

Pollution

*Pollution is spreading everywhere ,
With dirty water and poisonous air,
Dumping of hazardous chemicals'
Its affecting the life of humans and animals.*

*The adverse result of technology and toil,
Its tormenting nature and soil,
Smoke from cars and factories,
Are leading to fatal diseases.*

*Ice is melting in glaciers ,
Nobody has remained nature's savior,
Natural disasters are taking place,
With global temperature rising at a fatal pace,
Polythene causes permanent harm,
So use of jute bags should be our norm,
Preventing pollution should be our resolution,
Planting trees is the only solution.*
