**Mr. Vikash Raj**- Head Business Analytics & Process Engineering, IDFC Bank said that the summit is being organized at right time as the New Age Technology has to be understood fully to be successful in finance sector. He further added that artificial intelligence can be used in the financial planning. Mr Raj said that creating revenue from the use of artificial intelligence in the finance segment is the most important thing.

**Dr. Sharad Kohli**, Chairman, KCC Group briefed the students about how to manage money and giving example of mutual funds, he said that there are 457 mutual funds in market. On an average, an investor will invest in 7-8 mutual funds and all schemes have similar sounding names of equity. Now here comes the role of new age technology which will study the pattern of investment of investor and the advisor will offer the funds to investor accordingly.

Welcoming the august gathering **Prof. Bhawna Kumar**, Vice President, Ritnand Balved Education Foundation said that new age technologies like AI is changing the structure, function, skills levels to meet the growing demands of the volatile market and diversity of workforce. It is upto the person how he/she can adapt to the new technologies. The Finance Summit is focused on helping business partners and strategic Finance executives to increase both personal and organizational performance by redesigning and reinventing the structure, function, process with the help of technological development for sustainability and growth of the organization to become world class organization added Prof. Kumar.
