Theme of the Special Session

This special session on **Advance Technologies on Information Collection, Extraction and Transmission (ATICET)** aims to present the recent advancements happened in the field of information collection, knowledge extraction and secure transmission of information. Also, this special session aims to bring the recent algorithms, approaches and techniques to discuss and analyze the theoretical and practical challenges encountered and the solutions adopted.

Topics of Interest: We invite original (un-published) research contributions based on the above mentioned theme including following topics **but not limited to:**

- Data collection and storage
- Data preprocessing
- Data mining for knowledge extraction
- Regression model for predictive analytics
- Data privacy and safety applications
- Web technologies for information extraction
- Extraction of knowledge form multimedia
- Artificial intelligence on information extraction
- Machine learning for information extraction
- Soft computing for information processing
- Natural Language Processing for knowledge representation
- Cloud and knowledge computing
- Internet of Things for data publishing
- Secure transmission over various networks
- Broadcasting and routing protocols
- Future Challenges and other related topics

Important Dates

Receiving full paper	September 10, 2017
Email notification of paper acceptance	September 20, 2017
