Subject: MDR - 48: Study of in-depth genetic heterogeneity with respect to resistome and compensatory adaption of MDR Mtb clinical strains inside BM- Mesenchymal stem cells circulating in the North East Region

Dear Investigators,

This is with reference to the project proposal entitled "Study of in-depth genetic heterogeneity with respect to resistome and compensatory adaption of MDR Mtb clinical strains inside BM- Mesenchymal stem cells circulating in the North East Region." submitted to DBT under "MDR-TB in North East India: A Genomic Driven Approach -2016-17." for financial support which was reviewed by an Expert Committee in a meeting held on dated 20th June, 2017.

In this regard, we would like to inform you the Expert Committee comments, as follows:

A. The Committee recommended that the following points are to be strictly followed by all the PIs of the participating institutes/ Centers in this program:

1. Non-NER labs should ensure that functional/operational R&D infrastructure is established/strengthened in all the NE states.
2. Quality assurance & homogenization of the experimental SOPs, especially for the sample collection and processing, should be evolved; the same SOPs should be followed by all the collaborating labs so that results from various labs may be compared.
3. Each project will also be evaluated for outcome in terms of Number of manpower trained, application of newer methods, and its contribution towards establishing clinically relevant cut-off points for DST for NER.
4. Review of the programs will be done regularly at least once in a year.
5. All clinical isolates collected by/ from the NE centers will be deemed to constitute a virtual repository of NER Mtb isolates. These isolates must be made available to other labs participating in this programme as per requirement of the programme and recommendation of the DBT Expert Committee "

B. Specific Recommendation on the proposal:
Recommended with the following suggestion:

- Committee notes PI has provided the information as made in the last meeting.
- They have dropped 2 objectives as suggested.
- Committee approved the objectives aimed at understanding of the genetic heterogeneity with respect to resistome and

compensatory adaption of MDR Mtb clinical strains inside BM-MSCs. (This is not synonymous with "serotype" which is not done in Mtb).

- Considering the design of the study, the mechanism for virulence and persistence may not be determined. Hence, it is suggested to focus on resistome and compensatory adaption of MDR Mtb clinical strains inside BM-MSCs.
- The selection of bacteria from North Kamrup & Arunachal Pradesh by Kavi Krishna NGO should be done in consultation with RNTCP and the result should be communicated to them.
- Budget may be restricted to Rupees 3 crore only, keeping in view strictly adherence to the 60 (NE):40 (non-NE) rules

In this regard, a revised project proposal incorporating the above committee's suggestion may be submitted. Additionally, you are also requested to submit the following:
you are requested to submit the following documents:

1. Proforma invoices (Quotations) for non-recurring items proposed for this project. The proforma invoice on receipt to be scanned and sent to us by email and the original by post.
 2. Furnish the details of ongoing and completed projects of DBT (Pis & Co-Pis) along with bank details (format attached)
 3. Duly signed Declaration form by all the investigators and the head of the Institutes.(new format attached)
- The soft copy of the documents may please be sent on mail address:
promanhrd.nerbpmc@dbt.nic.in <mailto:promanhrd.nerbpmc@dbt.nic.in> on or before 31st July, 2017, followed by original hard copies at our following office address.

Please acknowledge the receipt of the mail.
