One Day workshop on

“Mentor Mentee practices”

September, 10th 2015.

AUH/IQAC/WS-2/2015

INTRODUCTION

“Mentoring is a brain to pick, an ear to listen, and a push in the right direction.”
- John Crosby

Academic mentoring in our educational system can be of great advantage. Mentoring may help new students to adapt to a new academic environment faster and it is a significant aspect of student’s life. The relationship between the mentor and mentee gives the mentee a sense of being connected to the larger community where they may otherwise feel lost. Mentors are chosen because they are academically successful and because they possess good professional background. Mentors serve as positive role models for the students, guiding them towards academic and social success. Mentors provide support, advice, encouragement, and even friendship to students. Mentors also stand to benefit from the mentor/mentee relationship. Mentors develop friendships through their participation in mentoring programs and usually derive satisfaction from helping a younger student, and possibly shaping his or her life in a positive way in our educational system.

In order to establish a strong Mentor mentee relationship at AUH, IQAC organized one day workshop.

Objectives of the Workshop

General objective

The key objective of this workshop is to create awareness and train our IQAC representatives and other Amity staff members on Mentor mentee practices.

Participants

The workshop was planned for 15 participants including all IQAC representatives from Institutes/departments - Academic and Nonacademic at AUH. Dr Sunita Sharma (Dy Director IQAC) shared her valuable acquaintance in sessions.

Inaugural Session

Dr Sunita Sharma, welcomed the participants. She introduced the guests and spoke about the context of the workshop.

“ICT as a tool in teaching learning”

January, 17th 2016.

AUH/IQAC/WS-3/2016

INTRODUCTION

UNESCO defines the term ‘information and communication technologies (ICT) as: The system of various technologies, tools, and devices that are used to transmit, process, store, create, display, share or exchange information by electronic means various technologies such as computers and its peripherals, video, radio, television, compact disc (CD), DVD, telephone (mobile and fixed line), personal digital assistants (PDA), digital cameras, satellite systems, network hardware and software as well equipment and services associated with these technologies, such as videoconferencing, emails, web logs (blogs), social networks (such as Facebook, and Twitters), fall under this rather large umbrella term.

The adoption and use of ICTs in education have a positive impact on teaching, learning, and research. ICT can affect the delivery of education and enable wider access to the same. In addition, it will increase flexibility so that learners can access the education regardless of time and geographical barriers. It can influence the way students are taught and how they learn. It also provides a rich environment and motivation for teaching learning process which seems to have a profound impact on the process of learning in education by offering new possibilities for learners and teachers. These possibilities can have an impact on student performance and their achievement.

Similarly, wider availability of best practices and best course material in education, which can be shared by means of ICT, can foster better teaching and improved academic achievement of students.

ICT has the capability of bringing the world into the classrooms, providing access to quality teaching and learning materials to the areas not reachable by conventional means; and ultimately improve information literacy.

Two day workshop on

“Ranking and Certification Methodologies”

16th-17th May 2016

AUH/IQAC/WS-4/2017

INTRODUCTION

Ranking exercises with an aim to assess ourselves on the qualitative parameters used for ranking of institutions and move upward on the quality spectrum to improve our ranking in subsequent years.

Research assessment and national ranking of Indian educational institutions can play an important role in improving performance and quality of academic institutions.

Certification is the confirmation that an institution is following the Norms and Standards prescribed by the regulator in terms of quality assurance and improvement.

It is a kind of recognition which indicates that a program fulfills desired standards.

The purpose of the ranking and certification is to promote and recognize excellence in technical education in universities—at both the undergraduate and post graduate levels. They also benefit from the process of continuous quality improvement that is encouraged by the ranking agencies developmental approach to promote excellence in technical education. In order to obtain more understanding on Ranking & Certification at AUH, IQAC organized a two day workshop.
