ALUMNI EDITION.

EDITORS'S DESK

TECHAHSI is the monthly magazine of the AMITY INSTITUTE OF INFORMATION TECHNOLOGY. It is everything about the AIIT, activities, events, guest lectures, everything involving and taking place in AIIT. Mid-way through editing and designing a pile of articles which we were nose deep in and with the thoughts of the zillion things that 'JUST HAD TO BE DONE'; we gave our best and fullest into it.

The TECHASHI Alumni Edition is a platform for all the AIITians to connect, communicate and converge with our alumni . It would be a crucial medium for all our alumni to stay connected with their Alma Mater. Our alumni community is playing a vital role in maintaining the values and ethics, keeping the light of the feeling of belongingness, love and affection with the all of us. In these strange and trying times we are looking up to our alumni for inspiration and leadership.

We take this opportunity to request the entire Alumni of Amity University to keep this feeling of belongingness and create a bond with this family, so as to help mentoring and hand holding for us, the juniors of this esteemed institution. We the student has felt the constant improvements in us, due to the mentoring and inspiration from you alumni. Keep sharing your experience, knowledge, love, and keep informing us about your accomplishments and milestones, as it would inspire the lives of all the students today who are destined to be the leaders of tomorrow.

With the second release of the series, we would like to thank all our alumni to give their valuable time and extend their hand to join with this felling of belongingness and complete the AIIT family. We would also like to thank and appreciate Dr. Ajay Rana, Director, AIIT and our Professor Dr. Alpana Kakkar, who took initiative to start Alum-Lecture-Series to bring Alumni back to Alma Mater and enlighten all the students of the institute. We thank all faculty members and students of AIIT for supporting the initiative.

Last but not least we would thank and appreciate the team Techashi and special regards to Dr. Alpana Kakkar, the mentor of the TECHASHI team who helped us creating this edition from design to content and add colors to it to take it to next level.

INSIDE

DR. AJAY RANA

DIRECTOR, AIIT

SENIOR VICE-PRESIDENT,
AMITY EDUCATION GROUP

Esteemed Readers

Every dark cloud has a silver lining! The reason I say this is because during this unprecedented times, when the lectures have been shifted to virtual platform, we got this unique opportunity to bring our alumni back to the campus. The alumni are the soul of an institute. And it would not be an understatement to say that an institute is recognized by how well placed their alumni are.

AIIT is committed to build a self-motivated and continuing relationship with its Alumni to facilitate greater collaboration and connection for mutual well-being and progress. It was a proud moment for us when we touched base with our alumni and invited them for "Alum Lecture Series". The response which we received from our alumni was overwhelming. The eagerness that they showed in connecting back with their Alma Mater and extending support to their juniors was very encouraging.

The response which I received made me a proud teacher too as I realized that as educators, mentors and guides, we had taught our students well. The response received from the alumni is also very motivating for our current students. I was part of each and every Lecture Series conducted by our Alumni and was highly impressed by their eloquence.

I would like to take this opportunity to congratulate my esteemed faculty members for imbibing such virtues in our students and for having a strong bond with them. I acknowledge and admire the efforts of each and every faculty member of AIIT for bringing together this Alum Lecture Series.

I am sure that this on-going series would continue even after this current phase and we would be glad to have our alumni on campus grounds, sharing their ideas and interacting with their juniors.

Wishing you the best of endeavours!

Sincerely!!!

Dr Ajay Rana

DR. ALPANA KAKKAR

PROFESSOR, AIIT

DY. DEAN STUDENTS WELFARE,
AMITY UNIVERSITY, UTTAR PRADESH

Hon'ble Founder President always say - "**Once an Amitian always an Amitian**", hence Communication should never stop even after graduates leave for their new professional world, instead, they should be kept informed so they can remain engaged and keep abreast on the progress of the university. Creating an engaged, supportive alumni network is imperative to an institution's success.

The feeling of **Belongingness,** is a composition of unerring positivity and compassion that has captivate to the students and Alumni of this great institution. The institution is the brand and its alumni are amongst its most potent assets and known to be the best brand ambassadors. Every year the institute under his tutelage has made great efforts to maintain its ties with the student body because beyond the image of an exemplary institution Amity is a family, and every member of this family is cultivated and nourished by its encompassing benevolence. **Hon'ble Chancellor Dr. Atul Chauhan** is very much connected to Alumni and he meets alumni in different countries he visit and cherish their belongingness with the alma-mater.

The aura created and the values gathered, when alumni came on board to interact with students about various spheres of life and profession sharing their time is momentous for Alma Mater. A que of Alumni lectures delivered for days, including interaction regarding the various technical and non- technical trends in the market, taught the students to utilize this time of pandemic and get something productive out of it. **Diksha Deo, Ayush Srivastava, Chirag Jindal, Akriti Singh, Akansha Mittal, Sonakshi Harjai**, experts who joined for second edition, I appreciate and thank these alumni who mentored their juniors and actively participated in the lecture series that won't only make students aware about academics but also encourages to take steps towards their success. My heartfelt thanks and blessings to alumni **Navita Gandhi Arora** and **Reenu Ranawat** for sharing with us their beautiful memories they have till date about the alma-mater and for sharing few clips of new life with their journey in corporate world.

Alumni can play a significant role in shaping the career of juniors by sharing their expertise and best practices in the field. I am extremely grateful for those of you who have and continue to do so. I invite all alumni to become more engaged by sharing your time, and expertise to nurture the immature but talented juniors at Amity.

With this invite to Alumni Mentors , I present to you the second edition of Techashi-Alum-Edition –II.
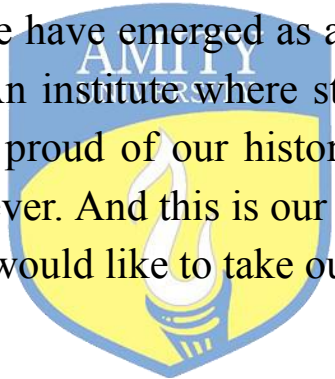

Stay Blessed , Stay Safe !

Prof. (DR.) Laxmi Ahuja

Deputy Director,

Amity Institute of Information & Technology

The key to success is to keep it simple and easy. Alumni can be as involved as they want to be, We all have traversed many a path, seen many ups & downs together, but finally we have emerged as an Institute to reckon with. An institute worth studying in. An institute where students vie with each other to gain admission. We are very proud of our history and would like to maintain this relationship with you forever. And this is our small gesture in that direction. We along-with your support would like to take our Institute to greater heights.

"Shiksha from Gurus like Dr. Ajay Rana, Dr. Alpana Kakkar and many members of the faculty is what I always cherish. Motivation, inspiration and strictness from the faculty is the right way to make an individual the next big thing in the universe."

MCA 2011-14, AIIT, Amity University Noida, India

Team Code: 4kt0ysk

Global Technology Leader & Covered by:

What lecture was all about ?

Indian Hardware will change the world. Era of Indian Electronics manufacturing.

⇒ Arduino & raspberry is not useful if learning to make core electronics. Even big electronics giants like Intel or INCUBSENCE will never hire someone if they just know Arduino & Raspberry.

⇒ It is important to learn that core knowledge for how to make PCB's & complete infra is important.

⇒ It is not at all difficult to set an infra as the next wave of the future is not software, it is hardware & connected applications. Standalone software & ecommerce will die soon.

⇒ Out of the box, I say "where is the box", hence, we should keep working on the unseen sides of the subject. We should always focus on end-to-end learning which enhances us & helps us to ask "why & how" a lot, finding the answers is the right way for learning.

⇒ Learning a language is good but learning what to learn & how to learn is the key for all. All languages are the same, it is the logic that we need to aple rest is all the same.

⇒ A bit of motivational discussion where, I personally suggest, students should listen to our esteemed faculties and explore more as suggested by them. In this field of rapid changing technology, it is very important to keep abreast with the pace.

⇒ If we want to make our career in any field related to connected devices or IoT, it is important to know that we should learn & should know multiple aspects like designs, moulds, api's, application, backend, embedded, security & connectivity etc. Only knowing a single language like "JAVA" will not & never help.

⇒ We also discussed the path of success, choosing anything doesn't matter, **what matters is to finish & to reach to the finish line**

Diksha's Corporate Mantra to Juniors—

Your Gurus always want the best for you. Hence, respect their toughness and take their anger as concern. Remember the best is yet to come.

Diksha's Corporate Achievements—

⇒ Diksha Deo is the Founder, CEO & Head of Software Engineering at INCUBSENCE and serves on its Board of Directors. She is a renowned technology and motivational speaker and has given 300+ talks and counting.

⇒ Diksha Deo is Exceptional Woman of Excellence 2019 felicitated by Women Economic Forum. Diksha is a Mentor of Change, Atal Innovation Mission, NITI Ayog to transform young students into Entrepreneurial Adults.

⇒ Diksha held several roles in many International and national organizations.

Testimonial—

"Diksha introduced herself to me in one of the mentoring sessions -" I am a meritorious student since the childhood ... & was challenged by a foreign borne organization to solve complex engineering problems at a very young age" . Then I taught her one subject MIS and in class, I found her way ahead in terms of intellect , maturity and management skills. She was always calm and quite, a patient listener who has gained all these strengths from a regular yoga and meditation routine in addition to her passion for classical dance, she mentioned. Diksha used to give programming language tuition to the school/college students while she was still studying for her Masters. She was always ready to extend her support and services for the growth of the Institution . First ICRITO site , AIIT Website etc were her initiatives with HOI, AIIT. As an Alumni mentor she took out time from her busy schedule to mentor the juniors . Today , Diksha is a successful entrepreneur, Founder and CEO of INCUBSENCE. With her " Made in India" Junoon , She is going to Push the Sky , and alma mater is very proud of Diksha. As a mentor, I wish her good luck in all her endeavors.

Belongingness Week @ AIIT

Agile Software Development Methodology :
Futuristic Approach

Ms. Akriti Singh
Business Analyst-New
Generation Corporation
AUUP MCA Batch (2011-14)
Faculty Coordinator : Mr. Shambhu kumar Jha

Date&Time: 27 May, 2020 IST 1:00 p.m. | Teams code: m3sqehs

What lecture was all about ?

Agile Software Development Methodology

The topic of the talk is **Agile Software Development Methodology: Futuristic Approach**. The purpose is to understand that of all the Software Development Methodologies, why Agile Software Development is the Future? It covers the principles of Agile Software Development , while answering questions like: How it shifts the organisational focus from tools and processes to interactions and individuals? What Agile does for the Teams? And why Agile, why now?

Akriti's Corporate Mantra to Juniors—

Be the best of yourself. Only your work performance will help you succeed. Also be confident with what you are suggesting and never shy away to admit if you are wrong, Try to understand the people with whom you have to deal on the daily basis, may be your team mates, managers, your clients. And top of all always deliver the quality work.

Testimonial—

"Ms. Akriti Singh is a multifaceted person with a zeal for professionalism, academic, cultural, and extra- curricular activities. She is quite ambitious, and career driven girl. I had many opportunities to observe her in close quarters. I was her instructor for the subject Relational Database Management System and Software Engineering. She takes up the responsibility of leading a team very well and completes work well within the stipulated time. She had involved herself in numerous organizations both in the campus and outside the campus during her three year stay."

THE FEEL OF BELONGINGNESS

I been thinking 'bout the college days

All my friends in the crib playing video games

We had the big screen TV, the pool outside

And we thought we had it all, not a worry on my mind

I was broke at the time, but my life was rich

Hella people surrounded me that I treated like kin

Everybody had each other so nobody fell within

And we talked about our problems from beginning to end

Every day was a blessing, every night was a party

But the time was running out when our senior year started

Everybody getting jobs, but in different locations

We didn't think about it, we were taking vacations

Damn, now I miss it more each day

I wish we could chill together, not a weekend away

I been looking back at pictures of the times that we had

I know life keeps moving, but I really wish that I could go back

I wish I could go back

Back to the college days

Me and my homies talking

I wish we could've stayed

Ms. Navita Arora

MCA (2004-07)

Each lyric is so apt in defining what the days were really like. I joined the MCA Course at AIIT in August of 2004. College is not college without friends. I remember I had made like 30 something friends in the first semester itself. HOW?? Amity has a great program in the form of MTC Military Training Camp. The University in the first year itself sends you to their Military college in Manesar to gain some discipline and comradeship and that's what you come back with (truthfully, for us it was less of discipline and more of comradeship). With these friends I started my college journey. Listening attentively to Databases and C++ lectures by faculties like Arun Sharma Sir and Ritu Punhani Ma'am, making sure everyone take their CCNA and UNIX lab sessions seriously were the hardworking faculties Tullika Mam and Alpana Ma'am, learning tips about business communication with Bhalla Ma'am, learning French / Japanese/ German (does any other college offer that? I don't think so !), cultural dance/drama practice with the ever so cool Laxmi Ma'am, lunch at cafeteria with my besties, Maggi at the street vendor outside the college gate just before leaving for home, girls night overs for group studying (gossip and movies most of the times ;)). I remember, early 4th semester, the campus placement had started happening which made sure we landed smoothly in the professional world but the sad part was that college was ending. It has been 13 years since we moved out of college. After college, we had our friends getting married, becoming parents, moving abroad, birthing their startups, hopping companies. Today also, during this COVID 19 time, we all are seeing and calling each other on ZOOM, playing Ludo and remembering the times we have spent together but I am sure deep down we all wish we could go back to college. I cannot thank Amity enough for giving me the lifetime memories, wings to fly and my husband, Saurabh to fly with.

Special mention (please forgive me if you are not in my list):-

- 'Beautiful girls' gang - Anshita, Divya, Pallavi, Shweta, Neha, Vanita, Chitra, Upasna and Priyanka

- 'Handsome boys' - Saurabh (now my husband), Jony (we miss you)

- 'Naughty ones' - Rahul, Nikhil, Nishant, Veer, Ruchin, Mayank and Anubhav

- 'Let us C/C++ boy' who almost gave his eye to Amity (literally, during a game) - Praveen

- 'Love doves' - Chinmay and Jyoti

- The Astrologer - Manpreet

The class CRUSH - Aditya Mukherjee

- And our Class Representative CR, Abhishek who has given us innumerable proxies ;))

I got a chance to showcase my managerial skills in the various events which we conducted in our department on various occasions like Amity Youth Fest. Apart from this, I also got to learn many important lessons of life from my time on campus, like the importance of responsibility.

Passing out of the university and stepping into the real world and real jobs, was certainly a big change and a moment of truth but Amity university prepared us well to face any challenge and overcome any adversity that lay in our path. There were a plethora of opportunities and experiences to be had. The knowledge and perseverance helped me get my first promotion at work in a year. My role at work draws on many facets of my academic work at Amity, my internship experiences, and the communication skills I honed through the leadership roles on campus.

After working in Noida, Bangalore and Chennai, I later moved to the Bay Area. Life in the US especially California is very different since you work with such a diverse group of people coming from different ethnicities, cultures and countries - The land and country built by immigrants like us. I currently work as a senior software developer and live in San Jose with my husband and a 2 year old son.

I'm certain that any of the alumni will rather prefer to have these wonderful years back, but life is about moving forward, and facing the world head on.

No matter where we are or what we pursuit there will always be a moving force within us that these experiences at our Alma mater have given us, promoting us to achieve, **"To strive, to seek, to find, and not to yield"** .

Renu Ranawat
MCA (2010-13)

Amity University life is truly one of a kind. I count doing masters at Amity as one of my accomplishments and most memorable years of my life. The years spent here helped me establish myself academically with help from the most amazing faculty, best-in-class infrastructure to prepare me for the corporate world and got me friends for life. I cherish countless beautiful memories - The celebrations in the hostel, lines in cafeterias, late night gossips with hostel buddies. My day scholar friends used to stay back for a few more hours to have fun with us, the swarm of tittle-tattle at H block, last minute preparation for presentations, and semesters. Abhinav(Tyagiji), Prerna(Sukhi), Neeraj (Auro), Atin, Ravi are some of the friends I miss and their silly nicknames we coined at (mostly) H-Block gossip sessions. We learned real-world coordination and organization working with the professors, on blood donation camps, the convocations,

the student exchange programs and other events. These activities groomed us in a way that helped us in developing our personality and the ability to fare effectively and efficiently in all spheres of life with

complete confidence. As for most of you, I too every year waited eagerly for the Annual fest. This time of the year was filled with the much awaited excitement, buzz and celebrations in our lives, along with an insight into other areas which were equally responsible for our overall growth and development. Amity provided us with the world's best faculty. Professor Dr Alpana Kakkar, she has always been my mentor. Thank you ma'am for having the integrity, strength, and courage to lead not only me but each and every students of yours, down the right path and showing us how we can be confident in our abilities. I really wanted to thank all the professors for their amazing lectures and feedback and thank you for being so supportive and for all that you do for your students!

-Reenu Ranawat

Life is an improvisation. You have no idea what's going to happen next, and you are just making the things up as you go

Ms. Sonakshi Harjai
MCA (2016-19)

Associate Engineer
Thales, India

The three years I spent in Amity was by far the best time of my life. I learnt a lot here, both academically and personally. Right from the start, Amity provided me with various opportunities to refine my skills and enhance my personality.

Working under the guidance of such experienced mentors and the excellent exposure that I got here, fueled the confidence in me. I feel proud that I am a part of this esteemed Amity family. I will always cherish the memories I share with this place.

- Sonakshi Harjai

What lecture was all about ?

Personality Development and Self Discovery

Sonakshi delivered the lecture on personality development and self-discovery. Session was all about the presentation skills, postures and expressions during placement. She carry forward the presentation with excellent examples. At the end she discussed her own experience during her batch placement and strategies at the time of placement

Sonakshi's Corporate Mantra to Juniors—

Taking responsibilities and completing them successfully, will make you feel good about yourself and boost your self-confidence. Think about the people that you admire the most and write down the list of qualities or characteristics that you like about them

Sonakshi's Corporate Achievements—

⇒ Vice President Public Relations of Thales Toastmaster's Club

⇒ Awarded for the best speaker at Club Level and Area Level Table Topics Contest (Toastmaster's International)

⇒ One of the selected participants for Thales Noida Hackathon 2019 on Machine Learning.

Testimonial—

"Sonakshi Harjai was a meritorious student . She had received the merit scholarship continuously for 2 years. Her hard work and determination had not only made her win gold medal in academics, but the Baljit Shastri Award as well. Initially she was very shy and introvert but from second year onwards she started participating in all co-curricular and extra - curricular activities. Today she is a star performer in her company
