**Overview of the FDP:**

Value based education has become an integral part of the National Education Policy 2020. Human Values and Ethics define the quality of a person or an organisation or society at large. Educational institutions play a critical role in building an ethical society. The fundamental character of children are formed in educational institutions. The Human Values and virtues orientation implemented and practised in Higher Educational Institutions (HEI) heavily influence the future generations. Through education and universities, the realization of meaning and purpose human values and ethics is enabled and its larger outcome is benefited by the stakeholders of the society. Value based education is likely to help the nation fight against all kinds of prevailing fanaticism, ill-will, violence, dishonesty, corruption, exploitation and drug abuse. Even the success of an Institution's Mission and vision is driven by value-based ethical behaviour of its committed faculty members, officers, staff and students. HEIs should thrive for imbibing core value and ethical behaviour into the daily interactions of stakeholder groups.

The Quality Mandates of University Grant Commission (UGC), reiterates the need and process to create high-quality practices and environment backed with human values and professional ethics in institutions of higher education and in its students enrolled in these Institutions.
