## PROJECT REPORT EVALUATION

**Course Code: FRE2637**

**Credit Units: 02**

The Project Report is primarily a research work and its primary objective is to gain knowledge through practical experience, a sound appreciation and understanding of the theoretical principles learnt during the semesters. It involves academic reading of several sources and writing on a particular topic relating to the core course or courses of the program. It is a scholarly inquiry into academic problems or issues. It should involve a systematic approach to gathering and analysis of information/ideas, leading to production of a structured report. The research topic should hold significant academic value commensurate with level of the Program.

### GUIDELINES FOR PROJECT REPORT

**Topic:** The topic of the paper will be of the student's choice with consent of the Supervisor. It must be relevant to the content of the course, but it should be treated in greater depth than it is covered in class. Make sure the subject focuses on one question or topic so that the paper has a definite purpose. Composing an introduction and conclusion can be a good test of the cohesiveness of the subject. The domain can include literature, culture, civilization or any other related areas.

**Synopsis of Project Report:** A Synopsis of the Project Report should be submitted to the Board of Studies of the Institute. The Board, after deliberation, will suggest changes and modifications and will assign a supervisor from amongst the teaching faculty of the Institute. The synopsis should include the following – Title of Project Report Introduction Problems of Research/Presenting the Topic/Problems/Issues of Research Objectives of Research Tentative Subheadings Suggested readings Source Material and References presenting your own ideas in a Project Report is encouraged. However, the paper must be based on facts and opinions from authoritative sources and these sources must be given proper credit. A minimum of three published sources should be cited. Direct quotes must be placed inside quotation marks or in indented sections and should be used sparingly. Paraphrasing is better in most cases. There are two popular ways to cite references. One is to place superscripted numbers in the text with corresponding footnotes at the bottom of the page or endnotes at the end of the paper. More typical of scientific papers is to place the author and year in parentheses (Heaton, 1984). In either case you need a bibliography of all cited sources at the end of the paper with author(s), year, title, publication or publisher, volume, and pages. These should be in alphabetical order by name of the primary author. Preference however should be given to MLA Style Sheet. Be sure to find source materials that are specific to your topic, either books or journal articles. Textbooks are usually too general and should be avoided. The libraries have published and computerized indexes that can be used to find relevant sources. See the Supervisor or a reference librarian if you are unfamiliar with these resources.

Plagiarism is the presenting of someone else's wording or ideas as one's own and is a violation of university policy. If you use someone else's words or ideas, you must give them proper credit. You must also obtain permission from the Supervisor before using your Project Report for more than one course.

**Length and Format** Length is not important; 20 to 25 pages of 2 spaced texts is a good target. The title, author, course, and date should be typed onto a cover sheet. Illustrations are not required but are often useful in explaining graphical concepts and in giving the paper character. The bibliography should be the last section of the paper. The entire report has to be submitted in two spiral bound copies.

**Grading** Students are required to make two submissions: a first draft and a final draft prior to final submission. The first draft is not to be a "rough" draft; it should be a completed, typed paper like you would ordinarily submit. It will read by the supervisor carefully, who may offer suggestions for

improvement, give it a grade, and return it to you promptly. The final draft, which is worth a larger share of the points, is your chance to respond to the suggestions and submit an improved paper. This will make the writing of a Project Report more of a learning experience. We strongly suggest using a word processor so that the final draft can be created by editing rather than complete retyping.

Grading is based on both research content and presentation. Your paper should demonstrate that you have gained a level of expertise in the subject by studying the relevant literature. Your presentation should be clean and convincing with proper use of paragraphs, complete sentences, and correct grammar, spelling, and punctuation. Make your Project Report look and sound professional.

### **Evaluation of Project Report**

#### **Evaluated by**

#### **1 Institution**

☐ Scope and content ☐ Understanding and presenting the topic ☐ Depth and breadth of analysis ☐ Project fulfillment ☐ Language, logical flow, coherence. ☐ Data collection ability in the field (if any) ☐ Scope of Implementation. (if applicable)

**Criteria Marks: 50**

#### **2 Board of Examiners Viva-voce**

**Examination Marks: 50**

**Total 100**

**Project Schedule Registration** First week of the last academic month Allotment of Faculty Guide takes place in accordance to the area of interest / stream chosen by the student at the time of registration.

**Approval of Project Topic** Week following: the week of registration

### **Submission of Synopsis to Faculty Guide**

Prior to the completion of End-Term Examination. The synopsis could be submitted any time after the allotment of project topic but certainly must be before completion of last examination.

**Duration of Project:** The project stretches for the full duration of the Semester break

**Submission of Report: First Draft** – After 20 Days from the commencement of the project **Second Draft** – 20 days after submission of the first draft. The first and second reports could be submitted through e-mail or any other medium as per the consent of faculty guide.

**Final Draft** – Within second week of rejoining of institution.

## Literature of France: from Origin to 16 century

Course Code: FRE2608

Credit Units: 04

### Course Objective:

- To introduce the students to the the French literature from moyen age to sixteenth century.
- To introduce the students with different genre of literature; novel, poem, theatre etc

# **GERMAN THROUGH LITERARY TEXTS**

## **(Deutsch mit literarischen Texten)**

**Course Code : GER2403**

**Credit Units: 05**

### **Course Objective:**

- To make the students understand the differences between various kinds of literary texts like novel, poem, short story, parable etc.
- To introduce them to German literature through a study of selected literary works
- To enable them to read and understand literary texts and find new meanings through analysis, evaluation and synthesis
- To empower them to develop critical/ creative thinking

### **Course Content:**

**Module I:** Bedeutung und Merkmale der unterschiedlichen literarischen Textsorte :

Romane, Kurzgeschichten, Gedichte, Ballade, Fabeln, Märchen, Novelle usw.

### **Module 2: deutsche Kurzgeschichten :**

- Das Brot- Wolfgang Borchert
- Ein Tisch ist ein Tisch- Peter Bichsel
- Popp und Mingel- Marie Luise Kaschnitz
- Anekdote zur Senkung Arbeitsmoral- Heinrich Boell
- Die Küchenuhr – Wolfgang Borchert

### **Module 3: deutsche Gedichte :**

- Todesfuge- Paul Celan
- An den Mond- Goethe
- Wandrers Nachtlied- Goethe
- Der Knabe im Moor- Annette von Droste-Hülshoff
- Die Stadt- Theodor Storm

### **Module 4: deutsche Novelle:**

- Das Erdbeben in Chili - Heinrich von Kleist
- Katz und Maus - Eine Novelle Günter Grass
- Der Tod in Venedig - Thomas Mann
- Peter Schlemihls wundersame Geschichte - A.v.Chamisso

### **Module 5 : deutsche Ballade, Fabeln, Märchen :**

- Erlkönigs Tochter - Johann Gottfried von Herder
- Kinder- und Hausmärchen der Brüder Grimm - Brüder Grimm
- The Tortoise and the Hare

**Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>Attd.</b>	<b>H</b>	<b>EE</b>

## **ENHANCING LANGUAGE PROFICIENCY**

**(Beherrschung der Sprachfertigkeit)**

**Course Code: GER2404**

**Credit Units: 04**

**Course Objective:**

To enable students to enhance their language proficiency

- by analyzing texts and authentic documents of different genres
- through a study of newspaper and magazine articles and other texts

**Course Contents:**

**Module 1**

Verschiedene Texttypen und Textsorten

Analyse von Texten unterschiedlicher Genre.

Textexterne und textinterne Faktoren

**Module 2**

Informative Texte : Zeitungen, Zeitschriften, Sachtexte usw

**Module 3**

Kochrezepte, Gebrauchsanleitungen, Anzeige, Werbung, usw.

# Syllabus – Fifth Semester

## WRITTEN EXPRESSION-V (Schriftliche Kompetenz-V)

Course Code: GER2501

Credit Units: 05

### Course Objective:

To furnish the linguistic tools

- To report past experiences, to write a newspaper article, to talk about a happy or sad moments
- To express differences and contrasts, to describe people and things
- To talk about television programs, to find a consensus, to read a thriller novel
- To do & describe relaxing exercises for one's health, to give suggestions and advices, examination by a doctor, to talk about statistics, to understand an instruction leaflet
- To ascertain opinions and views, to talk about language learning, to understand a radio transmission.
- To talk about professional wishes and interests, about business ideas, to apply for a job and to introduce oneself over telephone
- To talk about holiday wishes and dialogues while shopping, to understand travel brochures
- To talk & exaggerate about a dream house, unreal wishes, to live neighbors and resolve conflicts

### Course Contents:

#### Lektion 7 : Rund ums Wohnen

##### Themen :

Über eine Traumwohnung sprechen und übertreiben, über irreales sprechen, eine Hausordnung verstehen, mit Nachbarn leben und Konflikte lösen

#### Lektion :8 Unter Freunden

##### Themen :

eine Spielanleitung verstehen, Du oder Sie ?eine Person näher beschreiben,über Freunde und Kollegen sprechen, eine Kontaktanzeige und ein interview verstehen, Reportage : Tipps für Singles

#### Lektion 9 : Technik und Alltag

##### Themen

Unter Schein und Wirklichkeit sprechen, Über zeitliche Bezüge sprechen, Bedienungsanleitungen verstehen und erklären, sich in einem „ Forum“ im Internet austauschen, eine Geschichte verstehen

#### Lektion 10 : Rund ums Produkt

##### Themen :

Über Pannen und Missgeschicke im Alltag sprechen, ein Produkt näher beschreiben, sich im Handel, bei Dienstleitern beschweren, Radiosendung : Frauen in der Werbung

#### Lektion 11 : Mit Menschen

##### Themen :

Über Plänen und gute Vorsätze sprechen, sich entschuldigung und jemanden überreden,über Benimm-Regeln sprechen einen Standpunkt vertreten,über andere ländern und ihre Sitten sprechen

## **Lektion 12 Rat und Hilfe**

### **Themen :**

ein Problem beschreiben und sich beraten lassen, ein schriftliches Interview verstehen, einen Sachtext verstehen, über Engagement sprechen, über Vorbilder und Gewissensfragen sprechen

## **Lektion 13 Aus Politik und Geschichte**

### **Themen :**

Über Politische Entscheidung sprechen und sie vergleichen, Zeitungsmeldungen über politisches Engagement, Deutsche Geschichte nach 1945, über Parteien und Politiker sprechen.

## **Lektion 14 Zu Hause in der Welt**

### **Themen :**

über Deutschland und das Heimatland sprechen, Radio-Umfrage : Meinungen zu Europa, Kurioses aus Europa, über Heimat sprechen, Artikel : Zukunftsvisionen

### **Grammatik :**

- Temporale Konjunktionen mit Wiederholung von Präteritum, Plusquamperfekt, Adjektivdeklinaton
- Infinitiv mit zu Perfekt und wiederholung von Präsens und Konjunktiv II
- Graduierung der Adverbien, doppelte Verneinung
- Konjunktion *falls*
- Relativsatz mit Präposition
- Adjektiv als Nomen
- N-Deklination
- Zweiteilige Konjunktion *je...desto, sowohl...als auch, weder..noch*
- Konjunktion *als ob, nachdem, während*
- Relativsätze mit was und wo
- Werden+ Infinitiv
- Konjunktion *:seit dem, ohne dass, bis, in dem*
- Adjektivdeklinaton mit dem *Komparativ und Superlativ*
- Partizip Perfekt als Adjektiv
- Passiv Präteritum und Perfekt

## SUMMER PROJECT EVALUATION

**Course Code: GER2535**

**Credit Units: 03**

Summer Project is primarily a research work and its primary objective is to gain knowledge through practical experience, a sound appreciation and understanding of the theoretical principles learnt during the semesters. It involves academic reading of several sources and writing on a particular topic relating to the core course or courses of the program. It is a scholarly inquiry into academic problems or issues. It should involve a systematic approach to gathering and analysis of information/ideas, leading to production of a structured report. The research topic should hold significant academic value commensurate with level of the Program.

### GUIDELINES FOR SUMMER PROJECT REPORT

#### Topic

The topic of the paper will be of the student's choice with consent of the Supervisor. It must be relevant to the content of the course, but it should be treated in greater depth than it is covered in class. Make sure the subject focuses on one question or topic so that the paper has a definite purpose. Composing an introduction and conclusion can be a good test of the cohesiveness of the subject. The domain can include literature, culture, civilization or any other related areas.

#### Synopsis of Summer Project Report

**A Synopsis of the Summer Project Report should be submitted to the Board of Studies of the Institute. The Board, after deliberation, will suggest changes and modifications and will assign a supervisor from amongst the teaching faculty of the Institute. The synopsis should include the following –**

Title of Summer Project Report

Introduction

Problems of Research/Presenting the topic/Problems/Issues of Research

Objectives of Research

Tentative Subheadings

Suggested readings

#### Source Material and References

Presenting your own ideas in a Summer Project Report is encouraged. However, the paper must be based on facts and opinions from authoritative sources and these sources must be given proper credit. A minimum of three published sources should be cited. Direct quotes must be placed inside quotation marks or in indented sections and should be used sparingly. Paraphrasing is better in most cases.

There are two popular ways to cite references. One is to place superscripted numbers in the text with corresponding footnotes at the bottom of the page or endnotes at the end of the paper. More typical of scientific papers is to place the author and year in parentheses (Heaton, 1984). In either case you need a bibliography of all cited sources at the end of the paper with author(s), year, title, publication or publisher, volume, and pages. These should be in alphabetical order by name of the primary author. Preference however should be given to MLA Style Sheet.

Be sure to find source materials that are specific to your topic, either books or journal articles. Textbooks are usually too general and should be avoided. The libraries have published and computerized indexes

that can be used to find relevant sources. See the Supervisor or a reference librarian if you are unfamiliar with these resources.

Plagiarism is the presenting of someone else's wording or ideas as one's own and is a violation of university policy. If you use someone else's words or ideas, you must give them proper credit. You must also obtain permission from the Supervisor before using your Summer Project Report for more than one course.

### **Length and Format**

Length is not important; 20 to 25 pages of 2 spaced texts is a good target. The title, author, course, and date should be typed onto a cover sheet. Illustrations are not required but are often useful in explaining graphical concepts and in giving the paper character. The bibliography should be the last section of the paper. The entire report has to be submitted in two spiral bound copies.

### **Grading**

Students are required to make two submissions: a first draft and a final draft prior to final submission. The first draft is *not* to be a "rough" draft; it should be a completed, typed paper like you would ordinarily submit. It will read by the supervisor carefully, who may offer suggestions for improvement, give it a grade, and return it to you promptly. The final draft, which is worth a larger share of the points, is your chance to respond to the suggestions and submit an improved paper. This will make the writing of a Summer Project Report more of a learning experience. We strongly suggest using a word processor so that the final draft can be created by editing rather than complete retyping.

Grading is based on both research content and presentation. Your paper should demonstrate that you have gained a level of expertise in the subject by studying the relevant literature. Your presentation should be clean and convincing with proper use of paragraphs, complete sentences, and correct grammar, spelling, and punctuation. Make your Summer Project Report look and sound professional.

Sl. No.	Evaluated by	Criteria	Marks
1	Institution	<ul style="list-style-type: none"><li>• Scope and content</li><li>• Understanding and presenting the topic</li><li>• Depth and breadth of analysis</li><li>• Project fulfillment</li><li>• Language, logical flow, coherence.</li><li>• Data collection ability in the field (if any)</li><li>• Scope of Implementation.(if applicable)</li></ul>	50
2	Board of Examiners	Viva-voce Examination	50
<b>Total</b>			<b>100</b>

### **Project Schedule**

#### **Registration**

First week of the last academic month

Allotment of Faculty Guide takes place in accordance to the area of interest / stream chosen by the student at the time of registration.

**Approval of Project Topic**

Week following the „week of registration“

**Submission of Synopsis To Faculty Guide**

Prior to the completion of End-Term Examination. The synopsis could be submitted any time after the allotment of project topic but certainly must be before completion of last examination.

**Duration of Project**

The project stretches for the full duration of the Semester break .

**Submission of Report**

First Draft – After 20 Days from the commencement of the project.

Second Draft – 20 days after submission of the first draft.

The first and second reports could be submitted through e-mail or any other medium as per the consent of faculty guide.

Final Draft – Within second week of rejoining of institution.

# INTRODUCTION TO LINGUISTICS

**Course Code: GER2504**

**Credit Units: 04**

## **Course Objective:**

This paper aims to provide the students the basic knowledge of Linguistics and its various branches of study. The focus of the paper is to enable the learners to have an understanding of the science of language and to be able to analyze linguistically any given language including the foreign language that they pursue.

## **Course Contents:**

### **Module I: Introduction**

What is language and linguistics?

Design features of human language.

Various branches of Linguistics and their application.

### **Module II: Phonetics and Phonology**

Anatomy and physiology of speech production

Classification of sounds through IPA symbols

Difference between Phonetics and Phonology.

### **Module III: Morphology**

Basic concepts of morphology

Word Formation processes

### **Module IV: Syntax**

Theories and concepts of Syntactic structure.

Analysis of sentence structure

### **Module V: Semantics**

Basic concepts of Semantics

Meaning and types of Meaning

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>Attd.</b>	<b>H</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>20</b>	<b>5</b>	<b>5</b>	<b>70</b>

# **BUSINESS GERMAN-I**

## **(Deutsch für den Beruf-I)**

**Course Code: GER2505**

**Credit Units: 4**

### **Course Objective:**

The Program's objective is to familiarise students with the current terminology used in German business contexts and building an extensive active and passive Business German vocabulary.

**Course Content:** Unternehmen Deutsch (Course Book)

### **Module I**

#### **Herzlich Willkommen:**

Gäste, Besucher begrüßen, sich vom Gastgeber verabschieden, Wünsche , Bitten im Hotel vortragen, Besuchs und Besichtigungprogramme planen, sich nach Veranstaltung erkündigen Speisen und Getränke empfehlen und bestellen.

#### **Rund um die Firma**

Über Branchen und Produkte sprechen, Wirtschaftsbereiche benennen, Schaubilder und Diagramme beschreiben, Unternehmenstrukturen erläutern, die Geschichte einer Firma darstellen, ein Unternehmen vorstellen.

#### **Am Arbeitsplatz**

Abteilung im Betrieb und ihre Aufgaben darstellen, Betrieblicher Arbeit, neue Mitarbeiter vorstellen, über Krankheiten, Schmerzen und Beschwerden sprechen, Fragen beim Arzt beantworten, Krankversicherungssysteme vergleichen.

#### **Von Haus zu Haus mit...**

Planen und organisieren, auf Aufträge erteilen und reagieren, passende Mittel in der Geschäftskommunikation wählen.

#### **Das perfekte Mietsystem**

Abläufe beschreiben: Was wird von wem gemacht? über Vereinbarung und Verpflichtung informieren, Ursachen für Störungen im geschäftlichen Ablauf ermitteln, Verschiedene Zahlungsweisen unterscheiden und benutzen.

### **Grammatik**

- Reflexivpronomen und Verben
- Genitiv-Atribut
- Possessivartikel
- Verben mit Präposition
- Satzbau: Dativ-und Akkusativ
- Adjektivendung
- Relativsatz und pronomen
- KII-Gegenwart und Vergangenheit: würde+Infinitiv, hätte/ware+Partizip
- Passiv
- Indirekte Fragen mit Ob und dass Sätze

# Syllabus - Sixth Semester

## WRITTEN EXPRESSION-VI (Schriftliche Kompetenz-VI)

Course Code: GER2601

Credit Units: 05

### Course Objective:

To furnish the linguistic tools

- To give, accept and decline an invitation
- To talk about wishes and expectations
- To read biographies and make notes
- To compare pictures
- To read advertisements
- To talk about rights and duties
- To predict things and advice
- To talk about media and its role
- To talk about eating habits and food
- To summarize a text
- To express ideas about nature
- To describe tourist places
- To talk about professions and job applications
- To write a bio data and to ask questions regarding it
- To talk about relationships
- To discuss a hypothesis, to take a position and to criticize
- To talk about books and reading habits
- To talk about a theme for and against the motion, to interrupt and continue a discussion.

### Course Contents:

#### Lektion 1 : Von Feen und Prinzen

##### Themen :

Über Märchen sprechen und nacherzählen, eine Biografie lesen und Notizen machen, Bilder vergleichen, einen Werbetext schreiben

#### Lektion 2 : Mein gutes Recht

##### Themen :

Über Rechte und Pflichten sprechen, Wissen und Nichtwissen ausdrücken, Vermutungen äußern, sich beschweren, Konflikte lösen, eine Beschwerdebrief schreiben, Ratschläge geben

#### Lektion 3 : Digital zu Hause

über Medien und Mediennutzung sprechen, eine Grafik auswerten und kommentieren, eine Nachricht auf der Mailbox hinterlassen.

#### Lektion 4 : Einfach lecker ?!

Über Lebensmittel und Essen sprechen, Aussagen kurz kommentieren, etwas aushandeln, bestätigen, bestellen, einen Text auswerten und zusammenfassen

**Lektion 5 : Natur pur**

Eigene Ideen/Gedanken zum Thema 'Natur' ausdrücken, einen Standort beschreiben, über Urlaubziele sprechen, über Ausbildungsinhalte sprechen

**Lektion 6 : Viel Arbeit**

Über Arbeit diskutieren, über Arbeitsuche und Bewerbung sprechen, Frage zum Lebenslauf stellen und beantworten, eine tabellarischen Lebenslauf schreiben, ein Bewerbungsschreiben verfassen

**Lektion 7 : wo die Liebe hinfällt**

Über Beziehungen sprechen, eine Hypothese diskutieren, Positionen im Raum darstellen, Eindrücke beschreiben und kommentieren, eine Kritik schreiben.

**Lektion 8 : Lesezeichen**

Über Bücher und Lesegewohnheiten sprechen, Vor- und Nachteile zu einem Thema sammeln und Stellung nehmen, eine Diskussion führen, beim Diskutieren unterbrechen/ weitersprechen, eine Geschichte zu Ende schreiben.

**Grammatik :**

- Infinitiv mit zu Perfekt und wiederholung von Präsens und Konjunktiv II
- Graduierung der Adverbien, doppelte Verneinung
- Partizip I mit Verb oder Nomen, Nebensatz von Hauptsatz
- Satzglieder erkennen, Umstellprobe, Satzgliedkerne erkennen, verben und Ergänzungen
- Nomen Verb Verbindungen
- Reflexivpronomen
- Adjektivpaare auf -los und -voll
- Indirekte Rede
- Konzessive und konsekutive Konnektoren und Präpositionen
- Indefinitpronomen : irgendwer, irgendwelche

# DISSERTATION

**Course Code: GER2637**

**Credit Units: 03**

Dissertation is primarily a research work. It involves academic reading of several sources and writing on a particular topic relating to the core course or courses of the program. It is a scholarly inquiry into academic problems or issues. It should involve a systematic approach to gathering and analysis of information/ideas, leading to production of a structured report. The research topic should hold significant academic value commensurate with level of the Program.

The Dissertation will help students deal with literary problems and issues and they will learn to demonstrate critical thinking in research and writing.

## GUIDELINES OF DISSERTATION

### Objectives of Dissertation

The students will decide the topic at the beginning of the session in consultation with the Supervisor assigned. The progress of the work will be monitored regularly by the Supervisor. At the end of the Semester/Term the detailed dissertation will be submitted to the Supervisor assigned. The evaluation will be done by Board of Studies of the Institute.

### Title of Dissertation

The title should reflect the area and problems/issues of the dissertation properly. The student should do a preliminary reading of primary as well as secondary texts on the identified area of research followed by discussion with the teaching faculty before deciding the title. The title may be decided only after the area and problems of research have been identified. The student should ensure that the title is related to one or more of the courses or areas of the study program.

### Synopsis of Dissertation:

**A Synopsis of the Dissertation should be submitted to the Board of Studies of the Institute. The Board, after deliberation, will suggest changes and modifications and will assign a supervisor from amongst the teaching faculty of the Institute. The synopsis should include the following –**

Title of Dissertation

Introduction

Problems of Research

Objectives of Research

Tentative Chapterization

Suggested readings

### Format of Dissertation:

- Cover page should provide **Title, Student's particulars, Supervisor's Name and name of Institution/School.**
- Self- declaration
- Certificate from the HOI/HOD of the school. & the supervisor
- Acknowledgements
- Table of contents.

- Chapter I should be a general introduction of the Dissertation: background of the area, problems and objectives of the dissertation. The nature and scope of the dissertation may also be given.
- Other chapters will constitute the body of the Dissertation. The number of chapters and their length will depend on, among others, a critical analysis, implications and major findings.
- References: quotes and extracts should be recorded appropriately in Parenthetical References or Footnotes.
- Appendices and Glossary, if any, should be placed after the concluding chapter.
- Bibliography should be put at the end of the Dissertation: It should include all primary and secondary materials referred in the Dissertation. The references will include Manuscript, Primary Tests, Secondary Texts, Journals, e-texts and Web-links.
- Annexures (if any)

**Please note:**

Format for Cover page, declaration and certificates from the HOI/HOD of the school will be provided by the department.

**Typing Instructions:**

- Paper A4 Size
- Font (Times New Roman)-12 Points
- Spacing between two lines 2
- Margins Left = 1.5 inch, Right = 1 inch

**Submission of Dissertation:**

- Students **MUST** write the dissertation in the **Language of Specialization** only.
- Each student will make at least three copies of project report in the recommended format. It should be typed on one side. The students will submit one copy to the school and one copy to the concerned guide (internal).
- Two or more students cannot work on the same topic. It will not be acceptable.
- Each student is required to make a soft copy of the dissertation (in CD) and submit along with the dissertation.
- Dissertation will be run on plagiarism software and if found copied appropriate action will be taken against the student.
- Only 30-40% quotations are allowed, 60% of work should be their original work.
- The cover page must be hard bound in navy blue color with golden embossing. The size of the report would depend on the project undertaken. However it must be 30-35 (approx.) typed pages on A4 size paper. All the students are required to use uniform font and format (except in heading and subheadings) throughout the dissertation.
- The dissertation must be submitted along with certificates (one from the Head of the Institution of the school and another from the Supervisor) authenticating the originality of the work done in the prescribed format.
- If any matter in the report is picked up from any source and the source name is not referred in the bibliography section then it will be treated as a case of plagiarism. (Cheating)
- If the student uses any table/graph or Figure, then it is to be numbered and source of information from which it is collected, is to be mentioned under each.
- Page numbers should be mentioned at the bottom center of each page.

**Assessment Scheme:****Continuous Evaluation:**

40%

(Based on abstract writing, interim draft, general approach, research orientation, readings undertaken etc.)

**Final Evaluation:**

60%

(Based on the organization of the work, objectives/ problem profile/ issue outlining, comprehensiveness of the research, flow of the idea/ ideas, relevance of material used/presented, outcomes vs. objectives, presentation/ viva etc.)

## DETAILED STUDY OF SELECTED AUTHOR / LITERARY WORK

(Karl Georg Büchner *Woyzeck* – Eine Feinstudie

Karl Georg Büchner *Woyzeck* - A detailed study)

Course Code: GER2604

Credit Units: 04

### Course Objective:

- To enable students to do a detailed study of a literary work- „*Woyzeck*” von Georg Büchner
- To understand a work in relation to the author and in relation to the other works of the author
- To provide a broad perspective of the thoughts and philosophy of the period, of the contemporary works

### Course Contents:

#### Module 1

Studie des Drama „*Woyzeck*” von Karl Georg Büchner

#### Module 2

Der Autor, Biographie, literarische Werke

#### Module 3

Die Zeitwende, zeitgenössische Autoren und Ihre Werke

#### Module 4

Schreibstil des Autors (dramatische Technik der szenischen Darstellung und Episierung)

# **BUSINESS GERMAN-II**

## **(Deutsch für den Beruf-II)**

**Course Code: GER2605**

**Credit Units: 4**

**Course Objective:** The syllabus is in continuation of Business German-I where the students deal with complex grammar and business oriented vocabulary. It prepares the students to communicate effectively at workplace, makes them aware of the professional language and develops intercultural competence.

**Course Content :** Unternehmen Deutsch (Course Book)

### **Module I**

#### **Der Mitarbeiter im Betrieb**

Über das Personalwesen sprechen, Wünsche und Ziele ausdrücken, Inhalte präsentieren, ein Mitarbeitergespräch führen, Zielvereinbarungen treffen, Arbeitszeiten und Gehälter vergleichen.

#### **Verkaufen, verkaufen, verkaufen**

Umsatzziele und Maßnahmen vorschlagen und vereinbaren, Marketingstrategien besprechen, Vorschläge machen, zustimmen, widersprechen, Verkaufsverhandlung führen, planen, organisieren, evaluieren.

#### **Auf der Messe**

Über Messen sprechen, Gründe für eine Messebestellung nennen, Messegespräche führen, Produkte vorstellen, Aufgabe im Team verteilen, pro und contra diskutieren.

#### **Import-Export**

Eine Auftragsabwicklung erläutern, Lieferwege nachverfolgen, über die Allgemeinen Geschäftsbedingungen sprechen, auf Beschwerden reagieren.

#### **Ich möchte hier arbeiten**

Um informationen zu Stellenanzeigen bitten, Bildungssysteme vergleichen, einen Lebenslauf schreiben, Bewerbungsbrieife schreiben, Vorstellungsgespräche führen, sich über den Arbeitsmarkt in einem deutschsprachigen Land erkündigen.

#### **Grammatik**

- Dass- Sätze/ Infinitivsätze mit zu
- Konjunktiv II
- Der Gebrauch von werden und Konjugation
- Partizip Perfekt und mit sein und als Adjektive
- Passiv Perfekt und Präteritum
- Präpositionen mit Genitiv: trotz, wegen, während, statt
- Relativsätze mit Präposition
- konjunktion mit Nebensatz: wenn, obwohl, weil, während

### SOCIAL FORMATIONS AND CULTURAL PATTERNS OF THE ANCIENT WORLD

**Course Code: HIS2104**

**Credit Units: 5**

#### Course Objective

The course is designed to provide in-depth knowledge about the historical processes of the ancient world. Some key components of the course include evolution of humankind, the Neolithic phase, Bronze Age civilizations, and the history of Ancient Greece. The course will give an insight into the socio-cultural and political factors which impacted the historical process in the world during the ancient period.

#### Course Content

##### Unit I Evolution of humankind

- Palaeolithic Culture
- Mesolithic Culture

##### Unit II Neolithic Phase

- Food production-beginnings of agriculture and animal husbandry

##### Unit III Bronze Age Civilizations

- Case Study I: Egypt
- Case Study II: Mesopotamia

##### Unit IV Ancient Greece I

- Slave society in ancient Greece
- Agrarian economy, urbanisation and trade

##### Unit V Ancient Greece II

- Polis in ancient Greece: Athens and Sparta
- Greek Culture
- Greek Religion

#### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

## HISTORY OF EARLY INDIA-I

**Course Code: HIS2105**

**Credit Units: 5**

### Course Objective

The course is aimed at providing in-depth knowledge about the historical processes of early India. The course also intends to provide a historiographical background to ancient Indian history by reconstructing the history of the period. The course will focus on Stone Age cultures, advent of food production, the Harappan Civilization, and the Vedic Period.

### Course Content

#### Unit I Reconstructing Ancient Indian History

- Early Indian notions of History
- Sources and tools of historical reconstruction
- Historical interpretations (with special reference to gender, environment, technology, and regions)

#### Unit II Pre-historic Hunter-Gatherers

- Palaeolithic cultures- sequence and distribution; stone industries and other technological developments
- Mesolithic cultures- regional and chronological distribution; new developments in technology and economy; rock art

#### Unit III The Advent of Food Production

- Understanding the regional and chronological distribution of the Neolithic and Chalcolithic cultures : subsistence, and patterns of exchange

#### Unit IV The Harappan Civilization

- Origins; settlement patterns and town planning; agrarian base; craft productions and trade; social and political organisation; religious beliefs and practices; art; the problem of urban decline and the late/post-Harappan traditions

#### Unit V Cultures in Transition

- The Aryan Invasion Debate
- The Vedic Period

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

# INDO-ISLAMIC POLITY AND CULTURE IN MEDIEVAL INDIA-I

**Course Code: HIS2206**

**Credit Units: 4**

## **Course Objective**

The course is aimed at introducing students to the critical components of Medieval Indian history, beginning from the Delhi Sultanate. The key components of the course include historiography, political structures, social and economic developments, and cultural and religious processes.

## **Course Content**

### **Unit I Interpreting the Delhi Sultanate**

- Survey of sources: Persian tarikh tradition; vernacular histories; epigraphy

### **Unit II Sultanate Political Structures**

- Foundation, expansion and consolidation of the Sultanate of Delhi; The Khaljis and the Tughluqs; Mongol threat and Timur's invasion; The Lodis: Conquest of Bahlul and Sikandar; Ibrahim Lodi and the battle of Panipat
- Theories of kingship; ruling elites; Sufis, ulama and the political authority; imperial monuments and coinage
- Emergence of provincial dynasties: Bahamanis, Vijayanagar, Gujarat, Malwa, Jaunpur and Bengal
- Consolidation of regional identities; regional art, architecture and literature

### **Unit III Society and Economy**

- Iqta and the revenue-free grants
- Agricultural production; technology
- Changes in rural society; revenue systems
- Monetisation; market regulations; growth of urban centres; trade and commerce; Indian Ocean trade

### **Unit IV Religion, Society and Culture**

- Sufi silsilas: Chishtis and Suhrawardis; doctrines and practices; social roles
- Bhakti movements and monotheistic traditions in South and North India; Women Bhaktas; Nathpanthis; Kabir, Nanak and the Sant tradition
- Sufi literature: malfuzat; premakhayans

# RISE OF MODERN WEST-I

**Course Code: HIS2207**

**Credit Units: 4**

## **Course Objective**

The course is designed to introduce students to the historical processes which led to the modernization of the West. The key components of the course include a study of the transitional phase from feudalism to capitalism, early colonial expansion, the Renaissance period, the period of the Reformation, and the emergence of the European state system.

## **Course Content**

### **Unit I Transition from feudalism to capitalism**

- Problems and theories

### **Unit II Early colonial expansion**

- Motives
- Voyages and explorations
- The conquests of the Americas: beginning of the era of colonization; mining and plantation; the African slaves

### **Unit III Renaissance**

- Its social roots
- City states of Italy
- Spread of humanism in Europe
- Artistic Expressions

### **Unit IV Reformation**

- Origins
- Course and results of the European Reformation in the 16th century

### **Unit V Emergence of European State System**

- Spain
- France
- England
- Russia

# HISTORY OF AFRICA

**Course Code: HIS2208**

**Credit Units: 03**

## **Course Objective**

This course has been introduced in order to provide an in-depth understanding about the historical developments in the African continent. Relevant issues concerning the political, economic, social, and cultural processes in Africa will be covered as part of the course. It will help in equipping the students with a deeper understanding of African identity and ethnicity as well as making them aware about the nationalist struggles that shaped the history of most countries in Africa, including the famous South African struggle for independence. A study of colonization in Africa by various colonial powers and its subsequent decay will help the students in drawing parallels with the history of colonial rule in India.

## **Course Content**

### **SEMESTER V**

#### **UNIT I Perspectives on African History**

- Main historiographical trends
- Recent interventions

#### **UNIT II Trade, Commerce and Migration**

- Changing patterns of trade
- The trans- Atlantic slave trade and its repercussions
- Migration of capital and labour, with special reference to southern Africa

#### **UNIT III Patterns of Colonisation in the African Continent**

- Colonization of Africa in the 19<sup>th</sup> century-origins
- European imperialism and the partition of Africa
- French colonization of the Maghreb and West Africa
- British colonization of East, West and Southern Africa
- Belgian colonization of Congo

#### **UNIT IV Emergence of New Identities**

- Islam, Christianity and indigenous religions
- Race and class in colonial South Africa
- Language, education and cultural forms

#### **UNIT V Popular Protests, Rebellions and National Liberation Movements**

- Peasants and labour movements
- Nationalist movements in Algeria, China, Kenya, Congo, Angola and South Africa

## **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>A/TP</b>	<b>CT</b>	<b>EE</b>

# HISTORY OF BRITISH RULE IN INDIA-I

**Course Code: HIS2307**

**CreditUnits: 4**

## Course Objective

This course has been created to acquaint the students with the early history of the British rule in India. The key components of the course include the expansion and consolidation of colonial power, colonial strategy and ideology, rural economy and society under British rule, trade and industry under the British, and popular resistance movements. The course will help in enhancing the awareness of students about the coming of the British to India.

## Course Content

### Unit I India in the mid-18th Century

- Society-economy developments
- Political developments

### Unit II Expansion and Consolidation of Colonial Power

- Mercantilism, foreign trade and early forms of exactions from Bengal
- Dynamics of expansion, with special reference to Bengal, Mysore, Western India, Awadh, Punjab, and Sindh

### Unit III Colonial State and Ideology

- Arms of the colonial state: army, police, law
- Ideologies of the Raj and racial attitudes
- Education: indigenous and 'modern'

### Unit IV Rural Economy and Society

- Land revenue systems and forest policy
- Commercialization and indebtedness
- Rural society: change and continuity
- Famines
- Pastoral economy and shifting cultivation

### Unit V Trade and Industry

- De-industrialization
- Trade and fiscal policy
- Drain of Wealth
- Growth of modern industry

### Unit VI Popular Resistance

- Santhal uprising (185-7); Indigo rebellion (1860); Pabna agrarian leagues (1873); Deccan riots (1875)
- Uprising of 1857

## Examination Scheme

# HISTORY OF SOUTH-EAST ASIA

**Course Code: HIS2308**

**Credit Units: 03**

## **Course Objective**

This course has been introduced in order to familiarize students with the history of South East Asia. From pre-colonial to post-colonial structures, this course intends to provide a deeper understanding of the political, social, economic, and cultural processes that shaped the history of the region. Some countries will be taken up as a case study in order to facilitate more in-depth analysis of the colonial and post-colonial structures in the region. This course will help in establishing a link between the common cultural heritage of India and South-East Asia.

## **Course Content**

### **SEMESTER VI**

#### **UNIT I Historical Narratives on South-East Asia**

- Major themes in South-East Asian studies
- Constructing the past
- New historiographical trends

#### **UNIT II The Early Kingdoms-Political, Economic and Socio-Religious Developments**

- Historical background
- Case Studies-Vietnam, Angkor, Champa, Srivijaya, Ayutthaya, Majapahit, and Pagan
- Maritime Trade
- Religions of Indian origin
- Beginnings of Islam

#### **UNIT III Political, Economic and Socio-Religious Developments-16<sup>th</sup>-18<sup>th</sup> centuries**

- South-East Asia in the 16<sup>th</sup> Century
- Centres of political power in the 17<sup>th</sup> and 18<sup>th</sup> centuries
- Administrative reforms in the 17<sup>th</sup> century
- Fragmentation in the 18<sup>th</sup> century
- Population, commercialisation, urbanization
- Nature of commerce, origins of economic dualism, trade in narcotics
- Indigenous beliefs
- Islam and Christianity and their impact on society and culture

#### **UNIT IV Economy and Society in Early 19<sup>th</sup> Century**

- Patterns of production- agriculture and crafts
- Economic trends- trade and banking
- Cultural expressions- folk and classical

#### **UNIT V Colonisation and Colonial Transformations**

- Processes of colonial control and the 'Informal Empire' in Thailand
- Peasant society and agrarian transformations, plantations, forests, mining
- Urbanisation: Colonial cities in plural societies
- Culture: (i) Colonial Discourses and the Creation of 'National Culture'; (ii) Oral traditions, literacy and the case of Malay Hikayats; (iii) Creation of 'Perfect Natives'; (iv) Education

- Japanese aggression in South-East Asia

#### **UNIT VI Movements of Resistance and the Making of New Identities**

- Peasant resistance
- The origins of the Vietnamese Revolution
- Indonesian Revolution

#### **UNIT VII Emergence of Modern Nations and States**

- The Union of Burma (Myanmar)
- Indonesia, the Sukarno Era
- Cambodia under Norodom Sihanouk
- The Vietnam War

#### **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>A/TP</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

# HISTORICAL RESEARCH METHOD

**Course Code: HIS2408**

**Credit Units: 03**

## Course Objective

This course is being offered in order to acquaint students with the intricacies of historical research, and its methodology. Historical research is a specialized area, and needs some knowledge of the technical aspects of research. In order to introduce students to the various research methodologies which might be of help to them in the future, this course has been introduced.

## Course Content

### Unit I History

- Definition
- Development of Historical Concepts
- Introducing E. H. Carr's What is History

### Unit II History and its Allied Subjects

- Inter-disciplinary relation with Geography and Cartography
- Inter-disciplinary relation with Anthropology and Political Science
- Inter-disciplinary relation with Archaeology

### Unit III Sources for the study of History

- Primary and Secondary
- Textual, Material, Digital, Oral

### Unit IV Historical Methods

- Sources for the study of Indian History Ancient, Medieval, Modern and Contemporary

### Unit V

- Significance and Purpose of History

## Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

## Syllabus - Fifth Semester

### HISTORY OF USSR

**Course Code: HIS2504**

**CreditUnits: 5**

#### Course Objective

The course has been designed in order to acquaint students with the processes which shaped the history of USSR. The course includes key components such as the Russian Revolutions, the Civil War, the New Economic Policy, and the period of Soviet industrialization. The course is aimed at introducing students to the history of the Soviet Union and enhancing their learning abilities.

#### Course Content

##### Unit I The Russia Revolutions of February and October 1917

- Dual Power
- Provisional government
- The establishment of soviet Power
- Nationalities question

##### Unit II Civil War and War Communism 1918-1921

- The first eight months
- Red and White Economic Policies

##### Unit III The New Economic Policy

- Political Debates
- Trade unions
- Gender relations
- Foreign Policy
- The Comintern
- Formation of the USSR

##### Unit IV Soviet Industrialization

- Debates and Historiographical Interpretations

#### Examination Scheme

Components	A	P	A/TP	CT	EE

# HISTORY OF WEST ASIA

**Course Code: HIS2505**

**Credit Units: 5**

## Course Objective

The course is aimed at introducing students to the history of West Asia. The region of West Asia plays an important role in global politics. Geopolitically, this region is very important. The key components of this course include the rise of Arab nationalism, the Palestinian problem, political formations in Turkey, and the rise of nationalism in Egypt.

## Course Content

### Unit I Rise of Arab Nationalism

- Causes and Result
- Mandate System in West Asia after First World War, Iraq , Syria and Lebanon

### Unit II Palestinian Problem

- History and Development
- Arab and Israel conflicts upto 1967
- Formation of Kingdom of Saudi-Arab

### Unit III Iran and Western Powers

- Iran and Western Powers
- Reign of Shah Raza Khan: Reforms and Achievements
- Foreign Policy of Iran in First Half of 20th Century

### Unit IV Political Formations in Turkey

- Tanzimat Era
- Abdul Hamid's Policy of Reforms, Limitations
- Young Turk Movement; Programme and Achievements

### Unit V Post-War Developments in Turkey

- Turkey and First World War
- Emergence of Kamal Pasha
- Reforms and Achievements

### Unit VI Rise of Nationalism in Egypt

- Growth of Anglo-French Imperialism in Egypt
- Rise of Nationalism: Causes and Results
- Anglo-Egyptian Relations: Treaty of 1936 and afterwards till Second World War

## Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# HISTORY OF THE WORLD WARS

**Course Code: HIS2506**

**Credit Units: 5**

## **Course Objective**

This course has been designed to make the students aware of the major political developments that shaped European history in particular and world history in general in the 20<sup>th</sup> century. The two world wars were a turning point in history of humanity not only in terms of its political, economic and social consequences but also in term of the aftermath of the wars which left an indelible mark on the history of human civilization. Many lives were lost and much was learnt from these two wars that were fought. The inter-war period and the historical processes that shaped this period are also significant in terms of various political institutions that came up during this time and brought Europe on the brink of the Second World War.

## **Course Content**

### **SEMESTER VI**

#### **UNIT I First World War**

- Origins- Europe on the brink of War
- Causes of World War I
- Alliances- Triple Entente and Triple Alliance
- Major events of World War I
- End of the War and the Treaty of Versailles
- Consequences of the War

#### **UNIT II Europe between the Wars**

- The League of Nations
- The Great Depression and its impact on Europe
- The Spanish Civil War
- Japanese Invasion of China
- Literary and cultural developments in the inter-war period

#### **UNIT III Nazism and Fascism**

- Rise of Fascism in Italy
- Italian Invasion of Ethiopia
- Rise of Nazism in Germany
- Stalinist Russia

#### **UNIT IV Second World War**

- Origins and causes
- The Axis powers and Allied powers
- Major events of the War
- Aftermath of the War

## **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>A/TP</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : External Examination)

# HISTORY OF LATIN AMERICA

**Course Code: HIS2507**

**Credit Units: 03**

## **Course Objective**

The course is aimed at introducing students to the history of Latin America. The history of this region has been kept out of the mainstream for very long. It is important for students to understand the developments which shaped this continent. The course intends to acquaint students with the historical background of various movements and transformations in the continent.

## **Course Content**

### **Unit I Historiography**

- Brief survey of pre-15<sup>th</sup> century
- Cultures and civilizations of Latin America

### **Unit II The Colonization and Conquest of Central and South America**

- Spain and Portugal in Latin America (1490's onwards)
- War and conquest; agrarian transformation; gold and silver mining
- The question of labour and slavery
- Transatlantic commerce and the modern world system
- Institutions of state
- The advent of Christianity and evangelization
- Demographic consequences
- Resistance, collaboration, survival
- New and old hierarchies
- Gender, race, and culture: separateness or syncretism?

### **Unit III The Breakdown of the Colonial Order and the Movements for Independence**

- Social base
- Practices and ideologies

### **Unit IV Class and State Formation**

- Industrialization
- Immigration
- Popular culture 1830's to the 1930's: case studies of Mexico, Argentina, and Brazil

### **Unit V Authoritarianism Regimes**

- Populism
- Revolutions
- the politics of literature, music and sports-1930's to the 1960's

## **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>A/TP</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# Syllabus - Sixth Semester

## GENDER AND HISTORY

**Course Code: HIS2604**

**Credit Units: 04**

### Course Objective

The role played by gender dynamics in shaping historical processes has not been paid much attention especially at the under-graduate level. This course is developed keeping in mind the need for students to be sensitized to the issue of gender through the prism of historical movements. This course seeks to provide a deeper understanding to the students about the role of gender in history, and how has played a significant role over a period of time.

### Course Content

#### UNIT I Gender, Culture and History: Theoretical Perspectives

- Theories of Gender
- Historicising Gender
- Correlation between History and Gender

#### UNIT II Position of Women in the Indian Historical Context

- Women in the Indus Valley Civilisation
- Women in Vedic Age
- Construction of women's role by Manusmriti
- Women in the Epic Age
- Women in ancient Indian dynastic history
- Position of women in Medieval India
- Role of women in India's independence struggle

#### UNIT III Role of women in World History

- Women in the French Revolution
- Women in the Industrial Revolution

#### UNIT IV Origins of the Feminist Movement

- Socio-cultural genesis
- Political background
- Impact of feminism on history writing

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# HISTORY OF CONTEMPORARY INDIA

**Course Code: HIS2605**

**Credit Units: 04**

## **Course Objective**

This course is designed to provide an in-depth understanding about contemporary issues in India including most of the major political, economic, social, and cultural events that have shaped India post-independence. The course will equip students to not only prepare for relevant competitive examinations but will also help them in analysing events and issues related to contemporary times. The course will help students in developing critical thinking about processes of which they are a part. By providing a link between the past and the present, this course will enrich the knowledge of the students and make them aware about various issues related to the growth and development of India.

## **Course Content**

### **SEMESTER V**

#### ***UNIT I Political Events in the History of Contemporary India***

- Emergence of political parties at the national level
- Emergence of political parties at the state level
- History of electoral politics and its contemporary relevance
- Caste and religion as factors in electoral politics in contemporary India
- The Kashmir Issue
- Uniform Civil Code
- Violence and Politics- Sikh Riots, Babri Masjid, Bombay Riots, Gujarat Riots

#### ***UNIT II Perspectives on Development since Independence***

- State and planning- The Five Year Plans, impact and assessment
- Reforms undertaken by the government since independence
- Economy and Liberalization, emergence of middle class, industrial expansion

#### ***UNIT III Development Strategy and its Impact***

- New economic structures-mixed economy, privatisation, special economic zones (SEZ)
- Impact on industry, organised and unorganised labour
- Land reforms in India
- History of the Green and White Revolutions
- IT Revolution
- Environmental Issues- Historical perspective on environmental issues

#### ***UNIT IV Ideologies and Movements***

- Emergence of Naxalism-historical perspective
- RSS and the emergence of Hindutva politics- secularism vs communalism debate
- Muslim right-wing organizations and politics
- Terrorism and its impact on India
- Linguistic movements and emergence of new states
- Human Rights and Women's Rights in India

- Right to Information

# ENVIRONMENTAL HISTORY- GLOBAL PERSPECTIVES

Course Code: HIS2606

Credit Units: 03

## Course Objective

The course aims to acquaint students with environmental history. In today's world where global warming and climate change are important concerns, it is important to understand the basics of environmental history. The course will introduce students to various constituents of environment and the symbiotic relationship between man and nature. The measures taken to mitigate climate change and other environmental concerns shall also be analyzed as part of the course.

## Course Content

### Unit I Revisiting understanding/s of Environment

- Problematising Anthropocentrism and Anthropocene
- Challenging Stationarity?

### Unit II Humans and animals: Multiplicity of interactions

- Entertainment and amusement
- A viable source of energy in 'energy-scarce' world

### Unit III To and from the New World: ecological imperialism

- Native vs invasions
- Contestation over aquatic resources

### Unit IV Colonialism and industrialization: ecological readings

- Access and use: new inequalities
- Elimination of diversity: endangered livelihood patterns
- Ever expanding encroachments of wild

### Unit V World of insatiable appetite

- Fuel-ing consumption
- Issue of climate change
- Challenges

## Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# DISSERTATION

Course Code: HIS2637

Credit Units: 09

## Course Objective

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual or Theoretical Framework – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusions -- 10 marks

**Chapter 5:** Bibliography-- 5marks

## The Components of a Dissertation

A Dissertation should have the following components:

- 1) **Cover Page:** This should contain the title of the dissertation, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the work and name of the University.
- 2) **Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) **Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) **Body of the Report:** The body of the report should have these four logical divisions
  - a)**Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b)**Conceptual Framework:** (relating to the topic of the Dissertation).
  - c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).
  - d)**Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) **Bibliography or References:** This section will include the list of books and articles which have been used in the work, and in writing the report.
- 6) **Annexures:** Questionnaires (if any), relevant reports, etc.  
(The main text of the Dissertation should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of the Dissertation Work

**Step I:** Selection of the topic should be made keeping the following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Dissertation Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the dissertation dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual and Theoretical Framework

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusions

**Step V:** The following documents are to be attached with the Dissertation:

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Dissertation Work in any Organisation / Institution.

Annexures,

References / Bibliography

**Guidelines for evaluation:**

- Each of the students has to undertake a topic individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Dissertation and Viva-Voce Examination has to be English. The Dissertation must be typed and hard bound.
- Failure to submit the Dissertation or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Dissertation and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Dissertation unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Dissertation.
- Evaluation of the Dissertation to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Dissertation separately, obtaining a minimum marks of 40 (Dissertation and Viva-Voce taken together) in paper 3.5.
- Marking Scheme for Dissertation and Viva-Voce Examination:

<b>Dissertation</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## Syllabus - First Semester

### INDIAN NATIONALISM

Course Code: POL2101

Credit Units: 05

#### Course Objective

The course will seek to provide the student with a basic yet meaningful understanding of the political scenario that led to the struggle for India's independence. It would endeavor to cover the entire duration of the growth of nationalism in India till the attainment of independence in 1947.

#### Course Content

##### Module-I: Origins and meaning of nationalism

##### Module-II: Emergence of nationalism in India

Historiography of Indian Nationalism, Agrarian Society and Peasant Discontent, The New Middle Class and the Emergence of Nationalism, Causes of nationalism in India, Foundation of the Indian National Congress, The moderate Congress: objectives and methods

##### Module-III: Early Nationalism: Discontent and Dissension

The Moderates and Economic Nationalism, Hindu Revivalism and Politics, Muslim Politics and the Foundation of the Muslim League, Patriotism in literature

##### Module-IV: Roots of extremism

The Swadeshi Movement in Bengal- 1905-1908, Extremism in other provinces, Repression, conciliation, and divide and rule, War and Indian politics, Bhagat Singh, Surya Sen and the Revolutionary Terrorists

##### Module-V: Movements from below

# BRITISH COLONIALISM IN INDIA

**Course Code: POL2102**

**Credit Units: 05**

## **Course Objective**

The purpose of this course is to help the students understand India's colonial past. The importance and relevance of understanding this past is the fact that the roots of many political institutions and ideas, social and economic structures that are central to politics in India today can be traced back to this past. The course seeks to achieve this understanding by studying colonialism in India from different perspectives that reveal different facets of colonialism in India: social-economic, political, religious, legal, and educational.

## **Course Content**

### **Module-I: Imperialism and colonialism**

Brief History of Global and Indian imperialism; Major Perspectives on Colonialism – Liberalism, Marxism, Post-colonialism

### **Module-II: Foundations of Colonial Rule in India**

Consolidation of British power in India; Police and Civil Administration; Legal Foundations of the Colonial State; Issues related to the sovereignty and relations with British Parliament and major constitutional developments

### **Module-III: Economy and Society**

Impact on Agriculture, land relations and ecology; the 'Deindustrialization' Debate

### **Module-IV: Religion and Society**

Colonial Ideology of Indian Improvement/'civilizing mission': Orientalists and the Anglicists (Utilitarians and Missionaries); Shaping Communities: Census and Enumeration; Colonialism and the Gender question

### **Module-V: Education**

Teaching the Colonial Subject: Education; The New Middle Class

### **Module-VI: Early Indian Responses**

Peasant and Tribal Uprisings; The 1857 Rebellion

## **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>A/TP</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : External Examination)

## POLITICAL PHILOSOPHY-II

Course Code: POL2202

Credit Unit: 04

### Course Objective

This paper aims at helping the students understand the concepts, trends and issues in modern western political philosophy. Thus (i) the first module would help the students gain an analytical overview of modern western political thought and (ii) the other three modules would work towards imbuing the students with an in-depth sight into some perennial issues of politico-philosophical significance. Towards the latter end, the second, third and fourth modules would include a study and analysis of the political philosophies of Hobbes, Locke and Rousseau.

### Course Content

#### Module-I: Modern Western Philosophy: An Introduction

Modern Western Philosophy- An Introduction; Natural Rights; Utilitarianism; Liberals and Conservatives; Anarchists and Socialists; Justice; A Deeper Sense of Politics; Global Politics

#### Module-II: Hobbes

Human Nature and the State of Nature; The Role and Powers of the Sovereign; Secular Moralism and Role of Social Contract

#### Module-III: Locke

Doctrine of Natural Law, Legitimate Regime, Property and the Class State

#### Module-IV: Rousseau

The Social Contract: Its Problem and Assumptions; The General Will and the Questions of Stability

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# GLOBAL THEMES IN DEVELOPMENT AND POLITICS

**Course Code:**POL2203

**Credit Units:** 04

## **Course Objective**

The course would provide the students with an insight into key global issues in order for them to understand future developments and events. Necessary teaching aids such as group discussions and viewing of key documentary films would be made use of to explain the specifics of each of the topics mentioned below.

## **Course Content**

### **Module-I: Decolonization**

Methods and stages of decolonization, History of decolonization, Post-colonial organizations

### **Module-II: Democracy**

Brief history of democracy, Variants of democracy, Forms of modern democracy

### **Module-III: Development**

History of international development, Theories and concepts of international development, International development in practice

### **Module-IV: Disarmament**

History and definition of disarmament, Nuclear disarmament, India and disarmament

### **Module-V: Food Security**

Need for food security, Challenges to achieving global food security, Risks to food security

### **Module-VI: Fair Trade**

Theories of fair trade, The WTO and fair trade, Basics of the fair trade system

### **Module-VII: Governance**

Need for global governance, Concepts and themes in global governance, Regional views

### **Module-VIII: Human Rights**

Philosophy of human rights, International protection, Violation of human rights, Substantive rights

### **Module-IX: Peace and Security**

Ethnic conflict and international security, International cooperation, Rule of Law

### **Module-X: Population**

World human population, Predicted growth and decline, Control of global population

### **Module-XI: Refugees**

Reasons for global refugee crisis, Historical and contemporary crises

### **Module-XII: Terrorism**

Definitions and theories of terrorism, Types of terrorism, Global terrorism crisis

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : External Examination)

## CURRENT THEMES IN INDIAN POLITICS

Course Code: POL2204

Credit Units: 03

### Course Objective

The course would attempt to appreciate the various political processes active in contemporary India and understand their implications for the social and political future of the country. It would prepare the students to critically evaluate contemporary and modern Indian politics and encourage evaluative thinking. Class lectures would be aided by regular group discussions, class debates and interactive question and answer sessions.

### Course Content

#### Module-I: The Nature and Functioning of Democracy

The Parliamentary System: An Evaluation; Democracy: Social and Economic Dimensions; The Changing Nature of the Party System; The Nature of Coalition Politics; Transformative Nature of Electoral Processes in India

#### Module-II: Key themes in Indian Politics

Why Is Secularism Important for India; Contemporary Debates on Nationalism; Hindu Nationalism and its Impact on the Polity

#### Module-III: Current Political Scenarios

Dimensions of Indian Federalism; Democratic Decentralization and Panchayati Raj; The Changing Nature of Public Administration; Judicial Reforms in Modern India; The Changing Face of the Civil Society; India in the Global Strategic Environment

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

## TERM PAPER

**Course Code:POL2231**

**Credit Units: 02**

### Objective

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge of politics by undertaking hands-on research on a topic of their choice. The topics selected by the students must be commensurate with the ongoing courses pertaining to the semester in question.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned.

### Guidelines:

1. The term paper will be related to contemporary politics and related philosophical injunctions and the topic(s) will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Issues of caste in Indian politics
  - State and democracy
  - Internal security scenario
  - Theories of secularism
  - Justice and related themes
  - Multicultural societies
  - Feminist critique of Indian politics
  - Media and politics
  - Cultural imperialism

### Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Presentation	Total
30	30	20	20	100

# ELECTIONS AND ELECTORAL POLITICS

Course Code: POL2206

Credit Units: 01

## Course Objective

The objective of the course would be to inculcate a basic understanding of the intricacies of the process that culminates in the dance of democracy at the end of the term of the incumbent government. The course would seek to provide the students with a clear picture of the specific themes that govern the conduct of elections and the manner in which various political parties respond to the call for polls.

## Course Content

### Module-I : Brief History of Elections in India

Elections in India since 1947 ; Electoral reforms ; Election Commission : challenges and issues

### Module-II : Study of Indian Elections : an overview

Case studies ; Comparative approaches ; Electoral process ; voter registration ; absentee voting

### Module-III : Political debates in the study of elections

Scientific dilemmas ; Political issues

## Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

## Texts and References

### Texts :

Ahuja, M L. 1998. *Elections and Electoral Processes in India- 1952-1998*. New Delhi : Mittal Publications.

Kumar, Arun. 2000. *Elections in India*. New Delhi : Neha Publications.

### References :

Roy, Meenu. 2000. *Electoral politics in India: election process and outcomes, voting behaviour and current trends*. New Delhi : Deep & Deep Publications.

## REVIEW OF CONTEMPORARY LITERATURE-I

**Course Code: POL2230**

**Credit Units: 02**

### Course Objective

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### Guidelines

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

- Content
- Writing style
- Information/learning
- Content handling
- Characters(if any)
- Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : End-Term Examination)

## PROJECT (WITH PRESENTATION AND EVALUATION)

Course Code: POL2232

Credit Units: 03

### Course Objective

The major objective of this course would remain development of the ability to undertake independent research on any topic of political or socio-economic of relevance and produce an intellectual treatise which enhances future knowledge and provides a basis for further investigative work. The course would emphasise on the methodology of research.

### Methodology of Project

The project would be designed to encourage original research and at the same time provide the students with an opportunity to work on political issues that affect the everyday life of the students and those who live around them. For example, students could observe and assess the impact of impending elections on people in their constituency from the socio political point of view. Their observations could be reecorded in the form of project report followed by a presentation.

### Guidelines for Project Report

1. **Length of the report** : The project report should not exceed 5000 words in length (excluding Bibliography and Annexures).
2. **Contents of the report** :
  - a. Cover page
  - b. Acknowledgements
  - c. Table of Contents
  - d. Introduction
  - e. Review of readings
  - f. Findings and analysis
  - g. Conclusions
  - h. Bibliography or References
  - i. Annexures
3. **Steps for completion of project** :
  - a. Finalization of topic in consultation with faculty
  - b. Introductory presentation with research objectives and questions specified
  - c. Field work
  - d. Preparation of project report
  - e. Submission of project report
  - f. Final Presentation and viva

### Possible research topics

1. Select coverage of any political issue of importance and trace its development through news reports published in any reputed newspaper (English/Hindi).
2. Prepare a research report on the impact of elections in your constituency.
3. Prepare a report on the representation of terrorism in Hindi films. The report should contain a list of films viewed with full details.
4. Select any philosophical issue of your choice and attempt to bring out your own conclusions based on your reading of the various texts on that issue.

### Examination Scheme

Project Report	Power Point Presentation & Viva
75 marks	25 marks

## Syllabus – Third Semester

### INDIAN POLITICAL THOUGHT-I

**Course Code: POL2301**

**Credit Unit: 04**

#### Course Objective

This paper aims at helping the students understand the ancient Indian political thought with a contemporary perspective. It begins with an overview of ancient Indian political thought and proceeds to clarify the significant concepts and theories that are of relevance. It, also, includes a detailed study and analysis of the political philosophies of two major thinkers viz., Manu and Kautilya.

#### Course Content

##### Module-I: Ancient Indian Political Thought: An Overview

The Political Philosophy of- the Bhagwad Gita, Manusmriti, Arthashastra; Evolution from the Puranas to the Nitishastras.

##### Module-II: Basic Concepts and Concerns

Duties of the King; Justice and Punishment; Purusharthas; Varnas.

##### Module-III: Manu

Manusmriti; Manu on the Political Institutions; Manu and Modern Thinkers.

##### Module-IV: Kautilya

State, Law and Justice; Principles of Government.

#### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# POLITICS OF POST-COLONIAL STATES

Course Code: POL2303

Credit Units: 04

## Course Objective

The objective of the course is to delineate the specific features of post-colonial states and their development patterns. The students would be exposed to world-class literature on both the definition of the post-colonial state as well as the trajectory of political processes as they developed in those states, for a better and complete understanding of national as well as international politics.

## Course Content

### Module-I : Definition of post-colonial state

Europe as an instrument of colonialism ; historical trajectory of post-colonial states ; debates modernity in post-colonial states ; democratic institutions in post-colonial states

### Module-II : Development of the post-colonial state in Africa

Ghana ;Kenya ; South Africa ; Democratic Republic of Congo ; Algeria

### Module-III : Political processes in post-colonial states in Latin America

Argentina ; Brazil ; Bolivia

### Module-IV : Post-colonial states in Asia

Pakistan ; Bangladesh ; Sri Lanka ; Nepal

## Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# SUMMER PROJECT EVALUATION

Course Code: POL2335

Credit Units: 03

## Objective

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Brief Review of Literature – 25 marks

**Chapter 3:** Research Findings and Analysis – 25 marks

**Chapter 4:** Conclusions – 10 marks

**Chapter 5:** Bibliography – 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

**a) Introduction:** This will cover the background, rationale/ need / justification, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

**b) Brief Review of Literature:** (relating to the topic of the Project).

**c) Research Findings and Analysis:** (using the tools and techniques mentioned in the methodology).

**d) Conclusions:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic
- Relevance of the topic
- Time available for completion

- Feasibility of data collection within the given time limit
- Challenges involved in data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor

**STEP III:** Collection of information and data relating to the topic and analysis of the same

**STEP IV:** Writing the report dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Brief Review of Literature

**Chapter 3:** Research Findings and Analysis

**Chapter 4:** Conclusions

**Chapter 5:** Bibliography

**STEP V:** The following documents are to be attached with the Final Project Report.

- Approval letter from the supervisor (Annexure-IA)
- Student's declaration (Annexure-IB)
- Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

#### **Guidelines for evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate. The evaluation scheme shall be as follows:

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

**Student's Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of B.A. Honours in Political Science is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.  
I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# POLITICS AND MEDIA

**Course Code: POL2304**

**Credit Units: 03**

## **Course Objective**

To provide students with an overarching perspective on the various processes at play in the manner in which the media – print and visual – transform into vehicles of politics. The course will, through exploration of several case studies pertaining to various types of media, encourage the students to critically analyse media messages, both print and visual.

## **Course Content**

### **Module-I : Theories of the mass media**

Agenda Setting Theory ; Cultivation Theory ; Dependency Theory ; Hypodermic Needle Theory ; Knowledge Gap ; Media Richness Theory ; Medium Theory ; Spiral of Silence ; Two Step Flow Theory ; Uses and Gratifications Approach ; Priming ; Framing

### **Module-II : Print media and politics**

Brief history of newspapers in India ; Growth of print media in India ; print media and Indian political parties ; democratic processes and print media

### **Module-III : Television news media and politics**

Brief history of television media in India ; Growth of Television news media in india ; democratic politics and television media : perspectives and trends

## **Examination Scheme**

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

## REVIEW OF CONTEMPORARY LITERATURE-II

**Course Code: POL2330**

**Credit Units: 02**

### Course Objective

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### Guidelines

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

- Content
- Writing style
- Information/learning
- Content handling
- Characters(if any)
- Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : End-Term Examination)

## TERM PAPER

**Course Code: POL2331**

**Credit Units: 02**

### Objective

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge of politics by undertaking hands-on research on a topic of their choice. The topics selected by the students must be commensurate with the ongoing courses pertaining to the semester in question.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned.

### Guidelines:

1. The term paper will be related to contemporary politics and related philosophical injunctions and the topic(s) will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)

- Issues of caste in Indian politics
- State and democracy
- Internal security scenario
- Theories of secularism
- Justice and related themes
- Multicultural societies
- Feminist critique of Indian politics
- Media and politics
- Cultural imperialism
- Plato's Republic

### Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Presentation	Total
30	30	20	20	100

## SOUTH ASIA IN PERSPECTIVE

Course Code:POL2305

Credit Units: 01

### Course Objective

The course would attempt to inculcate understanding of the various political processes at work in South Asia, particularly states like Pakistan, Bangladesh, Sri Lanka and Nepal. It will supplement the South Asia unit from the core paper on post-colonial states and their development after independence. This course will focus primarily on two countries in South Asia – Pakistan and Sri Lanka.

### Course Content

#### Module-I : Institutions and Political Processes in South Asia

Development of post-colonial institutions ; historical development and current debates in democracy in South Asia ; role of military in post-colonial societies in South Asia

#### Module-II : State and Polity in Pakistan

Democracy and electoral process ; Islamization and cultural change ; the army and its role in political process ; Pakistan's foreign policy ; issues of internal security and terrorism

#### Module-III : State and Polity in Sri Lanka

Democratic institutions and their functioning ; role of the military ; the Tamil issue ; internal security and terrorism ; Sri Lanka's foreign policy

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

### Texts and References

## PROJECT (WITH PRESENTATION AND EVALUATION)

Course Code: POL2332

Credit Units: 03

### Course Objective

The major objective of this course would remain development of the ability to undertake independent research on any topic of political or socio-economic of relevance and produce an intellectual treatise which enhances future knowledge and provides a basis for further investigative work. The course would emphasise on the methodology of research.

### Methodology of Project

The project would be designed to encourage original research and at the same time provide the students with an opportunity to work on political issues that affect the everyday life of the students and those who live around them. For example, students could observe and assess the impact of impending elections on people in their constituency from the socio political point of view. Their observations could be reecorded in the form of project report followed by a presentation.

### Guidelines for Project Report

**Length of the report :** The project report should not exceed 5000 words in length (excluding Bibliography and Annexures).

**Contents of the report :**

- Cover page
- Acknowledgements
- Table of Contents
- Introduction
- Review of readings
- Findings and analysis
- Conclusions
- Bibliography or References
- Annexures

**Steps for completion of project :**

- Finalization of topic in consultation with faculty
- Introductory presentation with research objectives and questions specified
- Field work
- Preparation of project report
- Submission of project report
- Final Presentation and viva

### Possible research topics

- Select coverage of any political issue of importance and trace its development through news reports published in any reputed newspaper (English/Hindi).
- Prepare a research report on the impact of elections in your constituency.
- Prepare a report on the representation of terrorism in Hindi films. The report should contain a list of films viewed with full details.
- Select any philosophical issue of your choice and attempt to bring out your own conclusions based on your reading of the various texts on that issue.

### Examination Scheme

Project Report	Power Point Presentation & Viva
75 marks	25 marks

## Syllabus – Fourth Semester

### INDIAN POLITICAL THOUGHT-II

**Course Code: POL2401**

**Credit Unit: 05**

#### **Course Objective**

This paper aims at helping the students understand the pre as also post-Independence Indian political thought with a contemporary perspective. It, thus, deals extensively as also intensively with the life-sketches and political philosophies of four major Indian thinkers viz., Mahatma Gandhi, Sri Aurobindo, B.R. Ambedkar and M.A. Jinnah.

#### **Course Content**

##### **Module-I: MKGandhi**

Life Sketch; Political Thought; Critical Analysis.

##### **Module-II: Sri Aurobindo**

Foundations of Political Thought; Nationalism and the Ideal of Human Unity; Utopian Elements.

##### **Module-III: BRAmbedkar**

Untouchability, Justice, Democracy; Education.

##### **Module-IV: MAJinnah**

Life Sketch; Political Philosophy; Critical Analysis.

#### **Examination Scheme**

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# PUBLIC ADMINISTRATION-I

**Course Code: POL2402**

**Credit Unit: 05**

## **Course Objective**

This paper aims to help the students understand the key concepts and concerns in the field of public administration. It begins with an introduction to the discipline and proceeds towards an analysis of the main theories and principles. It concludes with a contemporary study and analysis of the relevance of the discipline.

## **Course Content**

### **Module-I: Introduction to Public Administration**

Meaning, Scope and Significance; New Public Administration.

### **Module-II: Theories and Principles of Public Administration**

Classical Theory, Scientific Management Theory, Human Relations Theory, Theory of Bureaucracy, Ecological Approach; Principles of Organization.

### **Module-III: An Analysis**

Public Administration in Asia and Beyond; Contemporary Relevance; Areas of Improvement.

## **Examination Scheme**

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# **SOCIAL MOVEMENTS IN INDIA**

**Course Code: POL2403**

**Credit Units: 05**

## **Course Objective**

To facilitate the understanding of various social movements in India and their impact on India's polity, economy and society as well as the changes they brought about in the manner in which politics is conducted in India. To provide wide ranging information on subaltern struggles in many parts of the country.

## **Course Content**

### **Module-I : Defining social movements**

Definition and features of social movements ; difference from historical movements ; objectives and ideologies of social movements

### **Module-II : Peasant Movements**

Key causes of peasant movements ; classification of peasant movements ; Naxalite Movement in West Bengal ; Telangana Movement in Andhra Pradesh ; peasant struggles in Uttar Pradesh ; impact of peasant movements ; leadership and organization

### **Module-III : Tribal Movements**

Key causes of peasant movements ; classification of peasant movements ; types of tribal movements ; tribal movements in Bihar ; resistance movements in north-western and southern India ; movements in north east India ; issues concerning tribal movements ; organization and leadership of tribal movements

### **Module-IV : Dalit Movements**

Types of dalit movements ; issues in dalit movements ; causes of dalit movements ; dalit movements in Andhra Pradesh, Maharashtra, Tamil Nadu and Uttar Pradesh ; organization and leadership of dalit movements ; key participants

### **Module-V : Backward caste/class movements**

Definition and types of backward caste/class movements ; causes of backward caste/class movements ; issues concerning backward caste/class movements ; participation and leadership of backward caste movements

### **Module-VI : Working Class Movements**

Types and methods of working class movements ; issues in working class movements ; participation and leadership of working class movements ; organization of working class movements

### **Module-VII : Middle Class Movements**

Typology of middle class movements ; issues in middle class movements ; 'nativism' vs. 'nationalism' ; participation and leadership of middle class movements ; organization of middle class movements

### **Module-VIII : Students Movements**

Issues in students movements ; participation and leadership ; organization of students movements ; key students movements in India

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : External Examination)

# RELIGION AND POLITICS IN INDIA

**Course Code: POL2404**

**Credit Units: 03**

## **Course Objective**

The course would attempt to provide the students with quality understanding of the interstices of religion and politics in modern India, with the roots of the current issues lying firmly in movements, events as well as processes witnessed during the colonial period. It would also inculcate in the student an appreciation of the various ways in which politics interacts with religion in Indian society.

## **Course Content**

### **Module-I : Secularism in a religious society**

Definitions and theories of secularism ; Historical Evolution of Secularism in India ; India as a secular state ; Functioning of Indian Secularism

### **Module-II : Hindu Nationalism**

Hindu Nationalism as a social movement ; Militant Social Movement Phase (1989-1992) ; the RSS as a Hindu Nationalist Sect and their political model

### **Module-III : Persistence of Hindu-Muslim conflict**

Congress policy towards Muslims ; Muslim grievances in North India ; Muslim politics and voting behaviour ; Hindu-Muslim polarization ; Hindu consciousness and Hindu-Muslim conflict

## **Examination Scheme**

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

## WORKSHOP ON CONTEMPORARY POLITICS

Course Code: POL2433

Credit Units: 01

### Course Objective

The course would facilitate students to engage with political issues of their choice and discuss the same with fellow students so that perspectives emerge and the development of varied points of view are encouraged. Students would also be encouraged to prepare and make presentations in class and share thoughts on politics and political issues.

### Format of Workshop

1. The workshop would be a culmination of class discussions on various emerging issues in Indian and global politics.
2. Students would prepare and make presentations on any one topic of their choice.
3. The presentation would be followed by question and answer session in which other students and invited faculty members would participate.
4. The workshop would be held on a convenient date and day so that several members of the faculty could take part in it.

### Guidelines for workshop

**Step 1 : Selection of topic for workshop presentation :** The students would select a topic of relevance in consultation with the faculty.

**Step 2 : Selection of a date/day/venue for workshop :** The workshop would be organized and managed entirely by the students. The faculty would play the role of advisors. From selection of suitable date and venue to inviting AUH faculty and officials for the workshop, students would be in charge of the smooth conduct of the workshop.

**Step 3 : Preparation for workshop presentation :** Once the topic is selected, students would start gathering relevant material for the presentation during the workshop. Since the presentation would be followed by questions and answers, the students have to be prepared for a tough session. Faculty will facilitate the collection of material and preparation of the presentation.

**Step 4 : Submission of presentation :** Students would submit their presentations in hard copy format for evaluation purposes.

### Examination Scheme

Power Point Presentation and Q&A	Participation and organization
75 marks	25 marks

## Syllabus – Fifth Semester

### PUBLIC ADMINISTRATION-II

**Course Code: POL2501**

**Credit Unit: 05**

#### Course Objective

This paper aims to help the students develop a deep and analytical understanding of the Indian public administrative system. It, thus, enters into a penetrating analysis of the systems of local government, personnel administration, financial administration and the like - as conceived and found in India. It takes up the study of recent events and debates and would encourage the students to enter into a constructive dialogue towards the betterment of the system.

#### Course Content

##### Module-I: Structure of Government Organizations in India

Departments; Public Corporations; Chief Executives

##### Module-II: Personnel and Financial Administration in India

Civil Services; Recruitment, Training and Performance Appraisal; Budget; Audit and Accounts

##### Module-III: Local Self-Government

Historical Overview; The structure of Local Self-Government in India; An analysis

#### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# INDIA'S FOREIGN POLICY

**Course Code: POL2503**

**Credit Units: 05**

## **Course Objective**

To provide an in-depth overview of the development of India's foreign policy particularly with reference to the contemporary scenario characterised by global terrorism and violence. To evaluate and discuss the methods of engaging with South Asia and the world that India has adopted over the years.

## **Course Content**

### **Module-I : Features and perspectives**

Foreign policy and national interest ; principles and objectives

### **Module-II : Non-alignment**

The genesis of non-alignment ; India and non-alignment ; non-aligned movement and its impact on international relations ; contemporary relevance of non-aligned movement

### **Module-III : India-Pakistan Relations**

The early years (1947-62) ; major developments leading to the 1971 conflict ; India-Pakistan relations in 1980s ; Kashmir conflict and Indo-Pak relations ; global terrorism and its impact on India-Pakistan relations ; contemporary trends in India-Pakistan relations

### **Module-IV : India's relations with other states in South Asia**

India's policy towards Bangladesh ; India and Nepal ; India's foreign policy towards Sri Lanka : history, the Tamil question and contemporary trends

### **Module-V : India-China Relations**

Evolution of India's China Policy ; India-China relations through the years ; major events and conflicts ; economic relations between India and China ; contemporary perspectives on India-China Relations

### **Module-VI : India's policy towards the rest of the world**

Southeast Asia in Indian Foreign Policy ; India-Iranian Relations ; India's policy towards Israel ; India's relations with Korea ; India-Japan Relations ; India's relations with Russia ; India and the United States

### **Module-VII : Issues in India's foreign policy**

Evolution of India's Nuclear Policy ; India's foreign economic policies ; domestic and international influences on India's energy policy

## **Examination Scheme**

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# CIVIL SOCIETY IN INDIA

**Course Code: POL2505**

**Credit Units: 02**

## **Course Objective**

The course would identify the importance of a vibrant civil society in a democratic polity and attempt to underline the same for the students through re-reading and teaching. Students would be provided with both the theoretical aspects as well as the current and practical scenario with regard to the development of a civil society in India.

## **Course Content**

### **Module-I : Civil Society as the 'Third Sphere'**

Civil society and governance ; Critique of civil society as Third Sphere ; Indian perspective on civil society ; the crisis of governance ; civil society and the goal of good governance ; corruption and the Right to Information

### **Module-II : Civil Society in Practice in India**

Save the Chilika Movement in Orissa ; Case study of the Chhattisgarh Mukti Morcha ; Democratic governance, civil society and Dalit protest ; governance and the subalterns ; the pavement dwellers of Mumbai ; land distribution for Kol tribals in Uttar Pradesh

### **Module-III : Case Study of Aam Aadmi Party in Delhi**

Genesis of the movement and development ; from movement to political party ; movement-politics interface ; reflections on election results for Aam Aadmi Party

## **Examination Scheme**

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

## TERM PAPER

**Course Code: POL2531**

**Credit Units: 02**

### Objective

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge of politics by undertaking hands-on research on a topic of their choice. The topics selected by the students must be commensurate with the ongoing courses pertaining to the semester in question.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned.

### Guidelines:

1. The term paper will be related to contemporary politics and related philosophical injunctions and the topic(s) will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Issues of caste in Indian politics
  - State and democracy
  - Internal security scenario
  - Theories of secularism
  - Justice and related themes
  - Multicultural societies
  - Feminist critique of Indian politics
  - Media and politics
  - Cultural imperialism

### Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Presentation	Total
30	30	20	20	100

## REVIEW OF CONTEMPORARY LITERATURE-IV

**Course Code: POL2530**

**Credit Units: 02**

### Course Objective

The objective of this concentration elective is to inculcate reading habit alongwith value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### Guidelines

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

- Content
- Writing style
- Information/learning
- Content handling
- Characters(if any)
- Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size16

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : End-Term Examination)

# POST-COLD WAR WORLD POLITICS

Course Code: POL2506

Credit Units: 03

## Course Objective

To provide a theoretical understanding of politics as it developed in the post-Cold War scenario particularly with regard to the politics of the United States of America vis-a-vis the rest of the world, the shifting of the power blocks, and the growth of anti-American sentiment in certain parts of the world. The course would also encourage students to read contemporary literature on emerging international political scenarios.

## Course Content

### Module-I : Overview of the post-Cold War decade

Historical background of US foreign policy ; US relations with EU ; brief history of US interventions in West Asia, South East Asia and the Middle East

### Module-II : Post-Cold War American Politics

Key institutional players ; lobbies and their importance in American politics ; media and public opinion in US ; America's position in a globalized economy

### Module-III : America and the Arab/Muslim World

Historical development of politics of the Arab/Muslim world ; why the Arabs/Muslims hate America ? US intervention and international war against terrorism

## Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# THEORIES OF PUNISHMENT

**Course Code: POL2507**

**Credit Unit: 01**

## **Course Objective**

This paper aims at helping the students understand the concepts and concerns that are intrinsic to the idea of punishment. It starts with a study and analysis of the concept of punishment and proceeds to understand the latter against the contemporary background.

## **Course Content**

### **Module-I: An introduction to the Idea of Punishment**

Concept of Punishment; Theories of Punishment.

### **Module-II: The Relevance of 'Punishment'**

Case Studies from Different Parts of the World; Conclusion.

## **Examination Scheme**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>A/TP</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : External Examination)

## PROJECT (WITH PRESENTATION AND EVALUATION)

Course Code: POL2532

Credit Units: 03

### Course Objective

The major objective of this course would remain development of the ability to undertake independent research on any topic of political or socio-economic of relevance and produce an intellectual treatise which enhances future knowledge and provides a basis for further investigative work. The course would emphasise on the methodology of research.

### Methodology of Project

The project would be designed to encourage original research and at the same time provide the students with an opportunity to work on political issues that affect the everyday life of the students and those who live around them. For example, students could observe and assess the impact of impending elections on people in their constituency from the socio political point of view. Their observations could be reecorded in the form of project report followed by a presentation.

### Guidelines for Project Report

**Length of the report :** The project report should not exceed 5000 words in length (excluding Bibliography and Annexures).

**Contents of the report :**

- Cover page
- Acknowledgements
- Table of Contents
- Introduction
- Review of readings
- Findings and analysis
- Conclusions
- Bibliography or References
- Annexures

**Steps for completion of project :**

- Finalization of topic in consultation with faculty
- Introductory presentation with research objectives and questions specified
- Field work
- Preparation of project report
- Submission of project report
- Final Presentation and viva

### Possible research topics

- Select coverage of any political issue of importance and trace its development through news reports published in any reputed newspaper (English/Hindi).
- Prepare a research report on the impact of elections in your constituency.
- Prepare a report on the representation of terrorism in Hindi films. The report should contain a list of films viewed with full details.
- Select any philosophical issue of your choice and attempt to bring out your own conclusions based on your reading of the various texts on that issue.

### Examination Scheme

Project Report	Power Point Presentation & Viva
75 marks	25 marks

## Syllabus – Sixth Semester

### COMPARATIVE GOVERNMENT AND POLITICS

**Course Code:**POL2601

**Credit Units:** 04

#### **Course Objective**

The core objective of the course is to impart an understanding of comparative forms of government and politics in countries with parliamentary as well as presidential forms of government. At the end of the course the student will be able to distinguish between forms and nature of governments in various countries and draw comparisons between political systems.

#### **Course Content**

##### **Module-I : Theoretical background**

Political concepts ; The State ; Democracy and democratic political regimes ; Authoritarian rule ; Theoretical approaches ; Structural-Functional Analysis ; System Analysis ; Constitutionalism

##### **Module-II : Forms of politics**

Political culture ; political communication ; political participation

##### **Module-III : Elements of Political Systems**

Political Parties ; Interest Groups ; Elections ; Voters

##### **Module-IV : Institutions**

Constitution and law ; Multilevel governance ; Legislatures ; Political Executive ; Bureaucracy and Public Administration

##### **Module-V : Policy and Methods**

Policy Process ; Comparative Methods

##### **Module-VI : Comparative political structures and processes**

United States ; United Kingdom ; China ; Pakistan

#### **Examination Scheme**

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : External Examination)

# DISSERTATION

Course Code: POL2637

Credit Units: 09

## Course Objective

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual or Theoretical Framework – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusions -- 10 marks

**Chapter 5:** Bibliography-- 5marks

## The Components of a Dissertation

A Dissertation should have the following components:

- 1) **Cover Page:** This should contain the title of the dissertation, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the work and name of the University.
- 2) **Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) **Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) **Body of the Report:** The body of the report should have these four logical divisions
  - a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b) **Conceptual Framework:** (relating to the topic of the Dissertation).
  - c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).
  - d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) **Bibliography or References:** This section will include the list of books and articles which have been used in the work, and in writing the report.
- 6) **Annexures:** Questionnaires (if any), relevant reports, etc.  
(The main text of the Dissertation should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of the Dissertation Work

**Step I:** Selection of the topic should be made keeping the following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.

- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Dissertation Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the dissertation dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual and Theoretical Framework

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusions

**Step V:** The following documents are to be attached with the Dissertation:

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Dissertation Work in any Organisation / Institution.

Annexures,

References / Bibliography

#### **Guidelines for evaluation:**

- Each of the students has to undertake a topic individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Dissertation and Viva-Voce Examination has to be English. The Dissertation must be typed and hard bound.
- Failure to submit the Dissertation or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Dissertation and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Dissertation unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Dissertation.
- Evaluation of the Dissertation to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Dissertation separately, obtaining a minimum marks of 40 (Dissertation and Viva-Voce taken together) in paper 3.5.
- Marking Scheme for Dissertation and Viva-Voce Examination:

<b>Dissertation</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## READING GANDHI

Course Code: POL2602

Credit Unit: 04

### Course Objective

The course aims at introducing the students to the life and philosophy of Mohandas Karamchand Gandhi. It enters into a critical evaluation of Gandhian thought and encourages students to analyze Gandhi's contribution to the Indian Society and suggest workable implications for the latter.

### Course Content

#### Module-I: M K Gandhi: An Introduction

Life Sketch; Influences; Criticism.

#### Module-II: Gandhi's Political Thought

Gandhian Philosophy; Political Thought and Action; Implications for the Indian Society.

#### Module-III: Critical Evaluation of Gandhi's Contribution

Was Freedom for India, in 1947, possible without Gandhi?; Why is Gandhi called the 'Father of the Nation?'; Conclusive Analysis.

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

## REVIEW OF CONTEMPORARY LITERATURE-V

**Course Code: POL2630**

**Credit Units: 02**

### Course Objective

The objective of this concentration elective is to inculcate reading habit alongwith value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### Guidelines

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

- Content
- Writing style
- Information/learning
- Content handling
- Characters(if any)
- Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size16

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A** : Attendance ; **P** : Presentation ; **A/TP** : Assignment/Term Paper ; **CT** : Class Test ; **EE** : End-Term Examination)

## TERM PAPER

**Course Code:POL2631**

**Credit Units: 02**

### Objective

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge of politics by undertaking hands-on research on a topic of their choice. The topics selected by the students must be commensurate with the ongoing courses pertaining to the semester in question.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned.

### Guidelines:

1. The term paper will be related to contemporary politics and related philosophical injunctions and the topic(s) will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Issues of caste in Indian politics
  - State and democracy
  - Internal security scenario
  - Theories of secularism
  - Justice and related themes
  - Multicultural societies
  - Feminist critique of Indian politics
  - Media and politics
  - Cultural imperialism

### Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Presentation	Total
30	30	20	20	100

## PROJECT (WITH PRESENTATION AND EVALUATION)

**Course Code: POL2632**

**Credit Units: 03**

### **Course Objective**

The major objective of this course would remain development of the ability to undertake independent research on any topic of political or socio-economic of relevance and produce an intellectual treatise which enhances future knowledge and provides a basis for further investigative work. The course would emphasise on the methodology of research.

### **Methodology of Project**

The project would be designed to encourage original research and at the same time provide the students with an opportunity to work on political issues that affect the everyday life of the students and those who live around them. For example, students could observe and assess the impact of impending elections on people in their constituency from the socio political point of view. Their observations could be reecorded in the form of project report followed by a presentation.

### **Guidelines for Project Report**

**Length of the report :** The project report should not exceed 5000 words in length (excluding Bibliography and Annexures).

#### **Contents of the report :**

- Cover page
- Acknowledgements
- Table of Contents
- Introduction
- Review of readings
- Findings and analysis
- Conclusions
- Bibliography or References
- Annexures

#### **Steps for completion of project :**

- Finalization of topic in consultation with faculty
- Introductory presentation with research objectives and questions specified
- Field work
- Preparation of project report
- Submission of project report
- Final Presentation and viva

### **Possible research topics**

- Select coverage of any political issue of importance and trace its development through news reports published in any reputed newspaper (English/Hindi).
- Prepare a research report on the impact of elections in your constituency.
- Prepare a report on the representation of terrorism in Hindi films. The report should contain a list of films viewed with full details.
- Select any philosophical issue of your choice and attempt to bring out your own conclusions based on your reading of the various texts on that issue.

### **Examination Scheme**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

### HISTORY OF ENGLISH LITERATURE

**Course Code: ENG2101**

**Credit Units: 05**

**Course Objective:**

The course is designed to give a broad background of English Literature over a period of some 14 centuries to the students. This will give the students an insight into the major literary canons – that sequence of interlinked works - with their characteristic trends and genres with major literary authors and texts. This course explores the long history of writing in the British Isles, from the Anglo-Saxon and the early Christian period and the world over in the present day. It gives a record of English writing – poetry, drama and fiction in the various regions.

**Course Contents:**

**Module-I:** Anglo-Saxon, Anglo-Norman, Medieval Age (Morality plays, Miracle plays & Mystery Plays)

**Module-II:** Renaissance in Europe (Elizabethan Theatre; Jacobean – Revenge plays, Metaphysical Poets; Puritan Age)

**Module-III:** Classical Age (Restoration & Augustan Age)

**Module-IV:** Romanticism

**Module-V:** Victorian Age

**Examination Scheme:**

Components	Assignment	Sessional	Presentation	EE
Weightage (%)	15	10	05	70

## RESEARCH METHODOLOGY-II

**Course Code: ENG2304**

**Credit Units: 01**

### **Course Objective:**

This paper proposes to introduce student to the philosophy and mechanics of research, to train them in the use of language, style and discourses suitable for dissertation writing to help them acquire both a theoretical thrust and hands-on experience in writing research proposals before they embark on the execution of the thesis proper.

### **Module-I: The Mechanics of Research**

The Mechanics of dissertation Writing

Data Collection – Primary and Secondary Sources.

Procedure in Literary Research e-learning and Research

### **Module-II: Language, Style and Types of Discourses**

The Style suitable for a Literary Thesis

Narration Argumentation

Exposition Description

### **Examination Scheme:**

<b>Components</b>	<b>Assignment</b>	<b>Sessional</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	05	70

### **Texts and References**

- Bateson, F.W. The Scholar Critic 2. Thorpe, James.
- Gibaldi, Joseph. MLA Handbook
- Brooks, C. and Warren, R.P. Modern Rhetoric
- Lodge, David. Modes of Modern Writing
- Kaplan, R.B. The Conduct of Inquiry: Methodology of Behavioural Sciences, San Francisco, 1964. Form and Style in Thesis Writing

# SUMMER PROJECT EVALUATION

**Course Code: ENG2335**

**Credit Units: 03**

Summer Project is primarily a research work. It involves academic reading of several sources and writing on a particular topic relating to the core course or courses of the program. It is a scholarly inquiry into academic problems or issues. It should involve a systematic approach to gathering and analysis of information/ideas, leading to production of a structured report. The research topic should hold significant academic value commensurate with level of the Program.

## GUIDELINES FOR SUMMER PROJECT REPORT

### Topic

The topic of the paper will be of the student's choice with consent of the Supervisor. It must be relevant to the content of the course, but it should be treated in greater depth than it is covered in class. Focus is of the utmost importance. Too broad a topic will either lead to superficial treatment or an unnecessarily long paper; too narrow a topic will lead to a lack of source material and redundancy. Make sure the subject focuses on one question or topic so that the paper has a definite purpose. Composing an introduction and conclusion can be a good test of the cohesiveness of the subject. The domain can include Literature, Linguistics, Applied Linguistics, English Language Teaching and other related areas.

### Synopsis of Summer Project Report

A Synopsis of the Summer Project Report should be submitted to the Board of Studies of the Institute. The Board, after deliberation, will suggest changes and modifications and will assign a supervisor from amongst the teaching faculty of the Institute. The synopsis should include the following –

- Title of Summer Project Report

- Introduction

- Problems of Research

- Objectives of Research

- Tentative Chapter Division

- Suggested readings

### Source Material and References

Presenting your own ideas in a Summer Project Report is acceptable and even encouraged. However, the paper must be based on facts and opinions from authoritative sources and these sources must be given proper credit. A minimum of three published sources is required, and ten or more is typical. Direct quotes must be placed inside quotation marks or in indented sections and should be used sparingly. Paraphrasing is better in most cases.

There are two popular ways to cite references. One is to place superscripted numbers in the text with corresponding footnotes at the bottom of the page or endnotes at the end of the paper. More typical of scientific papers is to place the author and year in parentheses (Heaton, 1984). In either case you need a bibliography of all cited sources at the end of the paper with author(s), year, title, publication or publisher, volume, and pages. These should be in alphabetical order by name of the primary author. Preference however should be given to MLA Style Sheet.

Be sure to find source materials that are specific to your topic, either books or journal articles. Textbooks are usually too general and should be avoided. The libraries have published and computerized indexes that can be used to find relevant sources. See the Supervisor or a reference librarian if you are unfamiliar with these resources.

Plagiarism is the presenting of someone else's wording or ideas as one's own and is a violation of university policy. If you use someone else's words or ideas, you must give them proper credit. You

must also obtain permission from the Supervisor before using your Summer Project Report for more than one course.

### **Length and Format**

Length is not important; 40 to 60 pages of 1.5 spaced text is a good target. The title, author, course, and date should be typed onto a cover sheet.. Illustrations are not required but are often useful in explaining graphical concepts and in giving the paper character. The bibliography should be the last section of the paper. The entire report has to be submitted in two spiral bound copies.

### **Grading**

Students are required to make two submissions: a first draft and a final draft prior to final submission. The first draft is not to be a "rough" draft; it should be a completed, typed paper like you would ordinarily submit. I will read it carefully, offer suggestions for improvement, give it a grade, and return it to you promptly. The final draft, which is worth a larger share of the points, is your chance to respond to the suggestions and submit an improved paper. This, I hope, will make the writing of a Summer Project Report more of a learning experience. We strongly suggest using a word processor so that the final draft can be created by editing rather than complete retyping.

Grading is based on both research content and presentation. Your paper should demonstrate that you have gained a level of expertise in the subject by studying the relevant literature. Your presentation should be clean and convincing with proper use of paragraphs, complete sentences, and correct grammar, spelling, and punctuation. Make your Summer Project Report look and sound professional.

### **Evaluation of Project Work**

<b>Sl. No.</b>	<b>Evaluated by</b>	<b>Criteria</b>	<b>Marks</b>
1	Institution	Quality Depth & Breadth of analysis, Coverage, Scope and content Project fulfillment Data collection ability in the field ( if any) Scope of Implementati on.	50
2	Board of Examiners	Viva-voce Examination	50
3		<b>Total</b>	<b>100</b>

### **Project Schedule**

#### **Registration**

First week of the last academic month

Allotment of Faculty Guide takes place in accordance to the area of interest / stream chosen by the student at the time of registration.

#### **Approval of Project Topic**

Week following the 'week of registration'

**Submission of Synopsis to Faculty Guide**

Prior to the completion of End-Term Examination. The synopsis could be submitted any time after the allotment of project topic but certainly must be before completion of last examination.

**Duration of Project**

The project stretches for the full duration of the Semester break

**Submission of Report**

First Draft – After 20 Days from the commencement of the project

Second Draft – 20 days after submission of the first draft.

The first and second reports could be submitted through e-mail or any other medium as per the consent of faculty guide.

Final Draft – Within second week of rejoining of institution

## Syllabus - Fourth Semester

### 20<sup>TH</sup> CENTURY INDIAN ENGLISH NOVEL

Course Code: ENG2401

Credit Units: 05

**Course Objective:**

This course will orient students towards understanding of Indian English Novel since its beginnings till recent day. To this end the texts will be studied in their relevance to the major sociopolitical issues of the Indian nation in the 20<sup>th</sup> century. The study of such texts will put in perspective the issues of Indian Culture, Religion and Nationalism.

**Text:**

1. R.K. Narayan - The Guide
2. Salman Rushdie - Midnight's Children
3. Amitav Ghosh - The Shadow Lines
4. Kamala Markandaya - Nectar in a Sieve

**Examination Scheme:**

Components	Assignment	Sessional	Presentation	EE
Weightage (%)	15	10	05	70

**Text & References:**

## POST-COLONIAL LITERATURE

**Course Code: ENG2406**

**Credit Units: 03**

### **Course Objective:**

To read a range of colonial and postcolonial fiction with reference to its historical context and its contemporary reception. To discuss the stereotypes encoded in colonial fiction and the efficacy of literary techniques employed by authors who desired to challenge these stereotypes. To discuss the methods used by postcolonial authors to convey the legacy of Imperialism.

### **Text:**

1. Edward Said - Orientalism
2. Chinua Achebe - Things Fall Apart
3. Bill Ashcroft, Gareth Griffiths and Helen Tiffin - The Empire Writes Back: Theory and Practice in Post-Colonial Literature

### **Examination Scheme:**

Components	Assignment	Sessional	Presentation	EE
Weightage (%)	15	10	05	70

### **Text & References:**

#### **Recommended Readings:**

- The Mimic Men by V.S.Naipaul
- Beloved by Toni Morrison
- The Empire Writes Back: Theory and Practices in Post-Colonial Literature by Bill Ashcroft, Gareth Griffiths and Helen Tiffin

## FEMINIST WRITINGS

**Course Code: ENG2408**

**Credit Units: 03**

**Course Objective:** This course will enable the students to explore woman's role, status, self-image, and history in literature written by women. It is based on the principles of feminism and includes all literary works centering on a woman's struggle for equality and to be accepted as a human being, before becoming a victim of gender stereotypes

**Text:**

1. Virginia Woolf – A Room of One's Own
2. Simone de Beauvoir – The Second Sex
3. Kate Millett - Sexual Politics

**Examination Scheme:**

Components	Assignment	Sessional	Presentation	EE
Weightage (%)	15	10	05	70

**Text & References:**

**Recommended Readings:**

- Woolf, Virginia. A Room of One's Own. Broadview Press, 2001.
- Beauvoir, Simone de. The Second Sex. Trans. H. M. Parshley. Vintage Books (Random House). 1952.
- Millett, Kate. Sexual Politics, Garden City, New York: Doubleday, 1970.

## LITERATURE AND SOCIETY

**Course Code: ENG2409**

**Credit Units: 03**

### **Course Objective:**

This course tends to deal with diverse social issues like caste, class, race, gender, violence and war.

### **Course Contents:**

1. Omprakash Valmiki- 'Joothan'
2. Rabindranath Tagore- 'The Exercise Book'
3. Ambai- 'Yellow Fish'
4. Wole Soyinka- 'Telephone Conversation'
5. Wilfred Owe- 'Dulce et Decorum Est'
6. Sa'adat Hasan Manto- 'The Dog of Tetwal'

### **Examination Scheme:**

Components	Assignment	Sessional	Presentation	EE
Weightage (%)	15	10	05	70

### **Text & References:**

## Syllabus - Fifth Semester

### MODERN ENGLISH POETRY

Course Code: ENG2501

Credit Units: 04

**Course Objective:**

This course will study some poems of representative poets that go into shaping Modernism. The employment of newer styles and techniques in poetry as Myth, Imagery, symbolism and allusions will be dealt. At a broader plane, the texts will be studied in relation to the major socio-political issues around such times that engulf the modern man. The course will study the relationship between the texts and the socio-political issues of the times - unrest in Ireland in the first quarter of 20<sup>th</sup> century and degeneration of structures and moral values brought about by the two world wars.

**Text:**

- |    |               |    |                                     |
|----|---------------|----|-------------------------------------|
| 1. | T.S. Eliot    | a) | The Love Song of J. Alfred Prufrock |
|    |               | b) | Hollow Men                          |
| 2. | W.B. Yeats    | a) | The Second Coming                   |
|    |               | b) | Sailing to Byzantium                |
| 3. | W. H. Auden   | a) | In the Memory of W. B. Yeats        |
|    |               | b) | September 1, 1939.                  |
| 4. | G. M. Hopkins | a) | Pied Beauty                         |
| 5. | Philip Larkin | a) | Church Going                        |

**Examination Scheme:**

# DISSERTATION

**Course Code: ENG2637**

**Credit Units: 07**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report. The Dissertation will help students deal with literary problems and issues and they will learn to demonstrate critical thinking in research and writing.

## **Chapter Scheme and distribution of marks:**

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual Framework/ National/International Scenario – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusion & Recommendations -- 10 marks

**Chapter 5:** Bibliography-- 5marks

## **The Components of a Dissertation**

A Dissertation should have the following components:

- 1) **Cover Page:** This should contain the title of the, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the work and name of the University.
- 2) **Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) **Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) **Body of the Report:** The body of the report should have these four logical divisions
  - a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Dissertation).
  - c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).
  - d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) **Bibliography or References:** This section will include the list of books and articles which have been used in the work, and in writing the report.
- 6) **Annexures:** Questionnaires (if any), relevant reports, etc.  
(The main text of the Dissertation should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **Steps of the Dissertation Work**

**Step I:** Selection of the topic should be made keeping the following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Dissertation Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual Framework / National & International Scenario,

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Dissertation:

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Dissertation Work in any Organisation / Institution.

Annexures,

References / Bibliography

**Guidelines for evaluation:**

- Each of the students has to undertake a topic individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Dissertation and Viva-Voce Examination has to be English. The Dissertation must be typed and hard bound.
- Failure to submit the Dissertation or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Dissertation and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Dissertation unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Dissertation.
- Evaluation of the Dissertation to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Dissertation separately, obtaining a minimum marks of 40 (Dissertation and Viva-Voce taken together) in paper 3.5.
- Marking Scheme for Dissertation and Viva-Voce Examination:

<b>Dissertation</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## Syllabus - First Semester

### ENGLISH LITERATURE FROM MEDIEVAL PERIOD TO 17<sup>TH</sup> CENTURY

Course Code: ENG4102

Credit Units: 05

#### Course Objective:

The student will study select authors and texts from Anglo-Saxon Period through the Middle Ages till the seventeenth century and with an aim to develop an understanding of the historical cultural and philosophical influences that shaped the literatures of those times.

Virgil	:	The Aeneid
Malory	:	Morte d' Arthur
Chaucer	:	The Canterbury Tales: The Prologue, Nun's Priest Tale, Wife of Bath's Tale.
Wyatt and Surrey	:	SURREY: Alas! so all Things now do Hold their Peace; The Frailty and Hurtfulness of Beauty; The Golden Gift that Nature did thee Give; Love that doth Reign and Live within my Thought; So Cruel Prison
Thomas Wyatt	:	Farewell Love and all thy Laws for ever; In Spain; The Long Love that in My thought doth Harbour, Unstable Dream; What should Say
Milton	:	Paradise Lost: Books I, II
Andrew Marvell	:	To His Coy Mistress
John Bunyan	:	The Pilgrim's Progress

#### Examination Scheme:

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

#### Recommended Readings:

- Peter S. Hawkins and Rachel Jacoff, The Poets' Dante, Twentieth-Century Responses, Edited.
- The Riverside Chaucer, Geoffrey Chaucer, Houghton Mifflin Company, 1987.
- Geoffrey Chaucer, The Canterbury Tales, Barnes & Noble Classics, 2006.
- George Williamson, Six Metaphysical Poets: A Reader's Guide, Syracuse University.
- John Bunyan, L. Edward Hazelbaker, The Pilgrim's Progress in Modern English, (Pure Gold Classics).

## **DRAMA FROM SHAKESPEARE TO BEN JONSON**

**Course Code: ENG4103**

**Credit Units: 05**

### **Course Objective:**

The course will provide the student with knowledge of the growth and development of drama in the Elizabethan period with Shakespeare as the representative poet through analysis of generic texts. Other representative texts of Thomas Middleton, Webster and Ben Jonson will be studied with Historical and cultural backgrounds. Students would also be encouraged to form a critical understanding of the different forms of drama like the tragedy, comedy, history, tragic-comedy, melodrama, farce etc.

### **Text:**

Shakespeare : The Tempest, Hamlet, Antony and Cleopatra  
Webster : The Duchess of Malfi  
Ben Jonson : Alchemist

### **Examination Scheme:**

<b>Components</b>	<b>TP</b>	<b>Sessional</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	05	70

### **Recommended Readings:**

- A.C Bradley, Shakespearean Tragedy
- Wilson Knight, A Wheel of Fire
- G. Evans, Elizabethan Jacobean Drama: The Theatre in Its Time
- Ben Singer, Melodrama and Modernity: Early Sensational Cinema and Its Contexts, Columbia University Press, 2001

# RESTORATION AND AUGUSTAN PROSE AND POETRY

**Course Code: ENG4104**

**Credit Units: 05**

## **Course Objective:**

The course will explore the major trends and some marginalized aspects in English prose and poetry of the Restoration and Augustan periods. A close reading and analysis of selected representative writers of the periods with their representative texts will be done. This will help to provide an understanding of the developments in varied literary styles in relation to political and cultural issues of these pivotal literary periods.

## **Text:**

John Dryden	:	Absalom and Achitophel
Alexander Pope	:	The Rape of the Lock
Jonathan Swift	:	Tale of the Tub.
James Thompson	:	Seasons
Addison & Steele	:	Sir Roger at Home; The Coverley Household; On Ghosts and Apparitions; sir Roger at Church; The Scope of Satire; Female Orators; A Hunting Scene With Sir Roger
Samuel Johnson	:	Selections from Lives of the Poets (Cowley, Milton, Dryden and Addison).

## **Examination Scheme:**

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

## **Recommended Readings:**

- Paul Hammond, Restoration Literature: An Anthology, Oxford World's Classics
- Louis Kronenberger, An Eighteenth Century Miscellany: The Classics of the Eighteenth Century Which Typify and Reveal an Era.
- Kenneth Young, John Dryden: A Critical Biography.
- Mark Van Doren, The Poetry of John Dryden.
- Arthur C. Kirsch, Literary Criticism of John Dryden.
- Peter Dixon ed., Alexander Pope, London: G. Bell, 1972.

## 18<sup>TH</sup> AND 19<sup>TH</sup> CENTURY NOVELS

**Course Code: ENG4105**

**Credit Units: 05**

### **Course Objective:**

This course will address the rise of the English novel. In addition to reading novels and understanding the historical milieu in which they are embedded, this course will present the central issues that have come up in novel genre as of the construction of subjectivity in terms of gender and culture.

### **Text:**

Henry Fielding	:	Tom Jones
Jane Austen	:	Emma
Dickens	:	Hard Times
Thomas Hardy	:	Tess of the d'Urbervilles
Leo Tolstoy	:	Anna Karenina

### **Examination Scheme:**

<b>Components</b>	<b>TP</b>	<b>Sessional</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	05	70

### **Recommended Readings:**

- Ian Watt, Rise of the Novel, Penguin.
- Walter Allen, History of the English Novel, Penguin
- Arnold Kettle, Introduction to the English Novel - I.
- George Lukacs, Essays in European Realism.
- R.F. Brissenden, Virtue in Distress: Studies in the Novel of Sentiment from Richardson to Sade, Basingstoke: Macmillan, 1974.
- John Carroll (ed), Samuel Richardson: A Collection of Critical Essays, Englewood Cliffs: Prentice-Hall, 1969.
- Margaret Anne Doody and Peter Sabor (eds), Samuel Richardson: Tercentenary Essays, Cambridge: Cambridge University Press, 1989.
- Sala, George A., Charles Dickens: An Essay. London: Routledge, 1870.
- Watkins, William. Charles Dickens. London, 1870.
- Mackenzie, R. S., Life of Charles Dickens. Philadelphia: T. B. Peterson, 1870.
- Burritt, Elihu, The Life and Writings of Charles Dickens: A Memorial Volume. 1870; NewSala, George A. Charles Dickens: An Essay. London: Routledge, 1870.
- Watkins, William. Charles Dickens. London, 1870.
- MacKenzie, R. S., Life of Charles Dickens. Philadelphia: T. B. Peterson, 1870.
- Jones, Malcolm, New Essays on Tolstoy, Cambridge University Press, Cambridge, 1978.
- Mandelker, Amy, "The Judgment of Anna Karenina." A Plot of Her Own: The Female Protagonist in Russian Literature. Ed. Sona Stephan Hoisington. Chicago: Northwestern University Press, 1995.
- Tolstoy, Leo, Anna Karenina, Trans. Richard Pevear and Larissa Volohonsky. New York: Viking Penguin, 2001.

## Syllabus – Second Semester

### RESTORATION AND AUGUSTAN DRAMA

**Course Code: ENG4201**

**Credit Units: 05**

**Course Objective:**

This course will make a close reading and analysis of the representative dramatic texts of the period, and introduce students to a variety of styles, genres and themes primarily through the works of five dominant figures: John Dryden, Aphra Behn, William Congreve, Richard Sheridan, and Oliver Goldsmith. The students will examine the genres and styles employed in the selected texts and also the political and social issues of the period.

**Text:**

John Dryden	:	All for love
Aphra Behn	:	The Rovers
William Congreve	:	The Way of the World
Oliver Goldsmith	:	She Stoops to Conquer

**Examination Scheme:**

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

**Recommended Readings:**

- J. M. Armistead, Four Restoration Playwrights: A Reference Guide to Thomas Shadwell, Aphra Behn, Nathaniel Lee, and Thomas Otway, Boston: G. K. Hall, 1984
- Scott McMillin, W.W., Restoration and Eighteenth-Century Comedy, Norton & Company
- Marcie Frank, Gender, Theatre, and the Origins of Criticism: From Dryden to Manley, Cambridge University Press, 2002.

# ENGLISH ROMANTIC POETRY

**Course Code: ENG4203**

**Credit Units: 05**

## **Course Objective:**

This course will introduce students to the representative English Romantic poets and their selected works. This course will help students to develop a tentative definition of the term Romanticism by identifying major social, political and cultural influences on poetry and poetic subjects and critical theories espoused by the poets themselves regarding poetry.

## **Text:**

Wordsworth	:	The Prelude Books I, II ,III.
Coleridge	:	The Rime of the Ancient Mariner
Keats	:	Hyperion, Lamia
Shelley	:	Prometheus Unbound
Lord Byron	:	Don Juan Canto I & II

## **Examination Scheme:**

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

## **Recommended Readings:**

- M.H. Abrams, The Mirror and the Lamp: Romantic Theory and the Critical Tradition (1958), on Romantic literary criticism and poetic theories
- M. H. Abrams, The Correspondent Breeze: Essays on English Romanticism (1984), includes "Structure and Style in the Greater Romantic Lyric"
- Harold Bloom (ed.), Romanticism and Consciousness, 1970.
- CM Bowra, The Romantic Imagination
- W. Paul Elledge, Byron and the Dynamics of Metaphor, 1968.
- W. Paul Elledge, "Parting Shots: Byron Ending Don Juan I," Studies in Romanticism, 1988.
- Robert F. Gleckner, Byron and the Ruins of Paradise, 1967.
- Robert F. Gleckner, ed., Critical Essays on Lord Byron, 1991.
- Abraham, Shane. "John Keats and the Fever of Creation." Thesis. Coe College, 1994. WordCat. Online. OCLC. 22 Sept. 1997.
- Austin, Allen C. "Toward Resolving Keat's Grecian Urn Ode." Context for Criticism. ed. Donald Keesey. Mountain View: Mayfield, 1994. 48-58.
- Bennett, Andrew. Keats, Narrative and Audience: The Posthumous Life of Writing. Cambridge, Eng.: Cambridge UP 1994.

## VICTORIAN POETRY AND PROSE

**Course Code: ENG4204**

**Credit Units: 05**

### **Course Objective:**

This course will introduce students to a wide range of prose and poetry written during the Victorian period, as well as to social and intellectual concerns that define and preoccupy these works. The course will closely consider formal and historical aspects of these texts, especially as they correspond with Victorian debates surrounding religious belief, anxieties of nation.

### **Text:**

Tennyson	:	In Memoriam
Robert Browning	:	The Last Ride Together, Rabbi Bin Ezra
Matthew Arnold	:	The Scholar Gipsy, Dover Beach, Culture and Anarchy
Rossetti	:	The Blessed Damozel
Pater	:	‘Style’ from Appreciation

### **Examination Scheme:**

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

### **Recommended Readings:**

- Altick, Richard D, Victorian People and Ideas: A Companion for the Modern Reader of Victorian Literature. New York: Norton, 1973.
- Buckley, Jerome Hamilton, The Victorian Temper: A Study in Literary Culture. Cambridge: Harvard University Press, 1951.
- Gilmour, Robin, The Victorian Period: The Intellectual and Cultural Context of English Literature, 1830-1890. London: Longman, 1993.
- Houghton, Walter Edwards, The Victorian Frame of Mind, 1830-1870. New Haven: Yale University Press, 1957.
- Tucker, Herbert F., A Companion to Victorian Literature and Culture. Malden, MA: Blackwell, 1999.
- Williams, Raymond, Culture and Society, 1780-1950. London: Chatto & Windus, 1958 Brooke, Stopford. The Poetry of Robert Browning. 1902.

# THEORETICAL LINGUISTICS

**Course Code: ENG4205**

**Credit Units: 05**

## **Course Objective:**

The aim of this course is to familiarize students with the major theories in Phonology, Morphology, Syntax, Semantics, discourse and Pragmatics. The paper introduces scientific reasoning and methodology of modern linguistics to be applied to different spheres of life.

## **Course Contents:**

### **Module-I:** Introduction to Sociolinguistics

- Language Contact, Policy and Shift
- Diglossia, Code Switching and Mixing
- Language Death and Revitalization
- Language globalization and Localization

### **Module-II:** Phonology and Morphology

- Airstream Mechanism
- Sound Systems of English Language
- Phoneme Vs Allophones
- Stress and Intonation

### **Module-III:** Introduction to Syntactic Theories

- Syntactic Categories
- Traditional Vs Generative Grammar

### **Module-IV:**

- Introduction to Semantic Theories
- Types of Semantic Relations
- Major Semantic Theories
- Discourse and pragmatics
- Speech Act Theories

## **Examination Scheme:**

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

## **Recommended Readings:**

- Ambrose- Grillet, Jeane, 1978. Glossary of Transformational Grammar , Rowley, MA : Newbury House
- Crystal David, 1971, Linguistics, Baltimore : Penguin Books
- Crystal David. 1980. A First Dictionary of Linguistics and Phonetics. Boulder, Co : Westview
- Dineen, Francis P. 1967. An Introduction to General Linguistics. New York : Holt, Rinehart and Winston.
- Finegan, E. 1999. Language : E : its Structure and Use 3<sup>rd</sup> ed. For Worth TX.
- Myerhoff, M. 2011. Introducing Sociolinguistics 6<sup>th</sup> ed. London : Routledge.

# RESEARCH METHODOLOGY-I

**Course Code: ENG4206**

**Credit Units: 01**

## **Course Objective:**

This paper proposes to introduce student to the philosophy and mechanics of research, to train them in the use of language, style and discourses suitable for dissertation writing, to help them acquire both a theoretical thrust and hands-on experience in writing research proposals before they embark on the execution of the thesis proper.

## **Module-I: The Philosophy of Research**

The Philosophy, Meaning and Definition of Research

The nature of inquiry in Physical Sciences, Social Sciences and Humanities.

The relationship between Scholarship, Criticism and Research.

Interpretation

Textual Criticism

Literary History

## **Module-II: Project Proposals: Theory and Practice**

The Identification of a Research Problem / Research Gap

The problems faced by a Research Scholar.

Parts of a Project Proposal

Preparing Minor Project Proposals

## **Examination Scheme:**

<b>Components</b>	<b>TP</b>	<b>Sessional</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	05	70

## **Texts and References**

- Bateson, F.W. The Scholar Critic 2. Thorpe, James.
- Gibaldi, Joseph. MLA Handbook
- Brooks, C. and Warren, R.P. Modern Rhetoric
- Lodge, David. Modes of Modern Writing
- Kaplan, R.B. The Conduct of Inquiry: Methodology of Behavioural Sciences, San Francisco, 1964. Form and Style in Thesis Writing

# Syllabus – Third Semester

## 20TH CENTURY POETRY

Course Code: ENG4301

Credit Units: 05

### Course Objective:

The course aims to introduce the 20th century developments in poetry that characterized the culmination of literary modernism. Representative texts would be discussed with an objective to encourage the students to examine various formal and technical innovations of the period.

### Text:

T.S. Eliot	:	The Wasteland
Ezra Pound	:	Cantos 1, 13 and 49.
W.B. Yeats	:	Sailing to Byzantium; The Second Coming, A Prayer for my daughter.
W.H. Auden	:	Spain, <u>September 1, 1939</u>
Philip Larkin	:	Aubade; Church Going
Ted Hughes	:	Crow; Thought Fox; The Jaguar.
Sylvia Plath	:	Daddy; Ariel;
G M Hopkins	:	The Wreck of Deutschland.

### Examination Scheme:

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

### Recommended Readings:

- Harvester Wheatsheaf, English Poetry of the First World War: Contexts and Themes, 1990.
- Michael Levenson, The Cambridge Companion to Modernism, Cambridge UP, 1999.
- Vassiliki Kolocotroni, Modernism: An Anthology of Sources and Documents, Edinburgh, 1998.
- Peter Nicholls, Modernisms: A Literary Guide, Macmillan, 1995.
- Dukore, Bernard F. Bernard Shaw, Playwright. Aspects of Shavian Drama. University of Missouri Press: Columbia, 1973.
- Gordon, David. Bernard Shaw and the Comic Sublime, St. Martin's: New York, 1990.
- Harold Bloom, ed., T. S. Eliot's "The Waste Land," 1986.
- Jewel Spears Brooker and Joseph Bentley, Reading "The Waste Land": Modernism and the Limits of Interpretation, 1990.
- Richard Ellmann, Yeats, the Man and the Masks, 1948.
- R. F. Foster, W. B. Yeats: A Life, 1997.
- Harold Bloom, Criticism, 1970.

## 20<sup>TH</sup> CENTURY DRAMA

**Course Code: ENG4302**

**Credit Units: 05**

### **Course Objective:**

The course aims at developing the student's response to the post World War developments in English drama. English drama post Second World War betrays a great deal of sociological and aesthetic peculiarities, and the prescribed texts would mark an interesting discussion in the ways in which the fall of the Empire affected literature back in England, among other things.

### **Text:**

Samuel Beckett	:	Endgame
Harold Pinter	:	The Birthday party
John Osborne	:	Look Back in Anger
Henrik Ibsen	:	The Doll's House
Bernard Shaw	:	Man and Superman.
Eugene O'Neil	:	Mourning Becomes Electra.

### **Examination Scheme:**

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

### **Recommended Readings:**

- Lawrence Cahoon ed., From Modernism to Post-Modernism: An Anthology, Blackwell, 2003.
- Camus, Albert. The Myth of Sisyphus and Other Essays. Tr. Justin O'Brien. New York: Vintage Books, 1961.
- Coe, Richard N. Beckett.: Oliver and Boyd, Glasgow, 1964.
- Cohn, Ruby, ed. Casebook on Waiting for Godot: The Impact of Beckett's Modern Classic: Reviews, Reflections, and Interpretations. New York: Grove Press, 1967.
- Peter Bary Ed., The Cambridge Companion to Harold Pinter, Homerton College, Cambridge
- D. Daiches Ed., The Penguin Companion to English Literature, 1972.

# LITERARY CRITICISM

**Course Code: ENG4303**

**Credit Units: 05**

## **Course Objective:**

The course focuses on critical theory as it applies to literature and culture. Review of classical Greek origins of issues concerning the nature of literature and criticism and English literary theory and criticism. Students will be able to comment on theories and apply various these to works of literature.

## **Text:**

Aristotle	:	Poetics
Longinus	:	On the Sublime
Sidney	:	An Apologie for Poetry
Dryden	:	Essay on Dramatic Poesy
Coleridge	:	Biographia Literaria: Chapter XIV.
Matthew Arnold	:	The Function of Criticism in the Present time; The Study of Poetry
T.S.Eliot	:	The Metaphysical Poets
William Empson	:	Seven Types of Ambiguity
I A Richards	:	As a Critic
F R Leavis	:	As a Critic

## **Examination Scheme:**

<b>Components</b>	<b>TP</b>	<b>Sessional</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	05	70

## **Recommended Readings:**

- Davis, Michael. Aristotle's Poetics: The Poetry Of Philosophy. Lanham: Rowman & Littlefield Publishers, 1992.
- Empson, William Seven Types of Ambiguity, New Directions Publishing Corporation
- I.A.Richards, Practical Criticism, Kegan Paul, London, 1929.
- Keith Hanley, Wordsworth's Revolution in Poetic Language
- M.A.R. Habib, A History of Literary Criticism From Plato to the Present, Rutgers University.
- Marshall Brown Ed. Cambridge History of Literary Criticism. New York: Cambridge UP, 1989
- Ransom, J C Poetry, A Note on Ontology Critical Theory Since Plato, 3rd Edition, Cengage, 2005
- Wellek, Rene. A History of Modern Criticism 1750-1950. New Haven: Yale UP, 1955

## 20<sup>TH</sup> CENTURY NOVEL

**Course Code: ENG4304**

**Credit Units: 05**

### **Course Objective:**

The course will study a selection of twentieth-century novels which will initiate students to participate in certain of the major debates that have animated twentieth-century literature and criticism. In addition to the focus on 'texts and debates', the course attends in detail to the variety of historical contexts in which the literary texts and the critical debates have arisen.

### **Text:**

<b>Joseph Conrad</b>	:	<b>The Heart of Darkness</b>
DH Lawrence	:	Women in Love
Albert Camus	:	The Plague
Gabriel Garcia Marquez	:	One Hundred Years of Solitude
J.M. Coetzee	:	Disgrace

### **Examination Scheme:**

<b>Components</b>	<b>TP</b>	<b>Sessional</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	05	70

### **Recommended Readings:**

- Dominic Head, The Cambridge Introduction to Modern British Fiction, 1950–2000, Brunel University.
- William Lyon Phelps, Essays on Russian Novelists, Macmillan, 1916.
- Gabriel García Márquez: A Critical Companion / Pelayo, Rubén., 1991
- Gabriel García Márquez: A Study of The Short Fiction / Oberhelman, Harley D., 1991
- Chinua Achebe, "An Image of Africa."
- John Batchelor, The Life of Joseph Conrad: A Critical Biography, 1993.
- Ted Billy, ed., Critical Essays on Joseph Conrad, 1987.
- Harold Bloom, ed., Joseph Conrad's "Heart of Darkness," 1987.
- Harold Bloom, ed., Joseph Conrad, 1986.
- Harold Bloom, Marlow, 1992.
- Bernard McKenna, James Joyce's Ulysses: A Reference Guide, Greenwood Press, 2002.
- Margot Norris, A Companion to James Joyce's Ulysses. St. Martins, 1998.
- Hubben, William, Dostoevsky Kierkegaard Nietzsche and Kafka: Four Prophets of our Destiny, New York: Collier Books, 1967.

# RESEARCH METHODOLOGY-II

**Course Code: ENG4305**

**Credit Units: 02**

## **Course Objective:**

This paper proposes to introduce student to the philosophy and mechanics of research, to train them in the use of language, style and discourses suitable for dissertation writing, to help them acquire both a theoretical thrust and hands-on experience in writing dissertation before they embark on the execution of the thesis proper.

## **Module-I: Language, Style and Types of Discourses**

The Style suitable for a Literary Thesis

Narration Argumentation

Exposition Description

## **Module-II: Research Objectives**

Literature Review

Research Plan

Research Hypothesis

## **Module-III: The Mechanics of Research**

The Mechanics of dissertation Writing

Data Collection – Primary and Secondary Sources.

Methods of data collection : Questionnaire, Interview, observation, document analysis

Methods of data analysis : Descriptive Statistics

Procedure in Literary Research e-learning and Research

## **Examination Scheme:**

<b>Components</b>	<b>TP</b>	<b>Sessional</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	05	70

## **Texts and References**

- Bateson, F.W. The Scholar Critic 2. Thorpe, James.
- Gibaldi, Joseph. MLA Handbook
- Brooks, C. and Warren, R.P. Modern Rhetoric

- Kaplan, R.B. The Conduct of Inquiry: Methodology of Behavioural Sciences, San Francisco, 1964. Form and Style in Thesis Writing

# **SUMMER PROJECT EVALUATION**

**Course Code: ENG4335**

**Credit Units: 03**

Summer Project is primarily a research work. It involves academic reading of several sources and writing on a particular topic relating to the core course or courses of the program. It is a scholarly inquiry into academic problems or issues. It should involve a systematic approach to gathering and analysis of information/ideas, leading to production of a structured report. The research topic should hold significant academic value commensurate with level of the Program.

## **GUIDELINES FOR SUMMER PROJECT REPORT**

### **Topic**

The topic of the paper will be of the student's choice with consent of the Supervisor. It must be relevant to the content of the course, but it should be treated in greater depth than it is covered in class. Focus is of the utmost importance. Too broad a topic will either lead to superficial treatment or an unnecessarily long paper; too narrow a topic will lead to a lack of source material and redundancy. Make sure the subject focuses on one question or topic so that the paper has a definite purpose. Composing an introduction and conclusion can be a good test of the cohesiveness of the subject. The domain can include Literature, Linguistics, Applied Linguistics, English Language Teaching and other related areas.

### **Synopsis of Summer Project Report**

A Synopsis of the Summer Project Report should be submitted to the Board of Studies of the Institute. The Board, after deliberation, will suggest changes and modifications and will assign a supervisor from amongst the teaching faculty of the Institute. The synopsis should include the following –

1. Title of Summer Project Report
2. Introduction
3. Problems of Research
4. Objectives of Research
5. Tentative Chapter Division
6. Suggested readings

### **Source Material and References**

Presenting your own ideas in a Summer Project Report is acceptable and even encouraged. However, the paper must be based on facts and opinions from authoritative sources and these sources must be given proper credit. A minimum of three published sources is required, and ten or more is typical. Direct quotes must be placed inside quotation marks or in indented sections and should be used sparingly. Paraphrasing is better in most cases.

There are two popular ways to cite references. One is to place superscripted numbers in the text with corresponding footnotes at the bottom of the page or endnotes at the end of the paper. More typical of scientific papers is to place the author and year in parentheses (Heaton, 1984). In either case you need a bibliography of all cited sources at the end of the paper with author(s), year, title, publication or publisher, volume, and pages. These should be in alphabetical order by name of the primary author. Preference however should be given to MLA Style Sheet.

Be sure to find source materials that are specific to your topic, either books or journal articles. Textbooks are usually too general and should be avoided. The libraries have published and computerized indexes that can be used to find relevant sources. See the Supervisor or a reference librarian if you are unfamiliar with these resources.

Plagiarism is the presenting of someone else's wording or ideas as one's own and is a violation of university policy. If you use someone else's words or ideas, you must give them proper credit. You must also obtain permission from the Supervisor before using your Summer Project Report for more than one course.

### Length and Format

Length is not important; 40 to 60 pages of 1.5 spaced text is a good target. The title, author, course, and date should be typed onto a cover sheet.. Illustrations are not required but are often useful in explaining graphical concepts and in giving the paper character. The bibliography should be the last section of the paper. The entire report has to be submitted in two spiral bound copies.

### Grading

Students are required to make two submissions: a first draft and a final draft prior to final submission. The first draft is *not* to be a "rough" draft; it should be a completed, typed paper like you would ordinarily submit. I will read it carefully, offer suggestions for improvement, give it a grade, and return it to you promptly. The final draft, which is worth a larger share of the points, is your chance to respond to the suggestions and submit an improved paper. This, I hope, will make the writing of a Summer Project Report more of a learning experience. We strongly suggest using a word processor so that the final draft can be created by editing rather than complete retyping.

Grading is based on both research content and presentation. Your paper should demonstrate that you have gained a level of expertise in the subject by studying the relevant literature. Your presentation should be clean and convincing with proper use of paragraphs, complete sentences, and correct grammar, spelling, and punctuation. Make your Summer Project Report look and sound professional.

### Evaluation of Project Work

Sl. No.	Evaluated by	Criteria	Marks
1	Institution	<ul style="list-style-type: none"> <li>✓ Quality</li> <li>✓ Depth &amp; Breadth of analysis,</li> <li>✓ Coverage,</li> <li>✓ Scope and content</li> <li>✓ Project fulfillment</li> <li>✓ Data collection ability in the field ( if any)</li> <li>✓ Scope of Implementation.</li> </ul>	50
2	Board of Examiners	Viva-voce Examination	50
3		<b>Total</b>	<b>100</b>

### Project Schedule

#### 1. Registration

First week of the last academic month

Allotment of Faculty Guide takes place in accordance to the area of interest / stream chosen by the student at the time of registration.

**2. Approval Of Project Topic**

Week following the 'week of registration'

**3. Submission Of Synopsis To Faculty Guide**

Prior to the completion of End -Term Examination. The synopsis could be submitted any time after the allotment of project topic but certainly must be before completion of last examination.

**4. Duration of Project**

The project stretches for the full duration of the Semester break

**5. Submission of Report**

First Draft – After 20 Days from the commencement of the project

Second Draft – 20 days after submission of the first draft.

The first and second reports could be submitted through e-mail or any other medium as per the consent of faculty guide.

Final Draft – Within second week of rejoining of institution

## Syllabus - Fourth Semester

### LITERARY THEORY

Course Code: ENG4401

Credit Units: 05

**Course Objective:**

This course will familiarize students with the study of major twentieth-century theories and applications. In this course, Historical, formalist, archetypal, psychoanalytic, Marxist, reader-response, New Historicist, feminist, postcolonial perspectives will be dealt. The course will enable students to comment on various theories and apply them to works of literature and aspects of contemporary culture.

**Text:**

Immanuel Kant	:	“What Is Enlightenment?”
Simone De Beauvoir	:	‘Introduction’ of <i>The Second Sex</i>
Foucault	:	“What is an Author?” from <i>The Essential Works of Foucault</i>
Jacques Lacan	:	Return to Freud: The Real, The Symbolic and The Imaginary

# EUROPEAN COMEDY

**Course Code: ENG4403**

**Credit Units: 05**

## **Course Objective:**

The course will introduce trends and issues related to European drama through study of the prescribed texts; develop critical arguments of local issues in relation to wider structures of individual plays and to generically structured theatre. The students will also be encouraged to make critical understanding of national and cross-national concepts of dramatic practice and identify the relationships between drama and wider philosophical, cultural and political issues.

## **Text:**

Cervantes	:	Don Quixote Vol - I
Rabelais	:	The Histories of Gargantua and Pantagorel
Moliere	:	The Misanthrope
Bakhtin	:	The Grotesque
George Meredith	:	Comedy
Henry Bergson	:	Laughter

## **Examination Scheme:**

<b>Components</b>	<b>TP</b>	<b>Sessional</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	05	70

## **Recommended Readings:**

- Gregory Dobrov, Figures of Play: Greek Drama & Metafictional Poetics, 2000.
- Ian Watt, Myths of Modern Individualism: Faust, Don Quixote, Don Juan, Robinson Crusoe, 1997

# ANCIENT GREEK AND LATIN LITERATURE IN TRANSLATION

**Course Code: ENG4407**

**Credit Units: 05**

## **Course Objective:**

Identify texts, contexts, and authors—and thematic, genre-based and stylistic hallmarks of those texts and authors within the early literary traditions. Understand, discuss and interpret key texts, ideas, themes, and aesthetic modalities and explain how the texts, ideas, themes and modalities arose within a given cultural or historic context. Recognize and discuss significant genre and stylistic aspects of those texts. Relate their knowledge of ancient texts and belief systems to enduring issues and values in contemporary societies, including their own.

## **Text:**

Homer	:	The Iliad
Sophocles	:	Oedipus Rex
Aristophanes	:	The Frog
Ovid	:	Metamorphoses – Story of Phaeon (Book II); The Rape of Proserpine (Book V) Story of Pygmalion the Statue (Book X); The region of Augustus in Which He Flourished (Book XV)
Marcus Aurelius	:	The Meditations – Book I to V

## **Examination Scheme:**

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

## **Recommended Readings**

- A Companion to Greek Tragedy by Justina Gregory, Blackwell Publishing
- The Cambridge Companion to Greek Tragedy (Cambridge Companions to Literature) (Paperback) by P. E. Easterling
- Greek Tragedy in Action, Oliver Taplin, Routledge, 2003
- Gender and Politics in Greek Tragedy, Michael X. Zelenak, Peter Lang Publishing, 1998
- Greek Tragedy: A Literary Study, H. D. F. Kitto, Methuen, 1939
- Greek and Roman Comedy: Translations and Interpretations of Four Representative Plays, Edited by Shawn O'Bryhim, Translated by George Fredric Franko, Timothy Moore, Shawn O'Bryhim, and Douglas Olson

## 20<sup>TH</sup> CENTURY INDIAN ENGLISH LITERATURE

Course Code: ENG4404

Credit Units: 05

### Course Objective:

This course will attempt to explore issues of contemporary Indian English. The aim is to open the students to the varieties of social and literary provocation at work in the texts prescribed and at the same time trace the changes in style, themes and its ideologies in the contemporary Indian English Writings. Students will be encouraged to - appreciate the sheer linguistic vitality of Indian English Writings; understand how the Indian subcontinent has been imaginatively reworked in recent Indian English writing and assess the cross-cultural impact of such reinvention.

### Text:

Raja Rao	:	Kanthapura
Anita Desai	:	In the Lighthouse
Amitav Ghosh	:	The Glass Palace
Salman Rushdie	:	Midnight's Children
Girish Karnad	:	Tughlaq
Nissim Ezekiel	:	Background Casually; Poet, Lover, Birdwatcher.
A.K. Ramanujan	:	Obituary; A River.
Kamla Das	:	The Descendants; A Hot Noon in Malabar.

### Examination Scheme:

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

### Recommended Readings:

- Singh, R. S. Indian Novel in English. Rep. Humanities Press Inc. Atlantic Highlands, New Jersey. 1978
- Iyengar, K. R. Srinivasa. Indian Writing in English. Rep Asia Publishing House. New York, New York. 1973.

# INDIAN LITERATURE IN TRANSLATION

Course Code: ENG4405

Credit Units: 05

## Course Objective:

The course aims at introducing certain key texts of the ancient and modern Indian traditions for detailed reading and critical analysis. The course had become a critical addition to M.A programme in English, considering the recent emphasis put on the native traditions in understanding literature and the related disciplines. The texts delineate the importance of the oral traditions and give important perspectives on the literary issues like author and reader, text and textuality, literature and society, literature and genre, language and literature et al.

## Text:

Ved Vyas	:	The Mahabharata
Vedic Texts	:	Upanishads Concept of Personal and Impersonal God and Aum
Bhasa	:	The Vision of Vasavadatta (Svapna-Vasavadattam)
Bharata Muni	:	Natyashastra
Mira	:	'Life without Hari is no life', 'Today your friend is coming', 'Murli sounds on the banks of the Jumna', 'The Bil woman tasted them, plum after plum', 'I have talked to you', 'Go to where my loved one lives',
Kabir	:	<b>Poems</b> : 'Hey Qazi, what's the book you're preaching from?', 'Tell me, Ram; what will happen to me? 'If cast was what the Creator had in mind?, Why be so proud of this useless, used -up body? 'Pundit, so well-read, go ask God'.
Rabindra Nath Tagore	:	The Post Office
Prem Chand	:	Godan
Shrilal Shukla	:	Raag Darbari

## Examination Scheme:

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

## Recommended Readings:

- Victor Witter Turner, Edward M Bruner edited, The Anthropology of Experience, 1986.

# LINGUISTICS AND ENGLISH LANGUAGE TEACHING

**Course Code: ENG4406**

**Credit Units: 05**

## **Course Objective:**

This paper aims to provide the learner the basic knowledge of Linguistics. This course will introduce the intricacies of language and linguistics to the students focusing on the application of linguistic knowledge in language teaching. The focus of the paper is also to introduce the learners with difference in language learning and language acquisition.

**Introduction:** What is language? Characteristics of human language; Linguistics: Definition and explanation; Importance and applications of linguistics; Levels of language study.

**Phonetics and Phonology:** Difference between Phonetics and Phonology; Classification of sound system; Articulation and Production of sounds; Tone, Accent and Stress.

**Sociolinguistics:** Language; Dialect; Registers; Bilingualism; Multilingualism.

**Language Acquisition:** Theories of language acquisitions; Stages of language acquisition; Problems of language acquisition.

**Methods of Language Teaching and Learning:** Grammar Translation; Audio – Visual; Immersion (Total and Partial); Direct Method; Communicative Language Teaching.

## **Examination Scheme:**

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

## **Text & References:**

- Adams ,V.1973. *An Introduction to Modern English Word Formation*. London: Longman
- Chomsky,N.,and M.Halle.1968. *The sound pattern of English*. New York: Harper and Row.
- Lyons J, 1977. *Semantics*. 2 Vols. Cambridge: Cambridge University Press.
- Crystal D.1997. *Encyclopedia of Language*: 2<sup>nd</sup> Vol., Cambridge: Cambridge University Press

# DISSERTATION

**Course Code: ENG4437**

**Credit Units: 03**

## **GUIDELINES FOR DISSERTATION**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### **Selecting the Dissertation Topic**

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

### **Planning the Dissertation**

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

### **The Dissertation plan or outline**

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.

- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

### **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct quotation and what is your paraphrase.

### **Dissertation format**

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**.
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required:

Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

### **The Layout Guidelines for the Dissertation:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).

2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion from the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

#### **Assessment Scheme:**

##### **Continuous Evaluation:**

40%

(Based on Abstract, Regularity,  
Adherence to initial plan, Records etc.)

**Final Evaluation:** Based on,  
Contents & Layout of the Report,  
Conceptual Framework,  
Objectives & Methodology and  
Implications & Conclusions

60%

## **SYLLABUS-UNDERGRADUATE-4 YEAR PROGRAMMES**

### **Syllabus - First Semester**

#### **ENGLISH-I**

**Course Code: CSS2152**

**Credit Units: 1**

**Course Objective:**

The course is intended to give a foundation of English Language. The literary texts are indented to help students to inculcate creative & aesthetic sensitivity and critical faculty through comprehension, appreciation and analysis of the prescribed literary texts. It will also help them to respond form different perspectives.

**Course Contents:**

**Module I: Vocabulary**

Use of Dictionary

Use of Words: Diminutives, Homonyms & Homophones

**Module II: Essentials of Grammar - I**

Articles

Parts of Speech

Tenses

**Module III: Communication**

The process and importance

Principles & benefits of Effective Communication

**Module IV: Spoken English Communication**

Speech Drills

Pronunciation and accent

Stress and Intonation

**Module V: Short Stories**

Of Studies, by Francis Bacon

Dream Children, by Charles Lamb

The Necklace, by Guy de Maupassant

A Shadow, by R.K.Narayan

Glory at Twilight, Bhabani Bhattacharya

**Examination Scheme:**

Components	Written	CAF	V/P	GD/Extempore	A

# FRENCH STUDIES

## PREAMBLE

Amity University aims to achieve academic excellence by providing multi-faceted education to students. The University has designed a system that would provide rigorous academic programme with necessary skills to enable them to excel in their careers.

This booklet contains the Programme Structure, the Detailed Curriculum and the Scheme of Examination. The Programme Structure includes the courses (Value-added Course: FL- French and Minor track courses), arranged semester wise. The importance of each course is defined in terms of credits attached to it. The credit units attached to each course has been further defined in terms of contact hours i.e. Lecture Hours (L), Tutorial Hours (T), Practical Hours (P). Towards earning credits in terms of contact hours, 1 Lecture and 1 Tutorial per week are rated as 1 credit each and 2 Practical hours per week are rated as 1 credit. Thus, for example, an L-T-P structure of 3-0-0 will have 3 credits, 3-1-0 will have 4 credits, and 3-1-2 will have 5 credits.

The Curriculum and Scheme of Examination of each course includes the course objectives, course contents, scheme of examination and the list of text and references. The scheme of examination defines the various components of evaluation and the weightage attached to each component. The different codes used for the components of evaluation and the weightage attached to them are:

<u>Components</u>	<u>Codes</u>	<u>Weightage (%)</u>
Case Discussion/ Presentation/ Analysis	C	05 - 10
Home Assignment	H	05 - 10
Project	P	05 - 10
Seminar	S	05 - 10
Viva	V	05 - 10
Quiz	Q	05 - 10
Class Test	CT	10 - 15
Attendance	A	05
End Semester Examination	EE	70

## **PROGRAMME OBJECTIVE**

This programme is designed for the students who opt for French as a Minor **in addition to taking French as Foreign Language (Value-added Course).**

This programme aims at providing an understanding of the basics of French grammar and phonetics.

Students get sensitized towards different “registres de langue” and are able to distinguish formal and informal language right from the beginning and use appropriate language while communicating in the professional and business world.

Through various listening and speaking exercises this course enables the students to quickly take position as a foreigner speaking French and establish contacts and communicate in oral and written language.

This programme also provides an insight into French literature. By furnishing information on select socio-cultural aspects of France, this programme creates a backdrop for a better understanding of the language and the people.

This programme focuses on developing all four language skills of reading, writing, listening and speaking. Through training in various activities it enhances the critical/ creative thinking and encourages the learners to think spontaneously in French.

# FRENCH STUDIES

## Programme Structure

Course Code	Course Title	Lectures (L) Hours per week	Tutorial (T) Hours per week	Practical (P) Hours per week	Total Credits
LAN2161	Professional French for Business-1	2	1	-	3
LAN2261	Professional French for Business-2	2	1	-	3
LAN2361	Professional French for Business-3	2	1	-	3

# GERMAN STUDIES

## PREAMBLE

Amity University aims to achieve academic excellence by providing multi-faceted education to students. The University has designed a system that would provide rigorous academic programme with necessary skills to enable them to excel in their careers.

This booklet contains the Programme Structure, the Detailed Curriculum and the Scheme of Examination. The Programme Structure includes the courses (Value-added Course: FL- German and Minor track courses), arranged semester wise. The importance of each course is defined in terms of credits attached to it. The credit units attached to each course has been further defined in terms of contact hours i.e. Lecture Hours (L), Tutorial Hours (T), Practical Hours (P). Towards earning credits in terms of contact hours, 1 Lecture and 1 Tutorial per week are rated as 1 credit each and 2 Practical hours per week are rated as 1 credit. Thus, for example, an L-T-P structure of 3-0-0 will have 3 credits, 3-1-0 will have 4 credits, and 3-1-2 will have 5 credits.

The Curriculum and Scheme of Examination of each course includes the course objectives, course contents, scheme of examination and the list of text and references. The scheme of examination defines the various components of evaluation and the weightage attached to each component. The different codes used for the components of evaluation and the weightage attached to them are:

<u>Components</u>	<u>Codes</u>	<u>Weightage (%)</u>
Case Discussion/ Presentation/ Analysis	C	05 - 10
Home Assignment	H	05 - 10
Project	P	05 - 10
Seminar	S	05 - 10
Viva	V	05 - 10
Quiz	Q	05 - 10
Class Test	CT	10 - 15
Attendance	A	05
End Semester Examination	EE	70

## **PROGRAMME OBJECTIVE**

This programme is designed for the students who opt for German a Minor **in addition to taking German Foreign Language (Value-added Course)**.

This programme aims at providing an understanding of the basics of German grammar and phonetics.

Students get sensitized towards different “Sprache Register” and are able to distinguish formal and informal language right from the beginning and use appropriate language while communicating in the professional and business world.

Through various listening and speaking exercises this course enables the students to quickly take position as a foreigner speaking German and establish contacts and communicate in oral and written language.

This programme also provides an insight into German literature. By furnishing information on select socio-cultural aspects of Germany, this programme creates a backdrop for a better understanding of the language and the people.

This programme focuses on developing all four language skills of reading, writing, listening and speaking. Through training in various activities it enhances the critical/ creative thinking and encourages the learners to think spontaneously in German.

# KOREAN STUDIES

## **Course Objective:**

The course is designed to give a broad geographical, historical, cultural and social background of Korea. This will give the students an insight into the major events- historical, political and cultural- of Korean society extending from pre-history era till date. This course explores how today's Korea came into existence and what role does it play in world, especially in East Asia. The course will highlight the various cultural aspects also like Korean festival, cuisine, cinema, music and theatre.

Besides this, the course brings out the various phases of contemporary Korea dealing with colonial legacy, anti-colonial movements, social, political and economic agenda; liberation and division; emerging political, economic and administrative structures; Korean war and aftermath; pace, pattern and processes of socio-economic transformation in the peninsula, Government (s) and politics in the peninsula etc. Exercises also involve practical analysis of material and articles dealing with current issues related to Korea. Texts related to economic, social, and political issues of contemporary Korea are read, analysed and discussed. Besides written examination, grading will also be based on active class discussion and participation.

Besides this, the students are also given introductory lectures on Korea's relations with its neighbours like China, Russia and Japan and also with important strategic partners like USA and India.

# **KOREAN STUDIES**

## **Syllabus - Semester First**

### **INTRODUCTION TO KOREAN HISTORY AND GEOGRAPHY**

**Course Code: LAN2165**

**Credit Units: 03**

#### **History**

- Prehistory and Gojoseon
- Proto–Three Kingdoms
- Three Kingdoms
- North-South States Period
- Goryeo dynasty
- Joseon dynasty
- Korean Empire

#### **Geography**

- Location
- Area
- Demography
- Rivers
- Mountains

## **Syllabus - Semester Second**

### **KOREAN CULTURAL PERSPECTIVES**

**Course Code: LAN2265**

**Credit Units: 03**

#### **Culture**

- Attire
- Gastronomy
- Monuments
- Dance/song
- Society
- Loisir

## **Syllabus - Semester Third**

### **MODERN HISTORY OF KOREA AND INTRODUCTION TO KOREAN LANGUAGE**

**Course Code: LAN2365**

**Credit Units: 03**

#### **History**

- Japanese occupation and Japan-Korea Annexation
- Division
- Korean War

#### **Language**

- Introduction to the history of Korean language
- Introduction to the writing system
- Basic Korean expressions and day to day situations

## **Syllabus - Semester Fourth**

### **CONTEMPORARY KOREA**

**Course Code: LAN2465**

**Credit Units: 03**

#### **Korea in International affairs**

- Indo-Korea relations
- R.O.K- US relations
- R.O.K- China relations
- R.O.K- Japan relations
- R.O.K- Russia relations
- R.O.K- D.P.R.K relations

#### **Geography**

- Strategic benefits and disadvantages

## **Syllabus - Semester Fifth**

### **POLITY AND ECONOMY OF KOREA**

**Course Code: LAN2565**

**Credit Units: 03**

#### **Politics**

- National government
- Political parties and elections
- Latest elections
- Political pressure groups and leaders
- Administrative divisions
- International organization participation

# PERFORMING ARTS

## OBJECTIVES OF PROGRAM

**AMITY CENTRE FOR PERFORMING ARTS** Amity School of Liberal Arts offers **Open Elective Course in PERFORMING ARTS** . This open elective course in Performing Arts is envisioned for students who have a flair for dance/music/theatre and are looking for structured intervention at the UG level. The course hopes to give a strong platform for our students to develop a passion for the Arts, sharpen their artistic skills and broaden their theoretical base.

The course attempts to transcend the definition of art across content and context while reaching out to individuals and communities. While the focus will be predominantly within the parameters of dance, music and theatre.

The primary aim of the course is not to make students experts in one art form or the other, but introduce them to the possibilities with art and to help them get an integrated sense of art. It is desirable that every student continues to work under an artist/group in one art form or the other outside the curriculum, toward long term development.

**Note : The medium of instruction and examination for the course would be Hindi and English.**

### Objectives:-

- To address a spectrum of art concerns
- To give a base in dance, music and theatre
- To stimulate a composite sense of art
- To foster a blend of practical and theoretical understanding and practice in the arts
- To enable identification and growth opportunities in chosen field of dance/music/theatre

# PERFORMING ARTS

## Syllabus - Semester First

### INTRODUCTION TO PERFORMING ARTS

**Course Code: PAR2151**

**Credit Units: 03**

**Course Objectives:**

To give a strong base in the respective areas of dance, music and theatre.  
To expose them to the terms and practice in the field.

**Course Contents:**

**Module-I: Introduction to Performing Arts**

- What is Performance?
- Performing Art and art of Performance.
- Nature and Structure of Performance.
- Dance- Theory/ practical.
- Music - Theory/ practical.
- Theatre - Theory/ practical.

**Module-II: Introduction to Indian Classical dance Forms**

**Theory-**

- Bharathanatyam
- Kathak
- Kathakali
- Kuchipudi
- Manipuri
- Mohiniattam
- Odissi
- Sattriya

**Practical-**

**Teen Tal(Kathak)**

- Simple Tatkar with Ekgun, Dugan and Chougan layakaries.
- Guru-Vandana , Thaat , Tehai , Tora/Tukra Chakardhar Tukda , Kavita.
- 2 Small semi classical dance in Dadra and Kahrawa Tal.

**Module-III: Tradition of Indian Music**

**Theory-**

- Definition of Sangeet.
  - Hindustani (Vocal/ Instrumental)

- Carnatic (Vocal/ Instrumental)

## Syllabus - Semester First

### HEALTH EDUCATION AND SPORTS

**Course Code: PED2151**

**Credit Units: 03**

**Course Objective:** - The aim of the course is to teach students about the rules for the preservation and development of their physical, mental and emotional health, which will be help to improve the standard of health and fitness status of the individual/community/society.

#### **Part-A**

##### **Module I: Health Education**

- 1.1. Introduction of Health Education
- 1.2. Safety and Security (Hygiene and Precaution)
- 1.3. Individual and Family Health
- 1.4. Food and Nutrition

##### **Module-II Physical Fitness and Wellness**

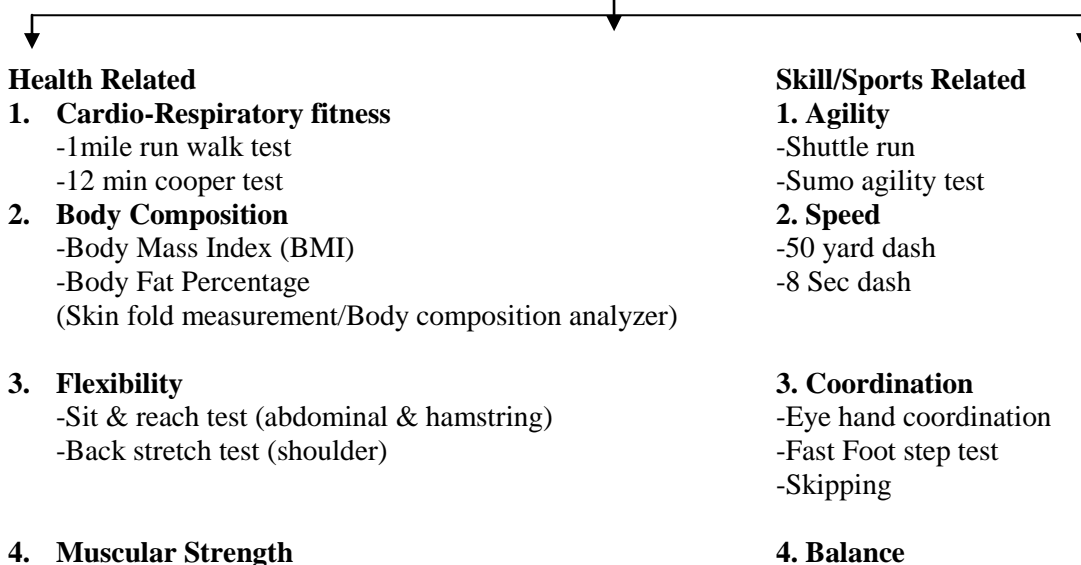

- 2.1. Meaning and Definition of Physical fitness and wellness
- 2.2. Types of Physical Fitness and Wellness
- 2.3. Importance of Physical fitness and Wellness
- 2.4. Healthy diet schedule (Pre-Match-Post)

##### **Module-III Human Posture**

- 4.1 What is a good Posture
- 4.2. Posture deformities
- 4.3. Types of Posture deformity
- 4.4. Remedies of Posture deformities by exercise and Yoga

#### **Part-B**

##### **Fitness Assessment (Practical)**

- Pull ups or pushups with weight (boys)
- Flex arm hang (girls)
- Grip Strength Test
- Bench press

- Static Balance Test
- Dynamic Balance Test

#### **5. Muscular Endurance**

- Sit-ups
- Pull ups and push ups

#### **5. Power**

- Standing Broad Jump

#### **6. Reaction Time**

- Nelson Scale test

#### **Fundamental Skills of Game/Sport**

##### **Basketball**

- ❖ History, Rule and Regulation of Sports
- ❖ Basic and Specific Skills
- ❖ Techniques and Tactics

#### **Examination Scheme:**

<b>Components</b>	<b>FA</b>	<b>CA</b>	<b>CP</b>	<b>A</b>	<b>EE</b>
<b>Weightage</b>	<b>10</b>	<b>10</b>	<b>5</b>	<b>5</b>	<b>70</b>

#### **External Assessment: 70**

#### **Part-A: Theory = 35**

#### **Part-B: Practical Examination = 35**

- (1) General Fitness Test (5 marks)
- (2) Sports Specific Test (10 Marks)
- (3) Project File (10 Marks)
- (4) Viva (10 Marks)

# Syllabus - Semester Second

## HUMAN ANATOMY AND EXERCISE

**Course Code: PED2251**

**Credit Units: 03**

**Course Objective:** - The aim of the course is to provide the knowledge of cell, tissues, organs and systems, microscopic structure of cell, Human body and their internal system and the effect of sports or exercise on their system.

### Part –A

#### Module -I Introduction of Various Human Systems

- 1.1. Meaning and concept of anatomy, need and importance of anatomy for the athlete/non-athlete
- 1.2. Brief introduction of various systems cell, tissues, organs and systems, microscopic structure of cell,

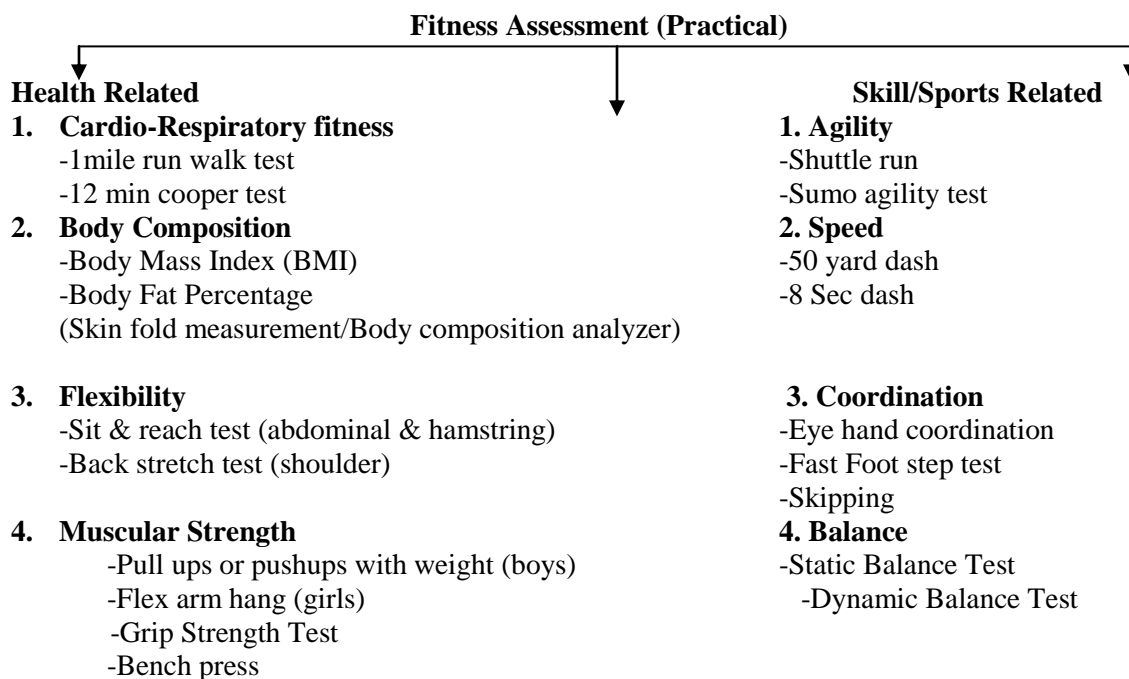

#### Module -II Effect of Exercise on various systems

- 1.1. Muscular System, Cardio-vascular system, Respiratory system, Nervous system, Reproductive system, Urinary system, Digestive system)

#### Module-III Fatigue

- 3.1. Concept, cause and systems of fatigue
- 3.2. Remedial measure to overcome fatigue
- 3.3. Importance of Warming-up in sports
- 3.4. Importance of Limber down in sports

### Part-B

**5. Muscular Endurance**

Sit-ups  
Pull ups and push ups

**5. Power**

-Standing Broad Jump

**6. Reaction Time**

-Nelson Scale test

**Fundamental Skills of Game/Sport****Football**

- ❖ History, Rule and Regulation
- ❖ Basic and Specific Skills
- ❖ Techniques and Tactics

**Examination Scheme:**

<b>Components</b>	<b>FA</b>	<b>CA</b>	<b>CP</b>	<b>A</b>	<b>EE</b>
<b>Weightage</b>	<b>10</b>	<b>10</b>	<b>5</b>	<b>5</b>	<b>70</b>

- (1) General Fitness Test (5 marks)
- (2) Sports Specific Test (10 Marks)
- (3) Project File (10 Marks)
- (4) Viva (10 Marks)

# Syllabus - Semester Third

## SPORTS TRAINING AND CONDITIONING

Course Code: PED2351

Credit Units: 03

**Course Objective:** - The aim of the course to provide the scientific knowledge of sports training and conditioning which help to the athlete or non athlete for develop their physical efficiency and performance.

### Part-A

#### Module-I Introduction

- 1.1. Introduction of Sports Training
- 1.2. Meaning and Definition of Sports Training
- 1.3. Principle of Sports Training
- 1.4. Significance of Sports Training

#### Module-II Motor Components

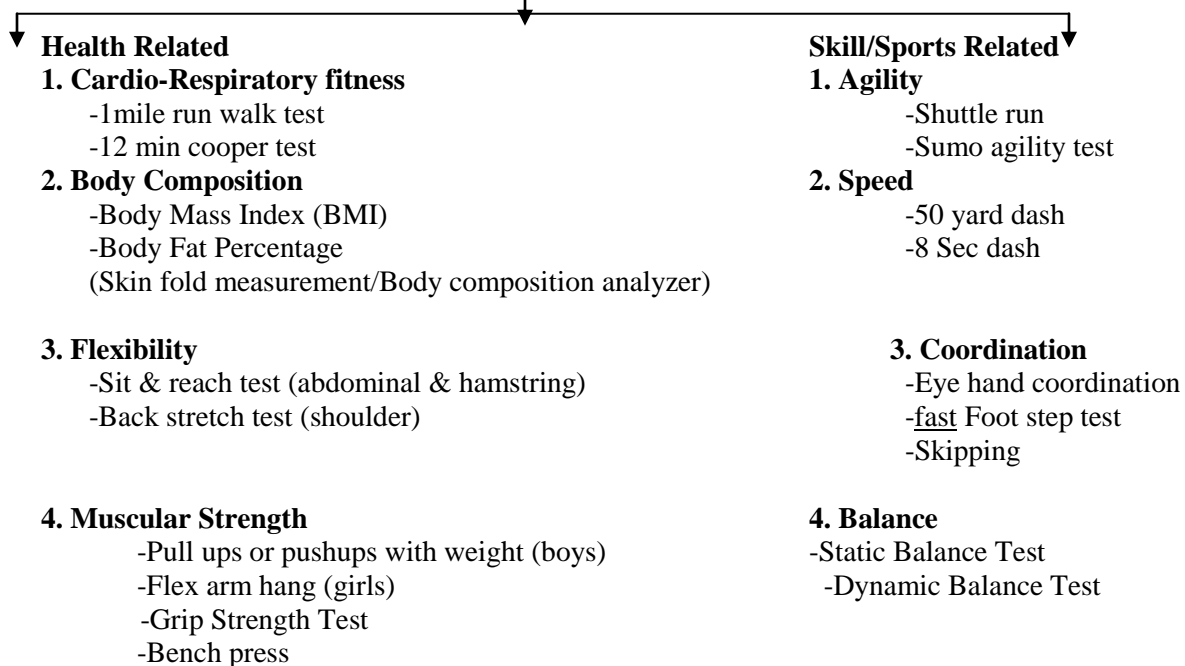

- 2.1. Introduction
- 2.2. Speed
- 2.3. Strength
- 2.4. Endurance
- 2.5. Flexibility and Coordination

#### Module-III Methods to develop various motor components

- 3.1. Development of Speed
- 3.2. Development of Strength
- 3.3. Development of Endurance.
- 3.4. Development of Flexibility and Coordination.

### Part-B

#### Fitness Assessment (Practical)

### **5. Muscular Endurance**

Sit-ups  
Pull ups and push ups

### **5. Power**

-Standing Broad Jump

### **6. Reaction Time**

-Nelson Scale test

### **b. Fundamental Skills of Game/Sport**

#### **Athletics**

- ❖ History, Rule and Regulation
- ❖ Basic and Specific Skills
- ❖ Techniques and Tactics

### **Examination Scheme:**

<b>Components</b>	<b>FA</b>	<b>CA</b>	<b>CP</b>	<b>A</b>	<b>EE</b>

**Part-B: Practical Examination = 35**

- (1) General Fitness Test (5 marks)
- (2) Sports Specific Test (10 Marks)
- (3) Project File (10 Marks)
- (4) Viva (10 Marks)

# Syllabus - Semester Fourth

## BASICS OF SPORTS MANAGEMENT

Course Code: PED2451

Credit Units: 03

**Course Objective:** - The aim of this course is to provide the management and organizational skill to the students for organizes any sports/competition or events by giving the practical assignments.

### Part -A

#### Module-I Sports management and planning in sports

- 1.1 Brief introduction of Sports Management
- 1.2 Management of Intramural and extramural competition
- 1.3. Types of Planning
- 1.4. Principle of planning
- 1.5. Importance of Effective Planning

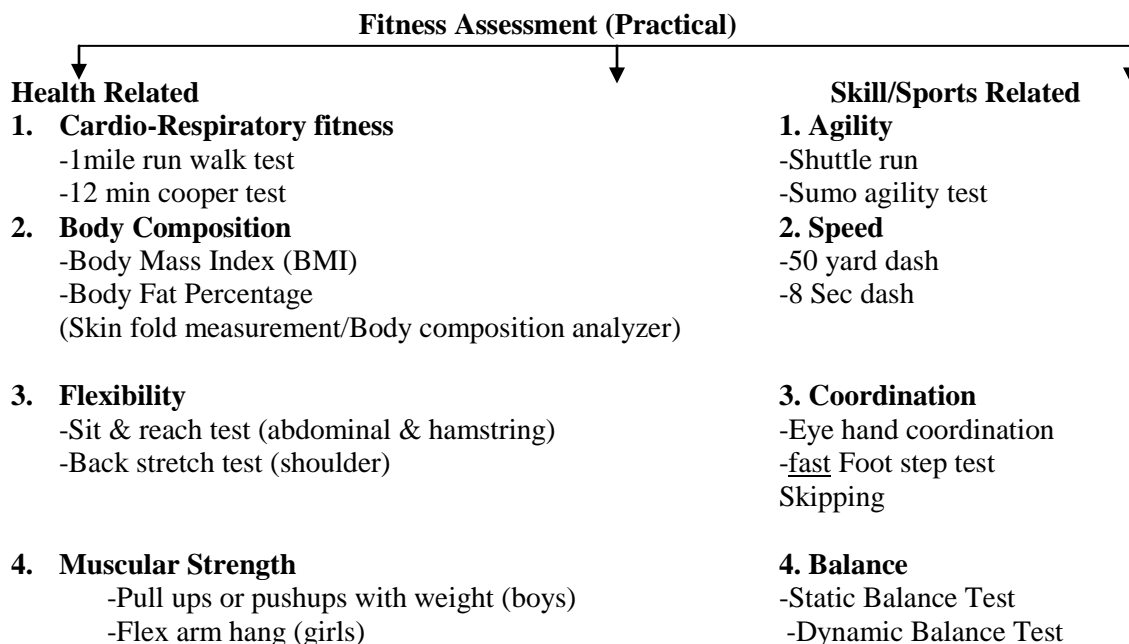

#### Module-II Controlling

- 2.1. Introduction of Controlling
- 2.2. Definition and Nature of Controlling
- 2.3. Steps of Controlling
- 2.4 Principle of Effective Control
- 2.5. Importance of Controlling in Physical Education and Sports

#### Module-III Budgeting and Stocking in Sports

- 2.1. Introduction
- 2.2. Definition of Budget and Stocking
- 2.3. Principles of Effective Budget
- 2.4. Steps in Constructing/ Preparation of Budget in Physical Education and Sports
- 2.5. Presentation of Budget Maintenance of Stocks
- 2.6. Financial Management

### Part-B

- Grip Strength Test
- Bench press

### 5. Muscular Endurance

- Sit-ups
- Pull ups and push ups

### 5. Power

- Standing Broad Jump

### 6. Reaction Time

- Nelson Scale test

### Fundamental Skills of Game/Sport

#### Volleyball & Throw Ball

- ❖ History, Rule and Regulation of
- ❖ Basic and Specific Skills
- ❖ Techniques and Tactics

### Examination Scheme:

Components	FA	CA	CP	A	EE
Weightage	10	10	5	5	70

Internal Assessment: 30

{FA=Fitness Assessment (10 Marks), CA=Competition Assignment (10Marks), CP=Class Presentation (5Marks), A=Attendance (5Marks)}

External Assessment: 70

Part-A: Theory = 35

Part-B: Practical Examination = 35

- (1) General Fitness Test (5 marks)
- (2) Sports Specific Test (10 Marks)
- (3) Project File (10 Marks)
- (4) Viva (10 Marks)

# Syllabus - Semester Fifth

## SPORTS PSYCHOLOGY

**Course Code: PED2551**

**Credit Units: 03**

**Course objective:** - The objective of this course is to facilitate the understanding of how psychological factors influence involvement and performance in sports setting. The course will explore such topics as Achievement motivation, Goal setting in sports.

### Part-A

#### Module-I Introduction of Sports Psychology

- 1.1. Meaning, nature and scope of Sports Psychology in Physical Education and Sports
- 1.2. Importance of Sports Psychology in Physical Education and Sports

#### Module-II Achievement Motivation

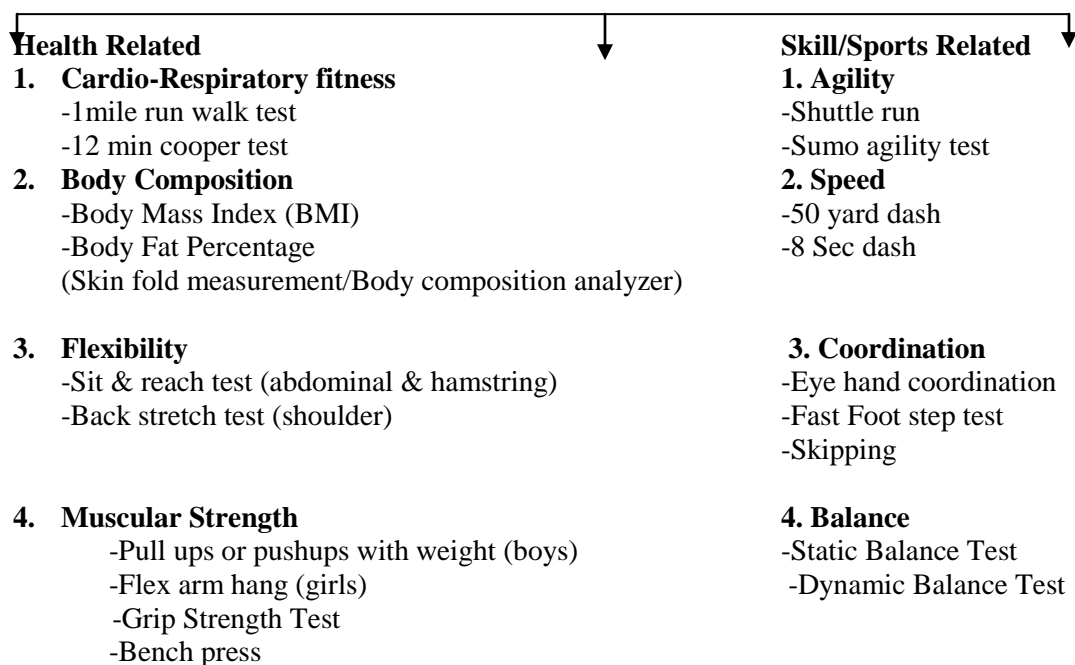

- 2.1. Meaning and definition of achievement motivation
- 2.2. Types of Motivation
- 2.3. Significance of achievement motivation in the field of Physical Education and Sports

#### Module-III Goal Setting

- 3.1. Introduction
- 3.2. Types of Goal Setting
- 3.3. Significance of Goal Setting in the field of Physical Education and Sports

### Part-B

#### Fitness Assessment (Practical)

## **5. Muscular Endurance**

Sit-ups

Pull ups and push ups

## **5. Power**

-Standing Broad Jump

## **6. Reaction Time**

-Nelson Scale test

### **1. Fundamental Skills of Game/Sport**

#### **Cricket**

- ❖ History, Rule and Regulation of
- ❖ Basic and Specific Skills
- ❖ Techniques and Tactics

### **Examination Scheme:**

<b>Components</b>	<b>FA</b>	<b>CA</b>	<b>CP</b>	<b>A</b>	<b>EE</b>
<b>Weightage</b>	<b>10</b>	<b>10</b>	<b>5</b>	<b>5</b>	<b>70</b>

# Syllabus - Semester Sixth

## POST-COLD WAR WORLD POLITICS

Course Code: POL2651

Credit Units: 03

### Course Objectives:

To provide a theoretical understanding of politics as it developed in the post-Cold War scenario particularly with regard to the politics of the United States of America vis-a-vis the rest of the world, the shifting of the power blocks, and the growth of anti-American sentiment in certain parts of the world. The course would also encourage students to read contemporary literature on emerging international political scenarios.

### Course Contents :

#### Module-I : Overview of the post-Cold War decade

Historical background of US foreign policy ; US relations with EU ; brief history of US interventions in West Asia, South East Asia and the Middle East

#### Module-II : Post-Cold War American Politics

Key institutional players ; lobbies and their importance in American politics ; media and public opinion in US ; America's position in a globalized economy

#### Module-III : America and the Arab/Muslim World

Historical development of politics of the Arab/Muslim world ; why the Arabs/Muslims hate America? US intervention and international war against terrorism

### Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(A : Attendance ; P : Presentation ; A/TP : Assignment/Term Paper ; CT : Class Test ; EE : External Examination)

# QUEBEC STUDIES

## Programme Structure

Course Code	Course Title	Lecture (L) Hours /Week	Tutorial (T) Hours /Week	Total Credits
LAN2164	Introduction to the French North America- a short history of Quebec	3	-	3
LAN2264	Quebec Society Culture and Language	3	-	3
LAN2364	Quebec in the World Affairs	3	-	3
LAN2464	Political Economy of Quebec	3	-	3
LAN2564	Introduction to Major Literary Movements in Quebec-I	3	-	3
LAN2664	Introduction to Major Literary Movements in Quebec-II	3	-	3
	<b>TOTAL</b>			<b>18</b>

# QUEBEC STUDIES

The course will be open to all the undergraduate students of AUG, especially students pursuing B.A (H) French and students learning French as FL.

## **Description of the Course**

The **Introduction to Study of Quebec** attempts to study a society that is overwhelmingly majority francophone in an anglophone American sphere. This course will do a survey of geographical, historical, demographical, cultural, political and social developments in Québec, from the French conquest to the present. The course is intended to provide students with a broad understanding of the narrative of Quebec history and to improve their knowledge of many important issues that have defined and continue to define and redefine Quebec, including the North American Free Trade Agreement, the evolution of the Canadian constitutional debate, the reform of social programs, provincial linguistic policies, native issues, regional differences and relations between the anglophone, allophone and francophone communities (the Ottawa-Paris-Quebec triangle).

## **Organization of the Course**

The weekly lectures (3hrs per week), learning responses, videos, clips, forum, and the weekly mandatory readings are an integral part of this course. It will also include workshop by faculty from Quebec. Movie screening and other cultural exposure will be organized in collaboration with Quebec Bureau Mumbai. The course will be spread up to two semesters.

## **Who can attend?**

Open to all the undergraduate student of AUG. Students learning French (B.A Hons./ FL) will have additional benefit.

## **Why to attend?**

- Quebec government has special provision of fees waiver for Indian students. The knowledge of Quebec society, its institution and education system will help students to better explore higher education opportunity and work possibility in Quebec as the knowledge of this course will add to the extra immigration point (like the knowledge of French).
- Knowing about the business prospects in Quebec will help students who wants to set up their own business or expand their reach to American continent. Quebec can be helpful to penetrate US market also as they do share lot of commonalities in business culture.

# QUEBEC STUDIES

## Syllabus - Semester First

# SPANISH STUDIES

## PREAMBLE

Amity University aims to achieve academic excellence by providing multi-faceted education to students. The University has designed a system that would provide rigorous academic programme with necessary skills to enable them to excel in their careers.

This booklet contains the Programme Structure, the Detailed Curriculum and the Scheme of Examination. The Programme Structure includes the courses (Value-added Course: FL- Spanish and Minor track courses), arranged semester wise. The importance of each course is defined in terms of credits attached to it. The credit units attached to each course has been further defined in terms of contact hours i.e. Lecture Hours (L), Tutorial Hours (T), Practical Hours (P). Towards earning credits in terms of contact hours, 1 Lecture and 1 Tutorial per week are rated as 1 credit each and 2 Practical hours per week are rated as 1 credit. Thus, for example, an L-T-P structure of 3-0-0 will have 3 credits, 3-1-0 will have 4 credits, and 3-1-2 will have 5 credits.

The Curriculum and Scheme of Examination of each course includes the course objectives, course contents, scheme of examination and the list of text and references. The scheme of examination defines the various components of evaluation and the weightage attached to each component. The different codes used for the components of evaluation and the weightage attached to them are:

<u>Components</u>	<u>Codes</u>	<u>Weightage (%)</u>
Case Discussion/ Presentation/ Analysis	C	05 - 10
Home Assignment	H	05 - 10
Project	P	05 - 10
Seminar	S	05 - 10
Viva	V	05 - 10
Quiz	Q	05 - 10
Class Test	CT	10 - 15
Attendance	A	05
End Semester Examination	EE	70

## **PROGRAMME OBJECTIVE**

This programme is designed for the students who opt for Spanish as a Minor **in addition to taking Spanish as Foreign Language (Value-added Course)**.

This programme aims at providing an understanding of the basics of Spanish grammar and phonetics.

Students get sensitized towards different “registros de lengua” and are able to distinguish formal and informal language right from the beginning and use appropriate language while communicating in the professional and business world.

Through various listening and speaking exercises this course enables the students to quickly take position as a foreigner speaking Spanish and establish contacts and communicate in oral and written language.

This programme also provides an insight into Spanish literature. By furnishing information on select socio-cultural aspects of Spain, this programme creates a backdrop for a better understanding of the language and the people.

This programme focuses on developing all four language skills of reading, writing, listening and speaking. Through training in various activities it enhances the critical/ creative thinking and encourages the learners to think spontaneously in Spanish.

# TAGORE STUDIES

## PREAMBLE

Tagore Studies will be a mainly Activity, Presentation and Seminar-based **Learner-Centric** Course that will offer the option of taking it up as a Minor Discipline (all six courses for 18 Credits) or One-at-a-time Course (3 Credits) under Open Elective Choice where the participants would be able to engage themselves in

- *Making a Choice, as to which Course/Courses to opt for* (for instance, someone from Fine Arts and Aesthetics background may like to opt for ‘Tagore as a Culture Icon with special reference to his Painting’ or ‘Tagore and Mass Media,’ whereas a Literature candidate may like to go for ‘Tagore as a Poet’ and ‘Tagore as a Fiction Writer.’ Students enrolled in Mass Media and Communication may love to get connected to ‘Tagore and Mass Media’ as well as ‘Tagore as a Fiction Writer.’ Those from the History orientation may like to opt for the ‘Cultural History’ area under ‘Tagore as a Cultural Icon’ module).
- *Collaboration* within or across disciplines to create a joint appraisal/critique/text which could then be presented before the class for internal evaluation – by the faculty and remaining students together – in a peer review mode together.)
- *Communication* would be tested on the oral or ppt presentations that a participant may like to make on any aspect of Tagore in a Colloquium model where one person communicates and the others on the panel comment, agree, differ or substantiate etc where their performance is evaluated.
- *Critical thinking* with respect to the issues raised by Tagore in the areas on Religion, Societal Practices, Nation Building, or Politics (especially in ENG2652) on which a participant may like to write an end-semester Term Paper.
- *Creativity* in performing a text, or putting up a play for the larger University community, or writing a sequel to or a new text/story/poem/essay creatively – or translating Tagore into one’s own language based on his English versions.

## COURSE OVERVIEW

It is expected that students cutting across disciplines should be interested in ENG2152 as an Open Elective course, just as students in History would like to opt for ENG2252 as well as ENG2352. Students under Mass Media and Communication may like opting for ENG2652 module whereas the students in Literature programme may find all or at least ENG2352, ENG2452 and ENG2552 to be attractive.

## Syllabus - Semester First

### RABINDRANATH TAGORE IN THE 21<sup>ST</sup> CENTURY

Course Code: ENG2152

Credit Units: 03

**Theme:**

The face of the world is changing, and as time passes, the changes are visible with a lot of disturbing images. But each time one feels an element of doom and despair, one's faith is rekindled to see that there are thinkers and doers like Tagore who firmly believed that ultimately the truth and beauty would prevail. It is not surprising to see Einstein sharing the same beliefs as the doyen of Indian literature, Rabindranath Tagore (1861-1941). Einstein had said: 'The ideals which have lighted my way, and time after time have given me new courage to face life cheerfully have been kindness, beauty, and truth.' The progress of mankind is crucially dependent on this realization. In exchanges with Einstein, Tagore had commented: "The progress of our soul is like a perfect poem. It has an infinite idea which once realized makes all movements full of meaning and joy. But if we detach its movements from that ultimate idea, if we do not see the infinite rest and only see the infinite motion, then existence appears to us a monstrous evil, impetuously rushing towards an unending aimlessness." No amount of personal loss could make Tagore deviate from his own trajectory of working for his own country, his own times and for his own mother tongue – Bangla, or Bengali that holds together two nations, India and Bangladesh. He knew that after the dark comes light, as he said: "Clouds come floating into my life, no longer to carry rain or usher storm, but to add color to my sunset sky." Tagore's relevance today will be focused under this course.

**Course Coverage:**

**Module-1: Contributions of Tagore and Relevance of Tagore Today**

- The current economic recession and financial crises in the world, and the continuing problems of religious polarization, militarism and hostilities – Tagore's warning and predictions
- Compassionate humanism and Composite Culture in India
- Nationalism and Internationalism.
- Tagore and Education at all levels

**Module-2: Tagore's works – An Introduction to the range and variety**

- Number of works: A Chronological Account
- The genre of publications and the range
- Variations of the same works and the *Bichitra Variorum*

**Module-3: Translation and Dissemination of Tagore's works**

- Tagore's own Translations
- Authentic Translation of Tagore by others
- Multiple Translations of Tagore

- Other Indian Languages & Foreign Languages Translation – A brief account

#### Module-4: Tagore and International Personalities

- Tagore, Yeats and Rothenstein
- Tagore and Einstein
- Tagore and Romain Rolland
- Tagore and Leonard Elmhirst
- Tagore and Victoria Ocampo

#### Examination Scheme:

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

#### Learning Outcomes: (of the Course)

Through this course, we are made aware as to why Tagore was critical of the de-humanizing economic systems, which, supported by educational methods based principally on competitions and rote-learning, fail miserably in generating creative and sensible individuals ready to think beyond the texts. Tagore's own practical project was to show the way for a modernized and less restrictive form of society that does not shun or abandon traditional values, but one that comprise networks of self sustaining groups, villages, or communities, where children and young people are encouraged to develop their natural curiosity and creativity, and to express themselves freely with body and mind. Tagore's approach to education and rural reconstruction, if implemented widely as he intended, could lead to a radical redesign of society, a turning of the world upside down. For both planners and thinkers, it is important to see the relevance of Tagore's arguments beyond his own time.

#### At the end of the course students will be able to: (Definitive Outcomes)

- Understand the text used,
- Talk about the text,
- Think about issues raised by Tagore through his writings,
- Work with his ideas, and
- Raise new issues in the changing contexts to see the relevance of Tagore's messages.

## Syllabus - Semester Second

### TAGORE- AUTOBIOGRAPHIES AND BIOGRAPHICAL SKETCHES

Course Code: ENG2252

Credit Units: 03

**Theme:**

In this section, we shall first look into Tagore's 1912-work *Jibansmriti*, the English translation of which, *My Reminiscences*, was published by Macmillan in 1917 under Surendranath Tagore's translation. Here Tagore describes the early years of his life; his experiences of loneliness, love, and loss. Tagore's emergence as a poet could also be read about here. In this work, he introduces his family circle and describes his experience with the formal education against which he rebelled. In a published lecture, titled "My School" (*The Modern Review*, 1931), Tagore speaks of his mission to revolutionize education by rearing young minds in harmony with nature. His autobiographical texts capture a child's-eye view of a mysterious, fascinating world in which fantasy blends seamlessly with reality. In a portion, he also describes his first encounters with death, the poignancy.

Tagore's book - *Talks in China* (1925) which was largely autobiographical, contextualizing his life in relation to the broad historical trends of the time, came up after he was invited by Liang Chi-Chao, president of the University Lecture Association of Beijing in April–May 1924. This will also be touched upon.

Tagore's *Chhelebelā (Boyhood Days)* was published in 1940, in response to a request to write something for young readers, where Tagore embarked on this delightful account of his childhood and adolescence.

When Rabindranath Tagore passed away in 1941 he left behind thousands of pages of poetry, prose, plays, essays, letters, humorous pieces, autobiographical writings, and travel literature. An astonishing number of these works remain of interest to us even today. In a letter in *Chhinnapatra (Torn Leaves)*, 92), Tagore confesses that though poetry has been for him "a kind of secret and forbidden delight," he has also found pleasure in writing short fiction, writing "in the form of a diary or some such genre," as well as producing polemical pieces. He affirms that it is "very important to cross swords with our people on social issues," although this offers him a pleasurable dilemma: "I don't want to disappoint any of my Muses." His growing awareness of and talent for theater and performing arts, including music and dance were all discussed here.

Finally, in *Atmaparichay (Self-Recognition)*, 1943), a collection of six introspective essays published posthumously, Tagore reveals some other aspects of himself – when he says: "It is not easy to know oneself. It is difficult to organize life's various experiences into a unified whole."

**Course Coverage:**

**Module-1: The Childhood days – Growing up and De-schooling (1861-78)**

- Prince Dwarkanath Tagore, Raja Rammohun Ray & Bankimchandra
- Debendranath Tagore and the Jorasanko Family
- Early Childhood, Loss of Mother and the influence of elder brothers
- Giving up Schooling and Self-education

**Module-2: Tagore and his says of the Youth – Creative Urge (1878-1889)**

- Tagore’s “education” in England
- Begins to write and publish poetry
- Marriage, Children and Death in the family
- In Eastern Part of Bengal and Contacts

**Module-3: Tagore as an Administrator and Institution Builder (1890-1913)**

- Tagore’s Management of Estate and Rural reconstruction
- Moves to Santiniketan to set up a School
- Tagore as an essayist and participation in nation building
- Spurt in poetic creativity and Short Stories
- The Nobel Prize

**Module-4: Tagore’s Discovery of the Self (1914-1941)**

- Establishment of ‘Sriniketan’ and the experiments
- Tagore and Gandhi relationship
- Numerous travels abroad and Belles letters
- Tagore’s influence over the contemporaries
- Tagore’s philosophy

**Examination Scheme:**

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

**Learning Outcomes:** (of the Course)

There could be several reasons as to why one benefits immensely from reading biographies and autobiographies. These texts help us see where we are going and where we need to go to because they allow us to *stand on the shoulders of giant scholars and performers*. Sir Isaac Newton wrote in a letter (in 1670) to his friend Robert Hooke, “If I have seen further, it is by standing on the shoulders of giants” That is exactly what reading biographies can do for you – allow you to see further. Then, George Santayana had warned us in 1905, “Those who cannot remember the past are condemned to repeat it.” Therefore, the best way of taking advantage from others is by reading about their lives. There may not be a direct lesson as you will have to discover for yourself as to what lessons are there to learn. It is therefore a way of promoting ‘self-help’ based on the stories and experiences of others. It is, as if, Tagore would mentor you from a distance in finding answers to your own questions in life. It is difficult to generalize but all smart people, and all great leaders read biographies. Their personal libraries are likely to have a few biography and memoir and autobiography.

**At the end of the course students will be able to:** (Definitive Outcomes)

- (i) Learn how to write a daily journals of their own activities and make it a habit which could be of great use in future.
- (ii) Learn how to jot down great ideas for use at an appropriate time.
- (iii) Come out of agony and depression to see that finally truth does prevail and perseverance pays.
- (iv) Will come to know of many unanswered questions about history of the era mentioned in the books.

(v) Find a lot of materials and quotable quotes for use in later days.

## Syllabus - Semester Third

### **TAGORE AS A CULTURAL ICON - TAGORE AS A PAINTER & PERFORMER**

**Course Code: ENG2352**

**Credit Units: 03**

**Theme:**

This unit will take us back to look at our cultural history – particularly at the way it unfolded itself during the last few hundred years. When we were beginning to negotiate with the western world, we lacked either the will or the vision, or perhaps both, in constructing our own cultural landscape. As a civilization in India, we had the required talent, the native intuition and appropriate knowledge to create our own pathways. But while under the British rule, we failed to communicate this wisdom and originality, because we fell into the trap of believing that we must build, promote and practice a medium of expression that should be understood by our western readers or viewers. That forced us to adopt the medium of English and its styles of expression. These we then decided to introduce in our education system that would be open only to the elites and the middle class gentry. It was not at all surprising, therefore, that along with English poetry and drama, the average neo-educated Indians began to adore the life-style and culture of their British masters, including their music, taste, dress, and even sports. We had been at an interesting cross-road of history when Tagore had emerged as an indigenous Cultural Icon that could match with the best in the west. Tagore's advent came as a boon to both civil society in India and to our cultural fields. How Tagore emerged as a Cultural Icon in a subjugated country is discussed here with copious examples from different fields of culture and literature to which he had contributed.

**Course Coverage:**

**Module-1: Indian Cultural History and Emergence of Tagore**

- 18<sup>th</sup>-19<sup>th</sup> Century Bengal and the British Indian Rule
- Cultural, Social, Intellectual and Artistic Re-awakening

**Module-2: Doodling, Designs and the Brand Santiniketan**

- Doodling on poetry copy-books with Hand-writing and Erasure aesthetics
- Masks, Faces and Designs
- Bringing in Designers Andre Karpeles and Stella Kramrisch (1896-1993)
- Abanindranath Tagore

**Module-3: Tagore's Experiments in Painting & Creating an Arts School**

- The range of Tagore's Paintings
- Painting nature and mystic landscapes
- Merger of the Familiar and the Unknown
- Dramatic Figures and Scenes

**Module-4: Tagore as a Playwright and his experiments in Music and Dance**

- From 'Valmiki Pratibha' (1881) to 'Visarjan' (1890) to 'The Post-Office' (1912)
- The Sung Poetry and his own Musical experiments with fusion
- Dance-Drama as a genre

**Examination Scheme:**

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

**Learning Outcomes: (of the Course)**

The fallacy in the perception that the 'Eastern' or so-called 'Oriental' Culture remains static – visibly recognizable over a long period of history began to change to become more like the 'Western' culture with the advent of the English rule and education will be clear with these lectures. The stereotype of the 'Unchanging East' and the meek acceptance of the meaning of 'Progress' or 'Development' as a move towards 'Material Culture' need to be demystified. A very practical advice that Tagore had given to those who are worried about this area could be seen in his statement: "You have to judge progress according to its aim. A railway train makes its progress towards the terminus station – it is a movement. But a full grown tree has no definite movement of that kind. Its progress is the inward progress of life. It lives, with its aspiration towards light tingling in its leaves and creeping in its silent sap." How Tagore had created a fusion of the best traditions of the west and the east in his plays and music to emerge as a Cultural Icon of our time is explained in this course.

**At the end of the course students will be able to: (Definitive Outcomes)**

- (i) Appreciate Tagore's contribution in national reawakening that happened in the 19<sup>th</sup> Century India;
- (ii) Be exposed to some of the finest musical experiments and scores where words touching one's soul and tunes appealing to one's senses get enmeshed;
- (iii) How plays could be used as instruments in social awakening or in protest movements could be clear from this course
- (iv) How education could change the face of our Society and Humanity will be appreciated.

## Syllabus - Semester Fourth

### TAGORE AS A POET

**Course Code: ENG2452**

**Credit Units: 03**

**Theme:**

Noted American author, Pearl Buck wrote about Tagore's poetry: "In a very real sense he was a world poet...He spoke out of his own soul and mind and heart. To him beauty is eternal and invincible, the indispensable source of refreshment for the soul, the mind, the heart of mankind." Rabindranath began writing poems at the age of 6 and as a young boy studied the classical poetry of Kalidasa. He also studied the Upanishads, languages and modern sciences. He was sent to England in 1878 to become a barrister, but he returned by 1880 without completing his education. His marriage to Mrinalini Devi, and his later assignment to look after his family's estates in the areas now in Bangladesh, allowed him a productive period of writing poetry, plays and short stories. When he joined Santiniketan (in West Bengal) to found an ashram, which became a world school, the opportunity grew further. Tagore thus emerged as Asia's first Nobel Prize winner for literature in 1913 for his book – 'The Song Offerings: Gitanjali'. As a creative genius and a seer-poet, he also played a crucial role in the cultural renaissance of India and Bengal in the 19th and early 20th Century.

Although he was inspired by notable poet Biharilal Chakrabarty and acknowledged him as his poetry-guru, his own poetry was undeniably unique. This was evident right from his first published volume of poetry entitled "Sandhyasangeet" (or Evening Songs) which came out in 1882. When his greatest source of inspiration - his sister-in-law Kadambari Devi, a wise and brilliant woman of her time, passed away in 1885, it inflicted a deep wound on Rabindranath. This sense of loss finds expression in many of his works, from "Kori O Komal" (1886) to several others. Rabindranath also wrote "Prabhat Sangeet" (or Morning songs) soon. The poems of love in this collection also symbolized the naissance of Rabindranath's personal view of God. The history of the completion that which Rabindranath was talking of, may be found in several other anthologies - "Naivedya", "Utsarga" and "Kheya", as also in "Chitra", "Kalpana" and "Khanika" – and subsequent works of his, until 'Gitanjali' (1910). Poems of yearning for the Divine, an immense craving for the Infinite, form an integral part of the temperament of the lyrical poems of "Gitanjali". In 1913, the English edition of "Gitanjali" was published with an introduction by English poet, W. B. Yeats. The rest is history. This course will also present a glimpse of the post-Gitanjali poetic creations of Tagore which took a completely different turn.

**Course Coverage:**

**Module-1: Early Phase of Tagore's Poetry**

- The Prabhat Sangeet (1883) and the Sandhya Sangeet (1882) days
- The 'Kari o Komal' (1886), 'The Manasi' (1890) and the 'Chitra' & 'Chaitali' (1896) phase

**Module-2: The 'Gitanjali' Period**

- 'Kanika' (1899), 'Kshanika' (1900) and the Bengali Original 'Gitanjali' (1910)
- Making of the English Gitanjali (1912)
- The sequels – 'Gitimalya' (1914) and 'Gitali' (1914)

### Module-3: The Poetic Plays

- The ‘Chitrangada’ (1892) – based on the epic story of the Maha-Bharata
- The ‘Chandalika’ (1938) – touching upon the issue of caste prejudices
- The Card Country, or ‘Tasher Desh’ (1933)

### Module 4: Later Phase of Tagore’s Poetry

- Punascha’ (1932) and ‘Parishesh’ (1932)
- ‘Shesh Saptak’ (1935), Patraput (1936) and Shyamali (1936)
- ‘Shesh Kotha’ (1940) and ‘Rogshajyay’ (1941)
- Poetry on Paintings – ‘Bichitrita’ 91933)

### Examination Scheme:

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

### Learning Outcomes: (of the Course)

Going through this course will make the participants appreciate the position of Tagore, namely, that since Man did not have any choice as to his origin and his state, i.e. his environ, and because the human mind is not contented with what is given, man likes to create, construct and set up himself and all that is around him in the way he likes. This works as a driving force for all in literature and art. Because man was not born complete, he wants to get over his incompleteness by creativity. Yet another learning outcome will be to realize what Tagore mentions in his essay, ‘The Significance of Literature.’ Through his poems, Tagore makes an attempt to define the various worlds that he places before him as a thinker-author – some real, and some unreal; some approachable through ‘language’, and some that employ a “language that is beyond language”. This Utopia expressed in his mystic poetry becomes clearer when we see him saying:

“The world becomes another world in our mind. In this world exist not only the color, shape, sound, and other attributes of the other world, but also our likes and dislikes, our fear and wonder, our pleasure and grief. Our mind, through its various processes, suffuses the outside world differently... This act of the mind enables us to individualize external reality... Through the color and shape of their mind, the external world assumes variegated shapes... This world is more precious to the imaginative individual than the outside world or the human world. The mind helps this world to become more suitable for access into people’s hearts, rendering it unique for consumption... Thus there is a difference between the outside world and the human world. The human world does not inform us of what is black and white and what is large and small. It tells us of what is dear and vile, what is beautiful and ugly, and what is good and bad in different ways.”

It is the nature of the human mind and the human world that get truly reflected in his poetry – which the participants will be able to discover through this course.

In particular, a few of Tagore’s poems in English translation would be discussed here from ‘The Fountain’s Awakening’ to ‘The dark Night of Sorrows.’ Tagore’s songs (over 2500 compositions) that belong to another genre of poetry will also be presented and discussed here, since Tagore had himself declared that music being the most abstract of all the arts, just as mathematics was in the region of science, musical expression was the purest and most unimpeded form of creative expression. And it is in

his songs that the evolution of the poet from what he called a state of being into one of becoming is best captured.

**At the end of the course students will be able to: (Definitive Outcomes)**

- (i) Comprehend the influences on Tagore by the poetic tradition of India
- (ii) Read and recite a few major poems in English translation and be exposed to some fine recorded recitations of original poems
- (iii) Understand the problems and nuances of poetic translation of Tagore texts – based on translations done by the poet himself and by the others
- (iv) Be exposed to a variety of poems – with so much of thematic and stylistic variations

## Syllabus - Semester Fifth

### TAGORE AS A FICTION WRITER

Course Code: ENG2552

Credit Units: 03

**Theme:**

Rabindranath Tagore is a poet dramatist, novelist, actor, composer, educator, painter, and a Philosopher. In a word he is the Leonardo-da-Vinci of our Renaissance True to the Indian Tradition, his own philosophical vision was depicted in his essays, stories as well as in his fiction. Tagore's short stories emerged at a time when this genre was not so well-cultivated in India, and they have given rise to many films later. The stories often deal with apparently simple subject matter: commoners, whereas his non-fiction writings dealt with history, linguistics, and spirituality. Well-known also as travelogue writer, his *Europe Jatrir Patro* ('Letters from Europe') are a treat to read. His career as a story-teller through dramatic mode began with *Balmiki Pratibha* in 1881 but soon he came up with *Bisarjan* (1890). His later dramas such as *Dak-ghar* ('The Post Office, 1912) or *Raktakarabi* ('Red Oleanders' 1926) were more philosophical and allegorical. The dance dramas such as *Chandalika* (1938), *Shyama* (1939), and *Chitrangada* (1905) are still extremely popular. This unit will also give an introduction to Tagore's well-known novels – *Chokher bali* (1903), *Noukadubi* (1906), *Gora* (1910), *Chaturanga* (1916), *Ghare Baire* (1916), *Jogajog* (1929), *Char Adhyay* (1933), and *Shesher Kabita* (1929) etc.

**Course Coverage:**

**Module-1: Tagore's Initial Texts leading to his 'Galpaguccha'**

- 'Bou-Thakuranir Hat' (1883) and 'Rajarshi' (1887)
- The beginning of his short stories from 1891 – 'Byabadhan', 'Khokababur Pratyabartan', 'Postmaster' (1891);
- 'Dena-paona', 'Ekti Asharhe Galpo' and 'Kabuliwalla' (all 1891-92);
- 'Kshudhita Pashan' & 'Ichapuran' (1895)

**Module-2: Selected Novella – Initial Phase**

- 'Nashtanir' (1901);
- 'Chokher Bali' (1902);
- 'Noukadubi' (1906)

**Module-3: Selected Novels – Later Phase**

- *Gora* (1910)

**Module-4: Poet as a Story-teller – Experiments in Fusion**

- *Ghare Baire* (1916)
- *Shesher Kavita* (1929)

**Examination Scheme:**

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

**Learning Outcomes:** (of the Course)

This course will provide a thorough and in-depth knowledge of Tagore's profound understanding of human emotions, values and social systems in nineteenth and twentieth century Bengal. More importantly, the man-woman relationships dramatized in Tagore's novels and plays will provide the learners with a glimpse of the turbulences and upheavals that in turn will enable to comprehend the larger politics of gender, sexuality and patriarchy in various guises. One will gradually have a critical acumen to realize the play of hierarchies in the past and the contemporary times. Also, a reading of Tagore's novels will make one aware of his humanist thinking that undermined the parochialism and jingoist nationalism. Tagore's broader humane worldview that repudiated ultra-nationalist excesses is very relevant for today. His plays and novels show that though he argued fiercely against the bonds of colonialism, he warned against the excesses of nationalism. For him "the idea of the nation is one of the most powerful anesthetics that man has invented." So, no wonder, going through this course one will not only revisit the colonial/ national histories, changing roles and status of women but also will grasp the working of social dynamics in different forms in the current era.

**At the end of the course students will be able to:** (Definitive Outcomes)

- Appreciate Tagore's take on nationalist and colonial histories.
- Understand Tagore's lyrical humanism and how that is pertinent in a world of strife and conflict
- Explore the representation of women and how it is related to the feminist studies.
- Unravel how fiction can be written as a mode of beauty and truth as well as to radically critique the systemic ideologies.

## Syllabus - Semester Sixth

### TAGORE AND MASS MEDIA

Course Code: ENG2652

Credit Units: 03

**Theme:**

Very few are aware that Rabindranath Tagore had himself dabbled into screenplay writing in the early days of Indian cinema. The silent era Orient Pictures film '*Balidan*' (1927) directed by Naval Gandhi and based on Tagore-play '*Bisarjan*' (known in English as '*Sacrifice*'), had its screenplay written jointly by Jamshed Ratnagar and Rabindranath Tagore. This commercially successful film was set in the fictional kingdom of Tippera, and involved clashes between a progressive-minded King and a "tradition-bound priest.

'*Natir Puja*' (*The dancing girl's worship*, 1932) - based on a recording of his 1926 dance-drama - is the only film where Rabindranath Tagore is credited as the director. Produced by B.N.Sircar of the New Theatre's Group, it was shot in four days where Tagore had himself enacted a small role. Although it was not a commercial success, the prints of the film were destroyed in a fire at the New Theatres. Though recently, attempts have been made to restore the film.

Tapan Sinha's Bengali version of Tagore-story '*Kabuliwala*' (1957) was remade in Hindi in 1961 – with the lead role being played by Chhabi Biswas in Bengali and Balraj Sahni in Hindi. Both versions were immensely successful aesthetically as well as commercially. The music was scored by Pt Ravi Shankar for the Bengali version and by Salil Choudhury for the Hindi version. It received two National Film Awards in 1956 and the Silver Bear Extraordinary Prize of the Jury in the Berlin Film Festival. The story was translated from Bangla into English by the Irish woman Margaret Elizabeth Noble, more popularly known to the world as Sister Nivedita.

Satyajit Ray's '*Teen kanya*' (literally, 'The Three Daughters') was a tribute to Tagore in his centenary year – 1961 as it was made out of three stories by the Master – 'Postmaster', 'Monihara' ("The Lost Jewels'), and 'Samapti' ('The Conclusion') – awarded as the best film at the National level and also honored at the Berlin Film Festival. The common thread seems to be three extraordinary women and their tale of love and affection.

'*Dak Ghar*', a 1912-play by Tagore, rendered into English by W.B.Yeats, and translated and performed in Spanish, French, German and Polish in Europe, was made into a Hindi film in 1965 – directed by Zul Vellani, produced by the Children's Film Society.

Many other successful films could be named – such as Kumar Shahani's 1997-film '*Char Adhyay*' produced by NFDC – based on Tagore's 1934 novel, and remade recently as a successful Bengali commercial film – '*Elar Char Adhyay*' (2012) directed by Bappaditya Bandopadhyay. In between, the same novel became the subject matter of another film – '*Chaturanga*' (2008) directed by Suman Mukherjee

There was yet another classic Tagore film that was remade – Satyajit Ray's '*Charulata*' (1964), with Soumitra Chatterji, Madhabi Mukherjee and Shailen Banerjee - remade by Agnidev Chatterji in 2012 with Rituparna Sengupta, Arjun Chakraborty and Kaushik Sen. Ray had received the Silver Bear as the

Best Director in the 15<sup>th</sup> Berlin International Festival in 1965 for this film and also Golden Lotus Award nationally in the same year.

There were some more movies with double versions – such as Tagore’s story ‘*Naukadubi*’ (‘The Wreck’) being made as ‘*Ghunghat*’ (1960) by Ramanand Sagar under a Gemini Studio production where Bharat Bhushan, Leela Chitnis, Pradeep Kumar, Bina Rai, Asha Parekh etc acted. The film went on to get two Filmfare awards. In 2011, Rituporno Ghosh made it in Bengali under the original title – ‘*Noukadubi*’ – produced by Subhash Ghai, and it was premiered as the opening film of the *Indian Panorama* section during the 41st International Film Festival of India (IFFI), Goa on 24 November 2010, in the year that marked Rabindranath Tagore’s 150th birth anniversary.

### Course Coverage:

In this unit, memorable films and other performances made out of Tagore’s works will be introduced, viewed and discussed, and a few documentary films on Tagore will be shown as a part of the course. Evaluation pattern will differ from the other courses under Tagore Studies.

**Module-1:** Satyajit Ray and Rituparna Ghosh on Tagore’s Biopic plus some other Documentaries on Tagore & Discussions

**Module-2:** Memorable films – *Charulata* (Satyajit Ray 1964)

**Module-3:** *Chokher Bali* (Rituparno Ghosh, 2003)

**Module-4:** *Ghare Baire* (Satyajit Ray, 1985)

**Module-5:** Multiple versions of Tagore films – ‘*Kabuliwala*’, ‘*Char Ahay*’, ‘*Charulata*’ etc.

### Examination Scheme:

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

### Learning Outcomes: (of the Course)

Tagore has been a source of inspiration to generations of filmmakers and theatre performers. Be it his songs, poems, short stories, novels, or plays, his works attracted many. Even recently, a few film-directors such as Sekhar Das (Jogajog) and Suman Ghosh (Kadambari) came up with elements from tagore stories or from his life. Subhabrata Chatterjee's debut Bengali film, *Monihara*, based on Tagore's short story was another example. Suman Mukherjee of ‘*Chaturanga*’-fame was working on his next film, *Shesher Kabita*, based on Tagore's novel of the same name. Tagore's influence on the Bengali television too can't be denied. A television series, *Chokher Bali*, based on Tagore's work, which was launched recently, too has found many takers.

This being the pervasive influence of Tagore on Mass Media, a student with interest in cinematography, screenplay or direction and production would be incomplete without being exposed to a course such as this. It would also bring out the best in the candidate in appreciating or critiquing film and television classics.

### At the end of the course students will be able to: (Definitive Outcomes)

- The Social Reformist in Tagore could be understood better through this course. His political ideas would be clearer.
- The stunningly contemporary elements in Tagore’s stories would be possible to use in further studies and works by the candidates.

- (iii) The issues of gender equality and women's emancipation would be appreciated through this course.
- (iv) Since Tagore's translation do not match the quality of his originals, the cinematic translations in the inter-semiotic endeavors make it easier for us to appreciate his genius.

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

# Overview – B.Sc. (Hons.) Nursing Programme

## Aim:

The aim of the Undergraduate Nursing program is to:

- Prepare graduates to assume responsibilities as professional, competent nurses in providing promotive, preventive, curative and rehabilitative services.
- Prepare nurses who can make independent decisions in nursing situations , protect the rights of and facilitate individuals and groups in pursuit of health , function in the hospital , community nursing services , and conduct research studies in the areas of nursing practice . They are also expected to assume the role of teacher, supervisor, and manager in a clinical. Public health setting.

## Objectives:

On completion of four year B.Sc. (Hons.) Nursing Program the graduate will be able to:

1. Apply knowledge from the physical, biological, and behavioural sciences. Medicine including alternative systems and nursing in providing nursing care to individuals, families and communities.
2. Demonstrate understanding of lifestyle and other factors which affect health of individuals and groups.
3. Provide nursing care based on steps of nursing process in collaboration with the individuals and groups.
4. Demonstrate critical thinking skill in making decisions in all situations in order to provide quality care.
5. Utilize the latest trends and technology in providing health care.
6. Provide promotive, preventive and restorative health service in line with the national health policies and programmes.
7. Practice within the framework of code of ethics and professional conduct, and acceptable standards of practice within the legal boundaries.
8. Communicate effectively with individuals and groups, and members of the health team in order to promote effective interpersonal relationships and team work.
9. Demonstrate skills to in teaching to individuals and groups in clinical/community health settings.
10. Participate effectively as members of the health team in health care delivery system
11. Demonstrate leadership and managerial skills in clinical/community health settings.
12. Conduct need based research studies in various settings and utilize the research findings to improve the quality of care.
13. Demonstrate awareness, interest, and contribute towards advancement of self and of the profession.

# ANATOMY & PHYSIOLOGY-I

**Course Code: NUR2101**

**Credit Unit-05**

## **PART – A ANATOMY**

**Course Description:** The course is designed to enable students to acquire knowledge of the normal structure of various human body systems and understand the alterations in anatomical structures in disease and practice of nursing.

### **Course Contents**

#### **Module I**

##### **Introduction to Anatomical terms organizations of the human body**

- Human Cell structure
- Tissues-Definition, Types, characteristics, classification, location, functions and formation
- Membranes and glands-classification and structure, alterations in disease
  - ✓ Applications and
  - ✓ Implications in nursing

#### **Module II**

##### **Circulatory and lymphatic system**

- The Circulatory System
  - ✓ Blood Microscopic Structure
  - ✓ Structure of Heart
  - ✓ Structure of blood vessels – arterial and venous system
    - Circulation: systemic, pulmonary, coronary
    - Lymphatic system
    - Lymphatic vessels and lymph
  - ✓ Lymphatic tissues
    - Thymus gland
    - Lymph nodes
    - Spleen
    - Lymphatic nodules
    - Alterations in diseases
    - Applications and implications in nursing

#### **Module III**

##### **The Respiratory System**

- Structure of the organs of respiration
- Muscles of respiration: Intercostals and Diaphragm
  - ✓ Alterations in disease
  - ✓ Applications and implications in nursing

#### **Module IV**

##### **The Digestive System**

- Structure of Alimentary tract and accessory organs digestion
  - ✓ Alterations in disease
  - ✓ Applications and implications in nursing

#### **Module V**

### **The Excretory system (Urinary)**

- Structure of organs of Urinary
- System: Kidney, ureters, urinary bladder, urethra, structure of skin
  - ✓ Alterations in disease
  - ✓ Applications and implications in nursing

## **PART –B (PHYSIOLOGY)**

**Course Description:** The course is designed to assist students to acquire knowledge of the normal physiology of various human body systems and understand the alterations in physiology in disease and practice of nursing.

### **Module I**

#### **Cell Physiology**

- Tissues-formation, repair
- Membranes and glands-functions
  - ✓ Alterations in disease
  - ✓ Applications and implications in nursing

### **ModuleII**

#### **Circulatory System**

- Blood formation, composition, blood groups, blood coagulation
- Hemoglobin: Variation of molecules, estimations
- Functions of Heart, Conduction, Cardiac cycle, circulation-Principles, Control, factors influencing BP and pulse
  - ✓ Alterations in disease
  - ✓ Applications and implications in nursing

### **ModuleIII**

#### **The Respiratory System**

- Functions of respiratory organs
- Physiology of respiration
- Pulmonary ventilation, Volume
- Mechanics of respiration
- Gaseous exchange in lungs
- Carriage of oxygen & carbon-dioxide
- Exchange of gases in tissues
- Regulation of respiration
  - ✓ Alterations in disease
  - ✓ Applications and implications in nursing

### **ModuleIV**

#### **The Digestive System**

- Functions of organs of digestive tract. Movement of alimentary tract, Digestion in mouth, stomach, small intestines, Large intestines,
- Metabolism of carbohydrates, protein and fat

### **Module V**

#### **The Excretory System**

- Function of kidneys, ureters, urinary bladder & urethra
- Composition of urine
- Mechanism of urine formation

- Functions of skin
- Regulation of body temperature
- Fluid and electrolyte
  - ✓ Alterations in disease
  - ✓ Applications and implications in nursing

## **Module VI**

### **Lymphatic and Immunological System**

- Circulation of lymph
- Immunity
  - ✓ Formation of T-cells and B cells
  - ✓ Types of Immune response
  - ✓ Antigens
  - ✓ Cytokines
  - ✓ Antibodies

### **Examination Scheme:**

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

### **Note:**

Anatomy and Physiology-I: Question paper will consist of Section A Anatomy of 37 marks and B Physiology should be of 38 marks.

### **Text & References:**

# **B.Sc.(Hons.)Nursing-First Semester NUTRITION AND BIOCHEMISTRY**

**Course Code: NUR2102**

**Credit Unit-08**

## **PART- A (NUTRITION)**

**Course Description:** The course is designed to assist the students to acquire knowledge of nutrition for maintenance of optimum health at different stages of life and its application for practice of nursing.

### **Course Contents**

#### **Module I**

##### **Introduction**

- Nutrition:
  - ✓ History
  - ✓ Concepts
- Role of nutrition in maintaining health
- Nutritional problems in India
- National nutritional policy
- Factors affecting food and nutrition: socio-economic, cultural, tradition, production, system of distribution, life style and food habits etc
- Role of food and its medicinal value
- Classification of foods
- Food standards
- Elements of nutrition: macro anti micro
- Calorie, BMR

#### **Module II**

##### **Carbohydrates**

- Classification
- Caloric value
- Recommended daily allowances
- Dietary sources.
- Functions
- Digestion, absorption and storage, metabolism of carbohydrates
- Malnutrition: Deficiencies and over consumption

#### **Module III**

##### **Fats**

- Classification
- Caloric value
- Recommended daily allowances
- Dietary sources.
- Functions.
- Digestion, absorption and storage, metabolism
- Malnutrition: Deficiencies and Over consumption
- 

#### **Module IV**

##### **Proteins**

- Classification

- Caloric value
- Recommended daily allowances
- Dietary sources.
- Functions
- Digestion, absorption and storage, metabolism of proteins
- Malnutrition: Deficiencies and over consumption

## **Module V**

### **Energy**

- Unit of Energy-Kcal
- Energy requirements of different categories of people.
- Measurements of energy.
- Body Mass Index (BMI) and basic metabolism
- Basal metabolic rate (BMR)- determination and factors affecting

## **Module VI**

### **Vitamins**

- Classification
- Recommended daily allowances
- Dietary sources.
- Functions
- Absorption, synthesis, metabolism storage and excretion
- Deficiencies
- Hypervitaminosis

## **Module VII**

### **Minerals**

- Classification
- Recommended daily allowances
- Dietary sources
- Functions
- Absorption, synthesis, metabolism ,storageand excretion
- Deficiencies
- Over consumption and toxicity

## **Module VIII**

### **Water & electrolytes**

- Water: Daily requirement, regulation of water metabolism, distribution of body water,
- Electrolytes: Types, sources, composition of body fluids
- Maintenance of fluid & electrolyte balance
- Over hydration, dehydration and water intoxication
- Electrolyte imbalances

## **Module IX**

### **Cookery rules and preservation of nutrients**

- Principal, methods of cooking and serving
- Preservation of nutrients
- Safe Food handling toxicity
- Storage of food
- Food preservation, food additives and its principals

- Prevention of Food Adulteration Act (PFA)
- Food Standards
- Preparation of simple beverages and different types of food

## **Module X**

### **Balanced diet**

- Elements
- Food groups
- Recommended Daily allowance
- Nutritive value of foods
- Calculation of balanced diet for different categories of people
- Planning of food
- Budgeting of food
- Introduction to therapeutic diets: Naturopathy -Diet

## **Module XI**

### **Role of nurse in nutritional programmes**

- National programmes related to nutrition
  - Vitamin A deficiency programme
  - National iodine deficiency disorders (IDD) programmes.
  - Mid-day meal programme
  - Integrated child development scheme (ICDS)
- National and International agencies working towards food/nutrition
  - NIPCCD, CARE, FAO, NIN, CFTRI (Central food technology and research institute) etc
- Assessment of nutritional status
- Nutrition education and role of nurse

## **PART - B (BIOCHEMISTRY)**

**Course Description:** The course is designed to assist students to acquire knowledge of the normal biochemical composition and functioning of human body and understand the alterations in biochemistry in disease for practice of nursing.

### **Course Contents**

#### **Module I**

##### **Introduction**

- Definition and significance in nursing
- Review of structure, Composition and functions of cell
- Prokaryote and Eukaryote cell
- Microscopy

#### **Module II**

##### **Structure and functions of Cell membrane**

- Fluid mosaic model tight junction, Cytoskeleton
- Transport Mechanism: diffusion, osmosis, filtration, active channel, sodium pump
- Acid base balance-maintenance & diagnostic tests
  - ✓ PH buffers

### **Module III**

#### **Composition and metabolism of Carbohydrates**

Type, structure, composition and uses:

- Monosaccharides, Disaccharides, Polysaccharides, Oligosaccharides
- Metabolism
  - ✓ Pathways of glucose:
    - Glycolysis
    - Gluconeogenesis: Cori's cycle, Tricarboxylic acid (TCA) cycle
    - Glycogenolysis
    - Pentose phosphate pathways (Hexose mono phosphate)
    - Regulation of blood glucose level
- Investigations and their interpretations

### **Module IV**

#### **Composition and metabolism of Lipids**

- Types, structure, composition and uses of fatty acids
  - ✓ Nomenclature, Roles and Prostaglandins
- Metabolism of fatty acid
  - ✓ Breakdown
  - ✓ Synthesis
- Metabolism of triacylglycerols
- Cholesterol metabolism
  - ✓ Biosynthesis and its Regulation
  - ✓ Bile salts and bilirubin
  - ✓ Vitamin D
  - ✓ Steroid hormones
- Lipoproteins and their functions:
  - ✓ VLDLs-IDLs, LDLs and HDLs
  - ✓ Transport of lipids
  - ✓ Atherosclerosis
  - ✓ Investigations and their interpretations

### **Module V**

#### **Composition and metabolism of Amino acids and Proteins**

- Types, structure, composition and uses of Amino acids and Proteins
- Metabolism of Amino acids and Proteins
  - ✓ Protein synthesis, targeting and glycosylation
  - ✓ Chromatography
  - ✓ Electrophoresis
  - ✓ Sequencing
- Metabolism of Nitrogen
  - ✓ Fixation and Assimilation
  - ✓ Urea Cycle
  - ✓ Hemes and chlorophylls
- Enzymes and co-enzymes
  - ✓ Classifications
  - ✓ Properties
  - ✓ Kinetics and inhibition
  - ✓ Control
- Investigations and their interpretations

## Module VI

### Composition of Vitamins and minerals

- Vitamins and minerals:
  - ✓ Structure
  - ✓ Classification
  - ✓ Properties
  - ✓ Absorption
  - ✓ Storage & transportation
  - ✓ Normal concentration
- Investigations and their interpretations

## Module VII

### Immunochemistry

- Immune response,
- Structure and classification of immunoglobins
- Mechanism of antibody production
- Antigen: HLA typing
- Free radical and Antioxidants.
- Specialized Protein: Collagen, Elastin, Keratin, Myosin, Lens Protein.
- Electrophoretic and Quantitative determination of immunoglobins –ELSA etc.
- Investigations and their interpretations

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

### Note:

Nutrition and Biochemistry: Question paper will consist of Section A Nutrition of 45 marks and Section B of Biochemistry of 30 marks.

# **B.Sc.(Hons.)Nursing-First Semester NURSING FOUNDATION-I**

**Course Code: NUR2103**

**Credit-18 (11+7)**

**Course Description:** The course is designed to help the students to develop an understanding of the philosophy, objective, theories and process of nursing in various Supervised Clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques nursing and practice them in Supervised Clinical settings.

## **Course Contents**

### **Module I**

#### **Introduction**

- Concept of Health: Health – illness continuum
- Factors influencing health
- Causes and risk factors for developing illness
- Body defenses: Immunity and immunization
- Illness and illness Behavior, Impact of illness on patient and family
- Health Care Service: Health Promotion and Prevention Primary Care, Diagnosis, Treatment, Rehabilitation and Continuing Care
- Health care teams
- Type of health care agencies
- Hospitals: Types, Organization and Functions
- Health Promotion and Levels of Disease Prevention
- Primary health care and its delivery: Role of nurse

### **Module II**

#### **Nursing as a profession**

- Definition and Characteristics of a profession
- Nursing:
  - ✓ Definition, Concepts, philosophy, objectives
  - ✓ Characteristics, nature and scope of nursing practice
  - ✓ Functions of nurse, Qualities of a nurse
  - ✓ Categories of nursing personnel
  - ✓ Nursing as a profession
  - ✓ History of Nursing in India
- Values: Definition, Types, Values Clarification and values in professional Nursing: Caring and Advocacy
- Ethics:
  - ✓ Definition and Ethical Principles
  - ✓ Code of ethics and professional conduct for nurses

### **Module III**

#### **Hospital admission and discharge**

- Admission to the hospital
  - ✓ Unit and its preparation admission bed
  - ✓ Admission procedure
  - ✓ Special considerations
  - ✓ Medico-legal issues
  - ✓ Roles and Responsibilities of the nurse
- Discharge from the hospital
  - ✓ Types: Planned discharge, LAMA and abscond, Referrals and transfers
  - ✓ Discharge Planning

- ✓ Discharge procedure
- ✓ Special considerations
- ✓ Medico-legal issue
- ✓ Roles and Responsibilities of the nurse
- ✓ Care of the unit after discharge

## **Module IV**

### **Communication and Nurse patient relationship**

- Communication: Levels, Elements, Types, Modes, Process, Factors influencing Communication
  - ✓ Methods of Effective Communication
    - Attending skills
    - Rapport building skills
    - Empathy skills
  - ✓ Barriers to effective communication,
- Helping Relationships (NPR) : Dimensions of Helping Relationships, Phases of a helping relationship
- Communicating effectively with patient, families and team members and maintain effective human relations with special reference to communicating with vulnerable group (children women, physically and mentally challenged and elderly )
- Patient Teaching : Importance, Purpose, Process, role of nurse and Integrating teaching in Nursing Process

## **Module V**

### **Documentation and Reporting**

- Documentation : Purposes of Recording and reporting
- Communication within the Health Care Team,
- Types of records; ward records, medical / nursing records,
- Common Record-keeping forms, Computerized documentation
- Guidelines for Reporting: Factual Basis, Accuracy, Completeness, currentness, Organization, confidentiality
- Methods of Recording
- Reporting: Change of shift reports: Transfer reports, Incident reports
- Minimizing legal Liability through effective record keeping

## **Module VI**

### **Vital signs**

- Guidelines for taking vital signs:
- Body temperature :
  - ✓ Physiology, Regulation, Factors affecting body temperature,
  - ✓ Assessment of body temperature : sites, equipments and technique, special considerations
  - ✓ Temperature alterations: Hyperthermia, Heatstroke, Hypothermia
  - ✓ Hot and cold applications
- Pulse:
  - ✓ Physiology and Regulation, Characteristics of the pulse, Factors affecting pulse
  - ✓ Assessment of pulse: site, location, equipments and technique, special considerations
  - ✓ Alterations in pulse
- Respiration :
  - ✓ Physiology and Regulation, Mechanics of breathing.
  - ✓ Characteristics of the respiration , factors affecting respiration
  - ✓ Assessment of respirations :technique, special considerations
  - ✓ Alterations in respiration

- Blood Pressure:
  - ✓ Physiology and Regulation, Characteristics of the blood pressure , Factors affecting blood pressure
  - ✓ Assessment of blood pressure: Sites, equipments and technique, special considerations
  - ✓ Alterations in blood pressure
- Recording of vital signs

## **Module VII**

### **Health assessment**

- Purposes
- Process of Health assessment
  - ✓ Health History
  - ✓ Physical examination: Methods- Inspection, Palpation, Percussion, Auscultation, Olfaction
  - ✓ Preparation for examination: patient and Unit
  - ✓ General assessment
  - ✓ Assessment of each body system
  - ✓ Recording of health assessment

## **Module VIII**

### **Meeting needs of patient**

- Basic needs (Activities of daily living )
  - Providing safe and clean environment:
    - Physical environment: Temperature, Humidity, Noise, Ventilation, light, Odor, pests control
    - Reduction of Physical hazards: fire, accidents
    - Safety devices: Restraints, side rails, airways, trapeze, etc
    - Role of nurse in providing safe and clean environment
  - Hygiene:-
    - Factors Influencing Hygienic Practice
    - Hygienic care: Care of the Skin-Bath and pressure points, feet and nail, Oral cavity, Hair Care, Eyes, Ears, and Nose
    - Assessment, Principles, Types, Equipments, Procedure, Special Considerations
    - Patient environment: Room, Equipment and linen, making patient beds
    - Types of beds and bed making
  - Comfort:-
    - Factors including Comfort
    - Comfort devices
  - Physiological needs:
    - Sleep and Rest:
      - Physiology of sleep
      - Factors affecting sleep
      - Promoting Rest and sleep
      - Sleep Disorders
    - Nutrition:-
      - Importance
      - Factors affecting nutritional needs
      - Assessment of nutritional needs: Variables
      - Meeting Nutritional needs: Principles, equipments, Procedure and special considerations
        - ✓ Oral
        - ✓ Enteral: Naso/Orogastric, gastrostomy
        - ✓ Parenteral:

## Module IX

### Infection control in Clinical settings

- Infection control
  - ✓ Nature of infection
  - ✓ Chain of infection transmission
  - ✓ Defenses against infection: natural and acquired
  - ✓ Hospital acquired infection (Nosocomial infection)
- Concept of asepsis: medical asepsis, and surgical asepsis
- Isolation precautions (Barrier nursing):
  - ✓ Hand washing: simple, hand antisepsis (scrub)
  - ✓ Isolation: Source and protective
  - ✓ Personal protecting equipments: types, uses and technique of wearing and removing
  - ✓ Decontamination of equipment and Unit
  - ✓ Transportation of infected patients
  - ✓ Standard safety precautions (Universal precautions)
  - ✓ Transmission based precautions
- Biomedical waste management:
  - ✓ Importance
  - ✓ Types of hospital waste
  - ✓ Hazards associated with waste
  - ✓ Decontamination of hospital waste
  - ✓ Segregation and Transportation and disposal

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

## **B.Sc.(Hons.)Nursing-First Semester ENGLISH LANGUAGE**

**Course Code: NUR2104**

**Credit Unit-05**

**Course Description:** The course is designed to enable students to enhance ability to comprehend spoken and written English (and uses English) required for effective communication in their professional work. Students will practice their skills in verbal and written English during clinical and classroom experiences.

### **Course Contents**

#### **Module I**

- Review of Grammar
- Remedial study of Grammar Building Vocabulary
- Phonetics
- Public Speaking

#### **Module II**

- Read and comprehend prescribed course books

#### **Module III**

- Various forms of composition
  - Letter writing
  - Note taking
  - Precise writing
  - Nurses notes
  - Anecdotal records
  - Diary writing
  - Reports on health problems etc.
  - Resume /CV

#### **Module IV**

- Spoken English
  - Oral report
  - Discussion
  - Debate
  - Telephonic conversation

#### **Module V**

- Listening Comprehension
  - Media, audio, video, speeches etc.

#### **ModuleV**

- Body Language
- Poise, Posture & Gait
- Personality Indicators
- Sitting (Men & Women),
- Standing (Men & Women)
- Eye Contact
- Anchoring Techniques

**Examination Scheme:**

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

**ANATOMY & PHYSIOLOGY-II**

**Course Code: NUR2201**

**Credit Unit-05**

**PART – A (ANATOMY)**

**Course Description:** The course is designed to enable students to acquire knowledge of the normal structure of various human body systems and understand the alterations in anatomical structures in disease and practice of nursing.

**Course Contents**

**Module I**

**The Skeletal System**

- Bones-types, structure, Axial & Appendicular Skeleton,
- Bone formation and growth
- Description of bones
- Joints-classifications and structure
  - Alterations in disease
  - Applications and
  - Implications in nursing

**Module II**

**The Muscular System**

- Types and structure of muscles
- Muscle groups
  - Alterations in disease
  - Applications and implications in nursing

**Module III**

**The Nervous system**

- Structure of neurologia& neurons
- Somatic Nervous system
  - Structure of
  - brain, spinal,
  - chord, cranial nerves
  - peripheralnerves
- Autonomic Nervous System-
  - Sympathetic, parasympathetic Structure, location
  - Alterations in disease
  - Applications and implication in nursing

## **ModuleIV**

### **The Sensory Organs**

- Structure of skin, eye, ear nose, tongue, (Auditory and olfactory apparatus)
  - Alterations in disease
  - Application and implications in nursing

## **ModuleV**

### **The Endocrine system**

- Structure of Pituitary, Pancreas, thyroid, parathyroid, thymus and adrenal glands
  - Alterations in disease
  - Applications and implications in nursing

## **ModuleVI**

### **The Reproductive system including breast**

- Structure of female reproductive organs
- Structure of male reproductive organs
- Structure of breast
  - Alterations in disease
  - Applications and implications in nursing

## **PART –B (PHYSIOLOGY)**

**Course Description:** The course is designed to assist students to acquire knowledge of the normal physiology of various human body systems and understand the alterations in physiology in disease and practice of nursing.

## **Module I**

### **Skeletal System**

- Bones formations& growth
- Bone –Functions and movements of bones of axial and appendicular skeleton, bone healing
- Joints- and joint movement
  - Alterations in disease
  - Applications and implications in nursing

## **Module II**

### **Muscular System**

- Muscle movements Muscle tone, Physiology of muscle contraction,
  - Alterations in disease
  - Applications and implications in nursing

## **Module III**

### **Nervous System**

- Functions of eurologia & neurons
- Stimulus and nerve impulse: Definitions and mechanism
- Functions of brain, spinal cord, cranial and spinal nerves
- Cerebrospinal fluid-Composition, circulation and function
- Reflex are, Reflex action and reflexes

- Autonomic functions-
  - Pain: somatic, visceral, and referred
  - Autonomic learning and biofeedback
  - Alterations in disease
  - Applications and implications in nursing

#### **Module IV**

##### **The Sensory Organs**

- Functions of skin, eye, ear, nose, tongue.
  - Alterations in disease
  - Applications and implications in nursing

#### **Module V**

##### **The Endocrine system**

- Functions of Pituitary, pineal body, thymus, thyroid, parathyroid, pancreas, Suprarenal, Placenta and ovaries & Testes
  - Alterations in disease
  - Applications and implications in nursing

#### **Module VI**

##### **The Reproductive system**

- Reproduction of cells-DNA, Mitosis, Meiosis, spermatogenesis, oogenesis.
- Functions of female reproductive organs; functions of breast, female sexual cycle.
- Introduction to embryology.
- Functions of male reproductive organs, Male function in reproduction, Male fertility system,
  - Alterations in disease
  - Applications and implications in nursing

#### **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>EA</b>	<b>EE</b>
<b>Weightage(%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

#### **Note:**

Anatomy and Physiology-I: Question paper will consist of Section A Anatomy of 37 marks and B Physiology should be of 38 marks.

## **B.Sc.(Hons.)Nursing-Second Semester NURSING FOUNDATION-II**

**Course Code: NUR2202**

**Credit Unit-18(11+7)**

**Course Description:** The course is designed to help the students to develop an understanding of the philosophy, objective, theories and process of nursing in various Supervised Clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques nursing and practice them in Supervised Clinical settings.

### **Course Contents**

#### **ModuleI**

##### **The Nursing Process**

- Critical Thinking and Nursing judgment
  - Critical Thinking : Thinking and learning ,
  - Competencies, Attitudes for Critical Thinking, Level of critical thinking in Nursing
- Nursing Process Overview: Application in practice
  - Nursing process format: INC, current format
  - Assessment
    - ✓ Collection of Data: Types, Sources, Methods
    - ✓ Formulating Nursing judgment: Data interpretation
  - Nursing diagnosis
    - ✓ Identification of client problems
    - ✓ Nursing diagnosis statement
    - ✓ Difference between medical and nursing diagnosis
  - Planning
    - ✓ Establishing Priorities
    - ✓ Establishing Goals and expected Outcomes,
    - ✓ Selection of interventions: Protocols and standing orders
    - ✓ Writing the Nursing Care plan
  - Implementation the plan of care
  - Evaluation
    - ✓ Outcome of care
    - ✓ Review and Modify
  - Documentation and Reporting

#### **ModuleII**

##### **Meeting needs of patient**

- Urinary Elimination
  - Review of Physiology of urine Elimination, composition and characteristics of urine
  - Factors Influencing Urination
  - Alteration in Urinary, Elimination
  - Types and collection of urine specimen: Observation, urine testing
  - Facilitating urine elimination: assessment, types, equipments, procedures and special considerations
  - Providing urinal/bed pan
  - Condom drainage
  - Perineal care
  - Catheterization
  - Care of urinary drainage

- Care of urinary diversions
- Bladder irrigation
- Bowel Elimination
  - Review of Physiology of Bowel elimination, Composition and characteristics of feces
  - Factors affecting Bowel elimination
  - Alteration in Bowel Elimination
  - Types and Collection of specimen of feces
  - Observation
  - Facilitating bowel elimination: Procedures and special considerations
  - Passing of Flatus tube
  - Enemas
  - Suppository
  - Sitz bath
  - Bowel wash
  - Care of Ostomies
- Mobility and immobility
  - Principal of Body Mechanics
  - Maintenance of normal body: Alignment and mobility
  - Factor affecting body Alignment and mobility
  - Hazards associated with immobility
  - Alteration in body alignment and mobility
  - Nursing interventions for impaired Body Alignment and
  - Mobility: assessment, types, devices used, method and Special considerations rehabilitation aspects
  - Range of motion exercises
  - Maintaining body alignment: Positions
  - Moving
  - Lifting
  - Transferring
  - Walking
  - Restraints
- Oxygenation
  - Review of Cardiovascular and respiratory Physiology
  - Factors Affecting Oxygenation
  - Alterations in Oxygenation
  - Nursing interventions in oxygenation: assessment,
  - Types equipment used, procedure and special considerations
  - Maintenance of patent airway
  - Oxygen administration
  - Suction
  - Inhalations: dry and moist postural drainage
  - Care of Chest drainage
  - Pulse-oximetry
  - CPR-Basic life support
- Fluid, Electrolyte, and Acid- Base Balances
  - Review of Physiological: Regulation of Fluid, Electrolyte, and Acid-Base Balances
  - Factors Affecting Fluid, Electrolyte, and Acid Base balances
  - Alterations in Fluid, Electrolyte, and Acid-Base Balances
  - Nursing interventions in fluid, Electrolyte, and Acid
  - Base Imbalances: assessment, types, and equipment, procedure and special considerations
  - Measuring fluid intake and output
  - Correcting fluid, Electrolyte Imbalance:

- Replacement of fluids: Oral and Parenteral - Venipuncture, regulating IV Flow rates, changing IV solutions and tubing, Changing IV dressing
- Administering Blood transfusion
- Restriction of fluids
- Psychosocial Needs
  - Concepts of Cultural Diversity, Stress and Adaptation, Self –concept, Sexuality, Spiritual Health, Coping with loss, death and grieving
  - Assessment of psychosocial needs
  - Nursing intervention for Psychosocial needs
  - Assist with coping and adaptation
  - Creating therapeutic environment
  - Recreational and diversional therapies

### **Module III**

#### **Administration of Medications**

- General
  - Principles/Considerations
  - Purpose of Medication
  - Principles: 5 rights, Special Considerations, Prescriptions, Safety in Administering Medications and Medication Errors
  - Drugs forms
  - Routes of administration
  - Storage and maintenance of drugs and Nurses responsibility
  - Responsibility
  - Broad classification of drugs
  - Therapeutic Effect, Side Effects, Toxic Effects, Idiosyncratic Reactions, Allergic Reactions, Drug Tolerance, Drug Interactions,
  - Factors influencing drug Actions-Systems of Drug Measurement: Metric System, Apothecary System, Household Measurements, and Solutions.
  - Converting Measurements, Unit: Conversion within one system, Conversion between system, Dosage Calculation,
  - Terminologies and abbreviations used in prescriptions of medication
- Oral Drugs Administration : Oral, Sublingual and Buccal: Equipment, procedure
- Parenteral
  - General principles: decontamination and disposal of syringes, needles,
  - Type of parenteral therapies
  - Types of syringes, needles, cannula, and infusion sets
  - Protection from Needlestick injuries: Giving Medications with a safety syringes
  - Routes of parenteral therapies
  - Intradermal: purpose, site, equipment, procedure, special considerations
  - Subcutaneous: purpose, site, equipment, procedure, special considerations
  - Intramuscular: purpose, site, equipment, procedure, special considerations
  - Intra Venous: purpose, site, equipment, site, equipment procedure, special considerations
  - Advanced techniques: epidural, intrathecal, intraosseous, intraperitoneal, intrapleural, intraarterial
  - Role of nurse
- Topical Administration:
  - Purposes, site, equipment, procedure, special considerations for
  - Application to Skin
  - Application to mucous membrane
  - Direct application of liquids-Gargle and swabbing the throat
  - Insertion of Drug into body cavity: Suppository/ medicated packing in rectum/vagina
  - Instillations:, Ear, Eye, Nasal, Bladder, Vaginal and Rectal

- Irrigations: Eye, Ear, Bladder, Vaginal and Rectal
- Spraying: Nose and throat
- Inhalation: Nasal, Oral, endotracheal / tracheal (steam, oxygen and medications)- purposes, types, equipment, procedure, special considerations
- Recording and reporting of medications administered

## **Module IV**

### **Meeting needs of perioperative patients**

- Definition and concept of perioperative Nursing
- Preoperative Phase
  - Preparation of patient for surgery
  - Intraoperative
  - Operation theatre Set up and environment
  - Role of nurse
- Postoperative phase
  - Recovery Unit
  - Post operative Unit
  - Postoperative care,
- Wounds: types, Classifications, wound Healing Process, Factors affecting Wound, Complications of Wound Healing
- Surgical asepsis
- Care of the wound: types, equipment , procedure and special considerations
  - Dressing, Suture Care,
  - Care of Drawings
  - Application of Bandages, Binders, Splints & Slings Heat and Cold Therapy

## **Module V**

### **Meeting special needs of the patient**

- Care of patients having alteration in
  - Temperature (hyper and hypothermia): Types, Assessment, Management
  - Sensorium (Unconsciousness): Assessment, Management
  - Urinary Elimination (retention and incontinence): Assessment, Management
  - Functioning of sensory organs: (Visual & hearing impairment)
  - Assessment of Self-Care ability
  - Communication Methods and special considerations
  - Mobility (physically challenged, cast), assessment of Self-Care ability: Communication methods and special considerations
  - Mental state (mentally challenged), assessment of Self-Care ability ;
  - Communication Methods and special considerations
  - Respiration (distress): types, Assessment
  - Comfort-(Pain)-Nature, Types, factors influencing Pain, coping Assessment management.
- Treatments related to gastrointestinal system; naso-gastric suction, gastric irrigation, gastric analysis

## **Module VI**

### **Care of terminally ill patient**

- Concepts of Loss, Grief, grieving Process
- Signs of clinical death
- Care of dying patient: special considerations
- Advance directives: euthanasia, will dying declaration, organ donation etc
- Medico-legal issues
- Care of dead body: equipment, procedure and care of Unit

- Autopsy
- Embalming

## Module VII

### Professional Nursing concepts and practices

- Conceptual and theoretical models of nursing practice: Introduction to models-health belief model, health promotion model etc
- Introduction to Theories in Nursing: Peplau's, Henderson's, Orem's Neuman's, Rogar's and Roy's.
- Linking theories with nursing process

## Module VIII

### Machinery, Equipment and linen

- Type: Disposables and reusable's- Linen, rubber goods, glass ware, metal, plastics, furniture machinery.
- Introduction:
  - Indent
  - Maintenance
  - Inventory

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination

# **B.Sc.(Hons.)Nursing-Second Semester**

## **INTRODUCTION TO PSYCHOLOGY**

**Course Code: NUR2203**

**Credit Unit-05**

**Course Description:** The course is designed to help the students to develop an understanding of the philosophy, objective, theories and process of nursing in various clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in Clinical settings.

### **Course Contents**

#### **Module I**

##### **Introduction:**

- History and origin of science of psychology
- Definitions & Scope of Psychology
- Relevance to nursing
- Methods of Psychology

#### **Module II**

##### **Biology of behavior**

- Body mind relationship modulation process in health and illness
- Genetics and behavior: Heredity and environment
- Brain and behavior: Nervous system,, Neurons and synapse,
- Association Cortex, Rt and Lt Hemispheres
- Psychology of Sensations
- Muscular and glandular controls of behavior
- Nature of behavior of an organism/Integrated responses

#### **Module III**

##### **Cognitive process**

- Attention: Types, determinants Duration & degree, alterations
- Perception : Meaning Principles, factors affecting Errors,
- Learning : Nature, Types Nature Factors influencing Development Theories and methods of memorizing and Forgetting
- Memory: meaning, types, nature, factors influencing, development theories and methods of memorizing and forgetting
- Thinking: types and levels, stages of development, Relationship with language and communication
- Intelligence: Meaning classification, uses, theories
- Aptitude: Concept, types, Individual differences and variability
- Psychometric assessments of cognitive processes
- Alterations in cognitive processes
- Applications

#### **Module IV**

##### **Motivation and Emotional Processes:**

- Motivation : Meaning, Concepts, Types, Theories, Motives and behavior, Conflict resolution
- Emotions & stress

- Emotion : Definition components, Changes in emotions, theories, emotional adjustments, emotions in health and illness
- Stress : stressors, cycle, effect, adaptation & coping
- Attitude: Meaning, nature, development, factors affecting,
- Behavior and attitudes
- Attitudinal change
- Psychometric assessments of emotions and attitudes
- Alterations in emotions
- Applications

## **Module V**

### **Personality**

- Definitions, topography, types, Theories
- Psychometric assessments of personality
- Alterations in personality
- Applications

## **Module VI**

### **Developmental Psychology**

- Psychology of people at different ages from infancy to old age
- Psychology of vulnerable individuals- challenged, women, sick, etc
- Psychology of groups

## **Module VII**

### **Mental hygiene and mental Health**

- Concepts of mental hygiene and mental health
- Characteristics of mentally healthy person
- Warning signs of poor mental health
- Promotive and preventive mental health-strategies and services
- Ego Defence mechanisms and implications
- Personal and social adjustments
- Guidance and counseling
- Role of nurse

## **Module VIII**

### **Psychological assessment & tests**

- Types, developments, Characteristics and Role of nurse Interpretations and Role of nurse in psychological assessment

### **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>EA</b>	<b>EE</b>
<b>Weightage(%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

## **B.Sc.(Hons.)Nursing-Second Semester INTRODUCTION TO MICROBIOLOGY**

**Course Code: NUR2204**

**Credit Unit-05**

**Course Description:** The course is designed to enable students to acquire understand fundamentals of Microbiology and identification of various micro-organisms. It also pre opportunities for practicing infection control measures in hospital and community settings...

### **Course Contents**

#### **Module I**

##### **Introduction**

- Importance and relevance to nursing
- Historical perspective
- Concepts and terminology
- Principles of microbiology

#### **Module II**

##### **General characteristics of Microbes**

- Structure and classification of Microbes
- Morphological types
- Size and form of bacteria
- Motility
- Colonization
- Growth and nutrition of microbes
  - Temperature
  - Moisture
  - Blood and body fluids
- Laboratory Method for Identification of Micro- organisms
- Staining techniques, Gram staining, Acid fast staining, Hanging drop preparation
- Culture; various Medias

#### **Module III**

##### **Infection control**

- Infection: Sources, portals of entry and exit, transmission
- Asepsis
- Disinfection; Types and methods
- Sterilization; Types and Methods
- Chemotherapy and antibiotics
- Standard safety measures
- Biomedical waste management
- Role of Nurse
- Hospital acquired infection
- Hospital infection control programme
- Protocols, collections of samples, preparation of report and status of rate of infection in the Unit/Hospital, nurse's accountability, continuing education etc.

#### **Module IV**

## Pathogenic organisms

- **Micro-organisms**
  - Cocci-gram positive and gram negative
  - Bacilli-gram positive and gram negative
  - Spirochaete
  - Mycoplasma
  - Rickettsiae
  - Chlamydiae
- Viruses
- Fungi- Superficial and Deep mycoses
- Parasites
- Rodents & vectors Characteristics, Source, portal of entry, transmission of infection Identification of disease producing micro-organisms, Collection, handling and transportation of various specimens

## Module V

### Immunity

- Immunity: Types, classification
- Antigen and antibody reaction
- Hypersensitivity – skin test
- Serological tests
- Immunoprophylaxis
  - Vaccines & sera – Types & Classification storage and handling's cold chain
  - Immunization for various diseases
  - Immunization schedule

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination

**INTRODUCTION TO COMPUTERS**

**Course Code: NUR2205**

**Credit Unit-04**

**Course Description:** The course is designed for students to develop basic understanding of use of computer and its applications in nursing.

**Course Contents**

**Module I**

**Introduction**

- Concepts of Computer
- Hardware and software; trends and technology
- Application of computer in nursing

**Module II**

- **Introduction to disk-operating system**
  - DOS
  - Windows (all version)
- **Introduction**
  - MS-Word
  - MS-Excel with pictorial presentation
  - MS-Access
  - MS-Power point

**Module III**

- Multimedia: types & uses
- Computer aided teaching & testing

**Module IV**

- Use of Internet and e-mail

**Module V**

- Statistical packages: types and their features

**Module VI**

- Hospital Management System: Types and uses

**Practical**

Clinical assignments to be done in Hospital/Unit/Ward.

- Practice in Unit/Hospital.
- Nursing Process record of patient
  - Simulated-1
  - Actual-1
- Role plays in simulated situations.
- Health Talk-1
- Nurses notes of presentation of the patient report of assigned patient-2/3.
- Lab practice.
- Measurement of vital signs of assigned patient.

- Simulated exercise on CPR maintain.
- Observation study-2
  - Department of Infection Control.
  - Department of CSSD.
- Collection of samples for culture.
- Clinical porting in infection control department and write report.
- Practice in Lab/Ward.

#### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

# **B.Sc.(Hons.)Nursing-Second Semester NURSING FOUNDATION I & II(PRACTICAL)**

**Course Code: NUR2206**

**Credit Unit-19**  
**(Nursing Foundation-I: 10 Credits)**  
**(Nursing Foundation-II: 09 Credits)**

**Course Description:** The course is designed to help the students to develop an understanding of the philosophy, objective, theories and process of nursing in various clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in Clinical settings.

## **Course Contents**

### **Skills**

#### **Hospital admission and discharge (III)**

- Admission
- Prepare Module for new patient
- Prepare admission bed
- Performs admission procedure
  - New patient
  - Transfer in
- Prepare patient records

#### **Discharge/Transfer out**

- Gives discharge counseling
- Perform discharge procedure (Planned discharge, LAMA and abscond, Referrals and transfers)
- Prepare records of discharge /transfer
- Dismantle, and disinfect Unit and equipment after discharge / transfer

#### **Perform assessment:**

- History taking, Nursing diagnosis, problem list, Prioritization, Goals & Expected Outcomes, selection of interventions.
- Write Nursing Care Plan
- Gives care as per the plan

#### **Communication**

- Use verbal and non verbal communication techniques

#### **Prepare a plan for patient teaching session**

#### **Write patient report**

- Changes- of shift reports, Transfer reports, Incident reports etc.
- Presents patient report

#### **Vital signs**

- Measure, Records and interpret alterations in body temperature pulse, respiration and blood pressure.

#### **Health assessment**

- Health history taking
- Perform assessment :
  - General
  - Body systems
- Use various methods of physical examination

- Inspection, Palpation, Percussion, Auscultation, Olfaction
- Identification of system wise deviations

### **Prepare Patient's Unit:**

- Prepare beds:
  - Open, closed, occupied, operation, amputation,
  - Cardiac, fracture, burn, Dividend, & Flowers bed
- Pain assessment and provision for comfort

### **Use comfort devices**

### **Hygienic care:**

- Oral Hygienic care:
- Baths and care of pressure points
- Hair wash, Pediculosis treatment

### **Feeding**

- Oral, Enteral, Naso/Orogastric, gastrostomy and Parenteral feeding
- Naso-gastric insertion, suction, and irrigation

### **Assisting patient in urinary elimination**

- Provides urinal/bed pan
- Condom drainage
- Perineal care.
- Catheterization
- Care of urinary drainage

### **Bladder irrigation**

### **Assisting bowel Elimination:**

- Insertion of Flatus tube
- Enemas
- Insertion of Suppository

### **Bowel wash**

### **Body Alignment and Mobility:**

- Range of motion exercises
- Positioning: Recumbent , Lateral (Rt/ Lt), Fowlers, Sims, Lithotomy, Prone, Trendelenburg position
- Assist patient in Moving, lifting, transferring , walking
- Restraints

### **Oxygen administration**

### **Suctioning: oropharyngeal, nasopharyngeal**

### **Chest physiotherapy and postural drainage**

### **Care of Chest drainage**

### **CPR- Basic life support**

### **Intravenous therapy**

### **Blood and blood component therapy**

### **Collect/assist for collection of specimens for investigations Urine, sputum, faeces, vomitus, blood and other body fluids**

### **Perform lab test:**

- Urine: sugar, albumin, acetone
- Blood: sugar (with strip/gluco-meter)

### **Hot and cold applications:**

Local and general Sitz bath

### **Communicating and assisting with self-care of visually & hearing impaired patients**

### **Communicating and assisting with self-care of mentally challenged / disturbed patients**

### **Recreational and diversional therapies**

### **Caring of patient with alteration in sensorium**

### **Infection control**

- Perform following procedures:
  - Hand washing techniques
  - (Simple, hand antisepsis and surgical antisepsis (scrub)
  - Prepare isolation Module In lab/ ward
  - Practice technique of wearing removing personal protective equipment(PPE)
  - Practice Standard safety precautions (Universal precautions)

### **Decontamination of equipment and Module**

- Surgical asepsis:
  - Sterilization
  - Handling sterilized equipment Calculate strengths of lotions,
  - Prepare lotions
- Care of articles

### **Pre and post operative care:**

- Skin preparations for surgery: Local
- Preparation of post operative Unit
- Pre & post operative monitoring, teaching and counseling
- Care of the wound.
- Dressings, Suture Care, care of Drainage, Application of Bandages, Binders, Splints & Slings
- Bandaging of various of body parts

### **Administration of medications**

- Administer Medications in different forms and routes
- Oral, Sublingual and Buccal
- Parenteral: Intradermal, Subcutaneous, Intramuscular etc.
- Assist with Intra Venous medications
- Drug measurements and dose calculations
- Preparation of lotions and solutions
- Administers topical applications
- Insertion of drug into body cavity: Suppository & medicated packing etc.
- Instillation of medicines and spray into Ear, Eye, Nose and throat
- Irrigations: Eye, Ear, Bladder, Vagina and Rectum
- Inhalations: Dry and moist

### **Care of dying patient**

- Caring and packing of dead body
- Counseling and supporting grieving relatives
- Terminal care of the Module

### **Examination Scheme:**

Components	NCP	OR	HE	CE	EPE
------------	-----	----	----	----	-----

<b>Weightage(%)</b>	<b>20</b>	<b>10</b>	<b>20</b>	<b>50</b>	<b>100</b>
---------------------	-----------	-----------	-----------	-----------	------------

**NCP- Nursing Care Plan, OR- Observation Report, HE- Health Education, CE-Clinical Evaluation,  
EPE- External Practical Examination**

## **INTRODUCTION TO SOCIOLOGY**

**Course Code: NUR2301**

**Credit Unit-05**

**Course Description:** This course is designed to introduce the concepts of sociology related to community and social institutions in India and its relationship with health, illness and nursing.

### **Course Contents**

#### **Module I**

##### **Introduction**

- Definition of Sociology
- Nature and scope of the discipline
- Importance and application of Sociology in Nursing

#### **Module II**

##### **Individual & Society**

- Society and Community
- Nature of society
- Difference between society and Community
- Process of Socialization and individualization
- Personal disorganization

#### **Module III**

##### **Culture**

- Nature of culture
- Evolution of culture
- Diversity and uniformity of culture
- Culture and socialization
- Transcultural society
- Influences on health and disease

#### **Module IV**

##### **Social groups and processes**

- The meaning and classification of groups
- Primary & Secondary Group
- In-group V/s. Out –group, Class Tribe, Caste
- Economic, Political, Religious groups, Mob, Crowd, Public and Audience Interaction & Social Processes
- Co-operation, Competition, Conflict
- Accommodation, Assimilation & Isolation

#### **Module V**

##### **Population**

- Society and population
- Population distribution in India Demographic characteristics

- Malthusian theory of Populations
- Population explosion in India and its impact on health status
- Family welfare programmes

## **Module VI**

### **Family and Marriage**

- Family-functions
- Types-joint, Nuclear, Blended and extended family: Characteristics
- The Modern Family-Changes, Problems-Dowry etc., Welfare Services
- Changes & legislations on family and marriage in India-marriage acts
- Marriage: Forms and Functions of Marriage
- Marriage and family problems in India
- Family, marriage and their influence on health and health practices

## **Module VII**

### **Social Stratification**

- Meaning & types of social stratification
- The Indian Caste System-origin & features
- Features of Caste in India Today
- Social Class system and status
- Social Mobility –Meaning & Types
- Race as a biological concept, criteria of racial classification
- Salient features of Primary races-Racism
- Influence of Class, Caste and Race on health and health practices

## **Module VIII**

### **Types of Communities in India (Rural, Urban and Regional)**

- Features of village community and Characteristics of Indian villages- Panchayat system, social dynamics
- Community Development project & planning
- Changes in Indian Rural Life
- Availability of health facilities in rural and its impact on health and health practices
- Urban – Community – features
- The growth of cities: Urbanisation and its impact on health and health practices
- Major Urban problems –Urban Slums
- Region: Problems and impact on Health

## **Module IX**

### **Social Change**

- Nature and process of social Change
- Factors influencing social change: cultural change, Cultural lags.
- Introduction to Theories of social change ; Linear, Cyclical, Marxian, Functional
- Role of nurse-Change agents

## **Module X**

### **Social organization and social system**

- Social organization : elements, types
- Democratic and authoritarian modes of participation,
- Voluntary associations

- Social system : Definition and Types of social system
- Role and Status as structural elements of social system
- Inter-relationship of institutions

## **Module XI**

### **Social Control**

- Nature and process of social control
- Political, Legal, Religious, Educational, Economics, Industrial and Technological systems, Norms & Values-Folkways & Mores Customs,
- Laws and fashion
- Role of nurse

## **Module XII**

### **Social Problems**

- Social disorganization
- Control & planning: poverty, housing, illiteracy, food supplies, prostitution, rights of women & children, vulnerable groups: Elderly, handicapped, minority groups and other marginalized groups, child labour, child abuse, delinquency and crime, substance abuse, HIV/AIDS.
- Social Welfare programmes in India
- Role of Nurse

### **Examination Scheme:**

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

### **Text & References:**

# **B.Sc.(Hons.)Nursing-Third Semester MEDICAL SURGICAL NURSING-I**

**Course Code: NUR2302**

**Credit Unit-09**

**Course Description:** The purpose of this course is to acquire knowledge and develop in caring for patients with medical and surgical disorders in verities of health care settings and at home.

## **Course Contents**

### **Module I**

#### **Introduction**

- Introduction to medical surgical nursing- Evolution and trends of medical and surgical nursing
- Review of Concepts of Health and illness, Disease-concepts, causations, classification International (ICD-10 or later version), Acute illness, chronic illness and teruinal illness, stages of illness
- Review of concepts of comprehensive nursing care in medical surgical conditions basedof classification diseases on nursing process.
- Role of Nurse, patient and family in care of adult patient
- Role and responsibilities of a nurse in medical surgical settings:
  - Outpatient department.
  - In-patient unit
  - Intensive care unit
  - Home and Community settings
- Introduction to Medical Surgical asepsis
  - Inflammation and Infection
  - Immunity
  - Wound healing
- Care of Surgical Patient Pre –operative
  - Intra operative
  - Post Operative

### **Module II**

#### **Common signs and symptoms and management**

- Fluid and electrolyte imbalance.
- Vomiting
- Dyspnea and cough, respiratory obstruction
- Fever
- Shock
- Unconsciousness, Syncope
- Pain
- Incontinence
- Edema
- Age related problems-geriatric

### **Module III**

#### **Nursing management of patients (adults including elderly) with respiratory problems**

- Review of anatomy and physiology of respiratory system,
- Nursing Assessment-History and physical assessment
- Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical surgical, dietetics & nursing management of adults including elder with-
  - Upper Respiratory tract infections.

- Bronchitis
- Asthma
- Emphysema
- Empyema
- Atelectasis
- Chronic Obstructive Pulmonary Diseases (COPD)
- Bronchiectasis
- Pneumonia Pulmonary tuberculosis
- Lung abscess
- Pleural effusion
- Cysts and Tumours
- Chest injuries
- Respiratory arrest and insufficiency
- Pulmonary embolism
- Special therapies, alternative therapies
- Nursing procedures
- Drugs used in treatment of respiratory disorders

#### **Module IV**

##### **Nursing management of patient (adults including elderly) with disorders of digestive system**

- Review of anatomy and physiology of digestive system
- Nursing Assessment-History and physical assessment
- Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management
- Disorders of
  - Oral cavity-lips, gums, tongue, salivary glands and teeth
  - Oesophagus -inflammation, stricture, obstruction, bleeding and tumours
  - Stomach and duodenum-hiatus hernia, gastritis, peptic and duodenal ulcer bleeding, tumours, pyloric stenosis
  - Small intestinal disorders-inflammation and infection, enteritis, malabsorption, obstruction, tumour and perforation
  - Large intestinal disorders- Colitis, inflammation and infection, obstruction and tumour and lump Hernias
  - Appendix-inflammation, mass, abscess, rupture
  - Anal & Rectum; hemorrhoids, fissures, Fistulas
  - Peritonitis/ acute abdomen
  - Pancreas: Inflammation, cyst, abscess and tumours
  - Liver: Inflammation, cyst, abscess, cirrhosis, portal hypertension, hepatic failure, tumours
  - Gall Bladder: Inflammation, obstruction, stones and tumours
  - Special therapies, alternative therapies
  - Nursing procedures
  - Drugs used in treatment of disorders of digestive system

#### **Module V**

##### **Nursing management of patient (adults including elderly) with blood and cardio vascular problems**

- Review of anatomy and physiology of blood and cardiovascular system
- Nursing Assessment-History and Physical assessment
- Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of –
- Vascular system

- Hypertension, Hypotension
- Artherosclerosis
- Raynaud's disease
- Aneurism and Perpherial vascular disorders

## Heart

- Coronary artery diseases
  - Ischemic Heart Disease
  - Coronary atherosclerosis
  - Angina pectoris
  - Myocardial infarction
- Valvular disorders of the heart
  - Congential and acquired
  - Rheumatic Heart diseases
- Endocarditis, Pericarditis Myocarditis
- Cardio Myopathies
- Cardiac dysrhythmias, Heart Block
- Congestive cardiac failure: Corpulmonale, Pulmonary edema, cardiogenic shock, cardiac tamponade
- Cardiac emergencies and arrest
- Cardio Pulmonary Resuscitation (CPR)
- Blood
  - Anaemias
  - Polycythemia
  - Bleeding disorder; clotting factor defects and platelets defects
  - Thalassemia
  - Leukemias
  - Leukopenias and agranulocytosis
  - Lymphomas
  - Myelomas
- Special therapies
  - Blood transfusion safety checks, procedure and requirements, management of adverse transfusion reaction, records for blood transfusion.
  - Management and counseling of blood donors, phlebotomy procedure, and post donation management. Blood bank functioning and hospital transfusion committee. Bio-safety and waste management in relation to blood transfusion.
  - Role of a nurse in Organ donation, retrieval and banking
  - Alternative therapies
  - Nursing procedures
  - Drugs used in treatment of blood and cardio vascular disorders

## Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination

**B.Sc.(Hons.)Nursing-Third Semester**  
**PHARMACOLOGY, PATHOLOGY AND GENETICS**

**Course Code: NUR2303**

**Credit Unit-08**

**Part A: Pharmacology**

**Course Description:** This course is designed to enable students to acquire understanding of Pharmacodynamics, pharmacokinetics, principles of therapeutics and nursing implications

**Course Contents**

**Module I**

**Introduction to pharmacology**

- Definition
- Sources
- Terminology used
- Types : Classification
- Pharmacodynamics: Actions, Therapeutic
- Adverse, toxic
- Pharmacokinetics: Absorption, distribution, metabolism, interaction, excretion.
- Review: Routes and principles of administration of drugs
- Indian Pharmacopocia: Legal issues
- Rational use of drugs
- Principles of therapeutics

**Module II**

**Chemotherapy**

- Pharmacology of commonly used;
  - Penicillin
  - Cephalosporins.
  - Aminoglycosides
  - Macrolide & Broad Spectrum Antibiotics
  - Sulfonamides Quinolones.
  - Antiamoebic
  - Antimalarials
  - Anthelmintics
  - Antiscabies agents
  - Antiviral & anti- fungal agents
  - Antitubercular drugs
  - Anti leprosy drugs
  - Anticancer drugs
  - Immuno-suppressants

Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

**Module III**

**Pharmacology of commonly used antiseptics, disinfectants and insecticides**

- Antiseptics: Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

- Disinfectants
- Insecticides

## **Module IV**

### **Drugs acting on G.I. System**

- Pharmacology of commonly used-
  - Antiemetics,
  - Emetics
  - Purgatives
  - Antacids
  - Cholinergic
  - Anticholinergics
  - Fluid and electrolyte therapy
  - Anti diarrhoeals
  - Histamines
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

## **Module V**

### **Drugs used on Respiratory System**

- Pharmacology of commonly used-
  - Ant asthmatics
  - Mucolytics
  - Decongestants
  - Expectorates
  - Antitussives
  - Bronchodilators
  - Broncho constrictors
  - Anti Histamines
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

## **Module VI**

### **Drugs used on Urinary System**

- Pharmacology of commonly used-
  - Diuretics and antidiuretics
  - Urinary antiseptics
  - Cholinergic and anticholinergics
  - Acidifiers and alkalinizes
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

## **Module VII**

### **Miscellaneous**

- Drugs used in de-addiction
- Drugs used in CPR and emergency
- Vitamins and minerals
- Immunosuppressant
- Antidotes
- Antivenom
- Vaccines and sera

## **Module VIII**

### **Drugs used on skin and mucous membranes**

- Topical application for skin, eye, ear, nose and buccal cavity, Antipruritics
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

## **Module IX**

### **Drugs acting on Nervous system**

- Basic & applied pharmacology of commonly used:
- Analgesics and Anaesthetics
  - Analgesics
  - Non steroidal anti-inflammatory (NSAID) drugs
  - Antipyretics
  - Hypnotics and Sedatives
  - Opioids
  - Non-Opioids
  - Tranquilizers
  - General & local anesthetics
  - Gases: oxygen, nitrous oxide, carbon-dioxide
  - Cholinergic and anti-cholinergics:
  - Muscle relaxants
  - Major tranquilizers
  - Anti-psychotics
  - Antidepressants
  - Anticonvulsants
  - Adrenergics
  - Noradrenergics
  - Mood stabilizers
  - Acetylcholine
  - Stimulants
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

## **Module X**

### **Cardiovascular drugs**

- Haematinics
- Cardio tonics,
- Anti anginals
- Anti-hypertensive & Vasodilators
- Anti- arrhythmics
- Plasma expanders
- Coagulants & antieoagulants
- Antiplatelets & thrombolytics
- Hypolipidemics
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

## **Module XI**

### **Describe Drugs used for hormonal disorders and supplementation, contraception and medical termination of pregnancy**

- Insulins & Oral hypoglycemics
- Thyroid supplements and suppressants
- Steroids, Anabolics

- Uterine stimulants and relaxants
- Oral contraceptives
- Other estrogen-progesterone preparations
- Corticotrophins & Gonadotropines
- Adrenaline
- Prostaglandins
- Calcitonins
- Calcium salts
- Calcium regulators
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

## **Module XII**

- **Introduction to Drugs used in alternative system of medicine.**
- Ayurveda, Homeopathy, Unani and Siddha etc

# **Part B: PATHOLOGY**

## **Course Description:**

This course is designed to enable students to acquire knowledge of Pathology of various disease conditions and apply this knowledge in practice of nursing.

## **Course Contents**

### **ModuleI**

#### **Introduction**

- Importance of the study of pathology
- Definition of terms
- Methods and techniques
- Cellular and Tissue changes
- Infiltration and regeneration
- Inflammations and infections
- Wound healing
- Vascular changes
- Cellular growth, Neoplasms
- Normal and Cancer cell
- Benign and Malignant growths
- In situ carcinoma
- Disturbances of fluid and electrolyte imbalance

### **ModuleII**

#### **Special pathology**

- Pathological changes in disease conditions of various systems:
- Respiratory tract
  - Tuberculosis, Bronchitis, Pleural effusion and pneumonia, Lung abscess, emphysema, bronchiectasis
  - Bronchial asthma, Chronic obstructive Pulmonary Disease & tumours
- Cardio-vascular system
  - Pericardial effusion
  - Pericardial effusion
  - Rheumatic heart disease

- Infective endocarditic, atherosclerosis
- Ischemia, infarction & aneurysm
- Gastro Intestinal Tract
  - Peptic ulcer, typhoid
  - Carcinoma of GI tract-buccal, Esophageal,
  - Gastric & intestinal
- Liver, Gall bladder & pancreas
  - Hepatitis, Chronic liver abscess, cirrhosis
  - Tumours of liver, gall bladder and pancreas,
  - Cholecystitis
- Kidneys & Urinary tract
  - Glomerulonephritis, pyelonephritis
  - Calculi, renal failure, renal carcinoma & cystitis.
- Male genital systems
  - Cryptorchidism, testicular atrophy
  - Prostatic hyperplasia, carcinoma Penis & prostate
- Female genital system
  - Fibroids
  - Carcinoma cervix and Endometrium
  - Vesicular mole, choriocarcinoma
  - Ectopic gestation
  - Ovarian cyst & tumours
- Cancer Breast
- Central Nervous system
  - Hydrocephalus, Meningitis, encephalitis,
  - Vascular disorders, thrombosis, embolism
  - Stroke, paraplegia, quadriplegia
  - Tumours, meningiomas-Gliomas
- Metastatic tumor
- Skeletal system
  - Bone healing, osteoporosis, osteomyelitis
  - Arthritis & tumours

### **ModuleIII**

#### **Clinical pathology**

- Various blood and bone marrow tests in assessment and monitoring of disease conditions
  - Hemoglobin
  - RBC, White cell & platelet counts
  - Bleeding time, clotting time and prothrombin time
  - Blood grouping and cross matching
  - Blood chemistry
  - Blood culture
  - Serological and immunological tests
  - Other blood tests
  - Examination of Bone marrow
- Methods of collection of blood specimen for various clinical pathology, biochemistry, microbiology tests, inference and normal values

### **ModuleIV**

#### **Examination of body cavity fluids, transudates and exudates**

- The laboratory tests used in CSF analysis
- Examination of other body cavity fluids, transudates and exudates – sputum, wound discharge etc

- Analysis of gastric and duodenal Contents
- Analysis of semen-sperm count, motility and morphology and their importance in infertility.
- Methods of collections of CSF and other cavity fluids specimen for various clinical pathology, biochemistry, microbiology test, inference and normal values

## **Module V**

### **Urine and faeces**

- Urine
  - Physical characteristics
  - Analysis
  - Culture and Sensitivity
- Faeces
  - Characteristics
  - Stool examination: occult blood, ova, parasite and cyst, reducing substance etc.
- Method of collection for various tests, inference and normal values

## **Section B: GENETICS**

### **Course Description:**

This course is designed to enable students to acquire understanding of Genetics, its role in causation and management of defects and diseases.

### **Course Contents**

#### **Module I**

##### **Introduction**

- Practical application of genetics in Nursing
- Impact of genetic condition on families
- Review of cellular division mitosis and meiosis.
- Characteristics and structure of genes
- Chromosomes – sex determination
- Chromosomal aberrations Patterns of inheritance
  - Mendelian theory of inheritance
  - Multiple allots and blood groups
  - Sex linked inheritance
  - Mechanism of inheritance
- Errors in transmission (Mutation)

#### **Module II**

##### **Maternal, prenatal and genetic influences on development of defects and diseases**

- Conditions affecting the mother ; genetic and infections
- Consanguinity atopy
- Prenatal nutrition and food allergies.
- Maternal Age
- Maternal drug therapy
- Prenatal testing and diagnosis
- Effect of Radiation, drugs and chemicals
- Infertility
- Spontaneous abortion

- Neural Tube Defects and the role of folic acid in lowering the risks
- Down syndrome (Trisomy 21)

### Module III

#### Genetic testing in neonates and children

- Screening for
  - Congenital abnormalities
  - Developmental delay
  - Dimorphisms

### Module VI

#### Genetic conditions of adolescents and adults

- Cancer genetics – Familial Cancer
- Inborn errors of metabolism
- Blood group alleles and hematological disorder
- Genetic haemochromatosis
- Huntington's disease
- Mental illness

### Module V

#### Services related to Genetics

- Genetic testing
- Human genome project
- Gene therapy
- The Eugenics movement
- Genetic Counseling
- Legal and Ethical issues
- Role of nurse

#### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

#### Note:

Pharmacology, Pathology and Genetics Question paper will consist of Section A of Pharmacology with 38 marks, Section B of Pathology of 25 marks and Genetics with 12 marks.

## **B.Sc.(Hons.)Nursing-Third Semester COMMUNITY HEALTH NURSING-I**

**Course Code: NUR2304**

**Credit Unit-04**

**Course description-** This course is designed for students to appreciate the principles of promotion and maintenance of health.

### **Module I**

#### **Introduction**

- Community health nursing
- Definitions, concepts and dimensions of health
- Promotion of health
- Maintenance of health

### **Module II**

#### **Determinants of health**

- Eugenics
- Environment
  - Physical: Air, light ventilation, Water, Housing, Sanitation: disposal of waste, disposal of dead bodies
  - Forestation, Noise, Climate, Communication:
  - Infrastructure facilities and Linkages
  - Acts regulating the environment: National Pollution control board
  - Bacterial & viral: Agents, host carriers and immunity
  - Arthropods and Rodents
- Food hygiene: Production, Preservation, Purchase, Preparation, Consumption
- Acts regulating food adulteration act, Drugs and cosmetic act
- Socio-cultural
  - Customs, taboos
  - Marriage system
  - Family structure
  - Status of special groups; Females, Children, Elderly, challenged groups and Sick persons
- Life Style
- Hygiene
- Physical Activity
  - Recreation and sleep
  - Sexual life
  - Spiritual life philosophy
  - Self reliance
  - Dietary pattern
  - Education
  - Occupation
- Financial Management
  - Income
  - Budget
  - Purchasing power
  - Security
- Climate Change and its Impact on Health
- Air Pollution and its impact on Health
- Heat Wave and its impact on Health

### Module III

#### Demography

- Definition, concept and scope
- Method of collection, analysis, and interpretation of demographic data
- Demographics rate and ratios

### Module IV

#### Population and its control

- Population explosion and its impact on social, economic development of individual, society and country
- Population control
  - Overall development: Women empowerment, social, economic educational development Limiting family size:
  - Promotion of small family
  - norm
  - Methods; spacing (natural, biological, chemical, mechanical methods etc)
  - Terminal: surgical methods
  - Emergency contraception

#### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

**MEDICAL SURGICAL NURSING-II**

**Course Code: NUR2401**

**Credit Unit-09**

**Course Description:** The purpose of this course is to acquire knowledge and develop proficiency in caring for patients with medical and surgical and disorder in verities of health care settings and at home.

**Course Contents**

**Module I**

**Nursing management of patient (adults including elderly) with disorders of genito-urinary problems**

- Review of anatomy and physiology of genitor-urinary system
- Nursing Assessment-History and physical assessment
- Etiology, Pathophysiology, clinical manifestations diagnosis, treatment modalities medical, surgical, dietetics & nursing management of:
  - Nephritis
  - Nephrotic syndrome
  - Nephrosis
  - Renal calculus
  - Tumours
  - Acute renal failure
  - Chronic renal failure
  - End stage renal disease
  - Dialysis, renal transplant
  - Congential disorders, urinary infections
  - Benign prostate hypertrophy.
  - Disorders of ureter, urinary bladder and urethra-inflammation infection, stricture obstruction, tumour, prostrate
- Special therapies, alternative therapies
- Nursing procedures Drugs used in treatment of genitourinary disorders

**Module II**

**Nursing management of dis-orders of male (adults including elderly) reproductive system**

- Review of anatomy and physiology of male reproductive system
- Nursing Assessment –History and physical assessment
- Etiology, Pathophysiology, clinical manifestation diagnosis, treatment modalities medical, surgical dietetics & nursing management of disorders of male reproductive system
  - Congential malformation; cryptorchidism
  - Hypospadiasis, Epispadiasis
  - Infections
  - Testis and adjacent structures
  - Penis
  - Prostate: inflammation, infection, hypertrophy, tumour

- Sexual Dysfunction
- Infertility
- Contraception
- Breast; gynecomastia, tumour
- Climacteric changes
- Special therapies, alternative therapies
- Nursing procedures Drugs used in treatment of disorders of male reproductive system

### **Module III**

#### **Nursing management of patient (adults including elderly) with disorders of endocrine system**

- Review of anatomy and physiology of endocrine system
- Nursing Assessment- History and physical assessment
- Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities medical, surgical, dietetics & nursing management of-
  - Disorders of Thyroid and Parathyroid
  - Diabetes mellitus
  - Diabetes insipidus
  - Adrenal tumour
  - Pituitary disorders,
- Special therapies, alternative therapies
- Nursing procedures Drugs used in treatment of disorders of endocrine system

### **Module IV**

#### **Nursing management of patient (adults including elderly) with disorders of Integumentary system**

- Review of anatomy and physiology of Skin and its appendages
- Nursing Assessment, History and physical assessment.
- Etiology, Pathophysiology, Clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management.
- Disorders of skin and its appendages.
  - Lesions and abrasions
  - Infection and infestations; Dermatitis
  - Dermatomes; infectious and Non infectious “inflammatory dermatoses”
  - Acne Vulgaris
  - Allergies and Eczema
  - Psoriasis
  - Malignant melanoma
  - Alopecia
- Special therapies, alternative therapies
- Nursing procedures Drugs used in treatment of disorders of Integumentary system

### **Module V**

#### **Nursing management of patient (adults including elderly) with musculoskeletal problems**

- Review of anatomy and physiology of musculoskeletal system
- Nursing Assessment- History and physical assessment
- Etiology, Pathophysiology, Clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of
- Disorders of-

- Muscles, Ligaments and Joints- inflammation, infection , trauma
- Bones-inflammation, infection dislocation, fracture , tumour and trauma
- Osteomalacia and osteoporosis
- Arthritis
- Congenital deformities
- Spinal column-defects and deformities, Tumor, prolapsed inter vertebral discs, pott's spine
- Paget's disease
- Amputation
- Prosthesis
- Transplant & replacement surgeries
- Rehabilitation.
- Special therapies, alternative therapies
- Nursing procedures
- Drugs used in treatment of disorders of musculoskeletal system

## **ModuleVI**

### **Nursing management of patient (adults including elderly) with Immunological problems**

- Review of Immune system
- Nursing Assessment –History and physical assessment
- Etiology, Path physiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of-
  - Immunodeficiency disorder
    - Primary immuno deficiency.
    - Phagocyte dysfunction
    - B-cell and T-cell deficiencies
  - Secondary immunodeficiency Syndrome (AIDS)
- Incidence of HIV & AIDS
- Epidemiology
- Transmission –Prevention of Transmission
- Standard Safety precautions
- Role of Nurse; Counseling
- Health education and home care consideration.
- National AIDS Control Program-NACO, various national and international agencies
- Infection control program
- Rehabilitation.
- Special therapies, alternative therapies
- Nursing procedures Drugs used in treatment of disorders of immunological system

## **ModuleVII**

### **Nursing management of patient (adults including elderly) with communicable disease**

- Overview of infectious disease, the infectious process
- Nursing Assessment-History and physical assessment
- Epidemiology, infections process, clinical manifestations, diagnosis, treatment, prevention and dietetics. Control and Eradication of common Communication Diseases-
  - Tuberculosis
  - Diarrhoeal diseases
  - Hepatitis A-E
  - Herpes
  - Chickenpox
  - Smallpox
  - Typhoid
  - Meningitis

- Gas gangrene
  - Leprosy.
  - Dengue
  - Plague
  - Malaria
  - Diphtheria
  - Pertussis
  - Poliomyelitis
  - Measles
  - Mumps
  - Influenza
  - Tetanus
  - Yellow fever
  - Filariasis
  - HIV, AIDS
- Reproductive Tract Infections
  - Special Infection control measures: Notifications, Isolation, Quarantine, Immunization, Infectious Disease Hospitals
  - Special therapies, alternative therapies
  - Nursing procedures.
  - Drugs used in treatment of communicable diseases.

## **ModuleVIII**

### **Peroperative nursing:**

- Organization and Physical set up of the Operation Theatre (OT):
  - Classifications
  - O.T.DESIGN
  - Staffing
  - Members of the OT team.
  - Duties and responsibilities of nurse in O.T.
  - Principles of Health and operating room attire.
  - Instruments,
  - Sutures and suture materials
  - Equipments
  - O.T. tables and sets for common surgical Procedures
  - Positions and draping for common surgical procedures
  - Scrubbing procedures
  - Gowning and gloving
  - Preparation of O.T. Sets
  - Monitoring the patient during surgical procedures
- Maintenance of therapeutic environment in O.T.
- Standard Safety measures
  - Infection control: fumigation, disinfection and sterilization
  - Biomedical waste management.
  - Prevention of accidents and hazards in O.T.
- Anesthesia
  - Types
  - Methods of administration
  - Effects and Stages
  - Equipments

- Drugs
- Cardio Pulmonary Resuscitation (CPR)
- Pain management techniques
- Legal Aspects

#### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

## **B.Sc.(Hons.)Nursing-Fourth Semester COMMUNITY HEALTH NURSING-II**

**Course Code: NUR2402**

**Credit Unit-04**

**Course description-** This course is designed for students to appreciate the principle of promotion, maintenance of health and to participate in the delivery of community health nursing.

### **Module III**

#### **Epidemiology**

- Definition, concept, aims, scope, uses and terminology used in epidemiology
- Dynamics of disease transmission: epidemiological triad
- Morbidity and mortality: measurements
- Levels of prevention
- Methods of epidemiology of
  - Descriptive
  - Analytical: Epidemic investigation
  - Experimental

### **Module IV**

#### **Epidemiology and nursing management of common Communicable Diseases**

- Respiratory infections
  - Small Pox
  - Chicken Pox
  - Measles
  - Influenza
  - Rubella
  - ARI's & Pneumonia
  - Mumps
  - Diphtheria
  - Whooping cough
  - Meningococcal meningitis
  - Tuberculosis
  - SARS
- Intestinal Infections
  - Poliomyelitis
  - Viral Hepatitis
  - Cholera
  - Diarrheas diseases
  - Typhoid Fever
  - Food poisoning
  - Amoebiasis
  - Hook worm infection
  - Ascariasis
  - Dracunculiasis

- Arthropod infections
  - Dengue
  - Malaria
  - Filariasis
  - Zoonoses
- **Viral**
  - Rabies
  - Yellow fever
  - Japanese encephalitis
  - Kyasnur Forest Disease
  - Chikungunya
- Bacterial
  - Brucellosis
  - Plague
  - Human Salmonellosis
  - Anthrax
  - Leptospirosis
- Rickettsial diseases
  - Rickettsial Zoonoses
  - Scrub typhus
  - Murine typhus
  - Tick typhus
  - Q fever
- Parasitic zoonoses
  - Taeniasis
  - Hydatid disease
  - Leishmaniasis
- Surface infection
  - Trachoma
  - Tetanus
  - Leprosy
  - STD & RTI
  - Yaws
  - HIV/AIDS
- And any other
- Food Born Diseases

## **Module V**

### **Epidemiology and nursing management of common Non –communicable diseases:**

- Malnutrition: under nutrition, over nutrition, nutritional deficiencies
- Anaemia
- Hypertension
- Stroke
- Rheumatic
- Heart Disease
- Coronary Heart Disease
- Cancer
- Diabetes mellitus
- Blindness
- Accidents

- Mental illness
- Obesity
- Iodine Deficiency
- Fluorosis
- Epilepsy

#### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

**COMMUNICATION AND EDUCATIONAL TECHNOLOGY**

**Course Code: NUR2403**

**Credit Unit-08**

**Course Description:** This course is designed to help the students acquire an understanding of the principles and methods of communications and teaching. Its help to develop skill in communicating effectively, maintaining effective interpersonal relations teaching , individuals and groups in clinical, community health and educational settings.

**Module I**

**Review of Communication Process**

- Process, elements and channel
- Facilitators
- Barriers and methods of overcoming
- Techniques

**ModuleII**

**Interpersonal relations**

- Purpose & types
- Phases
- Barriers & methods of overcoming
- Johari Window

**Module III**

**Human relations**

- Understanding self
- Social behavior, motivation, social attitudes
- Individual and groups
- Groups & individual
- Human relations in context of nursing
- Group dynamics
- Team work

**Module IV**

**Guidance & counseling**

- Definitions
- Purpose, scope and need
- Basic principles
- Organization of counseling services
- Types of counseling approaches
- Role and the preparation of counselor

- Issues for counseling in nursing: students and practitioners
- Counseling process – steps & techniques, tools of counselor
- Managing disciplinary problems
- Management of crisis & referral

## **Module V**

### **Principles of education & teaching learning process**

- Education: meaning, philosophy, aims, functions & principles
- Nature and characteristics of learning,
- Principles and maxims of teaching
- Formulating objectives; general and specific
- Lesson planning
- Classroom management

## **Module VI**

### **Methods of teaching.**

- Lecture, demonstration, group discussion, seminar, symposium, panel discussion, role play, project, field, trip, workshop, exhibition, programmed instruction, computer assisted learning, micro teaching, problem based learning, Self instructional module and simulation etc.
- Clinical teaching methods: case method, nursing round & reports, bedside clinic, conference (individual & group) and process recording

## **Module VII**

### **Educational media**

- Purpose & types & A.V. Aids, principles and sources etc.
- Graphic aids: chalk board, chart, graph, poster, flash cards, flannel graph, bulletin, cartoon
- Three dimensional aids; objects, specimens, models, puppets
- Printed aids: pamphlets & leaflets
- Projected aids; slides, overhead projector, Films, TV, VCR,/VCD, camera, microscope, LCD
- Audio aids: tape recorder, public address system
- Computer

## **Module VIII**

### **Assessment**

- Purpose & scope of evaluation & assessment
- Criteria for selection of assessment techniques and methods
- Assessments of knowledge: essay type questions, short answer questions (SAQ), Multiple choice questions (MCQ)
- Assessment of skills; observation checklist, practical exam, Viva, Objective structured clinical examination (OSCE)
- Assessment of Attitudes: Attitude scales

## Module IX

### Information, Education & communication for health (IEC)

- Health behavior & health education
- Planning for health education
- Health education with individuals groups & communities.
- Communicating health messages.
- Methods & media for communicating health messages
- Using mass media

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination

## **B.Sc.(Hons.)Nursing-Fourth Semester**

### **MEDICAL SURGICAL NURSING–I& II(PRACTICAL)**

**Course Code: NUR2404**

**Credit Unit-30(15+15)  
(MSN,CL-I&CL-II)**

#### **General Medical Ward (Respiratory, GI, Endocrine, Renal, Hematology)**

**Duration in weeks: 06**

- Assessment of the patient
  - Taking history
  - Perform general and specific physical examination.
  - Identify alterations and deviations
- Practice medical surgical asepsis-Standard safety measures
- Administer medications
  - Oral, IV, IM, Subcutaneous
- IV therapy
  - IV canulation
  - Maintenance and monitoring
- Oxygen therapy by different methods
- Nebulization
- Chest physiotherapy
- Naso gastric feeding
- Assist in common diagnostic procedures
- Perform /Assist in the therapeutic procedures
- Blood and component therapy
- Throat Suctioning
- Collect specimens for common investigations.
- Maintain elimination
  - Catheterisation
  - Bowel wash
  - Enema
  - Urinary drainage
- Maintain Intake, Output and documentation
- Counsel and teach related to specific Disease conditions

#### **General Surgical Ward (GI, Urinary, CTVS)**

**Duration in weeks: 06**

- Practice medical surgical asepsis-Standard safety measures
- Pre operative preparation of patients
- Post operative care-Receiving pt, assessment, monitoring, care
- Care of wounds and drainage
- Suture removal
- Ambulation and exercise
- Naso gastric aspiration
- Care of chest drainage
- Ostomy care
  - Gastrostomy

- Colostomy
- Enterostomy
- Blood and component therapy
- Practice universal precautions

### **Cardiology Ward**

#### **Duration in weeks: 02**

- Physical examination of the cardio vascular system Recording and interpreting ECG
- Monitoring of patients.
- Preparation and assisting in non-invasive and invasive diagnostic procedures.
- Administer cardiac drugs
- Cardio pulmonary Resuscitation
- Teach patients and families
- Practice medical and surgical asepsis-Standard safety measures

### **Skin and Communicable Diseases Ward**

#### **Duration in weeks: 01**

- Assessment of patients with skin disorders
- Assist in diagnostic and therapeutic procedures
- Administer topical medication.
- Practice medical surgical asepsis-Standard safety measures
- Use of personal Protective equipment (PPE)
- Give Medicated baths
- Counseling HIV positive patients
- Teach prevention of infectious diseases

### **Orthopaedic Ward**

#### **Duration in weeks: 02**

- Assessment of orthopedic patients
- Assist in application of plaster cast and removal of cast
- Apply skin traction buck's extension traction.
- Assist in application and removal of prosthesis
- Physiotherapy-Range of motion exercise (ROM), muscle strengthening exercises
- Crutch maneuvering technique.
- Activities of daily living
- Ambulation
- Teach and counsel patients and families

### **Operation Theatre**

#### **Duration in weeks: 06**

- Scrubbing, gowning, gloving
- Identify instruments, suturing materials for common operations
- Disinfection , Carbolization, fumigation
- Preparation of instrument sets for common operations
- Sterilization of sharps and other instruments
- Prepare the OT table depending upon the operation
- Positioning and monitoring of patients
- Endotracheal intubation
- Assisting in minor and major operations.
- Handling specimens

- Disposal of waste as per the guidelines

### **Practical**

- Clinical assessment to be done in the Hospital/Unit/Ward/OT.
- Plan and give to 3-4 assigned patients (Area wise).
- Nursing care plan-1 (Area wise).
- Nursing care shidy/presentation-1 (Area wise).
- Drug presentation-1.
- Maintain drug book (Area wise).
- Maintain practical record book.
- Assist as a circulatory nurse in:
  - Major cases – 10
  - Minor cases – 10
- Assist as a scrub nurse in:
  - Major cases – 10
  - Minor cases - 5

### **Examination Scheme:**

<b>Components</b>	<b>NCP</b>	<b>CS/CP</b>	<b>DP/MDB</b>	<b>HE</b>	<b>CE</b>	<b>EPE</b>
<b>Weightage(%)</b>	<b>10</b>	<b>20</b>	<b>10</b>	<b>10</b>	<b>50</b>	<b>100</b>

**NCP- Nursing Care Plan, CS- Case Study, CP- Case Presentation, DP- Drug Presentation, MDB- Maintain Drug Book, HE- Health Education, CE-Clinical Evaluation, EPE- External Practical Examination**

### MEDICAL SURGICAL NURSING (SPECIALITY)-III

**Course Code: NUR2501**

**Credit Unit-05**

**Course description-** The purpose of this course is to acquire knowledge and develop proficiency in caring for patients with medical and surgical disorder in varieties of health care settings and at home.

#### Course Contents

##### Module I

##### Nursing management of patient with neurological disorders

- Review of anatomy and physiology of the neurological system
- Nursing Assessment–History and Physical and neurological assessment and Glasgow coma scale
- Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical& surgical, nursing management of neurological disorders.
- Congenital malformations
- Headache
- Head Injuries
- Spinal Injuries
  - Paraplegia
  - Hemiplegia
  - Quadriplegia
- Spinal cord compression-herniation of intervertebral disc
- Tumors of the brain & spinal cord
- Intra cranial and cerebral aneurysms abscess.
- Infections:
  - Meningitis, Encephalitis, Brain abscess, neurocyst.
- Movement disorders
  - Chorea
  - Seizures
  - Epilepsies
- Cerebro Vascular Accidents (CVA)
- Cranial, Spinal Neuropathies-Bell's palsy, trigeminal neuralgia
- Peripheral Neuropathies; Guillain - Barr's Syndrome
- Myasthenia gravis
- Multiple sclerosis
- Degenerative diseases
  - Delirium
  - Dementia
  - Alzheimer's disease
  - Parkinson's disease
- Management of unconscious patients and patients with stroke
- Role of the nurse in communicating with patient having neurological deficit

- Rehabilitation of patients with neurological deficit
- Role of nurse in long stay facility (institutions) and at home
- Special therapies
- Nursing procedures
- Drugs used in treatment of neurological disorders

## **Module II**

### **Nursing management of patients with disorders of female reproductive system**

- Review of anatomy and physiology of the female reproductive system
- Nursing Assessment-History and physical assessment
- Breast Self Examination
- Etiology, path physiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical, nursing management of disorder of female reproductive system
- Congenital abnormalities of female reproductive system
- Sexuality and Reproductive Health
- Sexual Health Assessment
- Menstrual Disorders; Dysmenorrhea, Amenorrhea, Premenstrual syndrome.
- Abnormal uterine bleeding:
  - Menorrhagia, Metrorrhagia
- Pelvic Inflammatory Disease
- Ovarian and fallopian tube disorder: infections, cysts, tumors
- Uterine and cervical disorders; Endometriosis, polyps, Fibroids, Cervical and uterine tumors
- Uterine displacement, Cystocele/Urethrocele Rectocele.
- Vaginal disorders: Infections and Discharges, Fistulas
- Vaginal disorders: Infections, Cysts, Tumours.
- Diseases of breast: Deformities, Infections, Cysts and Tumors
- Menopause and Hormonal Replacement Therapy
- Infertility
- Contraception: Types, Methods, Risk and effectiveness
- Spacing Methods
  - Barrier methods, Intra Uterine Devices, Hormonal, Post Connectional Methods, etc
  - Terminal methods
  - Sterilization
- Emergency Contraception methods
- Abortion –Natural, Medical and surgical abortion –MTP Act
- Toxic Shock Syndrome
- Injuries and Trauma; Sexual violence
- Special therapies
- Nursing procedures
- Drugs used in treatment of gynecological disorders
- National family welfare programme

## **Module III**

### **Nursing care of the elderly**

- Nursing Assessment-History and Physical assessment
- Ageing.
- Demography: Myths and realities
- Concepts and theories of ageing

- Cognitive Aspects of Ageing
- Normal biological ageing
- Age related body systems changes
- Psychosocial Aspects of Aging
- Medications and elderly
- Stress & coping in older adults
- Common Health Problems & Nursing Management;
- Cardiovascular, Respirator, Musculoskeletal ,
- Endocrine, genitor-urinary, gastrointestinal
- Neurological, Skin and other Sensory organs
  - Psychosocial and Sexual
  - Abuse of elderly
- Role of nurse for care of elderly: ambulation, nutritional, communicational, Psychosocial and spiritual.
- Role of nurse for caregivers of elderly.
- Role of family and formal and non formal caregivers,
- Use of aids and prosthesis (hearing aids, dentures)
- Legal & Ethical Issues
- Provisions and programmes for elderly; privileges, Community programs and health services;
- Home and institutional care

## **Module IV**

### **Nursing management of patient in critical care Units**

- Nursing Assessment-History and physical assessment
- Classification
- Principles of critical care nursing
- Organization; physical setup, Policies, staffing norms,
- Protocols, equipment and supplies
- Special equipment; ventilators, cardiac monitors, defibrillators
- Resuscitation equipments
- Infection Control Protocols.
- Nursing management of critically ill patient;
- Monitoring of critically ill patient
- CPR-Advance Cardiac Life support
- Treatments and procedures.
- Transitional care
- Ethical and legal Aspects
- Communication with patient and family
- Intensive care records
- Crisis Intervention
- Death and Dying-coping with
- Drugs used in critical care Unit

## **ModuleV**

### **Nursing management of patients (adjusts including elderly) with Occupational and Industrial disorders**

- Nursing Assessment-History and Physical assessment
- Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical, nursing management of occupational and industrial health disorders

- Role of nurse
- Special therapies, alternative therapies
- Nursing procedures
- Drugs used in treatment
- Occupational and Industrial disorders
- Nursing management

#### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

## **B.Sc.(Hons.)Nursing-Fifth Semester CHILD HEALTH NURSING**

**Course Code: NUR2502**

**Credit Unit-08**

**Course description-** This course is designed for developing and understanding of the modern approach to child- care, identification, prevention and nursing management of common problems of neonates and children.

### **Course Contents**

#### **Module I**

Introduction Modern concepts of childcare

- Internationally accepted rights of the Child
- National policy and legislations in relation to child health and welfare
- National programs related to child health and welfare
- Agencies related to welfare services to the children
- Changing trends in hospital care, preventive, promotive and curative aspects of child health.
- Child morbidity and mortality rates.
- Differences between and adult and child
- Hospital environment for a sick child
- Impact of hospitalization on the child and family
- Grief and bereavement
- The role of a child health nurse in caring for hospitalized child
- Principles of pre and post operative care of infants and children
- Child health nursing procedures.

#### **Module II**

##### **The healthy child**

- Principles of growth and development
- Factors affecting growth & development
- Growth and development from birth to adolescence
- The needs of normal children through the stages of developmental and parental guidance
- Nutritional needs of children & infants; breast feeding, exclusive breast supplementary/artificial feeding and weaning ,
- Baby friendly hospital concept
- Accidents : causes and prevention
- Value of play and selection of play material
- Preventive immunization, immunization programme and cold chain
- Preventive pediatrics
- Care of under five & under five clinics/well baby clinics

#### **Module III**

##### **Nursing care of neonate**

- Nursing care of a normal newborn /Essential newborn care
- Neonatal resuscitation
- Nursing management of a low birth weight baby.
- Kangaroo mother care

- Nursing management of common neonatal disorders Organization of neonatal unit.
- Identification & nursing management of common congenital malformations.

## Module IV

### Integrated management of neonatal and childhood illnesses (IMNCI)

## Module V

### Nursing management in common childhood diseases

- Nutritional deficiency disorders
- Respiratory disorders and infections
- Gastrointestinal infections, infestations and congenital disorders
- Cardio vascular problem: congenital defects and rheumatic fever, rheumatic heart disease
- Genito-urinary disorders: acute glomerulo nephritis, Nephrotic syndrome, Wilms' tumor, infection and congenital disorder.
- Neurological infections and disorders: convulsions, epilepsy, meningitis, hydro cephalus, spina-bifida.
- Hematological disorders: Anemias, thalassemia, ITP, Leukemia, hemophilia.
- Endocrine disorders: juvenile Diabetes Mellitus
- Orthopedic disorders: club feet, hip dislocation and fracture
- Disorders of skin, eye, and ears
- Common communicable diseases in children, their identification in hospital and home and prevention.
- Child health emergencies: poisoning foreign bodies, hemorrhage, burns and drowning.
- Nursing care of infant children with HIV/AIDS.

## Module VI

### Management of behavioral & social problems in children

- Management of common behavioral disorders
- Management of common psychiatric problems
- Management of challenged children: Mentally, Physically, & Socially challenged
- Welfare services for challenged children in India.
- Child guidance clinics

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

## **B.Sc. (Hons.)Nursing- Fifth Semester**

### **NURSING RESEARCH AND STATISTICS**

**Course Code: NUR2505**

**Credit Unit-04**

**Course Description-** This course is designed to enable students to develop an understanding of basic concepts of research, research process and statistics. It is further, structured to conduct/participate in need based research studies in various settings and utilize the research findings to provide quality nursing care. The hours for practical will be utilized for conducting Individual /group research project.

#### **Course Contents**

##### **Module I**

##### **Research and research process**

- Introduction and need for nursing research
- Definition of Research & nursing research
- Step of scientific method
- Characteristics of good research
- Step of Research process-overview

##### **Module II**

##### **Research Problem/Question**

- Identification of problem area
- Problem statement
- Criteria of a good research problem
- Writing objective

##### **Module III**

##### **Review of Literature**

- Location
- Sources
- On line search: Cinhal, Cocharne etc
- Purposes
- Method of review

##### **Module IV**

##### **Research Approaches and Designs**

- Historical, survey and experimental
- Qualitative and Quantitative designs

##### **Module V**

##### **Sampling and Data Collection**

- Definition of Population, Sample, Sampling criteria, Factors influencing sampling process, types of sampling techniques.
- Data-why, what, from whom, when and where to collect
- Data collection methods and instruments:
  - Methods of data collection
  - Question interviewing

- Observations, record analysis and measurement
- Types of instruments
- Validity & variability of the Instrument
- Pilot study
- Data collection procedure

#### **Analysis of data:**

- Compilation, Tabulation, classification, summarization, presentation, interpretation of data

### **Module VI**

#### **Research and research process**

- Definition, use of statistics, scales of measurement.
- Frequency distribution and graphical presentation of data
- Mean, Median, Mode, Standard deviation
- Normal Probability and tests of significance
- Co-efficient of correlation.
- Statistical packages and its applications

### **Module VII**

#### **Introduction to statistics**

- Definition, use of statistics, scales of measurement
- Frequency distribution and graphical presentation of data
- Mean, Median, Mode, Standard deviation
- Normal Probability and tests of significance
- Co-efficient of correlation
- Statistical packages and its application

### **Module VIII**

#### **Communication and utilization of Research**

- Communication of research :
  - Verbal findings
  - Writing research
  - Writing research report
  - Critical review of published research
  - Utilization of research finding

#### **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>EA</b>	<b>EE</b>
<b>Weightage(%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

#### **Text & References:**

**B.Sc.(Hons.)Nursing-Fifth Semester  
CHILD HEALTH NURSING (PRACTICAL)**

**Course Code: NUR2504**

**Credit Unit-12**

**Course Contents**

**PAEDIATRIC MEDICINE WARD**

**Duration in weeks: 03**

- Taking pediatric History
- Physical examination and assessment of children
- Administer of oral, I/M & IV medicine./fluid
- Calculation of fluid requirements
- Prepare different strength of I.V. fluids
- Apply restraints
- Administer O<sub>2</sub> inhalation by different methods
- Give baby bath
- Feed children by Katori spoon, etc.
- Collect specimens for common investigations
- Assist with common diagnostic procedures
- Teach mothers/parents
  - Malnutrition
  - Oral rehydration therapy
  - Feeding & Weaning
  - Immunization schedule
  - Play therapy
- Specific Disease conditions

**PAEDIATRIC SURGERY WARD**

**Duration in weeks: 03**

- Calculate prepare and administer I/V fluids
- Do bowel wash
- Care for ostomies:
  - Colostomy Irrigation
  - Ureterostomy
  - Gastrostomy
  - Enterostomy
- Urinary catheterization and drainage
- Feeding
  - Naso-gastric
  - Jejunostomy
- Care of surgical wounds
  - Dressing
  - Suture removal

**PAEDITRIC OPD / IMMUNIZATION ROOM**

**Duration in weeks: 01**

- Assessment of children
- Health assessment
- Developmental assessment
- Anthropometric assessment

- Immunization
- Health/Nutritional Education

## **PAEDRIC MEDICINE AND SURGERY ICU**

### **Duration in weeks: 1+1**

- Care of a baby Incubator/warmer
- Care of a child on ventilator
- End tracheal suction
- Chest physiotherapy
- Administer fluids with infusion pump
- Total parenteral nutrition
- Phototherapy
- Monitoring of babies
- Cardio Pulmonary resuscitation

## **Internship**

### **PEDIATRIC MEDICINE WARD/ICU**

- Integrated Practice

### **PEDIATRIC SURGERY WARD /ICU**

- Integrated Practice

### **NICU**

- Integrated Practice

## **Practical**

Clinical assignment to be done in the Pediatric Ward.

- Give care to assigned pediatric patient-3 (Area wise).
- Nursing Care Plan-1 (Area wise).
- Case Study/Presentation-1 (Area wise).
- Health Talk-1.
- Development Study-1.
- Observation Report (PICU)-1.

### **Examination Scheme:**

<b>Components</b>	<b>NCP</b>	<b>CS/CP</b>	<b>DS</b>	<b>OR</b>	<b>HE</b>	<b>CE</b>	<b>EPE</b>
<b>Weightage(%)</b>	<b>10</b>	<b>20</b>	<b>05</b>	<b>05</b>	<b>10</b>	<b>50</b>	<b>100</b>

**NCP- Nursing Care Plan, CS- Case Study, CP- Case Presentation, DS- Developmental Study, OR- Observation Report, HE- Health Education, CE-Clinical Evaluation, EPE- External Practical Examination**

**MEDICAL SURGICAL NURSING (SPECIALITY) -IV**

**Course Code: NUR2601**

**Credit Unit-05**

**Course description-** The purpose of this course is to acquire knowledge and develop proficiency in caring for patients with medical and surgical disorder in varieties of health care settings and at home.

**Course Contents**

**Module I**

**Nursing management of patient with disorder of Ear Nose and Throat**

- Review of anatomy and physiology of the Ear Nose and Throat –
- Nursing Assessment-History and physical assessment
- Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of Ear Nose and Throat disorders:
  - External ear: deformities otalgia, foreign bodies, and tumors
  - Middle Ear- Impacted wax, Tympanic membrane perforation, otitis media , otosclerosis, mastoiditis, tumors
  - Inner ear-Meniere’s Disease, labyrinthitis, ototoxicity, tumors
  - Upper airway infections- Common cold, sinusitis, ethinitis, rhinitis, pharyngitis, tonsilit’s and adenoiditis, peritonsillar abscess, laryngitis
- Upper respiratory airway- epistaxis,
- Nasal obstruction, laryngeal obstruction, cancer of the larynx
- Cancer of the oral cavity
- Speech defects and speech therapy
- Deafness-  
Prevention, control and rehabilitation
- Hearing Aids, implanted hearing devices
- Special therapies
- Nursing procedures
- Drugs used in treatment of disorders of Ear Nose and Throat. Role of nurse Communicating with hearing impaired and muteness.

**Module II**

**Nursing management of patient with disorders of eye**

- Review of anatomy and physiology of the eye-
- Nursing Assessment-History and physical assessment
- Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of eye disorders:
  - Refractive errors
  - Eyelids-infections, tumors and deformities
  - Conjunctiva-inflammation and infection, bleeding
  - Cornea-inflammation and infection

- Lens, Cataracts
- Glaucoma
- Disorder of the uveal tract,
- Ocular tumors
- Disorders of posterior chamber and retina: Retinal and vitreous problems
- Retinal detachment.
- Ocular emergencies and their prevention
- Blindness
- National blindness control program
  - Eye Banking
  - Eye prostheses and Rehabilitation
- Role of a nurse-Communication with visually impaired patient, Eye camps
- Special therapies
- Nursing procedures
- Drugs used in treatment of disorders of eye

### **ModuleIII**

#### **Nursing management of patients with Burns, reconstructive and cosmetic surgery**

- Review of anatomy and physiology of the skin and connective tissues and various deformities
- Nursing Assessment-History and Physical assessment and Assessment of burns and fluid and electrolyte loss
- Etiology, Classification, Pathophysiology, clinical manifestations, diagnosis's, treatment modalities and medical & surgical Nursing management of Burns and Re-constructive and Cosmetic surgery;
- Types of Re-constructive and Cosmetic surgery; for burns, congenital deformities, injuries and cosmetic purposes
- Role of Nurse
- Legal aspects
- Rehabilitation
- Special therapies
- Psycho social aspects
- Nursing procedures
- Drugs used in treatment of Burns, reconstructive and cosmetic surgery

### **ModuleIV**

#### **Nursing management of patients with oncological conditions**

- Structure & characteristics of normal & cancer cells
- Nursing Assessment-History and Physical Assessment
- Prevention Screening, Early detection, Warning signs of cancer
- Epidemiology, Etiology, Classification

Pathophysiology, Staging, clinical manifestations, diagnosis, treatment modalities and Medical, Surgical and Nursing management of oncological conditions.

- Common malignancies of various body systems; Oral, larynx, lung, Stomach and Colon, Liver, Leukemias and lymphomas, Breast, Cervix, Ovary, Uterus, Sarcoma, Brain, Renal, Bladder, Prostate etc.
- Oncological emergencies
- Modalities of treatment
  - Immunotherapy
  - Chemotherapy
  - Radiotherapy

- Surgical interventions
- Stem cell and Bone marrow transplants
- Gene therapy
- Other forms of treatment
- Psychosocial aspect of cancer.
- Rehabilitation
- Palliative care; Symptom and pain Management, Nutritional support
- Home care
- Hospice care
- Stomal Therapy
- Special therapies
  - Psycho social aspects
- Nursing procedures

## **Module V**

### **Nursing management of patient in EMERGENCY & DISASTER situations**

- Concept and principles of Disaster Nursing
- Causes and Types of Disaster: Natural and Man- made
  - Earthquakes, Floods, Epidemics, Cyclones
  - Fire, Explosion, Accidents
  - Violence, Terrorism: biochemical War
- Policies related to emergency /disaster management ; International, national, state, institutional
- Disaster preparedness:
- Team, Guidelines, protocols, Equipment's Resources
- Coordination and involvement of; Community, various govt. departments, non-Govt. organizations and International agencies
- Role of nurse: working
- Legal Aspect of Disaster Nursing
- Impact on Health and after effects; Post Traumatic Stress Disorder
- Rehabilitation:Physical psychosocial, Financial, Relocation
- **Emergency Nursing**
- Concept, priorities, principles and Scope of emergency nursing
- Organization of emergency services: physical setup, staffing, equipment and supplies, protocols, Concepts of triage of and role of triage nurse
- Coordination and involvement of different departments and facilities
- Nursing Assessment-History and Physical assessment
- Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and Medical, Surgical and Nursing management of patient with medical and surgical Emergency
- Principles of emergency management
- Common Emergencies
- Respiratory Emergencies
- Cardiac Emergencies
- Shock and Hemorrhage
- Pain
- Poly-Trauma, Road accidents, Crush injuries, Wound
- Bites
- Poisoning; Food, Gas, Drugs, & chemical poisoning
- Seizures
- Thermal Emergencies; Heat stroke & Cold injuries
- Pediatric Emergencies

- Psychiatric Emergencies
- Obstetric Emergencies
- Violence, Abuse, Sexual assault
- Cardio Pulmonary Resuscitation
- Crisis Intervention
- Role of the Nurse; Communication and Interpersonal relations.
- Medico-Legal Aspects

#### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

## **B.Sc.(Hons.)Nursing- Sixth Semester MIDWIFERY AND OBSTETRICAL NURSING-I**

**Course Code: NUR2607**

**Credit Unit-04**

**Course Description-** This course is designed for students to appreciate the concept and principles of midwifery and obstetrical nursing. It helps them to acquire knowledge and skill in rendering nursing care to normal and high risk pregnant women during antenatal, natal and post natal period in hospital and community settings. It also develops skills in managing normal and high risk neonates and participates in family welfare programme.

### **Course Contents**

#### **Module I**

##### **Introduction to midwifery and obstetrical Nursing**

- Introduction to concepts of midwifery and obstetrical Nursing
- Trends in midwifery and obstetrical nursing
- Historical perspectives and current trends
  - Legal and ethical aspects
  - Pre –conception care and preparing for parenthood
  - National policy and legislation in relation to maternal health and welfare
  - Maternal morbidity, mortality and perinatal rates
  - Prenatal, morbidity and mortality rates

#### **Module II**

##### **Review of anatomy and physiology of female reproductive system and foetal development**

- Female pelvis-general description of the bones, joints of the pelvis, ligaments planes, diameters of the true pelvis, important landmarks, variations in pelvis shape,
- Female organs of reproduction-external genitalia, internal genital organs and their anatomical Relations, musculature – blood supply, nerves, lymphatics, pelvic, cellular tissue, pelvic peritoneum.
- Physiology of menstrual cycle
- Human sexuality
- Foetal development
  - Conception
  - Review of fertilization, implantation (embedding of the ovum), development of the embryo and placenta at term-functions, abnormalities, the foetal sac, amniotic fluid, the umbilical cord,
  - Foetal circulation, foetal skull, bones, sutures and measurements
- Review of Genetics

#### **Module III**

##### **Assessment and management of pregnancy (ante-natal)**

- Normal pregnancy
- Physiological changes during pregnancy.
  - Reproductive system
  - Cardio vascular system
  - Respiratory system
  - Urinary system
  - Gastro intestinal system
  - Metabolic changes

- Skeletal changes
- Skin changes
- Endocrine system
- Psychological changes
- Discomforts of pregnancy
- Diagnosis of pregnancy
  - Signs
  - Different diagnosis
  - Confirmatory tests
- Anti-natal care
  - Objectives
  - Assessment
    - History and physical examination
    - Antenatal Examination
    - Signs of previous child-birth
  - Relationship of fetus to uterus and pelvis: lie, Attitude, presentation Position
  - Per vaginal examination.
- Screening and assessment for high risk;
- Risk approach
- History and physical Examination
- Modalities of diagnosis: Invasive & Non-Invasive, ultrasonics, cardio tomography, NST, CST,
- Antenatal preparation
  - Antenatal counseling
  - Antenatal exercises
  - Diet
  - Substance use
  - Education for child-birth
  - Husband and families
  - Preparation for safe-confinement
  - Prevention from radiation
- Psycho-social and cultural aspects of pregnancy
  - Adjustment to pregnancy
  - Unwed mother
  - Single parent
  - Teenage pregnancy
  - Sexual violence
- Adoption

## **Module IV**

### **Assessment and management of intra-natal period**

- Physiology of labour, mechanism of labor
- Management of labour.
  - First stage
  - Signs and symptoms of onset of labour, normal and abnormal –
  - Duration
  - Preparation
  - Labour room
  - Women
  - Assessment and observation of women in labour, partogram- maternal and foetal monitoring
  - Active management of labour,
  - Induction on labour
  - Pain relief and comfort in labour

- Second stage
- Signs and symptoms; normal and abnormal
- Duration
- Conduct of delivery; Principles and techniques
- Episiotomy (only if required)
- Receiving the new born
- Neonatal resuscitation: initial steps and subsequent resuscitation
- Care of umbilical cord
- Immediate assessment including screening for congenital anomalies
- Identification
- Bonding
- Initiate feeding
- Screening and transportation of the neonate
- Third stage
  - Signs and symptoms; normal and abnormal
  - Duration
  - Method of placental expulsion
  - Management; Principles and techniques
  - Examination of the placenta
  - Examination of perineum
- Maintaining records and reports
- Fourth Stage

## **Module V**

### **Assessment and management of women during post natal period**

- Normal puerperium; Physiology Duration
- Postnatal assessment and management
  - Promoting physical and emotional well-being
  - Lactation management
  - Immunization
  - Family dynamics after child-birth.
- Family welfare services; method counseling
- Follow-up
- Records and reports

## **Module VI**

### **Assessment and management of normal neonates**

- Normal Neonate:
  - Physiological adaptation,
  - Initial & Daily assessment
  - Essential newborn care; Thermal control,
  - Breast feeding , prevention of infections
- Immunization
- Minor disorder of newborn and its management
- Level of Neonatal care (level, I, II, & III)
- At primary, secondary and tertiary levels
- Maintenance of Reports and Records

## **Module VII**

### **Pharmaco -therapeutics in obstetrics**

- Indication, dosage, action, contra indication and side effects of drugs
- Effect of drugs on pregnancy labour & puerperium

- Nursing responsibilities in the administration of drug in Obstetrics –oxytocins, antihypertensive, diuretics, troglodytic agents, anti –consultants;
- Analgesics and anesthetics in obstetrics
- Effects of maternal medication on foetus and neonate

## Module VIII

### Abnormalities during the post natal periods

- Assessment and management of woman with postnatal complications
  - Puerperial infections, breast engorgement& infections, UTI, thrombo-Embolic disorders, post-partum haemorrhage, Eclampsia and subinvolution,
  - Psychological complications
    - Post partum blues
    - Post partum depression
    - Post partum psychosis

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

### Text & References:

## **B.Sc.(Hons.)Nursing-Sixth Semester**

### **MENTAL HEALTH NURSING**

**Course Code: NUR2603**

**Credit Unit-08**

**Course description-** This course is designed for developing an understanding of the modern approach mental health, identification, prevention and nursing management of common Mental health problems with special emphasis on therapeutic interventions for individuals, family and community.

#### **Course Contents**

##### **Module I**

###### **Introduction**

- Perspectives of Mental Health and Mental Health nursing: evolution of mental Health services, treatments and nursing practices.
- Prevalence and incidence of mental health problems and disorders.
- Mental Health Act
- National Mental Health policy vis a vis National Health Policy
- National Mental Health Programme
- Mental health team
- Nature and scope of mental health nursing
- Role and functions of mental health nurse in various settings and factors affecting the level of nursing practice
- Concepts of normal and abnormal behavior

##### **Module II**

###### **Principles and Concepts of Mental Health Nursing**

- Definition: mental health nursing and terminology used
- Classification of mental disorders: ICD
- Review of personality development, defense mechanisms
- Maladaptive behavior of individuals and group: stress, crisis and disaster (s)
- Etiology: bio-psycho-social factors
- Psychopathology of mental disorders: review of structure and function of brain, limbic system and abnormal neurotransmission
- Principles of Mental health Nursing
- Standard of Mental health Nursing practice
- Conceptual models and the role of nurse:
  - Existential Model
  - Psycho-analytical models
  - Behavioral model
  - Interpersonal model

##### **Module III**

###### **Assessment of mental health status**

- History taking
- Mental status examination
- Mini mental status examination
- Neurological examination: Review
- Investigations: Related Blood chemistry, EEG, CT & MRI

- Psychological tests
- Role and responsibilities of nurse

## **Module IV**

### **Therapeutic communication and nurse-patient relationship**

- Therapeutic communication: Types, techniques, characteristics
- Types of relationship,
- Ethics and responsibilities
- Elements of nurse patient contract
- Review of technique of IPR- Johari Window
- Goals, phases, tasks, therapeutic techniques
- Therapeutic impasse and its intervention

## **Module V**

### **Treatment modalities and therapies used in mental disorders**

- Psycho Pharmacology
- Psychological therapies: Therapeutic community, psychotherapy-Individual: psycho-analytical, cognitive and supportive, family, Group, Behavioral, Play, Psycho-drama, Music, Dance, Recreational and Light therapy, Relaxation therapies: Yoga, Meditation, bio feedback
- Alternative system of medicine
- Occupational therapy
- Physical Therapy : electro convulsive therapy
- Geriatric considerations
- Role of nurse in above therapies

## **Module VI**

### **Nursing management of patient with Schizophrenia, and other psychotic disorders**

- Classification: ICD
- Etiology, psycho-pathology, types, clinical manifestations, diagnosis
- Nursing Assessment-History, physical and mental assessment
- Treatment modalities and nursing management of patients with schizophrenia and other psychotic disorders
- Geriatric considerations
- Follow-up and home care and rehabilitation

## **Module VII**

### **Nursing management of patient with mood disorders**

- Mood disorders: Bipolar affective disorder, Mania depression and dysthymia etc
- Etiology, psycho-pathology, clinical manifestations, diagnosis,
- Nursing Assessment –History, Physical and mental assessment
- Treatment modalities and nursing management of patients with mood disorders
- Geriatric considerations
- Follow up and home care and rehabilitation

## **Module VIII**

### **Nursing management of patient with neurotic, stress related and somatization disorders**

- Anxiety disorder, Phobias, Dissociation and Conversion disorder Obsessive , compulsive disorder, somatoform disorders, Post traumatic stress disorder
- Etiology, psycho-pathology, clinical manifestations, diagnosis
- Nursing Assessment-History, Physical and mental assessment

- Treatment modalities and nursing management of patients with neurotic, stress related and somatization disorders
- Geriatric considerations
- Follow up and home care and rehabilitation

## **Module IX**

### **Nursing management of patient with Substance use disorders**

- Commonly used psychotropic substance: Classification, forms, routes, action, intoxication and withdrawal
- Etiology of dependence: tolerance, physical dependence, withdrawal syndrome, diagnosis,
- Nursing Assessment –History, Physical, mental assessment and drug assay
- Treatment (detoxification, ant abuse and narcotic antagonist therapy and harm reduction ) and nursing management of patients with substance use disorders
- Geriatric considerations
- Follow-up and home care and rehabilitation

## **Module X**

### **Nursing management of patient with personality, Sexual and Eating disorders**

- Classification of disorders
- Etiology, psycho-pathology, clinical manifestations, diagnosis,
- Nursing Assessment –History, Physical and mental assessment
- Treatment modalities and nursing management of patients with personality, Sexual and Eating disorders
- Geriatric considerations
- Follow up and home care and rehabilitation

## **Module XI**

### **Nursing management of childhood and adolescent disorders including mental deficiency**

- Classification
- Etiology, psycho-pathology, characteristics , diagnosis
- Nursing Assessment –History, Physical and mental and IQ assessment
- Treatment modalities and nursing management of childhood disorder including mental deficiency
- Follow-up and home care and rehabilitation

## **Module XII**

### **Nursing management of organic brain disorders**

- Classification: ICD
- Etiology, psycho-pathology, clinical features diagnosis, and Differential diagnosis (parkinsons and alzheimers )
- Nursing Assessment –History, Physical, mental and neurological assessment
- Treatment modalities and nursing management of organic brain disorders
- Geriatric considerations
- Follow up and home care and rehabilitation

## **MODULE XIII**

### **Psychiatric Emergencies and Carry out crisis intervention**

- Types of psychiatric emergencies and the management
- Stress adaptation Model: stress and stressor, coping, resources and mechanism
- Grief: Theories of grieving process, principles, techniques of counseling
- Type of crisis
- Crisis Intervention: principles, Techniques and process
- Geriatric considerations

- Role and responsibilities of nurse

## Module XIV

### Legal Issues in Mental Health Nursing

- The Mental Health Act 1987: Act, Sections, Articles and their implications etc.
- Indian Lunacy Act. 1912
- Rights of mentally ill clients
- Forensic psychiatric
- Acts related to narcotic and psychotropic substances and illegal drug trafficking
- Admission and discharge procedures
- Role and responsibilities of nurse

## Module XV

### Community Mental Health Nursing

- Development of Community Mental Services:
- National Mental Health Programme
- Institutionalization Versus Deinstitutionalization
- Model of preventive psychiatry: Levels of prevention
- Mental Health Services available at the primary, secondary, tertiary levels including rehabilitation and Role of nurse
- Mental Health Agencies: Government and voluntary, National and International
- Mental health nursing issues for special populations: Children, Adolescence, Women, Elderly, Victims of violence and abuse, Handicapped, HIV/AIDS etc.

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

## **B.Sc. (Hons.)Nursing-Sixth Semester**

### **MEDICAL SURGICAL NURSING –III & IV (PRACTICAL)**

**Course Code: NUR2604**

**Credit Unit-12 (6+6)**

#### **Course Contents**

##### **ENT**

###### **Duration in Weeks: 01**

- Perform examination of ear, nose and throat
- Assist with diagnostic procedures
- Assist with therapeutic procedures
- Instillation of drops
- Perform/assist with irrigations.
- Apply ear bandage
- Perform tracheotomy care
- Teach patients and families
- Maintain drug book

##### **OPHTHAMOLOGY**

###### **Duration in Weeks: 01**

- Perform examination of eye
- Assist with diagnostic procedures
- Assist with therapeutic procedures
- Perform/assist with irrigations.
- Apply eye bandage
- Apply eye drops/ointments
- Assist with foreign body removal.
- Teach patients and families
- Maintain drug book

##### **NEUROLOGY**

###### **Duration in Weeks: 02**

- Perform Neurological Examination
- Use Glasgow coma scale
- Assist with diagnostic procedures
- Assist with therapeutic procedures
- Teach patients & families
- Participate in rehabilitation program

##### **GYNECOLOGY WARD**

###### **Duration in Weeks: 01**

- Assist with gynecological Examination
- Assist with diagnostic procedures

- Assist with therapeutic procedures
- Teach patients families
- Teaching self-Breast Examination
- Assist with PAP smear collection
- Maintain drug book

## **BURNS UNIT**

### **Duration in Weeks: 01**

- Assessment of the burns patient
  - Percentage of burns
  - Degree of burns
- Fluid & electrolyte replacement therapy
  - Assess
  - Calculate
  - Replace
  - Record intake/out put
- Care of Burn wounds
  - Bathing
  - Dressing
- Perform active & passive examination
- Practice medical & surgical asepsis
- Counsel and teach patients and families
- Participate in rehabilitation program

## **ONCOLOGY UNIT**

### **Duration in Weeks: 01**

- Screen for common cancers-TNM Classification
- Assist with diagnostic procedures
  - Biopsies
  - Pep smear
  - Bone-marrow aspiration
- Breast examination
- Assist with therapeutic procedures
- Participates in various modalities of treatment
  - Chemotherapy
  - Radiotherapy
  - Pain management
  - Stomalththerapy
  - Hormonal therapy
  - Immuno therapy
  - Gene therapy
  - Alternative therapy
- Participate in palliative care
- Counsel and teach patients and families
  - Self-Breast Examination
  - Warning signs
- Participate in rehabilitation program

## **CRITICAL CARE UNIT**

### **Duration in Weeks: 02**

- Monitoring of patients in ICU

- Maintain flow sheet
- Care of patient on ventilators
- Perform Endotracheal suction
- Demonstrates use of ventilators, cardiac monitors etc,
- Collect specimens and interprets ABG analysis
- Assist with arterial Puncture
- Maintain CVP line
- Pulse oximetry
- CPR-ALS
- Defibrillators
- Pace makers
- Bag-mask ventilation
- Emergency tray/trolley-Crash Cart
- Administration of drugs
  - Infusion pump
  - Epidural
  - Intra thecal
  - Intracardiac
- Total parenteral therapy
- Chest physiotherapy
- Perform active & passive exercise
- Counsel the patient and family in dealing with grieving and bereavement

## **CAUALTY / EMERGENCY**

### **Duration in Weeks: 01**

- Practice ‘triage’
- Assist with assessment, examination , investigations & their interpretations, in emergency and disaster situations
- Assist in documentations
- Assist in legal procedures in emergency unit
- Participate in managing crowd
- Counsel patients and families in grief and bereavement

### **Examination Scheme:**

<b>Components</b>	<b>NCP</b>	<b>CS/CP</b>	<b>MDB</b>	<b>OR</b>	<b>HE</b>	<b>CE</b>	<b>EPE</b>
<b>Weightage(%)</b>	<b>10</b>	<b>20</b>	<b>05</b>	<b>05</b>	<b>10</b>	<b>50</b>	<b>100</b>

**NCP- Nursing Care Plan, CS- Case Study, CP- Case Presentation, MDB-Maintain Drug Book, OR- Observation Report, HE- Health Education, CE-Clinical Evaluation, EPE- External Practical Examination**

## **B.Sc.(Hons.)Nursing-Sixth Semester**

### **MENTAL HEALTH NURSING (PRACTICAL)**

**Course Code: NUR2606**

**Credit Unit-12**

#### **Course Contents**

##### **PSYCHITRIC OPD**

###### **Duration in Weeks: 01**

- History taking
- Perform mental status examination (MSE)
- Assist in Psychometric assessment
- Perform Neurological examination
- Observe and assist in therapies
- Teach patients and family members

##### **CHILD GUIDANCE CLINIC**

###### **Duration in Weeks: 01**

- History taking
- Assist in Psychometric assessment
- Perform Neurological examination
- Observe and assist in various therapies
- Teach family and significant others

##### **IN-PATIENT WARD**

###### **Duration in Weeks: 06**

- History taking
- Perform mental status examination (MSE)
- Perform Neurological examination
- Assist in psychometric assessment
- Record therapeutic communication
- Administer medications
- Assist in Electroconvulsive Therapy (ECT)
- Participate in all therapies
- Prepare patients for Activities of Daily living (ADL)
- Conduct admission and discharge counseling
- Counsel and teach patients and families
- Maintain drug book

##### **COMMUNITY PSYCHIATRY**

###### **Duration in Weeks: 01**

- Conduct case work
- Identify individuals with mental health problems
- Assists in mental health camps and clinics
- Counsel and Teach family members, patients and community

**Examination Scheme:**

<b>Components</b>	<b>MSE</b>	<b>NCP</b>	<b>CS/CP</b>	<b>PR</b>	<b>OR</b>	<b>HE</b>	<b>CE</b>	<b>EPE</b>
<b>Weightage(%)</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>05</b>	<b>05</b>	<b>50</b>	<b>100</b>

**MSE- Mental status examination, NCP- Nursing Care Plan, CS- Case Study, CP- Case Presentation, PR-Process Recording, OR-Observation Report, HE- Health Education, CE-Clinical Evaluation, EPE- External Practical Examination**

## **B.Sc.(Hons.)Nursing-Sixth Semester**

### **DISSERTATION (NURSINGRESEARCH)**

**Course Code: NUR2637**

**Credit Unit-03**

**Objectives:** During the training the students is expected to learn about research problem, research methodology, research plan, implementation and statistical methods. The knowledge will be utilized for improving the quality of nursing practice and education.

#### **Research Project**

Students will conduct research project in selected areas of nursing and submit a report. The studies may include exploring existing health practices, improved practices of nursing procedures, health records, patient records and survey of nursing literature.

#### **Guidelines:**

- During the clinical training a student is supposed to write a research project work related to the profession of nursing, based on his/her interest.
- Project work would be under the supervision of internal faculty located for the project guiding appointed by the Principal/Director of college of nursing.
- The research project would be completed and submitted before the completion of eighth semester of the course (i.e. teaching work).
- Before the submission of project the student will be require to make a presentation before the research committee through power point presentation.
- The assessment of performance of student will be totally internal and the research committee will assess the student on the basis of his / herperformance.
- There would be mid-term review of the progress of the project before three members of the research committee appointed by the Principal/Director of college of nursing.
- The research project work should cover the following area.
  - Review of literature on the selected topic and reporting
  - Formulation of problem statement, objective and hypotheses
  - Research methodology conducted during the training period
  - Analysis and interpretation
  - Summary & Conclusion.

#### **Examination Scheme:**

<b>Components</b>	<b>PP</b>	<b>TP</b>	<b>DAP</b>	<b>GE</b>	<b>PR/VV</b>
<b>Weightage(%)</b>	<b>10</b>	<b>10</b>	<b>15</b>	<b>15</b>	<b>50</b>

**P- Proposal Presentation,TP- ToolPresentation, DAP- Data Analysis Presentation, GE-Guide Evaluation, PR-Project Report, VV- Voice Vive.**

# **B.Sc. (Hons.)Nursing-Seventh Semester**

## **COMMUNITY HEALTH NURSING- III**

**Course Code: NUR2701**

**Credit Unit-08**

**Course Description-** This course is designed for students to practice community health nursing for the individual, family and groups at both urban and rural settings by using concept and principles of health and community health nursing.

### **Course Contents**

#### **Module I**

##### **Introduction**

- Definition, concept & scope of Community Health and Community Health Nursing
- Historical development of
  - Community Health and
  - Community Health Nursing
    - Pre-independence
    - Post- independence

#### **Module II**

##### **Health planning and polices and problems**

- National health planning in India- Five Year Plans
- Various committees and commissions on health and family welfare
  - Central council for health and family welfare (CCH and FW)
  - National health polices (1983, 2002)
  - National population policy
- Health problems in India

#### **Module III**

##### **Delivery of community health services**

- Planning, budgeting and material management of SCs, PHC and CH
- Rural: Organization, staffing and functions of rural health services provided by government at:
  - Village
  - Sub centre
  - Primary health centre
  - Community Health centre/sub divisional
  - Hospital
  - District
  - State
  - Centre
- Urban: Organization, staffing and function of urban health services provided by government at:
  - Slums
  - Dispensaries
  - Maternal and child health centers
  - Special Clinics

- Hospitals
- Corporation /Municipality/Board
- Components of health services
  - Environmental sanitation
  - Health education
  - Vital statistics
  - M.C.H. –antenatal, natal, postnatal, MTP Act, female foeticide act, child adoption act
  - Family welfare
  - National health Programmes
  - School health service
  - Occupational health
  - Defense services
  - Institutional services
- Systems of medicine and health care
  - Allopathy
  - Indian System of Medicine and Homeopathy
  - Alternative health care systems like yoga, meditation, social and spiritual healing etc
- Diagnosing and treatment skills essential at subcentre level using standard treatment protocols as per national health programmes
- Referral system

#### **Module IV**

#### **Community health nursing approaches, concepts and roles and responsibilities of nursing personnel**

- **Approaches**
  - Nursing theories And Nursing process
  - Epidemiological approach
  - Problem solving approach
  - Evidence based approach
  - Empowering people to care for themselves
- **Concepts of Primary Health Care:**
  - Equitable distribution
  - Community participation
  - Focus on prevention
  - Use of appropriate technology
  - Multi-sectorial approach
- **Roles and responsibilities of Community health nursing personnel in**
  - Family health services
  - Information Education Communication (IEC)
  - Management Information system (MIS): Maintenance of Records & reports
  - Training and supervision of various categories of health workers
  - National Health Programmes
  - Environmental sanitation
  - Maternal and child health and family welfare
  - Treatment of Minor ailments
  - School Health Services
  - Occupational Health
  - Organization of clinics, camps: Types, Preparation, planning, conduct and evaluation
  - Waste management in the center, clinic etc.
  - Social Mobilization skills
  - Drug Dispensing
  - Programme management including supervision and monitoring
  - Investigation of an Outbreak

- Behaviour Change Communication and soft skills
- Organization of labour room
- Safe Child Birth Checklist
- Post Partum visit by health workers
- Home visit: Concept, Principles, Process, Techniques: Bag technique, home visit
- Qualities of Community Health Nurse
- Job Description of Community health nursing personnel
- Roles and Responsibilities of Mid level Health care Providers

## **Module V**

### **Assisting individuals and groups to promote and maintain their health**

- Empowerment for self-care of individuals, families and groups in-
- Assessment of self and family
  - Monitoring growth and development
    - Mile stones
    - Weight measurement
    - Social development
  - Temperature and Blood pressure monitoring
  - Menstrual cycle
  - Breast self-examination and testicles
  - Warning Signs of various diseases
  - Tests; Urine for sugar and albumin, blood sugar
- Seek health services for
  - Routine checkup
  - Immunization
  - Counseling
  - Diagnosis
  - Treatment
  - Follow up
- Maintenance of health records for self and family
- Continue medical care and follow up In community for various disease and disabilities
- Carryout therapeutic procedures as prescribed /required for self and family
- Waste Management
  - Collection and disposable of waste at home and community
- **Sensitize and handle social issue affecting health and development self and family**
  - Women Empowerment
  - Women and child abuse
  - Abuse of elders
  - Female Foeticide
  - Commercial sex workers
  - Food adulteration
  - Substance abuse
- **Utilize community resources for self and family**
  - Trauma services
  - Old age homes
  - Orphanage
  - Home for physically and mentally challenged individuals
  - Homes for destitute

## **Module VI**

### **National health and family welfare programmes and the role of a nurse**

- National ARI programme
- Revised National Tuberculosis Control Programme (RNTCP)
- National Anti-Malaria programme
- National Guinea worm eradication programme
- National Leprosy eradication programme
- National AIDS control programme
- STD control programme
- National programme for control of blindness
- Iodine deficiency disorder programme
- Expanded programme on immunization
- National Family Welfare Programme –RCH Programme historical development, Organization, administration, research, constraints
- National water supply and sanitation programme
- Minimum Need programme
- National Diabetics control programme
- Polio Eradication: Pulse Polio programme
- National Cancer Control programme
- Yaws Eradication programme
- National Nutritional Anemia Prophylaxis programme
- 20 point programme
- ICDS programme
- Mid-day meal applied nutritional programme
- National mental health programme
- New National Health Programmes Including AYUSHMAN BHARAT
- Introduction to Rashtriya Bal Sureksha Karyakaram (RBSK)
- Mother and Child Tracking System (MCTS)
- Family Planning 2020
- National Family Programmes
- Health schemes
  - ESI
  - CGHS
  - Health insurance

## **Module VII**

### **Health Agencies**

- International – WHO, UNFPA, UNDP, World Bank, FAO, UNICEF, DANIDA, European Commission (EC), Red cross, USAID, UNESCO, Colombo Plan, ILO, CARE etc.
- National- Indian Red Cross, Indian Council for child Welfare, Family Planning Association of India (FPAI), Tuberculosis Association of India, Hindu Kusht Nivaran Sangh, Central Social Welfare Board, All India women's conference, Blind Association of India etc.

### **Examination Scheme:**

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination**

**MIDWIFERY AND OBSTETRICALNURSING-II**

**Course Code: NUR2705**

**Credit Unit-04**

**Course Description-** This course is designed for students the appreciate the concept and principles of midwifery and obstetrical nursing. It helps them to acquire knowledge and skill in rendering nursing care to normal and high risk pregnant women during antenatal, natal and post natal periods in hospital and community settings. It also helps to develop skills in managing normal and high risk neonates and participate in family welfare Programme.

**Course Contents**

**ModuleI**

**High-risk pregnancy –assessment & management**

- Screening and assessment
  - Ultrasonic, cardio tomography, NST, CST, Non-invasive and Invasive
  - Newer modalities of diagnosis
- High-risk approach
- Levels of care; primary, secondary and tertiary levels
- Disorders of pregnancy
  - Hyper-emesis gravidarum, bleeding in early pregnancy
  - Abortion, Ectopic Pregnancy and vesicular mole
  - Pregnancy, vesicular mole
  - Ante-partum hemorrhage
- Uterine abnormality and displacement.
- Diseases complicating pregnancy
  - Medical and Surgical conditions
  - Infections, RTI (STD), UTI, HIV, TORCH
  - Gynecological diseases complicating pregnancy
  - Pregnancy induced hypertension & diabetes, Toxemia of pregnancy , hydamnios
  - Rh incompatibility
  - Mental disorders
- Adolescent Pregnancy, Elderly Primi and Grand Multipara
- Multiple pregnancy
- Abnormalities of placenta & cord
- Intra-uterine growth-retardation
- Nursing management of mothers with high-risk pregnancy
- Maintenance of Records and Report

**ModuleII**

**Abnormal Labour –assessment and management**

- Disorders in labour
  - CPD and contracted pelvis
  - Malpositions and malpresentations
  - Premature labour, disorders of uterine actions – precipitate labour, prolonged labour
  - Complications of third stage: injuries to birth canal
- Obstetrical emergencies and their management;
  - Presentations and prolepses of cord, Vasa praevia, amniotic fluid embolism, rupture of uterus, shoulder dystocia, obstetrical shock

- Obstetrical procedures and operations;
  - Induction of labour, forceps, vacuum version, manual removal of placenta, caesarean section, destructive operations
- Nursing management of women undergoing obstetrical operations and procedures

### Module III

#### Assessment and management of High risk new born

- Admission of neonates in the neonatal intensive care units: Protocols
- Nursing management of
  - Low birth weight babies
  - Infections
  - Respiratory problems
  - hemolytic disorders
  - Birth injuries
  - Malformations
- Monitoring of high risk neonates
- Feeding of high risk neonates
- Organization and management of neonatal intensive care units
- Infection control in neonatal intensive care units
- Maintenance of Records and Reports

### Module IV

#### Family welfare Programme

- Population trends and problems in India
- Concepts, aims, importance and history of family welfare Programme
- National Population: dynamics, policy and education
- National family welfare Programme; RCH, ICDS, MCH. Safe motherhood
- Organization and administration: At national, state, district, block and village levels
- Methods of contraception: Spacing, temporary and permanent, Emergency contraception
- Infertility and its management
- Counseling for family welfare
- Latest research in contraception
- Maintenance of vital statistics
- Role of a nurse in family welfare Programme
- Training/Supervision/Collaboration with other functionaries in community like ANMs, LHVs, Anganwadi workers, TBAs (Traditional birth attendant-Dai)

#### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination

## **B.Sc.(Hons.)Nursing-Seventh Semester**

### **MANAGEMENT OF NURSING SERVICES AND EDUCATION**

**Course Code: NUR2703**

**Credit Unit-08**

**Course Description:** This course is designed to enable students to acquire understanding of management of clinical and community health nursing services, nursing educational programmes. This is also design to enable students to acquire understanding of the professional responsibilities, prospects and contribution to the growth of the profession.

#### **Course Contents**

##### **Module I**

##### **Introduction to Management in Nursing**

- Definition, concepts and theories
- Functions of management
- Principles of Management
- Role of a Nurse as a manager

##### **Module II**

##### **Management process**

- Planning: mission, philosophy, objectives, operational plan
- Staffing: philosophy, staffing study, norms, activities, patient classification systems, scheduling
- Human resource management; recruiting, selecting, deployment, retaining, promoting, super annuation etc
- Budgeting: concept, principles, types, cost benefit analysis, audit
- Material management: equipment and supplies
- Directing process (Leading )
- Controlling: Quality management
- Program Evaluation Review Technique (PERT), Technique (Bench) marking, Activity Plan (Gantt chart)

##### **Module III**

##### **Management of nursing services in the hospital and Community**

- Planning:
  - Hospital and patient care Units including ward management
  - Emergency and disaster management
- Human resource management:
  - Recruiting, selecting, development, retaining promoting, superannuation etc
  - Categories of nursing personnel maturing job description of all levels
  - Patient/ population classification systems
  - Patients/population assignment and Nursing care responsibilities
  - Staff development and welfare
- Budgeting: proposal projecting, requirement for staff, equipment and supplies for
  - Hospital and patient care Units.
  - Emergency & disaster management.
- Material Management Procurement inventory control, auditingMaintenance in:
  - Hospital & Patient Care Unit.
  - Emergency & Disaster Management.

- Directing & Leading.
  - Delegation Participatory Management
  - Assignments, Rotations Delegations,
  - Supervision n & guidance ,
  - Implement Standards Policies,
  - Processors & Practices.
  - Staff Development & welfare,
  - Maintenance of Discipline.
- Controlling / Evaluation:
  - Nursing Rounds, Visits, Nursing Protocols Manuals.
  - Records and reports
  - Performance appraisal
  - Quality Assurance Model

## **ModuleIV**

### **Organizational behavior and human relations**

- Concepts and theories of organizational behaviors
- Review of Channels of communication
- Leadership styles
- Review of Motivation; concepts and theories
- Group dynamics
- Techniques of;
  - Communication; and
  - Interpersonal relationships
  - Human relations;
- Public relations in context of nursing
- Relations with professional associations, employee unions and collective bargaining

## **ModuleV**

### **In service education**

- Nature & scope of in-service education program
- Organization of in service education
- Principles of adult learning,
- Planning for in-service education program, techniques, methods & evaluation of staff education program
- Preparation of report

## **Module VI**

### **Management of nursing educational institutions**

- Establishment of Nursing educational institutional-INC norms and guidelines
- Co-ordination with-
  - Regulatory bodies
  - Accreditation
  - Affiliation
  - Philosophy/objective
  - Organization
  - Structure
  - Committees
  - Physical facilities: College/School and Hostel
  - Students: Selection, Admission, Guidance and Counseling and Maintaining discipline
  - Faculty and staff: Selection, Requirement, Job discussion, Placement, Performance appraisal, Development and welfare
- Budgeting

- Equipment's and supplies: audio visual equipment, laboratory equipment, books, journals etc
- Curriculum: Planning, Implementation and Evaluation,
- Clinical facilities
- Transport facilities
- Institutional Records and reports- administrative, faculty, staff and students

## Module VII

### Nursing as a profession

- Nursing as a profession
  - Philosophy; nursing practice
  - Aims and objectives
  - Characteristics of a professional nurse
  - Regulatory bodies; INC, SNC Acts:- constitution, functions
  - Current trends and issues in Nursing
- Professional ethics
  - Code of ethics; INC, ICN
  - Code of professional conduct; INC, ICN
- Practice standards for Nursing; INC
- Consumer protection act
- Legal aspects in Nursing
  - Legal terms related to practice:Registration and licensing
  - Laws related to nursing practice: Breach and penalties
  - Malpractice and negligence

## Module VIII

### Professional Advancement

- Continuing education
- Career Opportunities
- Collective bargaining
- Membership with Professional organizations; National and International
- Participation in research activities
- Publications: Journals, Newspapers etc.

### Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; EA- Extracurricular activity; EE- End Semester Examination

## **B.Sc.(Hons.)Nursing-Seventh Semester**

### **COMMUNITY HEALTH NURSING-I, II&III (PRACTICAL)**

**Course Code: NUR2704**

**Credit Unit-12 (6+6)**

#### **Course Contents**

##### **Community Health Nursing**

**Duration: 01 week for Urban and 04 weeks for Rural**

- Use techniques of interpersonal relationship
- Identification of health determinants of community
- History taking
- Physical examination
- Collect specimens sputum, malaria smear
- Perform simple lab tests at center-blood for Hemoglobin and sugar, urine for albumin and sugar
- Administer vaccines and medications to adults
- Counsel and teach individual, family and community
  - ✓ Nutrition
  - ✓ Hygiene
  - ✓ Self-health monitoring
  - ✓ Seeking health services
  - ✓ Healthy life style
  - ✓ Family welfare methods
  - ✓ Health promotion
- Community health survey
- Community diagnosis
- Family care: Home adaptation of common procedures
- Home visit: Bag technique
- Organize and conduct clinics-antenatal, post natal, well baby clinic, camps etc
- Screen manage and referrals for:
  - High risk mothers and neonates
  - Accidents and emergencies
  - Illness: Physical and mental
  - Disabilities
- Conduct delivery at centre/home: episiotomy and suturing
- Resuscitate newborn
- School Health programme
  - Screen , manage , refer children
- Collaborate with health and allied agencies.
- Train and Supervise health workers
- Provide family welfare services: insertion of IUD
- Provide family welfare services: insertion of IUD
- Counsel and teach individual, family and community about: HIV, TB, Diabetes, hypertension, mental health adolescent elderly's health physically and mentally challenged individuals etc.
- Collect and Calculate Vital health Statistics
- Document and maintain
  - Individuals, family and administrative records.
- Write reports-center, disease, national health programme /projects

- Daily diary writing
- Complete case book / Activity record book

**Examination Scheme:**

Components	FS	P	SR	OR	HE	CE	EPE
Weightage (%)	10	10	10	05	05	50	100

FS- Family Study, P- Project, SR- Survey Report, OR-Observation Report, HE- Health Education, CE-Clinical Evaluation, EPE- External Practical Examination

**MIDWIFERY AND OBSTETRICAL NURSING-I & II  
(PRACTICAL)**

**Course Code: NUR2706**

**Credit Unit-15 (7+8)**

**Course Contents**

**ANTENATAL CLINIC/OPD**

**Duration in Weeks: 02**

- Antenatal history taking Physical examination
- Recording of Weight & B.P
- Hb & Urine testing for sugar and albumin
- Antenatal examination-abdomen and breast
- Immunization
- Assessment of risk status
- Teaching antenatal mothers
- Maintenance of Antenatal records
- Case book recording

**LABOUR ROOM AND OT**

**Duration in Weeks: 04**

- Assessment of Women in labour
- Pervaginal examinations and interpretation
- Monitoring and caring of woman in labour
- Maintenance of partograph
- Conduct normal delivery
- Newborn assessment and immediate care
- Resuscitation of newborns
- Assessment of risk status of newborn
- Episiotomy and suturing
- Maintenance of labour and birth records
- Arrange for and assist with Caesarean section and care for woman & baby during Caesarean
- Arrange for and assist with **MTP** and other surgical procedures
- Case book recording

**POST NATAL WARD**

**Duration in Weeks: 04**

- Examination and assessment of mother and Baby
- Identification of deviations
- Care of postnatal mother and baby
- Perineal care
- Lactation management
- Breast feeding
- Baby bath
- Immunization ,
- Teaching postnatal mother :
  - Mother craft
  - Post natal care &

- Exercises
- Immunization
- Case book recording

## **NEW BORN NURSERY**

### **Duration in Weeks: 02**

- Newborn assessment
- Assessment of neonates
- Feeding of at risk neonates
  - Katori spoon, paladi, tube feeding, total parenteral nutrition
- Thermal management of neonates-Kangaroo mother care, care of baby in incubator
- Monitoring and care of neonates
- Administering medications
- Intravenous therapy
- Assisting with diagnostic procedure
- Assisting with exchange transfusion
- Care of baby on ventilator
- Phototherapy
- Infection control protocols in the nursery
- Teaching and counseling of parents
- Maintenance of neonatal records

## **FAMILY PLANNING CLINIC**

### **Rotation from post natal ward: 01 week**

- Counseling technique
- Insertion of IUD
- Teaching on use of family planning methods
- Arrange for and Assist with family planning operations
- Maintenance of records and reports

## **Essential requirements for registration as midwife**

- Antenatal examination - 30
- Conducting normal deliveries in hospital /home /health centre -20
- Vaginal examination - 05
- Episiotomy and suturing - 05
- Neonatal resuscitation - 05
- Assist with Caesarean section - 02
- Witness/Assist abnormal deliveries - 05
- Postnatal cases nursed in hospital /home/health centre -20
- Insertion of IUD - 20

**Note:** All casebooks must be certified by teacher on completion of essential requirements.

### **Examination Scheme:**

<b>Components</b>	<b>NCP</b>	<b>CS/CP</b>	<b>CBR</b>	<b>OR</b>	<b>HE</b>	<b>CE</b>	<b>EPE</b>
<b>Weightage(%)</b>	<b>10</b>	<b>10</b>	<b>20</b>	<b>05</b>	<b>10</b>	<b>50</b>	<b>100</b>

**NCP- Nursing Care Plan, CS- Case Study, CP- Case Presentation, CBR-Case Book Recording, OR- Observation Report, HE- Health Education, CE-Clinical Evaluation, EPE- External Practical Examination**

## **B.Sc. (Hons.)Nursing-Eighth Semester**

### **MIDWIFERY AND OBSTETRICAL NURSING (INTERNSHIP)**

**Course Code: NUR2801**

**Credit Unit-10**

**Skills:** Integrated practice by providing comprehensive care to mother and neonates

**Areas:**Duration in weeks

- Labour ward: 02
- Neonatal Intensive care unit: 01
- Antenatal: 02

**Examination Scheme:**

<b>Components</b>	<b>NCP</b>	<b>CS/CP</b>	<b>CBR</b>	<b>HE</b>	<b>CE</b>
<b>Weightage(%)</b>	<b>10</b>	<b>10</b>	<b>20</b>	<b>10</b>	<b>50</b>

**NCP- Nursing Care Plan, CS- Case Study, CP- Case Presentation, CBR-Case Book Recording, HE- Health Education, CE-Clinical Evaluation**

**B.Sc.(Hons.)Nursing-Eighth Semester  
COMMUNITY HEALTH NURSING  
(INTERNSHIP)**

**Course Code:** NUR2802

**Credit Unit-09**

**Skill:** Integrated practice by providing compressive care to Individual, family and Community. And group project one in each rural and urban

**Areas:**Duration in weeks

- Urban: 02
- Rural: 02

**TOPICS:**

- Health Planning and Health care delivery system in India ( IPHS)
- Health Management Information System ( HMIS)
- Electronic Medical Records (EMR)
- Micro birth planning
- Adolescent Counseling
- Sources of Vital Statistics
- Financial Management Accounts and Computing at Sub Centres
- Mental Health Act, Drug De addiction programmes
- Time trends in disease occurrence in Epidemiology
- Infant and young Child Feeding and Counseling
- Nutrition across life cycle and update on national nutritional Programmes
- Use Of Equipment
- Throat Problems and febrile seizure in children
- Transportation of baby and common accidents and mishaps in labour room
- Counselling GATHER approach
- Update biomedical waste management by specifying biomedical waste management rules 2016
- Suturing of superficial wounds
- Post Partum Intra Uterine Contraceptives Devices

All the national Health Programmes on Communicable and Non Communicable Diseases

**Examination Scheme:**

Components	FS	GP	HE	CE
Weightage(%)	20	10	20	50

**FS- Family Study, GP- Group Project, HE- Health Education, CE-Clinical Evaluation**

**B.Sc.(Hons.)Nursing-Eighth Semester**  
**MEDICAL SURGICAL NURSING**  
**(INTERNSHIP)**

**Course Code:** NUR2803

**Credit Unit-18**

**Skills:** Integrated practice in different areas by providing care to patients with Medical and Surgical Conditions including emergencies and assets with common operations.

**Areas:**Duration in weeks

- Medical Ward: 02
- Surgical Ward: 02
- Critical Care Unit/ICCU: 01
- Causality/Emergency: 02
- Operation Theatre: 02

**Examination Scheme:**

Components	NCP	CS	CP	HE/GP	CE
Weightage(%)	10	10	10	20	50

**NCP- Nursing Care Plan, CS- Case Study, CP- Case Presentation, HE- Health Education, GP-Group Project, CE-Clinical Evaluation**

## **B.Sc.(Hons.)Nursing-Eighth Semester**

### **CHILD HEALTH NURSING**

#### **(INTERNSHIP)**

**Course Code:** NUR2804

**Credit Unit-06**

**Skills:** Integrated practice in different areas by providing compressive care to children with Medical and Surgical Conditions including intensive care to neonates.

**Areas:**Duration in weeks

- Pediatric Medical Ward / ICU: 01
- Pediatric Surgical Ward / ICU: 01
- NICU: 01

#### **Examination Scheme:**

<b>Components</b>	<b>NCP</b>	<b>CS</b>	<b>CP</b>	<b>HE/GP</b>	<b>CE</b>
<b>Weightage(%)</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>20</b>	<b>50</b>

**NCP- Nursing Care Plan, CS- Case Study, CP- Case Presentation, HE- Health Education, GP-Group Project, CE-Clinical Evaluation**

## **B.Sc.(Hons.)Nursing-Eighth Semester**

### **MENTAL HEALTH NURSING**

#### **(INTERNSHIP)**

**Course Code:** NUR2805

**Credit Unit-04**

**Skills:** Integrated practice by providing compressive care to patients with mental health problems.

**Areas:**Duration in weeks

- Psychiatric Ward: 02

#### **Examination Scheme:**

<b>Components</b>	<b>NCP</b>	<b>CS</b>	<b>CP</b>	<b>HE/GP</b>	<b>CE</b>
<b>Weightage(%)</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>20</b>	<b>50</b>

GURUGRAM**

## Programme Overview

M.Sc. Nursing programme has duration of 4 semesters and the aim of the post-graduate Nursing program is to:

- Upgrade & to prepare graduate nurses to assume responsibilities as nurse specialists, consultants, educators, administrators in a wide variety of professional settings
- Prepare graduates to assume responsibilities as professional, competent nurses in providing promotive, preventive, curative and rehabilitative services.
- Prepare nurses who can make independent decisions in nursing situations, protect the rights of and facilitate individuals and groups in pursuit of health, function in the hospital, community nursing services, and conduct research studies in the areas of nursing practice . They are also expected to assume the role of teacher, supervisor, and manager in a clinical. Public health setting.

## PROGRAMME OUTCOMES (PO's)

- **PO1: Critical Thinking:** Take informed actions after identifying the assumptions that frame our thinking and actions, checking out the degree to which these assumptions are accurate and valid, and looking at our ideas and decisions (intellectual, organizational, and personal) from different perspectives.
- **PO2: Effective Communication:** Speak, read, write and listen clearly in person and through electronic media in English and in one Indian language, and make meaning of the world by connecting people, ideas, books, media and technology.
- **PO3: Social Interaction:** Elicit views of others, mediate disagreements and help reach conclusions in group settings.
- **PO4: Effective Citizenship:** Demonstrate empathetic social concern and equity centred national development, and the ability to act with an informed awareness of issues and participate in civic life through volunteering.
- **PO5: Ethics:** Recognize different value systems including your own, understand the moral dimensions of your decisions, and accept responsibility for them.
- **PO6: Environment and Sustainability:** Understand the issues of environmental contexts and sustainable development.
- **PO7: Self-directed and Life-long Learning:** Acquire the ability to engage in independent and life-long learning in the broadest context socio-technological changes

## **PROGRAMME SPECIFIC OUTCOMES (PSO's)**

On the completion of the two-year M.Sc. Nursing Programme the graduate will be able to:

- **PSO1 :** Assess the health status, identify nursing needs, plan, implement and evaluate nursing care for patients/client that contribute to health of individuals, families and communities.
- **PSO2:** Demonstrate competency in techniques of nursing skills based on concepts and principles from specialized areas of nursing, physical, biological and behavioral sciences. And Participate as member of health care team in the promotive, preventive, curative and restorative health care delivery system of the country.
- **PSO3:** Demonstrate leadership, managerial skills, qualities and decision-making abilities, teaching and communication skills in clinical/ community health settings.
- **PSO4:** Participation in research activities towards continued learning for personal and professional development, practice ethical values and utilize the research findings to improve the quality of care.

**Course Catalogue:** This course is aimed at developing competent teacher for delivering extempore by using competence based learning on objective based outcome by using modern trends & methods in teaching, learning & in evaluation as well.

**Course Objectives:**

This course is designed to assist students to develop a broad understanding of Fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

**Course Outcomes:**

On completion of this course students will be able to:

CO1: Describe the current trends and issues in education

CO2: Explain the Concepts of teaching and learning process

CO3: Discuss Key concepts in the selection and use of media in education

CO4: Explain the concept and nature of measurement and evaluation

CO5: Describe Standardized and non-standardized tests

CO6: Discuss the Administration, Scoring and Reporting

CO7: Explain the Standardized Tools

CO8: Discuss Perspectives of nursing education: Global and national

CO9: Explain Program planning, implementation and evaluation of continuing education programs.

CO10: Describe Program planning, implementation and evaluation of continuing education programs.

CO11: Discuss the Curriculum Development process

CO12: Explain the Preparation of professional teacher in organising professional teacher program

CO13: Describe the concept of Guidance and counselling

CO14: Discuss the concept of Administration of Nursing Curriculum

CO15: Explain Management of nursing educational institutions

CO16: Describe Development and maintenance of standards and accreditation in nursing education programs

Modules	Blooms level*	Number of hours
<p>MODULE 1:</p> <p><b>Introduction</b></p> <p>Education :Definition, aims, concepts, philosophies &amp; their education implications</p> <ul style="list-style-type: none"><li>• Impact of Social, economical, political &amp; technological changes on education:</li><li>• Professional education</li><li>• Current trends and issues in education</li><li>• Educational reforms and National Educational policy, various educational commissions-reports</li><li>• Trends in development of nursing education in India</li></ul>	L1, and L2	10
<p>MODULE 2:</p> <p><b>Teaching – Learning Process</b></p> <ul style="list-style-type: none"><li>• Concepts of teaching and learning: Definition, theories of teaching and learning, relationship between teaching and learning.</li><li>• Educational aims and objectives; types, domains, levels, elements and writing of educational objectives</li><li>• Competency based education(CBE) and outcome based education(OBE)</li></ul>	L1,L2, and L3	10

<ul style="list-style-type: none"> <li>• Instructional design: Planning and designing the lesson, writing lesson plan : meaning, its need and importance, formats.</li> <li>• Instruction strategies – Lecture, discussion, demonstration, simulation, laboratory, seminar, panel, symposium, problem solving, problem based learning (PBL), workshop, project, role-play(socio drama), clinical teaching methods, programmed instruction, self directed learning(SDL), micro teaching, computer assisted instruction(CAI), computer assisted learning (CAL)</li> </ul>		
<b>MODULE 3:</b> <b>Instructional media and methods</b> <ul style="list-style-type: none"> <li>• Key concepts in the selection and use of media in education</li> <li>• Developing learning resource material using different media</li> <li>• Instructional aids – types, uses, selection, preparation, utilization.</li> <li>• Teacher’s role in procuring and managing instructional Aids – Project and non-projected aids, multi media, video-tele conferencing etc</li> </ul>	L1,L2, L3 and L4	15
<b>MODULE 4:</b> <b>Measurement and evaluation:</b> <ul style="list-style-type: none"> <li>• Concept and nature of measurement and evaluation, meaning, process, purposes, problems in evaluation and measurement.</li> <li>• Principles of assessment, formative and summative assessment- internal assessment external examination, advantages and disadvantages.</li> <li>• Criterion and norm referenced evaluation</li> </ul>	L1,L2, and L3	10
<b>MODULE 5:</b> <b>Standardized and non-standardized tests</b> <ul style="list-style-type: none"> <li>• Meaning, characteristics, objectivity, validity, reliability, usability, norms, construction of tests</li> </ul>	L1,L2 and L3	15

<ul style="list-style-type: none"> <li>– Essay, short answer questions and multiple choice questions.</li> <li>– Rating scales, checklist, OSCE/OSPE(Objective structured clinical/practical examination)</li> <li>– Differential scales, and summated scales, sociometry, anecdotal record, attitude scale, critical incident technique</li> <li>• Question bank-preparation, validation, moderation by panel, utilization</li> <li>• Developing a system for maintaining confidentiality</li> </ul>		
<p>MODULE 6:</p> <p><b>Administration, Scoring and Reporting</b></p> <ul style="list-style-type: none"> <li>• Administering a test; scoring, grading versus marks</li> <li>• Objective tests, scoring essay test, methods of scoring, Item analysis.</li> </ul>	L1, L2,L3 and L5	5
<p>MODULE 7:</p> <p><b>Standardized Tools</b></p> <ul style="list-style-type: none"> <li>• Tests of intelligence aptitude, interest, personality, achievement, socio-economic status scale, tests for special mental and physical abilities and disabilities.</li> </ul>	L1,L2, and L3	10
<p>MODULE 8:</p> <p><b>Nursing Educational programs</b></p> <ul style="list-style-type: none"> <li>• Perspectives of nursing education: Global and national.</li> <li>• Patterns of nursing education and training programmes in India. Non-university and University programs: ANM, GNM, Basic B.Sc. Nursing, Post Certificate B.Sc. Nursing, M.Sc(N) programs, M.Phil and Ph.D) in Nursing, post basic diploma programs, nurse practitioner programs.</li> </ul>	L1,L2, and L5	10

<p>MODULE 9:</p> <p><b>Continuing Education in Nursing</b></p> <ul style="list-style-type: none"> <li>• Concepts – Definition, importance, need scope, principles of adult learning, assessments of learning needs, priorities, re-sources.</li> <li>• Program planning, implementation and evaluation of continuing education programs.</li> <li>• Research in continuing education.</li> <li>• Distance education in nursing.</li> </ul>	L1,L2, and L3	10
<p>MODULE 10:</p> <p><b>Curriculum Development</b></p> <ul style="list-style-type: none"> <li>• Definition, curriculum determinants, process and steps of curriculum development, Curriculum</li> <li>• models, Types and framework.</li> <li>• Formulation of philosophy, objectives, selection and organization of learning experiences; master plan, course plan, unit plan.</li> <li>• Evaluation strategies, process of curriculum change, role of students, faculty, administrators, statutory bodies and other stakeholders.</li> <li>• Equivalency of courses: Transcripts, credit system.</li> </ul>	L1,L2, L3 and L4	10
<p>MODULE 11:</p> <p><b>Teacher preparation</b></p> <ul style="list-style-type: none"> <li>• Teacher – roles &amp; responsibilities, functions, characteristics, competencies, qualities</li> <li>• Preparation of professional teacher</li> <li>• Organizing professional aspects of teacher preparation programs</li> <li>• Evaluation: self and peer</li> </ul>	L1,L2, and L3	10

<ul style="list-style-type: none"> <li>• Critical analysis of various programs of teacher education in India.</li> </ul>		
<p>MODULE 12:</p> <p><b>Guidance and counselling</b></p> <ul style="list-style-type: none"> <li>• Concept, principles, need, difference between guidance and counselling , trends and issues.</li> <li>• Guidance and counselling services : diagnostic and remedial.</li> <li>• Coordination and organization of services</li> <li>• Techniques of counselling: Interview, case work, characteristics of counsellor, problems in counselling.</li> <li>• Professional preparation and training for counselling</li> </ul>	L1,L2, and L5	5
<p>MODULE 13:</p> <p><b>Administration of Nursing Curriculum</b></p> <ul style="list-style-type: none"> <li>• Role of curriculum coordinator – planning, implementation and euation.</li> <li>• Evaluation of educational programs in nursing course and program.</li> <li>• Factors influencing faculty staff relationship and techniques of working together.</li> <li>• Concept of faculty supervisor (dual) position.</li> <li>• Curriculum research in nursing.</li> <li>• Different models of collaboration between education and service</li> </ul>	L1,L2, and L5	10
<p>MODULE 14:</p> <p><b>Management of nursing educational institutions</b></p> <ul style="list-style-type: none"> <li>• Planning, organizing, staffing, budgeting, recruitment, discipline, public relation, performance appraisal, welfare services, library services, hostel</li> </ul>	L1,L2, and L5	10

MODULE 15:		
<b>Standards and accreditation</b>		
<ul style="list-style-type: none"> <li>• Development and maintenance of standards and accreditation in nursing education programs.</li> <li>• Role of Indian Nursing Council, State Registration Nursing Councils, Boards and University.</li> <li>• Role of Professional associations and unions.</li> </ul>	L1,L2, and L5	10

<b>NUR4102</b>	Nursing Education (Practical)	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>Pre-requisites/Exposure</b>				<b>15</b>	<b>8</b>
<b>Co-requisite</b>					

### **Course Description:**

This course is designed to assist students in developing expertise and in - depth knowledge in the field of neurology and neurosurgical Nursing. It will help students to develop advanced skills for nursing intervention in caring for patients with neurological and neurosurgical disorders. It will enable the student to function as neuroscience nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of neurology and neurosurgical Nursing.

### **Course Outcomes:**

At the end of the course the students will be able to perform the following activities (Practical):

CO1- Framing philosophy, aims and objectives.

CO2-Lesson Planning.

CO3-Micro teaching-2.

CO4-Conduct practice teachings using different teaching strategies -10 (like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)

CO5-Preparation and utilization of instructional Aids using different media.

CO6-Develop course plans, unit plans, rotation plans.

CO7-Conduct a continuing education workshop.

CO8-Annotated bibliography.

CO9-Critical evaluation of any nursing education program offered by a selected institution.

CO10-Planning and Organizing field visits.

CO11-Educational visits.

CO12-Field visits (INC/SNRC) to get familiar with recognition/registration process.

---

CO13-Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc )

CO14-Observe and practice application of various non-standardized tests (intelligence, Aptitude, personality, Sociometry, physical & mental disabilities tests.)

### Course Content

<b>MSN4103</b>	<b>MEDICAL SURGICAL NURSING I</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>Pre-requisites/Exposure</b>		<b>15</b>	<b>15</b>		<b>15</b>
<b>Co-requisite</b>					

**Course Catalogue:** This course is aimed at developing competent teacher for delivering extempore by using competence based learning on objective based outcome by using modern trends & methods in teaching, learning & in evaluation as well.

**Course Objectives:**

The objective of this course is to assist students:

In developing expertise and in-depth understanding in the field of Medical Surgical nursing

1. To develop advanced skills for nursing intervention in various medical surgical Nursing conditions.
2. To function as Medical Surgical Nurse practitioner/specialist.
3. To enable the student to function as educator, manager and researcher in the field of Medical Surgical Nursing.

**Course Outcomes:**

On completion of this course students will be able to:

CO1: Describe the current trends and issues in Medical Surgical Nursing

CO2: Perform health Assessment

CO3: Discuss care in hospital setting

CO4: Explain management of patients with disorders of Gastrointestinal tract.

CO5: Explain management of patients with disorders of Nervous system

CO6: Explain management of patients with disorders of respiratory system

CO7: Explain management of patients with disorders of cardiovascular system

CO8: Explain management of patients with disorders of blood

CO9: Explain management of patients with disorders of genito-urinary system

CO10: Explain management of patients with disorders of endocrine system

CO11: Explain management of patients with disorders of musculoskeletal system

CO12: Explain management of patients with disorders of integumentary

- CO13: Explain management of patients with disorders of Eye and ENT
- CO14: Explain management of patients with disorders of Reproductive system
- CO15: Discuss aging and Disorders of geriatric population
- CO16: Discuss disorders of communicable and sexually transmitted diseases.
- CO17: Discuss emergency, trauma and multi-system organ failure care of patient.

### Course Content

Modules	Blooms level*	Number of hours
<b>Module I</b> <b>Introduction</b> <ul style="list-style-type: none"> <li>• Historical development of medical surgical nursing in India</li> <li>• Current status of health and disease burden in India</li> <li>• Current concept of health</li> <li>• Trends &amp; issues in medical surgical nursing</li> <li>• Ethical &amp; cultural issues in medical surgical nursing</li> <li>• Rights of patients</li> <li>• National health policies and national programs related to adult health</li> <li>• National health policy, special laws &amp; ordinances related to older people</li> <li>• Five year plans</li> </ul>	L1,L2	5
<b>Module II</b> <b>Health assessment of patients</b> <ul style="list-style-type: none"> <li>• History taking</li> <li>• Physical examination of various systems</li> <li>• Nutrition assessment</li> </ul>	L1,L2,L3	20

<ul style="list-style-type: none"> <li>• Related investigations and diagnostic assessment</li> </ul>		
<b>Module III</b> <b>Care in hospital settings</b> <ul style="list-style-type: none"> <li>• Ambulatory settings</li> <li>• Acute and critical care</li> <li>• Long term care</li> <li>• Home health care</li> <li>• Characteristics, care models, practice settings, interdisciplinary team</li> <li>• Hospitalization- effects of hospitalization on patient &amp; family</li> <li>• Stressors &amp; reaction related to disease process</li> <li>• Nursing care using nursing process</li> </ul>	L1,L2	5
<b>Module IV</b> <b>Management of patients with disorders of Gastro intestinal tract</b> <ul style="list-style-type: none"> <li>• Review of related anatomy and physiology</li> <li>• Disorders – etiology, pathophysiology, clinical manifestations, complications, prognosis.</li> <li>• Health assessment- history taking, physical examination, investigation &amp; diagnostic assessment</li> <li>• Treatment modalities and trends</li> <li>• Nursing management</li> <li>• Related research studies</li> <li>• Evidence based nursing practice</li> </ul> Rehabilitation and follow up.	L1,L2,L3	10

<b>PDN4103</b>	<b><u>Child Health (Pediatric) Nursing</u></b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	<b>15</b>	<b>20</b>		<b>15</b>
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

**Course Catalogue:** This course is aimed at developing an understanding of the modern approach to child care, the common health problems of children and neonates in health and sickness.

**Course Description:** This course is designed to assist students in developing expertise and in depth understanding in the field of Pediatric Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and Paediatric Nurse Specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric Nursing.

**Course Objectives:** At the end of the course the students will be able to:

- Appreciate the history and developments in the field of pediatrics and
- pediatric nursing as a specialty, apply the concepts of growth and development in providing care to the pediatric clients and their families.
- Appreciate the child as a holistic individual
- Perform physical, developmental, and nutritional assessment of
- pediatric clients. Apply nursing process in providing nursing care to neonates & children
- Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
- Recognize and manage emergencies in neonates, describe various recent technologies and treatment modalities in the management of high risk neonates
- Prepare a design for layout and management of neonatal units

**Course Outcomes:**

---

On completion of this course students will be able to:

- CO1. Appreciate the history and developments in the field of pediatrics and pediatric nursing as a specialty
- CO2. Apply the concepts of growth and development in providing care to the pediatric clients and their families.
- CO3. Appreciate the child as a holistic individual
- CO4. Perform physical, developmental, and nutritional assessment of pediatric clients
- CO5. Apply nursing process in providing nursing care to neonates & children
- CO6. Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
- CO7. Recognize and manage emergencies in neonates
- CO8. Describe various recent technologies and treatment modalities in the management of high risk neonates
- CO9. Appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
- CO10. Prepare a design for layout and management of neonatal units
- CO11. Incorporate evidence based nursing practice and identify the areas of research in the field of pediatric/neonatal nursing
- CO12. Recognize the role of pediatric nurse practitioner and as a member of the pediatric and neonatal health team

### **PROGRAMME SPECIFIC OUTCOMES:-**

On completion of M.Sc. Nursing programme the post graduates will be able to:

- PSO1 : Assess the health status, identify nursing needs, plan, implement and evaluate nursing care for patients/client that contribute to health of individuals, families and communities.
- PSO2: Demonstrate competency in techniques of nursing skills based on concepts and principles from specialized areas of nursing, physical, biological and behavioral sciences. And Participate as member of health care team in the promotive, preventive, curative and restorative health care delivery system of the country.

---

PSO3: Demonstrate leadership, managerial skills, qualities and decision-making abilities, teaching and communication skills in clinical/ community health settings.

PSO4: Participation in research activities towards continued learning for personal and professional development, practice ethical values and utilize the research findings to improve the quality of care

### Course Content

<b>Modules</b>	<b>Blooms level</b>	<b>Number of hours (as per INC)</b>
<b>Module I</b> <b>Introduction</b> <input type="checkbox"/> Historical development of Pediatrics and Pediatric Nursing in India; <input type="checkbox"/> Current status of child health in India; <input type="checkbox"/> Trends in Pediatrics and Pediatric Nursing, <input type="checkbox"/> Ethical and cultural issues in pediatric care <input type="checkbox"/> Rights of children <input type="checkbox"/> National health policy for children, special laws and ordinances relating to children. <input type="checkbox"/> National goals, <input type="checkbox"/> Five year plans, <input type="checkbox"/> National health programs related to child health.	<b>L1,2</b>	<b>10</b>
<b>Module II</b> <b>Assessment of pediatric clients</b> <input type="checkbox"/> History taking <input type="checkbox"/> Developmental assessment	<b>L4,5,6</b>	<b>10</b>

<input type="checkbox"/> Physical assessment <input type="checkbox"/> Nutritional assessment <input type="checkbox"/> Family assessment		
<b>Module III</b> <b>Hospitalized child</b> <input type="checkbox"/> Meaning of hospitalization of the child, preparation for hospitalization, effects of hospitalization on the child and family <input type="checkbox"/> Stressors and reactions related to developmental stages, play activities for ill hospitalized child. <input type="checkbox"/> Nursing care of hospitalized child and family -principles and practices	<b>L1,2,3</b>	<b>10</b>
<b>Module IV</b> <b>Pre-natal Pediatrics</b> <input type="checkbox"/> Embryological and fetal development, Prenatal factors influencing growth and development of fetus, <input type="checkbox"/> Genetic patterns of common pediatric disorders, chromosomal aberrations, genetic assessment and counseling legal and ethical aspects of genetic, screening and counseling role of nurse in genetic counseling, <input type="checkbox"/> Importance of prenatal care and role of pediatric nurse.	<b>L1,2</b>	<b>15</b>
<b>Module V</b> <b>Growth and Development of children</b> <input type="checkbox"/> Principles of growth and development, <input type="checkbox"/> Concepts and theories of growth and development, <input type="checkbox"/> Developmental tasks and special needs from infancy to adolescence, developmental milestones,	<b>L4,5,6</b>	<b>15</b>

<input type="checkbox"/> Assessment of growth and development of pediatric clients, <input type="checkbox"/> Factors affecting growth and development.		
<b>Module VI</b> <b>Behavioral Pediatrics and Pediatric Nursing</b> <input type="checkbox"/> Parent child relationship, <input type="checkbox"/> Basic behavioral pediatric principles and specific behavioral pediatric concepts/disorders- maternal deprivation, failure to thrive, child abuse, the battered child, <input type="checkbox"/> Common behavioral problems and their management, <input type="checkbox"/> Child guidance clinic.	<b>L1, 2,3</b>	<b>15</b>
<b>Module VII</b> <b>Preventive Pediatrics and Pediatric Nursing</b> <input type="checkbox"/> Concept, aims and scope of preventive pediatrics, <input type="checkbox"/> Maternal health and its influence on child health antenatal aspects of preventive pediatrics, <input type="checkbox"/> Immunization, expanded program on immunization/ universal immunization program and cold chain, <input type="checkbox"/> Nutrition and nutritional requirements of children, changing patterns of feeding, baby- friendly hospital initiative and exclusive breast feeding, <input type="checkbox"/> Health education, nutritional education for children <input type="checkbox"/> Nutritional programs <input type="checkbox"/> National and international organizations related to child health, Role of pediatric nurse in the hospital and community.	<b>L1,2,3</b>	<b>15</b>
<b>Module VIII</b> <b>Neonatal Nursing</b> <input type="checkbox"/> New born baby- profile and characteristics of the new born,	<b>L1,2,3</b>	<b>30</b>

<input type="checkbox"/> Assessment of the new born, <input type="checkbox"/> Nursing care of the new born at birth, care of the new born and family, <input type="checkbox"/> High risk newborn- pre term and term neonate and growth retarded babies, <input type="checkbox"/> Identification and classification of neonates with infections, HIV & AIDS, Ophthalmia neonatorum, congenital syphilis. <input type="checkbox"/> High risk new born- Identification, classification and nursing management <input type="checkbox"/> Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU.		
<b>Module IX</b> <b>IMNCI</b> (Integrated management of neonatal and childhood illnesses)	<b>L4, 5, 6</b>	<b>30</b>

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

## 7. Examination Scheme (Theory): Internals-25, External- 75

<b>CHN4103</b>	<b>Community Health Nursing-1</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	<b>15</b>	<b>20</b>		<b>15</b>
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

**Course Catalogue:** The course is designed to assist students in developing expertise and in-depth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & Group and develop skills to function as Community Health Nurse specialist/practitioner.

#### **Course Objectives:**

The course is designed to develop an understanding of concepts and constructs of theoretical basis of community health nursing and further enable student to function as an educator, manager and researcher in the field of Community Health nursing.

#### **Course Outcomes:**

On completion of this course students will be able to:

CO1: Describe the History and development of community health nursing, National Policies and Programmes

CO2: Explain the concepts and issues of health and eco system

CO3: Discuss the Approaches of Population dynamics and control

CO4: Explain the Quality Assurance in Community health Nursing and Family health nursing process

CO5: Explain the Maternal and neonatal care, Integrated Management of Neonatal And Childhood Illnesses

CO6: Describe the Disaster Management and Nursing Care in emergencies

CO7: Discuss the Information, education and communication and Management information and evaluation system

CO8: Explain the Health care delivery system in India

---

## PROGRAMME SPECIFIC OUTCOMES:-

On completion of M.Sc. Nursing programme in Community Health Nursing, the post graduates will be able to:

PSO1 : Assess the health status, identify nursing needs, plan, implement and evaluate nursing care for patients/client that contribute to health of individuals, families and communities.

PSO2: Demonstrate competency in techniques of nursing skills based on concepts and principles from specialized areas of nursing, physical, biological and behavioral sciences. And Participate as member of health care team in the promotive, preventive, curative and restorative health care delivery system of the country.

PSO3: Demonstrate leadership, managerial skills, qualities and decision-making abilities, teaching and communication skills in clinical/ community health settings.

PSO4: Participation in research activities towards continued learning for personal and professional development, practice ethical values and utilize the research findings to improve the quality of care.

<b>PSN4103</b>	<b>Mental Health (Psychiatric) Nursing</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	<b>15</b>	<b>20</b>		<b>15</b>
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

**Course Catalog:** This course is designed to assist students in developing expertise and in depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various Psychiatric conditions. It will enable the student to function as Psychiatric Nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric Nursing

**Course Objectives:**

1. This course is designed to assist students in developing expertise and in depth understanding in the field of Psychiatric Nursing.
2. It will help students to appreciate the client as a holistic individual and develop skill to function psychiatric nurse specialist.
3. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing.

**Course Outcomes:**

On completion of this course, the students will be able to:

CO1: Utilize/apply the concepts, theories and principles of psychiatric nursing science

CO2: Demonstrate advance competence in practice of psychiatric nursing

CO3: Practice as a psychiatric nurse specialist.

CO4: Demonstrate leadership qualities and function effectively as psychiatric nurse educator and manager.

CO5: Demonstrate skill in conducting nursing research, interpreting and utilizing the findings from health related research.

CO6: Demonstrate the ability to plan and effect change in psychiatric nursing practice and in the health care delivery system.

CO7: Establish collaborative relationship with members of other disciplines

CO8: Demonstrate interest in history taking of the psychiatric patients..

CO9 : Explain the Psycho social and physical therapies

CO10 : Describe the various Psychopharmacology

CO11 : Enumerate the Electroconvulsive Therapy

CO12: Explain the Alternative systems of medicine in mental health

Modules	Blooms level*	Number of hours
<b>MODULE: 1: Introduction.</b> <ul style="list-style-type: none"><li>• Mental Health and Mental Illness</li><li>• Historical perspectives</li><li>• Trends, issues and magnitude</li><li>• Contemporary practices</li><li>• Mental health laws/Acts</li><li>• National mental health program -National mental health authority, state mental health authority</li><li>• Human rights of mentally ill</li><li>• Mental Health/ Mental Illness Continuum</li><li>• Classification of mental illnesses-ICD, DSM</li><li>• Standards of Psychiatric nursing</li><li>• Challenges and Scope of psychiatric nursing</li><li>• Multi-disciplinary team and role of nurse<ul style="list-style-type: none"><li>• Role of psychiatric nurse- extended and expanded</li><li>• Principles and practice of Psychiatric Nursing Review</li></ul></li></ul>	L1, L2 and L3	10
<b>MODULE 2: Concepts of Psychobiology</b>	L2, L3	15

<ul style="list-style-type: none"> <li>• The Nervous System: <ul style="list-style-type: none"> <li>– An Anatomical Review</li> <li>– The Brain and limbic system</li> <li>– Nerve Tissue</li> <li>– Autonomic Nervous system</li> <li>– Neurotransmitters</li> </ul> </li> <li>• Neuroendocrinology <ul style="list-style-type: none"> <li>– Pituitary, Thyroid Gland</li> <li>– Circadian Rhythms</li> </ul> </li> <li>• Genetics</li> <li>• Neuro psychiatric disorders</li> <li>• Psychoimmunology <ul style="list-style-type: none"> <li>– Normal Immune response</li> <li>– Implications for psychiatric Illness</li> <li>– Implications for Nursing</li> </ul> </li> </ul>	and L4	
<b>MODULE 3: Theories of Personality Development and relevance to nursing practice</b> <ul style="list-style-type: none"> <li>• Psychoanalytic Theory- Freud's</li> <li>• Interpersonal Theory-Sullivan's</li> <li>• Theory of Psychosocial Development-Erikson's</li> </ul>	L2, L3 and L4	10

### **Course Catalogue:**

This course is designed to assist students in developing expertise and in depth understanding in the field of Obstetrics & Gynecological Nursing. It will help students o appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as an educator, manager and researcher in the field of Obstetrics & Gynecological Nursing.

### **Course Objectives:**

The objective of this course is to:

1. Be in a position to describe the physiology and management of the various stages of labour and puerperium.
2. Be is a position to manage the mothers during the normal vaginal delivery
3. Be in a position to conduct normal vaginal delivery and also be able to resuscitate the newborn babies immediately after birth.
4. Be in a position to identify the at risk mothers and manage them accordingly.
5. Be in a position to identify the various alternative and complimentary therapies in obstetrics & gynaecological nursing
6. Be in a position to incorporate evidence based nursing practice and identify the areas of nursing research.

### **Course Outcomes:**

At the end of the course students will be able to:

- 
- CO1: Appreciate the trends in the field of midwifery, obstetrics and gynecological as a specialty.
- CO2: Describe the population dynamics and indicators of maternal and child health.
- CO3: Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labour and puerperium.
- CO4: Provide comprehensive nursing care to women during reproductive period and newborns.
- CO5: Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynecological nursing.
- CO6: Identify and analyze the deviations from normal birth process and refer appropriately.
- CO7: Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse.
- CO8: Counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation.
- CO9: Describe the role of various type of complementary and alternative therapies in obstetric and gynecological nursing.
- CO10: Incorporate evidence based nursing practice and identify the areas of research on obstetric and gynecological nursing.
- CO11: Describe the recent advancement in contraceptive technology and birth control measures.
- CO12: Appreciate the legal and ethical issues pertaining to obstetric and gynecological nursing.

---

**Course coverage:**

<b>Modules</b>	<b>Bloom's level</b>	<b>Number of hours</b>
<b>Module I</b> <b>Introduction</b> <ul style="list-style-type: none"><li>• Historical and contemporary perspectives</li><li>• Epidemiological aspects of maternal and child health</li><li>• Magnitude of maternal and child health problems</li><li>• Issues of maternal and child health : Age, Gender, Sexuality, psycho Socio cultural factors</li><li>• Preventive obstetrics</li><li>• National health and family welfare programmes related to maternal and child health: health care delivery system- National Rural health mission, Role of NGO's</li><li>• Theories, models and approaches applied to midwifery practice</li><li>• Role and scope of midwifery practice: Independent Nurse midwifery practitioner</li><li>• Legal and Ethical issues: Code of ethics and standards of midwifery practice, standing orders</li><li>• Evidence based midwifery practice</li><li>• Research priorities in obstetric and gynaecological nursing.</li></ul>	L1, L2	10
<b>Module II</b> <ul style="list-style-type: none"><li>• Review of anatomy and physiology of human reproductive system: male and female</li><li>• Hormonal cycles</li><li>• Embryology</li><li>• Genetics, teratology and counselling</li></ul>	L1, L2	15

• Clinical implications		
<b>Module III</b> <b>Pregnancy</b> <ul style="list-style-type: none"> <li>• Maternal adaptation : Physiological, psychosocial</li> <li>• Assessment – Maternal and foetal measures Maternal measures: History taking , examination-General, physical and obstetrical measure, identification of high risk</li> <li>• Foetal measure- clinical parameters, biochemical- human estriol, Maternal Serum Alfa Feto Protein, Acetyl Choline esterase (AchE), Triple Test Aminocentesis, Cordocentesis, chorionic villus sampling (CVS)</li> <li>• Biophysical- (US IMAGING, Foetal movement count, Ultra Sonography, Cardiotocography, cardiotomography, Non Stress Test(NST), Contraction stress test(CST), amnioscopy, foetoscopy.</li> <li>• Radiological examination,</li> <li>• Interpretation of diagnostic tests and nursing implications</li> <li>• Nursing management of the pregnant women, minor disorders of pregnancy and management, preparation for child birth and parenthood, importance of institutional delivery , choice of birth setting, importance and mobilizing of transportation, prenatal counselling, role of nurse and crisis intervention, identification of high risk pregnancy and refer</li> <li>• Alternative/complementary therapies</li> </ul>	L1, L2,	10
<b>Module IV</b> <ul style="list-style-type: none"> <li>• <b>Normal Labour and nursing management</b> <ul style="list-style-type: none"> <li>– Essential factors of labour</li> <li>– Stages and onset</li> </ul> </li> <li>• <b>First stage: Physiology of normal labour</b> <ul style="list-style-type: none"> <li>– Use of partograph: Principles, use and critical analysis,</li> </ul> </li> </ul>	L1, L2, L3, L4	5

<p>evidence based studies</p> <ul style="list-style-type: none"> <li>–Analgesia and anaesthesia in labour</li> <li>–Nursing management</li> </ul> <p>• <b>Second stage</b></p> <ul style="list-style-type: none"> <li>– Physiology , intrapartum monitoring</li> <li>– Nursing management.</li> <li>– Resuscitation , immediate newborn care and initiate breastfeeding (Guidelines of National neonatology forum of India)</li> </ul> <p>• <b>Third stage</b> Physiology and nursing management</p> <p>• <b>Fourth stage – Observation, critical analysis and Nursing management.</b></p> <ul style="list-style-type: none"> <li>–Various child birth practice: water birth, position change etc</li> <li>–Evidence based practice in relation to labour intervention</li> </ul> <p>• <b>Role of nurse midwifery practitioner</b></p> <p>• Alternative/complementary therapies</p>		
<p><b>Module V</b></p> <p><b>Normal puerperium and nursing management</b></p> <ul style="list-style-type: none"> <li>• Physiology of puerperium</li> <li>• Physiology of lactation, lactation management, exclusive breastfeeding, Baby friendly hospital initiative (BFHI)</li> <li>• Assessment of postnatal women</li> <li>• Minor discomforts and complications of puerperium</li> <li>• Management of mothers during puerperium: Postnatal exercises Rooming in, bonding, warm chain</li> <li>• Evidence based studies</li> <li>• Role of nurse midwifery practitioner</li> <li>• Alternative/complementary therapies</li> </ul>	L3, L4	10

<b>Module VI</b> <b>Normal Newborn</b> <ul style="list-style-type: none"> <li>• Physiology and characteristics of normal newborn</li> <li>• Physical and Behavioural assessment of newborn</li> <li>• Needs of newborn</li> <li>• Essential newborn care: Exclusive breast feeding, Immunization, Hygiene measures, Newborn nutrition</li> <li>• Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU</li> <li>• Observation and care of newborn</li> <li>• Parenting process</li> </ul>	L1,L2, L3	10
<b>Module VII</b> <b>Pharmacodynamics in obstetrics</b> <ul style="list-style-type: none"> <li>• Drugs used in pregnancy, labour, post partum and newborn</li> <li>• Calculation of drug dose and administration</li> <li>• Effects of drugs used</li> <li>• Anaesthesia and analgesia in obstetrics</li> <li>• Roles and responsibilities of midwifery nurse practitioner</li> <li>• Standing orders and protocols and use of selected life saving drugs and interventions of obstetric emergencies approved by the MOHFW</li> </ul>	L2,L3,L4	10
<b>Module VIII</b> <b>Family welfare services</b> <ul style="list-style-type: none"> <li>• Population dynamics</li> <li>• Demography trends: vital statistics, calculation of indicators especially maternal and neonatal mortality rates and problems and other health problems</li> <li>• Recent advancement in contraceptive technology</li> </ul>	L1,L2	10

<ul style="list-style-type: none"> <li>• Role of nurses in family welfare programmes in all settings</li> <li>• Role of independent nurse midwifery practitioner</li> <li>• Family life education</li> <li>• Evidence based studies</li> <li>• Information, Education and Communication(IEC)</li> <li>• Management information and evaluation system(MIES)</li> <li>• Teaching and supervision of health team members</li> </ul>		
<b>Module IX</b> <b>Infertility</b> <ul style="list-style-type: none"> <li>• Primary and secondary causes</li> <li>• Diagnostic procedures</li> <li>• Counselling: ethical and legal aspects of assisted reproductive technology (ART)</li> <li>• Recent advancement in infertility management.</li> <li>• Adoption procedures</li> <li>• Role of nurses in infertility management.</li> </ul>	L1, L2 L3	35
<b>Module X</b> <b>Menopause</b> <ul style="list-style-type: none"> <li>• Physiological, psychological and social aspects</li> <li>• Hormone Replacement Therapy</li> <li>• Surgical menopause</li> <li>• Counselling and guidance</li> <li>• Role of midwifery nurse practitioner</li> </ul>	L1, L2 L3	10

<b>Module XI</b>	L1, L2	5
<b>Abortion</b>	L3	
<ul style="list-style-type: none"> <li>• Types, causes</li> <li>• Legislations, Clinical rights and professional responsibility</li> <li>• Abortion procedures</li> <li>• Complications</li> <li>• Nursing management</li> <li>• Role of midwifery nurse practitioner</li> </ul>

Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

**Course Catalogue:** This course is aimed at developing a holistic approach in rendering nursing care to the patients/clients in the hospital as well as in the community respectively by implementing modern trends & methods in nursing profession for the specific protection, promotion, prevention and rehabilitation of the patients/clients.

**Course Objectives:**

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

**Course Outcomes:**

On completion of this course students will be able to:

CO1: Describe the History of development of nursing profession, characteristics, criteria of the profession, perspective of nursing profession-national, global

CO2: Explain the Health care delivery system- national, state, district as well as at local level.

CO3: Discuss the Approaches to common genetic disorders

CO4: Describe the Application of epidemiology in health care delivery, Health surveillance and health informatics

CO5: Explain the Bio-Psycho social pathology

CO6: Describe the Philosophy as well as Theories of Nursing along with its implication in health care delivery system.

CO7: Explain Nursing process approach for the individual, family as well as community

CO8: Discuss Psychological aspects and Human relations

CO9: Describe the Extended and expanded role of the Nurse in promotive, preventive, curative as well as restorative health care delivery system in community and institutions

CO10: Explain the Computer applications for patient care delivery system as well as in Nursing Practice

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<p>MODULE 1:</p> <p><b>Nursing as a Profession</b></p> <ul style="list-style-type: none"> <li>History of development of nursing profession, characteristics, criteria of the profession, perspective of nursing profession-national, global</li> <li>Code of ethics(INC), code of professional conduct(INC), autonomy and accountability, assertiveness, visibility of nurses, legal considerations</li> <li>Role of regulatory bodies</li> <li>Professional organizations and unions-self defense, individual and collective bargaining</li> <li>Educational preparations, continuing education, career opportunities, professional advancement &amp; role and scope of nursing education.</li> <li>Role of research, leadership and management.</li> <li>Quality assurance in nursing (INC).</li> <li>Futuristic nursing.</li> </ul>	L1, and L2	10
<p>MODULE 2:</p> <p><b>Health care delivery</b></p> <ul style="list-style-type: none"> <li>Health care environment, economics, constraints, planning process, policies, political process vis a vis nursing profession.</li> <li>Health care delivery system- national, state, district and local level.</li> </ul>	L1,L2, and L3	10

<ul style="list-style-type: none"> <li>• Major stakeholders in the health care system-Government, non-govt, Industry and other professionals.</li> <li>• Patterns of nursing care delivery in India.</li> <li>• Health care delivery concerns, national health and family welfare programs, inter-sectoral coordination, role of nongovernmental agencies.</li> <li>• Information, education and communication (IEC).</li> <li>• Tele-medicine.</li> </ul>		
<p>MODULE 3:</p> <p><b>Genetics</b></p> <ul style="list-style-type: none"> <li>• Review of cellular division, mutation and law of inheritance, human genome project ,The Genomic era.</li> <li>• Basic concepts of Genes, Chromosomes &amp; DNA.</li> <li>• Approaches to common genetic disorders.</li> <li>• Genetic testing – basis of genetic diagnosis, Pre symptomatic and predisposition testing, Prenatal diagnosis &amp; screening, Ethical, legal &amp; psychosocial issues in genetic testing.</li> <li>• Genetic counselling.</li> <li>• Practical application of genetics in nursing.</li> </ul>	L1,L2, L3 and L4	15
<p>MODULE 4:</p> <p><b>Epidemiology</b></p> <ul style="list-style-type: none"> <li>• Scope, epidemiological approach and methods,</li> <li>• Morbidity, mortality,</li> <li>• Concepts of causation of diseases and their screening,</li> <li>• Application of epidemiology in health care delivery, Health surveillance and health informatics</li> <li>• Role of nurse</li> </ul>	L1,L2, and L3	15
<p>MODULE 5:</p>	L1,L2	15

<p><b>Bio-Psycho social pathology</b></p> <ul style="list-style-type: none"> <li>• Pathophysiology and Psychodynamics of disease causation.</li> <li>• Life processes, homeostatic mechanism, biological and psycho-social dynamics in causation of disease, life style.</li> <li>• Common problems: Oxygen insufficiency, fluid and electrolyte imbalance, nutritional problems, hemorrhage and shock, altered body temperature, unconsciousness, sleep pattern and its disturbances, pain, sensory deprivation.</li> <li>• Treatment aspects: pharmacological and pre- post operative care aspects,</li> <li>• Cardio pulmonary resuscitation.</li> <li>• End of life Care</li> <li>• Infection prevention (including HIV) and standard safety measures, bio-medical waste management.</li> <li>• Role of Nurse- Evidence based Nursing practice; Best practices</li> <li>• Innovations in Nursing.</li> </ul>	and L3	
<p>MODULE 6:</p> <p><b>Philosophy and Theories of Nursing</b></p> <ul style="list-style-type: none"> <li>• Values, Conceptual Models, Approaches.</li> <li>• Nursing theories: Nightingale's, Henderson's, Roger's, Peplau's, Abdella's, Lewine's, Orem's, Johnson's, King's, Neuman's, Roy's, Watson Parsce, etc and their applications,</li> <li>• Health belief models, communication and management, etc</li> <li>• Concept of Self health.</li> <li>• Evidence based practice model.</li> </ul>	L1, L2,L3 and L5	15
<p>MODULE 7:</p> <p><b>Nursing process approach</b></p> <ul style="list-style-type: none"> <li>• Health Assessment- illness status of patients/clients (Individuals, family, community), Identification of health illness problems,</li> </ul>	L1,L2, and L3	10

<p>health behaviors, signs and symptoms of clients.</p> <ul style="list-style-type: none"> <li>• Methods of collection, analysis and utilization of data relevant to Nursing Process. Formulation of nursing care plans, health goals, implementation, modification and evaluation of care.</li> </ul>		
<p>MODULE 8:</p> <p><b>Psychological aspects and Human relations</b></p> <ul style="list-style-type: none"> <li>• Human behavior, Life processes &amp; growth and development, personality development, defense mechanisms,</li> <li>• Communication, interpersonal relationships, individual and group, group dynamics, and organizational behavior,</li> <li>• Basic human needs, Growth and development, (Conception through preschool, School age through adolescence, Young &amp; middle adult, and Older adult)</li> <li>• Sexuality and sexual health.</li> <li>• Stress and adaptation, crisis and its intervention, Coping with loss, death and grieving,</li> <li>• Principles and techniques of Counseling.</li> </ul>	L1,L2, and L5	15
<p>MODULE 9:</p> <p><b>Nursing practice</b></p> <ul style="list-style-type: none"> <li>• Framework, scope and trends.</li> <li>• Alternative modalities of care, alternative systems of health and complimentary therapies.</li> <li>• Extended and expanded role of the Nurse, in promotive, preventive, curative and restorative health care delivery system in community and institutions.</li> <li>• Health promotion and primary health care.</li> <li>• Independent practice issues: - Independent Nurse-midwifery practitioner.</li> <li>• Collaboration issues and models-within and outside Nursing.</li> </ul>	L1,L2, and L3	15

<ul style="list-style-type: none"> <li>• Models of Prevention,</li> <li>• Family Nursing, Home Nursing,</li> <li>• Gender sensitive issues and women empowerment.</li> <li>• Disaster Nursing.</li> <li>• Geriatric considerations in Nursing.</li> <li>• Evidence based Nursing practice- best practices</li> <li>• Trans-cultural Nursing.</li> </ul>		
<b>MODULE 10:</b>  <b>Computer applications for patient care delivery system and Nursing Practice</b> <ul style="list-style-type: none"> <li>• Use of computers in teaching, learning, research and Nursing practice.</li> <li>• Windows, MS office: Word, Excel, Power Point,</li> <li>• Internet, literature search,</li> <li>• Statistical packages,</li> <li>• Hospital management information system: software.</li> </ul>	L1,L2, L3 and L4	10

### **Catalog Description**

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It also enables the students to evaluate research studies and utilize research findings to improve quality of Nursing practice, education and management. It will further enable the students to develop an understanding of the statistical methods and apply them in conducting research studies in Nursing.

### **Course Objectives**

The objective of this course is to

1. to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan.
2. enable the students to evaluate research studies and utilize research findings to improve quality of Nursing practice, education and management.
3. enable the students to develop an understanding of the statistical methods and apply them in conducting research studies in Nursing.

### **Course Outcomes:**

At the end of the course the students will be able to:

CO1. Define the terms used in research

CO 2. Describe concepts of scientific inquiry

- 
- CO 3. Describe research methodology
- CO 4. Critically analyze research studies
- CO 5. Develop acceptable research proposal
- CO 6. Demonstrate initial competency to conduct health related research
- CO 7. Write, present, interpret and utilize health related research
- CO 8. Write scientific paper for publication
- CO 9. Explain basic concepts related to statistics
- CO 10. Identify scope of statistics
- CO 11. Organize and tabulate the data and present it
- CO 12. Use descriptive and inferential statistics to predict the results
- CO 13. Apply & interpret measures of central tendency & measures of variance
- CO 14. Identify concepts related to probability
- CO 15. Use parametric and non- parametric statistical methods.
- CO 16. Draw conclusions of the study and to predict statistical significance of the results
- CO 17. Describe vital and health statistics and their use

### Course Content

Modules	Blooms level*	Number of hours
<b>Unit I: Introduction</b> Methods of acquiring knowledge – problem solving and scientific method. Research – Definition, characteristics, purposes, kinds of	L1, L2,L3 and L4	10

research, Historical Evolution of research in Nursing, Basic research terms, Scope of Nursing research: areas, problems in Nursing, health and social research, Concept of evidence based practice, Ethics in research, Overview of Research process.		
<b>Unit II</b> <b>Review of Literature</b> Importance, purposes, sources, criteria for selection of resources and steps in reviewing literature.	L1,L2, L3 and L5	5
<b>Unit III</b> <b>Research Approaches and designs</b>  Type: Quantitative and Qualitative, Historical, survey and experimental –Characteristics, types advantages and disadvantages, Qualitative: Phenomenology, grounded theory, ethnography	L2, L3 and L4	12
<b>Unit IV:</b>  <b>Research problem:</b> Identification of research problem, Formulation of problem statement and research Objectives:, Definition of terms, Assumptions and delimitations, Identification of variables, Hypothesis – definition, formulation and types.	L1,L2, L3, L4 and L5	10
<b>Unit V:</b> <b>Developing theoretical/conceptual framework</b> <ul style="list-style-type: none"> <li>Theories: Nature, characteristics, Purpose and uses</li> <li>Using, testing and developing conceptual framework, models and</li> </ul>	L1,L2 and L4	5

theories.		
<b>Unit VI –Sampling</b> <ul style="list-style-type: none"> <li>• Population and sample</li> <li>• Factors influencing sampling</li> <li>• Sampling techniques</li> <li>• Sample size</li> <li>• Probability and sampling error</li> <li>• Problems of sampling</li> </ul>	L1,L2, L3, L4 and L5	6
<b>Unit VII</b>  <b>Tools and methods of Data collection:</b> <ul style="list-style-type: none"> <li>• Concepts of data collection</li> <li>• Data sources, methods/techniques quantitative and qualitative.</li> <li>• Tools for data collection – types, characteristics and their development</li> <li>• Validity and reliability of tools</li> </ul> Procedure for data collection	L1,L2, L3, L4 and L5	20
<b>Unit VIII</b>  <b>Implementing research plan</b> <ul style="list-style-type: none"> <li>• Pilot Study, review research plan (design), planning for data collection, Administration of tool /interventions, collection of data</li> </ul>	L1,L2, L3, L4 and L5	5
<b>Unit IX</b>  <b>Analysis and interpretation of data</b> <ul style="list-style-type: none"> <li>• Plan for data analysis: quantitative and qualitative</li> </ul>	L1,L2, L3, L4 and L5	10

<ul style="list-style-type: none"> <li>• Preparing data for computer analysis and presentation.</li> <li>• Statistical analysis</li> <li>• Interpretation of data</li> <li>• Conclusion and generalizations</li> <li>• Summary and discussion</li> </ul>		
<b>Unit X</b>  <b>Reporting and utilizing research findings:</b> <ul style="list-style-type: none"> <li>• Communication of research results; oral and written</li> <li>• Writing research report purposes, methods and style Vancouver, American Psychological Association (APA), Campbell etc.</li> <li>• Writing scientific articles for publication: purposes &amp; style</li> </ul>	L1,L2, L3, L4 and L5	10
<b>Unit XI</b>  Critical analysis of research reports and articles	L1,L2, L3, L4 and L5	3
<b>Unit XII</b> <ul style="list-style-type: none"> <li>• Developing and presenting a research proposal</li> </ul>	L1,L2, L3, L4 and L5	4
<b>STATISTICS</b>		
<b>Unit I –</b> <b>Introduction:</b> Concepts, types, significance and scope of statistics, meaning of data, <ul style="list-style-type: none"> <li>• Sample, parameter</li> <li>• Type and levels of data and their measurement</li> </ul>	L1,L2, L3, L4 and L5	7

<ul style="list-style-type: none"> <li>• Organization and presentation of data – Tabulation of data;</li> <li>• Frequency distribution</li> <li>• Graphical and tabular presentations.</li> </ul>		
<b>Unit II -</b>  <b>Measures of central tendency:</b> <ul style="list-style-type: none"> <li>• Mean, Median, Mode</li> </ul>	L1,L2, L3, L4 and L5	4
<b>Unit III</b>  <b>Measures of variability;</b> <ul style="list-style-type: none"> <li>• Range, Percentiles, average deviation, quartile deviation, standard deviation</li> </ul>	L1,L2, L3, L4 and L5	4
<b>Unit V</b>  <b>Measures of relationship:</b> <ul style="list-style-type: none"> <li>• Correlation – need and meaning</li> <li>• Rank order correlation</li> <li>• Scatter diagram method</li> <li>• Product moment correlation</li> <li>• Simple linear regression analysis and prediction.</li> </ul>	L1,L2, L3, L4 and L5	6
<b>Unit VI</b>  <b>Designs and meaning:</b> <ul style="list-style-type: none"> <li>• Experimental designs</li> <li>• Comparison in pairs, randomized block design, Latin squares.</li> </ul>	L1,L2, L3, L4 and L5	5

<b>Unit VII</b>  <b>Significance of Statistic and Significance of difference between two Statistics (Testing hypothesis)</b> <ul style="list-style-type: none"> <li>Non parametric test – Chi-square test, Sign, median test, Mann Whitney test.</li> <li>Parametric test – ‘t’ test, ANOVA, MANOVA, ANCOVA</li> </ul>	L1,L2, L3, L4 and L5	8
<b>Unit VIII</b>  <b>Use of statistical methods in psychology and education:</b> <ul style="list-style-type: none"> <li>Scaling – Z score, Z Scaling</li> <li>Standard Score and T Score</li> <li>Reliability of test Scores: test-retest method, parallel forms, split half method.</li> </ul>	L1,L2, L3, L4 and L5	5
<b>Unit IX</b>  <b>Application of statistics in health:</b> <ul style="list-style-type: none"> <li>Ratios, Rates, Trends</li> <li>Vital health statistics – Birth and death rates.</li> <li>Measures related to fertility, morbidity and mortality</li> </ul>	L1,L2, L3, L4 and L5	4
<b>Unit X</b>  <b>Use of Computers for data analysis</b> <ul style="list-style-type: none"> <li>Use of statistical package.</li> </ul>	L1,L2, L3, L4 and L5	4

### **Modes of Evaluation: Quiz/Assignment/ Seminar/Written Examination**

### **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	5	8	7	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, EE: End Semester Examination; Att: Attendance

### Course Outcomes Assessment

This course contributes towards the learning outcomes, **‘nursing research and statistics**. The outcome will be measured by the performance of students in various class tests/assignments in addition to the End Semester Examination (ESE) that contains significant number of questions on problems related to the **nursing research and statistics**.

Relationship between the course outcomes (COs), programme Outcomes (PO) and learning outcomes (Los)

<b>MSN4203</b>	Medical Surgical Nursing CS I & II Practical	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:				<b>22</b>
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

**Course Catalogue:** The course is designed to enable students to develop expertise in the field of medical surgical nursing procedures.

**Course Description:** It will help students to appreciate the adults as a holistic individual and develop skill to function as a Medical Surgical Nurse specialist.

**Course Outcomes:**

On completion of this course students will be able to:

CO1: Apply concepts & theories related to health promotion.

CO2: Appreciate the client as a holistic individual.

CO3: Perform physical, psychosocial assessment of Medical – Surgical patients.

CO4: Apply Nursing process in providing care to patients.

CO5: Integrate the concept of family centered nursing care with associated disorder such as genetic, congenital and long-term illness.

CO6: Recognize and manage emergencies with Medical- Surgical patients.

CO7: Describe various recent technologies & treatment modalities in the management of critically ill patients.

CO8: : Recognize the role of Nurse practitioner as a member of the Medical – Surgical health team

CO9: Prepare a design for layout and management of Medical – Surgical Units.

**PROGRAMME SPECIFIC OUTCOMES:-**

---

On completion of M.Sc. Nursing programme the post graduates will be able to:

PSO1 : Assess the health status, identify nursing needs, plan, implement and evaluate nursing care for patients/client that contribute to health of individuals, families and communities.

PSO2: Demonstrate competency in techniques of nursing skills based on concepts and principles from specialized areas of nursing, physical, biological and behavioral sciences. And Participate as member of health care team in the promotive, preventive, curative and restorative health care delivery system of the country.

PSO3: Demonstrate leadership, managerial skills, qualities and decision-making abilities, teaching and communication skills in clinical/ community health settings.

PSO4: Participation in research activities towards continued learning for personal and professional development, practice ethical values and utilize the research findings to improve the quality of care.

### **Catalog Catalogue:**

This course is designed to assist students in developing expertise and in depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various Psychiatric conditions. It will enable the student to function as Psychiatric Nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric Nursing

**Course Objectives:** On completion of the two year M.Sc. Nursing (Psychiatry) programme, the Post Graduate Nurse will be able to provide comprehensive nursing care to patients with psychiatric problems in preventive, curative and rehabilitation aspects.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Utilize/apply the concepts, theories and principles of psychiatric nursing science

CO2.Demonstrate advance competence in practice of psychiatric nursing

&Practice as a psychiatric nurse specialist.

CO3.Demonstrate leadership qualities and function effectively as psychiatric nurse educator and manager.

CO4.Demonstrate skill in conducting nursing research, interpreting and utilizing the findings from health related research.

CO5.Demonstrate the ability to plan and effect change in psychiatric nursing practice and in the health care delivery system.

---

CO6.Establish collaborative relationship with members of other disciplines and Demonstrate interest in continued learning for personal and professional advancement

CO7 Elaborate the Substance-Related Disorders

CO8 Explain the Schizophrenia and Other Psychotic Disorders (Check ICD10)

CO9 Describe the mood disorder

CO10 Describe the Anxiety disorder

CO11 Discuss Somatoform and Sleep Disorders

CO12 Discuss the Dissociative Disorders and Management

CO13 Elaborate the Sexual and Gender Identity Disorders

CO14 Enumerate the Eating Disorders

CO15 Describe the Adjustment and Impulse Control Disorders

CO16 Explain the Medical Conditions due to Psychological Factors

CO17 Explain the Personality Disorders

CO18 Discuss the The Aging Individual

CO19 Describe the person living with HIV Disease

CO20 Explain the Problems Related to Abuse or Neglect

CO21 Elaborate the Community Mental Health Nursing

CO22 Discuss the Ethical and Legal Issues in Psychiatric/Mental Health Nursing

CO23 Describe the Psychosocial rehabilitation

CO24 Discuss the Counseling

CO25 Explain the Administration and management of Psychiatric units including emergency unit

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Principles and practice of Psychiatric Nursing</b> Review	L1, L2 and L3	6

**Course Catalogue :** The course is designed to assist students in developing expertise and in-depth understanding in the field of Community Health Nursing. It would help students to appreciate the Quality assurance and holistic geriatric care and understand the Community health services.

**Course Objectives:**

This course is designed to assist students in developing expertise and in depth understanding in the field of community health Nursing. It will help students to develop advanced skills for nursing intervention in various aspects of community health care settings. It will enable the student to function as community health Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of community health Nursing

**Course Outcomes:**

On completion of this course students will be able to:

CO1: Describe the Epidemiological Methods in Community Health Nursing

CO2: Explain the National Health and Family welfare programmes

CO3: Understand the approaches in School Health Services

CO4: understand the International Health

CO5: Understand the Quality Assurance

CO6: describe the Geriatric care

CO7: Explain the Rehabilitation Council of India

CO8: Understand the Community Health Services

CO9 : Explain the Occupational Health

---

**Course Coverage:**

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction</b>  <b>Epidemiology</b> <ul style="list-style-type: none"><li>• Introduction</li><li>• Concept, scope, definition, trends, History and development of modern Epidemiology</li><li>• Contribution of epidemiology</li><li>• Implications</li><li>• Epidemiological methods</li><li>• Measurement of health and disease:</li><li>• Health policies</li><li>• Epidemiological approaches<ul style="list-style-type: none"><li>• Study of disease causatives</li><li>• Health promotion</li><li>• Levels of prevention</li></ul></li><li>• Epidemiology of<ul style="list-style-type: none"><li>• Communicable diseases</li><li>• Non-communicable diseases</li></ul></li><li>• Emerging and re-emerging diseases Epidemics</li><li>• National Integrated disease Surveillance Programme</li><li>• Health information system</li><li>• National Integrated disease Surveillance Programme</li><li>• Health information system</li><li>• Epidemiology study and reports</li><li>• Role of Community health Nurse</li></ul>	L1, and L2	20

<p><b>MODULE 2: National Health and Family Welfare</b></p> <ul style="list-style-type: none"> <li>Objectives: Organisation/manpower/resources, Activities, Goals, inter-sectoral approach, implementation, item/purpose, role and responsibilities of community health Nurse:             <ul style="list-style-type: none"> <li>National Vector Borne Disease Control Program (NVBDP)</li> <li>National Filaria Control Programme</li> <li>National Leprosy Eradication Programme</li> <li>Revised national TB Control Programme</li> <li>National Programme for Control of Blindness</li> <li>National Iodine Deficiency disorders Control Programme</li> <li>National Mental Health Programme</li> <li>National AIDS Control Programme</li> <li>National Cancer Control Programme</li> <li>RCH I and II</li> <li>Non- communicable disease programmes</li> <li>NRHM</li> <li>Health Schemes</li> </ul> </li> <li>ESI</li> <li>CGHS</li> <li>Health Insurance</li> </ul>	L1,L2	15

### **Course Catalogue:**

This course is designed to assist the student in developing expertise and in depth understanding in the field of Obstetric and gynecological Nursing .It will help the student to develop advanced Nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery Nurse practitioner/ specialist, educator, manager and researcher in the field of obstetric and gynecological Nursing

### **Course Objectives:**

The objective of this course is to:

1. Be in a position to manage the problems of women during pregnancy
2. Be is a position to assess pregnancies at risk due to pre existing health problems
3. Be in a position to identify abnormal labour, pre term labour and obstetrical emergencies
4. Be in a position to identify and manage post partum complications
5. Be in a position to identify and manage high risk newborn
6. Be in a position to identify and manage patients with HIV/ AIDS
7. Be in a position to identify gynecological problems and nursing management
8. Be in a position to manage obstetrical and gynecological unit
9. Be in a position to educate and train staff in obstetrical and gynecological care

### **Course Outcomes:**

At the end of the course students will be able to:

CO1: Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of women with obstetric and gynecological conditions

- 
- CO2: Perform physical, psychological, cultural and spiritual assessment
- CO3: Demonstrate competence in caring for women with obstetrical and gynaecological conditions
- CO4: Demonstrate competence in caring for high risk newborn
- CO5: Identify and manage obstetrical neonatal emergencies as per protocol
- CO6: Practice infection control measures
- CO7: Utilize technology and various diagnostic, therapeutic modalities in the management of obstetrical, gynaecological and neonatal care
- CO8: Demonstrate skill in handling various equipments/ gadgets used for obstetrical, gynaecological and neonatal care
- CO9: Teach and supervise nurses and allied health workers
- CO10: Design a layout of speciality units of obstetrics and gynaecology
- CO11: Develop standards for obstetrical and gynaecological nursing practice
- CO12: Counsel women and families
- CO13: Incorporate evidence based nursing practice and identify the areas of research in the field of obstetrical and gynaecological nursing
- CO14: Function as independent midwifery nurse practitioner

**Course coverage:**

Modules	Bloom's level	No. of hours
<b>Module I</b> <b>Management of problems of women during pregnancy</b> <ul style="list-style-type: none"> <li>Risk approach of obstetrical Nursing care, concept &amp; goals.</li> <li>Screening of high-risk pregnancy, newer modalities of diagnosis.</li> <li>Nursing Management of Pregnancies at risk-due to obstetrical complication               <ul style="list-style-type: none"> <li>Pernicious Vomiting.</li> <li>Bleeding in early pregnancy, abortion, ectopic pregnancy, and gestational trophoblastic diseases.</li> </ul> </li> </ul>	L1, L2	25 hrs

### Course Objectives

The objective of this course is to assist students:

4. In developing expertise and in-depth understanding in the field of cardiovascular and thoracic nursing.

- 
5. To develop advanced skills for nursing intervention in various cardio medical and surgical conditions.
  6. To function as Cardio vascular and Thoracic Nurse practitioner/specialist.
  7. To enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

**Course Outcomes:**

At the end of the course the students will be able to:

CO1: Appreciate trends and issues related to cardio vascular and thoracic Nursing.

CO2: Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of cardio vascular and thoracic CO3: conditions

CO4: Participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio CO5: vascular and thoracic conditions

CO6: Perform physical, psychosocial & spiritual assessment

CO7: Assist in various diagnostic, therapeutic and surgical procedures

CO8: Apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions

CO9: Demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support.

CO10: Describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility

Demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients

CO11: Appreciate team work & coordinate activities related to patient care.

CO12: Practice infection control measures.

CO13: Identify emergencies and complications & take appropriate measures

CO14: Discuss the legal and ethical issues in cardio vascular and thoracic nursing

CO15: Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.

CO16: Appreciate the role of alternative system of medicine in care of patient

---

CO17: Incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing

CO18: Identify the sources of stress and manage burnout syndrome among health care providers.

CO19: Teach and supervise nurses and allied health workers.

CO20: Design a layout of ICCU and ICTU and develop standards for cardiovascular and thoracic nursing practice.

### Course Content

Modules	Blooms level*	Number of hours
<b>Unit I: Introduction</b> <ul style="list-style-type: none"><li>• Historical development, trends and issues in the field of cardiology.</li><li>• Cardio vascular and thoracic conditions – major health problem.</li><li>• Concepts, principles and nursing perspectives</li><li>• Ethical and legal issues</li><li>• Evidence based Nursing and its application in cardio vascular and thoracic nursing</li></ul>	L1, L2 and L3	5
<b>Unit II</b> <b>Epidemiology</b> <ul style="list-style-type: none"><li>• Risk factors: hereditary, psycho social factors, hypertension, smoking, obesity, diabetes mellitus etc</li><li>• Health promotion, disease prevention, Life style modification</li><li>• National health programs related to cardio vascular and thoracic conditions</li><li>• Alternate system of medicine</li><li>• Complementary therapies</li></ul>	L1,L2, L3	5

<p><b>Unit III</b></p> <p><b>Review of anatomy and physiology of heart, lung, thoracic cavity and blood vessels. Embryology of heart and lung.</b></p> <ul style="list-style-type: none"> <li>• Coronary circulation</li> <li>• Hemodynamics and electro physiology of heart.</li> <li>• Bio-chemistry of blood in relation to cardio pulmonary function</li> </ul>	<p>L1, L2 and L3</p>	<p>05</p>
<p><b>Unit IV:</b></p> <p><b>Assessment and Diagnostic Measures:</b></p> <ul style="list-style-type: none"> <li>• History taking</li> <li>• Physical assessment</li> <li>• Heart rate variability: Mechanisms, measurements, pattern, factors, impact of interventions on HRV</li> <li>• Diagnostic tests</li> <li>• Hemodynamic monitoring: Technical aspects, monitoring, functional hemodynamic indices, ventricular function indices, output measurements (Arterial and swan Ganz monitoring). Blood gases and its significance, oxygen supply and demand</li> <li>• Radiologic examination of the chest: interpretation, chest film findings</li> <li>• Electro cardiography(ECG) : electrical conduction through the heart, basic electrocardiography 12 lead electrocardiogram, axis determination - ECG changes in: intraventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance,</li> <li>• Echocardiography: technical aspects, special techniques, echocardiography of cardiac structures in health and disease, newer techniques</li> <li>• Nuclear and other imaging studies of the heart: Magnetic Resonance Imaging.</li> <li>• Cardio electrophysiology procedures: diagnostic studies, interven-</li> </ul>	<p>L1,L2, L3, L4 and L5</p>	<p>20</p>

<p>tional and catheter ablation, Nursing care</p> <ul style="list-style-type: none"> <li>• Exercise testing: indications and Objectives:, safety and personnel, pretest considerations, selection, interpretation, test termination, recovery period</li> <li>• Cardiac catheterization: indications, contraindications, patient preparation, procedure, interpretation of data</li> <li>• Pulmonary function test: Bronchoscope and graphics</li> <li>• Interpretation of diagnostic measures</li> <li>• Nurse's role in diagnostic tests</li> <li>• Laboratory tests using blood: Blood specimen collection, Cardiac markers, Blood lipids, Hematologic studies, Blood cultures, Coagulation studies, Arterial blood gases, Blood Chemistries, cardiac enzyme studies, Serum Concentration of Selected drugs.</li> <li>• Interpretation and role of Nurse</li> </ul>		
<p><b>Unit V:</b></p> <p><b>Cardiac disorders and Nursing management:</b></p> <ul style="list-style-type: none"> <li>• Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and Nursing management of: <ul style="list-style-type: none"> <li>• Hypertension</li> <li>• Coronary Artery Disease.</li> <li>• Angina of various types.</li> <li>• Cardiomegaly</li> <li>• Myocardial Infarction, Congestive cardiac failure</li> <li>• Heart Failure, Pulmonary Edema, Shock.</li> <li>• Rheumatic heart disease and other Valvular Diseases</li> <li>• Inflammatory Heart Diseases, Infective Endocarditis, Myocarditis, Pericarditis.</li> <li>• Cardiomyopathy, dilated, restrictive, hypertrophic.</li> <li>• Arrhythmias, heart block associated illnesses</li> </ul> </li> </ul>	L1,L2, L3 and L4	25
<b>Unit VI</b>	L1,L2,	10

<p><b>Altered pulmonary conditions</b></p> <ul style="list-style-type: none"> <li>• Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and Nursing management of: <ul style="list-style-type: none"> <li>• Bronchitis</li> <li>• Bronchial asthma</li> <li>• Bronchiectasis</li> <li>• Pneumonias</li> <li>• Lung abscess, lung tumor</li> <li>• Pulmonary tuberculosis, fibrosis, pneumoconiosis etc</li> <li>• Pleuritis, effusion</li> <li>• Pneumo, haemo and pyothorax</li> <li>• Interstitial Lung Disease</li> <li>• Cystic fibrosis</li> <li>• Acute and Chronic obstructive pulmonary disease (conditions leading to)</li> <li>• Cor pulmonale</li> <li>• Acute respiratory failure</li> <li>• Adult respiratory distress syndrome</li> <li>• Pulmonary embolism</li> <li>• Pulmonary Hypertension</li> </ul> </li> </ul>	<p>L3, and L5</p>	
<p><b>Unit VII</b></p> <p><b>Vascular disorders and Nursing management</b></p> <ul style="list-style-type: none"> <li>• Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and Nursing management of: <ul style="list-style-type: none"> <li>• Disorders of arteries</li> <li>• Disorders of the aorta</li> <li>• Aortic Aneurysms,</li> <li>• Aortic dissection</li> <li>• Raynaud's phenomenon</li> <li>• Peripheral arterial disease of the lower extremities</li> </ul> </li> </ul>	<p>L1,L2, L3, L4 and L5</p>	<p>10</p>

<ul style="list-style-type: none"> <li>• Venous thrombosis</li> <li>• Varicose veins</li> <li>• Chronic venous insufficiency and venous leg ulcers</li> <li>• Pulmonary embolism</li> </ul>		
<b>Unit VIII</b>  <b>Cardio thoracic emergency interventions</b> <ul style="list-style-type: none"> <li>• CPR- BLS and ALS</li> <li>• Use of ventilator, defibrillator, pacemaker</li> <li>• Post resuscitation care.</li> <li>• Care of the critically ill patients</li> <li>• Psychosocial and spiritual aspects of care</li> <li>• Stress management; ICU psychosis</li> <li>• Role of Nurse</li> </ul>	L3, L4 and L5	10
<b>Unit IX</b>  <b>Nursing care of a patient with obstructive airway</b> <ul style="list-style-type: none"> <li>• Assessment</li> <li>• Use of artificial airway</li> <li>• Endotracheal intubation, tracheostomy and its care</li> <li>• Complication, minimum cuff leak, securing tubes</li> </ul> <b>Oxygen delivery systems</b> <ul style="list-style-type: none"> <li>• Nasal Cannula</li> <li>• Oxygen mask, Venturi mask</li> <li>• Partial rebreathing bag</li> <li>• Bi-PAP and C-PAP masks</li> <li>• Uses, advantages, disadvantages, nursing implications of each.</li> </ul> <b>Mechanical Ventilation</b> <ul style="list-style-type: none"> <li>• Principles of mechanical ventilation</li> <li>• Types of mechanical ventilation and ventilators.</li> <li>• Modes of ventilation, advantage, disadvantage, complications.</li> </ul>	L1,L2, and L3	10

<ul style="list-style-type: none"> <li>• PEEP therapy, indications, physiology, and complications. Weaning off the ventilator.</li> <li>• Nursing assessment and interventions of ventilated patient.</li> </ul>		
<b>Unit X</b>  <b>Congenital Heart Diseases,</b> <ul style="list-style-type: none"> <li>• Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and Nursing management of: <ul style="list-style-type: none"> <li>•Embryological development of heart.</li> <li>•Classification – cyanotic and acyanotic heart disease.</li> <li>•Tetralogy of Fallots.</li> <li>•Atrial Septal Defect, Ventricular Septal Defect., Eisenmenger's complex.</li> <li>•Patent ductus arteriosus, AP window</li> <li>•Truncus Arteriosus.</li> <li>•Transposition of great arteries.</li> <li>•Total Anomaly of Pulmonary Venous Connection.</li> <li>•Pulmonary stenosis, atresia.</li> <li>•Coarctation of aorta.</li> <li>•Ebstein's anomaly</li> <li>•Double outlet right ventricle, Single ventricle, Hypoplastic left heart syndrome.</li> </ul> </li> </ul>	L1,L2, L3,	10
<b>Unit XI</b>  <b>Pharmacology</b>  <b>Review</b> <ul style="list-style-type: none"> <li>• Pharmacokinetics</li> <li>• Analgesics/Anti inflammatory agents</li> <li>• Antibiotics, antiseptics</li> <li>• Drug reaction &amp; toxicity</li> <li>• Drugs used in cardiac emergencies</li> </ul>	L1,L2, L3,	10

<ul style="list-style-type: none"> <li>• Blood and blood components</li> <li>• Antithrombolytic agents</li> <li>• Inotropic agents</li> <li>• Beta-blocking agents</li> <li>• Calcium channel blockers.</li> <li>• Vaso constrictors</li> <li>• Vaso dilators</li> <li>• ACE inhibitors.</li> <li>• Anticoagulents</li> <li>• Antiarrhythmic drugs.</li> <li>• Anti hypertensives</li> <li>• Diuretics</li> <li>• Sedatives and tranquilizers.</li> <li>• Digitalis.</li> <li>• Antilipemics</li> <li>• Principles of drug Administration, role and responsibilities of Nurses and care of</li> <li>• Drugs</li> </ul>		
<p><b>Unit XII</b></p> <p><b>Nursing Care of patient undergoing cardio thoracic surgery</b></p> <ul style="list-style-type: none"> <li>• Indications, selection of patient</li> <li>• Preoperative assessment and preparation; counseling.</li> <li>• Intraoperative care: Principles of open heart surgery, equipment, anesthesia, cardiopulmonary by pass.</li> <li>• Surgical procedures for Coronary Artery Bypass Grafting, recent advances and types of grafts, Valve replacement or reconstruction, cardiac transplant, Palliative surgery and different Stents, vascular surgery, other recent advances.</li> <li>• Thoracic surgery: lobotomy, pneumonectomy, tumor excision etc</li> </ul>	L1, L2 and L3	20

<ul style="list-style-type: none"> <li>• Immediate postoperative care: assessment, post-operative problems and interventions: Bleeding, Cardiac tamponade, Low cardiac output, Infarction, Pericardial effusion, Pleural effusion, Pneumothorax, Haemothorax, Coagulopathy,</li> <li>• Thermal imbalance, inadequate, ventilation/perfusion, Neurological problems, renal problems, Psychological problems.</li> <li>• Chest physiotherapy</li> <li>• Nursing interventions- life style modification, complementary therapy / alternative systems of medicine.</li> <li>• Intermediate and late post operative care after CABG, valve surgery, others.</li> <li>• Follow up care</li> </ul>		
<b>Unit XIII</b> <b>Cardiac rehabilitation</b> <ul style="list-style-type: none"> <li>• Process</li> <li>• Physical evaluation</li> <li>• Life style modification</li> <li>• Physical conditioning for cardiovascular efficiency through exercise</li> <li>• Counseling</li> <li>• Follow up care</li> </ul>	L1, L2 and L3	5
<b>Unit XIV</b> <b>Intensive Coronary Care units/intensive cardio thoracic units:</b> <ul style="list-style-type: none"> <li>• Quality assurance <ul style="list-style-type: none"> <li>• Standards, Protocols, Policies, Procedures</li> <li>• Infection control; Standard safety measures</li> <li>• Nursing audit</li> <li>• Design of ICCU/ICTU</li> <li>• Staffing; cardiac team</li> <li>• Burn out syndrome</li> </ul> </li> </ul>	L1, L2 and L3	

---

<ul style="list-style-type: none"> <li>• Nurse's role in the management of I.C.C.U and ICTU.</li> <li>• Mobile coronary care unit.</li> <li>• Planning in-service educational programme and teaching</li> </ul>

#### **Modes of Evaluation: Quiz/Assignment/ Seminar/Written Examination**

#### **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, EE: End Semester Examination; Att: Attendance

#### **Course Outcomes Assessment**

This course contributes towards the learning outcomes, ‘cardiovascular and thoracic nursing. The outcome will be measured by the performance of students in various class tests/assignments in addition to the End Semester Examination (ESE) that contains significant number of questions on problems related to the cardiovascular and thoracic nursing.

Relationship between the course outcomes (COs), programme Outcomes (PO) and learning outcomes (Los)

Version 1.1	Date of Approval:	<b>16</b>	<b>36**</b>		<b>16</b>
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

### **Course Objectives**

The objective of this course is to assist students:

In developing expertise and in-depth understanding in the field of Critical care nursing

8. To develop advanced skills for nursing intervention in various critical care conditions.
9. To function as critical care Nurse practitioner/specialist.
10. To enable the student to function as educator, manager and researcher in the field of critical care.

### **Course Outcomes:**

At the end of the course the students will be able to:

CO1: Appreciate trends and issues related to Critical Care Nursing.

CO2: Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of critically ill patients

CO3: Describe the various drugs used in critical care and nurses responsibility

---

CO4: Perform physical, psychosocial & spiritual assessment

CO5: Demonstrate advance skills/competence in managing critically ill patients including Advance Cardiac Life Support.

CO6: Demonstrate skill in handling various equipments/gadgets used for critical care

CO7: Provide comprehensive care to critically ill patients.

CO8: Appreciate team work & coordinate activities related to patient care.

CO9: Practice infection control measures.

CO10: Assess and manage pain.

CO11: Identify complications & take appropriate measures.

CO12: Discuss the legal and ethical issues in critical care nursing

CO13: Assist patients and their family to cope with emotional distress, spiritual, grief and anxiety

Assist in various diagnostic, therapeutic and surgical procedures

CO14: Incorporate evidence based nursing practice and identify the areas of research in the field of critical care nursing

CO15: Identify the sources of stress and manage burnout syndrome among health care providers.

CO16: Teach and supervise nurses and allied health workers.

CO1: Design a layout of ICU and develop standards for critical care nursing practice.

### Course Content

Modules	Blooms level*	Number of hours
---------	---------------	-----------------

<b>Unit I Introduction to Critical Care Nursing</b> <ul style="list-style-type: none"> <li>• Historical review- Progressive patient care (PPC)</li> <li>• Review of anatomy and physiology of vital organs, fluid and electrolyte balance</li> <li>• Concepts of critical care nursing</li> <li>• Principles of critical care nursing</li> <li>• Scope of critical care nursing</li> <li>• Critical care unit set up including equipments supplies, use and care of various type of monitors &amp; ventilators</li> <li>• Flow sheets</li> </ul>	L1, L2 and L3	5
<b>Concept of Holistic care applied to critical care nursing practice</b> <ul style="list-style-type: none"> <li>• Impact of critical care environment on patients:-</li> <li>• Risk factors, Assessment of patients, Critical care psychosis, prevention &amp; Nursing care for patients affected with psycho-physiological &amp; psychosocial problems of critical care unit, caring for the patient's family, family teaching</li> <li>• The dynamics of healing in critical care Units:-therapeutic touch, Relaxation, Music therapy, Guided Imagery, acupressure</li> <li>• Stress and burnout syndrome among health team members</li> </ul>	L1,L2, L3	5
<b>Unit III</b> <b>Review</b> <ul style="list-style-type: none"> <li>• Pharmacokinetics</li> <li>• Analgesics/Anti inflammatory agents</li> <li>• Antibiotics, antiseptics</li> <li>• Drug reaction &amp; toxicity</li> <li>• Drugs used in critical care Unit (inclusive of ionotropic, life saving drugs)</li> <li>• Drugs used in various body systems</li> <li>• IV fluids and electrolytes</li> <li>• Blood and blood components</li> </ul>	L1, L2 and L3	05

<ul style="list-style-type: none"> <li>Principles of drug Administration, role of Nurses and care of drugs</li> </ul>		
<b>Unit4:</b> <b>Pain Management</b> <ul style="list-style-type: none"> <li>Pain &amp; Sedation in Critically ill patients</li> <li>Theories of pain, Types of pain, Pain assessment, Systemic responses to pain</li> <li>Pain management-pharmacological and non-pharmacological measures</li> <li>Placebo effect</li> </ul>	L1,L2, L3, L4 and L5	20
<b>Unit V:</b> <b>Infection control in intensive care Unit</b> <ul style="list-style-type: none"> <li>Nosocomial infection in intensive care unit; methyl resistant staphylococcus aureus (MRSA), Disinfection, Sterilization, Standard safety measures, Prophylaxis for staff</li> </ul>	L1,L2, L3 and L4	25
<b>Unit VI</b> <b>Gastrointestinal System</b> <ul style="list-style-type: none"> <li>Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Gastrointestinal Bleeding, Abdominal injury, Hepatic Disorders:-Fulminant hepatic failure, Hepatic encephalopathy, Acute Pancreatitis, Acute intestinal obstruction, perforative peritonitis</li> </ul>	L1,L2, L3, and L5	10
<b>Unit VII</b> <b>Renal System</b> <ul style="list-style-type: none"> <li>Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Renal Failure, Chronic Renal Failure, Acute tubular necrosis, Bladder</li> </ul>	L1,L2, L3, L4 and L5	10

<p>trauma</p> <ul style="list-style-type: none"> <li>Management Modalities: Hemodialysis, Peritoneal Dialysis, Continuous Ambulatory Peritoneal Dialysis, Continuous arterio venous hemodialysis, Renal Transplant,</li> </ul>		
<p><b>Unit VIII</b></p> <p><b>Nervous System</b></p> <ul style="list-style-type: none"> <li>Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Common Neurological Disorders:- Cerebrovascular disease, Cerebrovascular accident, Seizure disorders, Guille in Barre-Syndrome, Masthenia Gravis, Coma, Persistent vegetative state, Encephalopathy, Head injury, Spinal Cord injury</li> <li>Management Modalities: Assessment of Intracranial pressure, Management of intracranial hypertension, Craniotomy</li> <li>Problems associated with neurological disorders: Thermo regulation, Unconsciousness, Herniation syndrome</li> </ul>	L3, L4 and L5	10
<p><b>Unit IX</b></p> <p><b>Endocrine System</b></p> <ul style="list-style-type: none"> <li>Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing Management of :-Hypoglycemia, Diabetic Ketoacidosis, Thyroid crisis, Myxoedema, Adrenal crisis, Syndrome of Inappropriate / hypersecretion of Antidiuretic Hormone (SIADH)</li> </ul>	L1,L2, and L3	10
<p><b>Unit X</b></p> <p><b>Management of other Emergency Conditions</b></p> <ul style="list-style-type: none"> <li>Mechanism of injury, Thoracic injuries, Abdominal injuries, pelvic fractures, complications of trauma, Head inju-</li> </ul>	L1,L2, L3,	10

<p>ries</p> <ul style="list-style-type: none"> <li>• Shock: Shock syndrome, Hypovolemic, Cardiogenic, Anaphylactic, Neurogenic and Septic shock</li> <li>• Systemic inflammatory Response: The inflammatory response, Multiple organ dysfunction syndrome</li> <li>• Disseminated Intravascular Coagulation</li> <li>• Drug Overdose and Poisoning,</li> <li>• Acquired Immunodeficiency Syndrome (AIDS)</li> <li>• Ophthalmic: Eye injuries, Glaucoma, retinal detachment</li> <li>• Ear Nose Throat: Foreign bodies, stridor, bleeding, quincy, acute allergic conditions</li> <li>• Psychiatric emergencies;, suicide,</li> <li>• Crisis intervention</li> </ul>		
<p><b>Unit XI</b></p> <p><b>Cardiovascular emergencies</b></p> <ul style="list-style-type: none"> <li>• Principles of Nursing in caring for patient's with cardiovascular disorders</li> <li>• Assessment: Cardiovascular system: Heart sounds, Diagnostic studies:- Cardiac enzymes studies, Electrocardiography monitoring, Holter monitoring, Stress test. Echo cardiography, Coronary angiography, Nuclear medicine studies</li> <li>• Causes, Pathophysiology, Clinical types, Clinical features, Diagnostic Prognosis, Management : Medical, Surgical &amp; Nursing management of:-Hypertensive crisis, Coronary artery disease, Acute Myocardial infarction, Cardiomyopathy, Deep vein thrombosis, Valvular diseases, Heart block, Cardiac arrhythmias &amp; conduction disturbances, Aneurysms, Endocarditis, Heart failure Cardio pulmonary resuscitation BCLS / ACLS</li> <li>• Management Modalities: Thrombolytic therapy, Pacemaker – temporary &amp; permanent, Percutaneous transluminal coronary angioplasty, Cardioversion, Intra Aortic Balloon pump monitoring,</li> </ul>	<p>L1,L2, L3,</p>	<p>10</p>

Defibrillations, Cardiac surgeries, Coronary Artery Bypass Grafts (CABG/MICAS), Valvular surgeries, Heart Transplantation, Autologous blood transfusion, Radiofrequency Catheter Ablation		
<b>Unit XII</b>  <b>Respiratory System</b> <ul style="list-style-type: none"> <li>• Acid-base balance &amp; imbalance</li> <li>• Assessment: History &amp; Physical Examination</li> <li>• Diagnostic Tests:Pulse Oximetry, End –Tidal Carbon Dioxide Monitoring, Arterial blood gas studies, chest radiography, pulmonary Angiography, Bronchoscopy, Pulmonary function Test, Ventilation perfusion scan, Lung ventilation scan</li> <li>• Causes Pathophysiology, Clinical types, Clinical features, Prognosis, Management: Medical, Surgical and Nursing management of Common pulmonary disorders:-Pneumonia, Status asthmatics, interstitial lung disease, Pleural effusion, Chronic obstructive pulmonary disease, Pulmonary tuberculosis, Pulmonary edema, Atelectasis, Pulmonary embolism, Acute respiratory failure, Acute respiratory distress syndrome (ARDS), Chest Trauma Haemothorax, Pneumothorax</li> <li>• Management Modalities:-Airway Management</li> <li>• Ventilatory Management:-Invasive, non- invasive, long term mechanical ventilations</li> <li>• Bronchial Hygiene:-Nebulization, deep breathing exercise, chest physiotherapy, postural drainage, Inter Costal Drainage, Thoracic surgeries</li> </ul>	L1, L2 and L3	20
<b>Unit XIII</b>  <b>Cardiac rehabilitation</b> <ul style="list-style-type: none"> <li>• Process</li> <li>• Physical evaluation</li> </ul>	L1, L2 and L3	5

<ul style="list-style-type: none"> <li>• Life style modification</li> <li>• Physical conditioning for cardiovascular efficiency through exercise</li> <li>• Counseling</li> <li>• Follow up care</li> </ul>		
<b>Unit XIV</b>  <b>Obstetrical Emergencies</b> <ul style="list-style-type: none"> <li>• Causes, Pathophysiology, Clinical types, clinical features, diagnostic Prognosis, Management: Medical, Surgical and Nursing management of:Antepartum haemorrhage, Preeclampsia, eclampsia, Obstructed labour and ruptured uterus, Post partum haemorrhage, Puerperal sepsis, Obstetrical shock.</li> </ul>	L1, L2 and L3	5

**Course Catalogue:** This course is aimed at developing an understanding of the modern approach to child care, the common health problems of children and neonates in health and sickness.

**Course Objectives:**

- To develop a broad understanding of Principles, concepts, trends and issues related to nursing management.
- To provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

**Course Outcomes:**

On completion of this course students will be able to:

CO1: Describe the philosophy and objectives of the health care institutions at various levels.

CO2: Identify trends and issues in nursing and analyse legal and ethical issues in nursing administration

CO3: Discuss the public administration, health care administration in nursing

CO4: Describe the principles of administration applied to nursing

---

CO5: Explain the organization of health and nursing services at the various levels/institutions.

CO6: Collaborate and co-ordinate with various agencies by using multisectoral Approach

CO7: Discuss the planning, supervision and management of nursing workforce for various health care settings.

CO8: Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care

CO9: Describe the process of quality assurance in nursing services.

CO10: Demonstrate leadership in nursing at various levels

CO11 Explain the leadership style as well as strategies in administration

CO12 Describe the legal & ethical issues in administration

## **PROGRAMME SPECIFIC OUTCOMES**

On completion of M.Sc. Nursing programme the post graduates will be able to:

PSO1 : Assess the health status, identify nursing needs, plan, implement and evaluate nursing care for patients/client that contribute to health of individuals, families and communities.

PSO2: Demonstrate competency in techniques of nursing skills based on concepts and principles from specialized areas of nursing, physical, biological and behavioral sciences. And Participate as member of health care team in the promotive, preventive, curative and restorative health care delivery system of the country.

PSO3: Demonstrate leadership, managerial skills, qualities and decision-making abilities, teaching and communication skills in clinical/ community health settings.

PSO4: Participation in research activities towards continued learning for personal and professional development, practice ethical values and utilize the research findings to improve the quality of care.

## **PRACTICALS**

- ☐ Prepare prototype personal files for staff Nurses, faculty and cumulative records
- ☐ Preparation of budget estimate, revised estimate and performance budget
- ☐ Plan and conduct staff development programme
- ☐ Preparation of Organization Chart
- ☐ Developing Nursing standards/protocols for various units
- ☐ Design a layout plan for specialty units /hospital, community and educational institutions.
- ☐ Preparation of job description of various categories of nursing personnel
- ☐ Prepare a list of equipment and supplies for specialty units.
- ☐ Assess and prepare staffing requirement for hospitals, community and educational institutions.
- ☐ Plan of action for recruitment process
- ☐ Prepare a vision and mission statement for hospital, community and educational institutions
- ☐ Prepare a plan of action for performance appraisal
- ☐ Identify the problems of the specialty units and develop plan of action by using problem solving approach
- ☐ Plan a duty roster for specialty Units/hospital, community and educational institutions
- ☐ Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, Nurses notes, Official letters, curriculum vitae, presentations etc.
- ☐ Prepare a plan for disaster management
- ☐ Group work
- ☐ Field appraisal report

Version 1.1	Date of Approval:		<b>28**</b>		<b>32</b>
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

**Course Catalogue:** The course is designed to enable students to develop expertise in the field of Community health nursing procedures.

**Course Outcomes:** The course is designed to assist students in developing expertise and in depth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & groups and develop skills to function as Community Health Nurse specialist/practitioner. It would further enable student to function as an educator, manager, care giver and researcher in the field of Community Health Nursing. Each student is required to participate in following activities during the community posting in urban as well as rural area

On completion of this course students will be able to:

CO1. Apply the nursing process in the care of geriatric patients in old age home and community

CO2. Demonstrate advanced skills/competence in nursing management of children with Communicable problems

CO3. Recognize and manage emergencies in deaddiction centres and mental health centres

CO4. Utilize the recent technology and various treatment modalities in the management of high risk children

CO5. Prepare a design for layout and describe standards for National health services

CO6. Identify areas of research in the field of community health nursing

---

<b>PSN4402</b>	<b>Psychiatric Nursing CS-III &amp; IV Practical</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:		<b>28**</b>		<b>32</b>
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

### **Catalog Catalogue:**

This course is designed to assist students in developing expertise and in depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various Psychiatric conditions. It will enable the student to function as Psychiatric Nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric Nursing

**Course Objectives:** On completion of the two year M.Sc. Nursing (Psychiatry) programme, the Post Graduate Nurse will be able to provide comprehensive nursing care to patients with psychiatric problems in preventive, curative and rehabilitation aspects.

### **Course Outcomes**

At the end of the course the students will be able to:

1. Apply the nursing process in the care of patients with mental disorders in hospital and community
2. Demonstrate advanced skills/competence in nursing management of patients with mental disorders
3. Identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS.
4. Identify and manage psychiatric emergencies.

- 
5. Provide nursing care to critically ill patients with mental disorders
  6. Utilize the recent technology and various treatment modalities in the management of patients with mental disorders
  7. Demonstrate skills in carrying out crisis intervention.
  8. Appreciate the legal and ethical issues pertaining to psychiatric nursing.
  9. Identify areas of research in the field of psychiatric nursing.
  10. Prepare a design for layout and describe standards for management of Psychiatric units/emergency units/hospitals
  11. Teach psychiatric nursing to undergraduate students & in-service nurses.

### **Course Content**

<b>Modules</b>	<b>Blooms level</b>
<b>Module 1: History collection and Assessment of mental status examination</b>	<b>L1,2, 3</b>
<b>Module 2 : Management of Psychiatric Patient</b>	<b>L2,3, 4</b>
<b>Module 3: Psychometric and Personality Assessment</b>	<b>L1,2,3</b>
<b>Module 4: Observing various therapies</b>	<b>L1,2, 3</b>
<b>Module 5: Process Recording</b>	<b>L3,4</b>
<b>Module 6: Socio and Psycho drama</b>	<b>L2, 3</b>

---

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

<b>PDN 4402</b>	<b><u>Child Health (Pediatric) Nursing Practical</u></b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:		<b>28**</b>		<b>32</b>
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

**Course Catalogue:** The course is designed to enable students to develop expertise in the field of child health nursing procedures.

**Course Description:** It will help students to appreciate the child as a holistic individual and develop skill to function as a Pediatric Nurse specialist.

### **Course Outcomes:**

On completion of this course students will be able to:

CO1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community

CO2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems

CO3. Recognize and manage emergencies in children and Provide nursing care to critically ill children

---

CO4. Utilize the recent technology and various treatment modalities in the management of high risk children

CO5. Prepare a design for layout and describe standards for management of pediatric units/hospitals

CO6. Identify areas of research in the field of pediatric nursing

### Course Content

<b>Modules</b>	<b>Blooms level</b>
<b>Module I</b> <b>Procedures Observed:</b> <ul style="list-style-type: none"><li>• Echo cardiogram</li><li>• Ultrasound head</li><li>• ROP screening (Retinopathy of prematurity)</li></ul>	<b>L1,2, 3</b>
<b>Module II</b> <b>Procedures Assisted</b> <ul style="list-style-type: none"><li>• Advanced neonatal life support</li><li>• Lumbar Puncture</li><li>• Arterial Blood Gas</li><li>• ECG Recording</li><li>• Umbilical catheterization – arterial and venous</li><li>• Arterial B P monitoring</li><li>• Blood transfusion- exchange transfusion full and partial</li><li>• IV cannulation &amp; therapy</li><li>• Arterial catheterization</li><li>• Chest tube insertion</li><li>• Endotracheal intubation</li><li>• Ventilation</li><li>• Insertion of long line</li><li>• Assist in surgery</li></ul>	<b>L2,3, 4</b>

<b>Module III</b> <b>Procedures Performed:</b> <ul style="list-style-type: none"> <li>• Airway Management <ul style="list-style-type: none"> <li>• Application of Oro Pharyngeal Airway</li> <li>• Oxygen therapy</li> <li>• CPAP (Continuous Positive Airway Pressure)</li> <li>• Care of Tracheostomy</li> <li>• Endotracheal Intubation</li> </ul> </li> <li>• Neonatal Resuscitation</li> <li>• Monitoring of Neonates – clinically &amp; with monitors, CRT (Capillary Refill Time), assessment of jaundice, ECGGastric Lavage</li> <li>• Setting of Ventilators</li> <li>• Phototherapy</li> <li>• Assessment of Neonates: Identification &amp; assessment of risk factors, APGAR Score, gestation age, Anthropometric assessment, Weighing the baby, Newborn examination, detection of life threatening congenital abnormalities,</li> <li>• Admission &amp; discharge of neonates</li> <li>• Feeding - management of breast feeding, artificial feeding, expression of breast milk, OG (Orogastric) tube insertion, gavage feeding, TPN, Breast feeding counseling</li> <li>• Thermoregulation- Axillary temperature, Kangaroo Mother Care (KMC), Use of Radiant warmer, incubators, management of thermoregulation &amp; control</li> <li>• Administration of Drugs: I/M, IV injection, IV Cannulation &amp; fixation infusion pump, Calculation of dosages, Neonatal formulation of drugs, use of tuberculin/ insulin syringes, Monitoring fluid therapy, Blood Administration.</li> </ul>	<b>L1,2,3</b>

---

<ul style="list-style-type: none"> <li>Procedures for prevention of infections: Hand washing, disinfections &amp; sterilization, surveillance, fumigation</li> <li>Collection of specimens</li> <li>Setting, Use &amp; maintenance of basic equipment: Ventilator, O2 analyzer, monitoring equipment, Photo therapy unit, Flux meter, Infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, laminar flow</li> </ul>

## **Post Basic Bachelor of Science Nursing**

**FLEXILEARN**

**-Freedom to design your degree**

**Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

## **Post Basic B.Sc. Nursing**

### **Aim**

The programme at post basic level is designed to upgrade and enhance the knowledge of the diploma nurses (General Nursing and Midwifery) to assume the roles and responsibilities as professional, competent nurses and midwives at basic level in providing promotive, preventive, curative and rehabilitative services. It enables them to make independent decisions in clinical situations, protect the patients' rights and facilitate individuals and groups in pursuit of health and function in the hospital, community nursing services and Nursing educational institutes. They are also prepared to conduct research in the areas of nursing practice.

### **OBJECTIVES**

On completion of Post Basic B.Sc. Nursing degree programme the graduates will be able to:

1. Assess the health status, identify nursing needs, plan, implement and evaluate nursing care for patients/client that contribute to health of individuals, families and communities.
2. Demonstrate competency in techniques of nursing skills based on concepts and principles from specialized areas of nursing, physical, biological and behavioural sciences.
3. Participate as member of health care team in the promotive, preventive, curative and restorative health care delivery system of the country.
4. Demonstrate skills in effective communication and interpersonal relationship.
5. Demonstrate leadership qualities and decision-making abilities in various situations.
6. Demonstrate skills in teaching to individuals and groups in community health settings.
7. Emphasize on practicing ethical values in their personal and professional life.
8. Participate in research activities and utilize research findings in improving nursing practice.
9. Recognize the need for continued learning for their personal and professional development.

# **Post Basic B.Sc. Nursing –First Semester NURSING FOUNDATION**

**Course Code: NUR2105**

**Credit Unit-04**

**Course Description:** This course will help students develop an understanding of the philosophy, objectives and responsibilities of Nursing as a Profession. The purpose of the course is to orient to the current concepts involved in the practices of Nursing and developments in the Nursing Profession.

## **OBJECTIVES**

**At the end of the course, the student will:**

1. Identify Professional aspects of Nursing.
2. Explain theories of Nursing.
3. Identify ethical aspects of Nursing Profession.
4. Utilize steps of Nursing Process.
5. Identify the role of the Nurse in various levels of health services.
6. Appreciate the significance of quality assurance in Nursing.
7. Explain current trends in health and Nursing.

## **Course Contents**

### **Module I**

- Development of Nursing as a Profession:
  - Its philosophy
  - Objectives and responsibilities of a professional Nurse.
- Trends influencing Nursing Practices.
- Expanded role of the Nurse.
- Development of Nursing Education in India and trends in Nursing Education.
- Professional organizations, career planning.
- Code of ethics & Professional conduct for Nurses.

### **Module II**

- Ethical, legal and other issues in Nursing.
- Concept of health and illness, effects on the person.
- Stress and adaptation.
- Health care concept and Nursing care concept.
- Developmental concept, needs, roles and problems of the development stages of individual – newborn, infant, toddler, pre-adolescent, adolescent, adulthood, middle- age old age.

### **Module III**

- Theory of Nursing practices.
- Meta-paradigm of Nursing – characterized by four central concepts i.e. Nurse, person (client/ patient), health and environment.

### **Module IV**

- Nursing process.
- Assessment: Tools for assessment, methods, recording.
- Planning: Teaching for planning care, types of care plans.

- Implementation: Different approaches to care, organizations and implementation of care, recording.
- Evaluation: tools for evaluation, process of evaluation, types of evaluation.

### Module V

- Quality assurance: Nursing Standards, Nursing audit, total quality management.
- Role of council and Professional bodies in maintenance of standards.

### Module VI

- Primary health care concept:
  - Community oriented Nursing
  - Holistic Nursing
  - Primary Nursing.
- Family oriented Nursing concept:
  - Problem oriented Nursing
  - Progressive patient care
  - Team Nursing.

### Examination Scheme:

Components	ATT	HA	CT	SE	P/S	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
P/S Presentation /Seminar; EE- End Semester Examination**

# **Post Basic B.Sc. Nursing –First Semester**

## **NUTRITION AND DIETETICS**

**Course Code: NUR2106**

**Credit Unit-04**

**Course Description:** This course is designed to provide the students with a wide knowledge of dietetics in Indian setting, that the practices of teaching optimum and realistic dietary planning can become an integral part of Nursing Practices.

### **OBJECTIVES**

**At the end of the course, the student will:**

1. Explain the principles and practices of nutrition and dietetics.
2. Plan therapeutic diets in different settings.
3. Identify nutritional needs of different age groups and plan diet accordingly.
4. Prepare meals using different methods utilizing cookery rules.
5. Prepare recommended meals according to the disease conditions of the patients.

### **Course Contents**

#### **Module I**

- Introduction to nutrition and dietetics.
- Balanced diet, factors on which it depends.
- Factors to be considered in planning.
- Guides available for planning.
- Food hygiene, preparation and preservation.
- Review of nutrients – micro & macro.

#### **Module II**

- Introduction to diet therapy.
- Routine hospital diets.
- Therapeutic diet under each Module i.e. Cardiovascular diseases, gastrointestinal diseases, renal disorders, endocrine and metabolic disorders, allergy, infections and fevers, pre and post operative stages, deficiency diseases and malnutrition, overweight and underweight.

#### **Module III**

- Infant and child nutrition.
- Feeding of normal infants: factors to be considered in planning nutritional requirements.
- Feeding of premature infants: factors to be considered in planning nutritional requirements.
- Supplementary feeding of infants: Advantage and method of introduction.
- Weaning, effects on mother and child.
- Psychology of infant and child feeding.
- Feeding the sick child. Diet in diseases of infancy and childhood.
- Deficiency status – Malnutrition and under nutrition.
- Feeding pre-school child: Nutritional needs, factors to be considered in planning diets. Problems in feeding.
- School lunch programme: Advantage, need in India.

## Module IV

- Community nutrition: need for Community nutrition programme.
- Nutritional needs for special groups: Infant, child, adolescent, pregnant woman, lactating mother and old people.
- Substitutes for non-vegetarian foods.
- Selection of cheap and nutritious foods. Nutrition education needs and methods.
- Methods of assessing nutritional status of individual / group / Community.
- Current nutritional problems and national programmes.

## PRACTICUM

### I. *Methods of cooking and cookery rules.*

1. Simple preparation of beverages, soups, cereals and pulses, eggs, vegetables, meat.
2. Menu plans.

### II. *Preparation of supplementary food for infants.*

1. Foods for toddlers.
2. Low cost nutritious dishes for vulnerable groups.
3. Dietary case study of patient on special diet planning of low cost dietary instructions for home adaptations.
4. Planning of therapeutic diets.

## Examination Scheme:

Components	ATT	HA	CT	SE	EA	EE
Weightage(%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
EA- Extracurricular activity; EE- End Semester Examination**

**Post Basic B.Sc. Nursing –First Semester**  
**BIOCHEMISTRY AND BIOPHYSICS**

**Course Code: NUR2107**

**Credit Unit-05**  
**(Biochemistry-3)**  
**(Biophysics -2)**

**Course Description:** This course introduces the basic principles of Biochemistry and Biophysics related to Nursing.

**OBJECTIVES**

**At the end of the course, the student will:**

1. Identify the basic principles of Biochemistry and Biophysics.
2. Synthesize the knowledge of these principles in various Nursing situations.

**Section A: Biochemistry**

**Course Contents**

**Module I**

- Introduction: Importance of Biochemistry in Nursing.
- Study of cell and its various components.

**Module II**

- Water and Electrolytes: Water – Sources, property & functions in human body.
- Water and fluid balance.
- Electrolytes of human body, functions, sources.

**Module III**

- Enzymes
  - Mechanism of action
  - Factors affecting enzyme activity
  - Diagnostic applications
  - Precautions for handling specimens for enzyme estimation.
- Digestion and absorption of carbohydrates, proteins and fats
- Various factors influencing the digestion and absorption, mal-absorption syndrome.

**Module IV**

- Carbohydrates: Catabolism of carbohydrates for energy purposes.
- Mitochondrial oxidation and oxidation phosphorylation.
- Fats of glucose in the body. Storage of glucose in the body, glycogenesis, glycogenolysis and neoglucogenesis, blood glucose and its regulation.
- Glucose tolerance test, hyperglycemia, hypoglycemia, glycemia.

**Module V**

- Protein: Amino acids, hormones.
- Essential amino acids. Biosynthesis of protein in the cells.
- Role of nucleic acid in protein synthesis.
- Nitrogenous constituents of urine, blood, their origin – urea cycle, uric acid formation, gout.
- Plasma proteins and their functions.

## **Module VI**

- Fat: Biosynthesis of fats and storage of fats in the body.
- Role of liver in fat metabolism.
- Biological importance of important lipids and their functions
- Cholesterol and lipoprotein
  - Sources, occurrence and distribution
  - Blood level and metabolism
  - Ketone bodies and utilization.
- Inter relationship in metabolism and cellular control of metabolic processes.

## **Section B: Biophysics**

### **Course Contents**

#### **Module I**

- Introduction: Concepts of Module and measurements.
- Fundamental and derived Modules.
- Modules of length, weight, mass, time.

#### **Module II**

- Vector and scalar motion, speed, velocity and acceleration.

#### **Module III**

- Gravity: Specific gravity, centre of gravity, principles of gravity.
- Effect of gravitational forces on human body.
- Application of principles of gravity in Nursing.

#### **Module IV**

- Force, work, energy: their Modules of measurement.
- Type and transformation of energy, forces of the body, static forces.
- Principles of machines, friction and body mechanics.
- Simple mechanics – lever and body mechanics, pulley and traction, incline plane, screw.
- Application of these principles in Nursing.

#### **Module V**

- Heat: Nature, measurement, transfer of heat.
- Effects of heat on matter.
- Relative humidity, specific heat.
- Temperature scales.
- Regulation of body temperature.
- Use of heat for sterilization.
- Application of these principles in Nursing.

#### **Module VI**

- Light: Laws of reflection.
- Focusing elements of the eye, defective vision and correction, use of lenses.
- Relationship between energy, frequency and wavelength of light.
- Biological effects of light.

- Use of light in therapy.
- Application of these principles in Nursing.

#### **Module VII**

- Pressures: Atmospheric pressure, hydrostatic pressure, osmotic pressure.
- Measurements of pressures in the body
  - Arterial and venous blood pressures
  - Ocular pressure
  - Intracranial pressure
  - Application of these principles in Nursing.

#### **Module VIII**

- Sound: Frequency, velocity and intensity.
- Vocalization and hearing.
- Use of ultrasound. Noise pollution and its prevention.
- Application of these principles in Nursing.

#### **Module IX**

- Electricity and electromagnetism: Nature of electricity, voltage, current, resistance and their Modules.
- Flow of electricity in solids, electrolytes, gases and vacuum.
- Electricity and human body.
- ECG, EEG, EMG, ECT.
- Pace makers and defibrillation.
- Magnetism and electricity.
- M.R.I. Scanning, C.T scan.

#### **Module X**

- Atomic energy: Structure of atom, isotopes and isobars.
- Radioactivity: Use of radioactive isotopes.
- Radiation protection Modules and limits, instruments used for detection of ionizing radiation. X- Rays.

#### **Module XI**

- Principles of electronics: Common electronic equipments used in patient care.

#### **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>P/S</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
P/S- Presentation/Seminar; EE- End Semester Examination**

## **Post Basic B.Sc. Nursing –First Semester MEDICAL SURGICAL NURSING**

**Course Code: NUR2108**

**Credit Unit-08**

**Course Description:** The purpose of this course is to widen the students' knowledge and develop proficiency in caring for patients with medical surgical problems. This course includes review of relevant Anatomy and Physiology, Pathophysiology in Medical-Surgical disorders and Nursing management of these conditions.

### **OBJECTIVES**

**At the end of the course, the student will:**

1. Explain relevant Anatomy and Physiology of various systems of the body.
2. Explain Pathophysiology of various disorders.
3. Explain the actions, side effects and Nursing implications in administering drugs for various disorders.
4. Discuss the recent advancement in the treatment and care of patients with medical surgical conditions.
5. Develop skill in giving comprehensive Nursing care to patients following the steps of Nursing process.
6. Assist the patients and their families in identifying and meeting their own health needs.
7. Appreciate the role of the nurse in the medical surgical health term.

### **Course Contents**

#### **Module I**

- Introduction to Medical Surgical Nursing.
- Review of concepts of comprehensive Nursing care in medical surgical conditions.
- Nurse, patient and his/ her family.
- Functions of Nurse in the Outpatient Department.
- Intensive care Module.

#### **Module II**

- Nursing management of patient with specific problems:
  - Fluid and electrolyte imbalance.
  - Dyspnea and cough, Respiratory obstruction
  - Fever
  - Shock
  - Unconsciousness
  - Pain
  - Acute illness
  - Chronic illness
  - Terminal illness
  - Age related illness
  - Patient undergoing surgery
  - Incontinence.

### **Module III**

- Nursing management of patient with Neurological and Neurosurgical conditions.
- Review of Anatomy and Physiology of the Nervous System.
- Pathophysiology, diagnostic procedures and management of:
  - Cerebra-vascular accident.
  - Cranial spinal and peripheral Neuropathies.
  - Headache and intractable pain.
  - Epilepsy.
  - Infectious and inflammatory diseases and trauma of the Nervous System.
  - Common disorders of the system.
  - Recent advances in diagnostic and treatment modalities.
  - Drugs used in these disorders.
  - Tumors of brain & Spinal cord, congenital malformations, degenerative diseases.

### **Module IV**

- Nursing management of patient with Cardiovascular problems.
- Review of relevant Anatomy and Physiology of Cardiovascular system.
- Pathophysiology, diagnostic procedures and management of:
  - Ischemic Heart diseases
  - Cardiac arrhythmias
  - Congestive heart failure
  - Rheumatic and other valvular heart diseases
  - Endocarditis, cardiomyopathies, congenital heart diseases, hypertension, heart block
  - Cardiac emergencies: Cardiac Arrest, acute pulmonary oedema, cardiac tamponade, cardiogenic shock, aneurysms and peripheral vascular disorders, recent advancement in cardiology.

### **Module V**

- Nursing management of patient with respiratory problems.
- Review of Anatomy and Physiology of respiratory system Pathophysiology, diagnostic procedures and management of upper respiratory tract infections:
  - Bronchitis
  - Asthma
  - Emphysema, Empyema, Atelectasis, COPD
  - Bronchiectasis
  - Pneumonia
  - Pulmonary tuberculosis
  - Lung abscess
  - Pleural effusion
  - Tumours and cysts
  - Chest injuries
  - Respiratory arrest and insufficiency
  - Pulmonary embolism
  - Drugs used in the management of these patients
  - Special respiratory therapies.

\

## **Module VI**

- Nursing management of patient with Genito-urinary problems.
- Review of Anatomy and Physiology of the Genito-urinary System
  - Nephritis
  - Renal calculus
  - Acute renal failure
  - Chronic renal failure
  - End stage renal disease.
- Special procedures, dialysis, renal transplant.
- Drugs used in management of these patients.
- Congenital disorders, urinary infections.
- Benign prostate hypertrophy.

## **Module VII**

- Nursing management of patients with problems of the digestive systems.
- Review of Anatomy and Physiology of gastrointestinal system and accessory organs.
- Pathophysiology, diagnostic procedures and management of :
  - G.I. Bleeding
  - Peptic ulcer
  - Infections
  - Acute abdomen
  - Colitis, diarrhea, dysentery & mal-absorption syndrome.
  - Cholecystitis
  - Hepatitis, hepatic coma and cirrhosis of liver
  - Portal hypertension
  - Pancreatitis
  - Tumors, Hernias, Fistulas, Fissures, Hemorrhoids.
- Drug used in the management of these patients.

## **Module VIII**

- Nursing management of patients with endocrine problems.
- Review of Anatomy, Physiology and Pathophysiology of patient with:
  - Thyroid disorders
  - Diabetes mellitus
  - Diabetes insipidus
  - Adrenal tumour
  - Pituitary disorders
  - Diagnostic procedures.
- Nursing management of patient with above problems.
- Drug used in Endocrine problems.

## **Module IX**

- Nursing management of patient with musculoskeletal problems.
- Review of anatomy, Physiology and Pathophysiology:
  - Arthritis Osteomyelitis, Bursitis

- Fractures, dislocation and trauma
- Prolapsed disc
- Osteomalacia and osteoporosis
- Tumor
- Amputation.
- Diagnostic procedures
- Nursing management of patient with above problems.
- Prosthesis and Rehabilitation.
- Transplant & replacement surgeries.

#### **Module X**

- Nursing management of patient with disorders of female reproductive tract.
- Disorder of menstruation.
- Infections of the genital tract.
- Benign and malignant tumors of the genital tract.
- R.V.F., V.V.F.
- Climacteric changes and associated problems.

#### **Module XI**

- Nursing management of patient with Oncological disorders.
- Types of Neoplasms and related Pathophysiology.
- Diagnostic procedures.
- Modalities of treatment and nurse's role.
- Special therapies – Chemotherapy and Radiotherapy
- Preventive measures, other therapies.

#### **Module XII**

- Nursing management of patient with burns.
- Nursing management of patient with reconstructive surgeries.

#### **Module XIII**

- Nursing management of patient with common communicable diseases & STD'S.
- Nursing management of patient with immunological disorders including HIV/AIDS.

#### **Module XIV**

- Nursing management of patient with diseases of eye, ear, nose, throat & skin.

#### **Module XV**

- Nursing management of patient with blood disorders
- Review of Anatomy & Physiology of Blood & Blood products.
- Pathophysiology, diagnostic procedures and management of blood disorders:
  - Anemia
  - Leukemia
  - Bleeding disorders
  - Hemophilia
  - Purpura etc.

- Blood transfusion, safety checks, procedure and requirements. Management of adverse transfusion reaction, records for blood transfusion.
- Management and counseling of blood donors, phlebotomy procedure, and post donation management.
- Blood bank functioning and hospital transfusion committee
- Bio-safety and waste management in relation to blood transfusion.

#### **Module XVI**

- Nursing in emergencies.
- Cardiac emergencies.
- Trauma.
- Poisoning.
- Crisis management: Thyroid crisis, Hypertensive crisis and Adrenal crisis.

#### **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>P/S</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; P/S-Presentation/Seminar; EE- End Semester Examination**

## **Post Basic B.Sc. Nursing –First Semester ENGLISH**

**Course Code: NUR2109**

**Credit Unit-05**

**Course Description:** This course is designed to help the students understand and use skills of English language required for their professional work.

### **OBJECTIVES**

After the course the student will develop:

1. Ability to speak and write grammatically corrects English.
2. Effective skill in reading and understanding the English language.
3. Skill in reporting.

### **Course Contents**

#### **Module I**

- Remedial study of Grammar.
- Review of grammar, vocabulary and effective use of dictionary.
- Prepare task oriented seminars.
- Symposia and panel discussion.

#### **Module II**

- The ability to understand selected passage and express meaning in one's own words.
- Reading and comprehension of the prescribed books.

#### **Module III**

- The study of various forms of composition:
  - Note taking
  - Diary
  - Nurse notes, Anecdotal records
  - Writing of summary
  - Nurses' reports on health problems.

The student will submit one sample of each item from her own practical experience.

#### **Module IV**

- Verbal communication.
- Oral reports.
- Summarization of discussion.
- Debate.
- Listening comprehension- film, cassette and radio.

### **PRACTICUM**

1. The clinical experience in the wards and bed side nursing will provide opportunity for students to fulfill the objectives of learning language.
2. Assignment on writing and conversation through participation in Discussion, Debates, Seminars and Symposia. The students will gain further skill in task oriented communication.

**Examination Scheme:**

Components	ATT	HA	CT	SE	EA	EE
Weightage (%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
EA- Extracurricular activity; EE- End Semester Examination**

**Text & References:****Text****Reference Books**

**Post Basic B.Sc. Nursing –First Semester  
MEDICAL SURGICAL NURSING (PRACTICAL)**

**Course Code: NUR2110**

**Credit Unit-11**

This Course is based on Course Code NUR2108

**Guidelines**

1. Students should be rotated in the selected medical & surgical areas, like Cardio Thoracic, Neurology, Urology, Orthopedics, Gynecology, Oncology, and Burns and Reconstructive surgical Modules.
2. The students should be given patient assignment. They have practices patient centered comprehensive Nursing.
3. Each student is requested to give planned health teachings, conduct clinical teaching, case presentation and drug study.

**Examination Scheme:**

Components	P/S	NCS	NCP	HE	CE	SPE	EPE
Weightage (%)	20	15	30	5	20	10	100

**P/S-Presentation/Seminar; NCS-Nursing Case Study; NCP- Nursing Care plan; HE- Health Education; CE-Clinical Evaluation; SPE-Sessional Practical Examination; EE- External Practical Examination**

**PSYCHOLOGY**

**Course Code: NUR2207**

**Credit Unit-06**

**Course Description:** This course is designed to reorient and widen the student's knowledge of fundamentals of psychology. The student is offered an opportunity to apply the theoretical concepts in the clinical setting and thereby understand the psychodynamics of patient behaviors. This course would also help the student to develop an insight into her own behavior.

**OBJECTIVES**

**At the end of course, the student will:**

1. Apply psychological principles while performing Nursing duties.
2. Distinguish the psychological processes during health and sickness.
3. Analyze own behavior patterns.
4. Tabulate the psychological needs of the patients for planning Nursing care.
5. Participate in psychometric assessment of the client.

**Course Contents**

**Module I**

- Introduction: Definition of psychology, scope and methods of psychology.
- Relationship with other subject.

**Module II**

- Sensation, Attention and Perception: Definitions.
- Sensory processes: Normal and abnormal.
- Attention and distraction: Contributory factors.
- Characteristics of perception, Perception: normal and abnormal.

**Module III**

- Motivation: Definition and nature of motivation.
- Biological and social motives.
- Frustration and conflicts.
- Self- actualization.

**Module IV**

- Emotions: Definition of emotions, Expression and perception.
- Emotions in sickness.

**Module V**

- Personality: Definition, constituents of personality.
- Personality in sickness and Nursing.

**Module VI**

- Psychological aspects of Nursing.
- Behaviour and sickness. Psychological needs of:
  - Child and adolescents
  - Adult
  - Aged
  - Attendants
  - Chronically ill individual.

## **Module VII**

- Individual differences.
- Significance of individual differences.
- Heredity and environment.
- Role of individual differences both in health and sickness.
- Implications of individual differences in Nursing.

## **Module VIII**

- Intelligence and abilities: Definition.
- Intelligence and abilities during sickness.
- Measurement of intelligence and abilities.

## **Module IX**

- Learning: Definition, Conditions of learning.
- Laws of learning.
- Learning during health and sickness.

## **Module X**

- Memory and forgetting: Definition and nature of memory.
- Memory during health and sickness.
- Forgetting during health and sickness.

## **Module XI**

- Attitudes: Definition, development and modification.
- Role of attitudes in health and sickness.

## **Module XII**

- Concept of mental hygiene & mental health.
- Characteristics of a mentally healthy person.
- Defense mechanisms.

## **PRACTICUM**

1. Simple experiments on (i) perception (ii) measuring thresholds (iii) reaction time.
2. Administration of psychological tests.
3. Observation and recording data: (i) field observation (ii) interview (iii) Case study (iv) Self-rating.

## **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>EA</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
EA- Extracurricular activity; EE- End Semester Examination**

# **Post Basic B.Sc. Nursing –Second Semester MATERNAL NURSING**

**Course Code: NUR2208**

**Credit Unit-05**

**Course Description:** This course is designed to widen the student's knowledge of obstetrics during pregnancy, labour and puerperium. It also helps to acquire knowledge and develop skill in rendering optimum Nursing care to a child bearing mother in a hospital or Community and help in the management of common gynecological problems.

## **OBJECTIVES**

**At end of the course, the student will:**

1. Describe the Physiology of pregnancy, labour and puerperium.
2. Manage normal pregnancy, labour and puerperium.
3. Explain the Physiology of lactation and advice on management of breast feeding.
4. Be skilled in providing pre and post operative Nursing care in obstetric conditions.
5. Identify and manage high risk pregnancy including appropriate referrals.
6. Propagate the concept and motivate acceptance of family planning methods.
7. Teach, guide and supervise auxiliary midwifery personnel.

## **Course Contents**

### **Module I**

- Introduction and historical review.
- Planned Parenthood.
- Maternal morbidity and mortality rates.
- Legislations related to maternity benefits, MTP acts, incentives for family planning etc.

### **Module II**

- Review of the Anatomy and Physiology of female reproductive system.
- Female pelvis (normal and contracted).
- Review of Foetal development.

### **Module III**

- Physiology and management of pregnancy, labour and puerperium.
- Signs and symptoms and diagnosis of pregnancy.
- Antenatal care.
- Pregnant woman with HIV/ AIDS.
- Management of common Gynecological problems.

### **Module IV**

- The new born baby.
- Care of the baby at birth including resuscitation.
- Essential newborn care:
  - Feeding
  - Jaundice and infection
  - Small & large for date babies.
  - Intensive care of the new born
  - Trauma and hemorrhage.

### **Module V**

- Management of abnormal pregnancy, labour and puerperium.
- Abortion, ectopic pregnancy and vesicular mole.

- Pregnancy induced hypertension, gestational diabetes, anaemia, heart disease.
- Urinary infection, Antepartum haemorrhage.
- Abnormal labour (malposition & malpresentation):
  - Uterine inertia
  - Disorders of puerperium
  - Management of engorged breast, cracked nipples, breast abscess and mastitis
  - Puerperal sepsis
  - Post partum haemorrhage
  - Inversion and prolapsed of uterus, obstetrical emergencies
  - Obstetrical operation i.e. forceps, vacuum, episiotomy, caesarean section.

#### **Module VI**

- Drugs in obstetrics.
- Effects of drugs during pregnancy, labour and puerperium on mother & body.

#### **Module VII**

- National Welfare Programmes for Women.
- National Family Welfare Programme.
- Infertile Family.
- Problems associated with unwanted pregnancy.
- Unwed mothers.

#### **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>P/S</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
P/S-Presentation/Seminar; EE- End Semester Examination**

# **Post Basic B.Sc. Nursing –Second Semester**

## **PAEDIATRIC NURSING**

**Course Code: NUR2209**

**Credit Unit-05**

**Course Description:** This course is aimed at developing an understanding of the modern approach to child care, the common health problems of children and neonates in health and sickness.

### **OBJECTIVES**

**At the end of the course, the student will:**

1. Explain the modern concept of child care and the principles of Paediatric Nursing.
2. Describe the normal growth and development of children at different ages.
3. Manage sick as well as healthy neonates and children.
4. Identify various aspects of preventive Paediatric Nursing and apply them in providing Nursing care to children in hospital and Community.

### **Course Contents**

#### **Module I**

- Introduction.
- Modern concept of child care.
- Internationally accepted rights of the child.
- National policy and legislations in relation to child health and welfare.
- National programmes related to child health and welfare.
- Changing trends in hospital care, preventive, promotive and curative aspects of child health.
- Child morbidity and mortality rates.
- Differences between an adult and child.
- Hospital environment for a sick child.
- The role of a Paediatric Nurse in caring for a hospitalized child.
- Principles of Pre and Post operative care of infants and children.
- Paediatric Nursing procedures.

#### **Module II**

- The healthy child.
- Growth and development from birth to adolescence.
- The needs of normal children through the stages of development and parental guidance.
- Nutritional needs of children & infants breast- feeding, supplementary/ artificial feeding and weaning.
- Accidents, causes and prevention.
- Value of play selection of play material.
- Preventive immunization.

#### **Module III**

- Nursing care of a neonate.
- Nursing care of a normal newborn.
- Neonatal resuscitation.
- Nursing management of a low birth weight body.
- Nursing management of common neonatal disorders.
- Organization of neonatal Module. Preventive of infections in the nursery.

#### **Module IV**

- Nursing management in common childhood diseases.
- Nutritional deficiency disorders.

- Reparatory disorders and infections.
- Gastrointestinal infections, infections and congenital disorders.
- Cardio vascular problem-congenital defects and rheumatic fever.
- Genito-urinary disorder – Nephritic syndrome, Wilms’ tumor, infection and congenital disorders.
- Neurological infections and disorders- convulsions, epilepsy, meningitis, hydrocephalus, spinabifida.
- Hematological disorders – Anemias, Thalassemia, ITP, Leukemia, hemophilia.
- Endocrine disorders – Juvenile Diabetes Mellitus.
- Orthopedic disorders – club feet, hip dislocation and fracture.
- Disorders of skin eye and ears.
- Common Communicable Diseases in children, their identification, Nursing management in hospital and home and prevention.
- Paediatric emergencies – poisoning, foreign bodies, haemorrhage, burns and drowning.

#### Module V

- Management of behavioral disorders in children.
- Management of challenged children:
  - Mentally challenged
  - Physically challenged
  - Socially challenged.

#### Examination Scheme:

Components	ATT	HA	CT	SE	P/S	EE
Weightage (%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination; P/S-Presentation/Seminar; EE- End Semester Examination**

# Post Basic B.Sc. Nursing –Second Semester

## MICROBIOLOGY

**Course Code: NUR2210**

**Credit Unit-07**

**Course Description:** This course reorients the students to the fundamentals of Microbiology and its various sub-divisions. It provides opportunities to gain skill in handling and use of microscope for identifying various micro- organisms. It also provides opportunities for safe handling of materials containing harmful bacteria and methods of destroying microorganisms.

### OBJECTIVES

**At the end of course the student will:**

1. Identify common disease producing micro- organisms.
2. Explain the basic principles of microbiology and their significance in health and disease.
3. Demonstrate skill in handling specimens.
4. Explain various methods of disinfection and sterilization.
5. Identify the role of the Nurse in hospital infection control system.

### Course Contents

#### Module I

- Structure and classification of microbes.
- Morphological types.
- Size and form of bacteria.
- Motility.
- Classification of micro-organisms.

#### Practical:

- Use and care of microscope.
- Common examination: Smear Blood, Moulds, and Yeasts.

#### Module II

- Identification of micro-organisms.
- Discussion of laboratory methods.
- Diagnosis of bacterial diseases.

#### Practical:

- Staining techniques- gram staining, acid fast staining.
- Hanging drop preparation.

#### Module III

- Growth and nutrition of microbes.
- Temperature.
- Moisture.
- Blood.

#### Practical

- Preparation of media and culture techniques.
- Collection, handling and transportation of various specimens.

#### **Module IV**

- Destruction of micro- organisms.
- Sterilization and disinfection.
- Chemotherapy and antibiotics.
- Effects of heat and cold.
- Hospital infection control procedure & role of Nurses.

**Practical:** Sterilization methods – Physical, Chemical and Mechanical

#### **Module V**

- Disease producing micro- organisms.
- Gram positive bacilli.
- Tuberculosis and leprosy.
- Anaerobes.
- Cocci.
- Spirochaete.
- Rickettsiae.

**Practical:** Identification and study of the following bacteria: streptococci, Pneumococci, and Staphylococci Corynebacteria, Spirochetes and gonococci. Enteric bacteria, Posting in infection control department.

#### **Module VI**

- Pathogenic Fungi.
- Dermatophytes.
- Systemic Mycotic infection.
- Laboratory diagnosis of Mycotic infection.

#### **Module VII**

- Immunity.
- Immunity and hypersensitivity - Skin test.
- Antigen and antibody reaction.
- Immunization in disease.

**Practical:** Demonstration of serological methods.

#### **Module VIII**

- Parasites and vectors.
- Characteristics and classification of parasites.
- Protozoal infection including amoebiasis.
- Helminthes infection.
- Diagnosis of parasitic infection.
- Vectors and diseases transmitted by them.

**Practical:** Identification of Parasites and Vectors.

#### **Module IX**

- Viruses.
- Classification and general character of viruses.
- Diseases caused by viruses in man and animal and their control.

## Module X

- Micro- organisms transmitted through food.
- Food poisoning. Food borne infections.

### Examination Scheme:

Components	ATT	HA	CT	SE	P/S	EE
Weightage (%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
P/S-Presentation/Seminar; EE- End Semester Examination**

### Text & References:

#### Text

## **Post Basic B.Sc. Nursing –Second Semester MATERNAL NURSING (PRACTICAL)**

**Course Code: NUR2211**

**Credit Unit-10**

This Course is based on Course Code NUR2208

### **Guidelines**

1. The student will:
  - a. Be posted in antenatal Clinic, MCH clinic, antenatal ward, labour room, postnatal ward, maternity OT, MTP room.
  - b. Visit welfare agencies for woman and write observation report.
  - c. Follow Nursing process in providing care to 3-6 patients.
  - d. Write at least two Nursing care studies and do a presentation.
  - e. Give at least one planned health teaching to a group of mothers.
2. Practices following Nursing procedures -
  - a. Antenatal & Post natal examination, per vaginal exam.
  - b. Conduct normal delivery, stitching of episiotomy, (for male candidate minimum conduct of 5 deliveries)
  - c. Motivation of family for adopting family planning methods.
  - d. Motivate family for Planned Parenthood.
  - e. Assist in various diagnostic and therapeutic procedures including IUD insertion and removal.

### **Examination Scheme:**

<b>Components</b>	<b>ANC</b>	<b>NCP (PNC)</b>	<b>P/S</b>	<b>HE</b>	<b>NCS</b>	<b>CE</b>	<b>SPE</b>	<b>EPE</b>
<b>Weightage (%)</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>40</b>	<b>10</b>	<b>100</b>

**ANC-Antenatal case; NCP- Nursing Care plan; PNC-Post natal case; P/S- Presentation//Seminar; HE-Health Education; NCS- Nursing Case Study; CE- Clinical Evaluation; SPE- Sessional Practical Examination; EPE-External Practical Exam**

## **Post Basic B.Sc. Nursing –Second Semester PAEDIATRIC NURSING (PRACTICAL)**

**Course Code: NUR2212**

**Credit Unit-10**

This Course is based on Course Code NUR2209

### **Guidelines**

The student will:

1. Be posted in Pediatric Medical and Surgical wards, OPD in hospital, health centre and neonatal unit.
2. Visit a centre for handicapped children and child welfare centre and write observation report.
3. Write an observational study of normal children of various age groups in home/ nursery school/ crèche.
4. Follow Nursing process in providing care to 3-6 children.
5. Write at least two Nursing care studies and do a presentation.
6. Give two planned health teachings, one in hospital and one in OPD / health centre.
7. Practice the following Nursing procedures:
  - Taking pediatric history
  - Physical assessment of children
  - Baby bath
  - Feeding
  - Restraining.
8. Calculation of dosage of drugs and administration of medications and injections.
9. Collection of specimens.
10. Enema, bowel wash, colostomy irrigation.
11. Steam and oxygen inhalation.
12. Preparation to assist with diagnostic tests and operations.
13. Examination / Assessment of a newborn.
14. Neonatal resuscitation.
15. Care of a baby in incubator and on ventilator.
16. Photo Therapy.
17. Assist in exchange transfusion and other therapeutic procedures.

### **Examination Scheme:**

<b>Components</b>	<b>NCP</b>	<b>HE</b>	<b>NCS/P</b>	<b>GDA</b>	<b>CE</b>	<b>SPE</b>	<b>EPE</b>
<b>Weightage (%)</b>	<b>10</b>	<b>10</b>	<b>20</b>	<b>10</b>	<b>30</b>	<b>20</b>	<b>100</b>

**NCP-Nursing Care Plan; HE- Health Education; NCS/P-Nursing Case Study/Presentation;  
GDA-Growth & Development Assessment; SPE-Sessional Practical Examination; CE- Clinical  
Evaluation; EPE- End Semester Practical Examination**

# **Post Basic B.Sc. Nursing –Third Semester**

## **SOCIOLOGY**

**Course Code: NUR2305**

**Credit Unit-05**

**Course Description:** This course is to reorient students to Sociology, relation to Community and social institution in India and its relationship with health, illness and Nursing.

### **OBJECTIVES**

**At the end of the course, the student will:**

1. Describe Sociological concepts that are applicable to Nursing.
2. Determine role of Sociology in Nursing as related to social institutions in India.
3. Develop positive attitudes towards individual, family and Community.

### **Course Contents**

#### **Module I**

- Introduction.
- Importance of study of Sociology in Nursing, relationship of Anthropology, Sociology, etc.

#### **Module II**

- Individual and the society.
- Socialization.
- Interdependence of the individual and society.
- Personal disorganization.

#### **Module III**

- Culture.
- Nature of culture.
- Evolution of culture.
- Diversity and uniformity of culture.

#### **Module IV**

- Social organization.
- Social groups, Crowds and Public groups, Nations, Race.
- Social Institutions: Family, Marriage, Education, Religion, Arts, Economic organization, Political organization.
- The Urban & Rural Community in India: Ecology, characteristics of the village, characteristics of the town and city.
- Social stratification: Class and Caste.

#### **Module V**

- Social Process.
- Process of Social Interaction: Competition, Conflict- war, Cooperation, Accommodation and Assimilation.

#### **Module VI**

- Social Change.
- Nature and process of Social Change: Factors influencing cultural change.
- Cultural Lag.

## Module VII

- Social Problems.
- Social disorganization control & planning: Poverty, Population Housing, Illiteracy, Food supplies, growth of urbanization, Prostitution, Minority groups, rights of woman & children, child labour, child abuse delinquency and crime, substance abuse.

### Examination Scheme:

Components	ATT	HA	CT	SE	P/S	EE
Weightage (%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
P/S-Presentation/Seminar; EE- End Semester Examination**

## **COMMUNITY HEALTH NURSING**

**Course Code: NUR2306**

**Credit Unit-05**

**Course Description:** The course enables the students to understand the national health care delivery system and to participate in the delivery of Community Health Nursing.

### **OBJECTIVES**

**At the end of the course, the student will:**

1. Explain the concepts of various factors contributing to health of individual, family and Community.
2. Identify the role of a Community Health Nurse.
3. Describe National Health Care delivery system.
4. Describe Epidemiological methods and principles of prevention and control of illness in the Community.
5. Identify the role of personnel working in the Community Health setting.
6. Plan the work of Community Health Nursing, and supervise and train health workers.

### **Course Contents**

#### **Module I**

- Introduction.
- Introduction to Community Health – Concepts, Principles and Elements of Primary Health Care.
- Introduction to Community Health Nursing.
- Concept of Community Health Nursing – Community Nursing process.
- Objective, Scope and Principles of Community Health Nursing.

#### **Module II**

- Family Health Services.
- Concept, Objective, Scope and Principles.
- Individual, Family and Community as a unit of service.
- Principles and techniques of home visiting.
- Establishing working relationship with the family.
- Working with families in relation to prevention of diseases, promotion of health.
- Care of the sick in the home, physically handicapped and mentally challenged.
- Surveillance and Monitoring.
- Social Mobilization Skills
- Programme management including supervision and monitoring

#### **Module III**

- Organization and Administration of health services in India.
- National Health Policy.
- Health Care Delivery system in India.
- Health team concepts:
  - Centre, State, District, Urban Health Services, Rural Health Services
  - System of medicines
  - Centrally sponsored health schemes
  - Role of voluntary health organizations and International Health Agencies
  - Role of health personnel in the Community
  - Public Health Legislation.
  - Roles and Responsibilities of Mid- level Health care Providers

- Diagnosing and treatment skills essential at sub-centre level using standard treatment protocols as per national health programmes
- Drug Dispensing

#### **Module IV**

- Health Education:
  - Aims, Concepts and Scope of Health Education.
  - National Plan for Health Education
  - Communication Techniques
  - Methods and media for health education programmes
  - Planning for health education and role of nurse.
  - Behaviour Change Communication and soft skills

#### **Module V**

- Role of the Community Health Nurse.
- National Health Programmes:
  - Maternal and child health programmes
  - Family welfare and school health services
  - Occupational health services.
- As a member of the health team.
- Training and supervision of health care workers.
- New National Health Programmes
- Ayushman Bharat
- Introduction to Rashtriya Bal Sureksha Karyakaram (RBSK)
- Integrated disease Surveillance Project (IDSP)
- Mother and Child Tracking System (MCTS)
- Organization of labour room
- Safe Child Birth Checklist
- Post Partum visit by health workers
- Family Planning 2020
- National Family Programmes
- Climate Change and its Impact on Health
- Heat Wave and its impact on Health
- Air Pollution and its impact on Health
- Air Pollution and its impact on Health
- 
- 

#### **Module VI**

- Epidemiology
- Definition – concepts, aims, objectives, methods & principles,
- Epidemiology – theories and models.
- Application of Epidemiology, principles and concepts in Community health.
- Food Born Diseases
- Chikungunya
- Investigation of an Outbreak

#### **Module VII**

- Bio-Statistics and Vital Statistics.
- Introduction, definition and scope, legislation.

- Report, recording and compiling of vital statistics at the local, state, national and international level.
- Definition and methods of computing vital statistics.
- Methods of presenting data.
- Management information system.

#### Examination Scheme:

Components	ATT	HA	CT	SE	P/S	EE
Weightage (%)	5	5	5	5	5	75

## **Post Basic B.Sc. Nursing –Third Semester NURSING ADMINISTRATION**

**Course Code: NUR2307**

**Credit Unit-13**

**Course Description:** This course is designed to give an opportunity to the student to gain an understanding of the principle of administration and its application to nursing service. It is also intended to assist the students to develop an understanding of professional leadership need.

### **OBJECTIVES**

**At the end of the course, the student will:**

1. Identify the principles of administration.
2. Describe the principles and techniques of supervision.
3. Explain the principles and methods of personnel management.
4. Explain the principles of budgeting.
5. Organize and manage a Nursing Module effectively.
6. Identify dynamics of organizational behavior, styles and functions of effective leadership.

### **Course Contents**

#### **Module I**

- Principles and Practices of administration.
- Significance, elements and principles of administration,
- Organization of Hospital – Definition, aims, functions, and classifications, health term.
- Policies of hospital, different departments with special emphasis to department of Nursing & office management.
- Responsibilities of the Nursing personnel especially of ward Sister, medico legal aspects, concept of cost effectiveness.

#### **Module II**

- Nursing Module Management.
- Physical layout of a Nursing Module of necessary facilities.
- Factors affecting the quality of Nursing care.
- Maintenance of a therapeutic environment
- Administration of the Module – management of patient care.
- Maintenance of physical environment.
- Assignment of duties and time plan.
- Patient assignment, safety measures, prevention of accidents and infections.
- Maintenance of patients' records and reports, legal responsibilities.
- Maintenance of quality Nursing care, Nursing audit.

#### **Module III**

- Personnel management.
- Staff recruitment and selection, appointment, promotions, personnel policies and jobs descriptions.
- Job analysis.
- Staffing the Module, staffing norms, rotation plan, leave planning, performance appraisal, staff welfare and management of disciplinary problems.

#### **Module IV**

- Supervision.
- Principles of supervision, nature and objectives.
- Tools and techniques of supervision.
- Evaluation.
- Nursing audit.
- Staff development – orientation program.
- Skill training.
- Leadership development.
- Problem solving process.

#### **Module V**

- Material management.
- Principles of material management.
- Quality control.
- Inventory, care of equipment, safekeeping.
- Role of nursing personnel in material management.

#### **Module VI**

- Financial Management.
- Budgeting – principles of budgeting, audit.

#### **Module VII**

- Organizational Behavior.
- Group dynamic and human relation, organizational communication (hospital information system).
- Public relation, leadership styles and functions.
- Methods of reporting.
- Maintaining records and reports.

#### **PRACTICUM**

1. Observe the functioning of Nursing administration at various level i.e. institution, department, Module etc.
2. Each student will practice Ward Management under supervision.
3. Student will prepare rotation plan of the staff, write reports, give verbal reports of the ward and assist in maintaining the inventory of the Nursing Module.
4. Visit to private and government hospital and write observation reports.

#### **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>P/S</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
P/S-Presentation/Seminar; EE- End Semester Examination**

**Post Basic B.Sc. Nursing –Third Semester  
COMMUNITY HEALTH NURSING (PRACTICAL)**

**Course Code: NUR2308**

**Credit Unit-10**

This Course is based on Course Code NUR2306

**Guidelines**

1. Each student will prepare a Community profile.
2. The student will be allotted families for gaining experience in identifying family health needs, health counseling and guidance and family budgeting for optimum health.
3. The student will participate in the activities of primary health centre.
4. Sub-centre, MCH centre.
5. Visits will be made to selected health and welfare agencies, water purification plant and sewage disposal plant, infectious disease hospital, child welfare centre, old aged homes, orphanages and handicapped hospitals.
6. Conduct health educational programmes for individual/ groups/ Community.

**Examination Scheme:**

<b>Components</b>	<b>CHP</b>	<b>CP</b>	<b>FCS</b>	<b>OR</b>	<b>HE</b>	<b>EPE</b>
<b>Weightage (%)</b>	<b>20</b>	<b>10</b>	<b>30</b>	<b>10</b>	<b>30</b>	<b>100</b>

**CHP- Community Health project; CP-Community Profile; FCS-Family Case Study; OR- Observation Report; HE-Health Education; EPE-External Practical Exam**

## **Post Basic B.Sc. Nursing –Fourth Semester PSYCHIATRIC NURSING**

**Course Code: NUR2405**

**Credit Unit-05**

**Course Description:** This course enables the students to recognize and appreciate the causes, symptoms and process of abnormal human behavior. It also introduces the student to the present day treatment modalities in the light of psychological, social and cultural factors affecting human behavior. This course helps the student to learn principles of Mental Health and Psychiatric Nursing and to develop beginning skills in the management of the mentally ill in hospital and Community.

### **OBJECTIVES**

**At the end of course, the student will:**

1. Identity and describe the Philosophy and Principles of Mental Health Nursing.
2. Describe the Historical Development of Mental Health and Psychiatric Nursing.
3. Classify Mental Disorders.
4. Develop skill in history taking and performing Mental status examination.
5. Describe etiological factors, Psychopathology, clinical features, diagnostic criteria and treatment methods used for mental disorders.
6. Manage the patients with various Mental disorders.
7. Communicate therapeutically with patients and their families.
8. Identity role of the Nurse in preventive psychiatry.
9. Identity the legal aspects in practice of Mental Health and Psychiatric Nursing.

### **Course Contents**

#### **Module I**

- Introduction and historical development.
- History of Psychiatry.
- Historical development of Mental Health Nursing.
- Philosophy, Principles of Mental Health Nursing and Psychiatric Nursing.
- Concept of normal and abnormal behavior.
- Role and qualities of Mental Health and Psychiatric Nurse.
- Mental Health team and functions of team members.
- Legal aspects in Psychiatry and Mental Health services.

#### **Module II**

- Classification and assessment of mental disorders.
- Terminologies used in Psychiatry.
- Classification of mental disorders.
- Etiological factors and psychopathology of mental disorders.
- History taking and assessment methods for mental disorders.

#### **Module III**

- Therapeutic communication.
- Communication process.
- Interview skills, therapeutic communication techniques. Nurse patient relationship, therapeutic impasse and its management process recording.

#### **Module IV**

- Management of mental disorders
- Etiological factors, psychopathology, types, clinical features, diagnostic criteria, treatment and Nursing management of patient with following disorders:
  - Neurotic disorders: Anxiety Neurosis, Depressive Neurosis, Obsessive Compulsive Neurosis, Phobic Neurosis and Hypochondriacal Neurosis, stress related and somatoform disorders.
  - Psychotic disorders: Schizophrenic form, Affective and Organic psychosis.
  - Organic Brain syndromes
  - Psychosomatic disorders
  - Personality disorders
  - Disorders of Childhood and Adolescence.

#### **Module V**

- Management of patients with Substance abuse disorders.
- Substance abuse and misuse.
- Dependence, Intoxication and Withdrawal
  - Classification of Psychoactive Substances
  - Etiological & Contributory factors
  - Psychopathology
  - Clinical features
  - Diagnostic criteria.
- Treatment and Nursing management of patient with Substance use disorders.
- Preventive and rehabilitative aspects in substance abuse.

#### **Module VI**

- Management of mental sub-normality.
- Classification of mental sub-normality.
- Etiological factors, psychopathology, psychometric assessment. diagnostic criteria and management of sub-normality.

#### **Module VII**

- Psychiatric emergencies.
- Types of emergencies, psychopathology, clinical features, assessment and diagnosis, treatment and Nursing management of patient with Psychiatric emergencies.
- Crisis intervention therapy.

#### **Module VIII**

- Therapeutic modalities.
- Principles, indication, contraindications and role of Nursing in various treatment methods: Therapeutic Community and Milieu therapy
  - Occupational therapy
  - Psychotherapy
  - Behavior therapy
  - Group therapy
  - Family therapy
  - Pharmacotherapy
  - Electro convulsive therapy
  - Other miscellaneous therapies.

#### **Module IX**

- Preventive Psychiatry.
- Model of prevention.

- Role of Nursing in preventive Psychiatry.
- Psychiatric social work.
- Community Mental Health Nursing.
- Community Mental Health agencies.
- National Mental Health programmes.

#### Examination Scheme:

Components	ATT	HA	CT	SE	P/S	EE
Weightage (%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
P/S-Presentation/Seminar; EE- End Semester Examination**

# **Post Basic B.Sc. Nursing –Fourth Semester INTRODUCTION TO NURSING EDUCATION**

**Course Code: NUR2406**

**Credit Unit-10**

**Course Description:** This course introduces the students to the principles and concepts of education, curriculum development, and methods and media of teaching. It also describes the steps in curriculum development and implementation of education programmes in Nursing.

## **OBJECTIVES**

**At the end of the course, the students will:**

1. Describe the philosophy and principles of education.
2. Explain the teaching – learning process.
3. Develop the ability to teach using various methods and media.
4. Describe the process of assessment.
5. Describe the administrative aspects of school of Nursing.
6. Participate in planning and organizing an in-service education programme.
7. Develop basic skill of counseling and guidance.

## **COURSE CONTENTS**

### **Module I**

- Introduction to education:
  - Meaning of education, aims, function and principles.
- Philosophy of education:
  - Factors influencing development of philosophy of Nursing Education.

### **Module II**

- Teaching learning process.
- Nature and characteristics of learning.
- Principles and maxims of teaching
- Formulating objectives.
- Lesson planning.

### **Module III**

- Methods of teaching:
  - Teaching methods
  - Lecturer
  - Discussion
  - Demonstration
  - Group discussion
  - Project
  - Role play
  - Panel discussion
  - Symposium
  - Seminar
  - Field trip
  - Workshop
  - Exhibition
  - Programmed instruction
  - Computer assisted learning.
- Clinical teaching methods:
  - Case methods

- Case presentation
- Nursing rounds and reports
- Bedside clinic
- Conference (individual and group)
- Recording of interaction process.

#### **Module IV**

- Educational media.
- Communication Process: Factors Affecting Communication.
- Purpose and Types of Audio-Visual Aids.
- Graphics aids: Chalk-board, Charts, Graphs, Poster, Flash Cards, Flannel graph / Khadigraph, Bulletin, Cartoon,
- Three Dimensional Aids: Objects, Specimen, Models, Puppets.
- Printed Aids: Pamphlets and Leaflets.
- Projected Aids: Slides, Films and Television, VCR, VCP, Overhead Projector, Camera, Microscope.
- Audio Aids: Tape Recorder, Public address system, Computer.

#### **Module V**

- Methods of assessment.
- Purpose and Scope of evaluation and assessment.
- Criteria for selection of assessment techniques and methods.
- Assessment of knowledge: essay type question, SAQ (short answer questions).
- MCQ (multiple choice questions).
- Assessment of skills: observation, check list. Practical examination Viva, objective structured clinical examination.
- Assessment of attitude: Attitude scale.

#### **Module VI**

- Management of School of Nursing.
- Planning of school of Nursing, organization.
- Recruitment of teaching staff, budget, facilities for the school, student selection and admission procedure, administrative planning of students, welfare services for students, maintenance of schools records, preparation of annual reports, INC guidelines for schools of Nursing.

#### **Module VII**

- Guidance and counseling: Definition.
- Basic principles of guidance and counseling.
- Organization of guidance and counseling services.
- Counseling process.
- Managing disciplinary problems.
- Management of crisis.

## Module VIII

- In-service education.
- Introduction to nature and scope of in-service education programme.
- Principles of adult learning.
- Planning for in-service programme.
- Techniques, and methods of staff education programme
- Evaluation of in- service programme.

## PRACTICUM

Each student should:

1. Conduct five planned teaching using different methods and media.
2. Prepare different types of teaching aids.
3. Plan, organize and conduct in-service education programme
4. Conduct at least one counseling session.
5. Prepare rotation plans.

## Examination Scheme:

Components	ATT	HA	CT	SE	P/PT	EE
Weightage (%)	5	5	5	5	5	75

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
P/PT-Presentation/Practice Teaching; EE- End Semester Examination**

# **Post Basic B.Sc. Nursing –Fourth Semester**

## **INTRODUCTION TO NURSING RESEARCH AND STATISTICS**

**Course Code: NUR2407**

**Credit Unit-04**

**Course Description:** The course is designed to assist the students to develop an understanding of basic concepts of Research and Statistics, use the findings of Nursing Research in nursing practices, apply the knowledge in conducting project(S) and solve problems related to nursing using scientific method.

### **OBJECTIVES**

**At the end of the course, the students will:**

1. Define the terms and concepts of Nursing Research.
2. Identify needs and scope of Nursing Research
3. Identify and define a Research problem
4. Locate and list sources of literature for a specific study
5. Describe different Research approaches, methods of data collection and sampling techniques with a special reference to survey method.
6. Develop tool for data collection.
7. Enumerate steps of data analysis and present data summary in tabular form.
8. Use descriptive and co-relational statistics in data analysis.
9. Conduct a group Research project.

### **Course Contents**

#### **A. INTRODUCTION TO RESEARCH METHODOLOGY**

##### **Module I**

- Steps of scientific methods.
- Definition of Research.
- Need for Nursing Research.
- Characteristics of good research. Research process.

##### **Module II**

- Statement of Research problem.
- Statement of purpose and objectives.
- Definition of Research terms.
- Review of literature.

##### **Module III**

- Research approaches: historical, survey and experimental.

##### **Module IV**

- Sampling techniques and methods of data collection.
- Sampling.
- Instrument-questionnaire, Interview.
- Observation schedule, records, measurements.
- Reliability and validity of instruments.

##### **Module V**

- Analysis of Data, Tabulation:
  - Classification and summarization

- Presentation
- Interpretation of data.

### **Module VI**

- Communication of research findings.
- Writing report:
  - Organizing materials for writing
  - Format of the report
  - Use of computers.

## **B. INTRODUCTION TO STATISTICS**

### **Module VII**

- Descriptive Statistics.
- Frequency Distribution – Types of measure - frequencies, class interval, graphic methods of describing frequency.
- Measures of Central Tendency – Mode, Median, Mean.
- Measures of variability: Range, Standard deviation
- Introduction to normal probability.

### **Module VIII**

- Correlation.
- Computation by rank difference methods.
- Uses of correlation co-efficient.

### **Module IX**

- Biostatistics: Crude rates and standardized rates, ratio and estimation of the trends.

### **Module X**

- Introduction to computers in Nursing.
- Introduction to Computer and disk – operating system
- Introduction to word processing
- Introduction to data base
- Window application: Word, Excel, Power point, Multimedia.
- Use of statistical packages.
- Introduction to internet & use of electronic mail.
- Computer aided teaching & testing.

### **Examination Scheme:**

<b>Components</b>	<b>ATT</b>	<b>HA</b>	<b>CT</b>	<b>SE</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>5</b>	<b>10</b>	<b>5</b>	<b>5</b>	<b>75</b>

**ATT-Attendance; HA-Home Assignment; CT-Class Test; SE-Sessional Examination;  
EE- End Semester Examination**

## **Text & References:**

## **Post Basic B.Sc. Nursing –Fourth Semester PSYCHIATRIC NURSING (PRACTICAL)**

**Course Code: NUR2408**

**Credit Unit-10**

This Course is based on Course Code NUR2405

### **Guidelines**

The student will be provided opportunity to:

1. Observe, Record and Report the behavior of their selected patients.
2. Record the process of interaction.
3. Assess the Nursing needs of their selected patients, plan and implement the Nursing intervention.
4. Counsel the attendant and family members of patient.
5. Participate in the activities of Psychiatric team.
6. Write observation report after a field visit to the following places:
  - Child guidance clinic.
  - School / Special Schools (For mentally subnormal)
  - Mental Hospital,
  - Community Mental Health Centers.
  - De-addiction and Rehabilitation Centers.

### **Examination Scheme:**

<b>Components</b>	<b>PR</b>	<b>NCP</b>	<b>NCS</b>	<b>MSE</b>	<b>HE</b>	<b>CE</b>	<b>EPE</b>
<b>Weightage (%)</b>	<b>20</b>	<b>20</b>	<b>20</b>	<b>10</b>	<b>10</b>	<b>20</b>	<b>100</b>

**PR-Process Recording; NCP-Nursing Care Plan; NCS-Nursing Case Study; MSE- Mental status Examination; HE- Health Education; CE-Clinical Evaluation; EPE-End Term Practical Examination.**

## Post Basic B.Sc. Nursing –Fourth Semester DISSERTATION (NURSING RESEARCH)

**Course Code: NUR2437**

**Credit Unit-10**

**Objectives:** During the training the students are expected to learn about research problem, research methodology, research plan, implementation and statistical methods. The knowledge will be utilized for improving the quality of nursing practice and education.

### **Research Project**

Students will conduct research project in selected areas of nursing and submit a report. The studies may include exploring existing health practices, improved practices of nursing procedures, health records, patient records and survey of nursing literature.

#### **Guidelines:**

- During the clinical training a student will write a research project work related to the profession of nursing, based on his/her interest.
- Project work would be under the supervision of internal faculty (assigned for guiding the project) appointed by the Principal/Director of college of nursing.
- The research project would be completed and submitted before the completion of fourth semester of the course.
- Before the submission of project the student will be required to make a presentation before the research committee through power point presentation.
- The assessment of performance of student will be totally internal and the research committee will assess the student on the basis of his/her performance.
- There would be mid-term review of the progress of the project before three members of the research committee appointed by the Principal/Director of college of nursing.
- The research project work should cover the following area.
  - Review of literature on the selected topic and reporting
  - Formulation of problem statement, objectives.
  - Research methodology
  - Analysis and interpretation
  - Summary & Conclusion.

#### **Examination Scheme**

Components	PP	TP	DAP	GE	Pr R/V (EE)
Weightage (%)	10	10	15	15	50

**PP -Proposal Presentation; TP- Tool Presentation; DAP- Data Analysis Presentation; GE- Guides' Evaluation; Pr R/V (EE)-Project Report/Viva (External Examination)**

## Syllabus – First Semester

### INTRODUCTORY PSYCHOLOGY

**Course Code: PSY2151**

**Credit Units: 03**

**Course Objective:**

This course is designed to introduce the science of psychology. It identifies and defines the theories, terms, methods, and various fields of psychology. This course can be used as a foundation towards continued education in more specific areas of psychology. General Psychology encourages students to study in depth the notions of modern scientific psychology. Upon completion of this course, student should have the following objectives:

- To know the major personalities important to the field of general psychology and the ideas, theories, and schools with which they are associated.
- To know the major terms associated with general psychology and their meanings.
- To know the major concepts associated with the area of general psychology.

**Course Content**

**Module I:**

Meaning, Definition, Nature and Goals of Psychology

**Module II:**

Scope of Psychology; Branches and Fields of Psychology

**Module III:**

Background of Psychology: Historical Perspective

**Module IV:**

Schools of Psychology: Structuralism, Functionalism, Behaviorism, Gestaltism, Psychoanalysis, Humanism, Existentialism, Cognitive

**Module V:**

Methods of Psychology: Introspection, Observation, Experimental, Interview, Questionnaire, Survey

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

# ELEMENTARY STATISTICS

**Course Code: PSY2101**

**Credit Units: 03**

## **Course Objective:**

The paper on Statistics introduces quantification of psychological data and gives primary research orientation to the students. Understanding Statistics and basic logic of Statistics is crucial to being able to read Psychology research article. Further by mastering the basic logic and ways of thinking about Statistics, students will be unusually well prepared for the advanced courses.

## **Course Contents:**

### **Module I:**

Meaning, Definition, Importance and Limitations of Statistics in Psychology  
Population and Sample: Types of Sampling

### **Module II:**

Primary and Secondary Data  
Classification and Tabulation of Data,  
Frequency Distribution

### **Module III:**

Graphical presentation of Data: Histograms, Frequency polygon, Frequency Curve, Cumulative Frequency Curve (Ogive), Cumulative Percentage Curve

### **Module IV:**

Measures of Central Tendency: Meaning, Application and Computation of Mean, Median and Mode

### **Module V:**

Measures of Variability: Range and Variation; Average deviation, Quartile deviation and Standard deviation

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT / H / P / V / Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## **Text & References:**

## EXPERIMENTAL PSYCHOLOGY- I

**Course Code: PSY2102**

**Credit Units: 03**

### **Course Objective:**

The basic general objective of Experimental Psychology is to familiarize the student with a basic and broad understanding of the scientific method and its application to the problems of Psychology. The course focuses on the logic, principles and practices of modern science and how it is applied to understanding the nature of reality. Successful completion of this course will prepare the student for graduate work and advanced experimental concepts.

### **Course Contents:**

#### **Module I:**

Meaning and History of Experimental Psychology

Nature of Science and Scientific Methods, Scope of Experimental Psychology

#### **Module II:**

Steps of Experimental Method

Problem and Hypothesis: Nature, Types and Sources

Variables: Nature and types and control of Variables.

#### **Module III:**

Sensory Process: Meaning and Types of Senses, Sensation and Sensitivity

Visual Sense- Structure and Functioning of Eye

Hearing Sense- Structure and Functioning of Ear

Chemical Senses- Sense of Smell and Sense of Taste

Skin Senses- Sense of Touch or Pressure, Sense of Temperature and Pain

Body Senses- Kinesthetic Sense and Vestibular Sense

#### **Module IV:**

Attentional Process: Nature, Types and Determinants of attention

#### **Module V:**

Perceptual Process: Meaning and Nature of Perception

Principal of Perceptual organization

Perception of Space, Depth–Visual Monocular Cues and Binocular Cues, Perception of Distance and

Direction Perceptual constancy

Perceptual Illusions; Delusions and Hallucinations

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT / H / P / V / Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

**Text & References:**

## PSYCHOLOGICAL PRACTICAL- I

**Course Code: PSY2103**

**Credit Units: 03**

### Course Objective:

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To familiarize the students with the use of elementary statistical techniques
4. To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5practicals will be conducted in the first semester among the list of following practicals out of which first three practicals are compulsory.**

### Course Content:

1	Alexander Pass-a-long Test of Intelligence	Intelligence
2	Muller Lyre Apparatus with stand	Perception Illusion
3	Division of Attention Board with reset 6 digit Impulse counter	Attention
4	Leadership Style Scale	Leadership
5	Depth Perception	Perception
6	Marital Coping Scale	Relationship

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

### Text & References:

- Mohsin, S. M.:Experiments in Psychology. MotilalBanarasidas
- Woodworth, R.S.:Experimental Psychology. Oxford & IBH & Schlosberg, H. Publishing

## SYSTEMS AND APPROACHES IN PSYCHOLOGY

**Course Code: PSY2104**

**Credit Units: 03**

### **Course Objective:**

The paper on System and Theories gives a brief history of psychology and the developments within the discipline.

### **Course Contents:**

#### **Module I: Development of Psychology as a Discipline**

Contribution of Weber, Fechner, Helmholtz, Galton, Ebbinghaus, Mc Keen Cattell.

#### **Module II: Structuralism, Functionalism**

Wundt and Titchner as the founder of structuralism, structuralism as a system  
Founding of Functionalism: Dewey and Angell

#### **Module III: Behaviourism**

Watsonian Behaviourism: systematic criteria and critical evaluation.

#### **Module IV: Gestalt psychology**

Founding the Gestalt psychology, Gestalt qualities, factors in organization, insight and productive thinking, Gestalt psychology as a system,

#### **Module V: Psychoanalysis**

Basic postulates, Freud, Jung and Adler's contributions to Psychoanalysis, critical evaluation.

### **Examination Scheme:**

Components	CT	CT / H / P / V / Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

### **Text & References:**

#### **Text:**

## **HUMAN RIGHTS, VALUES AND ETHICS**

**Course Code: PSY2105**

**Credit Units: 03**

### **Course Objective:**

The course will address the evolution of international human rights and of the legal instruments designed for their protection. It will study the theoretical foundations of the idea of human rights in India.

### **Course Contents:**

#### **Module I: Introduction to Human Rights**

Historical Perspective of Human rights  
 Meaning and Evolution of Human rights  
 Theories of Human Rights  
 Universalization of Human Rights  
 General Conditions Underlying the idea of human rights

#### **Module II: Human Rights in Indian Context**

Indian constitution and Human rights  
 Implementation of human rights in India  
 Personal and family rights  
 Group rights and right to equality

#### **Module III: Human Rights Education**

History and Determinants of Human Right Education  
 Principles of Human Rights Education  
 Awareness of Human Rights in Children  
 Protection of Human Rights in School  
 Global Need of Human Right Education

#### **Module IV: Human and Civil Rights**

Property Rights - Copyright - Intellectual Property  
 Crime and Social Deviance: Anomie  
 Ethics  
 Police — Law Enforcement: International Law Enforcement Agencies and National Law Enforcement Agencies

#### **Module V: Values and ethics In India**

Human Rights: Values and Ethics  
 Indian and Western Values and Ethics

### **Examination Scheme:**

Components	CT	CT / H / P / V / Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## READINGS IN PSYCHOLOGY

**Course Code: PSY2130**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16.

### **Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2132

Credit Units:03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4)Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor(Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).

- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## **ARTICLE/ FEATURE WRITING**

**Course Code: PSY2136**

**Credit Units: 01**

### **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of an article is to provide the students an opportunity to further enhance their knowledge in an area of their choice by undertaking different **aspects of human behavior and analyzing it** at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

The purpose of the article is for the students to draw upon their interest in currently published research literature with the aim of furthering theoretical work in the field of interest.

### **Guidelines:**

1. The article will be related to the contemporary Psychological issue and the topic will be given by the department. The article will be written in around 3000 words.
2. The presentation of the article is scheduled to be held before the commencement of Semester examinations.
3. The article will carry 100 marks that will be marked on the basis of selection of topic, article writing and viva.
4. There are a number of types of articles that are published in psychological journals, including reports of empirical studies (psychological reports), review articles, case studies and theoretical articles. Students may critically assess existing theories, identifying flaws or arguing for the superiority of one theory over another. This is often done through examining a theory's internal consistency and evaluating the level of empirical support for the theory (i.e. studies/experiments). This type of theoretical analysis is what we are expecting from students at undergraduate level.

### **Examples of a few broad areas for articles (List is indicative, not exhaustive)**

- Personality theories
- Emotional Intelligence
- Positive thinking
- Learning
- Self concept
- motivation

- Emotion
- Cognitive process
- Cross cultural Psychology
- Memory enhancement

## EVALUATION

Selection of topic & its significance	Article writing		Viva	Total
	Content	References(studies quoted)		
10	30	20	40	100

## Syllabus – Second Semester

### ABNORMAL PSYCHOLOGY

**Course Code: PSY2251**

**Credit Units: 03**

#### Course Objective:

Abnormal psychology is a branch of psychology that deals with psychopathology and abnormal behavior that causes suffering to the individual and others around him or her, and interferes with functioning in a significant way. The term covers a broad range of disorders, from depression to obsession-compulsion to sexual deviation and many more. The study of abnormal psychology also includes learning about the factors, situations, and conditions that cause mental disorders and how they may be best treated.

#### Course Content:

##### Module I: Introduction

Concept of abnormality: Criteria and Perspectives

Classification: DSM IV-R, conceptual and operational evaluation.

Casual factors in Psychopathological Behaviour

(a) Biological determinants

(b) Psychological determinants

(c) Socio-cultural determinants

##### Module II: Neurosis and Psychosis

Concept and Difference between both the two

##### Module III: Neurotic Disorder

Generalized anxiety disorders

Obsessive-Compulsive disorders

Phobic Disorders

Eating Disorder

##### Module IV: Mood Disorders

Depression

Bipolar Disorder

**Module V: Psychotic Disorder**

Bipolar disorders: Manic, Depressive, Mixed

Psychotic depression

Delusional Disorder

Schizophrenia

**Module VI: Mental Retardation and Development Disorders**

Levels of mental retardation, Organic factors in mental retardation.

Autism: Clinical picture and causal factors.

Childhood Disorder

**Module VII: Substance Abuse Disorders**

Alcoholism

Drug Addiction

**Module VIII:**

Psychosomatic Disorder

Somatoform Disorders

Personality Disorders

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

**Text & References:**

## ADVANCED STATISTICS

**Course Code: PSY2201**

**Credit Units: 03**

**Course Objective:**

The paper on statistics introduces quantification of psychological data and gives primary research orientation to the students.

**Course Contents:**

**Module I: The Normal Curve**

Characteristics and Problems in Normal Probability Curve (NPC), The Standard Normal Curve.

**Module II: Significance of mean**

Computation of the standard error of mean, application and interpretation, Z-test, The 't' distribution, Degrees of freedom, Levels of significance, Standard error of difference between two independent means (t-test: Large & small samples), Type I and Type II errors

**Module III: Chi-Square Test (Non-Parametric Method)**

Meaning, Test of Hypothesis with equal probability, Chi-Square with 2\*2 table

**Module IV: Analysis of Variance**

Hypothesis testing with the help of One way ANOVA (f-test)

**Module V: Parametric Vs Non-parametric Stats**

Introduction, Assumptions, basic differences, uses of parametric and Non-parametric tests

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## **EXPERIMENTAL PSYCHOLOGY-II**

**Course Code: PSY2202**

**Credit Units: 03**

### **Course Objective:**

The basic general objective of Experimental Psychology is to familiarize the student with a basic and broad understanding of the scientific method and its application to the problems of Psychology. The course focuses on the logic, principles and practices of modern science and how it is applied to understanding the nature of reality. Successful completion of this course will prepare the student for graduate work and advanced experimental concepts

### **Course Contents:**

#### **Module I: Psychophysics**

Basic Concepts, Stimulus and Differential Threshold  
Determination of Thresholds: Method of Limits,  
Method of Average Error, Method of Constant Stimuli

#### **Module II: Motivation**

Meaning, Definition and Nature of Motivation, Motivational Cycle  
Needs– Biological and Psychosocial, Drive and Incentive  
Classification of Motives– Biogenic and Psycho-social Motives  
Theories of Motivation–Need and Drive Reduction Theory, Instinctive and Social Theory, Self-Urges Theory, Goal-oriented Actualization Theory.

#### **Module III: Emotion**

Meaning, Nature and Characteristics of Emotions  
Aspect of Emotions- Bodily and Physiological Changes  
Theories of Emotion: James-Lange Theory, Cannon-Bard Theory, Schachter and Singer's Cognitive Theory, Lindsey's Activation Theory.

#### **Module IV: Learning**

Meaning, Nature and Types of learning (Verbal, Motor, Concept etc)  
Theories of Learning –Trial and Error Theory, Classical Conditioning Theory, Operant / Instrumental Conditioning, Insight Learning Theory

## Transfer of Training: Meaning, Types and Theories of Transfer of Training

### Module V: Learning disabilities

Reading Disorder/Developmental dyslexia

Disorder of written expression/Dysphasia/Aphasia

Math Disability/Dyscalculia.

### Examination Scheme:

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## PSYCHOLOGICAL PRACTICAL- II

**Course Code: PSY2203**

**Credit Units: 03**

**Course Objective:**

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the second semester among the list of following practicals out of which first three practicals are compulsory.**

**Course Content:**

1	Mirror Drawing	Motor Learning
2	Rey Auditory Verbal Learning Test	Verbal Learning
3	Emotions & Expressions	Emotion
4	Coopersmith Self Esteem Inventory	Self Esteem
5	Emotional Intelligence Test	Intelligence
6	Quality Of Marital Relationship scale	Relationship

**Examination Scheme:**

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

**Text & References:**

- Mohsin, S. M.:Experiments in Psychology. MotilalBanarasidas
- Woodworth, R.S.:Experimental Psychology. Oxford & IBH & Schlosberg, H. Publishing

## **INDUSTRIAL PSYCHOLOGY**

**Course Code: PSY2204**

**Credit Units: 03**

### **Course Objective:**

Industrial psychology is the branch of psychology that applies psychological theories and principles to organizations. Often referred to as I/O psychology, this course focuses on the topics like increasing workplace productivity and related issues such as the physical and mental well-being of employees.

### **Course Contents:**

#### **Module I: Introduction to Industrial Psychology**

Definition, Subject matter, & Goals

Development of Industrial Psychology, Present status & future prospects

#### **Module II: Personnel selection**

Determining job requirements: Uses and types of job information, and job analysis

Recruiting job applicants: Recruitment techniques

Personal history assessment: Standard application blanks, bio data items, resume and letter of reference

Assessment of current behavior: Interviews, psychological testing and assessment Centers

#### **Module III: Employee training and Development**

Training needs assessment

Training design

Techniques for training knowledge and skill

Training programme evaluation

#### **Module IV: Evaluating Job Performance**

Uses of performance evaluation: Downsizing, fair employment, employment-at-will and seniority

Sources of evaluation: The evaluator and performance information

Appraisal rating systems: Graphic rating scales and rating errors

Non-rating evaluation methods: Checklists and comparison method

#### **Module V: Conditions of Work & Accidents**

Conditions of Work: Physical Conditions for work- Illumination, Noise, Colour, Temperature, Humidity.

Temporal Condition for Work- Hours for Work, Length of Work Week, Flexible Working Hours, Rest Pauses and Shift work  
 Psychological Conditions of Work-Boredom, Monotony and Fatigue  
 Industrial Accident- Definition, Causes and Prevention

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## **ORGANIZATIONAL BEHAVIOUR**

**Course Code: PSY2205**

**Credit Units: 03**

### **Course Objective:**

To learn how the findings of psychology are applied to the problems involving human behavior in the workplace for providing optimum solutions.

### **Course Contents:**

#### **Module I: Nature and Scope of Organizational Psychology**

Organizational Psychology: Meaning, subject matter and functions of Organizational Psychology  
Development, Current status and Future of Organizational Psychology

#### **Module II: Work Motivation**

Theories

Job Design: Job enlargement, Job enrichment and Job characteristics models

#### **Module III: Organizational Attitude and Behaviour**

Job Satisfaction, Job Involvement, Organizational Commitment: Concepts, Determinants and Consequences.

#### **Module IV: Influence, Power and Politics in Organization**

Introduction: Individual bases of Power, Group or Subunit power

Structural determinants, Organizational Politics and its ethical implication

#### **Module V: Organizational Culture**

Nature, Formation and maintenance of organizational culture

Consequences of organizational culture

Work culture in the Indian context

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
------------	----	------------	----	---	----

<b>Weightage (%)</b>	10	10	5	5	70
----------------------	----	----	---	---	----

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## READINGS IN PSYCHOLOGY

**Course Code: PSY2230**

**Credit Units: 02**

### **Objectives:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16.

### **Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## PROJECT (WITH PRESENTATION & EVALUATION)

**Course code: PSY2232**

**Credit Units: 03**

### **Course Objective:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### **Chapter Scheme and distribution of marks:**

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

### **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4)Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).

- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## **ARTICLE/ FEATURE WRITING**

**Course Code: PSY2236**

**Credit Units: 01**

### **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of an article is to provide the students with an opportunity to further enhance their knowledge in an area of their choice by undertaking different **aspects of human behavior and analyzing it** at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

The purpose of the article is for the students to draw upon their interest in currently published research literature with the aim of furthering theoretical work in the field of interest.

### **Guidelines:**

1. The article will be related to the contemporary Psychological issue and the topic will be given by the department. The article will be written in around 3000 words.
2. The presentation of the article is scheduled to be held before the commencement of Semester examinations.
3. The article will carry 100 marks that will be marked on the basis of selection of topic, article writing and viva.
4. There are a number of types of articles that are published in psychological journals, including reports of empirical studies (psychological reports), review articles, case studies and theoretical articles. Students may critically assess existing theories, identifying flaws or arguing for the superiority of one theory over another. This is often done through examining a theory's internal consistency and evaluating the level of empirical support for the theory (i.e. studies/experiments). This type of theoretical analysis is what we are expecting from students at undergraduate level.

### **Examples of a few broad areas for articles (List is indicative, not exhaustive)**

- Personality theories
- Emotional Intelligence
- Positive thinking
- Learning
- Self concept
- motivation

- Emotion
- Cognitive process
- Cross cultural Psychology
- Memory enhancement

#### **EVALUATION**

<b>Selection of topic &amp; its significance</b>	<b>Article writing</b>		<b>Viva</b>	<b>Total</b>
	Content	References(studies quoted)		
10	30	20	40	100

## **Syllabus – Third Semester**

### **BASIC COGNITIVE PSYCHOLOGY**

**Course Code: PSY2351**

**Credit Units: 03**

#### **Course Objective:**

Cognitive Psychology is an objective, empirical discipline that tends to favor an experimental approach. This paper of Psychology is crucial to understand the basis of mental activity and human behaviour. The students of Psychology will need to have this knowledge about the normal mental operation of adults in order to understand more complex processes and their disorder. The subject emphasizes cognitive aspects to show the more up to date developments. In this paper of Psychology, Students will:

- Gain factual knowledge of the terminology, methods, and research findings in the field of cognitive psychology.
- Learn the fundamental theories and principles of cognitive psychology including being able to critique them.
- Learn how professionals in the field of cognitive psychology go about the process of gaining new knowledge.

#### **Course Content:**

##### **Module I:**

Introduction, History and Background of Cognitive Psychology

##### **Module II:**

Thinking: Nature, and Types of Thinking:

Tools of thinking- Images, Concept, Symbols and Signs, Language, Muscle Activities and Brain Function

##### **Module III:**

Reasoning: Meaning and Types of Reasoning: Deductive and Inductive Reasoning

##### **Module IV:**

Problem solving: Meaning and Method of Problem solving

Decision Making: Meaning, types and hindrances

**Module V:**

Intelligence: Meaning, Nature and Theories of intelligence: Unitary Theory, Multifactor Theory, Two Factor Theory, and Group Factor Theory.

Genetic and Environmental Influence on Intelligence

Classification of Intelligence Test

Concept of Mental Age and IQ

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## **SOCIAL PSYCHOLOGY**

**Course Code: PSY2301**

**Credit Units: 03**

### **Course Objective:**

Social Psychology is the study of social interaction and social influence. As such, it remains one of the most comprehensive and personally relevant areas within the field of psychology. This course has following objectives.

- To expand your knowledge about social psychology and human behavior.
- To foster respect for human diversity, particularly with regard to matters of gender, race and ethnicity.
- To enable students to (a) understand the forces that create group differences in patterns of social behavior, (b) understand and tolerate the behavior of other people, particularly that of members of the diverse array of groups and social categories to which they do not belong, (c) recognize the limits in generalizing psychological research to all cultural/gender/ethnic/age groups, and (d) understand the dynamics of intergroup relationships, conflict, and cooperation.

### **Course Contents:**

#### **Module I: Introduction**

Meaning and Nature of Social Psychology

Scope and Development of Social Psychology

Methods and their Application: Experimental Method, Observation Method, Correlational Method,

Interview and Questionnaire

Socio-metry

Relationship of Social Psychology with other discipline

#### **Module II: Social Perception and Cognition**

Perceiving ourselves: Self-Concept, Self-esteem and Self-Presentation

Perceiving others: Forming impressions and role of verbal and non-verbal cues

Attribution: Understanding the causes of others' behavior

Attribution Biases

#### **Module III: Interpersonal Attraction**

Concept and Meaning of interpersonal attraction

Factors affecting interpersonal attraction,

Theories of interpersonal attraction: Reinforcement Theory, Complementary Theory, Exchange Theory

#### **Module IV: Prosocial Behaviour**

Meaning and Nature

Social exchange theory, Bystander effect

Determinants of prosocial behavior

#### **Module V: Aggression**

Meaning and Determinants of Aggression: Social, Cultural, Personal and Situational

Prevention and Control of Aggression

#### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## PSYCHOLOGICAL PRACTICAL- III

**Course Code: PSY2302**

**Credit Units: 03**

### **Course Objective:**

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the third semester among the list of following practicals out of which first three practicals are compulsory.**

### **Course Content:**

1	Aggression Questionnaire	Aggression
2	Draw A Person Intellectual Ability Test	Intelligence
3	Multidimensional Self Concept Scale	Self-Concept
4	Swaroop Mehta Test Of Thinking Strategy	Thinking
5	Critical Thinking For Activities of Daily Living and Communication	Thinking
6	Marital Compatibility Index	Relationship

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>File Demonstration</b>	<b>Viva</b>	<b>EE</b>
<b>Weightage (%)</b>	5	35	35	25

## **SPORTS PSYCHOLOGY**

**Course Code: PSY2304**

**Credit Units: 03**

### **Course Objectives:**

- To trace the development of sports psychology as an independent discipline with its multidimensional perspectives;
- to identify the relationship of personality and situational factors with performance on individual and team events; and
- to apply the psychological interventions in sports

### **Course Contents:**

#### **Module I:**

Nature, Historical & recent perspectives on sports psychology

#### **Module II:**

The role of stress, arousal, anxiety and attention in the performance of individual and team sports

#### **Module III:**

Motivation, skills and performance, personality profiles of successful sports persons

#### **Module IV:**

Cognitive and social psychological dimensions of individual & team sports

#### **Module V:**

Training/Coaching techniques, cognitive and behavioral interventions, the role of Sports Psychologists

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## **SUMMER PROJECT EVALUATION-I**

**Course Code: PSY2335**

**Credit Units: 03**

**Course Objective:**

To enable the students with the practical exposure in their core area of interest (Corporate Sector, NGOs, Hospitals etc.), which in turn will be the pathway to their personal and professional training. It will also help students to develop report writing skills.

**Duration: Two Months (June- July)**

**Methodology:**

Students get opportunity in diversified Institutes e.g. Corporate Sector, Schools, NGOs and Hospitals. They will be guided by an internal and external supervisor from their respective Institute. Students will submit their summer project reports with their supervised daily reporting. Immediately after returning from their summer vacations. This would require primary data collection.

**Examination Scheme:**

Internal Faculty Interaction	20 Marks
Feedback from External Supervisor	20 Marks
Viva Voce	30 Marks
Report Writing	30 Marks
<b>Total</b>	<b>100 Marks</b>

## HEALTH PSYCHOLOGY

**Course Code: PSY2303**

**Credit Units: 03**

**Course Objective:**

To enable students to understand the concept of social gerontology and health and its relationship to the well-being of the individual in everyday life

**Course Contents:**

**Module I: Introduction & Methodology**

Definition of Health Psychology; Mind-Body Relationship; Changing Patterns of Illness;

Medical Acceptance; Health care services

Research Methodology- Anecdotal method, Case Study method, Correlation Research, Experimental method

**Module II: Models of Health**

Bio-Psycho-Social Model

**Module III: The Immune System**

Psycho-Neuro Immunology- the Immune System & immune functioning. Disorders of the Immune System- Infectious Diseases (viral infections & disease); Co-factor theory; Behavioral factors and common cold; AIDS (Transmission of HIV-AIDS & its consequences, coping with AIDS); Cancer- (Psychological factors in Cancer, causes of cancer)

**Module IV: Health Promotion & Disease Prevention**

Stress- Meaning of stress; Theories of stress (Selye & Lazarus); Responses to stress; Dimensions of Stress; Coping with Stress. Health compromising behavior- Alcohol abuse, Drug abuse, Smoking

**Module V: Health Enhancing Behaviour**

Improving health & wellbeing: Personality and Individual Differences

Stress- Hardiness; Motive patterns; gaining a sense of control; Enhancing Support

**Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
-------------------	-----------	-------------------	-----------	----------	-----------

<b>Weightage (%)</b>	10	10	5	5	70
----------------------	----	----	---	---	----

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

## READINGS IN PSYCHOLOGY

**Course Code: PSY2330**

**Credit Units: 02**

**Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

**Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size16.

**Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## **TERM PAPER**

**Course Code: PSY2331**

**Credit Units: 02**

### **Course Objective:**

The rationale behind introducing the term paper for BA (H) Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

### ***Guidelines for Term Paper:***

1. Topic
2. Introduction
3. Review Research
4. Key Learning: minimum 5 pgs handwritten
5. Conclusion
6. References
7. No. of pages in the compilation of the paper 25-30 (minimum 25 pages)

### **Examination Scheme:**

Compilation of Term Paper	50 Marks
Viva Voce	25 Marks
Presentation of Term Paper	25 Marks

**Total** **100 Marks**

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2332

Credit Units: 03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).

- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## **WORKSHOP/CERTIFICATION**

**Course Code: PSY2333**

**Credit Units: 01**

### **Course Objective**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes for Workshop**

The workshop may be conducted on any of the following major themes:

- Experimental Psychology
- Health Psychology
- Industrial Psychology
- Organizational Behaviour
- Sports Psychology
- Social Psychology
- Cognitive Psychology

These themes are merely indicative and other recent and relevant topics of study may be included.

### **Guidelines for Workshop**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.

6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

### Methodology

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Group Activity

Role Play

Quiz

### Evaluation Scheme:

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

## ARTICLE/FEATURE WRITING

Course Code: PSY2336

Credit Units: 01

### Course Objective:

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of an article is to provide the students an opportunity to further enhance their knowledge in an area of their choice by undertaking different **aspects of human behavior and analyzing it** at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

The purpose of the article is for the students to draw upon their interest in currently published research literature with the aim of furthering theoretical work in the field of interest.

### Guidelines:

1. The article will be related to the contemporary Psychological issue and the topic will be given by the department. The article will be written in around 3000 words.
2. The presentation of the article is scheduled to be held before the commencement of Semester examinations.
3. The article will carry 100 marks that will be marked on the basis of selection of topic, article writing and viva.
4. There are a number of types of articles that are published in psychological journals, including reports of empirical studies (psychological reports), review articles, case studies and theoretical articles.

Students may critically assess existing theories, identifying flaws or arguing for the superiority of one theory over another. This is often done through examining a theory's internal consistency and evaluating the level of empirical support for the theory (i.e. studies/experiments). This type of theoretical analysis is what we are expecting from students at undergraduate level.

### Examples of a few broad areas for articles (List is indicative, not exhaustive)

- Personality theories
- Emotional Intelligence
- Positive thinking
- Learning

- Self concept
- motivation
- Emotion
- Cognitive process
- Cross cultural Psychology
- Memory enhancement

#### **EVALUATION**

Selection of topic & its significance	Article writing		Viva	Total
	Content	References(studies quoted)		
10	30	20	40	100

## **Syllabus – Fourth Semester**

### **LIFE SPAN DEVELOPMENT**

**Course Code: PSY2451**

**Credit Units: 03**

#### **Course Objective:**

Developmental psychology, also known as human development, is the scientific study of systematic psychological changes, emotional changes, and perceptual changes that occur in human beings over the course of their life span. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire life span. Developmental psychology includes issues such as the extent to which development occurs through the gradual accumulation of knowledge versus stage-like development, or the extent to which children are born with innate mental structures versus learning through experience. The objective of this paper is:

1. To provide an understanding of Physical, cognitive, affective, moral, social and neural development during infancy, childhood, and adolescence.
2. To critically evaluate the role of heredity, maturation, and the environment in development.
3. To critically examine the relationship between scientific theories of development and the reality of development in everyday life.

#### **Course Content**

##### **Module I: Introduction**

Meaning and Concept of Development: Life Span Perspective,  
Theoretical Perspective on Development,  
Factors influencing development

##### **Module II: The Start to Life**

Conception and Prenatal Development: The Interaction of Heredity and Environment;  
Birth and newborn: Birth Complications, Competent Newborn.

**Module III: Development in Infancy and Toddlerhood (birth to 2years)**

Physical Development

Cognitive Development: Roots of Language

Social and Personality Development

**Module IV: Development in Childhood****The Preschool years(3-6 Years)**

Physical Development;

Cognitive Development: Language Development

Social and Personality Development

**The Middle Childhood(6-12 Years)**

Physical Development

Cognitive Development: Intellectual and Language development

Social and Personality Development

**Module V: Development in Adolescence and Young Adulthood****Adolescence (12-19 years)**

Physical Development

Cognitive development in Adolescence and School Performance

Social and Personality Development

**Young Adulthood (19-35 years)**

Physical Development: Physical Limitations and Challenges

Cognitive Development: Intelligence and Higher Education

Social and Personality Development:Forging Relationship and Choosing Career

**Module VI: Development in Middle and Late Adulthood****Middle Adulthood(35-55 years)**

Physical Development: Sexuality and Health

Cognitive Development:Memory and Remembering

Social and Personality Development: Cultural Dimensions

**Late Adulthood (55 years to death)**

Physical Development: Health and Wellness

Cognitive Development: Memory and Forgetting

Social and Personality Development: Successful Aging

Death, Dying and Bereavement

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## **PERSONALITY**

**Course Code: PSY2401**

**Credit Units: 03**

**Course Objective:**

The paper introduces description, evaluation and application of major personality theories for personality development. The objective of studying Personality may be defined in its importance because the more you know about personalities, the better you will be able to understand why people do the things they do, and how to communicate with them. By studying personality types, one can find out if he or she is an extrovert, an introvert, phobic, narcissist and so forth. The study of Personality can also bring awareness to the truth that there are many different types of people who require certain sensitivities. Following are the objectives that can be achieved after a study of personality:

- 1) Increment in personal integrity
- 2) Increment in personal freedom
- 3) Objectification of self and other
- 4) Increasing tolerance and understanding of others:

**Course Contents:**

**Module I: Introduction**

Concept and Definition of Personality: Western Perspective, Eastern Perspective  
 Personality as a Trait, Personality as Types  
 Methods of Personality Assessment: Testing Method, Observational method

**Module II: Determinants of Personality**

Nature / Nurture Controversy:  
 Biological Determinants: Role of Genes and Endocrine Glands  
 Role of Physical Environment: Natural Environment, Constructed Environment, Behavioural  
 Role of Socio – Cultural Environment: Early Social Experiences and Impact of parenting styles

**Module III: Trait and Type Theories of Personality**

Trait (Biological) and Type Theories: Allport, Cattell, Eysenck, Sheldon, and Friedman

**Module IV: Psychoanalytic Theories of Personality**

Sigmund Freud, Alfred Adler, Erich Fromm, Karen Horney and Erik Erikson's View

**Module V: Social-Cognitive and Humanistic Theories of Personality**

Behavioural Theory: Skinner

Social-Cognitive Theory: Miller & Dollard; Bandura

Humanistic Theory: Abraham Mashlow; Carl Rogers

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

## PSYCHOLOGICAL PRACTICAL- IV

Course Code: PSY2402

Credit Units: 03

### Course Objective:

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the Fourth semester among the list of following practicals out of which first three practicals are compulsory.**

### Course Content:

1	Developmental Screening Test	Development
2	Memory Drum Apparatus	Memory
3	Vocational Preference Inventory	Personality-Non Projective
4	Students Stress Scale	Stress
5	Authentic Leadership Questionnaire	Leadership
6	Thematic Apperception Test	Personality-Projective

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

### Text & References:

## ENVIRONMENTAL PSYCHOLOGY

**Course Code: PSY2405**

**Credit Units: 03**

**Course Objective:**

The paper on Environmental Psychology imparts knowledge on individual's relation to environment, the processes involved therein and manner of research done.

**Course Contents:**

**Module I: Introduction to Environmental Psychology**

Concept of Environment: Physical, Social and Institutional, Origin & Scope

**Module II: Approaches to the study of Environmental Psychology**

Approaches in Environmental Psychology: Arousal Approach, Understanding Approach, Adaptation Level Approach, Behavior Constraint Approach

**Module III: Environmental Stress**

Environmental Stress: Population, Pollution, Environmental Remodeling, Environmental Competence, Environmental Awakening, Social Accommodation  
Coping with environmental Stress

**Module IV: Environmental Assessment**

Management of Natural Environment, Natural Hazards, Development and changing environment.

**Module V: Applications of Environmental Psychology to Community Problems**

The Built Environment: Architectural Factors and Social behaviour in Housing, Human responses to protect the environment

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

**Text & References:**

## **APPLIED SOCIAL PSYCHOLOGY**

**Course Code: PSY2406**

**Credit Units: 03**

**Course Objective:**

Social Psychology is the study of social interaction and social influence. As such, it remains one of the most comprehensive and personally relevant areas within the field of psychology. This course has following objectives.

- To expand your knowledge about social psychology and human behavior.
- To foster respect for human diversity, particularly with regard to matters of gender, race and ethnicity.
- To enable students to (a) understand the forces that create group differences in patterns of social behavior, (b) understand and tolerate the behavior of other people, particularly that of members of the diverse array of groups and social categories to which they do not belong, (c) recognize the limits in generalizing psychological research to all cultural/gender/ethnic/age groups, and (d) understand the dynamics of intergroup relationships, conflict, and cooperation.

**Course Contents:**

**Module I: Introduction**

Social Psychology in the workplace, Social Psychology in the clinic,  
Social Psychology of poverty and deprivation. Psychology of collective behaviour.

**Module II: Group Process**

Group Structure: Nature and Function  
Task Performance: Social Interaction, Social facilitation, Social Loafing  
Conformity: Factors affecting Conformity  
Coordination in Groups and Group Cohesiveness

**Module III: Attitude**

Nature and Determinants of Attitude  
Formation, Change and Measurement of Attitudes: Likert Scale, Thurstone Scale, Bogardus Scale

#### **Module IV: Prejudices, Discrimination and Stereotypes**

Nature and Components of Prejudice, Discrimination and Stereotypes

Acquisition and techniques of Reduction.

#### **Module V: Leadership**

Definition, Nature and Function of Leadership

Types, Qualities and Theories of Leadership: Trait Approach, Situational Approach, Interactional Approach

#### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

#### **Text & References:**

## PHYSIOLOGICAL PSYCHOLOGY

**Course Code: PSY2403**

**Credit Units: 03**

**Course Objective:**

The paper on Physiological Psychology correlates the discipline to the physiological aspect of human life and emphasizes the need to study physiology for complete understanding of human beings.

**Course Contents:**

**Module I:**

Introduction: Psychology and Behaviour

Physiological Psychology: Definition, History and Techniques used

**Module II:**

Neural Conduction Mechanism: Structure of Neuron, Synapses, Reflexes and Nerve Impulse Transmission

**Module III:**

Nervous System: Central Nervous System: Brain and Spinal Cord

Peripheral Nervous System

**Module IV:**

Influence of Nervous System on Behaviour

Endocrinal glands: their location and function

**Module V:**

Impact of the functioning of Endocrine Gland on Behaviour

Genes and Behaviour

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

**Text & References:**

## **ADVANCE COGNITIVE PROCESS**

**Course Code: PSY2404**

**Credit Units: 03**

**Course Objective:**

The objective of this course is to study the concept, principles and theories of cognition and its application in cognitive psychology. This will facilitate the students to develop an understanding of the cognitive skills in themselves and others.

**Course Contents:**

**Module I: Intelligence**

New dimensions of intelligence: Social Intelligence & Emotional Intelligence

**Module II: Memory**

Meaning and Definition, Memory Stages (Encoding, Storage and Retrieval)

Information Processing Model

Types of Memory: Sensory Register, Short Term and Long Term Memory

Methods of Measuring Memory

Techniques of Improving Memory

**Module III: Forgetting**

Nature, Causes and Theories of Forgetting: Trace Decay Theory, Interference Theory, Consolidation Theory and Repressive Forgetting

**Module IV: Language**

Meaning, Definition and Elements of Language: Phonology, Syntax, Semantics, Morphology, Pragmatics

**Module V: Language disorders**

Communication disorders

Semantic pragmatic disorders

Brocas area

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## READINGS IN PSYCHOLOGY

**Course Code: PSY2430**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### **Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## **TERM PAPER**

**Course Code: PSY2431**

**Credit Units: 02**

### **Course Objective:**

The rationale behind introducing the term paper for BA Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

### **Guidelines for Term Paper:**

1. Topic
2. Introduction
3. Review Research
4. Key Learning: minimum 5 pgs handwritten
5. Conclusion
6. References
7. No. of pages in the compilation of the paper 25-30 (minimum 25 pages)

### **Examination Scheme:**

Compilation of Term Paper	50 Marks
Viva Voce	25 Marks
Presentation of Term Paper	25 Marks

**Total** **100 Marks**

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2432

Credit Units: 03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

- 1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at

the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).

- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## **WORKSHOP/CERTIFICATION**

**Course Code: PSY2433**

**Credit Units: 01**

### **Course Objectives:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes for Workshop**

The workshop may be conducted on any of the following major themes:

- Experimental Psychology
- Health Psychology
- Industrial Psychology
- Organizational Behaviour
- Sports Psychology
- Social Psychology
- Cognitive Psychology

These themes are merely indicative and other recent and relevant topics of study may be included.

### **Guidelines for Workshop**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.

6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

**Methodology**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Group Activity

Role Play

Quiz

**Evaluation Scheme:**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

## ARTICLE/FEATURE WRITING

**Course Code: PSY2436**

**Credit Units: 01**

**Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of an article is to provide the students an opportunity to further enhance their knowledge in an area of their choice by undertaking different **aspects of human behavior and analyzing it** at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

The purpose of the article is for the students to draw upon their interest in currently published research literature with the aim of furthering theoretical work in the field of interest.

**Guidelines:**

1. The article will be related to the contemporary Psychological issue and the topic will be given by the department. The article will be written in around 3000 words.
2. The presentation of the article is scheduled to be held before the commencement of Semester examinations.
3. The article will carry 100 marks that will be marked on the basis of selection of topic, article writing and viva.
4. There are a number of types of articles that are published in psychological journals, including reports of empirical studies (psychological reports), review articles, case studies and theoretical articles. Students may critically assess existing theories, identifying flaws or arguing for the superiority of one theory over another. This is often done through examining a theory's internal consistency and evaluating the level of empirical support for the theory (i.e. studies/experiments). This type of theoretical analysis is what we are expecting from students at undergraduate level.

**Examples of a few broad areas for articles (List is indicative, not exhaustive)**

- Personality theories
- Emotional Intelligence
- Positive thinking

- Learning
- Self concept
- motivation
- Emotion
- Cognitive process
- Cross cultural Psychology
- Memory enhancement

#### EVALUATION

Selection of topic & its significance	Article writing		Viva	Total
	Content	References(studies quoted)		
10	30	20	40	100

## Syllabus – Fifth Semester

### PSYCHOMETRIC TESTING

**Course Code: PSY2551**

**Credit Units: 03**

#### Course Objective:

Psychological assessment is a process of testing that uses a combination of techniques to help arrive at some hypotheses about a person and their behavior, personality and capabilities. Psychological assessment is also referred to as psychological testing, or performing a psychological battery on a person. A psychological assessment is the attempt of a skilled professional, usually a psychologist, to use the techniques and tools of psychology to learn either general or specific facts about another person, either to inform others of how they function now, or to predict their behavior and functioning in the future. Psychologists are the only profession that is expertly trained to perform and interpret psychological tests. Below are the objectives of studying this particular paper of Psychology:

- To train the students in various psychological assessment techniques.
- To impart skills necessary for selecting and applying different tests for different purposes such as evaluation, training and rehabilitation.

#### Course Content:

##### Module 1: Introduction

History of Psychological Testing

Meaning, Definition and Types of Psychological Testing

Ethical issues in Psychological Testing

##### Module 2: Measurement

Nature and significance of Measurement

Distinction between assessment and measurement

Levels of measurement

## Techniques of Attitude Measurement

### Module 3: Construction of Test

Steps of constructing a Psychological Test

Reliability: Meaning, types and factors affecting reliability

Validity: Meaning, types and factors affecting Validity

Characteristics of a good Psychological Test

### Module 4: Assessment of General and Special Abilities

Aptitude: Multidimensional aptitude Battery-II

Creativity: Creativity Assessment Packet (CAP)

Learning: Human Maze learning

### Module 5: Application of Testing

Assessment in Educational and Occupational Set-up: Achievement Test

Assessment in Clinical Set-up and in Counselling

### Examination Scheme:

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## PSYCHOLOGICAL PRACTICAL- V

**Course Code: PSY2501**

**Credit Units: 03**

### **Course Objective:**

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the Fifth semester among the list of following practicals out of which first three practicals are compulsory.**

### **Course Content:**

1	Multidimensional aptitude Battery-II (MAB-II)	Aptitude
2	Human Maze Learning	Learning
3	Creativity Assessment Packet	Creativity
4	Childrens Inventory of Anger(CHIA)	Aggression
5	Constructive Thinking Inventory(CTI)	Thinking
6	D2 Test of Attention	Attention

### **Text & References:**

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>File Demonstration</b>	<b>Viva</b>	<b>EE</b>
<b>Weightage (%)</b>	5	35	35	25

## **EDUCATIONAL PSYCHOLOGY**

**Course Code: PSY2503**

**Credit Units: 03**

### **Course Objective:**

Students will be able to apply the findings of experimental, social and child psychology to cognitive development in the areas of theories related to learning, motivation, and transfer of learning. Students will also be able to describe individual differences and problems of adjustment in the classroom

### **Course Contents:**

#### **Module I: Relationship of Psychology to Education**

Nature and Scope of Educational Psychology

Methods of Educational Psychology: Differential, Clinical and Experimental.

#### **Module II: Concept of Growth and Development**

Physical, Mental, Social and Emotional Development during childhood and adolescence

#### **Module III: Individual Differences**

Individual Differences: Concept and Areas

Determinants of Individual Differences

Role of Heredity and Environment in developing Individual Differences

Implications of Individual differences for organizing educational programmes

#### **Module IV: Learning**

Concept of learning

Theories of learning; Connectionism, Trial Error conditioning and Gestalt

Perpetual approach to learning; Gagne's hierarchy of learning types;

Factors influencing learning, Educational Implications

#### **Module V: Motivation**

Theories of motivation  
Factors affecting motivation, Educational Implications

#### **Module VI: Personality**

Meaning of personality  
Trait and type approaches to personality  
Assessment of personality by subjective, objective and projective techniques  
Role of teacher in fostering individual's personality

#### **Module VII: Creativity**

Creativity: nature and characteristics  
Development of creativity, theories

#### **Module VIII: Special education for:**

Exceptional Children: Gifted, Mental Retardation  
Educational Implications

#### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## **SUMMER PROJECT EVALUATION-II**

**Course Code: PSY2535**

**Credit Units: 06**

### **Course Objective:**

To enable the students with the practical exposure in their core area of interest (Corporate Sector, NGOs, Hospitals etc.), which in turn will be the pathway to their personal and professional training. It will also help students to develop report writing skills.

**Duration: Two Months (June- July)**

### **Methodology:**

Students get opportunity in diversified Institutes e.g. Corporate Sector, Schools, NGOs and Hospitals. They will be guided by an internal and external supervisor from their respective Institute. Students will submit their summer project reports with their supervised daily reporting. Immediately after returning from their summer vacations. This would require primary data collection.

### **Examination Scheme:**

Internal Faculty Interaction	20 Marks
Feedback from External Supervisor	20 Marks
Viva Voce	30 Marks
Report Writing	30 Marks
<b>Total</b>	<b>100 Marks</b>

## **CLINICAL PSYCHOLOGY**

**Course Code: PSY2502**

**Credit Units: 03**

### **Course Objective:**

Clinical Psychology is an integration of science, theory and clinical knowledge for the purpose of understanding, preventing, and relieving psychologically-based distress or dysfunction and to promote subjective well-being and personal development. In many countries, clinical psychology is a regulated mental health profession. Keeping pace with the disciplinary advances and with the goal of acquiring specialized knowledge, the paper would allow students to nurture their academic interest in clinical and other research domains of psychology, along with personal growth and citizenship. The faculty is expected to perform the following functions so that the objective of the concerned programme can be obtained:

- Integrate the course contents with the clinical viewpoint in a service setting.
- To train them into skills and competencies which are required for practice as a psychologist.
- To sensitize them to the ethics of profession.
- To impart knowledge and skills required for diagnosis of psychopathological conditions.
- To prepare students in specific areas in which professional psychological services can be rendered.
- To develop self-reflective skills.

### **Course Content:**

#### **Module I: Foundation of Clinical Psychology**

Introduction to Clinical Psychology: Meaning and nature of discipline,  
Historical Development of Clinical Psychology

#### **Module II: Contemporary Issues**

Professional Activities of Clinical Psychologist  
Subspecialties of Clinical Psychology  
Organizations in Clinical Psychology

## Ethical and Legal Issues in Clinical Psychology

### **Module III: Diagnosis and Assessment**

Nature and Purpose of Clinical Diagnosis and Assessment

Stages in the Assessment Process

Clinical Assessment Techniques

### **Module IV: Psychotherapy**

Definition, Goals and Stages of Psychotherapy

Essential Process in Psychotherapy

Models of Psychotherapy: Individual Therapy, Group Therapy, Couples Therapy, Family Therapy

### **Module V: Approaches to Psychotherapy**

Psychodynamic Psychotherapy

Behavioural Psychotherapy

Cognitive Psychotherapy

Humanistic Psychotherapy

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## **CHILD PSYCHOLOGY**

**Course Code: PSY2504**

**Credit Units: 03**

### **Course Objective:**

This paper introduces the students to the biological foundations, various developmental stages and theories from prenatal to childhood. The Students will also learn the applications of child psychology in various settings.

### **Course Contents:**

#### **Module I: Introduction to Child Psychology**

Definition and Concept of Childhood

Early history and beginnings of Child Psychology

Biological factors in Child Psychology (Prenatal, Natal and New-Natal Development,

Nature Vs Nurture: Genetics and Social atmosphere

#### **Module II: Biological Foundation**

Biology and Heredity

Stages in Prenatal Development: The germinal period, the period of embryo, the period of the foetus

Influences on Prenatal Development

Child Birth and Birth complication

#### **Module III: Motor and Sensory Development**

Motor Development: Contributions of Motor Development, Principles of Motor Development, Sequence of Motor Development and Motor Skills,

Environmental influences on Motor Development

Sensory Development: Vision, hearing, taste and smell, cutaneous senses, early deprivation and enrichment of senses.

#### **Module IV: Cognitive Development and Development of Language**

Piaget's cognitive development theory of intelligence- Structure and processes, stages, evaluation

Language Development- What is Language? Components of language and its development

Pre-linguistic development- receptivity to language, first speech sound  
Bilingual Vs Multilingualism

### **Module V: Emotional and Social Development**

Functions of emotions, Production and recognition of emotion

Early emotional development- Smiling, laughter, attachment, fear, jealousy, aggression, Izzard's Theory of Differential Emotions

Emotional Intelligence, Social intelligence

Social Development- Agents of socialization: Family- Parental control, sibling relationship; School; Peer group; Media- TV, books/journals, computers

### **Module VI: Moral Development**

Meaning of moral behavior, How morality is learned? Patterns of moral development, Kohlberg's Theory

Meaning of discipline, essentials and techniques of discipline, evaluation of discipline

Hazards in moral development

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## SCIENTIFIC RESEARCH PAPER-I

**Course Code: PSY2505**

**Credit Units: 03**

### **Course Objective:**

The scientific research papers for Graduate Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the research paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this research paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

### **Guidelines for Scientific Research Papers:**

- Topic :-
- Introduction :-
- Review Research :-
- Objective
- Methodology
- Analysis
- Discussion
- Conclusion :-
- References & Bibliography:-

No. of pages in the compilation of the paper 20-30 (minimum 20 pages)

### **Examination Scheme:**

Components	Compilation	Viva	Presentation
Weightage (%)	50	25	25

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2532

Credit Units: 03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.

- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as “Absent” in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## Syllabus – Sixth Semester

### COUNSELLING PSYCHOLOGY

**Course Code: PSY2651**

**Credit Units: 03**

**Course Objective:**

The paper of Counselling Psychology covers its history, theories, activities, specialties and trends. It concentrates on the importance of the personhood of counselors and of the multicultural, ethical and legal environments in which counselors operate. This paper focuses on the context and process of counseling to provide a range of high quality and responsive counseling skills and its applications to help oneself and others.

**Course Contents:**

**Module I: Introduction**

Meaning, Definitions and Goals of counselling  
Role of Counsellor in different Setting  
Characteristics of a good counsellor

**Module II: Counselling Process**

Building Counselling Relationship  
Working in a Counselling Relationship  
Termination of Counselling Relationship

**Module III: Counselling Approaches**

Insight-Oriented Counselling: Client-Centred  
Action-Oriented Counselling: Behavioural  
Testing, Assessment and Diagnosis in Counselling

**Module IV: Counselling Applications**

Child Counselling and Counselling in School  
 Adolescent Counselling and Counselling in College  
 Career Counselling: Theories of Career Development  
 Group Counselling and Family Counselling  
 Addiction Counselling

**Module V: Theories and Techniques of Counselling**

Psychodynamic Approaches  
 Humanistic Approach  
 Cognitive Approach  
 Behavioural Approaches

**Module VI: Current Issues in Counselling**

Ethical and Legal Issues  
 Mental Health Counselling  
 Counselling in a Multicultural Society  
 Counselling with Diverse Population

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## **SCHOOL COUNSELLING**

**Course Code: PSY2601**

**Credit Units: 02**

**Course Objective:**

This is to enable the students to develop an understanding of counseling within school setup, which is collaborative work of counselor and other school staff.

**Course Contents:**

**Module I: Introduction**

Guidance & Counseling

Need and importance of guidance and counseling in school

**Module II: Counselor in Educational Setting**

Elementary School, Middle School, Secondary School & Higher Secondary

Counseling & Curriculum

Counseling & Family

**Module III: Role of Personal Guidance**

Principal, Teacher, Counselor, Career Counselor, Parents & other Specialists

Importance of holistic approach in counseling

**Module IV: Mental Health of Students**

Typical difficulties of students

Supportive Services

Self Help Material

Role of Faith & Spirituality in Students mental Health

Students' perspective of Mental Health

**Module V: Experience of Transition**

Concept of Change, Adjustment & Transition  
Transition & Students' experiences

### **Module VI: Indian Education System: The Changing Perspective**

#### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

## PSYCHOLOGICAL PRACTICAL-VI

**Course Code: PSY2602**

**Credit Units: 03**

### **Course Objective:**

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the sixth semester among the list of following practicals out of which first three practicals are compulsory.**

### **Course Content:**

1	Multidimensional Anxiety Questionnaire(MAQ)	Anxiety
2	College Adjustment Scale(CAS)	Adjustment
3	Career Attitude And Strategies Inventory(CASI)	Career Attitude
4	Educational Assessment Checklist For Children With Intellectual Disability(EACCID)	Child Disability
5	Sensory Processing Measure(SPM)	Sensation
6	Self Esteem Index(SEI)	Self Esteem

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>File Demonstration</b>	<b>Viva</b>	<b>EE</b>
<b>Weightage (%)</b>	5	35	35	25

**Text & References:**

## **DISSERTATION (BASED ON APPLIED PSYCHOLOGY)**

**Course Code: PSY2637****Credit Units: 09****Course Objective:**

- To enable the students with the practical exposure in their core area of interest (Corporate Sector, NGOs, Hospitals etc.), which in turn will be the pathway to their personal and professional training.
- It will also help students to develop report writing skills.

**Duration: Four Months (Jan. - April)****Methodology:**

Students get opportunity in diversified Institutes e.g. Corporate Sector, Schools, NGOs and Hospitals. They will be guided by an internal and external supervisor. Students will submit their reports after **90 Hrs of Fieldwork (15 days\* 6hrs per day)**, with their supervised daily reporting, at the end of the academic year. **The days for fieldwork are two days in a week including Saturday.** The student will submit the Log Sheet to their internal supervisor on every Monday.

**Examination Scheme:**

Internal Faculty Interaction	20 Marks
Feedback from External Supervisor	20 Marks
Viva Voce	30 Marks
Report Writing	30 Marks
<b>Total</b>	<b>100 Marks</b>

## SCIENTIFIC RESEARCH PAPER-II

**Course Code: PSY2605**

**Credit Units: 03**

### **Course Objective:**

The research article or scientific papers for Masters Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

Guidelines for Research Article or Scientific Papers:

- Topic :-
- Introduction :-
- Review Research :-
- Objective
- Methodology
- Discussion
- Conclusion :-
- References & Bibliography:-

No. of pages in the compilation of the paper 25-30 (minimum 25 pages)

### **Examination Scheme:**

<b>Components</b>	<b>Compilation</b>	<b>Viva</b>	<b>Presentation</b>
<b>Weightage (%)</b>	50	25	25

## **POSITIVE PSYCHOLOGY**

**Course Code: PSY2606**

**Credit Units: 03**

**Course Objective:**

To enable students to understand the theory and research related to positive psychology and equip students to develop and apply positive psychology for enhancement of their self and others.

**Course Contents:**

**Module I: Introduction to Positive Psychology**

Introductory & Historical Overview

Positive Psychology, Prevention & Positive Therapy

**Module II: Positive Emotional States and Processes**

Broaden & Build Theory of Positive Emotions

Positive Emotions: Hope & Optimism, Love, Empathy

The Positive Psychology of Emotional Intelligence

**Module III: Positive Psychology and Relationship to Goals**

Importance of Goals

Values in actions

Developing Positive Personality

**Module IV: Strengths & Virtues & Positive Institutions**

Tyranny of Wisdom

Character Strengths and Virtues

Resilience in the phase of challenge & Loss

**Module V: Applications of Positive Psychology**

Going Positive

Understanding & Changing Human Behaviour

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A- Attendance; EE-End Session Exam

## GENDER PSYCHOLOGY

**Course Code: PSY2607**

**Credit Units: 03**

**Course Objective:**

This course is designed to introduce students to psychological theories and research regarding the differences and similarities between men and women and the effects of gender in social situations. Students will learn to understand the complexity and diversity of gendered experiences in the social settings of their own and other cultures

**Course Contents:****Module I: Introduction to Gender Psychology**

Historical antecedents of sex and gender within Psychology  
 Defining Sex and Gender  
 Perspectives in Gender: Social, Economic, Political & Biological  
 Gender Identity: Biological basis of Gender

**Module II: Gender and Life Course**

Physical, Social, Moral and Cognitive Development

**Module III: Gender Roles & Stereotypes**

Masculinity and Femininity  
 Religious Context  
 Global/Cultural Context  
 Effects of stereotypes and roles  
 Media and Depiction of gender

**Module IV: Gender Difference**

Defining gender differences (Physical and Cognitive)  
 Emergence of Gender Differences: Intellectual and Cognitive abilities  
 Determinants of gender differences: Social and affective behavior

## Gender Identity & Sex Stereotype Behavior

### Module V: Gender and Mental Health

Health & Fitness,  
Stress, Coping & Psychopathology,  
Treatment for Mental Disorders

#### Examination Scheme:

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

75 marks	25 marks

### **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexure:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as “Absent” in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## Syllabus – First Semester

### INTRODUCTORY PSYCHOLOGY

**Course Code: PSY2151**

**Credit Units: 3**

**Course Objective:**

This course is designed to introduce the science of psychology. It identifies and defines the theories, terms, methods, and various fields of psychology. This course can be used as a foundation towards continued education in more specific areas of psychology. General Psychology encourages students to study in depth the notions of modern scientific psychology. Upon completion of this course, student should have the following objectives:

- To know the major personalities important to the field of general psychology and the ideas, theories, and schools with which they are associated.
- To know the major terms associated with general psychology and their meanings.
- To know the major concepts associated with the area of general psychology.

**Course Content**

**Module I:**

Meaning, Definition, Nature and Goals of Psychology

**Module II:**

Scope of Psychology; Branches and Fields of Psychology

**Module III:**

Background of Psychology: Historical Perspective

**Module IV:**

Schools of Psychology: Structuralism, Functionalism, Behaviorism, Gestaltism, Psychoanalysis, Humanism, Existentialism, Cognitive

**Module V:**

Methods of Psychology: Introspection, Observation, Experimental, Interview, Questionnaire, Survey

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

# ELEMENTARY STATISTICS

**Course Code: PSY2101**

**Credit Units: 03**

## **Course Objective:**

The paper on Statistics introduces quantification of psychological data and gives primary research orientation to the students. Understanding Statistics and basic logic of Statistics is crucial to being able to read Psychology research article. Further by mastering the basic logic and ways of thinking about Statistics, students will be unusually well prepared for the advanced courses.

## **Course Contents:**

### **Module I:**

Meaning, Definition, Importance and Limitations of Statistics in Psychology  
Population and Sample: Types of Sampling

### **Module II:**

Primary and Secondary Data  
Classification and Tabulation of Data,  
Frequency Distribution

### **Module III:**

Graphical presentation of Data: Histograms, Frequency polygon, Frequency Curve, Cumulative Frequency Curve (Ogive), Cumulative Percentage Curve

### **Module IV:**

Measures of Central Tendency: Meaning, Application and Computation of Mean, Median and Mode

### **Module V:**

Measures of Variability: Range and Variation; Average deviation, Quartile deviation and Standard deviation

## **Examination Scheme:**

Components	CT	CT / H / P / V / Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## EXPERIMENTAL PSYCHOLOGY- I

**Course Code: PSY2102**

**Credit Units: 03**

### **Course Objective:**

The basic general objective of Experimental Psychology is to familiarize the student with a basic and broad understanding of the scientific method and its application to the problems of Psychology. The course focuses on the logic, principles and practices of modern science and how it is applied to understanding the nature of reality. Successful completion of this course will prepare the student for graduate work and advanced experimental concepts.

### **Course Contents:**

#### **Module I:**

Meaning and History of Experimental Psychology

Nature of Science and Scientific Methods, Scope of Experimental Psychology

#### **Module II:**

Steps of Experimental Method

Problem and Hypothesis: Nature, Types and Sources

Variables: Nature and types and control of Variables.

#### **Module III:**

Sensory Process: Meaning and Types of Senses, Sensation and Sensitivity

Visual Sense- Structure and Functioning of Eye

Hearing Sense- Structure and Functioning of Ear

Chemical Senses- Sense of Smell and Sense of Taste

Skin Senses- Sense of Touch or Pressure, Sense of Temperature and Pain

Body Senses- Kinesthetic Sense and Vestibular Sense

#### **Module IV:**

Attentional Process: Nature, Types and Determinants of attention

#### **Module V:**

Perceptual Process: Meaning and Nature of Perception

Principal of Perceptual organization

Perception of Space, Depth–Visual Monocular Cues and Binocular Cues, Perception of Distance and

Direction Perceptual constancy

Perceptual Illusions; Delusions and Hallucinations

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT / H / P / V / Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## PSYCHOLOGICAL PRACTICAL-I

**Course Code: PSY2103**

**Credit Units: 03**

### Course Objective:

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To familiarize the students with the use of elementary statistical techniques
4. To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the first semester among the list of following practicals out of which first three practicals are compulsory.**

### Course Content:

1	Alexander Pass-a-long Test of Intelligence	Intelligence
2	Muller Lyre Apparatus with stand	Perception Illusion
3	Division of Attention Board with reset 6 digit Impulse counter	Attention
4	Leadership Style Scale	Leadership
5	Depth Perception	Perception
6	Marital Coping Scale	Relationship

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

### Text & References:

- Mohsin, S. M.: Experiments in Psychology. Motilal Banarasi Das

## SYSTEMS AND APPROACHES IN PSYCHOLOGY

**Course Code: PSY2104**

**Credit Units: 03**

### **Course Objective:**

The paper on System and Theories gives a brief history of psychology and the developments within the discipline.

### **Course Contents:**

#### **Module I: Development of Psychology as a Discipline**

Contribution of Weber, Fechner, Helmholtz, Galton, Ebbinghaus, Mc Keen Cattell.

#### **Module II: Structuralism, Functionalism**

Wundt and Titchner as the founder of structuralism, structuralism as a system  
Founding of Functionalism: Dewey and Angell

#### **Module III: Behaviourism**

Watsonian Behaviourism: systematic criteria and critical evaluation.

#### **Module IV: Gestalt psychology**

Founding the Gestalt psychology, Gestalt qualities, factors in organization, insight and productive thinking, Gestalt psychology as a system,

#### **Module V: Psychoanalysis**

Basic postulates, Freud, Jung and Adler's contributions to Psychoanalysis, critical evaluation.

### **Examination Scheme:**

Components	CT	CT / H / P / V / Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

### **Text & References:**

## **HUMAN RIGHTS, VALUES AND ETHICS**

**Course Code: PSY2105****Credit Units: 03****Course Objective:**

The course will address the evolution of international human rights and of the legal instruments designed for their protection. It will study the theoretical foundations of the idea of human rights in India.

**Course Contents:****Module I: Introduction to Human Rights**

Historical Perspective of Human rights  
Meaning and Evolution of Human rights  
Theories of Human Rights  
Universalization of Human Rights  
General Conditions Underlying the idea of human rights

**Module II: Human Rights in Indian Context**

Indian constitution and Human rights  
Implementation of human rights in India  
Personal and family rights  
Group rights and right to equality

**Module III: Human Rights Education**

History and Determinants of Human Right Education  
Principles of Human Rights Education  
Awareness of Human Rights in Children  
Protection of Human Rights in School  
Global Need of Human Right Education

**Module IV: Human and Civil Rights**

Property Rights - Copyright - Intellectual Property  
Crime and Social Deviance: Anomie  
Ethics  
Police — Law Enforcement: International Law Enforcement Agencies and National Law Enforcement Agencies

**Module V: Values and ethics In India**

Human Rights: Values and Ethics  
Indian and Western Values and Ethics

**Examination Scheme:**

Components	CT	CT / H / P / V / Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## READINGS IN PSYCHOLOGY

**Course Code: PSY2130**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16.

### **Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2132

Credit Units: 03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor(Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## ARTICLE/ FEATURE WRITING

Course Code: PSY2136

Credit Units: 01

### Course Objective:

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of an article is to provide the students an opportunity to further enhance their knowledge in an area of their choice by undertaking different **aspects of human behavior and analyzing it** at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

The purpose of the article is for the students to draw upon their interest in currently published research literature with the aim of furthering theoretical work in the field of interest.

### Guidelines:

1. The article will be related to the contemporary Psychological issue and the topic will be given by the department. The article will be written in around 3000 words.
2. The presentation of the article is scheduled to be held before the commencement of Semester examinations.
3. The article will carry 100 marks that will be marked on the basis of selection of topic, article writing and viva.
4. There are a number of types of articles that are published in psychological journals, including reports of empirical studies (psychological reports), review articles, case studies and theoretical articles. Students may critically assess existing theories, identifying flaws or arguing for the superiority of one theory over another. This is often done through examining a theory's internal consistency and evaluating the level of empirical support for the theory (i.e. studies/experiments). This type of theoretical analysis is what we are expecting from students at undergraduate level.

### Examples of a few broad areas for articles (List is indicative, not exhaustive)

- Personality theories
- Emotional Intelligence
- Positive thinking
- Learning
- Self concept
- motivation
- Emotion
- Cognitive process
- Cross cultural Psychology
- Memory enhancement

### EVALUATION

Selection of topic & its significance	Article writing		Viva	Total
	Content	References(studies quoted)		

10	30	20	40	100
----	----	----	----	-----

## Syllabus - Second Semester

### ABNORMAL PSYCHOLOGY

**Course Code: PSY2251**

**Credit Units: 03**

**Course Objective:**

Abnormal psychology is a branch of psychology that deals with psychopathology and abnormal behavior that causes suffering to the individual and others around him or her, and interferes with functioning in a significant way. The term covers a broad range of disorders, from depression to obsession-compulsion to sexual deviation and many more. The study of abnormal psychology also includes learning about the factors, situations, and conditions that cause mental disorders and how they may be best treated.

**Course Content:**

**Module I: Introduction**

Concept of abnormality: Criteria and Perspectives

Classification: DSM IV-R, conceptual and operational evaluation.

Casual factors in Psychopathological Behaviour

(a) Biological determinants

(b) Psychological determinants

(c) Socio-cultural determinants

**Module II: Neurosis and Psychosis**

Concept and Difference between both the two

**Module III: Neurotic Disorder**

Generalized anxiety disorders

Obsessive-Compulsive disorders

Phobic Disorders

Eating Disorder

**Module IV: Mood Disorders**

Depression

Bipolar Disorder

**Module V: Psychotic Disorder**

Bipolar disorders: Manic, Depressive, Mixed

Psychotic depression

Delusional Disorder

Schizophrenia

**Module VI: Mental Retardation and Development Disorders**

Levels of mental retardation, Organic factors in mental retardation.

Autism: Clinical picture and casual factors.

Childhood Disorder

**Module VII: Substance Abuse Disorders**

Alcoholism

Drug Addition

**Module VIII:**

Psychosomatic Disorder

Somatoform Disorders

Personality Disorders

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## ADVANCED STATISTICS

**Course Code: PSY2201**

**Credit Units: 03**

**Course Objective:**

The paper on statistics introduces quantification of psychological data and gives primary research orientation to the students.

**Course Contents:**

**Module I: The Normal Curve**

Characteristics and Problems in Normal Probability Curve (NPC), The Standard Normal Curve.

**Module II: Significance of mean**

Computation of the standard error of mean, application and interpretation, Z-test, The 't' distribution, Degrees of freedom, Levels of significance, Standard error of difference between two independent means (t-test: Large & small samples), Type I and Type II errors

**Module III: Chi-Square Test (Non-Parametric Method)**

Meaning, Test of Hypothesis with equal probability, Chi-Square with 2\*2 table

**Module IV: Analysis of Variance**

Hypothesis testing with the help of One way ANOVA (f-test)

**Module V: Parametric Vs Non-parametric Statistics**

Introduction, Assumptions, basic differences, uses of parametric and Non-parametric tests

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## EXPERIMENTAL PSYCHOLOGY-II

**Course Code: PSY2202**

**Credit Units: 03**

### **Course Objective:**

The basic general objective of Experimental Psychology is to familiarize the student with a basic and broad understanding of the scientific method and its application to the problems of Psychology. The course focuses on the logic, principles and practices of modern science and how it is applied to understanding the nature of reality. Successful completion of this course will prepare the student for graduate work and advanced experimental concepts

### **Course Contents:**

#### **Module I: Psychophysics**

Basic Concepts, Stimulus and Differential Threshold  
Determination of Thresholds: Method of Limits,  
Method of Average Error, Method of Constant Stimuli

#### **Module II: Motivation**

Meaning, Definition and Nature of Motivation, Motivational Cycle  
Needs– Biological and Psychosocial, Drive and Incentive  
Classification of Motives– Biogenic and Psycho-social Motives  
Theories of Motivation–Need and Drive Reduction Theory, Instinctive and Social Theory, Self-Urges Theory, Goal-oriented Actualization Theory.

#### **Module III: Emotion**

Meaning, Nature and Characteristics of Emotions  
Aspect of Emotions- Bodily and Physiological Changes  
Theories of Emotion: James-Lange Theory, Cannon-Bard Theory, Schachter and Singer's Cognitive Theory, Lindsey's Activation Theory.

#### **Module IV: Learning**

Meaning, Nature and Types of learning (Verbal, Motor, Concept etc)  
Theories of Learning –Trial and Error Theory, Classical Conditioning Theory, Operant / Instrumental Conditioning, Insight Learning Theory  
Transfer of Training: Meaning, Types and Theories of Transfer of Training

#### **Module V: Learning disabilities**

Reading Disorder/Developmental dyslexia  
Disorder of written expression/Dysphasia/Aphasia  
Math Disability/Dyscalculia.

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## PSYCHOLOGICAL PRACTICAL- II

**Course Code: PSY2203**

**Credit Units: 03**

### **Course Objective:**

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the second semester among the list of following practicals out of which first three practicals are compulsory.**

### **Course Content:**

1	Mirror Drawing	Motor Learning
2	Rey Auditory Verbal Learning Test	Verbal Learning
3	Emotions & Expressions	Emotion
4	Coopersmith Self Esteem Inventory	Self Esteem
5	Emotional Intelligence Test	Intelligence
6	Quality Of Marital Relationship scale	Relationship

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>File Demonstration</b>	<b>Viva</b>	<b>EE</b>
<b>Weightage (%)</b>	5	35	35	25

### **Text & References:**

# INDUSTRIAL PSYCHOLOGY

**Course Code: PSY2204**

**Credit Units: 03**

## **Course Objective:**

Industrial psychology is the branch of psychology that applies psychological theories and principles to organizations. Often referred to as I/O psychology, this course focuses on the topics like increasing workplace productivity and related issues such as the physical and mental well-being of employees.

## **Course Contents:**

### **Module I: Introduction to Industrial Psychology**

Definition, Subject matter, & Goals

Development of Industrial Psychology, Present status & future prospects

### **Module II: Personnel selection**

Determining job requirements: Uses and types of job information, and job analysis

Recruiting job applicants: Recruitment techniques

Personal history assessment: Standard application blanks, bio data items, resume and letter of reference

Assessment of current behavior: Interviews, psychological testing and assessment Centers

### **Module III: Employee training and Development**

Training needs assessment

Training design

Techniques for training knowledge and skill

Training programme evaluation

### **Module IV: Evaluating Job Performance**

Uses of performance evaluation: Downsizing, fair employment, employment-at-will and seniority

Sources of evaluation: The evaluator and performance information

Appraisal rating systems: Graphic rating scales and rating errors

Non-rating evaluation methods: Checklists and comparison method

### **Module V: Conditions of Work & Accidents**

Conditions of Work: Physical Conditions for work- Illumination, Noise, Colour, Temperature, Humidity.

Temporal Condition for Work- Hours for Work, Length of Work Week, Flexible Working Hours, Rest

Pauses and Shift work

Psychological Conditions of Work-Boredom, Monotony and Fatigue

Industrial Accident- Definition, Causes and Prevention

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## ORGANIZATIONAL BEHAVIOUR

**Course Code: PSY2205**

**Credit Units: 03**

**Course Objective:**

To learn how the findings of psychology are applied to the problems involving human behavior in the workplace for providing optimum solutions.

**Course Contents:**

**Module I: Nature and Scope of Organizational Psychology**

Organizational Psychology: Meaning, subject matter and functions of Organizational Psychology  
Development, Current status and Future of Organizational Psychology

**Module II: Work Motivation**

Theories

Job Design: Job enlargement, Job enrichment and Job characteristics models

**Module III: Organizational Attitude and Behaviour**

Job Satisfaction, Job Involvement, Organizational Commitment: Concepts, Determinants and Consequences.

**Module IV: Influence, Power and Politics in Organization**

Introduction: Individual bases of Power, Group or Subunit power

Structural determinants, Organizational Politics and its ethical implication

**Module V: Organizational Culture**

Nature, Formation and maintenance of organizational culture

Consequences of organizational culture

Work culture in the Indian context

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

**READINGS IN PSYCHOLOGY****Course Code: PSY2230****Credit Units: 02****Objectives:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

**Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

**Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2232

Credit Units: 03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## ARTICLE/FEATURE WRITING

Course Code: PSY2236

Credit Units: 01

### Course Objective:

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of an article is to provide the students with an opportunity to further enhance their knowledge in an area of their choice by undertaking different **aspects of human behavior and analyzing it** at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

The purpose of the article is for the students to draw upon their interest in currently published research literature with the aim of furthering theoretical work in the field of interest.

### Guidelines:

1. The article will be related to the contemporary Psychological issue and the topic will be given by the department. The article will be written in around 3000 words.
2. The presentation of the article is scheduled to be held before the commencement of Semester examinations.
3. The article will carry 100 marks that will be marked on the basis of selection of topic, article writing and viva.
4. There are a number of types of articles that are published in psychological journals, including reports of empirical studies (psychological reports), review articles, case studies and theoretical articles. Students may critically assess existing theories, identifying flaws or arguing for the superiority of one theory over another. This is often done through examining a theory's internal consistency and evaluating the level of empirical support for the theory (i.e. studies/experiments). This type of theoretical analysis is what we are expecting from students at undergraduate level.

### Examples of a few broad areas for articles (List is indicative, not exhaustive)

- Personality theories
- Emotional Intelligence
- Positive thinking
- Learning
- Self concept
- motivation
- Emotion
- Cognitive process
- Cross cultural Psychology
- Memory enhancement

### EVALUATION

Selection of topic & its significance	Article writing		Viva	Total
	Content	References(studies quoted)		

10	30	20	40	100
----	----	----	----	-----

## Syllabus – Third Semester

### BASIC COGNITIVE PSYCHOLOGY

**Course Code: PSY2351**

**Credit Units: 03**

**Course Objective:**

Cognitive Psychology is an objective, empirical discipline that tends to favor an experimental approach. This paper of Psychology is crucial to understand the basis of mental activity and human behaviour. The students of Psychology will need to have this knowledge about the normal mental operation of adults in order to understand more complex processes and their disorder. The subject emphasizes cognitive aspects to show the more up to date developments. In this paper of Psychology, Students will:

- Gain factual knowledge of the terminology, methods, and research findings in the field of cognitive psychology.
- Learn the fundamental theories and principles of cognitive psychology including being able to critique them.
- Learn how professionals in the field of cognitive psychology go about the process of gaining new knowledge.

**Course Content:**

**Module I:**

Introduction, History and Background of Cognitive Psychology

**Module II:**

Thinking: Nature, and Types of Thinking:

Tools of thinking- Images, Concept, Symbols and Signs, Language, Muscle Activities and Brain Function

**Module III:**

Reasoning: Meaning and Types of Reasoning: Deductive and Inductive Reasoning

**Module IV:**

Problem solving: Meaning and Method of Problem solving

Decision Making: Meaning, types and hindrances

**Module V:**

Intelligence: Meaning, Nature and Theories of intelligence: Unitary Theory, Multifactor Theory, Two Factor Theory, and Group Factor Theory.

Genetic and Environmental Influence on Intelligence

Classification of Intelligence Test

Concept of Mental Age and IQ

**Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

# SOCIAL PSYCHOLOGY

**Course Code: PSY2301**

**Credit Units: 03**

## **Course Objective:**

Social Psychology is the study of social interaction and social influence. As such, it remains one of the most comprehensive and personally relevant areas within the field of psychology. This course has following objectives.

- To expand your knowledge about social psychology and human behavior.
- To foster respect for human diversity, particularly with regard to matters of gender, race and ethnicity.
- To enable students to (a) understand the forces that create group differences in patterns of social behavior, (b) understand and tolerate the behavior of other people, particularly that of members of the diverse array of groups and social categories to which they do not belong, (c) recognize the limits in generalizing psychological research to all cultural/gender/ethnic/age groups, and (d) understand the dynamics of intergroup relationships, conflict, and cooperation.

## **Course Contents:**

### **Module I: Introduction**

Meaning and Nature of Social Psychology

Scope and Development of Social Psychology

Methods and their Application: Experimental Method, Observation Method, Correlational Method,

Interview and Questionnaire

Socio-metry

Relationship of Social Psychology with other discipline

### **Module II: Social Perception and Cognition**

Perceiving ourselves: Self-Concept, Self-esteem and Self-Presentation

Perceiving others: Forming impressions and role of verbal and non-verbal cues

Attribution: Understanding the causes of others' behavior

Attribution Biases

### **Module III: Interpersonal Attraction**

Concept and Meaning of interpersonal attraction

Factors affecting interpersonal attraction,

Theories of interpersonal attraction: Reinforcement Theory, Complementary Theory, Exchange Theory

### **Module IV: Prosocial Behaviour**

Meaning and Nature

Social exchange theory, Bystander effect

Determinants of prosocial behavior

### **Module V: Aggression**

Meaning and Determinants of Aggression: Social, Cultural, Personal and Situational

## Prevention and Control of Aggression

### Examination Scheme:

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## PSYCHOLOGICAL PRACTICAL-III

**Course Code: PSY2302**

**Credit Units: 03**

### Course Objective:

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the third semester among the list of following practicals out of which first three practicals are compulsory.**

### Course Content:

1	Aggression Questionnaire	Aggression
2	Draw A Person Intellectual Ability Test	Intelligence
3	Multidimensional Self Concept Scale	Self-Concept
4	Swaroop Mehta Test Of Thinking Strategy	Thinking
5	Critical Thinking For Activities of Daily Living and Communication	Thinking
6	Marital Compatibility Index	Relationship

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

## HEALTH PSYCHOLOGY

**Course Code: PSY2303**

**Credit Units: 03**

### **Course Objective:**

To enable students to understand the concept of social gerontology and health and its relationship to the well-being of the individual in everyday life

### **Course Contents:**

#### **Module I: Introduction & Methodology**

Definition of Health Psychology; Mind-Body Relationship; Changing Patterns of Illness;

Medical Acceptance; Health care services

Research Methodology- Anecdotal method, Case Study method, Correlation Research, Experimental method

#### **Module II: Models of Health**

Bio-Psycho-Social Model

#### **Module III: The Immune System**

Psycho-Neuro Immunology- the Immune System & immune functioning. Disorders of the Immune System- Infectious Diseases (viral infections & disease); Co-factor theory; Behavioral factors and common cold; AIDS (Transmission of HIV-AIDS & its consequences, coping with AIDS); Cancer- (Psychological factors in Cancer, causes of cancer)

#### **Module IV: Health Promotion & Disease Prevention**

Stress- Meaning of stress; Theories of stress (Selye & Lazarus); Responses to stress; Dimensions of Stress; Coping with Stress. Health compromising behavior- Alcohol abuse, Drug abuse, Smoking

#### **Module V: Health Enhancing Behaviour**

Improving health & wellbeing: Personality and Individual Differences

Stress- Hardiness; Motive patterns; gaining a sense of control; Enhancing Support

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

## **SUMMER PROJECT EVALUATION-I**

**Course Code: PSY2335**

**Credit Units: 03**

**Course Objective:**

To enable the students with the practical exposure in their core area of interest (Corporate Sector, NGOs, Hospitals etc.), which in turn will be the pathway to their personal and professional training. It will also help students to develop report writing skills.

**Duration: Two Months (June- July)**

**Methodology:**

Students get opportunity in diversified Institutes e.g. Corporate Sector, Schools, NGOs and Hospitals. They will be guided by an internal and external supervisor from their respective Institute. Students will submit their summer project reports with their supervised daily reporting. Immediately after returning from their summer vacations. This would require primary data collection.

**Examination Scheme:**

Internal Faculty Interaction	20 Marks
Feedback from External Supervisor	20 Marks
Viva Voce	30 Marks
Report Writing	30 Marks

<b>Total</b>	<b>100 Marks</b>
--------------	------------------

## SPORTS PSYCHOLOGY

**Course Code: PSY2304**

**Credit Units: 03**

### **Course Objectives:**

- To trace the development of sports psychology as an independent discipline with its multidimensional perspectives;
- to identify the relationship of personality and situational factors with performance on individual and team events; and
- to apply the psychological interventions in sports

### **Course Contents:**

#### **Module I:**

Nature, Historical & recent perspectives on sports psychology

#### **Module II:**

The role of stress, arousal, anxiety and attention in the performance of individual and team sports

#### **Module III:**

Motivation, skills and performance, personality profiles of successful sports persons

#### **Module IV:**

Cognitive and social psychological dimensions of individual & team sports

#### **Module V:**

Training/Coaching techniques, cognitive and behavioral interventions, the role of Sports Psychologists

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## **READINGS IN PSYCHOLOGY**

**Course Code: PSY2330**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16.

### **Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## **TERM PAPER**

**Course Code: PSY2331**

**Credit Units: 02**

### **Course Objective:**

The rationale behind introducing the term paper for BA (H) Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

### **Guidelines for Term Paper:**

1. Topic
2. Introduction
3. Review Research
4. Key Learning: minimum 5 pgs handwritten
5. Conclusion
6. References
7. No. of pages in the compilation of the paper 25-30 (minimum 25 pages)

### **Examination Scheme:**

Compilation of Term Paper	50 Marks
Viva Voce	25 Marks
Presentation of Term Paper	25 Marks
<b>Total</b>	<b>100 Marks</b>

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2332

Credit Units: 03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## WORKSHOP/ CERTIFICATION

**Course Code: PSY2333**

**Credit Units: 01**

### Course Objective

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### Major Themes for Workshop

The workshop may be conducted on any of the following major themes:

- Experimental Psychology
- Health Psychology
- Industrial Psychology
- Organizational Behaviour
- Sports Psychology
- Social Psychology
- Cognitive Psychology

These themes are merely indicative and other recent and relevant topics of study may be included.

### Guidelines for Workshop

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

### Methodology

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Group Activity

Role Play

Quiz

### Evaluation Scheme:

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

## ARTICLE/ FEATURE WRITING

Course Code: PSY2336

Credit Units: 01

### Course Objective:

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of an article is to provide the students an opportunity to further enhance their knowledge in an area of their choice by undertaking different **aspects of human behavior and analyzing it** at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

The purpose of the article is for the students to draw upon their interest in currently published research literature with the aim of furthering theoretical work in the field of interest.

### Guidelines:

1. The article will be related to the contemporary Psychological issue and the topic will be given by the department. The article will be written in around 3000 words.
2. The presentation of the article is scheduled to be held before the commencement of Semester examinations.
3. The article will carry 100 marks that will be marked on the basis of selection of topic, article writing and viva.
4. There are a number of types of articles that are published in psychological journals, including reports of empirical studies (psychological reports), review articles, case studies and theoretical articles.

Students may critically assess existing theories, identifying flaws or arguing for the superiority of one theory over another. This is often done through examining a theory's internal consistency and evaluating the level of empirical support for the theory (i.e. studies/experiments). This type of theoretical analysis is what we are expecting from students at undergraduate level.

### Examples of a few broad areas for articles (List is indicative, not exhaustive)

- Personality theories
- Emotional Intelligence
- Positive thinking
- Learning
- Self concept
- motivation
- Emotion
- Cognitive process
- Cross cultural Psychology
- Memory enhancement

### EVALUATION

Selection of topic & its significance	Article writing		Viva	Total
	Content	References(studies quoted)		
10	30	20	40	100

# Syllabus – Fourth Semester

## LIFE SPAN DEVELOPMENT

**Course Code: PSY2451**

**Credit Units: 03**

### **Course Objective:**

Developmental psychology, also known as human development, is the scientific study of systematic psychological changes, emotional changes, and perceptual changes that occur in human beings over the course of their life span. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire life span. Developmental psychology includes issues such as the extent to which development occurs through the gradual accumulation of knowledge versus stage-like development, or the extent to which children are born with innate mental structures versus learning through experience. The objective of this paper is:

1. To provide an understanding of Physical, cognitive, affective, moral, social and neural development during infancy, childhood, and adolescence.
2. To critically evaluate the role of heredity, maturation, and the environment in development.
3. To critically examine the relationship between scientific theories of development and the reality of development in everyday life.

### **Course Content**

#### **Module I: Introduction**

Meaning and Concept of Development: Life Span Perspective,  
Theoretical Perspective on Development,  
Factors influencing development

#### **Module II: The Start to Life**

Conception and Prenatal Development: The Interaction of Heredity and Environment;  
Birth and newborn: Birth Complications, Competent Newborn.

#### **Module III: Development in Infancy and Toddlerhood (birth to 2years)**

Physical Development  
Cognitive Development: Roots of Language  
Social and Personality Development

#### **Module IV: Development in Childhood**

##### **The Preschool years(3-6 Years)**

Physical Development;  
Cognitive Development: Language Development  
Social and Personality Development

##### **The Middle Childhood(6-12 Years)**

Physical Development  
Cognitive Development: Intellectual and Language development  
Social and Personality Development

#### **Module V: Development in Adolescence and Young Adulthood**

##### **Adolescence (12-19 years)**

Physical Development

Cognitive development in Adolescence and School Performance

Social and Personality Development

**Young Adulthood (19-35 years)**

Physical Development: Physical Limitations and Challenges

Cognitive Development: Intelligence and Higher Education

Social and Personality Development: Forging Relationship and Choosing Career

**Module VI: Development in Middle and Late Adulthood**

**Middle Adulthood(35-55 years)**

Physical Development: Sexuality and Health

Cognitive Development: Memory and Remembering

Social and Personality Development: Cultural Dimensions

**Late Adulthood (55 years to death)**

Physical Development: Health and Wellness

Cognitive Development: Memory and Forgetting

Social and Personality Development: Successful Aging

Death, Dying and Bereavement

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

# PERSONALITY

**Course Code: PSY2401**

**Credit Units: 03**

## **Course Objective:**

The paper introduces description, evaluation and application of major personality theories for personality development. The objective of studying Personality may be defined in its importance because the more you know about personalities, the better you will be able to understand why people do the things they do, and how to communicate with them. By studying personality types, one can find out if he or she is an extrovert, an introvert, phobic, narcissist and so forth. The study of Personality can also bring awareness to the truth that there are many different types of people who require certain sensitivities. Following are the objectives that can be achieved after a study of personality:

- 1) Increment in personal integrity
- 2) Increment in personal freedom
- 3) Objectification of self and other
- 4) Increasing tolerance and understanding of others:

## **Course Contents:**

### **Module I: Introduction**

Concept and Definition of Personality: Western Perspective, Eastern Perspective  
Personality as a Trait, Personality as Types  
Methods of Personality Assessment: Testing Method, Observational method

### **Module II: Determinants of Personality**

Nature / Nurture Controversy:  
Biological Determinants: Role of Genes and Endocrine Glands  
Role of Physical Environment: Natural Environment, Constructed Environment, Behavioural  
Role of Socio – Cultural Environment: Early Social Experiences and Impact of parenting styles

### **Module III: Trait and Type Theories of Personality**

Trait (Biological) and Type Theories: Allport, Cattell, Eysenck, Sheldon, and Friedman

### **Module IV: Psychoanalytic Theories of Personality**

Sigmund Freud, Alfred Adler, Erich Fromm, Karen Horney and Erik Erikson's View

### **Module V: Social-Cognitive and Humanistic Theories of Personality**

Behavioural Theory: Skinner  
Social-Cognitive Theory: Miller & Dollard; Bandura  
Humanistic Theory: Abraham Maslow; Carl Rogers

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A- Attendance; EE-End Session Exam

## PSYCHOLOGICAL PRACTICAL- IV

Course Code: PSY2402

Credit Units: 03

### Course Objective:

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the Fourth semester among the list of following practicals out of which first three practicals are compulsory.**

### Course Content:

1	Developmental Screening Test	Development
2	Memory Drum Apparatus	Memory
3	Vocational Preference Inventory	Personality-Non Projective
4	Students Stress Scale	Stress
5	Authentic Leadership Questionnaire	Leadership
6	Thematic Apperception Test	Personality-Projective

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

# PHYSIOLOGICAL PSYCHOLOGY

**Course Code: PSY2403**

**Credit Units: 03**

## **Course Objective:**

The paper on Physiological Psychology correlates the discipline to the physiological aspect of human life and emphasizes the need to study physiology for complete understanding of human beings.

## **Course Contents:**

### **Module I:**

Introduction: Psychology and Behaviour

Physiological Psychology: Definition, History and Techniques used

### **Module II:**

Neural Conduction Mechanism: Structure of Neuron, Synapses, Reflexes and Nerve Impulse Transmission

### **Module III:**

Nervous System: Central Nervous System: Brain and Spinal Cord

Peripheral Nervous System

### **Module IV:**

Influence of Nervous System on Behaviour

Endocrinal glands: their location and function

### **Module V:**

Impact of the functioning of Endocrine Gland on Behaviour

Genes and Behaviour

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## **Text & References:**

## ADVANCE COGNITIVE PROCESS

**Course Code: PSY2404**

**Credit Units: 03**

### **Course Objective:**

The objective of this course is to study the concept, principles and theories of cognition and its application in cognitive psychology. This will facilitate the students to develop an understanding of the cognitive skills in themselves and others.

### **Course Contents:**

#### **Module I: Intelligence**

New dimensions of intelligence: Social Intelligence & Emotional Intelligence

#### **Module II: Memory**

Meaning and Definition, Memory Stages (Encoding, Storage and Retrieval)

Information Processing Model

Types of Memory: Sensory Register, Short Term and Long Term Memory

Methods of Measuring Memory

Techniques of Improving Memory

#### **Module III: Forgetting**

Nature, Causes and Theories of Forgetting: Trace Decay Theory, Interference Theory, Consolidation Theory and Repressive Forgetting

#### **Module IV: Language**

Meaning, Definition and Elements of Language: Phonology, Syntax, Semantics, Morphology, Pragmatics

#### **Module V: Language disorders**

Communication disorders

Semantic pragmatic disorders

Brocas area

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## **Text & References:**

# ENVIRONMENTAL PSYCHOLOGY

**Course Code: PSY2405**

**Credit Units: 03**

## **Course Objective:**

The paper on Environmental Psychology imparts knowledge on individual's relation to environment, the processes involved therein and manner of research done.

## **Course Contents:**

### **Module I: Introduction to Environmental Psychology**

Concept of Environment: Physical, Social and Institutional, Origin & Scope

### **Module II: Approaches to the study of Environmental Psychology**

Approaches in Environmental Psychology: Arousal Approach, Understanding Approach, Adaptation Level Approach, Behavior Constraint Approach

### **Module III: Environmental Stress**

Environmental Stress: Population, Pollution, Environmental Remodeling, Environmental Competence, Environmental Awakening, Social Accommodation  
Coping with environmental Stress

### **Module IV: Environmental Assessment**

Management of Natural Environment, Natural Hazards, Development and changing environment

### **Module V: Applications of Environmental Psychology to Community Problems**

The Built Environment: Architectural Factors and Social behaviour in Housing, Human responses to protect the environment

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## **Text & References:**

# APPLIED SOCIAL PSYCHOLOGY

**Course Code: PSY2406**

**Credit Units: 03**

## **Course Objective:**

Social Psychology is the study of social interaction and social influence. As such, it remains one of the most comprehensive and personally relevant areas within the field of psychology. This course has following objectives.

- To expand your knowledge about social psychology and human behavior.
- To foster respect for human diversity, particularly with regard to matters of gender, race and ethnicity.
- To enable students to (a) understand the forces that create group differences in patterns of social behavior, (b) understand and tolerate the behavior of other people, particularly that of members of the diverse array of groups and social categories to which they do not belong, (c) recognize the limits in generalizing psychological research to all cultural/gender/ethnic/age groups, and (d) understand the dynamics of intergroup relationships, conflict, and cooperation.

## **Course Contents:**

### **Module I: Introduction**

Social Psychology in the workplace, Social Psychology in the clinic,  
Social Psychology of poverty and deprivation, Psychology of collective behaviour

### **Module II: Group Process**

Group Structure: Nature and Function

Task Performance: Social Interaction, Social facilitation, Social Loafing

Conformity: Factors affecting Conformity

Coordination in Groups and Group Cohesiveness

### **Module III: Attitude**

Nature and Determinants of Attitude

Formation, Change and Measurement of Attitudes: Likert Scale, Thurstone Scale, Bogardus Scale

### **Module IV: Prejudices, Discrimination and Stereotypes**

Nature and Components of Prejudice, Discrimination and Stereotypes

Acquisition and techniques of Reduction

### **Module V: Leadership**

Definition, Nature and Function of Leadership

Types, Qualities and Theories of Leadership: Trait Approach, Situational Approach, Interactional Approach

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

## READINGS IN PSYCHOLOGY

**Course Code: PSY2430**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### **Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## TERM PAPER

**Course Code: PSY2431**

**Credit Units: 02**

### **Course Objective:**

The rationale behind introducing the term paper for BA Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

### **Guidelines for Term Paper:**

1. Topic
2. Introduction
3. Review Research
4. Key Learning: minimum 5 pgs handwritten
5. Conclusion
6. References
7. No. of pages in the compilation of the paper 25-30 (minimum 25 pages)

### **Examination Scheme:**

Compilation of Term Paper	50 Marks
Viva Voce	25 Marks
Presentation of Term Paper	25 Marks
<b>Total</b>	<b>100 Marks</b>

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2432

Credit Units: 03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4)Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## WORKSHOP/ CERTIFICATION

**Course Code: PSY2433**

**Credit Units: 01**

### **Course Objectives:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes for Workshop**

The workshop may be conducted on any of the following major themes:

- Experimental Psychology
- Health Psychology
- Industrial Psychology
- Organizational Behaviour
- Sports Psychology
- Social Psychology
- Cognitive Psychology

These themes are merely indicative and other recent and relevant topics of study may be included.

### **Guidelines for Workshop**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

### **Methodology**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study

Group Activity

Role Play

Quiz

### **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
<b>10</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>100</b>

## ARTICLE/FEATURE WRITING

Course Code: PSY2436

Credit Units: 01

### Course Objective:

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of an article is to provide the students an opportunity to further enhance their knowledge in an area of their choice by undertaking different **aspects of human behavior and analyzing it** at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

The purpose of the article is for the students to draw upon their interest in currently published research literature with the aim of furthering theoretical work in the field of interest.

### Guidelines:

1. The article will be related to the contemporary Psychological issue and the topic will be given by the department. The article will be written in around 3000 words.
2. The presentation of the article is scheduled to be held before the commencement of Semester examinations.
3. The article will carry 100 marks that will be marked on the basis of selection of topic, article writing and viva.
4. There are a number of types of articles that are published in psychological journals, including reports of empirical studies (psychological reports), review articles, case studies and theoretical articles. Students may critically assess existing theories, identifying flaws or arguing for the superiority of one theory over another. This is often done through examining a theory's internal consistency and evaluating the level of empirical support for the theory (i.e. studies/experiments). This type of theoretical analysis is what we are expecting from students at undergraduate level.

### Examples of a few broad areas for articles (List is indicative, not exhaustive)

- Personality theories
- Emotional Intelligence
- Positive thinking
- Learning
- Self concept
- motivation
- Emotion
- Cognitive process
- Cross cultural Psychology
- Memory enhancement

### EVALUATION

Selection of topic & its significance	Article writing		Viva	Total
	Content	References(studies quoted)		
10	30	20	40	100

# Syllabus – Fifth Semester

## PSYCHOMETRIC TESTING

**Course Code: PSY2551**

**Credit Units: 03**

### **Course Objective:**

Psychological assessment is a process of testing that uses a combination of techniques to help arrive at some hypotheses about a person and their behavior, personality and capabilities. Psychological assessment is also referred to as psychological testing, or performing a psychological battery on a person. A psychological assessment is the attempt of a skilled professional, usually a psychologist, to use the techniques and tools of psychology to learn either general or specific facts about another person, either to inform others of how they function now, or to predict their behavior and functioning in the future. Psychologists are the only profession that is expertly trained to perform and interpret psychological tests. Below are the objectives of studying this particular paper of Psychology:

- To train the students in various psychological assessment techniques.
- To impart skills necessary for selecting and applying different tests for different purposes such as evaluation, training and rehabilitation.

### **Course Content:**

#### **Module 1: Introduction**

History of Psychological Testing  
Meaning, Definition and Types of Psychological Testing  
Ethical issues in Psychological Testing

#### **Module 2: Measurement**

Nature and significance of Measurement  
Distinction between assessment and measurement  
Levels of measurement  
Techniques of Attitude Measurement

#### **Module 3: Construction of Test**

Steps of constructing a Psychological Test  
Reliability: Meaning, types and factors affecting reliability  
Validity: Meaning, types and factors affecting Validity  
Characteristics of a good Psychological Test

#### **Module 4: Assessment of General and Special Abilities**

Aptitude: Multidimensional aptitude Battery-II  
Creativity: Creativity Assessment Packet (CAP)  
Learning: Human Maze learning

#### **Module 5: Application of Testing**

Assessment in Educational and Occupational Set-up: Achievement Test  
Assessment in Clinical Set-up and in Counselling

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; A-Attendance; EE-End Session Exam

## PSYCHOLOGICAL PRACTICAL- V

Course Code: PSY2501

Credit Units: 03

### Course Objective:

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the Fifth semester among the list of following practicals out of which first three practicals are compulsory.**

### Course Content:

1	Multidimensional aptitude Battery-II (MAB-II)	Aptitude
2	Human Maze Learning	Learning
3	Creativity Assessment Packet	Creativity
4	Childrens Inventory of Anger(CHIA)	Aggression
5	Constructive Thinking Inventory(CTI)	Thinking
6	D2 Test of Attention	Attention

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

# CLINICAL PSYCHOLOGY

**Course Code: PSY2502**

**Credit Units: 03**

## **Course Objective:**

Clinical Psychology is an integration of science, theory and clinical knowledge for the purpose of understanding, preventing, and relieving psychologically-based distress or dysfunction and to promote subjective well-being and personal development. In many countries, clinical psychology is a regulated mental health profession. Keeping pace with the disciplinary advances and with the goal of acquiring specialized knowledge, the paper would allow students to nurture their academic interest in clinical and other research domains of psychology, along with personal growth and citizenship. The faculty is expected to perform the following functions so that the objective of the concerned programme can be obtained:

- Integrate the course contents with the clinical viewpoint in a service setting.
- To train them into skills and competencies which are required for practice as a psychologist.
- To sensitize them to the ethics of profession.
- To impart knowledge and skills required for diagnosis of psychopathological conditions.
- To prepare students in specific areas in which professional psychological services can be rendered.
- To develop self-reflective skills.

## **Course Content:**

### **Module I: Foundation of Clinical Psychology**

Introduction to Clinical Psychology: Meaning and nature of discipline,  
Historical Development of Clinical Psychology

### **Module II: Contemporary Issues**

Professional Activities of Clinical Psychologist  
Subspecialties of Clinical Psychology  
Organizations in Clinical Psychology  
Ethical and Legal Issues in Clinical Psychology

### **Module III: Diagnosis and Assessment**

Nature and Purpose of Clinical Diagnosis and Assessment  
Stages in the Assessment Process  
Clinical Assessment Techniques

### **Module IV: Psychotherapy**

Definition, Goals and Stages of Psychotherapy  
Essential Process in Psychotherapy  
Models of Psychotherapy: Individual Therapy, Group Therapy, Couples Therapy, Family Therapy

### **Module V: Approaches to Psychotherapy**

Psychodynamic Psychotherapy  
Behavioural Psychotherapy  
Cognitive Psychotherapy  
Humanistic Psychotherapy

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## SUMMER PROJECT EVALUATION - II

**Course Code: PSY2535**

**Credit Units: 06**

**Course Objective:**

To enable the students with the practical exposure in their core area of interest (Corporate Sector, NGOs, Hospitals etc.), which in turn will be the pathway to their personal and professional training. It will also help students to develop report writing skills.

**Duration: Two Months (June- July)**

**Methodology:**

Students get opportunity in diversified Institutes e.g. Corporate Sector, Schools, NGOs and Hospitals. They will be guided by an internal and external supervisor from their respective Institute. Students will submit their summer project reports with their supervised daily reporting. Immediately after returning from their summer vacations. This would require primary data collection.

**Examination Scheme:**

Internal Faculty Interaction	20 Marks
Feedback from External Supervisor	20 Marks
Viva Voce	30 Marks
Report Writing	30 Marks
<b>Total</b>	<b>100 Marks</b>

# EDUCATIONAL PSYCHOLOGY

**Course Code: PSY2503**

**Credit Units: 03**

## **Course Objective:**

Students will be able to apply the findings of experimental, social and child psychology to cognitive development in the areas of theories related to learning, motivation, and transfer of learning. Students will also be able to describe individual differences and problems of adjustment in the classroom

## **Course Contents:**

### **Module I: Relationship of Psychology to Education**

Nature and Scope of Educational Psychology

Methods of Educational Psychology: Differential, Clinical and Experimental.

### **Module II: Concept of Growth and Development**

Physical, Mental, Social and Emotional Development during childhood and adolescence

### **Module III: Individual Differences**

Individual Differences: Concept and Areas

Determinants of Individual Differences

Role of Heredity and Environment in developing Individual Differences

Implications of Individual differences for organizing educational programmes

### **Module IV: Learning**

Concept of learning

Theories of learning; Connectionism, Trial Error conditioning and Gestalt

Perpetual approach to learning; Gagne's hierarchy of learning types;

Factors influencing learning, Educational Implications

### **Module V: Motivation**

Theories of motivation

Factors affecting motivation, Educational Implications

### **Module VI: Personality**

Meaning of personality

Trait and type approaches to personality

Assessment of personality by subjective, objective and projective techniques

Role of teacher in fostering individual's personality

### **Module VII: Creativity**

Creativity: nature and characteristics

Development of creativity, theories

### **Module VIII: Special education for:**

Exceptional Children: Gifted, Mental Retardation

Educational Implications

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

# CHILD PSYCHOLOGY

**Course Code: PSY2504**

**Credit Units: 03**

## **Course Objective:**

This paper introduces the students to the biological foundations, various developmental stages and theories from prenatal to childhood. The Students will also learn the applications of child psychology in various settings.

## **Course Contents:**

### **Module I: Introduction to Child Psychology**

Definition and Concept of Childhood

Early history and beginnings of Child Psychology

Biological factors in Child Psychology (Prenatal, Natal and New-Natal Development,

Nature Vs Nurture: Genetics and Social atmosphere

### **Module II: Biological Foundation**

Biology and Heredity

Stages in Prenatal Development: The germinal period, the period of embryo, the period of the foetus

Influences on Prenatal Development

Child Birth and Birth complication

### **Module III: Motor and Sensory Development**

Motor Development: Contributions of Motor Development, Principles of Motor Development, Sequence of Motor Development and Motor Skills,

Environmental influences on Motor Development

Sensory Development: Vision, hearing, taste and smell, cutaneous senses, early deprivation and enrichment of senses.

### **Module IV: Cognitive Development and Development of Language**

Piaget's cognitive development theory of intelligence- Structure and processes, stages, evaluation

Language Development- What is Language? Components of language and its development

Pre-linguistic development- receptivity to language, first speech sound

Bilingual Vs Multilingualism

### **Module V: Emotional and Social Development**

Functions of emotions, Production and recognition of emotion

Early emotional development- Smiling, laughter, attachment, fear, jealousy, aggression, Izzard's Theory of Differential Emotions

Emotional Intelligence, Social intelligence

Social Development- Agents of socialization: Family- Parental control, sibling relationship; School; Peer group; Media- TV, books/journals, computers

### **Module VI: Moral Development**

Meaning of moral behavior, How morality is learned? Patterns of moral development, Kohlberg's Theory

Meaning of discipline, essentials and techniques of discipline, evaluation of discipline

Hazards in moral development

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

## SCIENTIFIC RESEARCH PAPER-I

**Course Code: PSY2505**

**Credit Units: 03**

### **Course Objective:**

The scientific research papers for Graduate Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the research paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this research paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

Guidelines for Scientific Research Papers:

- Topic :-
- Introduction :-
- Review Research :-
- Objective
- Methodology
- Analysis
- Discussion
- Conclusion :-
- References & Bibliography:-

No. of pages in the compilation of the paper 20-30 (minimum 20 pages)

### **Examination Scheme:**

<b>Components</b>	<b>Compilation</b>	<b>Viva</b>	<b>Presentation</b>
<b>Weightage (%)</b>	50	25	25

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2532

Credit Units: 03

### Course Objective:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

# Syllabus – Sixth Semester

## COUNSELLING PSYCHOLOGY

**Course Code: PSY2651**

**Credit Units: 03**

**Course Objective:**

The paper of Counselling Psychology covers its history, theories, activities, specialties and trends. It concentrates on the importance of the personhood of counselors and of the multicultural, ethical and legal environments in which counselors operate. This paper focuses on the context and process of counseling to provide a range of high quality and responsive counseling skills and its applications to help oneself and others.

**Course Contents:**

**Module I: Introduction**

Meaning, Definitions and Goals of counselling  
Role of Counsellor in different Setting  
Characteristics of a good counsellor

**Module II: Counselling Process**

Building Counselling Relationship  
Working in a Counselling Relationship  
Termination of Counselling Relationship

**Module III: Counselling Approaches**

Insight-Oriented Counselling: Client-Centred  
Action-Oriented Counselling: Behavioural  
Testing, Assessment and Diagnosis in Counselling

**Module IV: Counselling Applications**

Child Counselling and Counselling in School  
Adolescent Counselling and Counselling in College  
Career Counselling: Theories of Career Development  
Group Counselling and Family Counselling  
Addiction Counselling

**Module V: Theories and Techniques of Counselling**

Psychodynamic Approaches  
Humanistic Approach  
Cognitive Approach  
Behavioural Approaches

**Module VI: Current Issues in Counselling**

Ethical and Legal Issues  
Mental Health Counselling  
Counselling in a Multicultural Society  
Counselling with Diverse Population

**Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

# SCHOOL COUNSELLING

**Course Code: PSY2601**

**Credit Units: 02**

## **Course Objective:**

This is to enable the students to develop an understanding of counseling within school setup, which is collaborative work of counselor and other school staff.

## **Course Contents:**

### **Module I: Introduction**

Guidance & Counseling

Need and importance of guidance and counseling in school

### **Module II: Counselor in Educational Setting**

Elementary School, Middle School, Secondary School & Higher Secondary

Counseling & Curriculum

Counseling & Family

### **Module III: Role of Personal Guidance**

Principal, Teacher, Counselor, Career Counselor, Parents & other Specialists

Importance of holistic approach in counseling

### **Module IV: Mental Health of Students**

Typical difficulties of students

Supportive Services

Self Help Material

Role of Faith & Spirituality in Students mental Health

Students' perspective of Mental Health

### **Module V: Experience of Transition**

Concept of Change, Adjustment & Transition

Transition & Students' experiences

### **Module VI: Indian Education System: The Changing Perspective**

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

## PSYCHOLOGICAL PRACTICAL-VI

Course Code: PSY2602

Credit Units: 03

### Course Objective:

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To familiarize the students with the use of elementary statistical techniques
- To encourage and guide the students to undertake a small-scale research project.

**Note: Total 5 practicals will be conducted in the sixth semester among the list of following practicals out of which first three practicals are compulsory.**

### Course Content:

1	Multidimensional Anxiety Questionnaire(MAQ)	Anxiety
2	College Adjustment Scale(CAS)	Adjustment
3	Career Attitude And Strategies Inventory(CASI)	Career Attitude
4	Educational Assessment Checklist For Children With Intellectual Disability(EACCID)	Child Disability
5	Sensory Processing Measure(SPM)	Sensation
6	Self Esteem Index(SEI)	Self Esteem

### Examination Scheme:

<b>Components</b>	A	File Demonstration	Viva	EE
<b>Weightage (%)</b>	5	35	35	25

### Text & References:

## DISSERTATION (BASED ON CLINICAL PSYCHOLOGY)

Course Code: PSY2637

Credit Units: 09

### Course Objective:

- To enable the students with the practical exposure in their core area of interest (Corporate Sector, NGOs, Hospitals etc.), which in turn will be the pathway to their personal and professional training.
- It will also help students to develop report writing skills.

**Duration: Four Months (Jan. - April)**

### Methodology:

Students get opportunity in diversified Institutes e.g. Corporate Sector, Schools, NGOs and Hospitals. They will be guided by an internal and external supervisor. Students will submit their reports after **90 Hrs of Fieldwork (15 days\* 6hrs per day)**, with their supervised daily reporting, at the end of the academic year. **The days for fieldwork are two days in a week including Saturday.** The student will submit the Log Sheet to their internal supervisor on every Monday.

### Examination Scheme:

Internal Faculty Interaction	20 Marks
Feedback from External Supervisor	20 Marks
Viva Voce	30 Marks
Report Writing	30 Marks
<b>Total</b>	<b>100 Marks</b>

# PSYCHOLOGY OF CHILDREN WITH SPECIAL NEEDS

**Course Code: PSY2603**

**Credit Units: 03**

## **Course Objective:**

To enable students to understand and apply concepts of psychology to the development of education of challenged and gifted students

## **Course Contents:**

### **Module I: Children with mild differences in behavior & learning**

Children with Speech & Learning Disabilities  
Children with Learning Disabilities  
Children with Intellectual Disabilities  
Children and youth with behavior disorders  
Children who are Gifted, Creative and Talented

### **Module II: Children with Sensory Impairments**

Children and youth with Hearing Impairments  
Children with Visual Impairments

### **Module III: Children with Low Incidence Disabilities**

Children with Special Health Care Needs  
Children with Neurological Disabilities  
Children with Pervasive Developmental Disorders  
Children with Severe & Multiple Disabilities

### **Module IV: Interventions with Infants, Preschoolers, young adults and families**

### **Module V: Special Education across the Life Span**

Early Childhood Special Education  
Transitioning to Adulthood

### **Module VI: Special Education- Curriculum for the Handicapped**

Special Education  
Individualized Education Program (IEP)  
Integrated Education- Models of Integration  
Inclusive Education  
Community based instruction (Ecological)  
Action Research- Meaning and Nature

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **A**-Attendance; **EE**-End Session Exam

# **PSYCHOLOGY OF EXCEPTIONAL AND GIFTED CHILDREN**

**Course Code: PSY2604**

**Credit Units: 03**

## **Course Objective:**

The major goal of this course is for the student to gain an awareness, knowledge and understanding of the complexity of the exceptional child.

## **Course Contents:**

### **Module I: Foundations of Special Education**

Introduction to children who are exceptional

Issues and trends in special education

Risk factors & children at risk

Collaborating with parents & families

### **Module II: Special Education- Curriculum for the Gifted**

Approaches to curriculum

Differentiated curriculum

Enrichment approaches

- Interdisciplinary instruction
- Independent Study
- Mentorship Programs
- Internship
- Enrichment triad/revolving door model
- Curriculum compacting programs

Acceleration approach

- Advanced placement
- Ability grouping
- Individualized instruction

### **Module III: Identify and discuss Individualized Educational Plans**

Developing, Implementation & Assessment, Implications for curriculum development

### **Module IV: Critical Attitudes towards Special Children & Youth prior to 20<sup>th</sup> century**

Legislation & litigation concerning the Education of Special Children

Disability Act, 1995

An overview of different organizations working for Exceptional Children

Categories of Exceptionality and the effects of labeling

### **Module V: Attitudes, Expectations and Alternative Approaches in teaching Special Children**

Mainstreaming, Integration, Inclusion, Special Services

Dealing with teachers, parents, Special students & Non-handicapped Students

### **Module VI: Instructional Planning for each of the Exceptionality**

Developing appropriate instructional strategies for use with each of the Exceptionalities

Modification of given instructional units to meet the needs of students with each of the Exceptionalities

Development of a management plan for working with Special students within the regular classroom

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

**CT**-Class Test; **H**-Home Assignment; **P**-Presentation-Viva; **Q**-Quiz; **A**- Attendance; **EE**-End Session Exam

## SCIENTIFIC RESEARCH PAPER-II

**Course Code: PSY2605**

**Credit Units: 03**

### **Course Objective:**

The research article or scientific papers for Masters Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

Guidelines for Research Article or Scientific Papers:

- Topic :-
- Introduction :-
- Review Research :-
- Objective
- Methodology
- Discussion
- Conclusion :-
- References & Bibliography:-

No. of pages in the compilation of the paper 25-30 (minimum 25 pages)

### **Examination Scheme:**

<b>Components</b>	<b>Compilation</b>	<b>Viva</b>	<b>Presentation</b>
<b>Weightage (%)</b>	50	25	25

## PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY2632

Credit Units: 03

### Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

Project Report	Power Point Presentation & Viva
75 marks	25 marks

### Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexure:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

# Master of Arts - Counselling Psychology

## Syllabus – First Semester

### HISTORY AND SCHOOLS OF PSYCHOLOGY

Course Code: PSY4101

Credit Units: 02

#### Course Objective:

One of the primary goals of this paper is for students to learn the philosophical roots and historical events that have shaped the field of psychology. This will include an exploration of underlying philosophical assumptions, individual contributors, and various schools that served to shape the emerging field of psychology. A second goal is for students to acquire a basic understanding of Western and Indian thought, to articulate a perspective of their own, and apply that perspective to their professional work. This course aims at helping the students to understand basic principles, historical background and main theoretical perspectives, i.e., various schools of modern scientific psychology.

#### Course Contents:

##### Module I: Introduction of Psychology

Nature of Psychology, Understanding Science and Status of Psychology as a Science  
Approaches / Methods of Psychology

##### Module II: Historical Background of Psychology

Pre-Socratic Philosophers: Socrates, Plato and Aristotle  
Patristic Philosophy – Focus on Augustine,  
Scholastic Philosophy – Focus on Aquinas

##### Module III: Indian Philosophy

Indian Philosophy and Modern Psychology  
Sri Aurobindo and his Philosophy of the Individual Self

##### Module IV: Schools of Psychology

Structuralism  
Functionalism  
Gestalt  
Psychoanalysis  
Behaviourism

##### Module V: Forces of Psychology

Psychoanalytic  
Behavioural (Cognitive-Behavioural)  
Humanistic - Existential  
Transpersonal

#### Examination Scheme:

Components	CT	CT/H/P/V/Q	CT	A	EE
------------	----	------------	----	---	----

<b>Weightage (%)</b>	7	10	8	5	70
----------------------	---	----	---	---	----

# COGNITIVE PSYCHOLOGY

**Course Code: PSY4102**

**Credit Units: 02**

## **Course Objective:**

The course deals with the understanding of higher mental processes and its relevance in daily living. The study of normal processes is essential to enable the understanding of neurological or abnormal dysfunctions. The objective of this course is (a) to provide an understanding of normal mental processes and their relationship to brain, mind and behavior, and (b) to study the concept of cognition and its application in cognitive psychology. This will facilitate the students develop the cognitive skills in themselves and others.

## **Course Contents:**

### **Module I: Historical Background**

Psychophysical approach  
Information processing approach  
Ecological Approach  
Contemporary Cognitive Psychology

### **Module II: Attention and Perception**

Theories of Attention and current developments: Broadbent's filter theory, Treisman's attenuation theory, automatic and controlled processing, switching attention.  
Perceptual learning and development  
Perception of shape, space and movement  
Implicit perception and sensory integration theory  
Cognitive – Attentional Theory: Information Processor, Cognitive Timer

### **Module III: Learning**

General Phenomenon of Learning: Learning vs Maturation, Native Response Tendencies Theoretical issues of learning: Classical conditioning, Instrumental conditioning Verbal learning: Stimulus material, Trigram Methods-Serial Learning, Paired Associate Learning Discrimination Learning: Nature, Theories-Algebraic Summation Theory, Relational Theory, Transposition Effect

### **Module IV: Memory & Forgetting**

Sensory memory, STM, LTM, Working memory  
Metamemory: Semantic & Episodic Memory  
Models of Semantic knowledge  
Theories of forgetting  
Mnemonics

### **Module V: Thinking and Language Formation**

Concept formation and categorization  
Judgment and Decision-making  
Reasoning & Problem solving: Stages – Preparation, Production, Judgment and Incubation  
Structure of language, its acquisition and Formation  
Language and Thinking: Linguistic Determinism, language and Cognition

**Module VI: Learning and Language Disorder**

Reading Disorder/Developmental Dyslexia

Disorder of written expression / Dysphasia / Aphasia

Math Disability / Dyscalculia

Auditory Processing Disorder

Speech and Language pathology

Specific language Impairment

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

## **ADVANCED SOCIAL PSYCHOLOGY**

**Course Code: PSY4103**

**Credit Units: 03**

### **Course Objective:**

Knowledge in social psychology is inevitable for any postgraduate psychology student to conceptualize the subject matter of the social individual in its deepest sense. Building from the preliminary knowledge of social psychology at the undergraduate level, this course offers the learners a more hands-on experience on the social behavior dynamics. This course is structured to provide the students a culturally informed and contextualized view of the discipline. The students are encouraged to appreciate and analyze the changing cultural diversity in the present Indian society, therefore, equipping them to approach the social issues with its implications. This course enables students to achieve integrative understanding of social psychological theory and research. It also helps in acquiring a thorough familiarity with methodological issues and thinking critically and analytically about experimental research in social psychology.

### **Course Contents:**

#### **Module I: Basic Concepts in Social Psychology**

Definition, nature and Growth of Social Psychology; Alternative conceptions of social psychology: Social Structure, Social Stratification and Power Development of social psychology in India; Current status of the discipline and its indigenization Social Psychology in the New Millennium: Influence of A Cognitive Perspective, Exporting Social Psychology, Adoption of a Multicultural Perspective Emerging alternative methods in social psychology;

#### **Module II: Attitude and Attitude Change**

Attitude - Behaviour Link: Influence of attitude on behavior: responsible factors – aspects of the situation, aspects of the attitude Attitude Change: Approach to attitude change- Persuasion approach, cognitive approach Attitudes resist change: reactance, forewarning, selective avoidance, active defense biased assimilation and attitude polarization

#### **Module III: Prosocial Behaviour**

Concept of Prosocial Behaviour, Latane Darley's five step model, situational factors: Attraction, Attributions and Prosocial Models Theories of Prosocial Behaviour: Empathy - Altruism Theory, Egoistic Theory, Genetic Selfishness.

#### **Module IV: Social Issues**

Mass violence, Terrorism, Mob behavior, Natural Disaster  
Environmental stresses and social behavior.  
Social psychological perspectives on health and illness.  
Psychological effects of unemployment.  
Social and ethnic minorities and law

#### **Module V: Applied Social Psychology**

Applied Social Psychology in India: Challenges and possibilities, Need for indigenization Applied Social Psychology and developing countries; Emerging themes Multidisciplinary approach to the study of social change; Policy oriented research; Need for reorienting Social Psychology Methods of Applied Social Psychology: Laboratory experiment, Field experiment, Field study

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

# PERSONALITY THEORY

**Course Code: PSY4104**

**Credit Units: 02**

## **Course Objective:**

This course introduces critical evaluation of different theories in the background of the empirical evidence. It enables students to

1. Become familiar with the major theories and traditions related to the study of personality and personal growth.
2. To articulate the underlined themes, methodology and assumption of each theory to enhance understanding of personality and behaviour.
3. To orient the students in application of this knowledge in case analysis and therapeutic formulation
4. To develop the skills in personality assessment.

## **Course Contents:**

### **Module I: Introduction to Personality**

Nature of personality theory: Present status

Theory in Broader perspective

Grouping among theories: Different perspectives on personality, Dispositional Perspective

### **Module II: Type and Trait Approaches to Personality**

Trait (Biological) and Type Theories: Allport, Cattell, Eysenck, Sheldon and Friedman

Alternative Five factor Model.

### **Module III: Psychoanalytic Approach to Personality**

The Freudian Theory: Topographic model, Structural model, Instincts, Defense Mechanism.

The Neo Analytic Theory: Alfred Adler: Striving for superiority; parental influence on personality development, birth order Carl Jung: Collective Unconscious Karen Horney: Erik Erikson: Concept of Ego, Stages of Personality Development Harry Stock Sullivan: Personifications

### **Module IV: Behavioural and Cognitive Approach**

Skinner's Radical Behaviours

Social Learning Theory: Dollard and Miller

Social cognitive Theory: Bandura

### **Module V: Humanistic and Existential Approach**

Abraham Maslow's and Carl Rogers' Theory,

Kelly and Rollo May

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

# PARAMETRIC STATISTICAL METHOD

**Course Code: PSY4105**

**Credit Units: 03**

## **Course Objective:**

The Present paper focuses on providing knowledge about the basics of statistics. It will give clear understanding to the students about application of parametric statistical methods. Parametric tests are generally more powerful in that the likelihood (probability) of a test reaching the correct conclusion is greater. Besides this, a module is added in last so to make students aware of parametric statistics in SPSS. Thereby they can understand the procedures and applications of parametric statistics using SPSS.

## **Course Contents:**

### **Module I: Basics**

Nature, Meaning and importance of statistics Concept of Reasoning, population, sample and probability theory in statistical inferences Categories of statistics: Descriptive and Inferential Variables and their types Scales of Measurement: Nominal, Ordinal, Interval, Ratio.

### **Module II: Statistical conjecture**

Sampling and its kinds: Probability sampling method and Non-Probability sampling method.

Difference between Objectives and Hypothesis

Hypothesis testing: One-tailed and Two-tailed tests, Type I and Type II errors

### **Module III: Statistics and Test of Significance**

Meaning, concept and importance of determining reliability of statistics in data analysis Standard error of mean, standard deviations, percentages and correlation coefficients Significance of difference between means-critical ratio and t-test calculation (large and small sample) assumption & uses One-Way and Two Way ANOVA.

### **Module IV: Correlation and Regression**

Correlation: concept, types, assumption and Utility of Cor-relational Analysis in Psychological Research Bi-serial Correlation, Point Bi-serial Correlation, Partial Correlation, Tetra-choric Correlation Simple and Multiple linear regression, its uses, concepts and assumptions Difference between Simple linear and multiple regressions

### **Module V: Introduction to SPSS and parametric statistics in SPSS**

Introduction to SPSS, its usage and functioning

Understanding the concepts of Parametric tests in SPSS

Learning data entry

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## PRACTICUM- I

**Course Code: PSY4106**

**Credit Units: 03**

### Course Objective:

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To encourage and guide the students to undertake a small-scale research project.
4. To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the first semester among the list of following practicals**

### Course Content:

1	Continuous Visual Memory Test (CVMT)	Memory
2	Illinois Test of Psycholinguistic Abilities – Third Edition (ITPA-3)	Language
3	16 PF Questionnaire - Fifth Edition with Hand scoring	Personality
4	Tennessee Self-Concept Scale - Second Edition (TSCS:2)	Self-Concept
5	Developmental Test of Visual Perception – Adolescence and Adult	Perception
6	Test of Memory and Learning – Second Ed. (TOMAL-2)	Memory and Learning

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

### Text & References:

- Mohsin, S. M.: Experiments in Psychology. Motilal Banarasidas
- Woodworth, R.S.: Experimental Psychology. Oxford & IBH & Schlosberg, H. Publishing
- Postman, L. & Egan, J. P.: Experimental Psychology: An Introduction. Harper and Row

## **FIELD PRACTICE-I**

**Course Code: PSY4107**

**Credit Units: 04**

### **Course Objective:**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme:**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

# Syllabus – Second Semester

## PSYCHOPATHOLOGY

**Course Code: PSY4201**

**Credit Units: 03**

**Course Objective:**

- To acquaint students with various manifestations of psychopathology
- To impart knowledge and skills required for diagnosis of psychological conditions.
- To introduce them to different perspectives and models of etiology.
- To develop skills required for psychopathological formulation.

This course enables students to the study and prediction of adaptive and maladaptive behaviours and its processes across lifespan. It also enables students to understand different diagnostic and educational models of psychopathology.

**Course Content:**

**Module I: Classification and Theoretical Models**

Systems of Classification, basic features; DSM-IV TR, ICD-10, similarities and differences Major Theoretical Models of Psychopathology: The medical model, Psychoanalytic model, Behaviouristic model, Humanistic-existential models, Interpersonal approach, Systems approach.

**Module II: Diagnosis and Prognosis**

Problems and methods of diagnosis: physiological examination, observation, case-history, interview method, psycho-diagnostic tests, measures of bodily functions, computer assisted diagnosis.

**Module III: Mood and Anxiety Disorder**

Bipolar disorders: Manic, Depressive, Mixed Depressive disorder: Major depression and dysthymia, Suicide Anxiety Disorders: Generalized anxiety disorder, phobia, panic disorder, post traumatic stress disorder and obsessive compulsive disorder

**Module IV: Major Clinical Disorders**

Schizophrenia

Other psychotic disorders: Bipolar, Delusional, psychotic depression

**Module V: Somatoform Disorders**

Conversion disorder, Somatization disorder, Hypochondriasis, Body dysmorphic disorder, Pain disorder

**Module VI: Disorders of Infancy, Childhood and Adolescence**

Developmental disorder: PDD, Rett Disorder, Asperger Disorder,  
Behavioral Disorder: Conduct Disorder, Hyperactivity Disorder, ADHD,  
Genetic Disorders: Down Syndrome

**Module VII: Personality Disorder**

Personality Disorder: Narcissistic Personality, Histrionic Personality, Antisocial (Psychopathic) Personality, Borderline Personality, Paranoid Personality, and Schizotypal Personality

**Module VIII: Sexual Dysfunctions and Paraphilias**

Dysfunctions of Desire, Arousal, Orgasm and Pain

Paraphilias, Paedophilia and Rape  
Gender identity disorders  
Impotence and frigidity  
Causes, preventing suicide

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:**

# PSYCHOLOGICAL ASSESSMENT AND DIAGNOSIS

**Course Code: PSY4202**

**Credit Units: 03**

## **Course Objective:**

The course teaches the students about the characteristics, objectives and wide ranging effects of psychological testing. It further describes the various testing methodologies and outlines capabilities and limitations of these methods.

## **Course Contents:**

### **Module I: Introduction**

Purpose of testing, types of test used, Bias & Fairness  
Ethical Issues in Psychological Testing  
Overview of Tests  
Norms, Scoring Interpretation and Report Writings  
Issues in measurement  
Emerging trends of online testing

### **Module II: Cognitive functions and their assessment**

Concept of Attention, Gestalt Theory, Memory and Forgetting, PGI Memory Scale  
Theories of Intelligence  
Intelligence Tests:

**Slosson Intelligence Test** – Revised For Children and Adults (SIT-3/R)

Bhatia Battery Weschler's Adult Performance Intelligence Scale (WAPIS)

Raven's Progressive Matrices (Colour Progressive Matrices, Standard Progressive Matrices and Advanced Progressive Matrices)

Binet Kamat Test

Weschler's Intelligence Scale for Children – Revised (WISC)

Wide Range Intelligence Test (WRIT)

Alexander Pass-a-long Test of Intelligence

Draw-A-person Intellectual Ability Test for Children, Adolescents and Adults (DAP:IQ)

### **Module III: Achievement Test**

Wechsler Individual Achievement Test (WIAT)

Diagnostic Achievement Test For Adolescents – Second Edition (DATA-2)

Kaufman Test of Educational Achievement (KTEA)

Woodcock-Johnson Tests of Achievement (WJ)

### **Module IV: Assessment of Personality: Non-Projective Test**

Cattell's 16 Personality Factor Inventory (16 PF)

California Q-Sort Tests

Myers Briggs Type Indicator (MBTI)

Minnesota Multiphasic Personality Inventory (MMPI)

Personality Inventory for Children

OMNI Personality Inventory (OMNI)

Bell's Adjustment Inventory

Eysenck's Personality Questionnaire

NEO™ Personality Inventory-3 (NEO™-PI-3) Adult / Adolescent

**Module V: Assessment of Personality: Projective Tests**

Introduction of Projective Techniques

Difference between Projective & Non-Projective Techniques

Thematic Apperception Test

Rorschach Inkblot Test

House-Tree-Person (H-T-P)

Sentence Completion Test

**Module VI: Developmental Scales**

Developmental Screening Test

Vineland's Social Maturity Scale

Measures of Psychosocial Development (MPD)

Gesells' Developmental Schedule

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:****Text:**

# CHILD PSYCHOLOGY

**Course Code: PSY4203**

**Credit Units: 02**

## **Course Objective:**

Child Psychology is extremely important and tell us about the nature and development of children. This course introduces the methods, theories and main concepts used by psychologists to develop a real insight into the world of children. This study is intended for students of psychology, those training to work with children in a variety of professional roles, or anyone just interested in understanding how children develop. By studying child psychology, students can

- understand and accurately predict a reasonable norm for child development.
- understand children and equip them to become well-adjusted, more adaptable adults who are capable of living rich and varied lives.
- help our children through crises and enrich their daily lives by interacting with them in ways that are appropriate to their developmental levels.

## **Course Contents:**

### **Module I: Introduction**

Definition and Concept of Childhood

Early history and beginnings of child psychology

Biological factors in Child Psychology (Prenatal, Natal and New-Natal Development,

Nature vs Nurture: Genetics and Social atmosphere

Methods- Self Reports: Parental reports, Children's reports. Case Study, Experimental method,

Design- Longitudinal, Cross Sectional Sequential and Correlation

### **Module II: Biological Foundation**

Biology and Heredity: Cell Division, The genetic code- Chromosome, DNA, Sex cells, Multiple offspring; Patterns of genetic inheritance: Dominant and Recessive, Stages in Prenatal Development: The germinal period; the period of embryo, the period of foetus Influences on Prenatal Development Child Birth: The states of normal labour: Birth complication- Anoxia, Preterm and Low Birth weight infants New Born: Sleeping- Sudden Infant Death Syndrome (SIDS); Crying; Feeding; All the reflexes.

### **Module III: Major Schools of Child Psychology**

Psychoanalytic perspective (Freud and Erickson)

Behaviorist perspective- Social Learning Theory,

Piaget's Theory of Cognitive Development

Vygotsky's Theory of Socio-cognitive Development

Erikson's Eight Stages of Development

### **Module IV: Motor, Sensory and Cognitive Development**

Motor Development: contributions of Motor Development, Principles of Motor Development, Sequence of Motor Development and Motor Skills,

Environmental influences on motor development

Sensory Development: Vision, hearing, taste and smell, cutaneous senses, early deprivation and enrichment of senses. Cognitive development- Structure and processes, stages, Evaluation

### **Module V: Development of Language**

Language Development- What is Language, Components of language and its development

Pre-linguistic development- receptivity to language, first speech sound

Bilingual vs Multilingualism

Responsive communication and Verbal communication

**Module VI: Emotional, Social and Moral Development**

Early emotional development- Smiling, laughter, attachment, fear, jealousy, aggression, Izzard's Theory of Differential Emotions

Emotional Intelligence, Social intelligence

Social Development- Agents of socialization: Family-Parental control, sibling relationship; School; Peer group; Media- TV, books/journals, computers

Meaning of moral behavior, Patterns of moral development, Kohlberg's Theory

Meaning of discipline, essentials and techniques of discipline, evaluation of discipline

**Module VII: Situational and Applied Child Psychology**

Family dynamics

Peer relationships

Sibling relationships and birth order

Effects of divorce

Developing self-esteem

Understanding red flags

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:****Text:**

# NON-PARAMETRIC STATISTICAL METHOD

**Course Code: PSY4204**

**Credit Units: 03**

**Course Objective:** The Present paper focuses on providing knowledge about the basics of nonparametric statistics. It will give clear understanding about differences between Parametric & Nonparametric Test Procedures. This paper will

1. Explain commonly used Nonparametric Test Procedures.
2. Perform Hypothesis Tests Using Nonparametric Procedures.
3. Going to teach student how to use SPSS with non-parametric statistics.

## **Course Contents:**

### **Module I: Basics**

What is Non-Parametric statistics: Nature, Meaning and Concept strengths and limitations of non-parametric procedures Parametric VS Non- Parametric Statistics  
Four Levels of Measurement and Non-parametric statistics

### **Module 2: Tests of differences between Groups and Variables**

The Friedman Two-way analysis of variance by ranks-Basic concepts, uses and computations  
Test of differences between groups (Independent samples): Mann-Whitney U test computations, Kolmogorov-Smirnov test, uses Test of differences between variables (Dependent samples): Kruskal-Wallis ANOVA analysis of ranks, K-Sample Median test, uses and concepts

### **Module 3: Nominal Measures of Correlations**

Concept definition assumptions of Nominal Measures of Correlations  
The Phi-Coefficient, Contingency coefficient concepts uses and calculations  
Tetrachoric: Its uses, computation and comparison

### **Module 4: Chi-Square**

Concept and Definition, its assumptions and use  
Chi-Square Goodness of Fit (One-Sample Test)  
Chi-Square Test of Independence

### **Module 5: Introduction to SPSS and Non-parametric statistics in SPSS**

Introduction to SPSS, its usage and functioning  
Understanding the concepts of Non-Parametric tests in SPSS  
Learning data entry

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# POSITIVE PSYCHOLOGY

**Course Code: PSY4206**

**Credit Units: 02**

**Course Objective:** To enable students to understand the theories and research related to positive psychology and equip students to develop and apply positive psychology for enhancement of self and others.

- To trace the development of positive psychology as an independent discipline with its multidimensional perspective.
- To study the relationship of personality and situational variables with positive psychology.
- To discuss strategies to enhance positive affect.

## **Course Contents:**

### **Module I: Introduction to Positive Psychology**

Positive Psychology: Concept, History, Nature and Scope

Art of Well Being

Defense Mechanism & Coping Strategies

### **Module II: Interpersonal Perspectives & Emotional Intelligence**

Empathy Compassion, Love, Social relations

Hope & Optimism

Theory of Emotions

Emotional Intelligence & its importance

### **Module III: Strengths and Virtues**

Tyranny of Wisdom

Character Strengths and Virtues

Resiliency in the phase of challenge & Loss

### **Module IV: Happiness**

Theories, measures and Positive correlates of happiness

Traits associated with Subjective Happiness

Cross-cultural differences

### **Module V: Psychology of Positivism**

Positive Emotional States and Well Being with special emphasis on Forgiveness and Gratitude

Positive Institutions: Families, Religion, Spirituality and Well being.

Specific issues: Aging Well

### **Module VI: Positive Thinking and Applications of Positive Psychology**

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## PRACTICUM- II

Course Code: PSY4207

Credit Units: 03

### Course Objective:

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To encourage and guide the students to undertake a small-scale research project.
4. To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the second semester among the list of following practicals**

### Course Content:

1	Slosson Intelligence Test – Revised For Children and Adults (SIT-3/R)	Intelligence
2	Diagnostic Achievement Test For Adolescents – Second Edition (DATA-2)	Achievement
3	House-Tree-Person (H-T-P)	Personality: Projective
4	Rorschach Ink Blot Test	Personality: Projective
5	Personality Inventory for Children scoring kit	Personality:
6	OMNI Personality Inventory (OMNI) Introductory Kit	Personality:

### Examination Scheme:

<b>Components</b>	A	File Demonstration	Viva	EE
<b>Weightage (%)</b>	5	35	35	25

### Text & References:

## **FIELD PRACTICE-II**

**Course Code: PSY4208**

**Credit Units: 04**

### **Course Objective:**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme:**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

## SCIENTIFIC RESEARCH PAPER

**Course Code: PSY4209**

**Credit Units: 01**

### **Course Objective:**

The scientific research papers for Masters Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

### **Guidelines for Research Article or Scientific Papers:**

Topic  
Introduction  
Review Research  
Objective  
Methodology  
Discussion  
Conclusion  
References & Bibliography

No. of pages in the compilation of the paper 25-30 (minimum 25 pages)

### **Examination Scheme:**

<b>Components</b>	<b>Compilation</b>	<b>Viva</b>	<b>Presentation</b>
<b>Weightage (%)</b>	50	25	25

# Syllabus – Third Semester

## RESEARCH METHODS: EXPERIMENTAL DESIGN

**Course Code: PSY4301**

**Credit Unit: 02**

### **Course Objective:**

Research Methodology is a way to find out the result of a given problem on a specific matter or problem that is also referred as research problem. In Methodology, researcher uses different criteria for solving/searching the given research problem. Different sources use different type of methods for solving the problem. So this course will enable the student to understand and apply basic research methods in psychology including research design, data analysis and report findings research conclusion apparently based on the parameters of particular research methods.

### **Course Contents:**

#### **Module I: Introduction to Research**

Meaning of Scientific Research  
Objectives and Steps in Scientific Research  
Defining research problem  
Defining variables  
Developing hypothesis

#### **Module II: Evaluating Measures and Hypothesis**

Need For Evaluating Measures  
Reliability and Validity  
Hypothesis testing: Type1 and Type 2  
Going beyond hypothesis testing: Effect size and Power

#### **Module III: Validity of Experimental Researches and Threats to them**

Statistical Conclusion validity  
Construct validity and External Validity  
Establishing the cause and Effect  
Single Group threat, Multiple Group threats, Social threats

#### **Module IV: Experimental Designs-I**

Two-Group experimental designs  
    Within-subject Design  
    Between-subject design  
    General Linear Model

#### **Module V: Experimental Designs-II**

Factorial designs  
Randomized Block designs  
Hybrid Experimental Designs: Solomon four group designs  
Mixed designs

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# PSYCHOTHERAPY

**Course Code: PSY4302**

**Credit Units: 03**

## **Course Objective:**

The course enables students to learn various therapies and their applications in counselling field. The course aims to enable participants to acquire the development and therapies in counselling which can be used in a variety of settings, and also to understand the importance of the development of personal awareness in the effective application of counseling skills.

## **Course Contents:**

### **Module I: Introduction**

Psychotherapy: Meaning, Nature & Scope

Variables affecting Psychotherapy: Specific Variables: Client Variable, Therapist Variable, Process variables, Social & Environmental Variable

Non-Specific Variables: Spontaneous cure, Placebo Effect

Currents and Future Trends of Psychotherapy

### **Module II: Psychotherapy in India**

Psychotherapy in the Indian context

Spirituality and psychotherapy

Yoga and Meditation

### **Module III: Varieties of Psychotherapy**

Supportive therapy

Re-educative Therapy

Re-constructive therapy

Counselling vs. Psychotherapy

### **Module IV: Psychoanalytic Therapies**

Freud's Psycho-analytic Therapy, Adlerian Psychotherapy, Brief Dynamic Therapies

### **Module V: Humanistic Therapies**

Client-Centered Therapy, Existential Therapy and Gestalt Therapy

### **Module VI: Behavioral and Cognitive Behavior Therapy**

Behavioral therapy, Cognitive Behavior therapy, Rational Emotive Behavior Therapy (Ellis)

### **Module VII: Few more Important Therapies**

Family, Marital and Interpersonal Therapy

Therapies with Children and Adolescents

Group Therapy

### **Module VIII: Therapeutic Guidelines while working with**

Women, Older clients, Clients with personality disorder

Grief and loss

Self-harm

Persons from disadvantaged context

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:****Text:**

# COUNSELLING PSYCHOLOGY

**Course Code: PSY4304**

**Credit Unit: 03**

**Course Objective:** To produce graduates with a well-developed professional identity as counseling psychologists, including awareness and appreciation of context, development, and strength-based interventions. Thus, we seek to develop the professional skills of our students such that each is able to:

- Demonstrate understanding of the impact of multiple contexts on human behavior
- Demonstrate understanding of theories and techniques of developmentally-based health promotion and intervention for individuals, systems, and communities
- Appreciate the role of individual and cultural differences and diversity in human development and behavior

## **Course Contents:**

### **Module I: Introduction**

Meaning, Definition & Goals

Historical Background: Origin of Counseling within Philosophy and Medicine,

Influence from Psychology, Mental health development, the guidance movement and other influences

Difference between Counseling and other associated helping professions (psychotherapy, psychiatry, social work, guidance etc.)

### **Module II: Counseling Process**

Settings for counseling

Steps in counseling

Therapeutic relationship: The importance of relationship, components of relationship, Facilitative conditions for the counseling relationship

### **Module III: Counseling Approach: Insight oriented**

Psychodynamic Approach: Psychoanalytic, Adlerian

Humanistic Approach: Existential, Client-centered, Gestalt

### **Module IV: Counselling Approach: Action oriented & other approaches**

Behavioural Approach: Operant-Conditioning, Classical-Conditioning.

Cognitive Approach: Cognitive Therapy, Rational emotive therapy.

Other Approaches: Narrative Therapy, Expressive Therapy, and Biofeedback.

### **Module V: Current Issues in Counseling:**

Ethical Issues: Professional Codes, Our divided loyalties, Areas of ethical difficulty, recent trends

Legal Issues: Advice for the passionately committed counseling student

Mental Health Counseling

Counseling diverse population: Gender bias, Counseling the aged, the ethnic minorities, and the physically challenged

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## **Text & References:**

## PRACTICUM- III

Course Code: PSY4308

Credit Units: 03

### Course Objective:

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To encourage and guide the students to undertake a small-scale research project.
4. To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the third semester among the list of following practicals**

### Course Content:

1	Measures of Psychosocial Development (MPD)	Development
2	Culture Free Self-Esteem Inventories, 3 <sup>rd</sup> Edition	Self-Esteem
3	State-Trait Anger Expression Inventory-2 <sup>TM</sup> (STAXI-2)	Anger
4	Personality Inventory for Youth	Personality
5	Family Relations Test: Children's Version	Interpersonal Relationship
6	Wide Range Intelligence Test (WRIT)	Intelligence

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

### Text & References:

## **FIELD PRACTICE-III**

**Course Code: PSY4309**

**Credit Units: 04**

### **Course Objective:**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme:**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

# SUMMER INTERNSHIP EVALUATION

Course Code: PSY4335

Credit Units: 06

## GUIDELINES FOR INTERNSHIP FILE AND INTERNSHIP REPORT

(These guidelines will be useful for undertaking an internship programme during the summer or at any other time wherein the student/ researcher works full time with a company/organisation)

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**).

### INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. *Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.*

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include *five sections* in the order described below.

1. **The Title Page** – An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content** – An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed

through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.

5. **Appendices** – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

## **INTERNSHIP REPORT**

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (In case a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report should be as per the standard layout prescribed by the organization wherein the student undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

➤ **Title or Cover Page.**

The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

➤ **Acknowledgements**

Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

➤ **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or

captions. All major equations should also be numbered and unless it is really necessary, do not write in “point” form.

While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

➤ **Conclusion(s) & Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly. Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

➤ **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

➤ **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**The Layout Guidelines for the Internship File & Internship Report:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

**Assessment Scheme:**

<b>Continuous Evaluation:</b> (based on Internship File and the observations of the faculty guide/ supervisor)	30%
<b>Feedback from Company/ Organization:</b>	10%
<b>Final Evaluation:</b> (Based on Internship Report, Viva/ Presentation)	60%

# CLINICAL PSYCHOLOGY

**Course Code: PSY4303**

**Credit Units: 03**

## **Course objective:**

Clinical psychology is the branch of psychology concerned with the assessment and treatment of mental illness, abnormal behavior and psychiatric problems. This field integrates the science of psychology with the treatment of complex human problems, making it an exciting career choice for people who are looking for a challenging and rewarding field.

## **Course Contents:**

### **Module I: Introduction**

Meaning and Nature of Clinical Psychology

Background of Clinical Psychology: First Fifty years of Clinical Psychology (Establishment of Psychological Clinics and Influence of World War I)

Clinical Psychology: between World War I and II; From World War II to Present

### **Module II: Foundation of Clinical Psychology**

Historical origin, the Psychometric tradition, the influence of health and child guidance movement, the influence of Sigmund Freud & the American Psychologist's in America.

The influence of World War II on development of Clinical Psychology

Roots of Clinical Psychology in India: the pre-independence phase, post independence to the present scenario.

### **Module III: Development of clinical Psychology as a profession.**

Activities of Clinical Psychologist: psychological assessment, Psychotherapy, research, community mental health programme, teaching, consultation, administration.

Differences & similarities with other mental health professions

Subspecialties of clinical Psychology: Clinical health Psychology, Forensic Psychology, Geropsychology, Clinical Neuropsychology, and child clinical psychology.

Professional identity, responsibilities

### **Module IV: Diagnosis and assessment.**

Nature and purpose of Clinical diagnosis & assessment

Stages in the Assessment Process

Clinical Assessment Techniques: observation, interview, case-study, Psychological tests.

### **Module V:**

Employment Setting for Clinical Psychologist

Subspecialties of Clinical Psychology

Organizations in Clinical Psychology

Ethical and Legal Issues in Clinical Psychology

Cultural issues, current scenario & future prospects.

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# DEVELOPMENTAL PSYCHOLOGY

**Course Code: PSY4305**

**Credit Units: 03**

## **Course objective:**

To develop the understanding as to how developmental psychology focuses on the development of individuals across their lifespan within the context of family, peer groups, child-care and after-school programs, schools, neighborhoods, and larger communities and society. It considers the well-being of children, youth, and adults, vis-a-vis the cognitive, emotional, social, academic, and health domains

## **Course Contents**

### **Module 1: Background of Developmental Psychology**

Historical Background

Meaning, Nature and scope

Obstacles in studying Life-Span Development and its effect

### **Module2: Stages of Development**

General Patterns of Development

Stages of Development- Physical, Cognitive, Emotional, Social and Moral

### **Module 3: Theoretical perspective on Development**

Psychodynamic Theories: Freud, Erikson

Social Learning Theory: Albert Bandura

Cognitive Theory: Piaget

Attachment Theory: Bowlby

Socio Cultural Theory: Konrad-Lorens & Niko Tinbergen, Lev Vygotsky

Ecological Theory: Urie Bronfenbrenner

Ethology & Evolutionary Theory

### **Module 4: Development Related Disorders (DSM-IVTR and I.C.D-10)**

Pervasive Developmental Disorder: Autism

Specific Developmental Disorder of Speech and Language

Specific Learning Disabilities-Reading, Spelling, and Arithmetical Disorder

Behavioral Disorders: Attention Deficit Hyperkinetic Disorder, Conduct Disorder, Oppositional defiant Disorder

### **Module 5: Adjustment Related Issues.**

Adolescence: Psychological Hazards, Effects of Immaturity, and happiness in adolescence. Early Adulthood: Social Mobility, Sex-Role Adjustments, Personal & Social Hazards. Middle Age: Adjustment to Physical and mental changes, Vocational and marital hazards. Old Age: Changes in motor and mental abilities, Hazards to Personal and Social Adjustment.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	8	10	7	5	70

# EDUCATIONAL PSYCHOLOGY

**Course Code: PSY4307**

**Credit Units: 03**

## **Course Objective:**

This course focuses on different aspects of learning and motivation with educational implication reference to students for the development of effective teaching.

## **Course Contents:**

### **Module I: Educational Psychology**

Meaning, Nature, Scope, Aim

Methods of educational psychology:

Observational, interview

Experimental, Case-study

Survey

### **Module II: Developmental Theories**

Cognitive development - Piagetian foundations

Social development - Erikson's Stage theory

Language and thinking - Vygotsky's theory

Moral Development - Kohlberg's Theory

### **Module III: Learning**

Definition, Nature, Qualitative Distinctions

Intentional Versus Incidental Learning

Rote Versus Meaningful Learning

Reception Versus Discovery Learning

Conditions of Learning: Attitude Learning, Motor, Informational, Intellectual, Skill Learning, Cognitive Strategy Learning.

Educational Implications for Counsellor.

### **Module IV: Behavioural and Cognitive views of learning**

Educational implications of major learning theories for counselors

### **Module V: Motivation**

Basic Concepts of motivation

Murray's Need Theory

Atkinson's Achievement Theory

Corno & Rohrkemper's Self – regulation theory

Covington: Self Worth Theory

Educational Implications for Counselors

### **Module VI: Special Education for**

Gifted Children

Backward Children

Creative Children

### **Module VII: Career Counselling**

Meaning and Relevance of Career Counselling

Information about various Occupations

World of Work  
Application of Testing in Career Counselling

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## Syllabus – Fourth Semester

### RESEARCH METHODS: NON-EXPERIMENTAL DESIGN

**Course Code: PSY4401**

**Credit Unit: 02**

**Course Objective:**

Research Methodology is a way to find out the result of a given problem on a specific matter or problem that is also referred as research problem. In Methodology, researcher uses different criteria for solving/searching the given research problem. Different sources use different type of methods for solving the problem. So this course will enable the student to understand and apply basic research methods in psychology including research design, data analysis and report findings research conclusion apparently based on the parameters of particular research methods.

**Course Contents:**

**Module I: Introduction**

Nature and Purpose of Non-Experimental Research Designs and their importance

Advantages and Disadvantages of Non-experimental Research Designs

Differences between Experimental and Non-Experimental Research Designs

Types or Non-experimental Designs: Pure Descriptive design, Correlational Descriptive Design and Other type

**Module II: Quasi- Experimental designs**

Quasi- experimental research designs: their uses and importance

One-Group Designs

Non-equivalent control group designs

Pretest-Posttest Control Group Design

**Module III: Non-Experimental Designs**

Quantitative Non-Experimental Designs, Causal Comparative

Qualitative and Quantitative perspectives: Collecting qualitative data: Case study, interview,

Observational method. Discourse Analysis, Grand narrative analysis, Ethnographic methodology.

Time series Designs

**Module IV: Correlational Designs**

Correlational research design: Its Basic nature and uses

Kinds of Correlational designs: Panel Design, Cross-Sectional Design and Longitudinal Designs

Concept and application of Multiple Regression Analysis (linear and stepwise)

Factor analysis and Its Implications

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## ADVANCE AND APPLIED COUNSELLING SKILLS

**Course Code: PSY4403**

**Credit Unit: 02**

### **Course Objective:**

This course enables students to gather knowledge about theories of Advanced Counselling Skills. It is further designed to equip students with skills to practice as a Counselling Psychologist.

### **Course Contents:**

#### **Module I: Counsellor as a person**

Personal characteristics: A composite model of human effectiveness, role of self awareness in counselling.

Role and Function of the Counsellor: Definition of Role, Generic roles, organizing roles & functions

#### **Module II: Communication Skills – I**

Basic Communication Skills: Attending skills, Listening skills, Integrating Listening Skills.

Exploration Skills: Probe, Immediacy, Self-disclosure, Interpretation, Confrontation.

Action Skills: Information giving, Advice giving, Goal setting, Reinforcement, Directives

Self-disclosure by counsellor – when and how

Helping clients develop and work on preferred scenarios, negotiating homework.

Managing resistance and other obstacles in counselling

Skills of closure and terminating

#### **Module III: Techniques of Helping and working with emotions**

Self monitoring of Thought, Feeling and Action, Facilitating problem solving

Understanding and Improving Self talk, rules and thinking patterns.

Behavioural Methods

#### **Module IV: Counseling Applications**

Pediatric Counseling: Dynamics and process

Adolescent Counselling: Concept and Issues

Group Counselling: Concept & Process.

Academic Counselling: Definition and Scope.

Marital and Family Counselling: Concept & Process.

Addiction counseling: Principles & Prevention

Geriatric Counselling: Concept and Scope.

Rehabilitation Counseling, And Crisis Intervention & Trauma Counseling

#### **Module V: Assessment in psychology**

The purpose of assessment in counselling, Assessment principles

Intelligence and general ability testing

Measuring Achievement and aptitude

Appraisal of personality

Spiritual assessment strategies

Applications of assessment: Treatment planning, evaluation and accountability.

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## PRACTICUM- IV

Course Code: PSY4412

Credit Units: 03

### Course Objective:

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To encourage and guide the students to undertake a small-scale research project.
4. To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the fourth semester among the list of following practicals**

### Course Content:

1	NEO-4™ - Comprehensive Kit	Personality
2	Comprehensive Test of Non-verbal Intelligence-Second Edition (CTONI-2)	Intelligence
3	Neuropsychological Assessment Battery® (NAB®) Attention Module Kit	Attention
4	Detroit Tests of Learning Aptitude - Fourth Edition (DTLA-4)	Learning
5	Reynolds Intellectual Assessment Scales (RIAS)	Intelligence
6	General Health Questionnaire (GHQ)	Health

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

### Text & References:

- Mohsin, S. M.: Experiments in Psychology. Motilal Banarasidas
- Woodworth, R.S.: Experimental Psychology. Oxford & IBH & Schlosberg, H. Publishing

## **FIELD PRACTICE-IV**

**Course Code: PSY4413**

**Credit Units: 04**

### **Course Objective:**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme:**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

# DISSERTATION

**Course Code: PSY4437**

**Credit Units: 06**

## GUIDELINES FOR DISSERTATION

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Selecting the Dissertation Topic

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

### Planning the Dissertation

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

### The Dissertation plan or outline

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.

- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

### **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct quotation and what is your paraphrase.

### **Dissertation format**

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary.**
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required:

Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

### **The Layout Guidelines for the Dissertation:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5

- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

### **Assessment Scheme:**

<b>Continuous Evaluation:</b> (Based on Abstract, Regularity, Adherence to initial plan, Records etc.)	40%
<b>Final Evaluation:</b> Based on,	60%
Contents & Layout of the Report,	25
Conceptual Framework,	10
Objectives & Methodology and	10
Implications & Conclusions	15

# MENTAL RETARDATION

**Course Code: PSY4402**

**Credit Unit: 03**

**Course Objective:**

The paper on Mental Retardation introduces nature of mental retardation, its classification, assessment and intervention programs.

**Course Contents:**

**Module I:**

Mental Retardation: Definition of mental retardation, Classification-Psychological Classification Medical and Educational Classification, Causes and Prevention

**Module II:**

Mental Retardation: Psycho-educational Assessment, Intelligence Tests, FACP, BASIC-MR, BASAL-MR

**Module III:**

Mental Retardation: Enhancing Skills- CTC, IEP, Prompting, Task Analysis, Channing, Shaping, Modeling, Reinforcement

**Module IV:**

Mental Retardation: Reducing maladaptive behaviours- Assessment of maladaptive behaviours, plan of behavior modification, techniques for decreasing problem behavior.

**Module V:**

Vocational Training and Empowering families having child with Mental Retardation, Special Sports, Acts and Policies

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:**

**Text:**

- NIMH (1989) Mental Retardation : A Manual for Psychologist, Secundrabad

# CHILDHOOD PATHOLOGY AND EXCEPTIONAL CHILDREN

**Course Code: PSY4405**

**Credit Unit: 03**

**Course Objective:**

Objective of this course is to learn various categories of exceptionality, early identification, special and mainstream education

**Course Contents:**

**Module I:**

Developmental Disorders- Autism Spectrum Disorders, attention deficit hyperactivity disorder, Mental Retardation, Learning Disabilities, Hearing Impairment, Disability of Locomotion

**Module II:**

Bipolar disorder in children, conduct disorder, emotional disorders, eating disorders, enuresis  
Psychological Assessment of Childhood disorders

**Module III:**

Special Education: Special Schools and Rehabilitation centres

Mainstreaming: assistive devices, adaptation, barrier free environment

Mainstreaming: Attitudinal change- teachers, non disabled students, Parents and Community

**Module IV:**

National Institutes in the field of disability: NIMH, NIVH, NIOH, AYJNIHH, NIEPMD, SVNIRTAR, Alimbco.

NGOs, Parent Organizations, Advocacy organization

**Module V:**

Legislative framework: Mental Health Act, RCI Act, Persons with Disability Act, National Trust Act, UNCRPD

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:**

# EMPLOYEE COUNSELING AND EMPOWERMENT

**Course Code: PSY4409**

**Credit Units: 3**

## **Course Objective:**

To enable students to understand the diversity in organizations and equip them with skills to handle, manage and adjust to a culturally and socially diverse work environment.

## **Course Contents:**

### **Module I: Mentoring Career**

Improving various Professionally & Psychologically Skills, Performance & Capacity Development, Career Planning, Setting Goals, Interview Techniques, and Negotiation Skills

### **Module II: Work Life Counseling:**

Managing work life: key to perform well; remain stress free, happy & successful at work.

- Dealing with Boss, Colleagues & Juniors
- Stress Management, Time Management, Crisis Management
- Enhancing Performance & Will Power
- Work-Life Balance, Motivation & Performance
- Meeting Challenges of Workplace Harassment, Discrimination

### **Module III: Personal Life Counseling:**

Personality Development and Behavioural Management

- Understanding, Improving & Balancing Habits and Behavior
- Identifying Power within self
- Developing EQ & Emotional Intelligence, Developing Positive Psychology
- Utilizing Multiple Intelligence, Confidence Building
- Handling & Eradicating Stress & Phobia, Handling Frustration & Unhappiness
- Handling Ego/ Self Respect, Handling & eradicating Depression & Loneliness

### **Module IV: Introduction to Employee Counselling**

Meaning, Nature & Scope

Types and functions of Employee Counselling

Coaching, Mentoring and Counselling

### **Module V: Differences and power**

Concepts of prejudice, discrimination and oppression

Cultural and ethnicity as dimensions of differences

Race and racism in organizations

Gender and sexism in organization

Sexual orientation, physical ability, age, social class and other differences in workplace

### **Module VI: Conflict and Negotiation viz Employee Counselling**

Concept of Conflict and Negotiation

Importance and relevance of Conflict and Negotiation in Employee Counselling

### **Module VII: Employee Empowerment and leadership**

Change Management, Employee Involvement for Effective Change Management, Leadership

Management, Motivation / Recognition / Retention.

Essentials of Leadership Quality

Self-leadership leads to Empowerment  
Relevance of Empowerment in Employee Counselling

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:**

# ORGANIZATIONAL BEHAVIOR AND INDUSTRIAL RELATIONS

**Course Code: PSY4410**

**Credit Units: 03**

## **Course Objective:**

To equip students with the basic knowledge of psychological processes in the organizations and skills for using the same for organizational development and to aims at orienting the students to the functions of Industrial relations with relevance to the Indian context.

## **Course Contents:**

### **Module I: Evolution of management Thought**

Organizational Behavior: Definition, goals, fundamental concepts

Concept, Determinants and Models

Historical development of industrial organizational psychology

### **Module II: Job analysis and selection**

Job analysis – Definition and methods – Questionnaire method, checklist method, individual interview method, observation interview method, group method, technical conference method, diary method, work participation method and critical incident method

Selection – Application blank, psychological tests used in selection – Intelligence tests, personality tests, interest tests and aptitude tests (mention two tests in each area). Interview, guided interview, unguided interview, stress interview, group interview.

### **Module III:**

**Individual Behavior:** Foundation of Individual Behaviour, Personality, Learning, Perception and Attribution, Values and Attitudes, motivation and job performance. Management's assumptions about people.

**Group Behavior:** Foundation of group behavior, Group Dynamics, Leadership: theories and styles. Conflict: Sources, Patterns, Levels and Resolution. Organizational Power and Politics.

### **Module IV:**

Industrial Relation: Origin, Definition, Scope, Determinant, Socio-Economic, Technical, Political factors affecting IR in changing Environment, Approaches to the study of IR –Psychological, Human Relation, Socio,Gandhinian approach &It's Effect on Management

### **Module V:**

1. Present day industrial worker - comparison with predecessor Industrial disputes: meaning-causes. Importance of good labour management relations-causes of industrial unrest
2. Directive principles of State policy-creating and adopting labour policy.
3. Role of ILO in industrial relations.

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# PSYCHOLOGICAL PRACTICE IN PERSONNEL AND HUMAN RESOURCE MANAGEMENT

**Course Code: PSY4411**

**Credit Units: 03**

## **Course Objective:**

To enable students to understand the concepts of psychology as applied in various aspects of human resources in organizations and equip them to develop modules in accordance with the optimum use of the same.

## **Course Contents:**

### **Module I: The Human Resource Management**

Structure of Human Resource Management, Role and Responsibilities of the Human Resource Manager; Human Resource Policies - Formulation and Essentials of Sound HR Policies

**Module II: Challenges of Personnel Management:** Individual and Competitiveness, balancing organizational demands and employees concerns-metaphors used to manage people.

### **Module III: Development of Human Resources**

Learning, Training, Training and Development, Evaluation and Performance Appraisal

### **Module IV: Meeting HR requirements**

Job Analysis and job Descriptions, diversity and empowered employees, career management and developing diverse talent pool, competency assessment- Perspective and Techniques

### **Module V: Employment Testing**

Testing abilities, Testing personality, Testing skills and achievements, Using and not using tests.

### **Module VI: Contemporary Issues in HR**

Strategic Human Resource Management, International Human Resource Management Creating High Performing HR Systems: Wellness Programs and Work Life Balance and Green HRM

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## Syllabus - First Semester

### BASIC PSYCHOLOGICAL PROCESSES

**Course Code: PSY4109**

**Credit Units: 02**

#### **Course Objective**

This paper of psychology is crucial to understand the basis of mental activity and human behavior. The students of psychology will need to have this knowledge about the normal mental operation of adults in order to understand more complex processes. The subject emphasizes cognitive and social aspects and it shows the more up to date developments. Basic Psychological Processes encourage students to study in depth the notion of modern scientific psychology.

#### **Course Contents**

##### **Module I: Introduction of Psychology**

Nature of Psychology, Understanding Science and Status of Psychology as a Science and humanities, Scope of Psychology

Methods of Psychology: Experimental, Observation, Survey Method, Archival method, Interview and case study

Schools of Psychology: Structuralism, Functionalism, Gestalt, Psychoanalysis, Behaviourism, Humanistic - Existential

##### **Module II: Biology and Behaviour**

Nervous System: Central and Peripheral Nervous Systems.

Brain and Behaviour: Hind Brain, Mid Brain, and Forebrain- various structures and its importance, Significance of Brain Lateralization, Split brain.

Neurons: Structure of neurons, Electrical and chemical neural impulse transmission, Role of Neuro-transmitters in behaviour

Endocrine Glands-Functions and Impact of hormones on behavior

##### **Module III: Motivation and Emotion**

Motivation: Meaning, Nature, Needs-Biological and Psychological, Instinct, Drive and Incentive

Classification of Motives- Physiological, Psychological (Personal), Socio-genic Motive

Theories of Motivation: Need and Drive Reduction Theory, Instinctive and Social Urges Theory, Goal Oriented Theory, Self-Actualization Theory (Maslow's Need hierarchy)

Emotion: Meaning, Nature, Physiological basis of emotions,

Theories-James Lange Theory, Cannon Bard Theory, Schachter and Singer's, Cognitive Theory,

Lindsley's Activation Theory

Emotional Expression-display rules, facial feedback hypothesis, facial-affect programme

##### **Module IV: Cognitive Processes (Thinking, Reasoning and Problem Solving)**

Cognition- definition and process

Thinking- Nature, Types and Tools of Thinking

Reasoning: Meaning, Definition and Types

Decision Making: Meaning, Process and hindrances

Problem Solving: Meaning, Steps, Methods/Strategies

## Module V: Psychology of Individual Differences

Concepts and Nature of Individual differences

Intelligence: Theories of intelligence- factor and cognitive theories.

Determinants of Intelligence: Genetic, Environmental influences.

Intelligence test: Characteristics and Types.

Newer trends- Intelligence Quotient, Emotional Quotient, Social Quotient, Spiritual Quotient

Gender Difference: Biological basis of gender difference, Role of hormones in gender related behaviour,

Gender differences in social behaviour, Gender Differences in psychological adjustment, Factor or sources of gender differences

### Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

# COGNITIVE PSYCHOLOGY

**Course Code: PSY4102**

**Credit Units: 02**

## **Course Objective**

The course deals with the understanding of higher mental processes and its relevance in daily living. The study of normal processes is essential to enable the understanding of neurological or abnormal dysfunctions. The objective of this course is (a) to provide an understanding of normal mental processes and their relationship to brain, mind and behavior, and (b) to study the concept of cognition and its application in cognitive psychology. This will facilitate the students develop the cognitive skills in themselves and others.

## **Course Contents**

### **Module I: Historical Background**

Psychophysical approach

Information processing approach

Ecological Approach

Contemporary Cognitive Psychology

### **Module II: Attention and Perception**

Theories of Attention and current developments: Broadbent's filter theory, Treisman's attenuation theory, automatic and controlled processing, switching attention.

Perceptual learning and development

Perception of shape, space and movement

Implicit perception and sensory integration theory

Cognitive – Attentional Theory: Information Processor, Cognitive Timer

### **Module III: Learning**

General Phenomenon of Learning: Learning vs Maturation, Native Response Tendencies

Theoretical issues of learning: Classical conditioning, Instrumental conditioning

Verbal learning: Stimulus material, Trigram Methods-Serial Learning, Paired Associate Learning

Discrimination Learning: Nature, Theories- Algebraic Summation Theory, Relational Theory, Transposition Effect

### **Module IV: Memory & Forgetting**

Sensory memory, STM, LTM, Working memory

Metamemory: Semantic & Episodic Memory

Models of Semantic knowledge

Theories of forgetting

Mnemonics

### **Module V: Thinking and Language Formation**

Concept formation and categorization

Judgment and Decision-making

Reasoning & Problem solving: Stages – Preparation, Production, Judgment and Incubation

Structure of language, its acquisition and Formation

Language and Thinking: Linguistic Determinism, language and Cognition

### **Module VI: Language Learning Disorder**

Reading Disorder/Developmental Dyslexia  
 Disorder of written expression / Dysphasia / Aphasia  
 Math Disability / Dyscalculia  
 Auditory Processing Disorder  
 Speech and Language pathology  
 Specific language Impairment

### Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,  
 EE: End Semester Examination

## ADVANCED SOCIAL PSYCHOLOGY

**Course Code: PSY4103**

**Credit Units: 03**

### **Course Objective**

Knowledge in social psychology is inevitable for any postgraduate psychology student to conceptualize the subject matter of the social individual in its deepest sense. Building from the preliminary knowledge of social psychology at the undergraduate level, this course offers the learners a more hands-on experience on the social behavior dynamics. This course is structured to provide the students a culturally informed and contextualized view of the discipline. The students are encouraged to appreciate and analyze the changing cultural diversity in the present Indian society, therefore, equipping them to approach the social issues with its implications. This course enables students to achieve integrative understanding of social psychological theory and research. It also helps in acquiring a thorough familiarity with methodological issues and thinking critically and analytically about experimental research in social psychology.

### **Course Contents**

#### **Module I: Basic Concepts in Social Psychology**

Definition, nature and Growth of Social Psychology;

Alternative conceptions of social psychology: Social Structure, Social Stratification and Power

Development of social psychology in India; Current status of the discipline and its indigenization Social Psychology in the New Millennium: Influence of A Cognitive Perspective, Exporting

Social Psychology, Adoption of a Multicultural Perspective

Emerging alternative methods in social psychology;

#### **Module II: Attitude and Attitude Change**

Attitude - Behaviour Link: Influence of attitude on behavior: responsible factors – aspects of the situation, aspects of the attitude

Attitude Change: Approach to attitude change- Persuasion approach, cognitive approach

Attitudes resist to change: reactance, forewarning, selective avoidance, active defense biased assimilation and attitude polarization

#### **Module III: Prosocial Behaviour**

Concept of Prosocial Behaviour, Latane Darley's five step model, situational factors: Attraction, Attributions and Prosocial Models

Theories of Prosocial Behaviour: Empathy - Altruism Theory, Egoistic Theory, Genetic Selfishness

#### **Module IV: Social Issues**

Mass violence, Terrorism, Mob behavior, Natural Disaster

Environmental stresses and social behavior.

Social psychological perspectives on health and illness.

Psychological effects of unemployment.

Social and ethnic minorities and law

#### **Module V: Applied Social Psychology**

Applied Social Psychology in India: Challenges and possibilities, Need for indigenization

Applied Social Psychology and developing countries; Emerging themes

Multidisciplinary approach to the study of social change; Policy oriented research; Need for reorienting Social Psychology

Methods of Applied Social Psychology: Laboratory experiment, Field experiment, Field study

### Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

## **PERSONALITY THEORY**

**Course Code: PSY4104**

**Credit Units: 02**

### **Course Objective**

This course introduces critical evaluation of different theories in the background of the empirical evidence. It enables students to become familiar with the major theories and traditions related to the study of personality and personal growth. Course will also articulate the underlined themes, methodology and assumption of each theory to enhance understanding of personality and behavior to orient the students in application of this knowledge in case analysis and therapeutic formulation to develop the skills in personality assessment.

### **Course Contents**

#### **Module I: Introduction to Personality**

Nature of personality theory: Present status

Theory in Broader perspective

Grouping among theories: Different perspectives on personality, Dispositional Perspective

#### **Module II: Type and Trait Approaches to Personality**

Trait (Biological) and Type Theories: Allport, Cattell, Eysenck, Sheldon and Friedman

Alternative Five factor Model.

#### **Module III: Psychoanalytic Approach to Personality**

The Freudian Theory: Topographic model, Structural model, Instincts, Defense Mechanism.

The Neo Analytic Theory: Alfred Adler: Striving for superiority; parental influence on personality development, birth order Carl Jung: Collective Unconscious Karen Horney:

Erik Erikson: Concept of Ego, Stages of Personality Development

Harry Stock Sullivan: Personifications

#### **Module IV: Behavioural and Cognitive Approach**

Skinner's Radical Behaviours

Social Learning Theory: Dollard and Miller

Social cognitive Theory: Bandura

#### **Module V: Humanistic and Existential Approach**

Abraham Maslow's and Carl Rogers' Theory,

Kelly and Rollo May

### **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

# PARAMETRIC STATISTICAL METHOD

**Course Code: PSY4105**

**Credit Units: 03**

## **Course Objective**

The Present paper focuses on providing knowledge about the basics of statistics. It will give clear understanding to the students about application of parametric statistical methods. Parametric tests are generally more powerful in that the likelihood (probability) of a test reaching the correct conclusion is greater. Besides this, a module is added in last so to make students aware of parametric statistics in SPSS. Thereby they can understand the procedures and applications of parametric statistics using SPSS.

## **Course Contents**

### **Module I: Basics**

Nature, Meaning and importance of statistics

Concept of Reasoning, population, sample and probability theory in statistical inferences

Categories of statistics: Descriptive and Inferential

Variables and their types

Scales of Measurement: Nominal, Ordinal, Interval, Ratio

### **Module II: Statistical conjecture**

Sampling and its kinds: Probability sampling method and Non-Probability sampling method.

Difference between Objectives and Hypothesis

Hypothesis testing: One-tailed and Two-tailed tests, Type I and Type II errors

### **Module III: Statistics and Test of Significance**

Meaning, concept and importance of determining reliability of statistics in data analysis

Standard error of mean, standard deviations, percentages and correlation coefficients

Significance of difference between means-critical ratio and t-test calculation (large and small sample) assumption & uses

One-Way and Two Way ANOVA.

### **Module IV: Correlation and Regression**

Correlation: concept, types, assumption and Utility of Cor-relational Analysis in Psychological Research

Bi-serial Correlation, Point Bi-serial Correlation, Partial Correlation, Tetra-choric Correlation

Simple and Multiple linear regression, its uses, concepts and assumptions

Difference between Simple linear and multiple regressions

### **Module V: Introduction to SPSS and parametric statistics in SPSS**

Introduction to SPSS, its usage and functioning

Understanding the concepts of Parametric tests in SPSS

Learning data entry

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

# PRACTICUM-I

**Course Code: PSY4106**

**Credit Units: 03**

## Course Objective

Present course give practical experience to the students in administering and scoring psychological tests and interpreting the scores to acquaint the students with the basic procedure and design of psychology experiments. Course will also encourage and guide the students to undertake a small-scale research project to apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practical will be conducted in the first semester among the list of following practical**

## Course Content

1	Memory
2	Language
3	Personality
4	Self-Concept
5	Perception
6	Memory and Learning

## Examination Scheme

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

## Text & References

- Mohsin, S. M.: Experiments in Psychology. Motilal Banarasidas
- Woodworth, R.S.: Experimental Psychology. Oxford & IBH & Schlosberg, H. Publishing
- Postman, L. & Egan, J. P.: Experimental Psychology: An Introduction. Harper and Row

## **FIELD PRACTICE-I**

**Course Code: PSY4107**

**Credit Units: 04**

### **Course Objective**

To develop student's skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

# Syllabus - Second Semester

## PSYCHOPATHOLOGY

**Course Code: PSY4201**

**Credit Units: 03**

### **Course Objective**

To acquaint the students with various manifestations of psychopathology for imparting knowledge and skills required for diagnosis of psychological conditions. To introduce them to different perspectives and models of etiology and also to develop skills required for psychopathological formulation. This course will also enable students to the study and prediction of adaptive and maladaptive behaviours and its processes across lifespan. It also enables students to understand different diagnostic and educational models of psychopathology.

### **Course Content**

#### **Module I: Classification and Theoretical Models**

Systems of Classification, basic features; DSM-IV TR, ICD-10, similarities and differences

Major Theoretical Models of Psychopathology: The medical model, Psychoanalytic model, Behaviouristic model, Humanistic-existential models, Interpersonal approach, Systems approach.

#### **Module II: Diagnosis and Prognosis**

Problems and methods of diagnosis: physiological examination, observation, case-history, interview method, psycho-diagnostic tests, measures of bodily functions, computer assisted diagnosis.

#### **Module III: Mood and Anxiety Disorder**

Bipolar disorders: Manic, Depressive, Mixed

Depressive disorder: Major depression and dysthymia, Suicide

Anxiety Disorders: Generalized anxiety disorder, phobia, panic disorder, post traumatic stress disorder and obsessive compulsive disorder

#### **Module IV: Major Clinical Disorders**

Schizophrenia

Other psychotic disorders: Bipolar, Delusional, psychotic depression

#### **Module V: Somatoform Disorders**

Conversion disorder, Somatization disorder, Hypochondriasis, Body dysmorphic disorder, Pain disorder

#### **Module VI: Disorders of Infancy, Childhood and Adolescence**

Developmental disorder: PDD, Rett Disorder, Asperger Disorder,

Behavioral Disorder: Conduct Disorder, Hyperactivity Disorder, ADHD,

Genetic Disorders: Down Syndrome

#### **Module VII: Personality Disorder**

Personality Disorder: Narcissistic Personality, Histrionic Personality, Antisocial (Psychopathic) Personality, Borderline Personality, Paranoid Personality, and Schizotypal Personality

#### **Module VIII: Sexual Dysfunctions and Paraphilias**

Dysfunctions of Desire, Arousal, Orgasm and Pain

Paraphilias, Paedophilia and Rape

Gender identity disorders

Impotence and frigidity

Causes, preventing suicide

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,  
EE: End Semester Examination

# PSYCHOLOGICAL ASSESSMENT AND DIAGNOSIS

**Course Code: PSY4202**

**Credit Units: 03**

## **Course Objective**

The course teaches the students about the characteristics, objectives and wide ranging effects of psychological testing. It further describes the various testing methodologies and outlines capabilities and limitations of these methods.

## **Course Contents**

### **Module I: Introduction**

*Purpose of testing, types of test used, Bias & Fairness*

Ethical Issues in Psychological Testing

Overview of Tests

Norms, Scoring Interpretation and Report Writings

Issues in measurement

Emerging trends of online testing

### **Module II: Cognitive functions and their assessment**

Concept of Attention, Gestalt Theory, Memory and Forgetting, PGI Memory Scale

Theories of Intelligence

Intelligence Tests: Slosson Intelligence Test – Revised For Children and Adults (SIT-3/R)

*Bhatia Battery, Weschler's Adult Performance Intelligence Scale (WAPIS) BinetKamat Test*

Weschler's Intelligence Scale for Children – Revised (WISC) Wide Range Intelligence Test (WRIT) Alexander Pass-a-long Test of Intelligence

Draw-A-person Intellectual Ability Test for Children, Adolescents and Adults (DAP:IQ)

*Raven's Progressive Matrices (Colour Progressive Matrices, Standard Progressive Matrices and Advanced Progressive Matrices)*

### **Module III: Achievement Test**

Wechsler Individual Achievement Test (WIAT)

Diagnostic Achievement Test For Adolescents – Second Edition (DATA-2)

Kaufman Test of Educational Achievement (KTEA)

Woodcock-Johnson Tests of Achievement (WJ)

### **Module IV: Assessment of Personality: Non-Projective Test**

*Cattell's 16 Personality Factor Inventory (16 PF)*

California Q-Sort Tests

Myers Briggs Type Indicator (MBTI)

Minnesota Multiphasic Personality Inventory (MMPI)

Personality Inventory for Children

OMNI Personality Inventory (OMNI)

Bell's Adjustment Inventory

Eysenck's Personality Questionnaire

NEO™ Personality Inventory-3 (NEO™-PI-3) Adult / Adolescent

### **Module V: Assessment of Personality: Projective Tests**

Introduction of Projective Techniques

Difference between Projective & Non-Projective Techniques

Thematic Apperception Test

Rorschach Inkblot Test

House-Tree-Person (H-T-P), Sentence Completion Test

## Module VI: Developmental Scales

Developmental Screening Test

Vineland's Social Maturity Scale

Measures of Psychosocial Development (MPD)

*Gesells' Developmental Schedule*

### Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

# INDUSTRIAL-ORGANIZATIONAL (I-O) PSYCHOLOGY

**Course Code: PSY4210**

**Credit Units: 02**

## **Course Objective**

To introduce the students with the basic knowledge of psychological processes in the organizations and skills for using the same for organizational development and to aims at orienting the students to the functions of Industrial relations with relevance to the Indian context.

## **Course Contents**

### **Module I: Introduction to I-O**

Scope of Industrial Psychology and its Psychological, Social and Economic Foundation

Human Factor in Industry

Historical development of industrial organizational psychology

Organizational Behavior: Definition, goals, fundamental concepts, Determinants

Models of OB

### **Module II: Individual and Group Behaviour**

Individual Behavior: Foundation of Individual Behaviour, Personality, Learning, Perception and Attribution, Values and Attitudes, motivation and job performance. Management's assumptions about people, Group Behavior: Foundation of group behavior, Group Dynamics, Leadership: theories and styles. Conflict: Sources, Patterns, Levels and Resolution. Organizational Power and Politics

### **Module III: Job analysis and selection**

Job analysis – Definition, Process and methods – Questionnaire method, checklist method, individual interview method, observation interview method, group method, technical conference method, diary method, work participation method and critical incident method. Recruitment: Definition, Importance and methods, Selection – Application blank, psychological tests used in selection – Intelligence tests, personality tests, interest tests and aptitude tests (mention two tests in each area). Interview, guided interview, unguided interview, stress interview, group interview. Different methods of Selection

### **Module IV: Organizational Culture and Industrial Relations**

Organizational culture: Definition, Nature and scope, Formation and maintenance of Organizational culture. Industrial Relation: Origin, Definition, Scope, Determinant, Socio-Economic, Technical, Political factors affecting IR in changing Environment, Role of ILO in industrial relations

### **Module V: Fatigue, Monotony and Personal factors**

Meaning, Nature, Job fatigue work curve, Factor affecting fatigue and Reduction of fatigue

Comparison of fatigue work curves and monotonous work curve, Causes and education monotony

Personal and Social Factors in Industry: Motives, Incentives- Morale, Leadership and the causes of Industrial conflict.

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

# NON-PARAMETRIC STATISTICAL METHOD

**Course Code: PSY4204**

**Credit Units: 03**

## **Course Objective**

The Present paper focuses on providing knowledge about the basics of nonparametric statistics. It will give clear understanding about differences between Parametric & Nonparametric Test Procedures. Paper will also explain commonly used Nonparametric Test Procedures and Perform Hypothesis Tests Using Nonparametric Procedures to teach student how to use SPSS with non-parametric statistics.

## **Course Contents**

### **Module I: Basics**

What is Non-Parametric statistics: Nature, Meaning and Concept strengths and limitations of non-parametric procedures

Parametric VS Non- Parametric Statistics

Four Levels of Measurement and Non-parametric statistics

### **Module II: Tests of differences between Groups and Variables**

The Friedman Two-way analysis of variance by ranks-Basic concepts, uses and computations

Test of differences between groups (Independent samples): Mann-Whitney U test computations, Kolmogorov-Smirnov test, uses

Test of differences between variables (Dependent samples): Kruskal-Wallis ANOVA analysis of ranks, K-Sample Median test, uses and concepts

### **Module III: Nominal Measures of Correlations**

Concept definition assumptions of Nominal Measures of Correlations

The Phi-Coefficient, Contingency coefficient concepts uses and calculations

Tetrachoric: Its uses, computation and comparison

### **Module IV: Chi-Square**

Concept and Definition, its assumptions and use

Chi-Square Goodness of Fit (One-Sample Test)

Chi-Square Test of Independence

### **Module V: Introduction to SPSS and Non-parametric statistics in SPSS**

Introduction to SPSS, its usage and functioning

Understanding the concepts of Non-Parametric tests in SPSS

Learning data entry

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

# HEALTH PSYCHOLOGY

**Course Code: PSY4205**

**Credit Units: 02**

## **Course Objective**

- To give a better understanding of the concept of health and its various functions to understand its role in human behaviour.
- To acquaint the students with nature and significance of emerging areas of health psychology.
- To highlight the role of social, psychological and behavioural risk factors in health promotion and disease prevention.
- To introduce the students to types of stressors, their consequences, cognitive behavioural interventions for managing stress.
- To impart knowledge about causes and intervention for some prevalent stress related disorders / addictions.

## **Course Content**

### **Module I: Introduction to Health**

Historical background; Aims and Objectives of Health Psychology, Challenges for the future  
Significance of Health Behaviour, Theory of Planned Behaviour: Attributive Theory, Health Locus of Control

### **Module II: Social Support & Health**

Factors for Personality & Health Link, Types of Social Support, Link between social support & Health, Cross Cultural Images of Health

### **Module III: Life Style Disorder**

CAD, CHD, Hypertension, Stroke, Obesity, peptic ulcer, Migraine, Asthma, and Diabetes: Overview, Implications & Management.

### **Module IV: Health Enhancing Behaviour**

Stress: Meaning, Dimensions and Coping Strategies.

Improving Health & Well Being, Enhancing Support

Maintenance of Health: Diet and Nutrition, Relaxation Techniques: Jacobson Progressive Relaxation, Brotha's Relaxation Response

### **Module V: Health Behaviour Modification**

Cognitive Behavioural approach, Relapse Prevention, Attitude & Health-Belief Model

Models of Mental Health: Clinical, Community and Social Action Model

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,  
EE: End Semester Examination

## PRACTICUM-II

**Course Code: PSY4207**

**Credit Units: 03**

### Course Objective

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To encourage and guide the students to undertake a small-scale research project.
4. To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the second semester among the list of following practicals**

### Course Content

1	Intelligence
2	Achievement
3	Personality: Projective
4	Personality: Projective
5	Personality:
6	Personality:

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

## **FIELD PRACTICE-II**

**Course Code: PSY4208**

**Credit Units: 04**

### **Course Objective**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

# SCIENTIFIC RESEARCH PAPER

**Course Code: PSY4209**

**Credit Units: 01**

## **Course Objective**

The scientific research papers for Masters Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

## **Guidelines for Research Article or Scientific Papers**

# Syllabus - Third Semester

## APPLIED PSYCHOTHERAPY

**Course Code: PSY4310**

**Credit Units: 03**

### **Course Objectives**

To provide knowledge and skills to students about counseling and psychotherapy and also to train them in using therapeutic and counseling techniques for effectively practicing

### **Course Contents**

#### **Module I: Basic Counseling and Psychotherapeutic Skills**

Basic Skills: Empathy, Genuineness, unconditional positive regard, congruence, Listening, Paraphrasing, reflecting, summarizing

Advanced Skills: interpretation, insight, transference interpretation, exploring projections, identifying failure of therapy, identifying working with burnout, self-supervision, confrontation

Characteristics of effective counselor/ therapists

Challenges faced by novice

therapists: Dealing with anxiety, being oneself, self-disclosure, avoiding perfectionism, honesty with limitations, understanding silence, demands from clients; Understanding one's own self and Psychotherapy with self

#### **Module II: Therapeutic assessment and counseling session initiation**

Therapeutic assessment, History taking, and Formulation, setting goals

Contracting and its implications: Contracting for therapy and socialization, communicating ethical and professional rights responsibilities, violations of contract, Initial session, crisis and support, Counseling session's opening and closing skills, Effective conduction of counseling sessions

#### **Module III: Counseling and Psychotherapy Process**

Initial phase: Psych- education, Supportive psychotherapy. Selecting techniques

Ice-breaking, exploration, Loss framework.

Dealing with Resistance: Techniques and applications

Transference and counter-transference

#### **Module IV: Termination, Follow-up and Documentation**

Termination: Evaluating and sharing progress, Issues in termination and resolution Follow-up: Systems and techniques, sustained changes

Documentation: Therapists documentation, Communication with other professionals and referrals

Legal implications: Legal communication, documentation, Legal issues in psychotherapy and counselling.

#### **Module V: Therapeutic Case formulation and Demonstration**

Two Hypothetical case formulation and demonstration by using

Role play (video recorded), evaluation of basic and advanced skills for simulated cases, Two Hypothetical case formulation and demonstration by using

Role play (video recorded) for contracting and skills for opening and closing,

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE

# RESEARCH METHODS IN APPLIED PSYCHOLOGY

**Course Code: PSY4311**

**Credit Unit: 02**

## **Course Objective**

Research Methodology is a way to find out the result of a given problem on a specific matter or problem that is also referred as research problem. In Methodology, researcher uses different criteria for solving/searching the given research problem. Different sources use different type of methods for solving the problem. So this course will enable the student to understand and apply basic research methods in psychology including research design, data analysis and report findings research conclusion apparently based on the parameters of particular research methods.

## **Course Contents**

### **Module I: Introduction to Research**

Meaning of Scientific Research  
Objectives and Steps in Scientific Research  
Defining research problem  
Defining variables  
Developing hypothesis

### **Module II: Evaluating Measures and Hypothesis**

Need For Evaluating Measures  
Reliability and Validity  
Hypothesis testing: Type1 and Type 2  
Going beyond hypothesis testing: Effect size and Power

### **Module III: Validity of Experimental Researches and Threats to them**

Statistical Conclusion validity  
Construct validity and External Validity  
Establishing the cause and Effect  
Single Group threat, Multiple Group threats, Social threats

### **Module IV: Experimental Designs-I**

Two-Group experimental designs Within-subject Design  
Between-subject design  
General Linear Model

### **Module V: Experimental Designs-II**

Factorial designs  
Randomized Block designs  
Hybrid Experimental Designs: Solomon four group designs Mixed designs

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,  
EE: End Semester Examination

# INTERVIEWING AND COUNSELLING SKILLS

**Course Code: PSY4312**

**Credit Unit: 02**

## **Course Objective**

This course enables students to gather knowledge about interview techniques and cultivate Advanced Counselling Skills. It is further designed to equip students with skills to practice as a Counselling Psychologist.

## **Course Contents**

### **Module I: Counsellor as a person**

Personal characteristics: A composite model of human effectiveness, role of self awareness in counselling.

Role and Function of the Counsellor: Definition of Role, Generic roles, organizing roles & functions

### **Module II: Communication Skills-I**

Basic Communication Skills: Attending skills, Listening skills, Integrating Listening Skills.

Exploration Skills: Probe, Immediacy, Self-disclosure, Interpretation, Confrontation.

Action Skills: Information giving, Advice giving, Goal setting, Reinforcement, Directives

Self-disclosure by counsellor – when and how

Helping clients develop and work on preferred scenarios, negotiating homework.

Managing resistance and other obstacles in counselling

Skills of closure and terminating

### **Module III: Techniques of Helping and working with emotions**

*Self monitoring of Thought, Feeling and Action, Facilitating problem solving*

*Understanding and Improving Self talk, rules and thinking patterns.*

Behavioural Methods

### **Module IV: Counseling Applications**

Pediatric Counseling: Dynamics and process

Adolescent Counselling: Concept and Issues

Group Counselling: Concept & Process.

Academic Counselling: Definition and Scope.

Marital and Family Counselling: Concept & Process.

Addiction counseling: Principles & Prevention

Geriatric Counselling: Concept and Scope.

Rehabilitation Counseling, And Crisis Intervention & Trauma Counseling

### **Module V: Assessment in psychology**

The purpose of assessment in counselling, Assessment principles

Intelligence and general ability testing

Measuring Achievement and aptitude

Appraisal of personality

Spiritual assessment strategies

Applications of assessment: Treatment planning, evaluation and accountability.

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

## **FIELD PRACTICE-III**

**Course Code: PSY4309**

**Credit Units: 04**

### **Course Objective**

To cultivate the observation skills and techniques among students to gather and collect information from clients and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report :	: 20 marks

# SUMMER INTERNSHIP EVALUATION

Course Code: PSY4335

Credit Units: 06

## GUIDELINES FOR INTERNSHIP FILE AND INTERNSHIP REPORT

**(These guidelines will be useful for undertaking an internship programme during the summer or at any other time wherein the student/ researcher works full time with a company/organisation)**

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**).

### INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. **Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.**

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of continuous evaluation of the project.

The File will include five sections in the order described below.

1. The Title Page – An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. Table of Content – An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. Introduction – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. Main Body – Should include a brief summary/ executive summary of the Internship Project Report that the student has worked on, an analysis of the company/organization in which the student is working, a personal review of the student's management skills and how they have been developed through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.
5. Appendices – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

## INTERNSHIP REPORT

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (Incase a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report should be as per the standard layout prescribed by the organization wherein the student undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

- Title or Cover Page. The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.
- Acknowledgements Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.
- Abstract A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.
- Table of Contents Titles and subtitles are to correspond exactly with those in the text.
- Introduction Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.
- Materials and Methods This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.
- Results and Discussion Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form.

While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

### Conclusion(s) & Recommendations

A conclusion should be the final section in which the outcome of the work is mentioned briefly. Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

### **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

#### ➤ **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference. □

#### ➤ **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

### **The Layout Guidelines for the Internship File & Internship Report:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Assessment Scheme:**

<b>Continuous Evaluation:</b>	30%
(based on Internship File and the observations of the faculty guide/ supervisor)	

<b>Feedback from Company/ Organization:</b>	10%
---	-----

<b>Final Evaluation:</b>	
(Based on Internship Report, Viva/ Presentation)	60%

# APPLIED PSYCHOPHYSIOLOGY AND BIOFEEDBACK

**Course Code: PSY4313**

**Credit Units: 03**

## **Course Objectives**

To familiarize the students with various approaches, techniques and skills of counselling and psychotherapy in mental health problems To prepare the students to conduct different types of counselling and psychotherapies with different clinical and sub-clinical population To help them in identifying the processes of therapy and therapeutic change in the client and to enable them to conduct research in psychotherapy and report the findings

## **Course Contents**

### **Module I: Introduction**

Conceptual Issues, Client Variables in Counseling and Psychotherapy, Processes and Techniques of Psychotherapy

### **Module II: Modalities of Psychotherapy**

Gestalt Therapy; Experiential and Transpersonal Psychotherapies, Art Therapy, Play Therapy, Family Therapy, Yoga and Other Indegenious therapies, Research Designs, Issues and Evaluation.

### **Module- III: Applied Research**

Research in Psychotherapy: Experimental and Quasi-experimental designs. Ethical Issues in Psychotherapy

### **Module IV: Institutional visit**

Supervised Practicum: Students will be provided demonstrations in the laboratory setting and visit institutions providing specialized services and produce at least 2 case records. 10 Hrs.

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

# HUMAN FACTORS PSYCHOLOGY AND ERGONOMICS

**Course Code: PSY4314**

**Credit Units: 03**

## **Course Objective**

To gain an understanding of human strengths and limitations by studying human perception, cognition, memory, attention, biomechanics, and motor control/learning and also to gain an understanding of guidelines for displays, controls, anthropometry, office ergonomics, work physiology, and manual material handling.

## **Course contents**

### **Module I: Introduction to Human Factor Psychology**

Introduction to Human Factor Psychology and Ergonomics, Historical foundations, Biological basis of psychology and sensation, Human Information Processing

### **Module II: Visual system and Auditory and tactile systems**

Visual system: sensation vs. perception (depth perception, motion perception, and pattern recognition), color vision, visual search, perceptual speed, perceptual organization, visual display. Auditory and tactile systems: audition and touch, RSI (Repetitive Strain Injury), designing for hearing and touch, haptic/tactile interfaces.

### **Module III: Memory and attention**

Memory and attention: theories of attention, selective/divided attention, Multiple Resource Theory, reasoning, decision making, designing for memory.

### **Module IV: Performance measurement**

Performance measurement: Psychometric tests (Simple/Choice Reaction Time tests, digit/word span, other visuo-spatial and cognitive tests, etc), Fitts' Law, Hicks' Law, quantitative and qualitative methods. Workload management: mental workload, stress, fatigue and coping.

### **Module V: Ergonomics science in a glance**

Ergonomics science in a glance: introduction to anthropometry, work physiology and biomechanics.

## **Examination Scheme**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

# FORENSIC AND LEGAL PSYCHOLOGY

**Course Code: PSY4315**

**Credit Units: 03**

## Course Objectives

To introduce the students with knowledge and techniques of forensic psychology and further providing training in identification of criminals and forensic verification by using psychological methods

## Course Contents

### Module I: Introduction to forensic Psychology

Forensic Psychology: Introduction and overview, Historical Perspective, Fields of Forensic Psychology, Education and Training.

### Module II: Criminal and Investigative Psychology

Criminal and Investigative Psychology: Police Psychology, Mental and Aptitude testing, Personality assessment. Occupational stress in Police and investigation, Hostage taking Police interrogation and false confession Criminal of Psychological autopsy, Geographical profiling and mental manpower, Criminal Identification

### Module III: Violence and sexual offences

Psychological impacts of violence and sexual offences, Post-traumatic stress disorder, Family violence and victimization, Psychology of the bystanders 1

### Module IV: Correctional Psychology

Correctional Psychology: Legal rights of inmates: Rights to treatment, Right to refuse treatment, Inmates with mental disorders, Solitary confinement, Psychological assessment in correction, Psychological methods of correction, Treatment of sexual offenders, Community-based correction, Group homes, Family preservation model, Substance abuse model, Prevention of violence.

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

# COMMUNITY PSYCHOLOGY

**Course Code: PSY4316**

**Credit Units: 03**

## **Course Objectives**

To acquaint the students about the history & present status of community mental health services and also to develop a community based orientation towards mental health.

## **Course Contents**

### **Module I: Introduction to Community Psychology**

Historical and social contexts of community psychology: concept, evolution, scope and nature of community mental health.

### **Module II: Mental Health Models**

Models of mental health services: mental, social, organizational and ecological

### **Module III: Community mental health intervention and rehabilitation**

Community mental health intervention and community based rehabilitation (CBR): Issues, principles and programmes; evaluation of CBR; training the para-professional and non-professionals.

### **Module IV:**

Community mental health in India: Prospects, Issues & challenges, Legal issues in mental health, role of NGO, Govt. and hospitals in mental health in India

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,  
EE: End Semester Examination

# PSYCHOLOGICAL PRACTICE IN PERSONNEL AND HUMAN RESOURCE MANAGEMENT

**Course Code: PSY4317**

**Credit Units: 03**

## **Course Objective**

To enable students to understand the concepts of psychology as applied in various aspects of human resources in organizations and equip them to develop modules in accordance with the optimum use of the same.

## **Course Contents**

### **Module I: The Human Resource Management**

Structure of Human Resource Management, Role and Responsibilities of the Human Resource Manager; Human Resource Policies - Formulation and Essentials of Sound HR Policies

**Module II: Challenges of Personnel Management:** Individual and Competitiveness, balancing organizational demands and employees concerns-metaphors used to manage people.

### **Module III: Development of Human Resources**

Learning, Training, Training and Development, Evaluation and Performance Appraisal

### **Module IV: Meeting HR requirements**

Job Analysis and job Descriptions, diversity and empowered employees, career management and developing diverse talent pool, competency assessment- Perspective and Techniques

### **Module V: Employment Testing**

Testing abilities, Testing personality, Testing skills and achievements, Using and not using tests.

### **Module VI: Contemporary Issues in HR**

Strategic Human Resource Management, International Human Resource Management Creating High Performing HR Systems: Wellness Programs and Work Life Balance and Green HRM

## **Examination Scheme**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

# Syllabus - Fourth Semester

## REHABILITATION PSYCHOLOGY

**Course Code: PSY4404**

**Credit Units: 03**

### **Course Objective**

Objective of this course is to learn profession of Rehabilitation Psychology, Psychological Assessment of persons with disabilities, Psychological Interventions and dealing with families

### **Course Contents**

#### **Module I: Introduction**

Overview of the profession of Rehabilitation Psychology and practice, history, growth and scope, Role of Psychologist in Rehabilitation

#### **Module II: Psychological Assessment**

Psychological Assessment- Assessment of Cognition, aptitudes, psychopathology, work/vocational and daily functioning

#### **Module III: Health Behavior**

Health behavior: Theories of health behavior change, interventions strategies for individuals and families of disabled

Behaviour Modification and Cognitive Therapies in Rehabilitation

#### **Module IV: Families and disability**

Dealing with Families- Family's reactions to disabilities, coping styles, family counseling, Coordination with Multidisciplinary team

#### **Module V: Community Based Rehabilitation**

Community Based Rehabilitation – Goals of CBR, components of CBR, Role of Professionals, role of Community, Ethical Issues

### **Examination Scheme**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

# PSYCHOMETRICS

**Course Code: PSY4415**

**Credit Units: 02**

## **Course Objectives**

To acquaint students with advanced topics in psychometrics by supporting them in using the advanced psychometric models with psychometric data and also train students in writing report of the psychometric techniques

## **Course Contents**

### **Module I: Psychometrics**

Psychometrics: Concepts, Classical Test Theory and Practicing Psychometrics, Scaling, statistical concepts, Reliability: Conceptual basis and empirical estimation  
Validity: Conceptual basis and empirical estimation, factor analysis and test dimensionality  
Classical test theory: assumptions, ramification and practice  
Threats to psychometric quality: Test bias, response bias. Special problems in CCT

### **Module II: Modern test Theory and Practice**

Item Response Theory (IRT): basic concepts, models and estimations; Item and Item information; Models for Nominal and graded responses, Nonparametric and Bayesian approach  
Other IRT models and applications to non standard testing conditions

### **Module III: Generalizability Theory**

Concepts, Generalizability and variance component G studies and D studies  
Conducting and Interpreting Generalizability: One Facet design, two facet design, other designs.

### **Module IV: Applications**

Psychometric Assessment in Occupational Settings.  
Psychometric Clinical Assessment  
Psychometrics in Educational Settings  
Developing publication quality instrument and manual

### **Module V: Presentations**

Multidimensional scaling, Profile analysis, Discriminant analysis, Software applications: R in particular; Dominance (preference) scaling, Categorical modeling, Binary classifications; Non-geometric and non Euclidian model, Confirmatory Factor analysis

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

## PRACTICUM-IV

**Course Code: PSY4412**

**Credit Units: 03**

### Course Objective

To give practical experience to the students in administering and scoring psychological tests and interpreting the scores Also to acquaint the students with the basic procedure and design of psychology experiments Course will also encourage and guide the students to undertake a small-scale research project to apply the general concepts of psychology through experimentation and testing

**Note: Total 5practicals will be conducted in the fourth semester among the list of following practicals**

### Course Content

1	Personality
2	Intelligence
3	Attention
4	Learning
5	Intelligence
6	Health

### Examination Scheme

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

### Text & References

## **FIELD PRACTICE-IV**

**Course Code: PSY4413**

**Credit Units: 04**

### **Course Objective**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

# DISSERTATION

**Course Code: PSY4437**

**Credit Units: 06**

## GUIDELINES FOR DISSERTATION

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Selecting the Dissertation Topic

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

### Planning the Dissertation

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

### The Dissertation plan or outline

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.

- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

### **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct quotation and what is your paraphrase.

### **Dissertation format**

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**.
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required:

Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

### **The Layout Guidelines for the Dissertation:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

#### **Assessment Scheme:**

**Continuous Evaluation:** 40%  
 (Based on Abstract, Regularity,  
 Adherence to initial plan, Records etc.)

**Final Evaluation:** Based on, 60%  
 Contents & Layout of the Report, 25  
 Conceptual Framework, 10  
 Objectives & Methodology and 10  
 Implications & Conclusions 15

# EMPLOYEE COUNSELLING AND EMPOWERMENT

**Course Code: PSY4409**

**Credit Units: 3**

## **Course Objective**

To enable students to understand the diversity in organizations and equip them with skills to handle, manage and adjust to a culturally and socially diverse work environment.

## **Course Contents**

### **Module I: Mentoring Career**

Improving various Professionally & Psychologically Skills, Performance & Capacity Development, Career Planning, Setting Goals, Interview Techniques, and Negotiation Skills

### **Module II: Work Life Counseling**

Managing work life: key to perform well; remain stress free, happy & successful at work.

Dealing with Boss, Colleagues & Juniors

Stress Management, Time Management, Crisis Management

Enhancing Performance & Will Power

Work-Life Balance, Motivation & Performance

Meeting Challenges of Workplace Harassment, Discrimination

### **Module III: Personal Life Counseling**

#### **Personality Development and Behavioural Management**

Understanding, Improving & Balancing Habits and Behavior

Identifying Power within self

Developing EQ & Emotional Intelligence, Developing Positive Psychology

Utilizing Multiple Intelligence, Confidence Building

Handling & Eradicating Stress & Phobia, Handling Frustration & Unhappiness

Handling Ego/ Self Respect, Handling & eradicating Depression & Loneliness

### **Module IV: Introduction to Employee Counselling**

Meaning, Nature & Scope

Types and functions of Employee Counselling

Coaching, Mentoring and Counselling

### **Module V: Differences and power**

Concepts of prejudice, discrimination and oppression

Cultural and ethnicity as dimensions of differences

Race and racism in organizations

Gender and sexism in organization

Sexual orientation, physical ability, age, social class and other differences in workplace

### **Module VI: Conflict and Negotiation viz Employee Counselling**

Concept of Conflict and Negotiation

Importance and relevance of Conflict and Negotiation in Employee Counselling

### **Module VII: Employee Empowerment and leadership**

Change Management, Employee Involvement for Effective Change Management, Leadership Management, Motivation / Recognition / Retention.

Essentials of Leadership Quality

Self-leadership leads to Empowerment

Relevance of Empowerment in Employee Counselling

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

# PSYCHOLOGY OF SELLING, MARKETING AND ADVERTISING

**Course Code: PSY4416**

**Credit Units: 03**

## **Course Objectives**

To impart the basic knowledge of main psychological theories that is relevant within the field of market psychology among students. How does psychology apply to marketing? Clearly, psychology and marketing are closely related. As a marketing strategist, you need be looking less at what your product has to offer per se and more to the psychology of the consumers to whom you want to sell it.

## **Course contents**

### **Module I: Introduction**

Understanding selling, marketing, advertising Psychology, Nature, scope and need , marketing, advertising Psychology of application of psychology principles in selling, marketing and advertising, The Monkey Business Illusion

### **Module II: Cognitive Skills: Disciplinary & Cultural Knowledge**

Field of psychology complements the field of marketing Identify, main psychological theories and consumer behaviour, Judgment heuristics, rules of perception and marketing psychology, Role of personality, emotions, and motivation in consumer behaviour, Host-city manifestations of the influence of psychology on local consumer

### **Module III: Analytical Skills: Critical Thinking in Oral & Written Work**

Marketing techniques in psychology, Importance of emotions in advertising campaigns, Work of locus of control in your own self-control

### **Module IV: Affective Skills: Attitudinal & Intrapersonal**

Develop and convey empathy for the host peoples' attitudes towards consumption, Curiosity and Interface between marketing and psychology, Respond to psychology of marketing on critical-analytical levels and develop an open mind regarding local consumer habits

### **Module V: Behavioral Skills: Cultural Engagement & Interpersonal**

Knowledge of psychology to become a more aware and self-directed consumer, Use course-related criteria when purchasing you consumer good in the host country, Knowledge of marketing psychology to engage positively with host people & culture

# PSYCHOLOGY OF CRIMINAL BEHAVIOUR AND CRIMINAL PROFILING

**Course Code: PSY4417**

**Credit Units: 03**

## **Course Objectives**

To familiarize students with the emerging importance of psychology of criminal behaviour and criminal profiling and also to build awareness regarding the role of the psychologist in Forensic evaluations.

## **Course Contents**

### **Module I: Bases of criminal behavior**

Biological and psychological basis of criminal behavior  
Theoretical models in Forensic psychology  
Place of psychology in forensic science  
Ethical principles and professional competencies

### **Module II: Forensic assessment**

Empirical profiling of psychopathy  
Detection of Malingering and Deception  
Use of Brain Electrical Oscillation Signature (BEOS)  
Psychology and law : custody issues, testimony, documentation

### **Module III: Civil forensic procedures**

Eye witness memory  
Jury selection  
Child custody  
Evaluation of child trauma

### **Module IV: Criminal Forensic procedures**

Forensic evaluation of delinquency and criminal responsibility  
Child sexual abuse evaluations  
Violence risk assessment  
Competence to stand trial

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,  
EE: End Semester Examination

# OCCUPATIONAL HEALTH PSYCHOLOGY

**Course Code: PSY4418**

**Credit Units: 03**

## **Course Objectives**

To develop a general orientation towards abnormal behavior and disease process through various models of psychopathology. To understand causes of pathological behavior and its psychodiagnostic assessment. To develop skills for diagnosis and classification of mental disorders.

## **Course Contents**

### **Module I: Stress and health**

Stress and health: Occupational stress;  
Daily hassles and their impact ;Lifestyle issues, nutrition, substance use  
Positive psychology approaches, well being

### **Module II: Core concepts in Health Psychology**

Psycho-neuro-immunology  
Psychosocial support  
Personality factors in illness and health  
Health and illness perceptions

### **Module III : Psychology in health care settings**

GAS, cognitive appraisal and diathesis stress model  
Behavior change and wellness  
Primary prevention  
Training health care experts in communication skills

### **Module IV: Community and social factors impacting health and well being**

Community health  
Health and social relationships  
Dispositional optimism and health  
Lifestyles, social change and impact on health

### **Module V: Psychodiagnostics and Nonpharmacological management**

Psychodiagnosis of major Mental Disorders of the Adults and their treatment: Stress and Anxiety Disorders, and Schizophrenia, Affective Disorders, Psychosomatic Disorders, Personality Disorders and Substance abuse.

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

# GUIDANCE AND COUNSELLING

**Course Code: PSY4419**

**Credit Units: 03**

## **Course Objectives**

This course enables students to gather knowledge about techniques of guidance and Counselling. It is further designed to equip students to practice these learned skills in their day to day life.

## **Module I: Introduction**

Concept of Guidance and Counseling Meaning, Nature, Goals and Principles; Need and Relevance Emergence and Growth of Guidance and Counseling Psychology; Guidance and counseling Movement in India Ethical and legal considerations

## **Module II: Organization of Programme**

Organizing a Guidance Programme Principles of organizing an effective guidance program; Guidance activities at Elementary, Secondary and Senior Secondary level Meaning & Importance of Counseling Skills & Strategies; Stages of Counseling

## **Module III: Educational Guidance**

Educational Guidance Nature, Pupil Personnel work, Pupil Appraisal information, School Curriculum and Guidance. Vocational Guidance Nature, Study of Occupations- Collecting and Disseminating occupational information; Theories of occupation choice Role of counselor in education and vocational guidance

## **Module IV: Counseling skills**

Developing Empathy, rapport establishment, respect and genuineness Skills of Counselor Selection, implementation, evaluation, Observation, listening, silence, attending behaviour, use of questions & termination of counselling.

## **Module V: Approaches of Counseling**

Approaches of Counseling: Directive, Non-directive and Eclectic. Guidance Personnel in organizing Guidance Programmes, Theories of multicultural counseling: identity development, and social justice, Theories and models of individual, cultural, couple, family, and community resilience.

## **Examination Scheme**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

**FLEXILEARN**  
-Freedom to design your degree

## **Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

# Master of Social Work (MSW)

## Syllabus - First Semester

### **SOCIAL WORK: HISTORY, IDEOLOGIES, PERSPECTIVES AND CONTEMPORARY CONCERNS**

**Course Code: SCW4101**

**Credit Units: 03**

#### **Course Objective:**

- To understand the history of evolution of social work profession, both in India and the West.
- To develop insights into the origin and development of ideologies, approaches to social change. To understand rationale, goals, ideals and ethics for social change.
- To understand the perceptions of people and social problems, the status of benefactors and their motives.
- To develop skills to understand contemporary reality in its historical context.
- To understand self as a part of own environment and explore own assumptions, ideals, values to develop sensitivity to marginalization of vulnerable groups.

#### **Course Contents:**

##### **Module I: History of Social Work in India and Abroad**

Charity, Philanthropy

Social Situations: Poverty, Problems of Immigrants, Orphanhood, Squalor, War Victims

Social Reform Movements

Remedial Social work

##### **Module II: Ideologies of Social Work Practice in India**

Advent of Missionary (Serampore Missionaries-1785 onwards); Gandhian Ideology and Sarvodaya Movement; Ambedkar Thoughts

Marxist Perspectives, Feminist Perspective; Social Movements and Development Perspectives;

Dalit Movements, Tribal Movements, Peasants Movements, Working Class Movements, Naxalite Movements, Women's Movements, Environment and Ecological Movements, Movements of Project Affected Persons

Contemporary Ideologies for Social Change: Neoliberalism and Globalisation – Post Modernism, Multiculturalism, Ideology of Non-Governmental Organizations.

Role of state in providing social welfare services

##### **Module III: Evolution of Social Work**

The basic principles and values of professional social work

Alignment of Scientific and Humanitarian Motives for Promoting Social Welfare

Evolution of professional social work in UK and USA

Evolution of Professional Social work in India

Marathi Mission Nagpada Neighbourhood House, Mumbai and Sir Dorabji Graduate School of Social Work, Mumbai

##### **Module IV: Development and Social Analysis**

Social Ideals of the Indian Constitution: Fundamental Rights; Human Rights

Socio-economic order and comparative economic system; Features, merits and demerits of Capitalism, Socialism and Mixed economy; Marxian political economy

Social Analysis: Significance; Tools and Methods; A Rights based Approach

A brief analysis of and Inter-linkages among socioeconomic, political and cultural systems in the Indian context

##### **Module V: Dynamics of Development and Growth**

Theories of Economic Development, Globalization and its impact on Developing Countries; Under-development and its causes

Contemporary Development Dynamics: A historical overview with reference to developing countries of Asia, Africa and Latin America, North-south relations, world trades, Multinational corporations and their influences on Third World economics.

Trends and counter trends in the global, political, economic, military, ecological and socio-cultural spheres.

Stages of growth theory: Structural internationalist theory, Privatization, liberalization and structural adjustment programmes - Role of international financial institutions.

Contemporary Concerns: Gender Issues: Gender discrimination; Gender based violence,

Issues of Vulnerable Groups: Street and Working Children; Persons with Disability; SC, ST, OBC and Minorities, HIV/ AIDS Infected and Affected,

Environmental Issues: Climate Change; Global Warming; Disasters, Social Work response to social problems

## Examination Scheme

# BASICS OF SOCIAL WORK

Course Code: SCW4102

Credit Units: 03

## Course Objective:

- To understand the concept of social work.
- To get acquainted with the approaches and ethics of social work.
- To understand the areas of social work.

## Course Contents:

### Module I: Concepts in Social Work and Social Work Practice

Objectives and Functions of Social Work; Methods of Social Work (Primary and Secondary methods of social work); Social Service; Social Services

Social Exclusion (marginalization, exploitation, oppression); Empowerment

Social Development, Social Change, Social Action, Social Activism

Human rights and Human Rights Perspective

### Module II: Approaches

The Concept of Social Welfare; Welfare approach,

Remedial and Therapeutic Approach,

Social Development Approach

Conflict Oriented Approach

### Module III: The Profession of Social Work

The Basic Values and Principles of Professional Social Work

Religious, Political and Utilitarian Values

Code of professional ethic

Professional status of Social work in India

### Module IV: Fields of Social Work

Family & Child Welfare;

Women Centric Practice

Medical and Psychiatric Social Work

Criminology and Correctional Work

### Module V: HRD and HRM

Social Welfare Administration

Urban and Rural Community Development;

Dalit and Tribal Community Organization

Livelihoods and Social Entrepreneurship

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

# WORK WITH INDIVIDUALS AND FAMILIES: SOCIAL CASE WORK

Course Code: SCW4103

Credit Units: 03

## Course Objective:

- To be introduced to the method of working with individuals
- To understand the various contexts and the dimensions of issues and problems that individuals face and critically analyze them
- To be exposed to the approaches of social work practice with individuals
- To acquire the skills and techniques of working with individuals
- To comprehend the diversity of practice settings

## Course Contents:

### Module I: Social Casework as a Method of Social Work

Concept and Definition of Casework; Adjustment and maladjustment; Historical development of Social Casework; Influence of psychoanalysis on casework.

Principles of Social Casework Practice: Individualization, Acceptance, Non-judgmental Attitude, Participation, Relationship, Purposeful expression of feelings, Controlled emotional involvement, Client Self Determination, and Confidentiality

Components of Casework: Person- client, significant others and collaterals; Problem- need, impaired social functioning; Place- agency, objectives, functions, policies and resources; Process- Study, assessment, intervention, evaluation, follow-up, termination.

Skills and Techniques of working with individuals and families: Supportive, resource enhancement and Counselling, Knowledge of resources (networking)

Essential qualities in the caseworker: empathy, non-possessive warmth, genuineness.

Self as a professional: Conflicts and dilemmas in working with individuals and families.

### Module II: Approaches and Models to understand clients and their contexts

Psycho Social Diagnostic approach (Richmond), Supportive and Modificatory Approach (Hamilton), Classified Treatment method (Florence Hollies)

Psychoanalytical, Functional approach

Problem solving approach (Perlman), Crisis intervention (Rappaport), Competence based approach (Elleen Grabrill), Empowerment approach

Family intervention, Person-in-Environment Model

Transactional Analysis, Holistic approach, Eclectic approach.

### Module III: Case work tools

Listening, Communication Skills, Rapport Building.

Interview, Observation, Home visit, collateral contacts, referrals

Records: Nature, purpose and principles of recording. Types of Recording: narrative, process, problem oriented record keeping. Case history taking Use of case work records as tool of intervention.

Subjective –objective assessment plan (SOAP). Modeling, role-playing and confrontation

Case presentation as tool of professional development. Developing self awareness, JoHari window, dealing with stress and burnout

### Module IV: Casework Process

Phase 1 – Exploration of person in environment

Phase 2 - Multidimensional assessment and planning, multidimensional intervention

Phase 3 – Helping: implementing intervention and goal attainment

Phase 4 – Termination and evaluation, follow up

Case worker - client Relationship; characteristics of professional relationship: transference, counter transference and resistance; sustaining the relationship; obstacles in client - worker relationship.

### Module V: Application of Method

Types of problems faced by Individuals and families; individual differences and needs; Primary and secondary settings

Application of methods in family, women, and child welfare settings

Marriage Counselling centers

School settings

Medical and psychiatric settings  
Correctional institutions and industry

### Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,  
EE: End Semester Examination

# WORK WITH GROUPS: SOCIAL GROUP WORK

Course Code: SCW4104

Credit Units: 03

## Course Objective:

- To understand of group work as a method of professional social work
- To learn theoretical approaches that inform group work practice.
- To gain insight into dimensions of group processes and group work practice
- To develop competencies for working with groups in diverse settings.

## Course Contents:

### Module I: Social groups and Group Work

Definition, Characteristics, and Importance Classification of Groups

Cooley, Sumner, MacIver & Page, Tosel and Rivas Theories of Group formation

Social Group Work – Concept, Historical development of Group Work, Values and Skills

Principles and Purpose of Group work

### Module II: Theoretical approaches of group work practice

Psychoanalytic, Learning, Field, Social Exchange, Systems theories.

Stages of Group Development – Tuckman, Klien, Garland, Jones & Kolodny.

Models of social group work – Social goals, Remedial, Reciprocal models.

Programme development process, Programme Media.

### Module III: Basic Group Processes

Sub-group, Group conflict, Group decision making,

Leadership in groups.

Group dynamics – Concept, and Areas – Communication and Interaction Patterns, Group Cohesion,

Social Control Dynamics and Group Culture.

### Module IV: Stages or Phases of Group work

Pre group formation, Beginning phase, Middle/Working phase and Termination phase, Follow up,

Facilitation Skills and Techniques used in these Phases.

### Module V: Group Work Practice in diverse settings

Disaster victims, Substance abusers, Alcohol Anonymous and elderly care – Role of group worker –

Group psychotherapy, Group work Recording, Monitoring and Evaluation.

## Examination Scheme

# RESEARCH METHODS IN SOCIAL WORK: QUANTITATIVE APPROACH

Course Code: SCW4105

Credit Units: 03

## Course Objective:

- To develop an understanding about the scientific approach to human inquiry.
- To develop an appreciation of the value and approach in social work research in addressing problems in the field of professional practice.
- To develop attitudes and skills appropriate for social work research.
- To acquire the skills for data analyses and research writing

## Course Contents:

### Module I: Introduction

Meaning, purpose and Dimensions of Research, Paradigms of research: Quantitative and Qualitative Approaches; Types of variables; Levels of measurement

The main preoccupations of quantitative researchers: Measurement, Causality, Generalization, Replication.

Distinction between social research and social work research

Introduction to sampling, sampling error, types of probability sample, sample size, types of non-probability sampling

### Module II: Analytic Techniques

Univariate analysis: Frequency tables, measures of central tendency, measures of dispersion

Bivariate analysis: Pearson's r, Spearman's rho

Inferential Analyses: measures of association, tests of significance (chi square, t-test,) analysis of variance (ANOVA)

Multivariate analysis: Regression; Factorial Analysis; Path Analysis

### Module III: Social Work Research

Use of research in social work; Intervention research and practice based research, Difference between social science research and social work research.

Types of social work research: need assessment studies, situational analysis, monitoring and evaluation, impact assessment, policy research

Steps in Social Work Research: identification of problem; need assessment; selection of research design; baseline study; intervention; assessment of intervention effects/impact; data editing and classification, data processing and analysis, report writing.

### Module IV: Research Designs in Social Work Research

Scientific Social Surveys and field studies

Experimental study design, logic of experimentation, causation and control, randomization and matching internal validity

Types of experimental design (pre-experiment, true experiment, quasi experiment, external validity)

Other research approaches supportive to social work research: Action research; Participatory research

### Module V: Scaling Techniques and Psychometric worth of data

Objective tests and scales; Difference between test, scale, questionnaire and inventory,

Scaling Techniques: Likert, Thurstone, Guttman.

Reliability: The concepts of variance in and stability and consistency of measures; the maximum principle; Internal reliability; Inter-observer consistency. Types of reliability

Validity: Concept; Relationship between reliability and validity; Types of validity

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

# FIELD WORK PRACTICUM-I

**Course Code: SCW4107**

**Credit Units: 04**

## **Course Objective:**

The emphasis is on-learning skills which revolve around specific tasks where cause-effect relationships are understood, where the persons have problems but they are more victims of their life circumstances rather than of pathology for which great knowledge of psychological and social dynamics would be required and lower order of skills of intervention is required to be utilized. The processes dealt with at the individual, group or community is specific. Show dynamics but do not require unusual skills of intervention. Administrative tasks are also specific, e.g. planning and programming around a specific service.

The specific objectives of field-work in the first semester may include:

Development of the knowledge of:

- (a) Socio-economic background and the living condition of tire vulnerable groups and the problems confronting them.
- (b) Problem-solving techniques utilized in the specific area of work of the organization where student is placed.
- (e) The use of simple research procedures and maintenance of scientific data to assess problems/needs/agency.

Development of skills in:

- (a) Work with individuals, families, groups and communities and seeing the need for an integrated approach to problem solving.
- (b) Selecting and utilization of community resources.
- (c) Work as a member of a team with other professional anti own discipline to, plan, organise and implement projects, programmes with emphasis cm the use of the process in problem-assessment and problem solving.

Development of professional attitudes, conducive to work with individual families group and communities, leading gradually to an awareness of self as a professional person.

Efforts will be made to work out objectives in each semester for every student in field practicum according to the nature and services of the agency and his performance will be evaluated accordingly.

## **Methodology**

Each student will engage themselves in interaction and observation of social phenomenon and processes in a subject/ field of their choice. Student will then present their findings in the form of a paper for seminar discussions. Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

## **Examination Scheme:**

Field/Seminar Report :	40 marks
Viva-Voce :	30 marks
Internal Faculty and Interaction :	10 marks
Presentation/Daily Diary Report :	20 marks

# **SOCIAL WORK CAMP**

**Course Code: SCW4108**

**Credit Units: 01**

## **Course Objective:**

Urban/rural/tribal camps with duration of 7 to 10 days - provide opportunities to experience rural life, analyze rural dynamics, and observe the functioning of local self government and voluntary organizations. This experience aids peer participation in planning for activities for own group and those for local people. It also helps develop skills to carry out, evaluate, and report the experience.

## **Methodology**

Student will then present their findings in the form of a paper for seminar discussions. Students will present their practical observations, as a report with analysis and suggestions.

## **Examination Scheme:**

Field/Seminar Report:	40 marks
Viva-Voce:	30 marks
Internal Faculty and Interaction:	10 marks
Presentation/Daily Diary Report:	20 marks

# Syllabus - Second Semester

## SOCIAL POLICY AND SOCIAL WELFARE ADMINISTRATION

Course Code: SCW4201

Credit Units: 03

### Course Objective:

- To gain knowledge of policy analysis and the policy formulation process.
- To acquire skills in critical analysis of social policies and development plans.
- To develop an understanding of social policy in the perspective of national goals as stated in the Constitution, particularly with reference to Fundamental Rights and the Directive Principles of State Policy.
- To critically understand the concept, content and process of social development.
- To develop the capacity to identify linkages among social needs, problems, development issues and policies.
- To locate strategies and skills necessary for social development and reinforce values of social justice, gender justice and equality.

### Course Contents:

#### Module I: Social Policy and Constitution

Concept of social policy, sectoral policies and social services. Relationship between social policy and social development. Values underlying social policy and planning based on the Constitutional provisions (i.e. the Directive Principles of State Policy and Fundamental Rights) and the Human Rights. Different models of social policy and their applicability to the Indian situation.

#### Module II: Sectoral Social Policies in India

Evolution of social policy in India in a historical perspective.

Implementation of different sectoral policies related to education, health, social welfare, women, children, welfare of backward classes, social security, housing, youth, population and family welfare, environment and ecology, urban, rural and tribal development, and poverty alleviation.

#### Module III: Social Planning

Concept and scope of social planning;

Goals of social development. The popular restricted view of planning for social services;

The wider view as inclusive of all sectoral planning to achieve social goals.

Indian planning in a historical perspective; The Constitutional position of planning in India.

The legal status of the Planning Commission; Coordination between Centre and State;

Need for decentralization; Panchayath Raj; People participation.

#### Module IV: Social Development

Concept of social development; Current debates about development;

Approaches to development; Social Development Index and Social Progress Index; Social capital;

Social development, community and reciprocity; Sustainable and equal society; Importance and challenges of a developing society;

Social development strategy of empowering people by transforming institutions

#### Module V: Procedures in registering an organization and its administrative processes

Societies Registration Act, 1860, Indian Trust Act, 1882, The Companies Act, 1956. Administrative Structure – Memorandum of Association, Bye laws, Constitution, Deed, Functions and responsibilities of governing board, committees and office bearers. Administrative structure of social welfare at the Central, State and Local level – Programmes of Central Social Welfare Board and State Social Welfare Boards.

Administrative Processes: Planning, Organizing, Staffing, Directing, Coordinating, Reporting and Budgeting (POSDCORB) – Mobilization of financial resources - Grants in Aid – Foreign Contribution Regulation Act, 1976 – Exemption from Income tax – Administrative skills – Writing reports, letters and minutes of meetings – Project formulation, implementation, monitoring and evaluation.

# SOCIAL WORK WITH COMMUNITIES

Course Code: SCW4202

Credit Units: 03

## Course Objective:

- To gain knowledge about the primary method of social work practice with communities.
- To understand the techniques and approaches of social work practice with communities.
- To acquire the skill of working with communities.

## Course Contents:

### Module I: Community organization

History, Concept, Principles, Assumptions and Objectives

Community Organization and Community Development

Process of community organization: Study and Survey, Analysis, Assessment, Discussion, Organization, Action, Reflection, Modification and Continuation.

### Module II: Models of community organization

Locality development, social planning, social action

Skills in community organization: Communication, Training, Consultation, Public relations, resource mobilization, liaisoning.

Approaches to community organization; General content, Specific content and Process objective.

### Module III: Methods of community organization

Awareness creation, Planning and Organizing, Education, Networking, Participation,

Leadership; Community organization with vulnerable communities; Migrants, Refugees,

Slum dwellers and transgender.

### Module IV: Social Action in Community Organization

Concept, Purpose, Strategies and Tactics in Social Action

Social Action as a method of social work

Approaches to social action; Paulo Friere, Saul Alinsky, Mahatma Gandhi and Ambedkar.

### Module V: Concept of advocacy as a tool

Strategy for advocacy: Campaigning, Lobbying, Use of media and public opinion building in advocacy

Coalition and Network building, linking up protest movement with development work.

# PROJECT FORMULATION AND MANAGEMENT

Course Code: SCW4203

Credit Units: 02

## Objectives

- To provide background information and tools to guide project identification and formulation.
- To demonstrate how project elements can be clearly specified and risks assessed and reduced.
- To set out how to link logical project design to work planning and budgeting.

## Course Contents:

### Module-I: Project Identification, Formulation and Design

Project – why, what – difference between project and program, Characteristics of project, Project Family tree, Classification of Project,

Project selection process, Feasibility and viability Analysis (technical, social, environmental and financial), Stakeholder Analysis, Logical framework analysis, Analysis of factors affecting sustainability

Project formulation and steps in formulation, Implementation planning, work plans, project design and network analysis, cost benefit analysis

### Module-II: Project Management

Project Management (time, cost, quality, human resource, scope, project communication, risk management)

Project life cycle, Phases of project management, Project reporting, Waterfall versus cyclical project management

Tools and techniques for project management

Issues and challenges in project management: negotiation, conflict resolution, liaisoning and networking, management of resources

Project closure activities: Liabilities clearance, data backup, handover and disposal

### Module-III: Budgeting and Financial Management

Participatory Budgeting

Gender Responsive Budgeting

Good Financial Practices

FDR, UC & SOE Preparation

Statutory Compliance with 12A, 80G, FCRA, TDS, etc.

### Module-IV: Monitoring and Evaluation

Performance framework, Deliverables, Indicators, Data Management, Log Frame

Project Evaluation (ex-post & ex-ante): Tools for evaluation: Case studies of development project,

Documentation of practices (success and failure)

Quality Control(Audit & Data verification), RDQA

### Module-V: Documentation and Report writing

Project Appraisal (Social, technical, financial)

Project report (Technical & Financial)

Impact Analysis (Social, technical environmental and financial)

Project Closure

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,

EE: End Semester Examination

# COMMUNITY ORGANIZATION AND SOCIAL ACTION

Course Code: SCW4204

Credit Units: 03

## Course Objective:

To understand theory and practice of social work in community

## Course Contents:

### Module I: Community Work and Social Action

Definition of Community, Types of Communities. Difference between Rural and Urban Communities, Power Structure in the Community, Community Leaderships  
Types of Community Leaders, Role of Community leaders in Community Development.

### Module II: Strategies of Community Work and Social Action

Approaches to Community Work: Neighborhood Development, Systems and Radical, Politics and Community Work, Role of Community Organiser and Social Activist, Contemporary Social Action Interventions in India

### Module III: Community Organization

Definition, Objectives, Community Organization as a Method of Social Work  
Various approaches to Community Organization; General content approach, Specific content approach, Process content approach.  
Community organization and Development

### Module IV: Methods of Community Organization

Fact Finding, Planning, Group Decision Making, Conference and Committee Practice, Co-operative action negotiation, consultation, Methods of Conflict Resolutions, Resource Mobilization, Administration, Recording Evaluation, Skill required for Community Organization.

### Module V: Application of Community Organization Methods

Application in Slums, Rural areas, during Flood, Famine and War. Community Organization for prompting Public Health and Family Welfare.

## Examination Scheme

# RESEARCH METHODS IN SOCIAL WORK: QUALITATIVE APPROACH

**Course Code: SCW4205**

**Credit Units: 03**

## **Course Objective:**

- To understand various styles of interpretation of qualitative data.
- To analyze the relative appropriateness of different analysis approaches for a particular qualitative study.
- To apply one or more analytic approaches to data they have been collected and write a report.
- To understand ethical issues for qualitative research.
- To manage qualitative data files effectively to ensure ease of use and participant confidentiality.
- To use the basic and intermediate functions of a computer software program for coding of textual data.

## **Course Contents:**

### **Module I: Introduction**

Differences between Qualitative and Quantitative research

Nature and traditions of qualitative research: Naturalism, Ethnomethodology, Emotionalism, Post-Modernism,

Deductive and Inductive approaches to data collection

Paradigmatic issues in Qualitative research

### **Module II: Qualitative Validity**

Reliability and Validity: Types and procedures

Criteria for evaluating the worth of qualitative research: Credibility, Transferability, Dependability, Conformability, Triangulation

Collaborative Enquiry

### **Module III: Theoretical Background for Qualitative Research**

Phenomenology: Realistic and Constitutive Phenomenology, Existential analysis,

Constructivism: Social constructivism and Psychological Constructivism

Metaphysics: Existentialism

Grounded theory: Goals and Perspectives, Methods: Axial coding and selective coding

### **Module IV: Methods of Data Collection**

Interview: Purposes; Stages; Types: Structured, Semi-structured and Unstructured; Advantages and disadvantages associated with each; Interviewing Skills;

Focus group: Uses, recording and Transcription, size of groups, Limitations

Discourse analysis; Narrative analysis; Rhetorical analysis; Conversational analysis

Ethnography and participant Observation: Forms; Logistics; Advantages and disadvantages; Confidentiality; Taking and expanding field notes; Documenting; Being an effective participant observer

Documents as sources of data: Personal, Public, Organizational, Mass-Media, visual and virtual

Qualitative content analysis; mixed methods analysis

### **Module V: Use of Computers and Software**

Qualitative Data Analysis (QDA) Softwares: Computer Assisted Qualitative Data Analysis Software (CAQDAS); MAXQDA

Defining Variables; Developing coding systems; Tabulating Data

Quantification in qualitative research: Thematic, Qausi-Quantification in qualitative research

Data Analysis and knowledge management

## Examination Scheme

# SKILL BASED PROJECT

Course Code: SCW4206

Credit Units: 01

## Course Objective:

The aim of the skill based project is to help learners acquire specific skills to deal with situations encountered during practice and acquire skills for intervention. It provides learner with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

These may be for problems/ concerns, issues or situations like work with alcoholics, HIV/AIDS affected persons, adolescents for life skills development, youth for leadership development and couples for marital relationship and enrichment work with elderly. The skill based project is primarily to enhance skills/ develop new skills for practice in specific situation, specific problems and issues.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/ National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Findings -- 25 marks

Chapter 4: Conclusion & Recommendations -- 10 marks

Chapter 5: Bibliography -- 05 marks

## Project Report Power Point Presentation & Viva

75 marks 25 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1- Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2- Acknowledgement:** Various organizations and individuals who might have provided assistance /cooperation during the process of carrying out the study.

**3-Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4- Body of the Report:** The body of the report should have these four logical divisions

a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5- Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6- Annexures:** Questionnaires (if any) relevant reports etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

### **The Steps of a Project Report**

**Step I:** Selection of the topic for the project by taking following points into consideration:  
Suitability of the topic.

Relevance of the topic.

Time available at the disposal.

Feasibility of data collection within the given time limit.

Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario.

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

## FIELD WORK PRACTICUM-II

Course Code: SCW4207

Credit Units: 04

### Course Objective:

The emphasis is on-learning skills which revolve around specific tasks where cause-effect relationships are understood, where the persons have problems but they are more victims of their life circumstances rather than of pathology for which great knowledge of psychological and social dynamics would be required and lower order of skills of intervention is required to be utilized. The processes dealt with at the individual, group or community is specific. Show dynamics but do not require unusual skills of intervention. Administrative tasks are also specific, e.g. planning and programming around a specific service.

The specific objectives of field-work in the second semester may include:

1. Development of the knowledge of:
  - (a) Socio-economic background and the living condition of tire vulnerable groups and the problems confronting them.
  - (b) Problem-solving techniques utilized in the specific area of work of the organization where student is placed.
  - (e) The use of simple research procedures and maintenance of scientific data to assess problems/needs/agency.
2. Development of skills in :
  - (a) Work with individuals, families, groups and communities and seeing the need for an integrated approach to problem solving.
  - (b) Selecting and utilization of community resources.
  - (c) Work as a member of a team with other professional anti own discipline to, plan, organise and implement projects, programmes with emphasis cm the use of the process in problem-assessment and problem solving.
3. Development of professional attitudes, conducive to work with individual families group and communities, leading gradually to an awareness of self as a professional person.  
Efforts will be made to work out objectives in each semester for every student in field practicum according to the nature and services of the agency and his performance will be evaluated accordingly.

### Methodology

Each student will engage themselves in interaction and observation of social phenomenon and processes in a subject/ field of their choice. Student will then present their findings in the form of a paper for seminar discussions. Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### Examination Scheme:

Field/Seminar Report :	40 marks
Viva-Voce :	30 marks
Internal Faculty and Interaction :	10 marks
Presentation/Daily Diary Report :	20 marks

# Syllabus - Third Semester

## SOCIAL JUSTICE AND EMPOWERMENT

Course Code: SCW4302

Credit Units: 03

### Course Objective:

- To understand the concept of social justice and acquire information on the legal rights of people.
- To develop an understanding of the legal system and get acquainted with the process of the legal system with emphasis on functioning in India.
- To understand the role of the police, prosecution, judiciary and correction.
- To gain insight into the problems faced by the people belonging to different strata of society, in interacting with this system.
- To develop an understanding of the processes and problems of public interest litigation and legal aid to marginalized.

### Course Contents:

#### Module I: Social Justice

Meaning and Concept; Social legislation: Definitions and concept. Social justice as an essential basis of social legislations; Social legislations in a welfare state with special reference to India.

Rights: Concept and definitions; Types of Rights; Rights of women and children; Rights of Scheduled Castes and Scheduled Tribes; Rights of accused and offender under Constitution of India, Indian Penal Code and Criminal Procedure Code.

#### Module II: Division of Law

Substantive Law and Procedural Law. Legislations pertaining to Social Institutions: Marriage, divorce, maintenance of spouse, adoption.

Legislations for prevention of Crime and Deviance: Indian Penal Code (relevant chapters on Offences against Public Tranquility, Public Health, Safety, Convenience, Decency and Morals, Offences relating to Religion, Offences affecting the Human Body, Offences relating to Marriage and Cruelty).

Legislations pertaining to women

#### Module III: Criminal Justice System in India

Objectives of Criminal Justice System.

Police: Structure, powers and functions and their role in maintaining of peace and order in the society.

Prosecution: Meaning, structure and role in criminal justice; Trial participation.

Administration of criminal justice system; Understaffed police and judiciary, and lack of political will as ailments of criminal justice system in India

#### Module IV: Judicial System in India

Constitution of Supreme Court and High Court: Powers and functions.

District and Subordinate Courts: District Sessions Court, Magistrate Courts, Family Courts, Tribunals, Fast Track Courts, Lok Adalats.

Salient features of judicial system in India.

Judicial activism.

#### Module-V: Correction and Correctional Laws

Corrective measures as per Criminal Procedure Code, Probation of Offenders Act, Juvenile Justice (Care and Protection of Children) Act. Legal Aid: Concept of legal-aid, history of legal-aid, persons needing legal-aid, legal-aid schemes.

Public Interest Litigation: Meaning, Concept, Process and Problems.

Right to Information Act- Provisions and implementation.

Role of Social Worker: Social Work intervention, need, methods.

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance,  
EE: End Semester Examination

# COMMUNICATION AND COUNSELLING

**Course Code: SCW4303**

**Credit Units: 03**

## **Course Objective:**

- To understand the meaning and importance of communication in day-to-day life.
- To identify salient features of effective interpersonal communication and interviewing.
- To develop holistic understanding of Counselling as a tool for help.
- To acquire knowledge of various approaches: their theoretical under-pinnings for goals, values, processes and techniques.
- To develop and practice skills of communication and interviewing and applying it in real life situations.

## **Course Content:**

### **Module I: Communication: Meaning and importance**

Basics of Communication: Process, components, types Verbal and nonverbal communication; Interpersonal and Interpersonal communication; Education and communication for national development.

Interviewing: Objectives, principles of interviewing, interviewing skills: listening, reflection, questioning, confronting.

Formal verbal communication in seminars, conferences, lectures, group discussion, panel discussion, symposium, workshop, role playing, simulation exercises

Written communication: reports, letters, e mails, article/essay, project report.

### **Module II: Visual aids in communication**

Posters, notice boards, flip charts, charts, flash cards, photographs, pamphlets, slide shows.

Mass Communication: Television, exhibition, newspapers and magazines, advertisements, radio, film, VCD/ DVD, social media and internet.

Impact of mass communication on society, family, marriage and child development.

Communication Analysis and Planning: Planning and executing a communication campaign on an issue using various methods of communication.

### **Module III: Counselling**

Nature, goals and areas of counselling; ethics in counselling; cultural sensitivity in counselling; intentional Counselling and interviewing.

Counselling Situations: Developmental, preventive, educative, facilitative.

Process and stages of Counselling; Qualities of an effective counselor: Empathy, genuineness and non-possessive warmth

Counselling Skills: Building rapport, mind skills, feeling skills, relationship skills.

### **Module IV: Approaches to Counselling**

Rogers Person-centered Approach

Beck's Cognitive Therapy; Ellis' Rational Emotive Behaviour Therapy

Behaviour Counselling and Therapy: common principles, methods based on classical conditioning, methods based on instrumental conditioning

Gestalt Therapy: assumptions, games and exercises; Existential approaches

Eclectic model; Indigenous Approach: Mindfulness, meditation, yoga, philosophy of *Nishkam Karma* and Non-Doer.

### **Module V: Group and Relational Approaches**

Couple and Family Counselling: Issues related to dysfunctional communication, roles and boundaries in the family; Intervention strategies

Group Counselling: Process, advantages and disadvantages

Counselling in family Counselling centers, family courts, counselling bureau, vocational Counselling centers, mental health centers, child guidance clinics, correctional institutions, de-addiction and rehabilitation center, educational institutions.

## Examination Scheme

## FIELD WORK PRACTICUM-III

Course Code: SCW4304

Credit Units: 04

### Course Objective:

The emphasis is on-learning skills which revolve around specific tasks where cause-effect relationships are understood, where the persons have problems but they are more victims of their life circumstances rather than of pathology for which great knowledge of psychological and social dynamics would be required and lower order of skills of intervention is required to be utilized. The processes dealt with at the individual, group or community is specific. Show dynamics but do not require unusual skills of intervention. Administrative tasks are also specific, e.g. planning and programming around a specific service.

The specific objectives of field-work in the third semester may include:

1. Development of the knowledge of:
  - (a) Socio-economic background and the living condition of the vulnerable groups and the problems confronting them.
  - (b) Problem-solving techniques utilized in the specific area of work of the organization where student is placed.
  - (c) The use of simple research procedures and maintenance of scientific data to assess problems/needs/agency.
2. Development of skills in :
  - (a) Work with individuals, families, groups and communities and seeing the need for an integrated approach to problem solving.
  - (b) Selecting and utilization of community resources.
  - (c) Work as a member of a team with other professional and own discipline to, plan, organise and implement projects, programmes with emphasis on the use of the process in problem-assessment and problem solving.
3. Development of professional attitudes, conducive to work with individual families group and communities, leading gradually to an awareness of self as a professional person.

Efforts will be made to work out objectives in each semester for every student in field practicum according to the nature and services of the agency and his performance will be evaluated accordingly.

### Methodology

Each student will engage themselves in interaction and observation of social phenomenon and processes in a subject/ field of their choice. Student will then present their findings in the form of a paper for seminar discussions. Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### Examination Scheme:

Field/Seminar Report :	40 marks
Viva-Voce :	30 marks
Internal Faculty and Interaction :	10 marks
Presentation/Daily Diary Report :	20 marks

# SUMMER INTERNSHIP EVALUATION

Course Code: SCW4335

Credit Units: 06

## GUIDELINES FOR INTERNSHIP FILE AND INTERNSHIP REPORT

*(These guidelines will be useful for undertaking an internship programme during the summer or at any other time wherein the student/ researcher works full time with a company/organization)*

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**).

### INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. ***Item scan be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.***

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include **five sections** in the order described below.

1. **The Title Page** – An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content** – An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.
5. **Appendices** - Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

### INTERNSHIP REPORT

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (Incase a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report should be as per the standard layout prescribed by the organization wherein the student

undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

➤ **Title or Cover Page.**

The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

➤ **Acknowledgements.**

Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

➤ **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form.

While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

➤ **Conclusion(s) & Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly. Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

➤ **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

➤ **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of

the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**The Layout Guidelines for the Internship File & Internship Report:**

- A4 size Paper Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

**Assessment Scheme:**

**Continuous Evaluation:**

(based on Internship File and the observations of the faculty guide/ supervisor) 30%

**Feedback from Company/ Organization:** 10%

**Final Evaluation:**

(Based on Internship Report, Viva/ Presentation) 60%

# HUMAN RESOURCE DEVELOPMENT AND EMPLOYEE WELLNESS

**Course Code: SCW4305**

**Credit Units: 03**

## **Course Objective:**

- To develop multi facets of the personality and to build self confidence. To develop a spirit of continuous learning and innovation.
- To strengthen the competency base of individuals, teams and organization and also familiar with the organizational culture.
- To understand and further the organization culture.
- To appreciate the importance of bottom-line focus to the Human Resource function and trend toward HR Accountability.
- To understand the various approaches to and techniques of measuring HR issues.
- To create awareness of different types of information systems in an organization so as to enable the use of computer resources efficiently, for effective decision- making.

## **Course Content:**

### **Module I: Human Resource Development (HRD)**

Concept, origin and needs for HRD; Overview of HRD as a Total system; Approaches to HRD; human capital approach; social psychology approach and poverty alleviation approach

HRD and its dimension

Competency Mapping.

### **Module II: HRD Interventions**

Performance Measurement Systems: Fundamental issues. Feedback sessions.

Organizational goal setting process, Key Result Area (KRA) and Key Performance Indicator (KPI), Coaching, Mentoring, career planning, career development, reward system, quality of work life. HRIS: Computers and computer based Information Systems. Measuring HR: Changing role of HR, HR as a strategic partner, the need for measuring HR.

Approaches to measuring HR: Competitive Benchmarking, HR Accounting, HR Auditing, HR Effectiveness Index, HR Key Indicators, HR MBO (Management by Objectives).

### **Module III: Instructional Technology**

Learning and HRD; Building Learning Organization; Learning as intellectual capital, Measuring learning

Architecting a learning organization, Organizational Learning, models and curriculum

Factors and principles of learning; group and individual learning; HRD trends; Behavioural Sciences; Transactional Analysis Concepts of continuous learning, Behaviour modeling and self-directed learning

Evaluating the HRD effort: Data gathering; analysis and feedback; HRD experience in Indian organizations; future of HRD - Organization culture and development.

### **Module IV: Talent Development**

Concept and importance; Training Need Analysis, process of training, designing and evaluating training and development programs. Use of information technology, Types and Methods of Training: Training within industry (TWI), External training: on and off the job; Training methods; lecture, incident process, role play, structured and unstructured discussion, in-basket exercise, simulation, vestibule, training, management games, case study, programmed instruction, team development, and sensitivity training;

Review of training programs.

### **Module V: Employee Wellness**

Concept, philosophy, principles and scope; Importance and relevance of wellness programs, Role of Welfare Officer as per the Factories Act 1948. Relevance - with reference to Accidents, Absenteeism, Alcoholism, Domestic Violence: Preventive and remedial measures. Employee Counselling. Role of Counselor in Organizations. Corporate Social Responsibility (CSR): CSR as a business strategy. Environmental management systems ISO 14001, ISO 26000: Social responsibility guidance standard, environmental impact assessment.

# MENTAL HEALTH AND PSYCHIATRIC SOCIAL WORK

Course Code: SCW4306

Credit Units: 03

## Course Objective:

- Understand the concepts of mental health and mental illness.
- Understand the signs and symptoms, etiology, diagnosis and treatment of mental health problems.
- Understand different services for the care of mentally ill.
- Understand historical background of psychiatric social work in India and abroad.
- Understand the nature of psychiatric social work services and relevance of team work.
- Understand the nature of collaboration with voluntary organizations for the welfare of mentally ill.
- Identify the issues related to psychiatric social work department in hospitals and community mental health settings.

## Course Contents:

### Module I: Mental Health

Concept of health and illness; WHO's definition of Health; Mental health and mental illness; Deficit and competence based models of mental health; Classification of Mental Disorders: International Classification of Mental Disorders (ICD) and Diagnostic and Statistical Manual of Mental Disorders (DSM) – 5.

Symptoms, etiology, diagnosis, prognosis and management of –Neuroses, Psychoses, Psychophysiological disorders, Personality disorders, Psychiatric disturbances in children and adolescents, Organic psychotic conditions, Mental retardation.

### Module II: Introduction to Psychiatric Social Work

Meaning and Scope: Historical background of psychiatric social work in India and abroad; Reasons for its development as a specialty.

Application of social work methods and other related techniques used in the field

Multi-disciplinary approach and team work in mental health care Problems of hospitalization; Impact of mental illness on the patient, family and community.

### Module III: Practice of Social Work

Importance of home visit and visit to the place of work

Role of family in the treatment of mentally ill

Preparing the family and community for the return of the affected individual

Follow-up

### Module IV: Care of mentally ill:

Day-care centre, night-care centre, half-way-home, sheltered workshop, Occupational therapy units;

Role of voluntary organizations, governmental-agencies and paraprofessionals in the welfare of mentally ill.

Role of social worker in mental health centers, departments of psychiatry, general hospitals, child guidance clinics, community mental health units, correctional institutions, industries, and family welfare centers.

Role of social worker in the management of substance abuse. Educational avenues in psychiatric social work; Research avenue in the field of mental health for social workers.

### Module V: Organization of psychiatric social work

Psychiatric Departments: Functions and collaboration with other departments.

Community mental health and social work, NMHP, Innovations like Satellite clinics, district mental health programme etc.

Rehabilitation and Acts: Occupational therapy - Principles and practice - Psychosocial rehabilitation.

Mental Health Act, 1987.

The Persons with Disabilities (Equal Opportunities, Protection of Rights and Full Participation) Act, 1995.

# SOCIAL WORK WITH FAMILIES AND CHILDREN

**Course Code: SCW4307**

**Credit Units: 03**

## **Course Objective:**

- To strengthen the professional competence of Social work Practice with families and children.
- To gain understanding of type of practice settings working with families and children.
- To understand the role of the profession and the stakeholders in the welfare of families and children.

## **Course Content:**

### **Module I: Social Work with Families and Children**

Working effectively with children and families, Values and Ethics in social work with children and families, Family as a Client System, Strengthening Family structure and Communication.

### **Module II: Process of Intervention**

Social Worker-client relationship, Social Study, Assessment, Goal Setting, Contracting, Intervention; Development of practice skills: Conceptual skills, Interviewing skills – Informational interview, Diagnostic/Assessment interview, Therapeutic Interview, Recording skills, Evaluation.

### **Module III: Social Work Practice in different settings**

Social Work interventions for children in different settings: school settings, correctional settings, institutionalized children, community based interventions, children in care and protection, adoption centres, street children, children abusing substances, children in clinical settings, Social work interventions for families in different settings: Family Counselling centres, short stay, Respite care, Destitute homes, Clinical settings.

### **Module IV: Role of the Social Worker**

Role of the Social Worker while working with children and families: Case worker, Group Facilitator, Community Organizer, Case Manager, Enabler, Reformer, Project Manager, Researcher, Activist, Advocacy and Lobbying, Sensitisation, Campaigning, Social Audits, Trainer, Monitoring and Evaluation, Documentation, Fund Raising, Resource Mobilisation, Policy Planning, Catalyst, Change maker, Role Model, Community Organiser, Coordinator, Enabler, Reformer, Facilitator, Volunteer

### **Module V: Stakeholder's Participation**

State, Global Community, NGO's, Institutions of National Importance, Judiciary, Bureaucrats, Policy Makers, Social Activist, Educational Institutions, PRI's, Self Help Groups, Community Leaders, Religious Institutions, Gram Panchayats, Police, Health Workers, Grassroot Level workers, Anganwadi Workers, ASHA's, Donors, Volunteers, Youth, Civil Society Organisation, Community Based Organisations.

# CORRECTIONAL ADMINISTRATION AND SERVICES

Course Code: SCW4308

Credit Units: 03

## Course Objective:

- To acquaint with the correctional institution and non-institutional programmes.
- To understand the different services for juvenile, young and adults offenders and also to understand the legal provisions and procedures for their assistance.
- To understand the role of custodial staff in the process of correction and rehabilitation.
- To understand the structure, function, treatment and facilities provided by the institutions.

## Course Content:

### Module I: Institutional systems

Introduction to correctional administration. History of Correctional Administration in India: Concept, objectives and functions of Correctional administration.

Institutional protection for children and young offenders: Juvenile Justice (Care and Protection of Children) Act -2002, 2005.

Observation Home, Juvenile Homes for Boys and Girls and their functions. District Shelter for boys and girls and their functions.

### Module II: Institutional Treatment for Released Offenders and Convicts

Prison: Historical development of prison system; Indian Prison Act, Prison Manual (Haryana).

Prison administration, prison Labour, prison discipline and prison education; Pre-release programs; Prisoners' Welfare Board.

Open-air prison: Historical development of open-air prison system, organization and administration.

### Module III: Non-institutional systems

Probation: Historical development of probation system, principles and procedure.

Parole: Historical development of parole; functions and powers of Parole Board; Conditions under the Prison Manual. Indian Penal Code, provisions on Parole.

Pre-release preparation of the parolee

### Module IV: After care services

Legal provision for establishing social institution.

Provision for assistance to released prisoners: Role of voluntary organization, corporate bodies and the state in the rehabilitation.

Prevention of Immoral Traffic Act: Its objectives; State Home for Women (Sthrinikethana)

Citizen committees, Police help-line.

### Module V: Social work intervention

Scope of social work intervention in prisons.

Role of social worker in the prison administration.

Social work practice in correctional services: Nature, scope and challenges

Comprehensive assessments: of offenders, their families, and communities to identify offenders' needs, strengths, ability to cope and any support networks they may require.

A career in social work at correctional services

## Examination Scheme

# POPULATION AND ENVIRONMENT

Course Code: SCW4309

Credit Units: 03

## Course Objective:

- To understand characteristics, determinants of population growth.
- To examine population policy, plan and initiatives.
- To understand inter-relatedness of human life, living organisms and environment.
- To examine utilization and management of resources.
- To develop skills to participate in activities related to the two areas.

## Course Content:

### Module I: Characteristics of population

Population, determinants of growth. global concerns - Characteristics of Indian Population – Distribution by age, sex, literacy and occupation – Fertility trends - Birth and death ratio. Population Policy, World Action Plan, Population Policy of India- Implementation; Initiatives – Government and NGO.

### Module II: Family Planning

Objectives, scope, methods, implementation, mechanisms and progress. Concept and Scope of Population education, family life education, sex education, and family planning education.

### Module III: Population and Environment

Interrelatedness of human life, living organisms; Environment and natural resource – Environment, lifestyle, degradation. Environment management, maintaining, improving, enhancing – Current issues of Environment

### Module IV: Natural Resources and Diversity

Utilisation and management – Forest, land, water, air, energy sources - Pollution - Sources, treatment, prevention - Soil, water, air, noise - Waste matter - disposal, recycling, renewal, problems, issues – Programmes for forest, land and water management.

### Module V: Environment Protection

Laws and Role of Social Worker: Acts related to environmental protection – Forest conservation- Water pollution – Standards and tolerance levels – Unplanned urbanization- Environmental movements in India Role of NGOs in Environmental issues – Government agencies in environmental protection – Social work initiatives at different levels.

# GENDER AND DEVELOPMENT

**Course Code: SCW4402**

**Credit Units: 02**

## **Course Objective:**

- Understand issues related to development and empowerment of women in India.
- Understand the efforts at the International, National state and local levels for development and empowerment of Indian women.
- Develop understanding and contribution of women's movements in development and empowerment of women.
- Skill of using different evaluation techniques for the development of field projects, schemes.
- Understand the value of training, advocacy, campaigns and network in the field of gender and development

## **Course Content:**

### **Module I: Status of women in India**

Historical review of status of women in Indian society; Status of women in family and religion; Educational and health status of women; Political, economic and legal status; Regional religion, caste, class variations in women's status in India.

Women's Movements: International women's movements; Women's movements in India in 19th and early 20th century; Nationalist movement; Post-1975 campaign

Gender equality and empowerment; Governmental efforts for women's development; National and State level women's Policy.

### **Module II: Situation of girl child in India**

Sex determination, feticides and infanticide; Sex ratio and mortality; Malnutrition and health; Education

Early marriage and teenage pregnancies.

Problems of women: Physical and mental health problems; Dowry; Domestic violence; Divorce and dissolution; Rape, sexual abuse, sexual harassment.

### **Module III: Women and Law**

Rights guaranteed under constitution; Family laws: marriage, divorce, maintenance, adoption

Laws related to offences against women: Sati, Property and Succession; Domestic Violence, Rape, Trafficking, Prenatal Diagnostic Test, and Sexual Harassment at work place

Provisions for empowerment; Family Courts, Mahila Adalat, National and State Commissions;

Special Cells for women; All women police stations

### **Module IV: Welfare and Development Organizations**

Nature, characteristics and functions of welfare and development organizations in the context of gender development; Staff structure and staff policies in welfare organizations; The issue of attrition in welfare organizations; Team building in welfare organization. Administration of Welfare Organizations Administrative set up of Ministry of Women and Child Development at the central, state and district levels

Vision, mission, objectives, functions, systems and procedures at each level.

### **Module V: Training of Personnel**

Need for training, types of training; Adult learner and principles of adult learning; Training cycle: Designing contents, implementation and evaluation of training

Participatory training methodology tools: and techniques; Trainer effectiveness: qualities and skills.

Strategies for advocacy, planning and use of media and Internet for advocacy

Networking for gender development; Use of networks at national, state and local levels; Role of public interest litigation, court judgments, National Human Rights Commission and other commissions.

# **SOCIAL WORK WITH URBAN, RURAL AND TRIBAL COMMUNITIES**

**Course Code: SCW4403**

**Credit Units: 03**

## **Course Objective:**

- To develop an understanding of Urban, tribal and rural communities.
- To understand the characteristics and problems of urban, tribal and rural communities.
- To acquire knowledge about the contribution of Governmental and Nongovernmental Organisations to urban, tribal and rural development.
- To develop an understanding of the functions of Panchayath Raj Institutions .Gain knowledge about the application of social work in tribal and rural development programmes.

## **Course Contents:**

### **Module I: Tribe in Relation to Caste and Nation**

Nature and Characteristics of Primitive Cultures: Tribes in India and their ecological distribution.

Important tribal groups in India

Emerging Trends in Tribal Social Institutions: Family and Kinship Systems, Jati Structure, Economic Structure, Political organizations.

Characteristics of Tribal Society: Economic, Social, Political and Cultural Problems of Tribal Life.

### **Module II: Government Programs for Tribal Societies**

Post Independence Programs and their Impact on Tribal Societies Programmes of Voluntary Agencies and their Impact on Tribal Societies.

Analysis and Assessment of Tribal Communities; Special Problems of the Tribals in a different areas.

Social Work Practice in Tribal Development: Community organization as a method of intervention, Participatory Rural Appraisal (PRA), Logical Framework Approach/Analysis (LFA), Scope of other techniques of intervention in tribal community development.

### **Module III: Rural Society and Poverty**

Historical perspective: Dynamics in the village society; Caste/class relationships; Control and Power, Conflict and Integration. Poverty in the rural context; Nature and manifestations.

Analysis of Basic Problems: Issues faced by the rural poor such as Indebtedness, Bonded labour, Low wages, Unemployment, Underemployment, and other forms of exploitations.

Current Rural Development Programs in India: Council for the Advancement of People's Action and Rural Technology (CAPART) and other Rural Development Statutory Bodies. Panchayat Raj System in Indian states and its role in rural and tribal development.

Role of social worker in tribal and rural development programs.

### **Module IV: Perspectives on Urban Community Development**

Urban Economy: Urban economy in the context of land, labor, capital, technology, and organizations.

Concept and Meaning of Development: Basic Elements and Dimensions with an Urban Focus.

Economic Development in the Urban Context: Industrialization and Employment generation Different service sectors.

Infrastructure facilities: Road, Energy and Finance

Development of cities: production, distribution and the present shift; Economics of local Government – Revenue and tax collection and distribution for Development.

### **Module V: Urban Development and Civic Administration**

Growth of High-rise as well as slums; Slum-city relationship and its problems

Role of civic administration

Voluntary Organizations (NGOs) and urban dwellers

Role of law and town planning in urban development.

## FIELD WORK PRACTICUM-IV

Course Code: SCW4404

Credit Units: 03

### Course Objective:

The emphasis is on-learning skills which revolve around specific tasks where cause-effect relationships are understood, where the persons have problems but they are more victims of their life circumstances rather than of pathology for which great knowledge of psychological and social dynamics would be required and lower order of skills of intervention is required to be utilized. The processes dealt with at the individual, group or community is specific. Show dynamics but do not require unusual skills of intervention. Administrative tasks are also specific, e.g. planning and programming around a specific service.

The specific objectives of field-work in the Fourth semester may include:

1. Development of the knowledge of:
  - (a) Socio-economic background and the living condition of the vulnerable groups and the problems confronting them.
  - (b) Problem-solving techniques utilized in the specific area of work of the organization where student is placed.
  - (c) The use of simple research procedures and maintenance of scientific data to assess problems/needs/agency.
2. Development of skills in :
  - (a) Work with individuals, families, groups and communities and seeing the need for an integrated approach to problem solving.
  - (b) Selecting and utilization of community resources.
  - (c) Work as a member of a team with other professional and own discipline to, plan, organise and implement projects, programmes with emphasis on the use of the process in problem-assessment and problem solving.
3. Development of professional attitudes, conducive to work with individual families group and communities, leading gradually to an awareness of self as a professional person. Efforts will be made to work out objectives in each semester for every student in field practicum according to the nature and services of the agency and his performance will be evaluated accordingly.

### Methodology

Each student will engage themselves in interaction and observation of social phenomenon and processes in a subject/ field of their choice. Student will then present their findings in the form of a paper for seminar discussions. Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### Examination Scheme:

Field/Seminar Report :	40 marks
Viva-Voce :	30 marks
Internal Faculty and Interaction :	10 marks
Presentation/Daily Diary Report :	20 marks

# DISSERTATION

Course Code: SCW4437

Credit Units: 06

## GUIDELINES FOR DISSERTATION

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Selecting the Dissertation Topic

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of;
- information and to your own knowledge; of value and interest to you and your personal and professional development.

### Planning the Dissertation

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

### The Dissertation plan or outline

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.

- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

### **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct quotation and what is your paraphrase.

**Dissertation format** All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**.
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required: Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

### **The Layout Guidelines for the Dissertation:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5 Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

Has the student made a clear statement of the objective or objective(s).

If there is more than one objective, do these constitute parts of a whole?

Has the student developed an appropriate analytical framework for addressing the problem at hand.

Is this based on up-to-date developments in the topic area?

Has the student collected information/data suitable to the frameworks?

Are the techniques employed by the student to analyse the data / information appropriate and relevant?

Has the student succeeded in drawing conclusion from the analysis?

Do the conclusions relate well to the objectives of the project?

Has the student been regular in his work?

Layout of the written report

<b>Assessment Scheme:</b>	
<b>Continuous Evaluation:</b> (Based on Abstract, Regularity, Adherence to initial plan, Records etc.)	40%
<b>Final Evaluation:</b> Based on,	60%
Contents & Layout of the Report,	25
Conceptual Framework,	10
Objectives & Methodology and	10
Implications & Conclusions	15

# INDUSTRIAL RELATIONS AND LABOUR LEGISLATION

Course Code: SCW4405

Credit Units: 03

## Course Objective:

- To gain knowledge about labour legislations and labour welfare
- To understand the legal provisions relating to labour welfare in different industries
- To acquire the skills of working with the organized sector

## Course Content:

### Module I: Labour: Concept, Characteristics and Problems

Indian Labour: Labour in the organized and unorganized sectors. Labour Welfare: Concept, scope, Principles and Theories

Labour Welfare classification

Role and Functions of Labour Welfare Officer.

Objectives and functions of International Labour Organization (ILO); The role of ILO in Labour welfare implementation

ILO recommendations in India

### Module II: Labour Legislations: Concept, need and historical development

Labour Legislation in India: Factories Act 1948; Occupational safety and health The Contract Labour (Regulations and Abolition) Act 1970; Tamil Nadu Payment of Subsistence Allowance Act 1981; Tamil Nadu Industrial Establishments (Conferment of Permanent Status to Workmen) Act, 1981.

### Module III: Concept and Types of Wages

Legislations relating to Wages: The Payment of Wages Act 1936; The Minimum Wages Act 1948; The Equal Remuneration Act 1976; The Payment of Bonus Act, 1965.

### Module IV: Concept of Social security

Legislations relating to social security: The ESI Act 1948 The Employees Provident Fund and Miscellaneous Provisions Act 1952; The Payment of Gratuity Act 1972; The Maternity Benefit Act 1961; Employees Compensation Act 1923; National festival and Holidays Act.

### Module V: Legislations for Labour Welfare for Industries

The Plantation Labour Act 1951; The Mines Act 1952; The Motor Transport Workers Act 1961; Tamil Nadu Shops and establishment Act 1947; The Pondicherry Shops and Establishment Act 1964.

# REHABILITATION AND AFTER CARE SERVICES

Course Code: SCW4406

Credit Units: 03

## Course Objective:

- To understand the concept of handicap, rehabilitation and the scope for practice.
- To identify the specific client categories requiring the rehabilitation services, problem specificity and rehabilitation service interventions.
- To acquaint oneself with different rehabilitation settings, different therapeutic approaches to rehabilitation process.
- To acquire the social work skills adapted to facilitate the process of rehabilitation, the rights and legal provisions provided for differently abled people and assimilate the knowledge of social work practice to disability specific client service.

## Course Content:

### Module I: Rehabilitation

Definition and scope for social work interventions. History, Philosophy and Principles of Rehabilitation

Definition of Impairment, Disability, Handicap

Causes of Handicap: Heredity, acquired, Major illnesses

Physical, neurological and psychiatric stress, vulnerability, coping and competence to deal with handicaps

Need for comprehensive psycho-social rehabilitation

### Module II: Specific Rehabilitative Efforts

Rehabilitative efforts in various problem areas: physical handicap - vision, hearing; Orthopedic Handicap; Speech and Language Difficulties

Mental retardation and Neurological and Psychiatric disorders; alcohol and drug usage, terminal illnesses and due to accidents.

### Module III: Intervention in rehabilitation

Planning and Assessment

Designing and implementing intervention, tools for assessment

Evaluation of effectiveness of intervention

Follow-up services.

### Module IV: Rehabilitation Settings

Hospital based, day-care, night-care, quarter-way home, half- way-home, group home, hostels, long-stay homes

Vocational guidance centre, sheltered workshop, occupational therapy centre, community based rehabilitation centre, home care Inclusive education and other Approaches: Therapeutic community, Behaviour modifications, transactional analysis and eclectic approach

### Module V: Practice of Social work in the process of rehabilitation

Methods: Case work, group work, community organization, research, administration and social action.

Legal provisions for differently abled people: The Persons with Disabilities (Equal Opportunities, Protection of Rights and Full Participation) Act 1995

Rehabilitation Council of India: Formation, scope and functions Governmental policies and programs, initiatives from the non- governmental sectors. International trends and national initiatives in the rehabilitation scenario.

# SOCIAL WORK WITH PWD

Course Code: SCW4407

Credit Units: 03

## Course Objective:

- Gain knowledge about the concept of and different types of disabilities.
- Acquire an understanding of the theoretical models and approaches to disability
- Develop an attitude of respect and dignity towards persons with disability
- Become skilled at undertaking social work interventions with other stakeholders in the field of disability

## Course Contents:

### Module I: Concept of Disability and Impairment

ICIDH and WHO definitions of disability; causes, types Magnitude of various disabilities and their impact on persons with disability and their families

Discourses and models of disability

Developing an anti-oppressive and Inclusive understanding of disability

### Module II: Types, Causes and Rehabilitative Concerns

Types of disability: physical, sensory, intellectual, multiple disabilities, learning developmental disabilities, psychosocial disability

Causes, types and care for persons with disabilities (medical and other interventions including aids and appliances)

Process of rehabilitation: early identification, education, vocational rehabilitation, social inclusion and empowerment within the family and community.

Understanding the experience of disability: Limitations, strengths and potentials of persons with disabilities

### Module III: Impact of disability on individuals and their families

Reactions of parents/family members and individuals ways of coping with disability.

Needs and problems of persons with disability and their families across the life span and at critical stages in their lives

Social work intervention at each stage

### Module IV: Disability Intervention at Individual and Family Levels

Individual level strategies: Self help and support groups; assertiveness training, life skills enrichment

Family level strategies: Family crisis intervention, family centered intervention, parent guidance, parent training

Role of social worker in different settings: Hospital and treatment centers, home, educational institutions, vocational rehabilitation centers, the community

Multidisciplinary rehabilitation teams and their roles.

### Module V: Disability intervention at community and policy levels

Building awareness, community education, community based rehabilitation, advocacy and lobbying

Using international instruments (Salamanca Declaration, Standard Rules, UNCRPD) and legislations governing disability (Persons with Disability Act, 1995, RPD Bill, MHC Bill, RCI Act, National Trust Act, 1999) for advocacy

State's role in implementation of legislations.

# SOCIAL WORK WITH HIV/AIDS

Course Code: SCW4408

Credit Units: 03

## Course Objective:

- To understand the issues related with HIV/AIDS positive cases.
- To develop an attitude of respect and dignity towards persons with HIV/AIDS.
- To become skilled at undertaking social work interventions with and HIV/AIDS cases.

## Course Contents:

### Module I: HIV and AIDS: The Current Landscape from a Death Sentence to a Chronic Disease

The History of the Epidemic; Nature of the retro virus; HIV as a Behaviourally acquired infection; Modes of transmission; Prevention of transmission of infection; Safer Behaviours  
HIV Testing and Treatment; the issues of Confidentiality; Counselling Centers; High risk populations; Bridge populations  
Enduring Themes of Stigma and Discrimination

### Module II: National Response for HIV/AIDS Management

A Health Crisis; Risk Factors for HIV; Vulnerable Groups: Youth and children, women, prisoners  
National Response to the HIV/AIDS Crisis: National AIDS Control Policy (NACP) I-IV and the Formation of NACO and SACS  
Challenges of Positive Living; Approaching the Epidemic Holistically  
Future for HIV/AIDS Social Work: Developing a New Agenda

### Module III: HIV/AIDS Prevention for MSM and IDU

Risk factors for Men Who Have Sex with Men, Diverse ideologies and psychosocial settings of MSM  
IDU practices and health risks; Nationwide distribution of IDUs  
Intervention for HIV-Prevention among MSM and IDU: Condom distribution and syringe exchange programs  
Intricacies of Counselling MSM and IDU

### Module IV: HIV/AIDS Prevention and Care for At-Risk Adolescents and Young Adults

The Disproportionate Impact of HIV on Young People; Reasons for High Risk among Youth for HIV Infection  
HIV/AIDS Education for Adolescents and Young Adults; Sex and reproductive education; Impacts of Drugs and Alcohol on HIV transmission; Adolescent Sexual Minorities, Sexual Behaviour  
Experimentation among Adolescents; Assessment with Adolescents and Young Adults; The HEADSS Assessment Model; Suicide Risk/Depression Screening of Adolescents  
Community Level Interventions Targeted at Adolescents for HIV Prevention

### Module V: HIV Case Management: The Social Work Perspective

The Hub of Service Provision  
Understanding Social Work Case Management  
Description of Supportive HIV Case Management Services  
Common Risks in People Living with HIV or AIDS  
The Top Five Skills of an HIV Case Manager  
The Top Five Attitudes of an HIV Case Manager  
Partnership with people affected by HIV/AIDS

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

CT: Class Test, H: Home Assignment, P/V/Q: Presentation/Viva/Quiz, A: Attendance, EE: End Semester Examination

# HUMAN GROWTH AND DEVELOPMENT

Course Code: SCW4409

Credit Units: 03

## Course Objective:

- Develop an overall understanding of the principles of growth, their relevance and application to behaviour at various phases in the life span.
- Develop sensitivity towards needs, developmental tasks and health status along with need for developmental programmes for the same.
- Apply the information of growth, development and health in social work practice in general and to individuals, groups and communities in particular.
- Understand the implications of family norms for status of individuals and developmental opportunities in the family by age and gender.
- Encourage to study the process of family socialization and understand family norms, ecology and dynamics.

## Module I: Life Span: Beginning of life

Human reproductive system; Fertilization and Foetal development - Delivery and pre-natal and post-natal care and their importance in development. Principles of growth and development - Methods of studying human behaviour, Role of heredity and environment - Social customs traditions, values in parenting and child rearing practices, deprivation and development during stages of life span. Understanding of the Indian concept of life span stages.

## Module II: Developmental periods

Developmental periods: Infancy, babyhood, childhood, puberty, adolescence -.Growth, hazards, lifestyle effects, Adulthood - Growth, personal and social adjustment, health, sexuality, vocational and marital adjustment.

Aging - Characteristics, hobbies, adjustment, physical and mental health, death, dying and bereavement. Special focus is on psychosocial development, moral development, and personality development vis-a-vis the influence of the contexts of development. (The contexts here refers to gender, family, significant others, neighbourhood, peers, school, community, work place and other larger contexts like the society and culture. Emphasis is placed on the Indian context of development, variations from the normal patterns of development and views on the stages).

## Module III: Theories of Human Development

A critical look at the theories of human development - Freud's psychosexual theory, Erikson's psychosocial theory, learning theories.

## Module IV: Basic human needs

Physical, psychological and intellectual needs, stress – Coping and social support. Motivation, frustration and conflicts - Emotions and emotional behaviour.

## Module V: Personality and Intelligence

Personality: Definition, nature, types and assessment of personality.

Intelligence: Concept, levels of intelligence, influence of heredity and environment, assessment of intelligence. Relevance of Psychology to social work practice across the stages of development, period specific needs, tasks and challenges.

## Examination Scheme

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

# DISASTER MANAGEMENT

**Course Code: SCW4410**

**Credit Units: 03**

## **Course Objective:**

- Understand key concepts, theories and approaches of disaster management with specific reference to Indian context.
- Develop skills to analyse factors contributing to disaster. Develop an understanding of the process of disaster management. Develop an understanding of the social worker's role in the team for disaster management.

## **Course Contents:**

### **Module I: Disasters**

Concept, types and impact - Famine, floods, cyclones, hurricanes, warfare, earthquake, volcanoes; traditional and modern disaster threats and care factor, classification of disasters; Disaster management - Definition and concept; approaches to disaster management, importance and relevance of disaster management in the present environmental scenario, cases studies of disaster management.

### **Module II: Disaster and Social Work Intervention**

Scope of disaster related intervention, intervention during disaster impact stage, trauma Counselling and crisis intervention, post disaster management, damage assessment and long term rehabilitation and reconstruction, networking and co-ordination between government, NGOs, donor agencies, local bodies, police, military etc.

### **Module III: Disaster Prevention and Preparedness**

Vulnerability analysis, hazard mapping, community based disaster preparedness programmes, training for CBDP, preparedness for post-disaster emergency response and long term rehabilitation, organization and planning, logistics; resource utilization, specialized skills and training needs; public awareness and education; first-aid training, civil defense training.

### **Module IV: Institutions and Instruments in Disaster Response**

International decade for natural disaster reduction and UN resolutions, administration of relief in India - National, state, district and local levels.

### **Module V: Disaster related legislations and policies**

National and international donor agencies; NGOs, mental health institutions in disaster management and relief.

## Syllabus – First Semester

### HISTORY AND SCHOOLS OF PSYCHOLOGY

Course Code: PSY4101

Credit Units: 02

#### Course Objective:

One of the primary goals of this paper is for students to learn the philosophical roots and historical events that have shaped the field of psychology. This will include an exploration of underlying philosophical assumptions, individual contributors, and various schools that served to shape the emerging field of psychology. A second goal is for students to acquire a basic understanding of Western and Indian thought, to articulate a perspective of their own, and apply that perspective to their professional work. This course aims at helping the students to understand basic principles, historical background and main theoretical perspectives, i.e., various schools of modern scientific psychology.

#### Course Contents:

##### Module I: Introduction of Psychology

Nature of Psychology, Understanding Science and Status of Psychology as a Science  
Approaches / Methods of Psychology

##### Module II: Historical Background of Psychology

Pre-Socratic Philosophers: Socrates, Plato and Aristotle  
Patristic Philosophy – Focus on Augustine,  
Scholastic Philosophy – Focus on Aquinas

##### Module III: Indian Philosophy

Indian Philosophy and Modern Psychology  
Sri Aurobindo and his Philosophy of the Individual Self

##### Module IV: Schools of Psychology

Structuralism  
Functionalism  
Gestalt  
Psychoanalysis  
Behaviourism

##### Module V: Forces of Psychology

Psychoanalytic  
Behavioural (Cognitive-Behavioural)  
Humanistic - Existential  
Transpersonal

#### Examination Scheme:

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

# COGNITIVE PSYCHOLOGY

**Course Code: PSY4102**

**Credit Units: 02**

## **Course Objective:**

The course deals with the understanding of higher mental processes and its relevance in daily living. The study of normal processes is essential to enable the understanding of neurological or abnormal dysfunctions. The objective of this course is (a) to provide an understanding of normal mental processes and their relationship to brain, mind and behavior, and (b) to study the concept of cognition and its application in cognitive psychology. This will facilitate the students develop the cognitive skills in themselves and others.

## **Course Contents:**

### **Module I: Historical Background**

Psychophysical approach  
Information processing approach  
Ecological Approach  
Contemporary Cognitive Psychology

### **Module II: Attention and Perception**

Theories of Attention and current developments: Broadbent's filter theory, Treisman's attenuation theory, automatic and controlled processing, switching attention.  
Perceptual learning and development  
Perception of shape, space and movement  
Implicit perception and sensory integration theory  
Cognitive – Attentional Theory: Information Processor, Cognitive Timer

### **Module III: Learning**

General Phenomenon of Learning: Learning vs Maturation, Native Response Tendencies  
Theoretical issues of learning: Classical conditioning, Instrumental conditioning  
Verbal learning: Stimulus material, Trigram Methods-Serial Learning, Paired Associate Learning  
Discrimination Learning: Nature, Theories- Algebraic Summation Theory, Relational Theory, Transposition Effect

### **Module IV: Memory & Forgetting**

Sensory memory, STM, LTM, Working memory  
Metamemory: Semantic & Episodic Memory  
Models of Semantic knowledge  
Theories of forgetting  
Mnemonics

### **Module V: Thinking and Language Formation**

Concept formation and categorization  
Judgment and Decision-making  
Reasoning & Problem solving: Stages – Preparation, Production, Judgment and Incubation  
Structure of language, its acquisition and Formation  
Language and Thinking: Linguistic Determinism, language and Cognition

## **Module VI: Learning and Language Disorder**

Reading Disorder/Developmental Dyslexia

Disorder of written expression / Dysphasia / Aphasia

Math Disability / Dyscalculia

Auditory Processing Disorder

Speech and Language pathology

Specific language Impairment

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	7	10	8	5	70

# ADVANCED SOCIAL PSYCHOLOGY

**Course Code: PSY4103**

**Credit Units: 03**

## **Course Objective:**

Knowledge in social psychology is inevitable for any postgraduate psychology student to conceptualize the subject matter of the social individual in its deepest sense. Building from the preliminary knowledge of social psychology at the undergraduate level, this course offers the learners a more hands-on experience on the social behavior dynamics. This course is structured to provide the students a culturally informed and contextualized view of the discipline. The students are encouraged to appreciate and analyze the changing cultural diversity in the present Indian society, therefore, equipping them to approach the social issues with its implications. This course enables students to achieve integrative understanding of social psychological theory and research. It also helps in acquiring a thorough familiarity with methodological issues and thinking critically and analytically about experimental research in social psychology.

## **Course Contents:**

### **Module I: Basic Concepts in Social Psychology**

Definition, nature and Growth of Social Psychology;  
Alternative conceptions of social psychology: Social Structure, Social Stratification and Power  
Development of social psychology in India; Current status of the discipline and its indigenization  
Social Psychology in the New Millennium: Influence of A Cognitive Perspective, Exporting  
Social Psychology, Adoption of a Multicultural Perspective  
Emerging alternative methods in social psychology;

### **Module II: Attitude and Attitude Change**

Attitude - Behaviour Link: Influence of attitude on behavior: responsible factors – aspects of the situation, aspects of the attitude  
Attitude Change: Approach to attitude change- Persuasion approach, cognitive approach  
Attitudes resist change: reactance, forewarning, selective avoidance, active defense biased assimilation and attitude polarization

### **Module III: Prosocial Behaviour**

Concept of Prosocial Behaviour, Latane Darley's five step model, situational factors: Attraction, Attributions and Prosocial Models  
Theories of Prosocial Behaviour: Empathy - Altruism Theory, Egoistic Theory, Genetic Selfishness

### **Module IV: Social Issues**

Mass violence, Terrorism, Mob behavior, Natural Disaster  
Environmental stresses and social behavior.  
Social psychological perspectives on health and illness.  
Psychological effects of unemployment.  
Social and ethnic minorities and law

### **Module V: Applied Social Psychology**

Applied Social Psychology in India: Challenges and possibilities, Need for indigenization  
Applied Social Psychology and developing countries; Emerging themes  
Multidisciplinary approach to the study of social change; Policy oriented research; Need for reorienting Social Psychology

Methods of Applied Social Psychology: Laboratory experiment, Field experiment, Field study

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

## PERSONALITY THEORY

**Course Code: PSY4104**

**Credit Units: 02**

### **Course Objective:**

This course introduces critical evaluation of different theories in the background of the empirical evidence. It enables students to

1. Become familiar with the major theories and traditions related to the study of personality and personal growth.
2. To articulate the underlined themes, methodology and assumption of each theory to enhance understanding of personality and behaviour.
3. To orient the students in application of this knowledge in case analysis and therapeutic formulation
4. To develop the skills in personality assessment.

### **Course Contents:**

#### **Module I: Introduction to Personality**

Nature of personality theory: Present status

Theory in Broader perspective

Grouping among theories: Different perspectives on personality, Dispositional Perspective

#### **Module II: Type and Trait Approaches to Personality**

Trait (Biological) and Type Theories: Allport, Cattell, Eysenck, Sheldon and Friedman

Alternative Five factor Model.

#### **Module III: Psychoanalytic Approach to Personality**

The Freudian Theory: Topographic model, Structural model, Instincts, Defense Mechanism.

The Neo Analytic Theory: Alfred Adler: Striving for superiority; parental influence on personality development, birth order  
Carl Jung: Collective Unconscious  
Karen Horney:  
Erik Erikson: Concept of Ego, Stages of Personality Development  
Harry Stock Sullivan: Personifications

#### **Module IV: Behavioural and Cognitive Approach**

Skinner's Radical Behaviours

Social Learning Theory: Dollard and Miller

Social cognitive Theory: Bandura

#### **Module V: Humanistic and Existential Approach**

Abraham Maslow's and Carl Rogers' Theory,

Kelly and Rollo May

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	7	10	8	5	70

# PARAMETRIC STATISTICAL METHOD

**Course Code: PSY4105**

**Credit Units: 03**

## **Course Objective:**

The Present paper focuses on providing knowledge about the basics of statistics. It will give clear understanding to the students about application of parametric statistical methods. Parametric tests are generally more powerful in that the likelihood (probability) of a test reaching the correct conclusion is greater. Besides this, a module is added in last so to make students aware of parametric statistics in SPSS. Thereby they can understand the procedures and applications of parametric statistics using SPSS.

## **Course Contents:**

### **Module I: Basics**

Nature, Meaning and importance of statistics

Concept of Reasoning, population, sample and probability theory in statistical inferences

Categories of statistics: Descriptive and Inferential

Variables and their types

Scales of Measurement: Nominal, Ordinal, Interval, Ratio

### **Module II: Statistical conjecture**

Sampling and its kinds: Probability sampling method and Non-Probability sampling method.

Difference between Objectives and Hypothesis

Hypothesis testing: One-tailed and Two-tailed tests, Type I and Type II errors

### **Module III: Statistics and Test of Significance**

Meaning, concept and importance of determining reliability of statistics in data analysis

Standard error of mean, standard deviations, percentages and correlation coefficients

Significance of difference between means-critical ratio and t-test calculation (large and small sample) assumption & uses

One-Way and Two Way ANOVA.

### **Module IV: Correlation and Regression**

Correlation: concept, types, assumption and Utility of Cor-relational Analysis in Psychological Research

Bi-serial Correlation, Point Bi-serial Correlation, Partial Correlation, Tetra-choric Correlation

Simple and Multiple linear regression, its uses, concepts and assumptions

Difference between Simple linear and multiple regressions

### **Module V: Introduction to SPSS and parametric statistics in SPSS**

Introduction to SPSS, its usage and functioning

Understanding the concepts of Parametric tests in SPSS

Learning data entry

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## PRACTICUM- I

**Course Code: PSY4106**

**Credit Units: 03**

### Course Objective:

- To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
- To acquaint the students with the basic procedure and design of psychology experiments.
- To encourage and guide the students to undertake a small-scale research project.
- To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the first semester among the list of following practicals**

### Course Content:

1	Continuous Visual Memory Test (CVMT)	Memory
2	Illinois Test of Psycholinguistic Abilities – Third Edition (ITPA-3)	Language
3	16 PF Questionnaire - Fifth Edition with Hand scoring	Personality
4	Tennessee Self-Concept Scale - Second Edition (TSCS:2)	Self-Concept
5	Developmental Test of Visual Perception – Adolescence and Adult	Perception
6	Test of Memory and Learning – Second Ed. (TOMAL-2)	Memory and Learning

### Examination Scheme:

<b>Components</b>	A	File Demonstration	Viva	EE
<b>Weightage (%)</b>	5	35	35	25

### Text & References:

- Mohsin, S. M.: Experiments in Psychology. Motilal Banarasidas

## **FIELD PRACTICE-I**

**Course Code: PSY4107**

**Credit Units: 04**

### **Course Objective:**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme:**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

## Syllabus – Second Semester

### PSYCHOPATHOLOGY

**Course Code: PSY4201**

**Credit Units: 03**

**Course Objective:**

- To acquaint students with various manifestations of psychopathology
- To impart knowledge and skills required for diagnosis of psychological conditions.
- To introduce them to different perspectives and models of etiology.
- To develop skills required for psychopathological formulation.

This course enables students to the study and prediction of adaptive and maladaptive behaviours and its processes across lifespan. It also enables students to understand different diagnostic and educational models of psychopathology.

**Course Content:**

**Module I: Classification and Theoretical Models**

Systems of Classification, basic features; DSM-IV TR, ICD-10, similarities and differences

Major Theoretical Models of Psychopathology: The medical model, Psychoanalytic model, Behaviouristic model, Humanistic-existential models, Interpersonal approach, Systems approach.

**Module II: Diagnosis and Prognosis**

Problems and methods of diagnosis: physiological examination, observation, case-history, interview method, psycho-diagnostic tests, measures of bodily functions, computer assisted diagnosis.

**Module III: Mood and Anxiety Disorder**

Bipolar disorders: Manic, Depressive, Mixed

Depressive disorder: Major depression and dysthymia, Suicide

Anxiety Disorders: Generalized anxiety disorder, phobia, panic disorder, post traumatic stress disorder and obsessive compulsive disorder

**Module IV: Major Clinical Disorders**

Schizophrenia

Other psychotic disorders: Bipolar, Delusional, psychotic depression

**Module V: Somatoform Disorders**

Conversion disorder, Somatization disorder, Hypochondriasis, Body dysmorphic disorder, Pain disorder

**Module VI: Disorders of Infancy, Childhood and Adolescence**

Developmental disorder: PDD, Rett Disorder, Asperger Disorder,

Behavioral Disorder: Conduct Disorder, Hyperactivity Disorder, ADHD,

Genetic Disorders: Down Syndrome

**Module VII: Personality Disorder**

Personality Disorder: Narcissistic Personality, Histrionic Personality, Antisocial (Psychopathic)

Personality, Borderline Personality, Paranoid Personality, and Schizotypal Personality

**Module VIII: Sexual Dysfunctions and Paraphilias**

Dysfunctions of Desire, Arousal, Orgasm and Pain

Paraphilias, Paedophilia and Rape

Gender identity disorders

Impotence and frigidity

Causes, preventing suicide

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# PSYCHOLOGICAL ASSESSMENT AND DIAGNOSIS

**Course Code: PSY4202**

**Credit Units: 03**

## **Course Objective:**

The course teaches the students about the characteristics, objectives and wide ranging effects of psychological testing. It further describes the various testing methodologies and outlines capabilities and limitations of these methods.

## **Course Contents:**

### **Module I: Introduction**

Purpose of testing, types of test used, Bias & Fairness  
Ethical Issues in Psychological Testing  
Overview of Tests  
Norms, Scoring Interpretation and Report Writings  
Issues in measurement  
Emerging trends of online testing

### **Module II: Cognitive functions and their assessment**

Concept of Attention, Gestalt Theory, Memory and Forgetting, PGI Memory Scale  
Theories of Intelligence  
Intelligence Tests:

**Slosson Intelligence Test** – Revised For Children and Adults (SIT-3/R)  
Bhatia Battery  
Wechsler's Adult Performance Intelligence Scale (WAPIS)  
Raven's Progressive Matrices (Colour Progressive Matrices, Standard Progressive Matrices and Advanced Progressive Matrices)  
Binet Kamat Test  
Wechsler's Intelligence Scale for Children – Revised (WISC)  
Wide Range Intelligence Test (WRIT)  
Alexander Pass-a-long Test of Intelligence  
Draw-A-person Intellectual Ability Test for Children, Adolescents and Adults (DAP:IQ)

### **Module III: Achievement Test**

Wechsler Individual Achievement Test (WIAT)  
**Diagnostic Achievement Test For Adolescents – Second Edition (DATA-2)**  
Kaufman Test of Educational Achievement (KTEA)  
Woodcock-Johnson Tests of Achievement (WJ)

### **Module IV: Assessment of Personality: Non-Projective Test**

Cattell's 16 Personality Factor Inventory (16 PF)  
California Q-Sort Tests  
Myers Briggs Type Indicator (MBTI)  
Minnesota Multiphasic Personality Inventory (MMPI)  
**Personality Inventory for Children**  
**OMNI Personality Inventory (OMNI)**  
Bell's Adjustment Inventory  
Eysenck's Personality Questionnaire  
NEO™ Personality Inventory-3 (NEO™-PI-3) Adult / Adolescent

## **Module V: Assessment of Personality: Projective Tests**

Introduction of Projective Techniques

Difference between Projective & Non-Projective Techniques

Thematic Apperception Test

**Rorschach Inkblot Test**

**House-Tree-Person (H-T-P)**

Sentence Completion Test

## **Module VI: Developmental Scales**

Developmental Screening Test

Vineland's Social Maturity Scale

Measures of Psychosocial Development (MPD)

Gesells' Developmental Schedule

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	8	10	7	5	70

# CHILD PSYCHOLOGY

**Course Code: PSY4203**

**Credit Units: 02**

## **Course Objective:**

Child Psychology is extremely important and tell us about the nature and development of children. This course introduces the methods, theories and main concepts used by psychologists to develop a real insight into the world of children. This study is intended for students of psychology, those training to work with children in a variety of professional roles, or anyone just interested in understanding how children develop. By studying child psychology, students can

- understand and accurately predict a reasonable norm for child development.
- understand children and equip them to become well-adjusted, more adaptable adults who are capable of living rich and varied lives.
- help our children through crises and enrich their daily lives by interacting with them in ways that are appropriate to their developmental levels.

## **Course Contents:**

### **Module I: Introduction**

Definition and Concept of Childhood

Early history and beginnings of child psychology

Biological factors in Child Psychology (Prenatal, Natal and New-Natal Development,

Nature vs Nurture: Genetics and Social atmosphere

Methods- Self Reports: Parental reports, Children's reports. Case Study, Experimental method,

Design- Longitudinal, Cross Sectional Sequential and Correlation

### **Module II: Biological Foundation**

Biology and Heredity: Cell Division, The genetic code- Chromosome, DNA, Sex cells, Multiple offspring; Patterns of genetic inheritance: Dominant and Recessive,

Stages in Prenatal Development: The germinal period; the period of embryo, the period of foetus

Influences on Prenatal Development

Child Birth: The states of normal labour: Birth complication- Anoxia, Preterm and Low Birth weight infants

New Born: Sleeping- Sudden Infant Death Syndrome (SIDS); Crying; Feeding; All the reflexes

### **Module III: Major Schools of Child Psychology**

Psychoanalytic perspective (Freud and Erickson)

Behaviorist perspective- Social Learning Theory,

Piaget's Theory of Cognitive Development

Vygotsky's Theory of Socio-cognitive Development

Erikson's Eight Stages of Development

### **Module IV: Motor, Sensory and Cognitive Development**

Motor Development: contributions of Motor Development, Principles of Motor Development, Sequence of Motor Development and Motor Skills,

Environmental influences on motor development

Sensory Development: Vision, hearing, taste and smell, cutaneous senses, early deprivation and enrichment of senses.

Cognitive development- Structure and processes, stages, Evaluation

**Module V: Development of Language**

Language Development- What is Language, Components of language and its development

Pre-linguistic development- receptivity to language, first speech sound

Bilingual vs Multilingualism

Responsive communication and Verbal communication

**Module VI: Emotional, Social and Moral Development**

Early emotional development- Smiling, laughter, attachment, fear, jealousy, aggression, Izzard's Theory of Differential Emotions

Emotional Intelligence, Social intelligence

Social Development- Agents of socialization: Family-Parental control, sibling relationship; School; Peer group; Media- TV, books/journals, computers

Meaning of moral behavior, Patterns of moral development, Kohlberg's Theory

Meaning of discipline, essentials and techniques of discipline, evaluation of discipline

**Module VII: Situational and Applied Child Psychology**

Family dynamics

Peer relationships

Sibling relationships and birth order

Effects of divorce

Developing self-esteem

Understanding red flags

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:****Text:**

# NON-PARAMETRIC STATISTICAL METHOD

**Course Code: PSY4204**

**Credit Units: 03**

**Course Objective:** The Present paper focuses on providing knowledge about the basics of nonparametric statistics. It will give clear understanding about differences between Parametric & Nonparametric Test Procedures. This paper will

1. Explain commonly used Nonparametric Test Procedures.
2. Perform Hypothesis Tests Using Nonparametric Procedures.
3. Going to teach student how to use SPSS with non-parametric statistics.

## **Course Contents:**

### **Module 1: Basics**

What is Non-Parametric statistics: Nature, Meaning and Concept strengths and limitations of non-parametric procedures

Parametric VS Non- Parametric Statistics

Four Levels of Measurement and Non-parametric statistics

### **Module 2: Tests of differences between Groups and Variables**

The Friedman Two-way analysis of variance by ranks-Basic concepts, uses and computations

Test of differences between groups (Independent samples): Mann-Whitney U test computations, Kolmogorov-Smirnov test, uses

Test of differences between variables (Dependent samples): Kruskal-Wallis ANOVA analysis of ranks, K-Sample Median test, uses and concepts

### **Module 3: Nominal Measures of Correlations**

Concept definition assumptions of Nominal Measures of Correlations

The Phi-Coefficient, Contingency coefficient concepts uses and calculations

Tetrachoric: Its uses, computation and comparison

### **Module 4: Chi-Square**

Concept and Definition, its assumptions and use

Chi-Square Goodness of Fit (One-Sample Test)

Chi-Square Test of Independence

### **Module 5: Introduction to SPSS and Non-parametric statistics in SPSS**

Introduction to SPSS, its usage and functioning

Understanding the concepts of Non-Parametric tests in SPSS

Learning data entry

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# HEALTH PSYCHOLOGY

**Course Code: PSY4205**

**Credit Units: 02**

## **Course Objective:**

- To give a better understanding of the concept of health and it's various functions to understand its role in human behaviour.
- To acquaint the students with nature and significance of emerging areas of health psychology.
- To highlight the role of social, psychological and behavioural risk factors in health promotion and disease prevention.
- To introduce the students to types of stressors, their consequences, cognitive behavioural interventions for managing stress.
- To impart knowledge about causes and intervention for some prevalent stress related disorders / addictions.

## **Course Content:**

### **Module I: Introduction to Health**

Historical background; Aims and Objectives of Health Psychology, Challenges for the future  
Significance of Health Behaviour, Theory of Planned Behaviour: Attributive Theory, Health Locus of Control

### **Module II: Social Support & Health**

Factors for Personality & Health Link, Types of Social Support, Link between social support & Health, Cross Cultural Images of Health

### **Module III: Life Style Disorder**

CAD, CHD, Hypertension, Stroke, Obesity, peptic ulcer, Migraine, Asthma, and Diabetes: Overview, Implications & Management.

### **Module IV: Health Enhancing Behaviour**

Stress: Meaning, Dimensions and Coping Strategies.  
Improving Health & Well Being, Enhancing Support  
Maintenance of Health: Diet and Nutrition, Relaxation Techniques: Jacobson Progressive Relaxation, Brotha's Relaxation Response

### **Module V: Health Behaviour Modification**

Cognitive Behavioural approach, Relapse Prevention, Attitude & Health-Belief Model  
Models of Mental Health: Clinical, Community and Social Action Model

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## PRACTICUM- II

**Course Code: PSY4207**

**Credit Units: 03**

**Course Objective:**

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To encourage and guide the students to undertake a small-scale research project.
4. To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the second semester among the list of following practicals**

**Course Content:**

1	Slosson Intelligence Test – Revised For Children and Adults (SIT-3/R)	Intelligence
2	Diagnostic Achievement Test For Adolescents – Second Edition (DATA-2)	Achievement
3	House-Tree-Person (H-T-P)	Personality: Projective
4	Rorschach Ink Blot Test	Personality: Projective
5	Personality Inventory for Children scoring kit	Personality:
6	OMNI Personality Inventory (OMNI) Introductory Kit	Personality:

**Text & References:**

**Examination Scheme:**

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

## **FIELD PRACTICE-II**

**Course Code: PSY4208**

**Credit Units: 04**

### **Course Objective:**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme:**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

## SCIENTIFIC RESEARCH PAPER

**Course Code: PSY4209**

**Credit Units: 01**

### **Course Objective:**

The scientific research papers for Masters Students is to enhance the reading and writing habits of the students and to make them aware about the process of carrying out a research work. This helps them to develop insight into the course they are studying which creates an academic interest among the students. Presentation of the term paper plays an important role as it facilitates knowledge sharing and improvement in presentation skills which will further enhance the confidence of the students. The overall objective of this term paper is to develop research orientations in students and to make them understand and enhance skills in Research Methodology.

### **Guidelines for Research Article or Scientific Papers:**

Topic

Introduction

Review Research

Objective

Methodology

Discussion

Conclusion

References & Bibliography

No. of pages in the compilation of the paper 25-30 (minimum 25 pages)

### **Examination Scheme:**

<b>Components</b>	<b>Compilation</b>	<b>Viva</b>	<b>Presentation</b>
<b>Weightage (%)</b>	50	25	25

## **Syllabus – Third Semester**

### **RESEARCH METHODS: EXPERIMENTAL DESIGN**

**Course Code: PSY4301**

**Credit Unit: 02**

**Course Objective:**

Research Methodology is a way to find out the result of a given problem on a specific matter or problem that is also referred as research problem. In Methodology, researcher uses different criteria for solving/searching the given research problem. Different sources use different type of methods for solving the problem. So this course will enable the student to understand and apply basic research methods in psychology including research design, data analysis and report findings research conclusion apparently based on the parameters of particular research methods.

**Course Contents:**

**Module I: Introduction to Research**

Meaning of Scientific Research  
Objectives and Steps in Scientific Research  
Defining research problem  
Defining variables  
Developing hypothesis

**Module II: Evaluating Measures and Hypothesis**

Need For Evaluating Measures  
Reliability and Validity  
Hypothesis testing: Type1 and Type 2  
Going beyond hypothesis testing: Effect size and Power

**Module III: Validity of Experimental Researches and Threats to them**

Statistical Conclusion validity  
Construct validity and External Validity  
Establishing the cause and Effect  
Single Group threat, Multiple Group threats, Social threats

**Module IV: Experimental Designs-I**

Two-Group experimental designs  
    Within-subject Design  
    Between-subject design  
    General Linear Model

**Module V: Experimental Designs-II**

Factorial designs  
Randomized Block designs  
Hybrid Experimental Designs: Solomon four group designs  
Mixed designs

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# PSYCHOTHERAPY

**Course Code: PSY4302**

**Credit Units: 03**

## **Course Objective:**

The course enables students to learn various therapies and their applications in counselling field. The course aims to enable participants to acquire the development and therapies in counselling which can be used in a variety of settings, and also to understand the importance of the development of personal awareness in the effective application of counseling skills.

## **Course Contents:**

### **Module I: Introduction**

Psychotherapy: Meaning, Nature & Scope

Variables affecting Psychotherapy: Specific Variables: Client Variable, Therapist Variable, Process variables, Social & Environmental Variable

Non-Specific Variables: Spontaneous cure, Placebo Effect

Currents and Future Trends of Psychotherapy

### **Module II: Psychotherapy in India**

Psychotherapy in the Indian context

Spirituality and psychotherapy

Yoga and Meditation

### **Module III: Varieties of Psychotherapy**

Supportive therapy

Re-educative Therapy

Re-constructive therapy

Counselling vs. Psychotherapy

### **Module IV: Psychoanalytic Therapies**

Freud's Psycho-analytic Therapy, Adlerian Psychotherapy, Brief Dynamic Therapies

### **Module V: Humanistic Therapies**

Client-Centered Therapy, Existential Therapy and Gestalt Therapy

### **Module VI: Behavioral and Cognitive Behavior Therapy**

Behavioral therapy, Cognitive Behavior therapy, Rational Emotive Behavior Therapy (Ellis)

### **Module VII: Few more Important Therapies**

Family, Marital and Interpersonal Therapy

Therapies with Children and Adolescents

Group Therapy

### **Module VIII: Therapeutic Guidelines while working with**

Women, Older clients, Clients with personality disorder

Grief and loss

Self-harm

Persons from disadvantaged context

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# CLINICAL PSYCHOLOGY

**Course Code: PSY4303**

**Credit Units: 03**

## **Course objective:**

Clinical psychology is the branch of psychology concerned with the assessment and treatment of mental illness, abnormal behavior and psychiatric problems. This field integrates the science of psychology with the treatment of complex human problems, making it an exciting career choice for people who are looking for a challenging and rewarding field.

## **Course Contents:**

### **Module I: Introduction**

Meaning and Nature of Clinical Psychology

Background of Clinical Psychology: First Fifty years of Clinical Psychology (Establishment of Psychological Clinics and Influence of World War I)

Clinical Psychology: between World War I and II; From World War II to Present

### **Module II: Foundation of Clinical Psychology**

Historical origin, the Psychometric tradition, the influence of health and child guidance movement, the influence of Sigmund Freud & the American Psychologist's in America.

The influence of World War II on development of Clinical Psychology

Roots of Clinical Psychology in India: the pre-independence phase, post independence to the present scenario.

### **Module III: Development of clinical Psychology as a profession.**

Activities of Clinical Psychologist: psychological assessment, Psychotherapy, research, community mental health programme, teaching, consultation, administration.

Differences & similarities with other mental health professions

Subspecialties of clinical Psychology: Clinical health Psychology, Forensic Psychology, Geropsychology, Clinical Neuropsychology, and child clinical psychology.

Professional identity, responsibilities

### **Module IV: Diagnosis and assessment.**

Nature and purpose of Clinical diagnosis & assessment

Stages in the Assessment Process

Clinical Assessment Techniques: observation, interview, case-study, Psychological tests.

### **Module V:**

Employment Setting for Clinical Psychologist

Subspecialties of Clinical Psychology

Organizations in Clinical Psychology

Ethical and Legal Issues in Clinical Psychology

Cultural issues, current scenario & future prospects.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	8	10	7	5	70

## **Text & References**

## PRACTICUM- III

**Course Code: PSY4308**

**Credit Units: 03**

### Course Objective:

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To encourage and guide the students to undertake a small-scale research project.
4. To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the third semester among the list of following practicals**

### Course Content:

1	Measures of Psychosocial Development (MPD)	Development
2	Culture Free Self-Esteem Inventories, 3 <sup>rd</sup> Edition	Self-Esteem
3	State-Trait Anger Expression Inventory-2 <sup>TM</sup> (STAXI-2)	Anger
4	Personality Inventory for Youth	Personality
5	Family Relations Test: Children's Version	Interpersonal Relationship
6	Wide Range Intelligence Test (WRIT)	Intelligence

### Text & References:

- Mohsin, S. M.: Experiments in Psychology. Motilal Banarasidas
- Woodworth, R.S.: Experimental Psychology. Oxford & IBH & Schlosberg, H. Publishing
- Postman, L. & Egan, J. P.: Experimental Psychology: An Introduction. Harper and Row

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

## **FIELD PRACTICE-III**

**Course Code: PSY4309**

**Credit Units: 04**

### **Course Objective:**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme:**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

# SUMMER INTERNSHIP EVALUATION

Course Code: PSY4335

Credit Units: 06

## GUIDELINES FOR INTERNSHIP FILE AND INTERNSHIP REPORT

**(These guidelines will be useful for undertaking an internship programme during the summer or at any other time wherein the student/ researcher works full time with a company/organisation)**

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**).

### INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. *Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.*

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include *five sections* in the order described below.

1. **The Title Page** – An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content** – An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed

through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.

5. **Appendices** – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

## **INTERNSHIP REPORT**

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (In case a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report should be as per the standard layout prescribed by the organization wherein the student undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

➤ **Title or Cover Page.**

The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

➤ **Acknowledgements**

Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

➤ **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or

captions. All major equations should also be numbered and unless it is really necessary, do not write in “point” form.

While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

➤ **Conclusion(s) & Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly. Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

➤ **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

➤ **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**The Layout Guidelines for the Internship File & Internship Report:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

**Assessment Scheme:**

<b>Continuous Evaluation:</b> (based on Internship File and the observations of the faculty guide/ supervisor)	30%
<b>Feedback from Company/ Organization:</b>	10%
<b>Final Evaluation:</b> (Based on Internship Report, Viva/ Presentation)	60%

# COUNSELLING PSYCHOLOGY

**Course Code: PSY4304**

**Credit Unit: 03**

**Course Objective:** To produce graduates with a well-developed professional identity as counseling psychologists, including awareness and appreciation of context, development, and strength-based interventions. Thus, we seek to develop the professional skills of our students such that each is able to:

- Demonstrate understanding of the impact of multiple contexts on human behavior
- Demonstrate understanding of theories and techniques of developmentally-based health promotion and intervention for individuals, systems, and communities
- Appreciate the role of individual and cultural differences and diversity in human development and behavior

## **Course Contents:**

### **Module I: Introduction**

Meaning, Definition & Goals

Historical Background: Origin of Counseling within Philosophy and Medicine,

Influence from Psychology, Mental health development, the guidance movement and other influences

Difference between Counseling and other associated helping professions (psychotherapy, psychiatry, social work, guidance etc.)

### **Module II: Counseling Process**

Settings for counseling

Steps in counseling

Therapeutic relationship: The importance of relationship, components of relationship, Facilitative conditions for the counseling relationship

### **Module III: Counseling Approach: Insight oriented**

Psychodynamic Approach: Psychoanalytic, Adlerian

Humanistic Approach: Existential, Client-centered, Gestalt

### **Module IV: Counselling Approach: Action oriented & other approaches**

Behavioural Approach: Operant-Conditioning, Classical-Conditioning.

Cognitive Approach: Cognitive Therapy, Rational emotive therapy.

Other Approaches: Narrative Therapy, Expressive Therapy, and Biofeedback.

### **Module V: Current Issues in Counseling:**

Ethical Issues: Professional Codes, Our divided loyalties, Areas of ethical difficulty, recent trends

Legal Issues: Advice for the passionately committed counseling student

Mental Health Counseling

Counseling diverse population: Gender bias, Counseling the aged, the ethnic minorities, and the physically challenged

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# DEVELOPMENTAL PSYCHOLOGY

**Course Code: PSY4305**

**Credit Units: 03**

## **Course objective:**

To develop the understanding as to how developmental psychology focuses on the development of individuals across their lifespan within the context of family, peer groups, child-care and after-school programs, schools, neighborhoods, and larger communities and society. It considers the well-being of children, youth, and adults, vis-a-vis the cognitive, emotional, social, academic, and health domains

## **Course Contents**

### **Module 1: Background of Developmental Psychology**

Historical Background

Meaning, Nature and scope

Obstacles in studying Life-Span Development and its effect

### **Module2: Stages of Development**

General Patterns of Development

Stages of Development- Physical, Cognitive, Emotional, Social and Moral

### **Module 3: Theoretical perspective on Development**

Psychodynamic Theories: Freud, Erikson

Social Learning Theory: Albert Bandura

Cognitive Theory: Piaget

Attachment Theory: Bowlby

Socio Cultural Theory: Konrad-Lorens & Niko Tinbergen, Lev Vygotsky

Ecological Theory: Urie Bronfenbrenner

Ethology & Evolutionary Theory

### **Module 4: Development Related Disorders (DSM-IVTR and I.C.D-10)**

Pervasive Developmental Disorder: Autism

Specific Developmental Disorder of Speech and Language

Specific Learning Disabilities-Reading, Spelling, and Arithmetical Disorder

Behavioral Disorders: Attention Deficit Hyperkinetic Disorder, Conduct Disorder, Oppositional defiant Disorder

### **Module 5: Adjustment Related Issues.**

Adolescence: Psychological Hazards, Effects of Immaturity, and happiness in adolescence. Early Adulthood: Social Mobility, Sex-Role Adjustments, Personal & Social Hazards. Middle Age: Adjustment to Physical and mental changes, Vocational and marital hazards. Old Age: Changes in motor and mental abilities, Hazards to Personal and Social Adjustment.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>CT/H/P/V/Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	8	10	7	5	70

# NEURO-PSYCHOLOGY

**Course Code: PSY4306**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to give a better knowledge of brain and its various functions to understand its role in human behavior.

## **Course Contents:**

### **Module I: Introduction**

Understanding the concept of Neuropsychology  
The rationale for Neuropsychological evaluation  
Common problems with brain damage

### **Module II: Plasticity of Brain**

Neuropsychological aspect of plasticity of brain  
Cerebral cortex and lateralization / localization of functions

### **Module III: Frontal Lobe and Temporal Lobe Deficits**

Behavioural/ emotional/ personality/ cognitive changes associated with the lobe functions.

### **Module IV: Parietal and Occipital Lobes Deficits**

Behavioural / emotional/ cognitive functions associated with each lobe.

### **Module V: Neuropsychological Rehabilitation (Holistic Approach)**

Planning, process and outcome of cognitive retraining  
Role of family and larger community  
Financial/ employment Rehabilitation  
Neuropsychological Assessment

- Bender Gestalt Test
- Benton's Visual Retention Test

### **Module VI: Social Support and Health**

Factors for Personality and Health Link  
Types of Social Support  
Link between social support and Health  
Cross cultural images of health

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## Syllabus – Fourth Semester

### RESEARCH METHODS: NON-EXPERIMENTAL DESIGN

**Course Code: PSY4401**

**Credit Unit: 02**

**Course Objective:**

Research Methodology is a way to find out the result of a given problem on a specific matter or problem that is also referred as research problem. In Methodology, researcher uses different criteria for solving/searching the given research problem. Different sources use different type of methods for solving the problem. So this course will enable the student to understand and apply basic research methods in psychology including research design, data analysis and report findings research conclusion apparently based on the parameters of particular research methods.

**Course Contents:**

**Module I: Introduction**

Nature and Purpose of Non-Experimental Research Designs and their importance

Advantages and Disadvantages of Non-experimental Research Designs

Differences between Experimental and Non-Experimental Research Designs

Types or Non-experimental Designs: Pure Descriptive design, Correlational Descriptive Design and Other type

**Module II: Quasi- Experimental designs**

Quasi- experimental research designs: their uses and importance

One-Group Designs

Non-equivalent control group designs

Pretest-Posttest Control Group Design

**Module III: Non-Experimental Designs**

Quantitative Non-Experimental Designs, Causal Comparative

Qualitative and Quantitative perspectives: Collecting qualitative data: Case study, interview, Observational method. Discourse Analysis, Grand narrative analysis, Ethnographic methodology.

Time series Designs

**Module IV: Correlational Designs**

Correlational research design: Its Basic nature and uses

Kinds of Correlational designs: Panel Design, Cross-Sectional Design and Longitudinal Designs

Concept and application of Multiple Regression Analysis (linear and stepwise)

Factor analysis and Its Implications

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# MENTAL RETARDATION

**Course Code: PSY4402**

**Credit Units: 02**

**Course Objective:**

The paper on Mental Retardation introduces nature of mental retardation, its classification, assessment and intervention programs.

**Course Contents:**

**Module I:**

Mental Retardation: Definition of mental retardation, Classification-Psychological Classification Medical and Educational Classification, Causes and Prevention

**Module II:**

Mental Retardation: Psycho-educational Assessment, Intelligence Tests, FACP, BASIC-MR, BASAL-MR

**Module III:**

Mental Retardation: Enhancing Skills- CTC, IEP, Prompting, Task Analysis, Channing, Shaping, Modeling, Reinforcement

**Module IV:**

Mental Retardation: Reducing maladaptive behaviours- Assessment of maladaptive behaviours, plan of behavior modification, techniques for decreasing problem behavior.

**Module V:**

Vocational Training and Empowering families having child with Mental Retardation, Special Sports, Acts and Policies

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

**Text & References:**

**Text:**

## PRACTICUM- IV

Course Code: PSY4412

Credit Units: 03

### Course Objective:

1. To give practical experience to the students in administering and scoring psychological tests and interpreting the scores.
2. To acquaint the students with the basic procedure and design of psychology experiments.
3. To encourage and guide the students to undertake a small-scale research project.
4. To apply the general concepts of psychology through experimentation and testing

**Note: Total 5 practicals will be conducted in the fourth semester among the list of following practicals**

### Course Content:

1	NEO-4™ - Comprehensive Kit	Personality
2	Comprehensive Test of Non-verbal Intelligence-Second Edition (CTONI-2)	Intelligence
3	Neuropsychological Assessment Battery® (NAB®) Attention Module Kit	Attention
4	Detroit Tests of Learning Aptitude - Fourth Edition (DTLA-4)	Learning
5	Reynolds Intellectual Assessment Scales (RIAS)	Intelligence
6	General Health Questionnaire (GHQ)	Health

### Examination Scheme:

Components	A	File Demonstration	Viva	EE
Weightage (%)	5	35	35	25

### Text & References:

- Mohsin, S. M.: Experiments in Psychology. Motilal Banarasidas
- Woodworth, R.S.: Experimental Psychology. Oxford & IBH & Schlosberg, H. Publishing
- Postman, L. & Egan, J. P.: Experimental Psychology: An Introduction. Harper and Row

## **FIELD PRACTICE-IV**

**Course Code: PSY4413**

**Credit Units: 04**

### **Course Objective:**

To develop, in students the skills of observation, collection and documentation of data for conducting theoretically correct and practically relevant research

### **Methodology**

Each student will engage themselves in interaction and observation of psychological processes in a subject/ field of their choice.

Student will then present their findings in the form of a paper for seminar discussions.

Similarly, field work will be done by students in their area of interest and present their practical observations, as a report with analysis and suggestions.

### **Examination Scheme:**

Field/Seminar Report	: 40 marks
Viva-Voce	: 30 marks
Internal Faculty and Interaction	: 10 marks
Presentation/Daily Diary Report	: 20 marks

# DISSERTATION

**Course Code: PSY4437**

**Credit Units: 06**

## GUIDELINES FOR DISSERTATION

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### Selecting the Dissertation Topic

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

### Planning the Dissertation

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

### The Dissertation plan or outline

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.

- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

### **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct a direct quotation and what is your paraphrase.

### **Dissertation format**

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary.**
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required:

Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

### **The Layout Guidelines for the Dissertation:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5

- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

### **Assessment Scheme:**

<b>Continuous Evaluation:</b> (Based on Abstract, Regularity, Adherence to initial plan, Records etc.)	40%
<b>Final Evaluation:</b> Based on,	60%
Contents & Layout of the Report,	25
Conceptual Framework,	10
Objectives & Methodology and	10
Implications & Conclusions	15

# REHABILITATION PSYCHOLOGY

**Course Code: PSY4404**

**Credit Unit: 03**

## **Course Objective:**

Objective of this course is to learn profession of Rehabilitation Psychology, Psychological Assessment of persons with disabilities, Psychological Interventions and dealing with families

## **Course Contents:**

### **Module I:**

Overview of the profession of Rehabilitation Psychology and practice, history, growth and scope, Role of Psychologist in Rehabilitation

### **Module II:**

Psychological Assessment- Assessment of Cognition, aptitudes, psychopathology, work/vocational and daily functioning

### **Module III:**

Health behavior: Theories of health behavior change, interventions strategies for individuals and families of disabled

Behaviour Modification and Cognitive Therapies in Rehabilitation

### **Module IV:**

Dealing with Families- Family's reactions to disabilities, coping styles, family counseling, Coordination with Multidisciplinary team

### **Module V:**

Community Based Rehabilitation – Goals of CBR, components of CBR, Role of Professionals, role of Community, Ethical Issues

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## **Text & References:**

### **Text:**

# CHILDHOOD PATHOLOGY AND EXCEPTIONAL CHILDREN

**Course Code: PSY4405**

**Credit Unit: 03**

## **Course Objective:**

Objective of this course is to learn various categories of exceptionality, early identification, special and mainstream education

## **Course Contents:**

### **Module I:**

Developmental Disorders- Autism Spectrum Disorders, attention deficit hyperactivity disorder, Mental Retardation, Learning Disabilities, Hearing Impairment, Disability of Locomotion

### **Module II:**

Bipolar disorder in children, conduct disorder, emotional disorders, eating disorders, enuresis  
Psychological Assessment of Childhood disorders

### **Module III:**

Special Education: Special Schools and Rehabilitation centres  
Mainstreaming: assistive devices, adaptation, barrier free environment  
Mainstreaming: Attitudinal change- teachers, non disabled students, Parents and Community

### **Module IV:**

National Institutes in the field of disability: NIMH, NIVH, NIOH, AYJNIHH, NIEPMD, SVNIRTAR, Alimbco.  
NGOs, Parent Organizations, Advocacy organization

### **Module V:**

Legislative framework: Mental Health Act, RCI Act, Persons with Disability Act, National Trust Act, UNCRPD

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

# PSYCHOTHERAPEUTIC INTERVENTION IN CLINICAL SETTING

**Course Code: PSY4406**

**Credit Unit: 03**

## **Course Objective:**

To equip students with the basic understanding of various types of therapies and their implications in different clinical settings

## **Course Contents**

### **Module I: Introduction**

Psychotherapy Overview of historical developments and current trends in psychotherapy, issues related to consent (assent in case of minors), planning and recording of counseling session; and setting goals; pre and post assessment, interviewing: objectives of interview, structured and unstructured interview, open and close ended questions, clarification, reflection, facilitation and confrontation, silences in interviews.

### **Module II: Behavior Therapy**

Origin, Foundations; Principles and Methodologies, behavioral assessment, formulation and behavioral goals Systematic desensitization (in vivo and in vitro); Extinction: Flooding and Response Prevention, Implosion, Covert Sensitization, Negative Practice and stimulus satiation. Skill training: Assertiveness Training; Modeling; Behavioral Rehearsal. Operant procedures: Token economy, Contingency management. JPMR and Biofeedback

### **Module III: Cognitive Therapy**

Cognitive behavior therapy: Cognitive model; automatic negative thoughts, schemas principles and assumptions, technique: Ellis's Rational Emotive Behavior Therapy (REBT) and Beck's cognitive therapy, dialectical behavior therapy

### **Module IV: Therapy in Special Condition**

Chronic mental illness, Substance Abuse, Learning Disabilities and Mental retardation and such other conditions, where integrative/eclectic approach is the basis of clinical intervention

### **Module V: Biomedical Therapy**

Electro-convulsive therapy, Drug therapy-Antipsychotic drugs, Anti depressant drugs and Anti anxiety drugs

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## **Text & References:**

# DIFFERENTIAL DIAGNOSTIC TECHNIQUES

**Course Code: PSY4407**

**Credit Unit: 03**

## **Course Objective:**

Enable students to selecting an appropriate test for a particular purpose, administration, scoring and interpreting psychological test profile in clinical settings

## **Course Contents**

### **Module I: Introduction**

Case history; mental status examination; rationale of psychological test; behavioral observation, response recording and syntheses of information from different sources; formats of report writing, context of clinical assessment, types of referrals, ethical practice of assessment, selecting psychological tests.

### **Module II: Assessment of Cognitive Functions**

Bender gestalt test, PGI Memory scale; Bhatia's battery of performance tests of intelligence  
Binet's test of intelligence, Wechsler adult intelligence scale

### **Module III: Test for Differential Diagnosis**

Tests for diagnostic clarification: A) Rorschach psychodiagnostics, B) Tests for thought disorders – color form sorting test, object sorting test, proverbs test, C) Minnesota multiphasic personality inventory; Multiphasic questionnaire, clinical analysis questionnaire, IPDE, D) screening instruments such as GHQ, hospital anxiety/depression scale etc. to detect psychopathology.

### **Module IV: Tests for Adjustment and Personality Assessment**

Questionnaires and Inventories – 16 personality factor questionnaire, NEO-5 personality inventory, temperament and character inventory, Eysenck's personality inventory, Eysenck's personality questionnaire, self-concept and self esteem scales, Rottor's locus of control scale, Bell's adjustment inventory (students' and adults'), subjective well-being questionnaires, QOL

Projective tests – sentence completion test, picture frustration test, draw-a-person test; TAT – Murray's and Uma Chowdhary's

### **Module V: Therapy in Special Condition**

Psychological assessment of children: A) Developmental psychopathology check list, CBCL, B) Administration, scoring and interpretation of tests of intelligence scale for children such as SFB, C- 42 RPM, Malin's WISC, Binet's tests, and developmental schedules (Gesell's, Illingworth's and other) Vineland social maturity scale.

# COMMUNITY PSYCHOLOGY AND INTERVENTION

**Course Code: PSY4408**

**Credit Units: 03**

## **Course Objective:**

This course provides an introduction to the community psychology. Rehabilitation and human service system and professionally prepares the students for becoming rehabilitation counselors. It lays emphasis on the stands, approaches and contemporary issues related to community and rehabilitation psychology.

## **Course Contents**

### **Module I: Rehabilitation**

Case history; mental status examination; rationale of psychological test; behavioral observation, response recording and syntheses of information from different sources; formats of report writing, context of clinical assessment, types of referrals, ethical practice of assessment, selecting psychological tests

### **Module II: Health Behavior**

Theories of Health Behavior Change, Interventions Strategies For Individuals And Families of Disabled, Models Of Therapeutic Education For Successful Rehabilitation

### **Module III: Community issues**

Evaluation of community needs, rehabilitation in community, social counseling, training in daily living skills, community awareness raising and increasing community involvement, facilitating access to loans, vocational training, information for local self-help groups, contacts with different authorities, school enrolment .

### **Module IV: Psychotherapy in the Indian Context**

Historical perspective in psychological healing practices from the Vedic period and the systems of Ayurveda and Yoga, contemporary perspectives; socio-cultural issues in the Indian context in practice of psychotherapy; ongoing research related to process and outcome.

### **Module V: Mental Health Policies of Government (National Mental Health Program, Mental Health Act)**

## **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	8	10	7	5	70

## PROGRAMME STRUCTURE OF BEHAVIOURAL SCIENCE COURSES BEING OFFERED IN VARIOUS PROGRAMMES

### UNDERGRADUATE -4 YEAR PROGRAMMES AND UNDERGRADUATE –INTEGRATED LAW PROGRAMMES (BA LLB, B.COM LLB & BBA LLB)

Semester	Course Code	Course Title	Lectures (L) Hours per week	Tutorial (T) Hours per week	Practical (P) Hours per week	Total Credits
1	BEH2151	Understanding Self for Effectiveness	1	-	-	1
2	BEH2251	Problem Solving and Creative Thinking	1	-	-	1
3	BEH2351	Group Dynamics and Team Building	1	-	-	1
4	BEH2451	Stress and Coping Strategies	1	-	-	1
5	BEH2552	Personality, Nationalism and Human Values	1	-	-	1
6	BEH2652	Interpersonal Communication	1	-	-	1
7	BEH2751	Relationship Management	1	-	-	1
8	BEH2851	Personal & Professional Excellence	1	-	-	1

### UNDERGRADUATE -3YEAR PROGRAMMES

Semester	Course Code	Course Title	Lectures (L) Hours per week	Tutorial (T) Hours per week	Practical (P) Hours per week	Total Credits
1	BEH2151	Understanding Self for Effectiveness	1	-	-	1
2	BEH2251	Problem Solving and Creative Thinking	1	-	-	1
3	BEH2351	Group Dynamics and Team Building	1	-	-	1
4	BEH2451	Stress and Coping Strategies	1	-	-	1
5	BEH2551	Individual, Society and Nations	1	-	-	1
6	BEH2651	Interpersonal Communication and Relationship Management	1	-	-	1

## POSTGRADUATE PROGRAMMES

Semester	Course Code	Course Title	Lectures (L) Hours per week	Tutorial (T) Hours per week	Practical (P) Hours per week	Total Credits
1	BEH4151	Self-Development and Interpersonal Skills	1	-	-	1
2	BEH4251	Behavioural Communication and Relationship Management	1	-	-	1
3	BEH4351	Leading Through Teams	1	-	-	1
4	BEH4451	Professional Excellence	1	-	-	1

## INTEGRATED PROGRAMMES (UNDERGRADUATE-POSTGRADUATE)

Semester	Course Code	Course Title	Lectures (L) Hours per week	Tutorial (T) Hours per week	Practical (P) Hours per week	Total Credits
1	BEH2151	Understanding Self for Effectiveness	1	-	-	1
2	BEH2251	Problem Solving and Creative Thinking	1	-	-	1
3	BEH2351	Group Dynamics and Team Building	1	-	-	1
4	BEH2451	Stress and Coping Strategies	1	-	-	1
5	BEH2551	Individual, Society and Nations	1	-	-	1
6	BEH2651	Interpersonal Communication and Relationship Management	1	-	-	1
7	BEH4151	Self-Development and Interpersonal Skills	1	-	-	1
8	BEH4451	Professional Excellence	1	-	-	1
9	BEH4351	Leading Through Teams	1	-	-	1

# **SYLLABUS-UNDERGRADUATE-4 YEAR PROGRAMMES & UNDERGRADUATE- INTEGRATED LAW PROGRAMMES (BA LLB, B.COM LLB & BBA LLB)**

## **Syllabus - First Semester**

### **UNDERSTANDING SELF FOR EFFECTIVENESS**

**Course Code: BEH2151**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting:

- Understanding self & process of self exploration
- Learning strategies for development of a healthy self esteem
- Importance of attitudes and its effective on personality
- Building Emotional Competence

**Course Contents:**

**Module I: Self: Core Competency**

Understanding of Self

Components of Self – Self identity

Self concept

Self confidence

Self image

**Module II: Techniques of Self Awareness**

Exploration through Johari Window

Mapping the key characteristics of self

Framing a charter for self

Stages – self awareness, self acceptance and self realization

**Module III: Self Esteem & Effectiveness**

Meaning and Importance

Components of self esteem

High and low self esteem

Measuring your self esteem

**Module IV: Building Positive Attitude**

Meaning and nature of attitude

Components and Types of attitude

Importance and relevance of attitude

**Module V: Building Emotional Competence**

Emotional Intelligence – Meaning, components, Importance and Relevance

Positive and Negative emotions

Healthy and Unhealthy expression of emotions

**Module VI: End-of-Semester Appraisal****Viva based on personal journal****Assessment of Behavioural change as a result of training**

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

Components	SAP	Journal for Success (JOS)	A	Mid Term Test / CT / Assignment	VIVA / Presentation
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

# Syllabus – Second Semester

## PROBLEM SOLVING AND CREATIVE THINKING

**Course Code:** BEH2251

**Credit Units:** 01

**Course Objective:**

To enable the students:

- Understand the process of problem solving and creative thinking.
- Facilitation and enhancement of skills required for decision-making.

**Course Contents:**

**Module I: Thinking as a tool for Problem Solving**

What is thinking: The Mind/Brain/Behaviour

Critical Thinking and Learning:

- Making Predictions and Reasoning
- Memory and Critical Thinking
- Emotions and Critical Thinking

Thinking skills

**Module II: Hindrances to Problem Solving Process**

Perception

Expression

Emotion

Intellect

Work environment

**Module III: Problem Solving Process**

Recognizing and Defining a problem

Analyzing the problem (potential causes)

Developing possible alternatives

Evaluating Solutions

Resolution of problem

Implementation

Barriers to problem solving:

- Perception
- Expression
- Emotion
- Intellect
- Work environment

**Module IV: Plan of Action**

Construction of POA

Monitoring

Reviewing and analyzing the outcome

**Module V: Creative Thinking**

Definition and meaning of creativity

The nature of creative thinking

- Convergent and Divergent thinking

- Idea generation and evaluation (Brain Storming)
- Image generation and evaluation
- Debating

The six-phase model of Creative Thinking: ICEDIP model

### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

### **Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

# Syllabus – Third Semester

## GROUP DYNAMICS AND TEAM BUILDING

**Course Code: BEH2351**

**Credit Units: 01**

**Course Objective:**

To inculcate in the students an elementary level of understanding of group/team functions.  
To develop team spirit and to know the importance of working in teams.

**Course Contents:**

**Module I: Group formation**

Definition and Characteristics  
Importance of groups  
Classification of groups  
Stages of group formation  
Benefits of group formation

**Module II: Group Functions**

External Conditions affecting group functioning: Authority, Structure, Org. Resources, Organizational policies etc.  
Internal conditions affecting group functioning: Roles, Norms, Conformity, Status, Cohesiveness, Size, Inter group conflict.  
Group Cohesiveness and Group Conflict  
Adjustment in Groups

**Module III: Teams**

Meaning and nature of teams  
External and internal factors effecting team  
Building Effective Teams  
Consensus Building  
Collaboration

**Module IV: Leadership**

Meaning, Nature and Functions  
Self leadership  
Leadership styles in organization  
Leadership in Teams

**Module V: Power to empower: Individual and Teams**

Meaning and Nature  
Types of power  
Relevance in organization and Society

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal  
Assessment of Behavioural change as a result of training  
Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

Components	SAP	Journal for Success (JOS)	A	Mid Term Test / CT / Assignment	VIVA / Presentation
Weightage (%)	25	10	5	30	30

# Syllabus - Fourth Semester

## STRESS AND COPING STRATEGIES

**Course Code: BEH2451**

**Credit Units: 01**

**Course Objective:**

To develop an understanding the concept of stress its causes, symptoms and consequences.

To develop an understanding the consequences of the stress on one's wellness, health, and work performance.

**Course Contents:**

**Module I: Stress**

Meaning & Nature

Characteristics

Types of stress

**Module II: Stages and Models of Stress**

Stages of stress

The physiology of stress

Stimulus-oriented approach.

Response-oriented approach.

The transactional and interactional model

Pressure – environment fit model of stress

**Module III: Causes and symptoms of stress**

Personal

Organizational

Environmental

**Module IV: Consequences of stress**

Effect on behaviour and personality

Effect of stress on performance

Individual and Organizational consequences with special focus on health

**Module V: Strategies for stress management**

Importance of stress management

Healthy and Unhealthy strategies

Peer group and social support

Happiness and well-being

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

Components	SAP	Journal for Success (JOS)	A	Mid Term Test / CT / Assignment	VIVA / Presentation
Weightage (%)	25	10	5	30	30

## Syllabus – Fifth Semester

### PERSONALITY, NATIONALISM AND HUMAN VALUES

**Course Code: BEH2552**

**Credit Units: 01**

**Course Objective:**

This course aims at enabling students towards:

Understand the importance of individual differences

Better understanding of self in relation to society and nation

Facilitation for a meaningful existence and adjustment in society

Inculcating patriotism and national pride

**Course Contents:**

**Module I: Individual differences & Personality**

Personality: Definition & Relevance

Importance of nature & nurture in Personality Development

Importance and Recognition of Individual differences in Personality

Accepting and Managing Individual differences (adjustment mechanisms)

Intuition, Judgement, Perception & Sensation (MBTI)

BIG5 Factors

**Module II: Managing Diversity**

Defining Diversity

Affirmation Action and Managing Diversity

Increasing Diversity in Work Force

Barriers and Challenges in Managing Diversity

**Module III: Socialization**

Nature of Socialization

Social Interaction

Interaction of Socialization Process

Contributions to Society and Nation

**Module IV: Patriotism and National Pride**

Sense of pride and patriotism

Importance of discipline and hard work

Integrity and accountability

**Module V: Human Rights, Values and Ethics**

Meaning and Importance of human rights

Human rights awareness

Values and Ethics- Learning based on project work on Scriptures like- Ramayana, Mahabharata, Gita etc.

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

# Syllabus – Sixth Semester

## INTERPERSONAL COMMUNICATION

**Course Code: BEH2652**

**Credit Units: 01**

**Course Objective:**

This course provides practical guidance on

- Enhancing personal effectiveness and performance through effective interpersonal communication
- Enhancing their conflict management and negotiation skills

**Course Contents:**

**Module I: Interpersonal Communication: An Introduction**

Importance of Interpersonal Communication

Types – Self and Other Oriented

Rapport Building – NLP, Communication Mode

Steps to improve Interpersonal Communication

**Module II: Behavioural Communication**

Meaning and Nature of behavioural communication

Persuasion, Influence, Listening and Questioning

Guidelines for developing Human Communication skills

Relevance of Behavioural Communication for personal and professional development

**Module III: Interpersonal Styles**

Transactional Analysis

Life Position/Script Analysis

Games Analysis

Interactional and Transactional Styles

**Module IV: Conflict Management**

Meaning and nature of conflicts

Styles and techniques of conflict management

Conflict management and interpersonal communication

**Module V: Negotiation Skills**

Meaning and Negotiation approaches (Traditional and Contemporary)

Process and strategies of negotiations

Negotiation and interpersonal communication

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

Components	SAP	Journal for Success (JOS)	A	Mid Term Test / CT / Assignment	VIVA / Presentation
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

## Syllabus – Seventh Semester

### RELATIONSHIP MANAGEMENT

**Course Code: BEH2751**

**Credit Units: 01**

**Course Objective:**

- To understand the basis of interpersonal relationship
- To understand various communication style
- To learn the strategies for effective interpersonal relationship

**Course Contents:**

**Module I: Understanding Relationships**

- Importance of relationships
- Role and relationships
- Maintaining healthy relationships

**Module II: Bridging Individual Differences**

- Understanding individual differences
- Bridging differences in Interpersonal Relationship – TA
- Communication Styles

**Module III: Interpersonal Relationship Development**

- Importance of Interpersonal Relationships
- Interpersonal Relationships Skills
- Types of Interpersonal Relationships

**Module IV: Theories of Interpersonal Relationships**

- Theories: Social Exchange, Uncertainty Reduction Theory
- Factors Affecting Interpersonal Relationships
- Improving Interpersonal Relationships

**Module V: Impression Management**

- Meaning & Components of Impression Management
- Impression Management Techniques (Influencing Skills)
- Impression Management Training-Self help and Formal approaches

**Module VI: End-of-Semester Appraisal**

- Viva based on personal journal
- Assessment of Behavioural change as a result of training
- Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

## Syllabus – Eighth Semester

### PERSONAL AND PROFESSIONAL EXCELLENCE

**Course Code: BEH2851**

**Credit Units: 01**

**Course Objective:**

Importance of Personal and Professional excellence  
Inculcating the components of excellence

**Course Contents:**

**Module I: Components of Excellence**

Personal Excellence:

Identifying long-term choices and goals

Uncovering the talent, strength & style

Analyzing choke points in your personal processes by analysis in area of placements, events, seminars, conference, extracurricular activities, projects etc.

**Module II: Managing Personal Effectiveness**

Setting goals to maintain focus

Dimensions of personal effectiveness (self disclosure, openness to feedback and perceptiveness)

Integration of personal and organizational vision for effectiveness

A healthy balance of work and play

Managing Stress creatively and productively

**Module III: Personal Success Strategy**

Time management

Handling criticism and interruptions

Dealing with difficult people

Mapping and evaluating the situations

Identifying long-term goals

**Module IV: Positive Personal Growth**

Understanding & Developing positive emotions

Positive approach towards future

Resilience during loss and challenge

**Module V: Professional Success**

Building independence & interdependence

Reducing resistance to change

Continued reflection (Placements, events, seminars, conferences, projects extracurricular Activities etc.)

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

# **SYLLABUS - UNDERGRADUATE-3 YEAR PROGRAMMES**

## **Syllabus - First Semester**

### **UNDERSTANDING SELF FOR EFFECTIVENESS**

**Course Code: BEH2151**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting:

- Understanding self & process of self exploration
- Learning strategies for development of a healthy self esteem
- Importance of attitudes and its effective on personality
- Building Emotional Competence

**Course Contents:**

**Module I: Self: Core Competency**

Understanding of Self

Components of Self – Self identity

Self concept

Self confidence

Self image

**Module II: Techniques of Self Awareness**

Exploration through Johari Window

Mapping the key characteristics of self

Framing a charter for self

Stages – self awareness, self acceptance and self realization

**Module III: Self Esteem & Effectiveness**

Meaning and Importance

Components of self esteem

High and low self esteem

Measuring your self esteem

**Module IV: Building Positive Attitude**

Meaning and nature of attitude

Components and Types of attitude

Importance and relevance of attitude

**Module V: Building Emotional Competence**

Emotional Intelligence – Meaning, components, Importance and Relevance

Positive and Negative emotions

Healthy and Unhealthy expression of emotions

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

### **Assessment of Behavioural change as a result of training**

Exit Level Rating by Self and Observer

#### **Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

# Syllabus – Second Semester

## PROBLEM SOLVING AND CREATIVE THINKING

**Course Code: BEH2251**

**Credit Units: 01**

**Course Objective:**

To enable the students:

- Understand the process of problem solving and creative thinking.
- Facilitation and enhancement of skills required for decision-making.

**Course Contents:**

**Module I: Thinking as a tool for Problem Solving**

What is thinking: The Mind/Brain/Behaviour

Critical Thinking and Learning:

- Making Predictions and Reasoning
- Memory and Critical Thinking
- Emotions and Critical Thinking

Thinking skills

**Module II: Hindrances to Problem Solving Process**

Perception

Expression

Emotion

Intellect

Work environment

**Module III: Problem Solving Process**

Recognizing and Defining a problem

Analyzing the problem (potential causes)

Developing possible alternatives

Evaluating Solutions

Resolution of problem

Implementation

Barriers to problem solving:

- Perception
- Expression
- Emotion
- Intellect
- Work environment

**Module IV: Plan of Action**

Construction of POA

Monitoring

Reviewing and analyzing the outcome

**Module V: Creative Thinking**

Definition and meaning of creativity

The nature of creative thinking

- Convergent and Divergent thinking

- Idea generation and evaluation (Brain Storming)
- Image generation and evaluation
- Debating

The six-phase model of Creative Thinking: ICEDIP model

#### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

#### **Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

# Syllabus – Third Semester

## GROUP DYNAMICS AND TEAM BUILDING

**Course Code: BEH2351**

**Credit Units: 1**

**Course Objective:**

To inculcate in the students an elementary level of understanding of group/team functions.  
To develop team spirit and to know the importance of working in teams.

**Course Contents:**

**Module I: Group formation**

Definition and Characteristics  
Importance of groups  
Classification of groups  
Stages of group formation  
Benefits of group formation

**Module II: Group Functions**

External Conditions affecting group functioning: Authority, Structure, Org. Resources, Organizational policies etc.  
Internal conditions affecting group functioning: Roles, Norms, Conformity, Status, Cohesiveness, Size, Inter group conflict.  
Group Cohesiveness and Group Conflict  
Adjustment in Groups

**Module III: Teams**

Meaning and nature of teams  
External and internal factors effecting team  
Building Effective Teams  
Consensus Building  
Collaboration

**Module IV: Leadership**

Meaning, Nature and Functions  
Self leadership  
Leadership styles in organization  
Leadership in Teams

**Module V: Power to empower: Individual and Teams**

Meaning and Nature  
Types of power  
Relevance in organization and Society

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal  
Assessment of Behavioural change as a result of training  
Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

Components	SAP	Journal for Success (JOS)	A	Mid Term Test / CT / Assignment	VIVA / Presentation
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

## **Syllabus – Fourth Semester**

### **STRESS AND COPING STRATEGIES**

**Course Code: BEH2451**

**Credit Units: 01**

**Course Objective:**

To develop an understanding the concept of stress its causes, symptoms and consequences.

To develop an understanding the consequences of the stress on one's wellness, health, and work performance.

**Course Contents:**

**Module I: Stress**

Meaning & Nature

Characteristics

Types of stress

**Module II: Stages and Models of Stress**

Stages of stress

The physiology of stress

Stimulus-oriented approach.

Response-oriented approach.

The transactional and interact ional model.

Pressure – environment fit model of stress.

**Module III: Causes and symptoms of stress**

Personal

Organizational

Environmental

**Module IV: Consequences of stress**

Effect on behaviour and personality

Effect of stress on performance

Individual and Organizational consequences with special focus on health

**Module V: Strategies for stress management**

Importance of stress management

Healthy and Unhealthy strategies

Peer group and social support

Happiness and well-being

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

## Syllabus – Fifth Semester

### INDIVIDUAL, SOCIETY AND NATIONS

**Course Code: BEH2551**

**Credit Units: 01**

**Course Objective:**

This course aims at enabling students towards:

- Understand the importance of individual differences
- Better understanding of self in relation to society and nation
- Facilitation for a meaningful existence and adjustment in society
- To inculcate patriotism and National pride.
- To enhance personal and professional excellence

**Course Contents:**

**Module I: Individual differences& Personality**

Personality: Definition& Relevance

Importance of nature & nurture in Personality Development

Importance and Recognition of Individual differences in Personality

Accepting and Managing Individual differences (Adjustment Mechanisms)

Intuition, Judgment, Perception & Sensation (MBTI)

BIG5 Factors

**Module II: Socialization**

Nature of Socialization

Social Interaction

Interaction of Socialization Process

Contributions to Society & Nation

**Module III: Patriotism and National Pride**

Sense of Pride and Patriotism

Importance of Discipline and hard work

Integrity and accountability

**Module IV: Human Rights, Values and Ethics**

Meaning of Human Rights

Human Rights Awareness

Importance of human rights

Values and Ethics- Learning based on project work on Scriptures like Ramayana, Mahabharata, Gitaetc

**Module V: Personal and Professional Excellence**

Personal excellence:

- Identifying Long-term choices and goals
- Uncovering talent, strength and style

Alan P. Rossiter's eight aspects of Professional Excellence

Resilience during challenge and loss

Continued Reflection (Placements, Events, Seminars, Conferences, Projects, Extracurricular Activities, etc.)

### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

### **Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

## Syllabus – Sixth Semester

### INTERPERSONAL COMMUNICATION & RELATIONSHIP MANAGEMENT

**Course Code: BEH2651**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting an understanding of:  
Interpersonal communication and relationship  
Strategies for healthy interpersonal relationship  
Effective management of emotions  
Building interpersonal competence

**Course Contents:**

**Module I: Interpersonal Communication**

Importance of Behavioural/ Interpersonal Communication  
Types – Self and Other Oriented  
Rapport Building – NLP, Communication Mode  
Steps to improve Interpersonal Communication

**Module II: Interpersonal Styles**

Transactional Analysis  
Life Position/Script Analysis  
Games Analysis  
Interactional and Transactional Styles  
Bridging differences in Interpersonal Relationship through TA  
Communication Styles

**Module III: Conflict Management and Negotiation**

Meaning and Nature of conflicts  
Styles and techniques of conflict management  
Meaning of Negotiation  
Process and Strategies of Negotiation  
Interpersonal Communication: Conflict Management and Negotiation

**Module IV: Interpersonal Relationship Development**

Importance of Interpersonal Relationships  
Interpersonal Relationship Skills  
Types of Interpersonal Relationships  
Relevance of Interpersonal Communication in Relationship Development

**Module V: Impression Management**

Meaning & Components of Impression Management  
Impression Management Techniques  
Impression Management Training-Self help and Formal approaches

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

# **SYLLABUS – POSTGRADUATE PROGRAMMES**

## **Syllabus – First Semester**

### **SELF-DEVELOPMENT AND INTERPERSONAL SKILLS**

**Course Code: BEH4151**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting an understanding of:

Self and the process of self exploration

Learning strategies for development of a healthy self esteem

Importance of attitudes and their effect on work behaviour

Effective management of emotions and building interpersonal competence.

**Course Contents:**

**Module I: Understanding Self**

Formation of self concept

Dimension of Self

Components of self

Self Competency

**Module II: Self-Esteem: Sense of Worth**

Meaning and Nature of Self Esteem

Characteristics of High and Low Self Esteem

Importance & need of Self Esteem

Self esteem at work

Steps to enhance Self Esteem

**Module III: Emotional Intelligence: Brain Power**

Introduction to EI

Difference between IQ, EQ and SQ

Relevance of EI at workplace

Self assessment, analysis and action plan

**Module IV: Managing Emotions and Building Interpersonal Competence**

Need and importance of Emotions

Healthy and Unhealthy expression of emotions

Anger: Conceptualization and Cycle

Developing emotional and interpersonal competence

Self assessment, analysis and action plan

**Module V: Leading Through Positive Attitude**

Understanding Attitudes

Formation of Attitudes

Types of Attitudes

Effects of Attitude on  
Behaviour  
Perception  
Motivation  
Stress  
Adjustment  
Time Management  
Effective Performance  
Building Positive Attitude

### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

### **Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

## Syllabus – Second Semester

### BEHAVIOURAL COMMUNICATION AND RELATIONSHIP MANAGEMENT

**Course Code: BEH4251**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting an understanding of:

Process of Behavioural communication

Aspects of interpersonal communication and relationship

Management of individual differences as important dimension of IPR

**Course Contents:**

**Module I: Behavioural Communication**

Scope of Behavioural Communication

Process – Personal, Impersonal and Interpersonal Communication

Guidelines for developing Human Communication skills

Relevance of Behavioural Communication in relationship management

**Module II: Managing Individual Differences in Relationships**

Principles

Types of issues

Approaches

Understanding and importance of self disclosure

Guidelines for effective communication during conflicts

**Module III: Communication Climate: Foundation of Interpersonal Relationships**

Elements of satisfying relationships

Conforming and Disconfirming Communication

Culturally Relevant Communication

Guideline for Creating and Sustaining Healthy Climate

**Module IV: Interpersonal Communication**

Imperatives for Interpersonal Communication

Models – Linear, Interaction and Transaction

Patterns – Complementary, Symmetrical and Parallel

Types – Self and Other Oriented

Steps to improve Interpersonal Communication

**Module V: Interpersonal Relationship Development**

Relationship circle – Peer/ Colleague, Superior and Subordinate

Initiating and establishing IPR

Escalating, maintaining and terminating IPR

Direct and indirect strategies of terminating relationship

Model of ending relationship

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

## Syllabus – Third Semester

### LEADING THROUGH TEAMS

**Course Code: BEH4351**

**Credit Units: 01**

**Course Objective:**

This course aims to enable students to:  
Understand the concept and building of teams  
Manage conflict and stress within team  
Facilitate better team management and organizational effectiveness through universal human values.

**Course Contents:**

**Module I: Teams: An Overview**

Team Design Features: team vs. group  
Effective Team Mission and Vision  
Life Cycle of a Project Team  
Rationale of a Team, Goal Analysis and Team Roles

**Module II: Team & Sociometry**

Patterns of Interaction in a Team  
Sociometry: Method of studying attractions and repulsions in groups  
Construction of sociogram for studying interpersonal relations in a Team

**Module III: Team Building**

Types and Development of Team Building  
Stages of team growth  
Team performance curve  
Profiling your Team: Internal & External Dynamics  
Team Strategies for organizational vision  
Team communication

**Module IV: Team Leadership & Conflict Management**

Leadership styles in organizations  
Self Authorized team leadership  
Causes of team conflict  
Conflict management strategies  
Stress and Coping in teams

**Module V: Global Teams and Universal Values**

Management by values  
Pragmatic spirituality in life and organization  
Building global teams through universal human values  
Learning based on project work on Scriptures like Ramayana, Mahabharata, Gita etc.

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>

## Syllabus – Fourth Semester

### PROFESSIONAL EXCELLENCE

**Course Code: BEH4451**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting an understanding of:

Build and leverage your professional reputation

Maintain focus in pressure situations

Make a balanced choice between professional and personal commitments

**Course Contents:**

**Module I: Individual, Society and Nation**

Individual Differences and Dimensions of Personality

Socialization Process

Relating to the Nation: Values, Culture, Religion

Sense of pride and Patriotism

Managing Diversity

**Module II: Components of Excellence**

Personal Excellence:

Identifying long-term choices and goals

Uncovering the talent, strength & style

Analyzing choke points in your personal processes by analysis in area of placements, events, seminars, conference, extracurricular activities, projects etc.

Developing professional power: Goal-setting, time management, handling criticism, interruptions and time wasters

**Module III: Career Planning**

Knowing one's Interest and Aptitude

Identifying available Resources

Setting goals to maintain focus:

Developing Positive attributes in personality

Self-reliance and Employability skills

**Module IV: Stress Management for Healthy Living**

Meaning and Nature of Stress

Stages of stress

Causes and Consequences of stress: Personal, Organizational and Environmental

Personal Styles and strategies of coping

**Module V: Professional Success**

Building independence & interdependence

Reducing resistance to change

Continued reflection (Placements, events, seminars, conferences, projects extracurricular Activities etc.)

Construction of POA

Monitoring

Reviewing and analyzing the outcome

**Module V: Creative Thinking**

Definition and meaning of creativity

The nature of creative thinking

- Convergent and Divergent thinking
- Idea generation and evaluation (Brain Storming)
- Image generation and evaluation
- Debating

The six-phase model of Creative Thinking: ICEDIP model

#### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

#### **Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

## Syllabus – Third Semester

### GROUP DYNAMICS AND TEAM BUILDING

**Course Code: BEH2351**

**Credit Units: 01**

**Course Objective:**

To inculcate in the students an elementary level of understanding of group/team functions.  
To develop team spirit and to know the importance of working in teams.

**Course Contents:**

**Module I: Group formation**

Definition and Characteristics  
Importance of groups  
Classification of groups  
Stages of group formation  
Benefits of group formation

**Module II: Group Functions**

External Conditions affecting group functioning: Authority, Structure, Org. Resources, Organizational policies etc.  
Internal conditions affecting group functioning: Roles, Norms, Conformity, Status, Cohesiveness, Size, Inter group conflict.  
Group Cohesiveness and Group Conflict  
Adjustment in Groups

**Module III: Teams**

Meaning and nature of teams  
External and internal factors effecting team  
Building Effective Teams  
Consensus Building  
Collaboration

**Module IV: Leadership**

Meaning, Nature and Functions  
Self leadership  
Leadership styles in organization  
Leadership in Teams

**Module V: Power to empower: Individual and Teams**

Meaning and Nature  
Types of power  
Relevance in organization and Society

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal  
Assessment of Behavioural change as a result of training  
Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

Components	SAP	Journal for Success (JOS)	A	Mid Term Test / CT / Assignment	VIVA / Presentation
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

## **Syllabus – Fourth Semester**

### **STRESS AND COPING STRATEGIES**

**Course Code: BEH2451**

**Credit Units: 01**

**Course Objective:**

To develop an understanding the concept of stress its causes, symptoms and consequences.

To develop an understanding the consequences of the stress on one's wellness, health, and work performance.

**Course Contents:**

**Module I: Stress**

Meaning & Nature

Characteristics

Types of stress

**Module II: Stages and Models of Stress**

Stages of stress

The physiology of stress

Stimulus-oriented approach.

Response-oriented approach.

The transactional and interactional model.

Pressure – environment fit model of stress.

**Module III: Causes and symptoms of stress**

Personal

Organizational

Environmental

**Module IV: Consequences of stress**

Effect on behaviour and personality

Effect of stress on performance

Individual and Organizational consequences with special focus on health

**Module V: Strategies for stress management**

Importance of stress management

Healthy and Unhealthy strategies

Peer group and social support

Happiness and well-being

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

## Syllabus – Fifth Semester

### INDIVIDUAL, SOCIETY AND NATIONS

**Course Code: BEH2551**

**Credit Units: 01**

**Course Objective:**

This course aims at enabling students towards:

- Understand the importance of individual differences
- Better understanding of self in relation to society and nation
- Facilitation for a meaningful existence and adjustment in society
- To inculcate patriotism and National pride.
- To enhance personal and professional excellence

**Course Contents:**

**Module I: Individual differences& Personality**

Personality: Definition& Relevance

Importance of nature & nurture in Personality Development

Importance and Recognition of Individual differences in Personality

Accepting and Managing Individual differences (Adjustment Mechanisms)

Intuition, Judgment, Perception & Sensation (MBTI)

BIG5 Factors

**Module II: Socialization**

Nature of Socialization

Social Interaction

Interaction of Socialization Process

Contributions to Society & Nation

**Module III: Patriotism and National Pride**

Sense of Pride and Patriotism

Importance of Discipline and hard work

Integrity and accountability

**Module IV: Human Rights, Values and Ethics**

Meaning of Human Rights

Human Rights Awareness

Importance of human rights

Values and Ethics- Learning based on project work on Scriptures like Ramayana, Mahabharata, Gitaetc

**Module V: Personal and Professional Excellence**

Personal excellence:

- Identifying Long-term choices and goals
- Uncovering talent, strength and style

Alan P. Rossiter's eight aspects of Professional Excellence

Resilience during challenge and loss

Continued Reflection (Placements, Events, Seminars, Conferences, Projects, Extracurricular Activities, etc.)

### **Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

### **Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

## Syllabus – Sixth Semester

### INTERPERSONAL COMMUNICATION AND RELATIONSHIP MANAGEMENT

**Course Code: BEH2651**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting an understanding of:  
Interpersonal communication and relationship.  
Strategies for healthy interpersonal relationship  
Effective management of emotions.  
Building interpersonal competence.

**Course Contents:**

**Module I: Interpersonal Communication**

Importance of Behavioural/ Interpersonal Communication  
Types – Self and Other Oriented  
Rapport Building – NLP, Communication Mode  
Steps to improve Interpersonal Communication

**Module II: Interpersonal Styles**

Transactional Analysis  
Life Position/Script Analysis  
Games Analysis  
Interactional and Transactional Styles  
Bridging differences in Interpersonal Relationship through TA  
Communication Styles

**Module III: Conflict Management and Negotiation**

Meaning and Nature of conflicts  
Styles and techniques of conflict management  
Meaning of Negotiation  
Process and Strategies of Negotiation  
Interpersonal Communication: Conflict Management and Negotiation

**Module IV: Interpersonal Relationship Development**

Importance of Interpersonal Relationships  
Interpersonal Relationship Skills  
Types of Interpersonal Relationships  
Relevance of Interpersonal Communication in Relationship Development

**Module V: Impression Management**

Meaning & Components of Impression Management  
Impression Management Techniques  
Impression Management Training-Self help and Formal approaches

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

## Syllabus – Seventh Semester

### SELF-DEVELOPMENT AND INTERPERSONAL SKILLS

**Course Code: BEH4151**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting an understanding of:

Self and the process of self exploration

Learning strategies for development of a healthy self esteem

Importance of attitudes and their effect on work behaviour

Effective management of emotions and building interpersonal competence.

**Course Contents:**

**Module I: Understanding Self**

Formation of self concept

Dimension of Self

Components of self

Self Competency

**Module II: Self-Esteem: Sense of Worth**

Meaning and Nature of Self Esteem

Characteristics of High and Low Self Esteem

Importance & need of Self Esteem

Self esteem at work

Steps to enhance Self Esteem

**Module III: Emotional Intelligence: Brain Power**

Introduction to EI

Difference between IQ, EQ and SQ

Relevance of EI at workplace

Self assessment, analysis and action plan

**Module IV: Managing Emotions and Building Interpersonal Competence**

Need and importance of Emotions

Healthy and Unhealthy expression of emotions

Anger: Conceptualization and Cycle

Developing emotional and interpersonal competence

Self assessment, analysis and action plan

**Module V: Leading Through Positive Attitude**

Understanding Attitudes

Formation of Attitudes

Types of Attitudes

Effects of Attitude on

Behaviour

Perception

Motivation

Stress  
Adjustment  
Time Management  
Effective Performance  
Building Positive Attitude

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal  
Assessment of Behavioural change as a result of training  
Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

Components	SAP	Journal for Success (JOS)	A	Mid Term Test / CT / Assignment	VIVA / Presentation
Weightage (%)	25	10	5	30	30

SAP: Social Awareness Programme, A: Attendance, CT: Class Test

# Syllabus – Eighth Semester

## PROFESSIONAL EXCELLENCE

**Course Code: BEH4451**

**Credit Units: 01**

**Course Objective:**

This course aims at imparting an understanding of:

Build and leverage your professional reputation

Maintain focus in pressure situations

Make a balanced choice between professional and personal commitments

**Course Contents:**

**Module I: Individual, Society and Nation**

Individual Differences and Dimensions of Personality

Socialization Process

Relating to the Nation: Values, Culture, Religion

Sense of pride and Patriotism

Managing Diversity

**Module II: Components of Excellence**

Personal Excellence:

Identifying long-term choices and goals

Uncovering the talent, strength & style

Analyzing choke points in your personal processes by analysis in area of placements, events, seminars, conference, extracurricular activities, projects etc.

Developing professional power: Goal-setting, time management, handling criticism, interruptions and time wasters

**Module III: Career Planning**

Knowing one's Interest and Aptitude

Identifying available Resources

Setting goals to maintain focus:

Developing Positive attributes in personality

Self-reliance and Employability skills

**Module IV: Stress Management for Healthy Living**

Meaning and Nature of Stress

Stages of stress

Causes and Consequences of stress: Personal, Organizational and Environmental

Personal Styles and strategies of coping

**Module V: Professional Success**

Building independence & interdependence

Reducing resistance to change

Continued reflection (Placements, events, seminars, conferences, projects extracurricular Activities etc.)

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal

Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

Components	SAP	Journal for Success (JOS)	A	Mid Term Test / CT / Assignment	VIVA / Presentation
Weightage (%)	25	10	5	30	30

## Syllabus – Ninth Semester

### LEADING THROUGH TEAMS

**Course Code: BEH4351**

**Credit Units: 01**

**Course Objective:**

This course aims to enable students to:  
Understand the concept and building of teams  
Manage conflict and stress within team  
Facilitate better team management and organizational effectiveness through universal human values.

**Course Contents:**

**Module I: Teams: An Overview**

Team Design Features: team vs. group  
Effective Team Mission and Vision  
Life Cycle of a Project Team  
Rationale of a Team, Goal Analysis and Team Roles

**Module II: Team & Sociometry**

Patterns of Interaction in a Team  
Sociometry: Method of studying attractions and repulsions in groups  
Construction of sociogram for studying interpersonal relations in a Team

**Module III: Team Building**

Types and Development of Team Building  
Stages of team growth  
Team performance curve  
Profiling your Team: Internal & External Dynamics  
Team Strategies for organizational vision  
Team communication

**Module IV: Team Leadership & Conflict Management**

Leadership styles in organizations  
Self Authorized team leadership  
Causes of team conflict  
Conflict management strategies  
Stress and Coping in teams

**Module V: Global Teams and Universal Values**

Management by values  
Pragmatic spirituality in life and organization  
Building global teams through universal human values  
Learning based on project work on Scriptures like Ramayana, Mahabharata, Gita etc.

**Module VI: End-of-Semester Appraisal**

Viva based on personal journal  
Assessment of Behavioural change as a result of training

Exit Level Rating by Self and Observer

**Examination Scheme: Total Internal (100)**

<b>Components</b>	<b>SAP</b>	<b>Journal for Success (JOS)</b>	<b>A</b>	<b>Mid Term Test / CT / Assignment</b>	<b>VIVA / Presentation</b>

# POSITIVE PSYCHOLOGY

## Syllabus - Semester First

### THE SCIENCE OF HAPPINESS

**Course Code: PSY2152**

**Credit Units: 03**

Positive Psychology is the scientific study of human flourishing, and an applied approach to optimal functioning. It has also been defined as the study of the strengths and virtues that enable individuals, communities and organizations to thrive. The underlying premise of positive psychology is that you can learn to be happier just as you can learn a foreign language or to be proficient at golf. This rapidly growing field is shedding light on what makes us happy, the pursuit of happiness, and how we can lead more fulfilling, satisfying lives. The course focuses on the psychological aspects of a fulfilling and flourishing life. Topics include happiness, self-esteem, empathy, love, achievement, creativity, music, spirituality.

**Course Objectives:**

- To bring an experience marked by predominance of positive emotions and informing them about emerging paradigm of Positive Psychology
- Build relevant competencies for experiencing and sharing happiness as lived experience and its implications

**Course Contents:**

**Module-I: Introduction to Positive Psychology**

Positive Psychology: Concept, History, Nature, Dimension and scope of Positive Psychology  
Seligman's PERMA

**Module-II: Positive Emotional States and Processes**

Positive Emotions and well being: Hope & Optimism, Love  
The Positive Psychology of Emotional Intelligence  
Influence of Positive Emotions

**Module-III: Strengths and Virtues**

Character Strengths and Virtues  
Resilience in the phase of challenge & Loss  
Empathy and Altruism

**Module-IV: Happiness**

Introduction to Psychology of happiness, well being and scope, Types of happiness- Eudaimonic and Hedonic  
History of Happiness, Theories, Measures and Positive correlates of happiness  
Traits associated with Happiness  
Setting Goals for Life and Happiness

## Module-V: Forgiveness and Gratitude

Forgiveness and Gratitude

Personal transformation and Role of suffering

Trust and Compassion

### Examination Scheme:

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

A: Attendance, CT: Class Test, H/P/V/Q: Home Assignment/Presentation/Viva/Quiz,

EE: End Semester Exam

# Syllabus - Semester Second

## OPTIMISM AND SUCCESS

**Course Code: PSY2252**

**Credit Units: 03**

### **Course Objectives:**

This course synthesizes and integrates wellness principles and strategies into life, education and work place settings, thereby contributing to enhanced productivity, the prevention of chronic lifestyle disease, enjoyment of life, and personal fulfillment

Moreover, students will become holistic thinkers and lifelong learners who are able to integrate information across multiple disciplines and apply knowledge, skills, critical thinking and problem solving to real world situations.

### **Course Contents:**

#### **Module-I: Optimism and Physical Health**

Optimism and coping with physical illness

Optimism and quality of life

Complementary Strengths of Health Psychology and Positive Psychology

#### **Module-II: Optimism and Psychological Health**

Hope Theory

Self Esteem and Self efficacy

Well-being therapy

From Positive Potential to Positive Excellence: Steps to be optimistic

#### **Module-III: Gratitude: Parent of all virtues**

Optimism, Gratitude and Happiness

Characteristics of grateful people

Cultivating Gratitude-Becoming more grateful

#### **Module-IV: Problem Solving Appraisal and Psychological Adjustment**

Motivation and Resilience

Stress and Stress Management

#### **Module-V: Positive Psychology in Practice**

Promoting Human Flourishing in Work, Health, Education, and Everyday Life

Positive Psychology and Life Coaching

Integrating positive psychology in practice

#### **Module-VI: Success**

What is success?

SMART Goal Setting & Letters to Yourself, Self-Motivation

Human Psychological Capital

Skills Sought by Employees

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

A: Attendance, CT: Class Test, H/P/V/Q: Home Assignment/Presentation/Viva/Quiz,  
EE: End Semester Exam

# Syllabus - Semester Third

## RESILIENCE AND WELL BEING

**Course Code: PSY2352**

**Credit Units: 03**

### **Course Objectives:**

Wellbeing and resilience are vital to developing efficient problem solving skills, building and maintaining interpersonal relationships and realistic goal setting, all of which greatly enhance an individual's ability to perform and contribute meaningfully in daily life. The objective of this course is to develop an awareness of how mindfulness can allow one to navigate life's transitions, learn about Signs of resilience and wellbeing, and learn how to focus on wellbeing and resilience

### **Course Contents:**

#### **Module-I: Resilience**

Meaning, Nature and Approaches  
Theories of Resilience  
Promoting Resilience

#### **Module-II: Resilience in the phase of challenge & Loss,**

Positive Response to loss, Resilience & Grit  
Character Strengths and Virtues

#### **Module-III: Post Traumatic Growth & Benefit Finding**

Post Traumatic Growth, Models of PTG as Outcome, Models of PTG as a Coping Strategy  
Benefit Finding, Meaning Making and Stress Inoculation  
Types of Growth Outcome

#### **Module-IV: Mindfulness and Well Being**

Neuroscience of Well-being, Social / Emotional Wellbeing  
Mindfulness-Based Interventions, Mindfulness and mental health  
Mindfulness and Positive Thinking

#### **Module-V: Subjective Wellbeing**

Promoting Wellness: Integrating community and Positive Psychology  
Building Resilience and Wellbeing

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

A: Attendance, CT: Class Test, H/P/V/Q: Home Assignment/Presentation/Viva/Quiz,

EE: End Semester Exam

# Syllabus - Semester Fourth

## POSITIVE PSYCHOLOGY AND WORK LIFE

**Course Code: PSY2452**

**Credit Units: 03**

Positive organizational psychology takes a strengths-based approach to work relationships, leadership and individual purpose in the workplace. In applying positive psychology to work settings, the goal is to improve organizational performance as well as individual performance, well-being, and fulfillment. This course is designed to explore Positive Psychology in the work place. It will focus on the application of positive subjective experiences and traits in organizations to improve workplace effectiveness. This course looks at historical trends as well as emerging changes in employees and the workplace. Directions for future research and implications for practice will be emphasized.

### **Course Objectives:**

- Be able to summarize and identify applications of the theories, concepts, models and research in the field of positive organizational psychology.
- Personally reflect and deepen awareness of leadership skills, work attitudes, and analytical skills in relationship to the field.
- Demonstrate ability to be effective leaders and team members within business organizations, educational environments, and/or community settings.

### **Course Contents:**

#### **Module-I: The changing world of work**

Introduction to positive psychology and its application to the workplace  
Understand the world of work, upcoming trends that will affect work  
Management of today's multi-generational and diverse work force

#### **Module-II: Positive work environments for individuals and organizations:**

Employee engagement- what causes individuals to join an organization and why they stay or leave, person-centered approach to engagement  
Understand the concept of work as meaning  
Impact of employee well-being on the organization and impact of feelings about work on the individual's well-being.  
Bringing Positive Psychology to Organizational Psychology

#### **Module-III: Enabling a positive work life**

Understand the benefits of coaching, mindfulness, and strengths development in the workplace.  
Work and home life balance.

#### **Module-IV: Building psychological capital**

Identify personal character strengths and understand their relationship with work satisfaction  
Developing positivity and a positive team culture  
Maintaining positive relationships at work

## Module-V: Positive Organizations

Applying the strengths-based approach for high performance

Appreciative Inquiry – positive change management

Maintaining positive relationships at work

# Syllabus - Semester Fifth

## CREATIVITY AND PROBLEM SOLVING

**Course Code: PSY2552**

**Credit Units: 03**

### **Course Objectives:**

To enable the students:

- Understand the process of problem solving and creative thinking.
- Facilitation and enhancement of skills required for decision-making.

### **Course Contents:**

#### **Module-I: Problem Solving Process**

Problem-solving skills, including engaging with, researching and identifying strategies to solve unfamiliar problems and bring about change

Barriers to problem solving

#### **Module-II: Thinking as a tool for Problem Solving**

What is thinking: The Mind/Brain/Behaviour

Critical Thinking and Learning:

- Making Predictions and Reasoning
- Memory and Critical Thinking
- Emotions and Critical Thinking

#### **Module-III: Creative Thinking**

Definition and meaning of creativity

The nature of creative thinking

- Convergent and Divergent thinking
- Brain Storming

The six-phase model of Creative Thinking: ICEDIP model

#### **Module-IV: Physical disability and Positive growth**

#### **Module-V: Change Management Skills**

### **Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE

# Syllabus - Semester Second

## ABNORMAL PSYCHOLOGY

**Course Code: PSY2251**

**Credit Units: 3**

### **Course Objective:**

Abnormal psychology is a branch of psychology that deals with psychopathology and abnormal behavior that causes suffering to the individual and others around him or her, and interferes with functioning in a significant way. The term covers a broad range of disorders, from depression to obsession-compulsion to sexual deviation and many more. The study of abnormal psychology also includes learning about the factors, situations, and conditions that cause mental disorders and how they may be best treated. Following are the objectives for the part of Psychology:

- To gain an appreciation of the fundamental issues that underlies the concept of mental abnormality.
- To become familiar with how, in terms of symptoms, the various psychological disorders present themselves.
- To appreciate different explanations of abnormality. That is, to understand the role of environment, genetic factors, psychodynamics, neuropsychology, and biochemistry in the determination of psychopathology.

### **Course Content:**

#### **Module I: Introduction**

Concept of abnormality: Criteria and Perspectives

Classification: DSM IV-R, conceptual and operational evaluation.

Casual factors in Psychopathological Behaviour

- (a) Biological determinants
- (b) Psychological determinants
- (c) Socio-cultural determinants

#### **Module II: Neurosis and Psychosis**

Concept and Difference between both the two

#### **Module III: Neurotic Disorder**

Generalized anxiety disorders

Obsessive-Compulsive disorders

Phobic Disorders

Eating Disorder

#### **Module IV: Mood Disorders**

Depression

Bipolar Disorder

#### **Module V: Psychotic Disorder**

Bipolar disorders: Manic, Depressive, Mixed

Psychotic depression

Delusional Disorder

Schizophrenia

**Module VI: Mental Retardation and Development Disorders**

Levels of mental retardation, Organic factors in mental retardation.

Autism: Clinical picture and casual factors.

Childhood Disorder

**Module VII: Substance Abuse Disorders**

Alcoholism

Drug Addition

**Module VIII**

Psychosomatic Disorder

Somatoform Disorders

Personality Disorders

**Examination Scheme:**

Components	CT	CT/H/P/V/Q	CT	A	EE
Weightage (%)	10	10	5	5	70

## Syllabus - Semester Third

### BASIC COGNITIVE PSYCHOLOGY

**Course Code: PSY2351**

**Credit Units: 3**

**Course Objective:**

Cognitive Psychology is an objective, empirical discipline that tends to favor an experimental approach. This paper of Psychology is crucial to understand the basis of mental activity and human behaviour. The students of Psychology will need to have this knowledge about the normal mental operation of adults in order to understand more complex processes and their disorder. The subject emphasizes cognitive aspects to show the more up to date developments. In this paper of Psychology, Students will:

- Gain factual knowledge of the terminology, methods, and research findings in the field of cognitive psychology.
- Learn the fundamental theories and principles of cognitive psychology including being able to critique them.
- Learn how professionals in the field of cognitive psychology go about the process of gaining new knowledge.

**Course Content**

**Module I:**

Introduction, History and Background of Cognitive Psychology

**Module II:**

Thinking: Nature, and Types of Thinking:

Tools of thinking- Images, Concept, Symbols and Signs, Language, Muscle Activities and Brain Function

**Module III:**

Reasoning: Meaning and Types of Reasoning: Deductive and Inductive Reasoning

**Module IV:**

Problem solving: Meaning and Method of Problem solving

Decision Making: Meaning, types and hindrances

**Module V:**

Intelligence: Meaning, Nature and Theories of intelligence: Unitary Theory, Multifactor Theory, Two Factor Theory, Group Factor Theory.

Genetic and Environmental Influence on Intelligence

Classification of Intelligence Test

Concept of Mental Age and IQ

**Examination Scheme:**
