# Syllabus - Semester Fourth

## LIFE SPAN DEVELOPMENT

**Course Code: PSY2451**

**Credit Units: 3**

### **Course Objective:**

Developmental psychology, also known as human development, is the scientific study of systematic psychological changes, emotional changes, and perceptual changes that occur in human beings over the course of their life span. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire life span. Developmental psychology includes issues such as the extent to which development occurs through the gradual accumulation of knowledge versus stage-like development, or the extent to which children are born with innate mental structures versus learning through experience. The objective of this paper is:

1. To provide an understanding of Physical, cognitive, affective, moral, social and neural development during infancy, childhood, and adolescence.
2. To critically evaluate the role of heredity, maturation, and the environment in development.
3. To critically examine the relationship between scientific theories of development and the reality of development in everyday life.

### **Course Contents:**

#### **Module1: Introduction**

Meaning and Concept of Development: Life Span Perspective,  
Theoretical Perspective on Development,  
Factors influencing development

#### **Module 2: The Start to Life**

Conception and Prenatal Development: The Interaction of Heredity and Environment;  
Birth and newborn: Birth Complications, Competent Newborn.

#### **Module 3: Development in Infancy and Toddlerhood (birth to 2years)**

Physical Development  
Cognitive Development: Roots of Language  
Social and Personality Development

#### **Module 4: Development in Childhood**

##### **The Preschool years (3-6 Years)**

Physical Development;  
Cognitive Development: Language Development  
Social and Personality Development

##### **The Middle Childhood (6-12 Years)**

Physical Development  
Cognitive Development: Intellectual and Language development  
Social and Personality Development

#### **Module 5: Development in Adolescence and Young Adulthood**

##### **Adolescence (12-19 years)**

Physical Development

Cognitive development in Adolescence and School Performance

Social and Personality Development

**Young Adulthood (19-35 years)**

Physical Development: Physical Limitations and Challenges

Cognitive Development: Intelligence and Higher Education

Social and Personality Development: Forging Relationship and Choosing Career

**Module 6: Development in Middle and Late Adulthood**

**Middle Adulthood (35-55 years)**

Physical Development: Sexuality and Health

Cognitive Development: Memory and Remembering

Social and Personality Development: Cultural Dimensions

**Late Adulthood (55 years to death)**

Physical Development: Health and Wellness

Cognitive Development: Memory and Forgetting

Social and Personality Development: Successful Aging

Death, Dying and Bereavement

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

# Syllabus - Semester Fifth

## PSYCHOMETRIC TESTING

**Course Code: PSY2551**

**Credit Units: 3**

### **Course Objective:**

Psychological assessment is a process of testing that uses a combination of techniques to help arrive at some hypotheses about a person and their behavior, personality and capabilities. Psychological assessment is also referred to as psychological testing, or performing a psychological battery on a person. A psychological assessment is the attempt of a skilled professional, usually a psychologist, to use the techniques and tools of psychology to learn either general or specific facts about another person, either to inform others of how they function now, or to predict their behavior and functioning in the future. Psychologists are the only profession that is expertly trained to perform and interpret psychological tests. Below are the objectives of studying this particular paper of Psychology:

- To train the students in various psychological assessment techniques.
- To impart skills necessary for selecting and applying different tests for different purposes such as evaluation, training and rehabilitation.

### **Course Content:**

#### **Module-I: Introduction**

History of Psychological Testing

Meaning, Definition and Types of Psychological Testing

Ethical issues in Psychological Testing

#### **Module-II: Measurement**

Nature and significance of Measurement

Distinction between assessment and measurement

Levels of measurement

Techniques of Attitude Measurement

#### **Module-III: Construction of Test**

Steps of constructing a Psychological Test

Reliability: Meaning, types and factors affecting reliability

Validity: Meaning, types and factors affecting Validity

Characteristics of a good Psychological Test

#### **Module-IV: Assessment of General and Special Abilities**

Intelligence (DAP: IQ and Slosson Intelligence Test (SIT-3/R)

Creativity: Creativity Assessment Packet (CAP)

Achievement: Diagnostic Achievement Test for Adolescents (DATA-2)

#### **Module-V: Application of Testing**

Assessment in Educational and Occupational Set-up: Achievement Test

Assessment in Clinical Set-up and in Counselling

**Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>

## COUNSELLING PSYCHOLOGY

**Course Code: PSY2651**

**Credit Units: 3**

**Course Objective:**

The paper of Counselling Psychology covers its history, theories, activities, specialties and trends. It concentrates on the importance of the personhood of counselors and of the multicultural, ethical and legal environments in which counsellors operate. This paper focuses on the context and process of counselling to provide a range of high quality and responsive counseling skills and its applications to help oneself and others.

**Course Contents:**

**Module I: Introduction**

Meaning, Definitions and Goals of counselling  
Role of Counsellor in different Setting  
Characteristics of a good counsellor

**Module II: Counselling Process**

Building Counselling Relationship  
Working in a Counselling Relationship  
Termination of Counselling Relationship

**Module III: Counselling Approaches**

Insight-Oriented Counselling: Client-Centred  
Action-Oriented Counselling: Behavioural  
Testing, Assessment and Diagnosis in Counselling

**Module IV: Counselling Applications**

Child Counselling and Counselling in School  
Adolescent Counselling and Counselling in College  
Career Counselling: Theories of Career Development  
Group Counselling and Family Counselling  
Addiction Counselling

**Module V: Theories and Techniques of Counselling**

Psychodynamic Approaches  
Humanistic Approach  
Cognitive Approach  
Behavioural Approaches

**Module VI: Current Issues in Counselling**

Ethical and Legal Issues  
Mental Health Counselling  
Counselling in a Multicultural Society  
Counselling with Diverse Population

**Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>10</b>	<b>10</b>	<b>5</b>	<b>5</b>	<b>70</b>

## M. Phil in Clinical Psychology

### *Achieving Academic Excellence*

#### Curriculum & Scheme of Examination

2020

**AMITY UNIVERSITY HARYANA**

*Note: This is based on M.Phil (Clinical Psychology) Guidelines & Syllabus as given on the RCI website ([www.rehabcouncil.nic.in/writereaddata/mphilcp09.pdf](http://www.rehabcouncil.nic.in/writereaddata/mphilcp09.pdf))*

# 13109 M.PHIL IN CLINICAL PSYCHOLOGY

## AIM AND OBJECTIVES

### AIM

The aim of this course is to prepare the trainee to function as a qualified professional Clinical Psychologist in the areas of mental and physical health by offering Diagnostic, Therapeutic, Rehabilitative, Administrative services, and to work towards promoting the well-being and quality-of-life of individuals.

### OBJECTIVES

The course is developed as a rigorous two-year program with extensive theoretical inputs and widespread clinical experience to acquire the necessary skills in the area of Clinical Psychology. On completion of the course, the trainee is expected to perform the following functions:

- Diagnose mental health problems.
- Conceptualize specific adult and child mental health problems within a psychological framework, giving due consideration to psychosocial/ contextual factors, and carryout relevant treatment/management.
- Apply psychological principles and techniques in rehabilitating persons with mental health problems and disabilities.
- Work with the psychosocial dimensions of physical diseases, formulate and undertake focused/targeted psychosocial interventions.
- Work with community to promote health, quality-of-life and psycho-logical well-being.
- Undertake research in the areas of clinical psychology such as, mental health/illness, physical health/diseases and relevant societal issues viz. misconception, stigma, discrimination, social tension, gender construction, life style etc.
- Undertake responsibilities connected with teaching and training in core and allied areas of Clinical Psychology.
- Undertake administrative and supervisory/decision-making responsibilities in mental health area.
- Provide expert testimony in the court of law assuming different roles.

## REGULATIONS OF THE COURSE

### Entry requirement

Minimum educational requirement for admission to this course will be M.A./M.Sc. degree in Psychology from a university recognized by the UGC with a minimum of 55% marks in aggregate, preferably with special paper in Clinical Psychology. For SC/ST/OBC category, minimum of 50% marks in aggregate is essential, as per GOI.

### Admission Procedure

A selection committee that includes Head of the Department of Clinical Psychology shall make admission on the basis of an entrance examination, consisting of a written test, interview and practical. List of candidates so selected/admitted to the course should be sent to RCI within a month of admission formalities are completed. No changes shall be permitted once the list of admitted candidates for the academic year is sent to the council.

### Duration

This is a fulltime clinical training course providing opportunities for appropriate practicum and apprenticeship experiences for 2 academic years, divided as Part - I and II.

### Attendance

- Course of the study must, unless special exemption is obtained, continuously be pursued. Any interruption in a candidate's attendance during the course of study, due to illness or other extraordinary circumstances must be notified to the Head of the Institution/concerned authority and permission should be obtained. Under any circumstances the course must be completed within 4-yr from the date of enrollment.
- A minimum attendance of 80% (in the academic year) shall be necessary for taking the respective examination.
- Thirty days of causal leave, maximum of fifteen days per academic year, shall be permitted during the two-year course period.

## MINIMUM PRESCRIBED CLINICAL WORK DURING THE TWO YEAR OF TRAINING

	Number of Cases	
	Part – I	By the end of Part - II *
1) Detailed case histories	50	70
2) Clinical Interviews	40	60
3) Full length Psycho-diagnostics	40	50
4) Neuropsychological Assessment	5	10
5) Therapeutics		
i) Psychological Therapies		200 hr.
ii) Behavior Therapies		200 hr.

Therapies should be not less than 50 hr. of work in each of the following areas:

- a) Therapies with children
- b) Individual therapies with adults
- c) Family/marital/group/sex therapy
- d) Psychological and/or neuropsychological rehabilitation

A logbook of the clinical work carried out under the supervision during each year of training, with sufficient details such as particulars of the client, diagnosis, duration and nature of intervention(s), number of sessions held etc. should be maintained by all trainees and must be produced the same to the examiners at the time of Part - I and II practical examinations.

\* Includes the work done in Part - I

### Requirement/Submission

- Two months prior to Part - I examination the candidates are required to submit five full-length Psycho-diagnostic Reports as outlined above.
- Two months prior to Part - II examination the candidates are required to submit five Psychotherapy Records as outlined above.
- Three months prior to Part - II examination the candidates are required to submit, in triplicate, a research Dissertation under the guidance of a clinical psychology faculty members as specified above.
- The application for appearing either Part - I or Part - II examination should be accompanied by a certificate issued by Head of Department that the candidate has carried out the specified minimum clinical work, submission, dissertation (in case of Part - II only) and has attained the required competence in core-tests (refer section on “Practical - Psychological Assessments” for the list of core-tests and an addendum), as prescribed in the syllabus.

### Internal Assessment

In each paper 30% marks will be determined on the basis of written/clinical exams, viva-voce and supervised clinical work. These marks will be added to the marks allocated to the respective subjects in the yearly final examinations. The results of the final examinations will be declared on the basis of the total so obtained. The guidelines for allotting the internal marks may be prepared by the institution concerned.

## EXAMINATION

- The examination will be held in two parts (Part - I and Part - II). Part -I is held at the end of first year and Part – II is held at the end of second year. A candidate will not be allowed to take the Part – II examination unless he/she has passed the Part – I examination.
- A candidate who has not appeared or failed in Part – I of the regular examination may be allowed to continue the course for the II year and be allowed to take the supplementary Part – I examination.
- A minimum period of three months additional training shall be necessary before appearing for the examination in case he/she fails to clear Part – I and/ or Part – II examination.
- A candidate has to complete the course successfully within a period of four years from the year of admission to the course.

### Examination Fee

The prescribed examination fee as laid down from time to time by the concerned university to appear for Part – I and Part – II of the examination should be paid as per the regulations.

## SCHEME OF EXAMINATION

		<u>Part – I</u>	<u>(I Year)</u>	Marks	
Papers	Title	Duration	Final Examination (Maximum)	Internal Assessment (Maximum)	Total
<u>Group “A”</u>					
Paper I:	Psychosocial Foundations of Behavior and Psychopathology	3 hr.	70	30	100
Paper II:	Statistics and Research Methodology	3 hr.	70	30	100
Paper III:	Psychiatry	3 hr.	70	30	100
Practical:	Psychological Assessments and Viva Voce		70	30	100
<u>Group “B”</u>					
Submission of five cases of full-length Psychodiagnosics Report			None	100	100
					500

**Part – II**      **(II Year)**

Papers	Title	Duration	Marks		
			Final Examination (Maximum)	Internal Assessment (Maximum)	Total
<u>Group “A”</u>					
Paper I:	Psychotherapy and Counseling	3 hr.	70	30	100
Paper II:	Behavioral Medicine	3 hr.	70	30	100
Paper III:	Biological Foundations of Behavior	3 hr.	70	30	100
Practical:	Psychological Therapies & Viva Voce		140	60	200
<u>Group “B”</u>					
Submission of five fully worked-out Psychotherapy Records			None	100	100
<u>Group “C”</u>					
Dissertation			70	30	100
					700

**Board of Examination**

A board consisting of 4 examiners of which 2 shall be external will conduct the examination. Other examiners, external or internal appointed for this purpose, will assist the board. The Chairman of the board of examiners will be the Head of the Department of Clinical Psychology who will also be an internal examiner.

Two examiners, one internal and one external, shall evaluate each theory paper and dissertation. Two examiners, of whom one shall be external, will conduct the practical/clinical and vivo-voce examination.

**Minimum for Pass**

- A candidate shall be declared to have passed in either of the two parts of the M.Phil examination if he/she obtains not less than 50% of the marks in:
  - i) Each of the theory paper
  - ii) Each of the practical and viva-voce examinations
  - iii) Each of the submissions
  - iv) The dissertation (in case of Part – II only)
- A candidate who obtains 75% and above marks in the aggregate of both the parts shall be declared to have passed with distinction. A candidate who secures between 60% and below 75% of marks in the aggregate of both the parts shall be declared to have passed M.Phil degree in I Class. The other successful candidates as per the clause (a) of the above shall be declared to have passed M.Phil degree in II Class. If a candidate fails to pursue the course on a continuous basis, or fails or absent himself/ herself from appearing in any of the university theory and practical examinations of Part-I and II, the class shall not be awarded. The merit class (Distinction / First Class) is awarded to only those candidates who pass both Part – I and II examinations in first attempt.
- No candidate shall be permitted to appear either of Part – I or II examination more than three times.

**Appearance for each examination**

- A candidate shall appear for all the Groups of Part – I and Part – II examination when appearing for the first time.
- A candidate in Part – I and Part – II, failing in any of the “Group-A” subjects has to appear again in all the “Group-A” subjects.
- A candidate in Part – I, failing in “Group-B” has to resubmit five full-length Psychodiagnostic Records.
- A candidate in Part – II, failing in “Group-B” has to resubmit five fully worked- out Psychotherapeutic Records.
- A candidate in Part – II, failing in “Group-C”, has to reappear/resubmit the dissertation as asked for and/or outlined by the examiners.

**CURRICULUM  
&  
EXAMINATION SCHEME**

## Syllabus - First Year (Part-I)

### PAPER-I: PSYCHOSOCIAL FOUNDATION OF BEHAVIOR AND PSYCHOPATHOLOGY

**Course Code: PSY5101**

**Credit Units: 12**

**Aims:** The psychosocial perspectives attempt to understand human cognition, motives, perceptions and behavior as well as their aberrations as product of an interaction amongst societal, cultural, familial and religious factors. The overall aim is to introduce conceptualizations of mental health problems within the psychosocial framework, giving due considerations to contextual issues. Each Module in this paper pays attention to the different types of causal factors considered most influential in shaping both vulnerability to psychopathology and the form that pathology may take.

**Objectives:** By the end of Part-I, trainees are required to demonstrate ability to:

- Demonstrate a working knowledge of the theoretical application of the psychosocial model to various disorders.
- Make distinctions between universal and culture-specific disorders paying attention to the different types of sociocultural causal factors.
- Demonstrate an awareness of the range of mental health problems with which clients can present to services, as well as their psychosocial/contextual mediation.
- Carry out the clinical work up of clients with mental health problems and build psychosocial formulations and interventions, drawing on their knowledge of psychosocial models and their strengths and weaknesses.
- Apply and integrate alternative or complementary theoretical frameworks, for example, biological and/or religious perspectives, sociocultural beliefs and practices etc. in overall management of mental health problems.
- Describe, explain and apply current code of conduct and ethical principles that apply to clinical psychologists working in the area of mental health and illness.
- Describe Mental Health Acts and Policies, currently prevailing in the country and their implications in professional activities of clinical psychologists.

**Academic Format of Modules:** Learning would be mainly through clinical workup of clients presenting with range of mental health problems, and supplemented by lectures, seminars and tutorials, allowing trainees to participate in collaborative discussion.

**Evaluation: Theory** – involving long and short essays

**Course Contents: Part-A (Psychosocial Foundations of Behavior)**

#### **Module - I: Introduction**

Overview of the profession and practice; history and growth; professional role and functions; current issues and trends; areas of specialization; ethical and legal issues; code of conduct

#### **Module - II: Mental health and illness**

Mental health care – past and present; stigma and attitude towards mental illness; concept of mental health and illness; perspectives – psychodynamic, behavioral, cognitive, humanistic, existential and biological models of mental health/illness;

#### **Module - III: Epidemiology**

Studies in Indian context; tools available/standardized for epidemiological surveys; socio-cultural correlates of mental illness; religion and mental health; psychological well-being and quality of life - measures and factors influencing

**Module - IV: Self and relationships**

Self-concept, self-image, self-perception and self-regulations in mental health and illness; learned helplessness and attribution theories; social skill model; interpersonal and communication models of mental illness; stress diathesis model, resilience, coping and social support.

**Module - V: Family influences**

Early deprivation and trauma; neglect and abuse; attachment; separation; inadequate parenting styles; marital discord and divorce; maladaptive peer relationships; communication style; family burden; emotional adaptation; expressed emotions and relapse.

**Module - VI: Societal influences**

Discrimination in race, gender and ethnicity; social class and structure, poverty and unemployment; prejudice, social change and uncertainty; crime and delinquency; social tension & violence; urban stressors; torture & terrorism; culture shock; migration; religion & gender related issues with reference to India.

**Module - VII: Disability**

Definition and classification of disability; psychosocial models of disability; impact, needs and problems; issues related to assessment/certification of disability – areas and measures.

**Module - VIII: Rehabilitation**

Approaches to rehabilitation; interventions in the rehabilitation processes; models of adaptation to disability; family and caregivers issues; rights of mentally ill; empowerment issues; support to recovery.

**Module - IX: Policies and Acts**

Rehabilitation Policies and Acts; assistance, concessions, social benefits and support from government and voluntary organizations; contemporary challenges; rehabilitation ethics and professional code of conduct

**Course Contents: Part-B (Psychopathology)****Module - X: Introduction to psychopathology**

Definition; concepts of normality and abnormality; clinical criteria of abnormality; continuity (dimensional) versus discontinuity (categorical), and prototype models of psychopathology; classification and taxonomies – reliability and utility; classificatory systems, currently in use and their advantages and limitations.

**Module - XI: Signs and symptoms**

Disorders of consciousness, attention, motor behavior, orientation, experience of self, speech, thought, perception, emotion, and memory.

**Module - XII: Psychological theories**

Psychodynamic; behavioral; cognitive; humanistic; interpersonal; psychosocial; and other prominent theories/models of principal clinical disorders and problems, viz. anxiety, obsessive-compulsive, somatoform, dissociative, adjustment, sexual, substance use, personality, suicide, childhood adolescence, psychotic, mood disorders, and culture-specific disorders.

**Module - XIII: Indian thoughts**

Concept of mental health and illness; nosology and taxonomy of mental illness; social identity and stratification (Varnashrama Vyavastha); concept of – cognition, emotion, personality, motivation and their disorders

**Examination Scheme:**

	Internal Assessment (30 Marks)				Final Exam	Total Marks
Components	CT	H/P/V/Q	CT	A		
Weightage	10	5	10	5	70	100

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Term Exam

## PAPER-II: PSYCHIATRY

**Course Code: PSY5103**

**Credit Units: 12**

**Aim:** The aim is to train in conceptualization of psychopathology from different etiological perspectives, eliciting phenomenology and arrive at the clinical diagnosis following a classificatory system and propose/carry out psychological interventions including psychosocial treatment/management for the entire range of psychological disorders. Also, to train in assessing the caregivers' burden, disability and dysfunctions that are often associated with mental disorders and intervene as indicated in a given case.

**Objectives:** By the end of Part-I, trainees are required to demonstrate ability to:

- Demonstrate an understanding of a clinically significant behavioral and psychological syndrome, and differentiate between child and adult clinical features/presentation.
- Understand that in many ways the culture, societal and familial practices shape the clinical presentation of mental disorders, and understand the role of developmental factors in adult psychopathology.
- Carryout the clinical work up of clients presenting with the range of mental health problems and make clinical formulations/diagnosis drawing on their knowledge of a pertinent diagnostic criteria and phenomenology.
- Summarizes the psychosocial, biological and socio-cultural causal factors associated with mental health problems and neuropsychological disorders with an emphasis on bio-psychosocial and other systemic models.
- Carryout with full competence the psychological assessment, selecting and using a variety of instruments in both children and adults.
- Describe various intervention programs in terms of their efficacy and effectiveness with regard to short and longer term goals, and demonstrate beginning competence in carrying out the indicated interventions, monitor progress and outcome.
- Discuss various pharmacological agents that are used to treat common mental disorders and their mode of action.
- Demonstrate an understanding of caregiver, and family burden and their coping style.
- Assess the disability/dysfunctions that are associated with mental health problems, using appropriate measures.
- Discuss the medico-legal and ethical issues in patients requiring chronic care and institutionalization.

**Academic Format of Modules:** The learning would be primarily through clinical workups of cases having psychiatric disorders. A mixed lectures/seminar format, allowing trainees to participate in collaborative discussion, could be adapted in addition, for imparting theory components.

**Evaluation: Theory** – involving long and short essays, practical/clinical exam in psychological assessment of psychiatric cases and comprehensive viva.

### **Course Contents:**

#### **Module - I: Introduction**

Approach to clinical interviewing and diagnosis; case history; mental status examination; organization and presentation of psychiatric information; diagnostic formulation; classificatory system in use.

#### **Module - II: Psychoses**

Schizophrenia, affective disorders, delusional disorders and other forms of psychotic disorders – types, clinical features, etiology and management

#### **Module - III: Neurotic, stress-related and somatoform disorders**

Types, clinical features, etiology and management

#### **Module - IV: Disorders of personality and behavior**

Specific personality disorders; mental & behavioral disorders due to psychoactive substance use; habit and impulse disorders; sexual disorders and dysfunctions – types, clinical features, etiology and management.

**Module - V: Organic mental disorders**

Dementia, delirium and other related conditions with neuroalgebraic and systemic disorders – types, clinical features, etiology and management.

**Module-VI: Behavioral, emotional and developmental disorders of childhood and adolescence:** types, clinical features, etiology and management.

**Module - VII: Mental retardation**

Classification, etiology and management

**Module - VIII: Neurobiology of mental disorders**

Neurobiological theories of psychosis, mood disorders, suicide, anxiety disorders, substance use disorders and other emotional and behavioral syndromes.

**Module - IX: Therapeutic approaches**

Drugs, ECT, psychosurgery, psychotherapy, and behavior therapy, preventive and rehabilitative strategies – halfway home, sheltered workshop, daycare, and institutionalization.

**Module - X: Consultation-liaison psychiatry**

Psychiatric consultation in general hospital; primary care setting

**Module - XI: Special populations/Specialties**

Geriatric, terminally ill, HIV/AIDS, suicidal, abused, violent and non-cooperative patients; psychiatric services in community, and following disaster/calamity

**Module - XII: Mental health policies and legislation**

Mental Health Act of 1987, National Mental Health Program 1982, the Persons With Disabilities (equal opportunities, protection of rights and full participation) Act 1995; Rehabilitation Council of India (RCI) Act of 1993, National Trust for Mental Retardation, CP and Autistic Children 1999, Juvenile Justice Act of 1986; ethical and forensic issues in psychiatry practice.

**Examination Scheme:**

	Internal Assessment (30 Marks)				Final Exam	Total Marks
Components	CT	H/P/V/Q	CT	A		
Weightage	10	5	10	5	70	100

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Term Exam

## **PAPER-III: STATISTICS AND RESEARCH METHODOLOGY**

**Course Code: PSY5106**

**Credit Units: 12**

**Aim:** The aim of this paper is to elucidate various issues involved in conduct of a sound experiment/survey. With suitable examples from behavioral field, introduce the trainees to the menu of statistical tools available for their research, and to develop their understanding of the conceptual bases of these tools. Tutorial work will involve exposure to the features available in a large statistical package (SPSS) while at the same time reinforcing the concepts discussed in lectures.

**Objectives:** By the end of Part-II, trainees are required to demonstrate ability to:

- Understand the empirical meaning of parameters in statistical models
- Understand the scientific meaning of explaining variability
- Understand experimental design issues - control of unwanted variability, confounding and bias.
- Take account of relevant factors in deciding on appropriate methods and instruments to use in specific research projects.
- Understand the limitations and shortcomings of statistical models
- Apply relevant design/statistical concepts in their own particular research projects.
- Analyze data and interpret output in a scientifically meaningful way
- Generate hypothesis/hypotheses about behavior and prepare a research protocol outlining the methodology for an experiment/survey.
- Critically review the literature to appreciate the theoretical and methodological issues.

**Academic Format of Modules:** The course will be taught mainly in a mixed lecture/tutorial format, allowing trainees to participate in collaborative discussion. Demonstration and hands-on experience with SPSS program are desired activities.

**Evaluation: Theory** - involving long and short essays, and problem-solving exercises.

### **Course Contents:**

#### **Module - I: Introduction**

Various methods to ascertain knowledge, scientific method and its features; problems in measurement in behavioral sciences; levels of measurement of psychological variables - nominal, ordinal, interval and ratio scales; test construction - item analysis, concept and methods of establishing reliability, validity and norms.

#### **Module - II: Sampling**

Probability and non-probability; various methods of sampling - simple random, stratified, systematic, cluster and multistage sampling; sampling and non-sampling errors and methods of minimizing these errors

#### **Module - III: Concept of probability**

Probability distribution - normal, poisson, binomial; descriptive statistics - central tendency, dispersion, skewness and kurtosis

#### **Module - IV: Hypothesis testing**

Formulation and types; null hypothesis, alternate hypothesis, type I and type II errors, level of significance, power of the test, p-value. Concept of standard error and confidence interval

#### **Module - V: Tests of significance- Parametric tests**

Requirements, "t" test, normal z-test, and "F" test including post-hoc tests, one-way and two-way analysis of variance, analysis of covariance, repeated measures analysis of variance, simple linear correlation and regression.

#### **Module – VI: Tests of significance - Non-parametric tests**

Requirements, onesample tests – sign test, sign rank test, median test, Mc Nemer test; two-sample test – Mann Whitney U test, Wilcoxon rank sum test, Kolmogorov-Smirnov test, normal scores test, chi-square test; ksamle tests - Kruskal Wallies test, and Friedman test, Anderson darling test, Cramer-von Mises test.

#### **Module - VII: Experimental design**

Randomization, replication, completely randomized design, randomized block design, factorial design, crossover design, single subject design, non-experimental design.

#### **Module - VIII: Epidemiological studies**

Prospective and retrospective studies, case control and cohort studies, rates, sensitivity, specificity, predictive values, Kappa statistics, odds ratio, relative risk, population attributable risk, Mantel Haenzel test, prevalence, and incidence. Age specific, disease specific and adjusted rates, standardization of rates. Tests of association, 2 x 2 and row x column contingency tables

#### **Module - IX: Multivariate analysis**

Introduction, Multiple regression, logistic regression, factor analysis, cluster analysis, discriminant function analysis, path analysis, MANOVA, Canonical correlation, and Multidimensional scaling.

#### **Module - X: Sample size estimation**

Sample size determination for estimation of mean, estimation of proportion, comparing two means and comparing two proportions.

#### **Module - XI: Qualitative analysis of data**

Content analysis, qualitative methods of psychosocial research

#### **Module - XII: Use of computers**

Use of relevant statistical package in the field of behavioral science and their limitations

#### **Examination Scheme:**

	<b>Internal Assessment (30 Marks)</b>				<b>Final Exam</b>	<b>Total Marks</b>
<b>Components</b>	CT	H/P/V/Q	CT	A		
<b>Weightage</b>	10	5	10	5	70	100

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Term Exam

#### **Text & References:**

## **PAPER-IV: PRACTICAL: PSYCHOLOGICAL ASSESSMENT INCLUDING VIVA-VOCE**

**Course Code: PSY5104**

**Credit Units: 12**

**Aim:** To provide hands-on experience in acquiring the necessary skills and competency in selecting, administering, scoring and interpreting psychological tests often employed in clients with mental or neuropsychological disorders. Since psychological assessment involves integration of information from multiple sources, the trainees are required to be given extensive exposure in working up of cases and carrying out the assessment at all levels. Typical areas of focus for psychological assessment includes (not necessarily limited to): cognition, intelligence, personality, diagnostic, levels of adjustment, disability/functional capacity, neuropsychological functions, clinical ratings of symptomatology, variables that help/direct treatment, and assess treatment outcomes.

**Objectives:** By the end of Part-I, trainees are required to demonstrate ability to:

- Use relevant criteria to assess the quality and appropriateness of a psychological test and evaluate its strengths and weaknesses for clinical purposes.
- Able to carry out the clinical work-up and discuss the diagnostic possibilities based on the history and mental status examination of the clients with psychological/neuropsychological problems.
- Synthesize and integrate collateral information from multiple sources and discuss the rationale for psychological assessment as relevant to the areas being assessed.
- Select and justify the use of psychological tests and carry out the assessment as per the specified procedures in investigating the relevant domains.
- Interpret the findings in the backdrop of the clinical history and mental status findings and arrive at a diagnosis.
- Prepare the report of the findings as relevant to the clinical questions asked or hypothesis set up before the testing began, and integrate the findings in service activities.

**Academic Format of Modules:** Acquiring the required competency/skills would be primarily through clinical workups of cases having psychological/neuropsychological disorders and carrying out the indicated psychological assessments within the clinical context. Demonstration and tutorials shall be held for imparting practical/theory components of the psychological tests.

**Evaluation: Practical/clinical** – involve working up cases and carrying out the psychological assessment within clinical context and viva voce.

### **Course Contents:**

#### **Module - I: Introduction**

Case history; mental status examination; rationale of psychological assessment; behavioral observations, response recording, and syntheses of information from different sources; formats of report writing

#### **Module - II: Tests of cognitive functions**

Bender gestalt test; Wechsler memory scale; PGI memory scale; Wilcoxon cord sorting test, Bhatia's battery of performance tests of intelligence; Binet's test of intelligence (locally standardized); Raven's progressive matrices (all versions); Wechsler adult intelligence scale – Indian adaptation (WAPIS – Ramalingaswamy's), WAIS-R.

#### **Module - III: Tests for diagnostic clarification**

A) Rorschach psychodiagnostics, B) Tests for thought disorders – color form sorting test, object sorting test, proverbs test, C) Minnesota multiphasic personality inventory; multiphasic questionnaire, clinical analysis questionnaire, IPDE, D) screening instruments such as GHQ, hospital anxiety/depression scale etc. to detect psychopathology.

#### **Module - IV: Tests for adjustment and personality assessment**

A) Questionnaires and inventories – 16 personality factor questionnaire, NEO-5 personality inventory, temperament and character inventory, Eysenck's personality inventory, Eysenck's personality questionnaire, self-concept and self-esteem scales, Rottor's locus of control scale, Bell's adjustment inventory (students' and adults'), subjective wellbeing questionnaires, QOL , B) projective tests – sentence completion test, picture frustration test, draw-a-person test; TAT – Murray's and Uma Chowdhary's.

#### **Module - V: Rating scales**

Self-rated and observer-rated scales of different clinical conditions such as anxiety, depression, mania, OCD, phobia, panic disorder etc. (including Leyton's obsessional inventory, Y-BOCS, BDI, STAI, HADS, HARS, SANS, SAPS, PANSS, BPRS), issues related to clinical applications and recent developments.

#### **Module - VI: Psychological assessment of children**

A) Developmental psychopathology check list, CBCL, B) Administration, scoring and interpretation of tests of intelligence scale for children such as SFB, C-RPM, Malin's WISC, Binet's tests, and developmental schedules (Gesell's, Illingworth's and other) Vineland social maturity scale, AMD adaptation scale for mental retardation, BASIC-MR, developmental screening test (Bharatraj's), C) Tests of scholastic abilities, tests of attention, reading, writing, arithmetic, visuo-motor gestalt, and integration, D) Projective tests – Raven's controlled projection test, draw-a-person test, children's apperception test, E) Clinical rating scales such as for autism, ADHD etc.

#### **Module - VII: Tests for people with disabilities**

WAIS-R, WISC-R (for visual handicapped), blind learning aptitude test, and other interest and aptitude tests, Kauffman's assessment battery and such other tests/scales for physically handicapped individuals

#### **Module - VIII: Neuropsychological assessment**

LNNB, Halstead-Reitan battery, PGI-BBD, NIMHANS and other batteries of neuropsychological tests in current use

- Core Tests:**
1. Stanford Binet's test of intelligence (any vernacular version)
  2. Raven's test of intelligence (all forms)
  3. Bhatia's battery of intelligence tests
  4. Wechsler adult performance intelligence scale
  5. Malin's intelligence scale for children
  6. Gesell's developmental schedule
  7. Wechsler memory scale
  8. PGI memory scale
  9. 16 personality factor questionnaire
  10. NEO-5 personality inventory
  11. Temperament and character inventory
  12. Children personality questionnaire
  13. Clinical analysis questionnaire
  14. Multiphasic questionnaire
  15. Object sorting/classification test
  16. Sentence completion test
  17. Thematic apperception test
  18. Children' apperception test
  19. Rorschach psychodiagnostics
  20. Neuropsychological battery of tests (any standard version)

A certificate by the head of the department that the candidate has attained the required competence in all of the above tests shall be necessary for appearing in the university examinations of Part – I. However, if the center opts to test and certify the competency in neuropsychological tests as part of the requirements for appearing in the university examinations of Part - II (i.e. excluding it from Part - I), it could be done so. In such case, the Practical/Clinical examinations of Part – II shall include an examination in this area, in addition to examination in Psychological Therapies.

**Examination Scheme:**

	<b>Internal Exam (30)</b>			<b>Final Exam (70)</b>		<b>Total Marks</b>
<b>Components</b>	File demonstration	Case Conference, Seminar, Journal	A	End Term Exam	Viva	
<b>Weightage</b>	20	5	5	35	35	100

## **PAPER-V: SUBMISSION OF PSYCHODIAGNOSTIC RECORDS**

**Course Code: PSY5105**

**Credit Units: 12**

### **Course Contents:**

Five full-length Psycho-diagnostic Records: out of which one record each should be related to, child and neuropsychological assessment. The records should include a summary of the clinical history organized under relevant headings, and a discussion on

- a) rationale for testing,
- b) areas to be investigated,
- c) tests administered and their rationale,
- d) test findings and
- e) impression

### **Examination Scheme:**

<b>Components</b>	Submission of five cases of full-length Psycho-diagnostics Report
<b>Weightage (%)</b>	100

## Syllabus - Second Year (Part-II)

### PAPER-I: PSYCHOTHERAPY AND COUNSELLING

Course Code: PSY5301

Credit Units: 12

**Aim:** Impart knowledge and skills necessary to carry out psychological interventions in mental health problems with required competency. As a prelude to problem-based learning within a clinical context, the trainees are introduced to factors that lead to development of an effective working therapeutic alliance, pre-treatment assessment, setting therapy goals, evaluation of success of therapy in producing desired changes, and variables that affect the therapy processes. Further, the aim is to equip the trainees with various theories of clinical problems, and intervention techniques, and their advantages and limitations.

**Objectives:** By the end of Part-II, trainees are required to demonstrate ability to:

- Describe what factors are important in determining how well patients do in psychotherapy?
- Demonstrate an ability to provide a clear, coherent, and succinct account of patient's problems and to develop an appropriate treatment plan.
- Demonstrate a sense of working collaboratively on the problem and ability to foster an effective alliance.
- Demonstrate a working knowledge of theoretical application of various approaches of therapy to clinical conditions.
- Set realistic goals for intervention taking into consideration the social and contextual mediation.
- Carry out specialized assessments and interventions, drawing on their knowledge of pertinent outcome/evidence research.
- Use appropriate measures of quantifying changes and, apply and integrate alternative or complementary theoretical approach, depending on the intervention outcome.
- Demonstrate skills in presenting and communicating some aspects of current intervention work for assessment by other health professionals, give and receive constructive feedback.
- Demonstrate ability to link theory-practice and assimilate clinical, professional, academic and ethical knowledge in their role of a therapist.
- Present a critical analysis of intervention related research articles and propose their own methods/design of replicating such research.

**Academic Format of Modules:** Acquiring the required competency/skills would be primarily through clinical workups and carrying out of various treatment techniques, under supervision, within clinical context. The trainees are required to be involved in all clinical service activities – institutional or community based, of the center. Demonstration, clinical issue seminar, clinical seminar, clinical case conferences are required to be planned to impart the necessary knowledge and skills.

**Evaluation:** **Theory** - involving long and short essays, and practical/clinical - involving workup and assessment of clinical cases with viva voce.

#### Course Contents:

##### Module - I: Introduction to Psychotherapy

Definitions, objectives, issues related to training professional therapists; ethical and legal issues involved in therapy work; rights and responsibilities in psychotherapy; issues related to consent (assent in case of minors); planning and recording of therapy sessions; structuring and setting goals; pre- and postassessment; practice of evidence-based therapies.

##### Module - II: Therapeutic Relationship

Client and therapist characteristics; illness, technique and other factors influencing the relationship

### **Module - III: Interviewing**

Objectives of interview, interviewing techniques, types of interview, characteristics of structured and unstructured interview, interviewing skills (micro skills), open-ended questions, clarification, reflection, facilitation and confrontation, silences in interviews, verbal and non-verbal components

### **Module - IV: Affective psychotherapies**

Origin, basis, formulation, procedures, techniques, stages, process, outcome, indications, and research & current status with respect to psychodynamic, brief psychotherapy, humanistic, existential, gestalt, person-centered, Adlerian, transactional analysis, reality therapy, supportive, clinical hypnotherapy, play therapy, psychodrama, and oriental approaches such as yoga, meditation, shavasana, pranic healing, reiki, tai chi etc.

### **Module-V: Behavior therapies**

Origin, foundations, principles & methodologies, problems and criticisms, empirical status, behavioral assessment, formulations and treatment goals, Desensitization - (imaginal, in-vivo, enriched, assisted), Extinction - (graded exposure, flooding and response prevention, implosion, covert extinction, negative practice, stimulus satiation), Skill training - (assertiveness training, modeling, behavioral rehearsal), Operant procedures - (token economy, contingency management), Aversion - (faradic aversion therapy, covert sensitization, aversion relief procedure, anxiety relief procedure and avoidance conditioning), Self-control procedures - (thought stop, paradoxical intention, stimulus satiation), Biofeedback – (EMG, GSR, EEG, Temp., EKG), Behavioral counseling, Group behavioral approaches, Behavioral family/marital therapies.

### **Module - VI: Cognitive therapies**

Cognitive model, principles and assumptions, techniques, indications and current status of rational emotive behavior therapy, cognitive behavior therapy, cognitive analytic therapy, dialectical behavior therapy, problem-solving therapy, mindfulness based cognitive therapy, schema focused therapy, cognitive restructuring, and other principal models of cognitive therapies.

### **Module – VII: Systemic therapies**

Origin, theoretical models, formulation, procedures, techniques, stages, process, outcome, indications, and research & current status with respect to family therapy, marital therapy, group therapy, sex therapy, interpersonal therapy and other prominent therapies.

### **Module – VIII: Physiological therapies**

Origin, basis, formulation, procedures, techniques, stages, process, outcome, indications, and current status with respect to progressive muscular relaxation, autogenic training, biofeedback, eye-movement desensitization and reprocessing, and other forms of evidence-based therapies

### **Module – IX: Counseling**

Definition and goals, techniques, behavioral, cognitive and humanistic approaches, process, counseling theory and procedures to specific domains of counseling

### **Module - X: Therapy in special conditions**

Therapies and techniques in the management of deliberate self harm, bereavement, traumatic, victims of man-made or natural disasters, in crisis, personality disorders, chronic mental illness, substance use, HIV/AIDS, learning disabilities, mental retardation, and such other conditions where integrative/eclectic approach is the basis of clinical intervention.

### **Module - XI: Therapy with children**

Introduction to different approaches, psychoanalytic therapies (Ana Freud, Melanie Klein, Donald Winnicott); special techniques (behavioral and play) for developmental internalizing and externalizing disorders; therapy in special conditions such as psycho-physiological and chronic physical illness; parent and family counseling; therapy with adolescents

### **Module – XII: Psycho-education (therapeutic education)**

Information and emotional support for family members and caregivers, models of therapeutic education, family counseling for a collaborative effort towards recovery, relapse-prevention and successful rehabilitation with regard to various debilitating mental disorders.

### **Module – XIII: Psychosocial rehabilitation**

Rehabilitation services, resources, medical and psychosocial aspects of disability, assessment, group therapy, supportive therapy and other forms of empirically supported psychotherapies for core and peripheral members.

### **Module - XIV: Psychotherapy in the Indian Context**

Historical perspective in psychological healing practices from the Vedic period and the systems of Ayurveda and Yoga, contemporary perspectives; socio-cultural issues in the Indian context in practice of psychotherapy; ongoing research related to process and outcome.

### **Module - XV: Contemporary issues and research**

Issues related evidence-based practice, managed care, and research related to process and outcome.

### **Examination Scheme:**

	<b>Internal Assessment (30 Marks)</b>				<b>Final Exam</b>	<b>Total Marks</b>
<b>Components</b>	<b>CT</b>	<b>H/P/V/Q</b>	<b>CT</b>	<b>A</b>		
<b>Weightage</b>	10	5	10	5	70	100

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Term Exam

## **PAPER-II: BEHAVIOURAL MEDICINE**

**Course Code: PSY5302**

**Credit Units: 12**

**Aim:** Health psychology, as one of the subspecialties of applied psychology, has made a notable impact on almost the entire range of clinical medicine. The field deals with psychological theories and methods that contribute immensely to the understanding and appreciation of health behavior, psychosocial and cultural factors influencing the development, adjustment to, treatment, outcome and prevention of psychological components of medical problems. The aim of behavioral medicine is to elucidate the effects of stress on immune, endocrine, and neurotransmitter functions among others, psychological process involved in health choices individuals make and adherence to preventive regimens, the effectiveness of psychological interventions in altering unhealthy lifestyles and in directly reducing illness related to various systems. Further, to provide the required skills and competency to assess and intervene for psychological factors that may predispose an individual to physical illness and that maintain symptoms, in methods of mitigating the negative effects of stressful situations/events, and buffering personal resources.

**Objectives:** By the end of Part-II, trainees are required to demonstrate ability to:

- Appreciate the impact of psychological factors on developing and surviving a systemic illness.
- Understand the psychosocial impact of an illness and psychological interventions used in this context.
- Understand the psychosocial outcomes of disease, psychosocial interventions employed to alter the unfavorable outcomes.
- Understand the rationale of psychological interventions and their relative efficacy in chronic disease, and carry out the indicated interventions.
- Understand the importance of physician-patient relationships and communication in determining health outcomes.
- Understand of how basic principles of health psychology are applied in specific context of various health problems, and apply them with competence.
- Demonstrate the required sensitivity to issues of death and dying, breaking bad news, and end-of-life issues.
- Carry out specialized interventions during period of crisis, grief and bereavement.
- Understand, assimilate, apply and integrate newer evidence-based research findings in therapies, techniques and processes.
- Critically evaluate current health psychology/behavioral medicine research articles, and present improved design/methods of replicating such research.
- Demonstrate the sense responsibility while working collaboratively with another specialist and foster a working alliance.

**Academic Format of Modules:** Format would be essentially same as Paper – I on Therapies. The competency/skills are imparted through supervised workups, assessment and practical work of carrying out various treatment techniques within clinical context. Depending on availability of resources at the parent center, the trainees may be posted for extra-institutional learning. Demonstration, clinical issue seminar, clinical seminar, clinical case conferences are required to impart the necessary knowledge and skills. Evaluation: Theory - involving long and short essays, and practical/clinical - involving workup and assessment of clinical cases with viva voce.

**Course Contents:**

### **Module-I: Introduction**

Definition, boundary, psychological and behavioral influences on health and illness, neuroendocrine, neurotransmitter and neuroimmune responses to stress, negative affectivity, behavioral patterns, and

coping styles, psychophysiological models of disease, theoretical models of health behavior, scope and application of psychological principles in health, illness and health care.

#### **Module – II: Central nervous system**

Cognitive, personality, behavioral, emotional disturbances in major CNS diseases like cerebrovascular (stroke, vascular dementia etc.), developmental (cerebral palsy), degenerative (Parkinson's etc.), trauma (traumatic brain and spinal cord injury), convulsive (epilepsy), and infectious (AIDS dementia), assessment and methods for psychological intervention and rehabilitation with such patients.

#### **Module – III: Cardiovascular system**

Psychosocial, personality, lifestyle, and health practice issues, psychobehavioral responses including coping with illness and functional loss in hypertension, MI, following CABG and other cardiovascular conditions, salient issues with regard to quality-of-life and well-being, empirically proven methods of psychological management of CVS diseases.

#### **Module – IV: Respiratory system**

precipitants, such as emotional arousal, and other external stimuli, exacerbants such as anxiety and panic symptoms, effects, such as secondary gain, low self-esteem in asthma and other airway diseases, psychological, behavioral and biofeedback strategies as adjunct in the management.

#### **Module – V: Gastrointestinal system**

Evaluation of psychological factors including personality characteristics and stress/coping style in functional GI disorders such as irritable bowel syndrome, inflammatory bowel disease, peptic ulcer disease, esophageal disorder etc., role of psychotherapy, behavior modification, cognitive restructuring, biofeedback and relaxation training

#### **Module – VI: Genitourinary/renal/reproductive system**

Psychosocial issues in male/female sexual dysfunctions, micturition/voiding problems including primary / secondary enuresis, end-stage renal disease, dialysis treatment, primary and secondary infertility, empirically validated psychological and behavioral interventions in these conditions.

#### **Module – VII: Dermatology:**

Role of stress and anxiety in psychodermatological conditions such as psoriasis, chronic urticaria, dermatitis, alopecia and the impact of these on self-esteem, body image and mood, role of psychological interventions such as relaxation, stress management, counseling and biofeedback strategies.

#### **Module – VIII: Oncology**

Psychosocial issues associated with cancer - quality of life, denial, grief reaction to bodily changes, fear of treatment, side effects, abandonment, recurrence, resilience, assessment tools, and goals of interventions for individual and family, and therapy techniques.

#### **Module – IX: HIV/AIDS**

Model of HIV disease service program in India, pre- and post-test counseling, psychosocial issues and their resolutions during HIV progress, psychological assessment and interventions in infected adults and children, and family members/caregivers, highly active anti-retroviral treatments (HAART), neuropsychological findings at different stages of infection, issues related to prevention/spreading awareness and interventions in at risk populations.

#### **Module – X: Pain**

Physiological and psychological processes involved in pain experience and behavior, assessment tools for acute and chronic pain intensity, behavior, and dysfunctions/disability related to pain, psychological interventions such as cognitive, behavioral, biofeedback and hypnotic therapies.

#### **Module – XI: Terminally ill**

Medical, religious and spiritual definition of death and dying, psychology of dying and bereaved family, strategies of breaking bad news, bereavement and grief counseling, management of pain and other physical symptoms associated with end-of-life distress in patients with cancer, AIDS, and other terminal illness, professional issues related to working in hospice including working through one's own death anxiety, euthanasia – types, arguments for and against.

#### **Module – XII: Other general clinical conditions**

Application of psychological techniques and their rationale in the clinical care of patients in general medical settings where psychological services appears to affect the outcome of medical management positively, for example in diabetes, sleep disorders, obesity, dental anxiety, burns injury, pre- and postsurgery, preparing for amputation, evaluation of organ donors/recipient, pre- and post-transplantation, organ replacement, hemophiliacs, sensory impairment, rheumatic diseases, abnormal illness behavior, health anxiety etc.

#### **Module – XIII: Contemporary Issues**

Research and developments in health psychology, psychophysiology, psychoneuroimmunology, psychobiology, sociobiology and their implications, and effects of psychotherapy on the biology of brain

#### **Examination Scheme:**

	<b>Internal Assessment (30 Marks)</b>				<b>Final Exam</b>	<b>Total Marks</b>
<b>Components</b>	CT	H/P/V/Q	CT	A

## **PAPER-III: BIOLOGICAL FOUNDATION OF BEHAVIOR**

**Course Code: PSY5306**

**Credit Units: 12**

**Aim:** Brain disorders cause symptoms that look remarkably like other functional psychological disorders. Learning how brain is involved in the genesis of normal and abnormal behavioral/emotional manifestation would result in better clinical judgment, lesser diagnostic errors and increase sensitivity to consider and rule out a neuropsychological origin or biochemical mediation of the psychopathology. Also, current researches have indicated many pharmacological agents dramatically alter the severity and course of certain mental disorders, particularly the more severe disorders. Therefore, the aim of this paper is to provide important biological foundations of human behavior and various syndromes. The main focus is the nervous system and its command center – the brain.

**Objectives:** By the end of Part-I, trainees are required to demonstrate ability to:

- Describe the nature and basic functions of the nervous system.
- Explain what neurons are and how they process information.
- Identify the brain's levels and structures, and summarize the functions of its structures.
- Describe the biochemical aspects of brain and how genetics increase our understanding of behavior.
- State what endocrine system is and how it regulates internal environment and affects behavior.
- Discuss the principles of psychopharmacology and review the general role of neurotransmitters and neuromodulators in the brain.
- Describe the monoaminergic and cholinergic pathway in the brain and the drugs that affect these neurons.
- Describe the role of neurons that release amino acid neurotransmitters and the drugs that affect these neurons.
- Describe what kinds of clinical symptoms are often associated with lesions of frontal, parietal, temporal and occipital lobes of the brain.
- Describe what kinds of neuropsychological deficits are often associated with lesions of frontal, parietal, temporal and occipital lobes of the brain, and carry out the indicated neuropsychological assessment employing any valid battery of tests.
- Describe what kinds of neuropsychological deficits are often associated with subcortical lesions of the brain.
- List symptoms that are typical of focal and diffuse brain damage.
- Enumerate the characteristics of clinical syndrome and the nature of neuropsychological deficits seen in various cortical and sub-cortical dementias.
- Describe the neuropsychological profile of principal psychiatric syndromes.
- Demonstrate an understanding of functional neuro-imaging techniques and their application in psychological disorders and cognitive neuroscience.
- Demonstrate an understanding of the principles involved in neuropsychological assessment, its strengths and weaknesses, and its indications.
- Describe the nature of disability associated with head injury in the short and longer term, methods of remedial training and their strengths and weakness.

**Academic Format of Modules:** The learning would be primarily through clinical assessment of cases with brain lesions and disorders. Lectures, seminars and demonstrations by the experts in specific discipline, disease, topics such as by Anatomist, Biochemist, Physiologist, Psychiatrist, Neurologist and Neurosurgeons are required to impart knowledge and skills in certain domains. Depending on the resources available at the center these academic activity can be arranged.

**Evaluation: Theory**– involving long and short essays, practical/clinical exam in neuropsychological assessment with cases having a brain lesion/disorder and comprehensive viva.

## **Course Contents: Part-A (Anatomy, Physiology and Biochemistry of CNS)**

### **Module – I: Anatomy of the brain**

Major anatomical sub-divisions of the human brain; the surface anatomy and interior structures of cortical and subcortical regions; anatomical connectivity among the various regions; blood supply to brain and the CSF system; cytoarchitecture and modular organization in the brain.

### **Module – II: Structure and functions of cells**

Cells of the nervous system (neurons, supporting cells, blood-brain barrier); communication within a neuron (membrane potential, action potential); communication between neurons (neurotransmitters, neuromodulators and hormones).

### **Module – III: Biochemistry of the brain**

Biochemical and metabolic aspects of Brain; medical genetics; structure and function of chromosomes; molecular methods in genetics; genetic variation; population genetics; single-gene inheritance; cytogenetic abnormalities; multi-factorial inheritance; biochemistry of genetic diseases.

### **Module – IV: Neurobiology of sensory and motor systems**

Organization of sensory system in terms of receptors, relay neurons, thalamus and cortical processing of different sensations; principle motor mechanisms of the periphery (muscle spindle), thalamus, basal ganglia, brain stem, cerebellum and cerebral cortex.

### **Module – V: Regulation of internal environment**

Role of limbic, autonomic and the neuro-endocrine system in regulating the internal environment; reticular formation and other important neural substrates regulating the state of sleep/wakefulness

### **Module – VI: Neurobiology of behavior**

Neurobiological aspects of drives, motivation, hunger, thirst, sex, emotions, learning and memory;

**Module – VII:** Psychopharmacology: Principles of psycho pharmacology (pharmacokinetics, drug effectiveness, effect of repeated administration); sites of drug action (effects on production, storage, release, receptors, reuptake and destruction); neurotransmitters and neuromodulators (acetylcholine, monoamines, amino acids, peptides, lipids).

## **Course Contents: Part-B (Neuropsychology)**

### **Module - VIII: Introduction:**

Relationship between structure and function of the brain; the rise of neuropsychology as a distinct discipline, logic of cerebral organization; localization and lateralization of functions; approaches and methodologies of clinical and cognitive neuro-psychologists.

### **Module- IX: Frontal lobe syndrome**

Disturbances of regulatory functions; attentional processes; emotions; memory and intellectual activity; language and motor functions

### **Module-X: Temporal lobe syndrome**

Special senses – hearing, vestibular functions and integrative functions; disturbances in learning and memory functions; language, emotions, time perception and consciousness

### **Module – XI: Parietal and occipital lobe syndromes**

Disturbances in sensory functions and body schema perception; agnosias and apraxias; disturbances in visual space perception; color perception; writing and reading ability

**Module–XII: Neuropsychological profile of various neurological and psychiatric conditions:** Huntington’s disease, Parkinson’s disease, progressive supranuclear palsy, thalamic degenerative disease, multiple sclerosis, cortical and subcortical dementias, Alzheimer’s dementia, AIDS dementia complex etc., and principal psychiatric syndromes such as psychosis, mood disorders, suicide, anxiety disorders, and other emotional and behavioral syndromes.

**Module – XIII: Functional human brain mapping**

QEEG, EP & ERP, PET, SPECT, FMRI

**Module – XIV: Neuropsychological assessment**

Introduction, principles, relevance, scope and indications for neuropsychological assessment and issues involved in neuropsychological assessment of children.

**Module – XV: Neuropsychological rehabilitation**

Principles, objectives and methods of neuro-rehabilitation of traumatic brain injury and brain diseased; scope of computer-based retraining, neuro-feedback, cognitive aids etc.

**Examination Scheme:**

	<b>Internal Assessment (30 Marks)</b>				<b>Final Exam</b>	<b>Total Marks</b>
<b>Components</b>	CT	H/P/V/Q	CT	A		
<b>Weightage</b>	10	5	10	5	70	100

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Term Exam

## **PAPER-IV: PRACTICAL: PSYCHOLOGICAL THERAPIES INCLUDING VIVA-VOCE**

**Course Code: PSY5304**

**Credit Units: 12**

**Aim:** Acquire and practice theoretical understanding, attitude and skills necessary to apply various psychotherapeutic interventions to mental health problems and to also develop skills and competency to intervene in stress associated with medical problems among patients as well as their care givers.

### **Objectives:**

- Understanding the role of important client, counselor and context related factors in the psychotherapeutic process
- Systematic application of psychotherapeutic approaches in clinical conditions
- Carry out interventions considering relevant outcome research with ethical considerations
- Application and understanding of health psychology principles in various health conditions
- Working collaboratively with other health care professionals
- Appreciation of the role of social and cultural factors in intervention
- Learn strategies of raising and supporting mental health awareness

### **Core Topics for practical practice**

1. Presenting a clear and precise account of client's problems and Skill of collaborative working
2. Developing appropriate treatment plans
3. Formulating realistic goals for intervention taking into consideration the social and contextual mediation
4. Using appropriate measures of quantifying therapeutic changes
5. Conducting specialized interventions
6. Identifying/making use of factors that help patients get better with psychotherapy
7. Skills in presenting and communicating aspects of current intervention work for assessment by other health professionals
8. Ability to link theory with practice assimilating clinical, professional, academic and ethical knowledge in their role of a therapist
9. Presenting a critical analysis of intervention related research articles and developing methods of replicating such research
10. Understanding, assimilating and integrating newer evidence based research findings in therapies, techniques and processes
11. Understanding psychosocial impact of an illness and relevant psychological interventions
12. Understanding the rationale of psychological interventions and their relative efficacy in various disorders
13. Understanding the importance of counselor-patient relationships in determining therapy outcomes
14. Application of health psychology principles in specific health problems
15. Sensitive handling of issues related to death and dying, breaking bad news and end of life concerns
16. Ability to carry out specialized interventions during periods of crisis, grief and bereavement
17. Understanding training aspects of psychotherapy and ethical/legal issues involved in therapy
18. Ability to conduct a well rounded interview in clinical settings
19. Developing interviewing and counseling micro skills

20. Understanding and application of behavior therapy approaches- classical conditioning based procedures, operant procedures, self control procedures, Biofeedback- in individual, group, family and marital counseling
21. Application of rational emotive behavior therapy, cognitive behavior therapy, cognitive analytic therapy, dialectical behavior therapy, problem solving therapy, mindfulness based cognitive therapy and schema focused therapy
22. Understanding progressive muscular relaxation, autogenic training, biofeedback, eye-movement desensitization and reprocessing
23. Application of psychoanalytic therapies (Ana Freud, Melanie Klein, Donald Winnicott); special techniques (behavioral and play) for developmental, internalizing and externalizing disorders in children
24. Understanding and application of eclectic/integrative approaches for managing deliberate self harm, traumatic conditions, victims of disasters, chronic mental illnesses
25. Understanding of Yoga, meditation, Shavasana, Pranik Healing, Reiki, Tai Chi, etc.
26. Understanding of psycho-education for family members and care givers
27. Understanding psychosocial aspects of disabilities and extending various kinds of rehabilitation services
28. Understanding of stressors, resources and support systems specific to the Indian social context
29. Understanding of Indian psychological healing practices
30. Ability to review literature, appreciate theoretical/methodological issues involved, analyze data and interpret results in a scientifically meaningful ways

Note: A certificate by the head of the department that the candidate has attained the required competence in all of the above tests shall be necessary for appearing in the university examinations of Part-I & II.

#### Examination Scheme:

	Internal Exam (60)			Final Exam (140)		Total Marks
Components	File demonstration	Case Conference, Seminar, Journal Club	A	End Term Exam	Viva	
Weightage	45	10	5	70	70	200

## **PAPER-V: SUBMISSION OF PSYCHOTHERAPY RECORDS**

**Course Code: PSY5305**

**Credit Units: 12**

### **Course Contents:**

Five fully worked-out Psychotherapy Records, out of which one should be child therapy record. The records should include a summary of the clinical history organized under relevant headings, and a discussion on

- a) reasons for intervention(s),
- b) areas to be focused including short- and long-term objectives,
- c) type and technique of intervention employed and rationale
- d) therapy processes,
- e) changes in therapy or objectives, if any, and the reasons for the same,
- f) outcome,
- g) prevention strategies,
- h) future plans

### **Examination Scheme:**

<b>Components</b>	Submission of five fully worked-out Psychotherapy Records
<b>Weightage (%)</b>	100

## **PAPER-VI: DISSERTATION**

**Course Code: PSY5337**

**Credit Units: 10**

Under the guidance of a Clinical Psychology faculty member with Ph.D. or minimum 2-yr experience (post-qualification) in clinical teaching or clinical research. If the research work is of interdisciplinary nature requiring input/supervision from another specialist, co guide(s) from the related discipline may be appointed as deem necessary.

### **GUIDELINES FOR DISSERTATION**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

#### **Selecting the Dissertation Topic**

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of;
- information and to your own knowledge; of value and interest to you and your personal and professional development.

#### **Planning the Dissertation**

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation

- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

### **The Dissertation plan or outline**

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

### **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct quotation and what is your paraphrase.

**Dissertation format** All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**.
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required: Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

### **The Layout Guidelines for the Dissertation:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)

- Line spacing: 1.5 Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

Has the student made a clear statement of the objective or objective(s).

If there is more than one objective, do these constitute parts of a whole?

Has the student developed an appropriate analytical framework for addressing the problem at hand.

Is this based on up-to-date developments in the topic area?

Has the student collected information/data suitable to the frameworks?

Are the techniques employed by the student to analyse the data / information appropriate and relevant?

Has the student succeeded in drawing conclusion form the analysis?

Do the conclusions relate well to the objectives of the project?

Has the student been regular in his work?

Layout of the written report

#### **Assessment Scheme:**

**Continuous Evaluation:** 30%

(Based on Abstract, Regularity,  
Adherence to initial plan, Records etc.)

**Final Evaluation:** Based on, 70%

Contents & Layout of the Report, 25

Conceptual Framework, 15

Objectives & Methodology and 15

Implications & Conclusions 15

## Syllabus - First Semester

### HUMAN ANATOMY AND PHYSIOLOGY-I

Course Code : BP101T

Credit Units: 04

#### Course Objective :

This subject is designed to impart fundamental knowledge on the structure and functions of the various systems of the human body. It also helps in understanding both homeostatic mechanisms. The subject provides the basic knowledge required to understand the various disciplines of pharmacy.

#### Course Contents:

##### Module-I

**Introduction to human body:** Definition and scope of anatomy and physiology, levels of structural organization and body systems, basic life processes, homeostasis, basic anatomical terminology.

**Cellular level of organization:** Structure and functions of cell, transport across cell membrane, cell division, cell junctions. General principles of cell communication, intracellular signaling pathway activation by extracellular signal molecule, Forms of intracellular signaling: a) Contact-dependent b) Paracrine c) Synaptic d) Endocrine

**Tissue level of organization:** Classification of tissues, structure, location and functions of epithelial, muscular and nervous and connective tissues.

##### Module-II

**Integumentary System:** Structure and functions of skin

**Skeletal System:** Divisions of skeletal system, types of bone, salient features and functions of bones of axial and appendicular skeletal system. Organization of skeletal muscle, physiology of muscle contraction, neuromuscular junction

**Joints:** Structural and functional classification, types of joints movements and its articulation

##### Module-III

**Body fluids and blood:** Body fluids, composition and functions of blood, hemopoiesis, formation of hemoglobin, anemia, mechanisms of coagulation, blood grouping, Rh factors, transfusion, its significance and disorders of blood, Reticulo endothelial system.

**Lymphatic system:** Lymphatic organs and tissues, lymphatic vessels, lymph circulation and functions of lymphatic system

##### Module-IV

**Peripheral nervous system:** Classification of peripheral nervous system: Structure and functions of sympathetic and parasympathetic nervous system. Origin and functions of spinal and cranial nerves.

**Special senses:** Structure and functions of eye, ear, nose and tongue and their disorders.

##### Module-V

**Cardiovascular system:** Heart – anatomy of heart, blood circulation, blood vessels, structure and functions of artery, vein and capillaries, elements of conduction system of heart and heart beat, its regulation by autonomic nervous system, cardiac output, cardiac cycle. Regulation of blood pressure, pulse, electrocardiogram and disorders of heart.

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

# PHARMACEUTICAL ANALYSIS

Course Code : BP102T

Credit Units: 04

**Course Objective :** This course deals with the fundamentals of analytical chemistry and principles of electrochemical analysis of drugs. Upon completion of the course student shall be able to understand the principles of volumetric and electro chemical analysis, carryout various volumetric and electrochemical titrations & develop analytical skills.

**Course Contents :**

## Module-I

**(a) Pharmaceutical analysis-** Definition and scope

i) Different techniques of analysis

ii) Methods of expressing concentration

iii) Primary and secondary standards.

iv) Preparation and standardization of various molar and normal solutions-

Oxalic acid, sodium hydroxide, hydrochloric acid, sodium thiosulphate, sulphuric acid, potassium permanganate and ceric ammonium sulphate

**(b) Errors:** Sources of errors, types of errors, methods of minimizing errors, accuracy, precision and significant figures

**(c) Pharmacopoeia,** Sources of impurities in medicinal agents, limit tests.

## Module-II

**Acid base titration:** Theories of acid base indicators, classification of acid base titrations and theory involved in titrations of strong, weak, and very weak acids and bases, neutralization curves

**Non aqueous titration:** Solvents, acidimetry and alkalimetry titration and estimation of Sodium benzoate and Ephedrine HCl

## Module-III

**Precipitation titrations:** Mohr's method, Volhard's, Modified Volhard's, Fajans method, estimation of sodium chloride.

**Complexometric titration:** Classification, metal ion indicators, masking and demasking reagents, estimation of Magnesium sulphate, and calcium gluconate.

**Gravimetry:** Principle and steps involved in gravimetric analysis. Purity of the precipitate: co-precipitation and post precipitation, Estimation of barium sulphate.

Basic Principles, methods and application of diazotisation titration.

## Module-IV

### Redox titrations

(a) Concepts of oxidation and reduction

(b) Types of redox titrations (Principles and applications)

Cerimetry, Iodimetry, Iodometry, Bromatometry, Dichrometry, Titration with potassium iodate

## Module-V

### Electrochemical methods of analysis

**Conductometry:** Introduction, Conductivity cell, Conductometric titrations, applications.

**Potentiometry -** Electrochemical cell, construction and working of reference (Standard hydrogen, silver chloride electrode and calomel electrode) and indicator electrodes (metal electrodes and glass electrode), methods to determine end point of potentiometric titration and applications.

**Polarography:** Principle, Ilkovic equation, construction and working of dropping mercury electrode and rotating platinum electrode, applications

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACEUTICS-I

Course Code : BP103T

Credit Units: 04

## Course Objectives:

This course is designed to impart a fundamental knowledge on the preparatory pharmacy with arts and science of preparing the different conventional dosage forms.

## Course Contents:

### Module-I

**Historical background and development of profession of pharmacy:** History of profession of Pharmacy in India in relation to pharmacy education, industry and organization, Pharmacy as a career, Pharmacopoeias: Introduction to IP, BP, USP and Extra Pharmacopoeia.

**Dosage forms:** Introduction to dosage forms, classification and definitions

**Prescription:** Definition, Parts of prescription, handling of Prescription and Errors in prescription.

**Posology:** Definition, Factors affecting posology. Pediatric dose calculations based on age, body weight and body surface area.

### Module-II

**Pharmaceutical calculations:** Weights and measures – Imperial & Metric system, Calculations involving percentage solutions, alligation, proof spirit and isotonic solutions based on freezing point and molecular weight.

**Powders:** Definition, classification, advantages and disadvantages, Simple & compound powders – official preparations, dusting powders, effervescent, efflorescent and hygroscopic powders, eutectic mixtures. Geometric dilutions.

**Liquid dosage forms:** Advantages and disadvantages of liquid dosage forms. Excipients used in formulation of liquid dosage forms. Solubility enhancement techniques

### Module-III

**Monophasic liquids:** Definitions and preparations of Gargles, Mouthwashes, Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments and Lotions.

#### Biphasic liquids:

**Suspensions:** Definition, advantages and disadvantages, classifications, Preparation of suspensions; Flocculated and Deflocculated suspension & stability problems and methods to overcome.

**Emulsions:** Definition, classification, emulsifying agent, test for the identification of type of Emulsion, Methods of preparation & stability problems and methods to overcome.

### Module-IV

**Suppositories:** Definition, types, advantages and disadvantages, types of bases, methods of preparations. Displacement value & its calculations, evaluation of suppositories.

**Pharmaceutical incompatibilities:** Definition, classification, physical, chemical and therapeutic incompatibilities with examples.

### Module-V

**Semisolid dosage forms:** Definitions, classification, mechanisms and factors influencing dermal penetration of drugs. Preparation of ointments, pastes, creams and gels. Excipients used in semi solid dosage forms. Evaluation of semi solid dosages forms

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACEUTICAL INORGANIC CHEMISTRY

Course Code : BP104T

Credit Units: 04

## Course Objectives:

This subject deals with the monographs of inorganic drugs and pharmaceuticals.

Upon completion of course student shall be able to know the sources of impurities and methods to determine the impurities in inorganic drugs and pharmaceuticals & understand the medicinal and pharmaceutical importance of inorganic compounds

## Course Content:

### Module-I

**Impurities in pharmaceutical substances:** History of Pharmacopoeia, Sources and types of impurities, principle involved in the limit test for Chloride, Sulphate, Iron, Arsenic, Lead and Heavy metals, modified limit test for Chloride and Sulphate

**General methods of preparation,** assay for the compounds superscripted with **asterisk (\*)**, properties and medicinal uses of inorganic compounds belonging to the following classes

### Module-II

**Acids, Bases and Buffers:** Buffer equations and buffer capacity in general, buffers in pharmaceutical systems, preparation, stability, buffered isotonic solutions, measurements of tonicity, calculations and methods of adjusting isotonicity.

**Major extra and intracellular electrolytes:** Functions of major physiological ions, Electrolytes used in the replacement therapy: Sodium chloride\*, Potassium chloride, Calcium gluconate\* and Oral Rehydration Salt (ORS), Physiological acid base balance.

**Dental products:** Dentifrices, role of fluoride in the treatment of dental caries, Desensitizing agents, Calcium carbonate, Sodium fluoride, and Zinc eugenol cement.

### Module-III

#### Gastrointestinal agents

**Acidifiers:** Ammonium chloride\* and Dil. HCl

**Antacid:** Ideal properties of antacids, combinations of antacids, Sodium 40 Bicarbonate\*, Aluminum hydroxide gel, Magnesium hydroxide mixture

**Cathartics:** Magnesium sulphate, Sodium orthophosphate, Kaolin and Bentonite

**Antimicrobials:** Mechanism, classification, Potassium permanganate, Boric acid, Hydrogen peroxide\*, Chlorinated lime\*, Iodine and its preparations

### Module-IV

#### Miscellaneous compounds

**Expectorants:** Potassium iodide, Ammonium chloride\*.

**Emetics:** Copper sulphate\*, Sodium potassium tartarate

**Haematinics:** Ferrous sulphate\*, Ferrous gluconate

**Poison and Antidote:** Sodium thiosulphate\*, Activated charcoal, Sodium nitrite<sup>333</sup>

**Astringents:** Zinc Sulphate, Potash Alum

### Module-V

**Radiopharmaceuticals:** Radio activity, Measurement of radioactivity, Properties of  $\alpha$ ,  $\beta$ ,  $\gamma$  radiations, Half life, radio isotopes and study of radio isotopes - Sodium iodide I131, Storage conditions, precautions & pharmaceutical application of radioactive substances.

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest Editions)**

- A.H. Beckett & J.B. Stenlake's, Practical Pharmaceutical Chemistry Vol I & II, Stahlone Press of University of London, 4th edition.
- A.I. Vogel, Text Book of Quantitative Inorganic analysis
- P. Gundu Rao, Inorganic Pharmaceutical Chemistry, 3rd Edition
- M.L Schroff, Inorganic Pharmaceutical Chemistry
- Bentley and Driver's Textbook of Pharmaceutical Chemistry
- Anand & Chatwal, Inorganic Pharmaceutical Chemistry
- Indian Pharmacopoeia

# COMMUNICATION SKILLS

Course Code : BP105T

Credit Units: 02

## Course Objectives:

This course will prepare the young pharmacy student to interact effectively with doctors, nurses, dentists, physiotherapists and other health workers. At the end of this course the student will get the soft skills set to work cohesively with the team as a team player and will add value to the pharmaceutical business.

## Course Contents:

### Module-I

**Communication Skills:** Introduction, Definition, The Importance of Communication, The Communication Process – Source, Message, Encoding, Channel, Decoding, Receiver, Feedback, Context

**Barriers to communication:** Physiological Barriers, Physical Barriers, Cultural Barriers, Language Barriers, Gender Barriers, Interpersonal Barriers, Psychological Barriers, Emotional barriers

**Perspectives in Communication:** Introduction, Visual Perception, Language, Other factors affecting our perspective - Past Experiences, Prejudices, Feelings, Environment

### Module-II

**Elements of Communication:** Introduction, Face to Face Communication - Tone of Voice, Body Language (Non-verbal communication), Verbal Communication, Physical Communication

**Communication Styles:** Introduction, The Communication Styles Matrix with example for each -Direct Communication Style, Spirited Communication Style, Systematic Communication Style, Considerate Communication Style

### Module-III

**Basic Listening Skills:** Introduction, Self-Awareness, Active Listening, Becoming an Active Listener, Listening in Difficult Situations

**Effective Written Communication:** Introduction, When and When Not to Use Written Communication - Complexity of the Topic, Amount of Discussion' Required, Shades of Meaning, Formal Communication

**Writing Effectively:** Subject Lines, Put the Main Point First, Know Your Audience, Organization of the Message

### Module-IV

**Interview Skills:** Purpose of an interview, Do's and Dont's of an interview

**Giving Presentations:** Dealing with Fears, Planning your Presentation, Structuring Your Presentation, Delivering Your Presentation, Techniques of Delivery

### Module-V

**Group Discussion:** Introduction, Communication skills in group discussion, Do's and Dont's of group discussion

## Examination Scheme:

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	10	2	1	2	35

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance

EE: End Semester Examination

# REMEDIAL BIOLOGY

**Course Code : BP106RBT**

**Credit Units: 02**

## **Course Objectives:**

To learn and understand the components of living world, structure and functional system of plant and animal kingdom.

## **Course Contents:**

### **Module-I**

**Living world:** Definition and characters of living organisms. Diversity in the living world. Binomial nomenclature. Five kingdoms of life and basis of classification. Salient features of Monera, Protista, Fungi, Animalia and Plantae, Virus,

**Morphology of Flowering plants:** Morphology of different parts of flowering plants – Root, stem, inflorescence, flower, leaf, fruit, seed. General Anatomy of Root, stem, leaf of monocotyledons & Dicotyledones.

### **Module-II**

#### **Body fluids and circulation**

Composition of blood, blood groups, coagulation of blood

Composition and functions of lymph

Human circulatory system

Structure of human heart and blood vessels

Cardiac cycle, cardiac output and ECG

#### **Digestion and Absorption**

Human alimentary canal and digestive glands

Role of digestive enzymes

Digestion, absorption and assimilation of digested food

#### **Breathing and respiration**

Human respiratory system

Mechanism of breathing and its regulation

Exchange of gases, transport of gases and regulation of respiration

Respiratory volumes

### **Module-III**

#### **Excretory products and their elimination**

Modes of excretion

Human excretory system- structure and function

Urine formation

Renin angiotensin system

#### **Neural control and coordination**

Definition and classification of nervous system

Structure of a neuron

Generation and conduction of nerve impulse

Structure of brain and spinal cord

Functions of cerebrum, cerebellum, hypothalamus and medulla oblongata

#### **Chemical coordination and regulation**

Endocrine glands and their secretions

Functions of hormones secreted by endocrine glands

### Human reproduction

Parts of female reproductive system

Parts of male reproductive system

Spermatogenesis and Oogenesis

Menstrual cycle

### Module-IV

**Plants and mineral nutrition:** Essential mineral, macro and micronutrients Nitrogen metabolism, Nitrogen cycle, biological nitrogen fixation

**Photosynthesis:** Autotrophic nutrition, photosynthesis, Photosynthetic pigments, Factors affecting photosynthesis.

### Module-V

**Plant respiration:** Respiration, glycolysis, fermentation (anaerobic).

**Plant growth and development:** Phases and rate of plant growth, Condition of growth, Introduction to plant growth regulators

**Cell - The Module of life:** Structure and functions of cell and cell organelles. Cell division

**Tissues:** Definition, types of tissues, location and functions.

### Examination Scheme:

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	10	2	1	2	35

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance

EE: End Semester Examination

### Text Books

- Text book of Biology by S. B. Gokhale
- A Text book of Biology by Dr. Thulajappa and Dr. Seetaram.

### Reference Books

- A Text book of Biology by B.V. Sreenivasa Naidu
- A Text book of Biology by Naidu and Murthy
- Botany for Degree students By A.C.Dutta.
- Outlines of Zoology by M. Ekambaranatha ayyer and T. N. Ananthakrishnan.
- A manual for pharmaceutical biology practical by S.B. Gokhale and C. K. Kokate

# REMEDIAL MATHEMATICS

Course Code: BP106RMT

Credit Units: 03

## Course Objectives:

This is an introductory course in mathematics. This subject deals with the introduction to Partial fraction, Logarithm, matrices and Determinant, Analytical geometry, Calculus, differential equation and Laplace transform.

## Course Contents:

### Module-I:

**Partial fraction:** Introduction, Polynomial, Rational fractions, Proper and Improper fractions, Partial fraction, Resolving into Partial fraction, Application of Partial Fraction in Chemical Kinetics and Pharmacokinetics

**Logarithms:** Introduction, Definition, Theorems/Properties of logarithms, Common logarithms, Characteristic and Mantissa, worked examples, application of logarithm to solve pharmaceutical problems.

**Function:** Real Valued function, Classification of real valued functions,

**Limits and continuity:** Introduction, Limit of a function, Definition of limit of a function ( $n$  definition),  $\lim_{x \rightarrow a} \frac{f(x)}{g(x)}$ ,  $\lim_{x \rightarrow a} \frac{1}{f(x)}$ ,  $\lim_{x \rightarrow a} \sin x$ ,  $\lim_{x \rightarrow a} \cos x$

**Module-II: Matrices and Determinant:** Introduction matrices, Types of matrices, Operation on matrices, Transpose of a matrix, Matrix Multiplication, Determinants, Properties of determinants, Product of determinants, Minors and co-Factors, Adjoint or adjugate of a square matrix, Singular and non-singular matrices, Inverse of a matrix, Solution of system of linear equations using matrix method, Cramer's rule, Characteristic equation and roots of a square matrix, Cayley–Hamilton theorem, Application of Matrices in solving Pharmacokinetic equations

### Module-III: Calculus

**Differentiation :** Introductions, Derivative of a function, Derivative of a constant, Derivative of a product of a constant and a function, Derivative of the sum or difference of two functions, Derivative of the product of two functions (product formula), Derivative of the quotient of two functions (Quotient formula) – **Without Proof**, Derivative of  $x^n$  w.r.t.  $x$ , where  $n$  is any rational number, Derivative of  $e^x$ , Derivative of  $\log_e x$ , Derivative of  $a^x$ , Derivative of trigonometric functions from first principles (**without Proof**), Successive Differentiation, Conditions for a function to be a maximum or a minimum at a point. Application

### Module-IV: Analytical Geometry

**Introduction:** Signs of the Coordinates, Distance formula,

**Straight Line:** Slope or gradient of a straight line, Conditions for parallelism and perpendicularity of two lines, Slope of a line joining two points, Slope – intercept form of a straight line

**Integration:** Introduction, Definition, Standard formulae, Rules of integration, Method of substitution, Method of Partial fractions, Integration by parts, definite integrals, application

**Module-V: Differential Equations :** Some basic definitions, Order and degree, Equations in separable form, Homogeneous equations, Linear Differential equations, Exact equations, **Application in solving Pharmacokinetic equations**

**Laplace Transform :** Introduction, Definition, Properties of Laplace transform, Laplace Transforms of elementary functions, Inverse Laplace transforms, Laplace transform of derivatives, Application to solve

Linear differential equations, **Application in solving Chemical kinetics and Pharmacokinetics equations**

**Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	10	2	1	2	35

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance

EE: End Semester Examination

**Recommended Books (Latest Edition)**

- Differential Calculus by Shanthinarayan
- Pharmaceutical Mathematics with application to Pharmacy by Panchaksharappa Gowda D.H.
- Integral Calculus by Shanthinarayan
- Higher Engineering Mathematics by Dr.B.S.Grewal

# HUMAN ANATOMY AND PHYSIOLOGY PRACTICAL-I

**Course Code : BP107P**

**Credit Units: 02**

## **Course Objective:**

Practical physiology is complimentary to the theoretical discussions in physiology. Practicals allow the verification of physiological processes discussed in theory classes through experiments on living tissue, intact animals or normal human beings. This is helpful for developing an insight on the subject.

## **Course Contents:**

### **List of experiments :**

1. Study of compound microscope.
2. Microscopic study of epithelial and connective tissue
3. Microscopic study of muscular and nervous tissue
4. Identification of axial bones
5. Identification of appendicular bones
6. Introduction to hemocytometry.
7. Enumeration of white blood cell (WBC) count
8. Enumeration of total red blood corpuscles (RBC) count
9. Determination of bleeding time
10. Determination of clotting time
11. Estimation of hemoglobin content
12. Determination of blood group.
13. Determination of erythrocyte sedimentation rate (ESR).
14. Determination of heart rate and pulse rate.
15. Recording of blood pressure.

### **Examination Scheme :**

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# PHARMACEUTICAL ANALYSIS PRACTICAL

Course Code : BP108P

Credit Units: 02

## List of experiments:

### Limit Test of the following

- (1) Chloride
- (2) Sulphate
- (3) Iron
- (4) Arsenic

### II Preparation and standardization of

- (1) Sodium hydroxide
- (2) Sulphuric acid
- (3) Sodium thiosulfate
- (4) Potassium permanganate
- (5) Ceric ammonium sulphate

### III Assay of the following compounds along with Standardization of Titrant

- (1) Ammonium chloride by acid base titration
- (2) Ferrous sulphate by Cerimetry
- (3) Copper sulphate by Iodometry
- (4) Calcium gluconate by complexometry
- (5) Hydrogen peroxide by Permanganometry
- (6) Sodium benzoate by non-aqueous titration
- (7) Sodium Chloride by precipitation titration

### IV Determination of Normality by electro-analytical methods

- (1) Conductometric titration of strong acid against strong base
- (2) Conductometric titration of strong acid and weak acid against strong base
- (3) Potentiometric titration of strong acid against strong base

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# PHARMACEUTICS PRACTICAL

Course Code : BP109P

Credit Units: 02

## List of experiments :

### 1 . Syrups

- a) Syrup IP'66
- b) Compound syrup of Ferrous Phosphate BPC'68

### 3 Hours / week

### 2. Elixirs a) Piperazine citrate elixir

- b) Paracetamol pediatric elixir

### 3.Linctus a) Terpin Hydrate Linctus IP'66

### 4. Solutions

- b) Iodine Throat Paint (Mandles Paint)
- a) Strong solution of ammonium acetate
- b) Cresol with soap solution
- c) Lugol's solution

### 5. Suspensions

- a) Calamine lotion
- b) Magnesium Hydroxide mixture
- c) Aluminium Hydroxide gel

### 6. Emulsions a) Turpentine Liniment

- b) Liquid paraffin emulsion

### 7. Powders and Granules

- a) ORS powder (WHO)
- b) Effervescent granules
- c) Dusting powder
- d) Divided powders

### 8. Suppositories

- a) Glycero gelatin suppository
- b) Cocoa butter suppository
- c) Zinc Oxide suppository

### 8. Semisolids

- a) Sulphur ointment
- b) Non staining-iodine ointment with methyl salicylate
- c) Carbopal gel

### 9. Gargles and Mouthwashes

- a) Iodine gargle
- b) Chlorhexidine mouthwash

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# PHARMACEUTICAL INORGANIC CHEMISTRY PRACTICAL

Course Code : BP110P

Credit Units: 02

## List of experiments:

### I Limit tests for following ions

Limit test for Chlorides and Sulphates  
Modified limit test for Chlorides and Sulphates  
Limit test for Iron  
Limit test for Heavy metals  
Limit test for Lead  
Limit test for Arsenic

### II Identification test

Magnesium hydroxide  
Ferrous sulphate  
Sodium bicarbonate  
Calcium gluconate  
Copper sulphate

### III Test for purity

Swelling power of Bentonite  
Neutralizing capacity of aluminum hydroxide gel  
Determination of potassium iodate and iodine in potassium Iodide

### IV Preparation of inorganic pharmaceuticals

Boric acid  
Potash alum  
Ferrous sulphate

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## COMMUNICATION SKILLS PRACTICAL

**Course Code : BP111P**

**Credit Units: 01**

The following learning modules are to be conducted using words worth® English language lab software

### **Basic communication covering the following topics**

Meeting People  
Asking Questions  
Making Friends  
What did you do?  
Do's and Dont's

### **Pronunciations covering the following topics**

Pronunciation (Consonant Sounds)  
Pronunciation and Nouns  
Pronunciation (Vowel Sounds)

### **Advanced Learning**

Listening Comprehension / Direct and Indirect Speech  
Figures of Speech  
Effective Communication  
Writing Skills  
Effective Writing  
Interview Handling Skills  
E-Mail etiquette  
Presentation Skills

### **Examination Scheme:**

IA				EE	
A	PR	LR	V	PR	V
02	03	02	03	5	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## REMEDIAL BIOLOGY PRACTICAL

Course Code: BP112RBP

Credit Units: 01

### List of Experiments :

1. Introduction to experiments in biology
  - a) Study of Microscope
  - b) Section cutting techniques
  - c) Mounting and staining
  - d) Permanent slide preparation
2. Study of cell and its inclusions
3. Study of Stem, Root, Leaf, seed, fruit, flower and their modifications
4. Detailed study of frog by using computer models
5. Microscopic study and identification of tissues pertinent to Stem, Root Leaf, seed, fruit and flower
6. Identification of bones
7. Determination of blood group
8. Determination of blood pressure
9. Determination of tidal volume

### Examination Scheme:

IA				EE	
A	PR	LR	V	PR	V
02	03	02	03	5	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## Syllabus - Second Semester

### HUMAN ANATOMY AND PHYSIOLOGY-II

**Course Code : BP201T**

**Credit Units: 04**

**Course Objectives:** This subject is designed to impart fundamental knowledge on the structure and functions of the various systems of the human body. It also helps in understanding both homeostatic mechanisms.

#### Course Contents:

**Module-I: Nervous System:** Organization of nervous system, neuron, neuroglia, classification and properties of nerve fibre, electrophysiology, action potential, nerve impulse, receptors, synapse, neurotransmitters. Central nervous system: Meninges, ventricles of brain and cerebrospinal fluid. structure and functions of brain (cerebrum, brain stem, cerebellum), spinal cord (gross structure, functions of afferent and efferent nerve tracts, reflex activity)

**Module-II: Digestive System:** Anatomy of GI Tract with special reference to anatomy and functions of stomach, (Acid production in the stomach, regulation of acid production through parasympathetic nervous system, pepsin role in protein digestion) small intestine and large intestine, anatomy and functions of salivary glands, pancreas and liver, movements of GIT, digestion and absorption of nutrients and disorders of GIT.

**Energetics:** Formation and role of ATP, Creatinine Phosphate and BMR.

**Module-III: Respiratory System:** Anatomy of respiratory system with special reference to anatomy of lungs, mechanism of respiration, regulation of respiration Lung Volumes and capacities transport of respiratory gases, artificial respiration, and resuscitation methods.

**Urinary System:** Anatomy of urinary tract with special reference to anatomy of kidney and nephrons, functions of kidney and urinary tract, physiology of urine formation, micturition reflex and role of kidneys in acid base balance, role of RAS in kidney and disorders of kidney.

**Module-IV: Endocrine System:** Classification of hormones, mechanism of hormone action, structure and functions of pituitary gland, thyroid gland, parathyroid gland, adrenal gland, pancreas, pineal gland, thymus and their disorders.

**Module-V: Reproductive System:** Anatomy of male and female reproductive system, Functions of male and female reproductive system, sex hormones, physiology of menstruation, fertilization, spermatogenesis, oogenesis, pregnancy and parturition

**Introduction to genetics:** Chromosomes, genes and DNA, protein synthesis, genetic pattern of inheritance

#### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books :**

- Essentials of Medical Physiology by K. Sembulingam and P. Sembulingam. Jaypee brothers medical publishers, New Delhi.
- Anatomy and Physiology in Health and Illness by Kathleen J.W. Wilson, Churchill Livingstone, New York
- Physiological basis of Medical Practice-Best and Tailor. Williams & Wilkins Co,Riverview,MI USA
- Text book of Medical Physiology- Arthur C,Guyton andJohn.E. Hall. Miamisburg, OH, U.S.A.
- Principles of Anatomy and Physiology by Tortora Grabowski. Palmetto, GA, U.S.A.
- Textbook of Human Histology by Inderbir Singh, Jaypee brothers medical publishers, New Delhi.
- Textbook of Practical Physiology by C.L. Ghai, Jaypee brothers medical publishers, New Delhi.
- Practical workbook of Human Physiology by K. Srinageswari and Rajeev Sharma, Jaypee brother's medical publishers, New Delhi.

**Reference Books:**

- Physiological basis of Medical Practice-Best and Tailor. Williams & Wilkins Co, Riverview, MI USA
- Text book of Medical Physiology- Arthur C, Guyton and John. E. Hall. Miamisburg, OH, U.S.A.
- Human Physiology (vol 1 and 2) by Dr. C.C. Chatterrje ,Academic Publishers Kolkata

# PHARMACEUTICAL ORGANIC CHEMISTRY-I

**Course Code : BP202T**

**Credit Units: 04**

**Course Objectives:** This subject deals with classification and nomenclature of simple organic compounds, structural isomerism, intermediates forming in reactions, important physical properties, reactions and methods of preparation of these compounds.

**Course Contents:**

**Module-I: Classification, nomenclature and isomerism:** Classification of Organic Compounds Common and IUPAC systems of nomenclature of organic compounds (up to 10 Carbons open chain and carbocyclic compounds) Structural isomerisms in organic compounds

## **Module-II**

### **Alkanes\*, Alkenes\* and Conjugated dienes\***

SP<sup>3</sup> hybridization in alkanes, Halogenation of alkanes, uses of paraffins. Stabilities of alkenes, SP<sup>2</sup> hybridization in alkenes E1 and E2 reactions – kinetics, order of reactivity of alkyl halides, rearrangement of carbocations, Saytzeffs orientation and evidences. E1 versus E2 reactions, Factors affecting E1 and E2 reactions. Ozonolysis, electrophilic addition reactions of alkenes, Markownikoff's orientation, free radical addition reactions of alkenes, Anti Markownikoff's orientation. Stability of conjugated dienes, Diels-Alder, electrophilic addition, free radical addition reactions of conjugated dienes, allylic rearrangement

## **Module-III**

### **Alkyl halides\***

SN<sup>1</sup> and SN<sup>2</sup> reactions - kinetics, order of reactivity of alkyl halides, stereochemistry and rearrangement of carbocations. SN<sup>1</sup> versus SN<sup>2</sup> reactions, Factors affecting SN<sup>1</sup> and SN<sup>2</sup> reactions Structure and uses of ethylchloride, Chloroform, trichloroethylene, tetrachloroethylene, dichloromethane, tetrachloromethane and iodoform.

**Alcohols\*-** Qualitative tests, Structure and uses of Ethyl alcohol, Methyl alcohol, chlorobutanol, Cetosteryl alcohol, Benzyl alcohol, Glycerol, Propylene glycol

## **Module -IV**

### **Carbonyl compounds\* (Aldehydes and ketones)**

Nucleophilic addition, Electromeric effect, aldol condensation, Crossed Aldol condensation, Cannizzaro reaction, Crossed Cannizzaro reaction, Benzoin condensation, Perkin condensation, qualitative tests, Structure and uses of Formaldehyde, Paraldehyde, Acetone, Chloral hydrate, Hexamine, Benzaldehyde, Vanilin, Cinnamaldehyde.

## **Module-V**

### **Carboxylic acids\***

Acidity of carboxylic acids, effect of substituents on acidity, inductive effect and qualitative tests for carboxylic acids, amide and ester Structure and Uses of Acetic acid, Lactic acid, Tartaric acid, Citric acid, Succinic acid. Oxalic acid, Salicylic acid, Benzoic acid, Benzyl benzoate, Dimethyl phthalate, Methyl salicylate and Acetyl salicylic acid

**Aliphatic amines\* -** Basicity, effect of substituent on Basicity. Qualitative test, Structure and uses of Ethanolamine, Ethylenediamine, Amphetamine

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest Editions)**

- Organic Chemistry by Morrison and Boyd
- Organic Chemistry by I.L. Finar , Volume-I
- Textbook of Organic Chemistry by B.S. Bahl & Arun Bahl.
- Organic Chemistry by P.L.Soni
- Practical Organic Chemistry by Mann and Saunders.
- Vogel's text book of Practical Organic Chemistry
- Advanced Practical organic chemistry by N.K.Vishnoi.
- Introduction to Organic Laboratory techniques by Pavia, Lampman and Kriz.
- Reaction and reaction mechanism by Ahluwaliah/Chatwal.

# BIOCHEMISTRY

**Course Code : BP203T**

**Credit Units: 04**

**Course Objectives:** Biochemistry deals with complete understanding of the molecular levels of the chemical process associated with living cells. The scope of the subject is providing biochemical facts and the principles to understand metabolism of nutrient molecules in physiological and pathological conditions. It is also emphasizing on genetic organization of mammalian genome and hetero & autocatalytic functions of DNA.

## **Course Contents:**

### **Module-I**

**Biomolecules:** Introduction, classification, chemical nature and biological role of carbohydrate, lipids, nucleic acids, amino acids and proteins.

**Bioenergetics:** Concept of free energy, endergonic and exergonic reaction, Relationship between free energy, enthalpy and entropy; Redox potential. Energy rich compounds; classification; biological significances of ATP and cyclic AMP

### **Module-II**

**Carbohydrate metabolism:** Glycolysis – Pathway, energetics and significance Citric acid cycle- Pathway, energetics and significance HMP shunt and its significance; Glucose-6-Phosphate dehydrogenase (G6PD) deficiency Glycogen metabolism Pathways and glycogen storage diseases (GSD) Gluconeogenesis- Pathway and its significance Hormonal regulation of blood glucose level and Diabetes mellitus

**Biological oxidation:** Electron transport chain (ETC) and its mechanism. Oxidative phosphorylation & its mechanism and substrate phosphorylation Inhibitors ETC and oxidative phosphorylation/Uncouplers level

### **Module-III**

**Lipid metabolism:**  $\beta$ -Oxidation of saturated fatty acid (Palmitic acid) Formation and utilization of ketone bodies; ketoacidosis De novo synthesis of fatty acids (Palmitic acid) Biological significance of cholesterol and conversion of cholesterol into bile acids, steroid hormone and vitamin D Disorders of lipid metabolism: Hypercholesterolemia, atherosclerosis, fatty liver and obesity.

**Amino acid metabolism:** General reactions of amino acid metabolism: Transamination, deamination & decarboxylation, urea cycle and its disorders Catabolism of phenylalanine and tyrosine and their metabolic disorders (Phenylketonuria, Albinism, alcaptonuria, tyrosinemia) Synthesis and significance of biological substances; 5-HT, melatonin, dopamine, noradrenaline, adrenaline Catabolism of heme; hyperbilirubinemia and jaundice

**Module-IV: Nucleic acid metabolism and genetic information transfer:** Biosynthesis of purine and pyrimidine nucleotides Catabolism of purine nucleotides and Hyperuricemia and Gout disease Organization of mammalian genome Structure of DNA and RNA and their functions DNA replication (semi conservative model) Transcription or RNA synthesis Genetic code, Translation or Protein synthesis and inhibitors

**Module-V: Enzymes:** Introduction, properties, nomenclature and IUB classification of enzymes Enzyme kinetics (Michaelis plot, Line Weaver Burke plot) Enzyme inhibitors with examples Regulation of enzymes: enzyme induction and repression, allosteric enzymes regulation Therapeutic and diagnostic applications of enzymes and isoenzymes Coenzymes –Structure and biochemical functions

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest Editions)**

- Principles of Biochemistry by Lehninger.
- Harper's Biochemistry by Robert K. Murry, Daryl K. Granner and Victor W. Rodwell.
- Biochemistry by Stryer.
- Biochemistry by D. Satyanarayan and U.Chakrapani
- Textbook of Biochemistry by Rama Rao.
- Textbook of Biochemistry by Deb.
- Outlines of Biochemistry by Conn and Stumpf
- Practical Biochemistry by R.C. Gupta and S. Bhargavan.
- Introduction of Practical Biochemistry by David T. Plummer. (3rd Edition)
- Practical Biochemistry for Medical students by Rajagopal and Ramakrishna.
- Practical Biochemistry by Harold Varley.

# PATHOPHYSIOLOGY

**Course Code: BP204T**

**Credit Units: 04**

**Course Objectives:** Pathophysiology is the study of causes of diseases and reactions of the body to such disease producing causes. This course is designed to impart a thorough knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications, and understanding of basic pathophysiological mechanisms. Hence it will not only help to study the syllabus of pathology, but also to get baseline knowledge required to practice medicine safely, confidently, rationally and effectively.

## **Course Contents :**

**Module-I: Basic principles of Cell injury and Adaptation:** Introduction, definitions, Homeostasis, Components and Types of Feedback systems, Causes of cellular injury, Pathogenesis (Cell membrane damage, Mitochondrial damage, Ribosome damage, Nuclear damage), Morphology of cell injury – Adaptive changes (Atrophy, Hypertrophy, hyperplasia, Metaplasia, Dysplasia), Cell swelling, Intra cellular accumulation, Calcification, Enzyme leakage and Cell Death Acidosis & Alkalosis, Electrolyte imbalance

**Basic mechanism involved in the process of inflammation and repair:** Introduction, Clinical signs of inflammation, Different types of Inflammation, Mechanism of Inflammation – Alteration in vascular permeability and blood flow, migration of WBC's, Mediators of inflammation, Basic principles of wound healing in the skin, Pathophysiology of Atherosclerosis

## **Module-II**

**Cardiovascular System:** Hypertension, congestive heart failure, ischemic heart disease (angina, myocardial infarction, atherosclerosis and arteriosclerosis)

**Respiratory System:** Asthma, Chronic obstructive airways diseases.

**Renal System:** Acute and chronic renal failure .

## **Module-III**

**Haematological Diseases:** Iron deficiency, megaloblastic anemia (Vit B12 and folic acid), sickle cell anemia, thalassemia, hereditary acquired anemia, hemophilia

**Endocrine system:** Diabetes, thyroid diseases, disorders of sex hormones

**Nervous system:** Epilepsy, Parkinson's disease, stroke, psychiatric disorders: depression, schizophrenia and Alzheimer's disease.

**Gastrointestinal system:** Peptic Ulcer

## **Module-IV**

Inflammatory bowel diseases, jaundice, hepatitis (A,B,C,D,E,F) alcoholic liver disease.

**Disease of bones and joints:** Rheumatoid arthritis, osteoporosis and gout

**Principles of cancer:** classification, etiology and pathogenesis of cancer

**Diseases of bones and joints:** Rheumatoid Arthritis, Osteoporosis, Gout

**Principles of Cancer:** Classification, etiology and pathogenesis of Cancer

## **Module-V**

**Infectious diseases:** Meningitis, Typhoid, Leprosy, Tuberculosis Urinary tract infections

**Sexually transmitted diseases:** AIDS, Syphilis, Gonorrhea

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# COMPUTER APPLICATIONS IN PHARMACY

Course Code : BP205T

Credit Units: 03

**Course Objectives:** This subject deals with the introduction Database, Database Management system, computer application in clinical studies and use of databases.

## Course Contents:

### Module-I

**Number System:** Binary number system, Decimal number system, Octal number system, Hexadecimal number systems, conversion decimal to binary, binary to decimal, octal to binary etc, binary addition, binary subtraction – One's complement, Two's complement method, binary multiplication, binary division

**Concept of Information Systems and Software :** Information gathering, requirement and feasibility analysis, data flow diagrams, process specifications, input/output design, process life cycle, planning and managing the project

### Module-II

**Web technologies:** Introduction to HTML, XML, CSS and Programming languages, introduction to web servers and Server Products Introduction to databases, MYSQL, MS ACCESS, Pharmacy Drug database

**Module-III: Application of computers in Pharmacy -** Drug information storage and retrieval, Pharmacokinetics, Mathematical model in Drug design, Hospital and Clinical Pharmacy, Electronic Prescribing and discharge (EP) systems, barcode medicine identification and automated dispensing of drugs, mobile technology and adherence monitoring Diagnostic System, Lab-diagnostic System, Patient Monitoring System, Pharma Information System

### Module-IV

**Bioinformatics:** Introduction, Objective of Bioinformatics, Bioinformatics Databases, Concept of Bioinformatics, Impact of Bioinformatics in Vaccine Discovery

### Module-V

**Computers as data analysis in Preclinical development:** Chromatographic data analysis(CDS), Laboratory Information management System (LIMS) and Text Information Management System (TIMS)

## Examination Scheme:

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	50

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance

EE: End Semester Examination

# ENVIRONMENTAL SCIENCES

**Course Code : BP206T**

**Credit Units: 03**

**Course Objectives:** Environmental Sciences is the scientific study of the environmental system and the status of its inherent or induced changes on organisms. It includes not only the study of physical and biological characters of the environment but also the social and cultural factors and the impact of man on environment.

## **Course Contents:**

**Module-I:** The Multidisciplinary nature of environmental studies Natural Resources Renewable and non-renewable resources:

Natural resources and associated problems a) Forest resources; b) Water resources; c) Mineral resources; d) Food resources; e) Energy resources; f) Land resources: Role of an individual in conservation of natural resources.

## **Module-II**

Ecosystems Concept of an ecosystem. Structure and function of an ecosystem. Introduction, types, characteristic features, structure and function of the ecosystems: Forest ecosystem; Grassland ecosystem; Desert ecosystem; Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

## **Module-III**

Environmental Pollution: Air pollution; Water pollution; Soil pollution

## **Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	50

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance

EE: End Semester Examination

## HUMAN ANATOMY AND PHYSIOLOGY PRACTICAL-II

Course Code: BP207P

Credit Units: 02

Practical physiology is complimentary to the theoretical discussions in physiology. Practicals allow the verification of physiological processes discussed in theory classes through experiments on living tissue, intact animals or normal human beings. This is helpful for developing an insight on the subject.

### List of Experiments

1. To study the integumentary and special senses using specimen, models, etc.,
2. To study the nervous system using specimen, models, etc.,
3. To study the endocrine system using specimen, models, etc
4. To demonstrate the general neurological examination
5. To demonstrate the function of olfactory nerve
6. To examine the different types of taste.
7. To demonstrate the visual acuity
8. To demonstrate the reflex activity
9. Recording of body temperature
10. To demonstrate positive and negative feedback mechanism.
11. Determination of tidal volume and vital capacity.
12. Study of digestive, respiratory, cardiovascular systems, urinary and reproductive systems with the help of models, charts and specimens.
13. Recording of basal mass index .
14. Study of family planning devices and pregnancy diagnosis test.
15. Demonstration of total blood count by cell analyser
16. Permanent slides of vital organs and gonads.

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# PHARMACEUTICAL ORGANIC CHEMISTRY PRACTICAL-I

Course Code : BP208P

Credit Units: 02

## List of experiments

A. Systematic qualitative analysis of unknown organic compounds like

1. Preliminary test: Color, odour, aliphatic/aromatic compounds, saturation and unsaturation, etc.
2. Detection of elements like Nitrogen, Sulphur and Halogen by Lassaigne's test
3. Solubility test
4. Functional group test like Phenols, Amides/ Urea, Carbohydrates, Amines, Carboxylic acids, Aldehydes and Ketones, Alcohols, Esters, Aromatic and Halogenated Hydrocarbons, Nitro compounds and Anilides.
5. Melting point/Boiling point of organic compounds
6. Identification of the unknown compound from the literature using melting point/ boiling point.
7. Preparation of the derivatives and confirmation of the unknown compound by melting point/ boiling point.
8. Minimum 5 unknown organic compounds to be analysed systematically.

B. Preparation of suitable solid derivatives from organic compounds

C. Construction of molecular models

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## BIOCHEMISTRY PRACTICAL

Course Code : BP209P

Credit Units: 02

### List of experiments

1. Qualitative analysis of carbohydrates (Glucose, Fructose, Lactose, Maltose, Sucrose and starch)
2. Identification tests for Proteins (albumin and Casein)
3. Quantitative analysis of reducing sugars (DNSA method) and Proteins (Biuret method)
4. Qualitative analysis of urine for abnormal constituents
5. Determination of blood creatinine
6. Determination of blood sugar
7. Determination of serum total cholesterol
8. Preparation of buffer solution and measurement of pH
9. Study of enzymatic hydrolysis of starch
10. Determination of Salivary amylase activity
11. Study the effect of Temperature on Salivary amylase activity.
12. Study the effect of substrate concentration on salivary amylase activity.

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# COMPUTER APPLICATIONS IN PHARMACY PRACTICAL

Course Code : BP210P

Credit Units: 01

## List of experiments

1. Design a questionnaire using a word processing package to gather information about a particular disease.
2. Create a HTML web page to show personal information.
- 3 Retrieve the information of a drug and its adverse effects using online tools
- 4 Creating mailing labels Using Label Wizard , generating label in MS WORD
- 5 Create a database in MS Access to store the patient information with the required fields Using access
6. Design a form in MS Access to view, add, delete and modify the patient record in the database
7. Generating report and printing the report from patient database
8. Creating invoice table using – MS Access
9. Drug information storage and retrieval using MS Access
10. Creating and working with queries in MS Access
11. Exporting Tables, Queries, Forms and Reports to web pages
12. Exporting Tables, Queries, Forms and Reports to XML pages

## Examination Scheme:

IA				EE	
A	PR	LR	V	PR	V
02	03	02	03	5	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## Syllabus - Third Semester

### PHARMACEUTICAL ORGANIC CHEMISTRY-II

**Course Code : BP301T**

**Credit Units: 04**

**Course Objectives:** This subject deals with general methods of preparation and reactions of some organic compounds. Reactivity of organic compounds are also studied here. The syllabus emphasizes on mechanisms and orientation of reactions. Chemistry of fats and oils are also included in the syllabus.

**Course Content:**

General methods of preparation and reactions of compounds superscripted with asterisk (\*) to be explained. To emphasize on definition, types, classification, principles/mechanisms, applications, examples and differences

**Module-I**

**Benzene and its derivatives**

- A.** Analytical, synthetic and other evidences in the derivation of structure of benzene, Orbital picture, resonance in benzene, aromatic characters, Huckel's rule
- B.** Reactions of benzene - nitration, sulphonation, halogenation reactivity, Friedelcrafts alkylation- reactivity, limitations, Friedelcrafts acylation.
- C.** Substituents, effect of substituents on reactivity and orientation of mono substituted benzene compounds towards electrophilic substitution reaction
- D.** Structure and uses of DDT, Saccharin, BHC and Chloramine

**Module-II**

**Phenols\*** - Acidity of phenols, effect of substituents on acidity, qualitative tests, Structure and uses of phenol, cresols, resorcinol, naphthols

**Aromatic Amines\*** - Basicity of amines, effect of substituents on basicity, and synthetic uses of aryl diazonium salts

**Aromatic Acids\*** –Acidity, effect of substituents on acidity and important reactions of benzoic acid.

**Module-III**

**Fats and Oils**

- a. Fatty acids – reactions.
- b. Hydrolysis, Hydrogenation, Saponification and Rancidity of oils, Drying oils.
- c. Analytical constants – Acid value, Saponification value, Ester value, Iodine value, Acetyl value, Reichert Meissl (RM) value – significance and principle involved in their determination.

**Module-IV**

**Polynuclear hydrocarbons:**

- a. Synthesis, reactions
- b. Structure and medicinal uses of Naphthalene, Phenanthrene, Anthracene, Diphenylmethane, Triphenylmethane and their derivatives

## Module-V

### Cyclo alkanes\*

Stabilities – Baeyer's strain theory, limitation of Baeyer's strain theory, Coulson and Moffitt's modification, Sachse Mohr's theory (Theory of strainless rings), reactions of cyclopropane and cyclobutane only

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

### Recommended Books (Latest Editions)

- Organic Chemistry by Morrison and Boyd
- Organic Chemistry by I.L. Finar , Volume-I
- Textbook of Organic Chemistry by B.S. Bahl & Arun Bahl.
- Organic Chemistry by P.L.Soni
- Practical Organic Chemistry by Mann and Saunders.
- Vogel's text book of Practical Organic Chemistry
- Advanced Practical organic chemistry by N.K.Vishnoi.
- Introduction to Organic Laboratory techniques by Pavia, Lampman and Kriz

# PHYSICAL PHARMACEUTICS-I

Course Code : BP302T

Credit Units: 04

**Course Objectives:** The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

**Course Content:**

## Module-I

**Solubility of drugs:** Solubility expressions, mechanisms of solute solvent interactions, ideal solubility parameters, solvation & association, quantitative approach to the factors influencing solubility of drugs, diffusion principles in biological systems. Solubility of gas in liquids, solubility of liquids in liquids, (Binary solutions, ideal solutions) Raoult's law, real solutions. Partially miscible liquids, Critical solution temperature and applications. Distribution law, its limitations and applications

## Module-II

**States of Matter and properties of matter:** State of matter, changes in the state of matter, latent heats, vapour pressure, sublimation critical point, eutectic mixtures, gases, aerosols – inhalers, relative humidity, liquid complexes, liquid crystals, glassy states, solid crystalline, amorphous & polymorphism.

**Physicochemical properties of drug molecules:** Refractive index, optical rotation, dielectric constant, dipole moment, dissociation constant, determinations and applications

## Module-III

**Surface and interfacial phenomenon:** Liquid interface, surface & interfacial tensions, surface free energy, measurement of surface & interfacial tensions, spreading coefficient, adsorption at liquid interfaces, surface active agents, HLB Scale, solubilisation, detergency, adsorption at solid interface.

## Module-IV

**Complexation and protein binding:** Introduction, Classification of Complexation, Applications, methods of analysis, protein binding, Complexation and drug action, crystalline structures of complexes and thermodynamic treatment of stability constants.

## Module-V

**pH, buffers and Isotonic solutions:** Sorensen's pH scale, pH determination (electrometric and calorimetric), applications of buffers, buffer equation, buffer capacity, buffers in pharmaceutical and biological systems, buffered isotonic solutions.

## Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACEUTICAL MICROBIOLOGY

Course Code : BP303T

Credit Units: 04

**Course Objectives:** Study of all categories of microorganisms especially for the production of alcohol antibiotics, vaccines, vitamins enzymes etc..

**Course Content:**

## Module-I

Introduction, history of microbiology, its branches, scope and its importance. Introduction to Prokaryotes and Eukaryotes. Study of ultra-structure and morphological classification of bacteria, nutritional requirements, raw materials used for culture media and physical parameters for growth, growth curve, isolation and preservation methods for pure cultures, cultivation of anaerobes, quantitative measurement of bacterial growth (total & viable count). Study of different types of phase contrast microscopy, dark field microscopy and electron microscopy.

## Module-II

Identification of bacteria using staining techniques (simple, Gram's & Acid fast staining) and biochemical tests (IMViC). Study of principle, procedure, merits, demerits and applications of physical, chemical gaseous, radiation and mechanical method of sterilization. Evaluation of the efficiency of sterilization methods. Equipments employed in large scale sterilization. Sterility indicators.

## Module-III

Study of morphology, classification, reproduction/replication and cultivation of Fungi and Viruses. Classification and mode of action of disinfectants Factors influencing disinfection, antiseptics and their evaluation. For bacteriostatic and bactericidal actions Evaluation of bactericidal & Bacteriostatic. Sterility testing of products (solids, liquids, ophthalmic and other sterile products) according to IP, BP and USP.

## Module-IV

Designing of aseptic area, laminar flow equipments; study of different sources of contamination in an aseptic area and methods of prevention, clean area classification. Principles and methods of different microbiological assay. Methods for standardization of antibiotics, vitamins and amino acids. Assessment of a new antibiotic.

## Module-V

Types of spoilage, factors affecting the microbial spoilage of pharmaceutical products, sources and types of microbial contaminants, assessment of microbial contamination and spoilage. Preservation of pharmaceutical products using antimicrobial agents, evaluation of microbial stability of formulations. Growth of animal cells in culture, general procedure for cell culture, Primary, established and transformed cell cultures. Application of cell cultures in pharmaceutical industry and research.

## Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

# PHARMACEUTICAL ENGINEERING

**Course Code : BP304T**

**Credit Units: 04**

**Course Objectives:** This course is designed to impart a fundamental knowledge on the art and science of various Module operations used in pharmaceutical industry.

## **Course Content:**

### **Module-I**

**Flow of fluids:** Types of manometers, Reynolds number and its significance, Bernoulli's theorem and its applications, Energy losses, Orifice meter, Venturimeter, Pitot tube and Rotometer.

**Size Reduction:** Objectives, Mechanisms & Laws governing size reduction, factors affecting size reduction, principles, construction, working, uses, merits and demerits of Hammer mill, ball mill, fluid energy mill, Edge runner mill & end runner mill.

**Size Separation:** Objectives, applications & mechanism of size separation, official standards of powders, sieves, size separation Principles, construction, working, uses, merits and demerits of Sieve shaker, cyclone separator, Air separator, Bag filter & elutriation tank.

### **Module-II**

**Heat Transfer:** Objectives, applications & Heat transfer mechanisms. Fourier's law, Heat transfer by conduction, convection & radiation. Heat interchangers & heat exchangers.

**Evaporation:** Objectives, applications and factors influencing evaporation, differences between evaporation and other heat process. principles, construction, working, uses, merits and demerits of Steam jacketed kettle, horizontal tube evaporator, climbing film evaporator, forced circulation evaporator, multiple effect evaporator & Economy of multiple effect evaporator.

**Distillation:** Basic Principles and methodology of simple distillation, flash distillation, fractional distillation, distillation under reduced pressure, steam distillation & molecular distillation

### **Module-III**

**Drying:** Objectives, applications & mechanism of drying process, measurements & applications of Equilibrium Moisture content, rate of drying curve. principles, construction, working, uses, merits and demerits of Tray dryer, drum dryer spray dryer, fluidized bed dryer, vacuum dryer, freeze dryer.

**Mixing:** Objectives, applications & factors affecting mixing, Difference between solid and liquid mixing, mechanism of solid mixing, liquids mixing and semisolids mixing. Principles, Construction, Working, uses, Merits and Demerits of Double cone blender, twin shell blender, ribbon blender, Sigma blade mixer, planetary mixers, Propellers, Turbines, Paddles & Silverson Emulsifier,

### **Module-IV**

**Filtration:** Objectives, applications, Theories & Factors influencing filtration, filter aids, filter medias. Principle, Construction, Working, Uses, Merits and demerits of plate & frame filter, filter leaf, rotary drum filter, Meta filter & Cartridge filter, membrane filters and Seidtz filter.

**Centrifugation:** Objectives, principle & applications of Centrifugation, principles, construction, working, uses, merits and demerits of Perforated basket centrifuge, Non-perforated basket centrifuge, semi continuous centrifuge & super centrifuge.

### **Module-V**

**Materials of pharmaceutical plant construction, Corrosion and its prevention:** Factors affecting during materials selected for Pharmaceutical plant construction, Theories of corrosion, types of corrosion

and there prevention. Ferrous and nonferrous metals, inorganic and organic non metals, basic of material handling systems.

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

## PHARMACEUTICAL ORGANIC CHEMISTRY PRACTICAL-II

Course Code : BP305P

Credit Units: 02

### List of experiments

I Experiments involving laboratory techniques

Recrystallization

Steam distillation

II Determination of following oil values (including standardization of reagents)

Acid value

Saponification value

Iodine value

### III Preparation of compounds

Benzanilide/Phenyl benzoate/Acetanilide from Aniline/ Phenol /Aniline by acylation reaction.

2,4,6-Tribromo aniline/Para bromo acetanilide from Aniline/ Acetanilide by halogenation (Bromination) reaction.

5-Nitro salicylic acid/Meta di nitro benzene from Salicylic acid / Nitro benzene by nitration reaction.

Benzoic acid from Benzyl chloride by oxidation reaction.

Benzoic acid/ Salicylic acid from alkyl benzoate/ alkyl salicylate by hydrolysis reaction.

1-Phenyl azo-2-naphthol from Aniline by diazotization and coupling reactions.

Benzil from Benzoin by oxidation reaction.

Dibenzal acetone from Benzaldehyde by Claisen Schmidt reaction

Cinnamic acid from Benzaldehyde by Perkin reaction

*P*-Iodo benzoic acid from *P*-amino benzoic acid

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# PHYSICAL PHARMACEUTICS PRACTICAL-I

Course Code : BP306P

Credit Units: 02

## List of Experiments

1. Determination the solubility of drug at room temperature
2. Determination of pKa value by Half Neutralization/ Henderson Hasselbalch equation.
3. Determination of Partition co- efficient of benzoic acid in benzene and water
4. Determination of Partition co- efficient of Iodine in CCl<sub>4</sub> and water
5. Determination of % composition of NaCl in a solution using phenol-water system by CST method
6. Determination of surface tension of given liquids by drop count and drop weight method
7. Determination of HLB number of a surfactant by saponification method
8. Determination of Freundlich and Langmuir constants using activated char coal
9. Determination of critical micellar concentration of surfactants
10. Determination of stability constant and donor acceptor ratio of PABA-Caffeine complex by solubility method
11. Determination of stability constant and donor acceptor ratio of Cupric-Glycine complex by pH titration method

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# PHARMACEUTICAL MICROBIOLOGY PRACTICAL

Course Code : BP307P

Credit Units: 02

## List of experiments

1. Introduction and study of different equipments and processing, e.g., B.O.D. incubator, laminar flow, aseptic hood, autoclave, hot air sterilizer, deep freezer, refrigerator, microscopes used in experimental microbiology.
2. Sterilization of glassware, preparation and sterilization of media.
3. Sub culturing of bacteria and fungus. Nutrient stabs and slants preparations.
4. Staining methods- Simple, Grams staining and acid fast staining (Demonstration with practical).
5. Isolation of pure culture of micro-organisms by multiple streak plate technique and other techniques.
6. Microbiological assay of antibiotics by cup plate method and other methods
7. Motility determination by Hanging drop method.
8. Sterility testing of pharmaceuticals.
9. Bacteriological analysis of water
10. Biochemical test.

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# PHARMACEUTICAL ENGINEERING PRACTICAL

Course Code : BP308P

Credit Units: 02

## List of Experiments

- I. Determination of radiation constant of brass, iron, unpainted and painted glass.
- II. Steam distillation – To calculate the efficiency of steam distillation.
- III. To determine the overall heat transfer coefficient by heat exchanger.
- IV. Construction of drying curves (for calcium carbonate and starch).
- V. Determination of moisture content and loss on drying.
- VI. Determination of humidity of air – i) From wet and dry bulb temperatures –use of Dew point method.
- VII. Description of Construction working and application of Pharmaceutical Machinery such as rotary tablet machine, fluidized bed coater, fluid energy mill, de humidifier.
- VIII. Size analysis by sieving – To evaluate size distribution of tablet granulations – Construction of various size frequency curves including arithmetic and logarithmic probability plots.
- IX. Size reduction: To verify the laws of size reduction using ball mill and determining Kicks, Rittinger's, Bond's coefficients, power requirement and critical speed of Ball Mill.
- X. Demonstration of colloid mill, planetary mixer, fluidized bed dryer, freeze dryer and such other major equipment.
- XI. Factors affecting Rate of Filtration and Evaporation (Surface area, Concentration and Thickness/ viscosity)
- XII. To study the effect of time on the Rate of Crystallization.
- XIII. To calculate the uniformity Index for given sample by using Double Cone Blender.

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## Syllabus - Fourth Semester

### PHARMACEUTICAL ORGANIC CHEMISTRY-III

**Course Code : BP401T**

**Credit Units: 04**

**Course Objectives:** This subject imparts knowledge on stereo-chemical aspects of organic compounds and organic reactions, important named reactions, chemistry of important hetero cyclic compounds. It also emphasizes on medicinal and other uses of organic compounds.

**Course Content:**

**Note: To emphasize on definition, types, mechanisms, examples, uses/applications**

#### Module-I

**Stereo isomerism:** Optical isomerism – Optical activity, enantiomerism, diastereoisomerism, meso compounds. Elements of symmetry, chiral and achiral molecules. DL system of nomenclature of optical isomers, sequence rules, RS system of nomenclature of optical isomers. Reactions of chiral molecules. Racemic modification and resolution of racemic mixture. Asymmetric synthesis: partial and absolute

#### Module-II

Geometrical isomerism. Nomenclature of geometrical isomers (Cis Trans, EZ, Syn Anti systems). Methods of determination of configuration of geometrical isomers. Conformational isomerism in Ethane, n-Butane and Cyclohexane. Stereo isomerism in biphenyl compounds (Atropisomerism) and conditions for optical activity. Stereospecific and stereoselective reactions

#### Module-III

**Heterocyclic compounds:** Nomenclature and classification. Synthesis, reactions and medicinal uses of following compounds/derivatives. Pyrrole, Furan, and Thiophene. Relative aromaticity and reactivity of Pyrrole, Furan and Thiophene

#### Module-IV

Synthesis, reactions and medicinal uses of following compounds/derivatives  
Pyrazole, Imidazole, Oxazole and Thiazole.  
Pyridine, Quinoline, Isoquinoline, Acridine and Indole. Basicity of pyridine  
Synthesis and medicinal uses of Pyrimidine, Purine, azepines and their derivatives

#### Module-V

##### **Reactions of synthetic importance**

Metal hydride reduction ( $\text{NaBH}_4$  and  $\text{LiAlH}_4$ ), Clemmensen reduction, Birch reduction, Wolff Kishner reduction.  
Oppenauer-oxidation and Dakin reaction.  
Beckmanns rearrangement and Schmidt rearrangement.  
Claisen-Schmidt condensation

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest Editions)**

- Organic chemistry by I.L. Finar, Volume-I & II.
- A text book of organic chemistry – Arun Bahl, B.S. Bahl.
- Heterocyclic Chemistry by Raj K. Bansal
- Organic Chemistry by Morrison and Boyd
- Heterocyclic Chemistry by T.L. Gilchrist

# MEDICINAL CHEMISTRY-I

Course Code : BP402T

Credit Units: 04

**Course Objectives:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasizes on structure activity relationships of drugs, importance of physicochemical properties and metabolism of drugs. The syllabus also emphasizes on chemical synthesis of important drugs under each class.

## Course Content:

Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted (\*)

## Module-I

### Introduction to Medicinal Chemistry

#### History and development of medicinal chemistry

#### Physicochemical properties in relation to biological action

Ionization, Solubility, Partition Coefficient, Hydrogen bonding, Protein binding, Chelation, Bioisosterism, Optical and Geometrical isomerism.

#### Drug metabolism

Drug metabolism principles- Phase I and Phase II.

Factors affecting drug metabolism including stereo chemical aspects.

## Module-II

### Drugs acting on Autonomic Nervous System

#### Adrenergic Neurotransmitters:

Biosynthesis and catabolism of catecholamine.

Adrenergic receptors (Alpha & Beta) and their distribution.

#### Sympathomimetic agents: SAR of Sympathomimetic agents

Direct acting: Nor-epinephrine, Epinephrine, Phenylephrine\*, Dopamine, Methyldopa, Clonidine, Dobutamine, Isoproterenol, Terbutaline, Salbutamol\*, Bitolterol, Naphazoline, Oxymetazoline and Xylometazoline. Indirect acting agents: Hydroxyamphetamine, Pseudoephedrine, Propylhexedrine.

Agents with mixed mechanism: Ephedrine, Metaraminol.

#### Adrenergic Antagonists:

**Alpha adrenergic blockers:** Tolazoline\*, Phentolamine, Phenoxybenzamine, Prazosin, Dihydroergotamine, Methysergide.

**Beta adrenergic blockers:** SAR of beta blockers, Propranolol\*, Metibranolol, Atenolol, Betazolol, Bisoprolol, Esmolol, Metoprolol, Labetolol, Carvedilol.

## Module-III

### Cholinergic neurotransmitters:

Biosynthesis and catabolism of acetylcholine.

Cholinergic receptors (Muscarinic & Nicotinic) and their distribution.

#### Parasympathomimetic agents: SAR of Parasympathomimetic agents

**Direct acting agents:** Acetylcholine, Carbachol\*, Bethanechol, Methacholine, Pilocarpine.

#### Indirect acting/ Cholinesterase inhibitors (Reversible & Irreversible):

Physostigmine, Neostigmine\*, Pyridostigmine, Edrophonium chloride, Tacrine hydrochloride, Ambenonium chloride, Isofluorophate, Echothiophate iodide, Parathione, Malathion.

**Cholinesterase reactivator:** Pralidoxime chloride.

**Cholinergic Blocking agents: SAR of cholinolytic agents**

**Solanaceous alkaloids and analogues:** Atropine sulphate, Hyoscyamine sulphate, Scopolamine hydrobromide, Homatropine hydrobromide, Ipratropium bromide\*.

**Synthetic cholinergic blocking agents:** Tropicamide, Cyclopentolate hydrochloride, Clidinium bromide, Dicyclomine hydrochloride\*, Glycopyrrolate, Methantheline bromide, Propantheline bromide, Benztropine mesylate, Orphenadrine citrate, Biperidine hydrochloride, Procyclidine hydrochloride\*, Tridihexethyl chloride, Isopropamide iodide, Ethopropazine hydrochloride.

## Module-IV

### Drugs acting on Central Nervous System

#### A. Sedatives and Hypnotics:

**Benzodiazepines:** SAR of Benzodiazepines, Chlordiazepoxide, Diazepam\*, Oxazepam, Chlorazepate, Lorazepam, Alprazolam, Zolpidem

**Barbiturates:** SAR of barbiturates, Barbitol\*, Phenobarbital, Mephobarbital, Amobarbital, Butobarbital, Pentobarbital, Secobarbital

#### Miscellaneous:

Amides & imides: Glutethimide.

Alcohol & their carbamate derivatives: Meprobamate, Ethchlorvynol.

Aldehyde & their derivatives: Triclofos sodium, Paraldehyde.

#### B. Antipsychotics

**Phenothiazines:** SAR of Phenothiazines - Promazine hydrochloride, Chlorpromazine hydrochloride\*, Triflupromazine, Thioridazine hydrochloride, Piperacetazine hydrochloride, Prochlorperazine maleate, Trifluoperazine hydrochloride.

**Ring Analogues of Phenothiazines:** Chlorprothixene, Thiothixene, Loxapine succinate, Clozapine.

**Fluorobutyrophenones:** Haloperidol, Droperidol, Risperidone.

**Beta amino ketones:** Molindone hydrochloride.

**Benzamides:** Sulpieride.

**C. Anticonvulsants:** SAR of Anticonvulsants, mechanism of anticonvulsant action

**Barbiturates:** Phenobarbital, Methobarbital. **Hydantoins:** Phenytoin\*, Mephénytoin, Ethotoin

**Oxazolidine diones:** Trimethadione, Paramethadione **Succinimides:** Phensuximide, Methsuximide, Ethosuximide\* **Urea and monoacylureas:** Phenacemide, Carbamazepine\*

**Benzodiazepines:** Clonazepam

**Miscellaneous:** Primidone, Valproic acid, Gabapentin, Felbamate

## Module-V

### Drugs acting on Central Nervous System

#### General anesthetics:

**Inhalation anesthetics:** Halothane\*, Methoxyflurane, Enflurane, Sevoflurane, Isoflurane, Desflurane.

**Ultra short acting barbiturates:** Methohexital sodium\*, Thiopental sodium, Thiopental sodium.

**Dissociative anesthetics:** Ketamine hydrochloride.\*

#### Narcotic and non-narcotic analgesics

**Morphine and related drugs:** SAR of Morphine analogues, Morphine sulphate, Codeine, Meperidine hydrochloride, Anileridine hydrochloride, Diphenoxylate hydrochloride, Loperamide hydrochloride, Fentanyl citrate\*, Methadone hydrochloride\*, Propoxyphene hydrochloride, Pentazocine, Levorphanol tartrate.

**Narcotic antagonists:** Nalorphine hydrochloride, Levallorphan tartrate, Naloxone hydrochloride.

**Anti-inflammatory agents:** Sodium salicylate, Aspirin, Mefenamic acid\*, Meclofenamate, Indomethacin, Sulindac, Tolmetin, Zomepirac, Diclofenac, Ketorolac, Ibuprofen\*, Naproxen, Piroxicam, Phenacetin, Acetaminophen, Antipyrine, Phenylbutazone.

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest Editions)**

- Wilson and Giswold's Organic medicinal and Pharmaceutical Chemistry.

## PHYSICAL PHARMACEUTICS-II

Course Code : BP403T

Credit Units: 04

**Course Objectives:** The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

### Course Content:

#### Module-I

**Colloidal dispersions:** Classification of dispersed systems & their general characteristics, size & shapes of colloidal particles, classification of colloids & comparative account of their general properties. Optical, kinetic & electrical properties. Effect of electrolytes, coacervation, peptization & protective action.

#### Module-II

**Rheology:** Newtonian systems, law of flow, kinematic viscosity, effect of temperature, non-Newtonian systems, pseudoplastic, dilatant, plastic, thixotropy, thixotropy in formulation, determination of viscosity, capillary, falling Sphere, rotational viscometers

**Deformation of solids:** Plastic and elastic deformation, Heckel equation, Stress, Strain, Elastic Modulus

#### Module-III

**Coarse dispersion:** Suspension, interfacial properties of suspended particles, settling in suspensions, formulation of flocculated and deflocculated suspensions. Emulsions and theories of emulsification, microemulsion and multiple emulsions; Stability of emulsions, preservation of emulsions, rheological properties of emulsions and emulsion formulation by HLB method.

#### Module-IV

**Micromeritics:** Particle size and distribution, mean particle size, number and weight distribution, particle number, methods for determining particle size by different methods, counting and separation method, particle shape, specific surface, methods for determining surface area, permeability, adsorption, derived properties of powders, porosity, packing arrangement, densities, bulkiness & flow properties.

#### Module-V

**Drug stability:** Reaction kinetics: zero, pseudo-zero, first & second order, Modules of basic rate constants, determination of reaction order. Physical and chemical factors influencing the chemical degradation of pharmaceutical product: temperature, solvent, ionic strength, dielectric constant, specific & general acid base catalysis, Simple numerical problems. Stabilization of medicinal agents against common reactions like hydrolysis & oxidation. Accelerated stability testing in expiration dating of pharmaceutical dosage forms. Photolytic degradation and its prevention

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books: (Latest Editions)**

- Physical Pharmaceutics by Ramasamy C, and Manavalan R.

# PHARMACOLOGY-I

**Course Code : BP404T**

**Credit Units: 04**

**Course Objectives:** The main purpose of the subject is to understand what drugs do to the living organisms and how their effects can be applied to therapeutics. The subject covers the information about the drugs like, mechanism of action, physiological and biochemical effects (pharmacodynamics) as well as absorption, distribution, metabolism and excretion (pharmacokinetics) along with the adverse effects, clinical uses, interactions, doses, contraindications and routes of administration of different classes of drugs.

## **Course Content:**

### **Module-I**

#### **1. General Pharmacology**

- a. Introduction to Pharmacology- Definition, historical landmarks and scope of pharmacology, nature and source of drugs, essential drugs concept and routes of drug administration, Agonists, antagonists(competitive and non competitive), spare receptors, addiction, tolerance, dependence, tachyphylaxis, idiosyncrasy, allergy.
- b. Pharmacokinetics- Membrane transport, absorption, distribution, metabolism and excretion of drugs .Enzyme induction, enzyme inhibition, kinetics of elimination

### **Module-II**

#### **General Pharmacology**

- a. Pharmacodynamics- Principles and mechanisms of drug action. Receptor theories and classification of receptors, regulation of receptors. drug receptors interactions signal transduction mechanisms, G-protein–coupled receptors, ion channel receptor, transmembrane enzyme linked receptors, transmembrane JAK-STAT binding receptor and receptors that regulate transcription factors, dose response relationship, therapeutic index, combined effects of drugs and factors modifying drug action.
- b. Adverse drug reactions.
- c. Drug interactions (pharmacokinetic and pharmacodynamic)
- d. Drug discovery and clinical evaluation of new drugs -Drug discovery phase, preclinical evaluation phase, clinical trial phase, phases of clinical trials and pharmacovigilance.

### **Module-III**

#### **2. Pharmacology of drugs acting on peripheral nervous system**

- a. Organization and function of ANS.
- b. Neurohumoral transmission,co-transmission and classification of neurotransmitters.
- c. Parasympathomimetics, Parasympatholytics, Sympathomimetics, sympatholytics.
- d. Neuromuscular blocking agents and skeletal muscle relaxants (peripheral).
- e. Local anesthetic agents.
- f. Drugs used in myasthenia gravis and glaucoma

### **Module-IV**

#### **3. Pharmacology of drugs acting on central nervous system**

- a. Neurohumoral transmission in the C.N.S.special emphasis on importance of various neurotransmitters like with GABA, Glutamate, Glycine, serotonin, dopamine.
- b. General anesthetics and pre-anesthetics.
- c. Sedatives, hypnotics and centrally acting muscle relaxants.
- d. Anti-epileptics

e. Alcohols and disulfiram

#### Module-V

#### 3. Pharmacology of drugs acting on central nervous system

- Psychopharmacological agents: Antipsychotics, antidepressants, anti-anxiety agents, anti-manics and hallucinogens.
- Drugs used in Parkinsons disease and Alzheimer's disease.
- CNS stimulants and nootropics.
- Opioid analgesics and antagonists
- Drug addiction, drug abuse, tolerance and dependence.

#### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACOGNOSY AND PHYTOCHEMISTRY-I

**Course Code : BP405T**

**Credit Units: 04**

**Course Objectives:** The subject involves the fundamentals of Pharmacognosy like scope, classification of crude drugs, their identification and evaluation, phytochemicals present in them and their medicinal properties.

**Course Content:**

## **Module-I**

### **Introduction to Pharmacognosy:**

- (a) Definition, history, scope and development of Pharmacognosy
- (b) Sources of Drugs – Plants, Animals, Marine & Tissue culture
- (c) Organized drugs, unorganized drugs (dried latex, dried juices, dried extracts, gums and mucilages, oleoresins and oleo- gum -resins).

### **Classification of drugs:**

Alphabetical, morphological, taxonomical, chemical, pharmacological, chemo and sero taxonomical classification of drugs

### **Quality control of Drugs of Natural Origin:**

Adulteration of drugs of natural origin. Evaluation by organoleptic, microscopic, physical, chemical and biological methods and properties.

Quantitative microscopy of crude drugs including lycopodium spore method, leaf constants, camera lucida and diagrams of microscopic objects to scale with camera lucida.

## **Module-II**

### **Cultivation, Collection, Processing and storage of drugs of natural origin:**

Cultivation and Collection of drugs of natural origin

Factors influencing cultivation of medicinal plants.

Plant hormones and their applications.

Polyploidy, mutation and hybridization with reference to medicinal plants

### **Conservation of medicinal plants**

## **Module-III**

### **Plant tissue culture:**

Historical development of plant tissue culture, types of cultures, Nutritional requirements, growth and their maintenance.

Applications of plant tissue culture in pharmacognosy.

Edible vaccines

## **Module-IV**

### **Pharmacognosy in various systems of medicine:**

Role of Pharmacognosy in allopathy and traditional systems of medicine namely, Ayurveda, Unani, Siddha, Homeopathy and Chinese systems of medicine.

### **Introduction to secondary metabolites:**

Definition, classification, properties and test for identification of Alkaloids, Glycosides, Flavonoids, Tannins, Volatile oil and Resins

## Module-V

Study of biological source, chemical nature and uses of drugs of natural origin containing following drugs

### Plant Products:

Fibers - Cotton, Jute, Hemp

Hallucinogens, Teratogens, Natural allergens

### Primary metabolites:

General introduction, detailed study with respect to chemistry, sources, preparation, evaluation, preservation, storage, therapeutic used and commercial utility as Pharmaceutical

Aids and/or Medicines for the following Primarymetabolites:

**Carbohydrates:** Acacia, Agar, Tragacanth, Honey

**Proteins and Enzymes :** Gelatin, casein, proteolytic enzymes (Papain, bromelain, serratiopeptidase, urokinase, streptokinase, pepsin).

**Lipids(Waxes, fats, fixed oils) :** Castor oil, Chaulmoogra oil, Wool Fat, Bees Wax

### Marine Drugs:

Novel medicinal agents from marine sources

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

## MEDICINAL CHEMISTRY PRACTICAL-I

Course Code : BP406P

Credit Units: 02

### List of experiments

#### I Preparation of drugs/ intermediates

- 1,3-pyrazole
- 1,3-oxazole
- Benzimidazole
- Benztriazole
- 2,3- diphenyl quinoxaline
- Benzocaine
- Phenytoin
- Phenothiazine
- Barbiturate

#### II Assay of drugs

- Chlorpromazine
- Phenobarbitone
- Atropine
- Ibuprofen
- Aspirin
- Furosemide

#### III Determination of Partition coefficient for any two drugs

#### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## PHYSICAL PHARMACEUTICS PRACTICAL-II

Course Code : BP407P

Credit Units: 02

### List of experiments

1. Determination of particle size, particle size distribution using sieving method
2. Determination of particle size, particle size distribution using Microscopic method
3. Determination of bulk density, true density and porosity
4. Determine the angle of repose and influence of lubricant on angle of repose
5. Determination of viscosity of liquid using Ostwald's viscometer
6. Determination sedimentation volume with effect of different suspending agent
7. Determination sedimentation volume with effect of different concentration of single suspending agent
8. Determination of viscosity of semisolid by using Brookfield viscometer
9. Determination of reaction rate constant first order.
10. Determination of reaction rate constant second order
11. Accelerated stability studies

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## PHARMACOLOGY PRACTICAL-I

Course Code : BP408P

Credit Units: 02

### List of experiments

1. Introduction to experimental pharmacology.
2. Commonly used instruments in experimental pharmacology.
3. Study of common laboratory animals.
4. Maintenance of laboratory animals as per CPCSEA guidelines.
5. Common laboratory techniques. Blood withdrawal, serum and plasma separation, anesthetics and euthanasia used for animal studies.
6. Study of different routes of drugs administration in mice/rats.
7. Study of effect of hepatic microsomal enzyme inducers on the phenobarbitone sleeping time in mice.
8. Effect of drugs on ciliary motility of frog oesophagus
9. Effect of drugs on rabbit eye.
10. Effects of skeletal muscle relaxants using rota-rod apparatus.
11. Effect of drugs on locomotor activity using actophotometer.
12. Anticonvulsant effect of drugs by MES and PTZ method.
13. Study of stereotype and anti-catatonic activity of drugs on rats/mice.
14. Study of anxiolytic activity of drugs using rats/mice.
15. Study of local anesthetics by different methods

*Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos*

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# PHARMACOGNOSY AND PHYTOCHEMISTRY PRACTICAL-I

Course Code : BP409P

Credit Units: 02

## List of experiments

1. Analysis of crude drugs by chemical tests: (i) Tragacanth (ii) Acacia (iii) Agar (iv) Gelatin (v) starch (vi) Honey (vii) Castor oil
2. Determination of stomatal number and index
3. Determination of vein islet number, vein islet termination and palisade ratio.
4. Determination of size of starch grains, calcium oxalate crystals by eye piece micrometer
5. Determination of Fiber length and width
6. Determination of number of starch grains by Lycopodium spore method
7. Determination of Ash value
8. Determination of Extractive values of crude drugs
9. Determination of moisture content of crude drugs
10. Determination of swelling index and foaming

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## Syllabus - Fifth Semester

### MEDICINAL CHEMISTRY-II

**Course Code : BP501T**

**Credit Units: 04**

**Course Objectives:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasizes on structure activity relationships of drugs, importance of physicochemical properties and metabolism of drugs. The syllabus also emphasizes on chemical synthesis of important drugs under each class.

**Course Content:**

Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted (\*)

**Module-I**

**Antihistaminic agents:** Histamine, receptors and their distribution in the humanbody

**H1-antagonists:** Diphenhydramine hydrochloride\*, Dimenhydrinate, Doxylamines succinate, Clemastine fumarate, Diphenylpyraline hydrochloride, Tripelenamine hydrochloride, Chlorcyclizine hydrochloride, Meclizine hydrochloride, Buclizine hydrochloride, Chlorpheniramine maleate, Triprolidine hydrochloride\*, Phenidamine tartarate, Promethazine hydrochloride\*, Trimeprazine tartrate, Cyproheptadine hydrochloride, Azatidine maleate, Astemizole, Loratadine, Cetirizine, Levocetrazine Cromolyn sodium

**H2-antagonists:** Cimetidine\*, Famotidine, Ranitidin.

**Gastric Proton pump inhibitors:** Omeprazole, Lansoprazole, Rabeprazole, Pantoprazole

**Anti-neoplastic agents:**

**Alkylating agents:** Meclorothamine\*, Cyclophosphamide, Melphalan, Chlorambucil, Busulfan, Thiotepa

**Antimetabolites:** Mercaptopurine\*, Thioguanine, Fluorouracil, Floxuridine, Cytarabine, Methotrexate\*, Azathioprine

**Antibiotics:** Dactinomycin, Daunorubicin, Doxorubicin, Bleomycin

**Plant products:** Etoposide, Vinblastin sulphate, Vincristin sulphate

**Miscellaneous:** Cisplatin, Mitotane.

**Module-II**

**Anti-anginal:**

**Vasodilators:** Amyl nitrite, Nitroglycerin\*, Pentaerythritol tetranitrate, Isosorbide dinitrite\*, Dipyridamole.

**Calcium channel blockers:** Verapamil, Bepridil hydrochloride, Diltiazem hydrochloride, Nifedipine, Amlodipine, Felodipine, Nicardipine, Nimodipine.

**Diuretics:**

Carbonic anhydrase inhibitors: Acetazolamide\*, Methazolamide, Dichlorphenamide. Thiazides: Chlorthiazide\*, Hydrochlorothiazide, Hydroflumethiazide, Cyclothiazide, Loop diuretics: Furosemide\*, Bumetanide, Ethacrynic acid. Potassium sparing Diuretics: Spironolactone, Triamterene, Amiloride.

Osmotic Diuretics: Mannitol

**Anti-hypertensive Agents:** Timolol, Captopril, Lisinopril, Enalapril, Benazepril hydrochloride, Quinapril hydrochloride, Methyldopate hydrochloride,\* Clonidine hydrochloride, Guanethidine monosulphate, Guanabenz acetate, Sodium nitroprusside, Diazoxide, Minoxidil, Reserpine, Hydralazine hydrochloride.

### Module-III

**Anti-arrhythmic Drugs:** Quinidine sulphate, Procainamide hydrochloride, Disopyramide phosphate\*, Phenytoin sodium, Lidocaine hydrochloride, Tocainide hydrochloride, Mexiletine hydrochloride, Lorcaïnide hydrochloride, Amiodarone, Sotalol.

**Anti-hyperlipidemic agents:** Clofibrate, Lovastatin, Cholesteramine and Cholestipol

**Coagulant & Anticoagulants:** Menadione, Acetomenadione, Warfarin\*, Anisindione, clopidogrel

**Drugs used in Congestive Heart Failure:** Digoxin, Digitoxin, Nesiritide, Bosentan, Tezosentan.

### Module-IV

#### Drugs acting on Endocrine system

Nomenclature, Stereochemistry and metabolism of steroids

**Sex hormones:** Testosterone, Nandrolone, Progesterones, Oestriol, Oestradiol, Oestrone, Diethyl stilbestrol.

**Drugs for erectile dysfunction:** Sildenafil, Tadalafil.

**Oral contraceptives:** Mifepristone, Norgestrel, Levonorgestrol

**Corticosteroids:** Cortisone, Hydrocortisone, Prednisolone, Betamethasone, Dexamethasone

**Thyroid and antithyroid drugs:** L-Thyroxine, L-Thyronine, Propylthiouracil, Methimazole.

### Module-V

#### Antidiabetic agents:

Insulin and its preparations

Sulfonyl ureas: Tolbutamide\*, Chlorpropamide, Glipizide, Glimepiride.

Biguanides: Metformin.

Thiazolidinediones: Pioglitazone, Rosiglitazone.

Meglitinides: Repaglinide, Nateglinide.

Glucosidase inhibitors: Acarbose, Voglibose.

**Local Anesthetics:** SAR of Local anesthetics

**Benzoic Acid derivatives:** Cocaine, Hexylcaine, Mepylcaine, Cyclomethycaine, Piperocaine.

**Amino Benzoic acid derivatives:** Benzocaine\*, Butamben, Procaine\*, Butacaine, Propoxycaine, Tetracaine, Benoxinate.

**Lidocaine/Anilide derivatives:** Lignocaine, Mepivacaine, Prilocaine, Etidocaine.

**Miscellaneous:** Phenacaine, Dipreron, Dibucaine.\*

#### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# INDUSTRIAL PHARMACY-I

Course Code : BP502T

Credit Units: 04

**Course Objectives:** Course enables the student to understand and appreciate the influence of pharmaceutical additives and various pharmaceutical dosage forms on the performance of the drug product.

**Course content:**

## Module-I

**Preformulation Studies:** Introduction to preformulation, goals and objectives, study of physicochemical characteristics of drug substances.

**a. Physical properties:** Physical form (crystal & amorphous), particle size, shape, flow properties, solubility profile (pKa, pH, partition coefficient), polymorphism

**b. Chemical Properties:** Hydrolysis, oxidation, reduction, racemisation, polymerization BCS classification of drugs & its significant. Application of preformulation considerations in the development of solid, liquid oral and parenteral dosage forms and its impact on stability of dosage forms.

## Module-II

### Tablets:

a. Introduction, ideal characteristics of tablets, classification of tablets. Excipients, Formulation of tablets, granulation methods, compression and processing problems. Equipments and tablet tooling.

b. Tablet coating: Types of coating, coating materials, formulation of coating composition, methods of coating, equipment employed and defects in coating.

c. Quality control tests: In process and finished product tests

**Liquid orals:** Formulation and manufacturing consideration of syrups and elixirs suspensions and emulsions; Filling and packaging; evaluation of liquid orals official in pharmacopoeia

## Module-III

### Capsules:

a. **Hard gelatin capsules:** Introduction, Production of hard gelatin capsule shells. Size of capsules, Filling, finishing and special techniques of formulation of hard gelatin capsules, manufacturing defects. In process and final product quality control tests for capsules.

b. **Soft gelatin capsules:** Nature of shell and capsule content, size of capsules, importance of base adsorption and minim/gram factors, production, in process and final product quality control tests. Packing, storage and stability testing of soft gelatin capsules and their applications.

**Pellets:** Introduction, formulation requirements, pelletization process, equipments for manufacture of pellets

## Module-IV

### Parenteral Products:

a. Definition, types, advantages and limitations. Preformulation factors and essential requirements, vehicles, additives, importance of isotonicity

b. Production procedure, production facilities and controls, aseptic processing

c. Formulation of injections, sterile powders, large volume parenterals and lyophilized products.

d. Containers and closures selection, filling and sealing of ampoules, vials and infusion fluids. Quality control tests of parenteral products.

**Ophthalmic Preparations:** Introduction, formulation considerations; formulation of eye drops, eye ointments and eye lotions; methods of preparation; labeling, containers; evaluation of ophthalmic preparations

#### **Module-V**

**Cosmetics:** Formulation and preparation of the following cosmetic preparations: lipsticks, shampoos, cold cream and vanishing cream, tooth pastes, hair dyes and sunscreens.

**Pharmaceutical Aerosols:** Definition, propellants, containers, valves, types of aerosol systems; formulation and manufacture of aerosols; Evaluation of aerosols; Quality control and stability studies.

**Packaging Materials Science:** Materials used for packaging of pharmaceutical products, factors influencing choice of containers, legal and official requirements for containers, stability aspects of packaging materials, quality control tests.

#### **Examination Scheme :**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>S/V/Q</b>	<b>ATTD</b>	<b>EE</b>
<b>Weightage(%)</b>	<b>15</b>	<b>3</b>	<b>3</b>	<b>4</b>	<b>75</b>

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

#### **Recommended Books: (Latest Editions)**

- Pharmaceutical dosage forms - Tablets, volume 1 -3 by H.A. Liberman, Leon Lachman & J.B.Schwartz
- Pharmaceutical dosage form - Parenteral medication vol- 1&2 by Liberman & Lachman
- Pharmaceutical dosage form disperse system VOL-1 by Liberman & Lachman
- Modern Pharmaceutics by Gilbert S. Banker & C.T. Rhodes, 3rd Edition
- Remington: The Science and Practice of Pharmacy, 20th edition Pharmaceutical Science (RPS)
- Theory and Practice of Industrial Pharmacy by Liberman & Lachman
- Pharmaceutics- The science of dosage form design by M.E.Aulton, Churchill livingstone, Latest edition
- Introduction to Pharmaceutical Dosage Forms by H. C.Ansel, Lea &Febiger, Philadelphia, 5thedition, 2005
- Drug stability - Principles and practice by Cartensen & C.J. Rhodes, 3rd Edition, Marcel Dekker Series, Vol 107.

# PHARMACOLOGY-II

**Course Code : BP503T**

**Credit Units: 04**

**Course Objectives:** This subject is intended to impart the fundamental knowledge on various aspects (classification, mechanism of action, therapeutic effects, clinical uses, side effects and contraindications) of drugs acting on different systems of body and in addition, emphasis on the basic concepts of bioassay.

## **Course Content:**

### **Module-I**

#### **1. Pharmacology of drugs acting on cardio vascular system**

- a. Introduction to hemodynamic and electrophysiology of heart.
- b. Drugs used in congestive heart failure
- c. Anti-hypertensive drugs.
- d. Anti-anginal drugs.
- e. Anti-arrhythmic drugs.
- f. Anti-hyperlipidemic drugs.

### **Module-II**

#### **1. Pharmacology of drugs acting on cardio vascular system**

- a. Drug used in the therapy of shock.
- b. Hematinics, coagulants and anticoagulants.
- c. Fibrinolytics and anti-platelet drugs
- d. Plasma volume expanders

#### **2. Pharmacology of drugs acting on urinary system**

- a. Diuretics
- b. Anti-diuretics.

### **Module-III**

#### **3. Autocoids and related drugs**

- a. Introduction to autocoids and classification
- b. Histamine, 5-HT and their antagonists.
- c. Prostaglandins, Thromboxanes and Leukotrienes.
- d. Angiotensin, Bradykinin and Substance P.
- e. Non-steroidal anti-inflammatory agents
- f. Anti-gout drugs
- g. Antirheumatic drugs

### **Module-IV**

#### **5. Pharmacology of drugs acting on endocrine system**

- a. Basic concepts in endocrine pharmacology.
- b. Anterior Pituitary hormones- analogues and their inhibitors.
- c. Thyroid hormones- analogues and their inhibitors.
- d. Hormones regulating plasma calcium level- Parathormone, Calcitonin and Vitamin-D.
- d. Insulin, Oral Hypoglycemic agents and glucagon.
- e. ACTH and corticosteroids.

## Module -V

### 5. Pharmacology of drugs acting on endocrine system

- a. Androgens and Anabolic steroids.
- b. Estrogens, progesterone and oral contraceptives.
- c. Drugs acting on the uterus.

### 6. Bioassay

- a. Principles and applications of bioassay.
- b. Types of bioassay
- c. Bioassay of insulin, oxytocin, vasopressin, ACTH, d-tubocurarine, digitalis, histamine and 5-HT

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACOGNOSY AND PHYTOCHEMISTRY-II

Course Code : BP504T

Credit Units: 04

**Course Objectives:** The main purpose of subject is to impart the students the knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially. Also this subject involves the study of producing the plants and phytochemicals through plant tissue culture, drug interactions and basic principles of traditional system of medicine

## Module-I

### Metabolic pathways in higher plants and their determination

- Brief study of basic metabolic pathways and formation of different secondary metabolites through these pathways- Shikimic acid pathway, Acetate pathways and Amino acid pathway.
- Study of utilization of radioactive isotopes in the investigation of Biogenetic studies.

## Module-II

General introduction, composition, chemistry & chemical classes, biosources, therapeutic uses and commercial applications of following secondary metabolites:

**Alkaloids:** Vinca, Rauwolfia, Belladonna, Opium,

**Phenylpropanoids and Flavonoids:** Lignans, Tea, Ruta

**Steroids, Cardiac Glycosides & Triterpenoids:** Liquorice, Dioscorea, Digitalis

**Volatile oils:** Mentha, Clove, Cinnamon, Fennel, Coriander,

**Tannins:** Catechu, Pterocarpus

**Resins:** Benzoin, Guggul, Ginger, Asafoetida, Myrrh, Colophony

**Glycosides:** Senna, Aloes, Bitter Almond

**Iridoids, Other terpenoids & Naphthaquinones:** Gentian, Artemisia, taxus, carotenoids

## Module-III

Isolation, Identification and Analysis of Phytoconstituents

- Terpenoids: Menthol, Citral, Artemisin
- Glycosides: Glycyrrhetic acid & Rutin
- Alkaloids: Atropine, Quinine, Reserpine, Caffeine
- Resins: Podophyllotoxin, Curcumin

## Module-IV

Industrial production, estimation and utilization of the following phytoconstituents: Forskolin, Sennoside, Artemisinin, Diosgenin, Digoxin, Atropine, Podophyllotoxin, Caffeine, Taxol, Vincristine and Vinblastine

## Module-V

### Basics of Phytochemistry

Modern methods of extraction, application of latest techniques like Spectroscopy, chromatography and electrophoresis in the isolation, purification and identification of crude drugs.

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACEUTICAL JURISPRUDENCE

**Course Code : BP505T**

**Credit Units: 04**

**Course Objectives:** This course is designed to impart basic knowledge on important legislations related to the profession of pharmacy in India.

**Course Content:**

## **Module-I**

### **Drugs and Cosmetics Act, 1940 and its rules 1945:**

Objectives, Definitions, Legal definitions of schedules to the Act and Rules

Import of drugs – Classes of drugs and cosmetics prohibited from import, Import under license or permit. Offences and penalties.

Manufacture of drugs – Prohibition of manufacture and sale of certain drugs,

Conditions for grant of license and conditions of license for manufacture of drugs,

Manufacture of drugs for test, examination and analysis, manufacture of new drug, loan license and repacking license.

## **Module-II**

### **Drugs and Cosmetics Act, 1940 and its rules 1945.**

Detailed study of Schedule G, H, M, N, P, T, U, V, X, Y, Part XII B, Sch F & DMR (OA)

Sale of Drugs – Wholesale, Retail sale and Restricted license. Offences and penalties

Labeling & Packing of drugs- General labeling requirements and specimen labels for drugs and cosmetics, List of permitted colors. Offences and penalties.

Administration of the Act and Rules – Drugs Technical Advisory Board, Central drugs

Laboratory, Drugs Consultative Committee, Government drug analysts, Licensing authorities, controlling authorities, Drugs Inspectors

## **Module-III**

**Pharmacy Act –1948:** Objectives, Definitions, Pharmacy Council of India; its constitution and functions, Education Regulations, State and Joint state pharmacy councils; constitution and functions, Registration of Pharmacists, Offences and Penalties

**Medicinal and Toilet Preparation Act –1955:** Objectives, Definitions, Licensing,

Manufacture In bond and Outside bond, Export of alcoholic preparations,

Manufacture of Ayurvedic, Homeopathic, Patent & Proprietary Preparations.

Offences and Penalties.

**Narcotic Drugs and Psychotropic substances Act-1985 and Rules:** Objectives, Definitions, Authorities and Officers, Constitution and Functions of narcotic & Psychotropic Consultative Committee, National Fund for Controlling the Drug Abuse, Prohibition, Control and Regulation, opium poppy cultivation and production of poppy straw, manufacture, sale and export of opium, Offences and Penalties

## **Module -IV**

**Study of Salient Features of Drugs and Magic Remedies Act and its rules:** Objectives, Definitions, Prohibition of certain advertisements, Classes of Exempted advertisements, Offences and Penalties

**Prevention of Cruelty to animals Act-1960:** Objectives, Definitions, Institutional Animal Ethics Committee, CPCSEA guidelines for Breeding and Stocking of Animals, Performance of Experiments, Transfer and acquisition of animals for experiment, Records, Power to suspend or revoke registration, Offences and Penalties

**National Pharmaceutical Pricing Authority:** Drugs Price Control Order (DPCO)- 2013. Objectives, Definitions, Sale prices of bulk drugs, Retail price of formulations, Retail price and ceiling price of scheduled formulations, National List of Essential Medicines (NLEM)

#### **Module-V**

**Pharmaceutical Legislations** – A brief review, Introduction, Study of drugs enquiry committee, Health survey and development committee, Hathi committee and Mudaliar committee

**Code of Pharmaceutical ethics** Definition, Pharmacist in relation to his job, trade, medical profession and his profession, Pharmacist's oath

**Medical Termination of Pregnancy Act**

**Right to Information Act**

**Introduction to Intellectual Property Rights (IPR)**

#### **Examination Scheme :**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>S/V/Q</b>	<b>ATTD</b>	<b>EE</b>
<b>Weightage(%)</b>	<b>15</b>	<b>3</b>	<b>3</b>	<b>4</b>	<b>75</b>

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

#### **Recommended books: (Latest Edition)**

- Text book of Forensic Pharmacy by B.M. Mithal
- Hand book of drug law-by M.L. Mehra
- A text book of Forensic Pharmacy by N.K. Jain
- Drugs and Cosmetics Act/Rules by Govt. of India publications.
- Medicinal and Toilet preparations act 1955 by Govt. of India publications.
- Narcotic drugs and psychotropic substances act by Govt. of India publications
- Drugs and Magic Remedies act by Govt. of India publication
- Bare Acts of the said laws published by Government. Reference books (Theory)

## INDUSTRIAL PHARMACY PRACTICAL-I

Course Code : BP506P

Credit Units: 02

### List of experiments

1. Preformulation studies on paracetamol/asparin/or any other drug
2. Preparation and evaluation of Paracetamol tablets
3. Preparation and evaluation of Aspirin tablets
4. Coating of tablets- film coating of tables/granules
5. Preparation and evaluation of Tetracycline capsules
6. Preparation of Calcium Gluconate injection
7. Preparation of Ascorbic Acid injection
8. Qulaity control test of (as per IP) marketed tablets and capsules
9. Preparation of Eye drops/ and Eye ointments
10. Preparation of Creams (cold / vanishing cream)
11. Evaluation of Glass containers (as per IP)

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## PHARMACOLOGY PRACTICAL-II

Course Code : BP507P

Credit Units: 02

### List of experiments

1. Introduction to *in-vitro* pharmacology and physiological salt solutions.
2. Effect of drugs on isolated frog heart.
3. Effect of drugs on blood pressure and heart rate of dog.
4. Study of diuretic activity of drugs using rats/mice.
5. DRC of acetylcholine using frog rectus abdominis muscle.
6. Effect of physostigmine and atropine on DRC of acetylcholine using frog rectus abdominis muscle and rat ileum respectively.
7. Bioassay of histamine using guinea pig ileum by matching method.
8. Bioassay of oxytocin using rat uterine horn by interpolation method.
9. Bioassay of serotonin using rat fundus strip by three point bioassay.
10. Bioassay of acetylcholine using rat ileum/colon by four point bioassay.
11. Determination of PA<sub>2</sub> value of prazosin using rat anococcygeus muscle (by Schilds plot method).
12. Determination of PD<sub>2</sub> value using guinea pig ileum.
13. Effect of spasmogens and spasmolytics using rabbit jejunum.
14. Anti-inflammatory activity of drugs using carrageenan induced paw-edema model.
15. Analgesic activity of drug using central and peripheral methods

*Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos*

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## PHARMACOGNOSY AND PHYTOCHEMISTRY PRACTICAL-II

Course Code : BP508P

Credit Units: 02

### List of Experiments

1. Morphology, histology and powder characteristics & extraction & detection of: Cinchona, Cinnamon, Senna, Clove, Ephedra, Fennel and Coriander
2. Exercise involving isolation & detection of active principles
  - a. Caffeine - from tea dust.
  - b. Diosgenin from Dioscorea
  - c. Atropine from Belladonna
  - d. Sennosides from Senna
3. Separation of sugars by Paper chromatography
4. TLC of herbal extract
5. Distillation of volatile oils and detection of phytoconstituents by TLC
6. Analysis of crude drugs by chemical tests: (i) Asafoetida (ii) Benzoin (iii) Colophony (iv) Aloes (v) Myrrh

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

# Syllabus - Sixth Semester

## MEDICINAL CHEMISTRY-III

**Course Code : BP601T**

**Credit Units: 04**

**Course Objectives:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasis on modern techniques of rational drug design like quantitative structure activity relationship (QSAR), Prodrug concept, combinatorial chemistry and Computer aided drug design (CADD). The subject also emphasizes on the chemistry, mechanism of action, metabolism, adverse effects, Structure Activity Relationships (SAR), therapeutic uses and synthesis of important drugs.

**Course Content:**

Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted by (\*)

**Module-I**

**Antibiotics:** Historical background, Nomenclature, Stereochemistry, Structure activity relationship, Chemical degradation classification and important products of the following classes.

**β-Lactam antibiotics:** Penicillin, Cephalosporins, β- Lactamase inhibitors, Monobactams

**Aminoglycosides:** Streptomycin, Neomycin, Kanamycin

**Tetracyclines:** Tetracycline, Oxytetracycline, Chlortetracycline, Minocycline, Doxycycline

**Module-II**

**Antibiotics:** Historical background, Nomenclature, Stereochemistry, Structure activity relationship, Chemical degradation classification and important products of the following classes.

**Macrolide:** Erythromycin, Clarithromycin, Azithromycin.

**Miscellaneous:** Chloramphenicol\*, Clindamycin.

**Prodrugs:** Basic concepts and application of prodrugs design.

**Antimalarials:** Etiology of malaria.

**Quinolines:** SAR, Quinine sulphate, Chloroquine\*, Amodiaquine, Primaquine phosphate, Pamaquine\*, Quinacrine hydrochloride, Mefloquine.

**Biguanides and dihydro triazines:** Cycloguanil pamoate, Proguanil.

**Miscellaneous:** Primethamine, Artesunate, Artemether, Atovaquone.

**Module-III**

**Anti-tubercular Agents**

**Synthetic anti tubercular agents:** Isoniazid\*, Ethionamide, Ethambutol, Pyrazinamide, Para amino salicylic acid.\*

**Anti tubercular antibiotics:** Rifampicin, Rifabutin, Cycloserine, Streptomycin, Capreomycin sulphate.

**Urinary tract anti-infective agents**

**Quinolones:** SAR of quinolones, Nalidixic Acid, Norfloxacin, Enoxacin, Ciprofloxacin\*, Ofloxacin, Lomefloxacin, Sparfloxacin, Gatifloxacin, Moxifloxacin

**Miscellaneous:** Furazolidine, Nitrofurantoin\*, Methanamine.

**Antiviral agents:** Amantadine hydrochloride, Rimantadine hydrochloride, Idoxuridine trifluoride, Acyclovir\*, Gancyclovir, Zidovudine, Didanosine, Zalcitabine, Lamivudine, Loviride, Delavirding, Ribavirin, Saquinavir, Indinavir, Ritonavir.

#### Module-IV

##### **Antifungal agents:**

**Antifungal antibiotics:** Amphotericin-B, Nystatin, Natamycin, Griseofulvin.

**Synthetic Antifungal agents:** Clotrimazole, Econazole, Butoconazole, Oxiconazole Tioconazole, Miconazole\*, Ketoconazole, Terconazole, Itraconazole, Fluconazole, Naftifine hydrochloride, Tolnaftate\*.

**Anti-protozoal Agents:** Metronidazole\*, Tinidazole, Ornidazole, Diloxanide, Iodoquinol, Pentamidine Isethionate, Atovaquone, Eflornithine.

**Anthelmintics:** Diethylcarbamazine citrate\*, Thiabendazole, Mebendazole\*, Albendazole, Niclosamide, Oxamniquine, Praziquantal, Ivermectin.

##### **Sulphonamides and Sulfones**

Historical development, chemistry, classification and SAR of Sulfonamides:

Sulphamethizole, Sulfisoxazole, Sulphamethizine, Sulfacetamide\*, Sulphapyridine, Sulfamethoxazole\*, Sulphadiazine, Mefenide acetate, Sulfasalazine.

**Folate reductase inhibitors:** Trimethoprim\*, Cotrimoxazole.

**Sulfones:** Dapsone\*.

#### Module-V

**Introduction to Drug Design:** Various approaches used in drug design. Physicochemical parameters used in quantitative structure activity relationship (QSAR) such as partition coefficient, Hammett's electronic parameter, Taft's steric parameter and Hansch analysis. Pharmacophore modeling and docking techniques.

**Combinatorial Chemistry:** Concept and applications chemistry: solid phase and solution phase synthesis of combinatorial

##### **Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

##### **Recommended Books (Latest Editions)**

- Wilson and Giswold's Organic medicinal and Pharmaceutical Chemistry.
- Foye's Principles of Medicinal Chemistry.
- Burger's Medicinal Chemistry, Vol I to IV.
- Introduction to principles of drug design- Smith and Williams.
- Remington's Pharmaceutical Sciences.
- Martindale's extra pharmacopoeia.
- Organic Chemistry by I.L. Finar, Vol. II.
- The Organic Chemistry of Drug Synthesis by Lednicher, Vol. 1-5.
- Indian Pharmacopoeia.
- Text book of practical organic chemistry- A.I.Vogel

# PHARMACOLOGY-III

**Course Code : BP602T**

**Credit Units: 04**

**Course Objectives:** This subject is intended to impart the fundamental knowledge on various aspects (classification, mechanism of action, therapeutic effects, clinical uses, side effects and contraindications) of drugs acting on respiratory and gastrointestinal system, infectious diseases, immuno-pharmacology and in addition, emphasis on the principles of toxicology and chronopharmacology.

## **Course Content:**

### **Module-I**

#### **1. Pharmacology of drugs acting on Respiratory system**

- a. Anti -asthmatic drugs
- b. Drugs used in the management of COPD
- c. Expectorants and antitussives
- d. Nasal decongestants
- e. Respiratory stimulants

#### **2. Pharmacology of drugs acting on the Gastrointestinal Tract**

- a. Antiulcer agents.
- b. Drugs for constipation and diarrhoea.
- c. Appetite stimulants and suppressants.
- d. Digestants and carminatives.
- e. Emetics and anti-emetics.

### **Module-II**

#### **3. Chemotherapy**

- a. General principles of chemotherapy.
- b. Sulfonamides and cotrimoxazole.
- c. Antibiotics- Penicillins, cephalosporins, chloramphenicol, macrolides, quinolones and fluoroquinolones, tetracycline and aminoglycosides

### **Module-III**

#### **3. Chemotherapy**

- a. Antitubercular agents
- b. Antileprotic agents
- c. Antifungal agents
- d. Antiviral drugs
- e. Anthelmintics
- f. Antimalarial drugs
- g. Antiamoebic agents

### **Module-IV**

#### **3. Chemotherapy**

- l. Urinary tract infections and sexually transmitted diseases.
- m. Chemotherapy of malignancy.

#### **4. Immunopharmacology**

- a. Immunostimulants
- b. Immunosuppressant

Protein drugs, monoclonal antibodies, target drugs to antigen, biosimilars

## Module-V

### 5. Principles of toxicology

- a. Definition and basic knowledge of acute, subacute and chronic toxicity.
- b. Definition and basic knowledge of genotoxicity, carcinogenicity, teratogenicity and mutagenicity
- c. General principles of treatment of poisoning
- d. Clinical symptoms and management of barbiturates, morphine, organophosphorus compound and lead, mercury and arsenic poisoning.

### 6. Chronopharmacology

- a. Definition of rhythm and cycles.
- b. Biological clock and their significance leading to chronotherapy.

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# HERBAL DRUG TECHNOLOGY

**Course Code : BP603T**

**Credit Units: 04**

**Course Objectives:** This subject gives the student the knowledge of basic understanding of herbal drug industry, the quality of raw material, guidelines for quality of herbal drugs, herbal cosmetics, natural sweeteners, nutraceutical etc. The subject also emphasizes on Good Manufacturing Practices (GMP), patenting and regulatory issues of herbal drugs

## **Course Content:**

### **Module-I**

**Herbs as raw materials:** Definition of herb, herbal medicine, herbal medicinal product, herbal drug preparation. Source of Herbs. Selection, identification and authentication of herbal materials. Processing of herbal raw material

**Biodynamic Agriculture:** Good agricultural practices in cultivation of medicinal plants including Organic farming. Pest and Pest management in medicinal plants: Biopesticides/Bioinsecticides.

#### **Indian Systems of Medicine**

- a) Basic principles involved in Ayurveda, Siddha, Unani and Homeopathy
- b) Preparation and standardization of Ayurvedic formulations viz Aristas and Asawas, Ghutika, Churna, Lehya and Bhasma.

### **Module-II**

**Nutraceuticals:** General aspects, Market, growth, scope and types of products available in the market. Health benefits and role of Nutraceuticals in ailments like Diabetes, CVS diseases, Cancer, Irritable bowel syndrome and various Gastro intestinal diseases. Study of following herbs as health food: Alfaalfa, Chicory, Ginger, Fenugreek, Garlic, Honey, Amla, Ginseng, Ashwagandha, Spirulina

**Herbal-Drug and Herb-Food Interactions:** General introduction to interaction and classification. Study of following drugs and their possible side effects and interactions: Hypercium, kava-kava, Ginkobiloba, Ginseng, Garlic, Pepper & Ephedra.

### **Module-III**

#### **Herbal Cosmetics**

Sources and description of raw materials of herbal origin used via, fixed oils, waxes, gums colours, perfumes, protective agents, bleaching agents, antioxidants in products such as skin care, hair care and oral hygiene products.

#### **Herbal excipients:**

Herbal Excipients – Significance of substances of natural origin as excipients – colorants, sweeteners, binders, diluents, viscosity builders, disintegrants, flavors & perfumes.

#### **Herbal formulations :**

Conventional herbal formulations like syrups, mixtures and tablets and Novel dosage forms like phytosomes

### **Module-IV**

**Evaluation of Drugs** WHO & ICH guidelines for the assessment of herbal drugs Stability testing of herbal drugs.

#### **Patenting and Regulatory requirements of natural products:**

- a) Definition of the terms: Patent, IPR, Farmers right, Breeder's right, Bioprospecting and Biopiracy
- b) Patenting aspects of Traditional Knowledge and Natural Products. Case study of Curcuma & Neem.

**Regulatory Issues** - Regulations in India (ASU DTAB, ASU DCC), Regulation of manufacture of ASU drugs - Schedule Z of Drugs & Cosmetics Act for ASU drugs.

#### **Module-V**

**General Introduction to Herbal Industry:** Herbal drugs industry: Present scope and future prospects. A brief account of plant based industries and institutions involved in work on medicinal and aromatic plants in India.

#### **Schedule T – Good Manufacturing Practice of Indian systems of medicine**

Components of GMP (Schedule – T) and its objectives

Infrastructural requirements, working space, storage area, machinery and equipments, standard operating procedures, health and hygiene, documentation and records.

#### **Examination Scheme :**

# BIOPHARMACEUTICS AND PHARMACOKINETICS

Course Code : BP604T

Credit Units: 04

**Course Objectives:** This subject is designed to impart knowledge and skills of Biopharmaceutics and pharmacokinetics and their applications in pharmaceutical development, design of dose and dosage regimen and in solving the problems arising therein.

**Course Content:**

## Module-I

### Introduction to Biopharmaceutics

**Absorption;** Mechanisms of drug absorption through GIT, factors influencing drug absorption through GIT, absorption of drug from Non per oral extra-vascular routes, **Distribution** Tissue permeability of drugs, binding of drugs, apparent, volume of drug distribution, plasma and tissue protein binding of drugs, factors affecting protein-drug binding. Kinetics of protein binding, Clinical significance of protein binding of drugs

## Module-II

**Elimination:** Drug metabolism and basic understanding metabolic pathways renal excretion of drugs, factors affecting renal excretion of drugs, renal clearance, Non renal routes of drug excretion of drugs

**Bioavailability and Bioequivalence:** Definition and Objectives of bioavailability, absolute and relative bioavailability, measurement of bioavailability, *in-vitro* drug dissolution models, *in-vitro-in-vivo* correlations, bioequivalence studies, methods to enhance the dissolution rates and bioavailability of poorly soluble drugs.

## Module-III

**Pharmacokinetics:** Definition and introduction to Pharmacokinetics, Compartment models, Non compartment models, physiological models, One compartment open model. (a). Intravenous Injection (Bolus) (b). Intravenous infusion and (c) Extra vascular administrations. Pharmacokinetics parameters -  $KE$ ,  $t_{1/2}$ ,  $V_d$ ,  $AUC$ ,  $K_a$ ,  $Cl_t$  and  $CLR$ - definitions methods of eliminations, understanding of their significance and application

## Module-IV

**Multicompartment models:** Two compartment open model. IV bolus Kinetics of multiple dosing, steady state drug levels, calculation of loading and maintenance doses and their significance in clinical settings.

## Module-V

**Nonlinear Pharmacokinetics:** a. Introduction, b. Factors causing Non-linearity. c. Michaelis-menton method of estimating parameters, Explanation with example of drugs.

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACEUTICAL BIOTECHNOLOGY

**Course Code : BP605T**

**Credit Units: 04**

**Course Objectives:** Biotechnology has a long promise to revolutionize the biological sciences and technology. Scientific application of biotechnology in the field of genetic engineering, medicine and fermentation technology makes the subject interesting. Biotechnology is leading to new biological revolutions in diagnosis, prevention and cure of diseases, new and cheaper pharmaceutical drugs. Biotechnology has already produced transgenic crops and animals and the future promises lot more.

## **Course Contents :**

### **Module-I**

- a) Brief introduction to Biotechnology with reference to Pharmaceutical Sciences.
- b) Enzyme Biotechnology- Methods of enzyme immobilization and applications.
- c) Biosensors- Working and applications of biosensors in Pharmaceutical Industries.
- d) Brief introduction to Protein Engineering.
- e) Use of microbes in industry. Production of Enzymes- General consideration - Amylase, Catalase, Peroxidase, Lipase, Protease, Penicillinase.
- f) Basic principles of genetic engineering.

### **Module-II**

- a) Study of cloning vectors, restriction endonucleases and DNA ligase.
- b) Recombinant DNA technology. Application of genetic engineering in medicine.
- c) Application of r DNA technology and genetic engineering in the production of: i) Interferon ii) Vaccines- hepatitis- B iii) Hormones-Insulin.
- d) Brief introduction to PCR

### **Module-III**

Types of immModuley- humoral immModuley, cellular immModuley

- a) Structure of Immunoglobulins
- b) Structure and Function of MHC
- c) Hypersensitivity reactions, Immune stimulation and Immune suppressions.
- d) General method of the preparation of bacterial vaccines, toxoids, viral vaccine, antitoxins, serum-immune blood derivatives and other products relative to immModuley.
- e) Storage conditions and stability of official vaccines
- f) Hybridoma technology- Production, Purification and Applications
- g) Blood products and Plasma Substitutes.

### **Module-IV**

- a) Immuno blotting techniques- ELISA, Western blotting, Southern blotting.
- b) Genetic organization of Eukaryotes and Prokaryotes
- c) Microbial genetics including transformation, transduction, conjugation, plasmids and transposons.
- d) Introduction to Microbial biotransformation and applications.
- e) Mutation: Types of mutation/mutants.

### **Module-V**

- a) Fermentation methods and general requirements, study of media, equipments, sterilization methods, aeration process, stirring.
- b) Large scale production fermenter design and its various controls.

- c) Study of the production of - penicillins, citric acid, Vitamin B12, Glutamic acid, Griseofulvin,  
 d) Blood Products: Collection, Processing and Storage of whole human blood, dried human plasma, plasma Substitutes.

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACEUTICAL QUALITY ASSURANCE

**Course Code : BP606T**

**Credit Units: 04**

**Course Objectives:** This course deals with the various aspects of quality control and quality assurance aspects of pharmaceutical industries. It deals with the important aspects like cGMP, QC tests, documentation, quality certifications and regulatory affairs.

**Course Content:**

## **Module-I**

**Quality Assurance and Quality Management concepts:** Definition and concept of Quality control, Quality assurance and GMP

**Total Quality Management (TQM):** Definition, elements, philosophies

**ICH Guidelines:** purpose, participants, process of harmonization, Brief overview of QSEM, with special emphasis on Q-series guidelines, ICH stability testing guidelines

**Quality by design (QbD):** Definition, overview, elements of QbD program, tools

**ISO 9000 & ISO14000:** Overview, Benefits, Elements, steps for registration

**NABL accreditation :** Principles and procedures

## **Module-II**

**Organization and personnel:** Personnel responsibilities, training, hygiene and personal records.

**Premises:** Design, construction and plant layout, maintenance, sanitation, environmental control, utilities and maintenance of sterile areas, control of contamination.

**Equipments and raw materials:** Equipment selection, purchase specifications, maintenance, purchase specifications and maintenance of stores for raw materials.

## **Module-III**

**Quality Control:** Quality control test for containers, rubber closures and secondary packing materials.

**Good Laboratory Practices:** General Provisions, Organization and Personnel, Facilities, Equipment, Testing Facilities Operation, Test and Control Articles, Protocol for Conduct of a Nonclinical Laboratory Study, Records and Reports, Disqualification of Testing Facilities

## **Module-IV**

**Complaints:** Complaints and evaluation of complaints, Handling of return good, recalling and waste disposal.

**Document maintenance in pharmaceutical industry:** Batch Formula Record, Master Formula Record, SOP, Quality audit, Quality Review and Quality documentation, Reports and documents, distribution records.

## **Module-V**

**Calibration and Validation:** Introduction, definition and general principles of calibration, qualification and validation, importance and scope of validation, types of validation, validation master plan. Calibration of pH meter, Qualification of UV-Visible spectrophotometer, General principles of Analytical method Validation.

**Warehousing:** Good warehousing practice, materials management

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books: (Latest Edition)**

- Good Laboratory Practice Regulations, 2nd Edition, Sandy Weinberg Vol. 69.
- Quality Assurance of Pharmaceuticals- A compendium of Guide lines and Related materials Vol IWHO Publications.
- A guide to Total Quality Management- Kushik Maitra and Sedhan K Ghosh
- How to Practice GMP's – P P Sharma.
- ISO 9000 and Total Quality Management – Sadhan K Ghosh
- The International Pharmacopoeia – Vol I, II, III, IV- General Methods of Analysis and Quality specification for Pharmaceutical Substances, Excipients and Dosage forms
- Good laboratory Practices – Marcel Deckker Series
- ICH guidelines, ISO 9000 and 14000 guidelines

## MEDICINAL CHEMISTRY PRACTICAL-III

Course Code : BP607P

Credit Units: 02

### List of experiments

#### I Preparation of drugs and intermediates

- 1 Sulphanilamide
- 2 7-Hydroxy, 4-methyl coumarin
- 3 Chlorobutanol
- 4 Triphenyl imidazole
- 5 Tolbutamide
- 6 Hexamine

#### II Assay of drugs

- 1 Isonicotinic acid hydrazide
- 2 Chloroquine
- 3 Metronidazole
- 4 Dapsone
- 5 Chlorpheniramine maleate
- 6 Benzyl penicillin

#### III Preparation of medicinally important compounds or intermediates by Microwave irradiation technique

#### IV Drawing structures and reactions using chem draw®

#### V Determination of physicochemical properties such as logP, clogP, MR, Molecular weight, Hydrogen bond donors and acceptors for class of drugs course content using drug design software Drug likeliness screening (Lipinskies RO5)

#### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## PHARMACOLOGY PRACTICAL-III

Course Code : BP608P

Credit Units: 02

### List of experiments

1. Dose calculation in pharmacological experiments
2. Antiallergic activity by mast cell stabilization assay
3. Study of anti-ulcer activity of a drug using pylorus ligand (SHAY) rat model and NSAIDS induced ulcer model.
4. Study of effect of drugs on gastrointestinal motility
5. Effect of agonist and antagonists on guinea pig ileum
6. Estimation of serum biochemical parameters by using semi- autoanalyser
7. Effect of saline purgative on frog intestine
8. Insulin hypoglycemic effect in rabbit
9. Test for pyrogens ( rabbit method)
10. Determination of acute oral toxicity (LD50) of a drug from a given data
11. Determination of acute skin irritation / corrosion of a test substance
12. Determination of acute eye irritation / corrosion of a test substance
13. Calculation of pharmacokinetic parameters from a given data
14. Biostatistics methods in experimental pharmacology( student's t test, ANOVA)
15. Biostatistics methods in experimental pharmacology (Chi square test, Wilcoxon Signed Rank test)

*\*Experiments are demonstrated by simulated experiments/videos*

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## HERBAL DRUG TECHNOLOGY PRACTICAL

Course Code : BP609P

Credit Units: 02

### List of experiments

1. To perform preliminary phytochemical screening of crude drugs.
2. Determination of the alcohol content of Asava and Arista
3. Evaluation of excipients of natural origin
4. Incorporation of prepared and standardized extract in cosmetic formulations like creams, lotions and shampoos and their evaluation.
5. Incorporation of prepared and standardized extract in formulations like syrups, mixtures and tablets and their evaluation as per Pharmacopoeial requirements.
6. Monograph analysis of herbal drugs from recent Pharmacopoeias
7. Determination of Aldehyde content
8. Determination of Phenol content
9. Determination of total alkaloids

### Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## Syllabus - Seventh Semester

### INSTRUMENTAL METHODS OF ANALYSIS

**Course Code : BP701T**

**Credit Units: 04**

**Course Objectives:** This subject deals with the application of instrumental methods in qualitative and quantitative analysis of drugs. This subject is designed to impart a fundamental knowledge on the principles and instrumentation of spectroscopic and chromatographic technique. This also emphasizes on theoretical and practical knowledge on modern analytical instruments that are used for drug testing.

#### **Course Content:**

##### **Module-I**

**UV Visible spectroscopy:** Electronic transitions, chromophores, auxochromes, spectral shifts, solvent effect on absorption spectra, Beer and Lambert's law, Derivation and deviations. Instrumentation - Sources of radiation, wavelength selectors, sample cells, detectors- Photo tube, Photomultiplier tube, Photo voltaic cell, Silicon Photodiode. Applications - Spectrophotometric titrations, Single component and multi component analysis

**Fluorimetry:** Theory, Concepts of singlet, doublet and triplet electronic states, internal and external conversions, factors affecting fluorescence, quenching, instrumentation and applications

##### **Module-II**

**IR spectroscopy:** Introduction, fundamental modes of vibrations in poly atomic molecules, sample handling, factors affecting vibrations Instrumentation - Sources of radiation, wavelength selectors, detectors - Golay cell, Bolometer, Thermocouple, Thermister, Pyroelectric detector and applications

**Flame Photometry-**Principle, interferences, instrumentation and applications

**Atomic absorption spectroscopy-** Principle, interferences, instrumentation and applications

**Nepheloturbidometry-** Principle, instrumentation and applications

##### **Module-III**

###### **Introduction to chromatography**

**Adsorption and partition column chromatography-**Methodology, advantages, disadvantages and applications.

**Thin layer chromatography-** Introduction, Principle, Methodology, R<sub>f</sub> values, advantages, disadvantages and applications.

**Paper chromatography-**Introduction, methodology, development techniques, advantages, disadvantages and applications

**Electrophoresis-** Introduction, factors affecting electrophoretic mobility, Techniques of paper, gel, capillary electrophoresis, applications

##### **Module-IV**

**Gas chromatography -** Introduction, theory, instrumentation, derivatization, temperature programming, advantages, disadvantages and applications

**High performance liquid chromatography (HPLC)-**Introduction, theory, instrumentation, advantages and applications.

**Module-V**

**Ion exchange chromatography-** Introduction, classification, ion exchange resins, properties, mechanism of ion exchange process, factors affecting ion exchange, methodology and applications

**Gel chromatography-** Introduction, theory, instrumentation and applications

**Affinity chromatography-** Introduction, theory, instrumentation and applications

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest Editions)**

- Instrumental Methods of Chemical Analysis by B.K Sharma
- Organic spectroscopy by Y.R Sharma
- Text book of Pharmaceutical Analysis by Kenneth A. Connors

- Quantitative Analysis of Drugs by D. C. Garrett
- Quantitative Analysis of Drugs in Pharmaceutical Formulations by P. D. Sethi
- Spectrophotometric identification of Organic Compounds by Silverstein

## INDUSTRIAL PHARMACY-II

Course Code : BP702T

Credit Units: 04

**Course Objectives:** This course is designed to impart fundamental knowledge on pharmaceutical product development and translation from laboratory to market

**Course Content:**

### Module-I

**Pilot plant scale up techniques:** General considerations - including significance of personnel requirements, space requirements, raw materials, Pilot plant scale up considerations for solids, liquid orals, semi solids and relevant documentation, SUPAC guidelines, Introduction to platform technology

### Module-II

**Technology development and transfer:** WHO guidelines for Technology Transfer(TT): Terminology, Technology transfer protocol, Quality risk management, Transfer from R & D to production (Process, packaging and cleaning), Granularity of TT Process (API, excipients, finished products, packaging materials) Documentation, Premises and equipments, qualification and validation, quality control, analytical method transfer, Approved regulatory bodies and agencies, Commercialization - practical aspects and problems (case studies), TT agencies in India - APCTD, NRDC, TIFAC, BCIL, TBSE / SIDBI; TT related documentation - confidentiality agreement, licensing, MoUs, legal issues

### Module-III

**Regulatory affairs:** Introduction, Historical overview of Regulatory Affairs, Regulatory authorities, Role of Regulatory affairs department, Responsibility of Regulatory Affairs Professionals

**Regulatory requirements for drug approval:** Drug Development Teams, Non-Clinical Drug Development, Pharmacology, Drug Metabolism and Toxicology, General considerations of Investigational New Drug (IND) Application, Investigator's Brochure (IB) and New Drug Application (NDA), Clinical research / BE studies, Clinical Research Protocols, Biostatistics in Pharmaceutical Product Development, Data Presentation for FDA Submissions, Management of Clinical Studies.

### Module-IV

**Quality Management Systems:** Quality management & Certifications: Concept of Quality, Total Quality Management, Quality by Design (QbD), Six Sigma concept, Out of Specifications (OOS), Change control, Introduction to ISO 9000 series of quality systems standards, ISO 14000, NABL, GLP

### Module-V

**Indian Regulatory Requirements:** Central Drug Standard Control Organization (CDSCO) and State Licensing Authority: Organization, Responsibilities, Certificate of Pharmaceutical Product (COPP), Regulatory requirements and approval procedures for New Drugs.

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# PHARMACY PRACTICE

Course Code : BP703T

Credit Units: 04

**Course Objectives:** In the changing scenario of pharmacy practice in India, for successful practice of Hospital Pharmacy, the students are required to learn various skills like drug distribution, drug information, and therapeutic drug monitoring for improved patient care. In commModuley pharmacy, students will be learning various skills such as dispensing of drugs, responding to minor ailments by providing suitable safe medication, patient counselling for improved patient care in the commModuley set up.

## Course Contents:

### Module-I

**a) Hospital and it's organization:** Definition, Classification of hospital- Primary, Secondary and Tertiary hospitals, Classification based on clinical and non- clinical basis, Organization Structure of a Hospital, and Medical staffs involved in the hospital and their functions.

**b) Hospital pharmacy and its organization:** Definition, functions of hospital pharmacy, Organization structure, Location, Layout and staff requirements, and Responsibilities and functions of hospital pharmacists.

**c) Adverse drug reaction:** Classifications - Excessive pharmacological effects, secondary pharmacological effects, idiosyncrasy, allergic drug reactions, genetically determined toxicity, toxicity following sudden withdrawal of drugs, Drug interaction- beneficial interactions, adverse interactions, and pharmacokinetic drug interactions, Methods for detecting drug interactions, spontaneous case reports and record linkage studies, and Adverse drug reaction reporting and management.

**d) CommModuley Pharmacy:** Organization and structure of retail and wholesale drug store, types and design, Legal requirements for establishment and maintenance of a drug store, Dispensing of proprietary products, maintenance of records of retail and wholesale drug store.

### Module-II

**a) Drug distribution system in a hospital:** Dispensing of drugs to inpatients, types of drug distribution systems, charging policy and labelling, Dispensing of drugs to ambulatory patients, and Dispensing of controlled drugs.

**b) Hospital formulary:** Definition, contents of hospital formulary, Differentiation of hospital formulary and Drug list, preparation and revision, and addition and deletion of drug from hospital formulary.

**c) Therapeutic drug monitoring:** Need for Therapeutic Drug Monitoring, Factors to be considered during the Therapeutic Drug Monitoring, and Indian scenario for Therapeutic Drug Monitoring.

**d) Medication adherence:** Causes of medication non-adherence, pharmacist role in the medication adherence, and monitoring of patient medication adherence.

**e) Patient medication history interview:** Need for the patient medication history interview, medication interview forms.

**f) CommModuley pharmacy management:** Financial, materials, staff, and infrastructure requirements.

### Module-III

**a) Pharmacy and therapeutic committee:** Organization, functions, Policies of the pharmacy and therapeutic committee in including drugs into formulary, inpatient and outpatient prescription, automatic stop order, and emergency drug list preparation.

**b) Drug information services:** Drug and Poison information centre, Sources of drug information, Computerised services, and storage and retrieval of information.

**c) Patient counseling:** Definition of patient counseling; steps involved in patient counseling, and Special

cases that require the pharmacist

**d) Education and training program in the hospital:** Role of pharmacist in the education and training program, Internal and external training program, Services to the nursing homes/clinics, Code of ethics for commModuley pharmacy, and Role of pharmacist in the interdepartmental communication and commModuley health education.

**e) Prescribed medication order and communication skills:** Prescribed medication order- interpretation and legal requirements, and Communication skills- communication with prescribers and patients.

#### Module-IV

**a) Budget preparation and implementation:** Budget preparation and implementation

**b) Clinical Pharmacy:** Introduction to Clinical Pharmacy, Concept of clinical pharmacy, functions and responsibilities of clinical pharmacist, Drug therapy monitoring - medication chart review, clinical review, pharmacist intervention, Ward round participation, Medication history and Pharmaceutical care. Dosing pattern and drug therapy based on Pharmacokinetic & disease pattern.

**c) Over the counter (OTC) sales:** Introduction and sale of over the counter, and Rational use of common over the counter medications.

#### Module-V

**a) Drug store management and inventory control:** Organisation of drug store, types of materials stocked and storage conditions, Purchase and inventory control: principles, purchase procedure, purchase order, procurement and stocking, Economic order quantity, Reorder quantity level, and Methods used for the analysis of the drug expenditure

**b) Investigational use of drugs:** Description, principles involved, classification, control, identification, role of hospital pharmacist, advisory committee.

**c) Interpretation of Clinical Laboratory Tests:** Blood chemistry, hematology, and urinalysis

#### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

#### Recommended Books (Latest Edition):

# NOVEL DRUG DELIVERY SYSTEMS

Course Code : BP704T

Credit Units: 04

**Course Objectives:** This subject is designed to impart basic knowledge on the area of novel drug delivery systems.

**Course Content:**

## Module-I

**Controlled drug delivery systems:** Introduction, terminology/definitions and rationale, advantages, disadvantages, selection of drug candidates. Approaches to design controlled release formulations based on diffusion, dissolution and ion exchange principles. Physicochemical and biological properties of drugs relevant to controlled release formulations

**Polymers:** Introduction, classification, properties, advantages and application of polymers in formulation of controlled release drug delivery systems.

## Module-II

**Microencapsulation:** Definition, advantages and disadvantages, microspheres /microcapsules, microparticles, methods of microencapsulation, applications

**Mucosal Drug Delivery system:** Introduction, Principles of bioadhesion / mucoadhesion, concepts, advantages and disadvantages, transmucosal permeability and formulation considerations of buccal delivery systems

**Implantable Drug Delivery Systems:** Introduction, advantages and disadvantages, concept of implants and osmotic pump

## Module-III

**Transdermal Drug Delivery Systems:** Introduction, Permeation through skin, factors affecting permeation, permeation enhancers, basic components of TDDS, formulation approaches

**Gastroretentive drug delivery systems:** Introduction, advantages, disadvantages, approaches for GRDDS – Floating, high density systems, inflatable and gastroadhesive systems and their applications

**Nasopulmonary drug delivery system:** Introduction to Nasal and Pulmonary routes of drug delivery, Formulation of Inhalers (dry powder and metered dose), nasal sprays, nebulizers

## Module-IV

**Targeted drug Delivery:** Concepts and approaches advantages and disadvantages, introduction to liposomes, niosomes, nanoparticles, monoclonal antibodies and their applications

## Module-V

**Ocular Drug Delivery Systems:** Introduction, intra ocular barriers and methods to overcome – Preliminary study, ocular formulations and ocuserts

**Intrauterine Drug Delivery Systems:** Introduction, advantages and disadvantages, development of intra uterine devices (IUDs) and applications

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# INSTRUMENTAL METHODS OF ANALYSIS PRACTICAL

Course Code : BP705P

Credit Units: 02

## List of experiments

- 1 Determination of absorption maxima and effect of solvents on absorption maxima of organic compounds
- 2 Estimation of dextrose by colorimetry
- 3 Estimation of sulfanilamide by colorimetry
- 4 Simultaneous estimation of ibuprofen and paracetamol by UV spectroscopy
- 5 Assay of paracetamol by UV- Spectrophotometry
- 6 Estimation of quinine sulfate by fluorimetry
- 7 Study of quenching of fluorescence
- 8 Determination of sodium by flame photometry
- 9 Determination of potassium by flame photometry
- 10 Determination of chlorides and sulphates by nephelo turbidometry
- 11 Separation of amino acids by paper chromatography
- 12 Separation of sugars by thin layer chromatography
- 13 Separation of plant pigments by column chromatography
- 14 Demonstration experiment on HPLC
- 15 Demonstration experiment on Gas Chromatography

## Examination Scheme :

IA				EE	
A	PR	LR	V	PR	V
02	05	03	05	25	10

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

## PRACTICE SCHOOL

**Course Code: BP706PS**

**Credit Units: 06**

**Objectives:** Every candidate shall undergo practice school for a period of 150 hours evenly distributed throughout the semester. The student shall opt any one of the domains for practice school declared by the program committee from time to time. At the end of the practice school, every student shall submit a printed report (in triplicate) on the practice school he/she attended (not more than 25 pages). Along with the exams of Semester VII, the report submitted by the student, knowledge and skills acquired by the student through practice school shall be evaluated by the subject experts at college level and grade point shall be awarded.

**Examination Scheme:**

**Total: 150 marks**

**Internal Marks : 25**

**Continuous Mode :**

Assignment	Periodic report
10	15

**External Marks : 125**

Objective(s) of the work done	15 Marks
Learning Outcomes	30 Marks
Presentation of Work	30 Marks
Communication skills	20 Marks
Question and answer skills	30 Marks

**Total = 125 Marks**

## Syllabus - Eighth Semester

### BIOSTATISTICS AND RESEARCH METHODOLOGY

**Course Code : BP801T**

**Credit Units: 04**

**Course Objectives:** To understand the applications of Biostatistics in Pharmacy. This subject deals with descriptive statistics, Graphics, Correlation, Regression, logistic regression Probability theory, Sampling technique, Parametric tests, Non Parametric tests, ANOVA, Introduction to Design of Experiments, Phases of Clinical trials and Observational and Experimental studies, SPSS, R and MINITAB statistical software's, analyzing the statistical data using Excel.

#### **Course Content:**

##### **Module-I**

**Introduction:** Statistics, Biostatistics, Frequency distribution

**Measures of central tendency:** Mean, Median, Mode- Pharmaceutical examples

**Measures of dispersion:** Dispersion, Range, standard deviation, Pharmaceutical problems

**Correlation:** Definition, Karl Pearson's coefficient of correlation, Multiple correlation - Pharmaceuticals examples

##### **Module-II**

**Regression:** Curve fitting by the method of least squares, fitting the lines  $y = a + bx$  and  $x = a + by$ , Multiple regression, standard error of regression- Pharmaceutical Examples

**Probability:** Definition of probability, Binomial distribution, Normal distribution, Poisson's distribution, properties - problems

Sample, Population, large sample, small sample, Null hypothesis, alternative hypothesis, sampling, essence of sampling, types of sampling, Error-I type, Error-II type, Standard error of mean (SEM) - Pharmaceutical examples

**Parametric test:** t-test (Sample, Pooled or Unpaired and Paired) , ANOVA, (One way and Two way), Least Significance difference

##### **Module-III**

**Non Parametric tests:** Wilcoxon Rank Sum Test, Mann-Whitney U test, Kruskal-Wallis test, Friedman Test

**Introduction to Research:** Need for research, Need for design of Experiments, Experimental Design Technique, plagiarism

**Graphs:** Histogram, Pie Chart, Cubic Graph, response surface plot, Counter Plot graph

**Designing the methodology:** Sample size determination and Power of a study, Report writing and presentation of data, Protocol, Cohorts studies, Observational studies, Experimental studies, Designing clinical trial, various phases.

##### **Module-IV**

Blocking and confounding system for Two-level factorials

**Regression modeling:** Hypothesis testing in Simple and Multiple regression models

**Introduction to Practical components of Industrial and Clinical Trials Problems:** Statistical Analysis Using Excel, SPSS, MINITAB®, DESIGN OF EXPERIMENTS, R - Online Statistical Software's to Industrial and Clinical trial approach

## Module-V

### Design and Analysis of experiments:

**Factorial Design:** Definition, 22, 23 design. Advantage of factorial design

**Response Surface methodology:** Central composite design, Historical design, Optimization Techniques

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

### Recommended Books (Latest edition):

- Pharmaceutical statistics- Practical and clinical applications, Sanford Bolton, publisher Marcel Dekker Inc. NewYork.
- Fundamental of Statistics – Himalaya Publishing House- S.C.Guptha
- Design and Analysis of Experiments –PHI Learning Private Limited, R. Pannerselvam,
- Design and Analysis of Experiments – Wiley Students Edition, Douglas and C. Montgomery

## SOCIAL AND PREVENTIVE PHARMACY

Course Code : BP802T

Credit Units: 04

**Course Objectives:** The purpose of this course is to introduce to students a number of health issues and their challenges. This course also introduced a number of national health programmes. The roles of the pharmacist in these contexts are also discussed.

### Course Content:

#### Module-I:

**Concept of health and disease:** Definition, concepts and evaluation of public health. Understanding the concept of prevention and control of disease, social causes of diseases and social problems of the sick.

**Social and health education:** Food in relation to nutrition and health, Balanced diet, Nutritional deficiencies, Vitamin deficiencies, Malnutrition and its prevention.

**Sociology and health:** Socio cultural factors related to health and disease, Impact of urbanization on health and disease, Poverty and health

**Hygiene and health:** personal hygiene and health care; avoidable habits

#### Module-II:

**Preventive medicine:** General principles of prevention and control of diseases such as cholera, SARS, Ebola virus, influenza, acute respiratory infections, malaria, chicken guinea, dengue, lymphatic filariasis, pneumonia, hypertension, diabetes mellitus, cancer, drug addiction-drug substance abuse

#### Module-III:

**National health programs, its objectives, functioning and outcome of the following:** HIV AND AIDS control programme, TB, Integrated disease surveillance program (IDSP), National leprosy control programme, National mental health program, National programme for prevention and control of deafness, Universal immunization programme, National programme for control of blindness, Pulse polio programme.

#### Module-IV:

National health intervention programme for mother and child, National family welfare programme, National tobacco control programme, National Malaria Prevention Program, National programme for the health care for the elderly, Social health programme; role of WHO in Indian national program

#### Module-V:

CommModuley services in rural, urban and school health: Functions of PHC, Improvement in rural sanitation, national urban health mission, Health promotion and education in school.

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest edition):**

- Short Textbook of Preventive and Social Medicine, Prabhakara GN, 2nd Edition, 2010, ISBN: 9789380704104, JAYPEE Publications
- Textbook of Preventive and Social Medicine (Mahajan and Gupta), Edited by Roy
- Rabindra Nath, Saha Indranil, 4th Edition, 2013, ISBN: 9789350901878, JAYPEE Publications
- Review of Preventive and Social Medicine (Including Biostatistics), Jain Vivek, 6<sup>th</sup> Edition, 2014, ISBN: 9789351522331, JAYPEE Publications
- Essentials of Community Medicine—A Practical Approach, Hiremath Lalita D,
- Hiremath Dhananjaya A, 2nd Edition, 2012, ISBN: 9789350250440, JAYPEE Publications
- Park Textbook of Preventive and Social Medicine, K Park, 21st Edition, 2011,
- ISBN-14: 9788190128285, BANARSIDAS BHANOT PUBLISHERS.
- Community Pharmacy Practice, Ramesh Adepu, BSP publishers, Hyderabad

# PHARMA MARKETING MANAGEMENT

Course Code : BP803ET

Credit Units: 04

**Course Objective:** The course aims to provide an understanding of marketing concepts and techniques and their applications in the pharmaceutical industry.

## Course Contents:

### Module-I

**Marketing:** Definition, general concepts and scope of marketing; Distinction between marketing & selling; Marketing environment; Industry and competitive analysis; Analyzing consumer buying behavior; industrial buying behavior.

**Pharmaceutical market:** Quantitative and qualitative aspects; size and composition of the market; demographic descriptions and socio-psychological characteristics of the consumer; market segmentation & targeting. Consumer profile; Motivation and prescribing habits of the physician; patients' choice of physician and retail pharmacist. Analyzing the Market; Role of market research.

### Module-II

**Product decision:** Classification, product line and product mix decisions, product life cycle, product portfolio analysis; product positioning; New product decisions; Product branding, packaging and labeling decisions, Product management in pharmaceutical industry.

### Module-III

**Promotion:** Methods, determinants of promotional mix, promotional budget; An overview of personal selling, advertising, direct mail, journals, sampling, retailing, medical exhibition, public relations, online promotional techniques for OTC Products.

### Module-IV

**Pharmaceutical marketing channels:** Designing channel, channel members, selecting the appropriate channel, conflict in channels, physical distribution management: Strategic importance, tasks in physical distribution management.

**Professional sales representative (PSR):** Duties of PSR, purpose of detailing, selection and training, supervising, norms for customer calls, motivating, evaluating, compensation and future prospects of the PSR.

### Module-V

**Pricing:** Meaning, importance, objectives, determinants of price; pricing methods and strategies, issues in price management in pharmaceutical industry. An overview of DPCO (Drug Price Control Order) and NPPA (National Pharmaceutical Pricing Authority).

**Emerging concepts in marketing:** Vertical & Horizontal Marketing; Rural Marketing; Consumerism; Industrial Marketing; Global Marketing.

## Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books: (Latest Editions)**

- Philip Kotler and Kevin Lane Keller: Marketing Management, Prentice Hall of India, New Delhi
- Walker, Boyd and Larreche : Marketing Strategy- Planning and Implementation, Tata MC GrawHill, New Delhi.
- Dhruv Grewal and Michael Levy: Marketing, Tata MC Graw Hill
- Arun Kumar and N Menakshi: Marketing Management, Vikas Publishing, India
- Rajan Saxena: Marketing Management; Tata MC Graw-Hill (India Edition)
- Ramaswamy, U.S & Nanakamari, S: Marketing Managemnt:Global Perspective, IndianContext,Macmilan India, New Delhi.
- Shanker, Ravi: Service Marketing, Excell Books, New Delhi
- Subba Rao Changanti, Pharmaceutical Marketing in India (GIFT – Excel series) Excel Publications.

# PHARMACEUTICAL REGULATORY SCIENCE

Course Code : BP804ET

Credit Units: 04

**Course Objectives:** This course is designed to impart the fundamental knowledge on the regulatory requirements for approval of new drugs, and drug products in regulated markets of India & other countries like US, EU, Japan, Australia, UK etc. It prepares the students to learn in detail on the regulatory requirements, documentation requirements, and registration procedures for marketing the drug products.

## Course Content:

### Module-I

**New Drug Discovery and development:** Stages of drug discovery, Drug development process, pre-clinical studies, non-clinical activities, clinical studies, Innovator and generics, Concept of generics, Generic drug product development.

### Module-II

**Regulatory Approval Process:** Approval processes and timelines involved in Investigational New Drug (IND), New Drug Application (NDA), Abbreviated New Drug Application (ANDA). Changes to an approved NDA / ANDA.

**Regulatory authorities and agencies:** Overview of regulatory authorities of India, United States, European Union, Australia, Japan, Canada (Organization structure and types of applications)

### Module-III

**Registration of Indian drug product in overseas market:** Procedure for export of pharmaceutical products, Technical documentation, Drug Master Files (DMF), Common Technical Document (CTD), electronic Common Technical Document (eCTD), ASEAN Common Technical Document (ACTD) research.

### Module-IV

**Clinical trials:** Developing clinical trial protocols, Institutional Review Board / Independent Ethics committee - formation and working procedures, Informed consent process and procedures, GCP obligations of Investigators, sponsors & Monitors, Managing and Monitoring clinical trials, Pharmacovigilance - safety monitoring in clinical trials

### Module-V

**Regulatory Concepts:** Basic terminology, guidance, guidelines, regulations, Laws and Acts, Orange book, Federal Register, Code of Federal Regulatory, Purple book

## Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended books (Latest edition):**

- Drug Regulatory Affairs by Sachin Itkar, Dr. N.S. Vyawahare, Nirali Prakashan.
- The Pharmaceutical Regulatory Process, Second Edition Edited by Ira R. Berry and Robert P. Martin, Drugs and the Pharmaceutical Sciences, Vol.185. Informa Health care Publishers.
- New Drug Approval Process: Accelerating Global Registrations By Richard A Guarino, MD, 5th edition, Drugs and the Pharmaceutical Sciences, Vol.190.
- Guidebook for drug regulatory submissions / Sandy Weinberg. By John Wiley & Sons. Inc.
- FDA Regulatory Affairs: a guide for prescription drugs, medical devices, and biologics /edited by Douglas J. Pisano, David Mantus.
- Generic Drug Product Development, Solid Oral Dosage forms, Leon Shargel and Isader Kaufer, Marcel Dekker series, Vol.143
- Clinical Trials and Human Research: A Practical Guide to Regulatory Compliance By Fay A. Rozovsky and Rodney K. Adams
- Principles and Practices of Clinical Research, Second Edition Edited by John I. Gallin and Frederick P. Ognibene
- Drugs: From Discovery to Approval, Second Edition By Rick Ng

# PHARMACOVIGILANCE

**Course Code : BP805ET**

**Credit Units: 04**

**Course Objectives:** This paper will provide an opportunity for the student to learn about development of pharmacovigilance as a science, basic terminologies used in pharmacovigilance, global scenario of Pharmacovigilance, train students on establishing pharmacovigilance programme in an organization, various methods that can be used to generate safety data and signal detection. This paper also develops the skills of classifying drugs, diseases and adverse drug reactions.

## **Course Content:**

### **Module-I**

#### **Introduction to Pharmacovigilance**

History and development of Pharmacovigilance  
Importance of safety monitoring of Medicine  
WHO international drug monitoring programme  
Pharmacovigilance Program of India(PvPI)

#### **Introduction to adverse drug reactions**

Definitions and classification of ADRs  
Detection and reporting  
Methods in Causality assessment  
Severity and seriousness assessment  
Predictability and preventability assessment  
Management of adverse drug reactions

#### **Basic terminologies used in pharmacovigilance**

Terminologies of adverse medication related events  
Regulatory terminologies

### **Module-II**

#### **Drug and disease classification**

Anatomical, therapeutic and chemical classification of drugs  
International classification of diseases  
Daily defined doses  
International Non proprietary Names for drugs

#### **Drug dictionaries and coding in pharmacovigilance**

WHO adverse reaction terminologies  
MedDRA and Standardised MedDRA queries  
WHO drug dictionary  
Eudravigilance medicinal product dictionary

#### **Information resources in pharmacovigilance**

Basic drug information resources  
Specialised resources for ADRs

#### **Establishing pharmacovigilance programme**

Establishing in a hospital  
Establishment & operation of drug safety department in industry  
Contract Research Organisations (CROs)  
Establishing a national programme

### **Module-III**

#### **Vaccine safety surveillance**

Vaccine Pharmacovigilance

Vaccination failure

Adverse events following immunization

#### **Pharmacovigilance methods**

Passive surveillance – Spontaneous reports and case series

Stimulated reporting

Active surveillance – Sentinel sites, drug event monitoring and registries

Comparative observational studies – Cross sectional study, case control study and cohort study

Targeted clinical investigations

#### **Communication in pharmacovigilance**

Effective communication in Pharmacovigilance

Communication in Drug Safety Crisis management

Communicating with Regulatory Agencies, Business Partners, Healthcare facilities & Media

### **Module-IV**

#### **Safety data generation**

Pre clinical phase

Clinical phase

Post approval phase (PMS)

#### **ICH Guidelines for Pharmacovigilance**

Organization and objectives of ICH

Expedited reporting

Individual case safety reports

Periodic safety update reports

Post approval expedited reporting

Pharmacovigilance planning

Good clinical practice in pharmacovigilance studies

### **Module-V**

#### **Pharmacogenomics of adverse drug reactions**

Genetics related ADR with example focusing PK parameters.

#### **Drug safety evaluation in special population**

Paediatrics

Pregnancy and lactation

Geriatrics

#### **CIOMS**

CIOMS Working Groups

CIOMS Form

#### **CDSCO (India) and Pharmacovigilance**

D&C Act and Schedule Y

Differences in Indian and global pharmacovigilance requirements

### **Examination Scheme :**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>S/V/Q</b>	<b>ATTD</b>	<b>EE</b>
<b>Weightage(%)</b>	<b>15</b>	<b>3</b>	<b>3</b>	<b>4</b>	<b>75</b>

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest edition):**

- Textbook of Pharmacovigilance: S K Gupta, Jaypee Brothers, Medical Publishers.
- Practical Drug Safety from A to Z By Barton Cobert, Pierre Biron, Jones and Bartlett Publishers.
- Mann's Pharmacovigilance: Elizabeth B. Andrews, Nicholas, Wiley Publishers.
- Stephens' Detection of New Adverse Drug Reactions: John Talbot, Patrick Walle, Wiley Publishers.
- An Introduction to Pharmacovigilance: Patrick Waller, Wiley Publishers.
- Cobert's Manual of Drug Safety and Pharmacovigilance: Barton Cobert, Jones & Bartlett Publishers.
- Textbook of Pharmacoepidemiology edited by Brian L. Strom, Stephen E Kimmel, Sean Hennessy, Wiley Publishers.
- A Textbook of Clinical Pharmacy Practice -Essential Concepts and Skills: G.
- Parthasarathi, Karin Nyfort Hansen, Milap C. Nahata National Formulary of India
- Text Book of Medicine by Yashpal Munjal
- Text book of Pharmacovigilance: concept and practice

# QUALITY CONTROL AND STANDARDIZATION OF HERBALS

**Course Code : BP806ET**

**Credit Units: 04**

**Course Objectives:** In this subject the student learns about the various methods and guidelines for evaluation and standardization of herbs and herbal drugs. The subject also provides an opportunity for the student to learn cGMP, GAP and GLP in traditional system of medicines.

## **Course Contents:**

### **Module-I**

Basic tests for drugs – Pharmaceutical substances, Medicinal plants materials and dosage  
Forms WHO guidelines for quality control of herbal drugs.  
Evaluation of commercial crude drugs intended for use

### **Module-II**

**Quality assurance in herbal drug industry** of cGMP, GAP, GMP and GLP in traditional system of medicine.  
WHO Guidelines on current good manufacturing Practices (cGMP) for Herbal Medicines  
WHO Guidelines on GACP for Medicinal Plants.

### **Module-III**

EU and ICH guidelines for quality control of herbal drugs.  
Research Guidelines for Evaluating the Safety and Efficacy of Herbal Medicines

### **Module-IV**

Stability testing of herbal medicines. Application of various chromatographic techniques in standardization of herbal products.  
Preparation of documents for new drug application and export registration  
GMP requirements and Drugs & Cosmetics Act provisions.

### **Module-V**

Regulatory requirements for herbal medicines.  
WHO guidelines on safety monitoring of herbal medicines in pharmacovigilance systems  
Comparison of various Herbal Pharmacopoeias.  
Role of chemical and biological markers in standardization of herbal products

## **Examination Scheme :**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>S/V/Q</b>	<b>ATTD</b>	<b>EE</b>
<b>Weightage(%)</b>	<b>15</b>	<b>3</b>	<b>3</b>	<b>4</b>	<b>75</b>

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

# COMPUTER AIDED DRUG DESIGN

Course Code : BP807ET

Credit Units: 04

**Course Objectives:** This subject is designed to provide detailed knowledge of rational drug design process and various techniques used in rational drug design process.

**Course Content:**

## Module-I

### Introduction to Drug Discovery and Development

Stages of drug discovery and development

### Lead discovery and Analog Based Drug Design

Rational approaches to lead discovery based on traditional medicine,

Random screening, Non-random screening, serendipitous drug discovery, lead discovery based on drug metabolism, lead discovery based on clinical observation.

**Analog Based Drug Design:** Bioisosterism, Classification, Bioisosteric replacement. Any three case studies

## Module-II

**Quantitative Structure Activity Relationship (QSAR):** SAR versus QSAR, History and development of QSAR, Types of physicochemical parameters, experimental and theoretical approaches for the determination of physicochemical parameters such as Partition coefficient, Hammett's substituent constant and Taft's steric constant. Hansch analysis, Free Wilson analysis, 3D-QSAR approaches like COMFA and COMSIA.

## Module-III

### Molecular Modeling and virtual screening techniques

**Virtual Screening techniques:** Drug likeness screening, Concept of pharmacophore mapping and pharmacophore based Screening,

**Molecular docking:** Rigid docking, flexible docking, manual docking, Docking based screening. *De novo* drug design.

## Module-IV

**Informatics & Methods in drug design:** Introduction to Bioinformatics, chemoinformatics. ADME databases, chemical, biochemical and pharmaceutical databases.

## Module-V

**Molecular Modeling:** Introduction to molecular mechanics and quantum mechanics. Energy Minimization methods and Conformational Analysis, global conformational minima determination.

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest Editions)**

- Silverman R.B. “The organic Chemistry of Drug Design and Drug Action” Academic Press New York.

# CELL AND MOLECULAR BIOLOGY

**Course Code : BP808ET**

**Credit Units: 04**

## **Course Objectives:**

Cell biology is a branch of biology that studies cells – their physiological properties, their structure, the organelles they contain, interactions with their environment, their life cycle, division, death and cell function. This is done both on a microscopic and molecular level. Cell biology research encompasses both the great diversity of single-celled organisms like bacteria and protozoa, as well as the many specialized cells in multi-cellular organisms such as humans, plants, and sponges.

## **Course Content:**

### **Module-I**

- a) Cell and Molecular Biology: Definitions theory and basics and Applications.
- b) Cell and Molecular Biology: History and Summation.
- c) Properties of cells and cell membrane.
- d) Prokaryotic versus Eukaryotic
- e) Cellular Reproduction
- f) Chemical Foundations – an Introduction and Reactions (Types)

### **Module-II**

- a) DNA and the Flow of Molecular Information
- b) DNA Functioning
- c) DNA and RNA
- d) Types of RNA
- e) Transcription and Translation

### **Module-III**

- a) Proteins: Defined **and** Amino Acids
- b) Protein Structure
- c) Regularities in Protein Pathways
- d) Cellular Processes
- e) Positive Control and significance of Protein Synthesis

### **Module-IV**

- a) Science of Genetics
- b) Transgenics and Genomic Analysis
- c) Cell Cycle analysis
- d) Mitosis and Meiosis
- e) Cellular Activities and Checkpoints

### **Module-V**

- a) Cell Signals: Introduction
- b) Receptors for Cell Signals
- c) Signaling Pathways: Overview
- d) Misregulation of Signaling Pathways
- e) Protein-Kinases: Functioning

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (latest edition):**

- W.B. Hugo and A.D. Russel: Pharmaceutical Microbiology, Blackwell Scientific publications, Oxford London.
- Prescott and Dunn., Industrial Microbiology, 4th edition, CBS Publishers & Distributors, Delhi.
- Pelczar, Chan Kreig, Microbiology, Tata McGraw Hill edn.
- Malcolm Harris, Balliere Tindall and Cox: Pharmaceutical Microbiology. Rose: Industrial Microbiology.
- Probisher, Hinsdill et al: Fundamentals of Microbiology, 9th ed. Japan
- Cooper and Gunn's: Tutorial Pharmacy, CBS Publisher and Distribution.
- Pepler: Microbial Technology.
- Edward: Fundamentals of Microbiology.
- N.K.Jain: Pharmaceutical Microbiology, Vallabh Prakashan, Delhi
- Bergeys manual of systematic bacteriology, Williams and Wilkins- A Waverly company
- B.R. Glick and J.J. Pasternak: Molecular Biotechnology: Principles and
- Applications of RecombinantDNA: ASM Press Washington D.C.
- RA Goldshy et. al., : Kuby Immunology.

# COSMETIC SCIENCE

Course Code : BP809ET

Credit Units: 04

## Course Contents :

### Module-I

Classification of cosmetic and cosmeceutical products

Definition of cosmetics as per Indian and EU regulations, Evolution of cosmeceuticals from cosmetics, cosmetics as quasi and OTC drugs

**Cosmetic excipients:** Surfactants, rheology modifiers, humectants, emollients, preservatives. Classification and application

**Skin:** Basic structure and function of skin.

**Hair:** Basic structure of hair. Hair growth cycle.

**Oral Cavity:** Common problem associated with teeth and gums.

### Module-II

**Principles of formulation and building blocks of skin care products:** Face wash, Moisturizing cream, Cold Cream, Vanishing cream and their advantages and disadvantages. Application of these products in formulation of cosmeceuticals.

**Antiperspirants & deodorants-** Actives & mechanism of action.

**Principles of formulation and building blocks of Hair care products:** Conditioning shampoo, Hair conditioner, anti-dandruff shampoo. Hair oils. Chemistry and formulation of Para-phenylene diamine based hair dye. Principles of formulation and building blocks of oral care products: Toothpaste for bleeding gums, sensitive teeth. Teeth whitening, Mouthwash.

### Module-III

Sun protection, Classification of Sunscreens and SPF.

**Role of herbs in cosmetics:**

Skin Care: Aloe and turmeric

Hair care: Henna and amla.

Oral care: Neem and clove

**Analytical cosmetics:** BIS specification and analytical methods for shampoo, skin cream and toothpaste.

### Module-IV

Principles of Cosmetic Evaluation: Principles of sebumeter, corneometer. Measurement of TEWL, Skin Color, Hair tensile strength, Hair combing properties. Soaps, and syndet bars. Evolution and skin benefits.

### Module-V

Oily and dry skin, causes leading to dry skin, skin moisturisation. Basic understanding of the terms Comedogenic, dermatitis. Cosmetic problems associated with Hair and scalp: Dandruff, Hair fall causes. Cosmetic problems associated with skin: blemishes, wrinkles, acne, prickly heat and body odor. Antiperspirants and Deodorants- Actives and mechanism of action

## Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**References**

- Harry's Cosmeticology, Wilkinson, Moore, Seventh Edition, George Godwin.
- Cosmetics – Formulations, Manufacturing and Quality Control, P.P. Sharma, 4<sup>th</sup> Edition, Vandana Publications Pvt. Ltd., Delhi.

# EXPERIMENTAL PHARMACOLOGY

Course Code : BP810ET

Credit Units: 04

## Course Objectives:

This subject is designed to impart the basic knowledge of preclinical studies in experimental animals including design, conduct and interpretations of results.

## Course Contents:

### Module-I

#### Laboratory Animals:

Study of CPCSEA and OECD guidelines for maintenance, breeding and conduct of experiments on laboratory animals, Common lab animals: Description and applications of different species and strains of animals. Popular transgenic and mutant animals. Techniques for collection of blood and common routes of drug administration in laboratory animals, Techniques of blood collection and euthanasia.

### Module-II

#### Preclinical screening models

a. Introduction: Dose selection, calculation and conversions, preparation of drug solution/suspensions, grouping of animals and importance of sham negative and positive control groups. Rationale for selection of animal species and sex for the study.

b. **Study of screening animal models for:** Diuretics, nootropics, anti-Parkinson's, antiasthmatics,

**Preclinical screening models:** for CNS activity- analgesic, antipyretic, anti-inflammatory, general anaesthetics, sedative and hypnotics, antipsychotic, antidepressant, antiepileptic, antiparkinsonism, alzheimer's disease

### Module-III

**Preclinical Screening Models:** for ANS activity, sympathomimetics, sympatholytics, parasympathomimetics, parasympatholytics, skeletal muscle relaxants, drugs acting on eye, local anaesthetics

### Module-IV

**Preclinical screening models:** for CVS activity- antihypertensives, diuretics, antiarrhythmic, antidyslipidemic, anti aggregatory, coagulants, and anticoagulants. Preclinical screening models for other important drugs like antiulcer, antidiabetic, anticancer and antiasthmatics.

**Research methodology and Bio-statistics:** Selection of research topic, review of literature, research hypothesis and study design Pre-clinical data analysis and interpretation using Students 't' test and One-way ANOVA. Graphical representation of data

## Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (latest edition):**

- Fundamentals of experimental Pharmacology-by M.N. Ghosh
- Hand book of Experimental Pharmacology-S.K. Kulakarni
- CPCSEA guidelines for laboratory animal facility.
- Drug discovery and Evaluation by Vogel H.G.
- Drug Screening Methods by Suresh Kumar Gupta and S. K. Gupta
- Introduction to biostatistics and research methods by PSS Sundar Rao and J Richard

## ADVANCED INSTRUMENTATION TECHNIQUES

Course Code : BP811ET

Credit Units : 04

**Course Objectives:** This subject deals with the application of instrumental methods in qualitative and quantitative analysis of drugs. This subject is designed to impart advanced knowledge on the principles and instrumentation of spectroscopic and chromatographic hyphenated techniques. This also emphasizes on theoretical and practical knowledge on modern analytical instruments that are used for drug testing.

### Course Content:

#### Module-I

**Nuclear Magnetic Resonance spectroscopy:** Principles of H-NMR and C-NMR, chemical shift, factors affecting chemical shift, coupling constant, Spin - spin coupling, relaxation, instrumentation and applications

**Mass Spectrometry-** Principles, Fragmentation, Ionization techniques – Electron impact, chemical ionization, MALDI, FAB, Analyzers-Time of flight and Quadrupole, instrumentation, applications

#### Module-II

**Thermal Methods of Analysis:** Principles, instrumentation and applications of Thermogravimetric Analysis (TGA), Differential Thermal Analysis (DTA), Differential Scanning Calorimetry (DSC)

**X-Ray Diffraction Methods:** Origin of X-rays, basic aspects of crystals, X-ray Crystallography, rotating crystal technique, single crystal diffraction, powder diffraction, structural elucidation and applications.

#### Module-III

**Calibration and validation-**as per ICH and USFDA guidelines

**Calibration of following Instruments:** Electronic balance, UV-Visible spectrophotometer, IR spectrophotometer, Fluorimeter, Flame Photometer, HPLC and GC

#### Module-IV

**Radio immune assay:** Importance, various components, Principle, different methods, Limitation and Applications of Radio immuno assay

**Extraction techniques:** General principle and procedure involved in the solid phase extraction and liquid-liquid extraction

#### Module-V

**Hyphenated techniques-**LC-MS/MS, GC-MS/MS, HPTLC-MS.

### Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended Books (Latest Editions)**

- Instrumental Methods of Chemical Analysis by B.K Sharma
- Organic spectroscopy by Y.R Sharma
- Text book of Pharmaceutical Analysis by Kenneth A. Connors
- Vogel's Text book of Quantitative Chemical Analysis by A.I. Vogel
- Practical Pharmaceutical Chemistry by A.H. Beckett and J.B. Stenlake
- Organic Chemistry by I. L. Finar
- Organic spectroscopy by William Kemp
- Quantitative Analysis of Drugs by D. C. Garrett
- Quantitative Analysis of Drugs in Pharmaceutical Formulations by P. D. Sethi
- Spectrophotometric identification of Organic Compounds by Silverstein

# DIETARY SUPPLEMENTS AND NUTRACEUTICALS

**Course Code: BP812ET**

**Credit Units: 04**

**Course Objective:** This subject covers foundational topics that are important for understanding the need and requirements of dietary supplements among different groups in the population.

## **Course Contents:**

### **Module-I**

- a. Definitions of Functional foods, Nutraceuticals and Dietary supplements. Classification of Nutraceuticals, Health problems and diseases that can be prevented or cured by Nutraceuticals i.e. weight control, diabetes, cancer, heart disease, stress, osteoarthritis, hypertension etc.
- b. Public health nutrition, maternal and child nutrition, nutrition and ageing, nutrition education in community.
- c. Source, Name of marker compounds and their chemical nature, Medicinal uses and health benefits of following used as nutraceuticals/functional foods: Spirulina, Soyabean, Ginseng, Garlic, Broccoli, Ginkgo, Flaxseeds

### **Module-II**

Phytochemicals as nutraceuticals: Occurrence and characteristic features (chemical nature medicinal benefits) of following

- a) Carotenoids-  $\alpha$  and  $\beta$ -Carotene, Lycopene, Xanthophylls, lutein
- b) Sulfides: Diallyl sulfides, Allyl trisulfide.
- c) Polyphenolics: Resveratrol
- d) Flavonoids- Rutin, Naringin, Quercetin, Anthocyanidins, catechins, Flavones
- e) Prebiotics / Probiotics.: Fructo oligosaccharides, Lactobacillum
- f) Phyto estrogens : Isoflavones, daidzein, Genistein, lignans
- g) Tocopherols
- h) Proteins, vitamins, minerals, cereal, vegetables and beverages as functional foods: oats, wheat bran, rice bran, sea foods, coffee, tea and the like.

### **Module-III**

- a) Introduction to free radicals: Free radicals, reactive oxygen species, production of free radicals in cells, damaging reactions of free radicals on lipids, proteins, Carbohydrates, nucleic acids.
- b) Dietary fibres and complex carbohydrates as functional food ingredients..

### **Module-IV**

- a) Free radicals in Diabetes mellitus, Inflammation, Ischemic reperfusion injury, Cancer, Atherosclerosis, Free radicals in brain metabolism and pathology, kidney damage, muscle damage. Free radicals involvement in other disorders. Free radicals theory of ageing.
- b) Antioxidants: Endogenous antioxidants – enzymatic and nonenzymatic antioxidant defence, Superoxide dismutase, catalase, Glutathione peroxidase, Glutathione Vitamin C, Vitamin E,  $\alpha$ - Lipoic acid, melatonin Synthetic antioxidants: Butylated hydroxy Toluene, Butylated hydroxy Anisole.
- c) Functional foods for chronic disease prevention

### **Module-V**

- a) Effect of processing, storage and interactions of various environmental factors on the potential of nutraceuticals.

- b) Regulatory Aspects; FSSAI, FDA, FPO, MPO, AGMARK. HACCP and GMPs on Food Safety. Adulteration of foods.
- c) Pharmacopoeial Specifications for dietary supplements and nutraceuticals.

**Examination Scheme :**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

**Recommended books :**

- Dietetics by Sri Lakshmi
- Role of dietary fibres and nutraceuticals in preventing diseases by K.T Agusti and P.Faizal: BSPublication.
- Advanced Nutritional Therapies by Cooper. K.A., (1996).
- The Food Pharmacy by Jean Carper, Simon & Schuster, UK Ltd., (1988).
- Prescription for Nutritional Healing by James F.Balch and Phyllis A.Balch 2nd Edn., Avery Publishing Group, NY (1997).
- G. Gibson and C.williams Editors *2000 Functional foods* Woodhead Publ.Co.London.
- Goldberg, I. *Functional Foods*. 1994. Chapman and Hall, New York.
- Labuza, T.P. 2000 Functional Foods and Dietary Supplements: Safety, Good
- Manufacturing Practice (GMPs) and Shelf Life Testing in *Essentials of Functional Foods* M.K. Sachmidl and T.P. Labuza eds. Aspen Press.
- Handbook of Nutraceuticals and Functional Foods, Third Edition (Modern Nutrition)
- Shils, ME, Olson, JA, Shike, M. 1994 *Modern Nutrition in Health and Disease*. Eighth edition. Lea and Febiger

# PROJECT WORK

**Course Code: BP813PW**

**Credit Units: 06**

## **Objectives:**

The aim of the project work is to provide student with an opportunity to further intellectual and personal development in chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of the degree. The project work can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

The area of the project shall directly relate any one of the elective subject opted by the student in semester VIII. The project shall be carried out in group not exceeding 5 in number. The project report shall be submitted in triplicate (typed & bound copy not less than 25 pages).

## **THE COMPONENTS OF A PROJECT REPORT**

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- a. *Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- b. *Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- c. *Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- d. *Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures: Questionnaires** (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **THE STEPS OF PROJECT WORK**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II** : Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III** : Collection of information and data relating to the topic and analysis of the same.

**STEP IV** : Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**STEP V** : The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

Annexures, References / Bibliography

**Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Project Work separately, obtaining minimum marks of 80 (Dissertation Book and Presentation taken together).

**Examination Scheme: Total-150 marks**

***Evaluation of Dissertation Book:***

Objective(s) of the work done	15 Marks
Methodology adopted	20 Marks
Results and Discussions	20 Marks
Conclusions and Outcomes	20 Marks
<b>Total-75 Marks</b>	

***Evaluation of Presentation:***

Presentation of work	25 Marks
Communication skills	20 Marks
Question and answer skills	30 Marks
<b>Total-75 Marks</b>

# Syllabus - First Semester

## ANATOMY AND PHYSIOLOGY-I

Course Code: MLT2107

Credit Units: 03

### Course Objectives:

- To develop the knowledge of anatomical structures.
- To provide the basic understanding of human organ systems.
- To provide the concepts of interrelationship among different organ systems.

### Course Contents:

#### Module-I

**Anatomy:** Definition, anatomical divisions, axis and planes, anatomical terms and structural organization of the human body.

**Physiology:** Definition and functions of different organ systems.

**Cell:** Structure and functions of mammalian cell and organelles.

**Tissues:** Structure, functions and classification.

#### Module-II

**Skeletal System:** Division, anatomy and function of skeleton; Histology of bone; Types of bones and joints; Bone marrow; Cartilage; Composition and function of synovial fluid.

**Muscular system:** Histology, classification and functions of muscles; mechanism of muscle contraction.

#### Module-III

**Cardiovascular System:** Structure and functions of heart and blood vessels, blood circulation, cardiac cycle, cardiac output, stroke volume and blood pressure; ECG.

**Lymphatic System:** Structure and functions of lymphoid organs; lymph vessels; compositions, function and circulation of lymph.

#### Module-IV

**Digestive System:** Structure and function of digestive organs, digestion and absorption of food, compositions and functions of various gastrointestinal secretions.

### Examination Scheme

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

### Recommended books:

- B. D. Chaurasia, BD Chaurasia's Human Anatomy Regional and Applied Dissection and Clinical: Lower Limb Abdomen and Pelvis, Vol I, II and III, 7<sup>th</sup> Edition 2016, CBS Publishers & Distributors.
- K Simbulingam & P Simbulingam, Essential Medical Physiology, 6<sup>th</sup> Edition 2012, Jaypee Brothers Medical publishers (P) LTD.
- N Murgesh, Basic Anatomy and Physiology, 6<sup>th</sup> Edition 2011, Satya Publishers.
- Anne Waugh, Kathleen and J W Wilson, Ross and Wilson Anatomy and Physiology, 12<sup>th</sup> Edition 2014, Churchill Living Stone.
- H. G. Q. Rowett, Basic Anatomy and Physiology, 3<sup>rd</sup> Edition 1996, Murray Publishers Ltd.
- Gerard J. Tortora, Bryan H. Derrickson, Principle of anatomy and physiology, 14<sup>th</sup> Edition 2014, Wiley Publication.
- R S Winwood, Sears Anatomy & Physiology, 6<sup>th</sup> Edition, 1985, CRC Press.
- Elaine N. Marie, Essentials of Human Anatomy and Physiology, 11<sup>th</sup> Edition 2015, Pearsons

## HEMATOLOGY-I

**Course Code: MLT2108**

**Credit Units: 03**

### Course Objectives:

- To impart the knowledge about the blood and blood formation in bone marrow.
- To provide the knowledge about handling of haematological apparatus.
- To impart the knowledge of routine haematology tests.
- To develop the understanding of advanced haematological techniques.

### Course Contents:

#### Module-I

**Hematology:** Introduction and importance of hematology.

**Blood:** Definition, composition, functions of blood.

**Blood cells:** Shape, size, structure and functions of blood cells.

**Haemopoiesis:** Erythropoiesis, leucopoiesis and thrombopoiesis.

#### Module-II

**Instruments and apparatus used in hematology laboratory:** Neubauer chamber, pipettes, colorimeter, cell counter.

**Hemoglobin:** Formation, Degradation, types and functions.

**Haemoglobinometry:** Methods, principle, procedure, application and error analysis.

**Anticoagulants and preservatives:** Mode of action, composition, merits and demerits of EDTA, citrate, oxalate, heparin and sodium fluoride.

**Blood collection:** Capillary, venous and arterial method, order of blood draw, preservation of blood sample; Changes during blood storage.

#### Module-III

**Blood cells count:** Red blood cell, white blood cells, platelets, eosinophil and reticulocyte count.

**ESR:** Mechanism, methods, factors influencing and clinical significance.

**PCV:** Methods, principle, factors influencing and clinical significance.

**Buffy coat:** Preparation of buffy coat and its application.

**Peripheral blood smear:** Methods of preparation, importance and error analysis.

**Staining:** Methods, principle, composition and staining procedure and error analysis

#### Module-IV

**Hemocytometer:** Principle, procedure, application, precautions and clinical significance.

**Red cell indices:** Different parameters, calculations, color index and maturation index and clinical significance.

**Automated cell counter:** Principle, application and procedures.

### Examination Scheme

Components	CA	A	ME	EE
Weightage(%)	15	5	10	70

### Recommended books:

- Shrish M. Kawthalkar, Essential Hematology, 2<sup>nd</sup> Edition 2013, Jaypee Publication.
- Bain, Decie & Lewis Practical Hematology, 11<sup>th</sup> Edition 2016, Churchill Livingstone.
- J Ochei and A Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata Mcgraw Hill Publishing Co. Ltd.

- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- Harse Mohan, Text Book of Pathology 7<sup>th</sup> Edition 2015, Jaypee & Brothers Medical Publishers LTD.
- Richard A. McPherson, Henry's Clinical Diagnosis and Management by Laboratory Methods, 22 Edition 2014 Elsevier.
- E M Keohane, L Smith, J Walenga, Rodak's Hematology: Clinical Principle and Application, 5<sup>th</sup> Edition 2015, Elseivier.

- Bernadette F. Rodak, George A. Fritsma, Kathryn Doig, Hematology: Clinical Principles and Applications, 4<sup>th</sup> Edition 2012. Saunders & Elseviers.

# GENERAL MICROBIOLOGY

**Course Code: MLT2109**

**Credit Units: 03**

## Course Objective:

- To provide the understanding of relationship between microorganisms and human health.
- To impart the knowledge about microbial pathogenicity, aseptic methods, cultivation and identification techniques in microbiology.

## Course Contents:

### Module-I

**Microbiology:** Introduction, importance and scopes, contribution of Antony Van Leeuwenhoek, Edward Jenner, Louis Pasteur, Robert Koch and Joseph Lister; golden era of microbiology; safety measures in microbiology.

**Microorganisms:** Classification and taxonomy; Classification and morphological characteristics of bacteria, viruses, fungi, protozoa and helminthes.

### Module-II

**Microscopy:** Principle, parts, working, care and maintenance of compound, dark ground, fluorescent, phase contrast and electron microscope.

**Normal micro flora:** Importance of normal flora in human body

**Microbial Pathogenicity:** Virulence factors - antigenicity, toxicity, bacterial enzymes, **Infection:** Classification, sources, mode of transmission and portal of entry.

### Module-III

**Basic terminology:** Antibacterial, bactericidal, bacteriostatic and germicide agents.

**Sterilization:** Definition and classification; Parts, working, care and handling of autoclave, hot air oven and laminar air flow; Sterilization indicators and calibration of equipments.

**Disinfection:** Definition, types, mode of action, properties and use of disinfectants and antiseptics, efficiency testing of disinfectants.

### Module-IV

**Culture media:** Composition of culture media and broth, basal media, enriched media, enrichment media, selective media, differential media, transport media, anaerobic media.

**Inoculation:** Pouring, spreading, streaking, stroke, stab, slant and anaerobic culture methods; Colony characteristics.

## Examination Scheme

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

## Recommended books:

# GENERAL BIOCHEMISTRY-I

**Course Code: MLT2103**

**Credit Units: 03**

## **Course objectives:**

- The course will impart the concept of structure and function of bio molecules.
- The subject emphasizes on knowledge about essential and non-essential bio molecules.

## **Course Contents:**

### **Module-I:**

**Carbohydrates:** Definitions, functions, classifications, structural aspects, biological importance, isomers, optical activity, epimers, enantiomers, anomers, mutarotation, reactions of monosaccharide, derivatives of monosaccharide, structures of disaccharides, homopolysaccharides and heteropolysaccharides and clinical aspects of carbohydrates.

### **Module-II:**

**Lipids:** Definitions, functions, classification, fatty acids, essential fatty acids, triglycerides, phospholipids, glycolipids, lipoprotein, steroids and clinical aspects of lipids.

### **Module-III:**

**Proteins:** Definitions, general functions, classifications and properties of amino acids, structure and properties of proteins, denaturation, classification of protein, plasma proteins and clinical aspects of protein.

### **Module-IV:**

**Nucleic acids:** Introduction, structure of purine, pyrimidine, sugars, nucleoside and nucleotides, polynucleotide, Chargaff rule of DNA composition, DNA double helix, structure and types of RNA and clinical aspects of nucleic acid.

## **Examination Scheme**

<b>Components</b>	<b>CA</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	15	5	10	70

## **Recommended books:**

## ANATOMY AND PHYSIOLOGY LAB-I

**Course Code: MLT2110**

**Credit Units: 01**

### **Course objectives:**

- To provide the basic understanding of human organ systems.
- To impart the basic knowledge about the microscopic structure of different tissues and muscles.

### **List of experiments:**

- Demonstration of human anatomy with the help of chart.
- Demonstration of different tissues with the help of permanent mounted slides.
- Demonstration of human digestive system with the help of model or chart.
- Demonstration of structural differences between skeletal, smooth and cardiac muscles using permanent mounts.
- Demonstration of various parts of circulatory system using models or chart.
- Demonstration of human bones and joints.
- Estimation of blood pressure with the help of BP apparatus
- Demonstration of pulse rate.
- Demonstration of heart rate.
- Demonstration of body temperature.

### **Examination Scheme**

Components	Internal Assessment	Attendance	Record	EE
Weightage (%)	20	5	5	70

### **Recommended books:**

- B. D. Chaurasia, BD Chaurasia's Human Anatomy Regional and Applied Dissection and Clinical: Lower Limb Abdomen and Pelvis, Vol I, II and III, 7<sup>th</sup> Edition 2016, CBS Publishers & Distributors.

## HEMATOLOGY LAB-I

**Course Code: MLT2111**

**Credit Units: 01**

### **Course objectives:**

- To impart the basic knowledge of principles, techniques and clinical importance of routine and selected laboratory procedures.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical hematology laboratory.

### **List of experiments:**

1. Preparation of anticoagulants vials.
2. Collection of Blood by various methods.
3. Estimation of hemoglobin.
4. To perform RBC count.
5. To perform WBC count.
6. To perform Platelets count.
7. To perform ESR and PCV.
8. Preparation of Romanosky stain.
9. Preparation and staining of peripheral blood smear.
10. Examination of blood cells morphology.

### **Examination Scheme**

<b>Components</b>	<b>Internal Assessment</b>	<b>Attendance</b>	<b>Record</b>	<b>EE</b>
<b>Weightage (%)</b>	20	5	5	70

### **Recommended books:**

- J. Ochei and A. Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata Mcgraw Hill Publishing Co. Ltd.
- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- Bain, Decie & Lewis Practical Hematology, 11<sup>th</sup> Edition 2016, Churchill Livingstone.

- Sood, Textbook of Medical Laboratory Technology, 1<sup>st</sup> Edition 2006, Jaypee Brothers Publishers, 2006.

## CLINICAL TRAINING-I

**Course Code: MLT2112**

**Credit Units: 2**

**Course Objective:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

**Plan for clinical training:**

1. Hematology Lab
2. Microbiology Lab

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

**Examination Scheme**

Components	Viva	A	ME	EE
Weightage (%)	10	5	15	70

## Syllabus - Second Semester

### ANATOMY AND PHYSIOLOGY-II

Course Code: MLT2207

Credit Units: 03

#### Course Objectives:

- To develop the knowledge of anatomical structures.
- To provide the basic understanding of human organ systems.
- To provide the concepts of interrelationship among different organ systems.

#### Course Contents:

##### Module-I

**Urinary System:** Structure and functions of organs involved in urinary system, structure and functions of nephron, measurement and regulation of GFR, mechanism and composition of urine formation, physiology of excretion of urine.

**Endocrine system:** Histology and functions of different endocrine glands, hormones and their functions.

##### Module-II

**Nervous system:** Central Nervous System – structure and functions of brain and spinal cord; Peripheral Nervous System – structure and functions of cranial nerves and spinal nerves; Autonomic Nervous System – structure and functions of sympathetic system and parasympathetic system; Neurohumoral and neuro-muscle transmission, reflex action, electroencephalogram and nerve impulse; Secretion, composition and functions of CSF.

**Special senses organs:** Structure and functions of eyeball, ear, nose, tongue and skin, mechanism of vision, hearing, smell, taste, and sensation.

##### Module-III

**Male reproductive system:** Structure and functions of male reproductive organs, spermatogenesis.

**Female reproductive system:** Structure and functions of female reproductive organs, ovarian cycle, menstruation, fertilization and pregnancy.

##### Module-IV

**Respiratory System:** Structure and functions of different organs involved in respiratory system, gas exchange in the lungs, regulation of respiration, mechanism of respiration, respiratory muscles, composition and functions of pleural fluid; Various terms involved in respiratory System (Vital capacity, Total volume, Reserve volume, Total lung capacity).

#### Examination Scheme

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

#### Recommended books:

- B. D. Chaurasia, BD Chaurasia's Human Anatomy Regional and Applied Dissection and Clinical: Lower Limb Abdomen and Pelvis, Vol I, II and III, 7<sup>th</sup> Edition 2016, CBS Publishers & Distributors.
- K Simbulingam & P Simbulingam, Essential Medical Physiology, 6<sup>th</sup> Edition 2012, Jaypee Brothers Medical publishers (P) LTD.

- N Murgesh, Basic Anatomy and Physiology, 6<sup>th</sup> Edition 2011, Satya Publishers.
- Anne Waugh, Kathleen and J W Wilson, Ross and Wilson Anatomy and Physiology, 12<sup>th</sup> Edition 2014, Churchill Living Stone.
- H. G. Q. Rowett, Basic Anatomy and Physiology, 3<sup>rd</sup> Edition 1996, Murray Publishers Ltd.
- Gerard J. Tortora, Bryan H. Derrickson, Principle of anatomy and physiology, 14<sup>th</sup> Edition 2014, Wiley Publication.
- R S Winwood, Sears Anatomy & Physiology, 6<sup>th</sup> Edition, 1985, CRC Press.
- Elaine N. Marie, Essentials of Human Anatomy and Physiology, 11<sup>th</sup> Edition 2015, Pearsons Benjamin Cummings.

## HEMATOLOGY-II

**Course Code: MLT2208**

**Credit Units: 03**

### **Course Objectives:**

- To impart the knowledge about disorders of blood cells.
- To familiarize students about pathogenesis and laboratory diagnosis of various anemia.

### **Course Contents:**

#### **Module-I**

**Blood cell disorders:** Morphological disorders of Blood cells; Physiological variation of erythrocytes, leucocytes and thrombocytes.

**Bone Marrow:** Introduction, collection, processing, indications and significance.

#### **Module-II**

**Anemia:** Introduction, causes, sign and symptoms, classification and laboratory diagnosis of anemia; Pathogenesis and laboratory diagnosis of iron deficiency anemia, pernicious anemia, megaloblastic anemia, aplastic anemia, sideroblastic anemia; anemia due to chronic renal failure and liver disease.

#### **Module-III**

**Hemolytic Anemia:** Pathogenesis and laboratory diagnosis of hereditary spherocytosis, hereditary elliptocytosis, thalassemia and sickle cell anaemia; other types of anemia- Glucose -6-phosphate dehydrogenase deficiency, pyruvate kinase deficiency, paroxysmal nocturnal haemoglobinuria, warm antibody type, cold antibody type, incompatible blood transfusion, hemolytic disease of new born.

#### **Module-IV**

**Leukemia:** Introduction, causes, sign & symptoms, classification and laboratory diagnosis; myeloid and lymphoid leukemia.

### **Examination Scheme**

Components	CA	A	ME	EE
Weightage(%)	15	5	10	70

### **Recommended books:**

# CLINICAL BACTERIOLOGY

**Course Code: MLT2209**

**Credit Units: 03**

## **Course Objective:**

- To impart the knowledge of morphology, culture characteristics, pathogenicity, lab diagnosis and prophylaxis of major bacterial pathogens.
- To provide the understanding of special laboratory techniques.

## **Course Contents:**

### **Module-I**

**Bacteriology:** Introduction, bacterial reproduction, bacterial growth curve and factors effecting bacterial growth; Bacterial genetics- plasmid, mutation, transformation, transduction and conjugation.

### **Module-II**

**Gram negative bacteria:** Morphology, pathogenicity, lab diagnosis and prophylaxis of: *Neisseria gonorrhoeae*, *Neisseria meningitidis*, *Escherichia coli*, *Shigella*, *Klebsiella*, *Proteus*, *Yersinia*, *Salmonella*, *Vibrio*, *Aeromonas*, *Pseudomonas*, *Campylobacter*, *Bacteroides*, *Fusobacterium*, *Brucella*, *Haemophilus*, *Bordetella* and *Helicobacter pylori*.

### **Module-III**

**Gram positive bacteria:** Morphology, pathogenicity, lab diagnosis and prophylaxis of: *Staphylococci*, *Streptococci*, *Pneumococcus*, *Enterococcus*, *Bacillus*, *Corynebacterium*, *Clostridia*, *Mycobacterium*, *Actinomycetes* and *Listeria*.

**Miscellaneous bacteria:** Morphology, pathogenicity, lab diagnosis and prophylaxis of: *Spirochetes*, *Rickettsiae*, *Chlamydia* and *Mycoplasma*.

### **Module-IV**

**Staining:** Gram stain, AFB stain, Albert's stain and special stains for spore, capsule and flagella.

**Biochemical test:** Catalase, coagulase, oxidase, indole, MR, VP, citrate, urease and triple sugar iron agar.

**Special laboratory techniques:** Antimicrobial susceptibility testing; Bacteriological examination of water, milk and air.

## **Examination Scheme**

Components	CA	A	ME	EE
Weightage(%)	15	5	10	70

## **Recommended books:**

- C P Baveja, Text book of Microbiology, 4<sup>th</sup> Edition 2010, Arya Publication.
- Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, 9<sup>th</sup> Edition 2013, Orient BlackSwan.

## GENERAL BIOCHEMISTRY-II

Course Code: MLT2210

Credit Units : 03

### Course Objectives:

- To enable the students to know the functions of various bio molecules in the human body.
- To emphasize on deficiency of different vitamins and their recommended dietary allowance.
- To enhance the clinical importance of enzymes, vitamins, hormones and minerals.

### Course Contents:

#### Module-I

**Enzymes:** Introduction, classification, chemical nature of enzymes, properties of enzymes, factors affecting enzyme activity, enzyme inhibitors, enzymes of diagnostic importance

#### Module-II

**Vitamins:** Introduction, classification of vitamins (fat soluble and water soluble), sources, recommended dietary allowance, deficiencies condition.

#### Module-III

**Hormones:** Introduction, classifications, mechanism of action, secondary messengers, role of various hormones, clinically important hormones.

#### Module-IV

**Minerals:** Introductions, general functions, classification, major characteristics of principal and trace elements, clinically important minerals.

### Examination Scheme

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

### Recommended books:

- U Satyanarayan and U Chakrapani, Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.

## HAEMATOLOGY LAB-II

**Course Code: MLT2211**

**Credit Units: 01**

### **Course Objectives:**

- To impart the basic knowledge of principles, techniques and clinical importance of routine and selected laboratory procedures.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical hematology laboratory.

### **List of experiments:**

1. Demonstration of abnormal blood cells.
2. Demonstration of microcytic and hypochromic anemia.
3. Demonstration of macrocytic and normochromic anemia.
4. Demonstration of hemolytic anemia.
5. Demonstration of hemorrhagic anemia.
6. Demonstration myeloid leukemia.
7. Demonstration of lymphoid leukemia.
8. To perform osmotic fragility test.
9. To perform sickling test.
10. Demonstration of normal and abnormal bone marrow cells in permanent slides.

### **Examination Scheme**

Components	Internal Assessment	Attendance	Record	EE
Weightage (%)	20	5	5	70

### **Recommended books:**

- J. Ochei and A. Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata Mcgraw Hill Publishing Co. Ltd.
- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- Bain, Decie & Lewis Practical Hematology, 11<sup>th</sup> Edition 2016, Churchill Livingstone.
- Mannual of Basic Technique for Health Laboratory, 2<sup>nd</sup> Edition 2003, WHO Geneva.
- Sood, Textbook of Medical Laboratory Technology, 1<sup>st</sup> Edition 2006, Jaypee Brothers Publishers, 2006.

## CLINICAL TRAINING-II

**Course Code: MLT2212**

**Credit Units: 2**

**Course objective:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

**Plan for clinical training:**

1. Bacteriology Lab
2. Hematology Lab

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

**Examination Scheme**

Components	Viva	A	ME	EE
Weightage (%)	10	5	15	70

## NUTRITION

**Course Code: MLT2205**

**Credit Units: 03**

**Course Objective:** At the end of the course student would have gained the knowledge of the following: Balanced diet, protein, carbohydrates, vitamins, minerals, carotenoids and eye nutrition, Ocular aging and adverse effects of ocular nutritional supplements.

### **Course Contents:**

#### **Module I:**

Introduction to Nutrition and Food Science, Food Groups and Food Pyramid; Balanced diet for different age groups and recommended dietary Allowances

#### **Module II:**

Assessment of Nutritional Status; Energy – Units, Metabolisms, Energy expenditure, and Energy imbalance; Digestion, absorption and transport of Food

#### **Module III:**

Proteins and eye; Lipids and eye; Carbohydrates and eye; Vitamins and eye; Minerals and trace elements and eye; Carotenoids and eye; Oxidative stress and the eye

#### **Module IV:**

Vitamin A, C and E deficiency; Nutrition and ocular aging; Contraindications, Adverse reactions and ocular nutritional supplements

### **Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage (%)	5	5	10	10	70

(CT-Class Test; HA - Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

### **Recommended books:**

- M Swaminathan, Hand book of Food and Nutrition, fifth edition, Bangalore printing & publishing Co. Ltd, Bangalore, 2004.
- C Gopalan, BV Rama Sastri, SC Balasubramanian, Nutritive Value of Indian Foods, National Institute of Nutrition, ICMR, Hyderabad, 2004.
- Frank Eperjesi & Stephen Beatty, Nutrition and The Eye, A Practical Approach, Elsevier Butterworth – Heinemann, USA, 2006.

## MEDICAL TERMINOLOGY

**Course Code: MLT2206**

**Credit Units: 03**

**Course Objectives:** To use medical terms and abbreviations correctly related to medicine and health.

### **Course Contents:**

#### **Module-I**

**Introduction to Medical terminology:** Origin of terms; Body structure & organization; Anatomical planes; Diseases & disorder terms; Diagnostic tests & equipments; Surgical procedural terms; Area of study & specialists; Signs, symptoms & related terms; Medical abbreviations.

#### **Module-II**

**Medical Records & their utility:** Definition and characteristics of 'Good' medical record; Required characteristics of entries in medical records and responsibility for medical record quality; Medical record forms and their content; Incomplete record control; Utility & functions of medical records in health care delivery system; Organizations & management of medical records department; Role of medical technologists in medical record keeping; Reports & returns in medical record system.

#### **Module-III**

**Medico-Legal Aspects of Medical Records:** Basic knowledge of legal aspects of Medical Records including Factories Act - Workmen compensation act, consumer protection act; Procedures of medical auditing & its importance in brief.

### **Examination Scheme:**

<b>Components</b>	<b>CD</b>	<b>CT1</b>	<b>SA</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

### **Recommended books:**

- Quick Medical Terminology: A self teaching guide. Shirley Soltesz Steiner, Natalie Pate Capps 5th Edition.
- Medical Terminology: A Living Language (5th Edition)," by Bonnie F. Fremgen and Suzanne S. Frucht.
- Basic Medical Terminology Concepts (2nd Edition) by Marilyn White Wilson.

## Syllabus – Third Semester

### IMMUNOLOGY & SEROLOGY

Course Code: MLT2307

Credit Units: 03

**Course Objectives:**

- To impart the basic knowledge of human immune system.
- To familiarize with various methods of antigen-antibody reactions.

**Course Contents:**

**Module-I:**

**Immunity:** Definition, types - Innate, acquired, local and herd immunity, opsonization and phagocytosis, relationship between innate and acquired immunity, vaccine and immunization.

**Antigen:** Antigen properties, structure and types; Adjuvant.

**Antibody:** Immunoglobulin – structure, classes, properties and function; Monoclonal and polyclonal antibody.

**Module-II:**

**Immune Response:** Humoral and cellular immune response; Major histocompatibility complex.

**Cell and Organs of Immune System:** Primary lymphoid organ, secondary lymphoid organ, T-lymphocytes, B-lymphocytes, cytokines.

**Complement system:** General properties and pathways.

**Module-III:**

**Hypersensitivity:** Definition and classification- Type-I, Type-II, Type-III and Type-IV.

**Immunodeficiency Disorders:** Definition and classification, humoral immunodeficiency, cellular immunodeficiency, disorders of phagocytosis and complement system.

**Module-IV:**

**Antigen Antibody Reaction:** General properties and types of antigen antibody reaction, precipitation reaction, agglutination reaction, complement fixation test, neutralization test, radio immuno assay, enzyme-linked immune-sorbent assay and immunofluorescence assay.

**Examination Scheme**

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

**Recommended books:**

- Dale Male, Jonathan Brostoff, David B Roth and Ivan Roitt Kuby Immunology, 7th Edition 2012, Mosby (Elsevier).
- C P Baveja, Text book of Microbiology, 4<sup>th</sup> Edition 2010, Arya Publication.
- Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, 9<sup>th</sup> Edition 2013, Orient BlackSwan.
- D.R.Arora / Brij Bala Arora, Textbook of Microbiology, 5<sup>th</sup> Edition 2016, CBS Publishers & Distributors.
- B S Nagoba and D V Bedpathsk, Immunology, 1<sup>st</sup> Edition 2008, BI Publications.
- J Ochei and A Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata McGraw Hill Publishing Co Ltd.

- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- Peter Lydyard, Alex Whelan, Michael Fanger, Instant Notes in Immunology 3<sup>rd</sup> Edition 2011, BIOS Scientific Publisher.
- William E. Paul, Fundamental Immunology 7th Edition 2013, Woulters Kluwar / Lippincott Williams & Wilkins.
- T Doan, R Mervold, S Visseli, C Waltenbough, Immunology 2<sup>nd</sup> Edition 2013, Woulters Kluwar / Lippincott Williams & Wilkins.

## HAEMATOLOGY-III

**Course Code: MLT2308**

**Credit Units: 03**

### Course Objectives:

- To familiarize students about mechanism of haemostasis and related disorders.
- To impart the knowledge of investigation required in coagulation study.
- To impart the understanding of pathogenesis, lab diagnosis and prevention of multiple myeloma and lymphoma.

### Course Contents:

#### Module-I

**Hemostasis:** Introduction and mechanism of hemostasis, role of platelets in hemostasis, clotting factors and coagulation cascade- intrinsic, extrinsic and common pathway; Fibrinolytic system.

#### Module-II

**Hemostatic disorders:** Hemophilia, von Willebrand's syndrome, disseminated intravascular coagulation and other coagulation factor deficiencies, vitamin K deficiency, anticoagulant therapy, liver diseases, platelets disorders.

#### Module-III

**Laboratory diagnosis:** Principle, procedure, reference values and significance of – Bleeding Time, Clotting Time, Prothrombin Time, Activated Partial Prothrombin Time, Thrombin Time, Hess Test, Clot Retraction Time, Fibrinogen Degradation Product and assays for coagulation factors.

**Coagulometer:** Principle, working and applications.

#### Module-IV

**Lymphoma and Multiple Myeloma:** Introduction, Classification and pathogenesis, laboratory diagnosis, prevention and control.

**LE cell:** LE cell phenomena, various methods for diagnosis and clinical significance.

### Examination Scheme

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

### Recommended books:

- Shrish M. Kawthalkar, Essential Hematology, 2<sup>nd</sup> Edition 2013, Jaypee Publication.
- Bain, Decie & Lewis Practical Hematology, 11<sup>th</sup> Edition 2016, Churchill Livingstone.
- J Ochei and A Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata McGraw Hill Publishing Co Ltd.
- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- Harse Mohan, Text Book of Pathology 7<sup>th</sup> Edition 2015, Jaypee & Brothers Medical Publishers LTD.
- Richard A. McPherson, Henry's Clinical Diagnosis and Management by Laboratory Methods, 22 Edition 2014 Elsevier.

## **CLINICAL PARASITOLOGY**

**Course Code: MLT2309**

**Credit Units: 03**

### **Course Objectives:**

- To impart knowledge about detrimental effects of parasites on human health.
- To develop understanding of life cycle, transmission, pathogenicity, and control strategies of clinically important parasites.
- To familiarize with techniques of sample collection and processing to diagnose parasitic infection.

### **Course Contents:**

#### **Module-I**

**Introduction of Parasitology:** Introduction to clinical parasitology, general characteristics, morphology and classification of parasites, classification of hosts and vectors, relationship between parasites and host, mode of transmission of parasitic infections.

#### **Module-II**

**Protozoology:** Morphology, life cycle, pathogenicity, prevention and lab diagnosis of Entamoeba, Dientamoeba, Iodamoeba, Trichomonas, Trypanosomes, Leishmania, Giardia, Plasmodium, Isopora, Balantidium and Toxoplasma.

#### **Module-III**

**Helminthology:** Morphology, life cycle, pathogenicity, prevention and lab diagnosis of-

- i) Platyhelminthes: Diphylobothrium, Taenia, Echinococcus, Hymenolepis, Schistosoma, Fasciola, Fasciolopsis, Clonorchis, Peragonimus.
- ii) Nematelminthes: Ascaris, Ancylostoma, Necator, Strongyloides, Trichinella, Enterobius, Trichurias, Wucheria, Brugia, Loa loa, Onchocerca, Dracunculus.

#### **Module-IV**

**Diagnostic Methods:** Collection, transportation, processing of different clinical specimens for parasitological examination, concentration techniques, rapid diagnostic techniques and permanent smears preparation techniques.

### **Examination Scheme**

<b>Components</b>	<b>CA</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	15	5	10	70

### **Recommended books:**

- Arora & Arora, Text book of Medical parasitology, 4<sup>th</sup> Edition 2015, CBS Publishers.
- Saugata Ghosh, Paniker's text book of medical parasitology, 7<sup>th</sup> Edition 2013, Jaypee Brothers Medical Publishers.

- David T. John, William A. Petri Jr., Markell and Voge's Medical Parasitology, 9<sup>th</sup> Edition 2006, Saunders Elseviers.

## **METABOLIC BIOCHEMISTRY**

**Course Code: MLT2310**

**Credit Units: 03**

### **Course Objectives :**

- The course will impart the concept of major metabolic processes.
- The subject emphasizes on importance and clinical aspects of metabolic pathways.

### **Course Contents:**

#### **Module-I**

**Carbohydrates metabolism:** Glycolysis, Krebs cycle, gluconeogenesis, glycogenesis, glycogenolysis, HMP Shunt, bioenergetics regulations and clinical aspects.

#### **Module-II**

**Lipids metabolism:** Lipolysis, oxidation of fatty acid, biosynthesis of fatty acids, ketogenesis, ketogenolysis, cholesterol biosynthesis and clinical aspects.

#### **Module-III**

**Amino acid metabolism:** Transamination, deamination, metabolism of ammonia, urea cycle, regulation, relation with TCA cycle and clinical aspects.

#### **Module-IV**

**Nucleic acids metabolism:** Denovo and salvage pathway, purine and pyrimidine nucleotide breakdown and biosynthesis and clinical aspects.

### **Examination Scheme**

<b>Components</b>	<b>CA</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	15	5	10	70

### **Recommended books:**

- U Satyanarayan and U Chakrapani, Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.

## HAEMATOLOGY LAB-III

**Course Code: MLT2311**

**Credit Units: 01**

### Course Objectives:

- To impart the basic knowledge of principles, techniques and clinical importance of routine and selected laboratory procedures.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical hematology laboratory.

### List of Experiments:

1. To perform bleeding time.
2. To perform clotting time.
3. To perform prothrombin time.
4. To perform activated partial prothrombin time.
5. To perform thrombin time.
6. To perform Hess's test.
7. To perform clot retraction time.
8. To study LE cell phenomena.
9. To perform osmotic fragility test.
10. To perform reticulocyte counts.

### Examination Scheme:

Components	Internal Assessment	Attendance	Record	EE
Weightage (%)	20	5	5	70

### Recommended books:

- J. Ochei and A. Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata McGraw Hill Publishing Co. Ltd.

## CLINICAL BIOCHEMISTRY LAB

**Course Code: MLT2312**

**Credit Units: 01**

### Course Objectives:

- To impart the basic knowledge of principles, techniques and clinical importance of routine and selected laboratory procedures.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical biochemistry laboratory.

### List of Experiments:

1. To perform blood glucose.
2. To perform blood urea.
3. To perform total bilirubin.
4. To perform total plasma protein.
5. To perform serum creatinine.
6. Estimation of serum calcium ion.
7. Estimation of serum uric acid.
8. To perform blood urea nitrogen.
9. Estimation of serum phosphate.
10. Estimation of serum phosphorus.

### Examination Scheme:

Components	Internal Assessment	Attendance	Record	EE
Weightage (%)	20	5	5	70

### Recommended books:

Components	Viva	A	ME	EE
Weightage (%)	10	5	15	70

## HOSPITAL ADMINISTRATION

**Course Code: MLT2305**

**Credit Units: 03**

**Course Objective:** To develop understanding about the norms and standards for accreditation of the healthcare organization and adopt continuous evaluation to improve the quality of health care settings.

### **Course Contents:**

#### **Module-I**

**Hospital Organization:** History & development of hospitals, types & sizes of hospitals, role & functions of hospital administrator and hospital information system.

#### **Module-II**

**Financial Aspects:** Cost & its classification; Theory of supply & demand; Break even analysis.

#### **Module-III**

**Hospital Material Management:** Types of stores in hospitals; Material cycle; Location & Layout of store premises.

#### **Module-IV**

**Legal Aspects:** Statutory obligations; Medical negligence; Prevention against litigation.

#### **Module-V**

**Clinical services:** OPD, IPD, OT, ICU and emergency services.

**Support services:** Laboratory, Radiology, Blood bank and CSSD.

**Utility services:** MRD, engineering and pharmacy etc.

### **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

### **Recommended Books:**

- Yashpal Sharma, R. K. Sharma and L A Gomas. Hospital administration principles and practice, 1<sup>st</sup> edition 2013, Jaypee brothers publication.

## LAB MANAGEMENT & SAFETY PROCESS

**Course Code: MLT2306**

**Credit Units: 03**

**Course Objective:** The students will aware about the ethics of a clinical laboratory and learn about good laboratory practice, safety measures and quality management in a clinical laboratory.

### **Course Contents:**

#### **Module-I**

**Quality control:** Introduction to quality control, total quality management framework, quality laboratory processes, quality assurance, quality assessment, quality control, quality planning and quality improvement, costs of conformance and non conformance, appraisal costs, prevention costs, internal quality control, basic steps, sources of error and their correction methods, CAPA - corrective action & preventive action and sources of variation in laboratory results.

#### **Module-II**

**External quality control:** Quality control charts, Levy- Jennings and Cusum charts, external quality control, quality control programme, intrinsic and extrinsic and random errors, current trends in laboratory accreditation, ISO certificate, West guard rules and demonstration of various methods of quality control.

#### **Module-III**

**Laboratory ethics:** Ethical Principles and standards for a clinical laboratory professional – Duty to the patient, colleagues, other professionals and the society.

**Laboratory accreditation:** Good Laboratory Practice (GLP) Regulations and Accreditation – Introduction, aims and advantages of GLP and accreditation.

#### **Module-IV**

**Laboratory safety measures:** Awareness / Safety in a clinical laboratory, general safety precautions; HIV – pre and post-exposure guidelines; Hepatitis B & C – pre and Post-exposure guidelines; Drug resistant tuberculosis; Patient management for clinical samples collection, transportation and preservation of sample; Sample, purpose and methods of accountability.

### **Examination Scheme**

Components	P	A	ME	EE
Weightage (%)	15	5	10	70

### **Recommended books:**

- Textbook of Medical Lab Technology ,Sood, Jaypee Brothers Publications
- Fundamentals of urine and body fluid analysis (3rd ed.) - Brunzel, N. A

## Syllabus - Fourth Semester

### CLINICAL PATHOLOGY & CYTOLOGY

**Course Code: MLT2405**

**Credit Units: 03**

**Course Objectives:**

- To develop the knowledge about physical, chemical and microscopic examination of various clinical sample.
- To provide the understanding of collection, processing and clinical aspects of various body fluids.
- To develop the knowledge about various stains used in cytology.

**Course Contents:**

**Module-I**

**Urine Analysis:** Introduction, collection, handling, transportation, preservation and storage of urine; Physical, chemical and microscopic examinations with clinical significance; other specific tests and 24 hrs urine analysis.

**Module-II**

**Stool analysis:** Introduction, collection, preservation, transportation and clinical aspects of stool sample; Physical, chemical and microscopic examination with clinical significance.

**Semen analysis:** Introduction, composition and clinical aspects of semen, collection, preservation and transportation of semen sample; Physical, chemical and microscopic examinations with clinical significance.

**Module-III**

**CSF analysis:** Introduction, collection, transportation, processing and clinical indications of CSF analysis.

**Synovial fluid analysis:** Introduction, collection, transportation, processing and clinical indications of synovial fluid analysis.

**Serous fluids analysis:** Introduction, collection, transportation, processing and clinical indications of pleural, pericardial and peritoneal fluids analysis.

**Module-IV**

**Cytology:** Introduction to cytology and exfoliative cytology and clinical importance; Collection, preservation, transportation and processing of cytological specimens (Sputum, Bronchial brush, Esophageal and gastric brush, oral scraping, Breast aspiration and Nipple discharge, Cervical and vaginal specimens).

**Cytological stains:** Introduction, composition and preparation of cytological stains; Staining procedure - Giemsa stain, Papanicolaou stain, PAS stain, Haematoxylin and eosin stain, Masson's trichrome stain and Ziehl-Neelsen stain.

**Examination Scheme**

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

**Recommended books:**

- Medical Laboratory Science: Theory and practice by J. Ochei, Arundhati kolhatkar, 1<sup>st</sup> Edition 2000, Mcgraw Hill Education.
- P K Godkar, Text book of Medical Laboratory technology, 3<sup>rd</sup> Edition 2014, Bhalani Publication.

## CLINICAL VIROLOGY AND MYCOLOGY

**Course Code: MLT2406**

**Credit Units: 03**

**Course Objectives:**

- To impart knowledge of diagnosis of viral diseases.
- To impart knowledge of diagnosis of fungal disease.
- To provide understanding of molecular method of diseases diagnosis.

**Course Contents:**

**Module-I**

**Virology:** General properties of viruses; Collection, transportation and storage of clinical samples; Cultivation of viruses; Molecular methods for virus diagnosis.

**Module-II**

**Clinically important virus:** Human immunodeficiency viruses, viral hepatitis, rabies virus, herpes viruses, influenza viruses, rubella, mumps, measles, rota virus, poliomyelitis, japanese encephalitis, dengue, chikungunya, human onocogenic viruses and kysanur forest disease.

**Module-III**

**Mycology:** General properties, morphology, classification and cultivation of fungi; Types of mycoses; Lab diagnosis of fungal infections.

**Module-IV**

**Common fungal infections:** Dermatophytes, candidiasis, mycetoma, rhinosporidium, sporotrichosis, histoplasmosis, blastomycosis, coccidioidosis, paracoccidioidosis, cryptococcosis, aspergillosis, pencillosis, zygomycosis and pneumocystis.

**Examination Scheme**

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

**Recommended books:**

## DIAGNOSTIC BIOCHEMISTRY-I

**Course Code: MLT2407**

**Credit Units: 03**

### Course Objectives:

- To enhance the knowledge of various diagnostic tests for human health.
- To impart the knowledge of biochemical parameters in metabolic disorders.

### Course Contents:

#### Module-I

**Haem catabolism and bilirubin metabolism:** Bilirubin formation and excretion, Conjugated and un-conjugated bilirubin, Normal and abnormal values and clinical importance of serum bilirubin.

**Clinically important Iso-enzymes:** Creatine kinase, Lactate dehydrogenase, SGOT, SGPT, ALP, ACP.

#### Module-II

**Liver function test:** Introduction, normal ranges and clinical significance of albumin, aspartate transaminase, transaminases, alkaline phosphatase, lactate dehydrogenase, total bilirubin, direct bilirubin, gamma glutamyl transpeptidase, INR, 5' nucleotidase, coagulation test, clinical conditions.

#### Module-III

**Pancreatic function test:** Amylase, lipase, insulin, glucagon, clinical conditions.

**Diabetes:** Introduction and biochemical changes, types of diabetes, biochemical changes, role of insulin and glucagon, complications of diabetes, diabetes in relation to pregnancy and cardiovascular disease.

**Diabetes profile:** Oral glucose tolerance test and HbA1c.

#### Module-IV

**Thyroid function test:** T3 and T4, TSH, TRH, free T3 and T4, rT3 and rT4, Calcitonin, anti TSH, Thyroglobin, Iodine, clinical conditions

**Infertility profile:** Testosterone, Estrogen, Progesterone, Prolactin, Oxytocin, LH, FSH, clinical conditions

### Examination Scheme

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

### Recommended books:

- U Satyanarayan and U Chakrapani, Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.

## DIAGNOSTIC BIOCHEMISTRY LAB-I

**Course Code: MLT2408**

**Credit Units: 01**

### Course Objectives:

- To impart the basic knowledge of principles, techniques and clinical importance of routine and selected laboratory procedures.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical biochemistry laboratory.

### List of experiments:

1. To perform serum albumin and A: G ratio.
2. To perform serum ALP.
3. To perform SGPT.
4. To perform SGOT.
5. To perform serum amylase
6. To perform serum lipase.
7. To perform triiodothyronine hormone.
8. To perform tetraiodothyronine hormone.
9. To perform OGTT.
10. To perform HbA<sub>1c</sub>.

### Examination Scheme

Components	Internal Assessment	Attendance	Record	EE
Weightage(%)	20	5	5	70

### Recommended books:

- J. Ochei and A. Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata McGraw Hill Publishing Co. Ltd.
- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.

## CLINICAL TRAINING-IV

**Course Code: MLT2409**

**Credit Units: 2**

**Course Objectives:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

### **Plan for clinical training:**

1. Pathology Lab
2. Virology and Mycology Lab
3. Biochemistry Lab

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

### **Examination Scheme**

<b>Components</b>	<b>Viva</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## BASICS IN COMPUTER & PC PACKAGE

**Course Code: MLT2410**

**Credit Units: 03**

### **Course Objective:**

This course aims at preparing the students to handle personal computers, learn basics of the current hardware, software and windows operating systems being used.

### **Course Contents:**

#### **Module-I**

**Computer Basics:** History of computers, Definition of computers, Input Devices, storage devices, types of memory, and units of measurement, range of computers, generations of computers and characteristics of computers.

#### **Module-II**

**System:** Hardware, Software,, system definition, fundamentals of networking, internet, performing searches and working with search engines ,types of software and its applications.

#### **Module-III**

**Office Application Suite:** Word Processor, spread sheet, presentations, other utility tools  
Fundamentals of Linux /windows operating system, functions, interfaces and basic commands.

#### **Module-IV**

**Special Applications:** Use of database software for clinic records; Use of specialized software for optometric use.

### **List of practical:**

- Various browsers, Search engines, E-mail
- Text document with multiple formatting option using specific office package
- Spread sheet using a specified office package
- Presentation on a specified topic using a specified office package.

### **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>(CT)</b>	<b>V</b>	<b>P</b>
<b>Weightage (%)</b>	20	20	20	20	20

(CT-Class Test; V-Viva; HA - Home Assignment; P-Practical; A- Attendance)

## MATHEMATICS AND BIOSTATISTICS

**Course Code: MLT2411**

**Credit Units: 03**

**Course Objective:** Students will be able to organize, summarize and display quantitative data; and also able to design valid and efficient studies to address public health and clinical problems.

### **Course Contents:**

#### **Module-I**

**Introduction:** Statistical data and methods, types of tables, comparisons of tables, record, file sources of data, questionnaire design, design of sample survey, simple random sampling, stratified sampling, data coding and data verification.

#### **Module-II**

**Data Presentation:** Statistical tables, types of tables, comparisons, methods of presentation, graphic presentation, chart types, plotting a curve, rules for drawing curves, rules for drawing curves, bar charts, pictography, pie charts and histograms.

#### **Module-III**

**Statistical Methods:** Raw Data, frequency distribution, selecting number of classes, class limits, curves, cumulative frequency distribution, cumulative frequency distribution and gives, measures of central tendency, arithmetic mean, median, mode, harmonic mean, range, quartile deviation, average deviation, skewness and kurtosis.

#### **Module-IV**

**Correlation, Regression, Probability and Sampling:** Degree of correlation, correlation co-efficient, methods of concurrent deviation, co-efficient of rank correlation, partial correlation analysis, multiple correlation, simple and complex regression, Introduction to probability and sampling, addition rule, conditional probability, random variables, probability distribution and mathematical expectations.

#### **Module-V**

**Testing of Hypothesis:** Null Hypothesis, Alternate Hypothesis, level of significance, type 1 error, type 2 error, testing of hypothesis of a single mean, two means, paired means for small and large samples.

### **Examination Scheme:**

Components	CD	CT	SA	A	EE
Weightage	5	10	10	5	70

(CD= Class Discussion, CT = Class Test, SA= Short Assignments, A= Attendance. EE= External Examination)

### **Recommended books:**

- Vijai Basotia (2008). Fundamentals of Statistics. Shree Niwas Publications
- Andy Field (Discovering Statistics Using SPSS (Introducing Statistical Methods S.) (2nd Edition). Sage Publications Ltd; 2nd edition
- Gupta & Kapoor-Fundamentals of Mathematical Statistics-Sultan Chand
- Kothari-Research Methodology.

## Syllabus - Fifth Semester

### HISTOPATHOLOGY

Course Code: MLT2507

Credit Units : 04

#### Course Objectives:

- To impart the knowledge of fixatives and tissue processing for histopathological examination.
- To impart the knowledge of microtomy and staining technique in histopathology laboratory.

#### Course Contents:

##### Module-I

**Grossing:** Introduction, histological specimens, labeling and reporting.

**Fixation:** Definition, classification, properties, composition, advantages and disadvantages of fixatives; Post chroming.

**Decalcification:** Importance, decalcifying agent, composition, advantages and disadvantages.

##### Module-II:

**Tissue processing:** Definition, importance, steps, dehydrating agents and dehydration process, clearing agents and clearing process.

**Embedding:** Embedding media, water soluble embedding media;

##### Module-III:

**Microtome:** Definition, types, care and use of microtome; Microtome knife, honing and stropping; Technique for sectioning, paraffin embedded tissue, frozen section; Errors in sectioning and remedies.

**Mounting:** Mounting media, advantages and disadvantages.

##### Module-IV:

**Staining:** Hematoxylin and eosin staining; Specific stain for collagen, reticulin, elastin, fat, amyloid, glycogen, mucin, iron and neuron.

#### Examination Scheme

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

#### Recommended books:

- J Ochei and A Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata Mcgraw Hill Publishing Co Ltd.
- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- C F A Culling, Handbook of Histopathological and Histochemical Techniques, 3<sup>rd</sup> Edition 1974, Butterworth-Heinemann.
- Bancroft J. D and Gamble M, Theory & Practice of Histological Techniques, 6<sup>th</sup> Edition 2008, Churchill livingstone.

# IMMUNOHEMATOLOGY AND BLOOD TRANSFUSION

**Course Code: MLT2508**

**Credit Units: 03**

## **Course objectives:**

- To impart the basic knowledge of blood group antigens and antibodies.
- To provide the concepts of donor screening and blood transfusion reactions.

## **Course Contents:**

### **Module-I**

**Blood group system:** Introduction and history of blood group systems, ABO blood group system and Rh system, blood group antigens and antibody, Sub groups, Bombay group, Red cell membrane structure,

### **Module-II**

**Phlebotomy and blood storage:** blood bags and preservatives, donor selection criteria, blood collection procedure, component separation, cryoprecipitate, screening and storage of blood.

**Pre-transfusion testing:** blood grouping and typing, compatibility testing, coomb's test, D<sup>u</sup> test and HLA type.

### **Module-III**

**Blood transfusion:** Indication, types, apheresis, transfusion reactions, erythroblastosis fetalis, investigation of transfusion reaction.

**Artificial blood:** Clinical trials, blood substitutes and uses.

### **Module-IV**

**Blood banking:** Organization, operation and administration of blood bank and blood donation camp; quality control in blood banking.

**Advances in transfusion medicine:** Cord blood bank, Automation, blood collection machine.

## **Examination Scheme**

<b>Components</b>	<b>CA</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage(%)</b>	15	5	10	70

## **Recommended books:**

- J Ochei and A Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata Mcgraw Hill Publishing Co Ltd.
- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- R N Makroo, Principle &Practice of transfussion medicine, 1<sup>st</sup> Edition 2014, Jain Books.

- Richard A. McPherson, Henry's Clinical Diagnosis and Management by Laboratory Methods, 22<sup>nd</sup> Edition 2014, Elsevier.

# BIOSTATISTICS AND QUALITY ASSURANCE

Course Code: MLT2509

Credit Units: 03

## Course Objectives:

- To enable the student to understand the applications of statistics in diagnostic research.
- To impart the knowledge of hypotheses to estimate the possible risk factors of a disease.
- To enable to address public health and clinical problems in statistics forms.

## Course Contents:

### Module-I

**Basic Biostatistics:** Introduction, basic concept and clinical importance of biostatistics; Data classification, source of data, variables; Central tendency – mean, median, mode; Mode of dispersion – standard deviation, variance; Standard error, coefficient of variation and their importance; Normal distribution and t- test and its application.

### Module-II

**Sampling:** Introduction: various methods, errors and distribution of sampling.

**Hypothesis:** Introduction, basic concept and importance of null hypothesis and alternate hypothesis.

**Quality assurance system:** Introduction and its application; Internal quality assurance and external quality assurance.

### Module-III

**Quality control:** Introduction, basic concept and importance of quality control; Internal quality control and external quality control; Preparation quality control charts; Introduction, basic concept and application of Westguard rules; Biostatistics and its relation with laboratory quality control; Basic terminology- accuracy, precision, error, bias, sensitivity, specificity.

### Module-IV

**Automation:** Introduction, basic principle and importance of automation; Phases of automation – pre-analytical, analytical and post analytical.

## DIAGNOSTIC BIOCHEMISTRY-II

Course Code: MLT2510

Credit Units: 04

### Course Objectives:

- To enhance the knowledge about the bio molecules and their role in human health.
- To impart the knowledge of analysis of biochemical parameters in metabolic disorders.
- To impart the knowledge of principles of biochemical tests and their clinical significance.

### Course Contents:

#### Module-I

**Renal function test:** Glomerular Filtration Tests, tests for renal blood flow, tests of tubular function, other miscellaneous tests to assess renal function.

**Lipoproteins:** Formation of HDL, LDL, VLDL, circulation of lipoproteins, role in atherosclerosis, hyper and hypolipoproteinemia.

#### Module-II

**Gastric function test:** Patient preparation, principle and procedure of gastric analysis, fasting gastric juice analysis, post meal gastric analysis, post stimulation gastric analysis, clinical significance.

**Intestinal malabsorption analysis:** Principle, procedure of xylose absorption test, clinical significance of xylose absorption test.

#### Module-III

**Acid base balance test:** Buffer systems, acidosis and its pathophysiology, alkalosis and its pathophysiology, arterial blood gas test, metabolic panel, pulmonary function test.

**Blood electrolytes:** Sodium, potassium, magnesium, chloride and calcium.

#### Module-IV

**Tumour markers:** Biochemical changes in cancer, etiology of cancer, tumor markers, apoptosis and its role in carcinogens.

**Toxicology:** Drug abuse, lead, mercury, salicylates, aspirin, alcohol, illegal drugs, barbiturates.

### Examination Scheme

## DIAGNOSTIC BIOCHEMISTRY LAB-II

**Course Code: MLT2511**

**Credit Units: 01**

### Course Objectives:

- To impart the basic knowledge of principles, techniques and clinical importance of routine and selected laboratory procedures.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical biochemistry laboratory.

### List of Experiments:

1. To perform serum total cholesterol.
2. To perform serum triglyceride.
3. To perform serum HDL, LDL and VLDL.
4. Determination of Acid Phosphatase.
5. To perform urea clearance test.
6. To perform creatinine clearance test.
7. Estimation of Lactate dehydrogenase .
8. Estimation of serum sodium.
9. Estimation of serum potassium.
10. To perform serum chloride.

### Examination Scheme:

## CLINICAL TRAINING-V

**Course Code: MLT2512**

**Credit Units: 2**

**Course Objective:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

**Plan for clinical training:**

1. Histopathology Lab
2. Immunohematology and Blood Transfusion Lab
3. Biochemistry Lab

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

**Examination Scheme**

Components	Viva	A	ME	EE
Weightage (%)	10	5	15	70

# PREVENTIVE & SOCIAL MEDICINE

Course Code: MLT2505

Credit Units: 03

## Course objective:

- To sensitize the students with the awareness of communicable and non – communicable diseases.
- To make the students capable of investigating and managing possible outbreaks or epidemics.

## Course Contents:

### Module-I

**Health and Disease:** Determinants of health, multi – factorial causation of disease host, agent, environment relationship primary, secondary and tertiary levels of prevention with examples related to few diseases of national importance; Natural history of disease; Mode of transmission of disease; Air – borne, vector and vehicle transmission; Methods of control with examples for control of each mode.

**Disinfection:** Introduction, disinfection of the infective materials received in the Laboratory by using the appropriate disinfection methods at the health centre level.

### Module-II

**Health services:** Brief description of organization of health services at the centre and state levels; Primary health care – Definition, components and principles of primary health care, health for all indicators; Primary health centre – The functions, staffing pattern and the role of laboratory technicians in primary health centre, laboratory tests for use in health centre(see annexure for description).

**Health Programmes:** Family welfare programme; National programme for water supply and sanitation; Nutritional programmes; Immunization and universal immunization programme; National programmes of health and disease eradication /control; Disease eradication programme: leprosy & guinea worm; Disease control programmes – tuberculosis, malaria, filaria, S.T.D, goitre, cholera and other diarrhoeal diseases and national programme for prevention of blindness including trachoma.

### Module-III

**Demography & Population control:** Introduction; The factors influencing population growth, death rate, birth rate and methods of contraception.

**Environmental sanitation:** Methods of water purification and disinfection, collection of water samples, their transport and bacteriological analysis; Methods of excreta disposal.

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Recommended books:

- Park's Textbook of Preventive and Social Medicine, by K. Park, 24<sup>th</sup> edition, Banarsidas Bhanot Publishers.

# PROJECT

**Course code: MLT2532**

**Credit Units: 03**

## **Course objective:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Chapter Scheme and distribution of marks:**

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual Framework/ National/International Scenario – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusion & Recommendations -- 10 marks

**Chapter 5:** Bibliography -- 05 marks

## **Examination scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) **Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) **Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) **Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) **Abstract:** The body of the report should have summary of the project.
  - a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, inclusion & exclusion criteria and method of analysis), Limitations of the Study, and Planning.
  - b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).
  - c) **Presentation of Data, Analysis and Findings.**
  - d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) **Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) **Annexure:** Questionnaires (if any), relevant reports, etc.  
(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **The Steps of a Project Report**

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Methodology,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

#### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## Syllabus - Sixth Semester

### INTERNSHIP

**Course Code: MLT2637**

**Credit Units: 15**

**Course Objectives:**

The basic objective of internship is to provide first hand practical exposure of the medical laboratory and to acquaint students with the culture of medical lab. The internship training will also provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the laboratory. Thus, this internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the student's intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

**General guidelines:**

Every student of under graduate courses will be required to undergo a practical training in a medical laboratory organization approved by the Institute for four months, after the end of the 5<sup>th</sup> semester examinations. The candidates shall be required to undergo training in the various areas like clinical pathology, clinical hematology, clinical microbiology, clinical biochemistry and blood banking labs of the concerned organization. The organization may assign a specific project to the student, which will be completed by him/her during the period of training. The work done by the student during the training period shall be submitted in the form of a report as per the guidelines provided by the department.

**Chapter scheme for the internship project report:**

Chapter I: Introduction	- 20 marks
Chapter II: Conceptual Framework/National/International Scenario	- 5 marks
Chapter III: Presentation, Analysis and Findings	- 35 marks
Chapter IV: Conclusion and Recommendations	- 15 marks

The report has to be written in font style – Times New Roman, font size – 12, line spacing on both sides of the paper – 1.5 and should be spiral bound. The report should comprise of a maximum of 70 pages and has to be submitted in two copies.

**The components of internship project report:**

The outcome of internship training is the project report. A project report should have the following components:

- 1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the student, name of the supervisor, year of submission of the project work and name of the University.
- 2) Acknowledgement:** Various laboratory organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report:** The body of the report should have these four logical divisions
  - a. **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), limitations of the study, and chapter planning.
  - b. **Conceptual framework / national and international scenario:** (relating to the topic of the project).

- c. Presentation of data, analysis and findings: (using the tools and techniques mentioned in the methodology).
- d. Conclusion and Recommendations: In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexure:** Questionnaires (if any), relevant reports, etc.

**Guidelines for evaluation:**

1. Each of the students has to undertake a project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
2. Language of project report and viva-voce examination should be in English. The project report must be typed and hard (spiral) bound.
3. Failure to submit the project report or failure to appear at the viva-voce examination will be treated as “Absent” in the examination. He /she have to submit the project report and appear at the viva-voce examination in the subsequent years (within the time period as per university rules).
4. No marks will be allotted on the project report unless a candidate appears at the viva-voice examination. Similarly, no marks will be allotted on viva-voce examination unless a candidate submits his/her project report.
5. Evaluation of the project work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
6. A candidate has to qualify in the project work separately, obtaining minimum marks of 40 (project report and viva-voce taken together).

**Evaluation Scheme:**

<b>Internship Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## **Bachelor of Science - Dietetics & Applied Nutrition**

**FLEXILEARN**

-Freedom to design your degree

**Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

## **SEMESTER – I**

### **Principal of Nutrition**

**Course Code: DAN2151**

**Credit Units: 03**

#### **Module I**

Nutrition - General introduction, Classification of nutrients, Functions of food, social function of food, psychological functions of food.

Energy - Definition of Kilocalories, Joule, energy value of foods, determination, physiological fuel values, SDA of foods, determination of energy requirements of body, basal metabolic rate determination, factors influencing BMR, Recommended Dietary Allowances for energy.

Carbohydrates - functions, source, digestion, absorption and utilization, dietary fiber and health.

#### **Module-II**

Protein - Classification, functions, sources and requirements, digestion, absorption and Utilization, Deficiency due to shortage of protein and energy – PCM, kwashiorkor

Fats and Lipids - Classification, functions, sources, requirement, digestion, absorption and utilization

#### **Module-III**

Vitamins – Fat soluble vitamins –A, D, E and K- functions, source, requirements, deficiency disorders. Water soluble vitamins –The B-complex vitamins – Thiamine, Riboflavin, Niacin, Folic acid, Biotin, Pantothenic acid and Vitamin C - functions, source, requirements and deficiency disorders.

#### **Module-IV**

Minerals - General functions in the body, classification- macro and micro minerals. Micro minerals – Iron, Fluorine, Zinc, copper, Iodine -functions, absorption, utilization, requirements, deficiency and toxicity. Macro minerals – Calcium & phosphorus - functions, absorption, utilization, requirements, deficiency and toxicity.

#### **Module-V**

Water Balance – Functions of water, water distribution, maintenance of water and electrolyte balance, regulation of acid-base balance in the body.

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

8. Understanding Nutrition -Whitney P.N. and Roes S.R., West Publication Co, 1996.

## Food Science-I

Course Code: DAN2101

Credit

Units: 03

### Module-I

Food group: Basic 4, 5&7 food groups; functional food groups-energy yielding, body building and protective foods (only sources and not properties and functions) food pyramid

### Module-II

Study of various cooking methods - Boiling, steaming, stewing, frying, baking, roasting, broiling, cooking under pressure. Stages of sugar cookery, crystallization and factors affecting crystallization.

### Module-III

Cereals - Structure, composition of rice, wheat, effects of cooking on parboiled and raw rice, principles of starch cookery, gelatinization, flours-types, formation of dough and batter, hydration, rheological properties and development of gluten.

### Module-IV

Pulses and Legumes – Varieties of pulses & legumes, composition, nutritive value, cooking quality of pulses, germination and its effect.

### Module-V

Vegetables - Classification, composition, nutritive value, selection and preparation for cooking, methods and principles involved in cooking, and medicinal value of vegetables.

Fruits - Classification, composition, nutritive value, changes during ripening, methods and effects of cooking, enzymatic browning and medicinal value of fruits.

### Examination Scheme:

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

6.Modern Cookery for teaching and trade, volume I&II ,Thangam Philip. Orient Longmans Ltd.

7.Food Fundamentals by MacWilliams, John Willy and son's, New York.

8.Food Facts & Principles by Shakunthala manay & ShadakhraSwamy.

9.Food Science by Srilakshmi , second edition,2002.

## **SEMESTER – I**

### **Nutritional Biochemistry**

**Course Code: DAN2102**

**Credit Units: 04**

#### **Module I:**

Membrane Structure, Enzymes and Biologic Oxidation: Membrane Structure and functions, Transport of metabolites across membranes, Definition, importance, nomenclature and classification of enzymes, Factors affecting enzyme activity.

Coenzymes and cofactors, Enzyme inhibition and regulation. Importance of biologic oxidation, Components of electron transport chain, Oxidative phosphorylation and ATP generation.

#### **Module II:**

Carbohydrates: Chemistry and Metabolism

1. Definition, importance, classification and properties of carbohydrates
2. Carbohydrate metabolism (a) Glycolysis (b) Citric acid cycle (c) Glycogenesis (d) Glycogenolysis (e) Gluconeogenesis (f) Hexose Monophosphate shunt

#### **Module III:**

Lipids: Chemistry and Metabolism

1. Importance, classification and properties of lipids
2. Lipid metabolism (a) Oxidation of fatty acids (b) Fatty acid synthesis (c) Metabolism of unsaturated fatty acids (d) Metabolism of triglycerides, (e) Chain elongation and desaturase system.
3. Types of lipoproteins and their functions.

#### **Module IV:**

Amino acids and Proteins: Chemistry and Metabolism

1. Classification of amino acids
2. Structure of proteins – primary, secondary, tertiary and quaternary structures
3. Biologically important peptides
4. Functions of proteins
5. General reactions: Transamination, deamination and decarboxylation reactions
6. Urea cycle

#### **Module V:**

Nucleic acids and Nucleoproteins—Chemistry and metabolism

1. Chemistry and biological importance of nucleic acids
2. Nucleoproteins
3. Catabolism of purines, formation of uric acid and its relationship to Gout
4. Protein biosynthesis – translation, transcription and post translation events

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>

## **SEMESTER – I**

### **Food Science – I Lab**

**Course Code: DAN2103**

**Credit Units: 02**

Note: One recipe in each food group indicating best method of cooking

Food group Grouping of foods, discussion on nutritive value,

Sensory Evaluation

1. Cereals:

a) Microscopic study of different starches.

b) Methods of combining starch and boiling water.

C) Study of effects of moist heat on starch.

d) Preparation of white sauces and soups.

e) Gluten formation.

2. Pulses -

Effect of hard water, soft water, alkali, papaya on texture and cooking time of grams and dhals.

3. Vegetables -

Effect of shredding, dicing, acids, alkali, covering, steaming and pressure cooking on the different pigments and acceptability of vegetables.

4. Fruits -

Study of different methods of preventing enzymatic browning of fruits. Pectin content of fruits.

#### **Examination Scheme:**

## SEMESTER – I

### Nutritional Biochemistry– Lab

Course Code: DAN2104

Credit Units: 02

1. Qualitative tests for sugars-glucose, fructose, lactose, maltose and galactose.
2. Qualitative estimation of reducing sugars.
3. Qualitative tests for proteins.
4. Qualitative tests for minerals.
5. Quantitative estimation of Calcium.
6. Quantitative estimation of Phosphorous.
7. Quantitative estimation of Vitamin-C.
8. Deamination Experiments
9. Estimation of total nitrogen in foods (Micro or Macro Kjeldahl methods)
10. Lipid extraction
11. Determination of Iodine value.
12. Estimation of Iron.

## EXAMINATION DISTRIBUTION SCHEME

<b>Paper Theory</b>	<b>Name</b>	<b>Maximum marks</b>	<b>Exam Duration</b>
DAN2251	Family Meal Management	70 (30*)	3 hrs
DAN2201	Food Science II	70 (30*)	3 hrs
DAN2202	Food Microbiology	70 (30*)	3 hrs

\* Internal Assessment = 30 each

Total = 280 + 120 = 400

## PRACTICAL EXAM DISTRIBUTION

<b>Paper Practical</b>	<b>Name</b>	<b>Max Marks</b>	<b>Exam Duration</b>
DAN2203	Food Science II Lab	70 (30*)	4 hrs
DAN2204	Food Microbiology Lab	70 (30*)	4 hrs

\* Internal Assessment = 30 each

Total = 140 + 60 = 200

Total Marks Distribution = 300 + 200 = 500

## **SEMESTER – II**

### **Family Meal Management**

**Course Code: DAN2251**

**Credit Units: 03**

#### **Module I**

Protein quality - Definition of biological value, NPU, digestibility coefficient, PER definition and measurement. Reference protein, essential amino acids and mutual supplementation of dietary protein.

Fats : importance of essential fatty acids, their requirements and deficiency.

Basic Principles of Meal Planning - Basic meal pattern and its need to suit different income levels age and physiological stages.

#### **Module II**

Nutritional Needs during Pregnancy - Normal growth and weight change. Nutritional requirements, complications during various stages of pregnancy –

Nutrition during Lactation - Function of breast, physiology of lactation, hormonal control and relaxation, Milk output and factors affecting it, frequency of nursing- supply and demand, nutritional components of colostrum and mature milk. Nutritional requirements of lactating women.

#### **Module III**

Nutrition during Infancy - Growth and development, factors influencing growth, Advantages of breast feeding, difference between breast feeding and bottle feeding, factors to be considered in bottle feeding. Different types of milk formulae.

Weaning Foods - Weaning foods and commercially prepared baby foods. Uses of growth chart to monitor growth & development. Nutritional requirements of infants' upto one year.

Weaning foods developed by different organizations. Problems of feeding in normal and premature infants.

#### **Module IV**

Nutritional needs of pre-school children (1-5 year) - Nutritional and food requirements of pre school children. Factors to be considered while planning meals for pre-school children.

Eating problems of children and their management, preparation of supplementary foods using available low cost foods.

Nutrition for School children - Nutritional requirement, meal planning for school children, dental caries and packed lunch.

#### **Module V**

Nutrition during Adolescence - Physical Growth- changes and factors affecting height and weight, Nutritional requirement. Nutritional problems in adolescence- Iron deficiency anemia, anorexia nervosa and bulimia nervosa.

Nutritional needs of adults (men and women) – Nutrition and work efficiency. Menopausal and post menopausal women, hormonal changes, nutritional requirement of the adult in relation to occupation.

Nutrition During Old Age - Physiological changes in ageing- psycho-social and economic factors affecting eating behavior. Nutritional problems of aged and their management.

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>

## **SEMESTER – II**

### **Food Science II**

**Course Code: DAN2201**

**Credit Units: 03**

#### **Module I**

Milk - Composition, nutritive value, kinds of milk, pasteurization and homogenization of milk, changes in milk during heat processing, preparation of cheese and milk powder.

#### **Module II**

Egg - Structure, composition, selection, nutritive value, uses of egg in cookery, methods of cooking, foam formation and factors affecting foam formation.

#### **Module III**

Fleshy foods - Types of fleshy foods, meat structure, composition, nutritive value, selection of meat, post mortem changes in meat, aging, tenderness, methods of cooking meat and their effects.

Poultry – types, composition, nutritive value, selection, methods of cooking.

Fish - Structure, composition, nutritive value selection of fish, methods of cooking.

#### **Module IV**

Fats and Oils - Types of oils, function of fats and oils, shortening effects of oil, smoking point of oil, effect of heat on oil absorption and factors affecting absorption of oil.

#### **Module V**

Beverages - Classification, nutritive value, milk based beverages, fruit based beverages and preparation of carbonated beverages. Spices and Condiments - Uses and abuses.

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>

## **SEMESTER – II**

### **Food Microbiology**

**Course Code: DAN2202**

**Credit Units: 04**

#### **Module I**

Introduction and History of Microbiology - The theory of spontaneous generation, gene theory of disease, Louis pasteur's experiment. Different terminology of Heterotrophic nutrition, autotrophic nutrition, saprophytic, holozoic, host, culture, parasite.

Bacteria - Morphology, reproduction, growth curve, nomenclature, genera of bacteria important in food microbiology. Observation of motility of bacteria in bottle milk.

Mold - Morphology, reproduction, physiology and nutrition, genera of mold important in foods.

Demonstration of mold growth in bread.

#### **Module II**

Yeast - Morphology, reproduction, classification, physiology and nutrition, process of hybridization, importance of yeast in food. Observation of yeast cells

Virus - Occurrence, morphology, reproduction, human viral disease caused by virus.

Algae - Occurrence, morphology, reproduction, importance of algae.

General principles underlying spoilage- fitness and unfitness of food for consumption, causes for spoilage, factors affecting kinds and number of micro organism in food, factors affecting the growth of micro organism in food.

#### **Module III**

Contamination and kinds of micro organisms causing spoilage of

Cereal products- grains, flour, baked products and cake.

Fruits and vegetables and their products- fruit juice, pickles.

Fleshy foods- meats, poultry and fish. Observation of milk spoilage.

#### **Module IV**

Contamination and kinds of micro organisms causing spoilage of

Eggs and milk and milk products- cream, milk frozen desserts and butter.

Fats and oils, bottled beverages, spices and condiments.

Food poisoning, food infection and food borne diseases.

Micro organism in air, air borne diseases.

#### **Module V**

Micro-organisms in Water - sources, bacteriological examinations, total count, test of E.Coli, purification of water, water borne diseases.

Micro organisms in sewage and sewage disposal.

Destruction of bacteria- sterilization, physical agents, light, desiccators, electricity, heat and chemical agents. Visit to micro lab to learn most probable number.

**Course Code: DAN2203**

**Credit Units: 02**

1. **Eggs** -  
Coagulation of egg protein - factors, Egg white foam, effects of beating, sugar, acid and temperature
2. **Milk** cookery  
Coagulation of milk protein, paneer, cooking of vegetables in milk.
3. **FatsandOils** -  
Comparison of smoking temperature of some fats and oils.
4. **Sugar** and Jaggery -  
Different stages of crystallisation of sugar.
5. Experience in Baking (Group work) Cakes and biscuits.
6. Experience in preservation of foods (Group work) salting, pickling, preservation with sugar, jams, jellies, marmalades, squash, sauces and ketchup.
7. **Food adulteration** - Identification of common adulterants - Demonstration.

**Examination Scheme:**

IA				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	15	15	20

**SEMESTER – II**  
**Food Microbiology- Lab**

**Course Code: DAN2204**

**Credit Units: 02**

1. Demonstration of the different parts of the Microscope, the use and care of Microorganism
2. Preparation of Bacterial smear, Simple staining
3. Preparation of Common Laboratory media for cultivation of Bacteria, Yeast & Mold
4. Microbiological Identification of Important Mould & Yeast - Rhizopus, Mucor, Aspergillus, Penicillium, Saccharomyces, Alternaria
5. Demonstration Of Micro biological analysis of water and Milk

## **SEMESTER – III**

### **Basic Dietetics**

**Course Code: DAN2351**

**Credit Units: 03**

#### **Module - I**

Role of Dietician-hospital and community  
Basic concepts in Diet Therapy  
Therapeutic Adaptation of the normal diet

#### **Module - II**

Routine Hospital Diets- Regular diet, light diet, soft diet, full liquid diet and tube feeding.  
Modifications of Diet -Febrile conditions, infections & surgical conditions.

#### **Module - III**

Diets of gastro intestinal disorders, renal diseases, liver diseases, obesity, cardio vascular disorders and diabetes mellitus.  
Geriatrics - Role of diet.

#### **Module - IV**

Feeding infants & children - problems in feeding children in the hospital.  
Feeding the patient - psychology of feeding the patient, assessment of patients needs.

#### **Module - V**

Nutrition & Diet Clinics - Patients check up and dietary counseling, education of the patient and follow up.

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

## **SEMESTER – III**

### **Quantity Food Service**

**Course Code: DAN2301**

**Credit Units: 04**

#### **Module - I**

Floor planning and layout – characteristics of typical food service facilities. Floor plan physical planning, space allocation for the various areas and flow of traffic through receiving, storage, preparation, service and dish washing areas. Working heights and dimensions of work centers, lighting, ventilation and pest – rodent control.

#### **Module - II**

Materials - Basic materials used in the manufacture of equipment, finishes and insulation. Strength and limitation of materials.

#### **Module - III**

Equipment - Equipment required for quantity food service-major and minor equipment with reference to food storage, preparation, service and cleaning. Factors influencing their selection and purchase. Arrangement of equipment in work centers, use, care and maintenance of equipment. Transition from traditional to modern equipment.

#### **Module - IV**

Meal Planning - Menu-principles involved in planning menu, types of menu.

Fuel: Cooking fuels-selection, advantages, limitations, safety measures and fuel saving techniques.

#### **Module - V**

Quantity food preparation – Selection, purchasing and storage of foods, standardization of recipe, portion control, utilization of left over foods.

Marketing of foods –Importance and need for advertisement.

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>

## **SEMESTER – III**

### **Human Physiology**

**Course Code: DAN2302**

**Credit Units: 04**

#### **Module – I**

Cell - Structure and functions

Tissues - Structure and functions

Digestive system - Anatomical consideration – structure & functions, Brief study of the organization of the digestion, absorption and assimilation of food.

#### **Module – II**

Blood, RBC, WBC, Platelets and Lymph. Blood coagulation, blood grouping and Rh factor.

Circulatory system - Heart structure and functions - cardiac cycle, pulse rate and measurement of blood pressure –definition and normal value (only).

#### **Module – III**

Respiratory system - Basic anatomy of the respiratory system, process of respiration, transport and exchange of oxygen and carbon di oxide in the body.

Endocrine glands - Structure and function of pituitary, thyroid, islets of langerhans and adrenal gland.

#### **Module – IV**

Reproductive system - Anatomy of the male and female reproductive organs. Menstrual cycle

Sense organs - Structure and function of eye, ear, nose, tongue and skin.

#### **Module – V**

Excretory system - Excretory organs - structure of kidney and functions, formation of urine, composition of urine.

Muscles - physiology of muscular action.

Central nervous system - Physiology of the nerve cell, parts of the central nervous system and function.

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

**SEMESTER – III**  
**Human Physiology-Lab**

**Course Code: DAN2303**

**Credit Units: 01**

1. Estimation of Hemoglobin
2. Determination of Blood Group
3. Collect biochemical reports of the patients and study the same and prepare field survey report
  - a. Communicable diseases
  - b. Non-Communicable diseases
4. Determination of Blood Clotting time
5. Cardiopulmonary Resuscitation
6. Blood Pressure determination

**Examination Scheme:**

A				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	15	15	20

**SEMESTER – III**  
**Research Paper-Concentration Elective**

**Course Code: DAN2331**

**Credit Units: 02**

The students will be asked to do meta- analysis in brief(Article writing)

A **meta-analysis** refers to methods focused on contrasting and combining results from different studies, in the hope of identifying patterns among study results, sources of disagreement among those results, or other interesting relationships that may come to light in the context of multiple studies. In its simplest form, this is normally by identification of a common measure of effect size, of which a weighted average might be the output of a meta-analysis. The weighting might be related to sample sizes within the individual studies. More generally there are other differences between the studies that need to be allowed for, but the general aim of a meta-analysis is to more powerfully estimate the true effect size as opposed to a less precise effect size derived in a single study under a given single set of assumptions and conditions.

**Examination Scheme:**

A				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	15	15	20

**SEMESTER – III**  
**Project-Concentration Elective**

**Course Code: DAN2332**

**Credit Units: 03**

Every student shall be allotted a project supervisor. The project supervisor shall be from the Department of Dietetics & Applied Nutrition.

The allotment of the project supervisor will be done during the semester. The topic of project will be finalized by the project supervisor. It is the responsibility of the project supervisor that the student is making the required progress in work.

The project must be completed and submitted in the form of a report by the end of the semester.

1. Individual Project
2. Any one diseases (Infection & fever, allergy, deficiency diseases, obesity)
3. Minimum five clinical cases
4. To present a report furnishing the following data
  - a) Hospital - lay out and organization
  - b) Medical profile
    - a. general details
    - b. family history, associated complications, drugs
    - c. anthropometry and clinical status
    - d. biochemical status
    - e. biophysical status
    - f. progress chart
  - c) Diet therapy

**Examination Scheme:**

A				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	15	15	20

**SEMESTER – III**  
**Workshop-Concentration Elective**

**Course Code: DAN2333**

**Credit Units: 01**

It aims to provide a detailed insight on the simple practical aspects of the chosen topic by organising lectures followed by the group assignments .focus group discussion,Quiz ,debates and various modes of interactions .The registered participants will get participation certificate and one credit point.

**Objectives**

Potential trainers / participants will be able

Plan any low cost Nutritious recipe/Food product development

To plan general intervention strategies(action in order to improve eating habits)

Gather information on sensory evaluation or satisfaction level of the visitors/audience

**Implementation:**

This would be approximately 2 hours long after the completion of lectures. The student will ask the visitors to complete a form with details of their planned recipe including cost, nutritive value etc and its sensory evaluation. This information is necessary as it is important to have a complete idea of the acceptability to make their product better. They would be asked to fill the satisfaction scales/Feedback.This activity would be discussed in further depth during the workshop.

**Examination Scheme:**

<b>A</b>				<b>EE</b>		
<b>A</b>	<b>PR</b>	<b>LR</b>	<b>V</b>	<b>PR</b>	<b>WT</b>	<b>V</b>
5	10	10	5	15	15	20

**SEMESTER – III**  
**Food Processing-Area Elective**

**Course Code: DAN2304**

**Credit Units: 03**

### **Module I**

Cereals and Pulses

Milling of wheat - extraction of flour, refined wheat flour and pasta products

Milling of rice – parboiled rice, rice based instant food

Processing of corn, barley and millets – pearling, flaking and puffing, corn starch products,

Malting

Pulses – Red gram, Bengal gram, black gram, green gram, soy based products, Decortication and dhal milling, elimination of toxic factors, fermentation and germination

### **Module II**

Milk and Milk products

Collection, Standardization, pasteurization, homogenization, UHT processing, manufacture of paneer, khoa, curd, yogurt, cream, butter, cheese, ghee, flavoured milk, ice creams, dehydrated milk products

### **Module III**

Fruits and vegetables

Harvesting, physiological and bio chemical changes during ripening, handling and storage, general methods of processing - extraction and pulping, raw material and product specifications and standards.

### **Module IV**

Meat, poultry, fish and egg:

Ageing and tenderizing, curing, smoking and freezing of meat, fresh storage of meat. Meat based products: sausages, salaami, bacon. Fish processing and storage, pickling.

Egg: storage, frozen egg, dehydrated egg powder.

Others

### **Module V**

a. nuts and oil seeds – pressing, solvent extraction, purification – degumming, refining, bleaching, deodourizing. Hydrogenation – margarines, shortenings

b. Spices – processing and extraction of essential oils and colours, storage and preservation

c. Tea, coffee and coco – Processing and storage

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>

**SEMESTER – IV  
ADVANCED DIETETICS**

**Course code: DAN 2451**

**Credit: 03**

## **MODULE I**

**Objectives of diet therapy** - Role of a dietitian. Principles of diet preparation and counseling.

**Normal diet in the hospitals** –regular diet, liquid, semi liquid, light, soft diet, and bland diet.

**Different types of Feeding** - Basic concepts of oral feeding, tube feeding, IV feeding, gastrostomy feeding.

## **MODULE II**

**Therapeutic diets for the following disorders:**

- Under weight - definition, etiology, treatment
- Obesity - definition, etiology, treatment.
- Diseases of the gastro intestinal tract-Peptic ulcer and duodenal ulcer, Dumping syndrome, constipation
- Acute and chronic diarrhea -rehydration therapy.

## **MODULE III**

**Diseases of the liver and gall bladder** (risk factors and diet therapy)

- jaundice
- hepatitis
- cirrhosis
- fatty liver and diet therapy

**Diseases of the cardio vascular system** (risk factors and diet therapy)

- atherosclerosis
- arteriosclerosis
- hypertension
- congestive heart failure

## **MODULE IV**

**Diabetes mellitus** – causes, symptoms, bio-chemical changes, insulin, hypo-glycemic drugs, changes in the metabolism of carbohydrate, fat and protein, food exchange list, dietary management

**Diseases of the kidney and urinary tract**

- Acute and chronic nephritis
- Nephrotic syndrome
- Renal failure
- Urinary calculi
- Uremia

Causes and dietary treatment of kidney diseases and dialysis.

**Nutrition and cancer** - Dietary guidelines for management.

## **MODULE V**

**Diet in Allergy** - Definition, classification, common food allergy, test of allergy, diet therapy. Pre operative and post operative diets.

**Diet in febrile conditions** - Short duration e.g. Typhoid, Long duration e.g. Tuberculosis. Dietetic management of gout and phenyl ketonuria.

**Diet in relation to deficiency diseases**-Protein calorie deficiency, vitamin A deficiency and anemia.

### **Examination Scheme**

**SEMESTER – IV**  
**FOOD SERVICE MANAGEMENT**

**Course code: DAN 2401**

**Credits:03**

**MODULE I**

**Different types of catering institutions and services**, classifications of food service institutions according to

- a. Function : Profit oriented, service oriented and public health facility oriented.
- b. Method of processing : Conventional systems, Commissary system, fast food service system.
- c. Service of food : Self service, tray service, waiter-waitress services

## **MODULE II**

**Organisation** - Types and principles, organizational structure for catering institutions.  
**Management** - Definition, principles and techniques of effective management, leadership and managerial abilities. Tools of management-organisational chart, work study and work improvement.

## **MODULE III**

**Personnel Management** - Methods of selection, orientation, training, supervision and motivation of employees, importance of good human relations, legal aspects of catering.

## **MODULE IV**

**Cost control** - Principles and methods of food cost control.

**Financial management** –Factors affecting food, labour, operating and overhead cost, budget, inventories.

**Sanitation and safety**-significance of hygienic management in food preparation and service, sterilization, pest control, garbage disposal.

Health care of food service personnel, safety measures to be adopted in foodservice.

## **MODULE V**

**Art in food service** - Design selection-structural and decorative. Elements of design, principles of design, their application in food service institutions.

**Color** - Qualities of color, color schemes, flower arrangement-application of art principles in arranging flowers, styles and types.

**Table service** - Application of art in table service.

**Home furnishing** - With special reference to furniture and accessories, selection, factors to be considered and current trends.

## **Examination Scheme**

**SEMESTER – IV**  
**Quantity Food Production**

**Course Code: DAN 2402**  
**Course content:**

**Credit: 03**

## **MODULE I**

Aims and objectives of different food service outlets.

(a) Industrial (b) Institutional (c) Hospital.

## **MODULE II**

Different food and beverage outlets. 5 types of services of food and beverage outlets.

Staff organization of different outlets

Manager, Hostess, Supervisor, Steward, waiter.

## **MODULE III**

Menu planning - sequence of course - Indian (Regional i.e., North Indian, South Indian, West Indian and Gujarathis, Western and others)

Techniques of writing menus.

## **MODULE IV**

Types of meals and styles of service, breakfast, lunch, dinner, afternoon tea, snacks (table 'd' hote and a la carte menu).

## **MODULE V**

Plant and equipment management, maintenance, sanitation of plant, safety, security, garbage disposal pest control.

## **MODULE VI**

Beverages - alcoholic and non-alcoholic-Hot and cold - classification of beverages, use and importance in meals and snacks, suitable glassware for beverage service.

## **MODULE VII**

Use of bills and checks in control system outlets.

## **SEMESTER – IV CLINICAL NUTRITION**

**MODULE-I**

clinical nutrition - medical conditions food allergy - food intolerance & mal absorption syndrome - the role of personnel management in an organization - functioning of the hospital dietary department

**MODULE-II**

role of nutrition & medicine in sports science - technical - counseling - other skills required by a dietician - dietician`s ability to interpret pathological / clinical parameters in health & disease - pediatric and geriatric dietetics

**MODULE-III**

nutritional problems of cancer therapy - role of antioxidants in the prevention of disintegrative diseases - the dietitian - responsibilities in indian context - diet counseling - registered dietitian and the indian dietetic association.

**MODULE-IV**

Nutritional Management in the following conditions:

- a. AIDS: Introduction, sign and symptoms, Transmittal routes and Nutritional Management
- b. Arthritis: Osteoarthritis and Rheumatoid Arthritis
- c. Polycystic ovarian disease (PCOD)

**Examination Scheme**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

Practical experience is correlated with theory course and will be provided at Amity School of Medical, Gurgaon.

**Contents:**

- Standardisation of recipes
- Napkin folds
- Fruit and vegetable carving
- Table setting
- Quantity preparation and sale
- Visit to hospital food service
- Visit to Hotel food service
- Visit to Industrial canteen

**Examination Scheme:**

<b>IA</b>				<b>EE</b>		
<b>A</b>	<b>PR</b>	<b>LR</b>	<b>V</b>	<b>PR</b>	<b>WT</b>	<b>V</b>
5	10	10	5	15	15	20

**SEMESTER-IV**

**RESEARCH PAPER-CONCENTRATION ELECTIVE**

Every student shall be allotted a research supervisor. The research supervisor shall be from the Department of Dietetics & Applied Nutrition.

The allotment of the research supervisor will be done during the semester. The topic of research will be finalized by the research supervisor. It is the responsibility of the research supervisor that the student is making the required progress in work.

The research work must be completed and submitted in the form of a report by the end of the semester.

The format of the research report is given below:

1. Research Objective
2. Literature Review
3. Research Methodology
4. Results and Analysis
5. Conclusions
6. References
7. Appendices – to include questionnaire, if any

Every student shall be allotted a project supervisor. The project supervisor shall be from the Department of Dietetics & Applied Nutrition.

The allotment of the project supervisor will be done during the semester. The topic of project will be finalized by the project supervisor. It is the responsibility of the project supervisor that the student is making the required progress in work.

The project must be completed and submitted in the form of a report by the end of the semester.

1. Individual Project
2. Any one diseases (gastro intestinal disorders, renal diseases, liver diseases, cardio vascular disorders and diabetes mellitus, Cancer, Neurological Disorders, )
3. Minimum five clinical cases
4. To present a report furnishing the following data
  - a) Hospital - lay out and organization
  - b) Medical profile
    - a. general details
    - b. family history, associated complications, drugs
    - c. anthropometry and clinical status
    - d. biochemical status
    - e. biophysical status
    - f. progress chart
  - c) Diet therapy

Viva Voice

## **WORKSHOP-CONCENTRATION ELECTIVE**

**Course code: 2433**

**Credit : 01**

- To understand the basic concept of data collection on Nutrition based studies.i.e Nutritional Assessment including anthropometrical measurements, food diaries & 24 dietary recall method etc
- To present and facilitate with support of more experienced trainers as per the contents
- To practice facilitation and Counseling techniques and know about basic Communication with regard to Diet consultation

### **Implementation:**

This would be approximately 2 hours long after the completion of lectures. The student will be asked to complete a form with details of their health goals, and previous and current health history. This information is necessary as it is important to have a complete health picture before making nutritional recommendations. They would be asked to fill the 24 dietary recall/Food Frequency/3 day food Dairy. This information is discussed in further depth during the workshop. Relevant Physical Parameters/ measurements would also be recorded. These include blood pressure, Height, Weight & BMI etc. The final part would comprise of discussing the recommended dietary and lifestyle changes that will help the students to achieve their health goal(s). Supplementation with specific nutrients may be recommended if necessary.

# FOUNDATION OF FOODS & NUTRITION

Course Code: DAN 2405

Credits: 03

## Module-I

- **Nutrition** - General introduction, Classification of nutrients, Functions of food, social function of food, psychological functions of food.
- **Energy** - Definition of Kilocalories, Joule, energy value of foods, determination, physiological fuel values, SDA of foods, determination of energy requirements of body, basal metabolic rate determination, factors influencing BMR, Recommended Dietary Allowances for energy.
- **Carbohydrates** - Classification, functions, source, digestion, absorption and utilization, dietary fiber and health.

## Module-II

- **Protein** - Classification, functions, sources and requirements, digestion, absorption and Utilization, Protein quality - Definition of biological value, NPU, digestibility coefficient, PER definition and measurement. Deficiency due to shortage of protein and energy – PCM, kwashiorkor. Reference protein, essential amino acids and mutual supplementation of dietary protein.
- **Fats and Lipids** - Classification, functions, sources, requirement, digestion, absorption and utilization, importance of essential fatty acids, their requirements and deficiency.

## Module-III

- **Vitamins** – Fat soluble vitamins –A, D, E and K- functions, source, requirements, deficiency disorders. Water soluble vitamins –The B-complex vitamins – Thiamine, Riboflavin, Niacin, Folic acid, Biotin, Pantothenic acid and Vitamin C - functions, source, requirements and deficiency disorders.

## Module-IV

- **Minerals** - General functions in the body, classification- macro and micro minerals. Micro minerals – Iron, Fluorine, Zinc, copper, Iodine -functions, absorption, utilization, requirements, deficiency and toxicity. Macro minerals – Calcium & phosphorus - functions, absorption, utilization, requirements, deficiency and toxicity.

## Module-V

- **Water Balance** – Functions of water, water distribution, maintenance of water and electrolyte balance, regulation of acid-base balance in the body.

## Examination Scheme

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

## Reference Books:

B.Sc Home Science (Honours)  
Semester –V

Syllabus (Semester system) w.e.f. 2013-16

## EXAMINATION DISTRIBUTION SCHEME

\* Internal Assessment = 30 each

Paper Theory	Name	Maximum marks	Exam Duration
DAN2551	Community Nutrition	70 (30*)	3 hrs
DAN 2501	Nutrition for Health & Fitness	70 (30*)	3 hrs
DAN 2502	Bakery	70(30*)	3 hrs
DAN 2503	Food Quality Control	70 (30*)	3 hrs

Total = 280 + 120 = 400

## PRACTICAL EXAM DISTRIBUTION

Paper Practical	Name	Max Marks	Exam Duration
DAN 2504	Bakery Lab	70 (30*)	4 hrs
DAN 2505	Food Quality Lab	70 (30*)	4 hrs
DAN2535	Summer Internship	70 (30*)	

\* Internal Assessment = 30 each

Total = 140 + 60 = 200

Total Marks Distribution = 400 + 200 = 600

## SEMESTER-V COMMUNITY NUTRITION

Course code: DAN 2551

Credits:03

### MODULE I

**Definition** - Community, family, village and block

Meaning of Optimum Nutrition, Malnutrition- Under nutrition and over nutrition..

**Characteristics of community**- Demography, Vital statistics, IMR, MMR, morbidity. Causes of

**malnutrition**-Factors contributing to malnutrition in the community - food habits, customs and practices, availability of food, Socio-economic factors, Housing and hygienic conditions, population explosion.

### MODULE II

**Assessment of the nutritional status of the community** -direct and indirect methods - Anthropometry, Clinical and Biochemical, Diet Surveys.

Nutritional problems of women and men- Anemia, Vitamin A deficiency, B-complex deficiency.

**Nutritional problems of infants and children**- PEM-Marasmus and Kwashiorkor, Vitamin A deficiency, B-complex deficiency diseases, anemia-incidence, prevalence, epidemiology and prevention , other problems- Goitre, fluorosis and Lathyrism-prevalence, causes and symptoms and programmes to control.

### MODULE III

**Nutrition intervention programmes** - ICDS: Objectives and services, Noon meal programme, TINP, SNP, Vitamin A prophylaxis.

**National Organization**- Role of ICMR, NIN, NNMB & ICAR

**International organization**- WHO, FAO , UNICEF, DANIDA & World Bank.

### MODULE IV

**Home Science**- Meaning and Objectives. Role of Home-Scientists in rural development-with reference to ongoing programmes like Family Welfare Programme, Adult Education for community-different methods, advantages and disadvantages. Nutrition education- merits and demerits of different methods, Concept of nutrition garden.

### MODULE V

**Communication**- Principles, methods and classification. Advantages and limitations of different methods.

**Audio-visual aids**- Types, advantages and limitations.

**Health care**- delivery, challenges & strategies. Set up of PHC, school health services and employees state insurance.

### Examination Scheme

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

## **SEMESTER-V**

### **NUTRITION FOR HEALTH & FITNESS**

**Course code: DAN 2501**

**Course credits: 05**

#### **MODULE-I**

Definition components of specific fitness and health status. Energy input & output , diet & Exercise .Nutrition exercise ,physical fitness & health inter-relationship.

#### **MODULE-II**

Review of different energy systems for endurance and power activity shifts in carbohydrate and fat metabolism. Mobilization of fat stores during exercise.

#### **MODULE- III**

Nutrition in sports: sports specific requirements. Diet manipulation, pre-game & Post game meal . Life style and dietary management of stress.

#### **MODULE-IV**

Significance of Physical fitness, nutrition and prevention of weight control, obesity, CV disorder and diabetes.

#### **MODULE- V**

Alternative systems for health and fitness like Yoga, meditation.

#### **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

## SEMESTER-V

### BAKERY

Course code: DAN 2502

Credit: 04

#### MODULE I

**Baking** - Definition, Principles of baking, classification of baked foods. Types of equipments in baking industry, cleaning and sanitizing methods of baking equipments, baking temperature of different products, operation techniques of different baking equipments.

#### MODULE II

**Ingredients and Their Role in Baking** - Flour, Yeast, sugar, egg, butter, salt, baking powder, colouring, flavouring agents. List of standard colouring and flavouring agents.

#### MODULE III

**Preparation of baked foods** - Quick breads, cakes and its varieties, different types of biscuits, cookies and pastries.

#### MODULE IV

**Decoration of baked foods** - Icing- Types of Icing used in different bakery product. Role of other ingredients used in icing.

#### MODULE V

Baking unit/ plant layout & design of a baking unit sanitation and hygiene. Types of packaging materials used for bakery products, method of packaging.

#### Reference Books:

**SEMESTER -V**  
**SUBJECT-FOOD QUALITY CONTROL**

**Course code: DAN 2503**

**Credit: 04**

**MODULE I**

**Principles of Quality control of food** –Raw material control, processed control and finished product inspection. Leavening agents, classification, uses and optimum levels.

**Food additives** - Preservatives, colouring, flavouring, sequestering agents, emulsifiers, antioxidants.

**MODULE II**

**Standardisation systems for quality control of foods**-National and International standardization system, Food grades, Food laws-compulsory and voluntary standards.

**Food adulteration** - Common adulterants in foods and tests to detect common adulterants.

**MODULE III**

**Standards for foods** – Cereals and pulses, sago and starch, milk and milk products, Coffee, tea, sugar and sugar products.

**MODULE IV**

**Methods for determining quality** - Subjective and objective methods.

Sensory assessment of food quality-appearance, color, flavour, texture and taste, different methods of sensory analysis, preparation of score card, panel criteria, sensory evaluation room.

**MODULE V**

**Food safety, Risks and hazards:** Food related hazards, Microbial consideration in food safety,

**HACCP**-principles and structured approach. Chemical hazards associated with foods.

**Credits:02**

**Course Content:**

**MODULE I**

Organizing, preparing and serving food for three different meals for 50 members or more (list attached)

Setting up the restaurant - laying of table cloth changing, setting up the silver and other table arrangements.

Folding of serviettes correct use of waiter's cloth. Preparation for customers.

**MODULE II**

Serving and clearing practice, French and English service.

Service of beverages tea, coffee, juices and alcoholic beverages.

Laying for breakfast.

**MODULE III**

Tray service

Order taking, making out checks bills presentation of bills

Up keep and cleaning of cutlery, crockery, other equipment.

## SEMESTER VI

### SUBJECT-FOOD PRESERVATION

Course Code: DAN 2601

Credits: 04

#### MODULE I

**Food preservation** - Definition, General Principles and Methods of Food Preservation- Classification of foods for processing. Preservation by addition of sugar- General principles and methods of preparation of jams, jellies and Marmalades, theory of gel formation. Preparation of preserves, squashes & syrups. Preservation by addition of salt- Pickling. Preparation of Indian Pickles, Sauerkraut. Status & scope of food processing industry in India in developing Entrepreneur.

#### MODULE II

**Preservation by Use of High Temperature** - Pasteurization, Sterilization and their types. Thermal death curve, calculation of process time, methods of heat transfer.

**Canning** - steps, types of cans, advantages, disadvantages.

**Bottling** - steps, advantages, disadvantages.

**Food dehydration** - concept of dehydration and sun drying. Types of driers- advantages, disadvantages. Principle of dehydration-heat and mass transfer.

#### MODULE III

**Preservation by use of Low Temperature, Types** - Common types of cold storage, refrigeration requirement of refrigerated storage, characteristic of refrigerant, refrigeration during transport, defects in cold storage.

**Freezing** - Principles and methods of freezing, Freeze drying. Advantages and disadvantages.

#### MODULE IV

##### **Preservation with chemicals**

a. Mechanism of microbial inhibition, mechanism and action of preservatives in processed food

b. Inorganic & Organic preservatives.

c. Antibiotics

d. Mold inhibitors.

e. Antioxidants and its role.

#### MODULE V

##### **Radiation of Foods**

a. Sources of radiation, units of radiation

b. Mode of action of irradiation, radiation effect on proteins enzyme system

c. Microwave heating, properties of microwaves, applications in food processing and preservation.

##### **Preservation of Semi moist foods:**

a. Principles

b. Intermediate moist foods

## SEMESTER VI

### CLINICAL & THERAPEUTIC NUTRITION

**Course code: DAN 2602**

**Credits: 04**

#### MODULE I

**Carbohydrates** : Review of digestion, absorption and metabolism of carbohydrates, aerobic and anaerobic glycolysis, storage and utilisation of carbohydrates as energy source for physical activity.

#### MODULE II

**Lipids** : Review of digestion absorption and metabolism of fats and fatty acids, energy yield from dietary fats, storage, mobilisation of fat stores during exercises, production of Ketone bodies, Ketogenic diets.

#### MODULE III

**Energy Metabolism** : BMR, energy requirements for physical activity, relative body weight and influence of physical exercise on changes in body fat and body composition, utilization of energy by muscle tissue, shifts in lipid and carbohydrate, utilisation, in relation to exercise type, intensity and duration.

#### MODULE IV

**Water and electrolyte balance** : Water & electrolyte lossess and their replenishment; effect of dehydration.

#### MODULE V

**Nutrient and Drug Interactions:** Effect of drug therapy on absorption and utilisation onutrients.

#### MODULE VI

**Diseases of the gastro - intestinal tract** : Effect on digestion, absorption and nutritional status. **Implications for diet therapy**

- Diarrhoea, Constipation
- Gastritis and Ulcers.
- Colitis.
- Malabsorption syndromes.

#### MODULE VII

**Liver Gallbladder & Pancreas:** Etiology, symptoms, Metabolic and Nutritional Implications

- Hepatitis, Cirrhoses, Hepatic Coma
- Pancreatic
- Cholecystitits, Cholelithiasis

## 8. Renal System: Etiology, Symptoms, Metabolic and Nutritional Implications

- Nephritis
- Nephrotic Syndrome
- Renal Failure
- Renal Calculi

## 9. Disorders of Metabolism:

- Diabetes Mellitus
- Inborn Errors of Metabolism
- Gout

10. Cardiovascular system: - Etiology, Symptoms, Role of Specific nutrients, Clinical finding related to nutritional care. Hypertension, Atherosclerosis.

## **Bachelor of Audiology & Speech Language Pathology**

**FLEXILEARN**

**-Freedom to design your degree**

**Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

# Bachelor in Audiology & Speech Language Pathology

## 1.0 Nomenclature

As per UGC Notification of 2014, the nomenclature of the program shall be Bachelor in Audiology and Speech-Language Pathology. B. ASLP is the short form.

## 2.0 Objectives of the B.ASLP program

The objectives of the B.ASLP program are to equip the students with knowledge and skills to

- function as audiologists and speech-language pathologists in different work settings
- understand concepts in speech, language, communication, hearing and disability
- screen, evaluate, diagnose and assess the severity of different disorders related to speech, language, swallowing and hearing,
- manage speech, language, swallowing and hearing disorders across life span
- counsel persons with disorders of communication and their family members
- rehabilitate persons with speech, language, swallowing and hearing disorders
- prevent speech, language, swallowing and hearing disorders
- liaise with professionals in allied fields and other stake holders
- implement public awareness and education program,
- undertake advocacy measures on behalf of and for persons with speech language and hearing disorders

## 3.0 Duration of the program

- a) The program shall be of 4 academic years including 1 year of internship and should be completed within six years from the date of admission.
- b) An academic year consists of two semesters, and each semester shall extend over a minimum period of sixteen weeks excluding examination days. The semesters shall be spread out as follows:

Odd semester – 1	July – December
Odd semesters – 3, 5, 7	June – October/November
Even semesters – 2, 4, 6, 8	December – April
- c) There shall be examinations at the end of each semester. There shall be a vacation of minimum 1 week after the examinations at the end of odd semesters and 3 weeks after the examinations at the end of even semesters.
- d) Number of working days in a semester shall not be more than 100 days.

## 4.0 Eligibility for admission

- a) The candidate applying for admission to B.ASLP program should have passed 10+2 examination or an equivalent examination conducted by the Pre University Board of Education of the respective State Government securing a minimum of 50% marks. Relaxation in the qualifying marks shall be as per rules and regulations of respective University / State/UTs or Central Government.
- b) The applicant/candidate should have studied Physics, Chemistry, Biology and any one of Mathematics / Computer Science / Statistics / Electronics / Psychology.
- c) Applicants shall not be older than 25 years on the 1<sup>st</sup> July of the year of admission.

## 5.0 Attendance

- a) Minimum attendance shall be as stipulated by the respective University where the students are studying. However, attendance shall not be less than 80% in theory and 90% in Clinical/

- Practicals in each semester to be eligible to appear for examination at the end of each semester.
- b) Candidates who cannot appear for the examination for want of attendance will be declared as failed and will have to repeat the particular semester to be eligible to appear for exams subsequently.
  - c) Condonation of shortage of attendance in genuine cases shall be from the Vice-Chancellor of the respective University where the candidates are studying.

## **6.0 Criteria for passing**

The student is required to obtain a minimum of 50% in each of the theory papers, internal assessment, practical and clinical exams for a pass. Students will not be able to appear for University theory exam if they do not pass in their practical, internal assessment or clinical component. Students will have to pass the clinical examination of the given semester to proceed to the next semester.

## **Carry-over of papers**

6.1 Each paper should be successfully completed within 3 attempts including the first one.

6.2 Students can start internship after the 6<sup>th</sup> semester exams. However, students who fail in their clinical exam of 6<sup>th</sup> semester will have to discontinue internship. The candidates are permitted to carry over the theory courses until the end of the program.

## **7.0 Clinical internship**

All candidates shall complete a clinical internship of one academic year (10 months) after the 6<sup>th</sup> semester. The rules and regulations of clinical internship shall be as in Annexure 2.

## **8.0 Award of Degree**

The University shall award the degree and issue certificate only after the candidates successfully complete all the University examinations and clinical internship.

## **Guidelines for implementation of Clinical Internship of B.ASLP program with effect from the academic session 2017-18**

Objectives of the clinical internship are to:

- a) facilitate transition from academic training to independent clinical responsibility,
- b) provide additional inputs to attain and maintain competence in the clinical management of persons with communication disorders,
- c) initiate group and individual action focusing on prevention/early identification and intervention in individuals with speech, hearing and language impairments at the level of the individual, family and community, and
- d) provide training to understand professional responsibilities and ethical practices including :
  - i) Rights and dignity of patients.
  - ii) Consultation and referral to other professionals.
  - iii) Conduct and professional obligations to peers/patients/families and the community at large.

### **Guidelines**

- 1) Internship is mandatory
- 2) Duration: One academic year (10 months) split in to two semesters (VII & VIII).
- 3) Eligibility: Internship will start immediately after the candidate completes the academic and clinical training till the 6<sup>th</sup> semester. Students can start internship after the 6<sup>th</sup> semester exams. However, students who fail in their clinical exam of 6<sup>th</sup> semester will have to discontinue internship.
- 4) Structure and duration of posting
  - a) The respective parent institutions shall decide on the institutions where their students will be posted for internship. However, students can be posted for internship only at those institutions approved by the Rehabilitation Council of India.
  - b) Students will do internship at their parent institute for one semester and at an institute(s) outside the parent institute for one semester. Internship can be done at institutes like hospitals, special educational centers/schools, centers where clinical facilities for management of ASD, cochlear implantation, AVT etc. are available, centers which undertake empowering of mothers, centers for CP, and centers for LD, etc. Attempts must be made to provide clinical training to students in a variety of set ups.
  - c) It shall be mandatory to provide additional clinical training to students in such areas as management of neurologically afflicted persons, prevention and early intervention programs, community based rehabilitation, occupational health programs, structural abnormalities related to speech and hearing, etc.
- 5) Mode of supervision during internship: Supervision should generally be provided by a Speech-language Pathologist and Audiologist. However, in institute/centers where this is not feasible, supervision can be done by a specialist from an allied area like Otolaryngology, Neurology, Mental Health, Pediatrics, among others.
- 6) Maintenance of records by students: Every student shall maintain records of the number of hours of clinical work in different areas and institutions. This should be certified by the head of the

institution or his/her nominee where the student is undergoing internship.

- 7) Leave: Candidates should have an attendance of at least 90% during the internship period. Internship shall be extended by the number of days the student falls short of 90% attendance. Compensatory work for shortage of attendance must be completed before the final clinical exams of 8<sup>th</sup> semester.
- 8) Stipend: As per the norms of the parent institute.
- 9) Grading and evaluation of student: All internees will be assessed based on their attendance, performance in the postings and presentation of log books. The mode of assessment and frequency of assessment will be prescribed by the institute. The student is required to repeat those postings in which his/her performance is below 40%.
- 10) Certification: The parent institute will award a certificate after successful completion of the internship and clinical examination (7.1 and 7.2 in the Scheme of examination). Supervised clinical hours spent during internship shall be included in the clinical competence certificate issued to students.
- 11) The University shall award the degree only after the successful completion of clinical internship.

# **Syllabus - First Semester**

## **COMMUNICATION SCIENCES**

**Course Code: ASL2106**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand the

- basic concepts in speech, hearing, language and communication
- basic concepts of hearing sensitivity and acoustics

**Course Contents:**

### **Part-A: Speech-Language Pathology**

#### **Module-I: Speech, language and communication**

- a) Definitions of speech, language, communication, and their components
- b) Distinctions, similarities and functions of communication, speech and language
- c) Speech as an overlaid function
- d) Speech chain
- e) Normal development of speech & language
- f) Pre-requisites and factors affecting speech-language development
- g) Cultural and linguistic issues in communication; bi/multilingual issues

#### **Module-II: Bases of speech and language**

- a) Overview of speech production – speech sub-systems
- b) Speech mechanism as a sound generator, vocal tract, periodic and aperiodic sounds
- c) Acoustic theory of speech production
- d) Social, cognitive, neurological, and genetic bases of speech and language

### **Part-B: Audiology**

#### **Module-III: Sound intensity and concept of decibel**

- a) acoustic energy and power, absolute and relative units – importance of reference
- b) sound intensity and intensity levels –absolute and relative measurements and
- c) Bel and decibels, sound pressure and decibel sound pressure levels, relationship between intensity and pressure
- d) characteristics and application of decibels

#### **Module-IV: Audibility & hearing**

- a) Hearing range –intensity and frequency
- b) Up-down and staircase procedure of estimating minimum audible levels
- c) Minimum audible pressure and field, Missing six dB and related issues
- d) Reference equivalent threshold sound pressure levels and hearing levels
- e) Sensation levels, Threshold of pain, Most comfortable levels

#### **Module-V: Introduction to Audiology and Speech-language Pathology**

### **Part-A: Speech and language**

- a) Historical aspects of the field of speech-language pathology
- b) Development of speech and language pathology: Indian and global context

- c) Scope of practice in speech-language pathology
- d) Interdisciplinary nature of speech-language pathology

**Part-B: Audiology**

- a) Audiology – historical aspects, development of instrumentation in audiology
- b) Development of audiology: Indian and global context
- c) Branches of audiology
- d) Scope of audiology

**Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# **ANATOMY AND PHYSIOLOGY OF SPEECH AND HEARING**

**Course Code: ASL2107**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand the

- anatomy of the auditory system
- anatomy of the speech mechanism
- physiology of hearing mechanism
- functioning of speech and swallowing mechanism

**Course Contents:**

## **Module-I: Introduction**

- a) General anatomical terms
- b) Anatomical positions and planes of reference
- c) Cells, tissues and muscles
- d) Muscle connection and joints
- e) Tissue - vascular and neural

## **Module-II: Embryology**

- a) Basic terminologies related to embryology
- b) Development of external ear
- c) Development of middle ear
- d) Development of Inner ear and the auditory system
- e) Five examples of embryonic anomalies affecting speech-language & hearing
- f) Development of respiratory structures
- g) Development of larynx
- h) Development of facial region and palate
- i) Development of tongue and teeth

## **Module-III: Anatomy and physiology of speech production systems and swallowing**

- a) Mechanisms of breathing with emphasis on speech breathing
- b) Supportive frame work of larynx
- c) Anatomy of larynx
- d) Anatomy of oesophagus
- e) Brief mechanisms of swallowing
- f) Mechanisms of phonation
- g) Anatomy of articulators and associated structures
- h) Contribution of articulatory structures to speech production
- i) Anatomy of resonatory mechanisms
- j) Contribution of resonatory mechanisms to speech production

## **Module-IV: Anatomy and physiology of external and middle ear**

- a) Anatomy of the external ear
- b) Physiology of external ear including localization
- c) Head shadow effect, inter-aural intensity and time differences
- d) Brief anatomy of temporal bone
- e) Anatomy of tympanic membrane and associate structures
- f) Anatomy of middle ear and ossicles
- g) Anatomy of Eustachian tube and middle ear muscles
- h) Physiology of Eustachian tube

- i) Middle ear transformer action
- j) Physiology of middle ear muscles

#### **Module-V: Anatomy and physiology of labyrinth**

- a) Anatomy of bony and membranous labyrinth
- b) Macro anatomy of cochlea
- c) Micro anatomy of cochlea
- d) Innervations and blood supply to cochlea
- e) Overview of theories of hearing
- f) Physiology of cochlea
- g) Electrical potentials of the cochlea
- h) Physiology of hearing through bone conduction
- i) Overview to physiology of balancing mechanisms
- j) Overview to anatomy of central auditory pathway
- k) Overview to central auditory mechanism

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

#### **Recommended Reading**

# CLINICAL PSYCHOLOGY

**Course Code: ASL2108**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand the

- scope of clinical psychology and its significance for speech and hearing
- concept of normality, abnormality and classification of abnormal behavior
- cognitive, motor, emotional and social development
- theories of learning and therapy techniques based on learning principles
- neuropsychological assessment and rehabilitation
- application of neuropsychology in the field of speech and hearing
- basics of counselling

**Course Contents:**

## **Module-I: Introduction to psychology**

- a) Introduction to psychology: definition, history and schools of psychology
- b) Scope of psychology
- c) Meaning and definition of clinical psychology
- d) Historical development, modern clinical psychology
- e) Significance of clinical psychology in health sciences
- f) Role of clinical psychology in speech and hearing
- g) Concept of normality
- h) Concept of abnormality
- i) Models of mental disorders: biological, psychological social models

## **Module-II: Assessment procedures in clinical psychology**

- a) Methods in clinical psychology: case history, clinical interviewing, clinical observation, definition and types of psychological testing
- b) Assessment of cognitive functions
- c) Adaptive functions,
- d) Personality
- e) Behavioural assessment
- f) Classification of abnormal behavior
- g) History, need & rationale of classification
- h) Current classificatory system: DSM, ICD

## **Module-III: Developmental psychology**

- a) Child and developmental psychology: meaning, definition and scope
- b) Meaning of growth, development & maturation
- c) Principles of child development
- d) Motor development: general principals of motor development
- e) Stages in motor development: early motor development, motor development during later childhood and adolescence, decline with age
- f) Cognitive development: growth from early childhood to adolescence
- g) Piaget's theory of cognitive development
- h) Emotional development
- i) Social development

## **Module-IV: Principles of learning and behaviour modification**

- a) Learning: meaning, definition and characteristics

- b) Theories of learning: introduction
- c) Pavlov's classical conditioning: experiments and principles
- d) Skinner's operant conditioning: experiments and principles
- e) Therapeutic techniques based on learning principles
- f) Skill behavior techniques
- g) Problem behavior techniques

#### **Module-V: Neuropsychology and its relevance to study of speech**

- a) Neuropsychology: introduction and definition
- b) Neuropsychological assessment
- c) Neuropsychological rehabilitation
- d) Application of neuropsychology in the field of speech and hearing
- e) Counselling: introduction and definition
- f) Types of counselling: directive and non- directive
- g) Characteristics of a good counsellor

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# LINGUISTICS AND PHONETICS

**Course Code: ASL2109**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand

- different branches and aspects of linguistics
- characteristics and functions of language
- different branches of phonetics, applied linguistics, and phonology
- morphology, syntax, semantics, pragmatics
- acquisition of language and factors affecting it
- bi/multilingualism and related issues

**Course Contents:**

## **Module-I: Linguistics**

- a) Introduction to linguistics and different branches of linguistics: applied linguistics, sociolinguistics, psycholinguistics, metalinguistics, neurolinguistics and clinical linguistics
- b) Language characteristics and functions, difference between animal communication systems and human language
- c) Morphology – concepts of morph, allomorph, morpheme, bound free and compound forms, roots etc.
- d) Processes of word formation, content and function words
- e) Endocentric and exocentric constructions, form classes, grammatical categories
- f) Inflection and derivation, paradigmatic and syntagmatic relationship
- g) Principles and practices of morphemic analysis
- h) Langue versus parole
- i) Competence vs. performance

## **Module-II: Phonetics and Phonology**

- a) Introduction to phonetics
- b) Articulatory, acoustic, auditory and experimental phonetics – an introduction
- c) Articulatory classification of sounds – segmental and supra-segmental
- d) Classification description and recognition of vowels and consonants
- e) Pathological aspects of speech sound production
- f) Transcription systems with special emphasis on IPA. Transcription of samples of normal and disordered speech
- g) Introduction to phonology, classification of speech sounds on the basis of distinctive features and phonotactics
- h) Application of distinctive feature theory to speech pathology and speech therapy, phonotactics, phonotactic patterns of English and Indian languages
- i) Phonemic analysis – Principles and practices; their practical implications for speech pathologists
- j) Common phonological processes - assimilation, dissimilation, metathesis, haplology, epenthesis, spoonerism, vowel harmony, nasalization, neutralization

## **Module-III: Morphology, syntax, semantics and applied linguistics**

- a) Morphology – concepts of morph, allomorph, morpheme, roots, compound forms - endocentric and exocentric constructions, free and bound morphemes, inflection and derivation, principles and practices of morphemic analysis
- b) Syntax – different methods of syntactic analysis
- c) IC analysis, phrase structure, grammar, transformational generative grammar
- d) Introduction to the major types of transformations

- e) Sentence types, notions about competence versus performance
- f) Deep structure versus surface structure
- g) Acceptability versus grammaticality language versus parole etc.
- h) A brief introduction to semantics – semantic feature theory, pragmatics
- i) Processes of word formation, content and function words, form classes, grammatical categories
- j) Syntax – concepts of phrases and clauses, sentence and its types
- k) Different methods of syntactic analysis – Immediate constituent analysis, Phrase structure, grammar, transformational generative grammar– deep structure versus surface structure, acceptability versus grammaticality; Introduction to the major types of transformations
- l) Usefulness of morphemic and syntactic analysis in planning speech and language therapy
- m) A brief introduction to semantics, semantic relations, semantic feature theory
- n) A brief introduction to pragmatics and discourse.

#### **Module-IV: Language acquisition**

- a) Issues in first language acquisition
- b) Pre-linguistic stages, linguistic stages
- c) Acquisition of phonology, morphology, syntax, semantics, and pragmatics
- d) Language and cognition
- e) A brief introduction to theories and models of language acquisition
- f) Biological maturation theory, linguistic theory, behavioral theory, information processing theory, social interaction theory
- g) An integrated approach to theories communicative competence and its development
- h) Applied linguistics with special reference to communication disorders
- i) Usefulness of morphemic and syntactic analysis in planning speech and language therapy

#### **Module-V: Bi/multilingualism**

- a) Introduction to the language families of the world and India
- b) Issues related to second language acquisition & factors influencing it
- c) Inter-language theory, language transfer and linguistic interference
- d) Differences between first and second language acquisition/learning
- e) Bilingualism/Multilingualism
- f) Metaphonology
- g) Writing systems – types of writing
- h) History of writing systems
- i) Indian writing systems

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# ELECTRONICS AND ACOUSTICS

**Course Code: ASL2110**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand the

- concept and types of power supply for biomedical instruments
- basic aspects of digital signal processing
- theoretical basis of acoustics required for audiologists
- functioning of computers and computing systems

**Course Contents:**

## **Module-I: Electronic components and power supply**

- a) Resistors, capacitors, inductors
- b) Transformers and potentiometers,
- c) Semiconductor diodes and transistors
- d) Light emitting devices, seven segment displays, Liquid crystal displays
- e) Principles of operations and working of Field Effect Transistors, Uni-junction transistors and thyristors
- f) Introduction to linear and digital integrated circuits
- g) Block diagram of a DC power supply
- h) Linear regulated power supplies, line regulation and load regulation, specifications of a DC power supply unit, Switched Mode Power Supply
- i) AC power supply, stabilizers, Uninterrupted Power Supply, and inverters
- j) Basic electronic concepts such as Polarity, Grounding

## **Module-II: Introduction to acoustics**

- a) Vibrations and their characteristics
- b) Sound - generation and propagation
- c) Characteristics of sound
- d) Amplitude, frequency and phase of pure tones
- e) Amplitude, frequency and phase of complex tones (FFT and spectrum, relationship between time waveform, FFT and impulse response)
- f) Reflection and absorption, acoustic impedance, reverberation
- g) Impedance and admittance
- h) Electro-mechano-acoustic transformers

## **Module-III: Acoustical treatment, transducers and basics of computers**

- a) Introduction to audiometric rooms
- b) Absorption coefficient, Sabine's formula
- c) Materials for construction of audiometric rooms
- d) Lighting, grounding and other miscellaneous issues related to audiometric rooms
- e) Evaluation of efficiency of sound proofing in the audiometric rooms
- f) Amplifiers
- g) Microphones, loudspeakers - types and function
- h) Fundamentals of digital electronics, binary number system, Hex code, bit, byte, logic gates, counters, flip-flops etc.
- i) Introduction to computers
- j) Operating systems, hard ware, software, memory devices and other peripherals, care and preventive maintenance of computers

**Module-IV: Digital signal processing**

- a) Digital signal processing –introduction and need
- b) Analog to digital converters, sampling and quantization
- c) Fundamentals of digital filtering
- d) Infinite impulse response and finite impulse response filters
- e) Time domain methods of speech processing
- f) Frequency domain methods of speech processing
- g) Linear predictive analysis of speech signals
- h) Digital coding of speech signals
- i) Automatic speech recognition
- j) Speech synthesis

**Module-V: Instrumentation in speech and hearing**

- a) Introduction to electronic instrumentation in speech and hearing
- b) Electrodes, filters and preamplifiers
- c) Principle of operations, block diagram, calibration, maintenance and troubleshooting of audiometers, immittance meters, oto-acoustic emissions, hearing aids, evoked potential system, speech and voice analyses systems, artificial larynx, electroglottograph

**Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# RESEARCH METHODS AND STATISTICS

**Course Code: ASL2111**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand the

- basic concept of research in the field of audiology and speech-language pathology
- design and execution of research
- ethical guidelines for conducting research

**Course Contents:**

## **Part-A: Research Methods**

### **Module-I: Introduction to research methods**

- a) Meaning and purpose of research: meaning
- b) Need for research in audiology and speech-language pathology
- c) Funds/grants for research
- d) Steps in research: identification, selection
- e) Formulation of research questions: aims, objectives, statement of problem, hypothesis
- f) Types of variables; types of sampling procedures (random and non-random);
- g) Types/ methods of data collection and their advantages and disadvantages
- h) Reliability and validity (internal and external validity)

### **Module-II: Research design in audiology and speech-language pathology**

- a) Types of research: survey, ex-post facto research, normative research, standard-group comparison
- b) Experimental and quasi experimental research: group design & single subject design
- c) Internal and external validity of research
- d) Between groups vs. repeated measures design
- e) Documentation of research: scientific report writing, different formats or styles (APA, AMA and MLA),
- f) Ethics of research

## **Part-B: Statistics**

### **Module-III: Introduction to statistics and data collection**

- a) Application of statistics in the field of Audiology and speech-language pathology.
- b) Scales of measurement: nominal, ordinal, interval, ratio
- c) Classification of data: class intervals, continuous and discrete measurement
- d) Normal distribution: general properties of normal distribution, theory of probability, area under normal probability curve
- e) Variants from the normal distribution: skewness and kurtosis
- f) Measure of central tendency: mean, median, mode
- g) Measures of variability: range, deviation (average and standard deviation), variance

### **Module-IV: Statistics and research designs**

- a) Choosing statistics for different research designs
- b) Correlational techniques: Pearson's Product Moment Correlation Coefficient; Spearman's Rank order correlation coefficient
- c) Statistical inference: concept of standard error and its use; the significance of statistical measures; testing the significance of difference between two means z-test, t-test; analysis of variance, post hoc tests,

- d) Non-parametric tests: Chi-square test, Wilcoxon test, Mann-Whitney U test,
- e) Reliability and validity of test scores: reliability and validity, Item analysis
- f) Analysis of qualitative data
- g) Software for statistical analysis

#### **Module-V: Epidemiology**

- a) Basic epidemiologic concepts and principles
- b) Epidemiologic data sources and measurements
- c) Epidemiologic methods – questionnaire survey, screening, personal survey, testing
- d) Media - their advantages and disadvantages
- e) Incidence and prevalence of hearing, speech, language disorders as per different census (NSSO, WHO)

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# Syllabus - Second Semester

## NEUROLOGY

**Course Code: ASL2206**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand

- basic concepts, anatomy and physiology of nervous system related to speech and hearing
- neural organization –different structures and functions of various systems
- neurosensory and neuromotor controls in speech, language and hearing mechanisms
- cerebral plasticity and dominance and its relevance for speech, language and hearing disorders
- various neural diseases, lesions, nutritional and metabolic conditions affecting speech, language and hearing
- basic principles and assessment procedures used in speech, language and hearing disorders associated with neurological conditions
- basic principles and management procedures used in speech, language and hearing disorders associated with neurological conditions

### **Course Contents:**

#### **Module-I: Anatomy and physiology of the nervous system**

- a) General introduction to basic neurological concepts
- b) Organization of the neural system
- c) Central, peripheral and autonomic neural system
- d) Neural structures - applied anatomy and physiology
- e) Cranial nerves and those important for speech, language, hearing and balance
- f) Cerebral blood supply, nourishment and protection of the brain
- g) General principles of neural organization
- h) Transmission of information in neural system – nerve fibers, synaptic transmission, action potential, chemical transmission, excitatory and inhibitory potential & neuromuscular transmission
- i) Cerebral plasticity and development of neural plasticity and cerebral dominance

#### **Module-II: Neural organization of speech and hearing processes**

- a) Neurosensory organization of speech and hearing
- b) Central auditory nervous system
- c) Anatomy of oral sensation and oral sensory receptors
- d) Neuromotor control of speech
- e) The pyramidal, extra-pyramidal system, basal ganglia and cerebellar system
- f) Lower and upper motor neuron
- g) Alpha and gamma motor neurons
- h) Sensory and motor examination, oral, peripheral and other reflexes
- i) Swallowing mechanism and neural control
- j) Screening and bedside neurological examination

#### **Module-III: Neural disorders associated with speech and hearing disorders - I**

- a) Neural infections – meningitis, encephalitis
- b) Developmental anomalies – spinal cord defects, syringomelia and bulbia, Arnold chian malformations
- c) Hydrocephalus – source and circulation of CSF, types and etiopathogenesis
- d) UMN lesions –spastic dysarthria

- e) LMN lesions –flaccid dysarthria
- f) Mixed lesions
- g) Extra pyramidal lesions – dyskinetic dysarthria
- h) Cerebellum and cerebellar pathway lesions – ataxic dysarthria
- i) Other diverse lesions and dysarthrias

#### **Module-IV: Neural disorders associated with speech and hearing disorders - II**

- a) Cerebrovascular diseases – ischemic brain damage – hypoxic ischemic encephalopathy, cerebral infarction – intracranial hemorrhage – intracranial, subarachnoid
- b) Trauma to the CNS – subdural hematoma, epidural hematoma, parenchymal brain damages
- c) Demyelinating diseases – multiple sclerosis, perivenous encephalomyelitis, Dementia
- d) Degenerative, metabolic and nutritional disorders – Alzheimer’s disease, Parkinsonism
- e) Metabolic, hereditary, acquired, neuronal storage disorders
- f) Wilson’s disease, Phenylketonuria
- g) Nutritional – Wernicke’s encephalopathy, pellagra
- h) Alcoholic cerebellar degeneration
- i) Clinical-pathological methods and Neuro-imaging
- j) Tumors of the CNS – gliomas, embryonal tumors of meninges, metastasis, malignant tumors

#### **Module-V: Speech-language and swallowing disorders**

- a) Central language mechanism and its disorders
- b) Developmental motor speech disorders – cerebral palsy, muscular dystrophy
- c) Neurologic disorders with primitive reflexes, diagnosis and management
- d) Clinical neurological syndromes associated with speech and language disorders
- e) Childhood language disorders associated with neurologic disorders
- f) Swallowing associated with neurogenic disorders and assessing mastication and deglutition
- g) Agnosia and other conditions associated with speech and hearing disorders
- h) Cognitive disorders associated with neurologic disorders
- i) General management principles and options for childhood neurogenic speech, language and hearing disorders
- j) General management principles and options for adult neurogenic speech, language and hearing disorders

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# OTOLARYNGOLOGY

**Course Code: ASL2207**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand the

- causes, signs, symptoms, pathophysiology and management of diseases of external, middle and inner ear leading to hearing loss, and
- causes, signs, symptoms, pathophysiology and management of diseases of laryngeal and articulatory systems

## **Course Contents:**

### **Module-I: External and middle ear and their disorders**

- a) Clinical anatomy of the ear
- b) Congenital anomalies
- c) Diseases of the external ear
- d) Tumors of the external ear
- e) Perforation and ruptures of tympanic membrane
- f) Eustachian tube dysfunction
- g) Otitis media with effusion
- h) Cholesteatoma and chronic suppurative otitis media
- i) Otosclerosis
- j) Trauma to temporal bone
- k) Facial nerve and its disorder

### **Module-II: Inner ear and its disorders**

- a) Congenital anomalies
- b) Meniere's Disorder
- c) Ototoxicity
- d) Presbycusis
- e) Disorders of vestibular system
- f) Vestibular Schwannoma
- g) Tinnitus and medical line of treatment
- h) Pre-surgical medical and radiological evaluations for implantable hearing devices
- i) Overview of surgical technique for restoration and preservation of hearing
- j) Post-surgical care and complication of surgery for cochlear implants
- k) Overview of surgical technique, post-surgical care and complication of surgeries for implantable bone conducted hearing aids and middle ear implant

### **Module-III: Oral cavity and its disorders**

- a) Anatomy of the oral cavity
- b) Common disorders of the oral cavity
- c) Tumors of the oral cavity
- d) Cleft lip and palate – medical aspects
- e) Clinical anatomy and physiology of pharynx
- f) Inflammatory conditions of the pharynx, tonsils and adenoids
- g) Tumors of the pharynx

### **Module-IV: Larynx and its disorders**

- a) Clinical anatomy of larynx

- b) Difference between adult and infant larynx
- c) Clinical examination of larynx
- d) Stroboscopy - technique, procedure, interpretation and precautions
- e) Congenital laryngeal pathologies
- f) Inflammatory conditions of the larynx
- g) Vocal nodule and other disorders of the vocal folds
- h) Benign and malignant tumours of the larynx
- i) Laryngectomy – overview of surgical procedure
- j) Phono surgery and other voice restoration surgeries

#### **Module-V: Esophagus and its disorders**

- a) Clinical anatomy and physiology of esophagus
- b) Clinical examination of esophagus
- c) Congenital anomalies of esophagus
- d) Esophageal fistula
- e) Inflammatory conditions of esophagus
- f) Benign conditions of esophagus
- g) Malignant conditions of the esophagus
- h) Airway management procedures

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

#### **Recommended Reading**

# **SPEECH-LANGUAGE PATHOLOGY**

**Course Code: ASL2208**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to understand the

- different speech and language disorders
- basic concepts and tools required for diagnosing speech and language disorders
- basics of assessment procedures for speech and language disorders
- basic principles and intervention procedures for speech and language disorders
- clinical requirements to practice,
- different laws, social-cultural and ethical issues
- identification and prevention of speech and language disorders
- basic principles of providing counselling and guidance to clients and caregivers

**Course Contents:**

## **Module-I: Basic concepts and methods of diagnostics**

- a) Introduction to Speech Language Disorders
- b) Definition and descriptions of delay, deviancy and disorders; impairment, disability and handicap
- c) Incidence and prevalence of speech and language disorders
- d) Causes of speech and language disorders
- e) Basic principles in assessment, evaluation and appraisal
- f) Tools for diagnosis- case history, interview, self-reports, questionnaire & observations
- g) Diagnostic models – SLPM, Wepman, Bloom and Lahey
- h) Types of diagnoses – Clinical diagnosis, direct diagnosis, differential diagnosis, diagnosis by treatment, diagnosis by exclusion, team diagnosis, instrumental diagnosis, provocative diagnosis, tentative diagnosis advantage/disadvantages
- i) Characteristics of a diagnostic clinician
- j) Organization and basic requirements for clinical set up and team approach
- k) DSM, ICD classification and ICF

## **Module-II: Basic concepts and methods of therapeutics**

- a) Basic concepts and terminologies in speech therapeutics
- b) General principles of speech and language therapy
- c) Speech therapy set-up
- d) Individual and group therapy
- e) Procedures and types of for speech-language therapy
- f) Approaches to speech and language therapy – formal, informal and eclectic approaches
- g) Planning for speech and language therapy – goals, steps, procedures and activities
- h) Importance of reinforcement principles and strategies in speech and language therapy, types and schedules of rewards and punishment
- i) Individual and group therapy
- j) AAC and other nonverbal methods of therapy

## **Module-III: Overview of basic assessment and management of speech disorders**

- a) Causes of speech disorders
- b) Overview of assessment procedures for voice disorders; articulation and phonological disorders; and fluency disorders
- c) Overview of management procedures for voice disorders; articulation and phonological disorders; and fluency disorders
- d) Early identification and prevention of speech disorders

- e) Basic concepts in assessment and management of swallowing disorders

#### **Module-IV: Overview of basic assessment and management of language disorders**

- Types, characteristics and classification of language disorders
- Causes of language disorders
- Overview of assessment procedures for child language disorders; adult language disorders; and neurogenic language disorders
- Overview of management procedures for child language disorders; adult language disorders; and neurogenic language disorders
- Early identification and prevention of language disorders
- Issues related to bi- /multilingualism

#### **Module-V: Other issues in practice as a speech - language pathologist**

- Professional code of conduct – social, cultural and other ethical issues
- Scope of practice –different set ups and prerequisites
- Documentation of diagnostic, therapeutic and referral reports
- Counselling, guidance, facilitation of parent participation and transfer of skills
- Evaluation of therapy outcome and follow up
- Evidence based practice
- Community based rehabilitation
- Role of itinerant speech therapist, Anganwadis, resource teachers etc.
- PWD act, National Trust, Consumer protection Act, noise pollution Act and other public laws, RCI, ISHA and other organizations controlling the field
- Facilities and concessions available for speech and hearing disabled

#### **Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# AUDIOLOGY

**Course Code: ASL2209**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to

- understand and carryout experiments to measure differential sensitivity loudness and pitch
- take case history, administer the tuning fork tests and interpret the results
- administer pure tone audiometry including masking on clinical population and appreciate the theoretical back ground of it
- carryout different tests involved in speech audiometry appreciate the theoretical back ground
- carryout subjective calibration and daily listening checks of the audiometer
- get adequate theoretical information necessary to understand concepts involved in objective calibration

**Course Contents:**

## **Module-I: Differential sensitivity**

- a) Concept of differential sensitivity, just noticeable difference
- b) Weber's fraction
- c) Intensity discrimination
- d) Frequency discrimination
- e) Duration discrimination and temporal resolution
- f) Applications of jnd's
- g) Magnitude estimation and production
- h) Loudness – equal loudness level contours and its application
- i) Loudness scales - sone, phone, Steven's power law
- j) Pitch- scales of pitch

## **Module-II: Case history and tuning fork tests**

- a) Need for case history
- b) Basics of history taking
- c) Essential factors to be included in case history for adults
- d) Essential factors to be included in case history for children
- e) Interpretation of case history
- f) Audiological evaluation – rationale and purpose
- g) Principles, procedure, interpretation, advantages and disadvantages of Rinne and Schwabach tuning fork test
- h) Principles, procedure, interpretation, advantages and disadvantages of Weber and Bing tuning fork test
- i) Audiometric version of Weber and Bing test

## **Module-III: Pure tone audiometry**

- a) Classification of audiometers, Parts of an audiometer, characteristics and specifications of transducers used (earphones, bone vibrators, loud speakers)
- b) Audiogram- concept and symbols used
- c) Clinical method of threshold estimation
- d) Factors affecting air conduction threshold
- e) Bone conduction thresholds- measurements, factors effecting
- f) Permissible noise levels in the audiometric room

**Module-IV: Speech audiometry**

- a) Importance and purpose
- b) Different types of stimuli used in speech audiometry
- c) Concept of phonetically and phonemically balanced
- d) Speech detection thresholds – procedure and application
- e) Speech reception thresholds – procedures and application
- f) Word recognition scores – procedure and applications
- g) PIPB function – procedure and applications
- h) Factors affecting speech audiometry
- i) BC speech audiometry – procedure and its application
- j) Test materials available in various languages

**Module-V: Clinical masking and instrumental calibration**

- a) Definition and different terminologies
- b) Purpose and rationale of clinical masking
- c) Different types of stimulus employed in clinical masking
- d) Interaural attenuation and factors affecting interaural attenuation
- e) When to mask and how much to mask – importance of adequate noise levels
- f) Different procedures for masking
- g) Masking for speech audiometry
- h) Calibration definition and purpose
- i) Daily listening checks and subjective calibration
- j) Objective calibration of air conduction transducers
- k) Objective calibration of bone conduction transducers
- l) Frequency calibration

**Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# **PRACTICALS IN SPEECH-LANGUAGE PATHOLOGY**

**Course Code: ASL2210**

**Credit Units: 07**

## **Practicals**

- a) Demonstrate normal aspects of speech and analyse perceptually variations in voice, articulation and fluency in different recorded speech samples of typical individuals at different age groups (children, adults and older adults) and sex.
- b) Demonstrate normal aspects of language and analyse perceptually variations in language in different recorded samples of typical individuals at different age groups (children, adults and older adults) and sex.
- c) Demonstrate stress, rhythm and intonation and variations in rate of speech and analyse perceptually variations in prosody in different recorded samples of typical individuals at different age groups (children, adults and older adults) and sex.
- d) Use IPA to transcribe spoken words.
- e) Record a standard passage, count number of syllables and words, identify syllable structure, syntactic structures in the passage.
- f) Oral mechanism examination on 5 normal children and 5 normal adults.
- g) Prepare a chart and show the developmental stages of speech and language behavior.
- h) Administer standardized tests for assessment of delayed speech and language development such as REEL, SECS, LAT, 3DLAT, ALD each on any 2 children.
- i) Study the available normative data (Indian/Western) of speech such as respiratory, phonatory, resonatory and articulatory parameters.
- j) Measure the following in 5 normal subjects: (a) Habitual frequency (b) Frequency range (c) Intensity (d) Intensity range (e) Phonation duration (f) rate of speech (g) Alternate Motion Rates and Sequential Motion Rates (h) s/z ratio.
- k) Study the available normative data (Indian/Western) of language such as phonology, semantics, syntax, morphology and pragmatic measures.
- l) Perceptual analysis of speech and language parameters in normal (2 children and 2 adults and persons with speech disorders (3 adults + 3 children).
- m) Prepare a model diagnostic report of a patient with speech and language disorder.
- n) Prepare a diagnostic and therapy kit.
- o) Make a list of speech language stimulation techniques and other therapy techniques for various speech disorders.
- p) Familiarize with the sources for referral and parent counseling procedures.
- q) Prepare a report on the available audiovisual material and printed material/pamphlets relating to speech-language pathology, public education of communication and hearing disorders, etc.
- r) Prepare a report on the available clinical facilities and clinical activities of the institute.

## **Clinical Practicum**

- a) Observe the evaluation process and counselling of at least 5 different speech and language disorders in children.
- b) Observe the evaluation process and counselling of at least 5 different speech and language disorders in adults.
- c) Take case history of a minimum of 10 individuals (5 normal & 5 clients with complaints of speech-language problems).
- d) Observation of diagnostic procedures.

- e) Observe various therapeutic methods carried out with children and adults with speech and language disorders.

**Examination scheme:**

<b>Components</b>	<b>CRW</b>	<b>C/P/A</b>	<b>CT</b>	<b>A</b>	<b>Viva</b>
<b>Weightage (%)</b>	15	15	15	5	50

CRW- Clinical record writing, C/P/A- Case discussion/presentation/analysis, CT- Class test, A- Attendance, Viva- Internal/External

# PRACTICALS IN AUDIOLOGY

Course Code: ASL2211

Credit Units: 07

## Practicals

### Calculate/derive the answers for following

- a) Calculate the relative intensities with different reference intensities.
- b) Calculate decibels when sound intensities are doubled, increased by 4 times
- c) Add decibels when two sounds with different intensities are produced simultaneously
- d) Collect pictures of audiometers that existed between 1920 and 1990.

### Perform the following experiments

- a) Calculate reference equivalent sound pressure levels (RETSPL) for head phones and bone vibrator for any two frequencies using 30 participants.
- b) Measure most comfortable level on 10 participants with normal hearing sensitivity.
- c) Measure uncomfortable levels on 10 participants with normal hearing sensitivity.
- d) Calculate the sensation levels of MCL and UCLs in above 10 participants.
- e) Measure difference limen of intensity, frequency and duration on 10 normal hearing adults and plot it in graphical form and interpret the results.
- f) Measure equal loudness level contours at minimum level, 40 dB SPL, 70 dB SPL (1 kHz) in 5 normal hearing adults.
- g) Measure sone and mel in 5 normal hearing adults using scaling techniques.
- h) Take case history on 5 adults and 5 children with hearing problem and correlate the information from case history to results of pure tone audiometry.
- i) Administer different tuning fork tests on 5 simulated conductive and 5 sensori neural hearing loss individuals.
- j) Carry out pure tone and speech audiometry on 10 normal hearing individuals.
- k) Carry out clinical masking on 10 normal hearing individuals with simulated conductive hearing loss and carry out clinical masking on 5 individuals with conductive hearing loss and 5 individuals with sensori-neural hearing loss.
- l) Carryout daily listening checks and subjective calibrations 20 times and observe objective calibration once
- m) Perform otoscopy and draw the tympanic membrane of 10 healthy normal individuals
- n) Measure difference limen of intensity, frequency and duration on 10 normal hearing adults and plot it in graphical form and interpret the results
- o) Measure equal loudness level contours at minimum level, 40 dB SPL, 70 dB SPL (1 kHz) in 5 normal hearing adults
- p) Measure sone and mel in 5 normal hearing adults using scaling techniques
- q) Take case history on 5 adults and 5 children with hearing problem and correlate the information from case history to results of pure tone audiometry
- r) Administer different tuning fork tests on 5 simulated conductive and 5 sensori neural hearing loss individuals
- s) Carry out pure tone and speech audiometry on 10 normal hearing individuals.
- t) Carry out clinical masking on 10 normal hearing individuals with simulated conductive hearing loss and carry out clinical masking on 5 individuals with conductive hearing loss and 5 individuals with sensori-neural hearing loss
- u) Carryout daily listening checks and subjective calibration 20 times and observe objective calibration once

## Clinical Practicum

- a) Observe case history being taken on 5 adults and 5 children with hearing problem and correlate the information from case history to results of pure tone audiometry.
- b) Administer different tuning fork tests on 5 conductive and 5 sensori neural hearing loss individuals.
- c) Observe the pure tone audiometry being carried out on 30 clients.
- d) Plot the audiogram, calculate the pure tone average and write the provisional diagnosis of observed clients.
- e) Perform otoscopy (under supervision) on at least 1 client with following conditions: Tympanic membrane perforation, SOM, CSOM

## Examination scheme:

Components	CRW	C/P/A	CT	A	Viva
Weightage (%)	15	15	15	5	50

CRW- Clinical record writing, C/P/A- Case discussion/presentation/analysis, CT- Class test, A- Attendance, Viva- Internal/External

## Syllabus - Third Semester

### VOICE AND ITS DISORDERS

**Course Code: ASL2307**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to

- describe characteristics of normal voice and identify voice disorders
- explain etiology related to voice problems, and its pathophysiology
- assess voice disorders
- provide counselling and therapy to individuals with voice disorders

**Course Contents:**

**Module-I: Basic concepts in voice and its production**

- a) Definition and functions of voice – biological and non-biological
- b) Parameters of voice
- c) Structures and function of respiratory system for the purpose of phonation
- d) Laryngeal anatomy – Structural support of larynx, muscles, vocal fold microstructure, blood supply, and innervations
- e) Vocal tract resonance and voice quality
- f) Development of voice: Birth to senescence; structural and voice related changes
- g) Aerodynamic myo-elastic theory of voice production
- h) Voice mechanics – Physiologic, acoustic and aerodynamic correlates of voice
- i) Pitch and loudness changing mechanism, voice registers and voice quality
- j) Description of normal and abnormal voice: Parametric, pathologic/perceptual, social

**Module-II: Characteristics and pathophysiology of voice disorders**

- a) Pathologies of the laryngeal mechanism: classification of voice disorders, incidence, and prevalence
- b) Etiology of voice disorders: voice misuse and abuse, medical related etiologies, primary disorder etiologies and personality related etiologies
- c) Pathologies of vocal fold cover (infective and trauma related secondary conditions) and muscular dysfunction
- d) Non-organic voice disorders: functional disorders, psychosomatic- functional aphonia and physiological- voice abuse, puberphonia)
- e) Congenital voice disorders
- f) Neurological voice disorders
- g) Voice problems in systemic illnesses and endocrine disorders
- h) Voice problems in transgenders
- i) Voice problems in the elderly
- j) Voice problems in professional voice users: teachers and singers

**Module-III: Assessment of voice**

- a) Referral sources, medical examination and team approach
- b) Protocol for voice assessment: components and philosophies (ICF, ICD)
- c) Clinical voice laboratory: principles of instrumental measurements – electrical error, electrical safety, hygiene safety; recording of data; storage; patented softwares, free wares
- d) Perceptual evaluation of voice: GRBAS, CAPE -V
- e) Visualization procedures- indirect laryngoscopy, video laryngoscopy & stroboscopy

- f) Acoustic analysis of voice: F0 related measures, intensity related measures, quality related measures, phonetogram, DSI
- g) Electroglottography and inverse filtering procedures
- h) Aerodynamic analysis of voice: static & dynamic measures
- i) Self-evaluation of voice : PROM, VHI, V-DOP
- j) Reporting of voice findings, normative comparisons, differential diagnosis

#### **Module-IV: Management of voice**

- a) Voice therapy orientation: basic principles, goal setting and approaches
- b) Vocal hygiene and preventive counselling
- c) Symptomatic voice therapy – voice facilitation techniques
- d) Psychological approaches to voice therapy – psychoanalysis, rational emotive therapy and cognitive behavior therapy
- e) Physiological approach – breathing and postural techniques
- f) Holistic voice therapy approaches -1: accent therapy, confidential voice therapy,
- g) Holistic voice therapy approaches - 2: vocal function exercises, resonant voice therapy, Lee Silverman voice therapy
- h) Medical and surgical procedures in the treatment of benign vocal fold lesions: pharmaceutical effects on voice, phono surgery : re-innervation techniques, laryngeal framework surgeries, micro laryngeal excision
- i) Professional voice care

#### **Module-V: Intervention strategies for voice disorders**

- a) Vocal trauma related disorders
- b) Functional voice disorders – inappropriate vocal components
- c) Functional aphonia
- d) Puberphonia/mutational falsetto
- e) Muscle tension dysphonia
- f) Sulcus vocalis
- g) Vocal fold palsy
- h) Spasmodic dysphonia
- i) GERD/LPR
- j) Benign vocal fold lesions requiring surgical intervention
- k) Post-operative care for benign vocal fold lesions disorders
- l) Documenting voice therapy outcomes

#### **Practicals**

- a) Record phonation and speaking samples (counting numbers) from five children, adult men, adult women, geriatric men and geriatric women. Note recording parameters and differences in material.
- b) Make inferences on age and sex differences across the samples obtained in the previous experiment using perceptual voice profiling. Make a note of differences in pitch, loudness, quality and voice control. Explain how voice reflects ones personality and other social needs.
- c) Perform an acoustic voice analysis on phonation sample and generate a voice report based on acoustic findings. Compare findings between men & women.
- d) Perform MPT and s/z ratio. Infer differences across age and sex.
- e) Perform spirometry or any other appropriate aerodynamic procedure. Infer differences across age and sex.
- f) Perform acoustic analysis on five abnormal voice samples.
- g) Observe and document findings from five laryngeal examinations (pre-recorded or live) such as

- VLS, stroboscopy or any other relevant.
- h) Administer a PROM on five individuals.
- i) Prepare a vocal hygiene checklist.
- j) Demonstrate therapy techniques such as vocal function exercise, resonant voice therapy, digital manipulation, push pull, relaxation exercises.

#### Examination Scheme:

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# **SPEECH SOUND DISORDERS**

**Course Code: ASL2308**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to

- describe normal speech sound development and characterization of individuals with speech sound disorders.
- perform phonological analysis and assessment of speech sound disorders.
- plan intervention for individuals with speech sound disorders.

**Course Contents:**

## **Module-I: Speech sound acquisition and development**

- a) Fundamentals of articulatory phonetics - phonetic description of vowels & consonants.
- b) Phonology & phonological theories – generative phonology, natural phonology.
- c) Phonology & phonological theories – non-linear phonology, optimality theory.
- d) Methods to study speech sound acquisition – diary studies, cross sectional studies and longitudinal studies.
- e) Speech sound acquisition
  - i. birth to one year (development of infant speech perception, early speech production).
  - ii. one to two years (consonant inventories, influence of phonological knowledge on vocabulary acquisition).
  - iii. two to five years (growth of phonetic, phonemic, phonotactic inventory – consonants, clusters, phonological patterns).
  - iv. above five years (speech sound mastery and development of literacy – phonological awareness).
  - v. Factors influencing speech sound acquisition
- f) Acoustics of speech sounds
- g) Speech intelligibility, factors affecting speech intelligibility, assessment of speech intelligibility
- h) Co articulation: types and effects
- i) Phonological development in bilingual children.
- j) Phonological development in Indian languages.

## **Module-II: Assessment of speech sound disorders - I**

- a) Current concepts in terminology and classification of speech sound disorders
  - i. Organically-based speech sound disorders, childhood apraxia of speech.
  - ii. Speech sound disorders of unknown origin, classification by symptomatology.
- b) Factors related to speech sound disorders
  - i. structure and function of speech & hearing and oro-sensory mechanisms.
  - ii. cognitive – linguistic, psychosocial and social factors.
  - iii. metalinguistic factors related to speech sound disorders.
- c) Introduction to assessment procedures: aims of assessment, screening and comprehensive assessment.
- d) Speech sound sampling procedures - issues related to single word and connected speech samples; imitation and spontaneous speech samples, contextual testing, recording of speech samples.
- e) Review of tests in English and other Indian languages - Single word articulation tests, deep articulation of articulation, and computerized tests of phonology.
- f) Influence of language and dialectal variations in assessment.

- g) Transcription of speech sample - transcription methods –IPA and extension of IPA; broad and narrow transcription.

### **Module-III: Assessment of speech sound disorders - II**

- a) Introduction to independent and relational analysis.
- b) Independent analyses – phonetic inventory, phonemic inventory and phonotactic inventory (utility of independent analysis for analysis of speech of young children and children with severe speech sound disorders).
- c) Relational analyses – SODA, pattern analysis, (distinctive features, phonological process analysis).
- d) Phonological processes analyses - language specific issues, identification and classification of errors.
- e) Assessment of oral peripheral mechanism.
- f) Speech sound discrimination assessment, phonological contrast testing.
- g) Stimulability testing.
- h) Determining the need for intervention – speech intelligibility and speech severity assessment.
- i) Factors influencing target selection – stimulability, frequency of occurrence, developmental appropriateness, contextual testing, and phonological process analysis.
- j) Case study – Documenting the assessment findings and determining the need for intervention.

### **Module-IV: Management – I**

- a) Basic considerations in therapy – target selection, basic framework for therapy, goal-attack strategies, organizing therapy sessions, individual vs. group therapy.
- b) Treatment continuum – establishment, generalization and maintenance; measuring clinical change.
- c) Facilitation of generalization.
- d) Maintenance and termination from therapy.
- e) Motor-based treatment approaches – Principles of motor learning.
- f) Discrimination/ear training and sound contrast training.
- g) Establishing production of target sound – imitation, phonetic placement, successive approximation, context utilization.
- h) Traditional approach, contextual/sensory-motor approaches.
- i) General guidelines for motor-based treatment approaches.
- j) Use of technology in articulation correction.

### **Module-V: Management – II**

- a) Core vocabulary approach.
- b) Introduction to linguistically-based treatment approaches- Distinctive feature therapy.
- c) Minimal pair contrasts therapy.
- d) Metaphon therapy, Cycles approach.
- e) Broad-based language approaches.
- f) General guidelines for linguistically-based approaches.
- g) Phonological awareness and phonological disorders.
- h) Phonological awareness intervention for preschool children.
- i) Adapting intervention approaches to individuals from culturally and linguistically diverse backgrounds.
- j) Role of family in intervention for speech sound disorders.

### **Practicals**

- a) List the vowels and consonants in your primary language and provide phonetic and acoustic descriptions for the speech sounds.
- b) Identify the vowels and consonants of your language on the IPA chart and practice the IPA symbols by transcribing 25 words.

- c) Make a list of minimal pairs (pairs of words which differ by only one phoneme) in English.
- d) Make a list of minimal pairs in any language other than English.
- e) Identify the stages of speech sound acquisition by observations from videos of children from birth to 5 years of age.
- f) Record the speech of a two year old typically developing child, transcribe and analyze the speech sample.
- g) Record the speech of one typically developing child from 3-5 years of age (include single word and connected speech samples), transcribe the sample, and perform phonological assessment.
- h) Analyze transcribed speech samples of typically developing children – practice independent and relational analysis.
- i) Practice instructions for phonetic placement of selected sounds.
- j) Develop a home plan with activities for any one section of phonological awareness in English and in one Indian language.

#### Examination Scheme:

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# DIAGNOSTIC AUDIOLOGY: BEHAVIOURAL TESTS

Course Code: ASL2309

Credit Units: 05

**Course Objectives:** After completing this course, the student will be able to

- choose individualized test battery for assessing cochlear pathology, retro cochlear pathology, functional hearing loss, CAPD, vestibular dysfunctions, tinnitus and hyperacusis
- independently run the tests and interpret the results to identify the above conditions and also use the information for differential diagnosis
- make adjustments in the test parameters to improve sensitivity and specificity of tests.
- make appropriate diagnosis based on the test results and suggest referrals.

**Course Contents:**

## **Module-I: Introduction to diagnostic audiology**

- a) Characteristics of a diagnostic test, difference between screening and diagnostic test, functions of a diagnostic test in Audiology
- b) Need for test battery approach in auditory diagnosis and integration of results of audiological tests, cross-check principle
- c) Concept of sensitivity, specificity, true positive, true negative, false positive, false negative, hit rate
- d) Definition of behavioural and physiological tests and their characteristics in diagnostic audiology
- e) Theories and physiological bases of recruitment
- f) Theories and physiological bases of adaptation
- g) Clinical indications for cochlear pathology, retro-cochlear pathology, central auditory processing disorders, functional hearing loss, vestibular disorders

## **Module-II: Tests to identify cochlear and retro cochlear pathology**

- a) ABLB, MLB and SISI tests
- b) Behavioural tests of adaptation
- c) Bekesy audiometry
- d) Brief tone audiometry
- e) PIPB function
- f) Glycerol test
- g) Test to identify dead regions of cochlea

## **Module-III: Tests to diagnose functional hearing loss**

- a) Behavioural and clinical indicators of functional hearing loss
- b) Pure tone tests including tone in noise test, Stenger test, BADGE, puretone DAF
- c) Speech tests including Lombard test, Stenger test, lip-reading test, Doerfler-Stewart test, Low level PB word test, Yes-No test, DAF test
- d) Identification of functional hearing loss in children: Swinging story test, Pulse tone methods

## **Module-IV: Assessment of central auditory processing**

- a) Definition, different behavioral processes
- b) Behavioral and clinical indicators of central auditory processing disorders
- c) Bottle neck and subtlety principles and their implications in
- d) Tests to detect central auditory processing disorders
- e) Monaural low redundancy tests - filtered speech tests, time compressed speech test, speech-in-noise test, SSI with ICM, other monaural low redundancy tests.
- f) Dichotic speech tests – Dichotic digit test, Staggered spondaic word test, Dichotic CV test, SSI with CCM, Competing sentence test, other dichotic speech tests.

- g) Binaural interaction tests – RASP, BFT, MLD, other binaural interaction tests
- h) Tests of Temporal processing – pitch pattern test, duration pattern tests, other temporal ordering tests, gap detection test, TMTF
- i) Variables influencing the assessment of central auditory processing: Procedural and subject variables
- j) Test findings of important tests in subjects with central auditory disorders: brainstem lesion, cortical, CAPD in children.

#### **Module-V: Assessment of persons with vestibular disorder, tinnitus, hyperacusis**

- a) Introduction to structure and function of vestibular system
- b) Vestibular ocular reflex and vestibulo spinal reflex
- c) Overview on other systems involved in balance
- d) Signs and Symptoms of vestibular disorders
- e) Team in the assessment and management of vestibular disorders
- f) Behavioral tests to assess vestibular functioning: Fukuda stepping test, tandem gait test, finger nose pointing, Romberg test, Sharpened Romberg test, Dix-Hallpike test, Log-roll test
- g) Overview of tinnitus and hyperacusis and tests for assessment
- h) Pitch matching, loudness matching, residual inhibition, Feldman masking curves
- i) Johnson Hyperacusis Dynamic Range Quotient

#### **Practicals**

- a) Administer ABLB, MLB and prepare ladder gram (ABLB to be administered by blocking one ear with impression material)
- b) Administer classical SISI on 3 individuals and note down the scores
- c) Administer tone decay tests (classical and its modifications) and note down the results (at least 3 individuals)
- d) Administer Bekesy audiometry
- e) Administer Brief tone audiometry
- f) Plot PIPB function using standardized lists in any 5 individuals
- g) Administer the tests of functional hearing loss (both tone based and speech based) by asking subject to malingering and having a yardstick of loudness.
- g) Administer CAPD test battery to assess different processes on 3 individuals and note down the scores
- h) Administer Fukuda stepping test, Tandem gait test, Finger nose pointing, Romberg test, Sharpened Romberg test, Dix-Hallpike test, Log-roll test on 5 of the individuals each and note down the observations.
- i) Estimate the pitch and loudness of tinnitus in 2 persons with tinnitus (under supervision). Assess the residual inhibition in them.
- j) Plot Feldman masking curves for a hypothetical case
- k) Administer Johnson Hyperacusis Dynamic Range Quotient on any 2 of the individuals and note down the scores.

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# AMPLIFICATION DEVICES

**Course Code: ASL2310**

**Credit Units: 05**

**Course Objectives:** After completing this course, students will be able to

- assess the candidacy for hearing aids and counsel accordingly
- evaluate the listening needs and select the appropriate hearing aid
- independently program digital hearing aids as per the listening needs of the client
- independently assess the benefit from the hearing aid using subjective and objective methods
- make all types of ear molds
- counsel the parents/care givers at all stages

**Course Contents:**

## **Module-I: Types of hearing aids**

- a) Historical development of hearing aids: development of concept of amplification, development of different types of amplification devices
- b) Review of basic elements of hearing aids: Microphone, Amplifier, Receiver/vibrator, Cords, Batteries.
- c) Classification and Types of hearing aids
  - Body level, ear level, in the ear, ITC, invisible in the canal, CIC
  - Binaural, pseudo binaural, monaural
  - Programmable, trimmer digital and digital hearing aids
  - Directional hearing aids, modular hearing aids
  - RIC hearing aids
  - Implantable hearing aids
  - Master hearing aids
  - CROS hearing aids
- d) Group amplification – hard wired, induction loop, FM, infrared
- e) Assistive listening devices – types and selection (Telephones, Television, typing technology)

## **Module-II: Technological aspects in hearing aids**

- a) Routing of signals, head shadow/baffle/diffraction effects
- b) Output limiting and issues related to them: peak clipping, compression
- c) Concept and use of compression in hearing aids: BILL, TILL, PILL, Wide Dynamic Range Compression, Syllabic Compression, Dual Compression
- d) Signal processing in hearing aids – BILL, TILL, PILL
- e) Signal enhancing technology
- f) Noise reduction algorithms
- g) Extended low frequency amplification, frequency lowering technology (transposition, compression)
- h) Recent advances in hearing aids

## **Module-III: Electro-acoustic measurements for hearing aids**

- a) Purpose and Parameters to be considered: OSPL90, SSPL90, HFA SSPL90, Gain, Full on Gain, HFA Full on Gain, Reference test Gain, Basic Frequency Response, Total Harmonic distortion, Intermodulation Distortion, input Output functions, instrumentation, procedure, variables affecting EAM
- b) Electro-acoustic measurements, BIS, IEC and ANSI standards
- c) Environmental tests.
- d) Care, maintenance and troubleshooting of hearing aids
- e) Counselling and orienting the hearing aid user (Client and significant others)

#### Module-IV: Selection of hearing aids

- a) Pre-selection factors; Prescriptive and comparative procedures; Functional gain and insertion gain methods; Use of impedance, OAEs and AEPs audiometry; Hearing aids for conductive hearing loss; Hearing aids for children; Hearing aids for elderly; Selection of non-linear programmable and digital hearing aids
- b) Hearing aid programming
- c) Methods for assessing hearing aid benefit
- d) Real ear insertion measurements for verification of hearing aid benefit: REIG, REUR, REAR, REOR, RESR, REIG, REAG, RECD
- e) Acoustic feedback in hearing aids

#### Module-V: Mechano-acoustic couplers (Ear molds)

- a) Different types of molds
- b) Procedure for hard molds and soft mold
- c) UV curing methods
- d) Special modifications in the ear molds: Vents (diagonal and parallel), deep canal molds, short canal, horns, Libby horn, reverse horn, acoustic modifier
- e) Effects of mechano-acoustic couplers on the hearing aid output

#### Practicals

- a) Listen to the output of different types and classes of hearing aids (monaural, binaural, analog, digital hearing aids), in different settings
- b) Troubleshoot hearing aids: Check the continuity of the receiver cord using multi meter, measure the voltage of different sized batteries using multi meter, Check voltage of batteries different types and sizes
- c) Carry out electroacoustic measurements for the body level and ear level hearing aids
- d) Program the hearing aid for different configuration and degrees of hearing loss (at least 5 different audiograms) using different prescriptive formulae
- e) Program the hearing aid for different listening situations (at least 3 different situations)
- f) Vary the compression settings in a digital hearing aid and note down the differences in the output
- g) Perform real ear insertion measurements using different hearing aids (body level and ear level, hearing aids of different gains)
- h) Compare speech perception through conventional BTE and RIC hearing aids using a rating scale
- i) Observe assistive listening devices such as telephone amplifier, vibro-tactile alarms, note down the candidacy and their utility.
- j) Administer a questionnaire to assess hearing aid benefit on 2 persons using hearing aids.
- k) Carry out a role play activity of counselling a hearing aid user
- l) Ear Molds
  - Take impression for the ear mold using different techniques, different methods and using different materials
  - Make hard mold for any 2 ears
  - Make soft mold for any 2 ears
  - Make vent in hard molds you made

#### Examination Scheme:

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# CLINICALS IN SPEECH LANGUAGE PATHOLOGY-I

Course Code: ASL2311

Credit Units: 07

## General considerations:

- Exposure is primarily aimed to be linked to the theory courses covered in the semester.
- After completion of clinical postings in Speech –language diagnostics, the student will know (concepts), know how (ability to apply), show (demonstrate in a clinical diary/log book based on clinical reports/recordings, etc), and do (perform on patients/ client contacts) the following:

## Know:

1. Procedures to obtain a speech language sample for speech & language assessment from children of different age groups such as, pre schoolers, kindergarten, primary school and older age groups.
2. Methods to examine the structures of the oral cavity/organs of speech.
3. The tools to assess language abilities in children (with hearing impairment, specific language impairment & mixed receptive language disorder).
4. Development of speech sounds in vernacular and linguistic nuances of the language.

## Know-how:

1. To evaluate speech and language components using informal assessment methods.
2. To administer at least two standard tests for childhood language disorders.
3. To administer at least two standard tests of articulation/ speech sounds.
4. To assess speech intelligibility.

## Show:

1. Analysis of language components – Form, content & use – minimum of 2 samples.
2. Analysis of speech sounds at different linguistic levels including phonological processes – minimum of 2 samples.
3. Transcription of speech language samples – minimum of 2 samples.
4. Analyse differences in dialects of the local language.

## Do:

1. Case history - minimum of 5 individuals with speech & language disorders.
2. Oral peripheral examination - minimum of 5 individuals.
3. Language evaluation report – minimum of 5.
4. Speech sound evaluation report – minimum of 5.

## Evaluation:

- Internal evaluation shall be based on attendance, clinical diary, log book and learning conference.
- External evaluation: Spot test, OSCE, Record, Viva-voce, case work

## Examination scheme:

Components	CRW	C/P/A	CT	A	Viva
Weightage (%)	15	15	15	5	50

CRW- Clinical record writing, C/P/A- Case discussion/presentation/analysis, CT- Class test, A- Attendance, Viva- Internal/External

# CLINICALS IN AUDIOLOGY-I

Course Code: ASL2312

Credit Units: 07

## General considerations:

- Exposure is primarily aimed to be linked to the theory courses covered in the semester, however, not just limited to these areas.
- After completion of clinical postings in auditory diagnostics and auditory rehabilitation, the student will Know (concept), know how (ability to apply), show (demonstrate in a clinical diary/log book), and do (perform on patients/ client contacts) the following:

## Know:

1. Methods to calibrate audiometer.
2. Materials commonly employed in speech audiometry.
3. Calculation pure tone average, % of hearing loss, minimum and maximum masking levels.
4. Different types of hearing loss and its common causes

## Know-how:

1. To obtain detailed case history from clients or parents/guardians.
2. To carryout commonly used tuning fork tests.
3. To administer pure tone audiometry including appropriate masking techniques on adults using at least techniques
4. To administer tests to find out speech reception threshold, speech identification scores, most comfortable and uncomfortable levels on adults.

## Show:

1. Plotting of audiograms with different degree and type with appropriate symbols – 2 audiograms per degree and type
2. Detailed case history taken and its analysis
3. Calculation degree, type and percentage of hearing loss on 5 sample conditions

## Do:

1. Case history on at least 5 adults and 3 children with hearing disorders
2. Tuning fork test on at least 2 individuals with conductive and 2 individuals with sensori-neural hearing loss
3. Pure tone audiometry with appropriate masking on 5 individuals with conductive, 5 individuals SN hearing loss and 3 individuals with unilateral/asymmetric hearing loss – 5

## Evaluation:

- Internal evaluation shall be based on attendance, clinical diary, log book and learning conference.
- External evaluation: Spot test, OSCE, Record, Viva-voce, case work

## Examination scheme:

Components	CRW	C/P/A	CT	A	Viva
Weightage (%)	15	15	15	5	50

CRW- Clinical record writing, C/P/A- Case discussion/presentation/analysis, CT- Class test, A- Attendance, Viva- Internal/External

## **Syllabus - Fourth Semester**

### **MOTOR SPEECH DISORDERS IN CHILDREN**

**Course Code: ASL2402**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to

- describe the characteristics of motor speech disorders in children such as cerebral palsy, childhood apraxia of speech and other childhood dysarthrias
- assess the speech and non-speech aspects associated with the above conditions
- plan and execute therapy strategies for children with motor speech disorders

**Course Contents:**

#### **Module-I: Neuro-developmental processes in speech production and motor speech disorders**

- a) Review of neuro-anatomy (cerebral cortex, sub-cortical structures, brainstem, cerebellum, spinal cord & cranial nerves, pyramidal and extra-pyramidal systems)
- b) Sensory-motor integration (spatial temporal planning, motor planning and feedback)
- c) Anatomic development of speech production systems
- d) Development of neural pathways of speech motor control (brain maturation, reflexes, sensory and motor)
- e) Dysarthria in children – cerebral palsy – disorders of tone (spastic, flaccid): definition, etiology, characteristics and associated problems
- f) Dysarthria in children – cerebral palsy – disorders of movement (hyperkinetic, hypokinetic) and disorder of balance (ataxia): definition, etiology, characteristics and associated problems
- g) Dysarthria in children – lower motor neuron and other syndromes with motor speech disorders
- h) Childhood apraxia of speech and nonverbal oral apraxia: definition, characteristics and classification

#### **Module-II: Assessment of motor speech disorders in children**

- a) Case history and developmental neurological evaluation – primitive postural and oro-pharyngeal reflexes, cranial nerve examination
- b) Assessment of oral sensory and motor capacity – Oral peripheral mechanism examination, neuro-muscular status
- c) Assessment of speech sub-systems – quantitative and qualitative
- d) Assessment of speech intelligibility and comprehensibility
- e) Assessment of associated problem
- f) Speech assessment with specific reference to childhood apraxia of speech – Phonetic and phonemic inventory, phonotactics and syllable sequencing, variability of errors, speech intelligibility, fluency and prosody
- g) Test materials – checklist for childhood apraxia of speech, screening test for developmental apraxia of speech
- h) Protocols for non-verbal and verbal praxis specific to Indian languages
- i) Differential diagnosis- dysarthria and other developmental disorders
- j) Differential diagnosis - childhood apraxia of speech and other developmental disorders

#### **Module-III: Management of childhood dysarthria**

- a) Team approach in rehabilitation of motor speech disorders in children
- b) Neuro-developmental therapy
- c) Non speech oral-motor exercises: its application for children with dysarthria

- d) Management of drooling
- e) Behavioral management of respiratory, phonatory, resonatory and articulatory subsystems
- f) Prosthetic appliances in treatment of childhood dysarthria
- g) AAC in management of motor speech disorders- role of devices, AAC team, candidacy and pre-requisites, symbol selection, techniques, assessment for AAC, effective use of AAC
- h) Case studies: Planning intervention for children with dysarthria

#### **Module-IV: Management of childhood apraxia of speech**

- a) Principles of motor learning
- b) Integral stimulation – dynamic temporal cueing
- c) Multisensory and tactile cueing techniques (motor kinesthetic speech training, sensory motor approach, PROMPTS, Touch cue method & speech facilitation)
- d) Gestural cueing techniques (signed target phoneme therapy, adapted cueing techniques, cued speech, visual phonics, & Jordon's gestures)
- e) Miscellaneous techniques (melodic intonation therapy, multiple phonemic approach, & instrumental feedback)
- f) Cognitive/conceptual/ linguistic /phonological remedial approaches - phonotactics
- g) Other approaches: Vowel and diphthong remediation techniques (Northampton (Yale) vowel chart and Alcorn symbols), Nancy Kauffman's speech praxis treatment kit
- h) Use of AAC in childhood apraxia of speech
- i) Evidence-based practice in intervention for childhood apraxia of speech
- j) Case studies: Planning intervention for childhood apraxia of speech

#### **Module-V: Feeding and swallowing disorders in children**

- a) Embryology- periods and structures of development
- b) Anatomical structures of swallowing- upper aero digestive system, anatomic difference between adults and children
- c) Physiology of swallowing- swallow phases, neural control of swallowing, reflexes related to swallowing, suckling and sucking, airway and swallowing
- d) Terms involved in dysphagia and development of feeding skills
- e) Causes of dysphagia in children
- f) Signs and symptoms of dysphagia in children
- g) Assessment – inferences from neural developmental assessment, cranial nerve examination, assessment scales, nutritive and non-nutritive assessment, instrumental assessment (VFS, cervical auscultation), gastrointestinal evaluation
- h) Management: positioning, oral- motor treatment, team approach, non oral feeding, transitional feeding, modifications in feeding
- i) Role of speech-language pathologist in neonatal intensive care with reference to feeding and swallowing

#### **Practicals**

- a) With the help of models, charts and software, identify the motor control centers in the brain.
- b) Perform oro-motor examination in five children and adults and compare
- c) Identify oro-motor reflexes (rooting, suckling, & phase bite) in 5 infants.
- d) Demonstrate normal posture and breathing patterns required for varied speech tasks. Alter the postures and breathing patterns and notice changes in speech patterns.
- e) Assess DDK rate in five typically developing children.
- f) Rate intelligibility of speech in five typically developing children. Discuss factors that influenced speech intelligibility and their ratings.
- g) Observe and record (a) physical status, (b) oral sensory motor abilities and vegetative skills, (c)

respiration, (d) phonation, (e) resonance, (f) articulation and (g) language abilities in five typically developing children. Compare these with observations made from children with motor speech disorders.

- h) Perform oro-motor exercises – isotonic and isometric. Discuss strategies to modify exercises for children.
- i) Identify from video the AAC system such as low technology vs high technology systems and different symbol system, that is, Bliss symbols, IICP symbols and different signing systems – Makaton.
- j) Observe feeding and swallowing skills in different age groups of children: 2 newborns; 2 infants, 2 toddlers, and 2 older children. Identify the differences in feeding methods, food consistencies, texture, quantity, feeding habits, feeding appliances used by these children.

#### Examination Scheme:

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# CHILD LANGUAGE DISORDERS

**Course Code: ASL2406**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to

- explain the process of acquisition of language and factors that influence its development in children.
- identify and assess language delay and deviance in children.
- select appropriate strategies for intervention.
- counsel and provide guidance to parents/caregivers of children with language disorders.

**Course Contents:**

## **Module-I: Bases of language acquisition, development and disorders**

- a) Theories of language acquisition 1: Biological, Psycholinguistic/syntactic theory
- b) Theories of language acquisition 2: Cognitive, social interaction/pragmatic, information processing, behavioral
- c) Pre-cursors for normal development of language
- d) Development of components of language from birth to two years (pre-linguistic/pre-symbolic to symbolic)
- e) Development of components of language during preschool period
- f) Development of components of language during early school age and beyond
- g) Basic concepts and terminologies of language development in bilingual children – simultaneous versus sequential language acquisition, additive and subtractive bilingualism, process of second language acquisition, variables influencing second language acquisition
- h) Development of language in culturally diverse environments and exceptional circumstances – neglect and abuse, twins, low-socio economic background
- i) Over view of language disorders – definition and classification based on ICD, DSM
- j) Application of ICF in language disorders

## **Module-II: Language disorders – definition, classification, causes, and characteristics**

- a) Intellectual disability: definition, classification, causes and characteristics
- b) Autism spectrum disorders: definition, classification, causes and characteristics
- c) Attention deficit hyperactive disorder: definition, classification, causes and characteristics
- d) Language impairment - mixed receptive and expressive language disorder, specific language impairment: definition, classification, causes and characteristics
- e) Learning disability: definition, classification, causes and characteristics
- f) Acquired childhood aphasia: definition, classification, causes and characteristics
- g) Sensory impairments and language disorders: types, causes and characteristics
- h) Syndromic conditions leading to language difficulties: William syndrome, fragile x syndrome, Down syndrome
- i) Other developmental disabilities: deaf-blind, cerebral palsy and multiple disabilities.

## **Module-III: Assessment of language in children**

- a) Preliminary components of assessment: Case history, screening, evaluation of environmental, linguistic & cultural variables.
- b) Methods to assess children with language disorder: Formal versus informal assessment; types of assessment materials: assessment scales, observational checklists, developmental scales; standardization, reliability, validity, sensitivity and specificity of test materials
- c) Informal assessment - pre-linguistic behavior, play, mother-child interaction
- d) Language sampling: planning and collecting representative sample; strategies to collecting

- language sample, audio-video recording, transcription
- e) Analysis of language sample: Specific to various components of language such as phonology, morphology, syntax, semantics and pragmatics.
- f) Test materials for assessing language skills: Assessment of Language Development (ALD), 3D-Language Assessment Test, Linguistic Profile Test, Com-DEALL checklist, other Indian and global tests
- g) Test materials used for children with developmental delay, intellectual disability: Madras Developmental Program Scale, Bayley's Scale for infant and toddler development
- h) Test materials used for children with autism spectrum disorder: Modified-Checklist for Assessment of Autism in Toddlers, Childhood Autism Rating Scale, Indian Scale for Assessment of Autism
- i) Other test materials used for children with ADHD, ACA, LD (NIMH battery for assessment of Learning Disability)
- j) Documenting assessment results: diagnostic report, summary report and referral report specific to disorder
- k) Differential diagnosis of language disorders in children

#### **Module-IV: Management of language disorders in children - I**

- a) General principles and strategies of intervention in children with language impairment – purpose of intervention, basic approaches to language intervention (developmental or normative approach, functional approach)
- b) Types of service delivery models - Individuals versus group; direct versus tele-rehabilitation; structure of therapy session, setting the environment, furniture, seating arrangements
- c) Reinforcement in language therapy, types and schedules of reinforcement
- d) Choice of language for intervention, incorporating principles of multiculturalism into treatment activities
- e) Choosing and framing goals and Objectives: SMART Objectives
- f) Specific treatment techniques
  - i. Incidental teaching, self-talk, parallel talk, expansion, extension, recasting, joint routines, joint book reading,
  - ii. whole language, modifying linguistic input, communicative temptations
  - iii. drill, modelling
  - iv. Focused stimulation, vertical structuring, milieu teaching, and model
- g) Caregivers and family in intervention: Structured and informal approaches

#### **Module-V: Management of language disorders in children - II**

- a) Team approach to intervention
- b) Augmentative and alternative communication – types (aided and unaided) and application in child language disorders
- c) Specific approaches to management of children with Autism: PECS, Lovaas, TEACCH, Com-DEALL, ABA, Facilitated Communication
- d) Approaches to management of children with LD
- e) Strategies to facilitate language skills in children with disorders such as intellectual disability: Redundancy, chunking, chaining
- f) Use of technology in language intervention
- g) Home plan and counselling for children with language disorders
- h) Documentation specific to the disorder: pre-therapy; lesson plan; SOAP notes
- i) Documentation specific to the disorder: summary report, referral report
- j) Decision making in therapy: transition to next objective, termination of therapy

## Practicals

- a) Record mother-child interaction of one typically developing child in the age range of 0-1, 1-2, 2-4, 4-6 and 6-8 years of age. Compare linguistically the outputs from the mother and the child across the age groups. Make inferences on socio cultural influences in these interactions.
- b) Make a list of loan words in two familiar languages based on interaction with 10 typically developing children in the age range of 2-4, 4-6, 6-8 and 8-10 years. Discuss the influence of bi- or multilingualism on vocabulary.
- c) Record a conversation and narration sample from 3 children who are in preschool kindergarten, and primary school. Perform a language transcription and analyze for form, content and use.
- d) Administer 3D LAT, ALD, LPT, ComDEALL checklist on 2 typically developing children.
- e) Draft a diagnostic report and referral letter for a child with language disorder.
- f) Demonstrate general language stimulation techniques and discuss the clinical application.
- g) Demonstrate specific language stimulation techniques with appropriate materials and discuss its clinical applications.
- h) Draft Subjective Objective Assessment Plan (SOAP) for a pre-recorded sample of a 45 minute session of intervention for a child with language disorder.
- i) Draft a lesson plan for a child with language disorder.
- j) Draft a discharge summary report for a child with language disorder

## Examination Scheme:

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# DIAGNOSTIC AUDIOLOGY: PHYSIOLOGICAL TESTS

Course Code: ASL2407

Credit Units: 05

**Course Objectives: After completing this course, the students will be able to**

- justify the need for using the different physiological tests in the audiological assessment
- independently run the tests and interpret the results to detect the middle ear, cochlear and retro cochlear pathologies and also differentially diagnose
- design tailor-made test protocols in immittance, AEPs and OAEs as per the clinical need
- make appropriate diagnosis based on the test results and suggest referrals.

**Course Contents:**

## **Module-I: Immittance Evaluation**

- a) Clinical significance of physiological tests in audiology
- b) Immittance evaluation: Principle of immittance evaluation: Concept of impedance and admittance, their components,
- c) Tympanometry: definition, measurement procedure, response parameters, their measurement and normative, classification of tympanogram, clinical significance of tympanometry
- d) Eustachian tube functioning tests of tympanometry: basics of pressure equalization function of ET, Valsalva, Toynbee, William's pressure swallow, inflation-deflation test.
- e) Overview on multicomponent and multi-frequency tympanometry
- f) Overview on wide band reflectance and wide band tympanometry
- g) Reflexometry: definition, acoustic reflex pathway, measurement procedure, clinical applications of acoustic reflexes, special tests

## **Module-II: Auditory evoked potentials (AEPs): Auditory brainstem response (ABR)**

- a) Introduction and classification of AEPs
- b) Instrumentation
- c) Principles of AEP recording techniques:
- d) Auditory brainstem response generators
- e) Protocol and procedure of recording auditory brainstem response
- f) Factors affecting auditory brainstem responses
- g) Clinical applications of ABR
- h) ABR in the paediatric population
- i) Role of ABR in infant hearing screening

## **Module-III: Overview of other AEPs**

- a) ECochG
- b) Auditory Middle Latency Responses (AMLR) and their clinical applications
- c) Auditory Long Latency Responses (Obligatory responses) and their clinical applications
- d) Other long latency potentials such as P300, MMN, P600, N400, T-complex, CNV) and their clinical applications
- e) ASSR: Instrumentation, recording and clinical applications
- f) Brainstem responses to speech and other complex signals

## **Module-IV: Otoacoustic emissions**

- Introduction to otoacoustic emissions
- Origin and classification of OAEs
- Instrumentation
- Procedure of OAE measurement: SOAE, TEOAEs, and DPOAEs

- Interpretation of results: SOAE, TEOAEs, and DPOAEs
- Clinical applications of OAEs: SOAE, TEOAEs, and DPOAEs
- Contralateral suppression of OAEs and its clinical implications

#### **Module-V: Physiological tests for assessment of vestibular system**

- Electronystagmography: procedure, interpretation, clinical applications
- Videonystagmography, videooculograph
- Vestibular Evoked Myogenic Potentials
- Overview of Rotatory chair test, video Head Impulse Test,
- Overview of Dynamic Posturography

#### **Practicals**

- Measure admittance in the calibration cavities of various volumes and note down the observations
- Calculate Equivalent ear canal volume by measuring static admittance in an uncompensated tympanogram (10 ears)
- Do tympanogram in the manual mode and measure peak pressure, peak admittance and ear canal volume manually using cursor (10 ears).
- Measure gradient of the tympanogram (10 ears)
- Administer Valsalva and Toynbee and William's pressure swallow test(5 ears)
- Record acoustic reflex thresholds in the ipsi and contra modes, (10 ears)
- Plot Jerger box pattern for various hypothetical conditions that affect acoustic reflexes and interpret the pattern and the corresponding condition.
- Carry out Acoustic reflex decay test and quantify the decay manually using cursor (5 individuals).
- Trace threshold of ABR (in 5 dB nHL steps near the threshold) for clicks and tone bursts of different frequencies (2 persons) and draw latency intensity function.
- Record ABR using single versus dual channels and, note down the differences
- Record ABR at different repetition rates in 10/sec step beginning with 10.1/11.1 per second. Latency-repetition rate function needs to be drawn.
- Record with each of three transducers (HP, insert phones and bone vibrator) and polarities and draw a comparative table of the same. Students should also record with different transducers without changing in the protocol in the instrument and calculate the correction factor required.
- Record ASSR for stimuli of different frequencies and estimate the thresholds
- Record TEOAEs and note down the amplitude, SNR, noise floor and reproducibility at octave and mid-octave frequencies. Note down the stimulus stability and the overall SNR (10 ears).
- Record DPOAEs and note down the amplitude, SNR, noise floor and reproducibility at octave and mid-octave frequencies (10 ears)

#### **Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# IMPLANTABLE HEARING DEVICES

**Course Code: ASL2408**

**Credit Units: 05**

**Course Objectives:** After completing this course, the students will be able to

- assess candidacy for bone anchored hearing devices, middle ear implants, cochlear implants, and ABI
- select the appropriate device depending on the audiological and non-audiological findings
- handle post-implantation audiological management
- assess the benefit derived from implantation, and
- counsel the parents/care givers during different stages of implantation

**Course Contents:**

## **Module-I: Implantable hearing devices – basics**

- a) Need for implantable hearing devices
- b) History of implantable hearing devices (bone anchored hearing devices, middle ear implants, cochlear implants, auditory brainstem implants and midbrain implants)
- c) Candidacy for implantable hearing devices
- d) Team involved in implantable hearing devices
- e) Pre-implant counseling, Informed consent

## **Module-II: Bone anchored hearing devices and middle ear implants**

- a) Types, components
- b) Surgical approaches, risks, complications
- c) Audiological evaluations for candidacy, contraindications
- d) Assessment of benefits

## **Module-III: Cochlear implant and brain stem implants – basics**

- a) Terminology, types, components and features
- b) Bilateral, bimodal and hybrid cochlear implants
- c) Factors related to selection of the device, funding sources
- d) Surgical approaches, risks, complications
- e) Audiological and non-audiological candidacy criteria, contraindications

## **Module-IV: Cochlear implants and brainstem implants**

- a) Signal coding strategies, classification, types
- b) Intraoperative monitoring by audiologists
- c) Objective measures: ESRT, ECAP, prom stim, EABR, aided cortical potentials
- d) Post implant Mapping: schedule, pre-requisites, switch-on, mapping parameters, impedance, compliance, role of objective and subjective measures in mapping,
- e) post mapping audiological evaluation
- f) Assessment of benefits
- g) Optimization of hearing aid on contralateral ear

## **Module-V: Implantable hearing devices - Counselling and troubleshooting; Rehabilitation**

- a) Post implant Counselling on care and maintenance and trouble shooting of the device
- b) Overview of post implant rehabilitation including AVT
- c) Factors affecting outcome of implantable devices in adults and children

### Practicals

- Watch videos of BAHA, middle ear implant, cochlear implant
- Create hypothetical cases (at least 5 different cases) who are candidates for cochlear implantation. Make protocol for recording an EABR
- List down the technological differences across different models of cochlear implants from different companies, their cost
- Observation of mapping
- Watching of videos on AVT
- Watch video on cochlear implant surgery

### Examination Scheme:

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

## CLINICALS IN SPEECH-LANGUAGE PATHOLOGY-II

Course Code: ASL2409

Credit Units: 07

### General considerations:

- Exposure is primarily aimed to be linked to the theory courses covered in the semester.
- After completion of clinical postings in Speech –language diagnostics, the student will know (concepts), know how (ability to apply), show (demonstrate in a clinical diary/log book based on clinical reports/recordings, etc), and do (perform on patients/ client contacts) the following:

### Know:

1. Speech & language stimulation techniques.
2. Different samples /procedures required to analyse voice production mechanism. (acoustic/ aerodynamic methods / visual examination of larynx/ self evaluation)
3. Different samples /procedures required to analyse speech production mechanism in children with motor speech disorders.

### Know-how:

1. To administer at least two more (in addition to earlier semester) standard tests for childhood language disorders.
2. To administer at least two more (in addition to earlier semester) standard tests of articulation/ speech sounds.
3. To set goals for therapy (including AAC) based on assessment/test results for children with language and speech sound disorders.
4. To record a voice sample for acoustic and perceptual analysis.
5. To assess parameters of voice and breathing for speech.
6. Assessment protocol for children with motor speech disorders including reflex profile and swallow skills.
7. Counselling for children with speech-language disorders.

### Show:

1. Acoustic analysis of voice – minimum of 2 individuals with voice disorders.
2. Simple aerodynamic analysis - minimum of 2 individuals with voice disorders.
3. Self evaluation of voice – minimum of 2 individuals with voice disorders.
4. Informal assessment of swallowing – minimum of 2 children.
5. Assessment of reflexes and pre linguistic skills - minimum of 2 children.
6. Pre –therapy assessment and lesson plan for children with language and speech sound disorders - minimum of 2 children each.

### Do:

1. Case history - minimum of 2 individuals with voice disorders.
2. Case history - minimum of 2 children with motor speech disorders
3. Oral peripheral examination- minimum of 5 children
4. Apply speech language stimulation/therapy techniques on 5 children with language disorders (with hearing impairment, specific language impairment & mixed receptive language disorder)/speech sound disorders – minimum of 5 sessions of therapy for each child.
5. Exit interview and counselling - minimum of 2 individuals with speech language disorders.

**Evaluation:**

- Internal evaluation shall be based on attendance, clinical diary, log book and learning conference.
- External evaluation: Spot test, OSCE, Record, Viva-voce, case work

**Examination scheme:**

<b>Components</b>	<b>CRW</b>	<b>C/P/A</b>	<b>CT</b>	<b>A</b>	<b>Viva</b>
<b>Weightage (%)</b>	15	15	15	5	<b>50</b>

CRW- Clinical record writing, C/P/A- Case discussion/presentation/analysis, CT- Class test, A- Attendance, Viva- Internal/External

## CLINICALS IN AUDIOLOGY-II

Course Code: ASL2410

Credit Units: 07

### General considerations:

- Exposure is primarily aimed to be linked to the theory courses covered in the semester, however, not just limited to these areas.
- After completion of clinical postings in auditory diagnostics and auditory rehabilitation, the student will Know (concept), know how (ability to apply), show (demonstrate in a clinical diary/log book), and do (perform on patients/ client contacts) the following:

### Know:

- Indications to administer special tests
- Procedures to assess the listening needs
- National and international standards regarding electroacoustic characteristics of hearing aids

### Know-how:

- To administer at least 1 test for adaptation, recruitment and functional hearing loss.
- Counsel hearing aid user regarding the use and maintenance hearing aids
- To troubleshoot common problems with the hearing aids
- To select test battery for detection of central auditory processing disorders.
- Select different types of ear moulds depending on type of hearing aid, client, degree, type and configuration of hearing loss

### Show:

- Electroacoustic measurement as per BIS standard on at least 2 hearing aids
- How to process 2 hard and 2 soft moulds
- How to preselect hearing aid depending on listening needs and audiological findings on at least 5 clinical situations (case files)
- How select test battery depending on case history and basic audiological information – 3 situations

### Do:

- Tone decay test – 2 individuals with sensori-neural hearing loss
- Strenger test – 2 individuals with unilateral/asymmetrical hearing loss
- Dichotic CV/digit, Gap detection test – 2 individuals with learning difficulty or problem in hearing in noise
- Hearing aid fitment for at least 5 individuals with mild to moderate and 3 individuals with mod-severe to profound
- Hearing aid selection with real ear measurement system on 3 individuals with hearing impairment

### Evaluation:

- Internal evaluation shall be based on attendance, clinical diary, log book and learning conference.
- External evaluation: Spot test, OSCE, Record, Viva-voce, case work

### Examination scheme:

Components	CRW	C/P/A	CT	A	Viva
Weightage (%)	15	15	15	5	50

CRW- Clinical record writing, C/P/A- Case discussion/presentation/analysis, CT- Class test, A- Attendance, Viva- Internal/External

## Syllabus - Fifth Semester

### FLUENCY AND ITS DISORDERS

**Course Code: ASL2501**

**Credit Units: 05**

**Course Objectives:** After completion of the course, the student will be able to

- understand the characteristics of fluency and its disorders
- evaluate and diagnose fluency disorders
- learn about the techniques for the management of fluency disorders

**Course Contents:**

**Module-I: Fluency**

- a) Scope and definition of fluency
- b) Factors influencing fluency
- c) Definition and characteristics of features of suprasegmentals in speech: rate of speech, intonation, rhythm, stress and pause
- d) Suprasegmental features in typical speech
- e) Suprasegmental features in the speech of persons with fluency disorders
- f) Developmental aspects of suprasegmentals of speech
- g) Normal non-fluency

**Module-II: Stuttering and other fluency disorders**

- a) Stuttering: Definition and causes for stuttering
- b) Characteristics of stuttering: core and peripheral characteristics, primary and secondary stuttering, effect of adaptation and situation
- c) Development of stuttering
- d) Normal non fluency: characteristics and differential diagnosis
- e) Theories of stuttering: organic, functional, neurogenic, diagnosogenic and learning
- f) Cluttering: Definition, causes and characteristics
- g) Neurogenic stuttering: Definition, causes and characteristics

**Module-III: Assessment and differential diagnosis**

- a) Assessment of fluency disorders: stuttering, cluttering, neurogenic stuttering and normal non fluency:
- b) Subjective methods: protocols and tests
- c) Objective methods
- d) Qualitative and quantitative assessment
- e) Differential diagnosis of fluency disorders

**Module-IV: Management of stuttering**

- a) Approaches to management
- b) Changing scenario in management of stuttering
- c) Different techniques and strategies used in management with their rationale
- d) Relapse and recovery from stuttering
- e) Issues of speech naturalness in stuttering

### Module-V: Management of fluency-related entities

- a) Management of cluttering: rationale, techniques and strategies
- b) Management of neurogenic stuttering: rationale, techniques and strategies
- c) Management of normal non-fluency: rationale, techniques and strategies
- d) Relapse and recovery in cluttering and neurogenic stuttering. Changes in normal non-fluency
- e) Prevention and early identification of stuttering, and cluttering

### Practicals

- a) Assess the rate of speech in 5 normal adults.
- b) Record and analyse the supra segmental features in typically developing children between 2 and 5 years.
- c) Record audio visual sample of 5 typically developing children and 5 adults for fluency analysis.
- d) Listen/see samples of normal non fluency and stuttering in children and document the differences.
- e) Identify the types of dysfluencies in the recorded samples of adults with stuttering.
- f) Instruct and demonstrate the following techniques: Airflow, prolongation, easy onset shadowing techniques.
- g) Record 5 speech samples with various delays in auditory feedback and analyse the differences.
- h) Administer SPI on 5 typically developing children.
- i) Administer SSI on 5 adults with normal fluency.
- j) Administer self-rating scale on 10 adults with normal fluency.

### Examination Scheme:

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# STRUCTURAL ANOMALIES AND SPEECH DISORDERS

**Course Code: ASL2507**

**Credit Units: 05**

**Course Objectives:** After completing the course, the student will be able to

- understand the characteristics of disorders with structural anomalies including speech
- evaluate and diagnose the speech characteristics seen in these disorders
- learn about the techniques for the management of speech disorders in these conditions

**Course Contents:**

## **Module-I: Speech characteristics of persons with cleft lip and palate**

- a) Types, characteristics and classification of cleft lip and palate
- b) Causes of cleft lip and palate: genetic, syndrome and others
- c) Velopharyngeal inadequacy: types, causes and classification
- d) Associated problems in persons with cleft lip and palate: speech, language, feeding, dental and occlusion, hearing, psychological

## **Module-II: Assessment and management of cleft lip and palate speech**

- a) Team of professionals in the management of persons with cleft lip and palate: their roles in diagnosis and management.
- b) Assessment of persons with cleft lip and palate for speech language functions:
- c) Subjective assessment of speech characteristics and speech intelligibility: proforma, tests, scales and others.
- d) Objective assessment of phonatory, resonatory and articulatory features
- e) Diagnosis and differential diagnosis of speech related functions
- f) Subjective assessment of language and communication functions
- g) Reporting test results using Universal Parameters
- h) Management of persons with cleft lip and palate
- i) Surgical and prosthetic management
- j) Techniques and strategies to correct speech sound disorders
- k) Techniques and strategies to improve feeding
- l) Counselling and guidance

## **Module-III: Structural anomalies of tongue and mandible - Characteristics, assessment and management**

- a) Types, classification and characteristics of structural anomalies of tongue and mandible
- b) Causes for structural anomalies of tongue and mandible
- c) Team of professionals in the management of persons with structural anomalies of tongue and mandible and their roles.
- d) Associated problems in persons with structural anomalies of tongue and mandible:
  - Speech
  - Feeding
  - Dental and occlusion
  - Psychological and others
- e) Management of persons with structural anomalies of tongue and mandible
  - Surgical and prosthetic management
  - Techniques and strategies to improve speech intelligibility
  - Techniques and strategies to improve feeding
  - Counselling and guidance for persons with glossectomy and mandibulectomy

#### **Module-IV: Characteristics & assessment of laryngectomy**

- a) Causes, symptoms and classifications of laryngeal cancers
- b) Team of professionals in the management of persons with laryngeal cancer
- c) Surgery for laryngeal cancers: types and outcome
- d) Associated problems in laryngectomy individuals
- e) Assessment of speech and communication skills of laryngectomy individuals: Pre and post-operative considerations

#### **Module-V: Management of speech and communication in laryngectomies**

- a) Esophageal speech: candidacy, types of air intake procedures, speech characteristics and its modification through techniques and strategies, complications and contraindications.
- b) Tracheo-esophageal speech: candidacy, types of TEP, fitting of prosthesis, speech characteristics and its modification through techniques and strategies, complications and contraindications.
- c) Artificial larynx: types, factors for selection, output characteristics, techniques for efficient use of artificial larynx, complications and contraindications.
- d) Other remedial procedures: Pharyngeal speech, buccal speech, ASAI speech, gastric speech.

#### **Practicals**

- a) Identify the different types of cleft lip and palate by looking at illustrations and images
- b) Listen to 10 speech samples of children with cleft lip and palate and rate their nasality/ speech (articulation and cleft type errors) based on universal reporting parameters.
- c) Identify the type of closure of velopharyngeal port for 5 normal individuals and 5 individuals with cleft lip and palate using videos of nasoendoscopy/ videofluoroscopy.
- d) Perform oral peripheral mechanism examination on 10 individuals and document the structure and functions of the articulators.
- e) Analyse the different types of occlusion in 10 individuals.
- f) Identify the type of glossectomy by looking at pictures/illustrations.
- g) Identify the different types of prosthesis in the management of head and neck cancer.
- h) Analyse the speech profile of 5 individuals with laryngectomy.
- i) Identify parts of an artificial larynx and explore its use.
- j) Prepare a checklist / pamphlet illustrating care of the stoma and T- tubes in vernacular.

#### **Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# PEDIATRIC AUDIOLOGY

**Course Code: ASL2508**

**Credit Units: 05**

**Course Objectives:** After completing this course, the student will be able to

- describe auditory development
- list etiologies and relate them to different types of auditory disorders that may arise
- explain different hearing screening/identification procedures and their application
- elaborate on different aspects of paediatric behavioral and physiological / electrophysiological evaluation

**Course Contents:**

## **Module-I: Auditory development**

- a) Review of Embryology of the ear
- b) Development of auditory system from periphery to cortex
- c) Neuroplasticity
- d) Prenatal hearing
- e) Normal auditory development from 0-2 years
- f) Infant speech perception
- g) Incidence and prevalence of auditory disorders in children

## **Module-II: Auditory disorders**

- a) Congenital and acquired hearing loss in children
- b) Permanent minimal and mild bilateral hearing loss
- c) Impact on auditory skills, speech-language, educational and socio-emotional abilities
- d) Moderate to profound sensorineural hearing loss
- e) Unilateral hearing loss
- f) Auditory Neuropathy Spectrum Disorders
- g) Central auditory processing disorders
- h) Pseudohypacusis
- i) Auditory disorders in special population and multiple handicap

## **Module-III: Early identification of hearing loss**

- a) Principles of early hearing detection and intervention programs
- b) Principles and history of hearing screening
- c) Joint Committee on Infant Hearing position statement ( 2000, 2007,2013)
- d) High risk register/ checklists for screening
- e) Sensitivity and specificity of screening tests
- f) Hearing screening in infants and toddlers: Indian and Global context
- g) Hearing screening in preschool children: Indian and Global context
- h) Hearing screening in school-age children ( including screening for CAPD): Indian and Global context

## **Module-IV: Paediatric assessment I**

- a) Behavioral observation audiometry
- b) Conditioned orientation reflex audiometry
- c) Visual reinforcement audiometry, TROCA, play audiometry
- d) Pure tone audiometry in children: Test stimuli, response requirement and reinforcement
- e) Speech audiometry (SRT, SDT); Speech recognition and speech perception tests developed in India)

- f) Bone conduction speech audiometry
- g) Immittance evaluation in paediatric population
- h) Central auditory processing disorders assessment

#### **Module-V: Paediatric assessment II**

- a) Recording and interpretation of OAE in paediatric population
- b) Factors affecting OAE in paediatric population
- c) Recording and interpretation of click evoked and tone burst evoked ABR in paediatric population
- d) Factors affecting ABR in paediatric population
- e) Recording ASSR in paediatric population
- f) Recording AMLR, ALLR in paediatric population
- g) Assessment of hearing loss in special population
- h) Diagnostic test battery for different age groups
- i) Diagnosis and differential diagnosis

#### **Practicals**

- a) Observe a child with normal hearing (0-2 years) in natural settings. Write a report on his/her responses to sound.
- b) Observe a child with hearing impairment (0-2 years) in natural settings. Write a report on his/her responses to sound with and without his amplification device
- c) Administer HRR on at least 3 newborns and interpret responses
- d) Based on the case history, reflect on the possible etiology, type and degree of hearing loss the child may have.
- e) Compare ABR wave forms in children of varying ages from birth to 24 months.
- f) Observe live or video of BOA/VRA of a child with normal hearing and hearing loss and write a report on the instrumentation, instructions, stimuli used, procedure and interpretation.
- g) Observe OAE in a child with normal hearing and a child with hearing loss. Write a report on the instrumentation, protocol used and interpretation
- h) Observe ABR in a child with normal hearing and a child with hearing loss. Write down a report on the instrumentation, protocol used and interpretation
- i) Observe immittance evaluation in a child with normal hearing and a child with hearing loss. Write a report on the instrumentation, protocol used and interpretation
- j) Using role play demonstrate how the results of audiological assessment are explained to caregiver in children with the following conditions
  - Child referred in screening and has high risk factors in his history
  - Child with chronic middle ear disease
  - Child with CAPD
  - Child with severe bilateral hearing impairment

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

**Recommended Reading**

# AURAL REHABILITATION IN CHILDREN

**Course Code: ASL2509**

**Credit Units: 05**

**Course Objectives:** After completing this course the student will be able to

- describe the different communication options available for young children with hearing impairment
- explain the impact of hearing impairment on auditory development and spoken language communication
- describe factors that effect of acoustic accessibility and strategies to manage them at home and in classroom
- design activities for auditory learning at different levels
- enumerate how the needs of individuals with hearing impairment using sign language and spoken language as form of communication in India are being met

**Course Contents:**

## **Module-I: Auditory development, spoken communication and acoustic accessibility**

- a) Sensitivity period for auditory development
- b) Impact of hearing impairment on auditory development, spoken language acquisition, parent child communication
- c) Factors affecting auditory development
- d) Hearing loss implications for speech perception: acoustics of speech
- e) Optimizing hearing potential through hearing aids
- f) Optimizing hearing potential through cochlear implants
- g) Barriers to acoustic accessibility: distance, signal to noise ratio, reverberation
- h) Managing the listening environment for infants, toddlers schools
- i) Signal to noise ratio enhancing technologies personal FM, loop systems, desktop group systems, blue tooth connectivity

## **Module-II: Communication options**

- a) Detecting and confirming hearing loss
- b) Parent support counselling, individual family service plan
- c) Choosing communication options
- d) Auditory oral approach
- e) Auditory verbal therapy
- f) Manual/sign language: Indian and Global context
- g) Cued speech and total communication
- h) Listening devices hearing aid/cochlear implant
- i) Early intervention programs

### **Module-III: Optimal listening and learning environments infancy and early childhood**

- a) Involvement of family
- b) Factors impacting family involvement, supporting families through information and education
- c) Creating optimum listening and learning environment
- d) Intervention: Assessment, auditory learning, listening and language facilitation techniques in infancy and early childhood
- e) Issues with children with mild hearing loss, unilateral hearing loss,
- f) Children with hearing loss, ANSD or APD: Children are intervened late
- g) Children with hearing loss and other special needs
- h) Listening and spoken language in school age: benefits of inclusion
- i) Intervention at school age: Functional hearing assessment, communication assessment and intervention to integrate with academic targets

### **Module-IV: Auditory - speech reading training and literacy**

- a) Candidacy for auditory training and speech reading
- b) Auditory training/learning four design principles skill, stimuli, activity, and difficulty level
- c) Early training Objectives
- d) Analytic and Synthetic training Objectives
- e) Formal and informal training
- f) Auditory training for infants and very young children
- g) Outcomes of training
- h) Speech and language and literacy characteristics
- i) Speech language and literacy evaluation assessment
- j) Speech language therapy

### **Module-V: Indian perspectives**

- a) Prevalence of hearing impairment in children
- b) Education of the deaf in India historical perspectives
- c) Available resources for education of the hearing impaired
- d) Early intervention programs and centers
- e) Schools for the hearing impaired; day schools, residential schools
- f) Beyond school: college and vocational training
- g) Training manpower resources for service delivery
- h) Indian sign language
- i) Training sign language interpreters
- j) Cued speech in India
- k) Assessment and therapy tools developed for individuals with hearing impairment in India.

### **Practicals**

- a) Watch documentaries such as “Sound and Fury” (2001). Write a reflection of why parents made communication choices for their children
- b) Follow on links to the above film that shows the status of the children with hearing impairment after a few years.
- c) Learn at least 50 signs across different categories of Indian sign language. Make a video of you signing 10 sentences. Have a class mate interpret them.
- d) Interview a parent of a child with hearing impairment on how they adapted their child to wear the hearing aids and /or implant. What were the first responses to sound they observed and how language and speech develop?
- e) Complete a functional auditory evaluation on one child with hearing loss. Do a speech and language evaluation and also write a report on the child strengths and weakness.

- f) Design and demonstrate auditory learning activities at the four levels awareness, discrimination, identification and comprehension. Ensure that the activities encompass different skill level and difficulty levels.
- g) Develop a short audio/film/pamphlet for parents in your local language on one of the following: teaching parent to trouble shooting the hearing aid/cochlear implant, establishing consistent use of listening device, activities to facilitate language across different age groups
- h) Visit a school for the deaf. Document your observation about the acoustic environment in the class, strategies used by the teacher to promote listening and spoken language

#### **Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

#### **Recommended Reading**

## CLINICALS IN SPEECH LANGUAGE PATHOLOGY-III

Course Code: ASL2510

Credit Units: 07

### General considerations:

- Exposure is primarily aimed to be linked to the theory courses covered in the semester.
- After completion of clinical postings in Speech –language diagnostics, the student will know (concepts), know how (ability to apply), show (demonstrate in a clinical diary/log book based on clinical reports/recordings, etc.), and do (perform on patients/ client contacts) the following:

### Know:

1. Procedures to assess speech fluency and its parameters using standardized tests for children and adults.
2. Differential diagnosis of motor speech disorders in children.
3. Procedures to assess individuals with cleft lip and palate, and other oro-facial structural abnormalities.
4. Procedures to assess laryngectomy and provide management options.

### Know-how:

1. To administer at least two more (in addition to earlier semesters) standard tests for childhood language disorders.
2. To record a speech sample for analysis of fluency skills (including blocks & its frequency, rate of speech, prosody, etc.).
3. To assess posture and breathing for speech in children with motor speech disorders.
4. To consult with inter-disciplinary medical/rehabilitation team and counsel the individual/family regarding management options and prognosis.

### Show:

1. Rating of cleft, speech intelligibility and nasality – minimum of 2 individuals with cleft lip and palate.
2. Language assessment - minimum of 2 individuals with cleft lip and palate.
3. Transcription of speech sample and assessment of percentage dis/dysfluency– minimum of 2 individuals with stuttering.
4. Assessment of rate of speech on various speech tasks – at least on 2 children & adults.

### Do:

1. Voice assessment report - minimum of 2 individuals with voice disorders.
2. Fluency assessment report - minimum of 2 individuals with fluency disorders.
3. Oral peripheral examination on minimum of 2 individuals with cleft lip and palate.
4. Apply speech language stimulation/therapy techniques on 5 children with language disorders/speech sound disorders/ motor speech disorders – minimum 5 sessions of therapy for each child.

### Evaluation:

- Internal evaluation shall be based on attendance, clinical diary, log book and learning conference.
- External evaluation: Spot test, OSCE, Record, Viva-voce, case work.

**Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

## CLINICALS IN AUDIOLOGY-III

**Course Code: ASL2511**

**Credit Units: 07**

### **General considerations:**

- Exposure is primarily aimed to be linked to the theory courses covered in the semester, however, not just limited to these areas.
- After completion of clinical postings in auditory diagnostics and auditory rehabilitation, the student will Know (concept), know how (ability to apply), show (demonstrate in a clinical diary/log book), and do (perform on patients/ client contacts) the following:

### **Know:**

- Different protocols in tympanometry and reflexometry.
- Different protocols used in auditory brainstem responses
- Protocols for screening and diagnostic otoacoustic emissions
- Tests to assess vestibular system
- Different indications for selecting implantable hearing devices
- Various speech stimulation and auditory training techniques

### **Know-how:**

- To administer auditory brainstem responses for the purpose of threshold estimation and site of lesion testing
- To administer high frequency tympanometry and calculate resonance frequency
- To administer high risk register
- To modify the given environment to suit the needs of hearing impairment

### **Show:**

- Analysis of ABR waveforms – threshold estimation and site of lesion
- Analysis of immittance audiometry and relating to other tests – 5 individuals with conductive and 5 individuals with sensori-neural hearing loss
- How to formulate select appropriate auditory training technique based on audiological evaluation

### **Do:**

- Threshold estimation on 5 infants (< 2 years)
- TEOAE and DPOAE on 5 infants (<2 years)
- BOA on 5 infants (<2 years)
- VRA on 2 infants (6 month – 3 year)
- Conditioned play audiometry – 3 children (3-6 years)
- Hearing aid fitment on 1 infant (< 3 years) 2 children (3-6 years)
- Listening age of 3 children with hearing impairment
- Appropriate auditory training on 5 children with hearing loss

### **Evaluation:**

- Internal evaluation shall be based on attendance, clinical diary, log book and learning conference.
- External evaluation: Spot test, OSCE, Record, Viva-voce, case work

**Examination Scheme:**

<b>Components</b>	<b>CRW</b>	<b>PTB</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

## Syllabus - Sixth Semester

### MOTOR SPEECH DISORDERS IN ADULTS

**Course Code: ASL2606**

**Credit Units: 05**

**Course Objectives:** After completing the course, the student will be able to

- understand the characteristics of acquired motor speech disorders in adults
- evaluate and diagnose speech characteristics in acquired motor speech disorders
- learn about the techniques for the management of speech and related errors in acquired motor speech disorders

**Course Contents:**

#### **Module-I: Causes & Characteristics of dysarthria**

- a) Definition, etiology and classification of acquired dysarthria
- b) General, speech and feeding related characteristics of acquired dysarthria with and without genetic underpinnings:
- c) Vascular lesions: dysarthria following stroke/CVA, cranial and peripheral nerve palsies
- d) Infectious condition of the nervous system: dysarthria following meningitis, encephalitis, polyneuritis, poliomyelitis, neurosyphilis.
- e) Traumatic lesions: Dysarthria following TBI.
- f) Toxic conditions of the nervous system: Dysarthria following exogenic and endogenic toxic conditions of the nervous system.
- g) Anoxia of the nervous system: Dysarthria following anoxic conditions
- h) Metabolic disorders affecting nervous system: Dysarthria following metabolic conditions that affect the nervous system, Wilson's disease etc.
- i) Idiopathic causes: Dysarthria following idiopathic causes
- j) Neoplastic lesions of nervous system: Dysarthria following neoplastic lesions in the nervous system
- k) Demyelinating and degenerative conditions: Huntington's Chorea, Parkinson's, Multiple Sclerosis, Motor Neuron Diseases

#### **Module-II: Assessment and diagnosis of dysarthria**

- a) Subjective assessment of dysarthria:
  - Assessment of respiratory, phonatory, resonatory, articulatory errors
  - Assessment of prosodic features
  - Assessment of speech intelligibility
  - Scales, protocols and tests used for subjective assessment of dysarthria
- b) Instrumental analysis of speech in dysarthria: Acoustic, kinematic and physiological
- c) Advantages and disadvantages of subjective and instrumental procedures in the assessment of dysarthria in adults
  - Differential diagnosis of acquired motor speech disorders in adults:
  - Dysarthria and verbal apraxia
  - Dysarthria and functional articulation disorders
  - Dysarthria and aphasia
  - Apraxia of speech and aphasia
  - Dysarthria from other allied disorders such as agnosia, alexia, agraphia etc.
  - Apraxia from other allied disorders such as agnosia, alexia, agraphia etc.
  - Assessment of feeding, swallowing and related issues in persons with dysarthria

**Module-III: Management of dysarthria**

- a) Management of acquired dysarthria
- b) General principles in the management of dysarthria
- c) Influence of medical, prosthetic and surgical procedures on the speech in persons with acquired dysarthria.
- d) Facilitative approach: vegetative, sensorimotor and reflex based.
- e) Systems approach: correction of respiratory, phonatory, resonatory, articulatory and prosodic errors.
- f) Strategies to improve speech intelligibility and speech enhancement techniques
- g) Strategies to improve feeding, swallowing behavior in persons with acquired dysarthria

**Module-IV: Assessment and management of apraxia in adults**

- a) Definition, etiology and classification of acquired apraxia
- b) Characteristics of nonverbal apraxia's in adults
- c) Characteristics of verbal apraxia's in adults
- d) Subjective assessment strategies: standard tests and scales, protocols and behavioral profiles
- e) Instrumental analysis of the speech of apraxia in adults: Acoustic, Kinematic and Physiological
- f) Management Approaches for verbal & nonverbal apraxia: principles and strategies

**Module-V: Management related issues in motor speech disorders**

- a) Team involved in the management of persons with acquired dysarthria and apraxia
- b) Issues related to maintenance and generalization of speech in dysarthria and apraxia
- c) Counselling and guidance for persons with acquired dysarthria and apraxia
- d) Augmentative and alternative strategies for persons with acquired dysarthria and apraxia

**Practicals**

- a) Identify the cranial nerves and mention its origin and insertion from a picture/ model. Demonstrate methods to assess the cranial nerves.
- b) Assess the respiratory system using speech and non-speech tasks in 10 healthy adults.
- c) Assess the phonatory system using subjective and acoustic analysis in 10 healthy adults.
- d) Looking at a video identify the clinical signs and symptoms of different neurological conditions resulting in Dysarthria.
- e) Record the speech sample of 5 normal adults and compare with the audio sample of individuals with Dysarthria.
- f) Administer Duffy's intelligibility rating scale on 5 healthy adults.
- g) Administer Frenchay's Dysarthria Assessment on 5 healthy adults.
- h) Demonstrate activities to improve the functions of speech subsystem.
- i) Identify the signs of UMN and LMN based on a video.
- j) Prepare a low tech AAC for functional communication for an individual with apraxia.

**Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# LANGUAGE DISORDERS IN ADULTS

**Course Code: ASL2607**

**Credit Units: 05**

**Course Objectives:** After completing the course, the student will be able to

- understand the characteristics of language disorders in adults
- evaluate and diagnose speech characteristics in adults with language disorders
- learn about the techniques for the management of speech and related errors in language disorders seen in adults

**Course Contents:**

## **Module-I: Neural bases of language**

- a) Correlates of language functions: Neuroanatomical Neurophysiological Neurobiological Cognitive
- b) Neurolinguistic models of language processing Connectionist models Hierarchical models Global models Process models Computational models
- c) Language process in bi/multilingualism
- d) Language processing in right hemisphere

## **Module-II: Language disorders in adults**

- a) Definition, causes and characteristics of speech, language and cognition in Aphasia: cortical and subcortical Primary progressive aphasia Traumatic brain injury Right hemisphere damage Schizophrenia Dementia
- b) Differential diagnosis of various language disorders seen in adults.

## **Module-III: Assessment and diagnosis of language disorders**

- a) Assessment of the following in aphasia, primary progressive aphasia, traumatic brain injury, right hemisphere damage, schizophrenia and dementia
- b) Linguistic behaviour including speech: scales, tests, protocols.
- c) Assessment of cognitive, social, behavioural characteristics
- d) Medical Investigation: Neuroimaging

## **Module-IV: Management of language disorders**

- a) Medical, linguistic and programmed intervention for persons with Aphasia: cortical and subcortical Primary progressive aphasia Traumatic brain injury Right hemisphere damage Schizophrenia Dementia

## **Module-V: Rehabilitation issues relating to adult language disorders**

- a) Team involved in the rehabilitation of persons with adult language disorders
- b) Factors influencing the assessment and intervention for language in the context of bilingual and multilingual influences.
- c) Factors influencing the assessment and management of language in persons who are preliterate, illiterate and literate.
- d) Assessment of quality of life
- e) Recovery patterns and prognosis in adults with language disorders
- f) Age related influence in adults with language disorders
- g) Counselling and guidance for adults with language disorders
- h) Generalization and maintenance issues in adults with language disorders
- i) Augmentative and alternative strategies for adults with language disorders

## Practicals

- a) Identify different lobes of in the brain by looking at a model/ image and label the language areas.
- b) Administer a standardized test battery on 3 normal individuals to assess language and cognition.
- c) Administer bilingual aphasia test on 3 healthy normal adults.
- d) List the language characteristics in different types of aphasia from a video.
- e) Analyse the speech, linguistic and non-linguistic features seen in Right hemisphere damaged individual from a video.
- f) In a given brain model mark the subcortical structures involved in language processing/ production.
- g) Demonstrate various facilitatory and compensatory therapy techniques in the management of aphasia.
- h) Formulate activities to assess linguistic abilities in dementia and aphasia.
- i) Counsel by a role play for a given profile of an individual with adult language disorder.
- j) Prepare a counselling checklist /guideline that can be used with the family members of an individual with aphasia and traumatic brain injury.

## Examination Scheme:

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

# AURAL REHABILITATION IN ADULTS

**Course Code: ASL2608**

**Credit Units: 05**

**Course Objectives: After completing this course, the student will be able to**

- a) describe the impact on the quality of life of adults with hearing impairment
- b) explain the principles benefits and limitations of auditory training and speech reading
- c) recognize factors that impair communication and suggest facilitative and repair strategies
- d) identify components of aural rehabilitation program for adults (planning to outcome assessment)
- e) identify strategies used with the older adult to implement a successful aural rehabilitation program
- f) administer different tools for assessment of hearing handicap, attitudes and beliefs that can impact aural rehabilitation

**Course Contents:**

## **Module-I: Aural rehabilitation**

- a) Definition
- b) Scope of aural rehabilitation in adults
- c) Prevalence of hearing loss in children (global and Indian data )
- d) Prevalence of hearing loss in adults (global and Indian data)
- e) Relationship between audiometric data, hearing difficulties and amplification considerations
- f) Limitations of audiometric data
- g) Quality of life and impact on income, education, employment;
- h) Assessing communication handicap : interviews, questionnaires
- i) Vocational rehabilitation

## **Module-II: Listening training and speech reading for adults**

- a) Listening to speech with a hearing loss
- b) Candidacy for auditory training
- c) Listening training to improve speech perception
- d) Listening training to improve music perception
- e) Benefits of auditory training
- f) Speech reading for communication
- g) Characteristics of good lip readers versus good speech readers
- h) Factors affecting speech reading
- i) Assessing vision only auditory only processing
- j) Traditional methods of speech reading training.

## **Module-III: Communication strategies**

- a) Factors that influence the reception of spoken message
- b) Facilitative communication strategies
- c) Repair strategies
- d) Repairing a communication breakdown
- e) Conversational styles
- f) Communication strategies training formal instruction, guided learning, real world practice

## **Module-IV: Aural rehabilitation for adults**

- a) Principles of aural rehabilitation in adults
- b) Psychological impact of hearing loss
- c) Support through counselling
- d) Orienting towards hearing aid use

- e) Needs assessment for non-hearing and assistive technology for adults
- f) Categories of assistive technology
- g) Aural rehabilitation programs: Individual vs group
- h) Components of aural rehabilitation program
- i) Process of aural rehabilitation :
- j) Communication under adverse listening conditions

#### **Module-V: Aural rehabilitation for older adults**

- a) Influence of aging on the older adults: quality of life and psychological perspectives
- b) Influence of aging on the older adults: quality of life and social perspectives
- c) Auditory barriers to communication
- d) Non auditory barriers to communication
- e) Barriers to aural rehabilitation
- f) Factors influencing hearing aid use by the older adult
- g) Aural rehabilitation for different populations of older adult: independent and semi-independent older adult
- h) Aural rehabilitation for different populations of older adult: dependent older adult
- i) Aural rehabilitation in an old age home
- j) Hearing aid orientation

#### **Practicals**

\*All scales and tools available in Hull R. H; Introduction to aural rehabilitation

- a) Listen to the speech recorded using hearing loss simulators (available on internet) and experience the sounds as heard by persons with different degrees of hearing loss. Write your observations on the same
- b) Simulate hearing loss by plugging ears and administer sentence tests of word recognition. Write a report on the performance
- c) Administer any three self-report questionnaires to three adults who have hearing loss and write a report of the relationship of their hearing loss to performance on the scale
- d) Administer any three self-report questionnaires to three older adults who have hearing loss and write a report of the relationship of their hearing loss to performance on the scale
- e) Administer any three self-report questionnaires to three adults who wear hearing aids and write a report of the relationship of their hearing loss to performance on the scale
- f) Administer the hearing belief questionnaire (Saunders, 2013) on an adult. Identify the positive and negative attitude and behavior that may impact the success of aural rehabilitation
- g) Design a session of aural rehab program (Objectives, activities, outcomes assessment) for adults recently fitted with cochlear implant, group of 4 older adults.
- h) Design an individualised program for an executive using a hearing aid for the first time, and an adult moving from an analog to a digital hearing aid
- i) Develop a pamphlet in your local language that would address any topic in aural rehabilitation

#### **Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

### **Recommended Reading**

# AUDIOLOGY IN PRACTICE

**Course Code: ASL2609**

**Credit Units: 05**

**Course Objectives:** After completing the course, the student will be able to

- list and describe the highlights of legislations relating to hearing impairment and other disabilities
- incorporate ethical practices in professional service delivery.
- provide information on welfare measures, policies of government when needed
- describe different strategies to create awareness of hearing impairment and programs to address them
- explain the different clinical practice settings in audiology with reference to their requirement, protocols and role and responsibility of audiologist
- describe methods to measure the impact of noise on humans and strategies to address excessive noise exposure in industries and the community.
- describe terminology, technology and methods used in tele practice, and their application in audiological service delivery

**Course Contents:**

## **Module-I: Scope, legislation and ethics in audiology**

- a) Scope of practice in audiology (National – ISHA & International body - AAA)
- b) Professional ethics (ISHA)
- c) Legislations and conventions relating to disability: need and historical aspects
- d) Classification of hearing impairment and disability certification,
- e) Rehabilitation Council of India Act (1992) and its amendments
- f) Person with Disability Act (1995)
- g) National Trust Act (1999)
- h) Right to Education (2012)
- i) Biwako Millennium framework (2003) and Salamanca Statement 1994
- j) UNCRPD
- k) Concept of barrier free access and universal design relating to individuals with hearing impairment

## **Module-II: Hearing health and strategies for prevention of hearing impairment**

- a) Epidemiology of hearing disorders
- b) ICD and ICF
- c) Levels of prevention: Primary, secondary and tertiary
- d) National programs and efforts national institutes
- e) Welfare measures by Government,
- f) Camps (planning, purpose, organizing and providing remedial measures)
- g) Public education and information (media, radio broadcasts, street plays)
- h) Hearing health and prevention programs (hearing help line, dangerous decibels, online hearing tests etc.)

## **Module-III: Audiological practice in different settings**

- a) Audiological Private practice
- b) ENT clinics
- c) Paediatric / neonatology clinic/departments
- d) Neurology departments
- e) Factories and Industry
- f) Hearing aid dispensing centre/hearing aid industry
- g) Rehabilitation centres such as DRC/CRCs

- h) Schools for the hearing impaired
- i) Cochlear implant clinics
- j) Multiple handicap habilitation centre and others

#### **Module-IV: Noise and hearing conservation in industry and community**

- a) Introduction to noise, types
- b) Sources of noise in the industry and community
- c) Effects of noise in the auditory system (outer, middle and inner ear)
- d) Temporary threshold shift, permanent threshold shift, factors increasing the risk of NIHL
- e) Non auditory effects of noise (physiological, psychological, stress, sleep, job productivity and accidents)
- f) Legislations related to noise, permissible noise exposure levels, workers compensation, OSHA standards, Indian legislations related to noise
- g) Instrumentation, measurement and procedure for measuring noise in industry
- h) Instrumentation, measurement and procedure for measuring noise in community
- i) Hearing conservation program (HCP), steps, record keeping,
- j) Ear protective devices

#### **Module-V: Scope and practice of tele audiology**

- a) Introduction to tele-health: definition, history of tele-health
- b) Terminologies-tele-health, tele medicine, tele practice
- c) Connectivity: internet, satellite, mobile data
- d) Methods of tele-practice-store and forward and real time
- e) Ethics and Regulations for tele-audiology
- f) Requirements/Technology for tele- audiology: Web based platforms, Video conferencing, infrastructure
- g) Manpower at remote end and audiologist end, training assistants for tele-audiology
- h) Audiological screening using tele-technology : new born hearing screening, school screening, community screening, counselling
- i) Diagnostic audiological services using tele-technology : video otoscopy, pure tone audiometry, speech audiometry, oto acoustic emission, tympanometry, auditory brainstem response. Intervention / aural rehabilitation using tele-technology :hearing aid counselling and troubleshooting, tinnitus, counselling, aural rehabilitation services, AVT, and counselling

#### **Practicals**

- a) Undertake the activities such as ‘Dangerous decibel’ program ([www.dangerousdecibels.org](http://www.dangerousdecibels.org))
- b) Noise measurement and attenuation measurement of ear protection devices.
- c) Sound level meter measurement in different areas (generator room, audio rooms)
- d) Speech in noise assessment for 10 subjects
- e) Visit an audiologist in different practice settings and provide a report
- f) Administer ICF protocols for patients with different disorders
- g) Explore websites of national institutes, hearing aid companied, NGOs in disability field and describe the accessibility features and information provided
- h) Remote control a PC based audiology equipment connected to internet using any authorized desktop sharing software
- i) Develop one pamphlet/poster/ in local language that would address some aspect of audiology practice
- j) Perform Accessibility ability of your institute/center and prepare a report

**Examination Scheme:**

Components	CRW	PTB	CT	A	EE
Weightage (%)	5	5	15	5	70

CRW- Clinical record writing, PTB- Proficiency in using test batteries, CT- Class test, A- Attendance, EE- End semester examination

## CLINICALS IN SPEECH-LANGUAGE PATHOLOGY-IV

**Course Code: ASL2610**

**Credit Units: 07**

### **General considerations:**

- Exposure is primarily aimed to be linked to the theory courses covered in the semester.
- After completion of clinical postings in Speech–language diagnostics, the student will know (concepts), know how (ability to apply), show (demonstrate in a clinical diary/log book based on clinical reports/recordings, etc.), and do (perform on patients/ client contacts) the following:

### **Know:**

1. Procedures to assess motor speech disorders in adults.
2. Differential diagnosis of motor speech disorders in adults.
3. Procedures to assess individuals with adult language disorders, and other related abnormalities.

### **Know-how:**

1. To administer at least two standard tests for adult language disorders.
2. To administer at least two standard tests/protocols for motor speech disorders in adults.
3. To record a sample for analysis of language and speech skills in adults with neuro-communication disorders.
4. To assess posture, breathing, speech and swallowing in adults with motor speech disorders.
5. To consult with inter-disciplinary medical/rehabilitation team and counsel the individual/family regarding management options and prognosis.

### **Show:**

1. Language assessment - minimum of 2 individuals after stroke.
2. Associated problems in individuals after stroke and its evaluation.
3. Dysphagia assessment – minimum of 2 children & adults.
4. Goals and activities for therapy (including AAC) based on assessment/test results for adults with neuro-communication disorders.

### **Do:**

1. Voice therapy - Minimum of 2 individuals with voice disorders.
2. Fluency therapy - Minimum of 2 individuals with fluency disorders.
3. Bed side evaluation of individuals with neuro-communication disorders – Minimum of 2 individuals.
4. Apply speech language stimulation/therapy techniques on 5 children with language disorders/speech sound disorders/ motor speech disorders – minimum 5 sessions of therapy for each child.

### **Evaluation:**

- Internal evaluation shall be based on attendance, clinical diary, log book and learning conference.
- External evaluation: Spot test, OSCE, Record, Viva-voce, case work

### **Examination scheme:**

Components	CRW	C/P/A	CT	A	Viva
Weightage (%)	15	15	15	5	50

CRW- Clinical record writing, C/P/A- Case discussion/presentation/analysis, CT- Class test, A- Attendance, Viva- Internal/External

## CLINICALS IN AUDIOLOGY-IV

**Course Code: ASL2611**

**Credit Units: 07**

### **General considerations:**

- Exposure is primarily aimed to be linked to the theory courses covered in the semester, however, not just limited to these areas.
- After completion of clinical postings in auditory diagnostics and auditory rehabilitation, the student will Know (concept), know how (ability to apply), show (demonstrate in a clinical diary/log book), and do (perform on patients/ client contacts) the following:

### **Know:**

1. National and international standards related to noise exposure.
2. Recommend appropriate treatment options such as speech reading, AVT, combined approaches etc.

### **Know-how:**

1. To carryout noise survey in Industry and community
2. To carryout mapping of cochlear implant in infants and children using both objective and subjective procedures
3. To trouble shoot cochlear implant

### **Show:**

1. Analysis of objective responses like compound action potential, stapedial reflexes on at least 3 samples
2. Comprehensive hearing conservation program for at least 1 situation

### **Do:**

1. AVT on at least 1 child with hearing impairment
2. Trouble shooting and fine tuning of hearing aids on at least 5 geriatric clients
3. At least one activity for different stages involved in auditory training

### **Evaluation:**

- Internal evaluation shall be based on attendance, clinical diary, log book and learning conference.
- External evaluation: Spot test, OSCE, Record, Viva-voce, case work

### **Examination scheme:**

<b>Components</b>	<b>CRW</b>	<b>C/P/A</b>	<b>CT</b>	<b>A</b>	<b>Viva</b>
<b>Weightage (%)</b>	15	15	15	5	50

CRW- Clinical record writing, C/P/A- Case discussion/presentation/analysis, CT- Class test, A- Attendance, Viva- Internal/External

## Syllabus - Seventh Semester

### CLINICALS IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY-I

Course Code: ASL2701

Credit Units: 24

#### CLINICALS IN SPEECH LANGUAGE PATHOLOGY

**General:** Clinical internship aims to provide clinical exposure and experience in different set ups. The students would not only carry out greater quantum of work, but also work varied clinical populations and in different contexts. Internship will provide greater opportunity for the students to liaise with professionals from allied fields. The intern is expected to demonstrate competence and independence in carrying out the following, among others:

- 1) Diagnosis and management of speech, language, and swallowing disorders across life span.
- 2) Report evaluation findings, counsel and make appropriate referrals.
- 3) Plan and execute intervention and rehabilitation programs for persons with speech language, communication, and swallowing disorders
- 4) Develop and maintain records related to persons with speech-language, communication, and swallowing disorders

#### CLINICALS IN AUDIOLOGY

**General:** Clinical internship aims to provide clinical exposure and experience in different set ups. The students would not only carry out greater quantum of work, but also work varied clinical populations and in different contexts. Internship will provide greater opportunity for the students to liaise with professionals from allied fields. The intern is expected to demonstrate competence and independence in carrying out the following, among others:

- 1) Diagnosis and management of hearing disorders across life span.
- 2) Report evaluation findings, counsel and make appropriate referrals.
- 3) Plan and execute intervention and rehabilitation programs for persons with hearing disorders
- 4) Develop and maintain records related to persons with hearing disorders
- 5) Engage in community related services such as camps, awareness programs specifically, and community based rehabilitation activities, in general.

**Examination Scheme:** Based on performance in clinical practicum.

Components	DR	LP/TP	AT	CL
Weightage (%)	30	30	20	20

DR-Daily Report, LP/TP-Lesson Plan/Therapy Plan, AT-Attendance, CL-Case Load

## Syllabus - Eighth Semester

### CLINICALS IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY-II

Course Code: ASL2801

Credit Units: 24

#### CLINICALS IN SPEECH LANGUAGE PATHOLOGY

**General:** Clinical internship aims to provide clinical exposure and experience in different set ups. The students would not only carry out greater quantum of work, but also work varied clinical populations and in different contexts. Internship will provide greater opportunity for the students to liaise with professionals from allied fields. The intern is expected to demonstrate competence and independence in carrying out the following, among others:

- 1) Engage in community related services such as camps, awareness programs specifically, and community based rehabilitation activities, in general.
- 2) Make appropriate referrals and liaise with professionals from related fields.
- 3) Gain experience in different set ups and be able to establish speech centres in different set-ups
- 4) Demonstrate that the objectives of the B.ASLP program have been achieved.
- 5) Advise on the welfare measures available for their clinical clientele and their families.
- 6) Advise and fit appropriate aids and devices for their clinical population.

#### CLINICALS IN AUDIOLOGY

- 1) Make appropriate referrals and liaise with professionals from related fields.
- 2) Gain experience in different set ups and be able to establish hearing centres in different set-ups
- 3) Demonstrate that the objectives of the B.ASLP program have been achieved.
- 4) Advise on the welfare measures available for their clinical clientele and their families.
- 5) Advise and fit appropriate aids and devices for their clinical population.

**Examination Scheme:** Based on performance in clinical practicum.

Components	DR	LP/TP	AT	CL
Weightage (%)	30	30	20	20

DR-Daily Report, LP/TP-Lesson Plan/Therapy Plan, AT-Attendance, CL-Case Load

**GURUGRAM**

# Syllabus - First Semester

## GENERAL ANATOMY

**Course Code: OPT2101**

**Credit Units: 03**

**Course Objective:** At the end of the course, the student should be able to:

- Comprehend the normal disposition, inter-relationships, gross, functional and applied anatomy of various structures in the human body.
- Identify the microscopic structures of various tissues, and organs in the human body and correlate the structure with the functions.
- Comprehend the basic structure and connections between the various parts of the central nervous system so as to analyse the integrative and regulative functions on the organs and systems.

### **Course Contents:**

#### **Module-I: Introduction to Anatomical terms organization of the of the human body**

Human cell-structure, Tissue- Definition, Types, Characteristics, classification, location, functions and formation, Membranes & glands- classification & structure, Alterations in disease conditions

#### **Module-II: The Skeletal and the Muscular System**

Bones-Types, structure, blood supply and growth, ossification, Axial skeleton, Appendicular skeleton, Bones formation and growth ,Description of bones, Joints-Classification, structure ,Types and Structure of muscles ,Muscle groups and movement and alternations in disease conditions

#### **Module-III: The Nervous System and Sensory Organs**

Structure of Neuroglia and Neuron ,Somatic Nervous System, Structure of Brain, spinal chord, cranial nerves, peripheral nerves ,Autonomic Nervous System-Structure, Location ,Alternation in disease conditions ,The Structure of skin, eye, ear, nose tongue(Auditory and Olfactory apparatus ) Structure of Auditory apparatus and Alternations in disease condition

#### **Module-IV: The Circulatory, Respiratory and Digestive System**

Blood Microscopic structure, composition, blood group, blood coagulation, Heart Structure of Blood Vessels ,Arterial, & venous System ,Lymphatic Channels. Structure organs of respiration, Muscles of respiration Intercostals& Diaphragm, Structure and accessory organs of alimentary tract, Structure of liver and pancreas and alteration in disease condition

#### **Module-V: The Excretory, Endocrine and Reproductive System**

Structure of organs of urinary, Structure of the Skin, Structure of ovaries, testes, thyroid, Parathyroid, Thymus, pancreas, supra renal and pituitary gland, Structure of Reproductive system  
Record file of human anatomy various organs [as per curriculum] to be submitted for exam.

### **Examination Scheme:**

Components	CT	HA	R	V	A	EE
Weightage (%)	10	5	5	5	5	70

(R: Record file; HA - Home Assignment, V-Viva; CT-Class Test; A- Attendance; EE-End Semester Examination)

# GENERAL PHYSIOLOGY

**Course Code: OPT2102**

**Credit Units: 03**

**Course Objectives:** At the end of the course the student will be able to:

- Explain the normal functioning of various organ systems of the body and their interactions.
- Elucidate the physiological aspects of normal growth and development.
- Describe the physiological response and adaptations to environmental stresses.
- Know the physiological principles underlying pathogenesis of disease.

**Course Contents:**

## **Module-I: Cell Physiology**

Tissue formation, repair, Membranes and glands-functions.

## **Module-II: Skeletal System, Muscular System and Nervous System**

Bones-Functions and movements of bones of axial and appendicular skeleton, Joints and joint movements, Muscle movements, Muscle tone, physiology of muscle contraction, level and maintenance of posture, Functions of Neuronalgia and neurons, Stimulus & nerve-impulse-definitions and mechanism, Functions of brain, spinal cord, cranial and spinal, Cerebrospinal fluid-Composition, circulation and function, Reflex action and reflexes, Autonomic functions-autonomic learning and biofeedback, Pain: somatic, visceral and referred pains.

## **Module-III: Circulatory System, Respiratory System, Digestive System & Excretory System**

Blood formation, composition, blood groups, blood coagulation, Hemoglobin: Structure, Synthesis and breakdown, Variation of molecules, Functions of Heart Conduction, Cardiac cycle, circulation-Principles, Control factors influencing Blood pressure and Pulse, Functions of respiratory organs Physiology of respiration, Pulmonary ventilation, Volume, Mechanics of respiration Gaseous exchange in lungs, Carriage of oxygen and carbon-dioxide, Regulation of respiration, Functions of organs of digestive tract, Movement of alimentary tract, Digestion, Absorption of food, Function of liver, gall bladder and pancreas, Metabolism of carbohydrates, protein and fat, Functions of kidneys, ureters, urinary bladder and urethra, Composition of urine, Mechanism of urine formation, Function of skin, Regulation of body temperature, Fluid and electrolyte balance

**Module-IV:** Sensory Organs, Endocrine system, Reproductive System & Lymphatic and Immunological System, Functions of skin, eye, ear, nose tongue, Functions of Pituitary, pineal body, thymus, Thyroid, parathyroid, pancreas, Suprarenal, Placenta, ovaries and Testes, Reproduction of cells-DNA, Mitosis, Meiosis, spermatogenesis, oogenesis, Function of female reproductive organs; functions of breast, female sexual cycle, Introduction to embryology, Function of male reproductive organs, Male fertility system, Chromosomes-sex-determination, Nature of inheritance, Chromosomal aberrations, Mutation, Genetic counseling, Circulation of lymph, Immunity, Formation of T cells and B cells, Types of immune response, Antigens, Cytokines, Antibodies

Practical: demonstration / observation

Blood tests, test salivary digestion, examination of Urine, Clinical examination of respiratory system, Measurement of blood pressure and pulse rate

**Examination Scheme:**

Components	CT	HA	P	A	EE
Weightage (%)	10	5	10	5	70

(CT-Class Test; HA - Home Assignment, P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:****Text books:**

# BASIC BIOCHEMISTRY-I

**Course Code: OPT2103**

**Credit Units: 03**

**Course Objectives:** At the end of the course, the student should be able to: demonstrate his

Knowledge and understanding on:

- Structure, function and interrelationship of biomolecules and consequences of deviation from normal.
- Integration of the various aspects of metabolism, and their regulatory pathways.
- Principles of various conventional and specialized laboratory investigations and instrumentation, analysis and interpretation of a given data.

**Course Contents:**

**Module-I: Carbohydrates:**

Glucose; fructose; galactose; lactose; sucrose; starch and glycogen (properties and tests, Structure and function)

**Module-II: Proteins:**

Amino acids, peptides, and proteins (general properties & tests with a few examples like glycine, tryptophan, glutathione, albumin, hemoglobin, collagen)

**Module-III: Lipids:**

Fatty acids, saturated and unsaturated, cholesterol and triacylglycerol, phospholipids and plasma membrane

**Module-IV: Vitamins:**

General with emphasis on A, B2, C, E and inositol (requirements, assimilation and properties)

**Module-V: Minerals:**

Na, K, Ca, P, Fe, Cu and Se. (requirements, availability and properties)

**Practical:**

Estimation of blood and urine sugar, Reactions of monosaccharides, disaccharides and starch:

Glucose, Fructose, Galactose, Maltose, lactose, Sucrose, Starch, Bio fluid of choice – blood, plasma, serum, Glucose, Protein, Urea, Creatinine, Bilirubin

**Examination Scheme:**

Components	CT	HA	P	A	EE
Weightage (%)	10	5	10	5	70

(CT-Class Test; HA - Home Assignment-,P-Practical; A- Attendance; EE-End Semester Examination)

# PHYSICAL OPTICS

**Course Code: OPT2104**

**Credit Units: 03**

**Course Objectives:** The objective of this course is to equip the students with a thorough knowledge of properties of light. At the end of this course, students will be able to predict the distribution of light under various conditions.

## **Course Contents:**

### **Module-I: Nature of light**

Light as electromagnetic oscillation – wave equation, Sources of light; Electromagnetic Spectrum, Polarized light; Intensity of polarized light; Malus' Law; polarizers and analyzers.

### **Module-II: Birefringence; ordinary and extraordinary rays.**

Relationship between amplitude and intensity, Coherence; interference; constructive interference, destructive interference; fringes; fringe width, Double slits, multiple slits, gratings, Diffraction; diffraction by a circular aperture;

### **Module-III: Resolution of an instrument**

Raleigh's criterion, Scattering; Raleigh's scattering; Tyndall effect, Fluorescence and Phosphorescence

### **Module-IV: Basics of Lasers**

Coherence; population inversion; spontaneous emission; Einstein's theory of lasers.

### **Module-V: Radiometry**

radiometric units; photopic and scotopic luminous efficiency and efficacy curves; photometric units, Inverse square law of photometry; Lambert's law, other units of light measurement; retinal illumination; Trolands

### **Practicals:**

Determination of wavelengths of light from Mercury vapour lamp, Measurement of the resolving power of telescopes;; Demonstration of fluorescence and phosphorescence using crystals and paints.

### **Examination Scheme:**

Components	CT	HA	P	A	EE
Weightage (%)	10	5	10	5	70

(CT-Class Test; HA - Home Assignment-,P-Practical; A- Attendance; EE-End Semester Examination)

### **Text & References:**

- Text Book:Subrahmanyam N, Brij Lal, A text book of Optics, S. Chand Co Ltd, New Delhi, India, 2003.

### **Reference Books:**

- Pedrotti L. S, Pedrotti Sr. F. L, Optics and Vision, Prentice Hall, New Jersey, USA, 1998.
- Keating NM. P, Geometric, Physical and Visual Optics, Butterworth- Heinemann, Massachusetts, USA, 2002.

# GEOMETRICAL OPTICS-I

**Course Code: OPT2105**

**Credit Units: 03**

**Course Objectives:** The objective of this course is to equip the students with a thorough knowledge of mirrors and lenses. At the end of this course, students will be able to predict the basic properties of the images formed on the retina by the optics of the eye.

## **Course Contents:**

### **Module-I: Nature of light**

Light as electromagnetic oscillation; ideas of sinusoidal oscillations; amplitude and phase; speed of light in vacuum and other media; refractive index; Wavefronts – spherical, elliptical and plane; Curvature and vergence; rays; convergence and divergence in terms of rays and vergence; vergence at a distance; Refractive index; its dependence on wavelength

### **Module-II: Mirrors**

Fermat's and Huygen's Principle – Derivation of laws of reflection and refraction (Snell's law) from these principles; Plane mirrors – height of the mirror; rotation of the mirror; Reflection by a spherical mirror – paraxial approximation; sign convention; derivation of vergence equation; Imaging by concave mirror & convex mirror; Reflectivity; transmittivity; Snell's Law; refraction at a plane surface; Glass slab; displacement without deviation; displacement without dispersion.

### **Module-III: Refraction**

Thick prisms; angle of prism; deviation produced by a prism; refractive index of the prism; angular dispersion; dispersive power; Abbe's number, definition of crown and flint glasses; materials of high refractive index; Thin prism – definition; definition of Prism diopter; deviation produced by a thin prism; its dependence on refractive index; Refraction by a spherical surface; sign convention; introduction to spherical aberration using image formed by a spherical surface of a distance object; sag formula; Paraxial approximation; derivation of vergence equation; Imaging by a positive powered surface; Imaging by a negative powered surface.

### **Module-IV: Effectivity**

Vergence at a distance formula; effectivity of a refracting surface; Definition of a lens as a combination of two surfaces; different types of lens shapes; Image formation by a lens by application of vergence at a distance formula; definitions of front and back vertex powers; equivalent power; first and second principal planes/points; primary and secondary focal planes/points; primary and secondary focal lengths; Newton's formula; linear magnification; angular magnification; Nodal Planes.

### **Module-V: Lenses**

Thin lens as a special case of thick lens; review of sign convention; Imaging by a thin convex lens; image properties (real/virtual; erect/inverted; magnified/minified) for various object positions; Imaging by a thin concave lens; image properties (real/virtual; erect/inverted; magnified/minified) for various object positions; Prentice's Rule; System of two thin lenses; review of front and back vertex powers and equivalent power, review of six cardinal points; System of more than two thin lenses; calculation of equivalent power using magnification formula

### **Practical:**

Thick Prism – determination of prism angle and dispersive power; calculation of the refractive index; Thin Prism – measurement of deviation; calculation of the prism diopter; Image formation by spherical mirrors; Convex lens - power determination using lens gauge, power determination using distant object

method; power determination using the vergence formula; Concave lens – in combination with a convex lens – power determination; Construction of a tabletop telescope – all three types of telescopes; Construction of a tabletop microscope.

**Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	10	5	70

(CT-Class Test ; HA - Home Assignment-,P-Practical; A- Attendance; EE-End Semester Examination)

## OPTOMETRIC PROCEDURES-I

**Course Code: OPT2106**

**Credit Units: 01**

**Course Objectives:** At the end of the course the students will be equipped with the introduction to certain concepts that would lay the foundation of the program

### **Course Content:**

#### **Module-I: Introduction to Optometry**

Introduction to structure of eye.

Torch examination

#### **Module-II: Scope of optometry**

History of Optometry

Visit to Hospital / clinics

Introduction to various eye examination procedures

#### **Module-III:**

Visual Acuity

Refractive errors

Spectacle lenses and types

#### **Module-IV:**

History Taking;

Basic Eye Examination

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>HA</b>	<b>V</b>	<b>EE</b>
<b>Weightage (%)</b>	5	20	25	20	30

(CT-Class Test ; V-Viva; P-Practical; A- Attendance; EE-End Semester Examination, HA= assignments )

### **Reference Book:**

- Primary Care Optometry: Theodore Grosvenor, Theodore P. Grosvenor; Elsevier Health Sciences
- BHVI: Module I.
- Teachers reference notes

## BASICS IN COMPUTER & PC PACKAGE

**Course Code: OPT2107**

**Credit Units: 02**

**Course objective:** This course aims at preparing the students to handle personal computers, Learn Basics of the current hardware and software being used .the student should be able to complete his optometry and other professional assignment like project work ,thesis presentation etc. he should be well versed in using e-mail, and internet .

### **Course Contents:**

#### **Module-I: Computer Basics**

History of computers, Definition of computers, Input Devices, storage devices, types of memory, and units of measurement, range of computers, generations of computers. Characteristics of computers.

#### **Module-II: System**

Hardware, Software,, system definition, fundamentals of networking, internet, performing searches and working with search engines ,types of software and its applications

#### **Module-III: Office Application Suite**

Word Processor, spread sheet, presentations, other utility tools Fundamentals of Linux /windows operating system, functions, interfaces, basic commands.

#### **Module-IV: Special Applications**

Use of database software for clinic records

Use of specialised software for optometric use

#### **Practical:**

Various browsers, Search engines, E-mail

Text document with multiple formatting option using specific office package

Spread sheet using a specified office package

Presentation on a specified topic using a specified office package

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>(CT)</b>	<b>VIVA</b>	<b>PRACTICAL</b>
<b>Weightage (%)</b>	20	20	20	20	20

(CT-Class Test; V-Viva; HA - Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

# MATHEMATICS AND BIOSTATISTICS

**Course Code: OPT2108**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to provide students with an understanding of basic concepts of Statistics and Probability Theory in the Medical and Health Sciences.

## **Course Contents:**

### **Module I: Statistical Method**

Collection, classification and tabulation of Data, Bar Diagrams and pi diagrams, Histogram, Frequency curve and Frequency Polygon, mean, median, mode, standard deviation.

### **Module II: Correlation and Regression analysis**

Relation between two variables, Scatter diagram, definition of correlations, curve fitting, principles of least squares, Two regression lines, Karl Pearson's coefficient of correlation, Rank correlation, tied ranks.

### **Module III: Probability Theory:**

Random experiments, Sample space, Probability, conditional probability, Baye's theorem, Random variable, (discrete and continuous), Probability Distribution function (for continuous and random variable) Probability density function, cumulative probability function, Mathematical expectation, Variance.

## **Examination Scheme:**

<b>Components</b>	<b>CD</b>	<b>CT1</b>	<b>SA</b>	<b>A</b>	<b>EE</b>
<b>Weightage</b>	<b>5</b>	<b>10</b>	<b>10</b>	<b>5</b>	<b>70</b>

(CD= Class Discussion, CT 1= Class Test, SA= Short Assignments, A= Attendance. EE= External Examination)

# Syllabus - Second Semester

## BASIC BIOCHEMISTRY-II

**Course Code: OPT2201**

**Credit Units: 03**

**Course Objectives:**

- At the end of the course, the student should be able to: demonstrate his knowledge and understanding on:
- Integration of the various aspects of metabolism, and their regulatory pathways.
- Understand metabolic processes taking place in different ocular structures and fluids
- Principles of various conventional and specialized laboratory investigations and instrumentation, analysis and interpretation of a given data.

**Course Contents:**

**Module-I: Clinical Biochemistry**

Hormones and their receptors basic concepts in metabolic regulation with examples, insulin, glucagons and thyroxin. Blood sugar, urea, creatinine and Bilirubin, cholesterol etc and significance of their estimation.

**Module-II: Ocular Biochemistry**

Various aspects of the eye, viz. tears, cornea, lens, aqueous, vitreous, retina and pigment epithelium rhodopsin

**Module-III**

Quantitative exercises: Abnormal constituents in urine, sugar, proteins, ketones, blood and bile salts; Techniques: Electrophoresis, Chromatography, Preparation of - normal, molar and percentage solutions, buffers, PH determination; Demonstration: Laboratory test for Lipids, amino acid & protein, vitamins minerals, Antigens; Estimation of blood cholesterol, estimation of alkaline phosphate, salivary amylase (effect of PH, etc.)

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test;HA - Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:**

- D R Whitehart: Biochemistry of the Eye, 2nd edition, Butterworth Heinemann, Pennsylvania,2003]

# OCULAR ANATOMY

**Course Code: OPT2202**

**Credit Units: 03**

## **Course Objectives:**

At the end of the course, the student should be able to:

- Comprehend the normal disposition, inter-relationships, gross, functional and applied anatomy of various structures in the eye and adnexa.
- Identify the microscopic structures of various tissues in the eye and correlate the structure with the functions.
- Comprehend the basic structure and connections between the various parts of the central nervous system and the eye so as to understand the neural connections and distribution.
- To understand the basic principles of ocular embryology.

## **Course Contents:**

### **Module-I:**

Ocular Embryology

Orbit

Orbital Blood supply

Ocular Adnexa and Lacrimal system

Eye Lids

Extraocular Muscles

### **Module-II:**

Conjunctiva

Cornea

Aqueous, anterior chamber, Angle structures

Uvea – Iris, ciliary body & Choroid

Crystalline lens

### **Module-III:**

Vitreous

Retina

Sclera (episclera & sclera)

Optic Nerve

Visual Pathway

### **Module-IV**

Detailed anatomy, cellular structure, vasculature, nerve supply for all the above coats, pupils, nerve supply for Pupillary actions, Pupillary pathway.

Cranial Nerves : Detailed study of each of the following nerves in terms of their nuclei, course, relationship within brain, effects of compression etc at different regions

Optic nerve

Oculomotor nerve

Trochlear nerve

Trigeminal nerve

Abducent nerve

Facial nerve

**Practical:** Eye dissection of bull's eye

Demonstration / identification of various ocular structures

Practical file of various ocular structures to be prepared by student

**Examination Scheme:**

Components	A	HA	CT	R	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA - Home Assignment; R- Record File; A- Attendance; EE-End Semester Examination)

**Text & References:**

**Text Book:**

- L A Remington: Clinical Anatomy of the Visual System, Second edition, Elsevier Butterworth Heinemann, Missouri, USA, 2005.

# OCULAR PHYSIOLOGY

**Course Code: OPT2203**

**Credit Units: 04**

**Course Objectives:** At the end of the course the student will be able to:

- Explain the normal functioning of all the structures of the eye and their interactions.
- Elucidate the physiological aspects of normal growth and development of the eye.
- Understand the phenomenon of vision.
- List the physiological principles underlying pathogenesis and treatment of disease of the eye.

**Course Contents:**

**Module-I:**

Protective mechanisms in the eye

Precorneal tear film, eyelids and lacrimation

**Module-II:**

Extrinsic Ocular muscles, their actions and control of their movements

Saccadic, smooth pursuit and Nystagmic eye movements

**Module-III:**

Corneal Physiology

Physiology of Aqueous humor and vitreous: Intra ocular pressure

Physiology of Iris and pupil

Physiology of Crystalline lens and accommodation – presbyopia

**Module-IV:**

Retina – structure and functions, dark and Light Adaptations, Visual cycle

Visual pathway, central and cerebral connections, lesions of pathway and effects

**Module-V:**

Pigments of the eye and photochemistry, electrophysiology

The visual stimulus, refractive errors

Visual acuity, vernier acuity and principle of measurement

Visual perception – Binocular vision, stereoscopic vision, optical illusions

Contrast visual acuity

Colour vision and colour defects. Theories and diagnostic tests

**Module-VI**

Eye movements

Tests for lachrymal secretion (Schirmer's)

Pupillary reflexes

Schiotz tonometry

Measurement of accommodation

Visual acuity measurement

Ophthalmoscopy and retinoscopy- Procedure demo

Light and dark adaptation

Binocular vision Grades assessment

Colour vision assessment

Contrast visual acuity

Electrophysiology

**Examination Scheme:**

Components	A	HA	CT	P+R	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA - Home Assignment; P+R-Practical & Record File; A- Attendance; EE-End Semester Examination)

**Text & References:****Text book:**

# GEOMETRICAL OPTICS-II

**Course Code: OPT2204**

**Credit Units: 04**

**Course Objectives:** The objective of this course is to equip the students with a thorough knowledge of mirrors and lenses used in spectacle lenses. At the end of this course, students will be able to predict the basic properties of the images formed on the retina by the optics of the eye.

## **Course Contents:**

### **Module-I: Cylindrical Lenses**

Image formation; relation between cylinder axis and line image orientation; Imaging due to two cylinders in contact with axes parallel; Two cylinders in contact with axes perpendicular; line images and their orientations to the cylinders' powers; interval of Sturm; circle of least confusion (CLC); spherical equivalent; position of CLC; Spherical lens and a cylindrical lens in contact; spherical equivalent; interval of Sturm and CLC; Spherocylindrical lens notations – plus/minus cylinder form, cross cylinder/meridian form; transformations between them; depth of focus; depth of field;

### **Module-II: Aberrations**

Chromatic Aberrations; methods of removing chromatic aberrations; Abbe number; Monochromatic Aberrations – deviation from paraxial approximation; difference between ray aberrations and wavefront aberrations; Third order aberrations – spherical aberrations; coma; astigmatism; distortion and curvature of fields; Ways of minimizing spherical aberrations – pupil size, bending of lens, shape factor; Lens tilt – astigmatism; Higher order aberrations; introduction to Zernike Polynomials

### **Module-III: Telescopes & Microscopes**

Telescopes – Keplerian, Galilean and Newtonian; position of cardinal points, entrance and exit pupils; magnifications; advantages and disadvantages; Microscopes – magnification; tube length.

### **Module-IV: Gullstrand's Schematic Eye (GSE)**

Calculation of the power of the cornea, the lens and the eye; axial length; calculation of the position of the cardinal points; magnification; Purkinje images and their reflectances; Entrance and exit pupils for a 3mm pupil; ocular aberrations – spherical aberrations and coma; chromatic aberrations; Introduction to refractive errors - myopia and hyperopia; corneal curvature; axial length; far point; blur size calculations; corrections; astigmatism; blur size; circle of least confusion; correction; Object closer than at infinity; introduction to accommodation; far point; near point; presbyopia; spectacle and contact Lens corrections - comparison of magnification.

### **Practical- Demonstration:**

Imaging by a cylindrical lens – relationship between cylinder axis and image orientation; Imaging by two cylinders in contact – determination of the position of CLC; verification of CLC using a spherical lens with power equal to the spherical equivalent; orientations and position of the line images and their relation to the cylinders' powers and orientations; Imaging by a spherocylindrical lens – sphere and cylinder in contact – determination of the position of CLC; verification of CLC using a spherical lens with power equal to the spherical equivalent; orientations and position of the line images and their relation to the cylinder's power and orientation

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA - Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:****Text book:**

## OPTOMETRIC PROCEDURES-II

**Course Code: OPT2205**

**Credit Units: 02**

**Course Objectives:** At the end of the course the students will be equipped with the basics knowledge about certain concepts, which would lay the foundation for their courses in the next semester

### **Course Content:**

#### **Module-I: Objective refraction**

Principles of Retinoscopy, instrumentation brief and purpose; Retinoscopy demonstration and practical on model eyes.

#### **Module-II: Examination of the anterior segment**

Pupillary reflex test; Anterior segment examination with torch light – Slit lamp examination – demo, Tonometry.

#### **Module-III: Examination of the posterior segment**

Fundus demonstration by ophthalmoscopy, direct & indirect

#### **Module-IV: Adjunct tests**

Near point of convergence; cover test; Motilities; Visual field testing; Colour vision; IPD; Stereopsis; Contrast visual acuity

### **Examination Scheme:**

Components	A	CT	PL	V	P	EE
Weightage	5	15	20	20	10	30

(CT-Class Test; A- Attendance; PL- Practical Lab Record; V- Viva; P- Performance; EE-End Semester Examination)

### **Text & References:**

#### **Text book:**

- Grosvenor, Primary Care Optometry , Butterworth-Heinemann,

#### **Reference Books:**

## CLINICS-I

**Course Code: OPT2206**

**Credit Units: 01**

**Course Objective:** This course aims to give student the basic knowledge of the theory and practical behind the basic clinical procedures. After completion, of course the student should have standard eye examination. Learn to write formal records and understand the preliminary eye testing

**Course Content:**

The practical will involve rotation in campus clinics, observation in eye hospitals and screening camps.

Unit of Competency:

**Methods of ocular Examination-I**

The ability to communicate effectively with a diverse group of patients with arrange of optometric conditions and needs.

The ability to use techniques in ocular examination and to understand the implication of findings in terms of subsequent examination techniques

History taking of an Ophthalmic care

Visual acuity testing – Distance, Near

Basic of eye examination

History Taking

Visual Acuity Estimation

Torch light Examination

Pupil Examination

Near point of accommodation

Near point of convergence

Extra ocular Motility and cover/ uncover test

Tear function test

Slit lamp examination – Demo

Retinoscopy procedure on model eyes

IPD

90 % attendance is compulsory in clinics .In case of any miss out the student will have to complete the clinical hours to be allowed for the end term exam

**Examination Scheme:**

Components	Attd.	Record File	Multiple Choice Questions/ Quiz	Viva	Practical	Total
Weightage	5	15	15	15	50	100

**Text & References**

**Reference book:**

- Grosvenor, Primary Care Optometry , Butterworth-Heinemann,

# NUTRITION

**Course Code: OPT2207**

**Credit Units: 03**

**Course Objective:** At the end of the course student would have gained the knowledge of the following: Balanced diet. Protein, carbohydrates, vitamins, Minerals, carotenoids and eye, Nutrition and Ocular aging and adverse effects of ocular nutritional supplements.

## **Course Contents:**

### **Module-I:**

Introduction to Nutrition and Food Science, Food Groups and Food Pyramid; Balanced diet for different age groups, recommended dietary Allowances

### **Module-II:**

Assessment of Nutritional Status; Energy – Units, Metabolisms, Energy expenditure, and Energy imbalance; Digestion, absorption and transport of Food

### **Module-III:**

Proteins and eye; Lipids and eye; Carbohydrates and eye; Vitamins and eye; Minerals and trace elements and eye; Carotenoids and eye; Oxidative stress and the eye

### **Module-IV:**

Vitamin A, C and E deficiency; Nutrition and ocular aging; Contraindications, Adverse reactions and ocular nutritional supplements  
Ocular complications to nutritional deficiencies

## **Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA - Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

## **Text & References:**

### **Text books:**

- M Swaminathan: Hand book of Food and Nutrition, fifth edition, Bangalore printing & publishing Co.Ltd, Bangalore,2004

### **Reference book:**

- Frank Eperjesi & Stephen Beatty: Nutrition and the Eye A practical Approach, Elsevier Butterworth – Heinemann, USA, 2006

# MEDICAL PSYCHOLOGY

**Course Code: OPT2209**

**Credit Units: 03**

**Course Objective:** This course describes the various applications of different PSYCHOLOGY related issues to patient management

## **Course Contents:**

### **Module-I**

1. Introduction to Psychology
2. Intelligence Learning, Memory, Personality, Motivation
3. Body Integrity – one's body image

### **Module-II**

4. The patient in his Millen
5. The self-concept of the therapist, Therapist-patient relationship – some guidelines

### **Module-III**

6. Illness, its impact on the patient
7. Maladies of the age and their impact on the patient's own and others concept of his body image
8. Adapting changes in Vision
9. Why Medical Psychology demands commitment?

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT1</b>	<b>CT2</b>	<b>HA</b>	<b>Total</b>
<b>Weightage</b>	5	30	30	35	100

(CT-Class Test; A-Attendance; HA-Home Assignment)

## **Text & References:**

As recommended by the faculty.

# PROJECT

**Course code: OPT2232**

**Credit Units: 03**

## **Course Objectives:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity.

The basics of Research methodology need to be understood

The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Course Contents:**

### **Module-I:**

Introduction to research methods, Variables in research, Reliability and validity in research, Conducting a literature review, Formulation of research problems and writing research questions, Hypothesis, Null and Research Hypothesis, Type I and Type II errors in hypothesis testing

### **Module-II:**

Experimental and non experimental research designs, Sampling methods, Data collection methods- Observation method, Interview method, Questionnaires and schedules Construction

### **Module-III**

Ethical Issues in Research, Principles and Concepts in research ethics – confidentiality and privacy, informed consent

### **Module-IV:**

Writing Research proposals, Development of conceptual framework in research

### **Module-V:**

Basics of statistics in Research

Standard deviation, variance, T test, Regression, correlation

## **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>CT</b>
<b>Weightage</b>	5	10	5	30	50

(CP – Class Performance; V-Viva; A- Attendance; ME- Mid-Term Exam, CT-Class Test)

## **Text & References:**

### **Text books:**

- Research Methodology: A Step By Step Guide For Beginners : Ranjit Kumar
- Research Methodology: Methods and Techniques : By C. R. Kothari

# Syllabus - Third Semester

## OCULAR MICROBIOLOGY

**Course Code: OPT2301**

**Credit Units: 02**

**Course Objectives:** The objectives of the course are:

- to prepare the students to gain essential knowledge about the characteristics of bacteria, viruses, fungi and parasites;
- to acquire knowledge of the principles of sterilisation and disinfection in hospital and ophthalmic practice;
- to understand the pathogenesis of the diseases caused by the organisms in the human body with particular reference to the eye infections and
- To understand basic principles of diagnostic ocular Microbiology.

**Course Contents:**

**Module-I:**

Introduction to Microbiology; Types of Microorganisms; Physiology of Microorganisms – Nutrition, Enzymes, Metabolism and energy, Microbial Growth

**Module-II:**

Sterilization and disinfection in the laboratory; Control of Microbial Growth; Microbes versus Humans- The development of Infection, the disease process, pathogenicity and virulence

**Module-III:**

Ocular Bacteriology - Gram positive, (Staphylococcus aureus, Staphylococcus epidermidis, Streptococcus, propionibacterium, actinomyces, Nocardia) Bacteria including acid fast bacilli (Mycobacterium tuberculosis, Mycobacterium leprae); Ocular Bacteriology - Gram negative Bacteria (pseudomonas, haemophilus, Brucella, Neisseria, Moraxella); Spirochetes (Treponema, Leptospiraceae)

**Module-IV:**

Virology: Classification of Viruses in Ocular Disease, Rubella, Adenovirus, Oncogenic Viruses (HPV, HBV, EBV, Retroviruses), HIV.; Fungi : Yeasts, Filamentous, Dimorphic; Intracellular parasites - Chlamydia, Protozoa (Toxoplasmosis, Acanthamoeba); Helminths (Toxocariasis, Filariasis, Onchocerciasis, Trematodes)

**Practical:**

Students will visit the microbiology lab identify various microorganism; Practical demo of various culture media preparations and growth of microorganism on culture medias; Culture sensitivity test

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical/ record file ; A- Attendance; EE-End Semester Examination)

**Text & References:****Text books:**

- As per faculty recommendation

## **APPLIED OPTICS-I (Optometric Optics)**

**Course Code: OPT2302**

**Credit Units: 03**

**Course Objectives:** Skills/knowledge to be acquired at the end of this course:

Measurement of lens power, lens centration using conventional techniques

Transposition of various types of lenses

Knowledge to identify different forms of lenses (equi-convex, planoconvex, periscopic, etc.)

Knowledge to select the tool power for grinding process.

Measurement of surface powers using lens measure.

Method of laying off the lens for glazing process.

Ophthalmic prism knowledge – effects, units, base-apex notation, compounding and resolving prisms.

Knowledge of prism and decentration in ophthalmic lenses

Knowledge of different types of materials used to make lenses and its characteristics

Knowledge lens designs – single vision, bifocals, progressive lens

Knowledge on tinted and protective lenses

Knowledge on special lenses like isekonic, spectacle magnifiers.

Knowledge on spectacle frames – manufacture, materials

### **Course Contents:**

#### **Module-I: Revision of Basics**

Introduction – Light, Mirror, Reflection, Refraction and Absorption; Prisms – Definition, properties, Refraction through prisms, Thickness difference, Base-apex notation, uses, nomenclature and units, Sign Conventions, Fresnel's prisms, rotary prisms

#### **Module-II:**

Lenses – Definition, units, terminology used to describe, form of lenses; Vertex distance and vertex power, Effectivity calculations; Lens shape, size and types i.e. spherical, cylindrical and Sphero-cylindrical; Transpositions – Simple, Toric and Spherical equivalent; Prismatic effect, centration, decentration and Prentice rule, Prismatic effect of Plano-cylinder and Sphero-cylinder lenses

#### **Module-III:**

Spherometer & Sag formula, Edge thickness calculations; Magnification in high plus lenses, Minification in high minus lenses; Tilt induced power in spectacles; Aberration in Ophthalmic Lenses

#### **Module-IV:**

The characteristics of Ophthalmic lens material properties (Refractive index, Specific gravity, UV Cutoff, Impact resistance-Drop ball test, Abbe value, Center thickness) :Power Specification (Measurement of Lens power) including Lensometry:Types of Ophthalmic Lenses

#### **Module-V:**

Spectacle Frame Nomenclature, Lens surfacing: Identification of Optical center of the given Lens: Marking Datum line for spherical and cylindrical lenses: Glazing of spectacle lenses (Fitting)

#### **Practicals: Based on theory lectures**

Unit of competency: Lens Identification and Centration.

The ability to interpret different types of lenses, Facial and frame measurements.

The ability to measure the lens power by different methods

**Elements of competence:**

- A) Lens Identification: Biconvex, biconcave, Meniscus, Plano Convex and plano concave.
- B) Geneva lens measure for surface power calculation
- C) Lensometry and Hand neutralization
- D) Identification of optical centre and datum line marks for spherical lens
- E) Prism Power measurement with Lensometer
- F) Lens Material Identification
- G) Identification of different types of bifocal
- H) IPD measurement (Monocular and binocular)

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

CT-Class Test; HA-Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:**

- Text Books: Jalie M: The principles of Ophthalmic Lenses, The Association of Dispensing Opticians, London, 1972

# VISUAL OPTICS-I

**Course Code: OPT2303**

**Credit Units: 04**

## **Course Objectives:**

To understand the fundamentals of optical components of the eye

Upon completion of the course, the student should be able:

1. To understand the fundamentals of optical components of the eye
2. To gain theoretical knowledge and practical skill on visual acuity measurement, colour vision and history taking

## **Course Contents:**

### **Module-I: Review of Geometric Optics**

Vergence and power, Object space and image space, Sign convention, Cardinal points, Magnification, Aberrations

### **Module-II: Optics of Ocular Structures**

Cornea and aqueous, crystalline lens, Vitreous, Schematic and Reduced Eye

### **Module-III: Measurement of the optical constants of the eye**

Curvature of cornea, Curvature of the lens, Measurement of Axial length, Axes of the eye

### **Module-IV: Basic Optometric Procedures**

History taking in various cases, Visual Acuity, Color Vision, Maddox rod, filters,

### **Module-V: Refractive anomalies and their causes**

Etiology of refractive anomalies, populating distributions of anomalies, Optical component measurements, Growth of the eye in relation to refractive errors

Practicals:

History taking

Visual acuity measurement

Measurement of corneal curvature

Study of Purkinje Images

Effects of lenses

Colour Vision Measurement,

Pinhole

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT</b>	<b>P</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

CT-Class Test; HA - Home Assignment; A- Attendance; P-Practicals, EE-End Semester Examination

## **Text & References:**

### **Text Books:**

# **PATHOLOGY**

**Course Code: OPT2304**

**Credit Units: 02**

**Course Objective:** At the end of the course students will acquire knowledge in the following aspects:

- Inflammation and repair aspects.
- Pathology of various eye parts and adnexa

**Course Contents:**

**Module-I:**

General Pathology : Principles; Pathophysiology of Ocular Angiogenesis

**Module-II:**

Ocular Infections; Pathology of cornea and Conjunctiva; Pathology of Uvea; Pathology of Glaucoma

**Module-III:**

Pathology of Retina; Pathology of retina in systemic disease/disorders

**Module-IV:**

Pathology of eyelids and Adnexa; Pathology of orbital space occupying lesions; Pathology of the optic nerve; Retinoblastoma; Pathology of Lens

Demonstration of various Histo-pathological slides during the course for better understanding of the concepts.

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT1</b>	<b>CT2</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

CT-Class Test; HA - Home Assignment; A- Attendance; EE-End Semester Examination)

**Text & References:**

# OCULAR DISEASES-I

**Course Code: OPT2305**

**Credit Units: 04**

**Course Objective:** At the end of the course the students will be knowledgeable in the following aspects of ocular diseases: knowledge on the etiology, epidemiology, symptoms, signs, course sequelae of ocular disease, diagnostic approach, and Management of the ocular diseases.

## **Course Contents:**

### **Module-I: Orbit**

Applied Anatomy; Proptosis (Classification, Causes, Investigations); Enophthalmos; Developmental Anomalies; (craniosynostosis, Craniofacial Dysostosis, Hypertelorism, Median facial cleft syndrome); Orbital Inflammations (Preseptal cellulites, Orbital cellulitis Orbital Periostitis, cavernous sinus Thrombosis); Grave's Ophthalmopathy; Orbital tumors( Dermoids, capillary haemangioma, Optic nerve glioma); Orbital blowout fractures; Orbital surgery (Orbitotomy); Orbital tumors; Orbital trauma; Approach to a patient with proptosis

### **Module-II: Lids**

Applied Anatomy; Congenital anomalies (Ptosis, Coloboma, Epicanthus, Distichiasis, Cryptophthalmos); Oedema of the eyelid (Inflammatory, Solid, Passive edema); Inflammatory disorders (Blepharitis, External Hordeolum, Chalazion,; Internal hordeolum, MolluscumContagiosum); Anomalies in the position of the lashes and Lid Margin (Trichiasis, Ectropion, Entropion, Symblepharon, Blepharophimosis, Lagophthalmos, Blepharospasm, Ptosis); Tumors (Papillomas, Xanthelasma, Haemangioma, Basal carcinoma, Squamous cell carcinoma, sebaceous gland melanoma); Exophthalmometry

### **Module-III: Conjunctiva & Lacrimal System**

Applied Anatomy; Inflammations of conjunctiva ( Infective conjunctivitis – bacterial, Chlamydial, viral , Allergic conjunctivitis, Granulomatous conjunctivitis; Degenerative conditions; Pinguecula, Pterygium, Concretions; Symptomatic conditions; Hyperaemia, Chemosis, Ecchymosis, Xerosis, Discoloration; Cysts and Tumors. Applied anatomy & physiology of lacrimal system; Evaluation of the watering eye, causes of watering; Obstruction of Lacrimal drainage; Infection of Lacrimal Passages.

### **Module-IV: Cornea**

Applied Anatomy and Physiology; Congenital Anomalies; (Megalocornea, Microcornea, Cornea plana, Congenital cloudy cornea); Inflammations of the cornea (Topographical classifications: Ulcerative keratitis and Non ulcerative; Etiological classifications: Infective, Allergic, Trophic, Traumatic, Idiopathic); Degenerations ( classifications, Arcus senilis, Vogt's white limbal girdle, Hassal-henle bodies, Lipoid Keratopathy, Band shaped keratopathy, Salzmann's nodular degeneration, Droplet keratopathy, Pellucid Marginal degeneration); Dystrophies ( Reis Buckler dystrophy,Recurrent corneal erosion syndrome, Granular dystrophy,Lattice dystrophy, cornea guttata, Fuch's epithelial endothelial dystrophy, Congenital hereditary endothelial dystrophy); Keratoconus, Keratoglobus; Corneal oedema, Corneal opacity, Corneal vascularisation  
Refractive procedures; Penetrating Keratoplasty; Corneal investigations; keratometry; Aberrometry; Pachymetry;Topography; Aesthesiometer; Tearscope; Specular microscope

**Module-V: Lens**

Applied Anatomy and Physiology ; Clinical examination; Classification of cataract; Congenital and Developmental cataract; Acquired ( Senile, Traumatic, Complicated, Metabolic, Electric, Radiational, Toxic); Morphological: Capsular, Subcapsular, Cortical, Supranuclear, Nuclear, Polar; Management of cataract; Complications of cataract surgery; Displacement of lens: Subluxation, Displacement; Lens coloboma, Lenticonus, Microspherophakia.

**Practicals:**

Students will visit OPD clinic and record pathologies seen during the posting [under supervision of faculty]; Record file of ocular pathologies to be prepared [Faculty to decide]; At Least two Case presentation of pathologies seen during clinical posting; Assist ophthalmic surgeon while surgical procedures

**Examination Scheme:**

Components	A	HA	CT	R	EE
Weightage	5	5	10	10	70

CT-Class Test; HA - Home Assignment, R-Case records; A- Attendance; EE-End Semester Examination)

**Text & References:****Text books:**

- Jack J. Kanski Clinical Ophthalmology: A Systematic Approach, 6th edition, Butterworth - Heinemann, 2007

# CLINICAL OPTOMETRIC PROCEDURES

**Course Code: OPT2306**

**Credit Units: 03**

**Course Objectives:** At the end of the course the students will be skilled in knowing the purpose, set-up and devices required for the test, indications and contraindications of the test, step-by-step procedures, documentation of the findings, and interpretation of the findings of the various clinical optometry procedures.

**Course Contents:** Revision of skills and enhanced knowledge on skills as discussed in previous courses OP 1 and OP 2

## **Module-I: Case History**

Case History Script

## **Module-II: Entrance Tests**

Visual acuity and its estimation

Colour vision

cover test, Extraocular motility

Hirschberg test,

Near point of accommodation, Near point of convergence

Stereopsis

WFDT

Pupils Examination

Visual field test-Confrontation, Amsler' grid

IPD

## **Module-III: Ocular Health Assessment**

External examination of the eye, Lid Eversion

Tear function test-Schirmer's, TBUT, tear meniscus level, NITBUT (keratometer),

Anterior segment examination with torch light – Slit lamp examination – demo

Photostress test

Corneal Sensitivity

## **Module-IV: Functional Test**

Contrast acuity

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT</b>	<b>P</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

CT-Class Test; HA - Home Assignment, P-Practical; A- Attendance; EE-End Semester Examination)

## **Text & References:**

- N B. Carlson , D I Kurtz: Clinical Procedures for Ocular Examination, 3rd edition, McGraw-Hill Medical, 2003

## CLINICS-II

**Course Code: OPT2307**

**Credit Units: 01**

**Course Objective:** This course aims to give student the basic knowledge of the theory and practical behind the basic clinical procedures. After completion, of course the student should have standard eye examination. Learn to write formal records and understand the preliminary eye testing

### **Unit of Competency:**

#### **Methods of ocular Examination Part 2**

The ability to communicate effectively with a diverse group of patients with arrange of optometric conditions and needs.

The ability to use techniques in ocular examination and to understand the implication of findings in terms of subsequent examination techniques

### **Elements of competence:**

#### **Module-I: Basic Eye examination and finding the refractive error.**

History taking,

Visual acuity estimation

Retinoscopy on model eye.

Retinoscopy on human eye and neutralization.

#### **Module-II: Anterior segment examination**

External examination of the eye, Lid Eversion

Schirmer's, TBUT, tear meniscus level, NITBUT (keratometer)

Pupillary reflex test

Slit lamp techniques.

Anterior segment examination with torch light

Slit lamp examination on live eye – demo

Corneal Sensitivity, HVID, Keratometry

#### **Module-III: Visual field examination.**

Visual field testing

Confrontation test, Amsler' grid

#### **Module-IV: Miscellaneous test**

Photostress test,

Colour vision

Direct Ophthalmoscopy

### **Examination Scheme:**

Components	Attd.	Record File	Written Test	Viva	Practical	Total
Weightage	5	15	30	30	20	100

# HOSPITAL ADMINISTRATION

**Course Code: OPT2308**

**Credit Units: 02**

## **Course Objective:**

This course has been designed keeping in mind the requirement of scientific techniques and managerial skills for the modern day hospital administrators in a short time

The participant on successful completion of the course will be able to:

Understand clearly the basic concepts of management and hospital management.

Apply the managerial skill system in hospital.

Understand to manage finance, man and material resources in hospital.

Understand planning and management of Hospital and Health care services.

Understand planning of patient care and hospital support services.

Formulate a research project.

## **Course Contents:**

### **MODULE-I:** Introduction to management & Human Resource Development

Management principles and practices in Hospital

Human Resource Management

Organisational Behaviour

### **MODULE-II:** Resource Management and Quality Control

Financial Management

Equipment and Material Management

Hospital Information System and Quality Management

### **MODULE-III:** Hospital and Health care Services

Hospital and Health care System

Hospital Planning and Designing

Legal aspect of Hospital Administration

### **MODULE-IV:** Patient care and Support Services

Patient Care Services

Hospital Support Services

Hospital Utility Services

## **Examination Scheme:**

Components	Attd.	Assignment	Multiple Choice Questions/ Quiz	Class Test	End-Term Exam	Total
Weightage	5	15	15	15	50	100

## **Text book/ Reference Book**

As recommended by the faculty

# BASIC ACCOUNTANCY

**Course Code: OPT2309**

**Credit Units: 02**

**Course Objective:** The course not only aims at training students to gain knowledge in the fields related to Accounting & Finance but also leads to the all-round development in establishing their own business. It will give learners an understanding of the theory behind the accounting process and will help learners make decisions in diverse accounting situations as it provides a logical framework for accounting practice. This course will be of great interest to entrepreneurs and business professionals who would like to get an understanding of the theory behind the accounting practices that we use day today.

## **Course Contents:**

### **MODULE-I:** Introduction to Principles of Accountancy

Understand the purpose of accounting  
Understand financial terminology and concepts  
Understand the accounting process and the accounting equation  
Understand debits and credits  
Prepare the trial balance  
Understand the balance sheet and income statement  
Prepare the general ledger and general journal

### **MODULE-II:** Recording and presenting financial Data

Prepare the cashbook, bank reconciliation, and petty cash journals  
Perform daily and monthly routines  
Account for year-end adjustments  
Extract a trial balance and draft a balance sheet and income statement  
Prepare budgets and cash flow forecasts

### **Module-III:** practical lab for tally software

## **Examination Scheme:**

Components	A	ASG	CT1	CT2	EE
Weightage	5	15	15	15	50

(CT-Class Test; ASG-Assignment; A- Attendance; EE-End Semester Examination)

## **Text book/ Reference Book**

As recommended by the faculty

# MEDICAL LAWS AND ETHICS

**Course Code: OPT2310**

**Credit Units: 02**

**Course Objective:** The course not only aims at training students to gain knowledge in the fields related to Legal and ethical considerations are firmly believed to be an integral part of medical practice in planning patient care. Advances in medical sciences, growing sophistication of the modern society's legal framework, increasing awareness of human rights and changing moral principles of the community at large, now result in frequent occurrences of healthcare professionals being caught in dilemmas over aspects arising from daily practice.

Medical ethics has developed into a well based discipline which acts as a "bridge" between theoretical bioethics and the bedside. The goal is "to improve the quality of patient care by identifying, analyzing, and attempting to resolve the ethical problems that arise in practice". Doctors are bound by, not just moral obligations, but also by laws and official regulations that form the legal framework to regulate medical practice. Hence, it is now a universal consensus that legal and ethical considerations are inherent and inseparable parts of good medical practice across the whole spectrum.

## **Course Contents:**

Few of the important and relevant topics that need to focus on are as follows:

1. Medical ethics - Definition - Goal - Scope b
2. Introduction to Code of conduct
3. Basic principles of medical ethics –Confidentiality
4. Malpractice and negligence - Rational and irrational drug therapy
5. Autonomy and informed consent - Right of patients
6. Care of the terminally ill- Euthanasia
7. Organ transplantation
8. Medico legal aspects of medical records –Medico legal case and type- Records and document related to MLC - ownership of medical records - Confidentiality Privilege communication - Release of medical information - Unauthorized disclosure - retention of medical records - other various aspects.
9. Professional Indemnity insurance policy
10. Development of standardized protocol to avoid near miss or sentinel events
11. Obtaining an informed consent.

## **Examination Scheme:**

Components	A	ASG	CT1	CT2	EE
Weightage	5	15	15	15	50

(CT-Class Test; ASG-Assignment; A- Attendance; EE-End Semester Examination)

## **Text book/ Reference Book**

As recommended by the faculty

## TERM PAPER

**Course Code: OPT2331**

**Credit Units: 02**

### **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of Clinical Optometry at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

### **Guidelines:**

1. The term paper will be related to the contemporary Optometry topic and it will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

### **Examination Scheme:**

<b>Components</b>	<b>Organization &amp; relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Total</b>
<b>Weightage</b>	40	40	20	100

# PROJECT

**Course Code: OPT2332**

**Credit Units: 02**

## **Course Objectives:**

The objective of this module is to help the students understand the basic principles of research and methods applied to draw inferences from the research findings.

## **Course Contents:**

### **Module-I and II: Research Methodology**

1. Introduction to research methods
2. Identifying research problem
3. Ethical issues in research
4. Research design
5. Types of Data
6. Research tools and Data collection methods
7. Sampling methods
8. Developing a research proposal

### **Module-III and IV: Biostatistics**

1. Basics of Biostatistics
  - 1.1 Introduction of Biostatistics
  - 1.2 Measures of Morality
  - 1.3 Sampling
  - 1.4 Statistical significance
  - 1.5 Correlation
  - 1.6 Sample size determination.
  - 1.7 Statistics –Collection of Data - presentation including classification and diagrammatic representation –frequency distribution. Measures of central tendency; measures of dispersion.
  - 1.8 Theoretical distributions.
    - 1.8.1 Binomial
    - 1.8.2 Normal
    - 1.8.3 Sampling –necessity of methods and techniques.
    - 1.8.4 Chi. Square test (2 x 2)
2. Hospital Statistics
3. Use of computerized software for statistics

### **Examination Scheme:**

Components	A	ASG	CT1	CT2	EE
Weightage	5	15	15	15	50

(CT-Class Test; ASG-Assignment; A- Attendance; EE-End Semester Examination)

### **Text book/ Reference Book**

- Mausner & Bahn: Epidemiology-An Introductory text, 2nd Ed., W. B. Saunders Co.
- Richard F. Morton & J. Richard Hebd: A study guide to Epidemiology and Biostatistics, 2nd Ed., University Park Press, Baltimore.
- Sylvia W Smoller, J Smoller, Biostatistics & Epidemiology A Primer for health and Biomedical professionals, 4th edition, Springs, 2015

# WORKSHOP

**Course Code: OPT2333**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the major themes

The department may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

Relevant study material and references will be provided by the department in advance.

The participants are expected to explore the topic in advance and take active part in the discussions held

Attending and Participating in all activities of the workshop

Group Activities have to be undertaken by students as guided by the department.

Evaluation of workshop activities would be done through test and quiz at the end of the workshop.

Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Hands on training

Simulation

Group Activity

Role Play

Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

## Syllabus - Fourth Semester

### APPLIED OPTICS-II (Dispensing optics)

**Course Code: OPT2401**

**Credit Units: 04**

**Course Objectives:** Skills/knowledge to be acquired at the end of this course:

Measurement of lens power, lens centration using conventional techniques

Ophthalmic prism knowledge – effects, units, base-apex notation, compounding and resolving prisms.

Method of laying off the lens for glazing process.

Knowledge of prism and decentration in ophthalmic lenses

Knowledge of different types of materials used to make lenses and its characteristics

Knowledge lens designs – Bifocals and Progressive lens

Knowledge on tinted and protective lenses

Knowledge on special lenses like isekonic, spectacle magnifiers.

Knowledge on spectacle frames – manufacture, materials

#### **Course Contents:**

##### **Module-I**

The characteristics of lens material properties (Refractive index, specific gravity, UV cut off, impact resistance – include drop ball test, abbe value, Center thickness); Measurement of lens power; Quality control. Lens enhancements (Scratch resistant coatings – spin/dip, Anti-reflection coating, UV coating, Hydrophobic coating, anti-static coating)

##### **Module-II**

Lens types single vision; Lens types bifocal / multifocal; Lens notation; Lens power and thick lenses; Effectivity and high power lenses; Aberrations and lens design; Lens thickness.

##### **Module-III**

Ophthalmic prism; Absorptive lenses and lens coatings; Frames types and materials; Frame standard alignment and repairs done; Prescribing ophthalmic lenses; Facial Measurements; Frame Adjustment; Spectacle Delivery - on eye verification

##### **Module-IV**

Progressive lenses history and development; Prescribing PALs; Customized PAL designs; Dispensing PALs; Delivery of PALs; Troubleshooting PALs

##### **Module-V**

Pediatric Dispensing; Low Vision Aids; Lens enhancements (Scratch resistant coatings – spin/dip, Anti-reflection coating, UV coating, Hydrophobic coating, anti-static coating)

Practical to be conducted along with theory lectures

Lab visit will be undertaken to demonstrate different lab procedures.

Glazing and edging Hands on; A collection of different lens types and frames types should be done by students; Lens verification; Project report : lens and spectacle frames available in Indian market

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT</b>	<b>P</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

(CT-Class Test; HA - Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:****Text Books:**

- Jalie M: The principles of Ophthalmic Lenses, The Association of Dispensing Opticians, London, 1972

**Reference Books:**

- David Wilson: Practical Optical Dispensing, OTEN- DE, NSW TAFE Commission, 1999
- C V Brooks, IM Borish: System for Ophthalmic Dispensing, Second edition, Butterworth-Heinemann, USA, 1996

## **VISUAL OPTICS-II**

**Course Code: OPT2402**

**Credit Units: 03**

**Course Objectives:** To acquire a comprehensive theoretical understanding to the Optometric diagnostic procedures and the refractive conditions of the eye.

**Course Outcome:** Upon completion of the course, the student should be able:

1. To understand the fundamentals of optical components of the eye
2. To gain theoretical knowledge and practical skill on visual acuity measurement, objective and subjective clinical refraction

### **Course Contents:**

#### **Module-I: Refractive conditions**

Myopia  
Hyperopia  
Astigmatism  
Anisometropia and Anisekonion  
Presbyopia  
Aphakia and Pseudophakia  
Correction and Management of Amblyopia

#### **Module-II: Accommodation**

Far and near point of accommodation  
Range and amplitude of accommodation,  
Anomalies of accommodation  
Relationship between accommodation and convergence; A/c ratio

#### **Module-III: Objective Refraction**

Retinoscopy – principles and methods  
Retinoscopy – speed of reflex and optimum condition  
Retinoscopy – dynamic/static  
Review of objective refractive methods

#### **Module-IV: Subjective Refraction**

Subjective refractive methods  
Cross cylinder method for astigmatism, Astigmatic Fan test  
Duochrome, Transposition of lenses  
Spherical equivalent  
Prescribing prisms  
Binocular balancing & refraction

#### **Module-V: Effective power of spectacles; vertex distance effects**

Ocular refraction versus spectacle refraction  
Ocular accommodation versus spectacle accommodation  
Spectacle magnification and relative spectacle magnification  
Retinal image blur; depth of focus and depth of field

Tutorials: Case discussion on difficult situations on Retinoscopy

Practicals

I - History taking

## **II - Visual acuity measurement**

### **III - Objective Refraction**

Students are to neutralize 10 cases (2 low myope, 2 low hyperope, 2 high myope, 2 Aphake, 2 astigmats with or without spherical errors). An initial practice session would be given and the students are to exhibit their competency in neutralizing to the nearest power. In case of gross errors the lab would be repeated. The students are to submit the report of their cases duly signed by their supervisor

### **IV - Subjective refraction**

Students should perform fogging technique, Duochrome, cyclodamia, JCC, Binocular balancing and binocular refraction to determine the end point of refraction.

### **V - Measurement of accommodation**

Students need to measure the far point, near point, range and amplitude of accommodation using various methods for 10 cases. Also needs to measure the negative and positive relative accommodation compare the values between the normals.

### **VI - Measurement of convergence**

Students need to measure the near point of convergence, AC/A ratio for 10 patients

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT</b>	<b>P</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

(CT-Class Test; HA - Home Assignment; A- Attendance; P-Practicals, EE-End Semester Examination)

## OCULAR DISEASES-II

**Course Code: OPT2403**

**Credit Units: 04**

**Course Objective:** At the end of the course the students will be knowledgeable in the following aspects of ocular diseases: knowledge on the etiology, epidemiology, symptoms, signs, course sequelae of ocular disease, diagnostic approach, and Management of the ocular diseases.

### **Course Contents:**

#### **Module-I: Retina and Vitreous:**

Applied Anatomy; Congenital and Developmental Disorders (Optic Disc: Coloboma, Drusen, Hypoplasia, Medullated nerve fibers; Persistent Hyaloid Artery) ; Inflammatory disorders (Retinitis: Acute purulent , Bacterial, Virus, mycotic); Retinal Vasculitis (Eales's); Retinal Artery Occlusion (Central retinal Artery occlusion); Retinal Vein occlusion ( Ischaemic, Non Ischaemic , Branch retinal vein occlusion); Retinal degenerations : Retinitis Pigmentosa, Lattice degenerations; Macular disorders: Solar retinopathy, central serous retinopathy, cystoid macular oedema, Age related macular degeneration; Retinal Detachment: Rhegmatogenous, Tractional, Exudative); Retinoblastoma; LASERS in Ophthalmology; Fluorescein angiography; OCT

#### **Module-II: Ocular Injuries:**

Terminology: Closed globe injury ( contusion, lamellar laceration) Open globe injury ( rupture, laceration, penetrating injury, perforating injury); Mechanical injuries ( Extraocular foreign body, blunt trauma, perforating injury, sympathetic ophthalmitis); Non Mechanical Injuries ( Chemical injuries, Thermal, Electrical, Radiational); Clinical approach towards ocular injury patients

#### **Module-III: Uveal Tract & Sclera**

Applied Anatomy; Classification of uveitis; Etiology; Pathology ; Anterior Uveitis; Posterior Uveitis; Purulent Uveitis; Endophthalmitis; Panophthalmitis; Pars Planitis; Tumors of uveal tract( Melanoma); Episcleritis and scleritis; Clinical examination of Uveitis and Scleritis

#### **Module-IV: Clinical Neuro-ophthalmology**

Anatomy of visual pathway; Lesions of the visual pathway; Pupillary reflexes and abnormalities; Amaurotic light reflex, Efferent pathway defect, Wernicke's hemianopic pupil, Marcus gunn pupil. Argyll Robertson pupil, Adie's tonic pupil); Optic neuritis, Anterior Ischemic optic neuropathy, Pappilloedema, optic atrophy; Cortical blindness; Malingering; Nystagmus; Clinical examination

#### **Module-V: Glaucoma**

Applied anatomy and physiology of anterior segment; Clinical Examination; Definitions and classification of glaucoma; Pathogenesis of glaucomatous ocular damage; Congenital glaucomas; Primary open angle glaucoma; Ocular hypertension; Normal Tension Glaucoma; Primary angle closure glaucoma (Primary angle closure suspect, Intermittent glaucoma, acute congestive, chronic angle closure); Secondary Glaucomas; Management : common medications, laser intervention and surgical techniques; Glaucoma investigations and procedures; Confrontation Amsler grid; Tonometry-Appplanation Schiotz; Visual fields-; GTX,HRT; Provocative test; OCT

**Practicals:**

Students will visit OPD clinic and record pathologies seen during the posting [under supervision of faculty]; Record file of ocular pathologies to be prepared [Faculty to decide]; Atleast two Case presentations of pathologies seen during clinical posting

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:****Text books:**

- Jack J. Kanski Clinical Ophthalmology: A Systematic Approach, 6th edition, Butterworth-Heinemann, 2007

# BASIC PHARMACOLOGY

**Course Code: OPT2404**

**Credit Units: 02**

**Course Objective:** At the end of the course students will be knowledgeable in the following:

Basic principles of Pharmacokinetics and Pharmacodynamics

Commonly used ocular drugs, mechanism, indications, contraindications, drug dosage, and adverse effects.

**Course Contents:**

## **Module I: General Pharmacology**

Mechanisms of drug action; Dose-response relationship; Pharmacokinetics of drug absorption, distribution, bio-transformation, excretion and toxicity; Factors influencing drug metabolism of drug action

## **Module-II: Action of Specific Agents**

Depressants; Anti-coagulants; C.N.S. Stimulants and antidepressants; Diuretics and hypertensive agents; Cardiovascular drugs; Histamines and anti histamines; Serotonin; Prostaglandins

## **Module-III: Principles of ocular pharmacology**

Preparation and packing of ophthalmic drugs; General principles of ocular pharmacology; Drug action and effectiveness; Drug safety; Factors influencing the objectively demonstrated response; Ocular penetration; Routes of general and ocular drug administration

## **Module-IV: Optometric Diagnostic Drugs**

Optometric use of pharmaceuticals; Classification of drug use; Topical ophthalmic drugs; References and drug indices; Surface active drugs; Topical anaesthetics; Principles and classification of autonomic drugs; Sympathomimetics; Sympatholytics; Parasympathomimetics; Diagnostic use of autonomic drugs, Contact lens solutions

## **Module-V: Other Drug of Optometric Interest**

Physical agents; Germicides and sterilizing agents; Over-the-counter drugs; Dyes and stains

Preparation of ophthalmic drugs:

Ophthalmic drugs; Anti glaucoma; Sulphonamides; Antibiotics; Corticosteroids; Anesthetics; Proteolytic enzyme

## **Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA - Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

## **Text & References:**

# OPTOMETRIC INSTRUMENTS

**Course Code: OPT2405**

**Credit Units: 02**

**Course Objectives:** Upon completion of the course, the student should be able to gain theoretical knowledge and practical skill in handling the ophthalmic instruments.

## **Course Contents:**

### **Module-I**

Refractive instruments; Test charts standards; Choice of test charts; Phoropter

### **Module-II**

Pachymeter, specular microscope, OCT, FFA; Pupilometer; Ophthalmoscopes and related devices; Design of ophthalmoscopes – Direct and Indirect ophthalmoscope; Lensometer, Lens gauges or clock

### **Module-III**

Slit Lamp; Tonometers; Keratometer and corneal topography, Aberrometry

### **Module-IV**

Orthoptic Instruments (Synaptophore); Ultrasonography (A-Scan , B-Scan)

**Practical:** Demonstration of the instruments parts and procedure

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT</b>	<b>P</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

## CLINICS-III

**Course Code: OPT2406**

**Credit Units: 03**

### **Course Contents:**

#### **Module-I:**

Unit of competency: Refraction

An understanding of methods of assessing vision, Refraction in all Patients

The ability to relate facial anatomy to the fitting of optical appliances.

Elements of competence:

1. Recording VA
2. Practice of Streak Retinoscopy and dynamic retinoscopy.
3. Subjective refraction –
4. Initial sphere check.: fogging
5. Cylinder axis and power refinement: clockdial, fan, JCC,
6. Second sphere check, Duochrome or bichrome test,
7. Binocular balance :prism balance, TIB,
8. cyclodeimia,
9. Slit refraction.
10. Presbyopic add determination
11. Writing prescription
12. Overview of the use of cycloplegic drugs.

#### **Module-II**

Unit of competency: Applied Optics:

The ability to dispensing appropriate appliances

The ability to interpret and dispense a prescription using appropriate lenses and facial frame measurements.

Elements of competence:

1. Frame types and nomenclature of frames. Know about special frame features and handling the frames.
2. Relationship between frame ,lenses and face
3. IPD measurement (with Scale and IPD ruler , Pupilometer)
4. Recommends and dispenses special optical appliances where appropriate( e.g. VDU users, Sports, safety, pediatric frames, recumbent, reversible, flips, trigeminal spectacles etc.)
5. Identification of tints & Coating on lens surface and its application ,associated advantage and disadvantages.
6. Taking and recording children's facial and frame measurement
7. Awareness of the dermatological effects of the materials to be able to advise patient accordingly.
8. Identifies possible errors in prescription and follows the appropriate course of action.
9. Identification of incomplete, inaccurate and ambiguous prescription.
10. when to modify and when to refer a new prescription

#### **Module-III**

Unit of competency: Progressive addition lens

Brief overview of PAL'S and clinical decision making.

An understanding of refractive prescribing and management decisions

Elements of competence:

1. Know Basic construction of progressive addition lens.
2. Frame selection for Progressive

3. Familiarity of different types of progressive lens design and clinical relevance .advantages and disadvantages of different types of lens.
4. Choosing the right type of progressive lens
5. Progressive lens fitting measurement
6. Progressive lens verification.
7. Progressive dispensing
8. Trouble shooting of progressive.
- 9.Familiarity of different brands of PAL's.

#### **Module-IV:**

Unit of competency: Comprehensive eye care:

The ability to identify and manage ocular abnormalities

The ability to identify sight threatening eye diseases

Recognizes common ocular abnormalities referred when appropriate

Recognizes adverse ocular reactions to medication

Assess symptoms and signs of neurological significance

#### **Elements of competences:**

- 1.Understands the risk factors for developing common ocular conditions including: Glaucoma, cataract, diabetic retinopathy and ARMD .
2. Recognizes, using appropriate technique/s, all of the following: Cataract, Glaucoma or glaucoma suspects ,Anterior eye disorders e.g. blepharitis, dry eye, meibomian gland dysfunction, lid lesions AMD and macular abnormalities and Manages appropriately.
3. Manages patients presenting with cataract.
4. Evaluates glaucoma risk factors, to detect glaucoma and refer accordingly.
5. Recognize the patients presenting with macular degeneration .
6. Recognizes, evaluates and manages diabetic eye disease and refers accordingly.
- 7.Evaluates and manages patients presenting with symptoms of retinal detachment.
8. Recognizes ocular manifestations of systemic disease
9. Assesses symptoms and signs of neurological significance
10. Recognizes adverse ocular reactions to medication.

#### **Module-V**

##### **Unit of competency: Ocular diseases 1.**

The ability to identify and manage ocular abnormalities

The ability to identify sight threatening eye diseases

Recognizes common ocular abnormalities referred when appropriate

Recognizes adverse ocular reactions to medication

#### **Elements of competences:**

1. Interprets and investigates the presenting symptoms and sign of the patient.
2. Identifies external pathology and offers appropriate advice to patients not requiring referral.
  - External eye and ocular surfaces : Lids, lashes, lumps/bumps and red eye
  - Gives the correct advice /treatment and review period
  - Aware of pharmaceutical agents available (legal status, indications, contraindications and side effects and uses appropriate sources of medicines information)
  - Explains clearly to the patient and checks their understanding
3. Recognizes common ocular abnormalities
4. Understanding of symptoms associated with internal eye disease.
5. Manage patient presenting with Red eyes.

**Examination Scheme:**

<b>Components</b>	<b>Attd.</b>	<b>Record File</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Viva</b>	<b>Practical</b>	<b>Total</b>
<b>Weightage</b>	5	15	15	15	50	100

# OPHTHALMIC IMAGING

**Course Code: OPT2407**

**Credit Units: 03**

## **Course Objectives:**

Identify corneal interface disease with imaging technology

Examine diagnostic capabilities of imaging for glaucoma

Analyze imaging data for change to determine when to escalate treatment for glaucoma in response to progression by imaging

Examine current imaging printouts to see how they can help diagnose retinal diseases at an earlier stage

Analyze the different OCT imaging platforms based upon their differences in hardware and software design for optimal ophthalmic care

## **Course Contents:**

### **Module-I: Anterior segment imaging:**

Orbscan: Basic science and clinical application.

Anterior Segment OCT: Principle and Interpretation.

Corneal Topography

Ophthalmic Photography: External eye photography, Slit lamp photography,

### **Module-II: Glaucoma Imaging:**

Imaging of the optic nerve head: Basic science behind optic nerve head damage. Principle & role of different imaging system behind optic nerve head evaluation. (GDx, HRT)

### **Module-III: Retinal Imaging:**

B- Scan

Fundus photography,

Basic science and role of OCT (Stratus and Spectral domain OCT) in retinal diagnosis.

Auto fluorescence and fundus fluorescence Angiogram: Optical Principle and basic science, Procedure, Role of angiogram in retinal diagnosis and clinical decision making..

## **Practical:**

Demonstration , Observation and hands on of all the clinical ophthalmic imaging system

## **Evaluation Scheme:**

Attendance	Record file	Multiple Choice Questions/ Quiz	Viva	Practical skills /performance	Total
5	15	15	15	50	100

## OPHTHALMIC ELECTRODIAGNOSTIC PROCEDURES

**Course Code: OPT2408**

**Credit Units: 03**

**Course Objective:** The objective of the course is to familiarize the student with the Electrophysiology Laboratory which performs several clinical tests, including the electroretinogram (ERG), electro-oculogram (EOG), visual evoked response (VER), color vision testing (CVT) and dark adaptometry (DA)

### **Course Contents:**

#### **Module-I: Electrophysiological investigations**

Electro-oculogram (EOG) Measurement of retinal function with standardised eye movements.

Electroretinogram (ERG)

Macular or Focal Electroretinogram

Pattern Electroretinogram (PERG)

Flash Visually Evoked Cortical Potential (Flash VEP)

Pattern Appearance Visually Evoked Cortical Potential

Other non-standard procedures for recording VEP and ERG e. g., measurement of interocular beat frequencies, flicker and sweep VEPs, multi-focal ERG, fast oscillation.

Electromyogram (EMG)

Electro-nystagmography. For measurement of nystagmus and eye movements.

#### **Module-II: Indications for Patient Referral**

Tests Available

Patterns of Referral

Indications for Specific Tests

Standardised Electroretinogram, Electro-Oculogram and Visually, Evoked Potential

### **Evaluation Scheme:**

<b>Attendance</b>	<b>Record file</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Viva</b>	<b>Practical skills /performance</b>	<b>Total</b>
5	15	15	15	50	100

### **Textbook:**

- Ophthalmic Electrodiagnosis (Major Problems in Ophthalmology) N.R. Galloway

# PERIMETRY

**Course Code: OPT2409**

**Credit Units: 03**

**Course Objective:** The aim of this course is to acquire skills in the visual field examination of the eye. This course deals almost exclusively with manual and automated perimetry. Emphasis is on technical aspects of administering the automated test with skill; as well as on skillful interpretation of the result based on an understanding of the text.

## **Course Contents:**

### **Module-I:**

The field of vision  
Normal field of vision  
Retinal nerve fiber paths and the field of vision  
Characteristics of visual field loss in glaucoma

### **Module-II:**

Perimetric Parameters  
Manual vs. Automated Perimetry  
Advantages of Automated Perimetry  
Static vs. Dynamic Perimetry  
Target size and luminance  
Testing Algorithms

### **Module-III:**

Monitoring Fixation  
Monocular vs. Binocular testing  
Alternative perimetric targets  
Interpretation of SAP  
Patient and Test details  
Displays of sensitivities across the visual field

### **Module-IV:**

Summary measures of visual field performance  
Establishing reliability of results  
Identifying Glaucomatous VF Loss on SAP  
Common perimetric errors

## **Evaluation Scheme:**

Attendance	Record file	Multiple Choice Questions/ Quiz	Viva	Practical skills /performance	Total
5	15	15	15	50	100

## **Reference Book**

- Automated static perimetry : Douglas R. Anderson

## TERM PAPER

**Course Code: OPT2431**

**Credit Units: 02**

### **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of Clinical Optometry at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

### **Guidelines:**

1. The term paper will be related to the contemporary Optometry topic and it will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

### **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Total</b>
40	40	20	100

# PROJECT

**Course code: OPT2432**

**Credit Units: 03**

## **Course Objectives:**

The objective of this module is to help the students understand the basic principles of research and methods applied to draw inferences from the research findings.

## **Course Contents:**

### **Module-I and II: Research Methodology**

1. Introduction to research methods
2. Identifying research problem
3. Ethical issues in research
4. Research design
5. Types of Data
6. Research tools and Data collection methods
7. Sampling methods
8. Developing a research proposal

### **Module-III and IV: Biostatistics**

1. Basics of Biostatistics
  - 1.1 Introduction of Biostatistics
  - 1.2 Measures of Morality
  - 1.3 Sampling
  - 1.4 Statistical significance
  - 1.5 Correlation
  - 1.6 Sample size determination.
  - 1.7 Statistics –Collection of Data - presentation including classification and diagrammatic representation –frequency distribution. Measures of central tendency; measures of dispersion.
  - 1.8 Theoretical distributions.
    - 1.8.1 Binomial
    - 1.8.2 Normal
    - 1.8.3 Sampling –necessity of methods and techniques.
    - 1.8.4 Chi. Square test (2 x 2)
2. Hospital Statistics
3. Use of computerized software for statistics

## **Evaluation Scheme:**

Attendance	Assignment	CT1	CT 2	End-Term Evaluation	Total
5	15	15	15	50	100

## **Text book/ Reference Book**

- Mausner & Bahn: Epidemiology-An Introductory text, 2nd Ed., W. B. Saunders Co.
- Richard F. Morton & J. Richard Hebd: A study guide to Epidemiology and Biostatistics, 2nd Ed., University Park Press, Baltimore.

## WORKSHOP

**Course Code: OPT2433**

**Credit Units: 01**

### **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The department has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes for Workshop:**

The workshop may be conducted on any of the various major themes: These themes are merely indicative and the department may choose any recent and relevant topic of study.

### **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

Relevant study material and references will be provided by the department in advance.

The participants are expected to explore the topic in advance and take active part in the discussions held

Attending and Participating in all activities of the workshop

Group Activities have to be undertaken by students as guided by the department .

Evaluation of workshop activities would be done through test and quiz at the end of the workshop.

Submitting a write up of atleast 500 words about the learning outcome from the workshop.

### **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Hands on training

Simulation

Group Activity

Role Play

Quiz

### **Evaluation Scheme:**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# Syllabus - Fifth Semester

## CONTACT LENS-I

**Course Code: OPT2501**

**Credit Units -03**

**Course Objectives:** Upon completion of the course, the student should be able to:

- Understand the basics of contact lenses
- List the important properties of contact lenses
- Finalise the CL design for various kinds patients
- Recognize various types of fitting
- Explain all the procedures to patient
- Identify and manage the adverse effects of contact lens

### **Course Contents:**

#### **Module-I**

Anatomy and physiology of anterior segment, History of contact lenses, Optics of contact lenses, comparison spectacles, Contact lens designs, Corneal oxygenation in contact lens wear

#### **Module-II**

Contact lens fabrication, Manufacturing of Rigid and soft Contact Lenses –Various methods

Pre fitting examination-steps, significance, recording of results, Instruments used for examination, Special investigation in pre-fitting examinations., Keratometry and corneal topography, Slit lamp examination, Discussion with patient, choice of lens type

#### **Module-III**

Examining the Prospective Contact Lens Patient, Selecting Lens Type, Wear Mode and Replacement Rate, Fitting Spherical GP Contact Lenses, Fitting Spherical Soft Contact Lenses, Correcting Astigmatism with Contact Lenses

#### **Module-IV**

Calculation and finalizing of contact lens parameters, Ordering contact lenses – writing a prescription to the laboratory, Checking and verifying contact lenses from laboratory, Modifications possible with rigid lenses

#### **Practical:**

History Taking role plays, Pre fitting evaluation, RGP CL insertion & Removal, Fitting assessment Over refraction, Follow up examination, Patient instructions, Contact Lenses Do's and don'ts, Instructions for care and maintenance

#### **Practical:**

History Taking role plays; Pre fitting evaluation; RGP CL insertion & Removal; Fitting assessment; Over refraction; Follow up examination; Patient instructions; Contact Lenses Do's and don'ts ; Instructions for care and maintenance.

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & Reference:****Text books:**

# LOW VISION CARE

**Course Code: OPT2502**

**Credit Units: 03**

**Course Objectives:** At the end of the course, the student will be knowledgeable in the following:

- Definition and epidemiology of Low Vision
- Clinical examination of Low vision subjects
- Optical, Non-Optical, Electronic, and Assistive devices.
- Training for Low Vision subjects with Low vision devices
- Referrals and follow-up

**Course Contents:**

## **Module-I**

Definitions & classification of Low vision; Epidemiology of low vision [magnitude]

## **Module-II**

Pre-clinical evaluation of low vision patients, functional needs assessment; Types of low vision aids – optical aids, non-optical aids & electronic devices ,Assistive technologies devices; Optics of low vision aids

## **Module-III**

Clinical evaluation – assessment of visual acuity, visual field, selection of low vision aids, instruction & training; Paediatric Low Vision care

## **Module-IV**

Low vision aids – dispensing & prescribing aspects; Visual rehabilitation & counselling prognostic & psychological factors; psycho-social impact of low vision; Legal aspects of Low vision in India; Eye Disorders & Low vision; Case Analysis

## **Practical:**

Attending in low vision care clinic and history taking; Determining the type of telescope and its magnification (Direct comparison method & calculated method); Determining the change in field of view with different magnification and different eye to lens distances with telescopes and magnifiers; Inducing visual impairment and prescribing magnification; Determining reading speed with different types of low vision aids with same magnification; Evaluation of low vision patient; Prescribing optical devices [ How to use]; Prescribing of non-optical devices [ how to use them]; Visit to blind school and rehabilitation centers; Establishing a low vision in clinic; Report on disability networks in India; Visit to clinics and prepare report on low vision patients

## **VISUAL REHABILITATION:**

### **Module-I: Rehabilitation**

History of Rehabilitation Optometry; Definition and Principles of Rehabilitation; Psychology in Optometric Rehabilitation; Pain and Suffering; Adaptation and Compensatory Adjustment; Human Motivation; Psychological Disturbance and Psychotherapy; Symptomatology of Visual Disorders

### **Module-II: Introduction to Optometry rehabilitation Practice**

A Basis for Practice; Roles in Daily Life and Professional Practice

### **Module-III: Clinical Presentation and Case**

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:****Text books:**

# PUBLIC HEALTH & COMMUNITY OPTOMETRY

**Course Code: OPT2503**

**Credit Units: 02**

**Course Objectives:** At the end of the course students will be knowledgeable in the following areas:

- Community based eye care in India.
- Prevalence of various eye diseases
- Developing Information Education Communication materials on eye and vision care for the benefit of the public
- Organize health education programmes in the community
- Vision screening for various eye diseases in the community and for different age groups.

**Course Contents:**

## **Module-I**

Public Health Concepts; Health systems; Public health and epidemiology

## **Module-II**

Global blindness and visual impairment; Refractive error and low vision as public health issues; Socioeconomic implications of blindness and visual impairment

## **Module-III**

Vision screening; Blindness prevention role of civil society organisations; Eye in primary health care; Contrasting between Clinical and community health programs

## **Module-IV**

Vision 2020: The Right to Sight; Screening for eye diseases; National and International health agencies, NPCB

## **Module-V**

Role of an optometrist in Public Health; Organization and Management of Eye Care Programs – Service Delivery models; Health manpower and planning & Health Economics

## **Module-VI**

Optometrists role in school eye health programs; Basics of Tele Optometry and its application in Public Health; Information, Education and Communication for Eye Care programs

**Practical:** Students will participate in school screening program, one day screening camps, eye camps, eye banks, students will conduct eye donation camps and motivate and counsel public for eye donation.

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT</b>	<b>P</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:****Text Books:**

- BHVI modules and student notes
- Community eye health journals

**References:**

- GVS Murthy, S K Gupta, D Bachani: The principles and practice of community Ophthalmology, National programme for control of blindness, New Delhi, 2002

# BINOCULAR VISION-I

**Course Code: OPT2504**

**Credit Units: 03**

**Course Objectives:** On successful completion of this module, a student will be expected to be able to:-

- Demonstrate an in-depth knowledge of the gross anatomy and physiology relating to the extraocular muscles.
- Provide a detailed explanation of, and differentiate between the aetiology, investigation and management of binocular vision anomalies.
- Adapt skills and interpret clinical results following investigation of binocular vision anomalies appropriately and safely.

**Course Contents:**

## Module-I

Binocular Vision and Space perception; Relative subjective visual direction; Retino motor value; Grades of BSV; SMP and Cyclopean Eye; correspondence, Fusion, Diplopia, Retinal rivalry; Horopter; Physiological Diplopia and Suppression; Stereopsis, Panum's area, BSV

## Module-II

Revision: Anatomy of Extra Ocular Muscles; Physiology of Ocular movements; Center of rotation, Axes of Fick; Action of individual muscles

## Module-III

Laws of ocular motility; Donder's and Listing's law; Sherrington's law; Hering's law; Uniocular& Binocular movements - fixation, saccadic & pursuits; Version & Vergence; Fixation & field of fixation

## Module-IV

Near Vision Complex; Accommodation: Definition and mechanism (process), Methods of measurement, Stimulus and innervation, Types of accommodation, Anomalies of accommodation – aetiology and management; Convergence: Definition and mechanism, Methods of measurement, Types and components of convergence - Tonic, accommodative, fusional, proximal, Anomalies of Convergence – aetiology and management.

## Module-V

Sensory adaptations: Confusion, Suppression, Investigations, Management, Blind spot syndrome; Abnormal Retinal Correspondence, Investigation and management; Eccentric Fixation, Investigation and management; Amblyopia: Classification and management

## Practicals:

Binocular vision assessment, Stereopsis evaluation, Measurement of NPC and NPA, Measurement of AC/A Ratio, Measurement of convergence, Convergence insufficiency and management of cases, ARC-case discussion, Eccentric fixation –Diagnosis and discussion, Amblyopia management –case presentation

## Examination Scheme:

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

# DISEASE OF EYE AND CLINICAL MEDICINE

**Course Code: OPT2505**

**Credit Units: 02**

**Course Objectives:** At the end of the course, students should get acquainted with the following:

Common Systemic conditions: Definition, diagnostic approach, complications and management options

Ocular findings of the systemic conditions

First Aid knowledge

## **Course Contents:**

### **Module-I**

Hypertension – Definition, classification, Epidemiology, clinical examination, complications, and management. Hypertensive retinopathy; Diabetes Mellitus – Classification, pathophysiology, clinical presentations, diagnosis, and management, Complications, Diabetic Retinopathy; Thyroid Disease Physiology, testing for thyroid disease, Hyperthyroidism, Hypothyroidism, Thyroiditis, Thyroid tumors, Grave's Ophthalmopathy; Acquired Heart Disease : Ischemic Heart Disease, Congestive heart failure, Disorders of cardiac rhythm, Ophthalmic considerations

### **Module-II**

Cancer; Connective Tissue Disease; Rheumatic arthritis; Systemic lupus erythematosus; Sjogren syndrome Behcet's syndrome; Tuberculosis – Aetiology, pathology, clinical features, pulmonary tuberculosis, diagnosis, complications, treatment tuberculosis and the eye.

### **Module-III**

Herpes virus (HERPES AND EYE); Hepatitis (Hepatitis A, B, C); Acquired Immunodeficiency Syndrome

### **Module-IV**

Anaemia (Diagnosis, clinical evaluation, consequences, Sickle cell disease, treatment, Ophthalmologic considerations); Common Tropical Medical Ailments; Nutritional and Metabolic disorders: Myasthenia Gravis, Marfan's Syndrome

**Practical:** Visit to Hospital Medicine O.P.D / Ward, Neurology

## **Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

## **Text & References:**

- As recommended by Faculty

# OCCUPATIONAL OPTOMETRY

**Course Code: OPT2506**

**Credit Units: 02**

**Course Objectives:** At the end of the course the students will be knowledgeable in the following aspects:

- in visual requirements of jobs;
- in effects of physical, chemical and other hazards on eye and vision;
- to identify occupational causes of visual and eye problems;
- to be able to prescribe suitable corrective lenses and eye protective wear and
- to set visual requirements, standards for different jobs.

## **Course Contents:**

### **Module-I**

Introduction to Occupational health, hygiene and safety, international bodies like ILO, WHO, National bodies etc; Acts and Rules - Factories Act, WCA, ESI Act.

### **Module-II**

Electromagnetic Radiation and its effects on Eye; Light – Definitions and units, Sources, advantages and disadvantages, standards; Color – Definition, Color theory, Color coding, Color defects, Color Vision tests

### **Module-III**

Occupational hazards and preventive/protective methods; Task Analysis

### **Module-IV**

Industrial Vision Screening – Modified clinical method and Industrial Vision test; Vision Standards – Railways, Roadways, Airlines

### **Module-V**

Visual Display Units; Contact lens and work

**Practical:** Students will visit to hospital for various departments and their functioning; visit to sports stadium to know and counsel athletes for their vision requirements and help them in getting their best performance; Visit to different industries and study the vision requirements of different professionals; To prepare project report for vision requirement in different professions/departments; Case discussions on computer vision syndrome

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT</b>	<b>P</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:****Text Books:**

## CLINICS-IV

Course Code: OPT2507

Credit Units: 03

### Module-I

#### Unit Of competency: Contact lens -1.

The ability to select and fit the most appropriate lens for the planned use

The ability to Identify and manage after care

#### Elements of competence:

1. Recognize Contact lens types and material.
2. Pre fitting evaluation
3. Demonstrates an understanding of the range of rigid lens material and designs available
4. Appropriate choice of rigid lens parameter.
5. Fitting philosophies of rigid lens and fitting assessment.
6. Demonstrates an understanding of the type of astigmatism which require correction.
7. RGP lens adaptation
8. RGP lens wear and care including use of RGP lens care product.
9. Demonstrates an understanding of the range of soft lens materials and design available.
10. appropriate choices of soft lens , Fitting philosophies and fitting assessment.
11. Write appropriate order form for RGP and soft lenses
12. Instruct patient the technique of RGP, soft lens insertion, removal and other relevant handling instructions.

### Module-II

Unit Of competency: Assessment of Binocular vision

The ability to assess the patient with anomalies of binocular vision

The ability to assess binocular status using objective and subjective means

#### Elements of competence:

1. Understand the different objective test available to assess deviation. E.g. cover & motility test
2. Different subjective test available to assess subjective deviation. E.g. fixation disparity
3. Identification of phoria and tropia
4. Measurement of fusional vergence range dist and near
5. Measurement of accommodative facility
6. Measurement of stereopsis
7. AC/A ratio (heterophoria and gradient method)
8. Synoptophore:  
Measurement of SMP, FUSION And stereopsis  
Angle of anomaly  
ARC

### Module-III:

Unit of competency: Low vision and rehabilitation:

The ability to assess a patient with low vision

The ability to advise, refer and provide after care to low vision patients

The ability to refer low vision Patients to other agencies where appropriate

#### Elements of competence:

1. Distance and near vision chart used for low vision
2. Assessment of visual function, including the use of Log MAR and other specialist charts, effects of illumination, contrast and glare.
3. Assessment of visual field of patient with reduced vision.

4. VA criteria for visual impairment, Low vision and visually handicap
5. Indication of binocular low vision aids
6. Knowledge of Optical and non optical devices
7. Identification of patients visual needs
8. Sign and symptoms of ocular and systemic pathologies.
9. Assessment of magnification for distance and near vision
10. Selection of Optical aids for distance and near.
11. Advises on the use of, and dispenses simple low vision aids :  
Identifies which patients would benefit from low vision aids and advice ,  
Understands the principles of magnification,  
Field of view and working distance in relation to different aids Provides advice on the advantages and disadvantages of different types of simple low vision aids ,  
Understands the mechanisms of prescribing magnification including acuity reserve ,  
Gives correct instruction to a patient in the use of various aids, to include: Which specs to use with aid,  
Lighting required, Appropriate working distance
12. Training in use of aids
13. Low vision rehabilitation

#### **Module-IV:**

Unit of competency: Community Visit.

The ability to screen refractive error and knowledge of eye health disorders in community

The ability to impart information in a manner which is appropriate to the recipients.

#### **Elements of competence:**

1. School screening
2. Industrial Eye screening
3. Community eye services.

#### **Evaluation Scheme:**

<b>Attendance</b>	<b>Record file</b>	<b>Written test</b>	<b>Viva</b>	<b>Practical</b>	<b>Total</b>
5	15	30	30	20	100

#### **Text book/ Reference Book**

## SUMMER INTERSHIP EVALUATION-I

**Course Code: OPT2535**

**Credit Units: 02**

### **Objective:**

The basic objective of a Summer Internship is to refine the practical exposure. This summer training will provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the hospital / corporates. Thus this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

### **General Guidelines:**

Every student of Boptom shall be required to undergo a practical training in a organization approved by the Institute for minimum of four weeks, normally in the Summer Vacation, after the end of the fourth semester examinations. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific tasks to the candidate, which will be completed by him/her during the period of training. The work done by the candidate during the training period shall be submitted in form of a training report.

The last date for the receipt of training report AND CASE SHEETS in the department shall be one month after the date of completion of training, i.e. at the beginning of the fifth semester.

### **Evaluation Scheme:**

<b>Attendance</b>	<b>Overall Performance: grading by centre</b>	<b>Viva</b>	<b>Attendance</b>	<b>LOG book Report</b>	<b>Total</b>
5	30	30	10	30	100

## OCULAR PROSTHESIS

**Course Code: OPT2508**

**Credit Units: 03**

**Course Objective:**

This course aims at making the students equipped with the basics of Prosthesis and the various conditions where they are applied.

**Course Contents:**

- Basics on Prosthesis,
- Types of Prosthesis
- Indications,
- Techniques employed,
- Complications,
- Advancements and Results

**Evaluation Scheme:**

Attendance	Record file	Multiple Choice Questions/ Quiz	Viva	Practical skills /performance	Total
5	15	15	15	50	100

**Reference Book**

- J.H. Prince, Ocular Prosthesis, Livingstone, 1946

# REFRACTIVE SURGERY

**Course Code: OPT2509**

**Credit Units: 03**

## **Course Objectives:**

- Provide patients with unbiased, up-to-date advice concerning refractive surgery techniques
- Recognise the most appropriate tests for investigating suitable candidates pre-operatively and assessing visual performance post-operatively
- Recognise post-operative complications
- Appreciate the most appropriate management strategy for a given refractive surgery patient, communicating effectively with the patient and their surgeon
- Interpret and critically review research pertaining to refractive surgery.

## **Course Contents:**

**Module-I:** Background – History of Refractive Surgery, Radial Keratotomy, Excimer Laser Photorefractive Keratectomy, Automated Lamellar Keratoplasty, Laser In Situ Keratoplasty, newer advances

**Module-II:** Refractive surgery Measurement – Peripheral Keratometry, Photokeratoscopy, Videokeratoscopy, Evaluation of Videokeratoscopy, Applications of Videokeratoscopy, Corneal topography reports, Corneal tomography reports.

**Module-III:** Principles of Microkeratomes- Types of Microkeratomes, Achieving the Optimal Flap, Risks & Complications, Flap Creation Using Femtosecond Laser, Advantages & Disadvantages of Femtosecond Laser Customized Ablation Procedures - Why Use Customized Ablation?, Technology Used for Customised Ablation, Customized Ablation Methods, Guidelines

**Module-IV:** Complications of Refractive Procedures- Microkeratome related complication, Laser Ablation related complications, Postoperative Complications, Management.

**Module-V:** Introduction to Phakic IOLs-and Types of Corneal Rings- Preoperative Evaluation & Inclusion Criteria, Surgical Procedures, Overview of Refractive Lens Exchange (RLE), Deciding to perform RLE, Retinal Risks of RLE, Avoiding Retinal Detachment, Informing Patient of Risks, Postoperative Issues, Problems of Phakic IOLs

## **Evaluation Scheme:**

Attendance	Record file	Multiple Choice Questions/ Quiz	Viva	Practical skills /performance	Total
5	15	15	15	50	100

## TERM PAPER

**Course Code: OPT2531**

**Credit Units: 02**

### **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of Clinical Optometry at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

### **Guidelines:**

1. The term paper will be related to the contemporary Optometry topic and it will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

### **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Total</b>
40	40	20	100

# PROJECT

**Course code: OPT2532**

**Credit Units: 03**

## **Objectives:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
<b>75 marks</b>	<b>25 marks</b>

## **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
  - 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
  - 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
  - 4) Abstract: The body of the report should have summary of the project.
    - a) Introduction: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, inclusion & exclusion criteria and method of analysis), Limitations of the Study, and Planning.
    - b) Conceptual Framework / National and International Scenario: (relating to the topic of the Project).
    - c) Presentation of Data, Analysis and Findings
    - d) Conclusion and Recommendations: In this section, the concluding observations based on the main findings and suggestions are to be provided.
  - 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
  - 6) Annexure: Questionnaires (if any), relevant reports, etc.
- (The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **The Steps of a Project Report**

Step I: Selection of the topic for the project by taking following points into consideration:

Suitability of the topic.

Relevance of the topic

Time available at the disposal.

Feasibility of data collection within the given time limit.

Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Methodology,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

Step V: The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor

2) Student's declaration

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.

Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.

Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).

No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## WORKSHOP

**Course Code: OPT2533**

**Credit Units: 01**

### **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The department has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes for Workshop:**

The workshop may be conducted on any of the major themes: These themes are merely indicative and the department may choose any recent and relevant topic of study.

### **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

Relevant study material and references will be provided by the department in advance.

The participants are expected to explore the topic in advance and take active part in the discussions held

Attending and Participating in all activities of the workshop

Group Activities have to be undertaken by students as guided by the department .

Evaluation of workshop activities would be done through test and quiz at the end of the workshop.

Submitting a write up of atleast 500 words about the learning outcome from the workshop.

### **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Presentation

Hands on training

Simulation

Group Activity

Role Play

Quiz

### **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# Syllabus - Sixth Semester

## CONTACT LENS-II

**Course Code: OPT2601**

**Credit Units: 04**

**Course Objectives:** Upon completion of the course, the student should be able to:

- Review the basics of contact lenses
- List the important properties of contact lenses
- Finalise the CL design for various kinds patients
- Recognize various types of fitting
- Explain all the procedures to patient
- Identify and manage the adverse effects of contact lens

### **Course Contents:**

#### **Module-I: Prefitting examination**

Review of Basics; Patient Selection; Pre screening for contact lens wear; Slit Lamp examination; Assessment of Cornea; Assessment of Tear film

#### **Module-II: Contact lens fitting**

Soft contact lens fitting; Soft Toric Contact Lens fitting; Rigid Contact lens fitting; Managing the Presbyope

#### **Module-III: Extended wear contact lens**

Cornea and Oxygen; Extended Wear and Silicone Hydrogel Lenses

#### **Module-IV: Contact lens care**

Contact lens After Care; Contact lens Care System

#### **Module-V: Speciality contact lens**

Therapeutic and Prosthetic contact lenses; Overview of Special considerations for fitting contact lenses; Business Aspects of Contact lens practice; Setting up a Contact lens clinics

Assignment: The student should consult all the manufacturers of RGP lenses and soft lenses and list down various products (Lenses, care products and accessories) available with them. Detailed parameters along with manufacturer recommendation should be noted. Also students will be encouraged to read books and journals and submit a report to the faculty. The topics of the same can be decided by the faculty.

### **Practical**

Pre fitting evaluation; SCL insertion & Removal; Fitting assessment; Over refraction; Follow-up Examination; Toric contact lens fitting and assessment; Cosmetic contact lens fitting and assessment; Do's and don'ts for contact lenses; Care and maintenance; Special instructions for silicone hydrogels; Demonstration for bifocal ,multifocal lenses, scleral lenses, Orthokeratology; Patient communication workshop / role plays; Visit to contact lens manufacturing unit, Case Presentations ( components of Practical exam ); Video preparations ( components of Practical exam)

### **Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:**

## **BINOCULAR VISION-II**

**Course Code: OPT2602**

**Credit Units: 04**

**Course Objective:** The objective of this course is to inculcate the student with the knowledge of different types of strabismus its etiology signs and symptoms, necessary investigations and also management. The student on completion of the course should be able to independently investigate and diagnose case of strabismus with comments in respect to retinal correspondence and binocular single vision. The student should be able to perform all the investigations to check retinal correspondence, state of Binocular Single Vision, angle of deviation and special investigations for paralytic strabismus.

### **Course Contents:**

#### **Module-I:**

Strabismus - Definition, Classification and etiology; Development of squint or ocular deviation; Adaptation to development of ocular deviation; Orthoptic instruments and their uses; Methods of examination

#### **Module-II:**

Anomalous Retinal Correspondence (ARC); Suppression; Amblyopia and eccentric fixation; Definition & Classification; Investigations; Management

#### **Module-III:**

Latent Strabismus (Heterophoria); Esotropia; Accommodative esotropia; Partially accommodative esotropia; Non accommodative esotropia; Microtropia; Recurrent esotropia; Secondary esotropia; Management of esotropia; esotropia associated with vertical deviation; Exotropia; Classification and etiology; Primary exodeviation; Dissociated exodeviation; Secondary exodeviation; Cyclo - Vertical Deviation; Comitant hyper deviation; Dissociated vertical deviation; Dissociated horizontal deviation; Elevation in adduction; Depression in adduction; Cyclodeviation

#### **Module-IV:**

A and V pattern; Paralytic Strabismus; Genetics and occurrence of squint and binocular vision problems; Special Forms of Strabismus; Retraction syndrome (Duane syndrome); Brown syndrome; Adherence syndrome; Strabismus fixus; Strabismus in high myopes; Fibrosis of extra ocular muscles; Graves' Endocrine ophthalmopathy; Acute orbital myositis; Cyclic heterotropia; Acquired motor fusion deficiency; Fracture of orbital floor; Fracture of medial orbital floor; Ocular Myasthenia gravis; Chronic progressive external ophthalmoplegia ( Ocular myopathy of Von Graefe)

#### **Module-V:**

Nystagmus; Principle of non surgical treatment; Optical treatment; Pharmacological treatment; Orthoptics; Chemodenervation of extra ocular muscles – Botulinum Toxin; Principle of surgical treatment; Vision Training Programme (VTP)

#### **Practicals:**

History taking –Role play; Cover test; ocular motility demonstration and hands on various orthoptic instruments and procedures; Case discussion different types of strabismus; Visit to clinic and record cases

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text & References:**

# GERIATRIC OPTOMETRY

**Course Code: OPT2603**

**Credit Units: 03**

## **Course Objectives:**

- The student on taking this course should
- Be able to identify, investigate the age related changes in the eyes.
- Be able to counsel the elderly
- Be able to dispense spectacles with proper instructions.
- Have adequately gained knowledge on common ocular diseases.

## **Course Contents:**

### **Module-I**

Structural, and morphological changes of eye in elderly; Physiological changes in eye in the course of aging.

### **Module-II**

Introduction to geriatric medicine – epidemiology , need for optometry care, systemic diseases (Hypertension, Atherosclerosis, coronary heart disease, congestive Heart failure, Cerebrovascular disease, Diabetes, COPD)

### **Module-III**

Optometric Examination of the Older Adult; Ocular diseases common in old eye, with special reference to cataract, glaucoma, macular disorders, vascular diseases of the eye

### **Module-IV**

Contact lenses in elderly; Pharmacological aspects of aging; Low vision causes, management and rehabilitation in geriatrics; Spectacle dispensing in elderly – Considerations of spectacle lenses and frames

**Practical:** Students will observe and record Geriatric cases actual clinical practice will be done during internship.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>HA</b>	<b>CT</b>	<b>P</b>	<b>EE</b>
<b>Weightage</b>	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

# PEDIATRIC OPTOMETRY

**Course Code: OPT2604**

**Credit Units: 03**

**Course Objectives:** At the end of the course the student is expected to:

- have a knowledge of the principal theories of childhood development, and visual development
- have the ability to take a thorough paediatric history which encompasses the relevant developmental, visual, medical and educational issues
- be familiar with the accommodative-vergence system, the genesis of ametropia, the disorders of refraction, accommodation and vergence, and the assessment and management of these disorders
- be familiar with the aetiology, clinical presentation and treatment of amblyopia, comitant strabismus and commonly presenting incomitant strabismus
- have a knowledge of the epidemiology of eye disease in children, the assessment techniques available for examining visual function of children of all ages and an understanding varied management concepts of paediatric vision disorders
- Have knowledge of the art of dispensing contact lens, low vision aids and referral to the surgeon or other specialists at the appropriate timing.
- have a capacity for highly evolved communication and co-management with other professionals involved in pediatric assessment and care

**Course Contents:**

## **Module-I:**

The Development of Eye and Vision; History taking Paediatric subjects; Assessment of visual acuity; Normal appearance, pathology and structural anomalies of Orbit, Eye lids, Lacrimal system, Conjunctiva, Cornea, Sclera, Anterior chamber, Uveal tract, Pupil, Lens, vitreous and Fundus

## **Module-II**

Oculomotor system, Refractive Examination; Determining binocular status; Determining sensory motor adaptability

## **Module-III**

Compensatory treatment and remedial therapy for : Myopia, Pseudomyopia, Hyperopia, Astigmatism, Anisometropia, Amblyopia; Remedial and Compensatory treatment of Strabismus and Nystagmus

## **Module-IV**

Paediatric eye disorders: Cataract, Retinopathy of Prematurity, Retinoblastoma, Neuromuscular; conditions (myotonic dystrophy, mitochondrial cytopathy), and Genetics; Anterior segment dysgenesis, Aniridia, Microphthalmos, Coloboma, Albinism

## **Module-V**

Spectacle dispensing for children; Paediatric contact lenses

**Practicals:** Students will observe and record pediatric cases .clinical practice will be done during internship.

**Examination Scheme:**

Components	A	HA	CT	P	EE
Weightage	5	5	10	10	70

(CT-Class Test; HA- Home Assignment; P-Practical; A- Attendance; EE-End Semester Examination)

**Text books :**

- Clinical pediatric optometry.L J Press, B D Moore, Butterworth- Heinemann, 1993

## CLINIC-V

**Course Code: OPT2605**

**Credit Units: 03**

### **Course Contents:**

#### **Module-I**

##### **Unit of competency: Contact lens II**

The ability to select and fit the most appropriate lens for the planned use

The ability to Identify and manage after care

The ability to understand the techniques used in fitting complex contact lenses and advises patients requiring complex visual corrections.

#### **Module-II**

##### **Unit of competency: Pediatric and geriatric optometry:**

##### **Pediatric:**

Assess ocular health and systemic health conditions.

Identify risk factor of systemic diseases based on ocular findings.

Assess VA, ocular motility, pupil, Objective and subjective refraction.

Pediatric prescribing decision and their purpose. E.g. early onset myopia

investigation and management of children presenting with anomalies of binocular vision.

##### **Geriatric:**

Evaluate the functional status of the eye, vision system and account special demands and needs.

Assess ocular health and systemic health conditions.

Detect and diagnose ocular abnormalities and disease

Counsel and educate the patients regarding their visual, ocular and related systemic health care status including recommendations for treatment, management and future care.

#### **Module-III:**

Unit of competency: Squint Evaluation:

The ability to assess binocular status using objective and subjective tests

The ability to investigate and manage a patient presenting with heterophoria or heterotropia.

The ability to manage a patient presenting with an incomitant deviations

Demonstration of following Orthoptic instruments/methods and their uses –

Orthoptic Investigative & Therapeutic Procedure.

Cover and uncover test: Differentiate from phoria and tropia.

Measurement of angle of deviation: Subjectively (Synoptophore) and objectively (PBCT/ Modified Krinsky)

#### **Module-IV: Vision Therapy:**

The ability to understand different eye exercise procedure

Restoration of vision and maintain ocular alignments by means of different eye exercise

#### **Module-V: Comprehensive eye examination**

**Evaluation Scheme:**

Attendance	Record file	Written test	Viva	Practical	Total
5	15	30	30	20	100

**Text book/ Reference Book**

# VISUAL REHABILITATION

**Course Code: OPT2606**

**Credit Units: 03**

## **Course Objective:**

Its aim is develop skills for those who want to work in a professional setting assisting adult populations who are blind/visually impaired and integrate compensatory skills and assistive technology that will enable them to live safe, productive, and independent lives.

## **Competencies acquired**

Specific areas of instruction learned by Vision Rehabilitation Therapists will include:

Communication Systems (Braille, handwriting, recording skills, use of electronic reading systems, use of assistive technology and computer access technology, etc.).

Personal Management (grooming, hygiene, clothing organization, medical measurement, socialization skills, etc.)

Home Management (organization and labeling, repair and home maintenance, budgeting and record keeping, etc.)

Activities of Daily Living (cooking, cleaning, shopping, safety, money organization and management, etc.)

Leisure and Recreation (hobbies, woodworking, crafts, sports, etc.)

Psychosocial Aspects of Blindness and Vision Loss

Medical Management (assessment and instruction and training of adaptive medical equipment)

Basic Orientation and Mobility Skills (sighted guide, safety techniques, etc.)

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Record file</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Viva</b>	<b>Practical skills /performance</b>	<b>Total</b>
5	15	25	15	40	100

## **Text & References:**

As per the clinical supervisor

## VISION THERAPY AND LEARNING DISABILITIES

**Course Code: OPT2607**

**Credit Units: 03**

**Course Objective:** Its aim is develop skills for those who want to work as a professional Vision therapist  
--The course on learning disabilities, vision therapy is specifically directed toward resolving visual problems which interfere with reading, learning and educational instruction.

### **Competencies acquired**

Overview of Normal Child Development  
The Relationship between Vision and Learning General Issues  
Visual Efficiency Problems  
Management of Visual Information Processing Problems  
Vision Therapy Procedures for Developmental Visual Information Processing Problems  
Interdisciplinary Management of Learning Problems Case Studies  
The Role of the Optometrist in the Management of Learning Related Vision Problems  
Optometric Assessment Case History  
Optometric Assessment Visual Efficiency Problems  
Optometric Assessment Visual Information Processing Problems  
Various techniques used in management of anomalies

### **Evaluation Scheme:**

Attendance	Record file	Multiple Choice Questions/ Quiz	Viva	Practical skills /performance	Total
5	15	25	15	40	100

### **Text & References:**

- Optometric Management of Learning-related Vision Problems: Mitchell Scheiman, Michael W. Rouse

# EYE BANKING

**Course Code: OPT2608**

**Credit Units: 03**

**Course Objective:**

To familiarise the students with various methods of eye banking and the various procedures involved in tissue preservation, transport and storage.

**Course Contents:**

**Module-I: Quality Assurance and Control**

EB Medical Standards  
EB Standardized Procedures  
Sterilization  
Refrigeration and Temperature Recording  
Instrument Inspection, Cleaning, and Handling  
Quality Assurance Monitoring  
Record Keeping and Documentation  
Professional Standards  
Adverse Reaction Reports  
Consent Informed Consent Procedures and Documentation  
Donor History, Screening, and Evaluation  
Determination of Suitability  
Donation  
Transplant  
Legislation and Regulatory Requirements

**Module-II: Tissue Related Procedures**

Preservation of Tissue  
Procedures and Methods  
Preservation Media  
Transport and Storage of Tissue  
Packaging and Labeling  
Documentation Requirements  
Distribution of Tissue  
Storage  
Examination and Evaluation of Tissue  
Slit Lamp Biomicroscopy  
Specular Microscopy  
Other  
Surgical Procedures  
Penetrating Keratoplasty  
Lamellar Keratoplasty  
Epikeratoplasty  
Patch Graft

**Module-III: Technical Procedures**

Whole Eye Enucleations  
Preparation  
Equipment and Instrumentation

Procedure  
Corneal Excisions  
Preparation  
Equipment and Instrumentation  
Procedure

**Evaluation Scheme:**

<b>Attendance</b>	<b>Record file</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Viva</b>	<b>Practical skills /performance</b>	<b>Total</b>
5	15	25	15	40	100

**Text & References:**

# PROJECT

**Course code: OPT2632**

**Credit Units: 03**

## **Objectives:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
  - 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
  - 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
  - 4) Abstract: The body of the report should have summary of the project.
    - a) Introduction: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, inclusion & exclusion criteria and method of analysis), Limitations of the Study, and Planning.
    - b) Conceptual Framework / National and International Scenario: (relating to the topic of the Project).
    - c) Presentation of Data, Analysis and Findings
    - d) Conclusion and Recommendations: In this section, the concluding observations based on the main findings and suggestions are to be provided.
  - 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
  - 6) Annexure: Questionnaires (if any), relevant reports, etc.
- (The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **The Steps of a Project Report**

Step I: Selection of the topic for the project by taking following points into consideration:

Suitability of the topic.

Relevance of the topic

Time available at the disposal.

Feasibility of data collection within the given time limit.

Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Methodology,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

Step V: The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.

Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.

Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).

No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## Syllabus - Seventh Semester

### (CLINIC-VI A – INTERNSHIP) RETINA, GLAUCOMA, LOW VISION

**Course Code: OPT2701**

**Credit Units: 03**

**Course Objectives:**

At the end of the course, the student will be knowledgeable in the following:

Examination diagnose and manage various conditions of retina

Examine, Diagnose and manage various conditions of glaucoma

Examine manage patients with low vision

Prescribe and train patient for use of low vision devices

**Course Contents:**

**Module-I: Retina and Vitreous: student should be learning following**

Assess pupil reactions

Interpret and investigate the presenting symptoms of the patient.

Examine fundus using direct and indirect techniques

Identify external pathology and offer appropriate advice to patients not needing referral,

Understand of risk factors for common ocular conditions.

Recognise common ocular abnormalities and to refer when appropriate.

Develop a management plan for the investigation of the patient

Manage a patient presenting with reduced vision.

Manage a patient presenting with macular degeneration

Recognize, evaluate and manage diabetic eye disease and refer accordingly.

Evaluate and manage a patient presenting with symptoms suggestive of retinal detachment.

An understanding of the treatment of a range of common retinal diseases.

Recognise ocular manifestations of systemic disease.

Assess symptoms and signs of neurological significance.

Manage patients presenting with sight- threatening eye disease.

Recognise adverse ocular reactions to medication.

Help ophthalmologist in performing Retinal LASERS

Perform and analyse Fluorescein angiography

Perform and interpret test results of OCT

**Module-II: Glaucoma**

The ability to perform an examination of the eye and related structures use instruments in ocular examination and to understand the implications of the findings in terms of subsequent examination techniques. Use a contact tonometer to measure intraocular pressure and analyse and interpret the results of Tonometry- Applanation Schiotz

Amsler grid

Assess visual fields of patients with reduced visual acuity.

Interpret and investigate the presenting symptoms of the patient.

Understanding of risk factors for Glaucoma

Investigate visual fields and to analyse and interpret the results.

Visual fields- confrontations, automated, tangent screen, bernels perimeter

Manage a patient presenting with a red eye.

Manage a patient presenting with reduced vision.  
 Evaluate glaucoma risk factors, to detect glaucoma and refer accordingly.  
 Understanding of the role of optometrists in shared care  
 Recognise adverse ocular reactions to medication.  
 Management : common medications, laser intervention and surgical techniques  
 Glaucoma investigations and procedures  
 GTX,HRT,  
 Provocative test  
 OCT

### **Module-III: Low Vision**

Clinical examination of Low vision subjects  
 Optical, Non-Optical, Electronic, and Assistive devices.  
 Training for Low Vision subjects with Low vision devices  
 Deciding management plan for Referrals and follow-up  
 Visual rehabilitation

### **Examination Scheme**

<b>Component</b>	<b>Attendance</b>	<b>Performance</b>	<b>Log book</b>	<b>Practical skills</b>	<b>Viva</b>	<b>Total</b>
<b>Max marks</b>	05	25	20	30	20	100

### **Text books:**

- A K Khurana: Comprehensive Ophthalmology, 4th edition, new age international (p) Ltd. Publishers, New Delhi, 2007

## (CLINIC-VI B) PEDIATRIC & BINOCULAR VISION

**Course Code: OPT2702**

**Credit Units: 03**

### **Course Objective:**

#### **To inculcate in a student the**

Ability to take an appropriate binocular vision history

Ability to assess eye alignment and eye movements.

Ability to assess sensory fusion and stereopsis.

Ability to assess oculomotor function.

Ability to assess accommodation.

#### **Also to make the student able**

To develop an appropriate timetable for eye and vision examinations for pediatric patients

To select appropriate examination procedures for all pediatric patients

To examine the eye health and visual status of pediatric patients effectively

To minimize or avoid the adverse effects of eye and vision problems in children through early identification, education, treatment, and prevention

To inform and educate patients, parents/caregivers, and other health care providers about the importance and frequency of pediatric eye and vision examinations

### **Evaluation:**

#### **Evaluation will be based on the following competencies:**

Assesses binocular status using objective and subjective means.

Understands the management of patients with an anomaly of binocular vision.

Investigates and manages adult patients presenting with heterophoria

Manages adult patients with heterotropia.

Manages children at risk of developing an anomaly of binocular vision.

Manages children presenting with an anomaly of binocular vision.

Manages patients presenting with an incommittant deviation.

### **Examination Scheme:**

<b>Component</b>	<b>Attendance</b>	<b>Performance</b>	<b>Log book</b>	<b>Practical skills</b>	<b>Viva</b>	<b>Total</b>
<b>Max marks</b>	05	25	20	30	20	100

## (CLINIC-VI C) CORNEA & CONTACT LENS

**Course Code: OPT2703**

**Credit Units: 03**

**Course Objectives:** At the end of the course the student will be able to:

- Examine the anterior segment of the eye with the help of advanced diagnostic instrument.
- Access the ocular health and clinical decision making of types of contact lens is appropriate
- Instruct a patient in the techniques of soft & RGP lens insertion, removal and other relevant handling instructions and Instruct a patient on the principles of lens wear and care including lens care products.

### **Course Contents:**

#### **Module-I: Examination of anterior segment:**

Anatomy & physiology of the anterior segment  
Corneal topography: Measurement and significance  
Keratometry: interpretation of keratometry result.  
Slit lamp bio microscopy procedure  
Tear function test  
Corneal staining  
Corneal sensation test  
Specular microscopy: interpretation of test result

#### **Module-II: RGP lens**

Pre-fitting evaluation  
Nomenclature and lens design  
RGP contact lens fitting  
Correction of astigmatism with rigid lens  
Market availability of different types of RGP contact lens and lens material

#### **Module-III: Soft contact lens**

Nomenclature, design, Material properties and manufacturing techniques.  
Soft contact lens fitting  
Disposable, extended wear and frequent replacement soft contact lens  
Correction of astigmatism with soft contact lens  
Silicon hydrogel lens  
Market availability of different types of soft CL and

#### **Module-IV: Speciality contact lens**

Presbyopic lenses  
Rose k Lenses  
Scleral lenses  
Lenses for irregular cornea  
Orthokeratology  
Myopia control lenses .  
Contact lens fitting in high myopia and hyperopia.

#### **Module-V: Care & Maintenance**

Preservation and disinfection  
Contact lens cleaning and disinfection

Post fitting care of RGP and soft lenses  
Write appropriate order form for RGP and soft lenses  
CL practice management

**Examination Scheme:**

<b>Components</b>	<b>Attd.</b>	<b>Case Presentation</b>	<b>Log book</b>	<b>Viva /CT</b>	<b>EE Practical</b>
<b>Weightage (%)</b>	5	10	15	30	40

**Text book:**

- IACLE modules
- Essential Contact Lens practice : Jane Veys, John Meyler , Ian Davies
- Contact lens Primer : Monica Chaudhry : Jaypee Brothers
- CLAO Volumes 1, 2, 3
- Anthony J. Phillips : Contact Lenses, 5th edition, Butterworth-Heinemann, 2006

- E S. Bennett ,V A Henry :Clinical manual of Contact Lenses, 3rd edition, Lippincott Williams and Wilkins, 2008

## (CLINIC-VI D) PRIMARY EYE CARE

Course Code: OPT2704

Credit Units: 03

### Objectives:

- It is expected that upon completion the student will be able to carry out the standard clinical procedures safely and efficient
- Upon completion of the course the student must be able to achieve these skills

### Module-I: Take down a comprehensive history –

Must be able to take a structured, accurate history of symptoms from patients with a range of ophthalmic problems and needs

Must be able to produce comprehensive, legible and organized record keeping

### Module-II: Do a complete and proper refraction

Visual acuity estimation

Must be able to measure and assess visual function of patients of any age with appropriate tests and techniques like

Lensometry

Retinoscopy

Refraction procedures

Must be able to use subjective and objective techniques to identify and quantify ametropia

### Module-III: Do a torch light examination.

Hirschberg test

### Module-IV: Do a binocular vision assessment

Ocular motility, cover test

Must be able to assess eye alignment and eye movements

Near point of accommodation, Near point of convergence

Do a detailed binocular vision assessment if required in particular cases

**Module-V:** Use a slit lamp to do a complete anterior segment examination and posterior segment as required

Must be able to examine for abnormalities in eye and adnexa especially eyelid, conjunctiva, cornea, anterior chamber, lens and fundus using appropriate instruments and techniques

Must be able to interpret signs and symptoms of ocular abnormality

Must be able to perform applanation tonometry and non contact tonometry

Must be able to take the decision to dilate the eye as per need

Must be able take the decision to use appropriate ocular drugs diagnostically and to aid refraction and fundus examination in consultation with the ophthalmologist.

### Module-VI: Must be able to give a preliminary diagnosis

During management the student must be able to advice on the most suitable form of optical correction

### Examination Scheme:

Components	A	Case Discussion	Log book	Viva /CT	EE Practical
Weightage (%)	5	10	10	25	50

## SUMMER INTERNSHIP EVALUATION-II

**Course Code: OPT2735**

**Credit Units: 06**

### **Course Objectives:**

The basic objective of a Summer Internship is to refine the practical exposure. This summer training will provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the hospital / corporate. Thus this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

### **General Guidelines:**

Every student of Boptom shall be required to undergo a practical training in a organization approved by the Institute for minimum of four weeks, normally in the Summer Vacation, after the end of the fourth semester examinations. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific tasks to the candidate, which will be completed by him/her during the period of training. The work done by the candidate during the training period shall be submitted in form of a training report.

The last date for the receipt of training report AND CASE SHEETS in the department shall be one month after the date of completion of training, i.e. at the beginning of the next semester.

### **Evaluation Scheme:**

<b>Attendance</b>	<b>Overall Performance: grading by centre</b>	<b>Viva</b>	<b>Attendance</b>	<b>LOG book Report</b>	<b>Total</b>
5	30	30	10	30	100

## RESEARCH PROJECT (MID TERM EVALUATION)

**Objectives:** Midterm review of the final year project will be done this semester. The student is required to submit the following during this semester end

Chapter Scheme and distribution of marks:

Chapter 1: Introduction

Chapter 2: Literature review

Chapter 3 : methodology

Chapter 4 : data and its analysis

Pre conclusion and results

Project Report	Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Abstract: The body of the report should have summary of the project.
  - a) Introduction: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, inclusion & exclusion criteria and method of analysis), Limitations of the Study, and Planning.
  - b) Conceptual Framework / National and International Scenario: (relating to the topic of the Project).
  - c) Presentation of Data, Analysis and Findings
  - d) Conclusion and Recommendations: In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexure: Questionnaires (if any), relevant reports, etc.  
(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### The Steps of a Project Report

Step I: Selection of the topic for the project by taking following points into consideration:

Suitability of the topic.

Relevance of the topic

Time available at the disposal.

Feasibility of data collection within the given time limit.

Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Methodology,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

Step V: The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for Evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.

Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.

Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).

No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## Syllabus - Eighth Semester

### INTERNSHIP-II (CLINIC-VII) COMPREHENSIVE EYE CARE & REFRACTION

**Course Code: OPT2801**

**Credit Units: 05**

**Objectives:** It is expected that upon completion the student will be able to carry out the standard clinical procedures especially refraction efficiently and safely.

**Course Contents:**

Upon completion of the course the student must be able to

**Module-I: Take down a comprehensive history –**

Must be able to communicate effectively with the patient, taking into account his/her physical, emotional, intellectual and cultural background – building a rapport

Must be able to take a structured, efficient, accurate history and symptoms from patients with a range of ophthalmic problems and needs

Must be able to produce comprehensive, legible and organised record keeping with appropriate detail and grading

Must be able to interpret and respond appropriately to patient records and other relevant information

**Module-II: Do a complete and proper refraction**

Visual acuity estimation.

Must be able to measure visual function of patients of any age with appropriate tests and techniques

Must be able to assess visual function in patients with visual impairment

Lensometry

Retinoscopy

Refraction procedures

Must be able to use subjective and objective techniques to identify and quantify ametropia

**Module-III: Do a torch light examination.**

Hirschberg test

**Module-IV: Do a binocular vision assessment**

Ocular motility, cover test

Must be able to assess eye alignment and eye movements

Near point of accommodation, Near point of convergence

**Module-V:** Do a detailed binocular vision assessment if required in particular cases as per the format given in binocular vision syllabus

**Module-VI:** Do a pupil evaluation with torch light

**Module-VII:** Use a slit lamp to do a complete anterior segment examination and posterior segment as required

Must be able to examine for abnormalities in eye and adnexa especially eyelid, conjunctiva, cornea, anterior chamber, lens and fundus using appropriate instruments and techniques

Must be able to interpret signs and symptoms of ocular abnormality

Must be able to perform applanation tonometry and non contact tonometry

8. Must be able to take the decision to dilate the eye as per need

Must be able take the decision to use appropriate ocular drugs diagnostically and to aid refraction and fundus examination.

Must be able to give a preliminary diagnosis

During management the student must be able to advice on, order and be able to dispense the most suitable form of optical correction taking into account durability, comfort, cosmetic appearance, age and lifestyle.

**Evaluation Scheme:**

<b>Attendance</b>	<b>Record file Log book</b>	<b>Case discussion- I</b>	<b>Case discussion- II</b>	<b>EE Practical</b>	<b>Total</b>
10	20	20	20	30	100

The final evaluation is based on the Clinical skill evaluation practical exam the candidate will be asked to examine a patient with all details. This examination will primarily measures skills, it contains an assessment, management and communication skills, as well as some interpretation of clinical findings.

The study centre will form an integral part of the evaluation and will be based on the regular performance and participation in grand rounds .discussions and presentations.

**Text book/ Reference Book**

- BHVI modules

## (CLINIC-VII) OPTOMETRIC PROCEDURES & INSTRUMENTS

**Course Code: OPT2802**

**Credit Units: 05**

### **Course Objective:**

This course deals with complete theory and practical experience in all basic tests, instrumentation and procedures necessary to evaluate the ocular health status of a patient. The topics include complete optometric procedures and instruments taught in the previous semesters like case history, gross external examination of the eye and adnexa, pupil and muscle functions, anterior and posterior segment examination, tonometry, visual acuity, and visual fields assessment and so on .

The objective of this course is to apply all theoretical knowledge into examination and optometric management of the patient with ocular problems.

The student should learn to operate all instruments and be able to carry out all ophthalmic procedures.

### **Evaluation Scheme:**

The final evaluation is based on the Clinical skill evaluation practical exam the candidate will be asked to examine a patient with all details. This examination will primarily measures skills, it contains an assessment, management and communication skills, as well as some interpretation of clinical findings. It will be assessing the competence of individual optometrists in the practice of optometry

### **Evaluation Scheme:**

<b>Attendance</b>	<b>Record file Log book</b>	<b>Practical</b>	<b>Written test</b>	<b>Viva</b>	<b>Total</b>
10	20	30	30	20	100

The study centre will form an integral part of the evaluation and will be based on the regular performance and participation in grand rounds .discussions and presentations.

## PROJECT-DISSERTATION

**Course Code: OPT2837**

**Credit Units: 12**

The project evaluation will include assessment at the end of third year (synopsis submission). Midterm review (at the end of 7th semester)

Weightage will be as follows

Synopsis submission = 20% ( end of sixth semester )

Mid-Term review = 30 % ( end of seventh semester)

Final submission and presentation = 50%

Chapter Scheme and distribution of marks: ( submission at end semester )

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework and literature review – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

4) Abstract: The body of the report should have summary of the project.

a) Introduction: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, inclusion & exclusion criteria and method of analysis), Limitations of the Study, and Planning.

b) Conceptual Framework / National and International Scenario: (relating to the topic of the Project).

c) Presentation of Data, Analysis and Findings

d) Conclusion and Recommendations: In this section, the concluding observations based on the main findings and suggestions are to be provided.

5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.

6) Annexure: Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### The Steps of a Project Report

Step I: Selection of the topic for the project by taking following points into consideration:

Suitability of the topic.

Relevance of the topic

Time available at the disposal.

Feasibility of data collection within the given time limit.

Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Methodology,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

Step V: The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.

Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.

Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).

No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## **INTEGRATIVE SEMINAR DURING THE INTERNSHIP**

It serves to teach optometry students how the material in the curriculum relates to their role as optometrist. This will be achieved through a synthesis of lecture, clinical observation, case-based learning and small-group discussion. Once a week, the entire class will attend a one-hour lecture with topics reflective of the ongoing course material being presented in other courses. For two additional hours per week, small seminar group observation and discussion will take place. The seminar meetings will reinforce the lecture concepts through clinical observation and case discussions relating to those observations. Lecture and small-group discussions will include the participation of both basic and clinical science faculty in order to promote integration of the curricular material and to show how the care provided is related to what is currently being learned. This will enable the future clinician to make informed clinical decisions, encourage critical thinking and promote lifelong independent learning.

## **INTEGRATIVE SEMINAR**

Is designed to facilitate the student's transition into clinical internship by using an integrative approach. The course builds upon past Integrative Seminars, providing the student with an environment leading to the development of informed clinical decision making, critical thinking and lifelong independent learning. The student gains a foundation for optometric practice by learning to employ scientific knowledge, utilization of informational resources, doctor-patient interactive skills and clinic participation to form the basis of an individualized patient evaluation, assessment and plan. This will be achieved through a synthesis of group teaching, case-based learning, small-group discussion and clinical experience. Group discussions will include the participation of both basic and clinical science faculty to foster integration of curricular material. As a means of entry into clinical practice, the highest standards of professional conduct and responsibility will be emphasized throughout the course.

### **The interns are required to complete one quarter of senior seminar.**

The seminar meets over four hours each week to provide a small group-learning environment focused on clinical case presentations derived from the participants' clinical experience.

This grand-rounds format will provide a basis for integration and critical analysis of current clinical research with the goal of increasing the participants' understanding, use and communication of evidence-based clinical information.

## **Master of Science - Clinical Research**

**FLEXILEARN**

**-Freedom to design your degree**

## **Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

## **PROGRAM OBJECTIVE**

This course has the following objectives –

- To provide the students with the requisite knowledge that will enable them to pursue a career in the Clinical Research industry.
- Synthesize the highest academic standards with relevance to the need to present business & commercial policies.
- Encourage clinical research methodologies & start PhD programs in clinical research.
- Collaborate with organizations at national & international level in areas of research, training, seminars & conferences.
- Represent the interest of clinical research professionals in the country & ensure that
- India does not lag behind in maintaining the internationally prescribed standards of clinical Ethics.
- To give students in-depth training in both the theoretical and practical aspects of clinical research, regulatory affairs and clinical data management in the clinical research industry.

### **Eligibility**

- Graduate or post graduate from a recognized university in Life Sciences
- (Biochemistry, Pharmacology, Toxicology, Biotechnology, Microbiology,
- Botany or Zoology)
- Doctors (MBBS/ BDS/ BAMS/ BHMS/ BUMS/ BVSc/BSSM)
- Bachelors in physiotherapy, pharmacists (B.Pharm, M.Pharm)
- Nursing graduate

# Syllabus - First Semester

## FUNDAMENTALS OF CLINICAL OPERATIONS

**Course Code: CLR4101**

**Credit Units: 05**

**Course Objective:**

To enrich the understanding of clinical operations procedures in clinical research which sponsor, CRO and Hospital use for conducting clinical trials on patient . To know the importance of clinical research in clinical trials

**Course Contents:**

**Module-I: Introduction to Clinical pharmacology, Overview of Clinical Research Process Drugs:**

Definition of drugs, dose, formulation development, various route of drug administration, sources of drug, pharmaceuticals, labelling of drug, and packaging of drugs Acting on Nervous System, Drugs Acting on Respiratory System, Drugs Acting on Gastrointestinal System, Drugs Acting on Cardiovascular System, Drugs Acting on Kidney, Autacoids and Related Drugs, Hormones and Related Drugs, Drugs Affecting Blood and Blood Formation, Antimicrobial Drugs, Anticancer Drugs. GMP, Quality management, GLP-Objective, medical devices.

**Module-II: Medical terminologies and Clinical Research terminologies:**

Medical Terminologies, List of Symbols/Abbreviations, Abbreviations/Terminologies, Clinical research terminologies, Glossary of clinical trials terms. Adverse drug reactions, A/BE studies, study design.

**Module-III: Phases and Types of Clinical Trials & Good Clinical Practice, GCP-FDA, GCP-WHO:**

Introduction to Clinical trials, Phases of Clinical Trials, Types of Clinical Trials, Randomized Clinical Trial, Non Experimental clinical trials, Superiority trials. Introduction to Clinical trials, Phases of Clinical Trials, Types of Clinical Trials, Randomized Clinical Trial, Non Experimental clinical trials, Superiority trials.

**Module-IV: Site selection, site initiation, monitoring and site closeout:**

Site Selection Visit: Introduction to Site Selection Visit, Flow of Events Prior to SSV, Feasibility Study, SSV Checklist, On Site visit, Elements of Discussion during the SSV, Documentation and Reporting. Site initiation Visit : Introduction, Trials, Initiating the Study, Site initiation process, Procedure Site Monitoring and Site Close Out: Monitor, Responsibility of the Monitor, Aims of Monitoring, Monitoring Plan, Preparation for Monitoring Visits, Monitoring activities, Documenting the Monitoring Visit, Follow-up of Persistent Non-Compliance at site, Site Close Out, Flow of Events Prior to Site Close Out Visit, On Site Close Out visit.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

**Text & References:**

**Text:**

# CLINICAL DATA MANAGEMENT

**Course Code: CLR4102**

**Credit Units: 04**

## **Course Objective:**

To enrich the understanding of clinical data management procedure in clinical research which sponsor, CRO and Hospital use for clinical trials. To know the latest technology of clinical data management used in clinical trials

## **Course Contents:**

### **Module-I: Introduction to Clinical Data Management and SOPs**

Introduction to CDM, Computer system validation (CSV), Clinical Data Management flow, Data Management team, Roles and responsibilities of key team members and sponsor, SOPs of data management, review and authorization. CRF design , Procedure for CRF design, elements of CRF, data points to be captured in individual CRFs. Database design and build ,Introduction to data base design and build, data base design, data base validation. Clinical data entry process, Data entry screen validation, data entry process, symbols, data entering. Electronic clinical trials, advancement in drug discovery ,CTRI ,clinical trial for biological products and medical devices

### **Module-II:**

Electronic data and lab data loading ,electronic data interchange-Architecture for EDI, Advantages of using EDI, barriers to implementation, positives and negatives , Lab data loading  
Roles and responsibilities of lab loader technician, helpdesk, study coordinator, loading lab data, electronic/lab file contents, typical problems, lab data findings, Quality Assurance, SOPs for processing lab data, taking lab data seriously.

### **Module-III:**

Quality control of clinical data , Terminology and definitions, quality control process, data errors and quality measurement, responsibilities, operational QC, data management matrix

### **Module-IV:**

Database lock and data transfer, Introduction to data base lock, minimum standards, procedure, errors found after database closure, freezing the data base, best practices, recommended Standard Operating Procedures. Introduction to data transfer, procedure, best practices.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Text & References:**

- Clinical Data Management: 2nd Edition by Richard K. Rondel, Sheila A. Varley, Colin F. Webb
- Practical Guide to Clinical Data Management by Susanne Prokscha - Taylor & Francis

# STATISTICS FOR CLINICAL RESEARCH

**Course Code: CLR4103**

**Credit Units: 04**

## **Course Objective:**

To enrich the understanding of biostatistician procedure in clinical research which sponsor, CRO and Hospital use in clinical trials. To know the importance of biostatistics in clinical trials.

## **Course Contents:**

### **Module-I:**

Introduction and basic concepts ,Overview of the drug development process, bias, randomization, blinding, choice of control group. Organization and display of data, Types of data, graphical diagrammatic representation of data. Role of biostatisticians in clinical research, ANOVA –Survival analysis, measurement scales and variables, sampling, degree and meaning of correlation, and its types , karl Pearson and spearman correlation coefficient ,difference b/w correlation and regression.

### **Module-II:**

Measures of Central tendency ,Mean, median, mode, measure of dispersion ,Standard Deviation, Standard Error, Variance, range, Coefficient of Variation. Skewness & Kurtosis.

### **Module-III: Correlation and Regression**

**Correlation:**, types of data required, assumptions, correlation coefficient, significance of correlation, meaningfulness of correlation coefficient. **Regression:-**, Simple linear regression.

### **Module-IV:**

Probability and probability distributions, Definitions, probability distribution curves. Continuous probability distribution-Normal distribution, properties and applications. Discrete probability distribution-Binomial & Poisson distribution, properties and applications. Test of significance-F –test, t-test & chi-square test. Statistical input during protocol design, Demonstration of sample size calculation: comparing two means, Sample size computation

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **PRACTICAL**

**Credit: 01**

1. Collection of data & statistical calculations
2. Preparation of charts/graphs
3. Problems based on measure of central tendency.
4. Problems based on measure of dispersion.
5. Problems based on test of significance-t-test, F-test, chi-square test.
6. Problems based on correlation & regression.
7. Problems based on Probability

# BASICS OF PHARMACY, DRUG DISCOVERY AND DEVELOPMENT

**Course Code: CLR4104**

**Credit Units: 05**

## **Course Objective:**

To enrich the understanding of pharmacology, drug discovery procedure in clinical research which sponsor, CRO and Hospital use for patient protection. To know the importance of drug discovery in clinical trials

## **Course Contents:**

### **Module-I:**

History of Pharmacy, Indian Pharmaceutical industry, Drugs-sources, nomenclature, classification, Pharmacopoeias, Formulary, Codex. Branches of Pharmacy: Pharmacognosy, Pharmaceutical chemistry, Quality Assurance, Pharmaceutics, Pharmacology, Pharmacy Management and Pharmacy Practice. Pharmaceutical Manufacturing-Quality Assurance and Quality Control.

### **Module-II:**

Drug Regulatory Environment-Pharmaceutical Legislation in India, Drug regulatory authorities, International Conference on Harmonization, Good Practices and Quality Management, Drug Master File.

### **Module-III:**

Drug Discovery & Development. History of drug development, Drug Discovery Pipeline, Drug Discovery Process. Approaches to Drug Discovery: Synthetic/medicinal chemistry, combinatorial synthesis, Natural Product, In Silicon approach or CADD, QSAR, Discovery Genomics.

### **Module-IV:**

Personalized medicines, High throughput screening. Manufacturing and packaging Manufacturing-Multitasking machines Packaging-cGMP, USP requirements on containers and closures, Quality Control, Inhalation drug products, drug products for injection, drug products for ophthalmic, liquid based oral and topical drug products, post approval packaging changes.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Text & References:**

- Drug Discovery and Development , 2nd Edition by Raymond G Hill
- Drugs: From Discovery to Approval by Rick Ng

## Syllabus - Second Semester

### PRECLINICAL STUDIES AND SAFETY

**Course Code: CLR4201**

**Credit Units: 05**

**Course Objective:**

To enrich the understanding of pre-clinical drug discovery procedure in clinical research  
To know the importance of Preclinical studies and various procedure used in clinical trials

**Course Contents:**

**Module-I:**

Experimental animals used, Equipments used in ATC, Sterilization techniques, media for animal cell culture. Cell culture and cell lines, concepts in mammalian and non-mammalian culture, applications of cell culture, Assessment of preclinical data, assessment of cost benefit and risk ratio.

**Module-II:**

History of toxicity, relationship between dose and toxicity, types of toxicity, factors influencing toxicity, toxins, toxicity studies, special toxicity studies, in vitro models, in situ methods, in vivo models

**Module-III:**

Good Laboratory Practices, ICMR-GLP guidelines, FDA-GLP guidelines, Organization and personnel, facilities, equipment, testing facilities operation, test and control studies, protocol for and conduct of a non-clinical laboratory study, records and reports, disqualification of testing facilities, OECD-GLP guidelines, quality assurance program, facilities, test systems, test and reference items, Standard Operating Procedures, Performance of the study, reporting of study results, storage and retention of records and materials.

**Module-IV:**

Drug action, mechanism of drug action, dose-response relationship, therapeutic index, undesirable effects, disease modeling–hypertension, asthma, acidity, arthritis, cancer, addiction, autoimmune diseases, pain, epilepsy, inflammation.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

**Text & References:**

**Text:**

- Basic Principles of Clinical Research and Methodology by S.K.Gupta
- Drug Discovery and Development by Raymond G Hill

# IPR & DATA EXCLUSIVITY, BIOETHICS IN CLINICAL RESEARCH

**Course Code: CLR4202**

**Credit Units: 05**

## **Course Objective:**

To enrich the understanding of IPR and bioethics procedure in clinical research which sponsor, CRO and Hospital use for patient protection .To know the importance of ethics and IPR law used in clinical trials .

## **Course Contents:**

### **Module-I:**

Intellectual property rights, Laws of IPR, patents, The World Trade Organization and the TRIPS agreement, copy rights, the rationale for IP protection, the evidence about the impact of IP, Technology Transfer, Contracts and Agreements ,CIOMS , Insurance for research injuries , contractual agreement.

### **Module-II:**

The Data Protection Act & data mining, data and disclosure, data exclusivity, data exclusivity as a governmental function, commercial and economical rationale for test data, confidentiality, current state of data protection.

### **Module-III:**

Introduction to bioethics, ethical issues in preclinical (animal) studies, & clinical studies-Ethical principles, Institutional Review Board, Special issues in research. Ethical Guidelines-ICMR, Institutional Ethics Committees, Institutional Review Board, Ethics-SOPs Ethical issues based on methodology of clinical Research. The ethics of clinical research in developing countries.

### **Module-IV:**

Basic philosophies of animal ethics: (3 'R's), Animal Ethics Committee, executive, meetings, confidentiality and indemnity, period of approval, joint animal ethics committee, process to establish an AEC, guidelines for ethical conduct in the care and use of animals. Social responsibility for clinical researcher.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Text & References:**

- Basic Principles of Clinical Research and Methodology by S.K.Gupta

# REGULATORY AFFAIRS

**Course Code: CLR4204**

**Credit Units: 05**

## **Course Objective:**

To enrich the understanding of Regulatory Affairs procedure in clinical research for global business purposes. To know the procedure of regulatory submission from CRO, Sponsor.

## **Course Contents:**

### **Module-I**

#### **Introduction regulatory affairs:**

Overview of judicial system in India, Medical Evidence, Legitimacy and Paternity, Privileged Communication and Professional Secrets, The Rights and Obligations of a Medical Professional to Patient, Medical Malpractice, Code of Medical Ethics.

### **Module-II:**

#### **The Drugs and Cosmetics Act & Schedule Y:**

Introduction to Drugs and Cosmetics Act, Aims and Objectives, Definitions, Administrative bodies, Schedules to Drug Rules, Import of drugs, Manufacture of drugs, Sale of drugs, penalties for offence regarding sale of drugs, labelling and packaging of drugs . Schedule Y, Clinical trials, Studies in special populations, Post Marketing Surveillance, special studies. Bioavailability and Bioequivalence studies, Amendment of Schedule Y.

### **Module-III:**

#### **Food and Drug Administration (FDA):**

Introduction to Food and Drug Administration, Laws Enforced by the FDA, Food and Drugs Act, Food Standards during 1930s, 40s and 50s, Center for Drug Evaluation & Research (CDER) Establishment-first step, Drug Inspection laboratory, functions and activities of CDER, post drug approval activities. Center for Food Safety & Applied Nutrition (CFSAN)CFSAN-Mission, scope of responsibility, Organization of CFSAN, Applicability of Food Safety Law, precaution in regulating animal foods, authority to reconsider data, pesticides, plant and animal health regulations, FDA nutrition policy: labeling and fortification.

### **Module-IV:**

#### **Regulatory authorities & ICH:**

Regulatory authorities in India Indian FDA, DCGI, Schedule Y, ICMR, GEAC, AERB, DGFT, DTAB, DBT Guidelines and other important provisions, Indian regulatory approval process, regulatory timelines, approval timeline, approval letter. ICH and Process of Harmonization: History and structure of ICH, Process of Harmonization ICH Guidelines, Categories of ICH guidelines, Quality, Safety, and Efficacy Guidelines.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Text & References:**

1. A guide book for regulatory submission: Sandy Weinberg.
2. A guide to clinical drug research: A.Cohen & J. Posner.
3. FDA Regulatory affairs: Douglas J. Posano & David Mantus.
4. Introduction to regulatory affairs: Vedjignesh.
5. Regulatory affairs: Fegodets.

# AUDIT AND INSPECTION

**Course Code: CLR4206**

**Credit Units: 05**

## **Course Objective:**

To enrich the understanding of Audit and inspection procedure in clinical research for global business purposes. To know the importance of Audit and inspection for CRO, Sponsor and Hospital.

## **Course Contents:**

### **Module-I: Introduction to Audits and quality assurance :**

Quality Assurance, Definition, Quality system, The Quality Plan, Quality Assurance (QA), Quality Control (QC), Differentiating quality control and quality assurance, Structuring the quality assurance function, Critical Issues For Organizing The Quality Assurance Function, Overview Of QA Activities Audits: Definition of audit, Quality Assurance Audits In Clinical Research, Motives For Process Audit, Objectives Of Process Audit, Auditors, Conducting A Clinical Research Department Process Audit, Audit findings, Research Fraud and misconduct, site audits, FDA inspections, PL 483 warning letters, Auditing clinical data management function.

### **Module-II: Site audits, fraud and misconduct:**

Definition of audits as per ICH GCP, Goals and objectives of study site audits, Types of clinical trial site audits, Criteria for onsite audits, The audit process, Audit preparation activities, Common audit findings.

### **Module-III: FDA Inspections, PL 483, and warning letters :**

Definitions, Differentiating inspection from audits, Types of inspections, Purpose of regulatory inspections, The process of inspection, forms, warning letters, Selection of the study site for inspection, Forms, warning letters.

### **Module-IV: Auditing CDM function:**

Types of audits in CDM, Audit process, Activity-specific audits, Protocol audit, CRF audit, Audit of the Study Database Build, DMP review, Study-specific audit, Common findings during a data management audit.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Text & Reference:**

- Clinical trials audit-David machin
- Introduction to Audit & inspection-DJ Cockbuern
- Clinical trials audit preparation:a guide for good clinical practice inspection: Vera mihajlovic & madzarevic.

## Syllabus - Third Semester

### PROJECT MANAGEMENT AND BUSINESS DEVELOPMENT

**Course Code: CLR4301**

**Credit Units: 05**

**Course Objective:** To enrich the student role and responsibility of Project manager in clinical trials  
To know the importance of Project manager in clinical research

**Course Contents:**

**Module-I: Introduction to Project Management :**

The triple constraints in Project Management, Project management activities, Project objectives, Project management Documents, Project control variables, Project Management & Clinical Trials, Role of Project Management in Clinical Trials, Major Roles of a Project Manager in a CRO, Ensuring Project Success.

**Module-II: Project Management Process & Project Development Plan in clinical research:**

Initiating, Planning, Executing, Monitoring & Controlling, Closing .Preparation of Clinical Project Development Plan, Contents of Clinical Project Development, Plan, Review and Approval of CPDP.

**Module-III: Business Development in the Clinical Research Industry:**

Introduction & Stages of Business Development-Start-up Phase, Growth Phase, Maturity Phase, Decline Phase. Outsourcing in Clinical Research, Reasons for outsourcing to contract research organizations, The India Advantage, Scope and Future of CRO, List of Clinical Research Organizations in India, List of IT companies offering services in Clinical Research. Role of business development manager.

**Module-IV: Clinical Research outsourcing & Services Offered by CROs:**

Benefits of outsourcing, Out/In-Sourcing of Clinical Services, Process of outsourcing Phase I to Phase IV studies, Acute, Sub-acute, Chronic animal studies, Bioequivalence and Bioavailability, Clinical Trial Management, Clinical Trial Monitoring, Pharmacovigilance - Drug Safety, Data Management, Regulatory Affairs, Protocol Development, Site Management, Clinical Trial Supplies, Centralized Lab Management, Centralized ECG reading services, Centralized Imaging Services.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

**Text & Reference:**

1. Project Management - The Managerial Approach: Clifford Gray and Erik W. Larson
2. Principles of project management: Richard A. Billows.
3. Principles of project management & risk management: R.Max Wideman.
4. Business development: the expanding role of the project management: Lew Ireland

## SPECIAL REGULATORY PROCESS

**Course Code: CLR4302**

**Credit Units: 04**

**Course objective:** To enrich the student role and responsibility of Regulatory bodies in clinical trials  
To know the importance of regulatory affairs in clinical research

### **Course Contents:**

#### **Module-I:**

##### **IND Requirements for New Drugs, Biologics, Botanical Drug Products, Dietary Supplements (Nutraceuticals) :**

IND application, FDA's role in Drug Development, Types of INDs, Categories of INDs, Content of INDs, Resources for IND Applications, Guidance Documents for INDs, Manual of Policies and Procedures (MaPPs), Laws, Regulations, Policies and Procedures, IND Forms and Instructions, Emergency use of an Investigational Drug or Biologic, FDA's Drug Review Process: Ensuring Drugs are Safe and Effective, Stages of Drug Development and Review, The Quality of Clinical Data, Drug Safety Oversight Board (DSOB), Botanical Drug Products, Global Regulatory Standards For Dietary Supplements/Nutraceuticals.

#### **Module-II:**

**Compliance of Chemistry, Manufacturing, Control (CMC) Information:**(a)CMC Information for IND applications for Exploratory Phase I Studies,(b)CMC Information for IND Applications for Phase II & Phase III Studies

#### **Module-III:**

##### **Regulatory Process for cosmetics, Medical Devices and Veterinary Products**

##### **Cosmetics Regulation:**

Indian Scenario-Prohibition of Import of Cosmetics, Standards of Quality, Import of Cosmetics, Manufacture of Cosmetic for Sale or for Distribution, Labeling, Packaging and Standards of Cosmetics. a) Medical Devices / Diagnostic Kits- US FDA Scenario, Indian Scenario (b) Veterinary Products- US FDA Scenario, Indian Scenario

#### **Module-IV:**

##### **Biosimilars & Biopharmaceuticals:**

EMA, background, Guideline on Similar Biological Medicinal Products ,Guideline on similar biological medicinal products containing biotechnology-derived proteins as active substance, Guideline on Similar Biological Medicinal Products containing Biotechnology- Derived Proteins as active Substance: Non-Clinical and Clinical Issues. Indian regulations and guidance of Biopharmaceuticals – Regulatory bodies, Guidelines for generating preclinical and clinical data for r-DNA based vaccines, diagnostics and other biological.

### **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

### **Text & Reference:**

1. FDA Regulatory affairs: Douglas J. Posano & David Mantus.
2. A guide to clinical drug research: A.Cohen & J. Posner.
3. Introduction to regulatory affairs: Vedjignesh.
4. A guide book for regulatory submission: Sandy Weinberg

# REPORTING AND MEDICAL WRITING

Course Code: CLR4303

Credit Units: 05

## Course Objective :

To enrich the student role and responsibility of medical writer in clinical trials. To know the importance of medical writer in clinical research.

## Course Contents:

### Module-I:

#### Fundamentals of Medical Writing & Data interpretation and presentation:

The Scope of Medical Writing, Qualities of effective medical writer, Types of Data, Tools of data presentation Graphical methods for qualitative data: Frequency Tables, Pie Charts, Bar charts, Comparing Distributions, Graphical methods for quantitative data: Stem and leaf plots, Histograms, Line Graphs Error, Bookmark not defined. Dot plots Error, Bookmark not defined. Box Plot, Scatter Plot.

### Module-II:

#### The Clinical Study Report & Reporting clinical laboratory tests:

Structure of CSR and possible modifications, study patients, efficacy evaluation, safety evaluation, discussion and overall conclusions, tables, figures and graphs referred to but not included in the text, reference list, appendices. Reference ranges (normal ranges), Interpretation of normal values, Units of measurement, Factors Affecting interpretation of test.

### Module-III:

#### Preparation of Investigator's Brochure, clinical summaries and global submission dossiers:

Contents of the Investigator's Brochure, Table of Contents, Summary, Introduction, Physical, Chemical, and Pharmaceutical Properties and Formulation, Non-clinical Studies, Effects in Humans, Summary of Data and Guidance for the Investigator Components of the CTD, Global Submission Dossiers, Electronic Common Technical Document

### Module-IV:

#### Bibliography preparation ,Computer skills & Language for medical writers :

Types of referencing – Primary and secondary, standard referencing. Different styles of referencing – Focus on Vancouver style. MS word ,MS Excel & MS PowerPoint skills –complete knowledge & skills for typing, tabulation, slide show & animation preparation. Basic language orientation-Sentence Structure and Patterns, Choice of active or passive voice, proper use of tenses. Punctuation for Clarity and Style–types of punctuation, capitalization, use of hyphens, quotation marks, apostrophes, commas, and differences between British and American English. Techniques to improve simplicity and clarity of style-linking of passages and construction of paragraphs, building of strong sentences.

## Examination Scheme:

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## Text & Reference:

1. Clinician's Guide to Medical Writing :Robert B. Taylor. 1st ed. 2004. Springer Publications.
2. Guidebook to Better Medical Writing :Robert L. Iles (Author), Debra Volkland. Iles
3. Medical writing & clinical reporting: Beltas.
4. Medical writing: Cam Johns tan.
5. Medical writing & reporting:Dr.Nancy Snyder man.

# PHARMACOGENOMICS

**Course Code: CLR4304**

**Credit Units: 04**

## **Course Objective:**

To enrich the student important role of pharmacogenomics in drug discovery in clinical trials  
To know the importance of pharmacogenomics in clinical research

## **Course Contents:**

### **Module-I: Introduction to pharmacogenomics:**

History, Chronology of Events, Pharmacogenetics and Pharmacogenomics: The Difference, Benefits of Pharmacogenetics, Pharmacogenetics in Practice, Promise of Pharmacogenomics, Limitations, Pharmacogenomics drugs in the market, Future of Pharmacogenomics

### **Module-II: Determinants of drug response & Bioinformatics tools for pharmacogenomics:**

Pharmacokinetics and pharmacodynamics of drug, drug properties that influence its pharmacokinetics and pharmacodynamics .Bioinformatics, Divisions of Bioinformatics, Fields Related to Bioinformatics, Application of Bioinformatics in various disciplines/fields, Major categories of Bioinformatics Tools with examples

### **Module-III: Pharmacogenetics of enzymes and transporters:**

Xenobiotic -Phase I and II reactions Drug transporters-Structure and model of drug transporters, transport mechanisms, polarized expression of drug transporters, drug transporters in barrier epithelium, classification of drug transporters, ABC and SLC transporters, genetic variation and drug response, genetic variation in membrane transporters

### **Module-IV: Clinical pharmacogenomics and clinical trials:**

Pharmacogenomics in clinical practice, the role of drug metabolizing enzymes in cardiovascular pharmacology, Pharmacogenetics and clinical trials-Issues in clinical trials ethical implications of pharmacogenomics research, guidance on pharmacogenomics data.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Text & Reference:**

1. Basic and Clinical Pharmacology :Bertrand Katzung
2. Essentials of Medical Pharmacology :K. D Tripathi
3. Pharmacology: Rang, Dale and Ritter
4. Pharmacology and Pharmacotherapeutics:Satoskar,18th ed, 2003

# PHARMACOVIGILANCE AND SAFETY MONITORING

**Course Code: CLR4305**

**Credit Units: 04**

## **Course Objective:**

To enrich the student role and responsibility of Pharmacovigilance and various safety monitoring's in clinical trials .To know the importance of Pharmacovigilance in clinical research.

## **Course Contents:**

### **Module-I: Introduction to Pharmacovigilance:**

Introduction, Definition, requirement of Pharmacovigilance needed, Objectives of Pharmacovigilance, and Agencies concerned with Pharmacovigilance, Reporting ADRs, changes to recommendations for use, Methods involved in Pharmacovigilance, Pharmacovigilance plans, Scope of Pharmacovigilance, Indian scenario, Pharmacovigilance and pharmacogenomics.

### **Module-II: Safety monitoring process & good Pharmacovigilance Practices (GPP) :**

The Monitoring Process, the Role of Institutional Review Boards and Data Safety Monitoring Boards, Quality Assurance Monitoring, Ending Trials Early: Protecting the Interests of Participants and the Public. GPP, Overview of Risk Management Goals and Guidance, Adverse events, serious adverse events, Reporting of AE & SAE.

### **Module-III: Good reporting practices and safety signals:**

Risk management process, Signals, Case report, Case series, Causality, Data mining, Reporting rates Vs. incidence rates, Pharmacovigilance plans, Pharmacoepidemiological safety studies

### **Module-IV: Pharmacoepidemiology, Registers, Surveys :**

Pharmacoepidemiology, Guidelines for Good Pharmacoepidemiology Practices (GPP), Pharmacovigilance Methods, Use of health care databases in Pharmacoepidemiology, Registries, Surveys, Pharmacoeconomics and pharmacoepidemiology, Pharmacoepidemiology and pharmacokinetics, International drug monitoring, Using eHealth information for comprehensive Pharmacovigilance surveillance, Pharmacoepidemiology in India, Pharmacovigilance and India

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Text & Reference:**

- Textbook of therapeutics Drug and Disease Management: Eric T Herfindel, Dick R. Gourley, 6th ed.
- Assuring Data Quality And Validity In Clinical Trials For Regulatory Decision Making : Janet Woodcock, Frederick Ognibene, John Overbeke.2003;Welly Publication.

# SUMMER INTERNSHIP

**Course Code: CLR4335**

**Credit Units: 06**

## **GUIDELINES FOR SUMMER TRAINING**

The main objective of summer training is to familiarize students to laboratory environment and make them learn to handle equipments and softwares, design experiments and analyze the results. The student will be supervised by one or more faculty members and he or she will be required to submit a synopsis. While writing a synopsis emphasis should be given to make it publishable. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student. Initial drafts should be critiqued by the faculty guide and corrected by the student at each stage.

The File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation.

### **In general, the File should be comprehensive and include**

- A short account of the activities that were undertaken as part of the project;
- A statement about the extent to which the project has achieved its stated goals.
- A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
- Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
- Any problems that have arisen that may be useful to document for future reference.

### **Report Layout**

The report should contain the following components:

- TITLE PAGE
- CERTIFICATE
- ACKNOWLEDGEMENT
- ABBREVIATIONS
- CONTENTS WITH PAGE NUMBERS
- CHAPTER –
  - a. INTRODUCTION
  - b. REVIEW OF LITERATURE
  - c. MATERIALS & METHODS
  - d. RESULTS & DISCUSSION
  - e. SUMMARY AND CONCLUSION
  - f. REFERENCES
  - g. APPENDIX (OPTIONAL)
- 1 inch Margin on left side & 1"each on other sides.
- Single side of the paper to be used.
- Times New Roman.

### **Font Size**

- 12 (Bold for headings)
- 12 (Normal for Matter)
- 14 (for Chapter Names)
- 1.5 line spacing
- Numbering on the right hand Top of the page
- Numbers on pages before chapters to be done in Roman at the bottom of the page

## References

This should include papers and books referred to in the body of the report. These should be ordered alphabetically on the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

## Examples

### For research article

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic *Escherichia coli* O157: H7. *Clin Microbiol Infect*, **8** (suppl 1): 116–117.

### For Book

Kowalski,M.(1976) Transduction of effectiveness in *Rhizobium meliloti*. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), 7: 63-67

- Scientific names in Italics
- Cover Page containing - Title, Students Name, Supervisors Name, University, Name (along with logo), Course name & year of Submission in the prescribed format
- 2 copies to be submitted

## ASSESSMENT OF THE PROJECT FILE

Essentially, marking will be based on the following criteria: the quality of the report, the technical merit of the project and the project execution.. Evaluation will compose of two components - Project report assessment and Viva - voce. Project report assessment will be done by the two internal faculty members in respective fields. A committee of three faculty members will conduct Viva-voce.

Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project will be assessed as per evaluation format.

## Examination Scheme:

Project Report	50
Viva Voce	50
<b>Total</b>	<b>100</b>

# Syllabus - Fourth Semester

## DISSERTATION

Course Code: CLR4437

Credit Units: 20

### GUIDELINES FOR PROJECT FILE

Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critiqued by the faculty guide and corrected by the student at each stage.

The File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation.

### In general, the File should be comprehensive and include

- A short account of the activities that were undertaken as part of the project;
- A statement about the extent to which the project has achieved its stated goals.
- A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
- Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
- Any problems that have arisen that may be useful to document for future reference.

### Report Layout

The report should contain the following components:

#### ➤ Title or Cover Page

The title page should contain the following information: Project Title; Student's Name; Course; Year; Supervisor's Name.

#### ➤ Acknowledgements (optional)

Acknowledgment to any advisory or financial assistance received in the course of work may be given.

#### ➤ Abstract

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project

#### ➤ Table of Contents

Titles and subtitles are to correspond exactly with those in the text.

#### ➤ Introduction

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used. Methodology should be mentioned in details including modifications if any.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing these section, emphasis should be given on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary never write in “point” form.

➤ **Conclusion**

A conclusion should be the final section in which the outcome of the work is mentioned briefly.

➤ **Future prospects**

➤ **Appendices**

The Appendix contains material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References/ Bibliography**

This should include papers and books referred to in the body of the report. These should be ordered alphabetically on the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

## **Examples**

### **For research article**

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic *Escherichia coli* O157: H7. *Clin Microbiol Infect*, 8 (suppl 1): 116–117.

### **For book**

Kowalski, M. (1976) Transduction of effectiveness in *Rhizobium meliloti*. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), 7: 63-67

## **ASSESSMENT OF THE PROJECT FILE**

Essentially, marking will be based on the following criteria: the quality of the report, the technical merit of the project and the project execution.

Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project.

Project execution is concerned with assessing how much work has been put in.

The File should fulfill the following *assessment objectives*:

## **Range of Research Methods used to obtain information**

### **Execution of Research**

#### **Data Analysis**

Analyse Quantitative/ Qualitative information

Control Quality

#### **Draw Conclusions**

### **Examination Scheme:**

Project Report	50
Viva Voce	50
<b>Total</b>	<b>100</b>

# **Master of Science - Molecular Medicine & Stem Cell Technologies**

**FLEXILEARN**  
-Freedom to design your degree

# Syllabus - First Semester

## CELL BIOLOGY & GENETICS

**Course Code: SCT4101**

**Credit Units: 03**

### Course Objective

The objective of the course is to understand the structure and function of cellular and subcellular components of cells and tissues. It also focuses on the understanding of basic principles of genetics, incorporating the concepts of classical, molecular and population genetics. Compilation is required for recent advances in genetic principles for strong foundation in Biotechnology.

### Course Contents

#### Module I

Introduction to cell and cellular organelles: Cell theory, prokaryotic and eukaryotic cells. Structure and function of cell wall, plasma membrane, nucleus, mitochondria, chloroplast, Nucleus, lysosomes, peroxisomes, golgi bodies, and transport across membranes. Cell locomotion, cytoskeleton, structure and function of cilia and flagella. Cell cycle: molecular events, cell division, mitosis and meiosis.

#### Module II

Cell signaling mechanisms and their significance: General mechanism of signaling and structures of the various types of receptors. Cell proliferation and cell death mechanisms, e.g. apoptosis, necrosis, autophagy, immunogenic and non-immunogenic cell death.

#### Module III

Genetics: classical and molecular genetics, Mendelian principles of inheritance, human genetics. Extension of Mendelism: Allelic variations, influence of environment on expression, penetrance and expressivity, epistasis, pleiotropy. Chromosomal basis of inheritance, linkage, crossing over and chromosome mapping.

#### Module IV

Mutation and mutagenic agents, types of mutations. Numerical and structural changes in chromosomes with emphasis on human syndromes and genetic counseling. Types of cancer, etiology of cancer, metastasis, tumor suppressor genes. Cytological role of p53 and p21 genes in cancer development. Introduction to cancer therapy approaches: chemotherapy, radiation therapy, immunotherapy.

#### Module V

Classical and modern concept of gene, pseudoallelism, position effect, intragenic crossing over & complementation (cistron, recon & nutron) Benzer's work on rII locus in T<sub>2</sub> bacteriophage. Genetics of Population: Hardy-Weinburg Law and its deviations.

### Examination Scheme:

# MICROBIOLOGY & VIROLOGY

**Course Code: SCT4102**

**Credit Units: 03**

## **Course Objective:**

The course will offer thorough understanding of the biology of different forms of bacteria, fungi, protozoa and viruses, their role in disease development as well as in useful applications in biotechnology.

## **Course Contents:**

### **Module I**

Introduction and historical perspective: Discovery of the microbial world, role of microorganisms in transformation of organic matter and in the causation of diseases, development of pure culture methods. Methods in Microbiology: Principles of microbial nutrition, culture media, theory and practice of sterilization, pure culture techniques.

### **Module II**

Prokaryotic structure and function: functional anatomy of bacteria, cell envelope, cell wall, cytoplasmic membrane, capsule, surface appendages, cytoplasm and cytoplasmic inclusions. Growth: Definition of growth, mathematical expression of growth, growth curve, measurement of growth, synchronous growth, continuous culture, culture collection and maintenance of cultures. Systematics and taxonomy: new approaches to bacterial taxonomy, classification including ribotyping, ribosomal RNA sequencing, characteristics of primary domains, taxonomy, nomenclature and Bergey's manual.

### **Module III**

Metabolic diversity among microorganisms: photosynthesis in microorganisms, role of bacteriochlorophylls, carotenoids and phycobilins, Chemolithotrophy, hydrogrn-iron-nitrite-oxidizing bacteria, nitrate and sulphate reduction, methanogenesis and acetogenesis, Fermentations, nitrogen fixation, plant microbe interactions (mycorrhizae).

### **Module IV:**

Archae as earliest life forms, thermophiles, psychrophiles, halophiles, alkalophiles, acidophiles, hyperthermophiles Viruses: Bacterial, animal; structure of viruses; Reproduction and life cycle of RNA and DNA viruses; Viroids and prions. Algae and Fungi: Classification and Reproduction. Host-parasite relationship: Normal micro flora of skin, oral cavity, gastrointestinal tract, Respiratory infections; entry of pathogens into the host, types of toxins (Exo, endo, entro) and their mode of actions, Microbial pathogenesis: Disease reservoirs; Epidemiological terminologies; Infectious disease transmission; Sexually transmitted disease including AIDS, Food and water- borne diseases; pathogenic fungi.

### **Module V**

Chemotherapy/antibiotics: Antimicrobial agents, sulfa drugs, antibiotics, penicillin and cephalosporins, broad spectrum antibiotics, antifungal antibiotics; mode of action.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>Attendance</b>	<b>Assignment/ Project/Seminar/Quiz</b>	<b>EE</b>
<b>Weightage (%)</b>	15	5	10	70

# MOLECULAR BIOLOGY & rDNA TECHNOLOGY

**Course Code: SCT4103**

**Credit Units: 02**

## **Course Objective:**

A complete understanding of molecular techniques like DNA sequencing, restriction mapping, PCR for the cloning and expression of genes can be obtained through the course.

## **Course Contents:**

### **Module I**

Purification of DNA from bacterial, plant and animal cells, manipulation of purified DNA. Introduction of DNA into living cells, transformation, transduction, electroporation, micro-injection.

### **Module II**

Introduction to gene cloning and its uses, tools and techniques: plasmids, cosmids, transposons and other vectors, DNA, RNA, cDNA, viral and non-viral vectors.

### **Module III**

Clinical applications of recombinant technology; Erythropoietin; Insulin analogs and its role in diabetes; Recombinant human growth hormone; Streptokinase and urokinase in thrombosis; Recombinant coagulation factors, Monoclonal antibodies and their role in cancer; Role of recombinant interferons; Immunostimulants; Immune-suppressors in organ transplants; Role of cytokine therapy in cancers.

### **Module IV**

Analysis of DNA by Southern blotting, Analysis of RNA by Northern blotting, Analysis of proteins by Western blot techniques, Dot blots and slot blots, RFLP, AFLP.

PCR: Basic principles and its modification application and uses.

# HUMAN ANATOMY AND PHYSIOLOGY

**Course Code: SCT4104**

**Credit Units: 02**

**Course Objective:** The objective of this course is to familiarize students with basic organization of adult somatic cells, human anatomy and normal physiology. Students will learn basic principles and mechanisms that dictate maintenance of pluripotency in pluripotent stem cells and their differentiation into adult stem cells, somatic cells, tissues and organs.

## **Course Contents:**

### **Module-I:**

Cell anatomy, organizational components, cell division mechanisms in somatic cells and pluripotent stem cells.

### **Module-II:**

Introduction to epigenetics and its role in maintenance of pluripotency and differentiation of pluripotent stem cells into different somatic cell lineages.

### **Module-III:**

Basics of human anatomy & physiology and role of pluripotent stem cells and adult stem cells in maintenance of normal

### **Module-IV:**

Effect of breach in normal cellular physiology and homeostasis on human development.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# BIOANALYTICAL TECHNOLOGIES & INSTRUMENTATION

**Course Code: SCT4105**

**Credit Units: 02**

## **Course Objective:**

The course aims to educate students about bio-analytical instruments, principles of their proper functioning, and analysis methods applied to biological data obtained in experimental techniques, methodology and the safe laboratory practice.

## **Course Contents:**

### **Module I**

BSL I, BSLII, BSLIII laboratory facility development: design and regulatory requirements. Sampling and sample preparation: Sample fixing for various analytical applications and sample processing. Principles of microscopy, Light, dark field, fluorescence microscope, confocal microscope, transmission and Scanning electron microscopy, microtomy and analysis and measurement of image. Fluorescence activated cell sorter (FACS) basic principles and applications.

### **Module II**

Electrophoresis of DNA, RNA and proteins. Capillary electrophoresis, Two-dimensional electrophoresis, Southern blotting, Northern blotting, Immunoprecipitation, Western blotting. Sequencing, Next Generation Sequencing, RNA-Seq. etc.

### **Module III: Centrifugation and Spectroscopy**

Centrifugation techniques: Introduction, Basic principle of sedimentation, centrifuges and their uses, Density gradient and analytical centrifugation.

UV and visible spectroscopy, infrared and atomic absorption spectroscopy, fluorescence spectroscopy, mass spectrometry, MALDITOF, nuclear magnetic resonance and electron spin resonance spectroscopy.

### **Module IV: Chromatography**

Introduction to chromatographic techniques: Theoretical basis of chromatographic separations. Column, Thin layer, Paper, Normal phase and reverse phase chromatography, Ion-exchange, Affinity and Gas Chromatography, High performance liquid chromatography (HPLC) and GLC.

### **Module V**

Principles of X-ray diffraction and X-ray Crystallography. Theory and application of UV-VIS, IR, NMR, Fluorescence, Atomic absorption spectroscopy; X-ray diffraction. Introduction to mass spectroscopy Radioisotopic techniques: Introduction to radioisotopes, detection, measurement and uses of radioisotopes, counting efficiency and autoradiography, biotechnological applications

# BIOSTATISTICS

**Course Code: SCT4106**

**Credit Units: 03**

## **Course Objective:**

The course aims to develop competency and expertise in the application of statistical methods applied to biological data obtained in experimental techniques, methodology and the safe laboratory practice.

## **Course Contents:**

### **Module I**

Statistics and Biostatistics: Preliminary concepts; Measures of Central Tendency: Mean, Median, Mode  
Measures of Dispersion: Range, Standard deviation, Variance

### **Module II: Probability**

Random Experiments, Trial and Event, Sample Space, Mutually Exclusive or Disjoint Events, Mutually Exhaustive Events, Equally Probable Events, Complementary Event, Classical definition of Probability, Statistical definition of Probability, Axiomatic definition of Probability, Addition theorem, Multiplication theorem, Conditional Probability, Bayes' Theorem. Expectation.

### **Module III: Types of Probability Distributions**

Introduction to Normal Distribution, Bernoulli Distribution, Uniform Distribution, Binomial Distribution, Poisson distribution, Exponential Distribution

### **Module IV: Correlation & Regression**

Bivariate distribution Correlation, Types of Correlation, Simple Correlation Coefficient for ungrouped data, Properties and Interpretation of Correlation Coefficient, Coefficient of determination, Scatter diagram, Standard Error, Probable error of Correlation Coefficient. Rank correlation, Some examples. Regression lines and Regression Coefficients, Properties of Regression Coefficients, Some examples. Method of least square: Fitting of straight line

### **Module V: Hypothesis Testing**

Parameter, Statistic, Null hypothesis, Alternative hypothesis, Critical region, Type I Error, Type II Error, Level of significance, P-value and its applications. One sample t-test, Paired t-test, Degrees of freedom for t-test, F test for equality of Population variances, Degrees of freedom for F-test. Normal test for sample mean and population mean, Normal test for two sample means. Chi-square Test: Test of goodness of fit, Test of Independence of attributes, Degrees of freedom for Chi-square test, Coefficient of contingency, Yates' correction for continuity. Analysis of Variance: One way and Two-way (only Examples)

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# BIOLOGICAL PROGRAMMING (BIOINFORMATICS)-I

**Course Code: SCT4107**

**Credit Units: 01**

## **Course Objective:**

The course offers a basic understanding of bioinformatics tools and technologies for understanding different biological pathways at systems level as well as for characterizing cross-talks between different pathways.

## **Course Contents:**

### **Module I: Introduction and overview**

The NCBI data model; sequence databases, sequence retrieval, sequence file formats, submitting DNA and protein sequences; classification of biological databases. Sequence databases (EMBL, GenBank, DDBJ, -UNIPROT, PIR, TrEMBL),

### **Module II: Sequence alignment**

Global and local alignments, statistical significance of alignments, scoring matrices and gap penalties, position specific scoring matrices, programs and methods for Pairwise and multiple alignment, pattern searching programs, family and superfamily representation - Pfam, hidden Markov models.

### **Module III: Predictive methods using DNA and protein sequences**

ESTs: construction, databases, clustering, gene discovery and identification, and functional classification. Protein family/domain databases (PROSITE, PRINTS, Pfam, BLOCK, etc), Cluster databases-An Introduction, Specialised databases (KEGG, etc), Database technologies (Flat-file), Protein identification tools, physical properties, motifs and patterns

### **Module IV: Structure databases**

Structural databases - PDB and MMDB, structure file formats, Secondary and tertiary structure prediction methods in proteins, Internal and external coordinate system, software to visualize secondary and tertiary structural information in protein.folding classes, structure classification databases – SCOP and CATH;

### **Module V: Comparative genome analysis**

Phylogenetic analysis, Evolutionary Models, Character and distance based Tree building methods; tree evaluation, phylogenetic analysis, parsimony, maximum likelihood trees; Trees-splits and metrics on trees, tree interpretation, Distance – additive, ultrametric and nonadditive distances.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## CELL & MOLECULAR BIOLOGY LAB

Course Code: SCT4108

Credit Units: 01

### Course Contents

#### Module I

Microscopy: Light microscopy, Bright field, Phase contrast.

#### Module II

Cell culture: aseptic suspension and adherent cell culture techniques. Cell number enumeration and cell passage methods, and methods for characterization of cells in culture and cell proliferation.

#### Module III

Induction and characterization of apoptosis and necrosis. Cell mitosis and meiosis and karyotyping techniques. Cell mounting techniques, and study of permanent slides of different types of cancer.

#### Module IV

Bacterial culture techniques, single cell clone isolation, bacterial transformation and transduction techniques.

#### Module V

Study of physical and chemical mutagens on growth of *E. coli*; PTC test.

### Examination Scheme:

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spo tting	Practical Record	Viva
15	10	05	35	15	10	10

# MOLECULAR BIOLOGY & rDNA TECHNOLOGY LAB

**Course Code: SCT4109**

**Credit Units: 01**

## **Course Objective:**

The laboratory experiments in Recombinant DNA Technology would certainly help to comprehend the theoretical aspects of the subject.

## **Course Contents:**

### **Module I**

**Study** of cloning (GFP cloning)

### **Module II**

Design and execution of PCR, RT-PCR, quantitative RT-PCR

### **Module III**

Study of Southern hybridization

### **Module IV**

**Study** of RAPD

### **Module V**

Site directed mutagenesis

## **Examination Scheme:**

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spo tting	Practic al Record	Viva
15	10	05	35	15	10	10

## BIOANALYTICAL TECHNOLOGIES & INSTRUMENTATION LAB

Course Code: SCT4110

Credit Units: 01

### Course Contents:

#### Module I

Cell disruption techniques

#### Module II

Centrifugation – low speed and high speed.

#### Module III

Spectrophotometer techniques

#### Module IV

Chromatography –Paper Chromatography and Thin Layer Chromatography

#### Module V

Electrophoresis –SDS Page and Agarose gel electrophoresis.

### Examination Scheme:

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spotting	Practical Record	Viva
15	10	05	35	15	10	10

## **RESEARCH PRESENTATION / LIT. REVIEW & PRESENTATION**

**Course Code: SCT4111**

**Credit Units: 01**

### **Course Objective:**

Students will learn how to do literature search on a particular topic, how to construct, organize and deliver a scientific presentation.

### **Examination Scheme:**

Literature Search/Project Report	50
Presentation	50
<b>Total</b>	<b>100</b>

# TERM PAPER

**Course Code: SCT4131**

**Credit Units: 01**

## METHODOLOGY

A term (or research) paper is primarily a record of intelligent reading in several sources on a particular subject.

The students will choose the topic at the beginning of the session in consultation with the faculty assigned. The progress of the paper will be monitored regularly by the faculty. At the end of the semester the detailed paper on the topic will be submitted to the faculty assigned. The evaluation will be done by Board of examiners comprising of the faculties.

## GUIDELINES FOR TERM PAPER

The procedure for writing a term paper may consists of the following steps:

1. Choosing a subject
2. Finding sources of materials
3. Collecting the notes
4. Outlining the paper
5. Writing the first draft
6. Editing & preparing the final paper

### *1. Choosing a Subject*

The subject chosen should not be too general.

### 2. Finding Sources of materials

- a) The material sources should be not more than 10 years old unless the nature of the paper is such that it involves examining older writings from a historical point of view.
- b) Begin by making a list of subject-headings under which you might expect the subject to be listed.
- c) The sources could be books and magazines articles, news stories, periodicals, scientific journals etc.

### 3. Collecting the notes

Skim through sources, locating the useful material, then make good notes of it, including quotes and information for footnotes.

- a) Get facts, not just opinions. Compare the facts with author's conclusion.
- b) In research studies, notice the methods and procedures, results & conclusions.
- c) Check cross references.

### 4. Outlining the paper

- a) Review notes to find main subdivisions of the subject.
- b) Sort the collected material again under each main division to find sub-sections for outline so that it begins to look more coherent and takes on a definite structure. If it does not, try going back and sorting again for main divisions, to see if another general pattern is possible.

### 5. Writing the first draft

Write the paper around the outline, being sure that you indicate in the first part of the paper what its purpose is. You may follow the following:

- a) statement of purpose
- b) main body of the paper
- c) statement of summary and conclusion

Avoid short, bumpy sentences and long straggling sentences with more than one main ideas.

#### 6. Editing & Preparing the final Paper

- a) Before writing a term paper, you should ensure you have a question which you attempt to answer in your paper. This question should be kept in mind throughout the paper. Include only information/ details/ analyses of relevance to the question at hand. Sometimes, the relevance of a particular section may be clear to you but not to your readers. To avoid this, ensure you briefly explain the relevance of every section.
- b) Read the paper to ensure that the language is not awkward, and that it "flows" properly.
- c) Check for proper spelling, phrasing and sentence construction.
- d) Check for proper form on footnotes, quotes, and punctuation.
- e) Check to see that quotations serve one of the following purposes:
  - (i) Show evidence of what an author has said.
  - (ii) Avoid misrepresentation through restatement.
  - (iii) Save unnecessary writing when ideas have been well expressed by the original author.
- f) Check for proper form on tables and graphs. Be certain that any table or graph is self-explanatory.

Term papers should be composed of the following sections:

- 1) Title page
- 2) Table of contents
- 3) Introduction
- 4) Review
- 5) Discussion & Conclusion
- 6) References
- 7) Appendix

Generally, the introduction, discussion, conclusion and bibliography part should account for a third of the paper and the review part should be two thirds of the paper.

#### **Discussion**

The discussion section either follows the results or may alternatively be integrated in the results section. The section should consist of a discussion of the results of the study focusing on the question posed in the research paper.

#### **Conclusion**

The conclusion is often thought of as the easiest part of the paper but should by no means be disregarded. There are a number of key components which should not be omitted. These include:

- a) summary of question posed
- b) summary of findings
- c) summary of main limitations of the study at hand
- d) details of possibilities for related future research

#### **References**

From the very beginning of a research project, you should be careful to note all details of articles gathered.

The bibliography should contain ALL references included in the paper. References not included in the text in any form should NOT be included in the bibliography.

The key to a good bibliography is consistency. Choose a particular convention and stick to this.

#### **Bibliographical conventions**

Monographs

Crystal, D. (2001), Language and the internet. Cambridge: Cambridge University Press.

### **Edited Volumes**

Gass, S./Neu, J. (eds.) (1996), Speech acts across cultures. Challenges to communication in a second language. Berlin/ NY: Mouton de Gruyter.

[(eds.) is used when there is more than one editor; and (ed.) where there is only one editor. In German the abbreviation used is (Hrsg.) for Herausgeber].

### **Edited Articles**

Schmidt, R./Shimura, A./Wang, Z./Jeong, H. (1996), Suggestions to buy: Television commercials from the U.S., Japan, China, and Korea. In: Gass, S./Neu, J. (eds.) (1996), Speech acts across cultures. Challenges to communication in a second language. Berlin/ NY: Mouton de Gruyter: 285-316.

### **Journal Articles**

McQuarrie, E.F./Mick, D.G. (1992), On resonance: A critical pluralistic inquiry into advertising rhetoric. Journal of consumer research 19, 180-197.

### **Electronic Book**

Chandler, D. (1994), Semiotics for beginners [HTML document]. Retrieved [5.10.'01] from the World Wide Web, <http://www.aber.ac.uk/media/Documents/S4B/>.

### **Electronic Journal Articles**

Watts, S. (2000) Teaching talk: Should students learn 'real German'? [HTML document]. German as a Foreign Language Journal [online] 1. Retrieved [12.09.'00] from the World Wide Web, <http://www.gfl-journal.com/>.

### **Other Websites**

Verterhus, S.A. (n.y.), Anglicisms in German car advertising. The problem of gender assignment [HTML document]. Retrieved [13.10.'01] from the World Wide Web, <http://olaf.hiof.no/~sverrev/eng.html>.

### **Unpublished Papers**

Takahashi, S./DuFon, M.A. (1989), Cross-linguistic influence in indirectness: The case of English directives performed by native Japanese speakers. Unpublished paper, Department of English as a Second Language, University of Hawai'i at Manoa, Honolulu.

### **Unpublished Theses/ Dissertations**

Möhl, S. (1996), Alltagssituationen im interkulturellen Vergleich: Realisierung von Kritik und Ablehnung im Deutschen und Englischen. Unpublished MA thesis, University of Hamburg.

Walsh, R. (1995), Language development and the year abroad: A study of oral grammatical accuracy amongst adult learners of German as a foreign language. Unpublished PhD dissertation, University College Dublin.

### **Appendix**

The appendix should be used for data collected (e.g. questionnaires, transcripts,...) and for tables and graphs not included in the main text due to their subsidiary nature or to space constraints in the main text.

### **Assessment Scheme:**

#### **Continuous Evaluation:**

40%

(Based on abstract writing, interim draft, general approach, research orientation, readings undertaken etc.)

**Final Evaluation:**

60%

(Based on the organization of the paper, objectives/  
problem profile/ issue outlining, comprehensiveness of the  
research, flow of the idea/ ideas, relevance of material used/  
presented, outcomes vs. objectives, presentation/ viva etc.)

## Syllabus - Second Semester

### STEM CELL TECHNOLOGY

**Course Code: SCT4201**

**Credit Units: 02**

**Course Objective:** The objective of this paper is to familiarize the students with stem cell technology and its applications for betterment of the society. The course is designed to give a broad view of mammalian stem cells, reviewing where they are found in the body, the different types and how they are cultured. The topics will cover the basic biology of these stem cells as well as bioengineering and application of these stem cells to potential treatments of human diseases.

**Course Contents:**

**Module I: Introduction to stem cells**

Definition, properties, proliferation and, culture of stem cells, medical applications of stem cells, ethical and legal issues in use of stem cells.

**Module II: Types of stem cells.**

Stem Cell biology and therapy, types embryonic stem cell, Adult stem cell, Stem Cell Biology and Therapy, Embryonic Stem Cells, culture and the potential benefits of stem cell technology

**Module III: Gene Therapy**

Gene Therapy: Introduction, history and evolution of Gene therapy, optimal disease targets. Genetic perspectives for Gene Therapy, Gene Delivery methods: Viral vectors and Non-viral Vectors. Failures and successes of gene therapy. Future prospects of gene therapy.

**Module IV: Therapeutic applications of stem cells**

Applications of stem cells in cell replacement and gene therapy approaches. Stem cells in drug discovery.

**Module V: Ethical Issues associated with stem cell-based regenerative medicine field**

Regulatory and ethical considerations of stem cell and gene therapy. Assessing human stem cell safety, use of genetically modified stem cells in experimental gene therapies.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# FUNDAMENTAL IMMUNOLOGY-I

**Course Code: SCT4202**

**Credit Units: 02**

## **Course Objective:**

The course provides in-depth understanding of innate and adaptive immune responses, definition and properties of antigens, Major Histocompatibility complexes and their role in generation of immune response and transplant rejection. Factors determining generation and regulation of immune system, and cell-mediated cytotoxicity.

## **Course Contents:**

### **Module I: Introduction**

Phylogeny of Immune System, Innate and acquired immunity, clonal nature of Immune Response. Organization and structure of lymphoid organs Nature and Biology of antigens and super-antigens Antibody structure and function; Types of immunity:innate, acquired, active and passive.

### **Module II: Major Histocompatibility**

MHC, BCR and TCR, generation of antibody diversity, Complement system.

### **Module III: Cells of the immune system**

Hematopoiesis and differentiation, lymphocyte trafficking, B-Lymphocytes, T -Lymphocytes, macrophages, dendritic cells, natural killer, lymphokines and lymphokine activated killer cells, eosinophils, neutrophils and mast cells

### **Module IV: Regulation of immune response**

Antigen processing and presentation, activation of B and T lymphocytes, cytokines and their role in immune regulation, T cell regulation and MHC restriction, immunological tolerance

### **Module V: Cell mediated toxicity**

Mechanism of T cell and NK cell mediated lysis and macrophage mediated cytotoxicity. Immunological Techniques: Immunodiffusion, immunoelectrophoresis, ELISA, RIA, fluorescence activated cell sorter. Cross reactivity, Precipitation and Agglutination reaction.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# HUMAN EMBRYOLOGY AND DEVELOPMENTAL BIOLOGY

**Course Code: SCT4203**

**Credit Units: 02**

**Course Objective:** The objective of this course is to familiarize students with fundamental process of human embryology and developmental biology and progression of pluripotent stem cells through different phases of development.

**Course Contents:**

**Module-I:** Basics principles of human embryogenesis--gametogenesis, fertilization and embryo development.

**Module-II:**

Ectoderm, mesoderm and endoderm development and process of organogenesis during human development.

**Module-III:**

Molecular regulation of embryogenesis and organogenesis processes during human development. Epigenetics mechanisms and their role in human development.

**Module-IV:**

Different types of stem cells, process and mechanism of stem cell subset development and their spatial organization during human development. Role of epigenetic mechanisms in human stem cell homeostasis and differentiation.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## BIOLOGICAL PROGRAMMING (BIOINFORMATICS)-II

Course Code: SCT4204

Credit Units: 01

### Course Objective:

It enables the students to access biological information networks and databases in order to understand the different techniques of biotechnology to build detection systems especially in the prevention and treatment of human diseases.

### Course Contents:

#### Module I: Data Models and Database Management Systems

File systems vs. DBMS, advantages of DBMS, Levels of abstraction and data independence; Data models and their comparison; Entity relationship model -concepts, design, keys and features; Relational model - introduction, structure of the relational databases, integrity constraints, Relational algebra and calculus - selection and projection, set operations, renaming, Joins, Division etc.

#### Module II: Introduction to Biological scripting languages: BioJava

BioJava modules for sequence alignment, data mining, structure alignment.

#### Module III: BioPerl & BioPython

BioPerl & BioPython modules for sequence alignment, data mining, structure alignment,

#### Module IV: Introduction to R Programming

Introduction to R Programming R basics; Data structures in R; R programming fundamentals; Working with data in R; Strings and Dates in R;

#### Module V: R/Bioconductor for advanced biological data analysis

Overview of the Bioconductor; Pre-processing microarray data; Differential gene expression; Distances, prediction, and cluster analysis; Annotation and metadata Visualization; GO;

### Examination Scheme:

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# MOLECULAR MEDICINE: PRINCIPLES AND APPLICATIONS

**Course Code: SCT4205**

**Credit Units: 03**

## **Course Objective**

The students will be exposed to basic concepts related with human health development of different types of infectious and non-infectious diseases.

## **Course Contents**

### **Module I: Medical Biotechnology**

History and scope of medical biotechnology, current status and future prospects.

### **Module II: Classification of genetic diseases**

Chromosomal disorders – Numerical disorders e.g. trisomies & monosomies, Structural disorders e.g. deletions, duplications, translocations & inversions, Chromosomal instability syndromes. Gene controlled diseases – Autosomal and X-linked disorders, Mitochondrial disorders.

### **Module III: Molecular basis of human diseases**

Mechanism of disease development, Genetic susceptibility, Identification of targets for diagnosis and therapy: Acquired diseases, cardiovascular diseases, Neurological diseases, Hematology, Cancer. Pathogenic mutations: Gain of function mutations: Oncogenes, Huntingtons Disease, Pittsburg variant of alpha 1 antitrypsin. Loss of function: Tumour Suppressor. Dynamic Mutations - Fragile- X syndrome, Myotonic dystrophy. Mitochondrial diseases.

### **Module IV: Traditional and Modern Tools for Detection of Genomic Abnormalities**

Classical gene mapping techniques, next generation sequencing technology.

### **Module V: Nucleic acid based Therapy**

Gene silencing technology, siRNA, Aptamers, antisense oligodeoxynucleotides (AS-ODN), Ribozymes, Peptide Nucleic Acids

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# NANO-MEDICINE AND TECHNOLOGIES

**Course Code: SCT4206**

**Credit Units: 03**

## **Course Objective:**

Nanotechnology is the branch of biotechnology that utilizes nanomaterials for biological applications to develop novel solutions to different scientific and medical problems. Students will learn basic concepts, techniques and technologies and applications of nanomaterials for biotechnology and medical applications.

## **Course Contents:**

### **Module I: Introduction to Nanotechnology**

Historical perspective of the developments in the field of nanotechnology. Classification of nanostructured materials, physical environment regulations governing nanomaterials, and rules governing health and safety regulations for chemicals and nanomaterials.

### **Module II: Investigation and manipulation of nanomaterials**

Principal and applications of electron microscope, scanning probe microscope, optical microscope, Fourier transform Infrared spectroscopy, X-ray photoelectron spectroscopy, and X-ray diffraction for nanoscience and technology.

### **Module III: Nanostructures for medicinal applications and toxicity**

Introduction to nanomedicine and nanobiotechnology materials, their applications and therapeutic and commercial implications. Micro- and nanoscale control of cellular environment for tissue engineering. Nanoparticle contrast agents for molecular magnetic resonance imaging. Nano-material-based cancer therapeutics.

### **Module IV: Safety and regulatory issues associated with nanomaterials**

Nanomaterials and toxicity evaluation: cytotoxicity, genotoxicity, in-vivo-tests and assays. Biological barriers to nanocarrier-mediated delivery of therapeutic and imaging agents.

### **Module V: Societal implications of nanoscience**

From first industrial revolution to nano-revolution. Implications of nanoscience and nanotechnology for society, nano policies, nano arms race, public perception and public involvement in nano discourse. Harnessing nanotechnology for economical and social development

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>Attendance</b>	<b>Assignment/ Project/Seminar/Quiz</b>	<b>EE</b>
<b>Weightage (%)</b>	15	5	10	70

# FERMENTATION TECHNOLOGY AND ITS APPLICATIONS IN MOLECULAR MEDICINE

**Course Code: SCT4207**

**Credit Units: 03**

The course will educate students about use microorganism to produce various compounds of commercial interest. The student will be exposed to various techniques available for large scale cultivation of microorganisms.

## **Course Contents:**

### **Module I**

Introduction to fermentation process, Batch and Continuous production systems of cultivation, Solid-state fermentation process.

### **Module II**

Selection of industrial microorganisms, media for fermentation, aeration, pH, temperature and other requirements during fermentation, downstream processing and product recovery, food industry waste as fermentation substrate.

### **Module III**

Production of compounds like, antibiotics, enzymes, organic acids, solvents, beverages, SCP.

### **Module IV**

Production of fermented dairy products

### **Module V**

Immobilized enzymes systems, production and applications.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>Attendance</b>	<b>Assignment/ Project/Seminar/Quiz</b>	<b>EE</b>
<b>Weightage (%)</b>	15	5	10	70

# STEM CELL TECHNOLOGY LAB

Course Code: SCT4208

Credit Units: 01

## Course Contents:

### Module-I:

Stem cell isolation and characterization.

### Module-II:

Generation of iPSC lines and characterization of their pluripotency profile and genome stability (Stem Cell Karyotype analysis).

### Module-III:

Differentiation of iPSC into somatic cell lineages and characterization of stem cell-derived somatic cell populations.

### Module-IV:

Functional characterization of stem cell-derived somatic cell populations.

### Module-V:

Recent advances in stem cell therapeutics and stem cell-based drug discovery.

## Examination Scheme:

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spo tting	Practical Record	Viva
15	10	05	35	15	10	10

## Text & References:

## NANO-MEDICINES AND TECHNOLOGIES LAB

**Course Code: SCT4209**

**Credit Units: 01**

### **Course Objective:**

This course offers understanding of generation of nano particles, their characterization and applications.

### **Course Contents:**

1. Demonstration about occupational health and safety (OHS) and workplace health and safety (WHS) in nanotechnology.
2. Preparation of aqua regia, its handling and role in washing glass-ware for metal nanoparticles synthesis.
3. Optimization of temperature for metal nanoparticle preparations using biological materials.
4. Synthesis of silver nanoparticles and analysis of their surface Plasmon resonance (SPR) properties.
5. Neem extract mediated silver nanoparticle synthesis and analysis of their optical properties.
6. Dye degradation using silver nanoparticles synthesized in experiments 4 and 5.
7. Preparation of metal oxide nanoparticles and their characterization.
8. Interactions of silver nanoparticles with red blood cells.
9. Interaction of silver nanoparticles with bacterium and their antimicrobial properties.
10. Preparation of nanoparticles containing polymeric films.

### **Examination Scheme:**

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spo tting	Practical Record	Viva
15	10	05	35	15	10	10

## FUNDAMENTAL IMMUNOLOGY-I LAB

Course Code: SCT4210

Credit Units: 01

### Course Contents:

1. Blood film preparation and identification of cells.
2. Immuno-diffusion.
3. Hemagglutination, Agglutination inhibition.
4. Rocket immune-electrophoresis.
5. Western blotting, ELISA.
6. Epitope prediction using Immuno-informatics tool.
7. Isolation of Peripheral blood mononuclear cells.
8. Phenotype analysis.

### Examination Scheme:

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spo tting	Practica l Record	Viva
15	10	05	35	15	10	10

**Note:** Minor variation could be there depending on the examiner

## **BIOLOGICAL PROGRAMMING (BIOINFORMATICS)-II LAB**

**Course Code: SCT4211**

**Credit Units: 01**

### **Course Contents:**

#### **Module I**

Database creation using DDL and DML. Defining the primary and secondary keys. Implementation of selection, projection and joins (internal and external) with MySQL

#### **Module II**

Introduction to Linux Shell Programming, Running BioJava Scripts

#### **Module III**

Running BioPerl and BioPython Scripts

#### **Module IV**

Programming in R basic scripts

#### **Module V**

R/Bioconductor programming for DEGs, Visualization and annotation.

### **Examination Scheme:**

<b>IA</b>			<b>EE</b>			
<b>Class Test (Practical Based)</b>	<b>Mid Term Viva</b>	<b>Attendance</b>	<b>Major Experiment</b>	<b>Minor Experiment/Spo tting</b>	<b>Practical Record</b>	<b>Viva</b>
15	10	05	35	15	10	10

**Note:** Minor variation could be there depending on the examiner

## Syllabus - Third Semester

### CANCER BIOLOGY & CANCER THERAPEUTICS (T CELL AND ANTIBODY-BASED THERAPEUTICS)

**Course Code: SCT4301**

**Credit Units: 03**

**Course Objective:** The objective of this paper is to provide students greater understanding of different approaches for T cell-based and antibody-based cancer immunotherapy approaches.

**Course Contents:**

**Module I**

Biology and mechanism of cancer development. Chemotherapy, radiation therapy, immunotherapy of cancer.

**Module II**

History of Vaccine Development, Definition of Vaccine, Evolution of Vaccines, Process development for vaccines, Manufacturing of vaccines, Various aspects of vaccines, process development and manufacturing.

**Module III**

Clinical development of vaccines, Clinical end-point: Evolution of vaccines, General specifications and pharmaceuticals release criteria for the existing vaccines, Cold chain management of vaccines, Current vaccine research: Immune checkpoint strategies in cancer immunotherapy.

**Module IV**

Engineered anti-tumor immunity: T cell receptor (TCR) and chimeric antigen receptor technology development and TCR/CAR-engineered anti-tumor immunity.

**Module V**

Antibody-based cancer immunotherapy. Antibodies as drug carriers.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

**Text & References:**

- Diagnostic and Therapeutic Antibodies (Methods in Molecular Medicine by Andrew J.T. George (Editor), Catherine E. Urch (Editor) Publisher: Humana Press; edition (August 15, 2000) ISBN-10: 0896037983

# HUMAN STEM CELL CULTURE & DIFFERENTIATION METHODS

**Course Code: SCT4302**

**Credit Units: 03**

**Course Objective:** The objective of this paper is to provide students greater understanding of methodologies for generation of different cell lineages from pluripotent stem cells, and their phenotypic and functional characterization.

## **Course Contents:**

### **Module-I:**

History of human pluripotent stem cell development: isolation of human embryonic stem cells, generation of human induced pluripotent stem cells (iPSC).

### **Module-II:**

Methodologies for pluripotent stem cell culture, characterization of pluripotency. Methods for differentiation of PSC into different lineages, e.g. RBCs, platelets, lung cells, heart cells, neuronal cells, and their functional characterization.

### **Module-III:**

Methods to engineer pluripotent stem cells for treatment of genetically impaired conditions/diseases: Viral and non-viral vector-mediated gene delivery, homologous gene recombination-mediated genome engineering, CRISPR/TALEN-mediated gene editing.

### **Module-IV:**

Stem cell-based organogenesis, xeno-free culture systems for stem cell-based therapeutics, Immunogenicity of PSC, 3D-culture systems and bioreactors for stem cell culture and differentiation.

### **Module-V:**

Ethical, regulatory and safety issues affective pluripotent stem cell-based cell replacement therapies. Technological challenges towards development of pluripotent stem cell-based cell replacement therapies. Methodologies and recent advances in development of stem cell-based clinical trials.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# VACCINES AND PRECLINICAL ANIMAL MODELS

**Course Code: SCT4303**

**Credit Units: 02**

## **Course Objective:**

The application of Animal Biotechnology covers major areas related to commercial applications. Importance will also be given to areas like *in vitro* fertilization, animal cell and tissue culture, hormone vaccine and important enzyme production through animal biotechnology.

## **Course Contents:**

### **Module I**

Historical perspectives, sterilization methods, organ culture - culture techniques, plasma clot, raft methods, agar gel, grid method, organ engineering. Cell culture substrates, cultural media, natural and artificial media, initiation and maintenance of cell cultures, cell culture products, cryopreservation techniques, immobilized cultures

### **Module II**

In vitro fertilization and embryo transfer

### **Module III**

Somatic cell hybridization, hybridoma technology. Animal genetic engineering, vectors, gene transfer methods: microinjection, virus mediated and other methods of gene transfer

### **Module IV**

Transgenic animals with new traits, transgenic animals as bioreactors for producing pharmaceutically important compounds and therapeutics. Animal models for cancer research.

### **Module V**

Bioethical issues related to utilization of animals in ,

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Text & References**

## FUNDAMENTAL IMMUNOLOGY-II

Course Code: SCT4304

Credit Units: 02

### Course Objective:

Role of antibody engineering in biomedical applications and the importance of immune-genetics in disease processes, tissue transplantation and immune regulation are some of the areas of attributes of this course which can help the students to understand the biotechnology related to human kind.

### Course Contents:

#### Module I: Antigen, antibody definitions, properties and utility

Antigens and Antibodies: Factors responsible for immunogenicity, Epitopes, Adjuvants, superantigens, Antigen Presentation and processing, Structure and function of antibody, Antibody classes, Passive antibody therapy, Monoclonal antibody, Antibody engineering, Generation of antibody diversity

#### Module II: Autoimmunity, Hypersensitivity and Immunodeficiency

Tolerance and Autoimmunity, Types and mechanism of autoimmune diseases, Hypersensitive reactions, Transplantation types, Immunological basis of graft rejection. Primary and secondary immunodeficiency, AIDS

#### Module III: Tumor immunology, Immunity to infectious agents

Immune response to viral infections, Tumor immunity and Tumor antigens, Immunodiagnostics (diagnosis of infectious diseases)

#### Module IV: vaccines

General consideration, idotype network hypothesis, Synthetic vaccines: Active and passive immunization, Vaccine types (Live but attenuated, Killed, Subunit, Recombinant, DNA and Peptide).

#### Module V: Hybridoma technology and its applications

Fusion of myeloma cells with lymphocytes

### Examination Scheme:

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# GENOMICS & PROTEOMICS

**Course Code: SCT4305**

**Credit Units: 02**

## **Course Objective:**

The course involves a basic understanding of computer and bioinformatics tools and skills in the field of biology.

## **Course Contents:**

### **Module I: Essential Probability and Statistical Models**

Conditional Probability, Bayesian Probability, HMM, Profile HMM, Mapping and Sequencing Algorithms

### **Module II: Similarity Searching Algorithms**

Global and local alignments, statistical significance of alignments, scoring matrices and gap penalties, position specific scoring matrices, programs and methods for Pairwise and multiple alignment, pattern searching programs,

### **Module III: Gene Predictive Methods**

family and superfamily representation - Pfam, hidden Markov models Protein family/domain databases (PROSITE, PRINTS, Pfam, BLOCK, etc), Gene finding,

### **Module IV: Classification algorithms**

Phylogenetic analysis, Evolutionary Models, Character and distance based Tree building methods; tree evaluation, phylogenetic analysis, parsimony, maximum likelihood trees; Trees-splits and metrics on trees, tree interpretation, Distance – additive, ultrametric and nonadditive distances.

### **Module V: Proteomics Algorithms**

Algorithms for Secondary, tertiary structure prediction methods, docking, protein-protein, protein-DNA interaction algorithms, minimization and simulation algorithms, peptide sequencing problem, .

### **Module VI: Comparative genome analysis**

Algorithmic basis of reconstruction of metabolic pathways; genome rearrangements with inversions, signed inversions, functional classification.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# **ETHICS OF BIOMEDICAL RESEARCH, INTELLECTUAL PROPERTY (IP), IP RIGHTS (IPR)**

**Course Code: SCT4306**

**Credit Units: 02**

## **Course Objective**

The aim of this course is to develop the understanding of relevance, business Impact and protection of Intellectual Property along with the types of Intellectual Property Rights: Patents, Trademarks, Copyrights, Industrial Designs, Geographical Indications and International Conventions, Biosafety and Bioethics

## **Course Contents**

### **Module I: Basic Principles and Acquisition of Intellectual Property Rights**

Basic Principles of Patent Law, Patent Application procedure, Drafting of a Patent Specification, Understanding Copyright Law, Basic Principles of Trade Mark and Design Rights, International Background of Intellectual Property

### **Module II: Ownership and Enforcement of Intellectual Property Rights**

Patents-Objectives, Rights, Assignments, Defences in case of Infringement. Copyright-Objectives, Rights, Transfer of Copyright, work of employment Infringement, Defences for infringement. Trademarks-Objectives, Rights, Protection of goodwill, Infringement, Passing off, Defences. Designs-Objectives, Rights, Assignments, Infringements, Defences of Design Infringement, Enforcement of Intellectual Property Rights - Civil Remedies, Criminal Remedies, Border Security measures, Practical Aspects of Licensing - Benefits, Determinative factors, important clauses, licensing clauses.

### **Module III: Biotechnology and Intellectual Property Rights**

Objective, Evolution, Basic Structure of Gene Techniques, Applications, Commercial Potential of Biotech Inventions, Rationale for Intellectual Property Protection. Patenting Biotechnology Inventions-Objective, Concept of Novelty, Concept of inventive step, Microorganisms, Moral Issues in Patenting Biotechnological inventions. Plant Varieties Protection-Objectives, Justification, International Position, Plant Varieties Protection in India Protection of Geographical Indications Objectives, Justification, International Position, Multilateral Treaties, National Level, Indian Position.

### **Module IV**

Biosafety and Bioethics Management-Key to environmentally responsible use of biotechnology. Cartagena Protocol on Biosafety, Ethical implications of Biotechnological products and techniques. Biosafety: History, evolution and concept of biosafety; need and application of biosafety in laboratories and industries; biosafety guidelines and regulations, international and national norms of biosafety; Implementation of biosafety guidelines; Classification and Description of Biosafety levels. Good laboratory practice (GLP) and Good manufacturing practice (GMP), Use of GMO's and their release, GM products, issues in use of GMO's, risk for animal/human/agriculture and environment owing to GMOs. Bioethics: Introduction and need of bioethics, its relation with other branches, types of risk associated with genetically modified microorganisms, Ethical Issues involving GMOs; ethics related to human cloning, human genome project, prenatal diagnosis, agriculture and animal rights, data privacy of citizens health; ethical issues in India and abroad through case studies.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

# PLANT BIOTECHNOLOGY AND ITS APPLICATIONS IN MOLECULAR MEDICINE

**Course Code: SCT4307**

**Credit Units: 02**

## **Course Objective:**

The application of Plant Biotechnology covers major areas related to commercial applications. Regeneration of plants through *in vitro* techniques offers a practical strategy for micro propagation. Importance will also be given to areas like *in vitro* fertilization, animal cell and tissue culture, hormone vaccine and important enzyme production through animal biotechnology.

## **Course Contents:**

### **Module I**

Historical perspective of plant tissue culture.

Tissue culture lab and organization

Sterilisation techniques

Types of nutrient media and media composition

Plant regeneration pathways

Role of phytohormones

Cell culture techniques- cell, tissue, organ cultures, callus culture, suspension culture

Culture techniques Callus culture, cell culture and protoplast cultures.

### **Module II**

Organogenesis and somatic embryogenesis.

Applications of plant tissue and cell culture.

Micropropagation, pathogen free plants. production haploids,

Somaclonal variation.preservation of germplasm.

### **Module III**

Genetic engineering in plants, - transformation vectors

Gene transfer techniques-vector mediated and vector less gene transfer.

Transgenic plants transgene integration and expression

### **Module IV**

Transgenic crop with new traits-herbicide tolerance, insect and disease resistance,

Therapeutic proteins and compounds

Oral vaccines

Production of secondary metabolites via tissue culture

Bioethics of plant genetic engineering.

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## FUNDAMENTAL IMMUNOLOGY-II LAB

Course Code: SCT4308

Credit Units: 01

### Course Contents:

#### Module I

Blood film preparation and identification of cells. Identification of blood groups.

#### Module II

Isolation of serum. Purification of IgG through affinity chromatography

#### Module III

Immunohistochemistry. Lymphoid organs and their microscopic organization.

#### Module IV

WIDAL Test

#### Module V

Radial Immuno-diffusion Test. Ouchterlony Double diffusion Test. DOT, Sandwich ELISA.

### Examination Scheme:

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spo tting	Practical Record	Viva
15	10	05	35	15	10	10

## GENOMICS & PROTEOMICS LAB

**Course Code: SCT4309**

**Credit Units: 01**

### **Course Contents:**

#### **Module I**

Three dimensional Structures – In silico study – large molecular complexes RNA polymerase II, ribosome, unstructured proteins

#### **Module II**

Microarray and Microarray data analysis, DNA sequencing methods, next generation sequencing.

#### **Module III**

Comparison of two given genomes

#### **Module IV**

Inference of protein function from structure

#### **Module V**

Gene finding tools and Genome annotation.

### **Examination Scheme:**

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spo tting	Practical Record	Viva
15	10	05	35	15	10	10

## STEM CELL CULTURE LAB

**Course Code: SCT4310**

**Credit Units: 01**

### **Course Objective:**

Students will learn methods for isolation, culture and maintenance of immune cells, for example T cell lines, human primary T cells and antigen presenting cells. Students will also learn nuances of antigen-specific immune response generation, antigen processing and presentation, cell phenotype analysis, cell proliferation, cell death and cytotoxicity assays.

### **Course Contents:**

1. Culture of immortalized immune cell lines, for example Jurkat, T2-A2 etc.
2. Isolation of CD4 and CD8+ T cells from human peripheral blood.
3. Cell phenotype analysis, calculation of CD4:CD8 ratio in normal healthy individual blood.
4. Isolation and characterization of antigen presenting cells.
5. Activation of T cells by non-specific stimulus as well as by engaging their T cell receptor (TCR).
6. Cell proliferation assay.
8. Generation, and phenotypic and functional characterization of antigen-specific T cell response.
9. B cell culture and hybridoma technology.

### **Examination Scheme:**

IA			EE			
Class Test (Practical Based)	Mid Term Viva	Attendance	Major Experiment	Minor Experiment/Spo tting	Practical Record	Viva
15	10	05	35	15	10	10

## **SCIENTIFIC COMMUNICATION SKILL DEVELOPMENT (SEMINAR/ WORKSHOP)**

**Course Code: SCT4311**

**Credit Units: 01**

Students will learn how to do literature search on a particular topic, how to construct, organize and deliver a scientific presentation.

### **Examination Scheme:**

Literature Search/Project Report	50
Presentation	50
<b>Total</b>	<b>100</b>

# SUMMER INTERNSHIP EVALUATION

**Course Code: SCT4335**

**Credit Units: 03**

## **GUIDELINES FOR PROJECT FILE**

Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critiqued by the faculty guide and corrected by the student at each stage.

The File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation.

## **Methodology**

The students will be sent to various industries and institutes where they will undergo short term training. After the completion of the training the students will be required to submit project report which shall then be evaluated by two internal examiners. The students will then have to appear for a Viva Voce examination to be conducted by an external evaluator at the end of the semester.

## **In general, the File should be comprehensive and include**

- A short account of the activities that were undertaken as part of the project;
- A statement about the extent to which the project has achieved its stated goals.
- A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
- Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
- Any problems that have arisen that may be useful to document for future reference.

## **Report Layout**

The report should contain the following components:

### **➤ Title or Cover Page**

The title page should contain the following information: Project Title; Student's Name; Course; Year; Supervisor's Name.

### **➤ Acknowledgements (optional)**

Acknowledgment to any advisory or financial assistance received in the course of work may be given.

### **➤ Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project

### **➤ Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used. Methodology should be mentioned in details including modifications if any.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing these section, emphasis should be given on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in textbooks. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations

should also be numbered and unless it is really necessary never write in “point” form.

➤ **Conclusion**

A conclusion should be the final section in which the outcome of the work is mentioned briefly.

➤ **Future prospects**

➤ **Appendices**

The Appendix contains material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References / Bibliography**

This should include papers and books referred to in the body of the report. These should be ordered alphabetically on the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**Examples**

**For research article**

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic *Escherichia coli* O157: H7. *Clin Microbiol Infec*, **8** (suppl 1): 116–117.

**For book**

Kowalski, M. (1976) Transduction of effectiveness in *Rhizobium meliloti*. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), **7**: 63-67

**ASSESSMENT OF THE PROJECT FILE**

Essentially, marking will be based on the following criteria: the quality of the report, the technical merit of the project and the project execution.

Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project.

Project execution is concerned with assessing how much work has been put in.  
The File should fulfill the following *assessment objectives*:

**Range of Research Methods used to obtain information**

**Execution of Research**

**Data Analysis**

Analyse Quantitative/ Qualitative information  
Control Quality

**Draw Conclusions**

**Examination Scheme:**

Project Report	50
Viva Voce	50
<b>Total</b>	<b>100</b>

# SYSTEMS BIOLOGY

**Course Code: SCT4312**

**Credit Units: 02**

## **Course Objective:**

The course offers different tools and technologies for systems biology analysis, interpretation of data and development of hypothesis based on interpretations. Students will get acquainted with the diversity of different organisms and models and mathematical frameworks used in systems biology, and their application to a range of biological systems and processes.

## **Course Contents:**

### **Module-I:**

Concepts and working principles of System Biology.

### **Module-II:**

The multi-scale and multi-disciplinary nature of Systems Biology. Introduction to System Biology platforms. Proprietary system Biology platform. Practical applications of System Biology in Life Sciences.

### **Module-III:**

Microarray data analysis - Microarray analysis platforms - Introduction to Concepts and principles of Microarray technology - Application of Microarrays in Life Sciences.

### **Module-IV:**

Different Markup languages used in systems biology. Introduction to NGS technology. Current research topics within the field

## **Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## **Texts & References**

### **Texts:**

- System Biology: Computational Systems Biology (Hardcover) by Andres Kriete (Editor), Roland Eils (Editor)
- Stochastic Modelling for Systems Biology. ISBN-10 1-58488-540-8 and ISBN-13 978-158488-540-5
- Microarray Data Analysis: Gene Expression Data Analysis. A Beginner's Guide By: Helen Causton (Imperial College), J Quackenbush and Alvis Brazma (The European Bioinformatics Institute)
- A Practical Approach to Microarray Data Analysis (Hardcover) by Daniel P. Berrar (Editor), Werner Dubitzky (Editor), Martin Granzow (Editor)

# TERM PAPER

Course Code: SCT4331

Credit Units: 02

## METHODOLOGY

A term (or research) paper is primarily a record of intelligent reading in several sources on a particular subject.

The students will choose the topic at the beginning of the session in consultation with the faculty assigned. The progress of the paper will be monitored regularly by the faculty. At the end of the semester the detailed paper on the topic will be submitted to the faculty assigned. The evaluation will be done by Board of examiners comprising of the faculties.

## GUIDELINES FOR TERM PAPER

The procedure for writing a term paper may consists of the following steps:

- Choosing a subject
- Finding sources of materials
- Collecting the notes
- Outlining the paper
- Writing the first draft
- Editing & preparing the final paper

### *1. Choosing a Subject*

The subject chosen should not be too general.

### 2. Finding Sources of materials

- d) The material sources should be not more than 10 years old unless the nature of the paper is such that it involves examining older writings from a historical point of view.
- e) Begin by making a list of subject-headings under which you might expect the subject to be listed.
- f) The sources could be books and magazines articles, news stories, periodicals, scientific journals etc.

### 3. Collecting the notes

Skim through sources, locating the useful material, then make good notes of it, including quotes and information for footnotes.

- d) Get facts, not just opinions. Compare the facts with author's conclusion.
- e) In research studies, notice the methods and procedures, results & conclusions.
- f) Check cross references.

### 4. Outlining the paper

- c) Review notes to find main sub-divisions of the subject.
- d) Sort the collected material again under each main division to find sub-sections for outline so that it begins to look more coherent and takes on a definite structure. If it does not, try going back and sorting again for main divisions, to see if another general pattern is possible.

### 5. Writing the first draft

Write the paper around the outline, being sure that you indicate in the first part of the paper what its purpose is. You may follow the following:

- a) statement of purpose
- b) main body of the paper
- c) statement of summary and conclusion

Avoid short, bumpy sentences and long straggling sentences with more than one main ideas.

## 6. Editing & Preparing the final Paper

- g) Before writing a term paper, you should ensure you have a question which you attempt to answer in your paper. This question should be kept in mind throughout the paper. Include only information/details/ analyses of relevance to the question at hand. Sometimes, the relevance of a particular section may be clear to you but not to your readers. To avoid this, ensure you briefly explain the relevance of every section.
- h) Read the paper to ensure that the language is not awkward, and that it "flows" properly.
- i) Check for proper spelling, phrasing and sentence construction.
- j) Check for proper form on footnotes, quotes, and punctuation.
- k) Check to see that quotations serve one of the following purposes:
  - (iv) Show evidence of what an author has said.
  - (v) Avoid misrepresentation through restatement.
  - (vi) Save unnecessary writing when ideas have been well expressed by the original author.
- l) Check for proper form on tables and graphs. Be certain that any table or graph is self-explanatory.

Term papers should be composed of the following sections:

- Title page
- Table of contents
- Introduction
- Review
- Discussion & Conclusion
- References
- Appendix

Generally, the introduction, discussion, conclusion and bibliography part should account for a third of the paper and the review part should be two thirds of the paper.

### **Discussion**

The discussion section either follows the results or may alternatively be integrated in the results section. The section should consist of a discussion of the results of the study focusing on the question posed in the research paper.

### **Conclusion**

The conclusion is often thought of as the easiest part of the paper but should by no means be disregarded. There are a number of key components which should not be omitted. These include:

- summary of question posed
- summary of findings
- summary of main limitations of the study at hand
- details of possibilities for related future research

### **References**

From the very beginning of a research project, you should be careful to note all details of articles gathered.

The bibliography should contain ALL references included in the paper. References not included in the text in any form should NOT be included in the bibliography.

The key to a good bibliography is consistency. Choose a particular convention and stick to this.

### **Bibliographical conventions**

Monographs

Crystal, D. (2001), Language and the internet. Cambridge: Cambridge University Press.

### **Edited Volumes**

Gass, S./Neu, J. (eds.) (1996), *Speech acts across cultures. Challenges to communication in a second language*. Berlin/ NY: Mouton de Gruyter.

[(eds.) is used when there is more than one editor; and (ed.) where there is only one editor. In German the abbreviation used is (Hrsg.) for Herausgeber].

### **Edited Articles**

Schmidt, R./Shimura, A./Wang, Z./Jeong, H. (1996), *Suggestions to buy: Television commercials from the U.S., Japan, China, and Korea*. In: Gass, S./Neu, J. (eds.) (1996), *Speech acts across cultures. Challenges to communication in a second language*. Berlin/ NY: Mouton de Gruyter: 285-316.

### **Journal Articles**

McQuarrie, E.F./Mick, D.G. (1992), *On resonance: A critical pluralistic inquiry into advertising rhetoric*. *Journal of consumer research* 19, 180-197.

### **Electronic Book**

Chandler, D. (1994), *Semiotics for beginners* [HTML document]. Retrieved [5.10.'01] from the World Wide Web, <http://www.aber.ac.uk/media/Documents/S4B/>.

### **Electronic Journal Articles**

Watts, S. (2000) *Teaching talk: Should students learn 'real German'?* [HTML document]. *German as a Foreign Language Journal* [online] 1. Retrieved [12.09.'00] from the World Wide Web, <http://www.gfl-journal.com/>.

### **Other Websites**

Verterhus, S.A. (n.y.), *Anglicisms in German car advertising. The problem of gender assignment* [HTML document]. Retrieved [13.10.'01] from the World Wide Web, <http://olaf.hiof.no/~sverrev/eng.html>.

### **Unpublished Papers**

Takahashi, S./DuFon, M.A. (1989), *Cross-linguistic influence in indirectness: The case of English directives performed by native Japanese speakers*. Unpublished paper, Department of English as a Second Language, University of Hawai'i at Manoa, Honolulu.

### **Unpublished Theses/ Dissertations**

Möhl, S. (1996), *Alltagssituationen im interkulturellen Vergleich: Realisierung von Kritik und Ablehnung im Deutschen und Englischen*. Unpublished MA thesis, University of Hamburg.

Walsh, R. (1995), *Language development and the year abroad: A study of oral grammatical accuracy amongst adult learners of German as a foreign language*. Unpublished PhD dissertation, University College Dublin.

### **Appendix**

The appendix should be used for data collected (e.g. questionnaires, transcripts,...) and for tables and graphs not included in the main text due to their subsidiary nature or to space constraints in the main text.

**Assessment Scheme:****Continuous Evaluation:**

40%

(Based on abstract writing, interim draft, general approach, research orientation, readings undertaken etc.)

**Final Evaluation:**

60%

(Based on the organization of the paper, objectives/ problem profile/ issue outlining, comprehensiveness of the research, flow of the idea/ ideas, relevance of material used/ presented, outcomes vs. objectives, presentation/ viva etc.)

## **Syllabus - Fourth Semester**

### **PROJECT/ DISSERTATION**

**Course Code: SCT4437**

**Credit Units: 18**

**Course Objective:**

The students are expected to utilize their scheduled periods by undertaking the project that would be completed during the semester

Every student shall undertake a major Project. The major Project shall be undertaken in some biotechnology industry or laboratory of repute. Each student shall be assigned to a faculty who shall continuously monitor the progress of the Project in the concerned laboratory or industry. The faculty, in consultation with the concerned scientist of the industry/laboratory, shall decide the topic of the project. At the conclusion of the project the student shall submit a seminar and a dissertation. The dissertation shall be evaluated by the internal faculty/examiner. The student then shall have to appear for the viva voce examination.

**GUIDELINES FOR PROJECT FILE**

Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critiqued by the faculty guide and corrected by the student at each stage.

The File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation.

**In general, the File should be comprehensive and include**

- A short account of the activities that were undertaken as part of the project;
- A statement about the extent to which the project has achieved its stated goals.
- A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
- Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
- Any problems that have arisen that may be useful to document for future reference.

**Report Layout**

The report should contain the following components:

➤ **Title or Cover Page**

The title page should contain the following information: Project Title; Student's Name; Course; Year; Supervisor's Name.

➤ **Acknowledgements** (optional)

Acknowledgment to any advisory or financial assistance received in the course of work may be given.

➤ **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

## ADVANCED NUTRITION-I

**Course Code: DAN4101**

**Credit Units: 04**

### Course Objectives

1. The subject helps students to get detailed information about the various nutrients, their metabolism, classification, functions and food sources.
2. The health benefits and the role of nutrients in health and diseases are being included.
3. To make students understand the basics of food requirement, hunger, including information of individual's body composition which will make students understand the physiology of hunger.
4. Students are made to learn about physiology of water and its importance, including maintaining its regulation in the body.
5. Diseases of water and electrolyte imbalances are included to make students learn about their importance which may be useful to them in practical terms as well.

### Course Contents:

#### **Module – I: Body Composition:**

General body composition, determination of body water acid-base balance, extra cellular water, cell mass and body fat. Change in body composition

#### **Module – II: Physiology of hunger and Water**

Regulation of food intake Water intake and loss, exchange of water in body, effect of low and excess water and intake and effect of electrolytes on water balance

#### **Module – III: Energy**

Components of energy requirements . Factors affecting energy expenditure and requirements. Factors affecting the thermic effect of food. Energy content of food stuffs –unit and determination of gross and physiological energy value of food Energy expenditure – factors affecting – BMR and its maintenance Determination of energy metabolism of humans by direct and indirect method , Thermogenesis; Specific dynamic action (SDA)

#### **Module – IV: Carbohydrates:**

Types, Classification, digestion, absorption and transport- review, dietary fiber, fructo-oligosaccharides. Glycemic index of foods. Sweeteners- nutritive and non nutritive. Role of carbohydrate in health and disease

#### **Module – V: Proteins:**

Functions of protein. Evaluation of protein quality. Improvement of quality of protein in diet. Methods of estimating and assessing protein requirements at different stages of life cycle. Deriving Nutritional requirements and recommended dietary allowances for different age groups. Hormonal control of protein Metabolism.

#### **Module – VI: Lipids and Dietary Fiber**

Classification, digestion, absorption, transport - review. Functions of EFA. Role of n-3, n-6 fatty acids in health and disease. Requirements of total fat and fatty acids. Tran's fatty acids Prostaglandins Components of dietary fiber - Physiological effects of dietary fiber , Potential health benefits of dietary fiber. Recommended intake of dietary fiber

### Examination Scheme:

# NUTRITIONAL BIOCHEMISTRY-I

Course Code: DAN4102

Credit Units: 04

## Course Objectives

1. This subject makes students understand about the basic concepts of biochemistry like cell and the various processes involved in it like the release of energy.
2. Students are made to know about the various enzymes involved in the various biochemical reactions taking place in the human body.
3. The subject involves understanding of various nutrients and their involvement in the processes occurring in our body.
4. Biochemical structures, various acids, their classification are being learnt by the students.

## Module – I :

**Principles of Bioenergetics-** Concept of free energy, Oxidation and reduction, concept of cell, high energy compounds (ATP, PEP, and Phosphagens), role of ATP/ADP cycle in transfer of high energy phosphates, concept of coupled reactions.

## Module – II :

### Carbohydrates-

Definition, classification.

**Monosaccharides** Classification, occurrence, structure, stereoisomerism (DL and RS systems) and Properties, derivatives of Monosaccharides- deoxy sugars and amino sugars. **Disaccharides** of nutritional importance (sucrose, maltose, lactose),

**Polysaccharides** Homopolysaccharides- starch, glycogen, cellulose, Heteropolysaccharides - glycoprotein, Proteoglycans, mucopolysaccharides, pectins.

## Module – III :

**Lipids** : Definition, classification. Structure and functions of fatty acids (including essential fatty acids) Trans fatty acids, prostaglandins acylglycerols, phospholipids, sphingolipids, glycolipids, steroids (including role of cholesterol). Characterization of fats- saponification, iodine, acid, acetyl and peroxide value.

## Module – IV :

**Amino acids and Proteins:** Common structural features, classification based on the nature of R group, non-protein amino acids, essential amino acids and titration curves of monoamino-monocarboxylic, monoamino-dicarboxylic and diamino-monocarboxylic acids. peptide bond, biological role of proteins, classification of proteins, levels of protein structure- primary, secondary (super secondary elements in brief), tertiary and quaternary structure, forces stabilizing protein structure, denaturation of proteins.

## Module – V :

**Enzymology:** General Characteristics, classification and nomenclature, coenzyme, cofactor, prosthetic group, concept of holoenzyme and apoenzyme, units of enzyme activity, Enzyme kinetics- Michaelis-Menten and Lineweaver-Burk equation for monosubstrate reactions (turnover number), bisubstrate reactions.

## Module – VI :

**Nucleic acids:** Nitrogenous bases, experimental proof of DNA and RNA as genetic material, Chargaff's rules, double helical model of DNA (A, B and Z), DNA packaging, types of RNA and their functions.

## Examination Scheme:

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

# HUMAN PHYSIOLOGY

**Course Code: DAN4103**

**Credit Units: 03**

## **Course Objectives:**

1. Students learn about the various systems included in the human body.
2. The organs involved, their working and their functions in detail are being known by the students.
3. The various diseases of each system and their causative factors are focussed.
4. This subject makes students learn about Hyper and hypo activity of the various organs and imbalances.
5. Importance of various hormones and their role in various diseases is learnt by the students.

## **Course Contents:**

### **Module – I :**

**Digestive System :** Different parts of digestive system, Secretory and digestive functions of the salivary glands, stomach, pancreas, liver and intestines, mechanism of absorption of carbohydrates, proteins and fats.

### **Module – II :**

**Cardiovascular system:** Structure and function of the heart, ECG, cardiac cycle, cardiac output, heart sounds, regulation of heart rate, blood pressure, Factors affecting it and hypertension, composition and function of blood: RBCs, WBCs, hemoglobin, plasma proteins, erythropoiesis, coagulation of blood, Rh factor, blood groups.

### **Module – III:**

**Respiratory system:** Structure of respiratory organs, uptake and delivery of respiratory gases and regulation of breathing, Laryngitis, pharyngitis, bronchitis, asthma in brief.

### **Module – IV :**

**Reproductive system :** Structure and function of testis and ovaries, Menstrual cycle, puberty, menopause, breast and cervical cancer, menstrual disorders, infertility, ultra sound imaging in brief.

### **Module – V :**

**Excretory System:** Structure and function of kidneys, mechanism of urine formation and the role of the kidneys in water and electrolyte balance, renal stone, albuminuria, haematourea, oedema, uremia, incontinence, in brief.

### **Module – VI :Sensory System**

General senses (types, structure and functions). Special senses (olfaction, vision, gustation, equilibrium and hearing).

### **Module – VII : Endocrine System**

Structure, functions and the different syndromes resulting from hypo or hyperactivity of the following glands: Thyroid, parathyroid, adrenal cortex, adrenal medulla, endocrine pancreas, pituitary.

### **Module – VIII :Nervous system**

Main divisions, structure and function of various parts of brain: brain stem, cerebral cortex, cerebellum and diencephalon, structure and function of spinal cord, cerebrospinal fluid, cranial and spinal nerves, introduction to autonomic nervous system, neuralgia, sciatica, coma, poliomyelitis, EEC, CT in brief.

## **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
------------	---	----	-------	----	----

<b>Weightage (%)</b>	5	10	8	7	70
----------------------	---	----	---	---	----

3. Martini: Fundamentals of Anatomy and Physiology (6th & 7th Ed.)

# FOOD SCIENCE – I

**Course Code: DAN4104**

**Credit Units: 04**

## **Course Objectives:**

1. Students learn about the various food groups and their structure and composition
2. Properties of all food groups are included in the subject to make students aware about the various processes
3. Cooking methods involved for making varieties of foods are being known by the students.
4. Various adulterants and their tests of presence are learnt by the students which they can utilize for doing quality check.
5. Evaluating the various foods on different measures is included to make students know about those measures and their use.

## **Course Contents:**

### **Module – I**

Physical & Physiological changes in food.

- a) Colloidal Chemistry as related to food emulsions, foams, sols & gels, osmotic pressure. b) Enzymatic browning immobilized enzymes & enzymes in food Processing..  
c) Denaturation of Protein.

### **Module – II :Cereal and cereal Products:**

(A) Cereal grains, structure & composition , Cereal products, Breakfast Cereals. Leavening agents and products.

### **Module – III :Sugar and Sugar Products**

Manufacturing Process of Sugar Stages of sugar Cookery. Starch Structure , gelatinization, Modified Food Starches.

### **Module – IV :Fruits & Vegetables:**

Pigments and colour in Food.

### **Module – V :Milk & Milk Products:**

Composition and properties of milk. Dairy Products: Cultured milk , Yoghurt, butter, Whey, cheese etc.

### **Module – VI :**

**Meat , Poultry & Egg:** Postmortem changes in meat, tenderizing meat, heat induced changes in meat, meat substitutes.

Egg: Structure & composition , changes during storage, functional properties of egg, egg substitutes.

### **Module – VII :Food Additives**

- a) Meaning, need of food additives.  
b) Antioxidants, chelating agents, coloring agents, curing agents.  
c) Nutrient supplements, Non nutritive sweeteners, pH control agents.  
d) Preservatives, stabilizers and thickeners, Other Additives.  
e) Additives & Food Safety.

### **Module – VIII :Food Adulteration and Sensory evaluation**

Definition, meaning and various tests used in Sensory evaluation & food product development.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

# THERAPEUTIC NUTRITION-I

**Course Code: DAN4105**

**Credit Units: 03**

## **Course Objectives:**

1. To make students learn about the various types of diets included in hospitals as therapy.
2. Various types of diseases, their aetiology and assessment is included which makes students know about the causative factors.
3. The dietary modification in the diseases included is being taught to the students.
4. Surgical conditions, error in normal metabolism are some other conditions about which the students are acknowledged.

## **Course Contents:**

### **Module – I :**

Therapeutic modification of the normal diet Principles of Diet therapy; Routine Hospital diet; Diet modifications for therapeutic care, enteral and parenteral nutrition

### **Module – II :**

Etiology, clinical aberrations, prevention and nutritional management of Infection

Fever (Acute and chronic)

Allergy

Stress

Burns

### **Module – III :**

Nutrition in surgical conditions -pre and post operative

Obesity – Etiology , Assessment , Complications and Dietary Management

Nutrition in bone and joint diseases – Gout , Osteopenia , Osteoporosis

### **Module – IV :**

Etiology, manifestations and dietary management of

a Gastro intestinal tract disorders- Peptic ulcer, diarrhea, constipation,

b mal absorption syndrome – carbohydrates, fat and lactose intolerance, sprue and celiac disease,

### **Module – V :**

Inborn errors of metabolism, Introduction, clinical features, dietary management of phenylketonuria,

Galactosemia, Alkaptonuria

## **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

## NUTRITIONAL BICHEMISTRY LAB

**Course Code: DAN4106**

**Credit Units: 01**

### **Course Objectives:**

1. Students learn the process to identify the presence of one or more component present in food.
2. Practical teaches them about the preparation of solutions and buffers.
3. Qualitative and quantitative estimation of nutrients is learnt by the students.
4. The change in activity of certain foods on adding chemicals and observing them.

### **Course Content:**

1. Preparation of standard solutions.
2. Preparation of buffers using buffer tables and verify pH
3. Extraction and quantitative estimation of total sugars and reducing sugar from food stuffs.
4. Isolation and estimation of casein from milk.
5. Quantitative estimation of proteins by kjeldahl's, Biuret and lowary's method (any two methods).
6. Effect of pH, concentration, time and temperature of incubation on enzyme activity.
7. Estimation of activity of alkaline phosphatase in Moong been seeds.

### **Examination Scheme:**

<b>IA</b>				<b>EE</b>		
<b>A</b>	<b>PR</b>	<b>LR</b>	<b>V</b>	<b>PR</b>	<b>WT</b>	<b>V</b>
5	10	10	5	25	25	20

## FOOD SCIENCE – I LAB

**Course Code: DAN4107**

**Credit Units: 01**

### Course Objectives:

1. This practical aims at making students learn about the presence and absence of adulterants in foods.
2. Various experiments to check the purity and quality of foods are included to make students know about them and their use in future.
3. Students learn about the sensory evaluation and the various types and its uses to check the quality of food.
4. Students are made to think about innovative recipes by focussing on new product development and then checking its acceptability.

### Assessment of purity and quality of different food

- 1 Detection of metanil yellow in a given food sample .
- 2 Check the presence of rhodamine B in the given food sample.
- 3 Test the presence of sugar in honey.
- 4 Detection of NaHCO<sub>3</sub> in flour.
- 5 Check for the presence of vanaspati and rancidity in the ghee.
- 6 Check the milk for presence of protein, urea, sugar and starch.
7. Check the presence of mineral oil in the edible oil sample.

### Sensory Evaluation of Foods\

- 1 Design of sensory experiment – selection of panel, types of panel, training of panel, development of score card , data analysis and interpretation of results.
- 2 Determination of test threshold for the different sensations sweet, salty, sour.
3. Conduct test to know the acceptability of a new product using rating test.

### Examination Scheme:

IA				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	25	25	20

## **THERAPEUTICS NUTRITION – I LAB**

**Course Code: DAN4108**

**Credit Units: 01**

**Course Objectives:**

1. This practical aims to make students learn and make use of the various cooking methods.
2. Students learn to plan about the various diets of various diseases they have learnt in theory.
3. Calculation of nutritive values, the preparation of the planned recipe, its presentation and its evaluation is known by the students.
4. Including the correct choices of foods and the correct method of preparation is being learnt by the students.
5. Students learn the way of presenting a recipe to the person or patient.

**Course Content:**

Planning, Calculation, Preparation, serving and evaluation of therapeutic diets for diseases covered in theory

**Examination Scheme:**

<b>IA</b>				<b>EE</b>		
<b>A</b>	<b>PR</b>	<b>LR</b>	<b>V</b>	<b>PR</b>	<b>WT</b>	<b>V</b>
5	10	10	5	25	25	20

# Syllabus – Second Semester

## ADVANCED NUTRITION–II

**Course Code: DAN4201**

**Credit Units: 03**

### Course Objectives:

- 1.To understand about the digestion, absorption and transport of proteins, vitamins and minerals
2. To understand the role of nutrient interaction and drug-nutrient interaction in our body
3. To learn about the practical knowledge of various nutrients.
4. To learn about the physiological, pharmacological and therapeutic effects, toxicity and deficiency of vitamins.

### Course Contents:

#### Module – I

**Proteins:** Classification, digestion, absorption and transport - review. Protein quality, methods of evaluating protein quality. Protein and amino acid requirements. Therapeutic applications of specific amino acids: Branched chain, glutamine arginine, homocysteine, cysteine, taurine.

#### Module – II :

**Vitamins :** Historical background, food sources, absorption and transport, biochemical function. Interactions with other nutrients. Physiological, pharmacological and therapeutic effects, toxicity and deficiency with respect to the following

- a) Fat soluble: Vitamins A, D, E & K.
- b) Water soluble:Thiamine, riboflavin, niacin, biotin, pyridoxine, folic acid, pantothenic acid,ascorbic acid, cyanocobalamin, choline, inositol.

#### Module – III :

##### Minerals

(Note: For each nutrient sources, bioavailability, function requirements, RDI/ESADDI, deficiency and toxicity, interactions with other nutrients are to be discussed)

Macro minerals: calcium, phosphorus, magnesium sodium, potassium and chloride.

Micro minerals: Iron, copper, zinc, manganese, iodine, fluoride.

Trace minerals: Selenium, cobalt, chromium, vanadium, silicon, boron, nickel.

#### Module – IV :Nutrient

Nutrient interaction, drug-nutrient interaction.

### Examination Scheme:

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

5. Trace Elements in Human and Animal Nut. – Underwood, N.Y.
6. Essays in Biochemistry – Samul Graff, Tandon Book Dept. Sec. –16
7. Diabetes Mellitus- The Williams and Wilkinas Co., U.S.A.

## NUTRITIONAL BIOCHEMISTRY-II

**Course Code: DAN4202**

**Credit Units: 04**

### **Course Objectives:**

1. To understand the metabolism of carbohydrate, amino acid, lipid metabolism and nucleotide.
2. To learn the mechanism of enzyme action and role of enzymes in medicine and food industry.
3. To understand the different bio physical techniques with their applications.
4. To learn about the regulation of metabolic pathways in our body.

### **Course Contents:**

#### **Module – I :**

Metabolism of Carbohydrates: Review of glycolysis, fate of pyruvate: alcoholic and homolactic fermentation, Cori cycle, Citric acid cycle. Hexose monophosphate shunt, glycogenesis, glycogenolysis, gluconeogenesis, glyoxalate cycle. Regulation of blood glucose level.

#### **Module – II :**

Amino Acid Metabolism: Transamination, deamination, urea cycle, amino acids as biosynthetic precursors- biosynthesis of heme, biologically active amines and glutathione.

#### **Module – III**

Lipid Metabolism: Beta-oxidation of saturated and unsaturated fatty acids (including brief account of minor pathways of fatty acid oxidation), biosynthesis of fatty acids, triacylglycerols, Phospholipids, ketone body formation and their utilization, prostaglandins. Major alterations in carbohydrates, protein and fat metabolism in chronic nutrition related degenerative diseases.

#### **Module – III :**

Nucleotide Metabolism :Biosynthesis of purines and pyrimidines, DNA replication, transcription, translation, regulation of gene expression (Prokaryotes), mutagenesis and DNA repair, recombinant DNA technology and genetically modified foods.

#### **Module – IV :**

Enzymology :Mechanism of enzyme action (acid base catalysis, covalent catalysis, metal ion catalysis, electrostatic catalysis, proximity and orientation effect, preferential binding of the transition state complex, strain and distortion theory) Enzyme inhibition – irreversible(non-competitive, uncompetitive), reversible(competitive), feed back and product inhibition, regulation of enzyme activity by covalent modification, allosteric modification, isoenzymes, applications of enzymes in medicine and food industry

#### **Module – V :**

Biophysical Techniques: Chromatography- Column, Thin layer, Paper, Ionexchange, Affinity, Molecular exclusion, GLC and HPLC.

Electrophoresis- cellulose acetate and gel electrophoresis, isoelectric focusing. Spectrophotometry- Beer Lambert's Law, determination and application of extinction coefficient.

Centrifugation- sedimentation velocity and analytical methods, ultracentrifugation. Immunochemical Methods – RIA, ELISA. Use of Isotopes in biochemistry. \*Regulation of metabolic pathways should be discussed along with.

### **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

**Texts and References:**

# RESEARCH MEHODOLOGY

**Course Code: DAN4203**

**Credit Units: 04**

## **Course Objectives:**

1. To understand the scientific approaches to research.
2. To appreciate the importance of scientific writing and develop competence in writing skills.
3. To identify the sources of variability and uncertainty in research.
4. To learn about the different methods of research.

## **Course Contents:**

### **Module – I :**

Nature of research in Home Science, scientific approach. Types of Research: Experimental, Field studies, Case study, and Survey research.

Designing research: Problem, hypothesis, concept and types of variables (dependent, independent, random, discrete, continuous, qualitative and quantitative).

### **Module – II**

Methods of data collection: Interview, observation, questionnaire, rating scales. Research Designs: randomized groups, matched groups, pre and post test and factorial.

Sampling: Meaning, importance and types; random (simple, stratified, cluster), Non random (incidental, purposive, quota)

### **Module – III :**

Statistics: Meaning, primary data, array, frequency, frequency distribution and its types.

Measures of central tendency: Mean, Median, Mode; Measures of dispersion: range, mean deviation, standard deviation, root mean square deviation, variance, moments about origin and moments about mean, Binomial and Normal distribution, Skewness and Kurtosis. Case studies of areas of current research. Formulating a research plan and its presentation

### **Module – IV :**

Type of Articles (review, letters etc). Scientific paper format (Abstract, Introduction, Materials and Methods, Results, Discussion). Writing, evaluating, presenting and publishing the results of scientific research in the academic press (journals, conferences etc). Choosing the appropriate journal (Sources, Information, Instructions to authors, peer review system, journal evaluation)

## **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

## **Texts and References:**

### **Texts:**

1. S.C. Gupta & V.K. Kapoor: Fundamentals of Mathematical Statistics
2. S.C. Gupta: Fundamentals of statistics
- 3 G. Udny Yule, N.M.G. Kendall: An Introduction to the theory of Statistics

### **References:**

7 Sneececer G. W. Statistical Methods. Applied Pacific Private Ltd., 1961.

## THERAPEUTICS NUTRITION-II

**Course Code: DAN4204**

**Credit Units: 03**

**Course Objectives:**

1. To understand causative factors and metabolic changes in various disease/disorders
2. To gain knowledge of the principles of diet therapy
3. To learn principles of dietary counseling
4. To understand the rationale of prevention of various diseases/disorders

**Course Contents:**

**Module – I :**

Etiology, manifestations and dietary management of Renal Disorders-  
Glomerulonephritis,  
Nephrotic syndrome,  
Acute and chronic renal failure

**Module – II :**

Nutrition in AIDS and Cancer  
Nutrition management in special conditions; space travel, high altitude/ low temperature, heavy manual labour in tropical climate

**Module – III :**

Etiology, metabolic and clinical aberrations, complications, prevention and nutritional management of:  
a) Weight imbalances (over and under nutrition)  
b) Diabetes mellitus  
c) Cardiovascular disorders - Hypertension, Atherosclerosis, Coronary heart disease.

**Module – IV :** Chronic alcoholism – effect on digestion and absorption, alcohol nutrient interaction and dietary management.

Etiology, manifestation and dietary management in disorders of Liver, and pancreas. - Infective hepatitis, cirrhosis, hepatic failure, s, pancreatitis – acute and chronic

**Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

**Texts and References:**

**Texts:**

- 1 Mal-Nutrition and the Eye: Donala Sterart McLaren, Academic Press, New York and London.
- 2 Diabetes Mellitus: Williamses and Wikins Co., USA
- 3 Nutrition and Physical fitness: Bogert, L.J.
- 4 Human Nutrition Mc Durt, Maxine
- 5 Applied Nutrition – Rajalakshmi, R.
- 6 Hand boom of diet therapy: Dorothea, Turner.

**References:**

- 8 Clinical Dietetics and Nutrition - Anita, F.P.

9 Food Science and Technology: Pyke, Maonus.

10 Modern Nutrition in health and disease by Goodhearth R.S. Shills.

# DIETETIC TECHNIQUES AND PATIENT COUNSELING

**Course Code: DAN4205**

**Credit Units: 03**

## **Course Objectives:**

1. To understand the knowledge about the disease like gastrointestinal disorders, renal disease, liver diseases etc.
2. To familiarize the students with the layout and organization of the hospital.
3. To assess the medical profile of the patient like general details, family history, and associated complications, anthropometry, clinical status, biochemical and biophysical status.
4. To suggest the diet for the particular diseased condition.

## **Module I**

Dietitian as part of the Medical Team and Outreach Services.

Clinical Information - Medical History and Patient Profile Techniques of obtaining relevant information, Retrospective information, Dietary Diagnosis, Assessing food and nutrient intakes, Lifestyles, Physical activity, Stress, Nutritional Status. Correlating Relevant Information and identifying areas of need.

The Care Process - Setting goals and objectives short term and long term, Counselling and Patient Education, Dietary Prescription.

## **Module II**

Motivating Patients. Working with -

B. Hospitalized patients (adults, pediatric, elderly, and handicapped), adjusting and adopting to individual needs.

C. Outpatients (adults, pediatric, elderly, handicapped), patients' education, techniques and modes.

Follow up, Monitoring and Evaluation of outcome, Home visits

## **Module III**

Teaching aids used by dietitians- charts, leaflets, posters etc., preparation of teaching material for patients suffering from Digestive disorders, Hypertension, Diabetes, Atherosclerosis & Hepatitis and cirrhosis.

## **Module IV**

Maintaining records, Reporting findings, Applying findings, Resources and Aids for education and counselling, Terminating counselling, Education for individual patients, Use of regional language, linguistics in communication process, Counselling and education.

## **Texts and References:**

### ***Texts:***

- 1 Modern Nutrition in Health and Disease – Goodhearth, R. S.
- 2 Recommended dietary allowance for Indian – I.C.M.R., 1980
- 3 Nutrition and Development- Winick 1973, Univ. of Calombia.
4. Biology of Nutrition – Eclames 1972, Palaniuma Press
- 5 Foods & Nutrition – Krause 1972, Saunders.

### ***References:***

- 7 Clinical Dietetics and Nutrition - Anita, F.P.
- 8 Food Science and Technology: Pyke, Maonus.
- 9 Modern Nutrition in health and disease by Goodhearth R.S. Shills.

## **NUTRITIONAL BIOCHEMISTRY-II LAB**

**Course Code: DAN4206**

**Credit Units: 01**

### **Course Objectives:**

1. To understand the use of instruments like chromatography, calorimeter, etc. in biochemical estimation .
2. To detect the purity of sample by using biochemical techniques.

### **Course Content:**

1. Extraction and quantitative estimation of ascorbic acid.
- 2 Isolation and quantitative estimation of B1, B2 vitamins in various food stuffs.
- 3 Estimation of Moisture, Crude Fat, crude fiber and ash in the food stuffs.
- 4 Determination of energy value of foods using bomb calorie meter.
- 5 Determination of iodine value of given fat sample.
- 6 Determination of Sodium & Potassium of food /drinks through Flame Ph Meter
- 7 Separation of amino acids by paper chromatography, TLC.
8. Separation of proteins by gel electrophoresis

## **ADVANCED NUTRITION-II LAB**

**Course Code: DAN4207**

**Credit Units: 01**

**Course Objectives:**

1. To develop the new food product from different food groups.
2. To understand the knowledge about sensory evaluation of the food product

**Course content:**

1. Market and consumer survey to identify new products
2. Product development from different food groups and their sensory evaluation by different methods.
3. Two Visit to Food Industry

## **THERAPEUTICS NUTRITION – II LAB**

**Course Code: DAN4208**

**Credit Units: 02**

### **Course objectives:**

1. Plan and prepare suitable therapeutic diets based on patient needs for various diseased condition.
2. To provide nutritional counseling for the prevention/ treatment of various disease in hospitals.
3. Prepare special therapeutic diets.

### **Course Contents:**

- 1 Planning, Calculation, Preparation, serving and evaluation of therapeutic diets for diseases covered in theory
- 2 Study of the management of food services in selected Hospitals.
- 3 Visits to dietetic clinics in hospitals- case study of patients needing specific therapeutic diets.

## Syllabus – Third Semester

### COMMUNITY NUTRITION-I

Course Code: DAN4301

Credit Units: 02

#### Course objectives:

1. To understand community and common health problems in the community.
2. To study methods to assess nutritional status in the community.
3. To study the impact of health care policies and different health care delivery systems in improving health of the community.
4. To understand the role of national and international organizations in delivering community nutrition.

#### Course Contents:

##### Module I :

Definition and brief study of community, family, village and block. Malnutrition - causes, ecological factors, effects of malnutrition, protein deficiency diseases - PEM, Kwashiorkor - incidence, prevalence, epidemiology. The package programmes of immunization, nutrition education, feeding programmes, and measures to overcome malnutrition.

##### Module II :

Assessing the food and nutrition problems in the community - socio economic diet survey, anthropometry, clinical examination, laboratory examination for common nutrition problems.

##### Module III :

Nutrition and National Development, National nutritional policy - Aim, objectives, guidelines and thrust areas. PDS - Public distribution system, Agricultural planning - New strategies.

##### Module IV :

Nutrition intervention Programmes - Objectives, operation of feeding programmes. ICDS, TINP, NNMS, IRDP, DWACRA.

National organizations - ICMR, NIN, NNMB, ICAR, CFTRI, NIPCCD.

International organizations - FAO, WHO, UNICEF, UNESCO, World Bank.

#### Examination Scheme:

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

#### Texts and References:

##### Texts:

1. Health and hygiene - A Lesties Banks and Hislop J.A, Universal Tutorial Press, London.
2. Challenges in Rural Development - Senha H.K, Discovery publishing.
3. Food consumption and planning - Vol 5, International encyclopedia.
4. Theory and Practice of Public Health, Oxford university press, London.

##### References:

5. Applied Nutrition and Health Education, Sabarwal .B, Common wealth publishers, New Delhi.
6. Foundations of Community Health Education, Mc Graw Hill, London.

# **INSTITUTIONAL FOOD ADMINISTRATION**

**Course Code: DAN4302**

**Credit Units: 04**

## **Course Objectives:**

1. To understand management aspects related to food services and its application
2. Develop general knowledge on the origins and development of food service systems in hotels, restaurants, and institutions.
3. To identify variety of managerial, production, and service areas that is typical of the food service industry.
4. To understand managerial responsibilities as they relate to food service functions including menu planning, purchasing, storing, preparation, and recipe development.
5. To understand role of food safety, food budgeting and food standards.

## **Course Contents:**

### **Module I :**

Food service system and management

- (i) Introduction to food service system
- (ii) Evaluation of the food service industry
- (iii) Characteristics of the various types of food service units – commercial, institutional, hospital, military, any other
- (iv) Scope and development of food service institution in India
- (v) Effects of environmental changes on different types of establishments

### **Module II :**

Food service management

- (a) Definitions, principles and functions of Management
- (b) Approaches to management – traditional, system approach, management by objectives
- (c) Financial management – (i) Definition, application of management accounting to catering operations
- (ii) Budgeting, determining the financial needs sources
- (iii) Book- keeping and accounting

### **Module III : Food service organization**

- (a) Definition and types of organization in food
- (b) Tools of organization Chart, job description, job specification, work schedule and communication
- (c) Recruitment, induction, training, motivation and performance appraisal of personnel
- (d) Administrative leadership

### **Module IV: Planning and service of food**

- (a) Menu planning
  - (i) Types of menu structure
  - (ii) Factors affecting menu planning
  - (iii) Menu evaluation

### **Module V :Delivery and service of food**

- (a) Food service system Conventional, commissary, assembly service
- (b) Service of food: Self-service, tray service, waiter service, portable meals, banquets
- (c) Food service in selected types of organizations Hospitals, schools, colleges, industrial canteens, airlines and space
- (d) Customer relationships

### **Module VI :**

#### **Quality and Quantity control**

- (a) Construction and selection of recipes by quantity cooking

- (b) Standardization of recipe, recipe format and adjustment
- (c) Product standard and production control

#### **Module VII:**

##### **Food cost accounting / Analysis**

- (a) Importance of costing and food cost control
- (b) Methods of costing
- (c) Cost classification into materials, labor and overheads and their percentage analysis
- (d) Reports and trend analysis

##### **Food purchasing, selection and storage**

- (a) Purchasing –
  - (i) Forecasting, product selection, purchasing , specification
  - (ii) Methods and procedure of purchasing
- (i) Elements of receiving process
- (ii) Inventory control
- (c) Storage -
  - (i) Dry
  - (ii) Refrigerated and cold storage

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

## FOOD SCIENCE - II

Course Code: DAN4303

Credit Units: 03

### Course Objectives:

1. To inculcate knowledge about various food groups
2. To study nutritional value and cooking properties of vegetable and fruits, eggs, meat, fish and sea foods, milk and milk products, grams and dals.
3. To study cooking techniques with respect to various food groups.
4. To gain knowledge of new food products available in the market.

### Course Contents:

#### Module I :

**Vegetables and fruits:** Structure, texture, pigments (Structure) and acids in vegetables and fruits, Browning reaction. Pectic substances: Characteristics, uses, theory of pectic gel formation, testing of pectin, factors affecting jelly formation.

#### Module II :

**Eggs:** Structure, composition and selection. Coagulation of eggs protein. Eggs cooked in shells, poached eggs, omelets and their types. Role of eggs in baking

**Meat:** Structure, constituents of meat, post-mortem changes and symptoms, Methods of cooking and changes in meat during cooking. Tenderness and juiciness.

#### Module III : Fish and sea food

Types and composition, Storage and changes during storages. Changes during processing. By products and newer products. Cooking techniques for fish

#### Module IV :

**Milk and Milk products:** Composition, structure and constituents of milk and Milk products – Carbohydrates, Proteins, fats, vitamins and minerals. Coagulation of milk protein. Setting of curds, Creaming butter, different types of cheese. Micro organisms role in curds and cheese. New Dairy food products in market with Nutritional value

#### Module V: Grams and Dhals:

Composition, methods of processing and cooking, Effect of processing such as roasting, parching, soaking, germination and fermentation.

### Examination Scheme:

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

A – Attendance, CT- Class Test, S- Seminar, V- Viva, Q –Quiz, HA – Home Assignment, EE – End Term Exam

# FOOD MICROBIOLOGY-I

**Course Code: DAN4304**

**Credit Units: 05**

## **Course Objectives:**

1. To learn importance of microorganisms as food and its nutritional value as well as impact on health.
2. To understand methods of detection of microorganisms its use in food safety.
3. To study spoilage caused by microorganisms in various food groups and food borne diseases.
4. To understand methods of food preservation and indicators of food safety and quality assurance.

## **Course Contents:**

### **Module I :**

Microorganisms of importance in food- role of bacteria and fungi, sources, taxonomy, morphology, cultural and physiological characteristics and biochemical activities.

### **Module II :**

Factors Affecting Growth of Microorganisms- intrinsic and extrinsic factors like pH, water activity, oxidation reduction potential, nutritional requirements, temperature, relative humidity, gaseous environment, biological structure of food and inhibitory substances.

Methods of Isolation and Detection of Microorganisms or their products in food

- (a) Conventional methods
- (b) Rapid methods (newer techniques)
- (c) Immunological methods- fluorescent, antibody, radio Immune assay, ELISA etc
- (d) Chemical methods- Thermo stable, nuclear, ATP measurement and PCR(Polymer chain reactions)- only principles in brief.
- (e) Microbiological Assays.

### **Module III :**

Sources of contamination of food- Water, air, soil, sewage, animals, during handling and processing.

General principles underlying spoilage.

- (a) Chemical changes due to microbial spoilage.
- (b) Spoilage of different groups of foods- cereal and cereal products, vegetables and fruits, meat and meat products, egg and poultry, fish and other sea foods, sugar, milk and milk products, canned food.

Role of microbes in fermented foods and genetically modified foods oriented fermented foods, malt, bread, beverages, vinegar fermented vegetables, fermented dairy products, tea and coffee. Single cell protein, fats, amino acids and enzymes from microorganisms.

### **Module IV:**

Food Preservation- physical methods- drying, freeze drying, cold storage, heat treatment, irradiation, high pressure processing. Chemical preservatives and natural antimicrobial compounds. Biologically based preservation systems and probiotic bacteria.

Food Borne Diseases- infections and intoxications. Bacterial and viral food borne disorders. Food borne important animal parasites. Mycotoxins

Food Sanitation- microbiology in food plant sanitation, bacteriology of water, sewage and waste treatment and disposal. Microbiology of the food product 10. Indicators of food safety and quality- microbiological criteria of foods and their significance.

### **Module V :**

HACCP system and food safety- Introduction, need, benefits,& principles of HACCP.

- Guidelines for application of HACCP principles.
- The HACCP system in India

- Regulations related to genetically modified foods.

- International organizations and agreement in the area of food standard and quality control.

**Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

A – Attendance , CT- Class Test , S- Seminar , V- Viva , Q –Quiz , HA – Home Assignment , EE – End Term Exam

## COMMUNITY NUTRITION LAB

**Course Code: DAN4305**

**Credit Units: 01**

**Course Objectives:**

1. To learn method of socio-economic survey.
2. To perform dietary survey.
3. To study clinical examination to assess nutrient deficiencies.
4. To plan and conduct nutrition education program.

**Course Content:**

Conduct of socio - economic survey

Conduct of Diet survey

Conduct of Clinical Examination

Planning, conducting and Evaluating Nutrition Education Programme.

**Examination Scheme:**

IA				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	25	25	20

## FOOD SCIENCE-II LAB

**Course Code: DAN4306**

**Credit Units: 02**

**Course Objectives:**

1. To conduct appropriate experiments of food science and interpret the results.
2. To study effect of various treatments on food.
3. To learn basic culinary skills in various food groups.
3. To plan and perform nutrient rich recipes.

**Course content:**

Practical related to theory papers i.e : Effect of various treatments on the foods mentioned in syllabi

**Examination Scheme:**

IA				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	25	25	20

## FOOD MICROBIOLOGY- II LAB

**Course Code: DAN4307**

**Credit Units: 02**

1. To learn basic microbiological apparatus and equipments used in the laboratory.
2. To study and perform sterilization techniques used in microbiology.
3. To study and perform staining of bacteria and microscopic examination.
4. To perform isolation and culture techniques used in food microbiology.
5. To demonstrate RIA and ELISA

### **Course content:**

1. Microbiological apparatus and equipments-a basic introduction, instruments needed for isolation, cultivation and maintenance of microbes, tools needed in microbiology laboratory for inoculation and culturing
2. Cleaning and sterilization procedures for glassware.
3. Preparation and sterilization of laboratory media.
4. Staining of bacteria- gram's staining, use of oil immersion lens, micrometry, and microscopic enumeration.
5. Spread plating, pour plating, streaking techniques.
6. Enrichment of isolated cultures, SPC, MPC. Coli count and coli confirmations.
7. Study of biochemical characteristics of isolated cultures-
  - Fermentation reaction · Starch cultures
  - IMVIC Tests · Catalase test
  - Oxidase test · Urease test
  - H<sub>2</sub>S test · Coagulase test
8. Microbiological analysis of milk- raw, boiled and pasteurized - MBRT Test.
9. Demonstration of Techniques of
  - Radio immune Assay (RIA)
  - Enzyme Linked Immuno Sorbent Assay (ELISA)

### **Examination Scheme:**

IA				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	25	25	20

## SUMMER INTERNSHIP

**Course Code: DAN4335**

**Credit Units: 06**

### **Objectives:**

Summer internships are usually eight weeks long and it is full time. The students are required to do internships during the summer than during any other time of the year. These short term experiences provide a real insight into what it's actually like working in a particular job or career field. There's ample time to get into a regular work routine and gain valuable knowledge and skills. Internship objectives include:

- Developing personally and professionally while gaining confidence and real-world experience
- Meeting and networking with practitioners in one's area of interest
- Mentoring and performance feedback from the site supervisor
- Earning academic credit while getting paid or non paid.

### **General Guidelines:**

Every student of post graduate courses will be required to undergo a practical training in an organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the fourth semester examinations. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific project to the candidate, which will be completed by him/her during the period of training. The work done by the candidate during the training period shall be submitted in the form of a report as per the guidelines provided by the Department.

Chapter Scheme for the SIP Report:

Chapter I: Introduction	- 10 marks
Chapter II: Conceptual Framework/National/International Scenario	- 05 marks
Chapter III: Presentation, Analysis and Findings / Case Studies	- 20 marks
Chapter IV: Conclusion and Recommendations	- 10 marks
Hospital Chief Dietitian Marking	-30 marks

The Chief Dietitian is asked to evaluate the student based on his/her performance as well as their conduct. The report has to be written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise of a maximum of 70 pages and has to be submitted in two copies.

### **THE COMPONENTS OF A SIP REPORT**

The outcome of Summer Internship is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report: The body of the report should have these four logical divisions
  - a. *Introduction*: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b. *Conceptual Framework / National and International Scenario*: (relating to the topic of the Project).
  - c. *Presentation of Data, Analysis and Findings / Case studies* : (using the tools and techniques mentioned in the methodology).
  - d. *Conclusion and Recommendations*: In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexure: Questionnaires (if any), relevant reports, etc.

### **Evaluation Scheme:**

<b>SIP Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

# Syllabus – Fourth Semester

## COMMUNITY NUTRITION-II

**Course Code: DAN4401**

**Credit Units: 02**

### **Module I:**

Factors affecting food production & conservation- Per capita food availability and consumption, poverty, family planning, social & cultural values, education. Food security, food safety, nutrition security, Nutrition surveillance and planning.

### **Module II:**

a) Nutritional epidemiology: Introduction aims and purposes.

Principles of Nutritional epidemiology. Types of epidemiology and sources of information.

b) Descriptive epidemiology, cross sectional analysis, Prevalence and incidence, Risk factors, Socio demographic and psychosocial variables.

### **Module III:**

Vitamin deficiency - A, B1, B2, Niacin, C, D - prevalence, programmes to combat.

Nutritional Anaemia - Prevalence, programmes to control.

IDD and fluorosis - Prevalence, causes, symptoms and programmes to control.

Nutritional Programmes for improvement of Nutritional status

Nutrition Education:

- a Methods
- b Planning and execution
- c Evaluation and follow up

### **Module IV:**

Nutrition education - Merits, planning, evaluation and conduct.

Health care delivery - PHC, School Health services and their role in preventing communicable diseases.

### **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

### **Books Recommended:**

- 1 Nutritional evaluation of food processing, Roberts Haris John willy & Sons, N.Y. London.
- 2 Nutrition and Physical Fitness: Bogrert, L.J.
- 3 Nutrition in India: V.N.
- 4 Human Nutrition- M.C. Durt, Maxine
- 5 Applied Nutrition- Rajalakshmi-R.
- 6 Biology of nutrition – Elements 1972, Platinum Press
- 7 Nutritional Evaluation of Food

# FOOD PROCESSING & TECHNOLOGY

Course Code: DAN4402

Credit Units: 03

## Course objectives:

1. To understand principles of food preservation and its application of the different food.
2. To impart systematic knowledge of basic and applied aspects food processing and technology
3. To gain in depth knowledge about processing and preservation techniques of milk and milk product technology and fruits and vegetable technology.
4. To gain knowledge about industrial processing of legumes and oil seeds.

## Module I:

Processing technology of foods & nutritional implications for the following:

- Cereals & Pulses- Wheat grain characteristics and products, Rice processing, Pulses Processing & their elimination of toxic factors. Fermentation & Germination Nuts & Oilseeds- Nuts Oilseeds Processing, solvent extraction purification, hydrogenation and tempering products - butter, margarine etc
- Flesh Foods: Processing & Their Products.

## Module II:

Milk and Milk Products:- Classification and standardization, Pasteurization, homogenization, packing of milk. Milk Products- Fortified milk, Skim milk, Concentrated milks, Cream, Butter, Cheese, Ice cream and Indigenous milk products: Khoa, Paneer, Curd, Yoghurt, Ghee.

## Module III:

- Fruits & Vegetables: Physiological and biochemical changes during ripening, handling & storage & fruit processing. Processing of vegetables, canning, freezing, dehydration, pickles & chutneys. Beverages & Appetizers : Classification, Coffee, Tea, coco chocolates, Fruit beverages, soups, Vegetable Beverages, Carbonated & Noncarbonated beverages, Alcoholic beverages.

## Module IV:

- a). Physical principles in Food Processing Operations:
  - b). Food Deterioration, Methods of Preservation and Processing: Thermal Processing, Refrigeration, Freezing, Dehydration, Ionizing radiations, Fermentation, concentration.
  - c). Chemical Principles of Food Processing:
  - d). Preservation/processing by sugar, salt, smoke, acid and chemicals.
  - e). Chemical & biochemical reactions affecting food quality & safety.
- Some Recent concepts in Food Technology -
- Biotechnology in food.
  - Algae as food - Spirulina
  - Low cost nutrient supplement.
  - Packaging of foods.

## Examination Scheme:

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

# NUTRITION FOR HEALTH & FITNESS

**Course Code: DAN4403**

**Credit Units: 03**

## **Course objectives:**

1. Students learn about the meaning and importance of general health and fitness.
2. Detailed study of various sports and the diet involved for best outcome is being included.
3. Subject aims to make students understand how nutrition is important pre and post games and how it makes an influence on the performance of the player.
4. Nutrition and diet of injured athletes, specially abled athletes, along with the influence of environmental conditions are being learnt by the students.

## **Module I:**

Physical Fitness and health status: meaning, concept, assessment criteria and management

Healthy life style: Strategies, factors that promote life style changes, self management skills. Body composition in exercise and sport

## **Module II:**

Physical Activity: need, principles of physical activity Energy input and output: Different energy systems for endurance and power activity, Fuels and nutrients to support physical activity.

## **Module III:**

Nutrition in Sports: Sports specific requirement, Diet manipulation, Pre-game, during and post-game meals. Diets for athletes with high energy requirements, stress, fracture and injury

Water and electrolyte balance: Losses and their replenishment during exercise and sports events, effect of dehydration, sports drinks.

## **Module IV:**

Special Nutrition considerations for female, older and disabled athletes. Nutrition of athletes in hot, cold and high altitude environments

Nutrition education of athletes and coaches.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

## **Books Recommended**

- Ira Walinaky, (1998) Nutrition in Exercise and sport
- Charles B. Corbin, Ruth Lindsey and grey walk (2000) Concepts of fitness and wellness
- Robert A. Robergers and Scott O. Roberts (2000) exercise physiology.

## COMMUNITY NUTRITION-II LAB

**Course Code: DAN4404**

**Credit Units: 02**

### **Course Objectives:**

1. To conduct socio-economic and dietary survey in detail.
2. To conduct of clinical examination with ICMR score card.
3. To design, perform, interpret and evaluate nutrition education program.
4. To critically review various nutritional programs conducted in villages
5. To cook recipes for various socio-economic groups: LIG, MIG, HIG.

### **Course content:**

1. Conduct of socio - economic survey with Nutritional status parameters
2. Conduct of Dietary survey with detail calculations
3. Conduct of Clinical Examination with ICMR score card.
4. Planning, conducting and Evaluating Nutrition Education Programme.
5. Evaluation of various nutritional programmes conducted in villages.
6. Cooking of recipes for Low income group , Middle income group and High Income group.

### **Examination Scheme:**

IA				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	25	25	20

# FOOD PROCESSING AND TECHNOLOGY LAB

**Course Code: DAN4405**

**Credit Units: 01**

## **Course Objectives:**

1. To study physical dimensions of grains and other properties.
2. To determine pectin strength in various fruits and vegetables.
3. To study various food adulterants present in common foods.
4. To study tests used in sensory appraisal.
5. To prepare culture media of various microorganisms.

## **Course content:**

1. Determination of physical dimensions of grains (Length, Breadth, Thickness and Bulk density)
2. Determination of wet and dry gluten content of flours.
3. Testing the pectin strength of different fruits and vegetables.
4. Determination of PH and titrable acidity of a food sample.
5. Determination of Total solids as soluble and insoluble in foods
6. Test for adulterants
7. Food Evaluation using different sensory tests
8. Total microbial count
9. Determination of pasteurization effect in milk by MBRT
10. Preparation of culture media for different organisms

## **Examination Scheme:**

IA				EE		
A	PR	LR	V	PR	WT	V
5	10	10	5	25	25	20

# DISSERTATION

**Course Code: DAN4437**

**Credit Units: 06**

## **Course Objectives:**

1. To understand comprehensive knowledge of the literature in the field of nutrition.
2. To conduct and apply appropriate research methods, collect & interpret data systematically; to conduct research ethically.
3. To learn importance of scientific writing and develop competence in writing skills.
4. To do research work and submit dissertation at the end of semester.

## **GUIDELINES FOR PROJECT FILE AND PROJECT REPORT**

Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critically analyzed by the faculty guide and corrected by the student at each stage.

### **PROJECT FILE**

The Project File may be a very useful tool for undertaking an assignment along-with a normal semester, an exploratory study, sponsored projects, a project undertaken during summer period or any other period as per curricula where the researcher is working with a company/organization. The project/ assignment may also be a part of the bigger research agenda being pursued by a faculty/ institution/ department

The Project File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation. This file may be considered in continuous assessment.

#### **In general, the File should be comprehensive and include:**

- A short account of the activities that were undertaken as part of the project;
- A statement about the extent to which the project has achieved its stated objectives;
- A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
- Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
- Any problems that have arisen and may be useful to document for future reference.

### **PROJECT REPORT**

The Project Report is the final research report that the student prepares on the project assigned to him. In case of sponsored project the lay out of the project could be as prescribed by the sponsoring organization. However, in other cases the following components should be included in the project report:

#### **Title or Cover Page**

The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

#### **Acknowledgement(s)**

Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

### **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

### **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

### **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

### **Materials and Methods**

This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

### **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form.

While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

### **Conclusion(s) & Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly.

Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

### **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

### **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

### **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

### **Examples:**

For research article:

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic *Escherichia coli* O157: H7. *Clin Microbiol Infect* , **8** (suppl 1): 116–117.

For book:

Kowalski,M.(1976) Transduction of effectiveness in *Rhizobium meliloti*. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), **7**: 63-67

### **The Layout Guidelines for the Project File & Project Report:**

- A4 size Paper
  - Font: Arial (10 points) or Times New Roman (12 points)
  - Line spacing: 1.5
  - Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **ASSESSMENT OF THE PROJECT FILE AND THE PROJECT REPORT**

Essentially, the assessment will be based on the quality of the report, the technical merit of the project and the project execution. Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project. Project execution is concerned with assessing how much work has been put in.

The Project should fulfill the following *assessment objectives*:

- Range of Research Methods used to obtain information
- Execution of Research
- Data Analysis (Analyze Quantitative/ Qualitative information)
- Quality Control
- Conclusions

### **Assessment Scheme:**

**Continuous Evaluation:**40% (Based on punctuality, regularity of work, adherence to plan and methodology, refinements/ mid-course corrections etc. as reflected in the Project File.)

**Final Evaluation:** 60% (Based on the Documentation in the file, Final report layout, analysis and results, achievement of objectives, presentation/ viva)

**Examination Scheme:**

<b>Research Originality</b>	<b>Dissertation ( including all Chapters)</b>	<b>Research Paper</b>	<b>Power Point Presentation &amp; Viva</b>
20	40	10 marks	30 marks

## **Master of Science - Medical Lab Technology**

## Syllabus - First Semester

### LABORATORY MANAGEMENT AND QUALITY CONTROL

**Course Code:** MLT4108

**Credit Units:** 3

**Course Objective:** To allow students to understand the laboratory management and quality control.

**Course Contents:**

**Module-I: General Concept of Laboratory Management:** Strategic planning; quality system management; human resource management; laboratory design and service model; regulation, accreditation and legislation; safety- biomedical hazard, chemical hazard, ergonomic hazard.

**Module-II: Clinical Laboratory Informatics:** Information flow (patient's registration/ID), test order, sample collection, labeling, performing test, releasing result & report, feedback. LIS selection, Implementations & management; good laboratory practice

**Module-III: Quality Control:** Introduction, analytical variability and calibration; calibration issue in quality control; proficiency testing; Westgard rules; quality control of the product, chemicals, reagent; good, reliable, authentic report; total quality management framework of laboratory; essential elements of quality assurance programme; quality laboratory processes, quality assurance, quality assessment, quality control, quality planning and quality improvement

**Module-IV: Internal Quality control:** Control of pre-analytical variables, control of analytical variables, laboratory precision, accuracy & sensitivity; validation of methods; reference materials and calibrating definitive methods; sources of variation in laboratory test results. Systemic and random errors; quality control charts: Levy-Jenning chart, Cusum chart and Gaussian curve; Internal and external factors for quality control assurance; reference values

**Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

**Recommended books:**

- Praful B. Godkar, Darshan P. Godkar. Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- J Ochei and A Kolhatkar. Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata Mcgraw Hill Publishing Co. Ltd.
- Mc Pherson and Pincus. Henry's Clinical Diagnosis and management by Laboratory Method, 23<sup>rd</sup> Edition, Elsevier.

# ANATOMY

**Course Code: MLT4110**

**Credit Units: 3**

## **Course Objectives:**

To develop the knowledge of anatomical structures; To provide the basic understanding of human organ systems; To provide the concepts of interrelationship among different organ systems.

## **Course Contents:**

**Module-I: Gross Anatomy:** Introduction to Anatomy, nomenclature, anatomical position, planes, tissues and movements.

**Osteology:** Bones of the body and their position; classification of the bones with examples; general features of the bone and normal development; microscopic anatomy of bone; general pattern of blood supply; ossification of the bones of the limbs for age determination. X-rays of bones.

**Module-II: Muscular System:** Classification and identification of the muscles of the body: main attachments, nerve supply and action(s), microscopic anatomy of muscles and the nerve terminations; Details of attachments of the muscles; ultrastructural features of muscle; mechanism of the movement caused by the muscles and various forces exerted by them and their detailed action.

**Arthrology:** Definition and classification of joints, general features of different types of joints; detailed study of major joints of the limbs and movements performed at various joints in the body; Microscopic anatomy of articular cartilage; maintenance of articular cartilages; blood supply and nerve supply of the joints.

**Module-III: Cardio Vascular System:** Normal position, external features and parts of the heart; internal features of the chambers of heart, names of the blood vessels and venous drainage of the organs, structures and body as a whole, conducting system of heart, fibroskeleton of heart.

**Respiratory System:** Position, parts, relations, blood supply of upper and lower respiratory tract. Pleura, its reflection, nerve supply, pleural recesses and their significance, bronchopulmonary segments, their importance.

**Module-IV: Endocrine System and Individual Endocrine Glands:** Various endocrine glands, their location, relations, blood supply, nerve supply and lymphatic drainage.

**Nervous System and its components:** Parts of nervous system, neuron meninges, nerve terminals, neuroglia, myelination, degeneration and regeneration, ventricles, CSF, spinal cord and its blood supply. Motor and sensory pathways, cranial nerves, thalamus, cerebellum, limbic and autonomic pathways.

**Special Sensory Organs:** Gross Anatomy of eye ball, ear, nose and tongue.

## **Examination Scheme:**

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

## **Recommended books:**

- B. D. Chaurasia, BD Chaurasia's Human Anatomy Regional and Applied Dissection and Clinical: Lower Limb Abdomen and Pelvis, Vol I, II and III, 7<sup>th</sup> Edition 2016, CBS Publishers & Distributors.
- K Simbulingam & P Simbulingam, Essential Medical Physiology, 6<sup>th</sup> Edition 2012, Jaypee Brothers Medical publishers (P) LTD.

- N Murgesh, Basic Anatomy and Physiology, 6<sup>th</sup> Edition 2011, Satya Publishers.
- Anne Waugh, Kathleen and J W Wilson, Ross and Wilson Anatomy and Physiology, 12<sup>th</sup> Edition 2014, Churchill Living Stone.
- Gerard J. Tortora, Bryan H. Derrickson, Principle of anatomy and physiology, 14<sup>th</sup> Edition 2014, Wiley Publication.

# PHYSIOLOGY

**Course Code: MLT4111**

**Credit Units: 3**

## **Course Objectives:**

To develop the knowledge of anatomical structures; To provide the basic understanding of human organ systems; To provide the concepts of interrelationship among different organ systems.

## **Course Contents:**

**Module-I: Skeletal System:** Division, anatomy and function of skeleton; Histology of bone; Types of bones and joints; Bone marrow; Cartilage; Composition and function of synovial fluid.

**Muscular system:** Histology, classification and functions of muscles; mechanism of muscle contraction; role of joints and muscles in movements.

**Module-II: Cardiovascular System:** Structure and functions of heart and blood vessels, blood circulation, cardiac cycle, cardiac output, stroke volume and blood pressure; ECG.

**Lymphatic System:** Structure and functions of lymphoid organs; lymph vessels; compositions, function and circulation of lymph.

**Module-III: Digestive System:** Structure and function of digestive organs, digestion and absorption of food, compositions and functions of various gastrointestinal secretions.

**Urinary system:** Structure and functions of organs involved in urinary system, structure and functions of nephron, measurement and regulation of GFR, mechanism and composition of urine formation, physiology of excretion of urine.

**Module-IV: Male reproductive system:** Structure and functions of male reproductive organs, spermatogenesis.

**Female reproductive system:** Structure and functions of female reproductive organs, ovarian cycle, menstruation, fertilization and pregnancy.

## **Examination Scheme:**

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

## **Recommended books:**

- B. D. Chaurasia, BD Chaurasia's Human Anatomy Regional and Applied Dissection and Clinical: Lower Limb Abdomen and Pelvis, Vol I, II and III, 7<sup>th</sup> Edition 2016, CBS Publishers & Distributors.
- K Simbulingam & P Simbulingam, Essential Medical Physiology, 6<sup>th</sup> Edition 2012, Jaypee Brothers Medical publishers (P) LTD.
- N Murgesh, Basic Anatomy and Physiology, 6<sup>th</sup> Edition 2011, Satya Publishers.
- Anne Waugh, Kathleen and J W Wilson, Ross and Wilson Anatomy and Physiology, 12<sup>th</sup> Edition 2014, Churchill Living Stone.
- Gerard J. Tortora, Bryan H. Derrickson, Principle of anatomy and physiology, 14<sup>th</sup> Edition 2014, Wiley Publication.

# CLINICAL IMMUNOLOGY

**Course Code: MLT4113**

**Credit Units: 4**

**Course Objective:** To familiarize the students about the immune system and its role in infections, allergy and transplantation.

## **Course Contents:**

**Module-I: Introduction to Immunology:** History of immunology; innate immunity; acquired immunity.

**Immunoglobulin:** Structure, function and types of immunoglobulin; monoclonal and polyclonal antibody; adjuvant.

**Antigen:** Types of antigens; antigenicity; haptens

**Module-II: Immune Response:** Primary and secondary immune response; phagocytosis; antigen processing and presentation; humoral and cell mediated immune response; hemolytic disease of newborn.

**Complement System:** Complement portions and functions; classical, alternative pathway and lectin pathway.

**Hypersensitivity:** Introduction, types and complications of hypersensitive reactions; allergies

**Module-III: Clinical Transplantation:** Types of transplant; types of donor; HLA typing; transplant rejection; ethical issues; artificial organ; laboratory-grown organ; organ trafficking;

**Autoimmunity:** Factor affecting autoimmunity; pathogenesis of autoimmunity; autoimmune disease; diagnosis; immunological tolerance.

**Module-IV: Vaccines:** Effectiveness; adverse effects; types; recombinant vaccines

**Antigen and Antibody Reactions:** General features; precipitation; agglutination; flocculation; complement fixation test; neutralization; opsonisation.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>S/V/Q</b>	<b>ATTD</b>	<b>EE</b>
<b>Weightage (%)</b>	15	5	5	5	70

## **Recommended books:**

- Dale Male, Jonathan Brostoff, David B Roth and Ivan RoittKuby Immunology, 7th Edition 2012, Mosby (Elsevier).
- C P Baveja, Text book of Microbiology, 4<sup>th</sup> Edition 2010, Arya Publication.
- Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, 9<sup>th</sup> Edition 2013, Orient BlackSwan.
- D.R.Arora / BrijBala Arora, Textbook of Microbiology, 5<sup>th</sup> Edition 2016, CBS Publishers & Distributors Pvt. Ltd..
- B S Nagoba and D V Bedpathsk, Immunology, 1<sup>st</sup> Edition 2008, BI Publications.
- J Ochei and A Kolhatkar, Medical Laboratory Science- Theory and Practice, 1<sup>st</sup> Edition 2000, Tata Mcgraw Hill Publishing Co Ltd.
- Praful B. Godkar, Darshan P. Godkar, Text book of Medical Laboratory Technology, 3<sup>rd</sup> Edition 2014, Bhalani Publishing House.
- Peter Lydyard, Alex Whelan, Michael Fanger, Instant Notes in Immunology 3<sup>rd</sup> Edition 2011, BIOS Scientific Publisher.
- William E. Paul, Fundamental Immunology 7th Edition 2013, WoultersKluwar / Lippincott Williams & Wilkins.
- T Doan, R Mervold, S Visseli, C Waltenbough, Immunology 2<sup>nd</sup> Edition 2013, WoultersKluwar / Lippincott Williams & Wilkins.

## ADVANCED LABORATORY TECHNIQUE

Course Code: MLT4114

Credit Units: 4

**Course Objective:** To enable the students to understand the working principle of latest laboratory techniques.

### Course Contents:

**Module-I: Principles & Application of Chromatography:** Definition and types of Chromatography; Paper Chromatography; Thin Layer Chromatography; Adsorption Chromatography; Partition Chromatography; Ion-exchange Chromatography; Gel Filtration; Affinity Chromatography; Column Chromatography; High Performance liquid Chromatography (HPLC).

**Module-II: Electrophoresis:** Definition, General Methodology; Factors affecting migration of charged particles; Theory and applications of paper, SDS-PAGE and agarose gel electrophoresis; Isoelectric Focusing; Two Dimensional Electrophoresis; Protein purification and Evaluation; Densitometry

**Module-III: Immunological Technique:** Enzyme Linked immunosorbent assay; Radioimmunoassay; Immunodiffusion, Florescent immunoassay; Immunofluorescence, Immunoarray, Chemiluminosence assay.

**Module-IV: Molecular Techniques:** Recombinant DNA technology; Polymerase chain reaction; RT PCR; RFLP; DNA Probe; DNA finger printing; Sequencing; Eastern blot; Southern blot; Northern blot; Gel documentation, DNA microarray, FISH, RFLP.

### Examination Scheme:

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

### Recommended books:

- Keith Wilson & John Walker. Principles and techniques of biochemistry and molecular biology. Cambridge University Press, 7<sup>th</sup> Edition, (2015)
- S.V.S. Rana. Biotechniques theory and Practice Rastogi Publications, 3rd edition, (2012)
- U Satyanarayan and U Chakrapani, Text book of Biochemistry, 4th Edition 2013, Elsevier.
- M N Chatterjea and Rana Shinde, Text book of Medical Biochemistry , 8th Edition 2012, Jaypee Brothers Medical Publishers (P) Ltd.
- Mc Pherson and Pincus. Henry's Clinical Diagnosis and management by Laboratory Method, 23<sup>rd</sup> Edition, Elsevier.

## LAB COURSE

Course Code: MLT4105

Credit Unit: 1

### Course Objective:

- To impart the basic knowledge of principles, procedure and clinical importance of laboratory various test.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical laboratory.

### Serology

1. HIV test.
2. HCV test.
3. HBsAg test.
4. widal test.
5. ASO test.
6. CRP test.
7. RA test.
8. VDRL and RPR test.
9. Coomb's test.

### Molecular Pathology and Cytogenetics

1. To demonstrate PCR.
2. To demonstrate recombinant DNA technology.
3. To demonstrate DNA finger printing.
4. To demonstrate RT PCR and RFLP.

### Examination Scheme:

Components	Internal Assessment	Attendance	Record	EE
Weightage (%)	20	5	5	70

### Recommended books:

- DM Vasudevan, Subir Kumar Das, Practical Textbook of Biochemistry for Medical Students, Jaypee & Brothers Medical Publishers Pvt. Ltd.
- P K Godkar, Text Book of Medical Laboratory Technology 13<sup>th</sup> edition, Bhalani Publication.
- Ranjna Chawla, Practical Clinical Biochemistry: Methods and Interpretations 4<sup>th</sup> edition, Jaypee & Brothers Medical Publishers Pvt. Ltd.
- Shivaraja Shankara YM, ,araknahS ,yrtsimehcoiB laticarP rof launaM yrotarobaL ,KM hsenag .dtL .tvP srehsilbuP lacideM srehtorB & eepyaJ
- Medical Laboratory Science: Theory and practice by J. Ochei, Arundhati kolhatkar, Mcgraw Hill Education, 1<sup>st</sup> edition (2008).

## CLINICAL TRAINING

**Course Code: MLT4112**

**Credits Units: 2**

**Course objective:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

**Second Semester:**

1. Serology Lab
2. Molecular Lab

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

**Examination Scheme:**

Components	Viva	A	ME	EE
Weightage (%)	10	5	15	70

## Syllabus - Second Semester

### MOLECULAR DIAGNOSTICS

**Course Code:** MLT4208

**Credit Units:** 3

**Course Objective:** To enable the students to understand genetic diseases and its diagnosis.

**Course Contents:**

**Module-I: Mendelian Disease:** Autosomal recessive disorders; autosomal dominant disorders; sex linked inheritance; hemophilia; sickle-cell anaemia; phenylketonuria; cystic fibrosis; tay-sachs disease; xerodermapigmentosa; pedigree analysis; proband

**Chromosomal Disorders:** Normal chromosomes; Numerical disorders; Structural abnormalities; Down syndrome; Turner syndrome; Klinefelters syndrome.

**Module-II: Karyotyping:** Human karyogram, banding technique, applications of karyotyping; prenatal diagnosis; DNA profiling.

**Nucleic acid extraction:** Plasmid DNA; eukaryotic genomic DNA and Mitochondrial DNA extraction.

**Module-III: Mutation:** Introduction; molecular basis of mutation, mutagens.

**Gene Therapy:** Introduction; types and current approach and advancement

**Module-IV: Molecular Diagnosis:** Molecular based diagnosis of bacterial, viral, parasitic and fungal infections; ethical issues related to molecular diagnostics; future of molecular diagnostics.

**Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

**Recommended books:**

- U. Satyanarayana. Biotechnology, 1<sup>st</sup> Edition 2013. BOOKS & ALLIED Ltd.
- U Satyanarayan and U Chakrapani. Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.
- M N Chatterjea and Rana Shinde. Text book of Medical Biochemistry, 8<sup>th</sup> Edition 2012, Jaypee Brothers Medical Publishers (P) Ltd.

# RESEARCH METHODOLOGY AND BIOSTATISTICS

**Course Code: MLT4211**

**Credit Units: 3**

**Course Objective:** The course aims to promote the students to progress in research aspects in the medical diagnostic, pharmaceutical, biotechnology, and medical treatment field.

## **Course Contents:**

**Module-I: Basics of Research:** Meaning and purpose; Types, (Educational, Clinical, Experimental, Historical descriptive, Basic applied and Patent oriented Research); Formulation of hypothesis; Characteristic of designing a research work.

**Scientific writing:** Characteristics - Logical format for writing thesis and papers; essential features of abstract, introduction, review of literature, materials and methods, and discussion; effective illustration - tables and figures; reference styles - harvard and vancouver systems.

**Literature Survey-** use of library, books, journals-medlines-internet, and reprints of articles as a source for literature survey.

**Module-II: Biostatistics:** Collection and classification of data - diagrammatic and graphic representation of data, statistical tools, its importance in data analysis; measurement of central tendency; standard deviation; normal distribution; test of significance based on large samples and small samples; student t test; correlation and regression; Chi square test for independence of attributes; ANOVA

**Module-III: Patenting and ethical issues in research patenting:** definition of patent; the patents system in India and present status; intellectual property rights; what may be patented? ; Who may apply for patents?; preparation of patent- proposal; registration of patents in foreign countries & vice versa; research funding agency.

**Module-IV: ETHICS:** Ethics in animal experimentation; cpcsea guidelines - animal care, animal husbandry, feed, bedding, water, sanitation and cleanliness, waste disposal, anesthesia and euthanasia; composition of (human) institutional ethical committee (IEC) - general ethical issues; specific principles for chemical evaluation of drugs, herbal remedies and human genetics research, ethics in food and drug safety; environmental release of microorganisms and genetically engineered organisms; ethical issues in human gene therapy and human cloning.

## **Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	5	5	5	70

## **Recommended books:**

- R.A. Day. How to write a scientific paper. Cambridge University Press.
- Cooray P.G. Guide to scientific and technical writing.
- Carter V. Good and Douglas E seats Methods of Research.
- Alley, Michael. The craft of scientific writing. Englewood Cliffs. N.N. Prentice 1987.
- Sundar Rao, Jesudian Richard - An Introduction to Biostatistics. S.P. Gupta - Fundamentals of statistics, Sultan Chand.

## SPECIALIZATION – CLINICAL BIOCHEMISTRY METABOLIC BIOCHEMISTRY

**Course Code: MLT4210**

**Credit Units: 4**

**Course Objectives:**

- The course will impart the concept of major metabolic processes.
- The subject emphasizes on importance and clinical aspects of metabolic pathways.

**Course Contents:**

**Module-I: Carbohydrates Metabolism:** Glycolysis, Krebs cycle, gluconeogenesis, glycogenesis, glycogenolysis, HMP Shunt, bioenergetics regulations and clinical aspects.

**Module-II: Lipids Metabolism:** Lipolysis, oxidation of fatty acid, biosynthesis of fatty acids, ketogenesis, ketogenolysis, cholesterol biosynthesis and clinical aspects.

**Module-III: Amino Acid Metabolism:** Transamination, deamination, metabolism of ammonia, urea cycle, regulation, relation with TCA cycle and clinical aspects.

**Module-IV: Nucleic Acids Metabolism:** Denovo and salvage pathway, purine and pyrimidine nucleotide breakdown and biosynthesis and clinical aspects.

**Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

**Recommended books:**

- U Satyanarayan and U Chakrapani. Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.
- M N Chatterjea and Rana Shinde. Text book of Medical Biochemistry , 8<sup>th</sup> Edition 2012, Jaypee Brothers Medical Publishers (P) Ltd
- D M Vasudevan, Sreekumari S, Kannan Vidhyathan, Textbook of Biochemistry for Medical students, 8<sup>th</sup> Edition 2016, Jaypee & Brothers Medical Publishers (P) Ltd.
- Albert L Lehninger, Michel M Cox, David L Nension, Lehninger Principle of Biochemistry, 6<sup>th</sup> Edition 2013, W H Freeman & Co.
- Robert Kincaid Murray, David Bender, Kathleen M. Botham, Peter J. Kennelly, Harpers Illustrated Biochemistry, 30<sup>th</sup> Edition 2015, McGraw Hill Professional.
- Michael Lieberman, Allan D. Marks, Colleen M. Smith, Dawn B. Marks, Marks' Essential Medical Biochemistry, 2<sup>nd</sup> Edition 2007, Lippincott Williams & Wilkins.
- Donald Voet, Judith G. Voet, Charlotte W. Pratt. Fundamentals of Biochemistry: Life at the Molecular Level: Life at the Molecular Level. Fifth Edition 2016, Wiley

# CLINICAL NUTRITION

**Course Code: MLT4213**

**Credit Units: 4**

**Course Objective:** To prepare the students to understand the structure, function and properties carbohydrates, proteins and lipids.

## **Course Contents:**

**Module-I: Carbohydrate:** Introduction; biomedical importance; physical and chemical properties; structure- classification- monosaccharide, disaccharide, polysaccharide; triose, tetrose, pentose and hexoses sugars; digestion and absorption of carbohydrate; quantitative & qualitative test of carbohydrate; reducing and non-reducing sugars.

**Module-II: Amino acid:** Introduction; importance; physical & chemical properties; essential and non-essential amino acid; glucogenic and ketogenic amino acid.

**Protein:** Properties; functions; structure- primary, secondary, tertiary and quaternary; albumin, globulin and fibrinogen; clinical importance; digestion and absorption of protein; qualitative and quantitative test of protein and amino acid.

**Module-III: Lipid:** Introduction; importance; physical & chemical properties; structure of fat and fatty acid; essential and non-essential fatty acid; triglyceride and cholesterol structure and function; glycolipids; phospholipids; lipoproteins; digestion and absorption of fat; qualitative and quantitative test of lipids.

**Module-IV: Nucleic Acid:** Introduction; importance; physical & chemical properties; structure; Nucleoside; nucleotide; DNA and RNA- structure, function and biomedical importance.

**Vitamins:** Introduction; classification; importance; source; RDA; normal range and clinical significance.

**Minerals:** Introduction; classification; micro and macro minerals; importance; source; RDA; normal range and clinical significance.

## **Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

## **Recommended books:**

- U Satyanarayan and U Chakrapani, Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.
- M N Chatterjea and Rana Shinde, Text book of Medical Biochemistry , 8<sup>th</sup> Edition 2012, Jaypee Brothers Medical Publishers (P) Ltd
- D M Vasudevan, Sreekumari S, Kannan Vidhyathan. Textbook of Biochemistry for Medical students, 8<sup>th</sup> Edition 2016, Jaypee & Brothers Medical Publishers (P) Ltd.
- S Ramakrishana, Test Book of Medical Biochemistry, 3<sup>rd</sup> Illustrated Edition 2004, Orient Longman.
- S Chitiprol, Biochemistry: Instant Notes for Medical students, 1<sup>st</sup> Edition 2006, Jaypee Brothers Medical Publishers (P) Ltd
- DM Vasudevan, Subir Kumar Das, Practical Textbook of Biochemistry for Medical Students, 2<sup>nd</sup> Edition 2013, Jaypee Brothers Medical Publishers (P) Ltd

# PRINCIPLES OF BIOCHEMISTRY

**Course Code: MLT4214**

**Credit Units: 3**

**Course Objective:** To enable the students to understand the working principle of latest laboratory techniques.

**Course Contents:**

**Module-I: Centrifugation:** Types of centrifuge; Types of rotors; Theory and applications.

**Module-II: Spectrophotometry:** Colorimeter, spectrophotometer and atomic absorption spectrophotometry; theory and applications.

**Module-III: Photometry:** Introduction & Applications; Flame Photometry& its uses.

**Module-IV: Automation:** Phases of sample analysis- pre-analytical phase, analytical phase and post analytical phase; semi & fully automated analyzers, batch analyzer; dry chemistry analyzer.

**Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

**Recommended books:**

- Keith Wilson & John Walker. Principles and techniques of biochemistry and molecular biology. Cambridge University Press, 7<sup>th</sup> Edition, (2015)
- S.V.S. Rana. Biotechniques theory and Practice Rastogi Publications, 3rd edition, (2012)
- U Satyanarayan and U Chakrapani, Text book of Biochemistry, 4th Edition 2013, Elsevier.
- M N Chatterjea and Rana Shinde, Text book of Medical Biochemistry , 8th Edition 2012, Jaypee Brothers Medical Publishers (P) Ltd.
- Mc Pherson and Pincus. Henry's Clinical Diagnosis and management by Laboratory Method, 23<sup>rd</sup> Edition, Elsevier.

## CLINICAL BIOCHEMISTRY LAB COURSE-I

**Course Code: MLT4215**

**Credit Unit: 1**

### Course Objective

- To impart the basic knowledge of principles, procedure and clinical importance of laboratory various test.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical laboratory.

### Course Contents:

- 1) Carbohydrates: estimation of glucose (F, PP & R)
- 2) Protein: estimation of serum albumin, total protein and A/G ration.
- 3) Triglycerides : estimation of serum triglycerides
- 4) Cholesterol : estimation of total cholesterol
- 5) SGPT : estimation of SGPT
- 6) SGOT : estimation of SGOT
- 7) Alkaline phosphatase : estimation of alkaline phosphatase
- 8) Acid phosphatase : estimation of acid phosphatase
- 9) Bilirubin : estimation of serum bilirubin
- 10) Blood urea : estimation of blood urea in blood sample
- 11) Creatinine : estimation of serum creatinine
- 12) Calcium : estimation of serum calcium

### Examination Scheme:

Components	Internal Assessment	Attendance	File	EE
Weightage(%)	20	5	5	70

### Recommended books:

- Medical Laboratory Science: Theory and practice by J. Ochei, Arundhati kolhatkar, Mcgraw Hill Education, 1<sup>st</sup> edition (2008).
- P K Godkar, Text Book of Medical Laboratory Technology 13<sup>th</sup> edition, Bhalani Publication.

## CLINICAL BIOCHEMISTRY CLINICAL TRAINING-I

**Course Code: MLT4216**

**Credit Units: 2**

**Course Objective:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

### **Plan for clinical training:**

1. Clinical Pathology Lab
2. Instrumentation Lab

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

### **Examination Scheme:**

Components	Viva	A	ME	EE
Weightage (%)	10	5	15	70

# SPECIALIZATION-CLINICAL MICROBIOLOGY

## GENERAL MICROBIOLOGY

**Course Code: MLT4217**

**Credit Units: 4**

### **Course Objective:**

- To provide detailed knowledge of anatomy and physiology of microorganisms.
- To become students aware about applications of microorganisms in the industry, health-care, environment and research fields.

### **Course Contents:**

**Module-I: General Microbiology:** Introduction, history of microbiology; importance and scopes; safety measurements in microbiology laboratory; terminology related to microbiology.

**Microorganisms:** Introduction and Classification; morphological characteristics of various medically important microorganisms; microbial metabolism and reproduction; importance of normal micro-flora.

**Module-II: Microbial Genetics:** Introduction, principles of microbial genetics, structure and functions of genetic material, transformation; transduction, conjugation, lysogenic conversion, transposition, gene transfer by artificial methods, mutation, bacteriophages.

**Module-III: Microbial Pathogenicity:** Mechanism and transmission of microbial Infections, classification of infections, virulence factors affecting microbial pathogenicity, role of microorganisms in hospital acquired infections.

**Module-IV: Microscopy:** Introduction and types of microscopy; working, components, applications and preventive maintenance of different microscopes.

**Sterilisation and Disinfection:** Introduction, importance and types of sterilization; sterilization indicators; calibration and preventive maintenance of sterilizing equipments and instruments; mode of action, properties and uses of disinfectants and antiseptics, efficiency testing of disinfectants.

### **Examination Scheme**

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

### **Recommended books:**

- C P Baveja, Text book of Microbiology, Arya Publication.
- R. Ananthanarayan and Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, Orient BlackSwan.
- D.R.Arora / Brij Bala Arora, Textbook of Microbiology 4th, CBS Publishers & Distributors.
- Eds J. G. Collee, J. P. Duguid, A. G. Fraser & B. P. Marmio, Mackie and McCartney: Practical medical microbiology 13th Edition, Churchill Livingstone.
- R C Dubay & D.K.Maheshwari, Practical Microbiology revised edition, S Chand & Company LTD.
- Suvarna, Layton & Bancroft, Suvarna Bancroft's Theory & Pract. Of Histological Techniques, Churchill Livingstone.
- Joanne Willey, Linda Sherwood, Christopher J. Woolverton, Prescott's Microbiology 9th edition, McGraw-Hill Education.
- Gary W Procop & Elmer W. Koneman Koneman's Color Atlas and Textbook of Diagnostic Microbiology 7th, Wolter Kluwer.
- F. H. Kayser, K. A. Bienz, J. Eckert, Medical Microbiology, Thieme Stuttgart, New York.
- Michael Ford, Medical Microbiology 2nd Edition, Oxford university press.
- Neal Chamberlain, Medical Microbiology: The Big Picture, Mc Graw Hill Medical.

# DIAGNOSTIC MICROBIOLOGY-I

**Course Code: MLT4218**

**Credit Units: 3**

## **Course Objective:**

- To develop theoretical as well as practical skills for handling the microorganisms in microbiology laboratory.
- To empower students aware of routine laboratory techniques.

## **Course Contents:**

**Module-I: Diagnostic Microbiology:** Introduction and importance of diagnostic microbiology.

**Specimen Collection:** Collection, preservation, transportation and processing of various clinical specimens for microbiological investigations.

**Module-II: Gross / Physical Examination:** Significance and procedure for gross examination of various microbiological clinical specimens

**Microscopic Examination:** Unstained microscopic techniques; various staining techniques.

**Module-III: Culture Media:** Cultural characteristics of microbes; Preparation and application of various culture medias and broth

**Cultural techniques:** Different cultural techniques; antibiotic susceptibility test; interpretation of cultures and antibiotic testing; stock culture preparation and its maintenance.

**Module-IV: Specific identification tests:** Various biochemical tests; other laboratory techniques for identification of microbial strains or species.

## **Examination Scheme:**

<b>Components</b>	<b>CA</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	15	5	10	70

## **Recommended books:**

# CLINICAL BACTERIOLOGY

Course Code: MLT4219

Credit Units: 4

## Course Objective:

- To impart the knowledge of morphology, culture characteristics, pathogenicity, lab diagnosis and prophylaxis of major bacterial pathogens.
- To provide the understanding of special laboratory techniques.

## Course Contents:

**Module-I: Bacteriology:** Introduction, history and importance in health care sector

**Staining:** Gram stain, AFB stain, Albert's stain and special stains for spore, capsule and flagella.

**Biochemical test:** Catalase, coagulase, oxidase, indole, MR, VP, citrate, urease and triple sugar iron agar. Identification of bacteria by conventional method, molecular method and automatic methods.

**Special laboratory techniques:** Bacteriological examination of water, milk and air.

**Module-II: Gram positive bacteria:** Morphology, pathogenicity, lab diagnosis and prophylaxis of: Staphylococci, Streptococci, Pneumococcus, Enterococcus, Bacillus, Corynebacterium, Clostridia, Mycobacterium Tuberculosis, Mycobacterium leprae, Actinomycetes and Listeria.

**Module-III: Gram negative bacteria:** Morphology, pathogenicity, lab diagnosis and prophylaxis of: Neisseria gonorrhoeae, Neisseria meningitidis, Escherichia coli, Shigella, Klebsiella, Proteus, Yersinia, Salmonella, Vibrio, Aeromonas.

## Module-IV: Gram negative bacteria

Pseudomonas, Campylobacter, Bacteroides, Fusobacterium, Brucella, Haemophilus, Bordetella and Helicobacter pylori

**Miscellaneous bacteria:** Morphology, Pathogenicity, lab diagnosis and prophylaxis of: Spirochetes, Rickettsiae, Chlamydia and Mycoplasma and Ureaplasma. Bacterial Vaginosis.

## Examination Scheme:

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

## Recommended books:

- C P Baveja, Text book of Microbiology, 4<sup>th</sup> Edition 2010, Arya Publication.
- Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, 9<sup>th</sup> Edition 2013, Orient BlackSwan.
- D.R.Arora / Brij Bala Arora, Textbook of Microbiology, 5<sup>th</sup> Edition 2016, CBS Publishers & Distributors.

- Neal Chamberlain, Medical Microbiology: The Big Picture, 1<sup>st</sup> Edition 2008, McGraw Hill Medical.

# CLINICAL MICROBIOLOGY LAB COURSE-I

Course Code: MLT4220

Credit Unit: 1

## Course Objective:

- To impart the basic knowledge of principles, procedure and clinical importance of laboratory various test.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical laboratory.

## Course Contents:

- 1) **Preparation of culture media:** Peptone water, Nutrient broth, Selenite F broth, Thiosulfate citrate bile salt sucrose agar, Nutrient agar, Blood agar, chocolate agar, MacConkey's agar, Mueller-Hinton, Salmonella-Shigella agar, Xylose Lysine Deoxycholate agar, L J Medium, TSI agar, citrate agar, urease agar.
- 2) **Staining method:** Simple stain, Gram stain, ZN Stain, Albert stain, Negative stain,
- 3) **Culture Method:** Streak culture, Lawn Culture, Stroke Culture, Pour plate culture, Liquid culture.
- 4) **Biochemical tests:** Catalase test, Coagulase test, CAMP reaction, Bile solubility test,
- 5) Widal test
- 6) Hanging drop preparation and Satellitism.

## Examination Scheme:

Components	Internal Assessment	Attendance	File	EE
Weightage(%)	20	5	5	70

## Recommended books:

## CLINICAL MICROBIOLOGY CLINICAL TRAINING-I

**Course Code: MLT4221**

**Credit Units: 2**

**Course Objective:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

### **Plan for clinical training:**

1. Microbiology Lab
2. Bacteriology Lab

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

### **Examination Scheme:**

<b>Components</b>	<b>Viva</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## Syllabus - Third Semester

### SUMMER PROJECT EVALUATION

Course Code: MLT4335

Credit Units: 6

#### Summer Project report:

The Project Report is the final research report that the student prepares on the project assigned to him. In case of sponsored project the layout of the project could be as prescribed by the sponsoring organization. However, in other cases the following components should be included in the project report:

- **Title or Cover Page:** The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.
- **Acknowledgement(s):** Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.
- **Abstract:** A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.
- **Table of Contents:** Titles and subtitles are to correspond exactly with those in the text.
- **Introduction:** Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.
- **Materials and Methods:** This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.
- **Results and Discussion:** Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow. Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form. While presenting the results, write at length about the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather; it should lead to generalization of data on the chosen sample. Results and its discussion should be supporting / contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.
- **Conclusion(s) & Recommendations:** A conclusion should be the final section in which the outcome of the work is mentioned briefly.

Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
  - What are the main findings of the research?
  - Are there any recommendations?
  - Do you have any conclusion on the research process itself?
- 
- **Implications for Future Research:** This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.
  - **Appendices:** The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.
  - **References:** References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

#### **Examples:**

- For research article:

Voravuthikunchai SP, Lortheeranuwat A, Ninprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic *Escherichia coli* O157: H7. *Clin Microbiol Infect*, 8 (suppl 1): 116–117.

- For book:

Kowalski, M. (1976) Transduction of effectiveness in *Rhizobium meliloti*. *SYMBIOTIC NITROGEN FIXATION PLANTS* (editor P.S. Nutman IBP), 7: 63–67

#### **The Layout Guidelines for the Project File & Project Report:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

#### **ASSESSMENT OF THE PROJECT FILE AND THE PROJECT REPORT**

Essentially, the assessment will be based on the quality of the report, the technical merit of the project and the project execution. Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project. Project execution is concerned with assessing how much work has been put in.

#### **The Project should fulfil the following assessment objectives:**

- Range of Research Methods used to obtain information
- Execution of Research
- Data Analysis (Analyze Quantitative/ Qualitative information)
- Quality Control
- Conclusions

#### **Assessment Scheme:**

##### **Continuous Evaluation:**

40% (Based on punctuality, regularity of work, adherence to plan and methodology, refinements/mid-course corrections etc. as reflected in the Project File.)

##### **Final Evaluation:**

60% (Based on the Documentation in the file, Final report layout, analysis and results, achievement of objectives, presentation/ viva)

**It is recommended that the final evaluation should be carried out by internal supervisors.**

**Examination Scheme:**

<b>Components</b>	<b>Continuous assessment (External Supervisor-20 &amp; Internal Supervisor-20)</b>	<b>Final Evaluation (Attendance &gt;75%-5, Viva-10, Presentation- 15 &amp; Final report- 30)</b>
Weightage (%)	40	60

## SPECIALIZATION - CLINICAL BIOCHEMISTRY

### CLINICAL ENDOCRINOLOGY

**Course Code:** MLT4307

**Credit Units:** 4

**Course Objective:** To make the students to understand the basics of hormones function; clinically important hormones; diagnostic procedure and clinical interpretations.

#### **Course Contents:**

**Module-I: Basics of Endocrinology:** Exocrine and endocrine; anatomical aspects of human endocrine system; regulation of endocrine system; chemical nature of human hormones; hormone receptors; mechanism of peptide and non-peptide hormones action; secondary messenger.

**Hypothalamus:** Introduction; production, secretion regulation and functions of hypothalamic hormones.

**Module-II: Pituitary gland:** Introduction; production, secretion regulation and functions of pituitary hormones; related disorders.

**Pineal gland:** Introduction; production, secretion regulation and functions of pineal hormones; related disorders.

**Thyroid gland:** Introduction; production, secretion regulation and functions of thyroid hormones; related disorders; thyroid function test.

**Module-III: Parathyroid glands:** Introduction; production, secretion regulation and functions of parathyroid hormones;

**Adrenal gland:** Introduction; production, secretion regulation and functions of adrenal hormones; related disorders.

**Pancreas:** Introduction; production, secretion regulation and functions of insulin and glucagon; somatostatin; related disorders.

**Module-IV: Testes and Ovary:** Introduction; production, secretion regulation and functions of testes and ovarian hormones; related disorders.

**Other Biologically Important Hormones:** Hormones involving contraception; calcium metabolism; renin angiotensin; urotensin; erythropoietin; anti-mullerian hormone.

#### **Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

#### **Recommended Books:**

- U Satyanarayan and U Chakrapani. Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.
- M N Chatterjea and Rana Shinde. Text book of Medical Biochemistry , 8<sup>th</sup> Edition 2012, Jaypee Brothers Medical Publishers (P) Ltd

# CLINICAL ENZYMOLOGY

**Course Code: MLT4308**

**Credit Units: 4**

**Course Objective:** To make the students to understand the basics of enzymes function; clinically important enzymes; diagnostic procedure and clinical interpretations.

## **Course Contents:**

**Module-I: Basic Enzymology:** Historical perspective; general characteristics; factor affecting enzyme activity; nomenclature and IUB classification; holoenzyme; apoenzyme; co-factors; co-enzymes; prosthetic group; metallozyme; enzyme assay; units; Michaelis-Menten equation.

**Module-II: Enzyme inhibition:** Introduction; types; enzyme inhibitors; applications

**Co-enzyme:** NAD; NADP; FAD; Co-enzyme A TTP; Lipic acid; Vitamin B12; Tetrahydrofolate

**Module-III: Enzymes In Clinical Medicine:** Introduction; intra-cellular and extra-cellular enzymes; CPK; CK-MB; LDH; SGOT; SGPT; cholinesterase; amylase; lipase; aldolase; alkaline and acid phosphatase; Glucose-6-phosphatase; 5-nuceotidease; GGT.

**Module-IV: Enzymes in the Diagnosis of Diseases:** Diagnosis, prognosis and assessment of myocardial infarction, hepatitis, jaundice, pancreatitis, cancer, neurodegenerative disorders.

## **Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

## **Recommended books:**

- U Satyanarayan and U Chakrapani. Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.

## ADVANCES IN INTERMEDIARY METABOLISM

**Course Code: MLT4309**

**Credit Units: 3**

**Course Objective:** The objective of the course is to provide students with knowledge of the various diseases arising due to disorders in the biochemical processes.

### **Course Contents:**

**Module-I: Electron Transport & Oxidative Phosphorylation:** Components of Electron Transport Chain, Respiratory Chain, Energy Coupling hypothesis, Proton- Gradient generation, Mechanism of ATP synthesis, Uncoupling of Oxidative Phosphorylation

### **Module-II: Metabolic Disorders of Carbohydrates Metabolism**

Galactosemia, glycogen storage disease, deficiency of glucose-6-phosphate dehydrogenase, Hypoglycemia, Diabetes mellitus.

**Module-III: Metabolic Disorder of Lipid:** SIDS, Tay-Sachs disease, Nieman Pick disease, Farber's disease, Gaucher's disease, Krabbe's disease, hyperlipoproteinemia

**Module-IV: Metabolic Disorder of Amino Acid:** Phenylketonuria, Richner-Hanhart syndrome, Hartnup's disease, glycinuria, alkaptonuria, Maple syrup urine disease, albinism.

**Metabolic Disorder of Nucleotides:** Gout, SCID, Lesch-Nyhan Syndrome, Orotic aciduria

### **Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

### **Recommended books:**

- U Satyanarayan and U Chakrapani. Text book of Biochemistry, 4<sup>th</sup> Edition 2013, Elsevier.

# DIAGNOSTIC BIOCHEMISTRY

**Course Code: MLT4310**

**Credit Units: 4**

**Course Objective:** To make the students understand the basic principle, procedure, normal range and clinical significance of blood test.

## **Course Contents:**

**Module-I: Diabetes Profile:** Diabetes mellitus; Blood glucose; Glucose tolerance test; Glycosylated hemoglobin; urine sugar.

**Kidney Profile:** Serum total protein; albumin; creatinine; urea; blood urea nitrogen; clearance test; Sodium and Potassium

**Module-II: Pancreatic Function Test:** Serum amylase; lipase; secretin stimulation test; serum trypsinogen.

**Liver Function Test:** SGOT, SGPT, phosphatase, serum bilirubin; albumin; globulins; A/G ratio; gamma-glutamyl transpeptidase .

**Module-III: Cardiac Function Test:** SGOT, SGPT, LDH, CK-MB, Troponins and heart-type fatty acid binding protein (H-FABP); Myoglobin; Brain type natriuretic peptide (BNP).

**Lipid Profile:** Total serum lipids; total serum cholesterol; triglyceride; HDL; LDL; VLDL; Apo 1 and Apo 2

**Module-IV: Gastric And Intestinal Function Test:** Examination of resting contents; fractional gastric analysis; achylia gastrica ; stimulation tests; serum pepsinogen; tubeless gastric analysis; zollinger-elison syndrome; lactose intolerance; xylose absorption test; inulin absorption test.

## **Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

## **Recommended books:**

- Praful B. Godkar, Darshan P. Godkar. Text Book of Medical Laboratory Technology, 3rd Edition 2014, Bhalani Publishing House.
- U Satyanarayan and U Chakrapani, Text book of Biochemistry, 4th Edition 2013, Elsevier.
- M N Chatterjea and Rana Shinde, Text book of Medical Biochemistry , 8th Edition 2012, Jaypee Brothers Medical Publishers (P) Ltd.

## ADVANCED CHEMICAL PATHOLOGY

Course Code: MLT4313

Credit Units: 4

### Course Objective:

- To empower the students' knowledge with the procedure to diagnose human disease.
- To develop professional interests in the field of diagnosis.

### Course Contents:

**Module-I: Urine chemistry:** Colour, pH, bile salt and pigment, glucose, protein, ketones, nitrites, urobilinogen, casts and crystals, amylase, sodium, potassium, chloride, occult blood, Diagnostic Strip and its working principle; future aspects of urine chemistry in diagnosis.

**Module-II: Cancer:** Benign and malignant cancer; Cancer markers and its uses -CA15-3, CA19-9, CA-125, PSA, CEA, alpha fetoprotein, beta-HCG and other marks; common techniques.

**Module-III: Advance diagnostic procedure:** Separation of abnormal haemoglobin, isoenzymes, lipoproteins and serum proteins.

**Module-IV: Hormone profile:** Advance techniques for estimation of T3, T4, TSH, Testosterone, Oestrogen, Progesterone, Prolactin, FSH, ADH, Insulin and Glucagon

### Examination Scheme:

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

### Recommended books:

- Praful B. Godkar, Darshan P. Godkar. Text Book of Medical Laboratory Technology, 3rd Edition 2014, Bhalani Publishing House.
- U Satyanarayan and U Chakrapani, Text book of Biochemistry, 4th Edition 2013, Elsevier.
- M N Chatterjea and Rana Shinde, Text book of Medical Biochemistry, 8th Edition 2012, Jaypee Brothers Medical Publishers (P) Ltd.

## CLINICAL BIOCHEMISTRY LAB COURSE-II

Course Code: MLT4314

Credit Units: 1

### Course Objective

- To impart the basic knowledge of principles, procedure and clinical importance of laboratory various test.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical laboratory.
  - a. Lipid profile.
  - b. Liver function test
  - c. Pancreas function test
  - d. Cardiac profile
  - e. Cancer markers
  - f. Diabetic profile.
  - g. Kidney function test.
  - h. Gastric function test
  - i. To study hormonal assessment to diagnose disorders related to:
    - a. Pituitary gland
    - b. Hypothalamus
    - c. Thyroid gland
    - d. Parathyroid gland
    - e. Pancreas
    - f. Adrenal gland
    - g. Testes and ovary.

### Examination Scheme:

Components	Internal Assessment	Attendance	Record	EE
Weightage (%)	20	5	5	70

### Recommended books:

- DM Vasudevan, Subir Kumar Das, Practical Textbook of Biochemistry for Medical Students, Jaypee & Brothers Medical Publishers Pvt. Ltd.
- P K Godkar, Text Book of Medical Laboratory Technology 13<sup>th</sup> edition, Bhalani Publication.
- Ranjna Chawla, Practical Clinical Biochemistry: Methods and Interpretations 4<sup>th</sup> edition, Jaypee & Brothers Medical Publishers Pvt. Ltd.

## CLINICAL BIOCHEMISTRY CLINICAL TRAINING-II

**Course Code: MLT4315**

**Credit Units: 2**

**Course objective:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

**Plan for clinical training:**

1. Clinical Biochemistry Lab
2. Collection centre

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

**Examination Scheme:**

Components	Viva	A	ME	EE
Weightage (%)	10	5	15	70

## SPECIALIZATION - CLINICAL MICROBIOLOGY

### DIAGNOSTIC MICROBIOLOGY-II

**Course Code: MLT4316**

**Credit Units: 4**

#### **Course Objective:**

- To develop theoretical as well as practical skills for handling the microorganisms in microbiology laboratory.
- To make students aware of advanced laboratory techniques.

#### **Course Contents:**

**Module-I: Molecular Techniques:** DNA recombinant techniques, PCR, NAT, nucleic acid amplification, plasmid analysis, fingerprinting, ribo-typing and DNA sequencing, probe amplification, and other advanced techniques.

**Module-II: Rapid and advanced diagnostic techniques:** Immunoassays – ELISA, Immuno-electrophoresis, immuno- fluorescence, precipitation, flocculation and agglutination tests, rapid card methods; automatic blood culture system; rapid culture technique for MTB detection; micro-assays; laboratory techniques for cancer immunology.

**Module-III: Emerging Diseases:** Detailed study (etiology, transmission, pathogenesis, clinical manifestations, laboratory Diagnosis, prevention and control) of following infections – Dengue, Listeriosis, VRE (Vancomycin Resistant enterococci), Leptospirosis, Hepatitis non A , Swine flu, infections caused by Campylobacter , and prions.

**Module-IV: Epidemiology of infectious diseases:** Introduction, historical aspects, objectives and significance, epidemiological principals in prevention and control of various epidemic microbial diseases or infections; Measures of risks: frequency measures, morbidity frequency measures, mortality frequency measures natality (birth) measures, measures of association, measures of public health impact.

#### **Examination Scheme**

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

#### **Recommended books:**

- C P Baveja, Text book of Microbiology, Arya Publication.
- R. Ananthanarayan and Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, Orient BlackSwan.
- D.R.Arora / Brij Bala Arora, Textbook of Microbiology 4th, CBS Publishers & Distributors.

- Michael Ford, Medical Microbiology 2nd Edition, Oxford university press.
- Neal Chamberlain, Medical Microbiology: The Big Picture, Mc Grew Hill Medical.

# CLINICAL VIROLOGY

**Course Code: MLT4317**

**Credit Units: 4**

**Course Objectives:**

- To impart knowledge about harmful effects of virus in human health.
- To develop understanding of morphology, cultivation, transmission, Pathogenicity, and control strategies of clinically important Virus.
- To familiarize with techniques of sample collection, transport and processing to diagnose viral infection.

**Course Contents:**

**Module-I: Virology:** The nature of viruses, Classification of viruses, structure of virus, Cultivation and replication of virus, Bacteriophage, Interferon, Viral vaccines and antiviral drugs, sample collection, transport and storage of sample for viral diagnosis.

**Module-II:** Clinically important DNA virus: Herpes simplex virus, Varicella Zoster virus, Cytomegalovirus, Epstein-Barr virus, Poxviridae, Adenoviridae, Parvoviridae, Papillomaviridae.

**Module-III: Clinically important of RNA virus:** Orthomyxoviruses, Paramyxoviruses, Rubella virus, Picornaviruses, Dengue virus, Chikungunya virus, Japanese B encephalitis virus, Kyasanur Forest disease virus, Rhabdoviruses, HIV and other Retroviruses.

**Module-IV: Clinically important of miscellaneous virus:** Hepatitis viruses, Oncogenic viruses, Hantaviruses, Arenaviruses, Ebola virus, Coronaviruses, Slow viruses, Rotavirus. Emerging viral infections – SARS, Avian influenza, H1N1.

**Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

**Recommended books:**

- C P Baveja, Text book of Microbiology, 4<sup>th</sup> Edition 2010, Arya Publication.
- Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, 9<sup>th</sup> Edition 2013, Orient BlackSwan.

- Neal Chamberlain, Medical Microbiology: The Big Picture, 1<sup>st</sup> Edition 2008, Mc Grew Hill Medical.

# CLINICAL MYCOLOGY

**Course Code: MLT4318**

**Credit Units:4**

## **Course Objectives:**

- The subject includes the study of fungi (yeasts and moulds) which can cause infectious disease in humans.
- It discusses the present classification of fungi, modes of transmission, and infection, disease spectrum.
- Laboratory isolation and identification techniques by cultural and non cultural methods and susceptibility testing to antifungal agents will be emphasized.

## **Course Contents:**

**Module-I: Mycology:** Introduction of Mycology, Characteristic of Fungi, Taxonomy of Fungi, Immunity to Fungal diseases, Fungal culture media, Fungal reagent and staining, Discuss the procedures used in properly collecting specimens for mycology; Diagnosis of fungal disease; Anti Fungal drugs.

**Module-II: Superficial Mycoses:** Malassezia Versicolor, Atopic Dermatitis, Malassezia Folliculitis and Systemic Malassezia infection. Tinea Nigra, White Piedra, Black Piedra, Dermatophytes, Tinea Capitis, Dermatophytid or id reaction, wood,s lamp examination.

**Module-III: Subcutaneous Mycoses:** Mycetoma, Sporotrichosis, Chromoblastomycosis, Phaeohyphomycosis, Rhinosporidiosis and Lobomycosis.

**Module-IV: Systemic and Opportunistic Mycoses:** Histoplasmosis, Blastomycosis, Coccidioidomycosis and Paracoccidioidomycosis. Candidiasis, Cryptococcosis, Pneumocystosis, Penicilliosis Marneffe, Aspergillosis, Zygomycosis and Opportunistic Mycoses.

## **Examination Scheme:**

Components	CT	HA	S/V/Q	ATTD	EE
Weightage (%)	15	5	5	5	70

## **Recommended books:**

- C P Baveja, Text book of Microbiology, 4<sup>th</sup> Edition 2010, Arya Publication.
- Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, 9<sup>th</sup> Edition 2013, Orient BlackSwan.
- Mark Gladwin, Trattler William, C. Scott, Mahan, Clinical Microbiology Made Ridiculously Simple. 6<sup>th</sup> Edition 2013, Medmaster.
- D.R.Arora / Brij Bala Arora, Textbook of Microbiology, 5<sup>th</sup> Edition 2016, CBS Publishers & Distributors.
- Eds J. G. Collee, J. P. Duguid, A. G. Fraser & B. P. Marmio, Mackie and McCartney: Practical medical microbiology, 14<sup>th</sup> Edition 2007, Church New Delhi (India): Elsevierill Livingston.
- R C Dubay & D.K.Maheshwari, Practical Microbiology, Revised edition 2014, S Chand & Company LTD.
- Joanne Willey, Linda Sherwood, Christopher J. Woolverton, Prescott's Microbiology, 9<sup>th</sup> Edition 2014, McGraw-Hill Education.
- Gary W Procop & Elmer W. Koneman Koneman's Color Atlas and Textbook of Diagnostic Microbiology, 7<sup>th</sup> Edition 2016, Wolters Kluwer Health.

- F. H. Kayser, K. A. Bienz, J. Eckert, Medical Microbiology, 10<sup>th</sup> German Edition 2005, Thieme Stuttgart, New York.

- Jagdish Chander, Text book of medical Mycology, 3<sup>rd</sup> Edition 2009, Mehta publishers.

# CLINICAL PARASITOLOGY

Course Code: MLT4319

Credit Units:4

## Course Objectives:

- To provide advanced knowledge and understanding of medically important parasites.
- To equip students with the fundamental understanding of parasitological techniques.

## Course Contents:

**Module-I: Parasitology:** Introduction to parasites and host, classification of parasites and hosts, relationship between parasites and host, transmission of parasitic infections, preventive measurements for parasitic infections, terminology related to parasitology.

**Module-II: Protozoology:** Detailed study and laboratory techniques for diagnosis of medically important protozoa such as intestinal protozoa, blood and tissue protozoa.

**Module-III: Helminthology:** Detailed study and laboratory techniques for diagnosis of medically important parasitic worms; for example- intestinal, blood and tissue parasitic worms.

**Module-IV: Laboratory Techniques:** Collection and processing of different clinical samples for parasitological investigations; laboratory techniques for intestinal parasites, blood parasites, tissue parasites; advanced diagnostic techniques and molecular laboratory techniques.

## Examination Scheme

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

## Recommended books:

- Arora & Arora, Text book of Medical parasitology, CBS Publishers.
- Saugata Ghosh, Paniker's text book of medical parasitology, Jaypee.
- KD Chatterjee, Protozoology and Helminthology 13th edition, CBS Publishers & Distributors pvt.
- Parasitic diseases in man by Richard Knight English Language Book Society (ELBS).
- Subhash Chandra Parija, Textbook of Medical Parasitology : Protozoology & Helminthology, 4th Edition.
- T V Rajan, Textbook of Medical Parasitology, B I Publications.
- World Health Organization, Basic laboratory methods in medical parasitology, World Health Organization.
- Lynne S. Garcia, Diagnostic Medical Parasitology 5th Edition, ASM Press.
- David T. John, William A. Petri Jr., Markell and Voge's Medical Parasitology 9th, Saunders Elseviers.
- World Health Organization, Basic laboratory methods in medical parasitology, World Health Organization.

# PHARMACEUTICAL MICROBIOLOGY

**Course Code: MLT4320**

**Credit Units: 3**

**Course Objective:**

- A provide detailed knowledge about antimicrobial action and resistance.
- To become students aware about applications of microorganisms in the industry, health-care, environment and research fields.

**Course Contents:**

**Module-I: Antimicrobial Agents:** Introduction and types of antimicrobial agents; terminology related to pharmaceutical microbiology; history of development of antimicrobial drugs or agents, concept of R & D.

**Action Mechanism:** Mode of action and activity spectrum of major antibiotic classes, antifungal agents, antiviral agents, prophylactic usage and adverse reactions.

**Module-II: Antibiotic and antimicrobial Resistance:** introduction and importance, Mechanism of resistance- enzymatic destruction and modification, decreased permeability, promotion of antibiotic reflux, alteration and protection of target sites, bind-up antibiotics etc; molecular genetics of antibiotics resistance in bacteria- role off plasmid, transposable genetic elements, DNA integration elements.

**Module-III: Multidrug Resistance:** Mechanism and significance of multidrug resistance among microbes; detailed study about - multidrug resistant TB, Malaria, MRSA, VRE, MDR GNR, MDR viruses and fungus.

**Module-IV: Sterilization and quality control:** Microbial contamination and spoilage of microbial agents and their sterilization, FDA and govt. regulatory practices and policies, quality control.

**Vaccines:** Introduction, types, working mechanism and applications, adverse effects, terminology related to vaccines.

**Examination Scheme**

Components	CA	A	ME	EE
Weightage (%)	15	5	10	70

**Recommended books:**

- Hugo, WB and Russell, AD. Pharmaceutical Microbiology, (2003). Blackwell Science, Oxford, UK.
- Krogsgaard L, Lilijefors T. and Madsen, U. Textbook of Drug Design and Discovery, (2004). Taylor and Francis, London.
- Geoffrey Hanlon and Norman Hodges. Essential Microbiology for pharmacy and pharmaceutical science. (2013). Wiley Blackwell.
- S. P. Vyas & V. K. Dixit. Pharmaceutical Biotechnology. (2003) CBS Publishers & Distributors, New Delhi.
- Bhatia R and Ichhpujani RL. Quality Assurance in Microbiology. (1995). CBS Publishers, New Delhi.
- Gregory Gregoriadis. Drug Carriers in biology & Medicine. (2001). Academic Press New York.
- Davis, B. D., Dulbecco, R, Eisen, H. N., Ginsberg, R. S. Microbiology. (1990). Harper and Row Publishers, Singapore. F. H. Kayser, K. A. Bienz, J. Eckert, Medical Microbiology, Thieme Stuttgart, New York.
- Quality Assurance in Microbiology by Rajesh Bhatia, Rattan Lal Ichhpujani. CBS publishers & distributors, New Delhi.
- Quniolinone antimicrobial agents- Edited by David C. Hooper, John S. Wolfson. ASM Washington DC.

## CLINICAL MICROBIOLOGY LAB COURSE-II

Course Code: MLT4321

Credit Units: 1

### Course Objective:

- To impart the basic knowledge of principles, procedure and clinical importance of laboratory various test.
- To familiarize with basic knowledge of instruments commonly utilized in the clinical laboratory

### LIST OF PRACTICAL EXERCISES:

Virology, Mycology and Parasitology sections:

- Collection, transportation and preservation of specimens Specimen for viral diagnosis.
- Isolation and identification of viruses from specimens.
- Preparation of glassware and media for tissue culture.
- Preparation and maintenance of tissue culture.
- Virus isolation in tissue culture and identification.
- Use of chick embryo – inoculation by various routes.
- Use of laboratory animals for isolation of viruses, preparation of antisera and complement etc.
- Serological tests in virology.
- Antigen detection by various techniques.
- Collection of specimens for fungal examination.. Direct KOH examination.
- LPCB and India ink staining.
- Concentration techniques for stool and blood samples.
- Wet mount preparation of stool.
- Slide culture techniques.

### Examination Scheme:

Components	Internal Assessment	Attendance	Record	EE
Weightage (%)	20	5	5	70

### Recommended books:

- Arora & Arora, Text book of Medical parasitology, CBS Publishers.
- Saugata Ghosh, Paniker's text book of medical parasitology, Jaypee.
- KD Chatterjee, Protozoology and Helminthology 13th edition, CBS Publishers & Distributors pvt.
- C P Baveja, Text book of Microbiology, 4<sup>th</sup> Edition 2010, Arya Publication.
- Arti Kapil, Ananthanarayan and Paniker's Textbook of Microbiology, 9<sup>th</sup> Edition 2013, Orient BlackSwan.
- Michael Ford, Medical Microbiology, 2<sup>nd</sup> Edition 2014, Oxford university press.
- Neal Chamberlain, Medical Microbiology: The Big Picture, 1<sup>st</sup> Edition 2008, Mc Grew Hill Medical.

## CLINICAL MICROBIOLOGY CLINICAL TRAINING-II

**Course Code: MLT4322**

**Credit Units: 2**

**Course Objective:** The purpose of a Clinical training is to provide hands on practical experience in relevant sections of diagnostic labs as per the need of healthcare system. Students will participate in samples collection, documentation, transportation, receiving, processing and dispatch of reports. Students will help in the performance of clinical protocols, quality maintenance and laboratory research. In some cases, students may be deputed in community services or assist in organizing camps like blood testing or blood donation camp.

Students will be sent to diagnostic laboratory or hospital once a week outside campus or may be within the campus if facility available.

**Plan for clinical training:**

- Serology Lab
- Microbiology lab

**Note:** Students must submit training report during examination and the same would be evaluated through Viva voice and presentation.

**Examination Scheme:**

Components	Viva	A	ME	EE
Weightage (%)	10	5	15	70

## Syllabus - Fourth Semester

### ON JOB TRAINING

**Course Code: MLT4401**

**Credit Units: 9**

On-the-job training, also known as OJT, is teaching the skills, knowledge, and competencies that are needed to perform a specific job within the workplace and work environment. The main purpose is to correlate laboratory investigations, through case studies and laboratory tests and their correlations. Implementation of Quality controls and guidelines for implementation in accreditation programmes. Students will learn in an environment in which they will need to practice the knowledge and skills which he/she learnt in the class. On-the-job training uses the regular or existing workplace tools, machines, documents, equipment, knowledge, and necessary skills required for an employee to learn to effectively perform his or her job where ever he/she is sent for OJT.

**Examination Scheme:**

Components	Continuous assessment (External Supervisor-20 & Internal Supervisor-20)	Final Evaluation (Attendance >75%- 5, Viva-10, Presentation- 15 & Final report- 30)
Weightage (%)	40	60

# CLINICAL RESEARCH-DISSERTATION

Course Code: MLT4437

Credit Units: 9

## GUIDELINES FOR PROJECT FILE AND PROJECT REPORT

Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critically analyzed by the faculty guide and corrected by the student at each stage.

## PROJECT FILE

The Project File may be a very useful tool for undertaking an assignment along-with a normal semester, an exploratory study, sponsored projects, a project undertaken during summer period or any other period as per curricular where the researcher is working with a company/organization. The project/ assignment may also be a part of the bigger research agenda being pursued by a faculty/ institution/ department. The Project File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation. This file may be considered in continuous assessment.

### In general, the File should be comprehensive and include:

- A short account of the activities that were undertaken as part of the project;
- A statement about the extent to which the project has achieved its stated objectives;
- A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
- Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
- Any problems that have arisen and may be useful to document for future reference.

## PROJECT REPORT

The Project Report is the final research report that the student prepares on the project assigned to him. In case of sponsored project the layout of the project could be as prescribed by the sponsoring organization. However, in other cases the following components should be included in the project report:

- **Title or Cover Page:** The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.
- **Acknowledgement(s):** Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.
- **Abstract:** A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.
- **Table of Contents:** Titles and subtitles are to correspond exactly with those in the text.
- **Introduction:** Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

- **Materials and Methods:** This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.
- **Results and Discussion:** Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow. Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in “point” form. While presenting the results, write at length about the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather; it should lead to generalization of data on the chosen sample. Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.
- **Conclusion(s) & Recommendations:** A conclusion should be the final section in which the outcome of the work is mentioned briefly.

Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

- **Implications for Future Research:** This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.
- **Appendices:** The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.
- **References:** References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

### Examples:

- For research article:

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic *Escherichia coli* O157: H7. *Clin Microbiol Infect* , 8 (suppl 1): 116–117.

- For book:

Kowalski,M.(1976) Transduction of effectiveness in *Rhizobium meliloti*. *SYMBIOTIC NITROGEN FIXATION PLANTS* (editor P.S. Nutman IBP), 7: 63-67

**The Layout Guidelines for the Project File & Project Report:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

**ASSESSMENT OF THE PROJECT FILE AND THE PROJECT REPORT**

Essentially, the assessment will be based on the quality of the report, the technical merit of the project and the project execution. Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project. Project execution is concerned with assessing how much work has been put in.

**The Project should fulfil the following assessment objectives:**

- Range of Research Methods used to obtain information
- Execution of Research
- Data Analysis (Analyze Quantitative/ Qualitative information)
- Quality Control
- Conclusions

**Assessment Scheme:****Continuous Evaluation:**

40% (Based on punctuality, regularity of work, adherence to plan and methodology, refinements/mid-course corrections etc. as reflected in the Project File.)

**Final Evaluation:**

60% (Based on the Documentation in the file, Final report layout, analysis and results, achievement of objectives, presentation/ viva)

**It is recommended that the Final evaluation should be carried out by a panel of evaluators.**

**Examination Scheme:**

Components	Continuous assessment (External Supervisor-20 & Internal Supervisor-20)	Final Evaluation (Attendance >75%-5, Viva-10, Presentation- 15 & Final report- 30)

## Syllabus - First Semester

### HOSPITAL ORGANIZATION & MANAGEMENT PROCESSES

**Course Code: MHA4101**

**Credit Units: 04**

**Course Objective:**

To help the students gain understanding of the functions and responsibilities of the manager and to provide the student understand Human Behaviour in organizations so as to improve his managerial effectiveness.

**Course Contents:**

**Module-I: Management Process**

Evolution of Management thought and function of Management, roles and skills of a Manager, Emerging challenges of Management.

**Module-II: Fundamentals of Organizational Behaviour**

Nature and Structure of Organisation, Types of Organisation Line and Staff relationships, Formal and Informal Organisations.

**Module-III: Individual Behaviour**

Overview of Organisation Behaviour and its Importance, Organisation Models.

**Module-IV: Foundations of Group Behaviour**

Individual Behaviour, Perception and Learning, Personality, Values & Attitudes, Motivation: Concept Theory and application

**Module-V: Conflict Management**

Group Dynamics, Communication, Leadership, Power and Politics, Conflicts and Negotiation.

**Module-VI: Organizational Change and Stress Management**

Organisational Culture, Organisational Change and Development, Work Stress and its Management.

**Module-VII: Hospital as an Organization**

History and development of hospitals, Definition, types, control, role and functions, Hospitals in India- today their number, types, size, distribution, ownership, hospitals utilization, issues & trends, characteristics of a modern hospital.

Roles and functions of Hospital Administration, Profile of Hospital Administrator, Role of HA in education and research.

**Module-VIII: Social responsibilities of management**

Management and Society, Culture and management, management ethics, social objectives and responsibilities of management, Corporate social responsibility- hospitals and social responsibility.

**Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

# DEMOGRAPHY

**Course Code: MHA4102**

**Credit Units: 03**

## **Course Objective:**

To present students some basic techniques and concepts in population sciences.

## **Course Contents**

### **Module-I: Population Fundamentals**

Science of demography, Demographic cycle, Population trends and demographic indicators, Demography and Family Planning and its role in population policy of India.

### **Module-II: Demographic Studies**

- Fundamentals of population studies and its links with health.
- Methods of demographic data collection, sources of data, population census, population composition, world population growth, growth of Indian population, morbidity, mortality, ageing, migration/urbanization, population projections life tables.

### **Module-III: Family Planning**

Fertility and fertility factors, Family planning, Population policies & programmes and National Population Policy.

## **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

# MARKETING MANAGEMENT

**Course Code: MHA4104**

**Credit Units: 3**

## **Course Objective:**

The objective of this course is to provide the students exposure to modern marketing concepts, tools, and techniques, and help them develop abilities and skills required for the performance of marketing functions.

## **Course Contents:**

### **Module-I: Understanding Marketing in New Perspective**

Fundamentals of Marketing, Customer Value and Satisfaction, Customer Delight, Conceptualizing Tasks and Philosophies of Marketing Management, Value Chain, Scanning the Marketing Environment, Marketing Mix Elements, Difference between marketing and Selling, Relationship marketing, Social marketing, Strategic Planning in marketing, formulating the marketing plan.

### **Module-II: Analyzing Consumers & Selecting Markets**

The factors influencing consumer behavior. The stages in the buying process, the buying decision making process, factors effecting the buying decision., Market Segmentations, Levels of Market Segmentations, Patterns, Procedures, Requirement for Effective Segmentation, Evaluating the Market Segments, Selecting the Market Segments, Tool for Competitive Differentiation, Developing a Positioning Strategy.

### **Module-III: Managing Product & Pricing Strategies**

Classification of products, New Product development, stages of product development, Adoption process, Product mix decisions and line management, Length, width and depth of a line, line analysis, and brand management, product life cycle, stages in lifecycle and factors affecting each stage, Managing product life cycles. Setting the price, adapting the price, initiating and responding the price changes.

### **Module-IV: Designing: Managing the Integrated Communication**

Channel functions and flows. Channel design decisions. Channel management decisions. Channel dynamics; vertical horizontal and multi channel marketing systems. Market Logistics decisions. Effective Communication, Integrated Marketing Communication, Marketing Communication Process, Promotion mix, Advertising, Personal Selling, Sales Promotion and Publicity and Public Relations, Direct Marketing.

### **Module-V: Emerging Trends in Marketing**

An Introduction to Internet Marketing, Multi Level Marketing, E-Marketing, Green Marketing, Event Marketing, Types of Events, Sponsorship, Cause Related Marketing, Marketing for Non Profit Organizations Marketing Strategies for Leaders, Challenges, Followers and Nichers

## **Examination Scheme**

# BIOSTATISTICS

**Course Code: MHA4105**

**Credit Units: 3**

**Course Objective:** The aim of this course is to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the Hospital environment.

## **Course Contents:**

### **Module-I: Introduction**

Classification of data, Source of data, data organization Method of scaling - nominal, ordinal, ratio and interval scale, building composite scales, measuring reliability and validity of scales.

### **Module-II: Properties of measurement & Probability distributions**

- Measurement of central tendency, measurement of dispersion – Range, Mean deviation & Standard deviation.
- Concepts of probability, Probability distributions – Binomial, Poisson & Normal Probability Distribution.

### **Module-III: Sampling**

Sampling methods, Sampling Errors; Sampling distribution.

### **Module-IV: Testing Hypothesis**

Hypothesis Testing to compare two populations – Student's T-test, Interpretation of computer output of ANOVA, Chi – Square Test, F-test.

### **Module-V: Forecasting Techniques**

Correlation-Karl Person, Spearman's Rank methods, Regression Analysis, least squares method, coefficient of determination, Time Series Analysis.

### **Module-VI: Statistical methods and application:**

SPSS processing, Transformation and manipulation of SPSS file, Statistical procedures-descriptive, univariate, bivariate and multivariate statistics.

## **Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

# INFORMATION TECHNOLOGY FOR MANAGERS

**Course Code: MHA4106**

**Credit Units: 3**

**Course Objective:** This course will expose students to developments in computer technology and understand the working of a computer system. It will introduce end-user computing and build skills in using IT and understanding various technologies like internet, telecom, DBMS concepts, e-commerce etc. The course will expose the students to the latest trends in computer.

## **Course Contents:**

### **Module-I: Modern Computer Systems**

Evolution of Computer Systems, Input, output and storage technologies, Computer Assisted Control and Automation, (e.g. Delhi Metro , Digitally Controlled Car engines etc.), Computer Controlled Biometric/RFID based Access Control , Contemporary hardware and software platforms(Open Source, Web Software etc.), Storage of Data Resources

### **Module-II: Data Resource Management**

Introduction to DBMS, Benefits of DBMS over traditional file system, Types of DBMS, Application of DBMS using MS-ACCESS / ORACLE as a tool for understanding of DBMS concepts. SQL Query handling, Forms, Concept of Data Warehouses and Data Marts, Introduction to Data Centers. Storage Technologies and Architecture (DAT, NAS, SAN etc.). Live examples of storage strategies of companies like Google, Amazon Wal-Mart dealing with storage crisis

### **Module-III: Telecommunications and Computer Networks**

Networked Enterprise :- Components, Types of networks, Advantages of Network Environment, Business Uses of Internet, Intranet and Extranet, Web 2.0/3.0, Distributed/Cloud/Grid Computing, GSM & CDMA, GPRS ,3G & 4G technologies, VOIP and IPTV.

### **Module-IV: Electronic Commerce Systems**

Introduction to e-Commerce and M-Commerce, Advantages and Disadvantages of each. Concept of B2B, B2C, C2C , with examples. Concept of Internet Banking and Online Shopping, Electronic Payment Systems. Project Discussion:- Development of e-commerce store (Web Site Development, Internet Publicity, Payment Gateway, Packaging & Delivery , After Sales Support) .

### **Module-V: E-governance**

Concept of e-governance, World Perspective, Indian Perspective, Technologies for e-governance, e-governance as an effective tool to manage the country's citizens and resources, Advantages and Disadvantage of E-governance, E-governance perspective in India. Discussion on MCA21 Project, Bhoomi etc.

### **Module-VI: Security Management**

The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software, Hacking etc.) and counter measure. Definition of Cyber Crime and Types. Antivirus, Firewalls, Anti-Spyware, Security Audit, Discussion on Overview of IT-ACT 2000.

**Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

**Text & References:**

# ESSENTIALS OF HEALTHCARE SYSTEM

**Course Code: MHA4107**

**Credit Units: 3**

**Course Objective:** To provide the students a basic insight into the main features of Indian health care delivery system and how it compares with the other systems of the world.

## **Course Contents:**

### **Module-I: Health and Development**

Concept of Health, illness, sickness and disease; Public health Indicators, Health and its determinants, Disease Burden in terms of DALY, Social context of Health – Culture, health belief model and social issues affecting health like urbanization etc; Gender and health, Nutrition and Health, Nutritional Transition.

### **Module-II: Healthcare Systems**

Evolution of Health Planning in India, Concept and Elements of Primary Health Care, Rural Healthcare system in India – Structure & Current Scenario, Indian Public Health Standards, Organization and Management of Public Healthcare System, Issues in healthcare delivery system,

### **Module-III: Health Policies and Schemes**

Millennium development goals, National Health Policy, Integrated Child Development Scheme, Health Sector Reforms, Five year Plans, Reproductive and Child Health Programme, Universal Immunization Coverage, National Health Mission and National Urban Health Mission.

### **Module-IV: NRHM**

Goals & Strategies of NRHM, expected outcomes and its various components like Accredited Social Health Activists, Mobile Medical Units, JananiSurkshaYojna, JSSK, Village Health & Sanitation Committee, RogaKalyanSamiti etc.

### **Module-V: National Health Programmes**

Management and Implementation of National Health Programmes– Revised National Tuberculosis Control Programme, National AIDS control Programme, National programme for Control of Blindness, Vector Borne Diseases Control Programme, National Leprosy Eradication Programme, National Cancer Control Programme, National Diabetes Control Programme and National Mental Health Programme.

## **Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

## **Text & References:**

- K Park, *Preventive and Social Medicine*, BansaridasBhanot Publishing House.
- Brijesh C Purohit. *Health Care System in India: Towards Measuring Efficiency in Delivery of Services*.

# HUMAN RESOURCE MANAGEMENT

**Course Code: MHA4108**

**Credit Units: 03**

**Course Objective:** To help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

## Course Contents

### Module-I: HRM in perspective

Nature & scope of HRM, HRM functions, HRM models, understanding concepts of personnel management, HR development and strategic HR management, HR environment, changing role of HR.

### Module-II: Meeting HR requirements

The HRM processes cycle from job (role) analysis, description, strategic HR planning, recruitment, selection process, methods – Interview, tests, placement & induction.

### Module-III: Training & development of Employees

Training and development, understanding of performance management systems, potential appraisal, career development.

### Module-IV: Managing Compensation

Job evaluation, methods of job evaluation, strategic compensation, equity theory, components of pay structure, designing and administration of Wage and salary structure, Wage regulations in India.

### Module-V: Employee Compensation

Overview of Industrial relations, industrial disputes, collective bargaining, workers participations and management, grievance handling.

## Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

## Text & References:

## Syllabus - Second Semester

### FINANCIAL MANAGEMENT

**Course Code: MHA4201**

**Credit Units: 03**

**Course Objective:** The objective of this course is to develop an understanding of short-term and long-term financial decisions of a firm and various financial tools used in taking these decisions. It is also aimed to develop the understanding of the financial environment in which a company operates and how it copes with it.

#### **Course Contents:**

##### **Module-I: Introduction**

A Framework for Financial Decision-Making- Financial Environment, Changing Role of Finance Managers, Objectives of the firm.

##### **Module-II: Valuation Concepts**

Time Value of Money, Risk and Return, Financial and Operating Leverage.

##### **Module-III: Financing Decisions**

Capital Structure and Cost of Capital, Marginal Cost of Capital.

##### **Module-IV: Capital Budgeting**

Estimation of Cash Flows, Criteria for Capital Budgeting Decisions, Issues Involved in Capital Budgeting, Risk analysis in Capital Budgeting – An Introduction.

##### **Module-V: Working Capital Management**

Factors Influencing Working Capital Policy, Operating Cycle Analysis, Management of Inventory, Management of Receivables, Management of Cash and Marketable Securities, Financing of Working Capital.

##### **Module-VI: Dividend Policy Decisions**

An introduction: Different Schools of Thought on Dividend Policy.

#### **Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

#### **Text & References:**

- Financial Management for Hospital Administration, Kulkarni, GR, Jaypee Brother Medical Publications.

# HOSPITAL PLANNING

Course Code: MHA4203

Credit Units: 03

## Course Objective

To expose the students to planning and operation of hospitals in a detailed manner which will include all facets of hospital planning activities covering every department that is involved both in clinical care as well as supportive services.

## Course Contents

### Module-I: Introduction to Hospital Planning

Conception of idea, formation of hospital planning team, market survey, feasibility study, selection of location, Financial planning of hospitals, Macro level planning, Conception to commissioning- site development, architects brief working drawings and specifications, engineering drawing, equipment planning, bed distribution, space allocation, interior designing and construction of building - commissioning, shake down period

### Module-II: Planning for Medical and Ancillary services

Out-patient services, Emergency services, Day care services, Inpatient services and Intensive Care Units (ICU), Surgical suites, Labor and delivery suites-LDRP suites and Physical Therapy department.

### Module-III: Planning for Supportive Services

Admitting department, Medical Records department, Laboratory services, blood banking & Radiological services, Pharmacy & Medical store, Medical gas system, HVAC, CSSD, Food & Beverages and Laundry & linen services.

### Module-IV: Planning for Advanced facilities

Cardiac catheterization laboratory, various endoscopy units, Radiotherapy unit, IVF unit and Dialysis unit.

### Module-V: Recent Advances in Hospital Planning

Green Hospitals, Energy efficiency in hospitals, Robotics in Hospitals and Geriatric Care

## Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

## Texts & References:

- *Modern Trends in Planning & Designing of Hospitals: Principles and Practice:* Shakti Kumar Gupta, Sunil Kant, R Chandrashekhar, SidharthSatpathy, by Jaypee – 2007
- *Hospitals: Facilities Planning and Management*, GD Kunders by Tata Mcgraw Hill
- *Hospital Planning:* Charles Butler, Addison Erdman
- Dr Malhotra's series: *Step by Step – Hospital designing & Planning*, by Jaypee 2007

# HEALTH ECONOMICS

Course Code: MHA4204

Credit Units: 3

**Course Objective:** To study principles of economics and its application in Hospitals.

**Course Contents:**

## Module-I: Nature and scope of Economics

Fundamental Concepts –Scarcity & Choice, Macroeconomics & Microeconomics, Economic Agents – Consumer, Producer & government, Market – Free market mechanism and chained Market Mechanism.

## Module-II: Demand and Supply Market

Law of Demand, Shift in Demand Curve, Law of Supply, Shift in Supply curve, Market Equilibrium, Concept of elasticity – Price elasticity of Demand & Supply.

## Module-III: Healthcare Market

- Market Failure: Imperfect competition, Risk & uncertainty, Moral Hazard, Adverse selection, Externalities, Public Good, Asymmetric Information and concern of Equity. Market of unqualified medical care providers.
- Demand for Healthcare: Need, Want & demand, Healthcare as an investment, Determinants of demand – Price factors (opportunity cost), Patient factors & Physician factors – Supplier Induced Demand; Insurance and demand for healthcare.

## Module-IV: Costs

Classification of costs on the basis of traceability, cost behavior, controllability and selection among alternatives; Total, Average and Marginal costs.

## Module-V: Health Expenditure

Public Expenditure on Health, Expenditure and Allocations under Five-Year Plans, its SWOT analysis, National Health Accounts.

**Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

**Text & References:**

- Ceri J Phillips. *Health Economics- An introduction for health professionals*, Blackwell publishing.
- Clewer Ann and D Perkins. *Economics for healthcare management*, Prentice Hall.
- Folland S, A.C. Goodman, and M. Stano, *The economics of health & Healthcare*, Prentice Hall

# RESEARCH METHODOLOGY

Course Code: MHA4205

Credit Units: 03

## Course Objectives:

- To provide basic understanding towards research principles and methods.
- To introduce important analytical tools for research data analysis.
- To assist in the development of research proposals/reports.

## Course Contents:

### Module-I: Basics of Research

Definitions & uses of research in healthcare, Steps Involved in Research Process, Variables in research, Measurement scales, Formulation of research problems, writing research questions, Development of conceptual framework.

### Module-II: Sampling & Research Designs

Sampling, Sampling Procedure, Various types of Sampling Techniques, Sample size determination, reliability & validity in research, Research Designs- Non-experimental & experimental research designs.

### Module-III: Review of Literature & Hypothesis

Review of literature, Hypothesis- Meaning and types of hypothesis, Hypothesis testing, Type I & Type II errors in hypothesis testing.

### Module-IV: Data Collection

Types of Data: Secondary and Primary, Different methods of data collection- Observation method, interview method, Questionnaire and schedule, Data Management: editing, entry and preparing data sets for analysis; Design and development of questionnaire.

### Module-V: Research Reports

Structure and Components of Research Report, Types of Reports, Layout of Research Report, Method of writing a research report.

### Module-VI: Research Ethics& Reference Writing

History of ethics in health research, Principles and Concepts in research ethics – confidentiality and privacy, informed consent, vulnerable subjects and special treatments, standards of care – principles, review processes etc.; Vancouver style of reference writing.

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Text & References:

- Gummerrson, E. *Qualitative methods in Management Research*, Sage publications

# HOSPITAL MATERIALS MANAGEMENT

**Course Code: MHA4206**

**Credit Units: 03**

**Course Objective:** Hospitals carry a large inventory of drugs, sophisticated and highly costly equipment besides beds, furniture and linen. The student should be conversant with Inventory and various methods of control and Purchase management.

## **Course Contents:**

### **Module-I: Introduction**

Definition, scope and importance of materials management; aims, objectives & principles of materials management; Material Cycle; Material Codification-advantages and types.

### **Module-II: Stores Management**

Responsibilities and functioning of stores, types of Medical Stores, planning of hospital stores, duties of officer in-charge and storekeeper; location, lay-out planning and design of hospital stores, preservation of stores, documentation & evaluation of stores and role of computers in hospital stores management.

### **Module-III: Purchase Management**

Objectives and elements of good purchasing system, Procurement procedure, Tendering system, modes of tenders, Purchase order and its types, types of purchasing systems.

### **Module-IV: Inventory Management**

Inventory control, Basic inventory model, types of inventory, objectives and scope of inventory control, Lead time, Buffer stock, Re-order level, Economic order quantity (EOQ), Inventory control costs – Purchase cost, shortage cost, inventory carrying cost & inventory acquisition cost; Inventory ordering systems; Inventory control Techniques- ABC, VED, SDE, SAP, FSN, HML, XYZ, SOS, GOLF, MUSIC; and Supply chain management.

### **Module-V: Stock Verification, Condemnation and disposal**

Process and need for stock verification, Techniques of verification, Pilferage, Stock distribution methods, criteria and procedure of stock condemnation and disposal.

### **Module-VI: Equipment Management**

Classification of Hospital equipments, Planning and selection of equipments, factors affecting utilization of equipments, equipment failure, training & development, documentation, equipment maintenance and its types and Equipment audit.

### **Module-VII: Legal aspects**

Role and functions of Director General of supplies and disposal, Registration and blacklisting of firms, Law of contract, Letter of credit & its types, Import & export policy & pricing of goods and Duty of customs.

## **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

**Texts & References:**

# EPIDEMIOLOGY

**Course Code: MHA4207**

**Credit Units: 03**

## **Course Objective**

To provide an introduction to the basic concepts and methods of epidemiology and to highlight inter-relationship between epidemiology and medicine to understand evidence based medicine.

## **Course Contents**

### **Module-I: Introduction**

Concepts and uses of epidemiology, Components of epidemiological studies – frequency distribution and determinants of diseases, Methods to measure and describe health of population, epidemiological triad.

### **Module-II: Descriptive epidemiology**

Natural history of disease, Disease spectrum, Methods of transmission, epidemiological principles in prevention and control of disease, levels of prevention.

### **Module-III: Measurement Methods**

Measurement of morbidity and mortality, incidence, prevalence, age adjustment, standardization and Risk Measurement.

### **Module-IV: Study designs Basics**

- Epidemiological study designs and analysis, its application and use in the community.
- Sampling & Survey methods, Case control and Cohort methods.

## **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

## **Texts& References:**

## **HOSPITAL STUDY-I**

### **Objective:**

To have a practical exposure of various departments of a hospital. It is included in the syllabus to make the students aware of the functioning of different departments of hospital.

### **Training:**

1. Central Sterile Supply Dept.
2. Hospital Library
3. Emergency Dept
4. Critical Care Unit
5. Medical Record
6. Operation Theatre
7. Maintenance Department
8. Bio-Medical Department

### **Central Sterile Supply Department (CSSD)**

- 1) Location
- 2) Equipments
- 3) Items processed by Central Sterile Supply Department
- 4) Sterilization technique
  - a) Heat
  - b) Gas
  - c) Liquid
  - d) Ionizing radiation
  - e) Others
- 5) Work flow
- 6) Clean zone, dirty zone
- 7) Pooling of materials, equipments
- 8) Process of receiving and distribution of materials
- 10) Cleaning, drying and packing of sterilized materials
- 11) Segregation of Dirty zone and clean zone
- 12) Process of receiving and distribution of materials
- 13) Quality control checking of sterilization in collaboration with Micro-biology Lab.
- 14) Organization & Staffing
- 15) CSSD Committee

### **Emergency Dept**

- 1) Location
- 2) Basic lay out of Emergency Dept
  - (a) Receiving patients
  - (b) Patient examination zone
  - (c) Patient investigation zone
  - (d) Procedure room
  - (d) Cardio Pulmonary Resuscitation Unit
  - (e) Dead bodies identification and segregation

- (f) EMO's Office
- (g) Nursing Station
- 3) Infrastructural facilities
- 4) Equipments
- 5) Legal procedure system
- 6) Emergency Operation Theatre
- 7) Admission procedure
- 8) Billing for day care procedure in Emergency Dept.
- 9) Staffing
- 10) Security

### **Critical Care Unit**

- 1) Organizational structure
- 2) Bed orientation pattern
- 3) Lighting system
- 4) Monitoring system
- 5) Maintenance of sterility and general cleanliness
- 6) Administration of CCU
- 7) Workflow
- 8) Equipment maintenance
- 9) Maintenance of uninterrupted gas and power supply system
  - 1) Continuous wall flow oxygen
  - 2) Compressed air
  - 3) Suction Apparatus (Vacuum Pump)
  - 4) Uninterrupted Power Supply (UPS) line

### **Medical Records**

- a) Assembly of records
- b) Quantitative and qualitative analysis
- c) Different classification of records
- d) Methods of deficiency check
- e) Completion of incomplete records
- f) Retrieval of medical records
- g) Coding system
- h) Indexing system
- i) Generation of statistics and analysis
- j) Reporting to various statutory authorities
- k) Methods of numbering
  - i) Serial number
  - ii) Unit number system
  - iii) Serial unit numbering
- l) Filing System
  - i) Decentralized system
  - ii) Centralized system
  - iii) Various other methods
- m) Types of forms

## **Operation Theatre**

- 1) Location
- 2) Zoning of Operation Theatre
- 3) Infrastructural facilities
- 4) Centralized and decentralized Operation Theatres
- 5) Equipment requirement
- 6) Procurement and maintenance including annual maintenance contract
- 7) Functions and policies of Operation Theatres
- 8) Manpower requirement
- 9) Duties and responsibilities including standard operation procedures
- 10) Safety procedures
- 11) Methods of checking operating rooms for readiness to receive patient
- 12) Periodical sterilization / fumigation
- 13) Sterile supply

## **Maintenance Department**

Observation of

- a) Location of different maintenance departments
- b) Lay out
- c) Power Generation and supply
- d) Demineralization Plant with R.O. facility for Dialysis unit
- e) Oxygen Plant
- f) Effluent Treatment Plant
- g) Air Condition Plant and distribution system
- h) Maintenance of the medical equipments, calibration
- i) Maintenance of total hospital building – civil, electrical and mechanical
- j) Organization

## **Bio-Medical Department**

- 1) Bio Medical equipment and their function
- 2) Importance and fundamental functions of Bio-Medical Equipments
- 3) Maintenance procedures of Bio-Medical Equipments
- 4) AMC of Bio Medical Equipments

## Syllabus - Third Semester

### SUMMER INTERNSHIP EVALUATION

**Course Code: MHA4335**

**Credits Units: 06**

**Training Objective:**

To provide on the job experience, as an understudy in a hospital, to help the student understand systems and procedures and learn to make decisions considering the Hospital as an integral unit.

**Duration: 2 months**

**Format for Report Writing**

1. Abstract
2. Introduction
3. Aims & Objectives
4. Operational definitions
5. Significance of Study
6. Review of literature
7. Research methodology
8. Data Analysis
9. Results
10. Discussion
11. Conclusion
12. Recommendations
13. Limitations of study
14. Future prospects of study
15. References

**Guidelines for presentation-**

- Powerpoint presentation
- Time for presentation: 20 minutes
- Time for discussion: 10 minutes

**Examination Scheme**

Components	Presentation	Report submitted	Viva-Voce
Weightage (%)	25	50	25

# STRATEGIC MANAGEMENT

**Course Code: MHA4301**

**Credit Units: 03**

## **Course Objective:**

The course is designed to help students to understand the concept of strategy and strategic management process. Acquaint students with basic concepts and principles of strategic management, develop and prepare organizational strategies that will be effective for the current dynamic environment and likewise to impart the strategic management conceptual framework which will increase students' skills and knowledge in identifying and describing organizations' strategic posture and direction.

## **Course Contents:**

### **Module-I: Introduction and Purpose of Strategy Formulation**

Evolution and Introduction of strategic management. Concept and Classification of Corporate and Business Strategy with Hierarchy definition; Purpose of Strategy Formulation: Concept of Vision, Mission and Business Definition. Importance of Stakeholders in Business.

### **Module-II: Strategic Analysis**

PESTLE Analysis, Environmental Threat and Opportunity Profile (ETOP), Strategic Advantage Profile (SAP), Porter's Value Chain Analysis, Resource Based View of the Firm-VRIO Framework; Market Analysis-David Aaker Model, Competitor Analysis, Industry Analysis using Porter's five forces Model; Scenario analysis and SWOT Analysis. Strategic implications of company decisions and Strategic response to changes in business environment.

### **Module-III: Strategic Choice – Traditional Approach**

Portfolio Analysis using BCG, GE Nine Cell Matrix, Hofer's Model, Making Strategic Choices using Strickland's Grand Strategy Selection Matrix; Ansoff's Product Market Grid; Choosing Generic Strategies using Porter's Model of competitive advantage.

### **Module-IV: Industry Structures and Competitive Strategies**

Industry Structures and Lifecycle stages, Marketing Warfare and Dominance Strategies: Advantages and Disadvantages of Defensive and Offensive strategies; Innovation as Blue Ocean Strategy.

### **Module-V: Strategy Implementation and Evaluation**

Issues in implementation: Resource Allocation, Organization Structure, Social responsibilities – Ethics. Measuring performance and establishing strategic controls.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

**Text & References:**

- Wheelen and Hunger, (2008), Essentials of Strategic Management, Prentice Hall India.

# OPERATIONS RESEARCH

**Course Code: MHA4302**

**Credit Units: 03**

## **Course Objectives:**

- To provide basic OR approach to problem solving.
- To introduce important analytical tools for managerial decision making.
- To introduce concepts of resource allocation & health service planning.

## **Course Contents:**

### **Module-I: Introduction**

The OR approach to problem-solving and decision-making, Scope and limitations of OR in managerial decision-making.

### **Module-II: Introduction to OR Techniques**

Linear Programming, Decision Tree Analysis, Queuing theory, PERT/CPM.

### **Module-III: OR Models**

Replacement models, Sensitivity analysis, Assignment models, Inventory control models, Forecasting.

### **Module-IV: Applications of OR in Hospitals and Health Agencies**

Resource allocation, Health services planning, Deployment of health human power, Materials Management, Equipment replacement, Patient scheduling.

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

## **Text & References:**

# QUALITY MANAGEMENT

**Course Code: MHA4303**

**Credit Units: 03**

## **Course Objective:**

To understand the concept of quality and its relation to healthcare scenario

## **Course Contents:**

### **Module-I: Basics of Quality Management**

Definitions, principles of quality, benefits of quality management, dimensions of quality in primary healthcare and various quality frameworks

### **Module-II: Quality Improvement Approaches**

- Quality Assurance cycle and developing standards.
- TQM Quality Gurus: Deming, Juran and Crosby principles.
- Benchmarking: Principles, types and process of benchmarking
- Medical Audit: Clinical Audit, its methodology and related statistics.

### **Module-III: Quality Improvement Tools and techniques:**

- Tools: Brainstorming, Cause effect Analysis, Flow chart, Pareto Analysis, etc
- Lean Management: 4P model, Lean principles and its tools - 5 S technique, 3 M technique, Kaizen's theory, Jidoka & Andon, Throughput & Takt Time.
- Six Sigma: Variations in performance, DMAIC & DFSS methodology, Champions, black belts and green belts, Six sigma applications and its benefits.

### **Module-IV: Accreditation**

Benefits of Hospital Accreditation, ISO certification, Quality Council of India (QCI), National Accreditation Board for Hospitals & Healthcare Providers (NABH) – accreditation procedure, assessment criteria and its standards; and Joint Commission International (JCI)

### **Module-V: Cost and Quality**

Prevention cost, Appraisal Cost, Internal & External failure costs, Net & Total cost of quality.

## **Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

## **Text & References:**

# MEDICAL & HEALTH LAWS

**Course Code: MHA4304**

**Credit Units: 03**

## **Course Objectives:**

To acquaint the students with various legal aspects concerning type and character of the health care organizations and its duties towards patients and its employees.

To familiarize the students in matters of liability of hospital medical negligence and medical malpractice in diagnosis, administration of drugs, surgery etc.

## **Course Contents:**

### **Module-I: Introduction**

Law pertaining to establishment of hospitals and legal requirements under Medical Council Acts.

### **Module-II: Hospitals as an Industry**

Basic concepts of labour laws in India, Hospitals as an 'industry' - application of labour enactments, Discipline in hospitals and Trade union act

### **Module-III: Hospital's duties towards Patients**

Essentials of Contractual obligations in hospital services, duties towards patients, Rights of patients and Code of ethics.

### **Module-IV: Acts pertaining to Hospitals**

Legal aspects relating to Organ transplantation, MTP Act 1971, Basics of Drugs and Cosmetic Acts, Euthanasia. ESI Act, PNDT Act, Human experimentation, Clinical trials, Industrial dispute Act, Central Births & Death Registration Act.

### **Module-V: Legal liabilities of Hospitals**

Legal liability of hospitals - criminal, civil and tortuous; Absolute liability and vicarious liability, Medical negligence, Legal remedies available to patients under contract law, tort, criminal law, Consumer protection Act and Medical Jurisprudence.

### **Module-VI: Medical ethics, CPA & Auditory procedures**

Consumer protection act, Autopsy, Use of investigational drugs, Introduction/need & procedures for medical audit, Audit administration & Regulating committees.

Confidentiality and professional secrecy, ethics of trust and ethics of rights – autonomy and informed consent,

Medical ethics – basic issues, importance, process of developing and implementing ethics and values in an institution – codes of conduct: Hippocrates oath and declaration of Geneva – MCI regulation – professional conduct, etiquette and ethics.

## **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

## **Text & References:**

- *Medico-legal Aspects of Patient Care*, 3<sup>rd</sup> Edition, R. C. Sharma, Peepee Publishers & Distributors- 2008

# MANAGEMENT OF CLINICAL SERVICES

**Course Code: MHA4305**

**Credit Units: 03**

## **Course Objectives:**

- To enable the students gain insights into various aspects like importance, functions, policies and procedures, equipping, controlling, co-ordination, communication, staffing, reporting and documentation of clinical services in a hospital.
- To understand the processes and details related to effective patient care and to further increase the satisfaction level of patients

## **Course Contents:**

### **Module-I: Hospital as a system**

Concept of patient care, Role of Hospital Administration towards the patient and towards the Hospital, Patient safety and patient risk management.

### **Module-II: Out-Patient Department**

- Organization & management of OPD: Overview of the department, its functions, location and physical facilities
- Daycare services; Auxiliary, Ancillary & Domiciliary facilities in the OPD.

### **Module-III: Inpatient Department**

- Organization & management of OPD: Overview of department, its functions, Ward design (general & specialized), Nursing Administration, Isolation unit, Janitor's closet.
- Assessment of IPD in terms of Patient Days, Bed Utilization Rate, Ward Occupancy, and Average length of stay.

### **Module-IV: Accident and Emergency Services**

Organization & management of department, Physical facilities and Manpower planning, Triaging, Centralized Accident & Trauma services (CATS) and Observation unit.

### **Module-V: Operation Theatres**

Organization & Management of OT complex, Pre-op & Post-op area, Zoning, ventilation & lighting, Modular systems, Methods of fumigation and OT scheduling.

### **Module-VI: Intensive Care Units**

Organization & Management of ICUs, Types of ICUs, Staffing in ICUs, Specialized ICUs – ICCU, NICU, PICU etc, and Critical care scoring

### **Module-VII: Specialty Services**

Rehabilitation unit, Nuclear Medicine department, Burns Unit, Obstetrics & gynecology unit, Pediatric unit, Transplantation Unit etc.

### **Module-VIII: Other Hospital Functional Activities**

Biomedical Waste Management: segregation, collection, transportation & disposal, Nosocomial Infections & its control, Patient safety

**Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

# MANAGEMENT OF SUPPORT & UTILITY SERVICES

**Course Code: MHA4306**

**Credit Units: 03**

## **Course Objectives:**

- To enable the students gain insights into various aspects like importance, functions, policies and procedures, equipping, controlling, co-ordination, communication, staffing, reporting and documentation of non-clinical services in a hospital.
- To understand the processes and details related to effective patient care and to further increase the satisfaction level of patients

## **Course Contents:**

### **Module-I: Support Services-I**

- Radiology & Imaging Services: Types of services, Functional Areas, Organization & management of department, Turn-around time assessment, Radiation Hazards and its preventive measures.
- Hospital Laboratory: Its functional components, Lab hazards, quality assessment, National Accreditation Board for testing & calibration laboratories (NABL)
- Blood Bank & Transfusion Services: blood donation, labelling, transfusion reactions, legal aspects and accreditation.
- Transportation & Ambulance Services: History, transportation bay, Administrative aspects, Basic Life Support (BLS) and Advanced Life support (ALS).

### **Module-II: Support Services-II**

- Central Sterile Supply department: Functional areas, Sterilization process, Theatre Sterile Supply Unit (TSSU) and supply distribution system.
- Dietetics: Functions of Dietary services, Functional areas, equipments, diet distribution systems, centralized & decentralized services and other managerial issues.
- Medical Records Department: Types of medical records & its importance, functional organization of MRD, storage & retrieval of records, Reports generated by MRD and medico-legal aspects.

### **Module-III: Utility Services-I**

- Hospital Linen and Laundry: Types of hospital linen, Basic tasks of laundry, Types of laundering system and laundry process.
- Housekeeping services: Its functions, types, cleaning agents and cleaning operations.
- Mortuary: Mortuary services, physical facilities & staffing, policies & guidelines and managerial concerns.
- Security: Its functions, Security risks and types of security system.
- Pharmacy: Role & types of pharmacies, drug distribution systems, procurement of drugs and managerial issues.

### **Module-IV: Utility Services-II**

- Basic Engineering Services: Civil Assets, Electricity Supply, Water supply, Gas manifold
- Allied Engg services: Air conditioning, Refrigeration, non-conventional energy devices.
- Maintenance & store management, Engg service department
- Engineering Hazards: Hospital Planning & design, Physical environment, Building elements and material, preventive management program.

**Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

**Texts & References:**

- *Principles of Hospital Administration and Planning*, Shakharkar B.M.
- *Modern trends in Planning and designing of Hospitals: Principles and Practice*: Shakti Kumar Gupta, Sunil Kant, R Chandrashekhar.
- *Management of Hospitals & Health services*: Strategic issues and performance, Rockwell Schulz, Alton C. Johnson
- Shakharkar B.M., *Principles of Hospital Administration and Planning*
- *Hospital managerial services* Volume -4, S.L. Goel, R. Kumar
- *Hospital Core Services: Hospital administration in 21<sup>st</sup> century* Vol 1 Kumar R, S.L. Goel
- *Hospital Management*, Dr. A.K. Malhotra, Global India Publications Pvt ltd, New Delhi
- *Hospital Management : A guide to departments*, Howard S. Roland, Beatrice L Rowland

## **HOSPITAL STUDY-II**

### **Objective:**

To have a practical exposure of various departments of a hospital. It is included in the syllabus to make the students aware of the functioning of different departments of hospital.

### **Training:**

1. Central Sterile Supply Dept.
2. Hospital Library
3. Emergency Dept
4. Critical Care Unit
5. Medical Record
6. Operation Theatre
7. Maintenance Department
8. Bio-Medical Department

### **Central Sterile Supply Department (CSSD)**

- 1) Location
- 2) Equipments
- 3) Items processed by Central Sterile Supply Department
- 4) Sterilization technique
  - a) Heat
  - b) Gas
  - c) Liquid
  - d) Ionizing radiation
  - e) Others
- 5) Work flow
- 6) Clean zone, dirty zone
- 7) Pooling of materials, equipments
- 8) Process of receiving and distribution of materials
- 10) Cleaning, drying and packing of sterilized materials
- 11) Segregation of Dirty zone and clean zone
- 12) Process of receiving and distribution of materials
- 13) Quality control checking of sterilization in collaboration with Micro-biology Lab.
- 14) Organization & Staffing
- 15) CSSD Committee

### **Emergency Dept**

- 1) Location
- 2) Basic layout of Emergency Dept
  - (a) Receiving patients
  - (b) Patient examination zone
  - (c) Patient investigation zone
  - (d) Procedure room
  - (d) Cardio Pulmonary Resuscitation Unit
  - (e) Dead bodies identification and segregation
  - (f) EMO's Office

- (g) Nursing Station
- 3) Infrastructural facilities
- 4) Equipments
- 5) Legal procedure system
- 6) Emergency Operation Theatre
- 7) Admission procedure
- 8) Billing for day care procedure in Emergency Dept.
- 9) Staffing
- 10) Security

### **Critical Care Unit**

- 1) Organizational structure
- 2) Bed orientation pattern
- 3) Lighting system
- 4) Monitoring system
- 5) Maintenance of sterility and general cleanliness
- 6) Administration of CCU
- 7) Workflow
- 8) Equipment maintenance
- 9) Maintenance of uninterrupted gas and power supply system
  - 1) Continuous wall flow oxygen
  - 2) Compressed air
  - 3) Suction Apparatus (Vacuum Pump)
  - 4) Uninterrupted Power Supply (UPS) line

### **Medical Records**

- a) Assembly of records
- b) Quantitative and qualitative analysis
- c) Different classification of records
- d) Methods of deficiency check
- e) Completion of incomplete records
- f) Retrieval of medical records
- g) Coding system
- h) Indexing system
- i) Generation of statistics and analysis
- j) Reporting to various statutory authorities
- k) Methods of numbering
  - i) Serial number
  - ii) Unit number system
  - iii) Serial unit numbering
- l) Filing System
  - i) Decentralized system
  - ii) Centralized system
  - iii) Various other methods
- m) Types of forms

**Operation Theatre**

- 1) Location
- 2) Zoning of Operation Theatre
- 3) Infrastructural facilities
- 4) Centralized and decentralized Operation Theatres
- 5) Equipment requirement
- 6) Procurement and maintenance including annual maintenance contract
- 7) Functions and policies of Operation Theatres
- 8) Manpower requirement
- 9) Duties and responsibilities including standard operation procedures
- 10) Safety procedures
- 11) Methods of checking operating rooms for readiness to receive patient
- 12) Periodical sterilization / fumigation
- 13) Sterile supply

**Maintenance Department**

Observation of

- a) Location of different maintenance departments
- b) Lay out
- c) Power Generation and supply
- d) Demineralization Plant with R.O. facility for Dialysis unit
- e) Oxygen Plant
- f) Effluent Treatment Plant
- g) Air Condition Plant and distribution system
- h) Maintenance of the medical equipments, calibration
- i) Maintenance of total hospital building – civil, electrical and mechanical
- j) Organization

**Bio-Medical Department**

- 1) Bio Medical equipment and their function
- 2) Importance and fundamental functions of Bio-Medical Equipments
- 3) Maintenance procedures of Bio-Medical Equipments
- 4) AMC of Bio Medical Equipments

## Syllabus - Fourth Semester

### HOSPITAL MANAGEMENT INFORMATION SYSTEM

**Course Code: MHA4401**

**Credit Units: 02**

**Course Objective:**

To understand the various indicators of health and health information system and health management information system in hospitals

**Course Contents**

**Module-I: Introduction**

Concept of information as a resource, understanding the principles of information systems and Classification of information in hospitals.

**Module-II: Managing Hospital Information Systems**

- Data generated for HIS; Functions, Benefits and applications of HIS, HIS components, various performance Indicators, HIS model and data movement.
- HIS modules: Various HIS Modules for Clinicians Access, Nursing Access, In-patient Module, Registration Module, Diagnostic services Module, Dietetics Module, OT Module and Accident & Emergency Module etc.

**Module-III: Role of Information Technology in Hospitals**

Computerization in Hospitals, advantages of computerized system, database interface, IT Components of HIS and various softwares available in the healthcare market.

**Module-IV: Management Information System**

Concept of MIS, functions of MIS, developing MIS, types of MIS, developing indicators, identifying data and developing tools of measurement and applications of MIS.

**Module-V: Telemedicine**

Concept of Telemedicine and its evolution, Telemedicine network in India, and Strengths & Opportunities for Telemedicine in India.

**Examination Scheme:**

Components	CP	V	A	CT 1	CT 2
Weightage (%)	20	15	5	30	30

**Text & References**

- *Management Information System (MIS) in Hospitals: A computer based approach for quality in hospital services and administration*, by Anil Kumar Saini
- S.C. Joshi & S.N. Mehta. *National Information System: Planning and Management*, Global vision publishing house.
- *Information Technology in health care: Socio technical approaches*, 2010. IOS Press BV

# HEALTH INSURANCE AND MEDICAL TOURISM

Course Code: MHA4402

Credit Units: 02

## Course Objective:

To acquaint students to the concept of HI and various HI products, so that the students are ready for challenges of healthcare insurance which is emerging as a sector holding great promise.

## Course Contents

### Module-I: Introduction

History of Health Insurance, Principles of Health Insurance, Public Financing, Private Financing, Current trends in Health Insurance - International and Indian scenario, Economic and financial management of Health Insurance

### Module-II: Health Insurance systems in India

- Private Health Insurance: Individual Health Plans, Mediclaim, Floaters plans, Third Party Administration, Benefits Management, Claims Management, IRDA
- Social Health Insurance: ESI, CGHS, RSBY
- Social and Community based Insurance: Microfinance

### Module-III: Medical Tourism

Basic Concepts of Medical Tourism, Scope of Medical Tourism in India.

## Examination Scheme:

Components	CP	V	A	CT 1	CT 2
Weightage (%)	20	15	5	30	30

## Text & References:

- Usha Mehta, A.D. Narde. *Health Insurance in India and Abroad*, Allied Publishers.

# DISASTER MANAGEMENT

**Course Code: MHA4403**

**Credit Units: 02**

## **Course Objectives:**

- To learn, identify and assess disasters in the community.
- To set-forth policies and procedures for disaster preparedness and to prepare hospital disaster plan.

## **Course Contents**

### **Module-I: Basics of Disaster Management**

Definitions, Determining risk of disaster, Classification of disaster on the basis of origin, source, onset & anticipated response; Disaster process, Effects of Disasters – Health issues, characteristics and geography of disasters, Impact of Disasters on the Hospitals.

### **Module-II: Disaster Management Process**

Phases of disaster management, leadership, organization of medical relief, Triage, Disaster Response – local, national & International; Disaster Management Act – 2005.

### **Module-III: Disaster preparedness**

Hospital Disaster Plan – its pre-requisites, principles and components; Hospital disaster management committee and its role; Hospital disaster manual.

### **Module-IV: Fire Safety**

Grades of fire and its causes; elements of fire safety, various fire extinguishers; and fire safety training.

## **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>CT 1</b>	<b>CT 2</b>
<b>Weightage (%)</b>	20	15	5	30	30

## **Text & References:**

- *A guide to emergency health management after natural disasters*, American health organization scientific publication.
- *Emergency vector control after Natural disaster*, American health organization scientific publication.
- *District Health facilities*, WHO regional publication western pacific services.
- *Medical supply management after natural disaster*, American health organization scientific publication.

## **HOSPITAL STUDY-III**

### **Objective:**

To have a practical exposure of various departments of a hospital. It is included in the syllabus to make the students aware of the functioning of different departments of hospital.

### **Training:**

1. Diagnostic Imaging
2. Dental Service
3. Dialysis Unit
4. Burn Units
5. Blood Bank
6. Mortuary
7. Telemedicine
8. Medical transcription

### **Diagnostic Imaging**

- 1) Various types of machines like;
  - a) CT
  - b) MRI
  - c) PET
  - d) USG with color Doppler
- 2) Advantages / disadvantages of different types of machine
- 3) Basic functioning and maintenance
- 4) Special licensing requirement
- 5) Special structural requirements
- 6) Staffing and manpower planning
- 7) Cost analysis and profitability
- 8) Operation and maintenance

### **Dental Services**

- a) Location
- c) Laboratory
- d ) Recovery Room
- e) Waiting Room
- f) Storage
- i) Lighting
- j) Plumbing
- k) Ventilation
- l) Equipment and maintenance

### **Dialysis Unit**

1. Location
2. Infrastructural facility
  - a) for day care dialysis or out patient dialysis
  - b) for inpatient dialysis

3. Various types of dialysis units
4. Special arrangement for maintaining sterility
5. Ambulatory dialysis system
6. Procurement, installation and maintenance of various types of dialysis machines
7. Arrangement for stand-by unit

### **Burn Unit**

1. Location
2. Infrastructural facility
3. Special equipment requirement for Burn Unit
4. Laboratory facility
5. Communication facility
6. Maintenance of Asepsis
7. Manpower

### **Blood Bank**

- 1) Location
- 2) Reception
- 3) Special arrangements for voluntary donors
- 4) Administrative Office
- 5) Record Keeping
- 6) Servicing rooms
- 7) Bleeding Room
- 8) Storage Room
- 9) Storage equipment
- 10) Regulatory requirement
- 11) Blood safety procedures
- 12) Receipt, storing and delivery of blood
- 13) Triple screening and check method
- 14) Record keeping
- 15) Medico-legal aspects
- 16) Physical facilities
- 17) Waiting facilities
- 18) Laboratory facilities
- 19) Issuance of Blood Donor Card
- 20) Safety devices
- 21) Liquid waste management
- 22) Procedure for discarding
- 23) Staffing

### **Mortuary**

- 1) Location
- 2) Physical facilities
- 3) Body refrigerator
- 4) Walk in refrigerator
- 5) Capacity requirement of Mortuary
- 6) Autopsy facility

- 7) Preservation / identification/labeling of viscera / body fluids and other materials for medicolegal purposes
- 8) Embalming procedures
- 9) Methods of long distance transportation of dead bodies
- 10) Arrangements for religious rites
- 11) Mortuary traffic control
  - a) Internal
  - b) External
- 12) Identification of bodies using triple check system
- 13) Maintenance of records
- 14) Various legal requirements
- 15) Disposal of unclaimed bodies

### **Telemedicine**

1. Infrastructure – both end – (1) Hospital end (2) Nodal Centre
2. Requirement of:
  - a) Computer Monitors
  - b) Cameras
  - c) Internet connection
3. Observation of telemedicine techniques and practical demonstration
4. Manpower requirement

### **Medical Transcription**

1. Observation of techniques and demonstration
2. Infrastructural requirement
3. Trained manpower
4. Transmission modes

# DISSERTATION

**Course Code: MHA4437**

**Credit Units: 15**

## **Internship Objective:**

To impart the practical knowledge through research methods, help formulate a rigorous research problem related to hospital on the basis of their observation, help do an independent study, and encourage working in a team.

## **Pedagogy**

- Identifying several situations amenable to dissertation work, writing a proposal and making a presentation to the Departmental Research Committee.
- Reporting to the committee on the progress of research work periodically.
- Making use of a variety of research methods.
- Defending the inference before the Examining Committee.

## **Report Contents**

Every student will do a detailed study on the topic selected for the dissertation, and is expected to prepare a two or three proposals which he intends to take up for the Dissertation. The Assigned guide will examine this and decide on the topic of dissertation. Report will comprise of following contents:

1. Abstract
2. Introduction
3. Aims & Objectives
4. Operational definitions
5. Significance of Study
6. Review of literature
7. Research methodology
8. Data Analysis
9. Results
10. Discussion
11. Conclusion
12. Recommendations
13. Limitations of study
14. Future prospects of study
15. References

## **Evaluation**

The Departmental Research Committee and an expert from Hospital industry will evaluate the dissertation.

Components	Presentation	Report submitted	Viva-voce
Weightage (%)	25	50	25

## Master of Optometry

**FLEXILEARN**

-Freedom to design your degree

**Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

## Syllabus - First Semester

### EPIDEMIOLOGY, PUBLIC HEALTH & COMMUNITY OPTOMETRY

**Course Code: OPT4101**

**Credit Units: 03**

**Course Objective:** To inculcate the knowledge, sensitivity and clinical exposure of community optometry. The outcomes of the course are: thorough understanding of conducting of screening for specific eye conditions, and resultant implications through theoretical and practical exposure. By the end of the course the student will be able to use the knowledge of the skills gained in promotion and preventive measures of community optometry.

**Course Contents:**

**Module-I:** Public health concepts

History of public health

History of public health optometry (including epidemiology, man power, projections, community reimbursement mechanisms)

Organizations of health services (principles of primary, secondary and tertiary care) Health Care Delivery systems in India and determinants of health.

Detriments of health care delivery system

Planning of health services (including relevant legislation and implication to optometric practice).

Health manpower protection and in the practice of ophthalmology

Multidisciplinary and institutional practice modes

Global medicine and evolution of Public Health in India

Public Health optometry: concepts and implementation

**Module-II:** Levels of prevention-optometrist's role in community

Optometry's role as a primary care professional

**Module-III:** Health systems

Concepts of Health systems

National Health Programs

Effective delivery of eye care services

**Module- IV:** Global Blindness and visual impairment

Refractive error and low vision as public health issues

Socioeconomic implications of blindness and visual impairment

Vision screening

Organizing eye camps

Eye Donation and Eye Banking

Role of civil societies in blindness prevention

Vision2020 : the Right to Sight

National and International Agencies in eye Care

NPCB

DBCS

**Module-V: Epidemiology**

Public health and epidemiology

Prevalence ,incidence and distribution of visual impairment

Basics of Epidemiology study methods

Incidence , prevalence , risk factors , odd ratio

Childhood blindness

Refractive errors and presbyopia

Age related cataract

Low Vision

Diabetic retinopathy

Glaucoma

Age related Macular Degeneration

Trachoma

Corneal blindness

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>P</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

# **BINOCULAR VISION & PEDIATRIC OPTOMETRY-I**

**Course Code: OPT4102**

**Credits Units: 04**

**Course Objective:** This course gives both in-depth theoretical knowledge and clinical exposure in Binocular Vision, Orthoptics & Pediatric vision care. The outcomes of this course are: Thorough understanding of the visual development issues, evaluation of pediatric subjects, non-surgical management of the pediatric binocular and refractive problems, amblyopia and Strabismus

**Course Contents:**  
**BINOCULAR VISION**

**Module-I:**  
Refractive Development  
Retinal and cortical Development:

**Module-II:**  
Revision: Applied anatomy and physiology of extraocular muscle  
Oculomotor Function:

**Module-III:**  
Binocular Vision: and related aspects  
Development of binocular vision  
Physiology of binocular vision  
Development of ocular deviation and its adaptation

**Module-IV:**  
Amblyopia and occlusion  
Management guidelines of Amblyopia

**Module-V:**  
Abnormal retinal correspondence  
Anomalies of accommodation and its management  
Anomalies of convergence and its management  
Nystagmus

**PEDIATRIC OPTOMETRY**

**Module-I:**  
Assessment of Child Vision and Refractive Error  
Refractive Routines in the Examination of Children  
Cycloplegic Refraction

**Module-II:** Color Vision Assessment in Children

**Module-III:** Dispensing for the Child patient

**Module-IV:**  
Common genetic problems in Pediatric optometry  
Pediatric Ocular Diseases  
Ocular Trauma in Children

**Module-V:** Myopia control

**Module-VI:** Clinical uses of prism

**Examination Scheme:**

Components	A	CT	P	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

**Recommended Text books**

- Pediatric optometry ,Jerom rosner ,Butterworth heinmann
- Binocular vision and ocular motility , guntoor von noordan
- Clinical orthoptics ,Fiona rowe
- Strasbimus simplified ,pradeep sharma
- Assessing Children's Vision, Susan J Leat, Rosalyn H Shute, Carol A Westal
- Paediatric Optometry, William Harvey/ Bernard Gilmartin
- Pediatric Optometry, Jerome Rosner

# LOW VISION REHABILITATION AND GERIATRIC OPTOMETRY

**Course code: OPT4109**

**Credit Units: 04**

**Course Objectives:** This course gives both in-depth theoretical knowledge and clinical exposure in Low Vision care. The outcomes of this course are: Thorough understanding of the causes of the low vision, its functional and psychosocial consequences, and rehabilitational measures through didactic lectures and clinical postings.

## **Course Contents:**

### **Module-I:** Introduction to Low Vision

Definition of low vision  
The impact of low vision  
Prevalence of low vision  
Different levels of low vision services  
Psychosocial implication of low vision services

### **Module-II:** Causes and symptoms of low vision

Common causes of low vision  
Low vision symptoms and conditions  
Functional implication of diseases causing visual impairment

### **Module-III:** Clinical assessment of low vision patient

Purpose of low vision assessment  
Steps of low vision assessment

### **Module-IV:** Magnification

Different types of magnification  
Different methods and formulae for calculating magnification  
How to determine resolution ability  
Predict distance required to meet resolution goal  
Measure lens power  
Measure equivalent viewing distance  
Calculate equivalent viewing distance for different devices

### **Module-V:** Optical Low Vision devices

What are optical devices?  
Definition of various low vision devices  
Different type of optical low vision devices and their uses

## **Examination Scheme:**

Components	A	CT	P	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

**Recommended Text books:**

- Management & Practice of Low Visual Acuity - A T Dowie
- Low Vision Principles & Practice - C Dickinson
- Optometric Management of Visual Handicap - H Farrall
- Eye Essentials - Low Vision Assessment - J Macnaughton
- Low Vision Manual - Jackson and Wolffsohn
- The Art and Practice of Low Vision (2nd Edition) - P. D. Freeman and R. T. Jose
- Essentials of Low Vision Practice, Richard L. Brilliant OD

# APPLIED OPTICS

**Course Code: OPT4110**

**Credit Units: 04**

**Course Objective:** This course mainly deals with Optical management of refractive errors-new modalities the advanced techniques in subjective and objective refraction and Spectacle Dispensing. This course leads to a rewarding career as an optometrist, a specialist trained to dispense and to recognize basic ocular disorders. This allows students to recommend the right spectacle lens based on the condition of the eye

## **Course Contents:**

### **Module-I:** Ophthalmic Lens types,

Lens materials Properties of lenses (Refractive index, base curve, specific gravity, Abbe Value, UV cut off,etc)

Prism

Tints and coatings

### **Module-II:** Bifocals/Multifocals

### **Module-III:** Progressive addition lenses

Dispensing PAL, PAL trouble shooting, PALs in detail for Essilor, Hoya, Zeiss, Seiko, Rodenstock lenses

### **Module-IV:** Spectacle FRAMES:

Facial fitting principles

Spectacle delivery

Dispensing problem prescriptions

Frame types and parts

Classification of spectacle frames-material, weight, temple position, coloration Frame construction

Frame Measurements and markings

Frame manipulation and repair

Facial measurements and frame choice

Measuring the interpupillary distance and pupillometer

Special purpose frames (sports, kids, reading)

### **Module-V:** Lens Ordering

Lens edge thickness calculation Writing spectacle lens order

Facial measurements - Interpupillary distance measurement and measuring heights (single vision, multifocal, progressives)

Measurement of effective diameter minimum blank size Glazing and edging Hands on

### **Module-VI:** Lens Verification

Lens verification and axis marking and fitting of all lens types

Final checking of finished spectacle with frame adjustments

Delivery and follow-up

Troubleshooting complaints and handling patient's questions.

Optical centre marking

Axis marking

Surface power measurement using Geneva lens measure Identify various types of Frames and mountings

**Project:** Different brands for spectacle frames and sunglasses –Indian & international Demonstration-safety eyewear, different filters, recumbent spectacle, Ptosis spectacle,

## **Workshop**

## **PRACTICE MANAGMENT**

Building a Successful Optometry Practice  
Basic Operational Costs/Income Spread sheet  
Marketing a optometry Practice

Developing an Internal Marketing Plan for optometric Practice  
Developing an External Marketing Plan for optometric Practice

Managing a optometry Practice  
Developing a Plan to Manage a Contact Lens Practice Standards of Practice

Eight Categories of Professional Obligation  
Ethics in optometry  
Laws related to optometry practice

## **CLINIC-I (GENERAL)**

**Course Code: OPT4105**

**Credit Units: 3**

### **Course Contents:**

This course includes minimum of 90 hours of supervised clinical training. The clinics involve primary care clinics and community work.

The objective of clinics in this semester is to be able to examine the eye and understand the basic eye procedures with clinical management.

A logbook is maintained and 15 case sheets with complete management and follow up are mandatory for submission. The log book needs to be signed by the supervisor.

### **Examination Scheme:**

<b>Components</b>	<b>Attd.</b>	<b>Log Book</b>	<b>Case Sheets</b>	<b>Viva-EE</b>	<b>EE-Practical</b>
<b>Weightage (%)</b>	5	10	15	20	50

# RESEARCH METHODOLOGY & BIOSTATISTICS-I

Course Code: OPT4106

Credit Units: 03

## Research Methodology

**Course Objective:** This course is a brief overview about research design that is intended to cover the basics of designing and implementing a scientific study. It will provide the students the basic knowledge in Bio-statistics. At the completion of the course, the students will have the knowledge of data collection, statistical application and finally ready for research project. This will enable the student to gain understanding of different research methodologies and appropriate research design to be able to conduct research projects.

## Course Contents:

### Module-I:

Introduction to research methods, Variables in research, Reliability and validity in research, Formulation of research problems and writing research questions, Hypothesis, Null and Research Hypothesis, Type I and Type II errors in hypothesis testing

### Module-II:

Introduction of epidemiology, Descriptive epidemiology, Experimental and non experimental research designs, Screening, Sampling methods, Biological variability, normal distribution

### Module-III:

Bias and Confounding, Association and causation, Odds ratio and relative risk, sensitivity and specificity Data collection methods- Observation method, Interview method, Questionnaires and schedules Construction,

### Module-IV:

Critical analysis of research papers, Conducting a literature review, Writing Research proposals, Development of conceptual framework in research

### Module-V: Introduction to Biostatistics

Introduction to Statistics, Classification of data, Source of data, Method of scaling - nominal, ordinal, ratio and interval scale, measuring reliability and validity of scales, Measures of Central tendency, Measures of Dispersion, Skewness and kurtosis, Sampling, Sample size determination

## Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

(CP – Class Performance; V-Viva; A- Attendance; ME- Mid-Term Exam, EE – End semester Exam)

## Text & References:

### Text books:

- Research Methodology: Methods and Techniques : By C. R. Kothari

## Syllabus - Second Semester

### OCULAR DISEASE AND OCULAR DIAGNOSTICS-I

**Course Code: OPT4211**

**Credit Units: 04**

**Course Objectives:** This course gives both in-depth theoretical knowledge and clinical exposure to the diagnostic procedures. The outcomes of this course are: Thorough understanding of the basic and advanced ophthalmic procedures and instrumentation through didactic lectures and clinical postings.

**Revision and tutorial of clinical procedures and recent advanced shall be taught.**

Case files / log book needs to be maintained in the case examination procedures done during the semester. These need to be signed by the supervisor.

**Examination Scheme:**

Components	A	CT	HA (log book)	EE
Weightage (%)	5	10	15	70

A: Attendance, CT: Class Test, HA: Home Assignment, EE: End Semester Exam

**Recommended Text books:**

- BHVI optometry course modules
- Clinical Procedures in Optometry : J. Boyd Eskridge, John F. Amos, Jimmy D. Bartlett
- Primary care in Optometry :Theodore Grosvenor, Theodore P. Grosvenor
- Clinical Procedure Prim Eyecare : By David B. Elliott
- Optometric instrumentation : Dave Henson

## RESEARCH METHODOLOGY & BIOSTATISTICS-II

Course Code: OPT4212

Credit Units: 03

### Course Objective:

Introduction to Biostatistics and Implementing Statistical Tests and Procedures. This course is intended to provide a better understanding of data analysis and statistical issues in design of experiments, as well as the techniques and terminology commonly used to elicit and communicate evidence concerning scientific hypotheses. Students will learn to properly interpret the strength of statistical arguments made by researchers, and how to weigh statistical and clinical evidence in assessing a scientific hypothesis. Emphasis will be placed on conceptual understanding of issue. This is intended for students interested in learning how to conduct data analysis and how to interpret the output of statistical software. The implementation of these techniques through Excel and JMP will be illustrated by real datasets taken from clinical and public health studies. Students will learn where to find the relevant information from the statistical output tables generated by the software. Emphasis will be placed on application of statistical methods to real datasets.

### Course Contents:

#### Module-I:

Introduction to SPSS

#### Module-II:

Concept of probability and Probability distributions – Binomial Probability distribution, Poisson Probability distribution and Normal Probability distribution

#### Module-III:

Data entry. Data coding and cleaning, tests for Normality, chi square test two sample tests (t test, man whitney test and wilcoxon signed rank test)

#### Module-IV:

Three or more sample testing (One way AND Repeated measures ANOVA, Kruskal Wallis test and Friedman test)

#### Module-V:

Correlation-Karl Person, Spearman's Rank correlation methods, Regression Analysis, Scientific writing (Writing research papers and thesis), Ethical Issues in Research, Principles and Concepts in research ethics – confidentiality and privacy, informed consent

### Examination Scheme:

Components	A	HA (log book)	CT-I	CT-II	EE- Practical/ Viva
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, EE: End Semester Exam

## **BINOCULAR VISION-II & VISION THERAPY**

**Course Code: OPT4203**

**Credit Units: 04**

### **Course Objective:**

This course provides the student with the ability to diagnose as well as to initiate treatment for patients who present with non-strabismic binocular dysfunctions, accommodative anomalies, and non-pathologic oculomotor dysfunction. From a diagnostic perspective, it will integrate the clinical information gained in with the theoretical and practical information covered in other courses discussing binocular vision. Treatment options discussed will include the judicious application of lenses and prisms, as well as an introduction to optometric vision therapy. The course then takes a more clinical turn, as it provides the student with an organized approach to the clinical evaluation and management of a patient with strabismus and/or amblyopia. Discussions focus on natural history, etiology, signs and symptoms, related characteristics, significance and practical management of amblyopia, esotropia, exotropia, and noncomitant strabismus. There is special emphasis on the clinical decisions and procedures needed to recognize functional versus pathological etiologies with a laboratory component, setting the stage for discussion and hands-on experience with relevant diagnostic and treatment procedures.

### **Course Contents:**

#### **Module-I: Strabismus**

Diagnosis of strabismic anomalies  
Clinical model of visual processing  
Diagnostic Evaluation of strabismus  
Diagnostic assessment and prognosis

#### **Module-II: Management Strategy and treatment options**

Lens Therapy  
Prism Therapy  
Occlusion Therapy  
Active Vision Therapy  
Pharmacological Therapy  
Surgical Therapy

#### **Module-III: Management of sensory anomalies**

Treatment of suppression  
Treatment of functional amblyopia  
Treatment of anomalous correspondence

#### **Module-IV: Strabismus management strategies**

Management of Exotropias  
Management of Esotropias  
Management of vertical strabismus

#### **Module-V: Nystagmus**

#### **Module-VI: Vision Therapy and Vision therapy techniques**

#### **Module-VII: Dyslexia and Optometry Management**

**Examination Scheme:**

Components	A	CT	P	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

**Recommended Text & Reference books**

- Paediatric Optometry, William Harvey/ Bernard Gilmartin
- Clinical management of strasbismus, Elizabeth E Caloroso,btterworth

## ADVANCED CONTACT LENS -I

**Course Code: OPT4204**

**Credit Units: 4**

**Course Objective:** Contact lenses are an essential part of optometric practice; not only for practice success, but also in the management of certain ocular conditions that require visual or therapeutic rehabilitation. This course introduces all aspects of contact lens practice to the optometry student. It begins with soft and rigid gas permeable contact lenses, and continues through toric, multifocal and specialty lenses in the next semester. This semester gives overview of contact lens related complications and their management which is discussed in detail in the next semester, A hands-on practical provides experience with the various lens types, and online materials encourage independent learning.

### **Course Contents:**

#### **Module-I:** Introduction to Contact Lenses

History of Contact Lenses ,Contact Lens Materials and Manufacturing ,Optics of Contact Lenses, Soft & Rigid Gas Permeable Contact Lens Design ,Contact Lens Fabrication, Contact Lens Verification

#### **Module-II:** Contact Lens Fitting

Examining the Prospective Contact Lens Patient, Selecting Lens Type, Wear Mode and Replacement Rate

Fitting Spherical GP Contact Lenses, Fitting Spherical Soft Contact Lenses, Correcting Astigmatism with Contact Lenses

#### **Module-III:** Contact Lens Fitting

Fitting SiHyCLs, The Dispensing Visit and After-Care, Contact Lenses for Sports, Presbyopic Contact Lens Options

#### **Module-IV:** Care and Maintenance

Contact Lens Contamination ,CL Care and CL Care Products ,Rigid CL Care ,Hydrogel and Silicone Hydrogel CL Care

#### **Module-V:** Complications

Defending the Ocular Surface in Contact Lens Wear

Rigid Contact Lens Complications

Soft Contact Lens Complications

Dry Eye and Contact Lenses

### **Examination Scheme:**

Components	A	CT	P	HA	EE
Weightage (%)	5	10	5	10	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

### **Recommended Text & Reference books:**

- IACLE modules A,B,C,D,E
- Text book Of Contact Lenses 5th edition by Sinha Rajesh ,jaypee publication 2017
- Contact lens Primer
- Essentials of Contact lens practice

- Silicone hydrogels: the rebirth of continuous wear contact lense, Deborah F. Sweeney, Butterworth Heinemann
- Clinical manual of Contact Lenses, Edward S. Bennett and Vinita Allee Henry, Lippincott Williams and Wilkins, 2008
- Medical Contact Lens Practice, Elisabeth A. W. Millis
- Contact Lenses, Anthony J. Phillips and Lynne Speedwell
- The CLAO Guide to Basic Science and Clinical Practice: Volumes 1, 2, 3, Contact Lens Association of Ophthalmologists

## CLINICS-II (SPECIALITY)

**Course Code: OPT4205**

**Credit Units: 3**

The objective of clinics in this semester is to be able to examine the eye and understand the classified eye procedures with clinical management with special reference to low vision, binocular vision, pediatric care and contact lens.

An approximate of guided 150 hours needs to be completed in this semester. The students will be by rotation go to community clinics, Campus clinics, associated hospital partners and optical / optometric clinics.

The logbook has to be maintained and 30 case sheets of SELECTED speciality in the semester with complete management and follow up are mandatory for submission at the end of the semester

The log book needs to be signed by the supervisor during every visit. No case record will be considered without the supervisor's signature.

### Examination Scheme:

Components	A	Log Book	Case Sheets	Viva-EE	EE-Practical
Weightage (%)	5	10	15	20	50

A: Attendance, EE: End Semester Exam

## **PROJECT (Research)**

**Course Code: OPT4232**

**Credit Units: 02**

Research Project Data update

**Examination Scheme:**

<b>Components</b>	<b>Results &amp; Analysis</b>	<b>Data Collection</b>	<b>Conclusion &amp; Discussion</b>	<b>Total</b>
<b>Weightage (%)</b>	40	40	20	100

## Syllabus - Third Semester

### TEACHING METHODOLOGY

**Course Code: OPT4307**

**Credit Units: 3**

**Course Contents:**

**Module-I:**

Introduction, Understanding how adults learn, How to enhance student learning

**Module-II:**

Teaching strategies to enhance Learning, How to structure your course, leaning activities

**Module-III:**

Effective learning and Teaching activities in eye Care,

Methods of teaching, presentation, demonstration, case studies, Role plays, group discussion

**Module-IV:**

Student Assessment and evaluation techniques, formative and summative assessment, marking and providing feedback

**Examination Scheme:**

Components	A	Assignment-1	Assignment-2	Assignment-3	Project	Total
Weightage (%)	5	20	20	20	35	100

A: Attendance

**Text book/ Reference Book**

As recommended by the faculty

## ADVANCED CONTACT LENS-II

**Course Code: OPT4303**

**Credit Units: 4**

**Course Objective:** This course gives both in-depth theoretical knowledge and clinical exposure in Contact lens at advanced level and in therapeutic conditions. It prepares student to develop competency in handling all types of specialty lenses. This course also deals with all complications related to contact lenses and its management.

**Course Contents:**

**Module-I:** Children and Contact Lenses

**Module-II:** Fitting Scleral and Mini-Scleral Contact Lenses, Fitting an Ocular Prosthesis

**Module-III:** Myopia Control and Orthokeratology

**Module-IV:** Special Topics

Contact Lenses for Keratoconus ,Special Applications of Contact Lenses, Advanced Techniques and Instrumentation ,The Working Environment and Contact Lenses

**Module-V:** Business Aspects of Contact Lens Practice

Contact lenses (CLs) in practice, Financial factors in a CL practice, Managing &marketing techniques for a CL practice, Employee management, Record Keeping  
Professionalism & standards of care

**Examination Scheme:**

Components	A	CT	P	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

**Recommended Text & Reference books:**

- IACLE modules B,C,D,E
- Text book Of Contact Lenses 5th edition by Sinha Rajesh ,jaypee publication 2017
- Contact lens Primer
- Essentials of Contact lens practice
- Silicone hydrogels: the rebirth of continuous wear contact lense, Deborah F. Sweeney, Butterworth Heinemann
- Clinical manual of Contact Lenses, Edward S. Bennett and Vinita AlleeHenry,Lippincott Williams and Wilkins, 2008
- Medical Contact Lens Practice, Elisabeth A. W. Millis
- Contact Lenses, Anthony J. Phillips and Lynne Speedwell
- The CLAO Guide to Basic Science and Clinical Practice: Volumes 1, 2, 3, Contact Lens Association of Ophthalmologists

## OCULAR DISEASE AND DIAGNOSTICS-II

**Course Code: OPT4308**

**Credit Units: 04**

**Course Objective:** In this course latest articles published in optometry and vision science journals will be discussed. Periodic Journal club presentation would be conducted. This will enable the student to develop skill on critical appraisal of publications and also help to keep abreast of latest developments in the field of optometry and vision science. The course would also provide insight on understanding and/or incorporation of scientific evidence in clinical practice.

This course examines selected areas of recent research in optometry. Current advances in methodology, specifics of research design, and impact of research findings will be emphasized. Selected topics are based on participating faculty expertise will be assigned to the students.

Students will be assigned topics of presentation during the semester and they will have to present base literature review and latest advancements.

### **Text & Reference books /journals:**

Clinical and experimental optometry, Edited By: H. Barry Collin  
Optometry & vision science ,journal of American academy of optometry  
Optometry journal of American optometric association  
Ophthalmic and Physiological Optics Journal of the College of Optometrists, UK  
Contact lens & anterior eye : the journal of the British Contact Lens Association  
British Contact Lens Association

## CLINICAL DECISION MAKING IN OPTOMETRIC CARE-I

**Course Objective:** Upon completing this course, the student will achieve a moderately-high level of competence with respect to a modest list of patient presentations commonly encountered by primary care optometrists. By the course's end, the student will be able to conduct a comprehensive, primary-care optometric examination, reach a diagnosis, and outline a management plan for the vast majority of patients seen during the year. The course will cover the general areas of ocular disease, refraction, functional vision analysis, and patient communication.

**Course Contents:** In this course, the student will begin with refreshing their basic knowledge on common eye disease of the anterior segment. The course would further orient towards clinical decision making skills, interpretation and improving their clinical skill set, clinical management of optometry. They will learn and develop skills on evidence/intuitive based management for the commonly seen eye diseases and learn appropriate referral & co management guidelines for secondary or tertiary ophthalmic care

The mode of delivery would be through cases scenarios discussion, problem based learning and seminar/workshops and Presentations. Records need to be maintained in the following pathologies.

The following common conditions will be covered in this semester:

### **Module-I: Lid and Adnexa:**

Eyelid cysts  
GPC  
Hodeleum  
Chemosis

Xanthelasma  
Ectropion VKC Entropion

**Module-II:** Cornea :corneal dystrophy Corneal edema corneal infiltrates  
corneal opacities Fuchs endothelial dystrophy fungal keratitis  
Hypopyon  
Keratoconus follicular conjunctivitis Iritis  
pterygium PMD Pingecula ptosis  
Rheumatoid and eye Acne and eye Scleritis Episcleritis  
Stevenson johnson syndrome Synechia  
Terriens marginal degeneration

**Module-III:** Dry eye and its interpretation and managementWorkshop

**Module-IV:** Diseases of sclera and conjunctiva  
Abrasion  
Allergic eye disease Aniridia  
Atopic Keratoconjunctivitis Bacterial Conjunctivitis Blephritis  
Chalazion  
Epiphora  
Scleritis Episcleritis  
ophthalmia neonatrum Trachoma  
Trichiasis

**Module-V:** Lens and its abnormalities –  
Cataract Ectopia Lentis  
IOL, power calculations – post-refractive surgery , analysis of surgically induced astigmatism ,  
complications of cataract surgery

**Module-VI:** Diseases of Uvea /  
Endophthalmitis  
Anterior uveitis

**Examination Scheme:**

Components	A	Presentation	Presentation-EE	Case Records	EE-Viva	EE-Viva
Weightage (%)	5	20	20	5	30	20

A: Attendance, EE: End Semester Exam

**Text books:**

- Kanski, Clinical Ophthalmology: A Systematic Approach – May 2011 Edition, Jack J. Kanski MD MS FRCS FRCOphth, Brad Bowling FRCSEd(Ophth),Elseweare heath science division
- Optometric Management Of Visual Handicap, Helen Farral,Blackwell Scientific Publications, 1991
- Ocular Differential Diagnosis, Roy
- Clinical Decision Making In Optometry, Ellen Richter Ettinger OD MS FAAO
- Anterior segment disease and Management by Andrian Bruce

## CLINICS-III (SPECIALITY)

**Course Code: OPT4305**

**Credit Units: 3**

The objective of clinics in this semester is to be able to examine the eye and understand the eye procedures with clinical management with special reference to complete optometric care.

A minimum of guided 240 hours need to be completed in this semester. The students will be by rotation go to community clinic, Campus clinics, associated hospital partners and optical / optometric clinics.

The logbook has to be maintained and 30 case sheets of complete case management and follow up are mandatory for submission.

The log book needs to be signed by the supervisor every time a case is recorded in it. No case will be considered without the supervisor's signature.

### Examination Scheme:

Components	A	Assignment (log book)	Case Sheets	Viva-EE	EE- Practical
Weightage (%)	5	15	10	20	50

A: Attendance, EE: End Semester Exam

# ENVIRONMENTAL OPTOMETRY

**Course Code: OPT4306**

**Credit Units: 3**

**Course Objective:** Occupational optometry is the portion of optometric practice that is concerned with the efficient and safe visual functioning of an individual within the work environment. It encompasses more than just the prevention of occupational eye injuries, although that certainly is a major component. It also includes vision assessments of workers/patients, taking into account their specific vision requirements and the demands these requirements place upon them. Optometrists provide occupational vision services at three general areas or levels: primary care, eye safety consultation, vision consultation.

After the completion of the course the student should be able to

Complete an occupational history on each adult patient

Diagnose and manage occupationally induced conditions (making referrals when necessary)

Assess his or her patients' occupational vision demands and provide appropriate treatments as necessary

Educate patients on the need to incorporate eye safety principles into their daily activities.

Performing an eye-safety workplace assessment

Overseeing the procurement of eye protection devices (both prescription and nonprescription)

## **Course Contents:**

**Module-I:** Introduction

**Module-II:** Work place survey

Oculo visual hazard analysis

Ergonomic Factor

Work place lighting assessment

**Module-III:** Matching the worker to the task

Visual standards

Clinical evaluation

Personal protective strategies

**Module-IV:** Pitfalls of industrial consulting

**Module-V:** Visual Health in selected industries

**Module-VI:** References and standards

## **Examination Scheme:**

Components	Attd.	Case Studies	Field Visit	Assignment	Class Test
Weightage (%)	5	30	10	5	50

## **Test Books:**

- Eye Essentials: Environmental & Occupational Optometry, G Carson, S Doshi, W Harvey, Butterworth-Heinemann
- BHVI module for environmental optometry
- R V North: Work and the eye, Second edition, Butterworth-Heinemann, 2001
- G W Good: Occupational Vision Manual available in the following website: [www.aoa.org](http://www.aoa.org)
- N.A. Smith: Lighting for Occupational Optometry, HHSC Handbook Series, Safchem Services, 1999
- J Anshel : Visual Ergonomics Handbook, CRC Press, 2005

## **INTERNSHIP**

Eye care clinic: This sequence of courses gives students direct patient care experience and responsibilities in affiliated health centers, hospitals or in private practices. Clinical preceptors will evaluate and guide the student through the process of providing eye care. Students are graded on key clinical tools: technical skills, knowledge base, analytical skills, diagnostic skills, management and treatment, communication skills, efficiency, attitude, and professionalism. The clinical grade is honors, pass, remedial, or fail based on a midterm and final preceptor evaluation; on meeting documentation requirements, such as maintaining documentation; and on submitting patient logs, and site evaluations.

The AUG department of Optometry monitors the quality and quantity of patient encounters for each student. Through the clinical assignments, students will gain proficiency in full scope primary care optometry and contact lenses. All students must satisfy a minimum number of patient encounters during the course of their assignments. Some students may be assigned to specific sites in order to assure a clinical experience based on their projects. Some students may meet the contact lens requirement through affiliations set up on behalf of the students during the summer vacations with private practitioners who meet the College's program standards.

Four rotations during the final semester complete the clinical requirements, with mandatory assignments in Primary Care, Advanced Care and Specialty Care. Students choose an additional assignment in one of the mandatory categories or from a list of elective sites based on their projects. The College currently has affiliated clinical sites located around the campus and in other states.

Clinical sites that provide comprehensive eye care services for patients of all age brackets are categorized as Primary Care sites. Typically, these sites are eye care hospitals or private optometric practices. Clinical sites that provide professional specialty care are categorized as Specialty Care clinics. These include clinics specializing in visual therapy/binocular vision, contact lenses, pediatrics, geriatrics, patients with disabilities, or low vision. The rotation provides training in all of these specialty areas.

## Syllabus - Fourth Semester

### CLINICAL OPTOMETRY (GENERAL)

**Course Code: OPT4401**

**Credit Units: 05**

**Objective:** It is expected that upon completion the student will be able to carry out the standard clinical procedures safely and efficiently

Upon completion of the course the student must be able to

Take down a comprehensive history

Do a complete and proper refraction

Do a torch light examination

Do a binocular vision assessment

Use a slit lamp to do a complete anterior segment examination and posterior segment as required

Must be able to take the decision to dilate the eye as per need

Must be able to give a preliminary diagnosis

Each student must be able to complete 20 such examinations under supervision and maintain verified case records for the same.

Tutorial (Presentations) – Each student must also make 1 presentation on instruments and present it at the study center.

Case Presentation:

Each student must do two case discussions during the semester and of the patients. Thus each student presents 2 case discussions at a time and presents it at the study centre.

The hard copy of the presentations will have to be submitted for the term end exam.

#### Examination Scheme:

Components	Attd.	Case Records	Assignments	Clinical Supervisors Evaluation	Case Discussion	Practical + Viva
Weightage (%)	5	10	10	15	10	50

## **CLINICS-I -ADVANCE CLINICAL RETINA, GLAUCOMA**

**Course Code: OPT4407**

**Credit Units: 10**

### **Course Contents:**

**MODULE-I:** Retinal evaluation, diagnostics & optometric management

**MODULE-II:** Glaucoma investigation diagnostics and optometric management

**MODULE-III:** Low vision Evaluation, deciding diagnosis & management plan

**MODULE-IV:** Visual Rehabilitation for visually impaired person

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>Case Records</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	10	15	70

A: Attendance, EE: End Semester Exam

## **CLINICS-II: ADVANCE PEDIATRIC, BINOCULAR VISION & VISION THERAPY**

**Course Code: OPT4408**

**Credit Units: 10**

### **Course Contents:**

MODULE- I- To assess and manage patients with anomalies of binocular vision

MODULE II- To Assess binocular status using objective and subjective tests.

MODULE III- To Understanding of the management of a patient with an anomaly of binocular vision.

MODULE IV- To Investigate and manage adult patients presenting with heterophoria.

MODULE V- To Manage an adult patient with heterotropia

MODULEVI- To Manage children at risk of developing an anomaly of binocular vision.

MODULEVII- To Manage children presenting with an anomaly of binocular vision.

MODULE VIII- To Manage a patient presenting with an incomitant deviation.

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>Case Records</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	10	15	70

A: Attendance, EE: End Semester Exam

## **ADVANCE APPLIED OPTICS AND ADVANCE CORNEA & CONTACT LENS**

**Course Code: OPT4409 & OPT4410**

**Credit Units: 10 & 10**

### **Course Contents:**

MODULE I- Insert and remove contact lenses and instruct patients in these procedures.

MODULE II- Fit soft contact lenses.

MODULE III- Manage the aftercare of patients wearing soft contact lenses

MODULE IV- Advise on contact lens materials and care regimes

MODULE V- Manage the aftercare of patients wearing rigid gas permeable contact lens.

MODULE VI- Fit rigid gas permeable contact lenses.

MODULE VII- Fit contact lenses to patients with astigmatism.

MODULE VIII- Techniques used in fitting contact lenses and to advise patients requiring complex visual correction.

MODULE IX- Fit multifocal, contact Lenses

MODULE X- Fit special contact lenses e.g Rose K , Orthokeratology, Scleral

MODULE XI- Dispensing, ordering & verification of spectacle

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>Case Records</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	10	15	70

A: Attendance, EE: End Semester Exam

## CLINICAL INTERNSHIP-DISSERTATION

**Course Code: OPT4437**

**Credit Units: 10**

### **Course Contents:**

**MODULE-I:** Thesis Proposal Development is an independent tutorial conducted by the student's advisor, and involves a comprehensive literature survey of the chosen research area. Through regular meetings, the student and advisor discuss this literature in detail, and the student writes a paper, reviewed by the advisor, summarizing the literature. This paper should help in the development of the thesis proposal and thesis.

**MODULE-II:** Thesis Proposal At the end of the Semester 2. each student must submit to the university with the signed approval of the advisor, a thesis proposal defining the thesis project, the methods and design of the experiments needed for completion, the progress to date, and plans for completion.

### **MODULE-III: Thesis Preparation**

This is involving preparation of the thesis. The thesis must include a cover and title page, abstract, table of contents, Introduction of the thesis topic with a comprehensive review of the literature, appropriately organized methods, results, and discussion sections for the experiments performed, and a final conclusions section summarizing the outcome of the project. The student should submit a draft of the thesis to the advisor by the end of the third semester. Plans should be in place for the thesis examination to be held in the final exam.

### **MODULE-IV: Thesis submission**

#### **Project Work and Practical Training**

A Full time student admitted to M.Optom course will have to be involved in teaching under-graduate students for lectures, demonstrations and hands-on practical sessions.

All students will have to choose ONE speciality subject at start of first year M.Optom and inform the University through School of Optometry in writing within 3 months of being admitted for the first Semester M.Optom

As a part of clinical training during the first year M.Optom every student will document minimum number of cases specified in clinically examined by them. These clinical cases will have to be submitted before end of 4th semester

Every student will have to do a dissertation thesis during the second year M.Optom for this. Every student should submit a protocol which will have to be approved and accepted by post graduate teaching faculty at School of Optometry within second semester of starting first year.

Two copies of the dissertation thesis will have to be submitted before 15th May in second year. Some post graduate students may have to work with ophthalmic and optical industry in their projects of practitioner education, research and other related activities which will be given as assignments by the School of Optometry, Amity medical school.

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	25	70

A: Attendance, EE: End Semester Exam

## **Examination & Rules of passing for first and Second Year M.Optom**

Format for term end examination Theory papers

Each theory examination will be of 100 marks and 3 Hours duration, 70% marks will be taken as external marks.

Each theory examination paper will have total three Sections

### **Examination Pattern:**

Each semester examination will consists of both internal assessment and term end examination in the subjects prescribed in syllabus for each semester. The Faculty will conduct the internal assessments as per schedule prepared by school of optometry.

### **Amity University, Gurgaon will conduct university every term end examination**

#### **Eligibility for a student to appear in term for semester-term end Examination**

Minimum 50% marks in internal assessment i.e. minimum 15marks in theory internal and minimum 25 marks in practical/Viva/Oral

Minimum 75% attendance for all course , If of these eligibility conditions have not been satisfied, the student will not be allowed to appear for semester term end examinations

Duration of examination at end for each semester term for each written/practical/clinical examination will be such as may be notified from time to time on recommendation of the Amity University, Gurgaon authorities.

### **Results and passing for each semester Examination:**

A student will be declared to have passed in particular theory subjects provided he/she has secured not less than 50% marks out of 100(15 marks out of 30 in internal assessment and 35 marks out of 70 in term end examination) in each theory subject for every semester.

A student will be declared to have passed in a particular subject provided he/she has secured not less than 50 marks out of 100 [25 marks out of 50 in internal Assessment and 25 marks out of 50 in terms end examination] in each practical subject for every semester.

A student will be declared to have “PASSED” the complete semester Examination provided he/she has secured 50% marks individually in all theory and practical subjects of that semester.

If a student fails or does not appear for semester examination for semester I& III he/she will still be allowed to attend the theory classes and practical sessions for the semester II & IV Respectively ,which falls in same academic year.

A student who has not appeared or has failed in the semester examination for semester I& III will have to appear for the internal and external exams for only that subject along with semester exam for the current semester i.e. .II and IV respectively.

Only when the student is declared pass all subject of semester I and semester II examinations will be admitted to the second year of the course.

A student who has not appeared or has failed in the semester examination for semester I & II will not be admitted to the second year of the course. He/ She will have to get readmitted in the first year and pay the fees as prescribed by the university.

**Allowed to keep term:** If the student secures minimum 50% marks in at least three subjects of first year M.Optom, he/she will be allowed to keep term for second year. However he/she will have to pass in all the subjects of first year M.Optom in order to become eligible to apply/appear for second year final M.Optom University Examinations.

**Repeat term:** If the student fails in four or all five subjects of first year, he/she will be asked to pay the tuition fees proportionate to the number of subjects failed and the university examination fees and then appear for the midterm external examinations in those subjects in which he/she failed earlier. But they are not required to appear for internal examinations and neither repeat project.

**Second Year M.Optom Passing:** The internal examination and external examination marks will be added as the final marks of that subject for each year. Only when the student secures minimum 50% marks [Internal+External=combined] in all subjects of both the years and has completed the M.Optom Course and will be eligible for post graduate degree of Master of Clinical optometry [ M.Optom]

**Repeat Dissertation:** If the M.Optom student has failed in subject of the second year M.Optom the student will be required to either repeat the same dissertation project OR Choose different dissertation project and appear for the year end examination only.

He/she cannot take midterm examination for this subject in month of February every year.

If any student fails three times successively in the same subject at the university examinations for either first or second year M.Optom, He/She will not be allowed to continue the M.Optom course and his admission stands cancelled.

#### **Award of the Degree:**

A student who has secured 50% marks in every subject of final second year M.Optom Examination will be Eligible for conferment of Master of clinical Optometry [M.Optom] Post Graduate Degree by Amity university, Gurgaon

#### **Award of Gold Medal:**

Gold Medal will be awarded to the student who secures maximum marks in first and second ,Third& Fourth semester M.Optom added together, The candidate should have cleared each and every subject in every term in the first attempt.

#### **Guidelines for Master research project work:**

Basic reading material: Introductory reading material on research methodology, how to do a literature search and statistical methods should be provided at the beginning of the semester.

The students should read the material thoroughly and can mail their queries to their guides. a. Assignment 1: Exercises should be also given based on the reading material

The student should learn to do a through pubmed search in their area of research interest.. Read the recent research articles initially. Find out the research gaps. Based on that set up your research

aim. Your research aim should not be a repetition of an already done research. Substantiate the necessity (Gap in current research) for the proposed study. (Assignment II: mailed to guide)

Discuss with your peers and clinicians regarding the Originality & objective of the study, feasibility of the study and other ethical issues involved: Very important

Institutional Review Board and Ethics committee approval

Consent form certified

As they begin the research, it would be wise to also meet the statistician

Sample size estimation

Microsoft excel or access proforma design

Prepare a rough draft of the protocol (Assignment III)

Emphasize on the methodology

The final protocol should be ready by end of second semester

Update your research activities at least once in a month to your guide (Data collection proforma as excel sheet).

Data entry should be done in Excel appropriately. Consult with your local statistician for any queries and also discuss with your guide. (Assignment IV)

End of your data collections takes to Analysis: Kindly discuss with your guide and a statistician (Assignment V: on the basics of statistics pertaining to your research interest)\*

In the thesis introduction, literature and methodology should be ready before the end of fourth semester.

Submission of the final thesis to the guide should be done before one month of the deadline given. So that your guide will have enough time to review and make corrections

**GURUGRAM**

## Syllabus - First Semester

### EPIDEMIOLOGY, PUBLIC HEALTH & COMMUNITY OPTOMETRY

**Course Code: OPP4101**

**Credit Units: 03**

**Course Objective:** To inculcate the knowledge, sensitivity and clinical exposure of community optometry. The outcomes of the course are: thorough understanding of conducting of screening for specific eye conditions, and resultant implications through theoretical and practical exposure. By the end of the course the student will be able to use the knowledge of the skills gained in promotion and preventive measures of community optometry.

**Course Contents:**

**Module-I: Public health concepts**

History of public health, History of public health optometry (including epidemiology, man power, projections, and community reimbursement mechanisms), Organizations of health services (principles of primary, secondary and tertiary care) Health Care Delivery systems in India and determinants of health. Detriments of health care delivery system planning of health services (including relevant legislation and implication to optometric practice). Health manpower protection and in the practice of ophthalmology Multidisciplinary and institutional practice modes Global medicine and evolution of Public Health in India, Public Health optometry: concepts and implementation

**Module-II:** Levels of prevention-optometrist's role in community  
Optometry's role as a care primary care professional, preventable blindness

**Module-III: Health systems**

Concepts of Health systems National Health Programs Effective delivery of eye care services,  
Role of civil societies in blindness prevention:  
Vision2020: the Right to Sight  
National and International Agencies in eye Care, NPCB  
DBCS

**Module-IV: Global Blindness and visual impairment**

Refractive error and low vision as public health issues  
Socioeconomic implications of blindness and visual impairment  
Vision screening  
Organizing eye camps  
Eye Donation and Eye Banking

**Module-V: Epidemiology**

Prevalence, incidence and distribution of visual impairment  
Basics of Epidemiology study methods  
Incidence, prevalence, risk factors, odd ratio  
Childhood blindness  
Refractive errors and presbyopia  
Age related macular degeneration  
Low Vision  
Diabetic retinopathy

Glaucoma  
Age related Macular Degeneration  
Trachoma  
Corneal blindness

**Examination Scheme:**

Components	A	CT	P (field report)	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

**Text book and reference**

- Community eye health journal
- Epidemiology of Eye Diseases, by Gordon and Drawin

# **BINOCULAR VISION & PEDIATRIC OPTOMETRY-I**

**Course code: OPP4102**

**Credits Units: 04**

**Course Objective:** This course gives both in-depth theoretical knowledge and clinical exposure in Binocular Vision, Orthoptics & Pediatric vision care. The outcomes of this course are: Thorough understanding of the visual development issues, evaluation of pediatric subjects, and non-surgical management of the pediatric binocular and refractive problems, amblyopia and Strabismus.

**Course competencies:**

1. Ability to diagnose and manage and co-manage binocular vision anomalies
2. Ability to co-manage visual perceptual anomalies
3. Ability to manage diplopia, suppression and ARC
4. Ability to manage amblyopia

## **BINOCULAR VISION**

**Course Contents:**

**Module-I:**

Revision: Applied anatomy and physiology of extraocular muscle and Oculomotor Function  
Retinal and cortical development, refractive development, Development of vision, ocular changes with age

**Module-II:**

Binocular Vision: and related aspects, Development of binocular vision, Physiology of binocular vision.  
Development of ocular deviation and its adaptation

**Module-III:**

Amblyopia and occlusion, Management guidelines of Amblyopia, Abnormal retinal correspondence, Anomalies of accommodation and its management, Anomalies of convergence and its management, Nystagmus

## **PEDIATRIC OPTOMETRY**

**Module-I:**

Assessment of Child Vision and Refractive Error, Refractive Routines in the Examination of Children  
Cycloplegic Refraction, Color Vision Assessment in Children, Dispensing for the Child patient

**Module-II:**

Common genetic problems in Pediatric optometry, Pediatric Ocular Diseases  
Ocular Trauma in Children, Myopia control

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>P</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

**Recommended Text books**

- Clinical management of binocular vision Mitchell Scheiman and Bruce Wick
- Applied concepts in vision therapy: Leonard Press
- Paediatric optometry: Jerome K Rosner

**Reference books**

- Binocular Vision And Ocular Motility , Guntoor Von Noordan
- Clinical Orthoptics ,Fiona Rowe
- Strasbimus Simplified ,Pradeep Sharma
- Assessing Children's Vision, Susan J Leat, Rosalyn H Shute, Carol A Westal
- Paediatric Optometry, William Harvey/ Bernard Gilmartin
- Pediatric Optometry, Jerome Rosner

## **CLINIC-I (GENERAL)**

**Course Code: OPP4105**

**Credit Units: 3**

This course includes minimum of 90 hours of supervised clinical training. The clinics involve primary care clinics and community work.

The objective of clinics in this semester is to be able to examine the eye and understand the basic eye procedures with clinical management.

A logbook is maintained and case sheets with complete management and follow up are mandatory for submission.

The log book needs to be signed by the supervisor.

### **Examination Scheme:**

<b>Components</b>	<b>Attd.</b>	<b>Log Book</b>	<b>Case Sheets</b>	<b>Viva-EE</b>	<b>EE-Practical</b>
<b>Weightage (%)</b>	5	10	15	20	50

# RESEARCH METHODOLOGY & BIOSTATISTICS

**Course Code: OPP4106**

**Credit Units: 04**

## **Research Methodology**

Course Objective: This course is a brief overview about research design that is intended to cover the basics of designing and implementing a scientific study. It will provide the students the basic knowledge in Bio-statistics. At the completion of the course, the students will have the knowledge of data collection, statistical application and finally ready for research project. This will enable the student to gain understanding of different research methodologies and appropriate research design to be able to conduct research projects.

## **Course Contents:**

### **Module-I:**

Introduction to research methods, Variables in research, Reliability and validity in research, Formulation of research problems and writing research questions, Hypothesis, Null and Research Hypothesis, Type I and Type II errors in hypothesis testing

### **Module-II:**

Introduction of epidemiology, Descriptive epidemiology, Experimental and non experimental research designs, Screening, Sampling methods, Biological variability, normal distribution

### **Module-III:**

Bias and Confounding, Association and causation, Odds ratio and relative risk, sensitivity and specificity Data collection methods- Observation method, Interview method, Questionnaires and schedules Construction,

### **Module-IV:**

Critical analysis of research papers, Conducting a literature review, Writing Research proposals, Development of conceptual framework in research

### **Module-V: Introduction to Biostatistics**

Introduction to Statistics, Classification of data, Source of data, Method of scaling - nominal, ordinal, ratio and interval scale, measuring reliability and validity of scales, Measures of Central tendency, Measures of Dispersion, Skewness and kurtosis, Sampling, Sample size determination

## **Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

(CP – Class Performance; V-Viva; A- Attendance; ME- Mid-Term Exam, EE – End semester Exam)

## **Text & References:**

### **Text books:**

- Research Methodology: A Step By Step Guide For Beginners : Ranjit Kumar
- Research Methodology: Methods and Techniques : By C. R. Kothari

# LOW VISION CARE AND GERIATRIC OPTOMETRY

**Course Code: OPP4109**

**Credit Units: 04**

**Course Objectives:** This course gives both in-depth theoretical knowledge and clinical exposure in Low Vision care. The outcomes of this course are: Thorough understanding of the causes of the low vision, its functional and psychosocial consequences, and rehabilitational measures through didactic lectures and clinical postings.

## **Course Contents:**

### **Module-I: Introduction to Low Vision**

Definition of low vision. The impact of low vision. Prevalence of low vision

### **Module-II: Causes and symptoms of low vision**

Common causes of low vision. Low vision symptoms and conditions. Functional implication of diseases causing visual impairment. Disorder related to geriatric population and visual disability. Ocular changes with ageing.

### **Module-III: Clinical assessment of low vision patient**

Purpose of low vision assessment, Steps of low vision assessment. Diverse types of magnification, Different methods and formulae for calculating magnification, how to determine resolution ability, predict distance required to meet resolution goal, Measure lens power, Measure equivalent viewing distance, Calculate equivalent viewing distance for different devices

### **Module-IV: Assistive technology in Low Vision devices**

Different type of optical / non-optical low vision devices and their uses, Computer assistive Technology for low vision patient CTV, electronic magnifier, hand held electronic magnification. Mobility devices

### **Module-V: Non –optical low vision devices**

Relative size magnification Large-print clocks, timers, calculators, remote controls, watches, books, Glare & contrast control, Posture and comfort maintenance device, Hand writing and written communication device Orientation and mobility device, Sensory substitution device Medical management device

## **Examination Scheme:**

Components	A	CT	P	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

## **Recommended Text books:**

- Management & Practice of Low Visual Acuity - A T Dowis
- Low Vision Principles & Practice - C Dickinson
- Optometric Management of Visual Handicap - H Farrell
- Eye Essentials - Low Vision Assessment - J McNaughton
- Low Vision Manual - Jackson and Wolfson
- The Art and Practice of Low Vision (2nd Edition) - P. D. Freeman and R. T. Jose
- Essentials of Low Vision Practice, Richard L. Brilliant OD

# APPLIED OPTICS

**Course Code: OPP4110**

**Credit Units: 04**

**Course Objective:** This course mainly deals with Optical management of refractive errors-new modalities the advanced techniques in subjective and objective refraction and Spectacle Dispensing. This course leads to a rewarding career as an optometrist, a specialist trained to dispense and to recognize basic ocular disorders. This allows students to recommend the right spectacle lens based on the condition of the eye

## **Course Contents:**

### **Module-I: Ophthalmic Lens types,**

Lens materials Properties of lenses (Refractive index, base curve, specific gravity, Abbe Value, UV cut off,etc)

Prism

Tints and coatings

Bifocals/Multifocals

### **Module-II: Progressive addition lenses**

PAL design

Indication and advantages

Dispensing PAL,

PAL trouble shooting

Market availability

### **Module-III: Spectacle FRAMES:**

Facial fitting principles

Spectacle delivery

Dispensing problem prescriptions

Frame types and parts

Classification of spectacle frames-material, weight, temple position, coloration Frame construction

Frame Measurements and markings

Frame manipulation and repair

Facial measurements and frame choice

Measuring the interpupillary distance and pupillometer

Special purpose frames (sports, kids, reading)

identify various types of Frames and mountings

### **Module-IV: Lens Ordering and lens verification**

Lens edge thickness calculation Writing spectacle lens order

Facial measurements - Interpupillary distance measurement and measuring heights (single vision, multifocal, progressives)

Measurement of effective diameter minimum blank size Glazing and edging Hands on

Lens verification and axis marking and fitting of all lens types

Final checking of finished spectacle with frame adjustments

Delivery and follow-up

Troubleshooting complaints and handling patient's questions.

Optical centre marking

Axis marking

**Project:** Different brands for spectacle frames and sunglasses –Indian & international  
Demonstration- safety eyewear, different filters, recumbent spectacle, Ptosis spectacle,

#### **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>P</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

#### **Text & Reference Books:**

- The fine art of prescribing glasses, Benjmin Milder, Butterworth Heinnemann,
- Spectacle frame dispensing: H Obstfeld: Butterworth Heinnemann
- essentials of ophthalmic lens finishing , C.W. Brooks and Irvin Borish, Butterworth Heinnemann

- Systems of ophthalmic dispensing , Brook & Borish, Butterworth heinmann
- Clinical Optics , Troy Fennin , Theodore Grosvenor, Butterworth Heinmann

## **PROJECT**

**Course Code: OPP4132**

**Credit Units: 04**

### **RESEARCH PROJECT:**

Students will prepare the protocol during this semester after doing extensive literature search. Each student will be reporting to guide/supervisor who helps the student to go about in systematically. Research proposal need to be presented in front of the experts before going ahead with data collection. In institute which has Institute research board and ethics committee student can be encouraged to present the proposal in it.

## **Syllabus - Second Semester**

### **BINOCULAR VISION –II & VISION THERAPY**

**Course Code: OPP4203**

**Credit Units: 4**

**Course Objective:**

This course provides the student with the ability to diagnose as well as to initiate treatment for patients who present with non-strabismus binocular dysfunctions, accommodative anomalies, and non-pathologic oculomotor dysfunction. From a diagnostic perspective, it will integrate the clinical information gained in with the theoretical and practical information covered in other courses discussing binocular vision. Treatment options discussed will include the judicious application of lenses and prisms, as well as an introduction to optometric vision therapy. The course then takes a more clinical turn, as it provides the student with an organized approach to the clinical evaluation and management of a patient with strabismus and/or amblyopia. Discussions focus on natural history, etiology, signs and symptoms, related characteristics, significance and practical management of amblyopia, esotropia, exotropia, and noncombatant strabismus. There is special emphasis on the clinical decisions and procedures needed to recognize functional versus pathological etiologies with a laboratory component, setting the stage for discussion and hands-on experience with relevant diagnostic and treatment procedures.

**Course Contents:**

**Module-I: Strabismus**

Diagnosis of strabismus anomalies  
Clinical model of visual processing  
Diagnostic Evaluation of strabismus  
Nystagmus

**Module-II: Management Strategy and treatment options**

Lens Therapy  
Prism Therapy  
Occlusion Therapy  
Active Vision Therapy  
Pharmacological Therapy  
Surgical Therapy

**Module-III: Management of sensory anomalies**

Treatment of suppression  
Treatment of functional amblyopia  
Treatment of anomalous correspondence

**Module-IV: Strabismus management strategies**

Management of Exotropia's  
Management of Esotropias  
Management of vertical strabismus  
Dyslexia

### Examination Scheme

Components	A	CT	P	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

## ADVANCED CONTACT LENS -I

**Course Code: OPP4204**

**Credit Units: 4**

**Course Objective:** Contact lenses are an essential part of optometric practice; not only for practice success, but also in the management of certain ocular conditions that require visual or therapeutic rehabilitation. This course introduces all aspects of contact lens practice to the optometry student. It begins with soft and rigid gas permeable contact lenses, and continues through toric, multifocal and specialty lenses in the next semester. This semester gives overview of contact lens related complications and their management which is discussed in detail in the next semester, A hands-on practical provides experience with the various lens types, and online materials encourage independent learning.

### **Course Contents:**

#### **Module-I: Basics of Contact Lenses**

History of Contact Lenses, Contact Lens Materials and Manufacturing, Optics of Contact Lenses, Soft & Rigid Gas Permeable Contact Lens Design, Contact Lens Verification

#### **Module-II: Contact Lens Fitting**

Examining the Prospective Contact Lens Patient, Selecting Lens Type, Wear Mode and Replacement schedule

Fitting Spherical GP Contact Lenses, Fitting Spherical Soft Contact Lenses, Correcting Astigmatism with Contact Lenses

#### **Module-III: Advanced materials and designs**

Fitting Silicone Hydrogels,

The Dispensing Visit and After-Care, Contact Lenses for Sports, Presbyopia Contact Lens Options in contact lens wear

#### **Module-IV: Care and Maintenance**

Contact Lens Contamination, CL Care and CL Care Products, Rigid CL Care, Hydrogel and Silicone Hydrogel CL Care, Dry Eye and Contact Lenses

#### **Module-V: Complications with contact lenses**

Defending the Ocular Surface in Contact Lens Wear, Rigid Contact Lens Complications, Soft Contact Lens Complications

### **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>P</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

### **Recommended Text & Reference books:**

- IACLE modules A, B, C, D, E,
- Text book Of Contact Lenses 5th edition by Sinha Rajesh, Jaypee publication 2017
- Contact lens Primer
- Essentials of Contact lens practice

- Silicone hydrogels: the rebirth of continuous wear contact lenses, Deborah F. Sweeney, Butterworth Heinemann
- Clinical manual of Contact Lenses, Edward S. Bennett and Vinita Alee Henry, Lippincott Williams and Wilkins, 2008
- Medical Contact Lens Practice, Elisabeth A. W. Millis
- Contact Lenses, Anthony J. Phillips and Lynne Speedwell
- The CLAO Guide to Basic Science and Clinical Practice: Volumes 1, 2, 3, Contact Lens Association of Ophthalmologists

## CLINICS-II (SPECIALITY)

**Course Code: OPP4205**

**Credit Units: 3**

The objective of clinics in this semester is to be able to examine the eye and understand the classified eye procedures with clinical management with special reference to low vision, binocular vision, pediatric care and contact lens.

An approximate of guided 150 hours needs to be completed in this semester. The students will be by rotation go to community clinics, Campus clinics, associated hospital partners and optical / optometric clinics.

The logbook must be maintained and 30 case sheets of SELECTED specialty in the semester with complete management and follow up are mandatory for submission at the end of the semester

The log book needs to be signed by the supervisor during every visit. No case record will be considered without the supervisor's signature.

### Examination Scheme

Components	Attd.	Log Book	Case Sheets	Viva-EE	EE-Practical
Weightage (%)	5	10	15	20	50

A: Attendance, EE: End Semester Exam

# OCULAR DISEASE AND DIAGNOSTICS-I

**Course code: OPP4211**

**Credit Units: 04**

**Course Objectives:** This course gives both in-depth theoretical knowledge and clinical exposure to the diagnostic procedures. The outcomes of this course are: Thorough understanding of the basic and advanced ophthalmic procedures and instrumentation through didactic lectures and clinical postings. Evidence based approach to Diagnosis, Clinical decision Making, Management and co management of anterior segment ocular diseases. Developing more reading ability of scientific journals for more evidence based management with recent understanding of diseases.

## **Desired competencies**

Ability to perform clinical decision making for Ocular abnormalities

Referral criteria

Ability to perform and interpret corneal diagnostics including Topography/Pentacam/Orbscan

Specular microscopy

Pachymetry

Abberometry

AS OCT UBM

Ability to perform pre and post Lasik evaluation

Ability to interpret glaucoma diagnostic reports

OCT

Gonioscopy /HRT /GDX

ONH evaluation

Ability to perform anterior segment photography

Ability to manage and co-manage therapeutics for anterior segment

Recent advances will be added time to time

## **Examination Scheme:**

Components	A	CT	HA (log book)	EE-Viva	EE-Practical
Weightage (%)	5	10	15	20	50

A: Attendance, CT: Class Test, HA: Home Assignment, EE: End Semester Exam

## **Recommended Text books:**

- Clinical Ophthalmology: Jack J Kanski
- Diagnostics and imaging techniques in Ophthalmology: Amar Agarwal

## **Reference books**

- Clinical Procedures in Optometry : J. Boyd Eskridge, John F. Amos, Jimmy D. Bartlett
- Primary care in Optometry :Theodore Grosvenor, Theodore P. Grosvenor
- Clinical Procedure Prim Eyecare : By David B. Elliott

# LOW VISION CARE AND REHABILITATION

**Course code: OPP4212**

**Credit Units: 4**

**Course Objectives:** This course gives both in-depth theoretical knowledge and clinical exposure in Low Vision care. The outcomes of this course are: Thorough understanding of the causes of the low vision, its functional and psychosocial consequences, and rehabilitational measures through didactic lectures and clinical postings. This course introduces low vision rehabilitation and geriatrics. The course teaches the role optometrists perform in treating the level 1 low vision patient who has moderate visual impairment. The course also addresses how to refer the level 2 patient who has advanced visual impairment to comprehensive low vision care.

## **Course Contents:**

### **Module-I: Orientation and mobility**

Orientation and mobility skill set cane skills, sighted guide technique, using a cane  
Using other senses for orientation, Dos and don'ts for orientation and mobility  
Driving with Low vision, Visual functioning, how to enhance visual functioning, residual vision, classification of activities of daily living, basic step towards independent living, how to achieve independent living

### **Module-II: The vision related rehabilitation network**

Rehabilitation services network, state rehabilitation Programs & services, Private rehabilitation programs & services, low vision practitioner's role in rehabilitation service network, building a referral network, ensuring accessibility to service, financial resources,

### **Module-III: Visual Disorders**

The Epidemiology of Vision Impairment, Vision Impairment in the paediatric population, Children with Multiple Impairments, Dual Vision and Hearing Impairment, Diabetes Mellitus and Vision Impairment, Vision Problems associated with Multiple Sclerosis, Vision Impairment related to Acquired Brain Injury, Vision and Dementia, Low Vision and HIV infection

### **Module-IV: The Functional Perspective**

Low Vision and Psychophysics, Visual Disorders – The Psychosocial Perspective, Vision Impairment and Cognition, Spatial orientation and Mobility of people with vision impairments, Social skills Issues in vision impairment, Communication and language: Issues and concerns, Developmental perspectives on Aging and vision loss, Vision and cognitive Functioning in old age, Interactions of Vision Impairment with other Disabilities and sensory Impairments.

The Role of psychosocial Factors in adaptation to vision Impairment and Habitation outcomes for Adults and Older adults and children, Social support and adjustment to vision Impairment across the life span, Associated Depression, Disability and rehabilitation

### **Module-V: The Environment and Vision Impairment:**

Indian Disabilities act, Children's Environments, Environments of Older people  
Outdoor environments, Lighting to enhance visual capabilities, Signage and way finding. Accessible Environments through Technology

### Examination Scheme

Components	A	CT	P	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

- Primary Low Vision Care, Nowakovaski.R, Appleton and Lange

## PROJECT

**Course Code: OPP4232**

**Credit Units: 04**

Data Collection, Literature search, Presentation of the progress of the project to the guide

### Examination Scheme

Components	Overall Progress	Literature Review	Presentation	Total
Weightage (%)	40	40	20	100

## Syllabus - Third Semester

### ADVANCED CONTACT LENS-II

**Course Code: OPP4303**

**Credit Units: 4**

**Course Objective:** This course gives both in-depth theoretical knowledge and clinical exposure in Contact lens at advanced level and in therapeutic conditions. It prepares student to develop competency in handling all types of specialty lenses. This course also deals with all complications related to contact lenses and its management.

**COURSE COMPETENCIES:**

Ability to understand corneal physiology and oxygen needs  
Ability to diagnose and manage complications due to contact lenses  
Ability to fit specialized contact lenses  
Keratoconus  
Rose 'lenses  
Mini scleral lenses  
Handling complications

**Course Contents:**

**Module-I: & II: Ability to fit specialized contact lenses**

Keratoconus  
Rose 'lenses  
Mini scleral lenses  
Hybrid lenses  
Orthokeratology  
Scleral lenses: Dry eyes, SJS, Post PK, Post C3R, Post LASIK ectasia  
Ability to fit custom made ocular prosthesis  
Ability to fit paediatric contact lenses

**Module-III: Contact lens complications**

For all types of lenses

**Module-IV: Business Aspects of Contact Lens Practice**

Contact lenses (CLs) in practice, Financial factors in a CL practice, Managing & marketing techniques for a CL practice, Employee management, Record Keeping, Professionalism & standards of care  
Communication skill  
Recent advances

**Examination Scheme**

Components	A	CT	P	HA	EE
Weightage (%)	5	10	10	5	70

A: Attendance, CT: Class Test, HA: Home Assignment, P: Presentation, EE: End Semester Exam

**Recommended Text & Reference books:**

- The CLAO Guide to Basic Science and Clinical Practice: Volumes 1, 2, 3, Contact Lens Association of Ophthalmologists

## CLINICS-III (SPECIALITY)

**Course Code: OPP4305**

**Credit Units: 4**

The objective of clinics in this semester is to be able to examine the eye and understand the eye procedures with clinical management with special reference to complete optometric care.

A minimum of guided 240 hours need to be completed in this semester. The students will be by rotation go to community clinic, Campus clinics, associated hospital partners and optical / optometric clinics.

The logbook has to be maintained and 30 case sheets of complete case management and follow up are mandatory for submission.

The log book needs to be signed by the supervisor every time a case is recorded in it. No case will be considered without the supervisor's signature.

### Examination Scheme

Components	A	Assignment (log book)	Case sheets	EE-Viva	EE- Practical
Weightage (%)	5	15	10	20	50

A: Attendance, EE: End Semester Exam

# ENVIRONMENTAL OPTOMETRY

**Course Code: OPP4306**

**Credit Units: 3**

**Course Objective:** Occupational optometry is the portion of optometric practice that is concerned with the efficient and safe visual functioning of an individual within the work environment. It encompasses more than just the prevention of occupational eye injuries, although that certainly is a major component. It also includes vision assessments of workers/patients, considering their specific vision requirements and the demands these requirements place upon them. Optometrists provide occupational vision services at three general areas or levels: primary care, eye safety consultation, vision consultation.

After the completion of the course the student should be able to

Complete an occupational history on each adult patient

Diagnose and manage occupationally induced conditions (making referrals when necessary)

Assess his or her patients' occupational vision demands and provide appropriate treatments as necessary

Educate patients on the need to incorporate eye safety principles into their daily activities.

Performing an eye-safety workplace assessment

Overseeing the procurement of eye protection devices (both prescription and nonprescription)

## **Course Contents:**

**Module-I:** Introduction

## **Module-II: Work place survey**

Oculi visual hazard analysis

Ergonomic Factor

Work place lighting assessment

## **Module-III: Matching the worker to the task**

Visual standards

Clinical evaluation

Personal protective strategies

## **Module-IV:** Pitfall of industrial consulting

## **Module-V:** Visual Health in selected industries

## **Module-VI:** References and standards

## **Examination Scheme**

Components	A	Case Studies	Field Visit	Assignment	Class Test
Weightage (%)	5	30	20	15	30

## **Test Books:**

- Eye Essentials: Environmental & Occupational Optometry, G Carson, S Doshi, W Harvey, ButterworthHeinemann
- BHVI module for environmental optometry
- R V North: Work and the eye, Second edition, Butterworth Heinemann, 2001
- G W Good: Occupational Vision Manual available in the following website: [www.aoa.org](http://www.aoa.org)
- N.A. Smith: Lighting for Occupational Optometry, HHSC Handbook Series, Sachem Services, 1999
- J Anshul: Visual Ergonomics Handbook, CRC Press, 2005

## TEACHING METHODOLOGY

**Course Code: OPP4307**

**Credit Units: 3**

### **Course Contents:**

#### **Module-I:**

Introduction, understanding how adults learn, how to enhance student learning

#### **Module-II:**

Teaching strategies to enhance Learning, how to structure your course, leaning activities

#### **Module-III:**

Effective learning and Teaching activities in eye Care,

Methods of teaching, presentation, demonstration, case studies, Role plays, group discussion

#### **Module-IV:**

Student Assessment and evaluation techniques, formative and summative assessment, marking and providing feedback

### **Examination Scheme**

<b>Components</b>	<b>Attd.</b>	<b>Assignment- 1</b>	<b>Assignment- 2</b>	<b>Assignment- 3</b>	<b>CP</b>	<b>Total</b>
<b>Weightage (%)</b>	5	20	20	20	35	100

### **Text book/ Reference Book**

As recommended by the faculty

## OCULAR DISEASES AND DIAGNOSTICS-II

**Course Code: OPP4308**

**Credit Units: 4**

**Course Objective:** In this course, latest articles published in optometry and vision science journals will be discussed. Periodic Journal club presentation would be conducted. This will enable the student to develop skill on critical appraisal of publications and help to keep abreast of latest developments in the field of optometry and vision science. The course would also provide insight on understanding and/or incorporation of scientific evidence in clinical practice.

This course examines selected areas of recent research in optometry. Current advances in methodology, specifics of research design, and impact of research findings will be emphasized. Selected topics are based on participating faculty expertise will be assigned to the students.

Students will be assigned topics of presentation during the semester and they will have to present base literature review and latest advancements.

**Text & Reference books /journals:**

Clinical and experimental optometry, Edited By: H. Barry Collin  
Optometry & vision science, journal of American academy of optometry  
Optometry journal of American optometric association  
Ophthalmic and Physiological Optics Journal of the College of Optometrists, UK  
Contact lens & anterior eye: the journal of the British Contact Lens Association  
British Contact Lens Association

## CLINICAL DECISION MAKING IN OPTOMETRIC CARE-I

**Course Objective:** Upon completing this course, the student will achieve a moderately-high level of competence with respect to a modest list of patient presentations commonly encountered by primary care optometrists. By the course's end, the student will be able to conduct a comprehensive, primary-care optometric examination, reach a diagnosis, and outline a management plan for most of, many of patients seen during the year. The course will cover the general areas of ocular disease, refraction, functional vision analysis, and patient communication.

**Course Contents:** In this course, the student will begin with refreshing their basic knowledge on common eye disease of the anterior segment. The course would further orient towards clinical decision-making skills, interpretation and improving their clinical skill set, clinical management of optometry. They will learn and develop skills on evidence/intuitive based management for the commonly seen eye diseases and learn appropriate referral & co management guidelines for secondary or tertiary ophthalmic care

The mode of delivery would be through cases scenarios discussion, problem based learning and seminar/workshops and Presentations. Records need to be maintained in the following pathologies.

The following common conditions will be covered in this semester:

This semester will focus on Ability to manage and co-manage diseases and disorders of posterior segment

**Examination Scheme:**

Components	A	Presentation	Presentation-EE	Case Records	EE-Viva	EE-Viva
Weightage (%)	5	20	20	5	30	20

A: Attendance, EE-End Semester Exam

**Text books:**

- Kanski, Clinical Ophthalmology: A Systematic Approach – May 2011 Edition, Jack J. Kanski MD MS FRCS Froth, Brad Bowling FRCSEd(Ophth),Elsweare heath science division
- Optometric Management Of Visual Handicap, Helen Farral,Blackwell Scientific Publications, 1991
- Ocular Differential Diagnosis, Roy
- Clinical Decision Making In Optometry, Ellen Richter Ettinger OD MS FAAO
- Anterior segment disease and Management by Andrian Bruce

## PROJECT

**Course Code: OPP4332**

**Credit Units: 06**

Research Project Data update

### Examination Scheme

<b>Components</b>	<b>Results &amp; Analysis</b>	<b>Data Collection</b>	<b>Conclusion &amp; Discussion</b>	<b>Total</b>
<b>Weightage (%)</b>	40	40	20	100

## **INTERNSHIP**

Eye care clinic: This sequence of courses gives students direct patient care experience and responsibilities in affiliated health centers, hospitals or in private practices. Clinical preceptors will evaluate and guide the student through the process of providing eye care. Students are graded on key clinical tools: technical skills, knowledge base, analytical skills, diagnostic skills, management and treatment, communication skills, efficiency, attitude, and professionalism. The clinical grade is honors, pass, remedial, or fail based on a midterm and final preceptor evaluation; on meeting documentation requirements, such as maintaining documentation; and on submitting patient logs, and site evaluations.

The AUG department of Optometry monitors the quality and quantity of patient encounters for each student. Through the clinical assignments, students will gain proficiency in full scope primary care optometry and contact lenses. All students must satisfy a minimum number of patient encounters during their assignments. Some students may be assigned to specific sites to assure a clinical experience based on their projects. Some students may meet the contact lens requirement through affiliations set up on behalf of the students during the summer vacations with private practitioners who meet the College's program standards.

Four rotations during the final semester complete the clinical requirements, with mandatory assignments in Primary Care, Advanced Care and Specialty Care. Students choose an additional assignment in one of the mandatory categories or from a list of elective sites based on their projects. The College currently has affiliated clinical sites located around the campus and in other states.

Clinical sites that provide comprehensive eye care services for patients of all age brackets are categorized as Primary Care sites. Typically, these sites are eye care hospitals or private optometric practices. Clinical sites that provide professional specialty care are categorized as Specialty Care clinics. These include clinics specializing in visual therapy/binocular vision, contact lenses, pediatrics, geriatrics, patients with disabilities, or low vision. The rotation provides training in these specialty areas.

# Syllabus - Fourth Semester

## CLINICAL OPTOMETRY (GENERAL)

**Course Code: OPP4401**

**Credit Units: 06**

**Objective:** It is expected that upon completion the student will be able to carry out the standard clinical procedures safely and efficiently

### **PATIENT HISTORY**

1.1 Communicates with the patient

1.1.1 Modes and methods of communication are employed which consider the physical, emotional, intellectual and cultural background of the patient.

1.1.2 A structured, efficient, rational and comfortable exchange of information between the optometrist and the patient takes place.

1.2 Makes general observations of patient

1.3 Obtains the case history

1.4 Obtains and interprets patient information from other professionals

### **2. PATIENT EXAMINATION**

2.1 Formulates

2.1.1 An examination plan based on the patient history is designed to obtain the information necessary for diagnosis and management.

2.1.2 Tests and procedures appropriate to the patient's condition and abilities are selected.

2.2 Implements examination plan

2.2.1 Tests and procedures which will efficiently provide the information required for diagnosis are performed.

2.2.2 The examination plan and procedures are progressively modified based on findings.

2.3 Assesses the ocular adnexa and the eye

2.3.1 The structure and health of the ocular adnexa and their ability to function are assessed.

2.3.2 The structure and health of the anterior segment and its ability to function are assessed.

2.3.3 The structure and health of the ocular media and their ability to function are assessed.

2.3.4 The structure and health of the posterior segment and its ability to function are assessed.

2.3.5 The nature of the disease state is determined.

2.3.6 Microbiological tests are selected and ordered

2.4 Assesses central and peripheral sensory visual function and the integrity of the visual pathways

2.4.1 Vision and visual acuity are measured.

2.4.2 Visual fields are measured.

2.4.3 Colour vision is assessed.

2.4.4 Pupil function is assessed.

2.5 Assesses refractive status

2.6 Assesses oculomotor and binocular function.

2.6.1 Eye alignment and the state of fixation are assessed.

2.6.2 The quality and range of the patient's eye movements are determined.

2.6.3 The status of sensory fusion is determined.

2.6.4 The adaptability of the vergence system is determined.

2.6.5 Placement and adaptability of accommodation are assessed.

2.7 Assesses visual information processing

### Examination Scheme

Components	Attd.	Case Records	Assignments	Clinical Supervisors Evaluation	Case Discussion	Practical + Viva
Weightage (%)	5	10	10	15	10	50

## **ADVANCE CLINICAL RETINA**

**Course Code: OPP4407**

**Credit Units: 10**

**Course Contents:**

Retinal evaluation, diagnostics & optometric management  
Low vision Evaluation, deciding diagnosis & management plan  
Visual Rehabilitation for visually impaired person

**Examination Scheme**

<b>Components</b>	<b>Attd.</b>	<b>Case Records</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	10	15	70

## **ADVANCE CLINICAL GLAUCOMA**

**Course Code: OPP4408**

**Credit Units: 10**

### **Course Contents:**

Glaucoma investigation diagnostics and optometric management

Low vision Evaluation, deciding diagnosis & management plan

Visual Rehabilitation for visually impaired person

### **Examination Scheme**

<b>Components</b>	<b>Attd.</b>	<b>Case Records</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	10	15	70

## **ADVANCE CLINICAL PEDIATRIC, BINOCULAR VISION & VISION THERAPY**

**Course Code: OPP4409**

**Credit Units: 10**

To assess and manage patients with anomalies of binocular vision  
To Assess binocular status using objective and subjective tests.  
To Understanding of the management of a patient with an anomaly of binocular vision.  
To Investigate and manage adult patients presenting with heterophoria  
To Manage an adult patient with heterotropia  
To Manage children at risk of developing an anomaly of binocular vision.  
To Manage children presenting with an anomaly of binocular vision.  
To Manage a patient presenting with an incomitant deviation.

### **Examination Scheme**

<b>Components</b>	<b>Attd.</b>	<b>Case Records</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	10	15	70

## **ADVANCE APPLIED OPTICS**

**Course Code: OPP4410**

**Credit Units: 10**

### **Course Contents:**

MODULE I- Spectacle prescription & interpretation, transposition, Add and near power relation, Prescription for various requirements. e.g intermediate uses /computer use

MODULE II- Facial measurements – IPD, Frame size, bridge size, facial wrap, Pantoscopic tilt

MODULE III-Deciding most suitable type of single vision and bifocal Lens

MODULE IV- Lens selection of Progressive addition lenses as per patient needs

MODULE V- Frame selection and recommendation as per patient needs and facial type, communication & counselling of patient regarding frame selection

MODULE VI- Dispensing, ordering & verification of spectacle

MODULE VII- latest Technology in ophthalmic lenses and frames

### **Examination Scheme**

<b>Components</b>	<b>Attd.</b>	<b>Case Records</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	30	30	35

## ADVANCE CORNEA & CONTACT LENS

**Course Code: OPP4411**

**Credit Units: 10**

### **Course Contents:**

Insert and remove contact lenses and instruct patients in these procedures.

Fit soft contact lenses.

Manage the aftercare of patients wearing soft contact lenses

Advise on contact lens materials and care regimes

Manage the aftercare of patients wearing rigid gas permeable contact lens.

Fit rigid gas permeable contact lenses.

Fit contact lenses to patients with astigmatism.

Techniques used in fitting contact lenses and to advise patients requiring complex visual correction.

Fit multifocal, contact Lenses

- Fit special contact lenses e.g Rose K , Orthokeratology, Scleral

Dispensing, ordering & verification of spectacle

Contact lens complications

### **Examination Scheme**

<b>Components</b>	<b>Attd.</b>	<b>Case Records</b>	<b>Clinical Supervisors Evaluation</b>	<b>EE Practical + Viva</b>
<b>Weightage (%)</b>	5	10	15	70

# CLINICAL DISSERTATION

**Course Code: OPP4437**

**Credit Units: 11**

## **Course Contents:**

**MODULE-I:** Thesis Proposal Development is an independent tutorial conducted by the student's advisor, and involves a comprehensive literature survey of the chosen research area. Through regular meetings, the student and advisor discuss this literature in detail, and the student writes a paper, reviewed by the advisor, summarizing the literature. This paper should help in the development of the thesis proposal and thesis.

**MODULE-II:** Thesis Proposal At the end of the Semester 2. each student must submit to the university with the signed approval of the advisor, a thesis proposal defining the thesis project, the methods and design of the experiments needed for completion, the progress to date, and plans for completion.

## **MODULE-III: Thesis Preparation**

This is involving preparation of the thesis. The thesis must include a cover and title page, abstract, table of contents, Introduction of the thesis topic with a comprehensive review of the literature, appropriately organized methods, results, and discussion sections for the experiments performed, and a final conclusions section summarizing the outcome of the project. The student should submit a draft of the thesis to the advisor by the end of the third semester. Plans should be in place for the thesis examination to be held in the final exam.

## **MODULE-IV: Thesis submission**

### **Project Work and Practical Training**

A Full-time student admitted to M.Optom course will have to be involved in teaching under-graduate students for lectures, demonstrations and hands-on practical sessions.

All students will have to choose ONE specialty subject at start of first year M.Optom and inform the University through School of Optometry in writing within 3 months of being admitted for the first Semester M.Optom

As a part of clinical training during the first year M. Optom every student will document

Minimum number of cases specified in clinically examined by them. These clinical cases will have to be submitted before end of 4th semester

Every student will have to do a dissertation thesis during the second year M. Optom for this. Every student should submit a protocol which will have to be approved and accepted by post graduate teaching faculty at School of Optometry within second semester of starting first year.

Two copies of the dissertation thesis will have to be submitted before 15th May in second year.

Some post graduate students may have to work with ophthalmic and optical industry in their projects of practitioner education, research and other related activities which will be given as assignments by the School of Optometry, Amity medical school.

## **Examination & Rules of passing for first and Second Year M. Optom**

Format for term end examination Theory papers

Each theory examination will be of 100 marks and 3 Hours duration, 70% marks will be taken as external marks.

Each theory examination paper will have total three Sections

**Examination Pattern:**

Each semester examination will consist of both internal assessment and term end examination in the subjects prescribed in syllabus for each semester. The Faculty will conduct the internal assessments as per schedule prepared by school of optometry.

**Amity University, Gurgaon will conduct university every term end examination  
Eligibility for a student to appear in term for semester-term end Examination**

Minimum 50% marks in internal assessment i.e. minimum 15marks in theory internal and minimum 25 marks in practical/Viva/Oral

Minimum 75% attendance for all course, if of these eligibility conditions have not been satisfied, the student will not be allowed to appear for semester term end examinations

Duration of examination at end for each semester term for each written/practical/clinical examination will be such as may be notified from time to time on recommendation of the Amity University, Gurgaon authorities.

**Results and passing for each semester Examination:**

A student will be declared to have passed theory subjects provided he/she has secured not less than 50% marks out of 100 (15 marks out of 30 in internal assessment and 35 marks out of 70 in term end examination) in each theory subject for every semester.

A student will be declared to have passed in a subject provided he/she has secured not less than 50 marks out of 100 [25 marks out of 50 in internal Assessment and 25 marks out of 50 in terms end examination] in each practical subject for every semester.

A student will be declared to have “PASSED” the complete semester Examination provided he/she has secured 50% marks individually in all theory and practical subjects of that semester.

If a student fails or does not appear for semester examination for semester I& III he/she will still be allowed to attend the theory classes and practical sessions for the semester II & IV Respectively, which falls in same academic year.

A student who has not appeared or has failed in the semester examination for semester I& III will have to appear for the internal and external exams for only that subject along with semester exam for the current semester i.e. II and IV respectively.

Only when the student is declared pass all subject of semester I and semester II examinations will be admitted to the second year of the course.

A student who has not appeared or has failed in the semester examination for semester I & II will not be admitted to the second year of the course. He/ She will have to get readmitted in the first year and pay the fees as prescribed by the university.

Allowed to keep term: If the student secures minimum 50% marks in at least three subjects of first year M. Optom, he/she will be allowed to keep term for second year. However, he/she will have to pass in all the subjects of first year M. Optom to become eligible to apply/appear for second year final M. Optom University Examinations.

Repeat term: If the student fails in four or all five subjects of first year, he/she will be asked to pay the tuition fees proportionate to the number of subjects failed and the university examination fees and then appear for the midterm external examinations in those subjects in which he/she failed earlier. But they are not required to appear for internal examinations and neither repeat project.

Second Year M. Optom Passing: The internal examination and external examination marks will be added as the final marks of that subject for each year. Only when the student secures minimum 50% marks [Internal External=combined] in all subjects of both the years and has completed the M. Optom. Course and will be eligible for post graduate degree of Master of Clinical optometry [M. Optom]

Repeat Dissertation: If the M. Optom student has failed in subject of the second year M. Optom the student will be required to either repeat the same dissertation project OR Choose different dissertation project and appear for the year end examination only.  
He/she cannot take midterm examination for this subject in month of February every year.

If any student fails three times successively in the same subject at the university examinations for either first or second year M. Optom, Hershel will not be allowed to continue the M. Optom course and his admission stands cancelled.

#### **Award of the Degree:**

A student who has secured 5.5 CGPAM. Optom Examination will be Eligible for conferment of Master of clinical Optometry [M. Optom] Post Graduate Degree by Amity university, Gurgaon

#### **Award of Gold Medal:**

Gold Medal will be awarded to the student who secures maximum marks in first and second, Third& Fourth semester M. Optom added together, the candidate should have cleared each subject in every term in the first attempt.

#### **Guidelines for Master research project work:**

Basic reading material: Introductory reading material on research methodology, how to do a literature search and statistical methods should be provided at the beginning of the semester.

The students should read the material thoroughly and can mail their queries to their guides. a. Assignment 1: Exercises should be also given based on the reading material

The student should learn to do a thorough Pub Med search in their area of research interest. Read the recent research articles initially. Find out the research gaps. Based on that set up your research aim. Your research aim should not be a repetition of an already done research. Substantiate the necessity (Gap in current research) for the proposed study. (Assignment II: mailed to guide)

Discuss with your peers and clinicians regarding the Originality & objective of the study, feasibility of the study and other ethical issues involved: Very important

Institutional Review Board and Ethics committee approval

Consent form certified

As they begin the research, it would be wise to also meet the statistician

Sample size estimation

Microsoft excel or access proforma design

Prepare a rough draft of the protocol (Assignment III)

Emphasize on the methodology

The final protocol should be ready by end of FIRST semester

Update your research activities at least once in a month to your guide (Data collection proforma as excel sheet).

Data entry should be done in Excel appropriately. Consult with your local statistician for any queries and discuss with your guide. (Assignment IV)

End of your data collections takes to Analysis: Kindly discuss with your guide and a statistician (Assignment V: on the basics of statistics pertaining to your research interest) \*

In the thesis introduction, literature and methodology should be ready before the end of fourth semester.

Submission of the final thesis to the guide should be done before one month of the deadline given. So that your guide will have enough time to review and make corrections.

## DEMOGRAPHY

**Course Code: PUH 4101**

**Credit Units: 03**

### **Course Objective:**

To present students some basic techniques and concepts in population sciences.

### **Course Contents**

#### **Module I: Population Fundamentals**

Science of demography, Demographic cycle, Population trends and demographic indicators, Demography and Family Planning and its role in population policy of India.

#### **Module II: Demographic Studies**

- Fundamentals of population studies and its links with health.
- Methods of demographic data collection, sources of data, population census, population composition, world population growth, growth of Indian population, morbidity, mortality, ageing, migration/ urbanization

#### **Module III: Family Planning**

Fertility and fertility factors, Family planning, Population policies & programmes and National Population Policy, Family Planning 2020 India Commitment

## **BASIC EPIDEMIOLOGY**

**Course Code: PUH 4102**

**Credit Units: 03**

**Course Objective**

To provide an introduction to the basic concepts and methods of epidemiology and to highlight inter-relationship between epidemiology and medicine to understand evidence based medicine.

**Course Contents**

**Module I: Introduction**

Concepts and uses of epidemiology, Components of epidemiological studies – frequency distribution and determinants of diseases, Methods to measure and describe health of population, epidemiological triad.

**Module II: Descriptive epidemiology**

Natural history of disease, Disease spectrum, Modes of transmission, Levels of prevention. Epidemiological principles of Intervention in prevention and control of disease,

**Module III: Measurement Methods**

Measurement of morbidity and mortality, incidence, prevalence, age adjustment, standardization and Risk Measurement.

**Module IV: Study designs Basics**

- Epidemiological study designs and analysis, its application and use in the community.
- Case control and Cohort methods.

**SOCIAL & BEHAVIORAL ASPECTS OF HEALTH**

**Course Code: PUH 4103**

**Credit Units: 02**

**Course Objective**

To highlight the diseases and conditions that are of concern to a future public health professional. It highlights the social and behavioral issues in public health.

**Course Contents**

**Module I: Introduction**

Psychology and Public Health, Sociology & Public Health, Culture and Health, rural/urban migration, Urban Health

**Module II: Family & Health**

Inter-relationships between culture, society and environment, Ecology of health and disease, Demographic features of health and disease, interrelationship between human ecology, occupation, social changes and specific disease patterns.

**Module III:**

Cultural constraints to provision and utilization of healthcare, Socio-economics of health care, Socio-economic cost of disease

**HEALTHCARE DELIVERY SYSTEM & POLICIES**

**Course Code: PUH 4104**

**Credit Units: 03**

**Course Objective:**

To provide the students a basic insight into the main features of Indian health care delivery system and how it compares with the other systems of the world.

**Course Contents:**

**Module I: Health and Development**

Concept of Health, illness, sickness and disease; Public health Indicators, Health and its determinants, Disease Burden in terms of DALY, Social context of Health – Culture, health belief model and social issues affecting health like urbanization etc; Gender and health, Nutrition and Health- National Nutrition Mission and Mid-Day Meal Program

**Module II: Healthcare Systems & Delivery**

Millennium development goals, Sustainable Development goals, Evolution of Health Planning in India, Concept and Elements of Primary Health Care, Rural Healthcare system in India , Indian Public Health Standards, Five Year Plans

**Module III: Health Policies and Schemes**

National Health Policy, Integrated Child Development Scheme, Reproductive Maternal Newborn Child and adolescent Health Scheme, , Universal Immunization Program, PradhanMantriSurakshitMatritvaAbhiyan, Ayushman Bharat, RashtriyaBalSwasthyaKaryakram, Rashtriya Kishore SwasthyaKaryakram, Mission Indradhanush, RashtriyaArogyaNidhi, PradhanMantriSwasthyaSurakshaYojna and National Oral Health Program.

**Module IV: National Health Mission**

National Urban Health Mission (NUHM), National Rural Health Mission, National AYUSH Mission, National Nutrition Mission,

**Examination Scheme:**

**HEALTH ECONOMICS**

**Course Code: PUH 4103**

**Credit Units: 02**

**Course Objective:** To study principles of economics and its application in Public Health

**Course Contents:**

**Module I: Nature and scope of Economics**

Fundamental Concepts – Scarcity & Choice, Macroeconomics & Microeconomics, Economic Agents – Consumer, Producer & government, Market – Free market mechanism and chained Market Mechanism.

**Module II: Demand and Supply Market**

Law of Demand, Shift in Demand Curve, Law of Supply, Shift in Supply curve, Market Equilibrium, Concept of elasticity – Price elasticity of Demand & Supply.

**Module III: Healthcare Market**

- Market Failure: Imperfect competition, Risk & uncertainty, Moral Hazard, Adverse selection, Externalities, Public Good, Asymmetric Information and concern of Equity. Market of unqualified medical care providers.
- Demand for Healthcare: Need, Want & demand, Healthcare as an investment, Determinants of demand – Price factors (opportunity cost), Patient factors & Physician factors – Supplier Induced Demand; Insurance and demand for healthcare.

**Module IV: Costs**

Classification of costs on the basis of traceability, cost behavior, controllability and selection among alternatives; Total, Average and Marginal costs.

**Module V: Health Expenditure**

Public Expenditure on Health, Expenditure and Allocations under Five-Year Plans, its SWOT analysis, National Health Accounts.

**Examination Scheme:**

Components	CP	V	A	ME	EE
Weightage (%)	10	5	5	10	70

**Text & References:**

**Course Code: PUH 4106**

**Credit Units: 03**

**Course Objective:** The aim of this course is to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the environment.

**Course Contents:**

**Module I: Introduction**

Classification of data, Source of data, data organization Method of scaling - nominal, ordinal, ratio and interval scale, building composite scales, measuring reliability and validity of scales.

**Module II: Properties of measurement & Probability distributions**

- Measurement of central tendency, measurement of dispersion – Range, Mean deviation & Standard deviation.
- Concepts of probability, Probability distributions – Binomial, Poisson & Normal Probability Distribution.

**Module III: Sampling**

Sampling methods, Sampling Errors; Sampling distribution.

**Module IV: Testing Hypothesis**

Hypothesis Testing to compare two populations – Student's T-test, Interpretation of computer output of ANOVA, Chi – Square Test, F-test.

**Module V: Forecasting Techniques**

Correlation-Karl Person, Spearman's Rank methods, Regression Analysis, least squares method, coefficient of determination, Time Series Analysis

**Examination Scheme:**

## BASICS OF COMMUNICATION

**Course Code: CSS 4151**

**Credit Units: 1**

### **Course Objective:**

One cannot 'not communicate'. This course is designed to facilitate our young Amitians to communicate effectively by emphasizing on practical communication through refurbishing their existing language skills and also to bring one and all to a common take-of level.

### **Course Contents:**

#### **Module I: Fundamentals of communication**

Relevance of communication

Effective communication

Models of communication

Effective use of language

#### **Module II: Tools of communication**

Proficiency in English – The international

Language of business

Building vocabulary

(Denotative & connotative)

Extensive vocabulary drills

(Synonyms / Antonyms / Homonyms)

One Word substitution

Idioms & phrases

Mechanics and Semantics of sentences

Writing sentences that really communicate

(Brevity, Clarity, and Simplicity)

Improving the tone and style of sentences

#### **Module III: Barriers to Effective use of language**

Avoiding clichés

Removing redundancies

Getting rid of ambiguity

Euphemism

Jargons

Code switching

**Note:** 2 tests of 20 marks of one hour duration each will be conducted over and above the teaching hours. They will have to be programmed accordingly.

### **Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>CAF</b>	<b>V</b>	<b>GD</b>	<b>GP</b>	<b>A</b>
<b>Weightage (%)</b>	20	20	25	10	10	10	5

## **SELF-DEVELOPMENT & INTERPERSONAL SKILLS**

**Course Code: BEH 4151**

**Credit Units: 1**

**Course Objective:** This course aims at imparting an understanding of:

- Self and the process of self exploration
- Learning strategies for development of a healthy self esteem
- Importance of attitudes and their effect on work behaviour
- Effective management of emotions and building interpersonal competence.

### **Course Contents:**

#### **Module I: Understanding Self**

- Formation of self concept
- Dimension of Self
- Components of self
- Self Competency

#### **Module II: Self-Esteem: Sense of Worth**

Meaning and Nature of Self Esteem

Characteristics of High and Low Self Esteem

Importance & need of Self Esteem

Self esteem at work

Steps to enhance Self Esteem

#### **Module III: Emotional Intelligence: Brain Power**

Introduction to EI

Difference between IQ, EQ and SQ

Relevance of EI at workplace

Self assessment, analysis and action plan

#### **Module IV: Managing Emotions and Building Interpersonal Competence**

Need and importance of Emotions

Healthy and Unhealthy expression of emotions

Anger: Conceptualization and Cycle

Developing emotional and interpersonal competence

Self assessment, analysis and action plan

#### **Module V: Leading Through Positive Attitude**

Understanding Attitudes

Formation of Attitudes

Types of Attitudes

Effects of Attitude on

Behaviour

Perception

Motivation  
 Stress  
 Adjustment  
 Time Management  
 Effective Performance  
 Building Positive Attitude

### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal  
 Assessment of Behavioural change as a result of training  
 Exit Level Rating by Self and Observer

#### **Examination Scheme:**

<b>Components</b>	<b>SAP</b>	<b>A</b>	<b>Mid Term Test (CT)</b>	<b>VIVA</b>	<b>Journal for Success (JOS)</b>
<b>Weightage (%)</b>	20	05	20	30	25

## FRENCH - I

**Course Code: LAN 4151**

**Credit Units: 03**

### **Course Objective:**

To familiarize the students with the French language

- with the phonetic system
- with the accents
- with the manners
- with the cultural aspects

To enable the students

- to establish first contacts
- to identify things and talk about things

**Course Contents: Unité 1, 2: pp. 01 to 37**

### **Contenu lexical:**

#### **Unité 1: Premiers contacts**

1. Nommer des objets, s'adresser poliment à quelqu'un
2. se présenter, présenter quelqu'un
3. entrer en contact : dire tu ou vous, épeler
4. dire où on travaille, ce qu'on fait
5. communiquer ses coordonnées

#### **Unité 2: Objets**

1. identifier des objets, expliquer leur usage
2. Dire ce qu'on possède, faire un achat, discuter le prix.
3. Monter et situer des objets
4. Décrire des objets
5. comparer des objets, expliquer ses préférences

### **Contenu grammatical:**

1. articles indéfinis, masculin et féminin des noms, pluriel des noms
2. Je, il, elle sujets, verbes parler, habiter, s'appeler, être, avoir, masculin et féminin des adjectifs de nationalité
3. tu, vous sujets, verbes parler, aller, être, c'est moi/c'est toi
4. verbes faire, connaître, vendre, c'est/il est + profession, qui est-ce ? qu'est-ce que ... ?
5. article défini, complément du nom avec de, quel interrogatif
6. adjectifs possessifs (1), pour + infinitif
7. verbe avoir, ne...pas/pas de, question avec est-ce que ?, question négative, réponse Si
8. Prépositions de lieu, il y a/qu'est-ce qu'il y a
9. accord et place des adjectifs qualificatifs, il manque...
10. comparatifs et superlatifs, pronoms toniques, pronom on

### **Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>C</b>	<b>I</b>	<b>V</b>	<b>A</b>
<b>Weightage (%)</b>	20	20	20	20	15	5

C – Project + Presentation

I – Interaction/Conversation Practice

## GERMAN – I

**Course Code: LAN 4152**

**Credit Units: 03**

### **Course Objective:**

To enable the students to converse, read and write in the language with the help of the basic rules of grammar, which will later help them to strengthen their language.

To give the students an insight into the culture, geography, political situation and economic opportunities available in Germany

### **Course Contents:**

#### **Module I: Introduction**

Self introduction: heissen, kommen, wohnen, lernen, arbeiten, trinken, etc.

All personal pronouns in relation to the verbs taught so far.

Greetings: Guten Morgen!, Guten Tag!, Guten Abend!, Gute Nacht!, Danke sehr!, Danke!, Vielen Dank!, (es tut mir Leid!),

Hallo, wie geht's?: Danke gut!, sehr gut!, prima!, ausgezeichnet!,  
Es geht!, nicht so gut!, so la la!, miserabel!

#### **Module II: Interviewspiel**

To assimilate the vocabulary learnt so far and to apply the words and phrases in short dialogues in an interview – game for self introduction.

#### **Module III: Phonetics**

Sound system of the language with special stress on Diphthongs

#### **Module IV: Countries, nationalities and their languages**

To make the students acquainted with the most widely used country names, their nationalities and the language spoken in that country.

#### **Module V: Articles**

The definite and indefinite articles in masculine, feminine and neuter gender. All Vegetables, Fruits, Animals, Furniture, Eatables, modes of Transport

#### **Module VI: Professions**

To acquaint the students with professions in both the genders with the help of the verb “sein”.

#### **Module VII: Pronouns**

Simple possessive pronouns, the use of my, your, etc.

The family members, family Tree with the help of the verb “to have”

#### **Module VIII: Colours**

All the color and color related vocabulary – colored, colorful, colorless, pale, light, dark, etc.

#### **Module IX: Numbers and calculations – verb “kosten”**

The counting, plural structures and simple calculation like addition, subtraction, multiplication and division to test the knowledge of numbers.

“Wie viel kostet das?”

**Module X: Revision list of Question pronouns**

W – Questions like who, what, where, when, which, how, how many, how much, etc.

**Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>C</b>	<b>I</b>	<b>V</b>	<b>A</b>
<b>Weightage (%)</b>	20	20	20	20	15	5

## SPANISH – I

**Course Code: LAN 4153**

**Credit Units: 03**

### **Course Objective:**

To enable students acquire the relevance of the Spanish language in today's global context, how to greet each other. How to present / introduce each other using basic verbs and vocabulary.

### **Course Contents:**

#### **Module I**

A brief history of Spain, Latin America, the language, the culture...and the relevance of Spanish language in today's global context.  
Introduction to alphabets.

#### **Module II**

Introduction to '*Saludos*' (How to greet each other. How to present/ introduce each other).  
Goodbyes (*despedidas*)  
The verb *llamarse* and practice of it.

#### **Module III**

Concept of Gender and Number  
Months of the years, days of the week, seasons. Introduction to numbers 1-100, Colors, Revision of numbers and introduction to ordinal numbers.

#### **Module IV**

Introduction to *SER* and *ESTAR* (both of which mean To Be). Revision of '*Saludos*' and '*Llamar*'. Some adjectives, nationalities, professions, physical/geographical location, the fact that spanish adjectives have to agree with gender and number of their nouns. Exercises highlighting usage of *Ser* and *Estar*.

#### **Module V**

Time, demonstrative pronoun (*Este/esta, Aquel/aquella* etc)

#### **Module VI**

Introduction to some key AR /ER/IR ending regular verbs.

### **Examination Scheme:**

Components	CT1	CT2	C	I	V	A
Weightage (%)	20	20	20	20	15	5

C – Project + Presentation

I – Interaction/Conversation Practice

### **Text & References:**

## CHINESE – I

**Course Code: LAN 4155**

**Credit Units: 03**

### **Course Objective:**

There are many dialects spoken in China, but the language which will help you through wherever you go is Mandarin, or Putonghua, as it is called in Chinese. The most widely spoken forms of Chinese are Mandarin, Cantonese, Gan, Hakka, Min, Wu and Xiang. The course aims at familiarizing the student with the basic aspects of speaking ability of Mandarin, the language of Mainland China. The course aims at training students in practical skills and nurturing them to interact with a Chinese person.

### **Course Contents:**

#### **Module I**

Show pictures, dialogue and retell.

Getting to know each other.

Practicing chart with Initials and Finals. (CHART – The Chinese Phonetic Alphabet Called “Hanyu Pinyin” in Mandarin Chinese.)

Practicing of Tones as it is a tonal language.

Changes in 3<sup>rd</sup> tone and Neutral Tone.

#### **Module II**

Greetings

Let me Introduce

The modal particle “ne”.

Use of Please ‘qing’ – sit, have tea ..... etc.

A brief self introduction – Ni hao ma? Zaijian!

Use of “bu” negative.

#### **Module III**

Attributives showing possession

How is your Health? Thank you

Where are you from?

A few Professions like – Engineer, Businessman, Doctor, Teacher, Worker.

Are you busy with your work?

May I know your name?

#### **Module IV**

Use of “How many” – People in your family?

Use of “zhe” and “na”.

Use of interrogative particle “shenme”, “shui”, “ma” and “nar”.

How to make interrogative sentences ending with “ma”.

Structural particle “de”.

Use of “Nin” when and where to use and with whom. Use of guixing.

Use of verb “zuo” and how to make sentences with it.

#### **Module V**

Family structure and Relations.

Use of “you” – “mei you”.  
 Measure words  
 Days and Weekdays.  
 Numbers.  
 Maps, different languages and Countries.

**Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>C</b>	<b>I</b>	<b>V</b>	<b>A</b>
<b>Weightage (%)</b>	20	20	20	20	15	5

## APPLIED EPIDEMIOLOGY

**Course Code: PUH 4201**

**Credit Units: 03**

### Course Objective

To furnish the students with knowledge and skills regarding general principles of clinical trials research including regulatory, ethical principles & guidelines and theoretical idea about the design conduct and analysis of clinical trials

### Course Contents

#### Module I: Epidemiological Methods & Screening for disease.

Sources of epidemiological data, concepts of screening, criteria for screening, sensitivity and specificity, disease surveillance, techniques for randomization, adverse events, investigation of an epidemic and role of a healthcare facility in its control.

#### Module II: Epidemiology and Public Health

Epidemiology and Public Health, different epidemiological perspectives, use of epidemiological tools for health planning and making a community diagnosis,

#### Module III: Epidemiological Tools

Epidemiological tools for monitoring and evaluation of health programmes, epidemiological considerations in development of management information systems, epidemiological basis for formulation of health interventions, interpretation of published epidemiological studies.

### Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	10	5	5	10	70

## HUMAN RESOURCE MANAGEMENT

**Course Code: PUH 4202**

**Credit Units: 02**

**Course Objective:** To help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

### Course Contents

#### Module I: HRM in perspective

Nature & scope of HRM, HRM functions, HRM models, understanding concepts of personnel management, HR development and strategic HR management, HR environment, changing role of HR.

#### Module II: Meeting HR requirements

Job Analysis, Job Description, Job specification, Strategic Human Resource Planning, Recruitment, Selection Process, Methods – Interview, Tests, Induction and Placement, Promotion and Transfer

#### Module III: Development of Human Resources

Training and Development, Managing Careers, Understanding Performance Appraisal

#### Module IV: Managing Compensation

Compensation, Components of compensation, Job evaluation, methods of job evaluation, Designing and administration of wage and salary structure

#### Module V: Separation Processes

Turnover, Retirement, Layoff, Retrenchment and Discharge, VRS

#### Module VI: Emerging Trends and Challenges in HRM

Overview of Human Resource Information System (HRIS), Introduction to HR Audit, IHRM Practices, Cross- Cultural and Diversity Management, Work-life integration, Human Resource Outsourcing

### Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

## COMMUNICABLE & NON-COMMUNICABLE DISEASES

**Course Code: PUH 4203**

**Credit Units: 04**

### **Course Objective**

To provide students with an understanding of the scope of the public health issues with regard to communicable diseases and non-communicable diseases in India and also provide them the overview with the national health programs that have been designed to address these issues.

### **Course Contents**

#### **Module I: Introduction**

Classification of diseases, modes of evolution of disease stages, burden of communicable & and non-communicable diseases, disease cycle/ transmission

#### **Module II: Communicable diseases**

Vaccine preventable diseases, respiratory, intestinal, contact and vector borne diseases

#### **Module III: Non-communicable diseases**

Asthma, Cancer, Cardiovascular diseases, chronic rheumatic diseases, diabetes, substance abuse related illness & control, obesity, mental health, and Accident & Injuries.

#### **Module IV: Disease Control Programmes**

National Malaria Eradication Programme, Revised National Tuberculosis Control Programme, National Leprosy Eradication Programme, Vector Borne Disease Control Programme, Guinea worm Eradication Programme, National Iodine Deficiency Disorder Control Programme, Diarrheal Diseases Control Programme, National Blindness Control Programme, STD Control Programme, National AIDS Control Programme, National Cancer Control Programme, National Diabetes Control Programme, National surveillance Programme for Communicable diseases.

### **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>

## ENVIRONMENTAL HEALTH & SANITATION

**Course Code: PUH 4204**

**Credit Units: 02**

### **Course Objective**

To provide the comprehensive knowledge in issues related to environment affecting health, sanitation and means of sustainable development.

### **Course Contents**

#### **Module I: Air, Noise and Water Pollution**

- Air pollution: Pollutants and their resources, effects on human health, vegetation and climate of air pollution, ventilation, air pollution control legislation.
- Noise pollution: sources and effects, control measures
- Water pollution: sources, classification of water pollutants- organic waste, oxygen demanding waste, disease causing wastes, synthetic organic compounds. Sewage and agricultural run – off, inorganic pollutants suspended solids and sediments, radioactive materials, purification of water and waste water treatment.

#### **Module II: Waste management**

- Biomedical Waste management: classification, methods of treatment and disposal- composting, sanitary land filling, thermal process, recycling and reuse.
- Hazardous waste management: sources, treatment and disposal.

#### **Module III: Sustainable development and Environment**

Climate change- ozone depletion, global warming, green house effect, urban problems related to energy, water conservation, rainwater harvesting, watershed management, resettlement and rehabilitation of people, waste minimization and cleaner production.

### **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

### **Text & References:**

- Moeller, D.W. *Environmental Health*, Harvard University Press, 2004

## **RESEARCH METHODOLOGY**

**Course Code: PUH 4205**

**Credit Units: 03**

### **Course Objectives:**

- To provide basic understanding towards research principles and methods.
- To introduce important analytical tools for research data analysis.
- To assist in the development of research proposals/reports.

### **Course Contents:**

#### **Module I: Basics of Research**

Definitions & uses of research in healthcare, Steps Involved in Research Process, Variables in research, Measurement scales, Formulation of research problems, writing research questions, Development of conceptual framework.

#### **Module II: Sampling & Research Designs**

Sampling, Sampling Procedure, Various types of Sampling Techniques, Sample size determination, reliability & validity in research, Research Designs- Non-experimental & experimental research designs.

#### **Module III: Review of Literature & Hypothesis**

Review of literature, Hypothesis- Meaning and types of hypothesis, Hypothesis testing, Type I & Type II errors in hypothesis testing.

#### **Module III: Data Collection**

Types of Data: Secondary and Primary, Different methods of data collection- Observation method, interview method, Questionnaire and schedule, Data Management: editing, entry and preparing data sets for analysis; Design and development of questionnaire.

#### **Module IV: Research Reports**

Structure and Components of Research Report, Types of Reports, Layout of Research Report, Method of writing a research report.

#### **Module V: Research Ethics & Reference Writing**

History of ethics in health research, Principles and Concepts in research ethics – confidentiality and privacy, informed consent, vulnerable subjects and special treatments, standards of care – principles, review processes etc.; Vancouver style of reference writing.

### **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	10	70

## NATIONAL HEALTH PROGRAMMES

**Course Code: PUH 4206**

**Credit Units: 03**

### Course Objective

To give an idea about the background objectives, action plan, targets, operations, achievements and constraints of various National Health Programmes

### Course Contents

#### Module I: Introduction

Brief outline of health situation in India, Organization network for health and family welfare services at the centre, state, district and block level.

#### Module III: Key Health programmes in India – 1

National Health Mission, including Reproductive Child Health, Family Planning Programme, Universal Immunization Programme, Child Survival and Safe Motherhood Programme, Integrated Child Development Scheme, National AYUSH Mission, National Nutrition Mission.

#### Module III: Key Health programmes in India – 2

Ayushman Bharat, Pradhan Mantri Surakshit Matritva Abhiyan, Family Planning 2020, Reproductive Maternal Newborn Child and Adolescent Health Program, Rashtriya Bal Swasthya Karyakram, Rashtriya Kishore Swasthya Program, Mission Indradhanush, Pradhan Mantri, Rashtriya Arogya Nidhi, National Oral Health Program.

### Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	10	5	5	10	70

## CORPORATE COMMUNICATION

**Course Code: CSS 4251**

**Credit Units: 01**

### **Course Objective:**

This course is designed to hone the PR skills of the budding managers and enable them to be an integral part of the corporate communication network. The Verbal Communication (oral and written) will be the lingua franca of this endeavour.

### **Course Contents:**

#### **Module I: Communication in Practice**

Verbal Communication

1. Communication Networks
2. Developing writing skills

*Inter- office communication*

The business letters

E mail – Netiquette (etiquette on the mail)

*Intra- office communication*

Memos

Notices

Circulars

Agenda and Minutes

Business Report writing

*Resume writing*

#### **Module II: Cross Functional Communication**

Marketing/ integrated marketing communication

Project management communication

Human Resource communication

Financial Communication

#### **Module III: Communication for Public Relations**

Functions and activities of PR

Reputation Management

Building Corporate Image and Identity

Negotiation Techniques

### **Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>CAF</b>	<b>V</b>	<b>GD</b>	<b>GP</b>	<b>A</b>
<b>Weightage (%)</b>	20	20	25	10	10	10	5

## **BEHAVIOURAL COMMUNICATION AND RELATIONSHIP MANAGEMENT**

**Course Code: BEH 4251**

**Credit Units: 01**

### **Course Objective:**

This course aims at imparting an understanding of:

Process of Behavioural communication

Aspects of interpersonal communication and relationship

Management of individual differences as important dimension of IPR

### **Course Contents:**

#### **Module I: Behavioural Communication**

Scope of Behavioural Communication

Process – Personal, Impersonal and Interpersonal Communication

Guidelines for developing Human Communication skills

Relevance of Behavioural Communication in relationship management

#### **Module II: Managing Individual Differences in Relationships**

Principles

Types of issues

Approaches

Understanding and importance of self disclosure

Guidelines for effective communication during conflicts

#### **Module III: Communication Climate: Foundation of Interpersonal Relationships**

Elements of satisfying relationships

Conforming and Disconfirming Communication

Culturally Relevant Communication

Guideline for Creating and Sustaining Healthy Climate

#### **Module IV: Interpersonal Communication**

Imperatives for Interpersonal Communication

Models – Linear, Interaction and Transaction

Patterns – Complementary, Symmetrical and Parallel

Types – Self and Other Oriented

Steps to improve Interpersonal Communication

#### **Module V: Interpersonal Relationship Development**

Relationship circle – Peer/ Colleague, Superior and Subordinate

Initiating and establishing IPR

Escalating, maintaining and terminating IPR

Direct and indirect strategies of terminating relationship

Model of ending relationship

#### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme:**

<b>Components</b>	<b>SAP</b>	<b>A</b>	<b>Mid Term Test (CT)</b>	<b>VIVA</b>	<b>Journal for Success (JOS)</b>
<b>Weightage (%)</b>	20	05	20	30	25

## FRENCH - II

**Course Code: LAN 4251**

**Credit Units: 03**

**Course Objective:** To enable the student

- to talk about his time schedule
- to talk about travel

**Course Contents: Unité 3, 4: pp. 42 to 72:**

### **Contenu lexical:**

#### **Unité 3: Emploi du temps**

1. demander et donner l'heure, des horaires
2. raconter sa journée
3. parler de ses habitudes au travail, de ses loisirs
4. dire la date, parler du temps qu'il fait
5. fixer rendez-vous (au téléphone par e-mail), réserver une table au restaurant

#### **Unité 4: Voyage**

1. réserver une chambre d'hôtel, demander la note
2. expliquer un itinéraire
3. parler de ses déplacements, situer sur une carte
4. exprimer un conseil, une interdiction, une obligation
5. acheter un billet de train, consulter un tableau d'horaires

### **Contenu grammatical:**

1. question avec à quelle heure ? adjectifs démonstratifs
2. verbes pronominaux au présent, les prépositions à et de : aller à venir de
3. adverbes de fréquence, pourquoi... ? Parce que ... ?
4. expression indiquant la date, verbes impersonnels
5. verbe pouvoir + infinitif, le lundi, lundi prochain
6. adjectifs possessifs (2), adjectif tout
7. impératif présent (1), nombres ordinaux
8. questions avec est-ce que ? à et en + moyen de transport, en/au+pays
9. verbes devoir+infinitif, il faut+ infinitif, il est interdit de
10. verbes: aller, venir, partir, questions avec d'où, où, par où, à quel, de quel

### **Examination Scheme:**

Components	CT1	CT2	C	I	V	A
Weightage (%)	20	20	20	20	15	5

C – Project + Presentation

I – Interaction/Conversation Practice

## OPERATIONAL RESEARCH

**Course Code : PUH 4301**

**Credit Units: 02**

### **Course objectives:**

- \_ To provide basic OR approach to problem solving.
- \_ To introduce important analytical tools for managerial decision making.
- \_ To introduce concepts of resource allocation & health service planning.

### **Course Contents:**

#### **Module I: Introduction**

The OR approach to problem-solving and decision-making, Scope and limitations of OR in managerial decision-making.

#### **Module II: Introduction to OR Techniques**

Linear Programming, Decision Tree Analysis, Queuing theory, PERT/CPM.

#### **Module III: OR Models**

Replacement models, Sensitivity analysis, Assignment models, Inventory control models, Forecasting.

#### **Module III: Applications of OR in Hospitals and Health Agencies**

Resource allocation, Health services planning, Deployment of health human power, Materials Management, Equipment replacement, Patient scheduling.

### **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	10	70

### **Text & References:**

## QUALITY IN HEALTH CARE

**Course Code: PUH 4302**

**Credit Units: 01**

**Course Objective:** To understand the concept of quality and its relation to healthcare scenario benefits of quality managements, dimensions of quality in primary healthcare and various quality frameworks

### **Module I: Basics of Quality Management**

Definitions, principles of quality, benefits of quality management, dimensions of quality in primary healthcare and various quality frameworks

### **Module II: Quality Improvement Approaches**

Quality assurance cycle and developing standards.

TQM Quality Gurus: Deming, Juran and Crosby principles.

Benchmarking principles: Principles, types and process of benchmarking.

Medical Audits: Clinical Audit, its methodology and related statistics.

### **Module III: Quality Improvement Tools and Techniques:**

Tools: Brainstorming, Cause effect analysis, Flow chart, Pareto Analysis, etc.

Lean Management: 4P model, Lean principles and its tools, 5 S technique, 3M techniques, Kaizens theory, Jidoka & Andon, Throughput & Takt Time.

Six Sigma: Variation in performance, DMAIC & DFFS methodology, Champions, black belts and green belts, Six sigma applications and its benefits

### **Module IV: Accreditation**

Benefits of hospital Accreditation, ISO certification, Quality Council of India (QCI),

National Accreditation Board for Hospitals & Healthcare providers (NABH) – Accreditation procedure assessment criteria and its standards

### **Module V: Cost and Quality**

Prevention cost, Appraisal Cost, Internal & external failure costs, Net & Total cost of quality.

### **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>

## HEALTH PROMOTION & BEHAVIOR CHANGE COMMUNICATION

**Course Code: PUH 4306**

**Credit Units: 02**

### **Course Objective:**

To introduce different models of communication for use in health promotion activities and community based activities.

### **Course Contents**

#### **Module I: Basics of Communication**

Communication Process, Function and Types, Barriers to communication, Mass Communication, Communication Skills, Community Participation: Concepts and Types

#### **Module II: Health Communication & its functions**

Concepts & approach of Health Education & Promotion, Models & contents of health education, Practice of Health education – Audio-visual aids, Process of curriculum development, Types of evaluation and evaluation methods.

#### **Module III: Information, Education and Communication:**

- IEC in Health and Family Welfare
- IEC structure in districts
- Innovative strategies and evaluation

#### **Module IV: Behavioral Change Communication**

- Best practices and strategic approaches
- BCC framework, implementation strategy
- Target audience segmentation: Different approaches to target audience
- Physician- Patient Communication: Physician- patient relationship
- Data for IEC Planning
- Relationship Management

### **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	10	70

## SUMMER INTERNSHIP (EVALUTION)

**Course Code: PUH 4335**

**Credits Units: 06**

**Training Objective:** To expose the student to various programmes/ activities in health sector and develop a comprehensive understanding of programme design, strategies and planned intervention.

**Duration: 2 months**

### **Format for Report Writing**

1. Abstract
2. Introduction
3. Aims & Objectives
4. Operational definitions
5. Significance of Study
6. Review of literature
7. Research methodology
8. Data Analysis
9. Results
10. Discussion
11. Conclusion
12. Recommendations
13. Limitations of study
14. Future prospects of study
15. References

### **Guidelines for presentation-**

- Power point presentation
- Time for presentation: 20 minutes
- Time for discussion: 10 minutes

### **Examination Scheme**

<b>Components</b>	<b>Presentation</b>	<b>Report submitted</b>	<b>Viva-voce</b>
<b>Weightage (%)</b>	25	50	25

## INTERPERSONAL COMMUNICATION

**Course Code: CCS 4351**

**Credit Units: 01**

### **Course Objective:**

‘Actions speak louder than words.’ Every business communicator needs to understand the nuances of ‘body language and voice.’ This course is designed to enable the young Amitian to decipher the relevance of Kinesics, Proxemics and Para Language that cater to the fundamental requirements of effective business presentations and speeches.

### **Course Contents:**

#### **Module I: Non-Verbal Communication**

Principles of non- verbal communication

Kinesics

Proxemics

Paralanguage and visible code

#### **Module II: Speaking Skills**

Pronunciation drills (Neutralizing regional pulls)

Conversational English

Guidelines to an effective presentation

#### **Module III: Interviews and GDs**

### **Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>CAF</b>	<b>V</b>	<b>GD</b>	<b>GP</b>	<b>A</b>
<b>Weightage (%)</b>	20	20	25	10	10	10	5

## LEADING THROUGH TEAMS

**Course Code: BEH 4351**

**Credit Units: 01**

**Course Objectives:** This course aims to enable students to:

- Understand the concept and building of teams
- Manage conflict and stress within team
- Facilitate better team management and organizational effectiveness through universal human values.

### **Course Contents:**

#### **Module I: Teams: An Overview**

Team Design Features: team vs. group  
Effective Team Mission and Vision  
Life Cycle of a Project Team  
Rationale of a Team, Goal Analysis and Team Roles

#### **Module II: Team & Sociometry**

Patterns of Interaction in a Team  
Sociometry: Method of studying attractions and repulsions in groups  
Construction of sociogram for studying interpersonal relations in a Team

#### **Module III: Team Building**

Types and Development of Team Building  
Stages of team growth  
Team performance curve  
Profiling your Team: Internal & External Dynamics  
Team Strategies for organizational vision  
Team communication

#### **Module IV: Team Leadership & Conflict Management**

Leadership styles in organizations  
Self Authorized team leadership  
Causes of team conflict  
Conflict management strategies  
Stress and Coping in teams

#### **Module V: Global Teams and Universal Values**

Management by values  
Pragmatic spirituality in life and organization  
Building global teams through universal human values  
Learning based on project work on Scriptures like Ramayana, Mahabharata, Gita etc.

#### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal  
Assessment of Behavioural change as a result of training  
Exit Level Rating by Self and Observer

**Examination Scheme:**

Components	SAP	A	Mid Term Test (CT)	VIVA	Journal for Success (JOS)
Weightage (%)	20	05	20	30	25

## GERMAN – III

**Course Code: LAN 4352**

**Credit Units: 02**

### **Course Objectives:**

- To enable the students to converse, read and write in the language with the help of the basic rules of grammar, which will later help them to strengthen their language.
- To give the students an insight into the culture, geography, political situation and economic opportunities available in Germany.

### **Course Contents:**

#### **Module I: Modal verbs**

Modal verbs with conjugations and usage  
Imparting the finer nuances of the language

#### **Module II: Information about Germany (ongoing)**

Information about Germany in the form of presentations or “Referat”– neighbors, states and capitals, important cities and towns and characteristic features of the same, and also a few other topics related to Germany.

#### **Module III: Dative case**

Dative case, comparison with accusative case  
Dative case with the relevant articles  
Introduction to 3 different kinds of sentences – nominative, accusative and dative

#### **Module IV: Dative personal pronouns**

Nominative, accusative and dative pronouns in comparison

#### **Module V: Dative prepositions**

Dative preposition with their usage both theoretical and figurative use

#### **Module VI: Dialogues**

In the Restaurant,  
At the Tourist Information Office,  
A telephone conversation

#### **Module VII: Directions**

Names of the directions  
Asking and telling the directions with the help of a roadmap

#### **Module VIII: Conjunctions**

To assimilate the knowledge of the conjunctions learnt indirectly so far

**Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>C</b>	<b>I</b>	<b>V</b>	<b>A</b>
<b>Weightage (%)</b>	20	20	20	20	15	5

## CHINESE – III

**Course Code: LAN 4355**

**Credit Units: 02**

### **Course Objective:**

Foreign words are usually imported by translating the concept into Chinese, the emphasis is on the meaning rather than the sound. But the system runs into a problem because the underlying name of personal name is often obscure so they are almost always transcribed according to their pronunciation alone. The course aims at familiarizing the student with the basic aspects of speaking ability of Mandarin, the language of Mainland China. The course aims at training students in practical skills and nurturing them to interact with a Chinese person.

### **Course Contents:**

#### **Module I**

Drills

Dialogue practice

Observe picture and answer the question.

Introduction of written characters.

Practice reading aloud

Practice using the language both by speaking and by taking notes.

Character writing and stroke order

#### **Module II**

Measure words

Position words e.g. inside, outside, middle, in front, behind, top, bottom, side, left, right, straight.

Directional words – beibian, xibian, nanbian, dongbian, zhongjian.

Our school and its different building locations.

What game do you like?

Difference between “hii” and “neng”, “keyi”.

#### **Module III**

Changing affirmative sentences to negative ones and vice versa

Human body parts.

Not feeling well words e.g. ; fever, cold, stomach ache, head ache.

Use of the modal particle “le”

Making a telephone call

Use of “jiu” and “cal” (Grammar portion)

Automobiles e.g. Bus, train, boat, car, bike etc.

Traveling, by train, by airplane, by bus, on the bike, by boat.. etc.

#### **Module IV**

The ordinal number “di”

“Mei” the demonstrative pronoun e.g. mei tian, mei nian etc.

use of to enter to exit

Structural particle “de” (Compliment of degree).  
 Going to the Park.  
 Description about class schedule during a week in school.  
 Grammar use of “li” and “cong”.  
 Comprehension reading followed by questions.

### **Module V**

Persuasion-Please don't smoke.  
 Please speak slowly  
 Praise – This pictorial is very beautiful  
 Opposites e.g. Clean-Dirty, Little-More, Old-New, Young-Old, Easy-Difficult, Boy-Girl, Black-White, Big-Small, Slow-Fast ... etc.  
 Talking about studies and classmates  
 Use of “it doesn't matter”  
 Enquiring about a student, description about study method.  
 Grammar: Negation of a sentence with a verbal predicate.

### **Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>C</b>	<b>I</b>	<b>V</b>	<b>A</b>

# HEALTH INFORMATION SYSTEM

**Course Code: PUH 4401**

**Credit Units: 02**

## **Course Objective**

To understand the various indicators of health and health information system and health management information system in India.

## **Course Contents**

### **Module I: Basics**

Concept of information as a resource, understanding the principles of information system and Classification of information in health sector.

### **Module II: Managing Hospital Information Systems**

- Data generated for HIS; Functions, Benefits and applications of HIS, HIS components, various performance Indicators, HIS model and data movement.
- HIS modules: Various HIS Modules for Clinicians Access, Nursing Access, In-patient Module, Registration Module, Diagnostic services Module, Dietetics Module, OT Module and Accident & Emergency Module etc.
  - Setting strategic objectives for information systems, organizing an information systems department, Principles of systems development, Importance of security and confidentiality of data.

### **Module III: Role of Information Technology in Hospitals**

Principles of information processing, Role of information technology in information processing, Role of database management systems, Role of communication in managing hospital information systems.

### **Module IV: Management Information System**

Concept of Management Information System (MIS). Developing indicators, identifying data and developing tools of measurement. Use of MIS: monitoring progress and evaluation, hospital planning, monitoring employees, monitoring health development, decision making. Computerization of MIS: demonstration and critical analysis of different MIS software packages used in health projects in hospitals

### **Module V: Telemedicine**

Concept of Telemedicine and its evolution, Telemedicine network in India, and Strengths & Opportunities for Telemedicine in India.

**Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	10	70

**Text & References**

## HEALTH INSURANCE

**Course Code: PUH 4402**

**Credit Units: 01**

### Course Objective

To acquaint students to the concept of HI and various HI products, so that the students are ready for challenges of healthcare insurance which is emerging as a sector holding great promise.

### Course Contents

#### Module I: Introduction

History of Health Insurance, Principles of Health Insurance, Public Financing, Private Financing, Current trends in Health Insurance - International and Indian scenario, Economic and financial management of Health Insurance

#### Module II Health Insurance systems in India

- Private Health Insurance: Individual Health Plans, Mediclaim, Floaters plans, Third Party Administration, Benefits Management, Claims Management, IRDA
- Social Health Insurance: ESI, CGHS, RSBY
- Social and Community based Insurance: Microfinance

### Examination Scheme:

Components	CP	V	A	CT 1	CT 2
Weightage (%)	20	15	5	30	30

### Text & References

## DISASTER MANAGEMENT

**Course Code: PUH 4403**

**Credit Units: 02**

### **Course Objective**

- To learn, identify and assess disasters in the community.
- To set-forth policies and procedures for disaster preparedness and to prepare disaster plan.

### **Course Contents**

#### **Module I: Basics of Disaster Management**

Definitions, Determining risk of disaster, Classification of disaster on the basis of origin, source, onset & anticipated response; Disaster process, Effects of Disasters – Health issues, characteristics and geography of disasters, Impact of Disasters on the Hospitals

#### **Module II: Disaster Management Process**

Phases of disaster management, leadership, organization of medical relief, Triaging, Disaster Response – local, national & International; Disaster Management Act – 2005.

#### **Module III: Disaster preparedness**

Hospital Disaster Plan – its pre-requisites, principles and components; Hospital disaster management committee and its role; Hospital disaster manual.

#### **Module IV: Fire Safety**

Grades of fire and its causes; elements of fire safety, various fire extinguishers; and fire safety training.

### **Examination Scheme:**

<b>Components</b>	<b>CP</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	10	70

### **Text & References**

## OCCUPATIONAL HEALTH

**Course Code: PUH 4404**

**Credit Units: 02**

### **Course Objective:**

To study basic concepts of Occupational Health & learn about various occupational diseases & their prevention and know about the concerning laws applicable to it.

### **Course Contents**

#### **Module I: Introduction:**

Definition & history of occupational health, occupational hazards & their classification, Principles of occupational health & Ergonomics

#### **Module II: Occupational Diseases:**

Definition, classification, salient features of various common diseases including Pneumoconiosis & Occupational cancers and their preventive measures

#### **Module III: Agricultural & Industrial hazards:**

Agricultural accidents, Zoonotic diseases, snake bite, Insecticide & Pesticide Poisoning.  
Industrial accidents

#### **Module IV: Prevention & Control:**

Medical methods, Engineering methods, Psycho-social methods & Legislative methods

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>V</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	10	70

### **Text & References:**

## CROSS-CULTURAL COMMUNICATION

**Course Code: CSS 4451**

**Credit Unit: 01**

### **Course Objective:**

The influx of multinationals, FDIs and Retail Management makes global communication a harsh reality and offers cultural communication challenges. This course is designed to inculcate transcultural communication skills among the young Amitians.

### **Course Contents:**

#### **Module I: Importance of Culture in Communication**

- Principles of effective cross cultural communication
- Developing Communication Competence

#### **Module II: Barriers to effective communication**

- Sender, Receiver and Situation related barriers
- Measures to overcome the barriers
- Listening skills

#### **Module III: Cross cultural communication**

- Characteristics of culture
- Social differences
- Contextual differences
- Nonverbal differences
- Ethnocentrism

### **Examination Scheme:**

<b>Components</b>	<b>CT1</b>	<b>CT2</b>	<b>CAF</b>	<b>V</b>	<b>GD</b>	<b>GP</b>	<b>A</b>
<b>Weightage (%)</b>	20	20	25	10	10	10	5

CAF – Communication Assessment File

GD – Group Discussion

GP – Group Presentation

### **Text & References:**

## **PROFESSIONAL EXCELLENCE**

**Course Code : BEH 4451**

**Credit Unit: 01**

**Course Objective:** This course aims at imparting an understanding of:

- Build and leverage your professional reputation
- Maintain focus in pressure situations
- Make a balanced choice between professional and personal commitments

### **Course Contents:**

#### **Module I: Individual, Society and Nation**

- Individual Differences and Dimensions of Personality
- Socialization Process
- Relating to the Nation: Values, Culture, Religion
- Sense of pride and Patriotism
- Managing Diversity

#### **Module II: Components of Excellence**

- Personal Excellence:
- Identifying long-term choices and goals
- Uncovering the talent, strength & style
- Analyzing choke points in your personal processes by analysis in area of placements, events, seminars, conference, extracurricular activities, projects etc.
- Developing professional power: Goal-setting, time management, handling criticism, interruptions and time wasters

#### **Module III: Career Planning**

- Knowing one's Interest and Aptitude
- Identifying available Resources
- Setting goals to maintain focus:
- Developing Positive attributes in personality
- Self-reliance and Employability skills

#### **Module IV: Stress Management for Healthy Living**

- Meaning and Nature of Stress
- Stages of stress
- Causes and Consequences of stress: Personal, Organizational and Environmental
- Personal Styles and strategies of coping

#### **Module V: Professional Success**

- Building independence & interdependence
- Reducing resistance to change
- Continued reflection (Placements, events, seminars, conferences, projects extracurricular Activities etc.)

**Module VI: End-of-Semester Appraisal**

- Viva based on personal journal
- Assessment of Behavioural change as a result of training
- Exit Level Rating by Self and Observer

**Examination Scheme:**

Components	SAP	A	Mid Term Test (CT)	VIVA	Journal for Success (JOS)
Weightage (%)	20	05	20	30	25

**Text & References:**

## DISSERTATION (3 Months)

**Course Code: PUH 4437**

**Credits Units: 15**

### **Internship Objective:**

To impart the practical knowledge through research methods, help formulate a rigorous research problem related to public health sector on the basis of their observation, help do an independent study and encourage working in a team.

### **Pedagogy**

- Identifying several situations amenable to dissertation work, writing a proposal and making a presentation to the Dissertation faculty advisory committee.
- Reporting to the committee on the progress of research work periodically.
- Making use of a variety of research methods.
- Defending the inference before the Examining Committee.

### **Report Contents:**

Every student will do a detailed study on the topic selected for the dissertation, and is expected to prepare a two or three proposals which he intends to take up for the Dissertation. The Assigned guide will examine this and decide on the topic of dissertation. Report will comprise of following contents:

1. Abstract
2. Introduction
3. Aims & Objectives
4. Operational definitions
5. Significance of Study
6. Review of literature
7. Research methodology
8. Data Analysis
9. Results
10. Discussion
11. Conclusion
12. Recommendations
13. Limitations of study
14. Future prospects of study
15. References

### **Evaluation Scheme**

# DIETETICS & NUTRITION

## Syllabus - Semester First

### PRINCIPLES OF NUTRITION

**Course Code: DAN2151**

**Credit Units: 03**

#### **Course Objective**

This Course is designed to enable students

1. Understand the vital link between nutrition and health
2. Gain knowledge on functions, metabolism and effects of deficiency of nutrients

#### **Course Contents:**

##### **Module -I**

**Nutrition** - General introduction, Classification of nutrients, Functions of food, social function of food, psychological functions of food.

**Energy** - Definition of Kilocalories, Joule, energy value of foods, determination, physiological fuel values, SDA of foods, determination of energy requirements of body, basal metabolic rate determination, factors influencing BMR, Recommended Dietary Allowances for energy.

**Carbohydrates** - Classification, functions, source, digestion, absorption and utilization, dietary fiber and health.

##### **Module -II**

**Protein** - Classification, functions, sources and requirements, digestion, absorption and Utilization, Protein quality - Definition of biological value, NPU, digestibility coefficient, PER definition and measurement. Deficiency due to shortage of protein and energy – PCM, kwashiorkor. Reference protein, essential amino acids and mutual supplementation of dietary protein.

**Fats and Lipids** - Classification, functions, sources, requirement, digestion, absorption and utilization, importance of essential fatty acids, their requirements and deficiency.

##### **Module -III**

**Vitamins** – Fat soluble vitamins –A, D, E and K- functions, source, requirements, deficiency disorders. Water soluble vitamins –The B-complex vitamins – Thiamine, Riboflavin, Niacin, Folic acid, Biotin, Pantothenic acid and Vitamin C - functions, source, requirements and deficiency disorders.

##### **Module -IV**

**Minerals** - General functions in the body, classification- macro and micro minerals.

Micro minerals – Iron, Fluorine, Zinc, copper, Iodine -functions, absorption, utilization, requirements, deficiency and toxicity. Macro minerals – Calcium & phosphorus - functions, absorption, utilization, requirements, deficiency and toxicity.

##### **Module -V**

**Water Balance** – Functions of water, water distribution, maintenance of water and electrolyte balance, regulation of acid-base balance in the body.

**Examination Scheme:**

Components	ATT	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

(ATT-Attendance; P-Project; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

**Text and References:**

- Essentials of Nutrition and Diet therapy -Sue Rodwell Williams, fifth edition, Times Mirror Mosby College Publishing, 1990.
- Understanding Nutrition -Whitney P.N. and Roes S.R., West Publication Co, 1996

# Syllabus - Semester Second

## FAMILY MEAL MANAGEMENT

**Course Code: DAN2251**

**Credit Units: 03**

**Course Objectives:** To enable the students

1. Understand the nutritional demands in various stages of life cycle.
2. Acquire skills in planning adequate meals in different stages of life cycle.

**Course Contents:**

### Module I

**Basic Principles of Meal Planning** - Basic meal pattern and its need to suit different income levels age and physiological stages. Recommended allowance-RDA for Indians, basis for requirement, energy allowance for different growth pattern of children, energy allowance for various activities.

### Module II

**Nutritional Needs during Pregnancy** - Normal growth and weight change. Nutritional requirements, complications during various stages of pregnancy – hyper emesis gravidarum, preeclampsia and eclampsia and their management at family level.

**Nutrition during Lactation** - Function of breast, physiology of lactation, hormonal control and relaxation, Milk output and factors affecting it, frequency of nursing- supply and demand, nutritional components of colostrum and mature milk. Nutritional requirements of lactating women.

### Module III

**Nutrition during Infancy** - Growth and development, factors influencing growth, Advantages of breast feeding, difference between breast feeding and bottle feeding, factors to be considered in bottle feeding. Different types of milk formulae.

**Weaning Foods** - Weaning foods and commercially prepared baby foods. Uses of growth chart to monitor growth & development. Nutritional requirements of infants' upto one year. Weaning foods developed by different organizations. Problems of feeding in normal and premature infants.

### Module IV

Nutritional needs of pre-school children (1-5 year) - Nutritional and food requirements of preschool children. Factors to be considered while planning meals for pre-school children. Eating problems of children and their management, preparation of supplementary foods using available low cost foods.

**Nutrition for School children** - Nutritional requirement, meal planning for school children, dental caries and packed lunch.

### Module-V

**Nutrition during Adolescence** - Physical Growth- changes and factors affecting height and weight, increments during menarche, Nutritional requirement. Nutritional problems in adolescence- Iron deficiency anemia, obesity, anorexia nervosa and bulimia nervosa.

**Nutritional needs of adults (men and women)** – Nutrition and work efficiency. Menopausal and post menopausal women, hormonal changes, nutritional requirement of the adult in relation to occupation.

**Nutrition During Old Age** - Physiological changes in ageing- psycho-social and economic factors affecting eating behavior. Nutritional problems of aged and their management.

**Examination Scheme:**

Components	ATT	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

(ATT-Attendance; P-Project; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# Syllabus - Semester Third

## BASIC DIETETICS

**Course Code: DAN2351**

**Credit Units: 03**

**Course Objectives:**

- To understand the modifications in nutrients and dietary requirements for various diseases.
- To acquire the ability to plan and prepare diets for various diseases.

**Course Contents:**

**Module I**

- 1.Role of Dietician-hospital and community
2. Basic concepts in Diet Therapy
3. Therapeutic Adaptation of the normal diet
4. Routine Hospital Diets- Regular diet, light diet, soft diet, full liquid diet and tube feeding.
5. Modifications of Diet -Febrile conditions, infections & surgical conditions.

**Module II**

6. Diets of gastro intestinal disorders, renal diseases, liver diseases, obesity, cardio vascular disorders and diabetes mellitus.
7. Geriatrics - Role of diet.
8. Feeding infants & children - problems in feeding children in the hospital.
9. Feeding the patient - psychology of feeding the patient, assessment of patients needs.
10. Nutrition & Diet Clinics - Patients check up and dietary counseling, education of the patient and follow up.

**Examination Scheme:**

Components	ATT	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

(ATT-Attendance; P-Project; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# Syllabus - Semester Fourth

## ADVANCED DIETETICS

Course Code: DAN2451

Credit Units: 03

**Course Objectives:** To enable students

1. Gain knowledge about principles of diet therapy and different therapeutic diets.
2. Develop aptitude for taking up dietetics as a profession.

**Course Contents:**

### Module-I

**Objectives of diet therapy** - Role of a dietitian. Principles of diet preparation and counselling.

**Normal diet in the hospitals** –regular diet, liquid ,semi liquid, light , soft diet, and bland diet.

**Different types of Feeding** - Basic concepts of oral feeding, tube feeding, IV feeding, gastrostomy feeding.

### Module-II

**Therapeutic diets for the following disorders:**

- a. Under weight - definition, etiology, treatment
- b. Obesity - definition, etiology, treatment.
- c. Diseases of the gastro intestinal tract-Peptic ulcer and duodenal ulcer, Dumping syndrome, constipation
- d. Acute and chronic diarrhea -rehydration therapy.

### Module-III

**Diseases of the liver and gall bladder** (risk factors and diet therapy)

- a) jaundice b) hepatitis c) cirrhosis d) fatty liver and diet therapy

**Diseases of the cardio vascular system** (risk factors and diet therapy)

- a) atherosclerosis b) arteriosclerosis c) hypertension d) congestive heart failure

### Module-IV

**Diabetes mellitus** – causes, symptoms, bio-chemical changes, insulin, hypo- glycemic drugs, changes in the metabolism of carbohydrate, fat and protein, food exchange list, dietary management

**Diseases of the kidney and urinary tract**

- a. Acute and chronic nephritis
- b. Nephrotic syndrome
- c. Renal failure
- d. Urinary calculi
- e. Uremia

Causes and dietary treatment of kidney diseases and dialysis.

**Nutrition and cancer** - Dietary guidelines for management.

### Module-V

**Diet in Allergy** - Definition, classification, common food allergy, test of allergy, diet therapy. Pre operative and post operative diets.

**Diet in febrile conditions** - Short duration e.g. Typhoid, Long duration e.g. Tuberculosis. Dietetic management of gout and phenyl ketonuria.

**Diet in relation to deficiency diseases**-Protein calorie deficiency, vitamin A deficiency and anemia.

**Examination Scheme:**

Components	ATT	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

(ATT-Attendance; P-Project; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

**Text and References:**

# Syllabus - Semester Fifth

## COMMUNITY NUTRITION

**Course Code: DAN2551**

**Credit Units: 03**

**Course Objectives:** To enable the students

1. Know about the application of basics of nutrition in the community
2. Gain knowledge of community nutrition programmes of national and international organization

**Course Contents :**

### Module-I

**Definition** - Community, family, village and block

Meaning of Optimum Nutrition, Malnutrition- Under nutrition and over nutrition..

**Characteristics of community**- Demography, Vital statistics, IMR, MMR, morbidity. Causes of **malnutrition**-Factors contributing to malnutrition in the community - food habits, customs and practices, availability of food, Socio-economic factors, Housing and hygienic conditions, population explosion.

### Module-II

**Assessment of the nutritional status of the community** -direct and indirect methods - Anthropometry, Clinical and Biochemical, Diet Surveys.

Nutritional problems of women and men- Anemia, Vitamin A deficiency, B-complex deficiency.

**Nutritional problems of infants and children**- PEM-Marasmus and Kwashiorkor, Vitamin A deficiency, B-complex deficiency diseases, anemia-incidence, prevalence, epidemiology and prevention , other problems- Goitre, fluorosis and Lathyrism- prevalence, causes and symptoms and programmes to control.

### Module-III

**Nutrition intervention programmes** - ICDS: Objectives and services, Noon meal programme, TINP, SNP, Vitamin A prophylaxis.

**National Organization**- Role of ICMR, NIN, NNMB & ICAR

**International organization**- WHO, FAO , UNICEF, DANIDA & World Bank.

### Module-IV

**Home Science**- Meaning and Objectives. Role of Home-Scientists in rural development-with reference to ongoing programmers like Family Welfare Programme, Adult Education for community-different methods, advantages and disadvantages. Nutrition education- merits and demerits of different methods, Concept of nutrition garden.

### Module-V

**Communication**- Principles, methods and classification. Advantages and limitations of different methods.

**Audio-visual aids**- Types, advantages and limitations.

**Health care**- delivery, challenges & strategies. Set up of PHC, school health services and employees state insurance.

**Examination Scheme:**

Components	ATT	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

(ATT-Attendance; P-Project; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# Syllabus - Semester Sixth

## FOOD CHEMISTRY

**Course Code: DAN2651**

**Credit Units: 03**

### **Course Contents:**

#### **Module-I**

Study of various cooking methods - Boiling, steaming, stewing, frying, baking, roasting, broiling, cooking under pressure. Stages of sugar cookery, crystallization and factors affecting crystallization.

#### **Module-II**

Cereals - Structure, composition of rice, wheat, effects of cooking on parboiled and raw rice, principles of starch cookery, gelatinization, flours-types, formation of dough and batter

Pulses and Legumes – Varieties of pulses & legumes, composition, nutritive value, cooking quality of pulses, germination and its effect.

#### **Module III**

Vegetables - Classification, composition, nutritive value, selection and preparation for cooking

Fruits - Classification, composition, nutritive value, changes during ripening, methods and effects of cooking, enzymatic browning

#### **Module IV**

Milk - Composition, nutritive value, kinds of milk, pasteurization and homogenization of milk, changes in milk during heat processing, preparation of cheese and milk powder.

#### **Module V**

Egg - Structure, composition, selection, nutritive value, uses of egg in cookery

Fleshy foods - meat structure, composition, nutritive value, selection of meat, post mortem changes in meat, aging, methods of cooking meat

a)Poultry – types, composition, nutritive value, selection

b)Fish - Structure, composition, nutritive value selection of fish

#### **Module VI**

Fats and Oils - Types of oils, function of fats and oils, shortening effects of oil, smoking point of oil

#### **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

# STEM CELL TECHNOLOGY

## Syllabus - Semester First

### INTRODUCTION TO STEM CELL TECHNOLOGY

**Course Code: SCT2151**

**Credit Units: 03**

**Course Objective:** The objective of this paper is to familiarize the students with stem cell technology and its applications for betterment of the society. The course is designed to give a broad view of mammalian stem cells, reviewing where they are found in the body, the different types and how they are cultured. The topics will cover the basic biology of these stem cells as well as bioengineering and application of these stem cells to potential treatments of human diseases.

#### Course Contents:

##### Module I: Introduction to stem cells

Definition, properties, proliferation, culture of stem cells, medical applications of stem cells, ethical and legal issues in use of stem cells.

##### Module II: Types of stem cells.

Stem Cell biology and therapy, types embryonic stem cell, Adult stem cell, Stem Cell Biology and Therapy, Embryonic Stem Cells, culture and the potential benefits of stem cell technology

##### Module III: Therapeutic applications of stem cells

Gene Therapy: Introduction, History and evolution of Gene therapy, optimal disease targets, Failures and successes with gene therapy and future prospects, Genetic Perspectives for Gene Therapy, **Gene Delivery** methods: Viral vectors and Non-viral Vectors

##### Module IV: Ethical Issues associated with stem cell-based regenerative medicine field

Regulatory and Ethical Considerations of stem cell and Gene Therapy, Assessing Human Stem Cell Safety, Use of Genetically Modified Stem Cells in Experimental Gene Therapies.

#### Examination Scheme:

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

## Syllabus - Semester Second

### FUNDAMENTAL HUMAN EMBRYOLOGY AND DEVELOPMENTAL BIOLOGY

**Course Code:** SCT2251

**Credit Units:** 03

**Course Objective:** The objective of this course is to familiarize students with fundamental process of human embryology and developmental biology and progression of pluripotent stem cells through different phases of development.

**Course Contents:**

**Module-I:** Basics principles of human embryogenesis--gametogenesis, fertilization and embryo development.

**Module-II:**

Ectoderm, mesoderm and endoderm development and process of organogenesis during human development.

**Module-III:**

Molecular regulation of embryogenesis and organogenesis processes during human development.

**Module-IV:**

Different types of stem cells, process and mechanism of stem cell subset development and their spatial organization during human development.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

**Text & References:**

**Text:**

- Human embryology and developmental biology 5<sup>th</sup> Edition by Bruce M. Carson.

## Syllabus - Semester Third

### FUNDAMENTAL CELL BIOLOGY, HUMAN ANATOMY AND PHYSIOLOGY

**Course Code: SCT2351**

**Credit Units: 03**

**Course Objective:** The objective of this course is to familiarize students with basic organization of adult somatic cells, human anatomy and normal physiology. Students will learn basic principles and mechanisms that dictate maintenance of pluripotency in pluripotent stem cells and their differentiation into adult stem cells, somatic cells, tissues and organs.

**Course Contents:**

**Module-I:**

Cell anatomy, organizational components, cell division mechanisms in normal adult cells and in pluripotent stem cells.

**Module-II:**

Introduction to epigenetics and its role in maintenance of pluripotency and differentiation of pluripotent stem cells into different somatic cell lineages.

**Module-III:**

Basics of Human anatomy & physiology and role of pluripotent stem cells and adult stem cells in maintenance of normal

**Module-IV:**

Effect of breach in normal cellular physiology and homeostasis on human development.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

**Text & References:**

**Text:**

## Syllabus - Semester Fourth

### HUMAN PLURIPOTENT STEM CELL CULTURE & DIFFERENTIATION METHODS

**Course Code: SCT2451**

**Credit Units: 03**

**Course Objective:** The objective of this paper is to provide students greater understanding of different types of stem cells.

**Course Contents:**

**Module-I:**

Isolation of human Embryonic stem cells, generation of human induced pluripotent stem cells. History of human pluripotent stem cell development.

**Module-II:**

Methodologies for pluripotent stem cell culture, characterization of pluripotency and differentiation into different lineages.

**Module-III:**

Methods to engineer pluripotent stem cells for treatment of genetically impaired conditions/diseases.

**Module-IV:**

Ethical and regulatory issues affective pluripotent stem cell-based cell replacement therapies. Technological challenges towards development of pluripotent stem cell-based cell replacement therapies.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

**Text & References:**

- Human Pluripotent Stem Cells: Methods and Protocols (Methods in Molecular Biology) 2011th Edition by Philip H. Schwartz (Editor), Robin L. Wesselschmidt.
- Atlas of Human Pluripotent Stem Cells: Derivation and Culturing (Stem Cell Biology and Regenerative Medicine) 2011 by Michal Amit and Joseph Itskovitz-Eldor.
- Stem Cell and Gene-Based Therapy: Frontiers in Regenerative Medicine, *Alexander Battler, Jonathan Leo*, Springer,

## Syllabus - Semester Fifth

### THERAPEUTIC APPLICATIONS OF HUMAN PLURIPOTENT STEM CELLS

**Course Code: SCT2551**

**Credit Units: 03**

**Course Objective:** The objective of this paper is to familiarize students with different therapeutic areas that can benefit with pluripotent stem cell-based cell replacement therapies.

**Course Contents:**

**Module-I:**

Principles of cell replacement therapy and application of pluripotent stem cells in cell replacement therapy.

**Module-II:**

Application of pluripotent stem cells in neuronal disease management and treatment.

**Module-III:**

Application of pluripotent stem cells in ocular and cardiovascular diseases management and treatment.

**Module-IV:**

Application of pluripotent stem cells in treatment of autoimmune complications and cancer management and treatment.

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

**Text & References:**

**Text:**

- Frontiers in Pluripotent Stem Cells Research and Therapeutic Potentials Bench-To-Bedside, 2018, by Kuldip S. Sidhu.

## Syllabus - Semester Sixth

### PROJECT & PAPER PRESENTATION

**Course Code:** SCT2651

**Credit Units:** 03

**Course Objective:** The objective of this course is to help students acquire scientific skills to formulate research hypothesis and design research projects to test those hypotheses. The course will also help students to acquire/improve research presentation skills.

**Course Contents:**

**Examination Scheme:**

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	-	-	100	-

**GURUGRAM**

# Syllabus - First Semester

## HISTORY-I

**Course Code: LAW2101**

**Credit Units: 04**

### Course Objective:

Study of law relating to India is not complete without understanding history and development of law and legal institutions. Hence, the study of History is imperative to a student of law to understand the development and evolution of legal principles and legal institutions in a particular socio-economic context in History. Since India is a country rich in history and traditions, therefore, a student of law should be exposed to the ancient social order and religious philosophy as well as to the system of disputes settlement mechanism existing in those days.

The medieval period has also its influence in the development of legal system. The British / Colonial rule in India was an event, which had also its influence in the growth of judicial and legislative institutions in India, as such the students have to be taught in order to give an insight and awareness as to how the present legal, constitutional, legislative and judicial systems had emerged from the ancient and modern currents of history.

### Course Contents:

#### Module I: Introduction

History: Meaning and Methodology, Relationship between Law and History, Sources of ancient Indian Law and Medieval Law .

#### Module II: Polity, State and Administration

Ancient India: Vedic Polity, Mauryan State, Gupta Polity ;Medieval India: Chola Village Administration, Delhi Sultanat, Mughal State (Mansabdari System and Administrative Apparatus); Theory of Kingship and Nature of State in Ancient andMedieval India: Concept of State and Government in ancient India, Concept of Justice and Law in ancient India, Concept of 'Danda'; Administrative Concepts: Brahmanic, Buddhist, Kautilyan, Turko-Afgan Concept.

#### Module III: Society and Economy

Social Institutions in Ancient India: Varna, Jati, Gotra, Pravara, Family, Slavery, Position of Woman, Changes in Medieval period; Reformation in Medieval and Modern Times:

Bhakti Movement : Nanak, Kabir ; Socio Religious Movement 19<sup>th</sup> century: Raja Ram Mohan Roy, Dayananda Saraswati, Muslim Reform Movement (Sir Syed Ahmad Khan),Backward Class Movements (B.R. Ambedkar, Jotiba Phule); Economic Structure: Vedic Economy, Mauryan Economy, Post- Mauryan Economy and Gupta Economy, Iqtadari System, Agrarian Reforms and economic regulation of Alauddin Khilji, Indian Economy during British Rule and Drain of Wealth.

#### Module IV: Legal Systems and Institutions Ancient India and Medieval India

Thinkers: Manu, Brihaspati, Yajnavalkya, Narada, Katyayan; Judicial System: Types of court: Pratishita, Apratishta, Mudrita, Sasita, Guilds, Panchayats, Kantakasodhana, Dharmasthiyaa; Procedures: Appointment of judges, Trial, Witness, Pleaders, Secret agents, wergild and Punishment, Role of Judges and Investigation; Salient features of Islamic Criminal Law: Judicial organization, King, Chief Qazi, Judicial Officers, Investigative Process and Punishments; Law with regard to non-Muslims in Medieval India; Evolution of Judicial Setup: changes introduced by Akbar.

### Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# POLITICAL SCIENCE-I

**Course Code: LAW2102**

**Credit Units: 04**

## **Course Objective:**

Political Science is considered to be the 'mother science' of Law and as such the two have an intimate relationship. A student of law is expected to have an insight and understanding as to how Law Functions. Thus the students are introduced to the concepts on which the edifice of humanity rests. State being the central theme is prime focus of the study. The course involves the study of Political Obligation-an integral part of the modern democratic theory. The Thoughts of various western and Indian Political Thinkers has also been incorporated. It helps in bringing out the understanding of their views that exists in legal sphere.

## **Course Contents:**

### **Module I: Introduction**

Nature and scope of Political Science-conceptual analysis, Relationship of Political Science with other disciplines – History, Economics, Sociology, Political Science: Its relevance to the study of Law.

### **Module II: State and Sovereignty**

Concept and theories of origin of State: Divine Theory, Force Theory, Theory of Social Contract and Evolutionary Theory; Diverse notions of state: Legal, Plural, Liberal, Ideal, Welfare State; Sovereignty: Concept and types of Sovereignty and challenges to Sovereignty, Theories of Sovereignty: Pluralist, Legal, Monistic Theory

### **Module III: Political Concepts**

Rights: Concept and theories; Liberty and Equality: Concept and their relation; Justice: Concept and types; Property: Concept and theories

### **Module IV: Political Obligation**

Political obligation: Concept and its basis; Political Ideologies: Liberalism, Democratic Socialism, Marxism, Totalitarianism, Individualism.

### **Module V: Western and Indian Political Thinkers**

Foreign thinkers: Plato and Aristotle; Indian thinkers: Kautilya, Gandhi and Nehru.

## **Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

## **Text & References:**

# ENGLISH-I

**Course Code: LAW2103**

**Credit Units: 03**

## **Course Objective:**

The course is intended to give a foundation of English Language. The literary texts are indented to help students to inculcate creative and aesthetic sensitivity and critical faculty through comprehension, appreciation and analysis of the prescribed literary texts. It will also help them to respond from different perspectives.

## **Course Contents:**

### **Module I: Functional Grammar: Patterns and Usage**

Tenses and composition, Correction of sentences, Basic Transformatives: Active and Passive voices, Direct and Indirect speech, Connectives, Modifiers, Questions, Negatives; Reported Speech, Fill in the correct word.

### **Module II: Composition writing and comprehension of texts**

Comprehension of Legal Texts, Paragraph and Précis writing, Legal Letters and Formal Correspondence, Procedure of Note taking and making, Drafting of reports and projects, Abstracts and summary.

### **Module III: Short Stories**

Of studies, by Francis Bacon; Dream Children, by Charles Lamb; The Necklace, by Guy de Maupassant; A Shadow, by R.K. Narayan; Glory at Twilight, Bhabani Bhattacharya.

### **Module IV: Poems**

All the World is a Stage, by Shakespeare; To Autumn, by Keats; O! Captain, My Captain, Walt Whitman; Where the Mind is Without Fear, Rabindranath Tagore; Psalm of Life, H.W. Longfellow.

## **Examination Scheme:**

Components	P/S/V	CT	C	A	EE

# LEGAL METHOD

**Course Code: LAW2104**

**Credit Units: 04**

## **Course Objective:**

This paper focuses on orientation of students to legal studies from the point of view of basic concepts of law and legal system.

## **Course Contents:**

### **Module I: Meaning and Classification of Laws**

Meaning, Definition, Functions: Justice, Stability and Peaceful Change; Classification of laws: Public and Private Law, Substantive and Procedural Law, Municipal and International Law.

### **Module II: Sources of Law**

Custom; Precedent, Ratio, Obiter; Legislation

### **Module III: Basic Concepts of Indian Legal System**

Common Law, Essentials of a Valid Law, Constitution as the Basic Law, Rule of Law, Separation of Powers, Judicial system in India, **Principles of Equity**.

### **Module IV: Legal Writing and Research**

Legal materials: Case law, Statutes, Reports, Journals, Manuals, Digests etc.; Importance of legal research ; Techniques of Legal Research : Doctrinal, Empirical Research, Legal writings and citations.

## **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>A</b>	<b>C</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

# LAW OF CONTRACT-I

**Course Code: LAW2105**

**Credit Units: 04**

## **Course Objective:**

Whatever may be the nature of a given society, the contractual relations, as are obtained in that society, are governed by certain principles which are more or less of a general and basic nature. In India these general principles are included in the statute of the Indian Contract Act. 1872. This course is designed to acquaint a student with the conceptual and operational parameters of these various general principles of contractual relations. Specific enforcement of contract is an important aspect of the law of contracts. Analysis of the kinds of contracts that can be specifically enforced and the methods of enforcement forms a significant segment of this study.

## **Course Contents:**

### **Module I: Formation of Contract**

Meaning and nature of contract, Offer / Proposal (Definition, Communication, Revocation, General/Specific offer, Invitation to treat), Acceptance (Definition, Communication, Revocation, Tenders / Auctions). 'E'Contract

### **Module II: Consideration and Capacity**

Consideration (Definition, Essentials, Privity of contract), Capacity to enter into a contract (Minor's position, Nature / effect of minor's agreements).

### **Module III: Validity of Contract**

Unlawful consideration and object, Free Consent, Coercion, undue influence, Misrepresentation, Fraud, Mistake, Contingent contract, Quasi contracts, Effect of void, voidable, valid, illegal, unlawful and uncertain agreements contracts.

### **Module IV: Discharge and Performance of Contract**

Discharge of Contracts, Performance, Time and Place of performance, Impossibility of performance and frustration, Breach – Anticipatory & Present.

### **Module V: Remedies**

Damages, Remoteness etc., Injunction, Specific performance, Quantum Merit.

### **Module VI: Specific Relief Act, 1963**

Recovery of property, Specific performance of contracts, Rescission of Contract, Declaratory Decree, Injunctions: Temporary and Perpetual, Mandatory.

## **Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

## **Text & References:**

- Anson - Law of Contract
- Pollock and Mulla - Indian Contract Act
- Avtar Singh - Indian Contract Act
- Bangia - Law of Contract and Specific Relief
- Cheshire and Fifoot - Law of Contract.

# MICRO ECONOMICS-I

**Course Code: LAW2106**

**Credit Units: 04**

## **Course Objective:**

This course is designed to expose first –year students, who may be new to economics, the basic principles of microeconomic theory. The emphasis would be on thinking like an economists & the course will illustrate how microeconomic concepts can be applied to analyze real life situations.

## **Course Contents:**

### **Module I: Exploring the Subject Matter of Economics**

Why study economics? The scope and method of economics; scarcity and choice; questions of what, how and for whom to produce and how to distribute output

### **Module II: Supply and Demand: How Markets Work, Markets and Welfare**

Individual demand and supply schedules and the derivation of market demand and supply; shifts in demand and supply curves; the role prices in resource allocation; Elasticity of Demand — price, income and cross; Consumer's surplus

### **Module III: Consumer's Behavior**

Utility-cardinal and ordinal approaches, Indifference curves; budget constraints;. Consumer's equilibrium (Hicks and Slutsky); Giffin goods; Compensated demand; Revealed preference theory; Engel curve.

### **Module IV: Theory of Production and Costs:**

Technology, Isoquants, production with one and more variable inputs, Returns to scale, short run and long run costs, cost curves in the short run and long run, total, average, and marginal product, cost minimization and expansion path, elasticity of substitution.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# Syllabus - Second Semester

## HISTORY-II

**Course Code: LAW2201**

**Credit Units: 04**

### Course Objective:

This Course has been designed to acquaint the student with the systematic and methodological development of Courts, legislature and legal profession. The knowledge of these institutions is imperatively significant in order to understand pre and post colonial nature of Courts, Legislature and legal profession in India. The student shall be given insights to understand the critical analysis whether the birth, growth and development of Courts, Legislature and legal profession of India with the advent of colonial rule in India was scientific or unscientific and it is bane or boon. Besides, legal education like education is an important instrument of social control that enriches human life, materially as well as culturally.

### Course Contents:

#### Module I: Early Developments (1600- 1836)

Emergence of East India Company, Development of Legislative Authority under charters ; Administration of Justice in Presidency Towns (Settlements: Surat, Madras, Bombay and Calcutta) (1639 to 1726); Mayor's Court under charter 1726 and 1753 (Its genesis, working and defects); Statutes: Regulating Act, 1773; Pitts India Act, 1784; The Act of Settlement 1781; Supreme Court of Calcutta and some Landmark cases: Raja Nanad Kumar, Kamaluddin, Patna Case, and Cossijurah; Warren Hastings: Judicial Plans of 1772, 1774 and 1780; Lord Cornwallis: Judicial Plans of 1787, 1790 and 1793; Lord William Bentinck (With special focus on Appraisal of Criminal law) .

#### Module II: Evolution of Law and Legal Institutions

Development of Civil and Personal Laws in Mofussils: Special emphasis on Justice, equity and good conscience; Codification of Laws: Charter of 1833, The First Law Commission, the Charter of 1853, The Second Law Commission; Establishment of High Courts, 1861 ;Privy Council : Appeals and working, Appraisal of Privy Council; Federal Court: Under the Government of India Act 1935.

#### Module III: Constitutional History

The Indian Councils Act, 1861; The Indian Councils Act, 1892; The Indian Councils Act, 1909; The Government of India Act 1919; The Government of India Act, 1935.

#### Module IV: Legal Profession and Education

Present Judicial System; Legal Practitioners Act of 1879, The Chamber and Indian Bar Committee of 1951; The Advocates Act of 1961: Provisions and Disciplinary powers; Law Reporting: Theory of Precedents, Features of Law reporting from 1773 to 1950; Legal Education: History and Basic Aims of Legal Education.

#### Module V: Emergence of Indian Nationalism

Indian National Congress (Moderates, Extremists); Revolutionaries in India and Abroad ;Political Movements of Gandhi (Non-Cooperative, Civil Disobedience, and Quit India Movements); Problem of communalism and partition of India ;Indian Independence Act 1947.

### Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

### Text & References:

- M.P. Jain – Outlines of Indian Legal History
- V.D. Kulshrehtha – Landmarks of Indian Legal and Constitutional History

# POLITICAL SCIENCE-II

**Course Code: LAW2202**

**Credit Units: 04**

## **Course Objective:**

The contents of the Course are designed to have a critical understanding of the forms of Government, their working and the principles on which they are based. Introducing the organs of the Government, a comparative study of various organs will also be dealt with. Conceptual insights into theory and practice of representation, public opinion and Rule of Law will also be disseminated comprehensively.

## **Course Contents:**

### **Module I: Organs of Government**

Legislative, Executive, Judiciary, A comparative study of interaction of various organs of government in different forms of governance.

### **Module II: Political Organization**

State and Government, Forms of Government: unitary, Federal, Quasi – Federal, Parliamentary Presidential.

### **Module III: Organic and institutional Balances**

Doctrine of separation of powers and system of checks and balances with reference to U.S.A. and India, Principles of independence of judiciary and judicial review in Parliamentary, Presidential and other forms of government; Role and significance of Political institutions : Political parties, Pressure groups and interest groups.

### **Module IV: Concepts**

Democracy: Concepts and characteristics; Representation: Theory and practice of mass representation, Types of Representation: Territorial, Proportional, Functional, Minority Representation; Public Opinion: Concept and formation; Rule of Law *vis-à-vis* rule of life.

### **Module V: Institutions and Political Processes operating in India**

Indian party system: Evolution and nature; New social factors: Caste, Religion and Region.

## **Examination Scheme:**

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

## ENGLISH-II

**Course Code: LAW2203**

**Credit Units: 03**

### **Course Objective:**

Efficiency of advocacy depends upon communication skills to a substantial extent. The student should be conversant with legal terminology. A student should be equipped with writing skills of and presentation skills which are essential for effective advocacy.

### **Course Contents:**

#### **Module I: Introduction of Legal Language**

Legal maxims (Introduction and meaning), & Foreign legal words.

#### **Module II: Translation and usage of words**

Translation of legal Para from Hindi to English and vice versa, one legal word-substitute, Usage of common Hindi and Urdu words used in Courts.

#### **Module III: Presentation skills**

Presentation Skills: Speeches, Preparing presentation material, Planning the talk, Preparing visual aids, Delivering presentation, Managing your audience, Question and Answers, Introduction, summing up, vote of thanks and repertoire.

#### **Module IV**

Communication for the Courts: including drafting of moot memorials.

### **Examination Scheme:**

# LAW OF CONTRACT-II

**Course Code: LAW2204**

**Credit Units: 04**

## **Course Objective:**

This course shall be taught after the students have been familiarized with the general principles of Contract in which the emphasis is on understanding and appreciating the basic essentials of a valid Contract and on the existence of Contractual relationship in various instances. Obviously, Contract Law assumes special significance to suit changes in society. These special Contracts are studied in the light of statutory provisions and decisional Law. With the advent of globalization in various sectors of economy today and are in need of specialized legal Professionals due to huge contractual requirements, joint venture Partnerships and the like, Therefore, this Course of Special Contracts provides an insight into the justification for special statutory provisions for certain kind of Contracts.

## **Course Contents:**

### **Module I: Indemnity and Guarantee/Bailment and Pledge**

Meaning, Distinction between Indemnity and Guarantee, Right / Duties of Indemnifier, Indemnified and Surety, Discharge of Surety, Kinds of Guarantee, Bailment and Pledge: Meaning and Distinction, Rights and Duties of Bailor/Bailee, Pawnor/Pawnee, Lien, Termination of Bailment.

# MICRO ECONOMICS-II

**Course Code: LAW2205**

**Credit Units: 04**

## **Course Objective:**

The main objective of the course is to provide a deeper knowledge on some specific field of Microeconomics such as game theory, factor pricing, oligopoly & welfare Economics.

## **Course Contents:**

### **Module I: Decision theory under Uncertainty: Utility Functions and Expected Utility**

Risk aversion and risk preference, insurance and investor's choice.

Asymmetric information- Adverse selection and moral hazard

### **Module II: Oligopoly**

Analysis of Cournot & Stackelberg, Collusive Oligopoly and application of Prisoner's Dilemma of Nash equilibrium

### **Module III: Market Structure**

Review of perfect competition and monopoly; Pricing with market power; price discrimination, peak load pricing, two-part tariff; monopolistic competition and oligopoly.

### **Module IV: Factor Pricing**

Derived demand for a single input and multiple inputs in competitive & imperfect competition markets, firm demand and industry demand, collective bargaining and exploitation rent & quasi rent.

### **Module V: Welfare Economics**

Conditions of Pareto optimality in pure exchange and with production, optimality of perfect competition

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

A-Attendance; P-Project; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

# ADMINISTRATIVE LAW

Course Code: LAW2404

Credit Units: 04

## Course Objective:

Administrative law is as old as the administration itself. However, the form in which we find it today, Administrative is described a most outstanding legal development of the twentieth century. The reason for this development can only be attributed to a change of philosophy as regards the role and function of the State. The change in the concept of State from 'laissez faire' to a 'welfare state' has led to emergence of state activities in almost all spheres of human life. With the phenomenal increase in the area of state operation, the State was bound to take over a number of functions which were earlier left to private enterprise. In order to ensure that such functions are performed effectively and further due to certain other factors namely contingency, expertise etc. administrative agencies are given extraordinary powers and functions such as to make rules and deciding disputes apart from its wide discretionary powers. Obviously, this necessitated a new set of laws to check the possible abuses of such extraordinary powers on the part of administration. The courts in India and abroad in the course of time have developed various doctrines and methods to deal with such p[roblems. However, there is no end to this journey. The field is still open for new changes.

The main thrust of administrative law has been to study the nature of functions and powers exercised by the authorities on whom they have been conferred on and the study of remedies available to common man in case the limits of exercising power are transferred by such an authority. The focus or the centre point of this study, as usual as in cases of the study of other branches of public law, is the rights of individual *vis a vis* the public interest.

## Course Contents:

### Module I: Evolution, Nature and scope of Administrative law

Definitions, scope, classification and reason for the growth of administrative law; Relationship between constitutional law and administrative law; doctrine of Separation of Powers and its application in administrative law; Doctrine of Rule of law and application in administrative law.

### Module II: Legislative function of Administration

Delegated legislation: Necessity for delegated legislation, classification of delegated legislation and its requirement, constitutionality of delegated legislation, All form of control of delegated legislation i.e. Parliamentary, Procedural and Judicial control (doctrine of ultra vires).

### Module III: Judicial function of Administration

Reason for Administrative adjudication; Tribunals and classification of Tribunals; Principles of Natural Justice; Ombudsman: Lokpal, Lokayukta; Central Vigilance Commission (CVC).

### Module IV: Administrative discretion

Need and legality and abuses; Constitutional objections and discretion, failure to exercise discretion; Doctrine of proportionality; Legitimate expectation.

### Module V: Judicial control of administrative action

Courts as the final authority to determine the legality of Administrative actions ; Public Interest Litigation and the principle of *locus standi*, laches, Judicial review ; scope and extent, statutory appeals, writs.

## Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# ARBITRATION AND ALTERNATE DISPUTE RESOLUTION

Course Code: LAW2705

Credit Units: 05

## Course Objective:

The course material imparts to the students an understanding of the concept of alternate methods of resolving disputes in addition to the traditional court oriented processes. It focuses on an analytical study of arbitration law and practice in India and the relevant institutions monitoring the same. The paper also focuses on other alternate dispute resolving mechanisms through State mediatory services under the supervision of the courts.

## Course Contents:

### Module I: Introduction

**Alternative Dispute Resolution (ADR):** Concept and Need and International and National initiatives in India; IIC, UNCITRAL, KSID.

#### **Arbitration and Conciliation Act, 1996**

General Provisions, Definitions, receipt of written communications, waiver of right to object, extent of Judicial Intervention, Administration Assistance; Arbitration agreement, power to refer parties to arbitration where there is an arbitration agreement, Interim measures by court.

### Module II: Composition of Arbitral Tribunal

Composition, Jurisdiction, Conduct of Arbitral Proceedings: Settlement, form and contents of arbitral award, termination of proceedings, correction and interpretation of awards, additional award.

### Module III: Recourse against Arbitral Award

Application for setting aside Arbitral Award, Finality and enforcement of Arbitral Award, appealable orders, Miscellaneous, Deposits, Lien on Arbitral Award and Deposits as to costs, Arbitration agreement not to be discharged by death of party thereof, Provisions in case of insolvency, Jurisdiction, limitation, Limitations, Enforcement of certain Foreign Awards.

### Module IV: Techniques of ADR – I

Negotiation / Consultation, Mediation, Good offices, Conciliation: Nature, Scope and Methods.

Legal Services: Meaning and scope in Legal Aid and Advice, Lok Adalats-nature, scope, procedure and functioning.

## Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

## SUMMER INTERNSHIP EVALUATION-III

**Course Code: LAW2735**

**Credit Units: 03**

It is a mode of Clinical Legal education Specified period to be spent by the student with a law firm/court/Commissions/NGO's and like institutions working with the realm of law or connected therewith. The reports both by the student and the office together with diary where applicable to be certified will be submitted for evaluation

The Internship during the summer break is a compulsory course. There is a Internship Data form where students fill in the details of where they are interning with complete address and phone numbers Customized Legal Reference /Diary is provided to the students on payment They maintain a day to day record of the work that they do at the place they are interning. They are expected to intern for a minimum 90 days. They submit their completed diary, certificate from the employer and also a report of their experience at work. After submission there is a Viva by concerned faculty. They assess the student on the kind of work they have done during internship, presentation of the work they have done and also on the practical knowledge they have gained

The Paper is marked out of 100 marks. The breakup of the marks is as follows:

1.	Diary submission	25 Marks
2.	Report and certificate	25 Marks
3.	Viva (Panel of External Examiners)	40 Marks
4.	Attendance (Regularity in meeting the supervisor)	10 Marks
	<b>Total</b>	<b>100</b>

# Syllabus - Eighth Semester

## INVESTMENT AND COMPETITION LAW

**Course Code: LAW2801**

**Credit Units: 05**

**Course Objective:**

This paper focuses on the investment and competition laws of India in the context of new economic order.

**Course Contents:**

**Module I: Competition Law**

Background, Prohibitions, Competition Commission of India.

**Module II: Corporate Finance and regulatory framework**

Security Contract (Regulation) Act 1956, SEBI Act 1992, Depositories Act 1996, The Securitisation and Reconstruction of Financial Assets and enforcement of security Interest Act, 2002.

**Module III: Regulatory framework for foreign trade, multinational companies**

Foreign Trade (Development & Regulation) Act 1992, UNCTAD Draft Model on Trans – national Corporations, Control and regulation of foreign companies in India, Foreign collaborations and joint ventures.

**Module IV: Foreign Exchange Management**

Background, Policies, Authorities.

**Module V**

Role of Information Technology in the investment market, functioning of demat A/c portal. Investment through internet and virtual banking.

**Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

**Text & References:**

- Competition Act 2002
- Security Contract (Regulation ) Act 1956
- SEBI Act 1992
- Depositories Act 1996
- Foreign Trade (Development & Regulation) Act 1992,

# TAXATION LAW

**Course Code: LAW2802**

**Credit Units: 05**

## **Course Objective:**

Power to tax has been described as the power to destroy. This idea is being floated often whenever the State introduces a new tax. Is this true? Is it not necessary that in order to raise revenue and place the economy on solid foundation, the taxing power should be conferred on the State? The power to tax shall not go unregulated. In this context of a federal structure the distribution of the taxing powers assumes added significance. Obviously, a study of the Constitutional framework on taxation becomes important. Along with this, an analysis of the different laws enacted in exercise of these powers with their safeguards and remedies sheds light on the mechanics of the taxation by the Union and the States.

## **Course Contents:**

### **Module I: General Principles of Taxation Laws**

History and Development of Tax Laws in India, Fundamental Principles relating to Tax Laws, Taxing power and constitutional limitations, Distinction between: Tax, Fee and Cess; Tax avoidance and Tax evasion .

### **Module II: Basic concepts of Income Tax**

Income, Previous Year, assessment Year, Person, Assessee and Total Income, Income not included in the Total Income. Residential status, Clubbing of Income, Tax planning, Rate of Income Tax, Heads of Income, Salaries, Income from House Property, Income from Business or Profession, Capital Gains, Income from Other sources, Deductions under the Income Tax Act, 1961, Income Tax Authorities: Power and Functions, Filing of returns and procedure for assessment, Offences and Penal Sanctions .

### **Module III: Value Added Tax**

Meaning and importance of VAT, Difference between VAT and Sales Tax, West Bengal Value Added Tax Act, 2003, Criticisms and limitations of Vat system.

### **Module IV: Service Tax**

Taxable Service, Meaning and importance of Service Tax, Valuation of Taxable Service, Offences and Penalties.

## **Examination Scheme:**

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# INTERPRETATION OF STATUTES

**Course Code: LAW2803**

**Credit Units: 05**

## **Course Objective:**

Judicial interpretation involves construction of words, phrases and expressions. In their attempt to make the old and existing statutes contextually relevant, courts used to develop certain rules, doctrines and principles of interpretation. The course material seeks to impart to the students, the necessary skills to interpret the statutes with a judicial mind set.

## **Course Contents:**

### **Module I: Rules of Interpretation**

Commencement, repeal and revival of a statute; Rules of interpretation: Liberal rule, mischief rule and golden rules, Harmonious construction.

### **Module II: Principles of interpretation**

Ejusdem of Generis, Noscitur – A Socius, Reddendo Singula Singlis., Expressio Unius Est exclusion Alterius, UI Res Magis Valent Quam Pereat, Contemporanea Espositio Est Optima Et Protissima Lege.

### **Module III: Internal Aids to Interpretation**

### **Module IV: External Aids to Interpretation**

### **Module V**

Construction of Penal Statutes, Mens rea in statutory offences, Principles to be applied in interpreting the Constitution, Strict construction of taxing statutes and its limitations.

## **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

## **Text & References:**

# INTERNATIONAL TRADE LAW

**Course Code: LAW2804**

**Credit Units: 05**

## **Course Objective:**

To acquaint the Students about the basic aspects of International Trade Law, including the WTO and its different principles and Agreements.

## **Course Contents:**

### **Module I: Contract of Sale**

Uniform Rules on Contract of Sale, Types of Sale Contract - CIF, FOB, C & F Contract, Special Trade Terms in International Sale Contract, Indian Bill of Lading Act 1856, International Conventions Governing Bill of lading

Addition of Special Trade Terms in International Sale Contract, Indian Bill of Lading Act 1856 and International Conventions Governing Bill of Lading in Module I.

Addition of Background Role and Structure of WTO, and difference between GATT & WTO in Module IV

### **Module II: Payment for International Sales**

Letters of Credit, Bills of Exchange, and function and connected issues.

### **Module III: Settlement of Disputes**

Arbitration, Enforcement of Arbitral Awards.

### **Module IV: World Trade organization (WTO) and General Agreement on Tariffs and Trade (GATT)**

#### **Background of formation of WTO, Role of WTO in International Trade, Difference of GATT and WTO, Structure of WTO.**

Basic Principles: MFN, Treatment, National Treatment and Non-Discrimination, Exceptions to MFN : Tariff Bindings, Regional Trade Agreements, Escape Clause, Safeguard Measures, Quantitative Restrictions, Anti-dumping and counter-vailing duties.

### **Module V: WTO and Multilateral Agreements**

Trade Related Investment Measures (TRIMS), General Agreement on Trade in Services (GATS), Trade Related aspects of Intellectual Property Rights (TRIPS).

### **Module VI: Dispute Settlement Mechanism under WTO**

## **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>A</b>	<b>C</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	05	5	70

- Conveyancing – D'Souza

# INTELLECTUAL PROPERTY RIGHTS

**Course Code: LAW2902**

**Credit Units: 05**

## **Course Objective:**

The course is designed to provide comprehensive knowledge to the students regarding Indian position of the Patent Law (1970), Copy Right Law (1957) and Designs Act of 2000 which invariably form the part of Intellectual Property Law and shall comprise of the following.

The importance of this branch of the law is to be sufficiently realized in the Indian legal education. These areas are now internationally conceptualized as representing intellectual property. It is often the case that while the law of patents and trademarks is referred to as industrial property, the law relating to copyright is named intellectual property. While both these terms could be suitably invoked, we here speak of intellectual property as signifying all the three bodies of the law as well as the law on industrial designs.

Unlike other forms of property, intellectual property refers to regimes of legal recognition of, primarily, the products of the mind or imagination. The subject matter of property relations is here preeminently based on mental labour. The law relating to intellectual property protects the right to mental labour.

The law confers rights of proprietary nature on relative intellectual labour primarily on the basis that it is in the interests of society and state to promote creativeness and inventiveness. Limited monopoly provides incentive for greater inventive and innovative efforts in society. An important aspect of the exploration in this course would be ways in which the laws strike a fair balance between the interests and rights of the intellectual labourers on the one hand and organized industrial enterprises on the other. Another dimension is a study of the ways in which this regime of laws militates against, or favours, comm. Moduley property in national cultures. As concerns 'modernization' crucial questions arise in the field of copyright protection in computer software and hardware, internet, electronic music and scientific research. Both copyright, trademarks, design and patent law here relate basically to the law of unfair competition and constitute an aspect of consumer protection and welfare not only in the context of national perspectives but also in view of the waves of globalization already set in. Both from the standpoint of human resources development, modernization and justice it is important that the law students get sufficient insights in Intellectual Property Law.

## **Course Contents:**

### **Module I: Introduction**

Intellectual Property, Concept and Philosophy, Need for Private Rights versus Public Interests, Advantages and Disadvantages of IPR.

### **Module II: Patent**

Development of patent law, Rationale for patent protection, Nature and definition, Types of patentable subject matter, Patentability criteria, non-patentable inventions, Rights of patentee, Procedure for granting a patent, Grounds for opposition, Transfer of patent rights, Compulsory Licenses, Acquisition, Surrender, Revocation, restoration, Patent infringement and remedies, Bio patents and software patents, Official Machinery, Controller, Powers and Functions, Patent in pharmaceutical industry, Patent cooperation treaty, Paris convention.

### **Module III: Copyright**

History, Concept of copyright, conditions for grant of copyright, extent of rights exception to copyright protection, fair use provision, assignment and licensing, Compulsory licensing and statutory licensing, Collective administration, Copyright board and office, powers and functions, Moral rights: Neighboring rights; infringement penalties and remedies, Appeals, Berne Convention, Universal Copyright Convention - WIPO Copyright Treaty: WIPO Phonograms and Performances treaty, TRIPS with respect to Copyright and Neighboring rights.

### **Module IV: Designs, Protection, Historical development, Rationale**

Designs Act of 2000: Meaning of Design, Conditions for grant of protection, Ambit of Protection, Exceptions, Registration of Designs, Cancellation, Copyright in Registered Designs, Enforcement, Infringement and remedies, Powers and duties of Controller.

### **Module V: Trademarks**

Evolution, Functions, Objective, Definition, Kinds of Marks, Domain names, Registration, Concurrent registration, Procedure for registration, Relative and absolute grounds of refusal, opposition and its grounds, Assignment, transmission and licensing of Trademarks, Infringement, Penalties and Remedies, Withdrawal of protection, Passing off, Official machinery for regulation administration and Redressal, Registrar, Difference between Trade Mark, **Trade Secret, Traditional Knowledge** and Geographical Indications, TRIPS on Trademarks, Madrid Agreement for The Repression of False or Deceptive Indications of Source on Goods, 1891- Madrid Agreement for the International Registration of Marks, 1891 and protocol relating to that agreement 1989.

### **Module VI: Plant Varieties Protection Act, 2001**

Objectives, Rationale, Registry, Official machinery, registration, Criteria of fulfillment Exclusions, Benefit sharing, Farmers rights, Community Rights, compulsory license Redressal forum, Appellate tribunal, Infringement, offences and penalties; Geographical indications of Goods (Registration and Protection Act, 1999: History, Definition, Rationale, Functioning, official Machinery, Registry, Rights conferred, Registration Procedure. Redressal Machinery, Appeal, Passing off, Offences, penalties and Procedure.

# ENGLISH-I

**Course Code: LAW2103**

**Credit Units: 03**

## **Course Objective:**

The course is intended to give a foundation of English Language. The literary texts are indented to help students to inculcate creative and aesthetic sensitivity and critical faculty through comprehension, appreciation and analysis of the prescribed literary texts. It will also help them to respond from different perspectives.

## **Course Contents:**

### **Module I: Functional Grammar: Patterns and Usage**

Tenses and composition, Correction of sentences, Basic Transformatives: Active and Passive voices, Direct and Indirect speech, Connectives, Modifiers, Questions, Negatives; Reported Speech, Fill in the correct word.

### **Module II: Composition writing and comprehension of texts**

Comprehension of Legal Texts, Paragraph and Précis writing, Legal Letters and Formal Correspondence, Procedure of Note taking and making, Drafting of reports and projects, Abstracts and summary.

### **Module III: Short Stories**

Of studies, by Francis Bacon; Dream Children, by Charles Lamb; The Necklace, by Guy de Maupassant; A Shadow, by R.K. Narayan; Glory at Twilight, Bhabani Bhattacharya.

### **Module IV: Poems**

All the World is a Stage, by Shakespeare; To Autumn, by Keats; O! Captain, My Captain, Walt Whitman; Where the Mind is Without Fear, Rabindranath Tagore; Psalm of Life, H.W. Longfellow.

## **Examination Scheme:**

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# LEGAL METHOD

**Course Code: LAW2104**

**Credit Units: 04**

## **Course Objective:**

This paper focuses on orientation of students to legal studies from the point of view of basic concepts of law and legal system.

## **Course Contents:**

### **Module I: Meaning and Classification of Laws**

Meaning, Definition, Functions: Justice, Stability and Peaceful Change; Classification of laws: Public and Private Law, Substantive and Procedural Law, Municipal and International Law.

### **Module II: Sources of Law**

Custom; Precedent, Ratio, Obiter; Legislation. ;

### **Module III: Basic Concepts of Indian Legal System**

Common Law, Essentials of a Valid Law, Constitution as the Basic Law, Rule of Law, Separation of Powers, Judicial system in India, **Principles of Equity**.

### **Module IV: Legal Writing and Research**

Legal materials: Case law, Statutes, Reports, Journals, Manuals, Digests etc.; Importance of legal research ; Techniques of Legal Research : Doctrinal, Empirical Research, Legal writings and citations.

## **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>A</b>	<b>C</b>	<b>EE</b>

# LAW OF CONTRACT-I

**Course Code: LAW2105**

**Credit Units: 04**

## **Course Objective:**

Whatever may be the nature of a given society, the contractual relations, as are obtained in that society, are governed by certain principles which are more or less of a general and basic nature. In India these general principles are included in the statute of the Indian Contract Act. 1872. This course is designed to acquaint a student with the conceptual and operational parameters of these various general principles of contractual relations. Specific enforcement of contract is an important aspect of the law of contracts. Analysis of the kinds of contracts that can be specifically enforced and the methods of enforcement forms a significant segment of this study.

## **Course Contents:**

### **Module I: Formation of Contract**

Meaning and nature of contract, Offer / Proposal (Definition, Communication, Revocation, General/Specific offer, Invitation to treat), Acceptance (Definition, Communication, Revocation, Tenders / Auctions). 'E'Contract

### **Module II: Consideration and Capacity**

Consideration (Definition, Essentials, Privity of contract), Capacity to enter into a contract (Minor's position, Nature / effect of minor's agreements).

### **Module III: Validity of Contract**

Unlawful consideration and object, Free Consent, Coercion, undue influence, Misrepresentation, Fraud, Mistake, Contingent contract, Quasi contracts, Effect of void, voidable, valid, illegal, unlawful and uncertain agreements contracts.

### **Module IV: Discharge and Performance of Contract**

Discharge of Contracts, Performance, Time and Place of performance, Impossibility of performance and frustration, Breach – Anticipatory & Present.

### **Module V: Remedies**

Damages, Remoteness etc., Injunction, Specific performance, Quantum Merit.

### **Module VI: Specific Relief Act, 1963**

Recovery of property, Specific performance of contracts, Rescission of Contract, Declaratory Decree, Injunctions: Temporary and Perpetual, Mandatory.

## **Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

## **Text & References:**

- Anson - Law of Contract
- Pollock and Mulla - Indian Contract Act
- Avtar Singh - Indian Contract Act
- Bangia - Law of Contract and Specific Relief
- Cheshire and Fifoot - Law of Contract.

# E-COMMERCE

**Course Code: COM2103**

**Credit Units: 03**

## **Course Objective:**

In the changed business environment of today, it has become imperative for businesses to understand, appreciate and learn to create their presence in cyber space. This course focuses on exposing the students to the world of e-commerce, the opportunities, and the threats and teaches them the strategies of making businesses viable and successful.

## **Course Contents:**

### **Module I: E-Commerce Concept**

Meaning, definition, concept, features, function of E-Commerce, E-Commerce practices v/s traditional practices, scope and basic models of E-Commerce, limitations of E-Commerce, precaution for secure E-Commerce, proxy services. Concept of EDI, difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI, Software Concept of Electronic Signature, Access Control.

### **Module II: Types of E-Commerce**

Meaning of B2C, B2B, C2C, P2P. Applications in B2C- E-Banking, E-Trading. E-Auction - Introduction and overview of these concepts. Application of B2B- E-distributor, B2B service provider, benefits of B2B on Procurement, Just in time delivery. Consumer to consumer and peer to peer business model Introduction and basic concepts.

### **Module III: E-Marketing**

Traditional Marketing V/S E-Marketing, Impact of Ecommerce on markets, Marketing issue in E-Marketing, Promoting your E-Business. Direct marketing, one to one marketing.

### **Module IV: E-Finance**

Areas of E-Financing, E-Banking, traditional v/s E-Banking, operations in E-Banking. E-Trading- Stock marketing, trading v/s E-Trading, Importance of E-Trading, Advantages of E-trading, operational aspects of E-Trading.

### **Module V: E-Payment**

Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, cyber cash Internet cheques. Instant Paid payment system- Debit card, direct debit. Prepaid payment system- Electronic cash, digicash, Netcash, cybercash, smart cards.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

## **Text & References:**

### **Text:**

# BUSINESS MATHEMATICS

**Course Code: MGT2104**

**Credit Units: 03**

## **Course Objective:**

The course is designed to orient the students towards the basic concepts of mathematics and its applications in the business world.

## **Course Contents:**

### **Module I: Set Theory & Mathematical Induction**

Theory of Sets; Meaning; elements; types; presentation and equality of sets; subsets; super sets & power sets; finite, countable or infinite sets; union; intersection; compliment & difference of sets; Venn diagrams; Cartesian product of sets; cardinality; inclusion – exclusion principle; applications of set theory; mathematical induction

### **Module II: Techniques of counting**

Basic counting principle; Factorial notation; Binomial coefficient; Pascal's triangle; Permutations and Combination; Permutation with restriction; Circular permutation and Combination with restriction; Concept of tree diagram

### **Module III: Logarithms & Sequence – A.P.; G.P.**

Indices & Logarithms; Definition and properties, common logarithms; Arithmetic and Geometric Progression- General term, summation, Business Application.

### **Module IV: Matrices & Determinants**

Matrices; concepts and types; properties; addition; multiplication; transpose and inverse of matrix; algebra of matrices; adjoint of a matrix; determinants; properties of determinants; solution of simultaneous Linear Equations; business applications of matrices; Homogeneous System of Linear equations; Condition for Uniqueness for the homogeneous system; Solution using inverse of the coefficient matrix; Problems

### **Module V: Differentiation & Differential Calculus**

Differentiation - definition, derivatives of Algebraic, Logarithmic and exponential function, Business application of differentiation; Optimization using calculus; Point of inflexion absolute and local optima

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

# ECONOMIC SYSTEM AND SOCIETY

**Course Code: ECO2104**

**Credit Units: 03**

## **Course Objective:**

This course will reflect the socio-economic change in historical perspective, capitalism as an economic system, structure of capitalism and capitalism in global context.

## **Course Contents:**

### **Module I**

Analyzing Socio-Economic Change in Historical Perspective

### **Module II**

Capitalism as an economic system

Origins, nature and structure of capitalism; Accumulation and crisis; Alternative perspectives on capitalism.

### **Module III**

The transition from feudalism to capitalism

### **Module IV: The evolving structure of capitalism**

Monopoly capitalism, The modern corporation: divorce between ownership and control; The institutional diversity of capitalism; Alternative perspectives on the role of state.

### **Module V: Capitalism in Global Context**

Multinational corporations and their impact on the developing economics; imperialism.

## **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>P</b>	<b>HA</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

**ATT**-Attendance; **P**-Project; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination

## READINGS IN MANAGEMENT

**Course Code: MGT2130**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. The selection of the book will be department specific so that it can be discipline specific.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### **Evaluation:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

# TERM PAPER

**Course Code: MGT2131**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Credit rating
  - Risk management
  - Subprime meltdown and its after effect with case study from Indian industry
  - Corporate frauds
  - Micro finance institutions in India
  - Carbon Trading
  - IFRS
  - Celebrity Endorsement in real estate
  - Social media marketing
  - Green marketing
  - Sustainable branding practices
  - Relationship management
  - CSR
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Examination Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Total</b>
40	40	20	100

# PROJECT (WITH PRESENTATION & EVALUATION)

Course Code: MGT2132

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	– 25 marks
Chapter 4: Conclusion & Recommendations	– 10 marks
Chapter 5: Bibliography	– 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report: The body of the report should have these four logical divisions
  - a) *Introduction*: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b) *Conceptual Framework / National and International Scenario*: (relating to the topic of the Project).
  - c) *Presentation of Data, Analysis and Findings*: (using the tools and techniques mentioned in the methodology).
  - d) *Conclusion and Recommendations*: In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexures: Questionnaires (if any), relevant reports, etc.  
(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

Step I: Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

- Chapter 1: Introduction,
- Chapter 2: Conceptual Framework / National & International Scenario,
- Chapter 3: Analysis & Findings

#### Chapter 4: Conclusion and Recommendations.

Step V: The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

#### Guidelines for Evaluation:

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

#### Evaluation Scheme:

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

# WORKSHOP

**Course Code: MGT2133**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

Accounting

Finance

Human Resources

Marketing

Economics

Operations

Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Business Game

Simulation

Group Activity

Role Play

Business Planning

Quiz

## **Examination Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# Syllabus - Second Semester

## MARKETING MANAGEMENT

**Course Code: LAW2208**

**Credit Units: 03**

### **Course Objective:**

The main objective of this course is to give students an elementary knowledge of the fundamentals in the field of marketing. The focus will be both on developing and helping them imbibe basic marketing principles and establishing an appreciation of contemporary realities. However, in order to do justice to the varying diversity of a real market place, the course shall be taught over two semesters- semester III and IV. In semester III, emphasis will be on the core concepts in marketing, thereby giving the students an understanding of the environment in which marketing works.

### **Course Contents:**

#### **Module I: Introduction to Marketing**

Meaning of marketing, Core concepts of marketing, Evolution and its role in the changing business environment, various marketing management philosophies, viz., the production concept, the product concept, selling concept and the marketing concept, The newer definitions of marketing- societal marketing and relationship marketing, strategies planning in marketing, formulation of marketing plan.

#### **Module II: Analyzing marketing opportunities**

Internal and External Marketing Environment Analysis, Introduction to Marketing Information System and Marketing Research, BCG matrix, GE 9 cell model, Intensive growth strategies.

#### **Module III: Studying Consumer Behaviour and Selecting Markets**

Buying Behaviour for Consumer Markets and Industrial Markets, Types of Buying Situations, Buying Decision Process and Factors Affecting Buyer Behaviour, Consumer Adoption Process, Concept of Market Segmentation, Bases for segmenting Consumer and Business markets, Approaches for Targeting, Differentiation and Positioning.

#### **Module IV: Product Mix Strategy**

Product: concept & levels, Classification of products consumer and industrial, product differentiation, product mix, Product Life Cycle and various strategies, Branding: concept and challenges, brand decisions. Packaging and labeling.

#### **Module V: Product Development Decision and Pricing**

Product Line Decision, New Product Development: Challenges & Process, Consumer Adoption Process, Diffusion of Innovation, Setting the price, Understanding various pricing strategies and their application.

#### **Module VI: Distribution and Logistics Decision and Integrated Communication**

Nature of Marketing Channels, Channel Functions and Flows, Channel Design and Management Decisions, Channel Dynamics. Introduction to Wholesaling, Retailing and Logistics, Marketing communication mix and Introduction to various elements of integrated marketing communications briefly.

#### **Module VII: Emerging Marketing Paradigms**

Concept of E-marketing, Global marketing, Mobile marketing, Kiosk marketing, Green marketing, Tele marketing, Multi level marketing, Rural marketing.

### **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**Text & References:*****Text:***

# HUMAN RESOURCE MANAGEMENT

**Course Code: LAW2209**

**Credit Units: 03**

## **Course Objective:**

The objectives of this course are to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

## **Course Contents:**

### **Module I: Fundamentals of HRM**

Introduction, Concept and Functions, Scope and Significance of Human Resource Management, Personnel to HRM, Overview of basic HRM Model, Role and Responsibilities of the Human Resource Manager and essentials of Sound HR Policies.

### **Module II: Acquisition of Human Resources**

Objectives, Policies and Process of Human Resource Planning, Job Analysis, Recruitment (process, methods: internal, external), Selection (process, tests, interviews), Induction, Placement.

### **Module III: Development of Human Resources**

Training and Development(process, methods: On-the job, Off-the job), Evaluation of training(Kirkpatrick model) and Performance Appraisal(concept, significance, process, methods-Graphic rating scales, essays, confidential report, BARS,360 Degree, etc, errors during appraisal, reducing errors).

### **Module IV: Maintenance of Human Resources**

Job Evaluation: concept, process, compensation: concept, components, Designing and Administering the Wage and Salary Structure, Grievance Procedure and Handling.

### **Module V: Retention and Separation Processes**

Procedure of separation: Discharge, Retirement, Layoff, Retrenchment, VRS, Promotion and Transfer, exit interview, attrition and retention (concept, significance, determinants and strategies).

### **Module VI: Current Issues in HRM**

Increased concern for HRM( Sound IR, dual career couples, flexi-working hours, work-from home facility), International Human Resource Management-Managing inter country differences, SHRM, talent management, Employee engagement, competency mapping, HR accounting-cases Indian organizations, HRIS, HR audit.

## **Examination Scheme:**

## ENGLISH-II

**Course Code: LAW2203**

**Credit Units: 03**

### **Course Objective:**

Efficiency of advocacy depends upon communication skills to a substantial extent. The student should be conversant with legal terminology. A student should be equipped with writing skills of and presentation skills which are essential for effective advocacy.

### **Course Contents:**

#### **Module I: Introduction of Legal Language**

Legal maxims (Introduction and meaning), & Foreign legal words.

#### **Module II: Translation and usage of words**

Translation of legal Para from Hindi to English and vice versa, one legal word-substitute, Usage of common Hindi and Urdu words used in Courts.

#### **Module III: Presentation skills**

Presentation Skills: Speeches, Preparing presentation material, Planning the talk, Preparing visual aids, Delivering presentation, Managing your audience, Question and Answers, Introduction, summing up, vote of thanks and repertoire.

#### **Module IV**

Communication for the Courts: including drafting of moot memorials.

### **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>A</b>	<b>C</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

## LAW OF CONTRACT-II

Course Code: LAW2204

Credit Units: 04

### Course Objective:

This course shall be taught after the students have been familiarized with the general principles of Contract in which the emphasis is on understanding and appreciating the basic essentials of a valid Contract and on the existence of Contractual relationship in various instances. Obviously, Contract Law assumes special significance to suit changes in society. These special Contracts are studied in the light of statutory provisions and decisional Law. With the advent of globalization in various sectors of economy today and are in need of specialized legal Professionals due to huge contractual requirements, joint venture Partnerships and the like, Therefore, this Course of Special Contracts provides an insight into the justification for special statutory provisions for certain kind of Contracts.

### Course Contents:

#### Module I: Indemnity and Guarantee/Bailment and Pledge

Meaning, Distinction between Indemnity and Guarantee, Right / Duties of Indemnifier, Indemnified and Surety, Discharge of Surety, Kinds of Guarantee, Bailment and Pledge: Meaning and Distinction, Rights and Duties of Bailor/Bailee, Pawnor/Pawnee, Lien, Termination of Bailment.

#### Module II: Agency

Definitions of Agent and Principal, Appointment of an Agent, Authority of an Agent, Creation of agency: by agreement, Ratification and law, Relation of principal / agent, subagent and substituted agent, Ratification of Agents Authority, Revocation of Agency Authority, Effects of Agency on Contracts with third person, Personal Liability of agents, Termination of agency.

#### Module III: Sale of Goods Act 1930

Contract of Sale: Nature and definition, Conditions and Warranties, Transfer of Property and Title, Performance of the contracts, rights of unpaid seller, suit for breach of contract.

#### Module IV: The Indian Partnership Act, 1932

Nature of partnership firm, Relations of partners to one another and outsiders, Rights /Duties of partners *inter se*, Partnership Property: Relations of Partners to third parties, Liability for holding out, Minor as a partner; Incoming and outgoing partners, Dissolution of Partnership Firm, Modes of Dissolution, Consequences of dissolution, Registration of firms and effects of non registration.

### Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# ANALYSIS AND DESIGN OF BUSINESS SYSTEM

**Course Code: MGT2204**

**Credit Units: 03**

## **Course Objective:**

The course aims at preparing students conceptualize and define scope and domain of system analysis and design. It also focuses on system development life cycle using conventional and structural look.

## **Course Contents:**

### **Module I: The systems development Environment. (Information system development life cycle)**

System & its parts, Types of Systems, Characteristics of a System, System Analyst in system Development, Developing Systems- SDLC, Approaches to System Development (Prototyping, Joint Application Design (JAD), Participatory Design (PD)), System Development Models (Waterfall model & Spiral Model), System Planning & Selection (Identifying, Selecting, Initiating & Planning System Development Project).

### **Module II: System Planning and Selection (Graphic technology modeling tool)**

Identifying and Selecting Projects (Identifying potential development projects, classifying and ranking projects, and selecting projects for development), Methods for project identification and selection, Evaluation criteria for classifying and ranking projects, Initiating and Planning System Development Projects (Process & performed Activities, Deliverables & Outcomes), Assessing Project Feasibility (Economic, Operational, Technical, Schedule, Legal & Contractual, Political Feasibility)

### **Module III: System & Data Analysis (Data Analyzing Modeling)**

Determining System Requirements (Traditional Methods, Modern & Radical Methods), Structuring System Requirements (Process Modeling – DFD, Logic Modeling – Structured English & Decision Tables, Conceptual Modeling – ER Model), Data Analysis & Techniques (Interpretive, Coding, Recursive Abstraction and Mechanical Technique), Types of Analysis (Descriptive, Exploratory, Confirmatory and Predictive), Modeling Methodologies (Bottom Up method & Top Down Method), Generic and Schematic Data Modeling.

### **Module IV: System & Database Design**

System Design (Design Objectives, Phases in Designing, Purpose of System Design), System Design Goals, Type of Design, Design Strategy, System Decomposition (Modeling, Connection and Coupling of a System), System Design Methodologies, Database Design, Database Management System – an introduction, Overview of Data Models, Relational Database Model – Well structured relations, Keys, Schema & Subschema, Structure, Facilities & Users, Constraints, Anomalies, Functional Dependency, Normalization, Roles & Duties of System Administration.

### **Module V: System Implementation & Operation (System Management)**

Activities in implementing (Coding, Testing & Installation, Documentation, Training, Support, Maintenance), Types of testing, planning installation, approaches to installation, Documenting a system, Training and Supporting users, Types & Frequencies of Training Methods, Reasons of System Implementation Failures, Project Closedown, Conducting System Maintenance – Types of Maintenance (Corrective, Adaptive and Perfective Maintenance), effective maintenance, Evaluation of System's Success, System Enhancement, Quality Assurance in System Cycle.

### **Module VI: System Security and Auditing**

System Security: Data Security, Backup & Recovery during System & Database failure, Ethical Issues in System Development, Threat and Risk Analysis, Audit, System Audit, System Audit Standards (Planning, Implantation and Reporting Standards), System Analysis and Programming (Overview, Role & Duties of System Experts as Analyst and Programmer).

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>C</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

# INNOVATION & CREATIVITY MANAGEMENT

**Course Code: MGT2205**

**Credit Units: 03**

## **Course Objective:**

To develop an appreciation for new ideas and out of the box thinking so that students can successfully imbibe the habit of innovative and creative thinking in situations is demanding such an approach.

## **Course Contents:**

### **Module I:**

Innovation Management- Introduction, characteristics, Components, Types, Models of Innovation process, Innovation Environment-Originators of Innovation, Key Drivers of Innovation, Factors influencing innovation, Nurturing innovation in e-business.

### **Module II:**

Organizing for Innovation- Organizational theories and structures, traits of innovative organizations, current trends, factors influencing organizational design and size decisions, Need & Characteristics for creative organization, 7S framework, creativity crushers, fostering innovation climate and culture, The creativity Hit List.

### **Module III:**

Research and Development management- Significance, Prerequisites, Process, Technology development approaches, management of R &D, In source to open source environment, R&D in small industry, Managing Creative employees, significance and challenges of managing creative employees, Traits of a creative person, motivation to creativity, strategies for unblocking creativity, factors influencing group creativity, Promoting group creativity, Left and right thinking, Linear and non-linear thinking process, creative thinking, Tradition vs creative thinking.

### **Module IV:**

Individual creativity techniques- Inner and Directed creativity techniques, Group Creativity Techniques-creativity methods, writing techniques, techniques based on pictures, maps and networks, Product innovation-types of new products, Target markets for Disruptive Innovation, Technology strategies for innovation, new product development, packaging and positioning innovations, beyond product innovation, New product failures.

### **Module V:**

Innovation Diffusion- Concept of diffusion and adaptation, diffusion types, Innovation diffusion theory, Innovation adoption by organizations, Innovation adoption across countries, Marketing strategy and the diffusion process.

### **Module VI:**

Legal aspects of innovation- IPR, Indian Patents Act, trademark, Copyrights, Trade secrets, Towards Innovative Society-Innovation for social development, Spirit of innovation in India, Favourable and Unfavourable factors.

## **Examination Scheme:**

Components	CT 1	HA	V	A	EE
Weightage (%)	10	10	5	5	70

## **Text & References:**

### **Text:**

- Krishnamacharyulu and Lalitha, *Innovation Management*, Himalaya Publishing House, New Delhi- 2007

### **References:**

- Plsek, *Creativity, Innovation and Quality*, Prentice Hall of India, New Delhi-2003

**SALIENT PEDAGOGICAL FEATURES-**

1. Classroom teaching to focus on enhancing out of the box thinking.
2. Assignments: Practical tasks emphasising on honing up creative thinking.
3. Case study analysis: To enable students to appreciate the application of concepts in real life environment.
4. Active student participation in class discussions.
5. Role plays to boost spontaneity.

# HUMAN VALUES AND PROFESSIONAL ETHICS

**Course Code: MGT2206**

**Credit Units: 03**

## **Course Objective:**

The aim of this course is to facilitate the development of a Holistic perspective among students towards life, profession and happiness, based on a correct understanding of the Human reality and the rest of Existence. Such a holistic perspective forms the basis of value based living in a natural way. Recognize the need for lifelong learning and have the knowledge and skills that prepare them to identify the Moral issues involved in Management areas and to provide an understanding of the interface between Social, Technological and Natural environments.

## **Course Contents:**

### **Module I: Human Values**

Morals, Values, Types of values, evolution of human values, Ethics – Integrity – Work Ethic – Honesty – Courage –Empathy – Self-Confidence – Character, Challenges at Work place

### **Module II: Values in Management**

Relevance of values in Management, need for values in global change, values for managers, holistic approach for managers in decision making, problems related to stress in corporate management

### **Module III:**

**Workplace Rights and Responsibilities:** Organizational complaint procedures. Government agencies. Resolving Employee concerns. Limits on acceptable behavior in large corporation.

**Work environment:** Ethical and legal considerations, Organizational responses to offensive behavior and harassment. Ethics in a Global Context.

### **Module IV: Industrial Integrity**

The epitome of industrial success, Integrity and organization, Exploring learning process of integrity, Consequences of lack of integrity.

## **Examination Scheme:**

Components	CPA	Viva	HA	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# READINGS IN MANAGEMENT

**Course Code: MGT2230**

**Credit Units: 02**

## **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. The selection of the book will be department specific so that it can be discipline specific.

## **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

- Content
- Writing style
- Information/learning
- Content handling
- Characters(if any)
- Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

## **Evaluation:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

# TERM PAPER

**Course Code: MGT2231**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Credit rating
  - Risk management
  - Subprime meltdown and its after effect with case study from Indian industry
  - Corporate frauds
  - Micro finance institutions in India
  - Carbon Trading
  - IFRS
  - Celebrity Endorsement in real estate
  - Social media marketing
  - Green marketing
  - Sustainable branding practices
  - Relationship management
  - CSR
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **EVALUATION**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Total</b>
40	40	20	100

# PROJECT (WITH PRESENTATION & EVALUATION)

Course Code: MGT2232

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	– 25 marks
Chapter 4: Conclusion & Recommendations	– 10 marks
Chapter 5: Bibliography	– 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
  - 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
  - 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
  - 4) Body of the Report: The body of the report should have these four logical divisions
    - a) *Introduction*: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
    - b) *Conceptual Framework / National and International Scenario*: (relating to the topic of the Project).
    - c) *Presentation of Data, Analysis and Findings*: (using the tools and techniques mentioned in the methodology).
    - d) *Conclusion and Recommendations*: In this section, the concluding observations based on the main findings and suggestions are to be provided.
  - 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
  - 6) Annexures: Questionnaires (if any), relevant reports, etc.
- (The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

Step I: Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

- Chapter 1: Introduction,
- Chapter 2: Conceptual Framework / National & International Scenario,
- Chapter 3: Analysis & Findings
- Chapter 4: Conclusion and Recommendations.

Step V: The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

## WORKSHOP

**Course Code: MGT2233**

**Credit Units: 01**

### **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

Accounting

Finance

Human Resources

Marketing

Economics

Operations

Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

### **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of atleast 500 words about the learning outcome from the workshop.

### **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Business Game

Simulation

Group Activity

Role Play

Business Planning

Quiz

### **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# Syllabus - Third Semester

## ORGANISATIONAL BEHAVIOUR

Course Code: LAW2309

Credit Units: 03

### Course Objective:

The objective of this course is to familiarize the students with the behavioural patterns of Human beings at individual and group levels.

### Course Contents:

#### Module I: Understanding Human Behaviour

Concept, Nature and Significance of Human Behaviour, Factors Affecting Human Behaviour, Levels of Human Behaviour; Disciplines contributing to OB.

#### Module II: Individual Behaviour

Individual Differences; Personality and Theories of Personality; Perception; Learning and Behaviour reinforcement, Values.

#### Module III: Motivation & Attitude

Concept, Significance and Theories of Motivation, Motivation and Behaviour, Motivation at Work, Attitudes, Meaning and nature, Formation and change in attitudes, Job related attitudes.

#### Module IV: Interpersonal Behaviour, Power & Politics

Interpersonal Dimensions of Behaviour; Transactional Analysis Implications of TA, Organizational communication, making communication effective, Power: Concept, determinants, types; Organizational Politics: Tactics, Impression Management.

#### Module V: Group Behaviour and Leadership

Group Behaviour; Types, Functions, Determinants of Group Behaviour, Inter Group Problems, Leadership: Nature and Significance of Leadership, Leadership Styles, Theories of Leadership; Trait Theory, Behavioural Theory, Managerial Grid.

#### Module VI: Change and Conflicts

Organizational conflict, Nature and types of conflict, Management of organizational conflict, Approaches to conflict management, Organizational culture, Learning and maintaining organizational culture, Organizational change, Planned change, Resistance to change, Organization development, Definition, Need for organization development, Organization development process.

### Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# FINANCIAL MANAGEMENT

**Course Code: LAW2310**

**Credit Units: 03**

## **Course Objective:**

To take decisions which are effective, a manager in any of the functional areas be it Marketing, HR or IT requires a thorough cost and benefit analysis and a feel for Finance so as to look at the long term implications of his/her decision. This course is a "nut and bolts" course on Finance where the basic Financial decisions will be explained through problems and exercises, thus giving the student an understanding and a feel for Financial decision making.

## **Course Contents:**

### **Module I: Introduction to Financial Management**

Evolution of Financial Management, Key activities of Finance Manager Changing Role of Finance Managers, Key Decision Areas in Financial Management, Objectives of the firm.

### **Module II: Financial Statement Analysis**

Introduction, objectives of financial statement analysis, Techniques-Ratio analysis, Comparative analysis and limitations of financial statement analysis, AS-20 (no numerical)

### **Module III: Valuation Concepts**

Concept of Time value of Money, Process of Compounding and Discounting, Future Value of a Single amount, Future Value of an Annuity, Present Value of a Single Amount, Present Value of an Annuity, Cost of capital, Weighted average cost of capital, Leverage Analysis

### **Module IV: Financing Decision**

Capital structure, Factors affecting Capital Structure decisions, Theory of Capital Structure Decisions, MM Theory, NI, NOI and Traditional theory, Pecking order theory.

### **Module V: Investment Decision**

Basics of Capital Budgeting, Types of capital budgeting decisions, Estimating cash flows for project appraisal, Green capital budgeting, Non-discounted Cash Flow Techniques: Payback Period, ARR, Discounted Cash Flow Techniques: NPV, IRR, PI. Risk Analysis of Capital Budgeting: Risk adjusted discount rate, Certainty Equivalent Approach.

### **Module VI: Working Capital Management**

Meaning and importance of adequate working capital, Excess or Inadequate working capital, Determinants of working capital requirement, Cash management, Receivable management and Inventory management – Sources of working capital.

### **Module VII: Dividend Decisions**

Importance of dividend decisions, Theories of Dividend decisions: Irrelevance theory, Optimal dividend decision, Relevance theory, Determinants of dividend policy: Bonus Shares, Stock Splits & Buyback of shares. Tax considerations.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# CONSTITUTIONAL LAW-I

**Course Code: LAW2303**

**Credit Units: 04**

## **Course Objective:**

The course aims at analyzing constitutional institutions, its powers, limitations and interrelationships with one another and seeks to mould a frame of mind in the student to appreciate and assess constitutional policy and changes for the future.

## **Course Contents:**

### **Module I: Fundamental Rights and Directive Principles, and Fundamental Duties**

Idea of Fundamental Rights and their importance, against whom the Fundamental rights are available? Definition of 'State'? Law in Art. 13, Directive Principles; Nature and reasons for incorporation, inter-relationship between fundamental rights and directive principles, judicial policy towards Directive principles from Champakam to Minerva Mills and thereafter, Art. 51-A (K) and its correlation with Art. 21-A.

### **Module II: Freedom and Personal Liberty**

Freedom of speech and expression and of press; Is Right to Information inclusive in Freedom of Speech and Expression? Freedom of Assembly, Freedom of Association, Freedom of Movement, Freedom to reside and settle, Freedom of profession/Business, etc. Art. 19: Are these freedoms absolute? Rights of an accused: Double Jeopardy, Self-incrimination and retrospective punishment, Art. 20; Right to life and personal liberty: Meaning of personal liberty, Procedure established by Law, Before Maneka Gandhi, Maneka Gandhi and thereafter, Art. 21; preventive detention and constitutional safeguards: Art. 22; Right to education Art. 21-A.

### **Module III: Equality and Protective Discrimination**

Equality before Law and equal protection of Laws, meaning, constitutional provisions Arts 14, 15, 16, 17, 29 (2), 325: Total conspectus, Classification for differential treatment, prohibited grounds of discrimination: Arts. 15(1), (2), (3), 16 (2), (3), 29 (2); Protective Discrimination in favour of SC / ST and other backward classes and recent trends eg. Schedule IX and Reservation Policy, Women and children Art. 15, 15(3), 15(4), 15(5) Abolition of titles – Arts. 18.

### **Module IV: Secularism**

Concept of Secularism, Indian Constitutional provisions, Indian concept of Secularism, Freedom of religion, Scope: Arts. 25, 26, Limits of Freedom, Religion and State in India, State Control and non-interference with religion; Minority rights: Why? Scope: Meaning and Minority, Minority right to educational institutions and judicial attitude.

### **Module V: Judicial Process under the constitution**

Judicial Review : Nature of Judicial Review, Arts. 32, 136, 141, 226, 227.

Judges: Appointments, conditions of service, etc; Public Interest Litigation.

Supreme Courts Original and Advisory Jurisdiction.

## **Examination Scheme:**

# MERGERS AND ACQUISITIONS

**Course Code: ECO2304**

**Credit Units: 03**

## **Course Objective:**

The main objective of this course is to familiarize the students with the basic aspects of mergers and acquisitions.

## **Course Contents:**

### **Module I: Mergers and Acquisitions – Overview**

Introduction – Forms of Corporate Restructuring, Expansion, Mergers and Acquisitions, Tender Offers, Joint Ventures, Sell Offs, Spin Offs, Split Offs, Split Ups, Divestitures, Equity Carve outs, Corporate Control, Premium Buy Backs, Standstill Agreements, Anti Takeover Amendments, Proxy Contests, Changes in Ownership Structures, Share Repurchases, Exchange Offers, Leveraged Buy, out, Going Private, Issue Raised by Restructuring, History of Merger Movements.

### **Module II: Mergers and Acquisitions**

Economic Rationale for Major Types of Mergers, Horizontal Mergers, Vertical Mergers, Conglomerate Mergers, Concentric Mergers.

### **Module III: Theories of Mergers**

Efficiency Theories, Differential Efficiency, Inefficient Management, Operating Synergy, Pure Diversification, Financial Synergy, Strategic Realignment to Changing Environments, Undervaluation, Information and Signaling, Agency Problems and Managerialism, Takeovers as a Solution to Agency Problems

### **Module IV: Divestment of Public Sector Undertakings and Leveraged Buy-outs**

General Economic and Financial Factors illustration of an LBO

Takeover Defenses

Anti-Takeover Amendments, Any case study

## **Examination Scheme:**

Components	CT	C	HA	A	EE
Weightage (%)	10	10	5	5	70

# INDUSTRIAL PSYCHOLOGY

**Course Code: MGT2305**

**Credit Units: 03**

## **Course Objective:**

This course is designed to provide an overview of I/O Psychology including individual, group, and organizational issues resulting in enhanced understanding of the world of business and related career concerns. The main aim is to create awareness about the role and importance of Psychological factors and processes in the world of work

## **Course Contents:**

### **Module I: Introduction**

Nature and scope of organizational Psychology, History and development of field, Major problems of Industrial Psychology, Current trends in organizational Psychology

### **Module II: Types of Psychology**

Mental psychology, Male & Female psychology, Impact on behavior and efficiency

### **Module III: Test of Psychology**

Types of Tests, Effectiveness of these tests, Measures to control the tests steps to improve the psychology

### **Module IV: Individual and group behavior**

Interaction and psychology involved in individuals, Improving psychology, Group Dynamics, Characteristics of group behavior, Attitude measurement, Methods of measuring attitudes, Leadership and supervision, Theories of Leadership.

### **Module V: Performance Management**

Performance appraisal- Introduction, types, importance, Training and development- Introduction, significance and categories/types.

## **Examination Scheme:**

Components	C	HA/P	CT	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# TERM PAPER

**Course Code: MGT2331**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from Indian any industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT (WITH PRESENTATION & EVALUATION)

Course Code: MGT2332

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report: The body of the report should have these four logical divisions
  - a. *Introduction*: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b. *Conceptual Framework / National and International Scenario*: (relating to the topic of the Project).
  - c. *Presentation of Data, Analysis and Findings*: (using the tools and techniques mentioned in the methodology).
  - d. *Conclusion and Recommendations*: In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexure: Questionnaires (if any), relevant reports, etc.  
(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

Step I: Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

- Chapter 1: Introduction,
- Chapter 2: Conceptual Framework / National & International Scenario,
- Chapter 3: Analysis & Findings

#### Chapter 4: Conclusion and Recommendations.

Step V: The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

#### **Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

#### **Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

**Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGT2333**

**Credit Units: 01**

**Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

**Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

## SUMMER INTERNSHIP EVALUATION-I

**Course Code: LAW2335**

**Credit Units: 03**

It is a mode of Clinical Legal education Specified period to be spent by the student with a law firm/court/Commissions/NGO's and like institutions working with the realm of law or connected therewith. The reports both by the student and the office together with diary where applicable to be certified will be submitted for evaluation

The Internship during the summer break is a compulsory course. There is a Internship Data form where students fill in the details of where they are interning with complete address and phone numbers Customized Legal Reference /Diary is provided to the students on payment They maintain a day to day record of the work that they do at the place they are interning. They are expected to intern for a minimum 90 days. They submit their completed diary, certificate from the employer and also a report of their experience at work. After submission there is a Viva by concerned faculty. They assess the student on the kind of work they have done during internship, presentation of the work they have done and also on the practical knowledge they have gained

The Paper is marked out of 100 marks. The break up of the marks is as follows:

1.	Diary submission	25 Marks
2.	Report and certificate	25 Marks
3.	Viva (Panel of External Examiners)	40 Marks
4.	Attendance (Regularity in meeting the supervisor)	10 Marks
	<b>Total</b>	<b>100</b>

# Syllabus - Fourth Semester

## BUSINESS ENVIRONMENT

**Course Code: LAW2409**

**Credit Units: 03**

**Course Objective:**

The aim of the course is to orient the students towards the basic concepts of Indian and global business environment.

**Course Contents:**

**Module I: Overview of Business Environment**

Meaning and types of business environment, Internal and external environment, Micro and macro environment, Factors (Cultural, social, Political economic legal, demographic and technological) effecting business environment.

**Module II: Indian Industrial environment**

Industrial policy up to 1991, New industrial policy, Liberalisation, Privatisation and Globalization process in India, Disinvestment, Industrial sickness, MRTP act 1969, Competition law 2002, Foreign Exchange Regulation Act and Foreign Exchange Management Act (FERA and FEMA).

**Module III: Financial Environment**

Indian money and capital markets: meaning, functions and constituents, Stock exchange- importance and functions, SEBI, Capital market reforms and development, Industrial financial institutions (IDBI, SIDBI, ICICI, IFCI etc.).

**Module IV: Labour Environment**

Labour legislation in India, Social security benefits, Industrial disputes- causes and preventive measures, Settlement of disputes, International Labour Organisation (ILO), Trade union- meaning and functions, Trade Union Act.

**Module V: Economic Planning and Development**

Planning in India- needs and objectives, five year plans, planning commission, 11<sup>th</sup> five year plan, Green and white revolution- achievements and failures, Second green revolution, foreign trade policy 2009, Export processing zones, Export oriented units, Special economic zones (EPZ's, EOU's, SEZ's) and trading houses in India.

**Module VI: Global Environment**

Bretton woods system, features of Uruguay round of negotiations, GATT/ WTO- role, functions and ministerial conferences, IMF, World Bank (International Bank for Reconstruction and Development), Regional economic cooperation institutions, SAARC, EU, NAFTA and ASEAN.

**Examination Scheme:**

# RESEARCH METHODOLOGY AND REPORT PREPARATION

**Course Code: MGT2410**

**Credit Units: 03**

## **Course Objective:**

To provide an exposure to the students pertaining to the nature and extent of research orientation, which they are expected to possess when they enter the industry as practitioners. To give them an understanding of the basic techniques and tools of marketing research. To train the students in evaluating and developing the marketing information system.

## **Course Contents:**

### **Module I: Introduction**

Nature and scope of marketing research, Marketing research as input in decision making process, Marketing research and marketing information system. Applications of marketing research, Planning a research project, Problem identification and formulation of Research Design, introduction to Research Design, Market research on the Internet.

### **Module II: Data collection methods**

Attitudes measurement and scaling techniques, Ratio, Interval, Ordinal and nominal scales, Likert's scale, Thurstone scale, Semantic differentiation method. Observation methods and questionnaire method, Questionnaire design, Steps in constructing a questionnaire, Types of questions, introduction to Projective techniques and perceptual mapping.

### **Module III: Sampling**

Sampling decisions, Sampling frame, Sample selection methods - Probability and non probability, Sample size, sampling error and error in sampling. Application of sampling methods to marketing problems.

### **Module IV: Data Collection Field Force**

Data collection field force, Fieldwork procedure, common sources of error in the fieldwork, minimizing fieldwork errors, Tabulation of collected data.

### **Module V: Data Analysis**

Data analysis-I, Test of significance Z, t, F and chi-square, Data analysis-II, Correlation and regression techniques, Data analysis – III – Cluster Analysis, Introduction to Statistical Package

### **Module VI: Report Writing**

Research presentation and research process examination; Report writing - Types of research report. Examination of the research procedure, Selected applications of marketing research, identifying market segments, Product research, Advertising research.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

# ADMINISTRATIVE LAW

Course Code: LAW2404

Credit Units: 04

## Course Objective:

Administrative law is as old as the administration itself. However, the form in which we find it today, Administrative is described a most outstanding legal development of the twentieth century. The reason for this development can only be attributed to a change of philosophy as regards the role and function of the State. The change in the concept of State from 'laissez faire' to a 'welfare state' has led to emergence of state activities in almost all spheres of human life. With the phenomenal increase in the area of state operation, the State was bound to take over a number of functions which were earlier left to private enterprise. In order to ensure that such functions are performed effectively and further due to certain other factors namely contingency, expertise etc. administrative agencies are given extraordinary powers and functions such as to make rules and deciding disputes apart from its wide discretionary powers. Obviously, this necessitated a new set of laws to check the possible abuses of such extraordinary powers on the part of administration. The courts in India and abroad in the course of time have developed various doctrines and methods to deal with such p[roblems. However, there is no end to this journey. The field is still open for new changes.

The main thrust of administrative law has been to study the nature of functions and powers exercised by the authorities on whom they have been conferred on and the study of remedies available to common man in case the limits of exercising power are transferred by such an authority. The focus or the centre point of this study, as usual as in cases of the study of other branches of public law, is the rights of individual *vis a vis* the public interest.

## Course Contents:

### Module I: Evolution, Nature and scope of Administrative law

Definitions, scope, classification and reason for the growth of administrative law; Relationship between constitutional law and administrative law; doctrine of Separation of Powers and its application in administrative law; Doctrine of Rule of law and application in administrative law.

### Module II: Legislative function of Administration

Delegated legislation: Necessity for delegated legislation, classification of delegated legislation and its requirement, constitutionality of delegated legislation, All form of control of delegated legislation i.e. Parliamentary, Procedural and Judicial control (doctrine of ultra vires).

### Module III: Judicial function of Administration

Reason for Administrative adjudication; Tribunals and classification of Tribunals; Principles of Natural Justice; Ombudsman: Lokpal, Lokayukta; Central Vigilance Commission (CVC).

### Module IV: Administrative discretion

Need and legality and abuses; Constitutional objections and discretion, failure to exercise discretion; Doctrine of proportionality; Legitimate expectation.

### Module V: Judicial control of administrative action

Courts as the final authority to determine the legality of Administrative actions ; Public Interest Litigation and the principle of *locus standi*, laches, Judicial review ; scope and extent, statutory appeals, writs.

## Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# BUSINESS INFORMATION AND DATA BASE SYSTEM

**Course Code: MGT2404**

**Credit Units: 03**

## **Course Objective:**

The aim of this course is to introduce the students to the managerial issues relating to information systems, its role in organization and how information technology can be leveraged to provide business value.

## **Course Contents:**

### **Module I:**

MIS need and concepts, characteristics, Typology of MIS, Structure of MIS. Planning for MIS, System Development Methodologies, Conceptual and detailed designs of MIS, System Implementation strategies and process, System Evaluation and Maintenance.

### **Module II:**

Introduction to data base management system- Data versus information, record, file; data dictionary, database administrator, functions and responsibilities, file-oriented system versus databases system.

### **Module III:**

Advanced Concepts in Information Systems: Enterprise Resource Planning, Supply Chain Management, Customer Relationship Management, Data, Warehousing and Data Mining.

### **Module IV:**

Database system architecture- Introduction, schemas, sub schemas and instances; data base architecture, data independence, mapping, data models, types of database systems.

### **Module V:**

Data base security- Threats and security issues, firewalls and database recovery; techniques of data base security; distributed data base.

## **Examination Scheme:**

<b>Components</b>	<b>C</b>	<b>H</b>	<b>CT</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	10	5	5	70

# TERM PAPER

**Course Code: MGT2431**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Credit rating
  - Risk management
  - Subprime meltdown and its after effect with case study from Indian industry
  - Corporate frauds
  - Micro finance institutions in India
  - Carbon Trading
  - IFRS
  - Celebrity Endorsement in real estate
  - Social media marketing
  - Green marketing
  - Sustainable branding practices
  - Relationship management
  - CSR
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **EVALUATION**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Total</b>
40	40	20	100

# PROJECT (WITH PRESENTATION & EVALUATION)

Course Code: MGT2432

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report: The body of the report should have these four logical divisions
  - a. *Introduction*: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b. *Conceptual Framework / National and International Scenario*: (relating to the topic of the Project).
  - c. *Presentation of Data, Analysis and Findings*: (using the tools and techniques mentioned in the methodology).
  - d. *Conclusion and Recommendations*: In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexures: Questionnaires (if any), relevant reports, etc.  
(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

Step I: Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Step V: The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

Guidelines for evaluation:

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

# WORKSHOP

**Course Code: MGT2433**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

Accounting

Finance

Human Resources

Marketing

Economics

Operations

Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Business Game

Simulation

Group Activity

Role Play

Business Planning

Quiz

## **EVALUATION**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# Syllabus - Fifth Semester

## LAW OF EVIDENCE

**Course Code: LAW2502**

**Credit Units: 04**

**Course Objective:**

This paper is to orient students with importance of evidence for establishment of claims and the related rules and principles.

**Course Contents:**

**Module I: Definitions and Relevancy of Facts**

Evidence and its relationship with the substantive and procedural laws ;Definitions : Facts, facts in issue, relevant, evidence proved, disproved, not proved, oral and documentary evidence ;Relevancy and admissibility; Doctrine of *res gestae* ;Conspiracy.

**Module II: Admissions, confessions and statements by person who cannot be called as witnesses:**

Definition of admission, who can make admissions by or on their behalf, proof of admission against the persons making them and admissions in civil cases. (Section 17-23, 31); Definition, relevance and consideration of confessions (section 24-30); Dying declaration (Section 32 and Section 33). **Opinion of Third Persons (Sec. 45 to 51) & Character Evidence (Sec. 52 to 55).**

**Module III: Documentary Evidence**

Primary and Secondary Evidence, Proof and verification of documents; Public documents and presumption as to documents.

**Module IV: Production and Effect of Evidence**

Burden of proof (Sections 101-114); Estoppels (Section 115); Competence of witnesses (Sections 118-120).

**Module V: Examination of Witnesses (Sections 135-166) and Rejection of evidence (Section 167)**

Examination –in-chief : Cross Examination, Re-examination; Leading questions; Hostile witnesses; Refreshing memory; Judge’s power to put questions or order production.

**Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

# CODE OF CIVIL PROCEDURE

**Course Code: LAW2503**

**Credit Units: 04**

## **Course Objective:**

This paper is to help a law student to acquire a thorough knowledge of procedural aspects of working of civil courts and other machineries.

## **Course Contents:**

### **Module I: Initial steps in a suit**

Jurisdiction and place of suing; Institution of suit, cause of action, joinder, non-joinder and mis-joinder of parties; Summons; Pleadings: Meaning, object, General rules, Amendment of pleadings; Plaint and written statement: Particulars, set off and counter claim; Admission return and rejection; Discovery, Inspection and production of documents; Appearance and non-appearance of parties, ex-parte proceedings; First hearing: Meaning, object, framing of issues, omission to frame issues, disposal of suit in the first hearing; Trial: Summoning and attendance of witnesses, summons to produce documents, adjournment, hearing of suit.

### **Module II: Significant Terms and Definitions**

Definitions: Decree, Judgment, Order, Foreign Court, Foreign Judgment, Mesne, Profits, Affidavit, Suit, Plaint, Written Statement, Suit of civil nature ;Important Concepts: Res Sub-Judice, Resjudicata, Restitution, Caveat, Inherent powers of courts.

### **Module III: Interim Orders**

Commissions, Arrest before judgment, Attachment before judgment, Temporary Injunctions, Interlocutory orders, Receiver, Security of costs.

### **Module IV: Suits in Particular Cases**

Suits by or against Government, Suits by Indigent persons, Interpleader Suit, Summary Procedure, Suits relating to public nuisance. Execution Proceedings

### **Module V: Law of Limitation**

Definitions, period of limitation, plaintiff, defendant; and in foreign countries, limitation of suits, appeals, and application, computation of period of limitation.

## **Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

# PROJECT (WITH PRESENTATION & EVALUATION)

Course Code: MGT2532

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
  - 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
  - 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
  - 4) Body of the Report: The body of the report should have these four logical divisions
    - *Introduction*: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
    - *Conceptual Framework / National and International Scenario*: (relating to the topic of the Project).
    - *Presentation of Data, Analysis and Findings*: (using the tools and techniques mentioned in the methodology).
    - *Conclusion and Recommendations*: In this section, the concluding observations based on the main findings and suggestions are to be provided.
  - 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
  - 6) Annexures: Questionnaires (if any), relevant reports, etc.
- (The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

Step I: Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Step V: The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

# WORKSHOP

**Course Code: MGT2533**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

Accounting

Finance

Human Resources

Marketing

Economics

Operations

Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Business Game

Simulation

Group Activity

Role Play

Business Planning

Quiz

## **EVALUATION**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# FINANCIAL SERVICES

**Course Code: MGT2506**

**Credit Units: 03**

## **Course Objective:**

The aim of the course is to orient the student to the recent changes in the financial institutions and financial services industry and their link to economic development. The financial institutions and services are changing rapidly. A course that merely describes the existing institutions and services will not prepare you for the change. Thus you must familiarize yourself with the services available in the industry today and understand why they are the way they are and why they are changing. An Indian perspective will be given.

## **Course Contents:**

### **Module I: Financial Services**

Role of Financial Services in economic development. Evolution of Financial Services Sector in India. Marketing of Financial Services (Introduction)

### **Module II: Venture Capital**

Venture Capital Financing, International Experiences in Venture Capital Financing, Venture Capital Financing in India, Pitfalls to be avoided. Preparation & evaluation of Business Plan

### **Module III: Factoring & Forfaiting**

Factoring Services - Features Merits and Demerits, Cost Benefit Analysis. Forfaiting: Features, merits & Limitations

### **Module IV: Leasing and Hire Purchase**

Development of Leasing and Hire Purchase, Types of Leasing, Pricing Methodology and Financial analysis, Taxation, Legal Framework for Leasing and Hire Purchase Companies

### **Module V: Mutual funds**

The concept & Role of M/Fs, History of M/Fs in India, Types of M/Fs, Fund Structure & constituent, Selecting the right Investment Products for Investors, Comparison of Investment products, Measuring of Risk In M/Fs, Recommending model Portfolios & selecting the right funds.

### **Module VI: Credit rating & other financial services**

Credit rating concept of Credit rating, Types of credit rating, Advantages and Disadvantages of credit rating, Credit rating agencies and their methodology and process, Individual Credit rating, Sovereign Credit Rating Practices. Custodial Services, Credit Cards

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

# TERM PAPER

**Course Code: MGT2631**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Credit rating
  - Risk management
  - Subprime meltdown and its after effect with case study from Indian industry
  - Corporate frauds
  - Micro finance institutions in India
  - Carbon Trading
  - IFRS
  - Celebrity Endorsement in real estate
  - Social media marketing
  - Green marketing
  - Sustainable branding practices
  - Relationship management
  - CSR
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Total</b>
40	40	20	100

# PROJECT (WITH PRESENTATION & EVALUATION)

Course Code: MGT2632

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report: The body of the report should have these four logical divisions
  - a. *Introduction*: This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b. *Conceptual Framework / National and International Scenario*: (relating to the topic of the Project).
  - c. *Presentation of Data, Analysis and Findings*: (using the tools and techniques mentioned in the methodology).
  - d. *Conclusion and Recommendations*: In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexures: Questionnaires (if any), relevant reports, etc.  
(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

Step I: Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

Step III: Collection of information and data relating to the topic and analysis of the same.

Step IV: Writing the report dividing it into suitable chapters, viz.,

- Chapter 1: Introduction,
- Chapter 2: Conceptual Framework / National & International Scenario,
- Chapter 3: Analysis & Findings

## Chapter 4: Conclusion and Recommendations.

Step V: The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

### **Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

# WORKSHOP

**Course Code: MGT2633**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

Accounting

Finance

Human Resources

Marketing

Economics

Operations

Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Business Game

Simulation

Group Activity

Role Play

Business Planning

Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# CORPORATE TAX PLANNING

**Course Code: MGT2605**

**Credit Units: 03**

## **Course Objective:**

To provide understanding of Direct Tax including Rules pertaining there to and application to different business situations. To understand principles underlying the Service Tax and concepts of VAT.

## **Course Contents:**

### **Module I: Introduction to Tax Management**

Concept of tax planning, Tax avoidance and tax evasions, Corporate taxation.

### **Module II Income from business**

Residential Status of companies, Taxable income under Business and Profession, Computation of Profit and Gains from business profession, Deemed business profits, Assessment of Retail Business, Deemed incomes (cash credit, unexplained investments, unexplained money and other assets, unexplained expenditures, investments and valuable articles not fully disclosed in books of accounts).

### **Module III: Deductions allowed under business and profession**

Deduction Expressly allowed section 30-35, Depreciation deduction calculation, Setoff and carry forward of unabsorbed depreciation section 32(2). Determining Actual Cost 43(1), Set-off and Carry Forward Losses, Bonus or commission to employees section, Interest on borrowed capital, Insurance premium 36(1(i)), Employees contribution to provident fund, Bad debts 36, Revenue expenditure incurred by statutory corporation, Banking transaction tax, Security transaction tax, Commodity transaction tax, provision for admissibility of general deduction 37(1),

### **Module IV: International accounting and Taxation**

Analysis of foreign financial statement, Accounting standard: US GAAP, Indian GAAP, IAS, IFRS. Transfer Pricing – Meaning, measurement, strategic considerations Norms & Practices, tax havens, Double taxation agreement among countries, Tax implication of activities of foreign enterprise in India: Mode of entry and taxation respectively.

### **Module V: Indirect tax - concepts and general principles**

Service tax - Charge of service tax and taxable services, Valuation of taxable services, Payment of service tax and filing of returns.

VAT – Introduction, Calculation of VAT Liability including input Tax Credits, Small Dealers and Composition Scheme, VAT Procedures, Central Sales Tax.

### **Module VI: Tax Planning and Financial Management Decisions**

Tax planning relating to capital structure decision, Dividend policy, Inter – corporate, dividends and bonus shares, Tax provisions relating to free trade zones, Infrastructure sector and backward areas, Tax incentives for exports. Tax deductions and collection at source, Advance payment of tax.

## **Examination Scheme:**

# TAXATION LAW

**Course Code: LAW2802**

**Credit Units: 05**

## **Course Objective:**

Power to tax has been described as the power to destroy. This idea is being floated often whenever the State introduces a new tax. Is this true? Is it not necessary that in order to raise revenue and place the economy on solid foundation, the taxing power should be conferred on the State? The power to tax shall not go unregulated. In this context of a federal structure the distribution of the taxing powers assumes added significance. Obviously, a study of the Constitutional framework on taxation becomes important. Along with this, an analysis of the different laws enacted in exercise of these powers with their safeguards and remedies sheds light on the mechanics of the taxation by the Union and the States.

## **Course Contents:**

### **Module I: General Principles of Taxation Laws**

History and Development of Tax Laws in India, Fundamental Principles relating to Tax Laws, Taxing power and constitutional limitations, Distinction between: Tax, Fee and Cess; Tax avoidance and Tax evasion .

### **Module II: Basic concepts of Income Tax**

Income, Previous Year, assessment Year, Person, Assessee and Total Income, Income not included in the Total Income. Residential status, Clubbing of Income, Tax planning, Rate of Income Tax, Heads of Income, Salaries, Income from House Property, Income from Business or Profession, Capital Gains, Income from Other sources, Deductions under the Income Tax Act, 1961, Income Tax Authorities: Power and Functions, Filing of returns and procedure for assessment, Offences and Penal Sanctions .

### **Module III: Value Added Tax**

Meaning and importance of VAT, Difference between VAT and Sales Tax, West Bengal Value Added Tax Act, 2003, Criticisms and limitations of Vat system.

### **Module IV: Service Tax**

Taxable Service, Meaning and importance of Service Tax, Valuation of Taxable Service, Offences and Penalties.

## **Examination Scheme:**

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

## **Text & References:**

# FORENSIC SCIENCE-II

**Course Code: LAW2808**

**Credit Units: 05**

## **Course Objective:**

Forensic science is science related to the law. It is the scientific method of gathering and examining information about the past which is then used in a court of law. It is applied science and consists of a range of different disciplines which often require different underpinning science knowledge. It continues to evolve and is now applicable to crime disruption and crime prevention as well as crime detection and the identification of victims in mass disasters.

The course focuses on the following objectives:

1. Developing and understanding the concept of forensic anthropology
2. Brief description on the ballistic its analysis and reconstruction
3. Developing an understanding to wounds and its medico-legal aspect.
4. Developing an understanding on explosives and its crime scene investigations.

## **Course Contents:**

### **Module I: Forensic Anthropology**

Definition, scope, and application; time since death: assessing and determining the time and cause of death, study of burned bones and bones fragments; identification.

### **Module II: Ballistics**

Definition, Indian Arms Act, forensic importance, classification of firearms; ammunition; range of fire; firearms injuries, analysis and reconstruction.

### **Module III: Wounds and its medico-legal aspects**

Introduction to wounds; determining the age of the injury and its medico-legal aspect, injuries due to blunt forces, injuries due to sharp forces, miscellaneous injuries.

### **Module IV: Explosives and Explosion Scene Investigation**

Explosive Act: nature and classification, composition and characteristics of explosives, pyrotechnics, IEDs, specific approach to scene of explosion, post-blast residue collection, reconstruction of sequences of events; evaluation and assessment of scene of explosion and its examination.

### **Module V: Advanced fingerprint and other impression**

Fingerprint in personal identification, examination on the basis of poroscopy and its significances; evaluation of fingerprints on the basis of edgescopy and its significance in fingerprint field, Palmer, Planter and other impression its evaluation.

## **Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

# LAW AND MEDICINE-II

**Course Code: LAW2809**

**Credit Units: 05**

## Course Objective:

The course aims to provide the students the knowledge about the interrelationship between law and medicine and complex legal and ethical issues involved in the field of medicine and medical profession. The course include the ethical and legal issues in population control, surrogate motherhood, HIV/AIDS, the rights of the unborn, AID and Law, mental health and medical experimentation on human beings.

## Course Contents:

### Module I: Population control and community health

Law, Practice and Society- Causes for Population Explosion- National Population Policy, 2000- Terminal methods female sterilization and male sterilization- State Imposed sterilization and its legal validity- Population control and Right to family and Right to privacy.

### Module II: Surrogate Motherhood and the Rights of the Unborn

Surrogacy in foreign countries- Motherhood Debated-Legality of contract- problems-Refusal to accept the child-health Tourism and sanctity of woman's life- ICMR Code- The Unborn- Introduction- Right of an Unborn Child-Prenatal Diagnosis (and Amniocentesis)-Miscarriage

### Module III: AIDS

Rights, Freedom and duties of HIV/AIDS Patients- Privacy and Public health- Liberty and Security- Movement- Marriage and Finding a family- Right to work- Education for an infected person- Protection of children infected or born to infected parents- Right against degrading Treatment- Equality before law- access to medicine

### Module-IV

**International Norms-** general Provision-Consent-Human Genome-Scientific Research-Donors for Transplantation Purposes-Prohibition of Financial gain and Disposal of a part of the Human Body

### Module-V

**Mental Health-** Historical Background-types of Causes of Mental Illness- Development of the Human being and mental health-Prevention of Mental Illness and Treatment-Alcoholism and Drug Addiction- Mental health Act- Admission and discharge to mental hospital legal issues

### Module-VI

**Experiments of Human Beings-** The concept-Kinds of Experiments-Subject of Experimentation-controls-Clinical Trials-Studies in special Populations-Informed consent-Special Studies of Bioavailability and Bioequivalence-Ethics committee- Stem cell research- International documents and Indian laws-Ethical norms on experimentation

# INTELLECTUAL PROPERTY RIGHTS

**Course Code: LAW2902**

**Credit Units: 05**

## **Course Objective:**

The course is designed to provide comprehensive knowledge to the students regarding Indian position of the Patent Law (1970), Copy Right Law (1957) and Designs Act of 2000 which invariably form the part of Intellectual Property Law and shall comprise of the following.

The importance of this branch of the law is to be sufficiently realized in the Indian legal education. These areas are now internationally conceptualized as representing intellectual property. It is often the case that while the law of patents and trademarks is referred to as industrial property, the law relating to copyright is named intellectual property. While both these terms could be suitably invoked, we here speak of intellectual property as signifying all the three bodies of the law as well as the law on industrial designs.

Unlike other forms of property, intellectual property refers to regimes of legal recognition of, primarily, the products of the mind or imagination. The subject matter of property relations is here preeminently based on mental labour. The law relating to intellectual property protects the right to mental labour.

The law confers rights of proprietary nature on relative intellectual labour primarily on the basis that it is in the interests of society and state to promote creativeness and inventiveness. Limited monopoly provides incentive for greater inventive and innovative efforts in society. An important aspect of the exploration in this course would be ways in which the laws strike a fair balance between the interests and rights of the intellectual labourers on the one hand and organized industrial enterprises on the other. Another dimension is a study of the ways in which this regime of laws militates against, or favours, communal property in national cultures. As concerns 'modernization' crucial questions arise in the field of copyright protection in computer software and hardware, internet, electronic music and scientific research. Both copyright, trademarks, design and patent law here relate basically to the law of unfair competition and constitute an aspect of consumer protection and welfare not only in the context of national perspectives but also in view of the waves of globalization already set in. Both from the standpoint of human resources development, modernization and justice it is important that the law students get sufficient insights in Intellectual Property Law.

## **Course Contents:**

### **Module I: Introduction**

Intellectual Property, Concept and Philosophy, Need for Private Rights versus Public Interests, Advantages and Disadvantages of IPR.

### **Module II: Patent**

Development of patent law, Rationale for patent protection, Nature and definition, Types of patentable subject matter, Patentability criteria, non-patentable inventions, Rights of patentee, Procedure for granting a patent, Grounds for opposition, Transfer of patent rights, Compulsory Licenses, Acquisition, Surrender, Revocation, restoration, Patent infringement and remedies, Bio patents and software patents, Official Machinery, Controller, Powers and Functions, Patent in pharmaceutical industry, Patent cooperation treaty, Paris convention.

### **Module III: Copyright**

History, Concept of copyright, conditions for grant of copyright, extent of rights exception to copyright protection, fair use provision, assignment and licensing, Compulsory licensing and statutory licensing, Collective administration, Copyright board and office, powers and functions, Moral rights: Neighboring rights; infringement penalties and remedies, Appeals, Berne Convention, Universal Copyright Convention - WIPO Copyright Treaty: WIPO Phonograms and Performances treaty, TRIPS with respect to Copyright and Neighboring rights.

### **Module IV: Designs, Protection, Historical development, Rationale**

Designs Act of 2000: Meaning of Design, Conditions for grant of protection, Ambit of Protection, Exceptions, Registration of Designs, Cancellation, Copyright in Registered Designs, Enforcement, Infringement and remedies, Powers and duties of Controller.

### **Module V: Trademarks**

Evolution, Functions, Objective, Definition, Kinds of Marks, Domain names, Registration, Concurrent registration, Procedure for registration, Relative and absolute grounds of refusal, opposition and its grounds, Assignment, transmission and licensing of Trademarks, Infringement, Penalties and Remedies, Withdrawal of protection, Passing off, Official machinery for regulation administration and Redressal, Registrar, Difference between Trade Mark, **Trade Secret, Traditional Knowledge** and Geographical Indications, TRIPS on Trademarks, Madrid Agreement for The Repression of False or Deceptive Indications of Source on Goods, 1891- Madrid Agreement for the International Registration of Marks, 1891 and protocol relating to that agreement 1989.

### **Module VI: Plant Varieties Protection Act, 2001**

Objectives, Rationale, Registry, Official machinery, registration, Criteria of fulfillment Exclusions, Benefit sharing, Farmers rights, Community Rights, compulsory license Redressal forum, Appellate tribunal, Infringement, offences and penalties; Geographical indications of Goods (Registration and Protection Act, 1999: History, Definition, Rationale, Functioning, official Machinery, Registry, Rights conferred, Registration Procedure. Redressal Machinery, Appeal, Passing off, Offences, penalties and Procedure.

# READINGS IN MANAGEMENT

**Course Code: MGT2130**

**Credit Units: 02**

## **Objectives**

The objective of this concentration elective is to inculcate reading habit alongwith value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

## **Guidelines**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size16.

## **Evaluation Scheme**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

# TERM PAPER

Course Code: COM2131

Credit Units: 02

## Objectives

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face

## Guidelines:

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.

2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.

3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

### 4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)

- Credit rating
- Risk management
- Subprime meltdown and its after effect with case study from Indian industry
- Corporate frauds
- Micro finance institutions in India
- Carbon Trading
- IFRS
- Celebrity Endorsement in real estate
- Social media marketing
- Green marketing
- Sustainable branding practices
- Relationship management
- CSR
- Balanced Score Card
- Corporate Governance
- Employee retention
- NGOs.

## Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Total
40	40	20	100

# PROJECT

Course code: COM 2132

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

## components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III :** Collection of information and data relating to the topic and analysis of the same.

**Step IV :** Writing the report dividing it into suitable chapters, viz.,

Chapter 1:Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V :** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

# WORKSHOP

**Course Code: COM2133**

**Credit Units: 01**

## Objectives

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## Major Themes for Workshop

The workshop may be conducted on any of the following major themes:

Accounting

Finance

Human Resources

Marketing

Economics

Operations

Supply Chain Management

These themes are merely indicative and other recent and relevant topics of study may be included.

## Guidelines for Workshop

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## Methodology

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Business Game

Simulation

Group Activity

Role Play

Business Planning

Quiz

## Evaluation Scheme:

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# Syllabus - Second Semester

## FINANCIAL ACCOUNTING-II

**Course Code: LAW2206**

**Credit Units: 03**

### Course Objective:

To develop conceptual understanding of the fundamentals of financial accounting system which processes transactions and other events through a book-keeping mechanism to prepare financial statements, and also to impart skills in accounting for recording various kinds of business transactions.

### Course Contents:

#### Module I

##### Consignment and Joint Venture Accounts:

- (i) **Consignments:** Features, Accounting treatment in the books of the consignor and consignee.
- (ii) **Joint Ventures:** Accounting procedures: Joint Bank Account, Records Maintained by Co-venturer of (a) all transactions (b) only his own transactions. (Memorandum joint venture account).

#### Module II

Accounting for bills of exchange - bills receivable and payable, acceptance, endorsement, discounting, dishonour and renewal of bills, accommodation bills.

#### Module III

##### Partnership

Admission of a partner: partnership deed, goodwill valuation and treatment. Sacrificing ratio.  
Retirement and death of a partner: gaining ratio, goodwill treatment  
Dissolution of partnership: revaluation of assets and liabilities. Legal Position, Accounting for simple dissolution,  
Applications of rule in case of Garner Vs. Murray in case of insolvency of partner(s)  
(excluding piecemeal distribution and sale of a firm to a company).

### Examination Scheme:

components	A	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

A-Attendance; P -Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

### Text & References:

# BUSINESS MATHEMATICS

**Course Code: LAW2207**

**Credit Units: 04**

## **Course Objective:**

To familiarize the students with basic mathematical tools and the application of the same to business and economic situations.

## **Course Contents:**

### **Module-I:**

Arithmetic Progressions, Geometric progressions and Harmonic Progressions: Definition of A.P, G.P and H.P. Simple Examples

### **Module-II: compound Interest and Annuities**

Certain different types of interest rates; Concept of present value and amount of a sum; Types of annuities; Present Value and amount of an annuity, including the case of continuous compounding; valuation of simple loans and debentures; problems relating Sinking Funds.

### **Module III: Matrices and determinants**

Definition of a matrix; Types of matrices; Algebra of matrices; properties of determinants; calculation of values of Determinants upto third order; Adjoint of a matrix, Finding inverse of a matrix; Rank of a matrix, Solution of system of linear equations by Cramer's Rule and Matrix Inverse Method (including not more than three variables).

### **Module IV: Differentiation**

Definition; Derivative using first Principle; Method of Differentiation of sum, difference, product and Quotient of two functions; Derivative if composite, inverse, exponential, Logarithmic, parametric and Implicit functions; second order derivative.

### **Module V: Maxima and minima**

Case of one variable involving Second Order derivative; Average Cost, Average revenue functions, marginal cost, marginal revenue, Elasticity of demand.

### **Module VI: Integration**

Integration as anti-derivative process; Standard forms; Method of Integration by substitution, by parts and by use of partial fractions. Definite integral and their properties; Finding areas in simple cases; Determination of Cost, revenue and demand function; Consumer's surplus and Producer's surplus.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

A-Attendance; P -Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

## ENGLISH-II

**Course Code: LAW2203**

**Credit Units: 03**

### **Course Objective:**

Efficiency of advocacy depends upon communication skills to a substantial extent. The student should be conversant with legal terminology. A student should be equipped with writing skills of and presentation skills which are essential for effective advocacy.

### **Course Contents:**

#### **Module I: Introduction of Legal Language**

Legal maxims (Introduction and meaning), & Foreign legal words.

#### **Module II: Translation and usage of words**

Translation of legal Para from Hindi to English and vice versa, one legal word-substitute, Usage of common Hindi and Urdu words used in Courts.

#### **Module III: Presentation skills**

Presentation Skills: Speeches, Preparing presentation material, Planning the talk, Preparing visual aids, Delivering presentation, Managing your audience, Question and Answers, Introduction, summing up, vote of thanks and repertoire.

#### **Module IV**

Communication for the Courts: including drafting of moot memorials.

### **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>A</b>	<b>C</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

# LAW OF CONTRACT-II

Course Code: LAW2204

Credit Units: 04

## Course Objective:

This course shall be taught after the students have been familiarized with the general principles of Contract in which the emphasis is on understanding and appreciating the basic essentials of a valid Contract and on the existence of Contractual relationship in various instances. Obviously, Contract Law assumes special significance to suit changes in society. These special Contracts are studied in the light of statutory provisions and decisional Law. With the advent of globalization in various sectors of economy today and are in need of specialized legal Professionals due to huge contractual requirements, joint venture Partnerships and the like, Therefore, this Course of Special Contracts provides an insight into the justification for special statutory provisions for certain kind of Contracts.

## Course Contents:

### Module I: Indemnity and Guarantee/Bailment and Pledge

Meaning, Distinction between Indemnity and Guarantee, Right / Duties of Indemnifier, Indemnified and Surety, Discharge of Surety, Kinds of Guarantee, Bailment and Pledge: Meaning and Distinction, Rights and Duties of Bailor/Bailee, Pawnor/Pawnee, Lien, Termination of Bailment.

### Module II: Agency

Definitions of Agent and Principal, Appointment of an Agent, Authority of an Agent, Creation of agency: by agreement, Ratification and law, Relation of principal / agent, subagent and substituted agent, Ratification of Agents Authority, Revocation of Agency Authority, Effects of Agency on Contracts with third person, Personal Liability of agents, Termination of agency.

### Module III: Sale of Goods Act 1930

Contract of Sale: Nature and definition, Conditions and Warranties, Transfer of Property and Title, Performance of the contracts, rights of unpaid seller, suit for breach of contract.

### Module IV: The Indian Partnership Act, 1932

Nature of partnership firm, Relations of partners to one another and outsiders, Rights /Duties of partners *inter se*, Partnership Property: Relations of Partners to third parties, Liability for holding out, Minor as a partner; Incoming and outgoing partners, Dissolution of Partnership Firm, Modes of Dissolution, Consequences of dissolution, Registration of firms and effects of non registration.

## Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# COMPUTER APPLICATIONS IN BUSINESS

**Course Code: COM2204**

**Credit Units: 03**

## **Course Objective:**

To provide computer skills and knowledge for commerce students, and to make them complacent with the use of new tools of IT.

## **Course Contents:**

### **Module I**

General features of a computer. Generation of computers. Personal computer, Workstation, Mainframe computer and super computers. computer applications – data processing, information processing, Application areas of computer.

### **Module II**

Computer organization. Central processing module. Computer memory- primary memory and secondary memory. Secondary storage devices – magnetic and optical media. Input and output modules. OMR, OCR, MICR, scanner, mouse, Modem.

### **Module III**

Computer hardware and software. Machine language and high level language. Application software. Computer program. Operating system. Computer virus, Antivirus and Computer security, Windows OS and its features.

Computer arithmetic. Binary, octal and hexadecimal number systems. Algorithm and flowcharts. Illustrations. Elements of database and its applications.

### **Module IV**

Introduction to MS office Packages- Ms-Word – Editing a Document – Move and Copy text – Formatting text and paragraph – Finding and Replacing text and spelling checking – Using tabs, Tables, and other features, Enhancing document – using mail merge and other features.

Introduction to Worksheet- Getting started with excel – Editing Cells and using commands and functions – Moving And Coping, Inserting and Deleting Rows and Columns – Getting help and formatting a worksheet – Printing the worksheet – Creating Charts – using formulae and functions in excel. Introduction to Power Point Presentation

### **Module V**

Computer Networks & Internet Technology

Introduction to Computer Networks, Networking Components, Classification and types of Networks, Network Topologies – Overview with Advantages and Disadvantages, Communication Channels, Client Server Architecture, LAN concepts.

Introduction to internet intranet and Extranet, Myths about the Internet, Basic concepts of internet, Domain Name Service, Internet Protocols and Addressing, Services of internet, Internet and support Technologies, Censorship and Privacy issues

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>HA</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

A-Attendance; P -Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

# ANALYSIS AND DESIGN OF BUSINESS SYSTEMS

**Course Code: MGT2204**

**Credit Units: 03**

## **Course Objective:**

The course aims at preparing students conceptualize and define scope and domain of system analysis and design. It also focuses on system development life cycle using conventional and structural look.

## **Course Contents:**

### **Module I: The systems development Environment. (Information system development life cycle)**

System & its parts, Types of Systems, Characteristics of a System, System Analyst in system Development, Developing Systems- SDLC, Approaches to System Development (Prototyping, Joint Application Design (JAD), Participatory Design (PD)), System Development Models (Waterfall model & Spiral Model), System Planning & Selection (Identifying, Selecting, Initiating & Planning System Development Project).

### **Module II: System Planning and Selection (Graphic technology modeling tool)**

Identifying and Selecting Projects (Identifying potential development projects, classifying and ranking projects, and selecting projects for development), Methods for project identification and selection, Evaluation criteria for classifying and ranking projects, Initiating and Planning System Development Projects (Process & performed Activities, Deliverables & Outcomes), Assessing Project Feasibility (Economic, Operational, Technical, Schedule, Legal & Contractual, Political Feasibility)

### **Module III: System & Data Analysis (Data Analyzing Modeling)**

Determining System Requirements (Traditional Methods, Modern & Radical Methods), Structuring System Requirements (Process Modeling – DFD, Logic Modeling – Structured English & Decision Tables, Conceptual Modeling – ER Model), Data Analysis & Techniques (Interpretive, Coding, Recursive Abstraction and Mechanical Technique), Types of Analysis (Descriptive, Exploratory, Confirmatory and Predictive), Modeling Methodologies (Bottom Up method & Top Down Method), Generic and Schematic Data Modeling.

### **Module IV: System & Database Design**

System Design (Design Objectives, Phases in Designing, Purpose of System Design), System Design Goals, Type of Design, Design Strategy, System Decomposition (Modeling, Connection and Coupling of a System), System Design Methodologies, Database Design, Database Management System – an introduction, Overview of Data Models, Relational Database Model – Well structured relations, Keys, Schema & Subschema, Structure, Facilities & Users, Constraints, Anomalies, Functional Dependency, Normalization, Roles & Duties of System Administration.

### **Module V: System Implementation & Operation (System Management)**

Activities in implementing (Coding, Testing & Installation, Documentation, Training, Support, Maintenance), Types of testing, planning installation, approaches to installation, Documenting a system, Training and Supporting users, Types & Frequencies of Training Methods, Reasons of System Implementation Failures, Project Closedown, Conducting System Maintenance – Types of Maintenance (Corrective, Adaptive and Perfective Maintenance), effective maintenance, Evaluation of System's Success, System Enhancement, Quality Assurance in System Cycle.

### **Module VI: System Security and Auditing**

System Security: Data Security, Backup & Recovery during System & Database failure, Ethical Issues in System Development, Threat and Risk Analysis, Audit, System Audit, System Audit Standards (Planning, Implantation and Reporting Standards), System Analysis and Programming (Overview, Role & Duties of System Experts as Analyst and Programmer).

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>HA</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

**A**-Attendance; **P** -Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination

# INNOVATION & CREATIVITY MANAGEMENT

**Course Code: MGT2205**

**Credit Units: 03**

## **Course Objective:**

To develop an appreciation for new ideas and out of the box thinking so that students can successfully imbibe the habit of innovative and creative thinking in situations is demanding such an approach.

## **Course Contents:**

### **Module I:**

Innovation Management- Introduction, characteristics, components, Types, Models of Innovation process, Innovation Environment-Originators of Innovation, Key Drivers of Innovation, Factors influencing innovation, Nurturing innovation in e-business.

### **Module II:**

Organizing for Innovation- Organizational theories and structures, traits of innovative organizations, current trends, factors influencing organizational design and size decisions, Need & Characteristics for creative organization, 7S framework, creativity crushers, fostering innovation climate and culture, The creativity Hit List.

### **Module III:**

Research and Development management- Significance, Prerequisites, Process, Technology development approaches, management of R &D, In source to open source environment, R&D in small industry, Managing Creative employees, significance and challenges of managing creative employees, Traits of a creative person, motivation to creativity, strategies for unblocking creativity, factors influencing group creativity, Promoting group creativity, Left and right thinking, Linear and non-linear thinking process, creative thinking, Tradition vs creative thinking.

### **Module IV:**

Individual creativity techniques- Inner and Directed creativity techniques, Group Creativity Techniques-creativity methods, writing techniques, techniques based on pictures, maps and networks, Product innovation-types of new products, Target markets for Disruptive Innovation, Technology strategies for innovation, new product development, packaging and positioning innovations, beyond product innovation, New product failures.

### **Module V:**

Innovation Diffusion- Concept of diffusion and adaptation, diffusion types, Innovation diffusion theory, Innovation adoption by organizations, Innovation adoption across countries, Marketing strategy and the diffusion process.

### **Module VI:**

Legal aspects of innovation- IPR, Indian Patents Act, trademark, Copyrights, Trade secrets, Towards Innovative Society-Innovation for social development, Spirit of innovation in India, Favourable and Unfavourable factors.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

A-Attendance; P -Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

# HUMAN VALUES AND PROFESSIONAL ETHICS

**Course Code: MGT2206**

**Credit Units: 03**

## **Course Objective:**

The aim of this course is to facilitate the development of a holistic perspective among students towards life, profession and happiness, based on a correct understanding of the Human reality and the rest of Existence. Such a holistic perspective forms the basis of value based living in a natural way. Recognize the need for lifelong learning and have the knowledge and skills that prepare them to identify the Moral issues involved in Management areas and to provide an understanding of the interface between Social, Technological and Natural environments.

## **Course Contents:**

### **Module I: Human Values**

Morals, Values, Types of values, evolution of human values, Ethics – Integrity – Work Ethic – Honesty – Courage –Empathy – Self-Confidence – Character, Challenges at Work place

### **Module II: Values in Management**

Relevance of values in Management, need for values in global change, values for managers, holistic approach for managers in decision making, problems related to stress in corporate management

### **Module III:**

Workplace Rights and Responsibilities: Organizational Complaint procedures. Government agencies. Resolving Employee concerns. Limits on acceptable behavior in large corporation.

Work environment: Ethical and legal considerations, Organizational responses to offensive behavior and harassment. Ethics in a Global Context.

### **Module IV: Industrial Integrity**

The epitome of industrial success, Integrity and organization, Exploring learning process of integrity, Consequences of lack of integrity.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

A-Attendance; P -Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

# READINGS IN MANAGEMENT

**Course Code: MGT2230**

**Credit Units: 02**

## **Objectives**

The objective of this concentration elective is to inculcate reading habit alongwith value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

## **Guidelines**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size16.

## **Evaluation Scheme**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

# TERM PAPER

Course Code: COM2231

Credit Units: 02

## Objectives

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## Guidelines:

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.

2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.

3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

### 4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)

- Credit rating
- Risk management
- Subprime meltdown and its after effect with case study from Indian industry
- Corporate frauds
- Micro finance institutions in India
- Carbon Trading
- IFRS
- Celebrity Endorsement in real estate
- Social media marketing
- Green marketing
- Sustainable branding practices
- Relationship management
- CSR
- Balanced Score Card
- Corporate Governance
- Employee retention
- NGOs.

## Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Total
40	40	20	100

# PROJECT

Course Code: COM2232

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following Components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III :** Collection of information and data relating to the topic and analysis of the same.

**Step IV :** Writing the report dividing it into suitable chapters, viz.,

Chapter 1:Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V :** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

# WORKSHOP

**Course Code: COM2233**

**Credit Units: 01**

## Objectives

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## Major Themes for Workshop

The workshop may be conducted on any of the following major themes:

Accounting

Finance

Human Resources

Marketing

Economics

Operations

Supply Chain Management

These themes are merely indicative and other recent and relevant topics of study may be included.

## Guidelines for Workshop \

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## Methodology

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Business Game

Simulation

Group Activity

Role Play

Business Planning

Quiz

## Evaluation Scheme:

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# Syllabus - Third Semester

## CORPORATE ACCOUNTING

**Course Code: LAW2307**

**Credit Units: 03**

### Course Objective:

This course enables the students to develop awareness about Corporate Accounting in conformity with the Provision of companies' Act and latest amendments thereto with adoption of Accounting Standards that are likely to be introduced from time to time.

### Course Contents:

#### Module I- Introduction to Corporate Accounts

Statutory records to be maintained by a company; Accounting for share capital transactions- issue of shares at par, at premium and at discount; forfeiture and re-issue of shares; buy-back of equity shares; redemption of preference shares - statutory requirements, disclosure in balance sheet; rights issue.

#### Module II

Issue & Redemption of debentures - accounting treatment and procedures; conversion of debentures into shares; Final accounts of Limited liability companies; Preparation of Profit & Loss account, Profit & Loss appropriation & Balance Sheet account in accordance with the provisions of existing companies act( excluding managerial remuneration).

#### Module III

Holding and subsidiary companies - accounting treatment and disclosures; consolidation of accounts.

#### Module IV

Valuation of Goodwill and shares

Good will- Meaning, definition, elements, types and methods of valuation of Goodwill, Methods of share valuation (Equity & preference shares).

#### Module V

Accounting treatment for amalgamation with reference to As-14 (excluding intercompany transactions & holdings), absorption and reconstruction of companies; internal & external reconstruction, Liquidation – Preparation of Liquidator's Statement of affairs, deficiency /surplus statement, calculation of pro rata treatment of uncalled capital.

### Examination Scheme:

Components	A	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

A-Attendance; P -Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

# STATISTICAL METHODS IN RESEARCH-I

**Course Code: LAW2308**

**Credit Units: 03**

## **Course Objectives:**

To provide basic understanding of quantitative tools and their elementary application to business problems.

## **Module I- Introduction to Statistics**

Basic Concepts, Primary & Secondary data, classification of data, Graphical representation of data, frequency distribution.

## **Module II- Central Tendency and Dispersion**

Measures of central tendency; Mean, Median, Mode, Geometric mean and Harmonic mean; Measures of dispersion; Range, Mean Deviation, Standard Deviation, Coefficient of variation, Quartile Deviation, Skewness and Kurtosis; Difference between these measures and their interpretation.

## **Module III- Correlation & Regression**

**Correlation-** Concepts and importance, Positive & Negative correlation, Karl-Pearson's coefficient of correlation, Rank correlation coefficient, Spurious correlation, Coefficient of determination.

**Regression-**Concept, Difference between correlation & regression.

## **Module IV- Time Series and Index numbers**

**Time Series-** Introduction, Components of a time series, Multiplicative and additive models, Semi Average & Moving Average method;

**Index Numbers-** Concept, price relative, quantity relative, value relative, Laspeyre's, Passche's and Fisher's index numbers, Family Budget method, problems in construction and limitations of index numbers Tests for adequacy of index numbers.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

A-Attendance; P -Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

# Syllabus - Fourth Semester

## FINANCIAL MANAGEMENT

**Course Code: LAW2407**

**Credit Units: 03**

**Course Objective:**

To give insight into financial decision making and composition of different securities in the total Capital structure.

**Course Contents:**

**Module I**

Nature, Scope & Objectives of Financial Management, Goals of Financial Management, Time value of money, Concept of risk & return (including capital asset pricing model).

**Module II**

Financing Decisions: Operating & Financial leverage, Capital structure theories; NI, NOI and MM & Traditional Approach, Factors determining capital structure. Concept & measurement of cost of capital, weighed Average cost of capital.

**Module III**

Capital Budgeting Decisions: Capital budgeting process; estimation of relevant cash flows, Non-discounted & discounted cash flows techniques- pay back, ARR, NPV, IRR, and profitability index;

**Module IV**

Investment Decisions – capital budgeting – significance – techniques of evaluation of investment Proposals- payback method – return on investment method, net present value method – Case Studies

**Module IV**

Dividend Decisions – dividend policy – determinants of dividend policy – types of dividend policy – forms of dividend. Different Schools of thought on dividend policy (Gordon, Walter, MM).

**Module V**

Working Capital Management – meaning – importance of adequate working capital- excess or Inadequate working capital – determinants of working capital requirement – cash management, Receivable management and inventory management – sources of working capital.

**Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	5	5	15	70

# STATISTICAL METHODS IN RESEARCH-II

**Course Code: LAW2408**

**Credit Units: 03**

## **Course Objectives:**

To provide basic understanding of quantitative tools and their elementary application to business problems.

## **Module I- Probability Theory**

Independent, Dependent, Mutually Exclusive, Favourable, Exhaustive & Complementary events, Addition theorem, Conditional Probability, multiplication Theorem, Bayes's Theory.

## **Module II- Statistical Methods**

Random Variable- Continuous & discrete; Discrete distribution- Binomial & Poisson, Bernoulli's trials; Continuous Distribution- Normal distribution, Properties of normal curve, importance & application

## **Module III- Tests of Hypothesis**

Significance test: concepts and applications, acceptance and critical regions, null and alternative hypothesis, judgemental errors, level of significance. Power of a test, z test for testing of mean, proportion and equality of means, t- test.

## **Module IV- Decision Tree**

Decision Theory: Decision making, under certainty, uncertainty & risk, Bayesian Analysis, Decision tree.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>C</b>	<b>H</b>	<b>EE</b>
<b>Weightage (%)</b>	5	15	5	5	70

# ADMINISTRATIVE LAW

Course Code: LAW2404

Credit Units: 04

## Course Objective:

Administrative law is as old as the administration itself. However, the form in which we find it today, Administrative is described a most outstanding legal development of the twentieth century. The reason for this development can only be attributed to a change of philosophy as regards the role and function of the State. The change in the concept of State from 'laissez faire' to a 'welfare state' has led to emergence of state activities in almost all spheres of human life. With the phenomenal increase in the area of state operation, the State was bound to take over a number of functions which were earlier left to private enterprise. In order to ensure that such functions are performed effectively and further due to certain other factors namely contingency, expertise etc. administrative agencies are given extraordinary powers and functions such as to make rules and deciding disputes apart from its wide discretionary powers. Obviously, this necessitated a new set of laws to check the possible abuses of such extraordinary powers on the part of administration. The courts in India and abroad in the course of time have developed various doctrines and methods to deal with such p[roblems. However, there is no end to this journey. The field is still open for new changes.

The main thrust of administrative law has been to study the nature of functions and powers exercised by the authorities on whom they have been conferred on and the study of remedies available to common man in case the limits of exercising power are transferred by such an authority. The focus or the centre point of this study, as usual as in cases of the study of other branches of public law, is the rights of individual *vis a vis* the public interest.

## Course Contents:

### Module I: Evolution, Nature and scope of Administrative law

Definitions, scope, classification and reason for the growth of administrative law; Relationship between constitutional law and administrative law; doctrine of Separation of Powers and its application in administrative law; Doctrine of Rule of law and application in administrative law.

### Module II: Legislative function of Administration

Delegated legislation: Necessity for delegated legislation, classification of delegated legislation and its requirement, constitutionality of delegated legislation, All form of control of delegated legislation i.e. Parliamentary, Procedural and Judicial control (doctrine of ultra vires).

### Module III: Judicial function of Administration

Reason for Administrative adjudication; Tribunals and classification of Tribunals; Principles of Natural Justice; Ombudsman: Lokpal, Lokayukta; Central Vigilance Commission (CVC).

### Module IV: Administrative discretion

Need and legality and abuses; Constitutional objections and discretion, failure to exercise discretion; Doctrine of proportionality; Legitimate expectation.

### Module V: Judicial control of administrative action

Courts as the final authority to determine the legality of Administrative actions ; Public Interest Litigation and the principle of *locus standi*, laches, Judicial review ; scope and extent, statutory appeals, writs.

## Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

## Text & References:

- M.P. Jain and S.N. Jain: Principles of Administrative Law.

# Syllabus - Fifth Semester

## COST ACCOUNTING

**Course Code: LAW2507**

**Credit Units: 03**

### Course Objective:

To get an expert knowledge in the area of cost management and cost control to enable effective management decisions.

### Course Contents:

#### Module I: Cost Accounting

Introduction – Meaning of Cost, costing and Cost Accounting – Comparison between Financial Accounts and Cost Accounts –Cost concepts and Classification of Costs – Cost Module – Cost Center, cost object –Preparation of cost sheet

#### Module II: Material Costing

Issue of materials, Methods of pricing of material issues- LIFO, FIFO- Weighed Average Method, Simple Average Method; Inventory Control- Concept & techniques like fixing of stock levels, EOQ, ABC analysis, perpetual & periodic inventory systems, material losses & their treatment.

#### Module III: Labour Costing

Control of labour cost – Labour Turn Turnover – Causes and effects of labour turnover – Meaning of Time and Motion Study, Merit Rating, Job Analysis, Time keeping and Time booking – Idle time, causes and treatment – Overtime – Methods of Wage Payment, Time rate and Piece Rate – Incentive Schemes – Halsey Premium Plan – Rowan Bonus Plan – Taylor's and Merrick's differential piece rate systems – Problems.

#### Module IV: Overhead Costing

Definition, Classification, allocation, apportionment & absorption of overhead, treatment of over & under absorption

#### Module V:

Costing Methods Introduction - Job Costing – Batch Costing – Contract Costing- Process Costing – principles – distinction between Process and Job – Preparation of process accounts – treatment of normal loss – abnormal loss – abnormal gain – Joint and By-products. Service costing. Marginal costing- introduction, contribution, PVR, BEP Chart and Margin of safety.

#### Module VI:

Reconciliation of Cost and Financial Accounts - Need for reconciliation – Reasons for difference in profits – Problems on preparation of Reconciliation statements including Memorandum Reconciliation account.

## SUMMER INTERNSHIP EVALUATION-II

Course code: LAW2535

Credit Units: 03

### Objective:

The basic objective of a Summer Internship is to refine the practical exposure of the corporate functioning. This summer training will provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

### General Guidelines:

Every student of B.Com (Hons.) shall be required to undergo a practical training in an corporate organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the fourth semester examinations. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific project to the candidate, which will be completed by him/her during the period of training. The work done by the candidate during the training period shall be submitted in form of a training report.

The last date for the receipt of training report in the department shall be one month after the date of completion of training, i.e. at the beginning of the fifth semester.

### Chapter Scheme

Chapter I: Introduction 20 marks

Chapter II: Conceptual Framework/National/International Scenario 5 marks

Chapter III: Presentation, Analysis and Findings 35 marks

Chapter IV: Conclusion and Recommendations 15 marks

The report has to be type written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise of a maximum of 80 to 100 pages and has to be submitted in two copies.

### Examination Scheme:

SIP Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of the Report

The outcome of Summer Internship is the Project Report. A project report should have the following Components:

- 1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report:** The body of the report should have these four logical divisions
  - a) Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b) Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).
  - c) Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).
  - d) Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexures:** Questionnaires (if any), relevant reports, etc.

# Syllabus - Sixth Semester

## MANAGEMENT ACCOUNTING

**Course Code: LAW2607**

**Credit Units: 03**

**Course Objective:**

To provide the students knowledge about the use of costing data for planning, control and decision making.

**Course Contents:**

**Module I: Management Accounting**

Nature & Scope: Meaning and Definition - Objectives of Management Accounting - Management Accounting and Financial Accounting - Management Accounting and Cost Accounting - Utility of Management Accounting - Limitations of Management Accounting - Position of Management Accountant in the Organisation.

**Module II: Analysis and Interpretation of Financial Statements - I**

Concept of Financial Statements and their Nature - Limitations of Financial Statements - Analysis and Interpretation - Tools - comparative Financial Statements -common size Statements - Trend Percentages

Ratio Analysis - Nature and Interpretation - Utility and Limitations of Ratios - Short-term Financial Ratios - Long-term Financial Ratios - Profitability Ratios - Proprietary and Yield Ratios - Turnover Ratios - DUPONT Control Chart

**Module III: Cash Flow Analysis**

Distinction of cash from funds-utility of cash flow statement construction of cash flow statement

**Module IV: Responsibility Accounting and Standard Costing**

Concept of Responsibility Accounting - Cost Centers and Profit Centers - Contribution by Segments

**Module V: Budgets and Budgetary Control**

Concept of Budgets and Budgetary Control - Nature and Objectives of Budgetary Control - Advantages and Limitations of Budgetary Control - Establishing a system of Budgetary Control - Preparation of Sales Budget, Selling and Distribution Cost Budget, Production Budget, Purchase Budget, Cash Budget etc. - Flexible Budgets and Master Budgets

**Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	5	5	15	70
