	<p>After a successful career in Academics for 12 years and Clinics for 18 years, I realized that something is genuinely missing in teaching and practice. There is a void, a gap between Homoeopathy and the scientific world. I found that homoeopathy being unique and effective, it faces criticism worldwide. The answer lies in the language, the language of current science. We need to speak to the scientific world in their language to make it understandable. The beauty of homoeopathy lies in its uniqueness which the scientist cannot appreciate as because there is the gap in language. I dedicate my career to bridge this gap.</p> <p>My current research work is based on breast cancer cell lines, where I am looking for the cyto-</p>

	toxicity and cyto-protective activity of homoeopathic medicines on cancer cells and normal cells respectively. I will also be looking at the regulation of certain genes and their expressions.
Registrations	<p>State registration, Council of Homoeopathic Medicine, West Bengal No. 24387 Dated: 19 June 2002</p> <p>Central registration, Central Council of Homoeopathy, New Delhi No. 4235 Dated: 4 July 2013</p>
