

Amity University Haryana

AMIGREEN ENVIRONMENT CLUB

Our environment is under distress, and it is not a hidden fact anymore. The threat it is facing right now is alarming and it is our duty to save it before it gets too late. To tackle this crisis, everyone must come together to do their bit to save our environment. After all, it is because of our activities that our ecological balance has been disturbed. We must make sure that instead of over-exploiting the environment's resources, we come up with non-conventional yet effective alternatives promoting the concept of sustainable development.

Seeing the gravity of the situation, we the students of AUH have come up with the idea and initiative of an Ecological and Environment Conservation Society- 'AMIGREEN ENVIRONMENT Club', with the intention of promoting the concepts of sustainable lifestyle through subtle changes in our attitude and way of living and embracing our heritage in the process.

MAIN OBJECTIVES OF THE CLUB

- Emphasis on spreading awareness on ecological balance and its conservation.
- Enhance the ecological diversity and richness of the flora and fauna across the campus.
- Imbibe values of ancient cultural and socio-economical practices revolving around nature strengthening roots with our heritage.
- Relationship of ecology with the ever-growing field of science and technology and modern society.
- To make Amity University Haryana one of the most nature-friendly institutions in our country.
- To promote sustainability and emphasize the concept of 5Rs.

ACTIVITIES TO BE ORGANISED

- Nature conservation drives
- Sanitation drives
- Nature rallies
- Organizing talks with eminent environmentalists and conservationists
- Organizing photography events and competitions to promote wildlife diversity.
- Workshops to teach and explain the working of different ecosystems and inter-linking food webs across the ecosystem.

With your humble guidance and permission, we would like to officially inaugurate this small yet promising endeavor of ours that has the potential of making magnanimous changes for the betterment of the environment.

Approval of Clubs from Hon'ble Chancellor
