

“Women in Engineering: The Road Ahead for Women Technocrats”

Date: 23rd March 2023

Venue: F2 Auditorium

Overview:

Noted industry leaders from various companies like EIL, Barco, Nokia, and other renowned organizations were present at this session. The diverse panel shared valuable insights, experiences, and strategies to empower women in engineering, emphasizing the need for mentorship, skill development, and a supportive ecosystem to pave the way for the success of women technocrats in the field. Panelists shared experiences, insights, and strategies for enhancing gender diversity in engineering, highlighting the importance of mentorship, networking, and professional development opportunities. The event aimed to inspire and encourage women to pursue careers in engineering, advocating for equal representation and recognition in the field. Overall, it underscored the significance of creating a conducive ecosystem to propel the advancement of women technocrats in engineering.

Panelists for the session:

- Ms. Shalini Verma, Senior General Manager, EIL
- Ms. Namerita Khanna, Director of RF – CMOS SoC Development, NXP Semiconductors
- Ms. Swati Pandey, R&D Leader, Barco
- Ms. Taznoon Khajawal, Applied R&D Engineer, NOKIA
- Prof.(Dr.) Madhuri Kumari, Department of Civil Engineering, Amity University
