

## Why My Class Rocks

### Visit IX-C And Feel The Difference

Come to IX C and enter the heavens  
With lots of Shahrukhs, Dhonis and Michael Beavans  
A few 'lucky' teachers find us sitting on chairs and tables  
And that too, as if, horses were sprawled in the stable  
We play; we study with spirits immense,  
Just visit IX C and feel the difference.

Suman Ma'am's bio period gives some of us a jump start  
While some of us plan our recess's diet chart  
She starts off with her daily doze of Debit and Credit  
She's our class teacher ,you know, 'The Big Boss'  
Well, having her is all profit without any loss  
Her smile and presence is necessary for our day to commence  
Just visit IX C and feel the difference.

Everyone prays for Bindiya Ma'am's mood  
Coz it can be dangerous if it is not good  
Many of us find mathematics as hot as boiling sun  
But learning it with her is real fun  
She cracks jokes and keeps us amused  
Meanwhile our bookworms seem to be confused  
She integrates our efforts and differentiates our weaknesses  
Rationalizes our behaviour and clears our distresses  
We all long for her lovely presence  
Just visit IX C and feel the difference.

Next comes Kusum Ma'am whose goodness needs no mention  
Coz with her arrival we forget all our tension  
She never loses her temper , she's as cool as Ice  
But always tries to teach us relation b/w demand and price

She can even prove that a bicycle is a car  
And then very sweetly say “Everything is fair in economics year”  
We study, we enjoy and the period is perfect in all sense  
Just visit IX C and feel the difference.

Then enters Lubna Ma’am  
Although many of us see English as dangerous allergy (not really)  
Her teaching is superb and to us she is like a buddy  
Now comes Deepika Ma’am to teach us chemistry  
For us, this period is meant for ease  
She plans well and her direction is magnificent  
All in all she is a perfect tutor for chemistry  
She often says, “When you people study you are the best  
But it’s all opposite if you are given some rest”  
Her smiles freshens us up and gives us pleasure  
And we discuss our problems without any pressure  
Whenever someone needs help, we give her reference  
Just visit IX C and feel the difference.

Thus , in her period , for a change we guys study (totally false)  
It is in her period discipline is at peak (not actually)  
Because none of us wishes for a red cheek  
She stresses on us to complete our syllabus  
So just visit IXC and feel the difference.

United we stand and divided we fall  
But with support of these five pillars (there are more also) we make a strong wall  
We are like a family as birds in a nest  
And I can undoubtedly say, my class is the best  
The very thought of separation after IXth , makes us tense  
I’m sure now, you too would say, IX C is a class with a difference
