Abstract:

ABSTRACT A SILICONE-BASED FUTURE FACE MASK AND WORKING METHOD THEREOF The present invention describes a silicone-based future face mask and working method thereof. The present invention, such as highly durable, it can withstand high temperature. It can be easily sterilized (dishwasher / microwave / autoclave). Pores on the mask are large enough to make it breathable preventing irritation so there's no constant touching of the face. The cushioned nose grip will prevent the formation of blood clot marks on the nose bridge. The silicone used is of medical grade approved by FDA/LFGB. Accompanied Drawing [Fig. 1] Dated this 17th day of August 2023
