

Amity University Haryana

HEI DVV modified input

Criterion 7.1.11: Number of initiatives taken to engage with and contribute to local community

‘Service LearningTeaching’ methods connect meaningful community service to academic curricula. Service learning blends community service goals and formal and informal (standard/academic and experiential/non-standard) educational goals in a manner that benefits participants and recipients. Service learning is a set of techniques and tools that can strengthen community relationships and connections. The community engagement around the university is the one of the major objective of Amity University Haryana. The department organizes the events and research, develop, plan, and initiate substantial, effective, locally-based programs geared toward making community members more self-sufficient, better informed, or more strongly empowered. All of this is valuable and important in terms of strengthening and developing service learning initiatives and programs. Amity University Haryana provides means and modes to complete the activities related to the engagement of the local people by organizing various programs such as Eye screening camps, Educating school children , Health promoting events etc.

The certified copy of circular/brochure/report of the initiatives taken to engage with and contribute to local community during the last five years is provided as per following revised input:

2018-19	2017-18	2016-17	2015-16	2014-15
1	2	6	10	16

7.1.11 Number of initiatives taken to engage with and contribute to local community during the last five years (Not addressed elsewhere) (5)

OUTCOME REPORT - "Life Saving Training"

Event Type: Workshop

Event Title: Life Saving Training

Details of Speaker/Resource Person: Brig Narayan Singh Malik, Director RLSSI and MsShrutiAdhav, Head Operations, RLSSI

Date: 26.06.2018

Venue: B Block Auditorium

Organized by: Amity Medical School in collaboration with Rashtriya Life Saving Society of India

Faculty Coordinator(s): Prof Dr.HarishSatia, Dr.PuneetaAjmera and SheetalYadav

Participation: 123

Highlights of the Event:

A day long, Life Saving Training Programme was conducted at AUH. The training programme covered several aspects of emergencies where swift actions can save lives.

1. Felicitation of the speakers by Deputy Vice Chancellor:

After the organizing team introduced the guests, Maj Gen B.S. Suhag formally welcomed the guests and felicitated the team with mementos and shawls. In his inaugural address, he dwelt upon the enormity of the problem of people losing their lives for lack of immediate life-saving assistance.

2. Session 1: Safety code, Concept of First Aid, Recovery and Revival etc

Brig. Malik discussed about First Aid – Recovery and Revival and its principles. Then, Ms ShrutiAdhav put some light on prioritization of safety, how to conduct initial assessment and its general rules.

Later, Brig Malik discussed about the basics of anatomy and physiology of Respiratory system, Skeletal system, circulatory system and nervous system.
The lecture was followed by a Tea Break.

3. Session 2: Cardiopulmonary Resuscitation (CPR) – Theory Demo and practice:

A detailed presentation on Cardio Pulmonary Resuscitation (CPR) including live demonstration of the technique evoked huge interest. The technique of CPR was thoroughly demonstrated by the team which evoked huge interest among audience. The participants performed CPR under the guidance of the trainers and were very enthusiastic to learn the techniques. Majority of the participants were doing it for the first time in their lives.

4. Session 3: Respiratory and circulatory system, choking, loss of consciousness, shock, bleeding (internal & external), drowning etc

After the lunch break, the team discussed the emergencies of Heart Attack, Choking (with a special focus on infants), Stroke, drowning, internal & external bleeding and shock. The presentation was designed in a manner that a common person could easily understand. Participants were also made to practice how to make and apply a pressure bandage to stop bleeding, how to deal with a patient of burns, road accidents, and other such emergencies.

5. Session 4: Head / Neck / Spinal injuries and other emergencies:

After a quick tea break, the team threw some light on fractures and dislocations. The various immobilization techniques for fractures and dislocations were also demonstrated and practiced by the participants. Participants also learnt how to lift a patient having fractures, including various types of Carriage for victims – one, two and three rescuer carriage. The team also highlighted the first aid management of Poisoning, Snake bites and Seizures.

6. First Aider's Oath

Presentations were followed by a questionnaire which was answered by the participants. And at the end of the sessions, all the participants took an oath to help those requiring emergency help.

7. Vote of thanks:

The program was concluded with Vote of thanks by Prof (Dr) HarishSatia, Head of the Dept. of Hospital Administration, Amity Medical School.

Outcome of the Event:

A total of 123 participants, inclusive of 68 faculty and 55 staff members attended.

It's been a very useful programme for the participants and it has been very well received. It helped people to understand various types of emergencies they may encounter in life and how to deal with those emergencies to save lives as well as to give necessary first aid till the time medical help gets available.

By attending the workshop, the participants would be able to:

- **recognize life-threatening situations & take appropriate actions.**
- **offer vital assistance** before any Paramedic/ambulance arrives
- provide single-person **CPR** on an adult, child and baby
- be a workplace **First Responde**

Outcome of the activity:

This community visit was organized on 13th February 2015 by department of Dietetics and Applied nutrition involving faculty Dr. Luxita Sharma and students of BDAN 2nd & 4th semester and MDAN 2nd semester. In the first visit students came back with the duly filled questionnaire and later brief analysis was done to understand malnutrition in the community. It was found that malnutrition was present among the children of the villagers. Despite they disclosed that they eat healthy and local food, even then prevalence of malnutrition was seen. The signs of malnutrition were very much prevalent as their head circumference was not in the required range. The height and weight was below the normal range. It was found that 80 percent of the children were suffering from under nutrition and underweight.

So students had an interaction with the mothers of the children and were advised about the health of their children. They were told that the growth of their children was not proper and they need to give proper diet and nourishment to their children. They were educated about the importance of nutrition at early age is important for proper growth and development. Total 51 patients were counseled by the students of Dietetics and Applied Nutrition in the second community visit. This community visit was fruitful for students as well as for the village people. As students got practical exposure and knowledge about working in a community while villagers got nutrition education which will help in reducing prevalence of malnutrition, hence a symbiotic relationship was established among students and community.

Outcome of the activity:

The activity was organized on 13th January 2015 by department of Dietetics and Applied nutrition involving faculties Dr. Luxita Sharma and Ms Richa Singh along with students of BDAN 4th semester and MDAN 2nd semester. The activity involved a community visit to Padha village, Haryana, to evaluate nutritional status of local school children. The students gave nutrition education and told about the healthy food options the local children need to include in their diet. At first students found out the problems persistent among the villagers in terms of their health and deficiency disorders. A standardized questionnaire made by students was filled by our students by asking face to face questions about their medical history, eating habits and the food options available to them. It was found that the villagers were eating food locally available and they were unaware about many food products available in the markets. Since this was initial stage and first camp, this made it challenging in finding the problem regarding the diseases persistent among them. The villagers were not very friendly and the information was not given properly as felt during the session, but students tried to build rapport and break the ice. Overall the session helped the students to understand the process of data collection in community. It also helped them to polish their communication skills.
