# LAW AND MEDICINE-I

**Course Code: LAW2709**

**Credit Units: 05**

## **Course Objective:**

The course aims to provide the students the knowledge about the interrelationship between law and medicine and complex legal and ethical issues involved in the field of medicine and medical profession. The course include the doctor-patient relationship and its legal dimensions, medical negligence, socio-legal issues involved in the new technologies in medical science and biotechnology as well. As medico-legal issues became a consumer issue as well as a fundamental rights violation the course will help the students to have knowledge in laws related to medicine and analyse the issues in a better way.

## **Course Contents:**

### **Module I: Introduction**

Inter-relationship between law and medicine-issues involved and legal control- Doctor-Patient relationship- Constitutional perspective and penal provisions- Indian penal Code- Directive principles- Right to life- Right to health and emergency medical care.

### **Module II: Regulation of medical and Paramedical profession**

Medical profession in India- Para medical profession- Regulatory authorities- Self regulation- medical Ethics- WHO declarations- Declaration of Geneva- Helsinki declaration- Regulatory authorities created by statutes- Regulations under medical Degrees Act, 1916- Pharmacy Act, 1948- Indian medical Councils Act- education regulations- Medical Council of India- Disciplinary Control- Hospital and research centers- Responsibility to patients- Duty to take care- Medical examination- Informed consent- Confidentiality- Access to medical records.

### **Module III: Liability of Professional Negligence**

Medical negligence- Negligence in diagnosis, treatment- Duty to warn- Civil negligence and criminal negligence- Vicarious liability- negligence of students and nurses- Liability of Doctors and Hospitals under the Consumer protection Act, 1986.

### **Module IV: regulation of Manufacture, Storage and sale of Medicines**

Drugs and Cosmetic Act, 1940-Production, storage and sale of drugs- Advertisement drugs and Magic remedies Act, 1954- penalties.-Access to medicine and Public health.

### **Module V: Medical Science and Technologies**

Boitechnology-Bioethics-Genetic Engineering- Cloning-Human genome project- Biomedicine Convention- In vitro fertilization(IVF)- Selective reproduction- Surrogacy- Euthanasia- abortion- Medical termination of pregnancy Act- Indian penal Code-Stem cell therapy and research- Transplantation of Human organs- Organ Transplantation Act, 1994- Human Subjects Research- Helsinki declaration- Schedule Y, Drugs and Cosmetic Act 1940- ICMR Code- AMA code of Ethics- WHO Good Clinical Practices.

## **Examination Scheme:**

## Syllabus - Eighth Semester

### INVESTMENT AND COMPETITION LAWS

**Course Code: LAW2801**

**Credit Units: 05**

**Course Objective:**

This paper focuses on the investment and competition laws of India in the context of new economic order.

**Course Contents:**

**Module I: Competition Law**

Background, Prohibitions, Competition Commission of India.

**Module II: Corporate Finance and regulatory framework**

Security Contract (Regulation) Act 1956, SEBI Act 1992, Depositories Act 1996, The Securitisation and Reconstruction of Financial Assets and enforcement of security Interest Act, 2002.

**Module III: Regulatory framework for foreign trade, multinational companies**

Foreign Trade (Development & Regulation) Act 1992, UNCTAD Draft Model on Trans – national Corporations, Control and regulation of foreign companies in India, Foreign collaborations and joint ventures.

**Module IV: Foreign Exchange Management**

Background, Policies, Authorities.

**Module V : Role Of IT**

Role of Information Technology in the investment market, functioning of demat A/c portal. Investment through internet and virtual banking.

**Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

**Text & References:**

- Competition Act 2002
- Security Contract (Regulation ) Act 1956
- SEBI Act 1992

# TAXATION LAW

Course Code: LAW2802

Credit Units: 05

## Course Objective:

Power to tax has been described as the power to destroy. This idea is being floated often whenever the State introduces a new tax. Is this true? Is it not necessary that in order to raise revenue and place the economy on solid foundation, the taxing power should be conferred on the State? The power to tax shall not go unregulated. In this context of a federal structure the distribution of the taxing powers assumes added significance. Obviously, a study of the Constitutional framework on taxation becomes important. Along with this, an analysis of the different laws enacted in exercise of these powers with their safeguards and remedies sheds light on the mechanics of the taxation by the Union and the States.

## Course Contents:

### Module I: General Principles of Taxation Laws

History and Development of Tax Laws in India, Fundamental Principles relating to Tax Laws, Taxing power and constitutional limitations, Distinction between: Tax, Fee and Cess; Tax avoidance and Tax evasion .

### Module II: Basic concepts of Income Tax

Income, Previous Year, assessment Year, Person, Assessee and Total Income, Income not included in the Total Income. Residential status, Clubbing of Income, Tax planning, Rate of Income Tax, Heads of Income, Salaries, Income from House Property, Income from Business or Profession, Capital Gains, Income from Other sources, Deductions under the Income Tax Act, 1961, Income Tax Authorities: Power and Functions, Filing of returns and procedure for assessment, Offences and Penal Sanctions .

### Module III: Value Added Tax

Meaning and importance of VAT, Difference between VAT and Sales Tax, West Bengal Value Added Tax Act, 2003, Criticisms and limitations of Vat system.

### Module IV: Service Tax

Taxable Service, Meaning and importance of Service Tax, Valuation of Taxable Service, Offences and Penalties.

## Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# INTERPRETATION OF STATUTES

**Course Code: LAW2803**

**Credit Units: 05**

## **Course Objective:**

Judicial interpretation involves construction of words, phrases and expressions. In their attempt to make the old and existing statutes contextually relevant, courts used to develop certain rules, doctrines and principles of interpretation. The course material seeks to impart to the students, the necessary skills to interpret the statutes with a judicial mind set.

## **Course Contents:**

### **Module I: Rules of Interpretation**

Commencement, repeal and revival of a statute; Rules of interpretation: Liberal rule, mischief rule and golden rules, Harmonious construction.

### **Module II: Principles of interpretation**

Ejusdem of Generis, Noscitur – A Socius, Reddendo Singula Singlis., Expressio Unius Est exclusion Alteriu, UI Res Magis Valent Quam Pereat, Contemporanea Espositio Est Optima Et Protissima Lege.

### **Module III: Internal Aids to Interpretation**

### **Module IV: External Aids to Interpretation**

### **Module V**

Construction of Penal Statutes, Mens rea in statutory offences, Principles to be applied in interpreting the Constitution, Strict construction of taxing statutes and its limitations.

## **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

## **Text & References:**

# INTERNATIONAL TRADE LAW

**Course Code: LAW2804**

**Credit Units: 05**

## **Course Objective:**

To acquaint the Students about the basic aspects of International Trade Law, including the WTO and its different principles and Agreements.

## **Course Contents:**

### **Module I: Contract of Sale**

Uniform Rules on Contract of Sale, Types of Sale Contract - CIF, FOB, C & F Contract, Special Trade Terms in International Sale Contract, Indian Bill of Lading Act 1856, International Conventions Governing Bill of lading

Addition of Special Trade Terms in International Sale Contract, Indian Bill of Lading Act 1856 and International Conventions Governing Bill of Lading in Module I.

Addition of Background Role and Structure of WTO, and difference between GATT & WTO in Module IV

### **Module II: Payment for International Sales**

Letters of Credit, Bills of Exchange, and function and connected issues.

### **Module III: Settlement of Disputes**

Arbitration, Enforcement of Arbitral Awards.

### **Module IV: World Trade organization (WTO) and General Agreement on Tariffs and Trade (GATT)**

#### **Background of formation of WTO, Role of WTO in International Trade, Difference of GATT and WTO, Structure of WTO.**

Basic Principles: MFN, Treatment, National Treatment and Non-Discrimination, Exceptions to MFN : Tariff Bindings, Regional Trade Agreements, Escape Clause, Safeguard Measures, Quantitative Restrictions, Anti-dumping and counter-vailing duties.

### **Module V: WTO and Multilateral Agreements**

Trade Related Investment Measures (TRIMS), General Agreement on Trade in Services (GATS), Trade Related aspects of Intellectual Property Rights (TRIPS).

### **Module VI: Dispute Settlement Mechanism under WTO**

## **Evaluation Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	05	5	70

# LAND LAWS

Course Code: LAW2805

Credit Units: 05

## Course Objective:

The legislative power to make laws relating to land and land ceiling is in the state list. Different States have enacted their own laws on this subject. The Constitutional perspectives relating to this subject have to be taught as an essential part of this course. The provisions in the Constitution in Part III, IV and XII as well as those in Schedule VII relating to distribution of legislative powers over land are essentially to be taught with emphasis.

## Course Contents:

**Module I: Punjab Land Revenue Act 1887 (Applicable over Punjab and Haryana),** Definition of Key Words, Revenue Officers: Their Power and Functions, Preparation of Revenue Record: Like Documents of Jamabandi, Girdawari, Mutation, Intkaal, Sijra Nasab (Pedigree Table) Sirja Aze (Map of the Village), Assessment of Land Revenue, Collection of Land Revenue, Concepts & Procedure of Partitions.

## Module II: Punjab Land Revenue Act, 1887:

Records-Of-Rights and Annual Records, Collection Of Land Revenue, Recovery of other Demands by Revenue-officers, Partition, **Assessment** and other relevant provisions.

## Module III: Haryana Rent Control Act, 1973

Definitions (Sec. 1-4), Rights & Duties of Tenants, Rights and Duties of Landlords, Grounds of Ejectment of Tenants.

**Haryana Panchayati Raj Act, 1994** (Sec. 1 to 54) (Chapter 1 to 6) Definition of Key Words, Constitution of Gram Sabha and Gram Panchayat, Gram Panchayat's Duties, Functions and Powers, Finance and Taxation, Control of Gram Panchayat, Sources of Income and Expenditure of Gram Panchayat.

## Module IV: Haryana Panchayati Raj Act 1994,

Panchayati Samiti (Chapter 7 To 11) And Sec. 55 To 116) Definition of Key Words, Conduct of Business of Panchayat Samities, Servant of Panchayat Samities, Duties and Powers of Panchayat Samiti, Finance and Taxation, Sources of Income of Panchayat Samiti, Control of Panchayat Samiti

## Module V: Delhi Land Laws

### Real Estate Development and Apartment ownership

Delhi Apartment Ownership Act, 2009,

# FORENSIC SCIENCE-II

Course Code: LAW2808

Credit Units: 05

## Course Objective:

Forensic science is science related to the law. It is the scientific method of gathering and examining information about the past which is then used in a court of law. It is applied science and consists of a range of different disciplines which often require different underpinning science knowledge. It continues to evolve and is now applicable to crime disruption and crime prevention as well as crime detection and the identification of victims in mass disasters.

The course focuses on the following objectives:

1. Developing and understanding the concept of forensic anthropology
2. Brief description on the ballistic its analysis and reconstruction
3. Developing an understanding to wounds and its medico-legal aspect.
4. Developing an understanding on explosives and its crime scene investigations.

## Course Contents:

### Module I: Forensic Anthropology

Definition, scope, and application; time since death: assessing and determining the time and cause of death, study of burned bones and bones fragments; identification.

### Module II: Ballistics

Definition, Indian Arms Act, forensic importance, classification of firearms; ammunition; range of fire; firearms injuries, analysis and reconstruction.

### Module III: Wounds and its medico-legal aspects

Introduction to wounds; determining the age of the injury and its medico-legal aspect, injuries due to blunt forces, injuries due to sharp forces, miscellaneous injuries.

### Module IV: Explosives and Explosion Scene Investigation

Explosive Act: nature and classification, composition and characteristics of explosives, pyrotechnics, IEDs, specific approach to scene of explosion, post-blast residue collection, reconstruction of sequences of events; evaluation and assessment of scene of explosion and its examination.

### Module V: Advanced fingerprint and other impression

Fingerprint in personal identification, examination on the basis of poroscopy and its significances; evaluation of fingerprints on the basis of edgescopy and its significance in fingerprint field, Palmer, Planter and other impression its evaluation.

## Examination Scheme:

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

## LAW AND MEDICINE-II

Course Code: LAW2809

Credit Units: 05

### Course Objective:

The course aims to provide the students the knowledge about the interrelationship between law and medicine and complex legal and ethical issues involved in the field of medicine and medical profession. The course include the ethical and legal issues in population control, surrogate motherhood, HIV/AIDS, the rights of the unborn, AID and Law, mental health and medical experimentation on human beings.

### Course Contents:

#### Module I: Population control and community health

Law, Practice and Society- Causes for Population Explosion- National Population Policy, 2000- Terminal methods female sterilization and male sterilization- State Imposed sterilization and its legal validity- Population control and Right to family and Right to privacy.

#### Module II: Surrogate Motherhood and the Rights of the Unborn

Surrogacy in foreign countries- Motherhood Debated-Legality of contract- problems-Refusal to accept the child-health Tourism and sanctity of woman's life- ICMR Code- The Unborn- Introduction- Right of an Unborn Child-Prenatal Diagnosis (and Amniocentesis)-Miscarriage

#### Module III: AIDS

Rights, Freedom and duties of HIV/AIDS Patients- Privacy and Public health- Liberty and Security- Movement- Marriage and Finding a family- Right to work- Education for an infected person- Protection of children infected or born to infected parents- Right against degrading Treatment- Equality before law- access to medicine

#### Module-IV

**International Norms-** general Provision-Consent-Human Genome-Scientific Research-Donors for Transplantation Purposes-Prohibition of Financial gain and Disposal of a part of the Human Body

#### Module-V

**Mental Health-** Historical Background-types of Causes of Mental Illness- Development of the Human being and mental health-Prevention of Mental Illness and Treatment-Alcoholism and Drug Addiction- Mental health Act- Admission and discharge to mental hospital legal issues

#### Module-VI

**Experiments of Human Beings-** The concept-Kinds of Experiments-Subject of Experimentation-controls-Clinical Trials-Studies in special Populations-Informed consent-Special Studies of Bioavailability and Bioequivalence-Ethics committee- Stem cell research- International documents and Indian laws-Ethical norms on experimentation

# Syllabus - Ninth Semester

## DRAFTING, PLEADING AND CONVEYANCING

Course Code: LAW2901

Credit Units: 05

### Course Objective:

The course aims at acquainting the students about the various fundamentals of drafting to develop the skills of pleading and conveyancing.

### Course Contents:

#### Module I: Fundamentals Rules of Pleadings

Meaning: Pleading and Conveyancing, Complaint structure, written statement, Affidavit and Conveyancing, Verification of pleading, Object of verification, Amendment of Pleadings.

#### Module II: General Principles of Civil Pleadings

Suit for Part-performance of the contract ; Suit for specific performance of the contract; Suit for recovery of money given on Interest (Money suit); Suit of damages ; Suit for restitution of conjugal rights; Maintenance suit by wife; Application under Section 13 Hindu Marriage Act (Divorce); Suit for recovery of rent or eviction of tenant; Interpleader suit; Suit for malicious prosecution ; Suit under Section 13 of Negotiable Instruments Act; Application under Order 6 Rule 17 of Code of Civil Procedure (Amendment of Pleadings); Appeal (First); Execution Petition; Revision; Application for Temporary Injunction Order 39 Rule 2 of Code of Civil Procedure.

#### Module III: General Principles of Criminal Pleadings

Complaint; Application for Bail (Section 436, 437 of Code of Criminal Procedure); Application for Anticipatory Bail (Section 438 of Code of Criminal Procedure Code); Accused's reply; Criminal Appeal (Appeal against conviction ).

#### Module IV: Conveyancing

Notice and Reply to notice; General power of attorney; Special power of Attorney; Writ petitions: *Habeas Corpus, Mandamus, Certiorari, Quo warranto*; Sale deed; Partnership deed; Lease deed/ Rent deed; Promissory note; Gift deed; Adoption deed; Will; Affidavit ; Mortgage – deed.

### Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

### Text & References:

# INTELLECTUAL PROPERTY RIGHTS

**Course Code: LAW2902**

**Credit Units: 05**

## **Course Objective:**

The course is designed to provide comprehensive knowledge to the students regarding Indian position of the Patent Law (1970), Copy Right Law (1957) and Designs Act of 2000 which invariably form the part of Intellectual Property Law and shall comprise of the following.

The importance of this branch of the law is to be sufficiently realized in the Indian legal education. These areas are now internationally conceptualized as representing intellectual property. It is often the case that while the law of patents and trademarks is referred to as industrial property, the law relating to copyright is named intellectual property. While both these terms could be suitably invoked, we here speak of intellectual property as signifying all the three bodies of the law as well as the law on industrial designs.

Unlike other forms of property, intellectual property refers to regimes of legal recognition of, primarily, the products of the mind or imagination. The subject matter of property relations is here preeminently based on mental labour. The law relating to intellectual property protects the right to mental labour.

The law confers rights of proprietary nature on relative intellectual labour primarily on the basis that it is in the interests of society and state to promote creativeness and inventiveness. Limited monopoly provides incentive for greater inventive and innovative efforts in society. An important aspect of the exploration in this course would be ways in which the laws strike a fair balance between the interests and rights of the intellectual labourers on the one hand and organized industrial enterprises on the other. Another dimension is a study of the ways in which this regime of laws militates against, or favours, communal property in national cultures. As concerns 'modernization' crucial questions arise in the field of copyright protection in computer software and hardware, internet, electronic music and scientific research. Both copyright, trademarks, design and patent law here relate basically to the law of unfair competition and constitute an aspect of consumer protection and welfare not only in the context of national perspectives but also in view of the waves of globalization already set in. Both from the standpoint of human resources development, modernization and justice it is important that the law students get sufficient insights in Intellectual Property Law.

## **Course Contents:**

### **Module I: Introduction**

Intellectual Property, Concept and Philosophy, Need for Private Rights versus Public Interests, Advantages and Disadvantages of IPR.

### **Module II: Patent**

Development of patent law, Rationale for patent protection, Nature and definition, Types of patentable subject matter, Patentability criteria, non-patentable inventions, Rights of patentee, Procedure for granting a patent, Grounds for opposition, Transfer of patent rights, Compulsory Licenses, Acquisition, Surrender, Revocation, restoration, Patent infringement and remedies, Bio patents and software patents, Official Machinery, Controller, Powers and Functions, Patent in pharmaceutical industry, Patent cooperation treaty, Paris convention.

**GURUGRAM**

# Syllabus - First Semester

## RESEARCH METHODOLOGY AND LEGAL WRITING

**Course Code: LAW4101**

**Credit Units: 03**

### **Course Objective:**

The main objective of this course is to acquaint the students of Law with the method of social science research. This course is expected to provide the knowledge of technique of selection, collection and interpretation of primary and secondary data in socio –legal research.

### **Course Contents:**

#### **Module-I: Nature and Scope**

1. Meaning and Objective of Legal Research.
2. Kinds of Research.
3. Doctrinal and Non-Doctrinal Methods of Research.
4. Stages of Research Process.

#### **Module-II: Research Problem, Hypothesis and Research Design**

1. Research Problem- Definition, Determination, Sources of Data.
2. Hypothesis- Meaning and Definition, Characteristics.
3. Research Design- Meaning and Essentials of Research Design; Forms of Research Design.
4. Testing of Hypothesis.
5. Sampling Design- Basic Assumption, Classification.

#### **Module-III: Research Methods and Tools**

1. Social and Legal Survey.
2. Case Analysis.
3. Questionnaire Schedule.
4. Observation and Interview.

#### **Module-IV: Tabulation, Analysis, Interpretation, Reporting and Legal Writing**

1. Classification and Tabulation of Data.
2. Analysis and Interpretation of Data.
3. Use of Statistical Methods and Computers in Legal Research.
4. Reporting and Method of Citations.
5. Ethics in Research.
6. Foundation of Writing.

### **Examination Scheme:**

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# COMPARATIVE PUBLIC LAW OR SYSTEM OF GOVERNANCE

**Course Code: LAW4102**

**Credit Units: 03**

## **Course Objective:**

This course focuses on orientation of the students to understand the Constitutional Laws, their concept, constitutionalism and comparative Constitutional Law.

## **Course Contents:**

### **Module-I: Public Law-Constitution and Administrative Law**

1. Concept of Constitution
  - ☐ Meaning and Idea of Constitution, Nature and Goals.
  - ☐ Living Constitution.
  - ☐ Constitution as Supreme Law.
2. Study of Comparative Constitutional Law
  - ☐ Relevance.
  - ☐ Problems and Concerns in Using Comparison.
3. Constitutionalism
  - ☐ Concept, Distinction between Constitution and Constitutionalism.
  - ☐ Essential features of Constitutionalism -Written Constitution, Separation of Powers, Fundamental Rights, Independence of Judiciary and Judicial Review.

### **Module-II: Constitutional Foundations of Powers**

1. Supremacy of Legislature in Law making.
2. Rule of Law
  - ☐ Dicey's concept of Rule of Law.
  - ☐ Modern concept of Rule of Law.
  - ☐ Social and economic rights as part of Rule of Law.
3. Separation of powers
  - ☐ Concept of separation of powers.
  - ☐ Checks and balances.
  - ☐ Separation of powers or separation of functions.
4. Forms of Governments
  - ☐ Federal and Unitary Forms.
  - ☐ Features, Advantages and Disadvantages.
  - ☐ Models of Federalism and Concept of Quasi-federalism.
  - ☐ Role of Courts in Preserving Federalism.
  - ☐ Parliamentary and Presidential Forms of Government.

### **Module-III: Constitutional Review**

1. Methods of Constitutional Review
  - ☐ Judicial and Political Review
  - ☐ Concentrated and Diffused Review
  - ☐ Anticipatory and Successive Review
2. Concept and Origin of Judicial Review
3. Limitations on Judicial Review

**Module-IV: Amendment of Constitution**

1. Various Methods of Amendment
2. Limitations on Amending Power: Comparative Perspective
3. Theory of Basic Structure: Origin and Development

**Examination Scheme:**

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# **CORPORATE & BUSINESS LAW (SPECIALISATION)**

## **LAWS ON SECURITIES & FINANCIAL MARKETS**

**Course Code: LAW4103**

**Credit Units: 02**

### **Course Objectives:**

Laws on Securities and Financial Markets course provides a conceptual understanding and in-depth knowledge of securities laws and the regulatory framework concerning financial markets in India.

### **Course Contents:**

#### **Module-I: An Overview of Financial System**

1. Constituents of financial system; significance, development and growth of financial and capital markets in India.
2. Financial reforms and present scenario.
3. Regulatory authorities governing financial and capital markets:
  - ☐ Securities and Exchange Board of India (SEBI).
  - ☐ The Securitization and Reconstruction of Financial Assets and Enforcements of Security Interest Act, 2002.

#### **Module-II: Primary Market and Secondary Market**

1. Primary and Secondary Markets: Meaning, significance, scope and developments in both the markets.
2. Difference between Primary and Secondary markets.
3. Issue of Capital SEBI Guidelines (Initial public offer).
4. Stock Exchanges:
  - ☐ Functions and significance of stock exchanges.
  - ☐ Regulatory framework and control.
  - ☐ Operations of stock exchanges.

#### **Module-III: Capital Market and Money Market Instruments**

1. Capital market instruments:
  - ☐ Equity shares, Preference shares, Sweat Equity shares, Non-voting shares, Debentures.
  - ☐ New instruments of capital market – pure, hybrid and derivatives.
2. Money market instruments:
  - ☐ Treasury bills, Commercial bills, Certificate of deposits.
  - ☐ New money market instruments.

#### **Module-IV: Primary and Secondary Market Intermediaries**

1. Primary Market :
  - ☐ Various agencies and institutions involved in Primary Market.
  - ☐ Role of intermediaries– merchant bankers, registrars, underwriters, bankers to issue, portfolio managers, debenture-trustees, etc.
  - ☐ Their rules, regulations and code of conduct framed by SEBI.
2. Secondary Market:
  - ☐ Secondary market intermediaries– stock brokers, sub-brokers, advisors.
  - ☐ Their rules, regulations and code of conduct framed by SEBI.

### **Module-V: Mutual Funds and Collective Investment Schemes**

1. Mutual Funds
  - ☐ Introduction, definitions, types, risks involved performance evaluation
  - ☐ SEBI regulations for Mutual Funds.
2. Collective Investment Schemes
  - ☐ Introduction, definitions, types, risks involved and performance evaluation.
  - ☐ SEBI regulations for collective investment schemes.

### **Module-VI: Depository System**

1. An analysis of the Depositories Act, 1996:
  - ☐ Constitution, role and functions of depository.
  - ☐ Depository participants, issuers and registrars.

### **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

# CORPORATE GOVERNANCE

**Course Code: LAW4104**

**Credit Units: 02**

## **Course Objectives:**

Corporate Governance is a set of customs, policies and processes by which an institution is governed. It is an important topic of strategic management, how a company is governed; influences, rights and relationships among the stakeholders and eventually how an organization is managed. This course will focus on the fundamentals of Corporate Governance from a varied prospect including the board of directors, investors and other stakeholders and assessing the effectiveness and execution of governance roles, regulators and responsibilities.

## **Course Contents:**

### **Module-I:**

1. Concepts, origin and development of Corporate Governance
  - ☐ Meaning of the term governance.
  - ☐ Kumarmangalam committee Report.
  - ☐ Naresh Chandra committee Report.
  - ☐ Cadbury Committee Report.
  - ☐ Rahul Bajaj Committee Report.
2. Meaning of “Corporate Governance”.
  - ☐ Definitions of Corporate Governance.
  - ☐ Need for good Governance.
3. Problems in effective Governance.
  - ☐ Corporate Governance and Ethics.
  - ☐ Corporate Governance and financial accounting.

### **Module-II:**

1. Legal and Policy Issues in Corporate Governance
  - ☐ Transparency and Disclosure.
  - ☐ Board and management structure.
  - ☐ Shareholders claim satisfaction and financial information.
2. Corporate Social Responsibility.

### **Module-III:**

1. Corporate Governance in India
  - ☐ Listing Agreement Clause 49- SEBI Role.
  - ☐ Changes since liberalization.
  - ☐ Corporate Governance of Banks.
  - ☐ The Board of Directors.
  - ☐ The Role of Auditors.
  - ☐ Role of Regulatory Agencies.
  - ☐ The Role of International Economic Institutions.
  - ☐ Companies Act, 2013.
  - ☐ Policy document on Corporate Governance.
2. Overarching principles of Corporate Governance.

**Module-IV:**

1. International Corporate Governance
  - ☐ OECD Guidelines on Corporate Governance.
  - ☐ MNC/ TNC/ MNE Companies.
  - ☐ UNCTRIAL Model Law.
  - ☐ Governance and Development.

**Module-V:**

1. Role of judicial bodies on Governance and Accountability
  - ☐ Constitutional Law and principles on Corporate Governance.
  - ☐ Recent Case studies (India and International Corporate Law).

**Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

# INTELLECTUAL PROPERTY LAW

**Course Code: LAW4105**

**Credit Units: 02**

## **Course Objective**

This Course is designed with the objective of acquainting students with the conceptual and operational parameters of Intellectual Property Law, the judicial interpretation and the new and emerging dimensions of the subjects. It also teaches them various aspects and rights that exist for them in emerging Intellectual Property Laws.

## **Course Contents:**

### **Module-I:**

1. Introduction to IPR
  - ☐ Introduction to various kinds of Intellectual Property Rights.
  - ☐ TRIPS & WTO

### **Module-II:**

1. Patents
  - ☐ Meaning of Patents.
  - ☐ Subject matter of Patents.
2. Infringement of Patents and Remedies available
  - ☐ Patent of Addition, Rights of Patentee.
  - ☐ Transfer of Patents, revocation of Patents & leading Case Law.

### **Module-III:**

1. Trademark
  - ☐ Introduction meaning and definition of Trademark,
  - ☐ Function and essentials of Trademark,
  - ☐ Similar and deceptive mark, principles of registration of Trademark,
2. Infringement of Trademark,
3. Passing off, Absolute & Relative Mark of Refusal & Leading Case Laws.

### **Module-IV:**

1. Copyright
  - ☐ Meaning and definition of Copyrights.
  - ☐ Concept of Author and Owners of Copyrights.
  - ☐ Contract of Service and Contract for Service.
2. Infringement Under Section 51 of Copyrights Act 1957.
3. Fair dealing Under section 52.
4. Features of Copyrights and Remedies available & leading Case Laws.

### **Module-V:**

1. Trade Secret
  - ☐ Meaning of Trade Secret.
  - ☐ Definition of Trade Secret and Leading Laws.

**Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**Text & References:**

# **CENTER STATE RELATION & CONSTITUTIONAL GOVERNANCE**

**Course Code: LAW4107**

**Credit Units: 02**

## **Course Objective:**

This paper aims at giving the students an insight into the federal structure as envisaged in the Constitution of India and focuses upon educating them about the Legislative, Administrative and Financial relations between the Centre and the States.

## **Course Contents:**

### **Module-I: NATURE OF INDIAN POLITY**

1. Introduction to the Constitution of India.
2. Constitutional Law---Constitutionalism.
3. Introduction to the concept of Federalism.
4. Historical evolution of Federal features in India.
5. Different forms of Governments-Unitary, Federal and Confederation, their features, merits, de-merits and distinction between them.
6. Nature of Indian Federalism –Dominant features of the Union over the States.
7. Judicial Perspective over the Indian Federalism.

### **Module-II: LEGISLATIVE RELATIONS BETWEEN THE CENTRE AND THE STATES**

1. Doctrine of Territorial Nexus.
2. Delegated Legislation-permissible limits of delegation.
3. Scheme of distribution of legislative powers between Union and States.
4. Principles of interpretation of lists- Doctrine of Pith and Substance; Doctrine of Colorable Legislation; Doctrine of harmonious construction; Ancillary legislation
5. Residuary Powers.
6. Parliament's power to legislate on the State List.
7. Inconsistency between laws passed by Parliament and State legislature.

### **Module-III: ADMINISTRATIVE RELATIONS BETWEEN THE UNION AND STATES**

1. Distribution of executive powers
2. Inter-governmental delegation of powers
3. Centre's directive to State & other Constitutional provisions
4. All India Services
5. Co-operative federalism; disputes relating to waters, Inter-State Council

### **Module-IV: FINANCIAL RELATIONS BETWEEN THE UNION AND THE STATES**

1. Introduction to Allocation of taxing powers-Central Taxes, State Taxes, Concurrent Taxes, No tax outside the tax entries.
2. Funds-Consolidated and Contingency Funds.
3. Public Accounts.
4. Tax and Fees.
5. Restrictions on taxing powers.
6. Inter-Government Tax immunities.
7. Tax-sharing.
8. Grants-Grants-in-lieu; Grants-in-aids; Specific Purpose Grants.
9. Finance Commissions.
10. Borrowing Powers.

**Module-V: SERVICES UNDER THE UNION AND THE STATES**

1. Recruitment and Regulations of Conditions of Services.
2. Doctrine of Pleasure-Restrictions on Doctrine of Pleasure.
3. Constitutional Safeguards to Civil Servants.
4. Public Service Commission-Appointment of Member of Public Service Commission.
5. Functions of Public Service Commission.

**Module-VI: EMERGENCY PROVISIONS**

1. National Emergency.
2. State Emergency.
3. Financial Emergency.

**Examination Scheme:**

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

# POLICE AND SECURITY ADMINISTRATION

Course Code: LAW4108

Credit Units: 02

## Course Objective:

In every written constitution, provision is required to be made to equip the state to face grave threats to its existence arising from extra-ordinary circumstances created by war or external aggression or armed rebellion. Although "amidst the clash of arms, the laws are not silent" they do not speak the same language in war as in peace. Extra-ordinary circumstances warrant the invocation of extra-ordinary laws and such laws are known as emergency laws. They put greater fetters on individual liberty and also eclipse certain aspects of the due process. But in such circumstances, the democratic forces must assert that for survival of the State, the least possible liberty should be available. This course aims to familiarize the students with different aspects of such emergency powers and scrutinizing intellectual attitude towards such powers.

## Course Contents:

### Module-I: NATIONAL SECURITY, PUBLIC ORDERS AND RULE OF LAW

1. Emergency Detention in England - Civil Liberties.
2. Subjective satisfaction or objective assessment?
3. Pre-Independence law.

### Module-II: EXCEPTIONAL LEGISLATIONS

1. COFEPOSA and other legislation to curb economic offenders.
2. TADA: "the draconian law"-comments of NHRC
3. Special courts and tribunals
4. Due process and special legislation

### Module-III: MARTIAL LAW

1. Provisions in English Law
2. Provisions in the Indian Constitution

### Module-IV: ACCESS TO COURTS AND EMERGENCY

1. Article 359: ups and downs of judicial review
2. Constitution (Forty-fourth), Amendment Act, 1978.
3. Constitution (Fifty-ninth) Amendment Act, 1988.

## Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

## Syllabus - Second Semester

### LAW & JUSTICE IN A GLOBALISING WORLD

**Course Code: LAW4201**

**Credit Units: 03**

**Course Objective:**

The title of the subject, as suggested in the UGC Guidelines dated 18 January 2013, does not seem to restrict its scope at the level of discussion of abstract concepts and theories. The part in the globalising world“ is to be taken seriously and the idea of law and justice needs to be discussed in the specific context of globalisation. This essentially means creation of a better understanding of international law as well as an analysis of how and to what extent the existing and emerging legal framework at the international level ensures justice. This also includes study of institutional framework at the global level relevant in the context of global justice.

The issue of overlapping with some streams of specialisations such as human rights, and humanitarian law is not critical because these branches of law are not to be discussed in detail. Instead it will be discussed from a restricted angle – justice perspective. Moreover, the theories and concepts need to be linked with the contemporary reality and discussed in the light of these issues that will help the students to understand as well as analyse it effectively. In this background, the broad objectives of the subject are- Introduction and discussion of concepts and theories relating to law and justice in the specific context of the globalising world and examine whether international law promotes justice or perpetrates injustice. The students will also learn about the changes that may be advocated (if needed) to ensure a world order that ensures justice for all

**Course Contents:**

**Module-I: Legal theories relevant in globalisation context**

1. Globalisation – concept, history and development -various dimensions of globalisation (economic, cultural etc) – legal dimension of globalization.
2. Public International Law – nature, scope, contemporary relevance and challenges.
3. Globalisation - implications for law and justice:
  - ☐ Colonial/imperial era and global justice (imperial invasion/exploitation)
  - ☐ Post colonial situation – women’s rights, self-determination, indigenous people’s rights etc.
  - ☐ Globalisation of law – harmonization of law- emergence of global institutions (e.g. IPRs, protection of investors’ rights, universal human rights).
  - ☐ Constitutionalism in international order.
  - ☐ Global environmental justice.
4. Law and justice at the global level – developing countries and Indian perspective [Case studies – strengthening IPR regime and investment law regime, exploitation of resources (including genetic resources) in the developing world; working of the UN Security Council].

**Module-II: Global Justice Organisations and Movements**

1. Global justice and international organisations
  - ☐ United Nations - humanitarian intervention, responsibility to protect, judicial review, Veto system, UN reforms.
2. International Financial Institutions (WTO, IMF, WB) – implications for global justice
  - ☐ Dominance of western countries.

- ☐ Western concepts being global concepts (e.g. IPR, Investment, human rights).
- ☐ Designing the domestic law and policies through International Law and loan conditionality.
- 3. Global movements – implications for law and justice
  - ☐ How global movements shape/influence/change international law to ensure justice?
  - ☐ Case studies – indigenous people’s rights/women’s rights/environmental justice/anti-privatisation movements (e.g. right to water movements)/human rights movements (access to medicine, farmers’ rights etc.).
  - ☐ Indian perspective – anti-patent movements in India (e.g. Novartis case/gene campaign etc.)/ anti-FTA movements in India/Anti-IFI movements.

### **Module-III: Human Rights, Humanitarian Law and Criminal Justice**

1. Emergence of International Human Rights Law
  - ☐ Deviation of traditional approach of International Law addressing only states.
  - ☐ International Bill of Rights and other HR treaties.
  - ☐ Universalism v. cultural relativism.
  - ☐ Humanitarian intervention and Responsibility to Protect – implications for law and justice
2. Humanitarian Law and International Criminal Law
  - ☐ History and development – overview of Hague and Geneva Conventions and the statute of the International Criminal Court.
  - ☐ Big country’s impunity - Critique from realist point of view.

# DISSERTATION

Course Code: LAW4237

Credit Units: 03

## Research Dissertations:

- (a) Dissertations are in the nature of monographs based on students' own research work under their respective Guides.
- (b) Length of Dissertations should be between 100-125 pages (typed in 12 points, double-spaced, on A-4 size paper, hard-bound).
- (c) Title-page of the Dissertation should mention its title followed by the words "submitted to Amity Institute of Advanced Legal Studies in part fulfillment of requirements for LL.M (mention specialization here) Degree of Amity University Uttar Pradesh" and should bear the students name and year of submission.
- (d) Contents-page of the Term Paper should give its chapter-plan consisting of proper headings and sub-headings. This will be followed by a Preface.
- (e) Each chapter of the Dissertation should begin on a fresh page and references in the prescribed style (given below) for each chapter should be given at the end of that chapter.
- (f) Table of Statutes, Table of Cases and Bibliography must be given in the Dissertation after the last chapter.

## Assessment Scheme:

### Dissertation

Continuous Evaluation: Based on the oral presentations [three], regularity and records etc. – 30%

Final Evaluation: Based on contents and layout of the report, conceptual framework, objectives and methodology and implications and conclusions. – 70%

Term Paper: Continuous Evaluation based on chapter-plan, general approach and two presentations – 30%

Final Evaluation: Based on the organization of the paper, objectives, comprehensiveness of the research, flow of the ideas, relevance of the material used. – 70%

# MEDIA LAW

**Course Code: LAW4208**

**Credit Units: 02**

## **Course Objective:**

This course discusses the principles of media law as they apply to the work of media and communications professionals in a variety of fields. Understanding the current and evolving state of media law is a challenging task, therefore this course will introduce students to the study of legal and ethical issues in the media. Students will develop an understanding and appreciation of these issues and the ability to analyze the important legal and ethical issues involved with the mass media industry.

## **Course Contents:**

### **Module-I: Media & Public Policy**

#### **I. Disseminating the facets of Media**

1. Understanding the concept of Media
2. History of Media Theories of Media
3. Evolution of Media
  
1. Media Legislation - British experience
2. Media Legislation in U.S.
3. Media Legislation in Indian Context
  
1. Freedom of Expression in Indian Constitution
2. Interpretation of Media freedom
3. Issues of Privacy
4. Right to Information
5. Case studies on Media and Free expression

### **Module-II: Media - Regulatory Framework**

1. Legal Dimensions of Media
2. Self Regulation & Other Issues

### **Module-III: Convergence & New Media**

1. Understanding Broadcast Sector
2. Legislative efforts on Broadcast sector
3. Opening of Airwaves
4. The New Media of Internet

### **Module-IV: Media – Advertisement & Law**

1. Concept of Advertisement
2. Advertisement & Ethics
3. Advertisement Act of 1954

## **Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

# Syllabus - Semester Second

## PATENT LAW AND PRACTICES

**Course Code: LAW2251**

**Credit Units: 03**

### Course Objective

The course is designed to provide comprehensive knowledge to the students regarding Indian position of the Patent Law (1970), Historical development, Procedure for granting a patent, Infringement.

### Module I

Research exemption Introduction to Patents  
Overview  
Historical development  
Concepts, Novelty, Utility  
Inventiveness/Non-obviousness

### Module II

Patent Act 1970 – amendments of 1999, 2000, 2002 and 2005  
Patentable subject matter, Patentability criteria, non-patentable inventions  
Pharmaceutical products and process and patent protection  
Software Patents  
Patenting of Micro-organism

### Module III

Rights of patentee  
Procedure for granting a patent and obtaining patents  
Grounds for opposition  
Working of Patents, Compulsory License  
Acquisition, Surrender, Revocation, restoration  
Transfer of patent rights,

### Module IV

Infringement  
What Is Infringement? Direct, Contributory, and Induced  
How Is Infringement Determined? Who Is an Infringer?  
Official Machinery, Controller, Powers and Functions  
Defences to Infringement

### Examination Scheme

# Syllabus - Semester Third

## COPYRIGHT LAW AND PRACTICES

**Course Code: LAW2351**

**Credit Units: 03**

### Course Objective

The course is designed to provide comprehensive knowledge to the students regarding Indian position of the Copyright Law, 1957, Historical background and Development of Copyright Law, Infringement.

### Module I

Copyright and Neighbouring Rights  
Concept and Principles  
Historical background and Development of Copyright Law  
Leading International Instruments, Berne Convention, Universal Copyright Convention,  
International Copyright under Copyright Act  
WIPO Phonograms and Performances treaty

### Module II

Copyright Act, 1957  
Terms of Copyright  
conditions for grant of copyright,  
extent of rights exception to copyright protection,  
fair use provision, assignment and licensing,  
Copyright in Literary, Dramatic and Musical ,Works, Sound Recording, Cinematograph  
Films,  
Copyright in Computer Programme, Author Special Rights, Right of Broadcasting and  
performers,

### Module III

Copyright Registrar and Copyright Board-Power and Procedure  
Copyright Societies,  
Ownership, Assignment, Licence, Translation of Copyright,  
Compulsory Licences,  
Infringement-Criteria of Infringement, Infringement of Copyright-Films,  
Literary and Dramatic works, Importation and Infringement.

### Examination Scheme

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	05	5	70

# HUMAN RIGHTS

## Syllabus - Semester First

### CONCEPT AND THEORETICAL UNDERSTANDING OF HUMAN RIGHTS

Course Code: LAW2152

Credit Units: 03

#### **Module-I: Introduction**

History of Human Rights-17th-18th century-19th century-20th century- pre world wars- Post world wars- Philosophy of Human rights

#### **Module-II: Principle and Theories of Human Rights**

Classification of human rights- Three generations-Nature of Human rights- Legal Theories related to Human Rights- Legal documents related to Human Rights before the Second World War

#### **Module-III: International Protection of Human Rights**

Failure of League of Nations- United Nations Organisation- UN Charter- UN system and organs of the UN-Universal Declaration of Human Rights- International Covenant on Civil and Political Rights (**ICCPR**) - the International Covenant on Economic, Social and Cultural Rights (**ICESCR**)

#### **Module-IV: Implementation of Human Rights at the International Level**

Human Rights Council of the UN- Committees and organs protecting Human Rights- Role of UN General Assembly and Security Council – Individual Communication system

#### **Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

## Syllabus - Semester Second

### SYSTEM, ORGANIZATIONAL AND INSTRUMENTS OF HUMAN RIGHTS

**Course Code: LAW2252**

**Credit Units: 03**

**Module-I: UN and other Regional Organisation for the Protection of Human Rights**

UN system of protection of Human Rights- EU and Human Rights- Protection under the Inter American System- African Charter – Arab Charter- Cultural Relativism and Universalism

**Module-II: International Documents Related to Human Rights**

Genocide Convention-Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW) - Convention on the Elimination of All Forms of Racial Discrimination (CERD)- Convention on the Rights of Persons with Disabilities (CRPD)- Convention on the Rights of the Child (CRC)-United Nations Convention Against Torture (CAT)- International Convention on the Protection of the Rights of All Migrant Workers and Members of their Families

**Module-III: Basic Human Rights under the International Documents**

Three generations of Rights- First generation Rights- Right to Equality- Right to life- Right to Speech- Freedom of Religion- Freedom from Torture

**Module-IV: Second and Third generations of Rights**

Rights related to dignity of individuals- Right to education- Right to food- Right to work-Right to livelihood- Right to Self Determination- Right to development- Rights of Indigenous people

**Examination Scheme:**

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

## Syllabus - Semester Third

### CONTEMPORARY HUMAN RIGHTS SITUATIONS AND ISSUES

Course Code: LAW2352

Credit Units: 03

#### Module-I: Indian Constitution and Human Rights

Concept of State- Concept of Law- Just fair and reasonableness- Fundamental Rights and Human Rights

#### Module-II: Fundamental Rights and International Covenant on Civil and Political Rights (ICCPR)

Right to Equality- Right to Freedom- - Right to Life- Freedom of Religion- Rights of Minorities- Right to Constitutional Remedies- Judicial pronouncement of the Courts in India

#### Module-III: Directive principles of State Policy and the International Covenant on Economic, Social and Cultural Rights (ICESCR)

Resources of a country and Implementation of Second Generation Rights- Positive Rights and negative rights- Enumerated Rights and Non Enumerated Rights-Directive principles of State Policy- International Covenant on Economic, Social and Cultural Rights (ICESCR)

#### Module-IV: Protection of Human Rights in India

Protection of Human Rights Act, 1993- National Human Rights Commission and State Commissions- Woman's Commission- Minority Commission- SC/ST Commission- Police atrocities- Violations against woman and other weaker sections- Role of NGOs- Human Rights education

#### Examination Scheme:

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

## Syllabus - Semester Fourth

### SPECIFIC THEMES IN HUMAN RIGHTS

Course Code: LAW2452

Credit Units: 03

**Module-I: Morality, Ethics, Religion and Human Rights**

**Module-II: Terrorism and Human Rights**

**Module-III: Science and Technology and Human Rights**

**Module-IV: Human Rights of the Marginalized People**

Rights of the Refugees- Prisoners of war- Under trials- Rights of the Differently abled- Sexual Minorities and Human Rights- HIV/AIDS- Access to Medicine- Protection of persons from enforced disappearance- Right against corruption- Right to development-Right to clean Environment

#### Examination Scheme:

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

## **Syllabus - Semester Fifth**

### **LEGISLATION THEMES IN HUMAN RIGHTS**

**Course Code: LAW2552**

**Credit Units: 03**

**Module-I: Regional Human Rights Legislations**

**Module-II: National Human Rights Legislations**

**Module-III: Role of Judiciary-judicial Activism and P.I.L**

**Module-IV: Specific Human Rights issues in India and Role of legislation and Judiciary**

**Examination Scheme:**

<b>Components</b>	<b>P/S/V</b>	<b>CT</b>	<b>A</b>	<b>C</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

## Syllabus - Semester Sixth

### REPORT WRITING AND THESIS PREPARATION

Course Code: LAW2652

Credit Units: 03

- 1- Field Report
- 2- Term Paper/ Study Report
- 3- Viva

#### Examination Scheme:

Components	Field Report	Term Paper/ Study Report	Viva	Total
Weightage (%)	20	50	30	100

# Bachelor of Arts Economics (Honors)

## Syllabus - First Semester

### MICRO ECONOMICS-I

**Course Code: ECO2151**

**CreditUnits: 03**

#### Course Objective:

This course is designed to expose first –year students, who may be new to economics, the basic principles of microeconomic theory. The emphasis would be on thinking like an economists & the course will illustrate how microeconomic concepts can be applied to analyze real life situations.

#### Course Contents:

##### Module I: Exploring the Subject Matter of Economics

Why study economics? The scope and method of economics; scarcity and choice; questions of what, how and for whom to produce and how to distribute output

##### Module II: Supply and Demand: How Markets Work, Markets and Welfare

Individual demand and supply schedules and the derivation of market demand and supply; shifts in demand and supply curves; the role prices in resource allocation; Elasticity of Demand — price, income and cross; Consumer's surplus

##### Module III: Consumer's Behavior

Utility-cardinal and ordinal approaches, Indifference curves; budget constraints;. Consumer's equilibrium (Hicks and Slutsky); Giffin goods; Compensated demand; Revealed preference theory; Engel curve.

##### Module IV: Theory of Production and Costs:

Technology, Isoquants, production with one and more variable inputs, Returns to scale, short run and long run costs, cost curves in the short run and long run, total, average, and marginal product, cost minimization and expansion path, elasticity of substitution.

#### Examination Scheme:

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# MATHEMATICAL METHODS FOR ECONOMICS

**Course Code: ECO2101**

**CreditUnits: 03**

## **Course Objective:**

The main objective of inclusion of this course in Economics is to familiarize the students with basic quantitative & algebraic tools & techniques which will be needed for the understanding of the core subject and the students can apply the quantitative techniques in the analysis of managerial problems.

## **Course Contents:**

### **Module I**

Matrices and Determinants: Types; Transpose, Trace, Ad Joint and Inverse of Matrices; Solution of a system of two and three equations by Matrix Inverse and Cramer's methods; Linear independence and Linear dependence of vectors; Rank of a matrix; Simple application questions. Application in Input-Output analysis

### **Module II**

Basic Concepts: Functions and their graphs; Limits and Continuity; Equations – simple, quadratic and simultaneous and Identities; Equations of a straight line, concept of slope; Equation and interpretation of Rectangular Hyperbola.

### **Module III**

Partial and Total differentiation; Homogenous function and Euler's Theorem; Maxima and Minima of Functions of one and two variables; Constrained Optimization Problem (with maximum three variables); Integration of a function; Methods of Substitution and Partial fractions

### **Module IV**

The derivative of a function, differentiability and continuity, techniques of differentiation; sums, products and quotients of functions; composite functions and the chain rule, Inverse functions, Implicit differentiation, Second and higher order derivatives, Points of inflexion, Differentials and linear approximation, Exponential and logarithmic functions, Logarithmic differentiation

### **Module V**

Maxima and Minima, saddle point, unconstrained optimization, necessary and sufficient conditions for local optima, constrained optimization (equality constraints), the method of Lagrange multipliers & economic examples

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## ECONOMIC HISTORY OF INDIA (1857-1947)

**Course Code: ECO2102**

**Credit Units: 03**

**Course Objective:**

It will throw light on the economic history which will subsequently help the students to understand the trend of economic growth & development.

**Course Contents:**

**Module I: Introduction: Colonial India: Background and Introduction**

Overview of colonial economy

**Module II: Macro Trends**

National Income; Population; Occupational Structure

**Module II: Agriculture**

Agrarian structure and land relations; agricultural markets and institutions – credit, commerce and technology; trends in performance and productivity; famines

**Module II: Railways and Industry**

Railways; The de-industrialisation debate; evolution of entrepreneurial and industrial structure; nature of industrialisation in the interwar period; constraints to industrial breakthrough; labour relations

**Module II: Economy and State in the Imperial Context**

The imperial priorities and the Indian economy; drain of wealth; colonial exploitation-form and consequences; Case for protection of Indian Industries

**Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# HISTORY OF ECONOMIC THOUGHT

**Course Code: ECO2103**

**CreditUnits: 03**

## **Course Objective :**

This course is essential for a student who aspires for advanced training in economics. Contemporary economic science has evolved over many centuries. The evolution of economic ideas in each instance was as much a response to immediate economic problems and policy issues as much as it was a self-conscious attempt to refine earlier analysis by correcting mistakes and filling in the gaps in analysis. Economic ideas did not evolve in isolation, but were an integral and important part of the evolution of modern social thought. Prevailing ideas of science, scientific rigour and measurement played a significant role in the shaping of economic science at each stage of its evolution. This course, tracing the history of economic thought, would enable the student to understand how contemporary economics came to be what it is.

## **Course Contents:**

### **Module 1: Early Period**

Nature and importance of Economic Thought. Economic thought of Plato and Aristotle  
Mercantilism: main characteristics; Thomas Mun — Physiocracy: natural order, primacy of agriculture, social classes

### **Module 2: Classical Period**

Adam Smith — division of labour, theory of value, capital accumulation, distribution, views on trade, economic progress;  
David Ricardo — value, theory of rent, distribution, ideas on economic development and international trade;  
Thomas R. Malthus — theory of population, theory of gluts;  
Karl Marx — dynamics of social change, theory of value, surplus value, profit, and crisis of capitalism;  
Economic ideas of J.B. Say, J.S. Mill

### **Module 3: Marginalists**

The marginalist revolution;  
Pigou: Welfare economics; Schumpeter: role of entrepreneur and innovations.

### **Module 4: Keynesian Ideas**

An introduction to the thoughts contributed by Lord Keynes: The aggregate economy, Liquidity Preference Theory, Marginal Efficiency of Capital and Marginal Efficiency of Investment, wage rigidities, multiplier principle, cyclical behaviour of the economy, uncertainty and role of expectations

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# ECONOMIC SYSTEM AND SOCIETY

**Course Code: ECO2104**

**CreditUnits: 03**

## **Course Objective:**

This course will reflect the socio-economic change in historical perspective, capitalism as an economic system, structure of capitalism and capitalism in global context.

## **Course Contents:**

### **Module I**

Analyzing Socio-Economic Change in Historical Perspective

### **Module II**

Capitalism as an economic system

Origins, nature and structure of capitalism; Accumulation and crisis; Alternative perspectives on capitalism

### **Module III**

The transition from feudalism to capitalism

### **Module IV**

The evolving structure of capitalism; Monopoly capitalism, the modern corporation: divorce between ownership and control; The institutional diversity of capitalism; Alternative perspectives on the role of state.

### **Module V**

Capitalism in Global Context: Multinational corporations and their impact on the developing economics; imperialism

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# COMPUTERS IN MANAGEMENT

**Course Code: MGT2101**

**CreditUnits: 03**

## **Course Objective:**

The objective of this subject is to provide conceptual knowledge of the information technology to the future Managers. This subject highlights the topics like Database Management, Networking, Internet, E-commerce etc., which can help managers to take routine decisions very efficiently.

## **Course Contents:**

### **Module I: World of Computers**

Introduction to world of Computers, Computers in home (Reference, Education & Communications, Entertainment and Digital Media Delivery, Smart Appliances, Home Computers), Computers in education, Computers in workplace (productivity and decision making, customer services, communications), Computers on the move (Portable and Hand held computers, Self-Service kiosks, GPS Applications), Support Systems - Hardware and Software, Computer Peripherals, Memory Management.

### **Module II: Computer Networks**

Introduction to Computer Networks, Networking components, Classification and types of Networks, Network Topologies – Overview with Advantages and Disadvantages, Communication Channels, Client Sever Architecture, LAN concepts.

### **Module III: Internet Technology & World Wide Web**

Introduction to internet intranet and Extranet, Myths about the Internet, Basic concepts of internet, Domain Name Service, Internet Protocols and Addressing, Services of internet, Internet and support Technologies, Censorship and Privacy issues.

### **Module IV: E-commerce**

Introduction, E-Commerce Vs E-Business, Advantages & Disadvantages, E-Commerce Business Models, E-Commerce Technologies, Hosting E-Commerce Site – Planning and constructing web services, E-Commerce Applications, E-Core Values – Ethical, Legal, Taxation and International issues, E-Commerce Security Issues, Internet based Payment System.

### **Module V: Enterprise Resource Planning**

Introduction, Scope and Benefit, ERP and related technologies (BPR, MIS, DSS, EIS, SCM, OLAP, etc), ERP implementation methodology – implementation life cycle, ERP and its success factors, Pitfalls and management concerns, ERP Market – renowned vendors and the packages.

### **Module VI: Database Management System**

Introduction, Need for DBMS, Components of DBMS, Benefits of DBMS over Tradition File System, classification and types of Database Models, Database Approach – Its benefits and Disadvantages.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# E-COMMERCE

**Course Code: COM2103**

**CreditUnits: 03**

## **Course Objective:**

The subject will provide students with the knowledge to cover wide-ranging aspects of conducting business on the Internet.

## **Course Contents:**

### **Module I:E-Commerce Concept**

Meaning, definition, concept, features, function of E-Commerce, E-Commerce practices v/s traditional practices, scope and basic models of E-Commerce, limitations of E-Commerce, precaution for secure E-Commerce, proxy services. Concept of EDI, difference between paper based Business and EDI based business, advantages of EDI, Application areas for EDI, action plan for implementing EDI, factors influencing the choice of EDI, Software concept of Electronic Signature, Access Control.

### **Module II:Types of E-Commerce**

Meaning of B2C, B2B, C2C, P2P, Applications in B2C- E-Banking, E-Trading. E-Auction - Introduction and overview of these concepts. Application of B2B- E-distributor, B2B service provider, benefits of B2B on Procurement, Just in time delivery. Consumer to consumer and peer to peer business model Introduction and basic concepts

### **Module III: E-Marketing**

Traditional Marketing V/S E-Marketing, impact of Ecommerce on markets, marketing issue in E-Marketing, promoting your E-Business, Direct marketing, one to one marketing

### **Module IV: E-Finance**

Areas of E-Financing, E-Banking, traditional v/s E-Banking, operations in E-Banking; E-Trading- Stock marketing, trading v/s E-Trading, importance of E-Trading, advantages of E-trading, operational aspects of E-Trading.

### **Module V: E-Payment**

Transactions through Internet, requirements of E-Payment system, post paid payment system- credit card solutions, cyber cash Internet cheques. Instant paid payment system- debit card, direct debit. Prepaid payment system- Electronic cash, digicash, netcash, cybercash, smart cards

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## TERM PAPER

**Course Code: ECO2131**

**Credit Units: 02**

### Objectives

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

### Guidelines:

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Inflation
  - Unemployment
  - Fiscal Deficit
  - Poverty
  - Education
  - Malnutrition
  - Rural Development
  - Regional Imbalance
  - Globalization
  - Foreign Direct Investment

### Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Presentation	Total
30	30	20	20	100

# PROJECT

**Course Code: ECO2132**

**Credit Units: 03**

## **Objectives:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Chapter Scheme and distribution of marks:**

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual Framework/ National/International Scenario – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusion & Recommendations -- 10 marks

**Chapter 5:** Bibliography -- 05 marks

## **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4)Body of the Report:** The body of the report should have these four logical divisions

**a)Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

**b)Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

**c) Presentation of Data,Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

**d)Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.

- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II** : Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III** : Collection of information and data relating to the topic and analysis of the same.

**STEP IV** : Writing the report dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual Framework / National & International Scenario,

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusion and Recommendations.

**Chapter 5:** Bibliography

**STEP V** : The following documents are to be attached with the Final Project Report.

- Approval letter from the supervisor (Annexure-IA)
- Student's declaration (Annexure-IB)
- Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

#### **Guidelines for evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate. The evaluation scheme shall be as follows:

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

**Student's Declaration**

I .....hereby declare that the Project Work with the  
title (in block  
letters).....

submitted by me for the partial fulfilment of the degree of B.A. Honours in  
Economics is my original work and has not been submitted earlier to any other  
University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been  
incorporated in this report from any earlier work done by others or by me. However,  
extracts of any literature which has been used for this report has been duly  
acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: ECO2133**

**Credit Units: 01**

## Objectives

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## Major Themes for Workshop

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and other recent and relevant topics of study may be included.

## Guidelines for Workshop

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## Methodology

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## Evaluation Scheme:

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# Syllabus - Second Semester

## INDIAN ECONOMY

**Course Code: ECO2251**

**Credit Units: 03**

### Course Objective:

This subject covers the major features of Indian Economy at Independence in the field of agriculture industry and other infrastructure of the economy. It also deals with growth of development of different phases on the current issues in Indian economy policy.

### Course Contents:

#### Module I: Economic Development at the time of Independence

Major features of the economy at independence: Colonial economy; Semi-feudal economy; Backward economy; Stagnant economy

#### Module II: Planning in India

Objectives; Strategy; Broad achievements and failures; Current Five Year Plan — objectives, allocation and targets; New economic reforms — Liberalization, privatization and globalization; Rationale behind economic reforms; Progress of privatization and globalization

#### Module III: Major Economic Issues

Demographic trends and issues; education; poverty and inequality; unemployment, inflation

#### Module IV: External Sector

Role of foreign trade; Trends in exports and imports; Composition and direction of India's foreign trade; Balance of payments crisis; Export promotion measures and the new trade policies

#### Module V: Agriculture

Nature and importance; Trends in agricultural production and productivity; Factors determining productivity; Land Reforms; New agricultural strategy and green revolution

#### Module VI: Industry

Industrial development during the planning period; Industrial policy of 1991 and the latest Industrial policy; Growth and problems of small scale industries; Role of public sector enterprises in India's industrialization

### Examination Scheme:

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## MICRO ECONOMICS - II

**Course Code: ECO2201**

**CreditUnits: 03**

### **Course Objective:**

The main objective of the course is to provide a deeper knowledge on some specific field of Microeconomics such as game theory, factor pricing, oligopoly & welfare Economics.

### **Course Contents:**

#### **Module I: Decision theory under Uncertainty: Utility Functions and Expected Utility**

Risk aversion and risk preference, insurance and investor's choice.

Asymmetric information- Adverse selection and moral hazard

#### **Module II: Oligopoly**

Analysis of Cournot&Stackelberg, Collusive Oligopoly and application of Prisoner's Dilemma of Nash equilibrium

#### **Module III: Market Structure**

Review of perfect competition and monopoly; Pricing with market power; price discrimination, peak load pricing, two-part tariff; monopolistic competition and oligopoly.

#### **Module IV: Factor Pricing**

Derived demand for a single input and multiple inputs in competitive & imperfect competition markets, firm demand and industry demand, collective bargaining and exploitation rent & quasi rent.

#### **Module V: Welfare Economics**

Conditions of Pareto optimality in pure exchange and with production, optimality of perfect competition

### **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

A-Attendance; P-Project; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

### **Text & References:**

# STATISTICAL METHODS IN ECONOMICS-I

**Course Code: ECO2202**

**CreditUnits: 04**

## **Course Objective:**

This subject will deal with all fundamental statistical methods of tools which the students have to use in economic analysis and decision making problems.

## **Course Contents:**

### **Module I: Introduction:**

Basic concepts: Population, Sample, Parameter, Statistic, Frequency distribution, Cumulative frequency distribution; Graphic and diagrammatic representation of data; Techniques of data collection. Sampling vs. Population, primary and secondary data.

### **Module II: Central Tendency and Dispersion:**

Measures of Central Tendency: Mean, Median, Mode, Geometric mean, Harmonic mean; Measures of Dispersion; Range, Quartile deviation Mean deviation, Standard deviation; Skewness and Kurtosis, Moments.

### **Module III: Correlation and Regression:**

Correlation: Simple; Coefficient of correlation; Karl Pearson and Rank correlation; Partial and Multiple Correlation analysis; Regression analysis – Estimation of a regression line in a bivariate distribution, Least squares method; Interpretation of correlation and regression coefficients; Coefficient of determination.

### **Module IV: Time Series:**

Time Series Analysis - concept and components, determination of trend (Linear, Quadratic and Exponential) and seasonal indices

### **Module V: Index Numbers**

Concept of an index number; Laspeyer's, Paasche's and Fisher's Index Numbers; Time Reversal, Factor reversal and circular tests; Chain base index; Problems in the Construction of an index number; splicing; base shifting and use of index number for deflating other series.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# ENVIRONMENTAL ECONOMICS

**Course Code: ECO2203**

**CreditUnits: 03**

## **Course Objective:**

This course focuses on economic causes of environmental problems. In particular, economic principles are applied to environmental questions and their management through various economic institutions, economic incentives and other instruments and policies. Economic implications of environmental policy are also addressed as well as valuation of environmental quality, quantification of environmental damages, tools for evaluation of environmental projects such as cost-benefit analysis and environmental impact assessments.

## **Course Content:**

### **Module I:**

Economics and environment – Scope and significance of Environmental Economics; Supply & Demand: Market forces and the environment; Market & Market Failure: A cause of Environmental Degradation

### **Module II:**

Consumer Theory and Valuation; Consumer behaviour and the environment; Measuring benefits to consumers; Revealed & State preference methods

**Module III:** Production Theory: Why firms pollute. Production, pollution, output and prices

### **Module IV:**

Environmental Protection and Welfare-maximising net benefits in the presence of externalities; The Coase Theorem; Government policies for environment protection; . National Committee on Environmental planning and Co-ordination (NCEPC), Tiwari Committee (1980) – Department of Environment (DOE) Pollution Control Board

### **Module V:**

Resource Management-Renewable and Non-Renewable resource management, application-economic growth and the environment; sustainability

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# INSURANCE AND ECONOMICS

**Course Code: ECO2204**

**CreditUnits: 03**

**Course Objective:** To familiarize the students with the concepts of insurance and the application of economics to the fundamentals of insurance.

**Course Content:**

## **Module I**

The quest for Economic Security - Classification of Risks - Demand for Insurance, Definition and Nature - Evolution and Importance of Insurance, Principles of Insurance

## **Module II**

Life Insurance Contract: Nature and Classification of Policies - Selection of Risk - Calculation of premium - Investment of Funds - Surrender Value.

## **Module III**

Fire Insurance: Nature and uses - Kinds of Policies - Policy Conditions - Rate Fixation - Payment of claim - Motor Insurance - Personal Accident - Health and Medical Insurance

## **Module IV**

Insurance in Economic Development: Insurance and Mobilisation of savings - Insurance Institutions as Investment Institutions and their role in capital market.

## **Module V**

Insurance as social welfare and security: Insurance - An Investment - Tax and Non - Tax Advantages - Retirement Planning - pension plans - Insurance Regulation and Development Authority (IRDA)

**Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# ANALYSIS AND DESIGN OF BUSINESS SYSTEMS

**Course Code: MGT2204**

**CreditUnits: 03**

## **Course Objective:**

The course aims at preparing students conceptualize and define scope and domain of system analysis and design. It also focuses on system development life cycle using conventional and structural look.

## **Course Contents:**

### **Module I: The Systems Development Environment. (Information System Development Life Cycle)**

System & its parts, Types of Systems, Characteristics of a System, System Analyst in system Development, Developing Systems- SDLC, Approaches to System Development (Prototyping, Joint Application Design (JAD), Participatory Design (PD)), System Development Models (Waterfall model & Spiral Model), System Planning & Selection (Identifying, Selecting, Initiating & Planning System Development Project).

### **Module II: System Planning and Selection (Graphic technology Modeling Tool)**

Identifying and Selecting Projects (Identifying potential development projects, classifying and ranking projects, and selecting projects for development), Methods for project identification and selection, Evaluation criteria for classifying and ranking projects, Initiating and Planning System Development Projects (Process & performed Activities, Deliverables & Outcomes), Assessing Project Feasibility (Economic, Operational, Technical, Schedule, Legal & Contractual, Political Feasibility)

### **Module III: System & Data Analysis (Data Analyzing Modeling)**

Determining System Requirements (Traditional Methods, Modern & Radical Methods), Structuring System Requirements (Process Modeling – DFD, Logic Modeling – Structured English & Decision Tables, Conceptual Modeling – ER Model), Data Analysis & Techniques (Interpretive, Coding, Recursive Abstraction and Mechanical Technique), Types of Analysis (Descriptive, Exploratory, Confirmatory and Predictive), Modeling Methodologies (Bottom Up method & Top Down Method), Generic and Schematic Data Modeling.

### **Module IV: System & Database Design**

System Design (Design Objectives, Phases in Designing, Purpose of System Design), System Design Goals, Type of Design, Design Strategy, System Decomposition (Modeling, Connection and Coupling of a System), System Design Methodologies, Database Design, Database Management System – an introduction, Overview of Data Models, Relational Database Model – Well structured relations, Keys, Schema & Subschema, Structure, Facilities & Users, Constraints, Anomalies, Functional Dependency, Normalization, Roles & Duties of System Administration.

### **Module V: System Implementation & Operation (System Management)**

Activities in implementing (Coding, Testing & Installation, Documentation, Training, Support, Maintenance), Types of testing, planning installation, approaches to installation, Documenting a system, Training and Supporting users, Types & Frequencies of Training Methods, Reasons of System Implementation Failures, Project Closedown, Conducting System Maintenance – Types of Maintenance (Corrective, Adaptive and Perfective Maintenance), effective maintenance, Evaluation of System's Success, System Enhancement, Quality Assurance in System Cycle.

### **Module VI: System Security and Auditing**

System Security: Data Security, Backup & Recovery during System & Database failure, Ethical Issues in System Development, Threat and Risk Analysis, Audit, System Audit, System Audit

Standards (Planning, Implantation and Reporting Standards), System Analysis and Programming (Overview, Role & Duties of System Experts as Analyst and Programmer).

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>HA</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination)

**Text & References:**

# INNOVATION & CREATIVITY MANAGEMENT

**Course Code: MGT2205**

**CreditUnits: 03**

## **Course Objective:**

To develop an appreciation for new ideas and out of the box thinking so that students can successfully imbibe the habit of innovative and creative thinking in situations is demanding such an approach.

## **Course Contents:**

### **Module I**

Innovation Management- Introduction, characteristics, components, types, models of Innovation process, Innovation Environment-Originators of Innovation, Key Drivers of Innovation, Factors influencing Innovation, Nurturing Innovation in e-business.

### **Module II**

Organizing for Innovation- Organizational theories and structures, traits of innovative organizations, current trends, factors influencing organizational design and size decisions, Need & Characteristics for creative organization, 7S framework, creativity crushers, fostering innovation climate and culture, the creativity Hit List.

### **Module III**

Research and Development management- Significance, prerequisites, process, technology development approaches, management of R &D, In source to open source environment, R&D in small industry, Managing creative employees, significance and challenges of managing creative employees, Traits of a creative person, motivation to creativity, strategies for unblocking creativity, factors influencing group creativity, Promoting group creativity, Left and right thinking, Linear and non-linear thinking process, creative thinking, Tradition vs creative thinking.

### **Module IV**

Individual creativity techniques- Inner and Directed creativity techniques, Group Creativity Techniques-creativity methods, writing techniques, techniques based on pictures, maps and networks, Product innovation-types of new products, Target markets for Disruptive Innovation, Technology strategies for innovation, new product development, packaging and positioning innovations, beyond product innovation, New product failures.

### **Module V**

Innovation Diffusion- Concept of diffusion and adaptation, diffusion types, Innovation diffusion theory, Innovation adoption by organizations, Innovation adoption across countries, Marketing strategy and the diffusion process.

### **Module VI**

Legal aspects of innovation- IPR, Indian Patents Act, trademark, Copyrights, Trade secrets, Towards Innovative Society-Innovation for social development, Spirit of innovation in India, Favourable and Unfavourable factors.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# HUMAN VALUES AND PROFESSIONAL ETHICS

**Course Code: MGT2206**

**CreditUnits: 03**

## Course Objective:

The aim of this course is to facilitate the development of a Holistic perspective among students towards life, profession and happiness, based on a correct understanding of the human reality and the rest of existence. Such a holistic perspective forms the basis of value based living in a natural way, recognize the need for lifelong learning and have the knowledge and skills that prepare them to identify the moral issues involved in management areas and to provide an understanding of the interface between social, technological and natural environments.

## Course Contents:

### Module I: Human Values

Morals, Values, types of values, evolution of human values, Ethics – Integrity – Work Ethic – Honesty – Courage –Empathy – Self-Confidence – Character, Challenges at Work place

### Module II: Values in Management

Relevance of values in Management, need for values in global change, values for managers, holistic approach for managers in decision making, problems related to stress in corporate management

### Module III: Workplace Rights and Responsibilities and Work Environment

Organizational complaint procedures; Government agencies; Resolving employee concerns; Limits on acceptable behavior in large corporation.

Work Environment: Ethical and legal considerations, Organizational responses to offensive behavior and harassment; Ethics in a Global Context.

### Module IV: Industrial Integrity

The epitome of industrial success, Integrity and organization, exploring learning process of integrity, Consequences of lack of integrity

## Examination Scheme:

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## READINGS IN ECONOMICS

**Course Code: ECO2230**

**Credit Units: 02**

### **Objectives:**

The objective of this concentration elective is to inculcate reading habit alongwith value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. A contemporary and relevant book will be selected by the concerned department.

### **Guidelines**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size16

### **Evaluation Scheme**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

## TERM PAPER

**Course Code: ECO2231**

**Credit Units: 02**

### **Objectives:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

### **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Inflation
  - Unemployment
  - Fiscal Deficit
  - Poverty
  - Education
  - Malnutrition
  - Rural Development
  - Regional Imbalance
  - Globalization
  - Foreign Direct Investment

### **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

**Course Code: ECO2232**

**Credit Units: 03**

## **Objectives:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Chapter Scheme and distribution of marks:**

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual Framework/ National/International Scenario – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusion & Recommendations -- 10 marks

**Chapter 5:** Bibliography -- 05 marks

## **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

**a) Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

**b) Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

**c) Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

**d) Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.

- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II** : Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III** : Collection of information and data relating to the topic and analysis of the same.

**STEP IV** : Writing the report dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual Framework / National & International Scenario,

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusion and Recommendations.

**Chapter 5:** Bibliography

**STEP V** : The following documents are to be attached with the Final Project Report.

- Approval letter from the supervisor (Annexure-IA)
- Student's declaration (Annexure-IB)
- Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

#### **Guidelines for evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate. The evaluation scheme shall be as follows:

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

**Student's Declaration**

I .....hereby declare that the Project Work with the  
title (in block  
letters).....

submitted by me for the partial fulfilment of the degree of B.A. Honours in  
Economics is my original work and has not been submitted earlier to any other  
University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been  
incorporated in this report from any earlier work done by others or by me. However,  
extracts of any literature which has been used for this report has been duly  
acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: ECO2233**

**Credit Units: 01**

## Objectives:

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## Major Themes for Workshop

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and other recent and relevant topics of study may be included.

## Guidelines for Workshop

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## Methodology

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## Evaluation Scheme:

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# Syllabus – Third Semester

## MACRO ECONOMICS - I

**Course Code: ECO2351**

**CreditUnits: 03**

### **Course Objective:**

This course aims at introducing the fundamentals of Macroeconomic theories, policies and models in a historical perspective. It will enable the students to develop a critical insight on Classical and Keynesian macroeconomic models, to understand the relationship between inflation and employment by providing exposure to the constructions of Friedman, Phelps & Phillips.

### **Course Contents:**

#### **Module I: Introduction to Macroeconomics**

The roots of macroeconomics, macroeconomic concerns, the role of government in the macro economy, the components of the macro economy, the methodology of macroeconomics

#### **Module II: Introduction to National Income Accounting**

Concepts of GDP and national income, approaches to calculating GDP, GDP and personal income, Nominal and real GDP, Limitations of the GDP concept.

#### **Module III: Schools of Macroeconomic Thoughts**

Classical, Neo Classical and Keynesian Models.; Say's Law of Markets and Classical Theory of Employment

#### **Module IV: Keynesian Model**

Keynes theory of income and employment; Consumption function; theory of investment-marginal efficiency of capital; saving and investment; The Investment Multiplier and its application to LDC's

#### **Module V: Money in the Modern Economy**

Theories of Demand for Money: Quantity Theory and Keynes approach; Characteristics of a monetary economy; the supply of money and overall liquidity position; credit creation

#### **Module VI: Inflation**

Inflation: types, causes, consequences and impact on the Indian economy; remedial measures.

#### **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

### **Text & References:**

# INDUSTRIAL ECONOMICS

**Course Code: ECO2301**

**CreditUnits: 03**

## **Course Objective:**

The core idea behind the inclusion of this subject is to introduce the students on the industrial developmental side of India, its different facts, different arena, policies & future prospect.

## **Course Contents:**

### **Module I**

Patterns, processes, speed and implications of industrialization; Factors inhibiting industrialization; measures conducive to industrialization; Size and efficiency of an industrial unit; Factors determining optimum size of industrial units

### **Module II**

Issues relating to the Composition of Indian Industry: Small vs. Large Industry; Public vs. Private Sector, with emphasis on: Performance of the public sector; Privatization; Dynamics of the Industrial Sector: Growth and Sickness

### **Module III**

Theories of industrial location—Weber's deductive theory; Sargent Florence's inductive analysis; Factors affecting industrial location; Industrial productivity

### **Module IV**

Industrial Development in India: New Industrial Policy 1991 and recent industrial policies in India, Industrial Growth and pattern in India.

### **Module VI**

Role and functions of IFCI, IDBI, SIDBI, MSFC in Industrial Finance

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

A-Attendance (**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination)

## **Text & References:**

### **Text:**

## STATISTICAL METHODS IN ECONOMICS - II

**Course Code: ECO2302**

**CreditUnits: 04**

### **Course Objective:**

This subject will lead the students into the field of probability and hypothesis testing. Each one of them has a lot of application in the practical problems of economics.

### **Course Contents:**

#### **Module I: Probability Theory**

Elements of Probability Theory: Sample space Events, meaning of probability Classical definition of probability, The addition rule, Multiplication Rule, Theorems of total probability, conditional and statistical independence, limitation of classical definition, Bayes formula, random variable, expectation and variance of random variable (for random sampling with or without replacement)

#### **Module II: Random Variables and Probability Distributions**

Defining random variables; probability distributions; expected values of random variables and of functions of random variables; properties of commonly used discrete and continuous distributions (uniform, binomial, normal, poisson and exponential random variables).

#### **Module III: Introduction to Estimation**

Methods of sampling; sampling distribution of a statistic; distribution of the sample mean; sampling error and standard error of a statistic with special reference to the mean; Point and interval estimation of parameters; properties of an estimator; unbiasedness, relative efficiency and consistency.

#### **Module IV: Hypothesis Testing**

Testing of Hypothesis; type I and type II errors, power of a test; large sample tests, “t” test for the mean; one tail and two tail tests for difference of means; z-test, f-test, Chi-square test for (i) goodness of fit and (ii) independence of two attributes.

### **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# ECONOMICS OF ENTREPRENEURSHIP

**Course Code: ECO2303**

**CreditUnits: 03**

## **Course Objective:**

The twenty first century has dawned with entrepreneurship as a major force shaping the global economy. The future growth of this economy lies in the hands of men and women committed to achieving success through innovative customer focussed new products and services. Therefore it is high time that the students had a glimpse of a few aspects of entrepreneurship.

## **Course Content:**

### **Module I**

Entrepreneurs - Concepts and qualities - Barriers - Structures - Definitions - Entrepreneur - Traits and types - Functions - Motivation - Project identification - Theories of entrepreneurship.

### **Module II**

Steps for starting a small scale industry - selection of types of organisation - Small Scale Industry - Problems and sickness of small scale industry - Government Policy

### **Module III**

Women Entrepreneur - Concept of women entrepreneur - Growth and Development of entrepreneurs - Functions - Rural women entrepreneurs - Problems of Women Entrepreneur - Role of Women's Association

### **Module IV**

Financial Analysis - Social Cost and Benefit Analysis - Sources of Project Finance - Institutions helping entrepreneurs - Role of Commercial Banks - New Entrepreneurial Development Agencies

### **Module V**

Entrepreneurial Development Programme (EDP) - Indian EDP - Risk - Development Strategy - Backward Area Development - International Business - Small Companies "going global"

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# MERGERS AND ACQUISITIONS

**Course Code: ECO2304**

**CreditUnits: 03**

## **Course Objective:**

The main objective of this course is to familiarize the students with the basic aspects of mergers and acquisitions.

## **Course Contents:**

### **Module I: Mergers and Acquisitions – Overview**

Introduction – Forms of Corporate Restructuring – Expansion – Mergers and Acquisitions – Tender Offers – Joint Ventures – Sell Offs – Spin Offs – Split Offs – Split Ups – Divestitures – Equity Carve outs - Corporate Control – Premium Buy Backs – Standstill Agreements – Anti- Takeover Amendments – Proxy Contests - Changes in Ownership Structures - Share Repurchases – Exchange Offers – Leveraged Buy – out – Going Private – Issue Raised by Restructuring – History of Merger Movements.

### **Module II: Mergers and Acquisitions**

Economic Rationale for Major Types of Mergers - Horizontal Mergers – Vertical Mergers – Conglomerate Mergers - Concentric Mergers.

### **Module III: Theories of Mergers**

Efficiency Theories – Differential Efficiency - Inefficient Management – Operating Synergy – Pure Diversification - Financial Synergy – Strategic Realignment to Changing Environments – Undervaluation – Information and Signaling – Agency Problems and Managerialism - Takeovers as a Solution to Agency Problems

### **Module IV: Divestment of Public Sector Undertakings and Leveraged Buy-outs**

General Economic and Financial Factors illustration of an LBO

**Takeover Defenses :** Anti-Takeover Amendments, Any case study

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>HA</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## **Text & References:**

# AGRICULTURAL ECONOMICS

**Course Code: ECO2305**

**CreditUnits: 03**

## **Course Objective:**

This subject is aimed at providing knowledge on the agricultural economy of India, its development, productivity, rural indebtedness and defects in the agricultural market and to develop a critical study on recent agricultural crises in India To familiarize the agricultural situation in India To provide sound knowledge base on India's Agricultural economy before green revolution and after it. To develop a critical study on recent Agricultural crises in India

## **Course Contents:**

### **Module I**

Features of Agriculture - Importance of Agriculture in the Indian Economy – Relationship between Agriculture and Non-Agriculture sectors

### **Module II**

Agriculture Development in India - Subdivision and Fragmentation of holdings in India and causes - Land Tenure and Land Reforms

Productivity in Agriculture - New Agriculture Strategy - Green Revolution - Nature of Food Economy - Agriculture price policy in India - Public Distribution system

### **Module III**

Rural Indebtedness - Causes of Rural Indebtedness - Sources of Agricultural Finance.

Market and Marketed Surplus - Defects in marketing Agricultural produce – Regulated markets - Co-operative marketing - Farmers Market.

### **Module IV**

Current Issues in Indian Agriculture

Sustainable Agricultural growth- Concepts & Constraints

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## **Text & References:**

# INDUSTRIAL PSYCHOLOGY

**Course Code: MGT2305**

**CreditUnits: 03**

## **Course Objective:**

This course is designed to provide an overview of Industrial Psychology including individual, group, and organizational issues resulting in enhanced understanding of the world of business and related career concerns. The main aim is to create awareness about the role and importance of psychological factors and processes in the world of work

## **Course Contents:**

### **Module I: Introduction**

Nature and scope of organizational Psychology – History and development of field; major problems of industrial psychology, current trends in organizational psychology

### **Module II: Types of Psychology**

Mental psychology, Male & Female psychology; Impact on behavior and efficiency

### **Module III: Test of Psychology**

Types of tests, Effectiveness of these tests; Measures to control the tests, steps to improve the psychology

### **Module IV: Individual and Group Behavior**

Interaction and psychology involved in individuals; Improving psychology; Group Dynamics – Characteristics of group behavior; attitude measurement; methods of measuring attitudes; leadership and supervision; theories of leadership

### **Module IV: Performance Management**

Performance appraisal- Introduction, types, importance; Training and development- Introduction, significance and categories/types of training

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

A-Attendance; P-Project; HA-Home Assignment; CT-Class Test; EE-End Semester Examination

## **Text &References:**

### **Text:**

## TERM PAPER

**Course Code: ECO2331**

**Credit Units: 02**

### Objectives

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face

### Guidelines:

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Inflation
  - Unemployment
  - Fiscal Deficit
  - Poverty
  - Education
  - Malnutrition
  - Rural Development
  - Regional Imbalance
  - Globalization
  - Foreign Direct Investment

### Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Presentation	Total
30	30	20	20	100

# PROJECT

**Course Code: ECO2332**

**Credit Units: 03**

## **Objectives:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Chapter Scheme and distribution of marks:**

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual Framework/ National/International Scenario – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusion & Recommendations -- 10 marks

**Chapter 5:** Bibliography -- 05 marks

## **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

**a) Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

**b) Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

**c) Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

**d) Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.

- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II** : Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III** : Collection of information and data relating to the topic and analysis of the same.

**STEP IV** : Writing the report dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual Framework / National & International Scenario,

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusion and Recommendations.

**Chapter 5:** Bibliography

**STEP V** : The following documents are to be attached with the Final Project Report.

- Approval letter from the supervisor (Annexure-IA)
- Student's declaration (Annexure-IB)
- Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

#### **Guidelines for evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate. The evaluation scheme shall be as follows:

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

**Student's Declaration**

I .....hereby declare that the Project Work with the  
title (in block  
letters).....

submitted by me for the partial fulfilment of the degree of B.A. Honours in  
Economics is my original work and has not been submitted earlier to any other  
University /Institution for the fulfilment of the requirement for any course of study.

# Syllabus - Fourth Semester

## MACRO ECONOMICS - II

**Course Code: ECO2401**

**Credit Units: 03**

**Course Objective:**

The course mainly aims to lead the students to a higher level of macro economics. It will deal with, New Keynesian models: - Keynesian & classical theories of macroeconomics.

**Course Contents:**

**Module I: Fiscal Policy:**

Fiscal policy: objectives, targets, instruments and implications on an economy

**Module II: Monetary Policy**

Monetary policy :objectives, targets, instruments and implications on an economy

**Module III:Business Cycles**

Business Cycle Theories of Schumpeter, Kaldor, Samuelson and Hicks; Control of business cycles – relative efficacy of monetary and fiscal policies.

**Module IV:Equilibrium of Product Market and Money Market**

Theory of Interest; IS and LM curves: Derivation, their shifts and rotations. Simultaneous equilibrium of product market and money market

**Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# COMPARATIVE ECONOMIC DEVELOPMENT

**Course Code: ECO2402**

**CreditUnits: 03**

## **Course Objective:**

The objective of this course is to make a comparative study of the economic development among the developed countries- Britain, German, USA, Japan & USSR. The student will also get to know about the role of the state in economic development.

## **Course Contents:**

**Module I:** Perspectives on Comparative Economic Development:

- (a) Features of and trends in Modern Economic Growth -- a brief discussion of Kuznets' findings
- (b) Gerschenkron's hypothesis of Economic Development in Historical Perspective.

## **Module II**

An overview of economic development of the countries selected for case studies -- Britain, U.S.A., Japan and USSR. Major features of structural changes and their interrelations- labour, productivity, capital formation, output, consumption, income and distribution of income.

## **Module III**

Changes in the structure of agriculture and economic development -- Britain, Japan and U.S.S.R.  
Role and pattern of industrialisation in Britain, Japan and U.S.S.R.

## **Module IV**

Labour markets and processes - Britain and Japan  
Financial institutions and economic development in U.S.A and Japan

## **Module V**

Foreign trade and economic development -- Britain, Japan and USA.  
Role of the State in economic development (regulatory and developmental role) -- Japan, USA and USSR

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# PUBLIC FINANCE

**Course Code: ECO2451**

**Credit Units: 03**

## **Course Objective:**

This subject is primarily aimed at introducing principles of public finance, role of different governments, public expenditure, taxation, budget and fiscal policy in India. The government plays different roles and performs varied functions which are different from earlier societies. In this context the public financial functions of the government need to be understood by a student, by studying the relevant theory and empirical analysis.

## **Course Contents:**

### **Module I Introduction**

Nature, Scope and Importance, Theory of Maximum Social Advantage, Private goods, Public goods and Merit goods; Role of government in managing the economy under different economic systems – Social Welfare Function; Theory of Public goods - Market failure - Externalities - problems in allocation of resources - theoretical developments in Demand revelation for social goods -Public choice.

### **Module II: Public Expenditure**

Theories of Public Expenditure -Structure and growth of public expenditure - Criteria for public investment - Income Redistribution – Expenditure Programmes for the poor - Social Insurance: Unemployment Insurance, Health Care, and Education - Social cost-benefit analysis - benefit estimation and evaluation.

### **Module III: Taxation**

Theory of Taxation - Benefit and ability-to-pay approaches - Indian Direct and Indirect Taxes - Effects of taxation - Requirements of a sound tax system - Canons of taxation - Tax reforms since 1975 - Chelliah Committee Report - Evaluation of Tax Reforms -Taxation Incidence and alternative concepts of Incidence.

### **Module IV Budgeting and Debt**

Budget - Concept of PPB - Zero-based Budgeting - Cash budgeting : Cash management and Treasury functions in Government - Deficit Budgeting - Types of Deficits - Public Debt: Trends and composition of Indian Public Debt: Instruments - Treasury bills, bonds and other securities, Role of RBI - Debt management - Methods of debt redemption.

### **Module V: Fiscal Policy**

Role of Fiscal Policy in India - Principles of Fiscal federalism in India; Finance Commissions and Planning Commission

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>HA</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# ECONOMICS OF INFRASTRUCTURE

**Course Code: ECO2404**

**Credit Units: 03**

## **Course Objective:**

To enable the student to understand the importance of infrastructure in an economy and the provision and management of it

## **Course Content:**

### **Module I: Importance of Infrastructure**

Infrastructure – meaning, importance and role in economic development - Infrastructure as a public good- Social and physical infrastructure- Special characteristics of infrastructure- Pricing of infrastructure.

### **Module II Transport and Communication**

Demand for transport- cost functions in the transport sector – Principle of pricing- Special problems of individual modes of transport- Telephone utilities- cost in telephone industry- Characteristics of postal services- Criteria for fixation of postal rates- measurement of standards of service in telephone and postal utilities.

### **Module III: Energy, Electricity and Water Supply**

Primacy of energy in the process of economic development- factors determining demand for energy- Effects of energy shortages- Energy conservation- Renewable and non-conventional sources of energy- Relative economics of thermal, hydel and nuclear power plants.

### **Module IV: Education and Economic Growth**

Education and economic growth- the case for universal, free, primary education- structure of higher education- Financing of Higher Education in India- Health dimensions - Determinants of health – Poverty, Malnutrition, Illiteracy and lack of health information.

### **Module V Organisation and Financing of Infrastructure**

Organization and financing of infrastructure - Private Vs Public sector financing - PPP in infrastructure.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# BUSINESS INFORMATION & DATABASE SYSTEM

**Course Code: MGT2404**

**Credit Units: 03**

## **Course Objective:**

The aim of this course is to introduce the students to the managerial issues relating to information systems, its role in organization and how information technology can be leveraged to provide business value.

## **Course Contents:**

### **Module I**

MIS need and concepts, characteristics, Typology of MIS, Structure of MIS. Planning for MIS, System Development Methodologies, Conceptual and detailed designs of MIS, System Implementation strategies and process, System Evaluation and Maintenance.

### **Module II**

Introduction to data base management system- Data versus information, record, file; data dictionary, database administrator, functions and responsibilities, file-oriented system versus databases system.

### **Module III**

Advanced Concepts in Information Systems: Enterprise Resource Planning, Supply Chain Management, Customer Relationship Management, Data, Warehousing and Data Mining.

### **Module IV**

Database system architecture- Introduction, schemas, sub schemas and instances; data base architecture, data independence, mapping, data models, types of database systems.

### **Module V**

Data base security- Threats and security issues, firewalls and database recovery; techniques of data base security; distributed data base.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# PERSONAL FINANCIAL PLANNING

**Course Code: MGT2405**

**CreditUnits: 03**

## **Course Objective:**

Post Liberalization, India has witnessed a phenomenal growth in her GDP. With the advent of MNC's, and growth in private business, individuals income and saving pattern has changed. Therefore the need arises to manage these funds in a manner that it is no more called as savings but addressed as a need for Personal financial planning. This course is essential for every student irrespective of the specialization as every individual needs to plan his finances.

## **Course Contents:**

### **Module I: Introduction to Personal Financial Planning and Personal Accounting**

Concept of Personal Financial Planning: Need, Significance, Scope; Ethical issues in Personal Financial Planning; Changing per capita investors. Need to maintain Accounts, Methods: Traditional & Using Electronic Media. Applying for PAN & filing of Income Tax returns.

### **Module II: Investment Avenues**

**Real Assets:** Investment in Real Assets: Real Estate, Precious Metals, Other Fixed assets. Their relative merits & demerits. Change in their returns over the past few years.

**Financial Assets:** Investments in securities: Through IPO, Secondary Market. Investment in G-sec; Debt instruments, Post Office instruments, Insurance Policies, Mutual Funds, Certificate of Deposits, Foreign Market.

### **Module III: Introduction to Income tax and Income from Salary**

Introduction to Income tax act 1961 and Finance Act. Previous year, Assessment year, Income, Total Income, Gross Total Income, Capital and Revenue Receipts / Expenditures, Exempted Incomes, Residential Status and incidence of Tax.

Salary, Exemption:- Leave encashment, Gratuity, Pension, Annuity, Pension fund, Allowance (HRA, Entertainment, Special allowance – dependent of expense ad not dependent on expenae, perquisites – rent free accommodation, Leave travel concession, medical facility), Deductions 80c to 80u. ). Sections (2(9), 2(31), 2(7), 2(24), 3, 6, 14, 288A, 288B, 2(17), 4, 9, 45, 9(1)(ii), 9(1)(iv), 9(1)(v), 10, 11, 12, 17(1), 22,

### **Module IV: Income from House Property, Capital Gains and Other Sources**

Income from House Property(Types of house property, Exempted house property income, Computation of GAV and NAV, Treatment of unrealized, recovered and arrears of rent), Capital Gains and other Sources (Short term & Long term capital gain, Cost of acquisition, Cost of improvement, Index cost, Income that are taxed under other sources, Deduction under other sources, Tax treatment of lotteries, puzzles. Sections 23, 24, 2528, 30, 31, 32

### **Module V: Tax Planning**

Concept, significance and problems of tax planning, Tax evasion and tax avoidance, Individual Taxation Slabs, Wealth Tax, Gift Tax, Capital Gains Tax, Service tax, Recent Tax saving schemes

### **Module VI: Retirement & Goal Planning**

Concept of risk assessment of individual, Introduction to portfolio management, Retirement planning & investment: Income generation after retirement, liability management, anticipation of expenses. Investment for major goals: House, Family, Education, Medical, Wealth Management/ Financial Advisory companies. Their role, significance & growth.

**Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination)

# SALES AND DISTRIBUTION MANAGEMENT

**Course Code: MGT2406**

**Credit Units: 03**

## **Course Objective:**

The major objective of this course is to acquaint the students with the theory and practice of Management of Sales Operations.

## **Course Contents:**

### **Module I: Introduction**

Sales management- Concept, Objectives and functions; Evolution of sales management; Nature and role of Sales Manager's job; Sales management as a career, emerging trends in sales management

### **Module II: Sales Organization**

Purpose of sales organization; Setting sales organization; Types of sales organization; Coordination of selling functions with other marketing activities; Sales forecasting

### **Module III: Controlling Sales Effort**

Sales Budget: Purpose and budgetary procedure. Quotas: Concept, Objectives and Types. Sales Territory: Concept and procedure of devising sales territories, Routing and Scheduling of Sales force. Sales Audit.

### **Module IV: Managing Sales Force**

Concept of sales force management. Recruitment and Selection of sales personnel (domestic and international perspective). Cross Cultural challenges. Sales training. Compensating and motivating sales personnel. Controlling and evaluating sales personnel.

### **Module V: Distribution Management and Channel Control**

Distribution channels: Concept and need. Distribution Channel Strategy. Managing distribution channel. Features of effective channel design. Channel Conflict: Concept and stages. Conflict management.

### **Module VI: Logistics Management**

Objectives of logistics. Concept of logistics planning: inventory management decisions, transportation decisions, Location decisions.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## TERM PAPER

**Course Code: ECO2431**

**Credit Units: 02**

### **Objectives:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

### **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Inflation
  - Unemployment
  - Fiscal Deficit
  - Poverty
  - Education
  - Malnutrition
  - Rural Development
  - Regional Imbalance
  - Globalization
  - Foreign Direct Investment

### **Evaluation Scheme**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

**Course Code: ECO2432**

**Credit Units: 03**

## **Objectives:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Chapter Scheme and distribution of marks:**

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual Framework/ National/International Scenario – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusion & Recommendations -- 10 marks

**Chapter 5:** Bibliography -- 05 marks

## **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4)Body of the Report:** The body of the report should have these four logical divisions

**a)Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

**b)Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

**c) Presentation of Data,Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

**d)Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III :** Collection of information and data relating to the topic and analysis of the same.

**STEP IV :** Writing the report dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual Framework / National & International Scenario,

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusion and Recommendations.

**Chapter 5:** Bibliography

**STEP V :** The following documents are to be attached with the Final Project Report.

- Approval letter from the supervisor (Annexure-IA)
- Student's declaration (Annexure-IB)
- Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate. The evaluation scheme shall be as follows:

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

**Student's Declaration**

I .....hereby declare that the Project Work with the title  
(in block letters).....  
submitted by me for the partial fulfilment of the degree of B.A. Honours in Economics is  
my original work and has not been submitted earlier to any other University /Institution for  
the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in  
this report from any earlier work done by others or by me. However, extracts of any  
literature which has been used for this report has been duly acknowledged providing details  
of such literature in the references.

# WORKSHOP

**Course Code: ECO2433**

**Credit Units: 01**

## **Objectives:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and other recent and relevant topics of study may be included.

## **Guidelines for Workshop**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of at least 500 words about the learning outcome from the workshop.

## **Methodology**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
<b>10</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>100</b>

# Syllabus - Fifth Semester

## ECONOMETRICS - BASIC THEORY AND APPLICATION

**Course Code: ECO2551**

**Credit Units: 03**

### Course Objective:

This course presents the basic econometrics techniques emphasizing numerical estimation of economic relationships as applied to practical economic and managerial problems. It enables the students to learn the basic econometric techniques relating to the estimation of parameters. On successful completion of the course the students should have understood the estimation techniques, learned the difficulties involved in the estimation process, evaluation of parameters and enable understanding of scientific decision making process.

### Course Contents:

**Module I: Nature and Scope of Econometrics,** The methodology of econometric research; Specification and estimation of an econometric model; Basic concepts of estimation

### Module II: Simple Linear Regression Model: Two Variable Case

Estimation of model by method of ordinary least squares, properties of estimators, goodness of fit; tests of hypotheses, scaling and units of measurement, confidence intervals, GaussMarkov theorem, forecasting.

### Module III: Multiple Linear Regression Model.

Estimation of parameters; properties of OLS estimators, goodness of fit, partial regression coefficients, testing hypotheses, functional forms of regression models, qualitative (dummy variables) independent variables

### Module IV: Violations of Classical Assumptions and Remedies

Multicollinearity, Heteroscedasticity and Auto-correlation

### Module V: Specification Analysis

Omission of a relevant variable; Inclusion of irrelevant variable; Tests of Specification Errors

### Examination Scheme:

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# INTERNATIONAL ECONOMICS

**Course Code: ECO2501**

**CreditUnits: 03**

## **Course Objective:**

This course focuses on the basic issues, concepts and theories related to the international economics. It includes different trade policy & welfare, international trading system, WTO, Balance of Payments Fixed and Flexible exchange rate systems, IMF & others.

## **Course Contents:**

### **Module I**

The subject matter of international economics; Comparative advantage theory: Ricardian, specific-factors, and Heckscher-Ohlin models; Terms of trade, Immiserising growth, and the transfer problem.

### **Module II**

New trade theories: economies of scale and imperfect competition; International factor movements: labour migration and foreign investment; Trade policy and welfare, with special reference to developing countries. The international trading system: WTO and preferential trading agreements.

### **Module III**

Review of national income and balance of payments accounting; The foreign exchange market and exchange rate determination; fixed and flexible exchange rates.

### **Module IV**

International monetary institutions and issues: IMF, World Bank, WTO, currency crises, stabilization and other contemporary issues.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## **Text & References:**

# MONEY AND FINANCIAL MARKETS

**Course Code: ECO2502**

**CreditUnits: 03**

## **Course Objective:**

The main objective of the course is to impart knowledge about money & financial markets, financial instruments & money; Demand for & Supply of money, financial deepening etc.

## **Course Contents:**

### **Module I: Money in the Financial System**

Money and its functions; financial markets, financial instruments and money; Money and Capital market, Financial deepening

### **Module II: Risk and Return**

Sources and types of risk; management of risk and return, efficient portfolio, minimum Variance Portfolio, Optimal Portfolio, Capital Asset Pricing Model, Efficient Market Hypothesis.

### **Module III: Analysis of Interest Rates**

Interest rates in closed and open economies; Theories of term structure

### **Module IV: Financial Markets and Services**

Banking system, bond market, foreign exchange market, equity market, debt market, Introduction to the concept of Derivatives: Futures, Options, Call/Put; Primary Market: Initial public offer (IPO), Book Building, Fixed vs booking building issues, Private placement.

Secondary Market: Roles and functions of SEBI, Intermediaries in Indian stock exchange.

### **Module V: Financial Services**

Meaning, Nature and Types - Leasing, Factoring, Hire Purchase Finance, Housing, Finance, Credit Rating

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# URBAN ECONOMICS

**Course Code: ECO2503**

**Credit Units: 03**

**Course Objective:** To understand the causes and consequences of urban growth and economic issues in the provision of urban amenities.

## **Course Contents:**

### **Module I: Urban Systems**

Structure of Human settlement - Spatial economic organization - Urban system - Functional dependencies between human settlements of different sizes

### **Module II: Economics of Location**

Economics of city size - Agglomeration economics - Economics of location - City size distribution – Satellite Town

### **Module III: Urban Infrastructure**

Urban infrastructure - Land use pattern – Land Market – Urban housing - Slum renewal and up-gradation - Urban crimes

### **Module IV: Urban Planning**

Urban environmental planning – Transport - MRTS - Metro Industrial Complex - Energy use – Urban water supply

### **Module V: Urban Finance**

Financing Urban Infrastructure - Different Methods - Federal Finance -Local Public Finance - Municipal Administration - Urban Planning and Policy - Private Sector Participation

## **Examination Scheme:**

Components	A	P	HA	CT	EE

## SUMMER INTERNSHIP EVALUATION

**Course code: ECO2535**

**Credit Units:06**

### **Objective:**

The basic objective of a Summer Internship is to refine the practical exposure of the corporate functioning. This summer training will provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

### **General Guidelines:**

Every student of B.A (Honors) shall be required to undergo a practical training in a corporate organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the fourth semester examinations. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific project to the candidate, which will be completed by him/her during the period of training. The work done by the candidate during the training period shall be submitted in form of a training report.

The last date for the receipt of training report in the department shall be one month after the date of completion of training, i.e. at the beginning of the fifth semester.

### **Chapter Scheme**

**Chapter I:** Introduction: 20 marks

**Chapter II:** Conceptual Framework/National/International Scenario: 5 marks

**Chapter III:** Presentation, Analysis and Findings: 35 marks

**Chapter IV:** Conclusion and Recommendations: 15 marks

The report has to be type written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise of a maximum of 80 to 100 pages and has to be submitted in two copies.

### **Components of the Report**

The outcome of Summer Internship is the Project Report. A project report should have the following components:

- 1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report:** The body of the report should have these four logical divisions
  - a) Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b) Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).
  - c) Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

**d) Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

**Evaluation Scheme:**

<b>SIP Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

# DEMOGRAPHY

**Course Code: ECO2504**

**Credit Units: 03**

## **Course Objective:**

The modules incorporated in this paper educate the students about the inter-relationship between economic development and population, along with an exposition of the established theories of population. Issues relating to demographic techniques and basic sources of demographic data in the Indian economy have also been included. Aspects of population policy and study of its social characteristics are other important components of the modules of this paper.

## **Course Contents:**

### **Module 1: Introduction**

Population study and demography: its relation with other disciplines; Theories of Population: Malthus, Optimum theory of population, and theory of demographic transition; Historical evidence of population growth in developed and developing countries.

### **Module 2: Sources of Demographic Data in India**

Sources of Demographic data in India: Census — civil registration system and demographic surveys; National Family Health Survey: their relative merits and demerits.

### **Module 3: Techniques of Analysis**

Crude birth and death rates, age specific birth and death rates; Study of Fertility: Total fertility rate, gross reproduction rate, and net reproduction rate— Life table: meaning of its columns and its uses — Reproductive and child health in India — Temporal and spatial variation in sex ratios.

### **Module 4: Population Projection**

Techniques of population projection — Concept of stationary, stable and quasi-stationary population; Changes in family structure and old age security

### **Module 5: Population Policy**

Evolution of population policy in India, Shift in policy focus from fertility population control to family welfare and to women empowerment; Education, Women's autonomy; The New Population Policy

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# PRINCIPLES OF INVESTMENT MANAGEMENT

**Course Code: MGT2507**

**Credit Units: 03**

## **Course Objective:**

The course aims at equipping the undergraduate students with financial tools, which help in making decisions for investment in financial securities. It is also aimed at imparting a basic understanding of the influence of changing economic scenario on the decisions and important theories and models, techniques and regulations underlying these decisions.

## **Course Contents:**

### **Module I: Introduction to Investments**

Investments: Introduction, Avenues for Investment including introduction to derivatives, Investments and Speculation, Features of a good investment programme, Process of Investment Decision Making, Risks involved in Investments including the concept of beta, Principle of Dominance.

### **Module II: The Stock Markets in India**

Nature and Functions of the Stock Market, OTCEI & BSE, NSE & Role of Depositories, Market Indices, The Brokerage Business

### **Module III: Valuation of Securities**

Bond Valuation and Analysis, Preference share Valuation and Analysis, Equity Share Valuation

### **Module IV: Security Analysis**

Fundamental Security Analysis, Technical Security Analysis

### **Module V: Portfolio Analysis and Management**

Portfolio Analysis: Risk and Return, Portfolio Choice: Utility Theory and Indifference Curves, Markowitz: Portfolio Selection Model, Capital Asset Pricing Model, Sharpe's Single Index Model and Portfolio Evaluation Treynor, Sharpe and Jensen.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# RELATIONAL DATABASE MANAGEMENT SYSTEM

**Course Code: MGT2512**

**CreditUnits: 03**

## **Course Objective:**

The objective of the course is to give knowledge of the Relational Database Management Software, in particular ORACLE. It is expected that a student at the end of the course would attain a good conceptual and practical understanding of databases.

## **Course Contents:**

### **Module I: Introduction to RDBMS**

RDBMS: Introduction, Relational Model concept and Relational data structure, Relational Model constraints as domain constraints, Key constraints, Entity integrity constraints, Referential Integrity constraints.

### **Module II: Introduction to oracle**

Tools of Oracle, Features of oracle

### **Module III: SQL**

Overview of SQL, Component of SQL (DDL, DML, DCL), Advantage of SQL, Basics of syntax writing, Data Definition Language, Create command, Data type, Constraints, ALTER & DROP, UPDATE & DELETE Commands, Substitutions variables, Run time Environments variables, SELECT Commands Basic Constructs, Functions, Nested Queries, Correlated queries, Views, Sequence, User Management Commands.

### **Module IV: PL/SQL**

Basic features, Block Structure of a PL/SQL Programs, Control Structures, Exception Handling, Cursor, Procedure, Functions and Triggers, Internet features of Oracle.

### **Module V: Database Technologies**

Client/Server Databases, Distributed Databases, Web Databases

### **Module VI: Administration of Oracle databases**

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>P</b>	<b>HA</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## TERM PAPER

**Course Code: ECO2531**

**Credit Units: 02**

### Objectives

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face

### Guidelines:

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Inflation
  - Unemployment
  - Fiscal Deficit
  - Poverty
  - Education
  - Malnutrition
  - Rural Development
  - Regional Imbalance
  - Globalization
  - Foreign Direct Investment

### Evaluation Scheme

Organisation and relevance of content	Literature Review	Bibliography	Presentation	Total
30	30	20	20	100

# PROJECT

**Course Code: ECO2532**

**Credit Units: 03**

## **Objectives:**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Chapter Scheme and distribution of marks:**

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual Framework/ National/International Scenario – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusion & Recommendations -- 10 marks

**Chapter 5:** Bibliography -- 05 marks

## **Components of a Project Report**

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4)Body of the Report:** The body of the report should have these four logical divisions

**a)Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

**b)Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

**c) Presentation of Data,Analysis and Findings:**(using the tools and techniques mentioned in the methodology).

**d)Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III :** Collection of information and data relating to the topic and analysis of the same.

**STEP IV :** Writing the report dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual Framework / National & International Scenario,

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusion and Recommendations.

**Chapter 5:** Bibliography

**STEP V :** The following documents are to be attached with the Final Project Report.

- Approval letter from the supervisor (Annexure-IA)
- Student's declaration (Annexure-IB)
- Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate. The evaluation scheme shall be as follows:

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

**Student's Declaration**

I .....hereby declare that the Project Work with the title  
(in block letters).....  
submitted by me for the partial fulfilment of the degree of B.A. Honours in Economics is  
my original work and has not been submitted earlier to any other University /Institution for  
the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in  
this report from any earlier work done by others or by me. However, extracts of any  
literature which has been used for this report has been duly acknowledged providing details  
of such literature in the references.

# WORKSHOP

**Course Code: ECO2533**

**Credit Units: 01**

## **Objectives:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and other recent and relevant topics of study may be included.

## **Guidelines for Workshop**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
<b>10</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>100</b>

# Syllabus – Sixth Semester

## ECONOMIC GROWTH AND DEVELOPMENT

**Course Code: ECO2601**

**Credit Units: 03**

### Course Objective:

This course will enable the students to acquire advanced knowledge as to how policies facilitate the economic growth and development in advanced countries. It also enables the students to understand important growth models and help them to familiarize with factors that contribute to economic growth. It will provide a strong knowledge base on India's economy both during pre and post reform periods and help in developing a critical study on recent development in the Indian Economy in the context of the world economic scenario.

### Course Contents:

#### Module I

Economic growth, Economic Development and Sustainable Development – Measurement of Development: Conventional, HDI and Physical Quality of life Indices (PQLI) – Factors determining economic development – Obstacles of economic development: vicious circle of poverty.

#### Module II

Growth Theories-Adam Smith-Ricardo-Malthus- Karl Marx-Schumpeter's theory of Development-Keynes-Rostow's stages of Economic Growth-Big Bush theory.

#### Module III

Doctrine of balanced growth-Concept of unbalanced growth-Dualistic theories-Myrdal theory- Growth Models-Harrod-Domar – Joan Robinson's model of capital accumulation-Meade's neoclassical model-Solow Model of Long Run Growth-Kaldor's model of growth-Models of Technical Change – Mahalanobis Model.

#### Module IV

Economic planning-Planning process in a mixed economy-Growth Models in Indian Planning- Need for Foreign Capital-Forms of Foreign Capital-Multinational Corporations and foreign collaborations – India's Balance of Payments.

### Examination Scheme:

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# LABOUR ECONOMICS

**Course Code: ECO2602**

**Credit Units: 03**

**Course Objective:**

This paper exposes the students to theoretical as well as empirical issues concerning labour.

**Course Contents:**

**Module I: Labour and Labour Economics**

Meaning and concept of labour - Definition, nature, scope and importance of Labour Economics – Labour Market Segmentation – Labour Market Policies

**Module – II: Wage Determination**

Wage concepts - Minimum wage, fair wage and living wage - Classical, Neo classical and Bargaining theories; Types of wages in India -Need for State Regulation of wages - National Wage Policy and Wage Boards in India.

**Module -III: Trade Unionism, Industrial Dispute and Labour Legislation**

Meaning and objectives of Trade Union - Trade Union Movement in India- Problems and draw backs - Measures to strengthen the Trade Union Movement -Industrial disputes: meaning - causes and effects of industrial disputes - Prevention of industrial disputes - Machinery of settling the industrial disputes in India – Collective Bargaining - Labour Legislation in India.

**Module IV: Social Security Measures of Labour**

Meaning and need for Social Security Measures - Social Assistance and Social Insurance - Social Security Legislations in India: Workmen's Compensation Act, 1923, Employees' State Insurance Scheme Act, 1948, Maternity Benefits Act, 1961 and the Provident Fund Act, 1952 – Labour Welfare Funds

**Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

# BANKING & FINANCIAL INSTITUTIONS

**Course Code: ECO2603**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to make the candidates aware about the banking system prevalent in India and the role of financial Institution in the Indian financial system.

## **Course Contents:**

### **Module I: Introduction**

Bank - Concept, classification, objectives & functions. Bank Management - Concept, Functions, Importance. Legal framework of regulation of banks: Banking Regulation Act 1949 and main amendments. Reserve requirements: CRR, SLR, Forex Reserves, bank fee based services; innovative products in banking.

### **Module II: RBI and Banking Reforms:**

The RBI Act, 1934 and main amendments; Reforms in banking after 1991. Micro Financing in India.

### **Module III: Financial Institutions:**

Commercial banks: Meaning, functions, management and investment policies, E-banking and E-trading; Present structure and recent developments in commercial banking.

Development banks: Concept, objectives and functions of development banks; Operational and promotional activities of development Banks; IFCI, ICICI, IDBI, IRBI, SIDBI, state development banks and state financial corporations.

### **Module IV: Other Financial Institutions:**

Introduction; Life Insurance Corporation of India, General Insurance Corporation of India, Unit Trust of India.

### **Module V: Mutual Funds:**

Concept, performance appraisal and regulation of mutual funds (with special reference of SEBI guidelines); Designing and marketing of mutual funds schemes; Latest mutual fund schemes in India – an overview.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

# DISSERTATION

**Course Code: ECO2637**

**CreditUnits:09**

## **Objectives:**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Chapter Scheme and distribution of marks:**

**Chapter 1:** Introduction – 10 marks

**Chapter 2:** Conceptual Framework/ National/International Scenario – 25 marks

**Chapter 3:** Presentation, Analysis & Findings -- 25 marks

**Chapter 4:** Conclusion & Recommendations -- 10 marks

**Chapter 5:** Bibliography-- 5marks

## **The Components of a Dissertation**

A Dissertation should have the following components:

- 1) **Cover Page:** This should contain the title of the, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the work and name of the University.
- 2) **Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) **Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) **Body of the Report:** The body of the report should have these four logical divisions
  - a) **Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b) **Conceptual Framework / National and International Scenario:** (relating to the topic of the Dissertation).
  - c) **Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).
  - d) **Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) **Bibliography or References:** This section will include the list of books and articles which have been used in the work, and in writing the report.
- 6) **Annexures:** Questionnaires (if any), relevant reports, etc.  
(The main text of the Dissertation should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## **Steps of the Dissertation Work**

**Step I:** Selection of the topic should be made keeping the following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Dissertation Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

**Chapter 1:** Introduction,

**Chapter 2:** Conceptual Framework / National & International Scenario,

**Chapter 3:** Analysis & Findings

**Chapter 4:** Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Dissertation:

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Dissertation Work in any Organisation / Institution.

Annexures,

References / Bibliography

**Guidelines for evaluation:**

- Each of the students has to undertake a topic individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Dissertation and Viva-Voce Examination has to be English. The Dissertation must be typed and hard bound.
- Failure to submit the Dissertation or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Dissertation and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Dissertation unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Dissertation.
- Evaluation of the Dissertation to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Dissertation separately, obtaining a minimum marks of 40 (Dissertation and Viva-Voce taken together) in paper 3.5.
- Marking Scheme for Dissertation and Viva-Voce Examination:

<b>Dissertation</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

**Student's Declaration**

I .....hereby declare that the Project Work with the title  
(in block letters).....  
submitted by me for the partial fulfilment of the degree of B.A. Honours in Economics is  
my original work and has not been submitted earlier to any other University /Institution for  
the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in  
this report from any earlier work done by others or by me. However, extracts of any  
literature which has been used for this report has been duly acknowledged providing details  
of such literature in the references.

# HEALTH ECONOMICS

**Course Code: ECO2604**

**Credit Units: 03**

## **Course Objective:**

The importance of education and health in improving well being is reflected in their inclusion among the Millennium Development Goals adopted by the United Nations member states, which include among other goals, achieving universal primary education, reducing child mortality, improving maternal health and combating diseases. This course provides a microeconomic framework to analyse, among other things, individual choice in the demand for health and education, government intervention and aspects of inequity and discrimination in both sectors. It also gives an overview of health and education in India.

## **Course Contents:**

### **Module I**

Definition and scope; Health, good health and quality of life; Determinants of good health; Measurement of health status; Mortality, morbidity and “HALY family” of summary measures QUALY

### **Module II**

Demand for health and demand for medical care. Supplier induced demand; Production of health care, providers- physicians, hospitals and pharmaceuticals; Role of technological change in health care; Sustainability, equity-efficiency trade off

### **Module III**

Health Cost concepts – opportunity cost, fixed and variable costs, incremental and marginal cost, direct and indirect medical costs time costs and travel cost.

### **Module IV**

Economics of health insurance; Information asymmetry – adverse selection; Risk aversion; Moral hazard; Health insurance- challenges; Insurance concepts; Co-payments; Co-insurance rates, deductibles, group insurance

### **Module V**

Health and Education Sector in India: Overview: Health outcomes; health systems; health financing Literacy rates, school participation, school quality measures.

## **Examination Scheme:**

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination)

## TERM PAPER

**Course Code: ECO2631**

**Credit Units: 02**

### **Objectives:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face

### **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Inflation
  - Unemployment
  - Fiscal Deficit
  - Poverty
  - Education
  - Malnutrition
  - Rural Development
  - Regional Imbalance
  - Globalization
  - Foreign Direct Investment

### **Evaluation Scheme**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation</b>	<b>Total</b>
30	30	20	20	100

# WORKSHOP

**Course Code: ECO2633**

**Credit Units: 01**

## **Objectives:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and other recent and relevant topics of study may be included.

## **Guidelines for Workshop**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
<b>10</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>100</b>

### MANAGEMENT FOUNDATIONS

**Course Code: MGC2151**

**Credit Units: 03**

**Course Objective:**

The aim of the course is to orient the students in theories and practices of Management so as to apply the acquired knowledge in actual business practices. This is a gateway to the real world of management and decision-making.

**Course Contents:**

**Module I: Introduction**

Concept, Nature, Scope and Functions of Management, Levels of Management, Evolution and Foundations of Management Theories - Classical and Neo - Classical Theories, Systems Approach to organization, Modern Organization Theory.

**Module II: Management Planning Process**

Planning objectives and characteristics, Hierarchies of planning, the concept and techniques of forecasting, Decision making – concepts & process, MBO, concept and relevance.

**Module III: Organization**

Meaning, Importance and Principles, Departmentalization, Span of Control, Types of Organization, Authority, Delegation of Authority.

**Module IV: Staffing**

Meaning, Job analysis, Manpower planning, Recruitment, Transfers and Promotions, Appraisals, Management Development, Job Rotation, Training, Rewards and Recognition.

**Module V: Directing**

Motivation, Co-ordination, Communication, Directing and Management Control, Decision Making, Management by objectives (MBO) the concept and relevance.

**Module VI: Management Control**

Coordination, Meaning, Nature, Features, Objectives and Process of Management Control, Techniques and Behavioural Aspects of Management control.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; V - Viva; CT- Class Test; A - Attendance; EE - End Semester Examination)

# COMPUTERS IN MANAGEMENT

**Course Code: MGC2101**

**CreditUnits: 03**

## **Course Objective:**

The objective of this subject is to provide conceptual knowledge of the information technology to the future Managers. This subject highlights the topics like Database Management, Networking, Internet, E-commerce etc., which can help managers to take routine decisions very efficiently.

## **Course Contents:**

### **Module I: World of Computers**

Introduction to world of Computers, Computers in Home (Reference, Education & Communications, Entertainment and Digital Media Delivery, Smart Appliances, Home Computers), Computers in Education, Computers in workplace (productivity and decision making, customer services, communications), Computers on the move (Portable and Hand held computers, Self-Service kiosks, GPS Applications), Computer Peripherals, Memory Management.

### **Module II: Computer Networks**

Introduction to Computer Networks, Networking Components, Classification and Types of Networks, Network Topologies – Overview with Advantages and Disadvantages, Communication Channels, Client Server Architecture, LAN concepts.

### **Module III: Internet Technology & World Wide Web**

Introduction to Internet Intranet and Extranet, Myths about the Internet, Basic Concepts of Internet, Domain Name Service, Internet Protocols and Addressing, Services of internet, Internet and support Technologies, Censorship and Privacy issues.

### **Module IV: E-commerce**

Introduction, E-Commerce Vs E-Business, Advantages & Disadvantages, E-Commerce Business Models, E-Commerce Technologies, Hosting E-Commerce Site – Planning and constructing web services, E-Commerce Applications, E-Core Values – Ethical, Legal, Taxation and International issues, E-Commerce Security Issues, Internet based Payment System.

### **Module V: Enterprise Resource Planning**

Introduction, Scope and Benefit, ERP and related technologies (BPR, MIS, DSS, EIS, SCM, OLAP, etc), ERP implementation methodology – implementation life cycle, ERP and its success factors, Pitfalls and management concerns, ERP Market – renowned vendors and the packages.

### **Module VI: Database Management System**

Introduction, Need for DBMS, Components of DBMS, Benefits of DBMS over Tradition File System, classification and types of Database Models, Database Approach – Its benefits and Disadvantages.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; V - Viva; CT - Class Test; A - Attendance; EE - End Semester Examination)

# FINANCIAL ACCOUNTING

Course Code: MGC2102

Credit Units: 03

## Course Objective:

To understand the basics of accounting and concepts of double entry system. The students will be given a detailed grounding on recording of transactions and preparation of final accounting statements for business organizations.

## Course Contents:

### Module I: Introduction to Accounting

Understanding the meaning, nature, functions and usefulness of accounting, branches of Accounting, Accounting Equation, Accounting Concepts and Generally Accepted Accounting Principles. Difference between Indian GAAP and US GAAP

### Module II: Recording of Transactions and Subsidiary Books

Concept of Double Entry System. Understanding the Accounting cycle, Preparation of Voucher, Journal, Ledger and Trial Balance and Numerical on the Same. Preparation of subsidiary Books including Purchase Book, Sales Book, Purchase Returns Book and Sales Return Books (and numerical on the same), Cash book, types of cash book and balancing of cashbook. Numerical on single column cashbook, Double column cashbook, triple column cashbook and petty cash book.

### Module III: Reconciliation of Bank Accounts

Causes for difference in the Balance as per Pass book and balance as per cashbook, Procedure for preparation of bank reconciliation statement when there is favorable balance and in case of overdraft (and numerical on the same).

### Module IV: Financial Statements

Preparation of Trading Account, Manufacturing Account, Profit And Loss Account and balance sheet along with adjustments (and numerical on the same) and non-profit making organizations an overview. AS-1, AS-21 (no numerical)

### Module V: Accounting For Partnership

Introduction to Partnership Accounts, Partnership Deed. **Admission of a new partner**- Revaluation account, Computation of New Profit Sharing Ratio and Sacrificing Ratio, Proportionate Capital, Treatment of goodwill in partnership accounts and its valuation. **Retirement and Death of a partner**: Determining the gaining ratio, Revaluation of assets and liabilities, Reserve, Final payment to retiring partner, Treatment and adjustment of goodwill. Numericals on preparation of various accounts in case of retirement and death of a partner. **Dissolution of the firm**: Circumstances leading to dissolution of partnership, Settlement of the accounts, Capital ratio on insolvency, Insolvency of all partners and Garner Vs Murray decision.

## Examination Scheme:

Components	CT	HA	C	P	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; V - Viva; CT - Class Test; P - Project A - Attendance; EE - End Semester Examination)

# MANAGERIAL ECONOMICS

Course Code: MGC2103

CreditUnits: 03

## Course Objective:

The purpose of this course is to apply managerial economics concepts and techniques in evaluating business decision taken by firms. The emphasis is on explaining how the tools of standard price theory can be employed to formulate a decision problem, evaluate alternative courses of action and finally choose among alternatives.

## Course Contents:

### Module I: Introduction to Managerial Economics

Nature, Scope, Definitions of Managerial Economics, Application of Managerial Economics to Business, Micro Vs. Macro Economics, Opportunity Costs, Time Value of Money, Marginalism, Incrementalism, Market Forces and Equilibrium.

### Module II: Consumer Behaviour and Demand Analysis

Cardinal Utility Approach: Diminishing Marginal Utility, Law of Equi-Marginal Utility, Ordinal Utility Approach: Indifference Curves, Marginal Rate of Substitution, Budget Line and Consumer Equilibrium, Theory of Demand, Law of Demand, Movement along vs. Shift in Demand Curve, Concept of Measurement of Elasticity of Demand, Factors Affecting Elasticity of Demand, Income Elasticity of Demand, Cross Elasticity of Demand. Production with one variable input, Production and optimal input proportions, two variable inputs, Law of variable proportions and law of return to scale, Cost Concepts, Theory of costs in short run and long run.

### Module III: Theory of Production, Cost and Firm's Behaviour

Meaning and concept of Production, Factors of Production and Production Function, Fixed and Variable Factors, Law of Variable Proportion (Short Run Production Analysis), Law of Returns to a Scale (Long Analysis), Concept of Cost, Cost Function, Short Run Cost, Long Run Cost, Economics and Diseconomies of Scale, Explicit cost and Implicit Cost, Private and Social Cost

### Module IV: Macro Economics and Business Decisions

Phases of Business cycle - Evil effects of cyclical fluctuations on business firms - Minimizing effects of Business cycles, Economic and Business forecasting - uses of economic forecasts - Methods of economic forecasting - selecting a forecast - evaluating forecasts.

### Module V: Price and Output Decisions under Different Market Structures

Price and Output Decisions under Perfect Competition, Monopoly and Monopolistic Competition - Pricing under Oligopoly - Kinked Demand Curve - Price Leadership - Pricing under Collusion.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# E-COMMERCE

**Course Code: COM2103**

**CreditUnits: 03**

## **Course Objective:**

In the changed business environment of today, it has become imperative for businesses to understand, appreciate and learn to create their presence in cyber space. This course focuses on exposing the students to the world of e-commerce, the opportunities, and the threats and teaches them the strategies of making businesses viable and successful.

## **Course Contents:**

### **Module I: E-Commerce Concept**

Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services. Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI, Software Concept of Electronic Signature, Access Control.

### **Module II: Types of E-Commerce**

Meaning of B2C, B2B, C2C, P2P, Applications in B2C- E-Banking, E-Trading. E-Auction - Introduction and overview of these concepts, Application of B2B- E-distributor, B2B service provider, benefits of B2B on Procurement, Just in time delivery, Consumer to consumer and peer to peer business model introduction and basic concepts.

### **Module III: E-Marketing**

Traditional Marketing V/S E-Marketing, Impact of Ecommerce on markets, Marketing issue in E-Marketing, Promoting your E-Business, Direct marketing, one to one marketing.

### **Module IV: E-Finance**

Areas of E-Financing, E-Banking, traditional v/s E-Banking, operations in E-Banking, E-Trading- Stock marketing, Trading v/s E-Trading, Importance of E-Trading, Advantages of E-trading, operational aspects of E-Trading.

### **Module V: E-Payment**

Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; V - Viva; CT - Class Test; A - Attendance; EE - End Semester Examination)

# BUSINESS MATHEMATICS

**Course Code: MGC2104**

**Credit Units: 03**

## **Course Objective:**

The course is designed to orient the students towards the basic concepts of mathematics and its applications in the business world.

## **Course Contents:**

### **Module I: Set Theory & Mathematical Induction**

Theory of Sets; Meaning; Elements; Types; Presentation and Equality of sets; Subsets; Super sets & Power sets; Finite, Countable or Infinite sets; Union; Intersection; Compliment & Difference of sets; Venn diagrams; Cartesian product of sets; Cardinality; Inclusion – Exclusion principle; Applications of set theory; Mathematical induction

### **Module II: Techniques of counting**

Basic counting principle; Factorial notation; Binomial coefficient; Pascal's triangle; Permutations and Combination; Permutation with restriction; Circular permutation and Combination with restriction; Concept of tree diagram

### **Module III: Logarithms & Sequence – A.P.; G.P.**

Indices & Logarithms; Definition and properties, Common logarithms; Arithmetic and Geometric Progression- General term, Summation, Business Application.

### **Module IV: Matrices & Determinants**

Matrices; concepts and types; properties; Addition; Multiplication; Transpose and inverse of matrix; Algebra of matrices; Adjoint of a matrix; Determinants; Properties of determinants; Solution of simultaneous Linear Equations; Business applications of matrices; Homogeneous System of Linear equations; Condition for Uniqueness for the homogeneous system; Solution using inverse of the coefficient matrix; Problems

### **Module V: Differentiation & Differential Calculus**

Differentiation - definition, Derivatives of Algebraic, Logarithmic and exponential function, Business application of differentiation; Optimization using calculus; Point of inflexion absolute and local optima

## **Examination Scheme:**

Components	CT	HA	C	P	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; V - Viva; CT - Class Test; P – Project; A- Attendance; EE - End Semester Examination)

# ECONOMIC SYSTEM AND SOCIETY

**Course Code: ECO2104**

**CreditUnits: 03**

## **Course Objective:**

This course will reflect the socio-economic change in historical perspective, capitalism as an economic system, structure of capitalism and capitalism in global context.

## **Course Contents:**

### **Module I**

Analyzing Socio-Economic Change in Historical Perspective

### **Module II**

Capitalism as an economic system

Origins, nature and structure of capitalism; Accumulation and crisis; Alternative perspectives on capitalism

### **Module III**

The transition from feudalism to capitalism

### **Module IV: The evolving structure of capitalism**

Monopoly capitalism, The modern corporation: Divorce between ownership and control; The institutional diversity of capitalism; Alternative perspectives on the role of state.

### **Module V: Capitalism in Global Context**

Multinational corporations and their impact on the developing economics; Imperialism

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>HA</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**HA** - Home Assignment; **P** - Project; **CT** - Class Test; **A**- Attendance; **EE** - End Semester Examination

## READINGS IN MANAGEMENT

**Course Code: MGC2130**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. The selection of the book will be department specific so that it can be discipline specific.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters (if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### **Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

# TERM PAPER

**Course Code: MGC2131**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from any Indian industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGC2132

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	– 25 marks
Chapter 4: Conclusion & Recommendations	– 10 marks
Chapter 5: Bibliography	– 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- a) *Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- b) *Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- c) *Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- d) *Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for Evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

**Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGC2133**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held.
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of at least 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

## MARKETING MANAGEMENT

**Course Code: MGC2251**

**Credit Units: 03**

### Course Objective:

The main objective of this course is to give students an elementary knowledge of the fundamentals in the field of marketing. The focus will be both on developing and helping them imbibe basic marketing principles and establishing an appreciation of contemporary realities.

### Course Contents:

#### Module I: Introduction to Marketing

Meaning of marketing, Core concepts of marketing, Evolution and its role in the changing business environment, various marketing management philosophies, viz., the production concept, the product concept, selling concept and the marketing concept, Newer definitions of marketing- societal marketing and relationship marketing, Strategies planning in marketing, Formulation of marketing plan.

#### Module II: Analyzing Marketing Opportunities

Internal and External Marketing Environment Analysis, Introduction to Marketing Information System and Marketing Research, BCG matrix, GE 9 cell model.

#### Module III: Studying Consumer Behaviour and Selecting Markets

Buying Behaviour for Consumer Markets and Industrial Markets, Types of Buying Situations, Buying Decision Process and Factors Affecting Buyer Behaviour, Consumer Adoption Process, Concept of Market Segmentation, Bases for segmenting Consumer and Business markets, Approaches for Targeting, Differentiation and Positioning.

#### Module IV: Product Mix Strategy

Product: concept & levels, Classification of consumer and industrial products, Product Differentiation, Product Mix, Product Life Cycle and various strategies, Branding: concept and challenges, Brand decisions, Packaging and Labeling.

#### Module V: Product Development Decision and Pricing

Product Line Decisions, New Product Development: Challenges & Process; Consumer Adoption Process, Diffusion of Innovation, Pricing Strategies; Setting the price, Understanding various pricing strategies and their application.

#### Module VI: Distribution and Logistics Decision and Integrated Communication Mix

Nature of Marketing Channels, Channel Functions and Flows, Channel Design and Management Decisions, Channel Dynamics, Introduction to Wholesaling, Retailing and Logistics, Marketing communication mix and Introduction to various elements of integrated marketing communications briefly

#### Module VII: Emerging Marketing Paradigms

E-marketing, Global marketing, Mobile marketing, Kiosk marketing, Green marketing, Tele marketing, Multi level marketing, Rural marketing.

### Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# HUMAN RESOURCE MANAGEMENT

**Course Code: MGC2201**

**CreditUnits: 03**

## **Course Objective:**

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

## **Course Contents:**

### **Module I: Fundamentals of HRM**

Introduction, Concept and Functions, Scope and Significance of Human Resource Management, Personnel Management and HRM, Overview of basic HRM Model, Role and responsibilities of the Human Resource Manager and Essentials of Sound HR Policies.

### **Module II: Acquisition of Human Resources**

Objectives, Policies and Process of Human Resource Planning, Job Analysis, Recruitment (process, methods: internal, external), Selection (process, tests, interviews), Placement, Induction.

### **Module III: Development of Human Resources**

Training and Development(process, methods: On-the job, Off-the job), Evaluation of training (Kirkpatrick model) and Performance Appraisal (concept, significance, process, methods-Graphic rating scales, Essays, Confidential report, BARS, 360 Degree, etc, errors during appraisal, reducing errors).

### **Module IV: Maintenance of Human Resources**

Job Evaluation: concept, process, compensation: concept, components, Designing and Administering the Wage and Salary Structure, Grievance Procedure and Handling.

### **Module V: Retention and Separation Processes**

Procedure of separation: Discharge, Retirement, Layoff, Retrenchment, VRS, Promotion and Transfer, Exit interview, Attrition and Retention (concept, significance, determinants and strategies).

### **Module VI: Current Issues in HRM**

Increased concern for HRM (Sound IR, dual career couples, flexi-working hours, work-from home facility), International Human Resource Management-Managing inter country differences, SHRM, Talent management, Employee engagement, Competency mapping, HR accounting-cases of Indian organizations, HRIS, HR audit.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# BUSINESS STATISTICS

**Course Code: MGC2202**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to familiarize the students with various statistical tools which can help them in analysis and interpretation of business data. This course will provide students with hands-on experience to promote the use of statistical thinking and techniques to apply them to make educated decisions whenever there is variation in business data. Therefore, it is a course in statistical thinking via a data-oriented approach.

## **Course Contents:**

### **Module I: Introduction to Statistics**

Definitions, Functions of Statistics, Statistics and Computers, Limitation of Statistics, Application of Statistics.

### **Module II: Data Collection and Analysis**

Methods of Data Collection, Primary and Secondary Data, Graphic Representation of Data, Measures of Dispersion-Range, Quartile Deviation, Mean Deviation, Standard Deviation, Coefficient of Variation.(Absolute & Relative Measure of Dispersion), Skewness-Karl-Pearson's Coefficient of Skewness, Bowley's Coefficient of Skewness, Kurtosis.

### **Module III: Correlation Analysis and Regression Analysis**

Introduction-Importance of Correlation, Types of Correlation, Scatter Diagram Method, Karl Pearson's coefficient of Correlation (Grouped and Ungrouped). Spearman's Coefficient of Rank Correlation, Rank Correlation for Tied Ranks, Regression Analysis- Concepts of Regression, Difference b/w Correlation and Regression, Regression Lines.

### **Module IV: Time Series Analysis**

Meaning and Significance, Components of Time Series, Trend Measurement, Moving Average Method, Least Square Method (Fitting of Straight Line Only).

### **Module V: Probability**

Introduction, Terminology used in Probability, Definitions of Probability, Mathematical, Statistical and Axiomatic Approach to Probability, Probability Rules-Addition Rule, Multiplication Rule of Probability, Conditional Probability- Bayes Theorem, Problems on Bayes Theorem.

### **Module VI: Probability Distribution**

Discrete Probability Distributions-Binomial Probability Distribution, Poisson Probability Distribution, Properties, Applications, Continuous Probability Distributions-Normal Probability distribution, Properties of the Normal Curve, Applications, Relation b/w distributions.

## **Examination Scheme:**

Components	CT	HA	Q	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# CORPORATE ACCOUNTING

**Course Code: MGC2203**

**Credit Units: 03**

## **Course Objective:**

This course enables the students to develop awareness about Corporate Accounting in conformity with the Provision of Companies' Act and latest amendments thereto with adoption of Accounting Standards that are likely to be introduced from time to time.

## **Course Contents:**

### **Module I**

Statutory records to be maintained by a company, Accounting standards - relevance and significance; National and international accounting standards.

### **Module II**

Accounting for share capital transactions - issue of shares at par, at premium and at discount; forfeiture and re-issue of shares; buy-back of shares; redemption of preference shares - Statutory requirements, Disclosure in balance sheet; Rights issue, Underwriting.

### **Module III**

Issue of debentures - accounting treatment and procedures; Redemption of debentures; Conversion of debentures into shares.

### **Module IV**

Preparation and presentation of final accounts of joint stock companies as per company law requirements; Provisions and reserves; Determination of managerial remuneration; Appropriation out of profits; Transfer of profits to reserves; Payment of dividend, Transfer of unpaid dividend to Investor Education and Protection Fund; Bonus shares and payment of interest out of capital.

### **Module V**

Holding and subsidiary companies - Accounting treatment and disclosures; Consolidation of accounts.

### **Module VI**

Valuation of goodwill and shares

Good will – Meaning, Definition, Elements, Types and Methods of Valuation of Goodwill, Methods of share valuation (Equity & preference shares).

### **Module VII**

Accounting treatment for amalgamation, Absorption and reconstruction of companies; Internal and external reconstruction, Liquidation- Preparation of liquidators statement & affairs, Deficiency/surplus statement, Calculation of pro rata treatment of uncalled capital.

## **Examination Scheme:**

Components	HA	CT	C	A	EE
Weightage (%)	5	10	10	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# ANALYSIS AND DESIGN OF BUSINESS SYSTEM

**Course Code: MGC2204**

**CreditUnits: 03**

## **Course Objective:**

The course aims at preparing students conceptualize and define scope and domain of system analysis and design. It also focuses on system development life cycle using conventional and structural look.

## **Course Contents:**

### **Module I: Systems Development Environment. (Information system development life cycle)**

System & its parts, Types of Systems, Characteristics of a System, System Analyst in system Development, Developing Systems- SDLC, Approaches to System Development (Prototyping, Joint Application Design (JAD), Participatory Design (PD)), System Development Models (Waterfall model & Spiral Model), System Planning & Selection (Identifying, Selecting, Initiating & Planning System Development Project).

### **Module II: System Planning and Selection (Graphic technology modeling tool)**

Identifying and Selecting Projects (Identifying potential development projects, classifying and ranking projects, and selecting projects for development), Methods for project identification and selection, Evaluation criteria for classifying and ranking projects, Initiating and Planning System Development Projects (Process & performed Activities, Deliverables & Outcomes), Assessing Project Feasibility (Economic, Operational, Technical, Schedule, Legal & Contractual, Political Feasibility)

### **Module III: System & Data Analysis (Data Analyzing Modeling)**

Determining System Requirements (Traditional Methods, Modern & Radical Methods), Structuring System Requirements (Process Modeling – DFD, Logic Modeling – Structured English & Decision Tables, Conceptual Modeling – ER Model), Data Analysis & Techniques (Interpretive, Coding, Recursive Abstraction and Mechanical Technique), Types of Analysis (Descriptive, Exploratory, Confirmatory and Predictive), Modeling Methodologies (Bottom Up method & Top Down Method), Generic and Schematic Data Modeling.

### **Module IV: System & Database Design**

System Design (Design Objectives, Phases in Designing, Purpose of System Design), System Design Goals, Type of Design, Design Strategy, System Decomposition (Modeling, Connection and Coupling of a System), System Design Methodologies, Database Design, Database Management System – an introduction, Overview of Data Models, Relational Database Model – Well structured relations, Keys, Schema & Subschema, Structure, Facilities & Users, Constraints, Anomalies, Functional Dependency, Normalization, Roles & Duties of System Administration.

### **Module V: System Implementation & Operation (System Management)**

Activities in implementing (Coding, Testing & Installation, Documentation, Training, Support, Maintenance), Types of testing, planning installation, approaches to installation, Documenting a system, Training and Supporting users, Types & Frequencies of Training Methods, Reasons of System Implementation Failures, Project Closedown, Conducting System Maintenance – Types of Maintenance (Corrective, Adaptive and Perfective Maintenance), effective maintenance, Evaluation of System's Success, System Enhancement, Quality Assurance in System Cycle.

### **Module VI: System Security and Auditing**

System Security: Data Security, Backup & Recovery during System & Database failure, Ethical Issues in System Development, Threat and Risk Analysis, Audit, System Audit, System Audit Standards (Planning, Implantation and Reporting Standards), System Analysis and Programming (Overview, Role & Duties of System Experts as Analyst and Programmer).

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# INNOVATION & CREATIVITY MANAGEMENT

**Course Code: MGC2205**

**CreditUnits: 03**

## **Course Objective:**

To develop an appreciation for new ideas and out of the box thinking so that students can successfully imbibe the habit of innovative and creative thinking in situations.

## **Course Contents:**

### **Module I**

Innovation Management- Introduction, Characteristics, Components, Types, Models of Innovation process, Innovation Environment-Originators of Innovation, Key Drivers of Innovation, Factors influencing innovation, Nurturing innovation in e-business.

### **Module II**

Organizing for Innovation- Organizational theories and structures, Traits of innovative organizations, Current trends, Factors influencing organizational design and size decisions, Need & Characteristics for creative organization, 7S framework, Creativity crushers, Fostering innovation climate and culture, The creativity Hit List.

### **Module III**

Research and Development management- Significance, Prerequisites, Process, Technology development approaches, Management of R &D, In source to open source environment, R&D in small industry, Managing Creative employees, Significance and challenges of managing creative employees, Traits of a creative person, Motivation to creativity, Strategies for unblocking creativity, Factors influencing group creativity, Promoting group creativity, Left and right thinking, Linear and non-linear thinking process, Creative thinking, Traditional vs Creative thinking.

### **Module IV**

Individual creativity techniques- Inner and Directed creativity techniques, Group Creativity Techniques-creativity methods, Writing techniques, Techniques based on pictures, maps and networks, Product innovation-types of new products, Target markets for Disruptive Innovation, Technology strategies for innovation, New product development, Packaging and Positioning innovations, Beyond product innovation, New product failures.

### **Module V**

Innovation Diffusion- Concept of diffusion and adaptation, diffusion types, Innovation diffusion theory, Innovation adoption by organizations, Innovation adoption across countries, Marketing strategy and the diffusion process.

### **Module VI**

Legal aspects of innovation- IPR, Indian Patents Act, Trademark, Copyrights, Trade secrets, Towards Innovative Society-Innovation for social development, Spirit of innovation in India, Favourable and Unfavourable factors.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

**Text & References:*****Text:***

- Krishnamacharyulu and Lalitha, (2007), Innovation Management, Himalaya Publishing House, New Delhi- 2007

***References:***

- Plsek, (2003) Creativity, Innovation and Quality, Prentice Hall of India, New Delhi.

**Salient Pedagogical Features-**

1. Classroom teaching to focus on enhancing out of the box thinking.
2. Assignments: Practical tasks emphasising on honing up creative thinking.
3. Case study analysis: To enable students to appreciate the application of concepts in real life environment.
4. Active student participation in class discussions.
5. Role plays to boost spontaneity.

# HUMAN VALUES AND PROFESSIONAL ETHICS

**Course Code: MGC2206**

**CreditUnits: 03**

## **Course Objective:**

The aim of this course is to facilitate the development of a Holistic perspective among students towards life, profession and happiness, based on a correct understanding of the Human reality and the rest of Existence. Such a holistic perspective forms the basis of value based living in a natural way. Recognize the need for lifelong learning and have the knowledge and skills that prepare them to identify the Moral issues involved in Management areas and to provide an understanding of the interface between Social, Technological and Natural environments.

## **Course Contents:**

### **Module I: Human Values**

Morals, Values, Types of values, Evolution of human values, Ethics, Integrity, Work Ethic, Honesty, Courage, Empathy, Self-Confidence, Character, Challenges at Work place

### **Module II: Values in Management**

Relevance of values in Management, Need for values in global change, Values for managers, Holistic approach for managers in decision making, Problems related to stress in corporate management.

### **Module III**

**Workplace Rights and Responsibilities:** Organizational complaint procedures. Government agencies, Resolving Employee concerns, Limits on acceptable behavior in large corporation.

**Work environment:** Ethical and legal considerations, Organizational responses to offensive behavior and harassment, Ethics in a Global Context.

### **Module IV: Industrial Integrity**

The epitome of industrial success, Integrity and organization, Exploring learning process of integrity, Consequences of lack of integrity.

## **Examination Scheme:**

Components	C	V	HA	A	ME	EE
Weightage (%)	5	5	5	5	10	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## READINGS IN MANAGEMENT

**Course Code: MGC2230**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. The selection of the book will be department specific so that it can be discipline specific.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### **Evaluation:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

# TERM PAPER

**Course Code: MGC2231**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from any Indian industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGC2232

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	– 25 marks
Chapter 4: Conclusion & Recommendations	– 10 marks
Chapter 5: Bibliography	– 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

**a) Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

**b) Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

**c) Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

**d) Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

### Declaration

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGC2233**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

## ORGANISATIONAL BEHAVIOUR

**Course Code: MGC2351**

**Credit Units: 03**

**Course Objective:**

The objective of this course is to familiarize the students with the behavioural patterns of Human beings at individual and group levels.

**Course Contents:**

**Module I: Understanding Human Behaviour**

Concept, Nature and Significance of Human Behaviour, Factors Affecting Human Behaviour, Levels of Human Behaviour; Disciplines contributing to OB.

**Module II: Individual Behaviour**

Individual Differences; Personality and Theories of Personality; Perception; Learning and Behaviour reinforcement, Values.

**Module III: Motivation & Attitude**

Concept, Significance and Theories of Motivation, Motivation and Behaviour, Motivation at Work, Attitudes, Meaning and nature, Formation and change in attitudes, Job related attitudes.

**Module IV: Interpersonal Behaviour, Power & Politics**

Interpersonal Dimensions of Behaviour; Transactional Analysis Implications of TA, Organizational communication, making communication effective, Power: Concept, determinants, types; Organizational Politics: Tactics, Impression Management.

**Module V: Group Behaviour and Leadership**

Group Behaviour; Types, Functions, Determinants of Group Behaviour, Inter Group Problems, Leadership: Nature and Significance of Leadership, Leadership Styles, Theories of Leadership; Trait Theory, Behavioural Theory, Managerial Grid.

**Module VI: Change and Conflicts**

Organizational conflict, Nature and types of conflict, Management of organizational conflict, Approaches to conflict management, Organizational culture, Learning and maintaining organizational culture, Organizational change, Planned change, Resistance to change, Organization development, Definition, Need for organization development, Organization development process.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# FINANCIAL MANAGEMENT

**Course Code: MGC2301**

**CreditUnits: 03**

## **Course Objective:**

To take decisions which are effective, a manager in any of the functional areas be it Marketing, HR or IT requires a thorough cost and benefit analysis and a feel for Finance so as to look at the long term implications of his/her decision. This course is a "nut and bolts" course on Finance where the basic Financial decisions will be explained through problems and exercises, thus giving the student an understanding and a feel for Financial decision making.

## **Course Contents:**

### **Module I: Introduction to Financial Management**

Evolution of Financial Management, Key activities of Finance Manager Changing Role of Finance Managers, Key Decision Areas in Financial Management, Objectives of the firm.

### **Module II: Financial Statement Analysis**

Introduction, objectives of financial statement analysis, Techniques-Ratio analysis, Comparative analysis and limitations of financial statement analysis, AS-20 (**no numerical**)

### **Module III: Valuation Concepts**

Concept of Time value of Money, Process of Compounding and Discounting, Future Value of a Single amount, Future Value of an Annuity, Present Value of a Single Amount, Present Value of an Annuity, Cost of capital, Weighted average cost of capital, Leverage Analysis

### **Module IV: Financing Decision**

Capital structure, Factors affecting Capital Structure decisions, Theory of Capital Structure Decisions, MM Theory, NI, NOI and Traditional theory, Pecking order theory.

### **Module V: Investment Decision**

Basics of Capital Budgeting, Types of capital budgeting decisions, Estimating cash flows for project appraisal, Green capital budgeting, Non-discounted Cash Flow Techniques: Payback Period, ARR, Discounted Cash Flow Techniques: NPV, IRR, PI. Risk Analysis of Capital Budgeting: Risk adjusted discount rate, Certainty Equivalent Approach.

### **Module VI: Working Capital Management**

Meaning and importance of adequate working capital, Excess or Inadequate working capital, Determinants of working capital requirement, Cash management, Receivable management and Inventory management – Sources of working capital.

### **Module VII: Dividend Decisions**

Importance of dividend decisions, Theories of Dividend decisions: Irrelevance theory, Optimal dividend decision, Relevance theory, Determinants of dividend policy: Bonus Shares, Stock Splits & Buyback of shares. Tax considerations.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# MANAGEMENT INFORMATION SYSTEMS

**Course Code: MGC2302**

**CreditUnits: 03**

## **Course Objective:**

This course focuses on the relationships among management, information, and systems as well as the relationship between a manager's need for information and his/her position in the organization, how hardware, software, data, people, and procedures are combined to form an information system, how information technology can be used by a business organization to gain a competitive advantage why a knowledge of information systems is crucial to anyone who plans a career in business Organization.

## **Course Contents:**

### **Module I: Organizations, Management and Information**

Meaning of MIS, Components of MIS, IS in Business, Data Information and knowledge, Characteristics of Information in context, Issues with Information, System and Subsystems, Organization as a System, Different Organizational Structures: Hierarchical Structure – (Different Levels of Management, Information disposition at different levels), Matrix Structure, Business Process (Management, Operational and Support).

### **Module II: Information Technology Architecture**

Managing Hardware Assets – Considerations in Procurement and installation, Managing Software Assets – Consideration in procurement and configuration, Data Resource Management (Database Management System – Types and Structure of Database, Data Warehousing – Phases in building Data Warehouses in an organization, Data Mining – Data Mining Applications, Data Banking)

### **Module III: Management and Organizational Support Systems for the Firm**

Information, Decision and Management, Decision Support System (Phases in Decision Making, Problems and Decision Types, DSS components, and Analytical Models in Decision Making), Executive Information System – Characteristics and benefits, Managing Knowledge (Knowledge Engineering, Knowledge Management Activities and Knowledge Representation Methodologies), Artificial Intelligence (Domains of AI, AI in Business), Expert System (Components, Benefits and Limitations, Suitability Criteria for ES)

### **Module IV: Building Information Systems in the Digital Firm**

Organizational Planning – Planning at distinct Managerial Levels, Approaches in Planning (Top Down, Bottom Up, Planning through CSF), IT and IS Planning – Prerequisites and factors, IT and IS Architecture (Centralized, Decentralized and Distributed), Implementing IT and IS (Factors and Resistance in implementation), Change Management with BPR, System Development (System Development Life Cycle-Overview, Prototyping), Evaluating Factors for IT and IS services.

### **Module V: Managing Information Systems in the Digital Firm**

Managing Security (Security Challenges of IT, Business and Technological Ethics), Computer Crime (Tools for Computer Crime, Tools for Security Management), IS Security Management Control (Information System Control, Auditing the Security), Managing World Wide Information System (Managing Multi Site IT and IS – Cultural and Technical Differences), World Wide IT and IS Strategies (Multinational, International and Global Strategies)

### **Module VI: Key System Applications for the Digital Age**

Enterprise Systems – Supply Chain Management & Customer Relationship Management Systems, Using Enterprise Applications and Achieving Operational Excellence & Customer Intimacy, E-Commerce: Digital Market & Digital Goods, M-Commerce: Services & Applications, Enterprise Applications: New Opportunities and Challenges.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>C</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# COST ACCOUNTING

**Course Code: MGC2303**

**CreditUnits: 03**

## **Course Objective:**

To get an expert knowledge in the area of cost management and cost control to enable effective management decisions.

## **Course Contents:**

### **Module I: Cost Accounting**

Introduction – Meaning of Cost, costing and Cost Accounting, Comparison between Financial Accounts and Cost Accounts, Application of Cost Accounting, Designing and installing a Cost Accounting system, Cost concepts and Classification of Costs, Cost Module, Cost Center, Elements of Cost, Preparation of cost sheet, Tenders and Quotations, Problems.

### **Module II: Material Costing**

Classification of materials, Material Control, Purchasing procedure, store keeping, techniques of Inventory control, Setting of stock levels, EOQ, Methods of pricing materials issues, LIFO, FIFO, Weighted Average Method, Simple Average Method, Problems.

### **Module III: Labour Costing**

Control of labour cost, Labour Turn Turnover, Causes and effects of labour turnover, Meaning of Time and Motion Study, Merit Rating, Job Analysis, Time keeping and Time booking, Idle time, causes and treatment, Overtime, Methods of Wage Payment, Time rate and Piece Rate, Incentive Schemes.

### **Module IV: Overhead Costing**

Definition, Classification of overheads, Procedure for accounting and control of overheads, Allocation of overheads, Apportionment of overheads, Apportionment of Service department costs to production departments, Repeated Distribution method, Simultaneous equation method, absorption of OH's, Methods of Absorption, Percentage of direct material cost, Direct Labour Cost, Prime Cost, Direct Labour hour rate and Machine Hour Rate, Problems.

### **Module V**

Costing Methods Introduction, Job Costing, Batch Costing, Contract Costing, Process Costing, principles, distinction between Process and Job, Preparation of process accounts, treatment of normal loss, abnormal loss, abnormal gain, Joint and By-products, Service costing.

### **Module VI**

Reconciliation of Cost and Financial Accounts, Need for reconciliation, Reasons for difference in profits, Problems on preparation of Reconciliation statements including Memorandum Reconciliation account.

### **Examination Scheme:**

Components	A	CT	C	H	EE
Weightage (%)	5	15	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

### **Text & References:**

# ANALYTICAL DECISION MAKING

**Course Code: MGC2304**

**Credit Units: 02**

## **Course Objective:**

To develop in students skills of analytical and logical reasoning this will be a great asset for them in their future careers.

## **Course Contents:**

### **Module I: Quantitative Reasoning**

Number System & Number Theory, Percentage method, Profit & Loss, Speed, Time & Distance

### **Module II: Quantitative Reasoning**

Ratio, Proportion, Mixtures & Alligations, Set Theory, Co-ordinate Geometry (2-D only), Mensuration

### **Module III: Data Interpretation**

Bar Graph, Line Graph, Pie Chart, Table, Table Three Dimensional or Triangular Bar Diagram, Misc. (Radar, Area, Network), Caselets.

### **Module IV: Data Sufficiency & Logical reasoning**

Mathematical, reasoning based, Data Decoding: Analytical: Assumption, Courses of Action, Argument, Weak/ Strong, Pictorial Analysis

### **Module V: Verbal Ability, Reasoning & Reading Comprehension**

Vocabulary based questions, English Usage, Grammar Types of statements and their relationship / Reversibility of idea, Re-arranging sentences of a paragraph, Paraphrasing, Fact, Inference, Judgment & deductions. Four types of Passages: The social science passage, The Science passage, the business passage & the entertainment passage.

### **Module VI: General Awareness and Current Affairs**

Economic, Political, Financial & Social Affairs based on International & Indian Issues.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

- This course is aimed at enhancing students' skills in the area of English, General knowledge and Quantitative aptitude. No textbooks or reference books are required as the course is carried out in the form of classroom exercises, which are circulated by the faculty himself.

# MERGERS AND ACQUISITIONS

Course Code: ECO2304

CreditUnits: 03

## Course Objective:

The main objective of this course is to familiarize the students with the basic aspects of mergers and acquisitions.

## Course Contents:

### Module I: Mergers and Acquisitions – Overview

Introduction – Forms of Corporate Restructuring, Expansion, Mergers and Acquisitions, Tender Offers, Joint Ventures, Sell Offs, Spin Offs, Split Offs, Split Ups, Divestitures, Equity Carve outs, Corporate Control, Premium Buy Backs, Standstill Agreements, Anti Takeover Amendments, Proxy Contests, Changes in Ownership Structures, Share Repurchases, Exchange Offers, Leveraged Buy, out, Going Private, Issue Raised by Restructuring, History of Merger Movements.

### Module II: Mergers and Acquisitions

Economic Rationale for Major Types of Mergers, Horizontal Mergers, Vertical Mergers, Conglomerate Mergers, Concentric Mergers.

### Module III: Theories of Mergers

Efficiency Theories, Differential Efficiency, Inefficient Management, Operating Synergy, Pure Diversification, Financial Synergy, Strategic Realignment to Changing Environments, Undervaluation, Information and Signaling, Agency Problems and Managerialism, Takeovers as a Solution to Agency Problems

### Module IV: Divestment of Public Sector Undertakings and Leveraged Buy-outs

General Economic and Financial Factors illustration of an LBO

#### Takeover Defenses

Anti-Takeover Amendments, Any case study

## Examination Scheme:

Components	CT	C	HA	A	EE
Weightage (%)	10	10	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# INDUSTRIAL PSYCHOLOGY

**Course Code: MGC2305**

**CreditUnits: 03**

## **Course Objective:**

This course is designed to provide an overview of I/O Psychology including individual, group, and organizational issues resulting in enhanced understanding of the world of business and related career concerns. The main aim is to create awareness about the role and importance of Psychological factors and processes in the world of work

## **Course Contents:**

### **Module I: Introduction**

Nature and scope of organizational Psychology, History and development of field, Major problems of Industrial Psychology, Current trends in organizational Psychology

### **Module II: Types of Psychology**

Mental psychology, Male & Female psychology, Impact on behavior and efficiency

### **Module III: Test of Psychology**

Types of Tests, Effectiveness of these tests, Measures to control the tests steps to improve the psychology

### **Module IV: Individual and group behavior**

Interaction and psychology involved in individuals, Improving psychology, Group Dynamics, Characteristics of group behavior, Attitude measurement, Methods of measuring attitudes, Leadership and supervision, Theories of Leadership.

### **Module IV: Performance Management**

Performance appraisal- Introduction, types, importance, Training and development- Introduction, significance and categories/types.

## **Examination Scheme:**

Components	C	HA/P	CT	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TERM PAPER

**Course Code: MGC2331**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from Indian any industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGC2332

Credit Units:03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexure:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

### Declaration

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGC2333**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

## BUSINESS ENVIRONMENT

**Course Code: MGC2451**

**CreditUnits: 03**

### Course Objective:

The aim of the course is to orient the students towards the basic concepts of Indian and global business environment.

### Course Contents:

#### Module I: Overview of Business Environment

Meaning and types of business environment, Internal and external environment, Micro and macro environment, Factors (Cultural, social, Political economic legal, demographic and technological) effecting business environment.

#### Module II: Indian Industrial environment

Industrial policy up to 1991, New industrial policy, Liberalization, Privatization and Globalization process in India, Disinvestment, Industrial sickness, MRTP act 1969, Competition law 2002, Foreign Exchange Regulation Act and Foreign Exchange Management Act (FERA and FEMA).

#### Module III: Financial Environment

Indian money and capital markets: meaning, functions and constituents, Stock exchange- importance and functions, SEBI, Capital market reforms and development, Industrial financial institutions (IDBI, SIDBI, ICICI, IFCI etc.).

#### Module IV: Labour Environment

Labour legislation in India, Social security benefits, Industrial disputes- causes and preventive measures, Settlement of disputes, International Labour Organisation (ILO), Trade union- meaning and functions, Trade Union Act.

#### Module V: Economic Planning and Development

Planning in India- needs and objectives, five year plans, planning commission, 11<sup>th</sup> five year plan, Green and white revolution- achievements and failures, Second green revolution, foreign trade policy 2009, Export processing zones, Export oriented units, Special economic zones (EPZ's, EOU's, SEZ's) and trading houses in India.

#### Module VI: Global Environment

Bretton woods system, features of Uruguay round of negotiations, GATT/ WTO- role, functions and ministerial conferences, IMF, World Bank (International Bank for Reconstruction and Development), Regional economic cooperation institutions, SAARC, EU, NAFTA and ASEAN.

### Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# PRODUCTION AND OPERATIONS MANAGEMENT

**Course Code: MGC2401**

**CreditUnits: 03**

## **Course Objective:**

The course is oriented to familiarize the students with fundamentals of Production and Operations Management, and tools and techniques used in taking decisions in operating and controlling the Production and Service Industries. Further this course will familiarize the students with Quality Management and Current Quality Tools used in Production and Service Industries.

## **Course Contents:**

### **Module I: Overview of Production and Operation Management**

Brief history of Production and Operation Management, Service Revolution, Definition, Factors Affecting Operations Management, Role- Scope and Function of Production and Operation Management, Criteria of Performance for the Production and Operation Management, Operation Strategies, Effect of Growth of Service Sector on Operations Management

### **Module II: Demand Forecasting & Capacity Planning**

Qualitative Forecasting Methods (Educated Guess, Consensus, Delphi Method, Historical Analogy, Market Research), Quantitative Forecasting (Linear Regression, Moving Average, Weighted Moving Average, Exponential Smoothing with Numerical), Definition of Production Capacity

### **Module III: Facility Location and Facility Layout**

Factors Affecting Location Decisions, Quantitative Techniques in Facility Location (Factor Rating Method, Centre of Gravity Method, Load Distance Method, Break Even Analysis Method – Numerical for each method), Utilization of GIS in Plant Location.

Principles of Facility Layout, Types of Layout (Process Layout, Product or Line Layout, Fixed Position Layout), Basics of Line Balancing –(No Numerical), Merits and Demerits of Product and Process Layout

### **Module IV: Production Planning and Control**

Capacity Planning, Aggregate Planning, Master Production Scheduling.

Production Planning and Control Systems (Push System, Pull System)

Job Shop Scheduling and its Criteria (Mean Flow Time, Mean Tardiness, Number of Tardy Jobs - Numerical), Single Processor Job Shop Scheduling (Due Date Method, Shortest Processing Time Method - Numerical).

Two Machines Scheduling – Johnson's Rule – (Numerical).

General Job Shop Scheduling – Earliest Due Date Method – (Numerical)

### **Module V: Inventory Management, Supply Chain Management & Logistics Management**

Basic Concepts of Inventory Management, Lead time, Safety Stock, Elements of Inventory Costs, Inventory Models – EOQ –(Derivation and Numerical), EOQ with Quantity Discount – (Numerical), Fixed Order Quantity Model - No Numerical, Fixed Order Period Model - (No Numerical).

Basic Concepts, Objectives of Supply Chain Management, Decision Phases in Supply Chain Management.

Basic Concepts of Logistics Management, Warehousing, Material Handling Equipments

### **Module VI: Foundations of Quality, Quality Control, TQM**

Concept of Quality - Gurus of quality a Comparative Discussion on Edward Deeming, David Juran and Philip Crosby - their Philosophy contribution and limitations.

Statistical Quality Control (Mean and Range Charts, c Chart, p Chart – (Numerical), Basic Concepts of Acceptance Sampling, OC Curves – (No Numerical).

Basic Concepts of TQM, 5 –S and Kaizen, 6-Sigma.

ISO Standards, and ISO Certification.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# RESEARCH METHODOLOGY AND REPORT PREPARATION

Course Code: MGC2402

Credit Units: 03

## Course Objective:

To provide an exposure to the students pertaining to the nature and extent of research orientation, which they are expected to possess when they enter the industry as practitioners. To give them an understanding of the basic techniques and tools of marketing research. To train the students in evaluating and developing the marketing information system.

## Course Contents:

### Module I: Introduction

Nature and scope of marketing research, Marketing research as input in decision making process, Marketing research and marketing information system. Applications of marketing research, Planning a research project, Problem identification and formulation of Research Design, introduction to Research Design, Market research on the Internet.

### Module II: Data collection methods

Attitudes measurement and scaling techniques, Ratio, Interval, Ordinal and Nominal scales, Likert's scale, Thurstone scale, Semantic differentiation method, Observation methods and questionnaire method, Questionnaire design, Steps in constructing a questionnaire, Types of questions, introduction to Projective techniques and perceptual mapping.

### Module III: Sampling

Sampling decisions, Sampling frame, Sample selection methods - Probability and non probability, Sample size, sampling error, Application of sampling methods to marketing problems.

### Module IV: Data Collection Field Force

Data collection field force, Fieldwork procedure, common sources of error in the fieldwork, minimizing fieldwork errors, Tabulation of collected data.

### Module V: Data Analysis

Data analysis-I, Test of significance Z, t, F and chi-square, Data analysis-II, Correlation and Regression techniques, Data analysis – III – Cluster Analysis, Introduction to Statistical Package

### Module VI: Report Writing

Research presentation and research process examination; Report writing - Types of research report. Examination of the research procedure, Selected applications of marketing research, identifying market segments, Product research, Advertising research.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# MANAGEMENT ACCOUNTING

**Course Code: MGC2403**

**Credit Units: 03**

## **Course Objective:**

To provide the students knowledge about the use of costing data for planning, control and decision making.

## **Course Contents:**

### **Module I:Management Accounting**

Meaning and Definition, Nature & Scope: Objectives of Management Accounting, Management Accounting and Financial Accounting, Management Accounting and Cost Accounting, Utility of Management Accounting, Limitations of Management Accounting, Position of Management Accountant in the Organization.

### **Module II:Cash Flow Analysis**

Distinction of Cash from Funds, Utility of Cash Flow Statement, Construction of Cash Flow Statement

### **Module III:Budgets and Budgetary Control**

Concept of Budgets and Budgetary Control, Nature and Objectives of Budgetary Control, Advantages and Limitations of Budgetary Control, Establishing a system of Budgetary Control, Preparation of Sales Budget, Selling and Distribution Cost Budget, Production Budget, Purchase Budget, Cash Budget, Flexible Budgets and Master Budgets.

### **Module IV:Responsibility Accounting**

Concept of Responsibility Accounting, Cost Centers and Profit Centers, Contribution by Segments

### **Module V: Marginal Costing**

Meaning, assumptions, cost- volume profit analysis, Break- Even analysis, Decision making areas- product mix, make/ buy, pricing decision.

## **Examination Scheme:**

Components	A	CT	C	H	EE
Weightage (%)	5	10	10	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# BUSINESS INFORMATION AND DATABASE SYSTEM

**Course Code: MGC2404**

**CreditUnits: 03**

## **Course Objective:**

The aim of this course is to introduce the students to the managerial issues relating to information systems, its role in organization and how information technology can be leveraged to provide business value.

## **Course Contents:**

### **Module I:**

MIS need and concepts, characteristics, Typology of MIS, Structure of MIS. Planning for MIS, System Development Methodologies, Conceptual and detailed designs of MIS, System Implementation strategies and process, System Evaluation and Maintenance.

### **Module II:**

Introduction to data base management system- Data versus information, record, file; data dictionary, database administrator, functions and responsibilities, file-oriented system versus databases system.

### **Module III:**

Advanced Concepts in Information Systems: Enterprise Resource Planning, Supply Chain Management, Customer Relationship Management, Data, Warehousing and Data Mining.

### **Module IV:**

Database system architecture- Introduction, schemas, sub schemas and instances; data base architecture, data independence, mapping, data models, types of database systems.

### **Module V:**

Data base security- Threats and security issues, firewalls and database recovery; techniques of data base security; distributed data base.

## **Examination Scheme:**

Components	C	H	CT	V	A	EE
Weightage (%)	5	5	10	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# PERSONAL FINANCIAL PLANNING

Course Code: MGC2405

CreditUnits: 03

## Course Objective:

Post Liberalization, India has witnessed a phenomenal growth in her GDP. With the advent of MNC's, and growth in private business, individual's income and saving pattern has changed. Therefore the need arises to manage these funds in a manner that it is no more called as savings but addressed as a need for Personal financial planning. This course is essential for every student irrespective of the specialization as every individual needs to plan his finances.

## Course Contents:

### Module I: Introduction to personal financial planning and personal accounting

Concept of Personal Financial Planning: Need, Significance, Scope; Ethical issues in Personal Financial Planning; Changing per capita investors. Need to maintain Accounts, Methods: Traditional & Using Electronic Media. Applying for PAN & filing of Income Tax returns.

### Module II: Investment Avenues

**Real Assets:** Investment in Real Assets: Real Estate, Precious Metals, Other Fixed assets. Their relative merits & demerits. Change in their returns over the past few years.

**Financial Assets:** Investments in securities: Through IPO, Secondary Market. Investment in G-sec; Debt instruments, Post Office instruments, Insurance Policies, Mutual Funds, Certificate of Deposits, Foreign Market.

### Module III: Introduction to Income tax and Income from salary

Introduction to Income tax act 1961 and Finance Act. Previous year, Assessment year, Income, Total Income, Gross Total Income, Capital and Revenue Receipts / Expenditures, Exempted Incomes, Residential Status and incidence of Tax.

Salary, Exemption:- Leave encashment, Gratuity, Pension, Annuity, Pension fund, Allowance (HRA, Entertainment, Special allowance – dependent of expense ad not dependent on expense, perquisites – rent free accommodation, Leave travel concession, medical facility), Deductions 80c to 80u. ). Sections (2(9), 2(31), 2(7), 2(24), 3, 6, 14, 288A, 288B, 2(17), 4, 9, 45, 9(1)(ii), 9(1)(iv), 9(1)(v), 10, 11, 12, 17(1), 22,

### Module IV: Income from house property, capital gains and other sources

Income from House Property(Types of house property, Exempted house property income, Computation of GAV and NAV, Treatment of unrealized, recovered and arrears of rent), Capital Gains and other Sources (Short term & Long term capital gain, Cost of acquisition, Cost of improvement, Index cost, Income that are taxed under other sources, Deduction under other sources, Tax treatment of lotteries, puzzles. Sections 23, 24, 25, 28, 30, 31, 32.

### Module V: Tax planning

Concept, significance and problems of tax planning, Tax evasion and tax avoidance, Individual Taxation Slabs, Wealth Tax, Gift Tax, Capital Gains Tax, Service tax, Recent Tax saving schemes

### Module VI: Retirement & Goal Planning

Concept of risk assessment of individual, Introduction to portfolio management, Retirement planning & investment: Income generation after retirement, liability management, anticipation of expenses. Investment for major goals: House, Family, Education, Medical, Wealth Management/ Financial Advisory companies. Their role, significance & growth.

## Examination Scheme:

Components	P	C	CT	A	EE
Weightage (%)	10	5	10	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# SALES AND DISTRIBUTION MANAGEMENT

**Course Code: MGC2406**

**Credit Units: 03**

## **Course Objective:**

The major objective of this course is to acquaint the students with the theory and practice of Management of Sales Operations.

## **Course Contents:**

### **Module I: Introduction**

Sales management- Concept, Objectives and functions. Evolution of sales management. Nature and role of Sales Manager's job. Sales management as a career. Emerging trends in sales management.

### **Module II: Sales Organization**

Purpose of sales organization. Setting sales organization. Types of sales organization. Coordination of selling functions with other marketing activities. Sales forecasting.

### **Module III: Controlling sales effort**

Sales Budget: Purpose and budgetary procedure. Quotas: Concept, Objectives and Types. Sales Territory: Concept and procedure of devising sales territories, Routing and Scheduling of Sales force. Sales Audit.

### **Module IV: Managing Sales Force**

Concept of sales force management. Recruitment and Selection of sales personnel (domestic and international perspective). Cross Cultural challenges. Sales training. Compensating and motivating sales personnel. Controlling and evaluating sales personnel.

### **Module V: Distribution Management and channel control**

Distribution channels: Concept and need. Distribution Channel Strategy. Managing distribution channel. Features of effective channel design. Channel Conflict: Concept and stages. Conflict management.

### **Module VI: Logistics Management**

Objectives of logistics. Concept of logistics planning: inventory management decisions, transportation decisions, Location decisions.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TERM PAPER

**Course Code: MGC2431**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from any Indian industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organization and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGC2432

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

### Declaration

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been  
submitted earlier to any other University /Institution for the fulfilment of the requirement for any  
course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report  
from any earlier work done by others or by me. However, extracts of any literature which has been  
used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGC2433**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of at least 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

## OPERATIONS RESEARCH

**Course Code: MGC2551**

**Credit Units: 03**

**Course Objective:**

The objective of this paper is to make students familiar with basic concepts and tools in Operations Research. These techniques assist in solving complex problems and help in decision making.

**Course Contents:**

**Module I: Introduction**

Introduction to Operations Research, Definition, scope and limitations of Operations Research

**Module II: Linear Programming**

Linear Programming – Basic Concepts, Model formulation; Solution methods – Graphical Solution method, Simplex method (problems involving only upto 3 constraints and of inequality <), Application of LPP in business decision making.

**Module III: Transportation Problem**

Transportation problem- Initial Basic feasible solution (North - West corner rule, Vogels approximation method), Test for optimality (Modified Distribution (MODI) method)

**Module IV: Assignment Problem**

Assignment Problem – Introduction, Approach of the Assignment model, Solution Methods (Hungarian method)

**Module V: Game Theory**

Game Theory - Concept and definition; Solution methods of Pure Strategy games (with saddle point), Significance of Game Theory.

**Module VI: Queuing & Simulation**

Introduction, Elementary queuing system, Introduction to Single – channel queuing model (with Poisson arrivals and Exponential service times), (no numerical); Introduction to Simulation, applications, advantages and drawbacks of simulation, Introduction to Monte – Carlo Simulation, Role of computers in Simulation.

**Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# INTERNATIONAL BUSINESS MANAGEMENT

**Course Code: MGC2501**

**CreditUnits: 03**

## **Course Objective:**

To introduce students to the contemporary issues in International Business that illustrate the unique challenges faced by managers in the international business environment.

## **Course Contents:**

### **Module I: Introduction to International Business**

Nature and scope of international business. International business environment, Classical theory of international trade: Absolute cost advantage theory, comparative cost theory, and Modern theory of international trade. Michael Porter model of competitive advantage of nations, Globalization – forces, Meaning, dimensions and stages in Globalization.

### **Module II: International Business Environment**

Tariff and non-tariff barriers, General Agreement on Trade and Tariffs (GATT), World Trade Organization, Important Ministerial Conferences & their outcomes, Dispute settlement mechanism under WTO, Regional Integrations, Trade Blocks – nature and levels of integration, arguments for and against regional integration.

### **Module III: Modes of International Entry**

International Business – Entry modes, Franchising, Exporting, Licensing, International Agents, International Distributors, Cross Border Mergers & Acquisitions, Strategic Alliances, Joint Ventures, Overseas Manufacture and International Sales Subsidiaries, Outsourcing, FDI, FII, PN

### **Module IV: International Financial Management**

Introduction to International Financial Management –International Monetary System, exchange rate system (floating and fixed) Financial Markets and Instruments- Introduction to Export and Import Finance – ECGC & EXIM Bank, Methods of payment in International Trade: Letter of Credit, Banker's Acceptance, Draft.

### **Module V: Forex Exposure**

Country Risk Analysis, Political, Social and Economic, Types of Forex Exposure: Accounting, Operating & Transaction – their management, An introduction to interest rate exposure.

### **Module VI: Foreign Trade Procedure**

An Introduction to Foreign trade Policy and its impact on different sectors of the Economy. Documentation Framework: Types, Characteristics of Document, Export Contract - INCO Terms - Processing of an Export Order.

### **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# ENTREPRENEURSHIP DEVELOPMENT

**Course Code: MGC2502**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to provide students an understanding of entrepreneurship & the process of creating and growing a new venture. The course also focuses on giving the students the concept of an entrepreneur who is willing to accept all the risks & put forth the effort necessary to create a new venture.

## **Course Contents:**

### **Module I: Basic Concepts**

Qualities, Characteristics of an entrepreneur, Venture idea generation, Ideas and the entrepreneurship, Women entrepreneurs, Preliminary Screening, Drawbacks or Problems of entrepreneurship, Reasons of failure, Overview of setting up an enterprise with organizational forms – MSMED Act and SMERA Overview.

### **Module II: Project Appraisal**

Pre-feasibility Report, Project Report, Comparative Rating of Product ideas, Cash Flow, Financial Analysis and Planning, Sources of Finance, Stages of Project Feasibility Analysis-Market, Technical, Financial, Social Analysis, Project Implementation Stages

### **Module III: Financial Analysis**

Financing the project, Sources of finance, Venture Capital Sources, What Investor looks in the Investment Proposal, Outline for a Venture Capital Proposal, Sources of finance from different banks, Proposal with IDBI etc.

### **Module IV: Market and Materials Management Analysis**

Vendor development, vendor selection decision factors, methods of price determination, direct and hidden cost in material management, market development, market feasibility, activities and decisions in materials management – International Markets.

### **Module V: Project Management**

Steps and procedure for setting up small scale, Role of Banks and Financial Institutions in Development, E-Commerce, E-Business, E-Auction, Project management problems. SEZ, Cluster Development.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# SUMMER INTERNSHIP EVALUATION

Course Code: MGC2535

CreditUnits: 06

## Objectives:

The basic objective of a summer internship is to provide first hand practical exposure of the corporate functioning and to acquaint students with the culture of corporate. The summer training will also provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus, this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

## General Guidelines:

Every student of under graduate courses will be required to undergo a practical training in a corporate organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the fourth semester examinations. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific project to the candidate, which will be completed by him/her during the period of training. The work done by the candidate during the training period shall be submitted in the form of a report as per the guidelines provided by the Department.

## Chapter Scheme for the SIP Report:

Chapter I: Introduction	- 20 marks
Chapter II: Conceptual Framework/National/International Scenario	- 5 marks
Chapter III: Presentation, Analysis and Findings	- 35 marks
Chapter IV: Conclusion and Recommendations	- 15 marks

The report has to be written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise of a maximum of 70 pages and has to be submitted in two copies.

## THE COMPONENTS OF A SIP REPORT

The outcome of Summer Internship is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexure:** Questionnaires (if any), relevant reports, etc.

**Evaluation Scheme:**

<b>SIP Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

# CONSUMER BEHAVIOUR

**Course Code: MGC2503**

**Credit Units: 03**

## **Course Objective:**

To develop an understanding of how consumers behave and use the knowledge to adopt appropriate marketing strategies.

## **Course Contents:**

### **Module I: Introduction**

Consumer Behaviour: Definition and significance, Understanding consumer and market, Difference in individual buyer behaviour and organizational buyer behaviour, Market segmentation: lifestyle and demographic segmentation, usage segmentation, benefit segmentation, Product positioning.

### **Module II: Environmental influences**

Culture: Meaning and Characteristics, Cross Cultural understanding of Consumer Behaviour, Subculture, Social Groups: Meaning and formation of a group, Reference groups, Influence of reference groups on consumer behaviour, Family: Lifecycle and its significance on consumer behaviour, Family purchase decision process.

### **Module III: Personal influence and Diffusion of Innovation**

Concept, nature and significance of personal influence, Opinion leadership and its role in consumer behaviour, Concept of product adoption and adoption process, Diffusion of innovation and process of diffusion.

### **Module IV: Individual determinants of Consumer Behaviour**

Personality and self concept and its relevance in consumer behaviour, Motivation: Nature and role of motives and their significance in marketing, Information processing: Concept and Process, Attitudes: Characteristics, functions and its importance in buyer behaviour.

### **Module V: Consumer Decision process**

Consumer decision process model, Problem Recognition, Search and Evaluation, Purchasing Process, Post-purchase Behaviour: Post Purchase evaluation and Product disposition.

### **Module VI: Organizational Buyer Behaviour**

Nature of Organizational Buying Behaviour, Factors influencing organizational buyer behaviour, Types of decision situations, Organizational buyers decision process.

## **Examination Scheme:**

# SERVICE MARKETING

**Course Code: MGC2504**

**Credit Units: 03**

## **Course Objective:**

The course has been designed to familiarize students with characteristics of services, their design and delivery and the complexities of handling intangibles.

## **Course Contents:**

### **Module I: Services an Overview**

Services: concept, characteristics, Marketing of goods v/s marketing of services, Significance of services marketing, Role of services sector in economy, Growth of service sector, Services- Global and Indian Scenario, Introduction to service marketing mix; classification of services.

### **Module II: Consumer Behaviour in Services**

Consumer decision-making process, Consumer Expectations: Concept, Factors influencing customer expectation of services, Service encounter and moments of truths, Managing Customer Satisfaction, Service failure and recovery.

### **Module III: Service Quality & Productivity**

Managing service operations. Concept of productivity in service context. Approaches to improve productivity, Managing service demand and capacity: Understanding capacity constraints, understanding demand patterns, Strategies for matching demand and supply; service blueprinting, physical evidence & Servicescape.

### **Module IV: Service Quality**

Concept of service quality, Gap model of service quality, Measuring & improving service quality, Concept of SERVQUAL system, Concept of CRM & enhancing quality through it, Introduction to Six Sigma.

### **Module V: Managing service personnel**

Role of service personnel and developing customer-focused personnel, Job characteristics, Internal marketing, strategies for delivering quality through people.

### **Module VI: Pricing and Distribution for services**

Price determinants, pricing modifications, Approaches to pricing services, Pricing strategies linking to value definitions, Customer-focused pricing, Channel structures, distribution-growth options.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# INTERNATIONAL MARKETING

**Course Code: MGC2505**

**Credit Units: 03**

## **Course Objective:**

After giving students an introduction of marketing management, it is necessary to give them an overview about the international scenario keeping in view the ever growing importance of international market.

## **Course Contents:**

### **Module I: Introduction**

Meaning, scope and challenges of international marketing, International dimensions of marketing, international marketing v/s domestic marketing, Benefits of International Marketing.

### **Module II: Global Business Environment**

WTO and its impact on international business operations, Tariff and non-tariff barriers, Regional economic groupings and their significance.

### **Module III: International Marketing Environment**

International marketing environment- Geographical, demographic, economic, political, legal, socio cultural environment- Elements of culture, Cultural challenges, Business customs and practices, Emerging markets and marketing challenges.

### **Module IV: Planning for International Marketing**

International Marketing Research and Information System, Modes of entering into foreign markets, International Product Life Cycle, International market segmentation, targeting and positioning.

### **Module V: International Marketing Decisions**

International pricing strategy- Factors influencing price, pricing methods, Global Branding Decisions, International distribution – Types and functions of foreign distribution channels; distribution logistics, Promotion Decisions- International advertising, Selection of media, Challenges of international advertising, Personal selling publicity and sales promotion.

### **Module VI: The Indian Scenario**

The Export Import Scene in India, EXIM Policy, Export Documentation, Export Procedure

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TERM PAPER

**Course Code: MGC2531**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from any Indian industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGC2532

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- e. *Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- f. *Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- g. *Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- h. *Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

### **Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

**Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGC2533**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# FINANCIAL SERVICES

**Course Code: MGC2506**

**CreditUnits: 03**

## **Course Objective:**

The aim of the course is to orient the student to the recent changes in the financial institutions and financial services industry and their link to economic development. The financial institutions and services are changing rapidly. A course that merely describes the existing institutions and services will not prepare you for the change. Thus you must familiarize yourself with the services available in the industry today and understand why they are the way they are and why they are changing. An Indian perspective will be given.

## **Course Contents:**

### **Module I: Financial Services**

Role of Financial Services in economic development, Evolution of Financial Services Sector in India, Marketing of Financial Services (Introduction)

### **Module II: Venture Capital**

Venture Capital Financing, International Experiences in Venture Capital Financing, Venture Capital Financing in India, Pitfalls to be avoided, Preparation & evaluation of Business Plan

### **Module III: Factoring & Forfaiting**

Factoring Services - Features Merits and Demerits, Cost Benefit Analysis, Forfaiting: Features, merits & Limitations

### **Module IV: Leasing and Hire Purchase**

Development of Leasing and Hire Purchase, Types of Leasing, Pricing Methodology and Financial analysis, Taxation, Legal Framework for Leasing and Hire Purchase Companies

### **Module V: Mutual Funds**

The concept & Role of M/Fs, History of M/Fs in India, Types of M/Fs, Fund Structure & constituent, Selecting the right Investment Products for Investors, Comparison of Investment products, Measuring of Risk In M/Fs, Recommending model Portfolios & selecting the right funds.

### **Module VI: Credit Rating & other Financial Services**

Credit rating concept of Credit rating, Types of credit rating, Advantages and Disadvantages of credit rating, Credit rating agencies and their methodology and process, Individual Credit rating, Sovereign Credit Rating Practices. Custodial Services, Credit Cards

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# PRINCIPLES OF INVESTMENT MANAGEMENT

**Course Code: MGC2507**

**Credit Units: 03**

## **Course Objective:**

The course aims at equipping the undergraduate students with financial tools, which help in making decisions for investment in financial securities. It is also aimed at imparting a basic understanding of the influence of changing economic scenario on the decisions and important theories and models, techniques and regulations underlying these decisions.

## **Course Contents:**

### **Module I: Introduction to Investments**

Investments: Introduction, Avenues for Investment including introduction to derivatives, Investments and Speculation, Features of a Good Investment programme, Process of Investment Decision Making, Risks involved in Investments including the concept of beta, Principle of Dominance.

### **Module II: The Stock Markets in India**

Nature and Functions of the Stock Market, OTCEI & BSE, NSE & Role of Depositories, Market Indices, Brokerage Business

### **Module III: Valuation of Securities**

Bond Valuation and Analysis, Preference share Valuation and Analysis, Equity Share Valuation

### **Module IV: Security Analysis**

Fundamental Security Analysis, Technical Security Analysis

### **Module V: Portfolio Analysis and Management**

Portfolio Analysis: Risk and Return, Portfolio Choice: Utility Theory and Indifference Curves, Markowitz: Portfolio Selection Model, Capital Asset Pricing Model, Sharpe's Single Index Model and Portfolio Evaluation Treynor, Sharpe and Jensen.

## **Examination Scheme:**

Components	CT	HA	C	S	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# FINANCIAL DERIVATIVES

**Course Code: MGC2508**

**CreditUnits: 03**

## **Course Objective:**

This course attempts to give an overview of the derivatives market with special reference to India. A financial manager must understand how derivatives can be used to the advantage of the firm. An introduction to Derivatives will equip the students to understand the mechanics of this highly intriguing & innovative field of study

## **Course Contents:**

### **Module I: Introduction to financial derivatives**

Introduction to derivative trading, Characteristics of derivatives, Underlying assets (Equity Bonds/loans, Foreign Currency, and Commodity), Importance of derivatives as an investment option, introduction to types of derivatives, Participants in derivatives market (Hedgers, Speculators, Arbitrageurs), Evolution of Derivative markets in India

### **Module II: Forwards & Futures**

Forward contracts: Limitations of forward markets, Differences between forwards and futures, Futures terminology, Pricing of futures contract, Introduction to currency futures, Interest rate futures, Treasury bond futures, Eurodollar futures, Commodity futures, Index futures & Stock Futures (Hedging, speculation and arbitrage).

### **Module III: Options: Fundamentals**

Terminology - call, put, writer, buyer, premium, intrinsic value, time value, expiry date, settlement date, strike price, ATM, OTM & ITM, Options positions (payoff graphs), Types of Stock options, Futures options vs Spot options, Options on stock Indices, Currencies & futures, Warrants & Executive stock options, Exotic options

### **Module IV: Principles of trading & Hedging with Options**

Option Valuation: The BS-Merton Model (Solving for BS model, assumption application and criticism), Trading strategies - Option trading using bull and bear spreads (payoff graphs)

### **Module V: Swaps**

Terminology: LIBOR, MIBOR, Swap basis, Interest rate swaps, Determining LIBOR/MIBOR swap zero rates, Currency swaps: Various types of swaps & features, Introduction to Swaptions.

### **Module VI: Recent Developments**

New Derivative contracts including Credit Derivatives, Weather Derivatives, Energy Derivatives etc, Role of derivatives in the economic meltdown of 2007 - 2008, Major Derivative mishaps in the world including The Barrings Bank disaster, The Sumitomo Corporation Scandal, the Swiss Bank Scam

## **Examination Scheme:**

Components	P	C	CT	A	EE
Weightage (%)	10	5	10	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# ORGANISATIONAL DEVELOPMENT AND CHANGE

**Course Code: MGC2509**

**Credit Units: 03**

## **Course Objective:**

It aims to provide a conceptual input of meaning, characteristics, process and influences of organizational development and change management. It gives comprehensive overview of human capital from the prospective of organizational excellence in the light of transitional phase of Indian Industries. It gives the imperatives, assumptions, role and skills of O.D. specialists through experiential learning methods. It facilitates teamwork, team building and the concepts of transformational Leadership.

## **Course Contents:**

### **Module I: Organizational Development**

Nature, Assumptions, Characteristics & Importance, Values and assumption.

### **Module II: Organizational Development Process**

Steps involved in OD, Role of Managers, Factors affecting OD.

### **Module III: Implementation of Change Models**

Lewin's force field analysis, Kotler's eight step model, action research model.

### **Module IV: Structural and Comprehensive OD Interventions**

Classification of OD interventions: Human Process, Techno structural, HRM, Strategic interventions, Evaluation and institutionalization of interventions.

### **Module V: Change Management**

Need for the change, Factors causing change, environmental, Technological, Legal, Political, Social and cultural factors of change, Models and Techniques involved in change management, Total Quality Management, Business Process Reengineering, Learning Organization.

### **Module VI: OD Process**

OD process, Role & styles of OD practitioners, contemporary OD issues for today's managers.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TRAINING AND DEVELOPMENT

**Course Code: MGC2510**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to help students acquire and enhance their knowledge of how to plan, develop, carry out, and evaluate training and executive development programmes in Business Organizations.

## **Course Contents:**

### **Module I: Introduction**

Meaning and definition of training, Training vs Education, Culture and Context, Introduction to training Strategy.

### **Module II: Process of Training**

Establishing objectives, Training need assessment, Designing the programs, Training methods, Trainers and training styles, Introduction to Management Development program.

### **Module III: Evaluation of Training & Development**

Training Evaluation – Need for evaluation, Measuring Training Effectiveness, Concept of Return on Investment, Cost – Benefit Analysis, Models of Training Evaluation.

### **Module IV: Training Systems**

Action Research for better training, Knowledge management, Career development, Succession planning, Diversity training, Orientation training.

### **Module V: Changes in Training Needs for Modern Organizations**

Concept and Need for Learning Organizations, Training for Trainers, Leadership, Team Playing and Group Dynamics, Basics of Sensitivity Training, Computer Based Training.

### **Module VI: Development**

Executive Development – significance & nature, Identifying development needs and setting objectives. Techniques of development and advantages, Role of HRD in 21<sup>st</sup> Century.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# INTERNATIONAL HUMAN RESOURCE MANAGEMENT

**Course Code: MGC2511**

**CreditUnits: 03**

## **Course Objective:**

The main objective of this course is to explore the dynamics of global business development and to prepare the students about examining significant business investment opportunities and maximization of returns in context with human resources.

## **Course Contents:**

### **Module I: Internationalization**

Broad overview of International Human Resource Management features, Elements, Benefits and Limitations, Domestic and International HRM, Factors influencing the global work environment.

### **Module II: Strategic Human Resource Management**

Strategic HRM, Aims of SHRM, Integrating the business and HR strategies, Formulating HR strategy, Content of HR strategies, Relationship between International Strategy and SIHRM

### **Module III: Cross-Cultural Management**

Cultural diversity in consortia formation, Developing cognitive framework to appreciate the impact of culture on managerial behaviour, Introduction, Understanding Culture, Key Concepts, Determinants of Cultural Identity, Frameworks for Mapping the Culture, Concept of Geert Hofstede

### **Module IV: International Recruitment, Training and Rewards**

Recruiting from Host country, Reward strategies for international execution, The expatriate approach, International values and reward policy, Designing rewards for the international business unit, Training Global executives.

### **Module V: Performance Management and Compensation in International Business**

Context for international performance management, framework for performance management, Compensation, Issue of double taxation.

### **Module VI: Best HR Practices**

Emerging Trends, North America, South America, Some key pointers, Northern Europe, Value based management in Nordic countries, China emerging economy, Japan – a culture of enfolding relationship, Trends and Future of HR in high performing Co., Essay on Dream Organisational.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# RELATIONAL DATABASE MANAGEMENT SYSTEM

**Course Code: MGC2512**

**CreditUnits: 03**

## **Course Objective:**

The objective of the course is to give knowledge of the Relational Database Management Software, in particular ORACLE. It is expected that a student at the end of the course would attain a good conceptual and practical understanding of databases.

## **Course Contents:**

### **Module I: Introduction to RDBMS**

RDBMS: Introduction, Relational Model concept and Relational data structure, Relational Model constraints as domain constraints, Key constraints, Entity integrity constraints, Referential Integrity constraints.

### **Module II: Introduction to Oracle**

Tools of Oracle, Features of oracle.

### **Module III: SQL**

Overview of SQL, Component of SQL (DDL, DML, DCL), Advantage of SQL, Basics of syntax writing, Data Definition Language, Create command, Data type, Constraints, ALTER & DROP, UPDATE & DELETE Commands, Substitutions variables, Run time Environments variables, SELECT Commands Basic Constructs, Functions, Nested Queries, Correlated queries, Views, Sequence, User Management Commands.

### **Module IV: PL/SQL**

Basic features, Block Structure of a PL/SQL Programs, Control Structures, Exception Handling, Cursor, Procedure, Functions and Triggers, Internet features of Oracle.

### **Module V: Database Technologies**

Client/Server Databases, Distributed Databases, Web Databases

### **Module VI: Administration of Oracle databases**

## **Examination Scheme:**

Components	CT	HA	Q	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# SOFTWARE PROJECT DESIGN AND ANALYSIS

**Course Code: MGC2513**

**Credit Units: 03**

## **Course Objective:**

This module will introduce and develop concepts that are seen as central to the effective management of software projects. You will be expected to develop an appreciation of key, generic project management concepts and techniques as well as those techniques and approaches that are specific to the management of software projects. As well as knowing the core techniques, you will be expected to apply them across a limited range of software project management scenarios.

## **Course Contents:**

### **Module I: An Introduction to Software Project Management**

Management Spectrum, People, Product, Process, Project the W5HH Principle, The Profile of a Project, Project start-up, Development, Completion Operation, Role of SDLC models (such as the waterfall model, incremental model, spiral model) and Structured methods (such as SSADM)

### **Module II: Project Metrics**

Measures, Metrics & Indicators, Metrics in the process & Project domain, Metrics for software quality.

### **Module III: Software Project Planning**

Discussion of network diagrams and critical path analysis (CPA), Planning aids, Simple manual techniques such as Gantt Charts through to more complex and sophisticated planning tools, Estimation tools (Delphi technique, CoCoMo)

### **Module IV: Risk Analysis & Management**

Risks Risk Identification, Risk Projection, Risk Refinement, Mitigation, Monitoring & Management.

### **Session V: Scheduling and Resourcing**

Concepts of lateness, Defining task set for software project, Defining a Task Network, Scheduling, Earned value analysis, Error tracking, Project plan

### **Module VI: Software Configuration Management**

Baselines, SCM Process, Identification of objects in s/w configuration, Version control, Change control, Configuration audit, Status reporting, Hands on MS-Project.

## **Examination Scheme:**

# PROGRAMMING WITH MICROSOFT VISUAL BASIC

**Course Code: MGC2514**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to offer the students all key concepts and capabilities to be bound in Microsoft Visual Basic. This course seeks to provide very clear and straightforward implementation of key features of Visual Basic with explanations of each work. The student should walk away with an in-depth understanding of how to utilize all of Visual Basic's capabilities for building industrial strength enterprise application and understand the process of software development. The course will make the students learn real world context.

## **Course Contents:**

### **Module I: Visual Basic Overview**

Opening, writing and running Visual Basic Program, Working with controls and defining their properties, Working with menus and dialog boxes.

### **Module II: Programming Fundamentals**

Visual Basic Variables and Operators, Using Decision Structure, Using Iterations and Timers.

### **Module III: Creating the Perfect User Interface**

Working with Forms, Printers and Error Handling, Adding Artwork and Special Effects

### **Module IV: Managing Corporate Data**

Using Modules and Procedures, Working with Arrays, Exploring text files and string processing, Managing access databases.

### **Module V: Professional Edition Tools and Techniques**

Word Processing with the Rich Text box control, Displaying progress and status information, Integrating music and video with the multimedia MCI control, Using the windows API.

### **Module VI: Advanced Database Programming**

Managing data with the Flex Grid Control, Exploring database handling using DAO, RDO and ADO, Handling the Recordset.

## **Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

# LAW OF CRIMES

**Course Code: MGC2515**

**Credit Units: 03**

## **Course Objective:**

The basic objective of this course is to give an insight of the basic principles of crime and the law determining criminal liability and punishment.

## **Course Contents:**

### **Module I: Introduction to Law of Crimes**

Extent and operation of the Indian Penal Code, Definition of Crime, Fundamental elements of crime, Stages in commission of a crime, Intention, Preparation, Attempt: Essentials of the attempt, Impossible attempt, Attempt and preparation distinguished

### **Module II: General Explanations and Exceptions**

Definitions, Constructive joint liability, Mistake, Judicial and Executive acts, Accident, Necessity, Infancy, Insanity, Intoxication, Consent, Good faith Private Defense

### **Module III: Abetment and Criminal Conspiracy**

Law relating to Abetment, Accomplice vs. Co-accused.

### **Module IV: Punishment**

Theories: Deterrent, Retributive, Preventive, Expiatory and Reformatory Theory Punishment under the IPC: Fine, Life Imprisonment, And Death Sentence/Capital Punishment

### **Module V: Offences affecting Body**

Offences affecting the Human body, Offences against Women and Offences against Property.

### **Module VI: Offences: Defamation and related to property**

Defamation and offences relating to documents and property marks.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# LAW AND TECHNOLOGY

**Course Code: MGC2517**

**Credit Units: 03**

## **Course Objective:**

Understanding the legal measures for handling issues related Technological development in various fields. To develop a better understanding of Techno- legal aspects for the development of society and business.

## **Course Contents:**

### **Module I: E-Commerce**

Online contracting, Online securities offering and E-Banking

### **Module II: Cyber Crimes**

Obscenity, Defamation, Hacking and Cracking Crime through Mobile Phones

### **Module III: Genetic and Medical Technologies**

Regulation of Genetic Technology and Laws for Medical Technology

### **Module IV: Broadcasting**

Regulation and Control of Broadcasting and Law relating to Cable Television Network

### **Module V: Jurisdiction**

Concept of Territorial Jurisdiction for Handling Technological issues, and Protection against the anticipated threats (outcome of technological advancement)

### **Module VI: Information Technology Act, 2000**

Introduction to Information Technology Act: Meaning and Definition, Digital Signature, Electronic governance, Offences Cyber regulation Appellate Tribunal

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# DISSERTATION

Course Code: MGC2637

CreditUnits: 09

## Objectives:

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	- 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	- 5 marks
Chapter 3: Presentation, Analysis & Findings	- 25 marks
Chapter 4: Conclusion & Recommendations	- 10 marks

## THE COMPONENTS OF A PROJECT REPORT

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## THE STEPS OF PROJECT WORK

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II** : Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III** : Collection of information and data relating to the topic and analysis of the same.

**STEP IV** : Writing the report dividing it into suitable chapters, viz.,  
Chapter 1: Introduction,  
Chapter 2: Conceptual Framework / National & International Scenario,  
Chapter 3: Analysis & Findings  
Chapter 4: Conclusion and Recommendations.

**STEP V** : The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Annexures,**

**References / Bibliography**

**Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Project Work separately, obtaining minimum marks of 40 (Project Report and Viva-Voce taken together).

**Evaluation Scheme:**

<b>Dissertation</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

# BRAND MANAGEMENT

**Course Code: MGC2602**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to help the students understand and appreciate the theoretical concepts of brands. To generate the ability to apply the concepts in real life.

## **Course Contents:**

### **Module I: Introduction**

Meaning and importance of brands, Brands v/s products, Challenges and opportunities of branding, Concept of Brand Equity, Brand management process, Role of CRM in building brands.

### **Module II: Brand Positioning and value**

Sources of brand equity, Brand Building, Implications of brand building, Brand positioning: Brand value, Internal branding.

### **Module III: Brand Marketing**

Criteria for choosing Brand elements, Building brand equity: Product strategy, pricing strategy, Integrated marketing communication, Celebrity endorsements, Concept of co-branding

### **Module IV: Brand Performance and Branding strategies**

Brand value chain, Brand equity management system, Brand hierarchy, Designing branding strategy, Brand extension: Concept, Advantages and disadvantages, Evaluating opportunities of brand extension, Branding strategy over PLC.

### **Module V: Managing Brands**

Reinforcing Brands, Brands revitalization Managing brands internationally, Advantages and disadvantages of global marketing, Standardization v/s customization, Global Brand strategy.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TERM PAPER

**Course Code: MGC2631**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from Indian any industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>

# PROJECT

Course code: MGC2632

Credit Units:03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

**Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGC2633**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# CORPORATE TAX PLANNING

Course Code: MGC2605

CreditUnits: 03

## Course Objective:

To provide understanding of Direct Tax including Rules pertaining there to and application to different business situations. To understand principles underlying the Service Tax and concepts of VAT

## Course Contents:

### Module I: Introduction to Tax Management

Concept of tax planning, Tax avoidance and tax evasions, Corporate taxation.

### Module II Income from Business

Residential Status of companies, Taxable income under Business and Profession, Computation of Profit and Gains from business profession, Deemed business profits, Assessment of Retail Business, Deemed incomes (cash credit, unexplained investments, unexplained money and other assets, unexplained expenditures, investments and valuable articles not fully disclosed in books of accounts).

### Module III: Deductions Allowed Under Business and Profession

Deduction Expressly allowed section 30-35, Depreciation deduction calculation, Setoff and carry forward of unabsorbed depreciation section 32(2). Determining Actual Cost 43(1), Set-off and Carry Forward Losses, Bonus or commission to employees section, Interest on borrowed capital, Insurance premium 36(1(i)), Employees contribution to provident fund, Bad debts 36, Revenue expenditure incurred by statutory corporation, Banking transaction tax, Security transaction tax, Commodity transaction tax, provision for admissibility of general deduction 37(1),

### Module IV: International Accounting and Taxation

Analysis of foreign financial statement, Accounting standard: US GAAP, Indian GAAP, IAS, IFRS. Transfer Pricing – Meaning, measurement, strategic considerations Norms & Practices, tax havens, Double taxation agreement among countries, Tax implication of activities of foreign enterprise in India: Mode of entry and taxation respectively.

### Module V: Indirect Tax - Concepts and General Principles

Service tax - Charge of service tax and taxable services, Valuation of taxable services, Payment of service tax and filing of returns.

VAT – Introduction, Calculation of VAT Liability including input Tax Credits, Small Dealers and Composition Scheme, VAT Procedures, Central Sales Tax.

### Module VI: Tax Planning and Financial Management Decisions

Tax planning relating to capital structure decision, Dividend policy, Inter – corporate, dividends and bonus shares, Tax provisions relating to free trade zones, Infrastructure sector and backward areas, Tax incentives for exports. Tax deductions and collection at source, Advance payment of tax.

## Examination Scheme:

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# BANKING AND FINANCIAL INSTITUTIONS

Course Code: MGC2606

CreditUnits: 03

## Course Objective:

The aim of the course is to orient the finance students to the change in the banking industry. The financial industry much like the computer industry is changing rapidly. The students will be familiarized with institutions of today and developing an understanding why they are the way they are, and why they are changing is the core aim of the course.

## Course Contents:

### Module I: Introduction

Money, Process of Capital Formation., Banking and Financial Institutions and economic development, Role of Development Banks in Industrial Financing.

### Module II: Banking System & Operations.

Banking system and structure in India- Types of banks in operation and their functions, Retail and Wholesale Banking, Near Banks, Rural Banking. Cooperative Banking. Universal Banking, NBFCs- International Banking- Financing exporters and importers – Important ECGC Policies and guarantees governing export financing) Banking Operation: An overview Principles of Lending, Study of Borrowers & Project Evaluation Criteria

### Module III: Banking Sector Reforms

Provisions of Banking Regulation Act, Prudential Norms - Narsimhan Committee Recommendations, Regulatory Institutions RBI & SEBI, Basle Committee Recommendations, Asset Liability Management in Commercial Banks.

### Module IV: Insurance Institutions

Introduction to Insurance – Elements of Insurance Risk, Principles of Insurance, Types of Insurance – Life Insurance and General Insurance Products including unit linked plans, Re-insurance, Bancassurance- concepts, critical issues & functional aspects. Role of Insurance companies in Industrial Financing.

### Module V: Financial Inclusion

Concept, Financial Inclusion in India: Challenges, Scope of Financial Inclusion in banking activities & financial services.

Micro Finance as a tool of Financial inclusion: Evolution: Grameen Model, Self Help groups.

Progress in India, Principles of microfinance- institutional structures and delivery mechanisms. Enforcement and savings

### Module VI: Trends in Banking

Banking Innovations, Marketing of banking services, Banking Technology - Internet banking, ATMs, mobile banking; Banking Technology - ECS, debit, credit and smart cards Securitization (SARFAECI Act, SPV, ARC)

## Examination Scheme:

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# ADVANCED CORPORATE FINANCE

**Course Code: MGC2607**

**Credit Units: 03**

## **Course Objective:**

The basic objective of this course is to acquaint the students with the latest developments in the field of corporate finance. This course will be a step above Financial Management II where they will learn advanced topics related to behavioural finance, corporate restructuring & corporate governance

## **Course Contents:**

### **Module I: Introduction**

Objectives of Corporate finance, Shareholder wealth maximization, Agency Problems, Management Compensation & measurement of Performance

### **Module II: Valuation Concepts**

Valuation Models, Application of Valuation Model, EVA/MVA, Balanced scorecard and other methods/measures of financial performance.

### **Module III: Corporate restructuring**

Differential Efficiency & Financial Synergy: Theory of Mergers, Operating Synergy & Pure Diversification: Theory of mergers, Costs and Benefits of Merger, Evaluation of Merger as a Capital Budgeting Decision, Poison Pills, Turnaround Strategies, Tax Planning relating to mergers and Amalgamation

### **Module IV: Corporate Governance & Business Ethics**

Implementation of Corporate Governance, Ethics and finance, Ethical practices in market place, Corporate Responsibility, Social Audit and Ethical Investing.

### **Module V: Behavioural Finance**

Introduction and Expected Utility, Non-Expected Utility Preferences, A review of classical probability theory, Beliefs, Biases and Heuristics, Preferences and Anomalies in the Financial markets

### **Module VI: Strategic Cost management**

Financial aspects of Supply Chain Management, Operations management perspective on Costs, Strategic cost analysis (using activity based costing, target costing and life cycle costing) and Product pricing at Different stages of product's life cycle.

## **Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# INDUSTRIAL RELATIONS AND LABOUR LAW

**Course Code: MGC2608**

**CreditUnits: 03**

## **Course Objective:**

The objective of the course is to acquaint students with the origin and importance of Labour laws governing general functioning of employees in an organisation and also to educate student with the important provisions under these laws. This will enable them to develop the right perspective of this delicate responsibility to deal with union constructively and to maintain industrial democracy.

## **Course Contents:**

### **Module I: Basic Concepts**

Industrial Relations, Industrial Peace, Industrial unrest and Industrial Discipline

### **Module II: Laws Relating to Industry**

The Factories Act, 1948, Definition, Approval licencing and registration of factories, Notice by occupier, Health, and welfare measures, weekly holidays, Leave with wages, Employment of women and young person, Penalties and returns, The Industrial Disputes Act, 1947 – Definition, Conciliation, Court of enquiry and Voluntary process for the settlement of industrial disputes, Power of the Govt. under ID Act, Instrument of economic coercion, Strike & lock out, Lay off Retrenchment, Transfer and closures, Discharge and Dismissal, Managements prerogative during pendency of proceeding, Work Committee, arbitration and adjudication.

### **Module III: Laws Relating to Remuneration**

The Payment of Wages Act, 1936 - Definition - Rules for payment of wages and deductions from wage, The Minimum Wages Act 1948 - Fixing of minimum wages, Procedure for raising minimum wage, Concept of living wages, Fair wage and minimum wage, The Employees State Insurance Act 1948 – Definition, Applicability of the Act, Insurable workmen, Contribution Benefit, Penalties, The Employees Provident Fund and Miscellaneous Provisions Act, 1952 and Employees family pension scheme – definition, Coverage of the organization and employees under the Act, Employees Provident Fund and pension fund scheme, Calculation of contribution withdrawal of Provident Fund amount, Penalties for offence, The Payment of Gratuity Act, 1972 – Definition, Scope and Coverage of the Act - Eligibility criteria - Calculation of Gratuity Nomination, The Payment of Bonus Act 1965 - Applicability of Act, Coverage of employee, Calculation of bonus Rate of Payable bonus, Available surplus, Allocable surplus.

### **Module IV: Laws Relating to Trade Union**

The Trade Union Act 1926, Statutory Definition - Registration of TU, Immoduley granted to Registered Trade Union, Recognition of TU.

### **Module V: Compensation and Insurance**

The workmen's compensation Act 1923 – Definition, Rules regarding workmen's compensation, Defense available to employer and employees, The Maternity Benefit Act 1961.

### **Module VI: Miscellaneous Acts**

The Industrial Employment (standing order) Act 1946 - Scope and coverage of the Act - Concept of standing order, its Certification process - Modification - Interpretation and Enforcement of standing orders.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# PERFORMANCE MANAGEMENT SYSTEM

**Course Code: MGC2609**

**Credit Units: 03**

## **Course Objective:**

This course will help students understand the significance of appraisal for an organization and individuals. It will develop an understanding of various Performance Appraisal tools and their applications and potential appraisal. Further it will develop a right perspective in them towards managing and improving performance.

## **Course Contents:**

### **Module I: Overview of Performance Management**

Employee Motivation & Needs (Vroom's & Adam's Theory of Motivation), Performance Appraisal: The past & the future, Human Resource Development & Performance Appraisal, Planning Performance & Role Clarity, Accountability and Effectiveness.

### **Module II: Process of Performance Appraisal**

Measuring Performance Appraisal – Objectives & Indicators, Methods of Appraisal – Contemporary & Modern methods, Performance feedback & counseling, PMS.

### **Module III: 360 Degree Feedback**

Definition, methodology, advantages/disadvantages of Feedback, RSDQ Model, and Criteria for success, Experiences in 360 appraisals.

### **Module IV: Potential Appraisal**

Concept, Difference between performance appraisal and potential appraisal, Competency mapping & Potential appraisal –case studies

### **Module V: Performance Management in Application**

Performance Management and development, Performance Management and Pay, Creating High Performance organization.

### **Module VI: Emerging Concerns & Performance Management**

Appraisal for future – Going beyond tangible performance, HR Scorecard.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# COMPENSATION AND REWARD MANAGEMENT

**Course Code: MGC2610**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to familiarize students with the dynamics of wage and salary administration and current trends in India.

## **Course Contents:**

### **Module I: Introduction**

Overview of Compensation Management, Wage and Salary Administration – Nature, Importance, Philosophy, Objectives, Definition, Goals Role of various parties – Employees, Employers, Unions & Government and Legislations for compensation.

### **Module II: Developing Compensation Programs**

Job Evaluation, Basic systems Time wage, Piece wage, Incentives, Wage payments and Total Salary Structure, Compensation Surveys, Hay Plan, Developing Competitive Compensation Programs, Developing Salary Structures

### **Module III: Derivatives of Compensation**

Pay for Performance, Merit pay and Performance Appraisal, Performance based rewards, Performance Criteria Choices, and Competency Mapping & Developing Performance Matrix, Performance based Compensation Schemes.

### **Module IV: Incentive Plans**

Incentive Plans: individual and group incentive plans, Productivity Gain sharing plans, Profit Sharing Plans, Non - Financial and Financial incentives, Measuring Cost- to – Company (CTC).

### **Module V: Employee Benefits**

Employee Benefits: Supplemented Pay benefits (pay for time not worked) insurance benefits, Retirement benefits, Employees' service benefits, Introduction to ESOPs, Flexible benefits and Benefit Surveys.

### **Module VI: Current Trends**

Current Trends in Compensation and Reward Management

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# OBJECT ORIENTED PROGRAMMING WITH JAVA

Course Code: MGC2611

Credit Units: 03

## Course Objective:

The objective of the course is to give knowledge of the Object Oriented approach to development of software using Java Language. It is expected that a student at the end of the course would attain a good conceptual understanding and logical approach of software development.

## Course Contents:

### Module I: Basics of OOPS

Object, Class, Abstraction & Encapsulation, Inheritance, Polymorphism Genesis and overview of Java. The creation of Java, Java's importance to the Internet, Lexical issues (White space, Identifiers, Literals, Comments, Separators, Keywords), The Java Class Libraries.

### Module II: Data types, Variables and Arrays

Integer Data Type, Floating Data Type, Characters, Booleans, Literals, Variables, Type Conversion & Casting, Arrays & Strings Operators Arithmetic Operators, Bitwise Operators, Relational Operators, Boolean Logical Operators, the Assignment Operator, Operator.

### Module III: The Control Statements

Selection Statements, Iteration Statements, Jump Statements. Classes, Class Fundamentals, Declaration of Object, Methods, Constructors, A Stack Class, Overloading Methods and Constructors, Argument Passing, Objects as Parameters, Returning Objects, Introducing Final & Understanding Static.

### Module IV: Inheritance

Inheritance Basics, Using Super, Multilevel Hierarchy, Method Overriding, Dynamic Method Dispatch, using Abstract Classes, Exception handling Fundamentals of Exception Handling, Exception Types, using Try and Catch, Throw and Throws, nested Try statements.

### Module V: I/O Applets

I/O basics, Reading console inputs and outputs, The Print Writer Class, Applet fundamentals, the Transient and Volatile modifiers, native methods and their problems, The Java Libraries String Handling, Exploring Java.lang, the collections framework with java.util, managing Input/ Output by exploring java.io.

### Module VI: The Applet Class

Applet architecture, an applet skeleton, Applet display methods, passing parameters to Applets, Applet context and show Document, Networking, Java and the net, InetAddress, TCP/IP Client and Server Socket, URL Connections.

## Examination Scheme:

Components	CT	HA	Q	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# DATA COMMUNICATION AND NETWORK

**Course Code: MGC2612**

**CreditUnits: 03**

## **Course Objective:**

The objective of the course is to give knowledge of the Object Oriented approach to development of software using C++ Language. It is expected that a student at the end of the course would attain a good conceptual understanding and logical approach of software development.

## **Course Contents:**

### **Module I: Introduction**

Introduction to Computer Networking, Computing Models and Network development, Required Network Elements, Networking Services, Common Networking Services File Service, Print Services, Message services, Application Services, Database services Centralized versus Distributed Network Services.

### **Module II: Transmission Media**

Transmission Media, Introduction to Transmission Media, Common Computer Network Transmission Media, Public and Private Network, Transmission Media Connections Introducing Transmission Media Connections, Networking Connectivity Hardware.

### **Module III: Networking Protocol and Models**

Networking Protocol and Models, Need of Rules, Moving from Rules to Models, OSI Model, Leading Protocol Stack for Computer Networking, Internet protocol, Transmission Control Protocol.

### **Module IV: LAN Terminology & Components**

LAN terminology & Components, LAN architecture, Protocols and Addressing, Ethernet LANs, Token Ring & FDDI, LAN Networking Devices, Common approaches to LAN Management, Concept of N/w Design, Introduction to WAN: Private & Public, VPN: How it works, VPN security, Technologies.

### **Module V: Overview of ATM Technology**

Overview of ATM Technology, VoIP, Frame Relay, Gigabit Ethernet, Wireless Communications Convergence of Telecom, IT & Management, Telecommunication as a strategic weapon-some, Satellite communication, V-SAT.

## **Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

# WEB DATABASE PROGRAMMING WITH ASP

**Course Code: MGC2613**

**CreditUnits: 03**

## **Course Objective:**

The objective of the course is to capacitate students to build and deploy dynamic web applications that interact with a powerful database. The modules provide background on subjects such as HTML, client side scripting and relational databases. At the end of the course, the students will be able to set up their own personal dynamic web site using a Microsoft web server to illustrate web site creation and administration principles. The curriculum will make the students learn real world context.

## **Course Contents:**

### **Module I: ASP Fundamentals**

Software requirements, Installing personal web server, Installing IIS, IIS service features, Hardware requirement, ASP connection with IIS, Built in objects. Understanding request and response objects, The ASP request object, Requesting information from forms, QueryString collection & Server variables, cookies, ASP response object, response object methods and properties.

### **Module II: Understanding VB Script Language**

Scripting, VB Scripting, Understanding variables, Integrating Script with HTML, Client side and server side scripting, Converting variable types, Operators, Message Box, Accessing objects, Using built in functions and statements, Program control statements.

Error Handling: Error Handling, ASP.

### **Module III:**

#### **Understanding Procedures and Classes**

Understanding procedures, Sub-procedures, Functions, Classes, Methods, Events.

#### **Session and Application Objects**

The Session Object and collection of Session Object, Methods, properties and events, The Application object collections and methods, Using session and application objects.

### **Module IV: The ADO connect Object**

Data Access components, Universal data access architecture, ADO, DAO, RDO architectures, OLE DB and ODBC, The ADO connection object, Creating and opening connection object, Creating DSN, connection with ODBC, connecting with OLE DB, using ADO connection and SQL statements.

### **Module V: ADO Record set Object**

Creating and opening a record set object, Moving through a record set, The fields collection, using ADO record set, Bookmarks, Filtering Record sets, Searching for records, Modifying Records, The Get String method.

The ADO command object: Creating a command object, using a stored procedure, using stored procedure with parameters, return values, Output parameters and the command object.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>Q</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# INTELLECTUAL PROPERTY RIGHTS

**Course Code: MGC2614**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to acquaint the students with basics of intellectual property rights with special reference to Indian law and practice.

## **Course Contents:**

### **Module I: Introduction**

Types of Intellectual Property Rights, Inventions vs. Discoveries, Conventions .

### **Module II: Copyright**

Nature and Meaning, Scope of protection, Procedure for protection, Enforcement and Remedies.

### **Module III: Patents**

Nature and Meaning, Scope of protection, Procedure for protection, Enforcement and Remedies .

### **Module IV: Trademarks**

Nature and Meaning, Scope of protection, Procedure for protection, Enforcement and Remedies .

### **Module V: Designs**

Nature and Meaning, Scope of protection, Procedure for protection, Enforcement and Remedies.

### **Module VI: Current Scenario:**

Role of WTO and essential elements under TRIPS.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>C</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# HUMAN RIGHTS

**Course Code: MGC2615**

**Credit Units: 03**

## **Course objective:**

The objective of this course is to lay the foundation of the Human Rights Law and acquaint the students with basic human rights institutions.

## **Course Contents:**

### **Module I: Introduction**

Concept & Development of Human Rights.

### **Module II: UN Charter and Human Rights**

Contribution of United Nations in the Development & Implementation of Human Rights, Universal Declaration of Human Rights, International Covenants

### **Module III: Human Rights and the Indian Constitution**

Fundamental Rights & Directive principles of State Policy.

### **Module IV: Protection of Human Rights Act 1993**

Meaning & scope, Nature of Human Rights violations Role of National Human Rights Commission.

### **Module V: Group Rights**

Rights of Marginalised Groups

Women

Children

Refugees

Refugees

Prisoners

Disabled

### **Module VI: Protection of Human Rights**

Role of National Human Rights Commission, role of NGO's, the role of Judiciary, Recent developments in Human Rights.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# MANAGERIAL ECONOMICS

**Course Code: MBF2104**

**CreditUnits: 03**

## **Course Objective:**

The purpose of this course is to apply managerial economics concepts and techniques in evaluating business decision taken by firms. The emphasis is on explaining how the tools of standard price theory can be employed to formulate a decision problem, evaluate alternative courses of action and finally choose among alternatives.

## **Course Contents:**

### **Module I: Introduction to Managerial Economics**

Nature, Scope, Definitions of Managerial Economics, Application of Managerial Economics to Business, Micro Vs. Macro Economics, Opportunity Costs, Time Value of Money, Marginalism, Incrementalism, Market Forces and Equilibrium.

### **Module II: Consumer Behaviour and Demand Analysis**

Cardinal Utility Approach: Diminishing Marginal Utility, Law of Equi-Marginal Utility, Ordinal Utility Approach: Indifference Curves, Marginal Rate of Substitution, Budget Line and Consumer Equilibrium, Theory of Demand, Law of Demand, Movement along vs. Shift in Demand Curve, Concept of Measurement of Elasticity of Demand, Factors Affecting Elasticity of Demand, Income Elasticity of Demand, Cross Elasticity of Demand. Production with one variable input, Production and optimal input proportions, two variable inputs, Law of variable proportions and law of return to scale, Cost Concepts, Theory of costs in short run and long run.

### **Module III: Theory of Production, Cost and Firm's Behaviour**

Meaning and concept of Production, Factors of Production and Production Function, Fixed and Variable Factors, Law of Variable Proportion (Short Run Production Analysis), Law of Returns to a Scale (Long Analysis), Concept of Cost, Cost Function, Short Run Cost, Long Run Cost, Economics and Diseconomies of Scale, Explicit cost and Implicit Cost, Private and Social Cost

### **Module IV: Macro Economics and Business Decisions**

Phases of Business cycle - Evil effects of cyclical fluctuations on business firms - Minimizing effects of Business cycles, Economic and Business forecasting - uses of economic forecasts - Methods of economic forecasting - selecting a forecast - evaluating forecasts.

### **Module V: Price and Output Decisions under Different Market Structures**

Price and Output Decisions under Perfect Competition, Monopoly and Monopolistic Competition - Pricing under Oligopoly - Kinked Demand Curve - Price Leadership - Pricing under Collusion.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# HUMAN RESOURCE MANAGEMENT

**Course Code: MBF2202**

**CreditUnits: 03**

## **Course Objective:**

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

## **Course Contents:**

### **Module I: Fundamentals of HRM**

Introduction, Concept and Functions, Scope and Significance of Human Resource Management, Personnel Management and HRM, Overview of basic HRM Model, Role and responsibilities of the Human Resource Manager and Essentials of Sound HR Policies.

### **Module II: Acquisition of Human Resources**

Objectives, Policies and Process of Human Resource Planning, Job Analysis, Recruitment (process, methods: internal, external), Selection (process, tests, interviews), Placement, Induction.

### **Module III: Development of Human Resources**

Training and Development(process, methods: On-the job, Off-the job), Evaluation of training (Kirkpatrick model) and Performance Appraisal (concept, significance, process, methods-Graphic rating scales, Essays, Confidential report, BARS, 360 Degree, etc, errors during appraisal, reducing errors).

### **Module IV: Maintenance of Human Resources**

Job Evaluation: concept, process, compensation: concept, components, Designing and Administering the Wage and Salary Structure, Grievance Procedure and Handling.

### **Module V: Retention and Separation Processes**

Procedure of separation: Discharge, Retirement, Layoff, Retrenchment, VRS, Promotion and Transfer, Exit interview, Attrition and Retention (concept, significance, determinants and strategies).

### **Module VI: Current Issues in HRM**

Increased concern for HRM (Sound IR, dual career couples, flexi-working hours, work-from home facility), International Human Resource Management-Managing inter country differences, SHRM, Talent management, Employee engagement, Competency mapping, HR accounting-cases of Indian organizations, HRIS, HR audit.

## **Examination Scheme:**

# BUSINESS STATISTICS

**Course Code: MBF2203**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to familiarize the students with various statistical tools which can help them in analysis and interpretation of business data. This course will provide students with hands-on experience to promote the use of statistical thinking and techniques to apply them to make educated decisions whenever there is variation in business data. Therefore, it is a course in statistical thinking via a data-oriented approach.

## **Course Contents:**

### **Module I: Introduction to Statistics**

Definitions, Functions of Statistics, Statistics and Computers, Limitation of Statistics, Application of Statistics.

### **Module II: Data Collection and Analysis**

Methods of Data Collection, Primary and Secondary Data, Graphic Representation of Data, Measures of Dispersion-Range, Quartile Deviation, Mean Deviation, Standard Deviation, Coefficient of Variation.(Absolute & Relative Measure of Dispersion), Skewness-Karl-Pearson's Coefficient of Skewness, Bowley's Coefficient of Skewness, Kurtosis.

### **Module III: Correlation Analysis and Regression Analysis**

Introduction-Importance of Correlation, Types of Correlation, Scatter Diagram Method, Karl Pearson's coefficient of Correlation (Grouped and Ungrouped). Spearman's Coefficient of Rank Correlation, Rank Correlation for Tied Ranks, Regression Analysis- Concepts of Regression, Difference b/w Correlation and Regression, Regression Lines.

### **Module IV: Time Series Analysis**

Meaning and Significance, Components of Time Series, Trend Measurement, Moving Average Method, Least Square Method (Fitting of Straight Line Only).

### **Module V: Probability**

Introduction, Terminology used in Probability, Definitions of Probability, Mathematical, Statistical and Axiomatic Approach to Probability, Probability Rules-Addition Rule, Multiplication Rule of Probability, Conditional Probability- Bayes Theorem, Problems on Bayes Theorem.

### **Module VI: Probability Distribution**

Discrete Probability Distributions-Binomial Probability Distribution, Poisson Probability Distribution, Properties, Applications, Continuous Probability Distributions-Normal Probability distribution, Properties of the Normal Curve, Applications, Relation b/w distributions.

## **Examination Scheme:**

Components	CT	HA	Q	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# CORPORATE ACCOUNTING

**Course Code: MBF2204**

**Credit Units: 03**

## **Course Objective:**

This course enables the students to develop awareness about Corporate Accounting in conformity with the Provision of Companies' Act and latest amendments thereto with adoption of Accounting Standards that are likely to be introduced from time to time.

## **Course Contents:**

### **Module I**

Statutory records to be maintained by a company, Accounting standards - relevance and significance; National and international accounting standards.

### **Module II**

Accounting for share capital transactions - issue of shares at par, at premium and at discount; forfeiture and re-issue of shares; buy-back of shares; redemption of preference shares - Statutory requirements, Disclosure in balance sheet; Rights issue, Underwriting.

### **Module III**

Issue of debentures - accounting treatment and procedures; Redemption of debentures; Conversion of debentures into shares.

### **Module IV**

Preparation and presentation of final accounts of joint stock companies as per company law requirements; Provisions and reserves; Determination of managerial remuneration; Appropriation out of profits; Transfer of profits to reserves; Payment of dividend, Transfer of unpaid dividend to Investor Education and Protection Fund; Bonus shares and payment of interest out of capital.

### **Module V**

Holding and subsidiary companies - Accounting treatment and disclosures; Consolidation of accounts.

### **Module VI**

Valuation of goodwill and shares

Good will – Meaning, Definition, Elements, Types and Methods of Valuation of Goodwill, Methods of share valuation (Equity & preference shares).

### **Module VII**

Accounting treatment for amalgamation, Absorption and reconstruction of companies; Internal and external reconstruction, Liquidation- Preparation of liquidators statement & affairs, Deficiency/surplus statement, Calculation of pro rata treatment of uncalled capital.

## **Examination Scheme:**

Components	HA	CT	C	A	EE
Weightage (%)	5	10	10	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# FINANCIAL SERVICES

**Course Code: MBF2205**

**CreditUnits: 03**

## **Course Objective:**

The aim of the course is to orient the student to the recent changes in the financial institutions and financial services industry and their link to economic development. The financial institutions and services are changing rapidly. A course that merely describes the existing institutions and services will not prepare you for the change. Thus you must familiarize yourself with the services available in the industry today and understand why they are the way they are and why they are changing. An Indian perspective will be given.

## **Course Contents:**

### **Module I: Financial Services**

Role of Financial Services in economic development, Evolution of Financial Services Sector in India, Marketing of Financial Services (Introduction)

### **Module II: Venture Capital**

Venture Capital Financing, International Experiences in Venture Capital Financing, Venture Capital Financing in India, Pitfalls to be avoided, Preparation & evaluation of Business Plan

### **Module III: Factoring & Forfaiting**

Factoring Services - Features Merits and Demerits, Cost Benefit Analysis, Forfaiting: Features, merits & Limitations

### **Module IV: Leasing and Hire Purchase**

Development of Leasing and Hire Purchase, Types of Leasing, Pricing Methodology and Financial analysis, Taxation, Legal Framework for Leasing and Hire Purchase Companies

### **Module V: Mutual Funds**

The concept & Role of M/Fs, History of M/Fs in India, Types of M/Fs, Fund Structure & constituent, Selecting the right Investment Products for Investors, Comparison of Investment products, Measuring of Risk In M/Fs, Recommending model Portfolios & selecting the right funds.

### **Module VI: Credit Rating & other Financial Services**

Credit rating concept of Credit rating, Types of credit rating, Advantages and Disadvantages of credit rating, Credit rating agencies and their methodology and process, Individual Credit rating, Sovereign Credit Rating Practices. Custodial Services, Credit Cards

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

## ORGANISATIONAL BEHAVIOUR

**Course Code: MBF2301**

**Credit Units: 03**

**Course Objective:**

The objective of this course is to familiarize the students with the behavioural patterns of Human beings at individual and group levels.

**Course Contents:**

**Module I: Understanding Human Behaviour**

Concept, Nature and Significance of Human Behaviour, Factors Affecting Human Behaviour, Levels of Human Behaviour; Disciplines contributing to OB.

**Module II: Individual Behaviour**

Individual Differences; Personality and Theories of Personality; Perception; Learning and Behaviour reinforcement, Values.

**Module III: Motivation & Attitude**

Concept, Significance and Theories of Motivation, Motivation and Behaviour, Motivation at Work, Attitudes, Meaning and nature, Formation and change in attitudes, Job related attitudes.

**Module IV: Interpersonal Behaviour, Power & Politics**

Interpersonal Dimensions of Behaviour; Transactional Analysis Implications of TA, Organizational communication, making communication effective, Power: Concept, determinants, types; Organizational Politics: Tactics, Impression Management.

**Module V: Group Behaviour and Leadership**

Group Behaviour; Types, Functions, Determinants of Group Behaviour, Inter Group Problems, Leadership: Nature and Significance of Leadership, Leadership Styles, Theories of Leadership; Trait Theory, Behavioural Theory, Managerial Grid.

**Module VI: Change and Conflicts**

Organizational conflict, Nature and types of conflict, Management of organizational conflict, Approaches to conflict management, Organizational culture, Learning and maintaining organizational culture, Organizational change, Planned change, Resistance to change, Organization development, Definition, Need for organization development, Organization development process.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# FINANCIAL MANAGEMENT

**Course Code: MBF2302**

**CreditUnits: 03**

## **Course Objective:**

To take decisions which are effective, a manager in any of the functional areas be it Marketing, HR or IT requires a thorough cost and benefit analysis and a feel for Finance so as to look at the long term implications of his/her decision. This course is a "nut and bolts" course on Finance where the basic Financial decisions will be explained through problems and exercises, thus giving the student an understanding and a feel for Financial decision making.

## **Course Contents:**

### **Module I: Introduction to Financial Management**

Evolution of Financial Management, Key activities of Finance Manager Changing Role of Finance Managers, Key Decision Areas in Financial Management, Objectives of the firm.

### **Module II: Financial Statement Analysis**

Introduction, objectives of financial statement analysis, Techniques-Ratio analysis, Comparative analysis and limitations of financial statement analysis, AS-20 (**no numerical**)

### **Module III: Valuation Concepts**

Concept of Time value of Money, Process of Compounding and Discounting, Future Value of a Single amount, Future Value of an Annuity, Present Value of a Single Amount, Present Value of an Annuity, Cost of capital, Weighted average cost of capital, Leverage Analysis

### **Module IV: Financing Decision**

Capital structure, Factors affecting Capital Structure decisions, Theory of Capital Structure Decisions, MM Theory, NI, NOI and Traditional theory, Pecking order theory.

### **Module V: Investment Decision**

Basics of Capital Budgeting, Types of capital budgeting decisions, Estimating cash flows for project appraisal, Green capital budgeting, Non-discounted Cash Flow Techniques: Payback Period, ARR, Discounted Cash Flow Techniques: NPV, IRR, PI. Risk Analysis of Capital Budgeting: Risk adjusted discount rate, Certainty Equivalent Approach.

### **Module VI: Working Capital Management**

Meaning and importance of adequate working capital, Excess or Inadequate working capital, Determinants of working capital requirement, Cash management, Receivable management and Inventory management – Sources of working capital.

### **Module VII: Dividend Decisions**

Importance of dividend decisions, Theories of Dividend decisions: Irrelevance theory, Optimal dividend decision, Relevance theory, Determinants of dividend policy: Bonus Shares, Stock Splits & Buyback of shares. Tax considerations.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

# COMPUTERS & MANAGEMENT INFORMATION SYSTEMS

**Course Code: MBF2303**

**CreditUnits: 03**

## **Course Objective:**

This course focuses on the relationships among management, information, and systems as well as the relationship between a manager's need for information and his/her position in the organization, how hardware, software, data, people, and procedures are combined to form an information system, how information technology can be used by a business organization to gain a competitive advantage why a knowledge of information systems is crucial to anyone who plans a career in business Organization.

## **Course Contents:**

### **Module I: Organizations, Management and Information**

Meaning of MIS, Components of MIS, IS in Business, Data Information and knowledge, Characteristics of Information in context, Issues with Information, System and Subsystems, Organization as a System, Different Organizational Structures: Hierarchical Structure – (Different Levels of Management, Information disposition at different levels), Matrix Structure, Business Process (Management, Operational and Support).

### **Module II: Information Technology Architecture**

Managing Hardware Assets – Considerations in Procurement and installation, Managing Software Assets – Consideration in procurement and configuration, Data Resource Management (Database Management System – Types and Structure of Database, Data Warehousing – Phases in building Data Warehouses in an organization, Data Mining – Data Mining Applications, Data Banking)

### **Module III: Management and Organizational Support Systems for the Firm**

Information, Decision and Management, Decision Support System (Phases in Decision Making, Problems and Decision Types, DSS components, and Analytical Models in Decision Making), Executive Information System – Characteristics and benefits, Managing Knowledge (Knowledge Engineering, Knowledge Management Activities and Knowledge Representation Methodologies), Artificial Intelligence (Domains of AI, AI in Business), Expert System (Components, Benefits and Limitations, Suitability Criteria for ES)

### **Module IV: Building Information Systems in the Digital Firm**

Organizational Planning – Planning at distinct Managerial Levels, Approaches in Planning (Top Down, Bottom Up, Planning through CSF), IT and IS Planning – Prerequisites and factors, IT and IS Architecture (Centralized, Decentralized and Distributed), Implementing IT and IS (Factors and Resistance in implementation), Change Management with BPR, System Development (System Development Life Cycle-Overview, Prototyping), Evaluating Factors for IT and IS services.

### **Module V: Managing Information Systems in the Digital Firm**

Managing Security (Security Challenges of IT, Business and Technological Ethics), Computer Crime (Tools for Computer Crime, Tools for Security Management), IS Security Management Control (Information System Control, Auditing the Security), Managing World Wide Information System (Managing Multi Site IT and IS – Cultural and Technical Differences), World Wide IT and IS Strategies (Multinational, International and Global Strategies)

### **Module VI: Key System Applications for the Digital Age**

Enterprise Systems – Supply Chain Management & Customer Relationship Management Systems, Using Enterprise Applications and Achieving Operational Excellence & Customer Intimacy, E-Commerce: Digital Market & Digital Goods, M-Commerce: Services & Applications, Enterprise Applications: New Opportunities and Challenges.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# COST ACCOUNTING

**Course Code: MBF2304**

**CreditUnits: 03**

## **Course Objective:**

To get an expert knowledge in the area of cost management and cost control to enable effective management decisions.

## **Course Contents:**

### **Module I: Cost Accounting**

Introduction – Meaning of Cost, costing and Cost Accounting, Comparison between Financial Accounts and Cost Accounts, Application of Cost Accounting, Designing and installing a Cost Accounting system, Cost concepts and Classification of Costs, Cost Module, Cost Center, Elements of Cost, Preparation of cost sheet, Tenders and Quotations, Problems.

### **Module II: Material Costing**

Classification of materials, Material Control, Purchasing procedure, store keeping, techniques of Inventory control, Setting of stock levels, EOQ, Methods of pricing materials issues, LIFO, FIFO, Weighted Average Method, Simple Average Method, Problems.

### **Module III: Labour Costing**

Control of labour cost, Labour Turn Turnover, Causes and effects of labour turnover, Meaning of Time and Motion Study, Merit Rating, Job Analysis, Time keeping and Time booking, Idle time, causes and treatment, Overtime, Methods of Wage Payment, Time rate and Piece Rate, Incentive Schemes.

### **Module IV: Overhead Costing**

Definition, Classification of overheads, Procedure for accounting and control of overheads, Allocation of overheads, Apportionment of overheads, Apportionment of Service department costs to production departments, Repeated Distribution method, Simultaneous equation method, absorption of OH's, Methods of Absorption, Percentage of direct material cost, Direct Labour Cost, Prime Cost, Direct Labour hour rate and Machine Hour Rate, Problems.

### **Module V**

Costing Methods Introduction, Job Costing, Batch Costing, Contract Costing, Process Costing, principles, distinction between Process and Job, Preparation of process accounts, treatment of normal loss, abnormal loss, abnormal gain, Joint and By-products, Service costing.

### **Module VI**

Reconciliation of Cost and Financial Accounts, Need for reconciliation, Reasons for difference in profits, Problems on preparation of Reconciliation statements including Memorandum Reconciliation account.

## **Examination Scheme:**

Components	A	CT	C	H	EE
Weightage (%)	5	15	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# MONEY AND BANKING

**Course Code: MBF2305**

**CreditUnits: 02**

## **Course Objective:**

The course aims to provide the student with an introduction to the role of money, banking and money market in the economy, thus providing a solid foundation for further study or employment in the banking and financial services industry. This course addresses classical and contemporary issues in the theory of money and banking.

## **Course Contents:**

### **Module I: Money**

Evolution and functions of money – Significance of money, Quantity theory of money (Fishers and Cambridge), Demand for and supply of money.

### **Module II: Commercial Banking**

Commercial Banking- Functions and kinds, Balance sheet of a commercial bank, Investment policy, commercial bank in economic development, Branch Banking and Unit Banking, Deposit Banking Vs Mixed Banking, credit creation of Commercial Banks.

### **Module III: Central Banking**

Functions of a central bank, credit control, quantitative controls, selective controls, RBI and economic development.

### **Module IV: Money Market**

Structure, organized and unorganized money market, Development of money market, Indian Money Market, London and New York Money Markets, Capital Market in India

### **Module V: Inflation and Deflation**

Inflation: Meaning and definition, Kinds of inflation, causes and consequences of inflation, Deflation, Inflation in a developing economy.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# CORPORATE TAX PLANNING

Course Code: MBF2306

CreditUnits: 03

## Course Objective:

To provide understanding of Direct Tax including Rules pertaining there to and application to different business situations. To understand principles underlying the Service Tax and concepts of VAT.

## Course Contents:

### Module I: Introduction to Tax Management

Concept of tax planning, Tax avoidance and tax evasions, Corporate taxation.

### Module II Income from Business

Residential Status of companies, Taxable income under Business and Profession, Computation of Profit and Gains from business profession, Deemed business profits, Assessment of Retail Business, Deemed incomes (cash credit, unexplained investments, unexplained money and other assets, unexplained expenditures, investments and valuable articles not fully disclosed in books of accounts).

### Module III: Deductions Allowed Under Business and Profession

Deduction Expressly allowed section 30-35, Depreciation deduction calculation, Setoff and carry forward of unabsorbed depreciation section 32(2). Determining Actual Cost 43(1), Set-off and Carry Forward Losses, Bonus or commission to employees section, Interest on borrowed capital, Insurance premium 36(1(i)), Employees contribution to provident fund, Bad debts 36, Revenue expenditure incurred by statutory corporation, Banking transaction tax, Security transaction tax, Commodity transaction tax, provision for admissibility of general deduction 37(1),

### Module IV: International Accounting and Taxation

Analysis of foreign financial statement, Accounting standard: US GAAP, Indian GAAP, IAS, IFRS. Transfer Pricing – Meaning, measurement, strategic considerations Norms & Practices, tax havens, Double taxation agreement among countries, Tax implication of activities of foreign enterprise in India: Mode of entry and taxation respectively.

### Module V: Indirect Tax - Concepts and General Principles

Service tax - Charge of service tax and taxable services, Valuation of taxable services, Payment of service tax and filing of returns.

VAT – Introduction, Calculation of VAT Liability including input Tax Credits, Small Dealers and Composition Scheme, VAT Procedures, Central Sales Tax.

### Module VI: Tax Planning and Financial Management Decisions

Tax planning relating to capital structure decision, Dividend policy, Inter – corporate, dividends and bonus shares, Tax provisions relating to free trade zones, Infrastructure sector and backward areas, Tax incentives for exports. Tax deductions and collection at source, Advance payment of tax.

## Examination Scheme:

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# Syllabus – Fourth Semester

## MANAGEMENT ACCOUNTING

**Course Code: MBF2401**

**Credit Units: 03**

**Course Objective:**

To provide the students knowledge about the use of costing data for planning, control and decision making.

**Course Contents:**

**Module I: Management Accounting**

Meaning and Definition, Nature & Scope: Objectives of Management Accounting, Management Accounting and Financial Accounting, Management Accounting and Cost Accounting, Utility of Management Accounting, Limitations of Management Accounting, Position of Management Accountant in the Organization.

**Module II: Cash Flow Analysis**

Distinction of Cash from Funds, Utility of Cash Flow Statement, Construction of Cash Flow Statement

**Module III: Budgets and Budgetary Control**

Concept of Budgets and Budgetary Control, Nature and Objectives of Budgetary Control, Advantages and Limitations of Budgetary Control, Establishing a system of Budgetary Control, Preparation of Sales Budget, Selling and Distribution Cost Budget, Production Budget, Purchase Budget, Cash Budget, Flexible Budgets and Master Budgets.

**Module IV: Responsibility Accounting**

Concept of Responsibility Accounting, Cost Centers and Profit Centers, Contribution by Segments

**Module V: Marginal Costing**

Meaning, assumptions, cost- volume profit analysis, Break- Even analysis, Decision making areas- product mix, make/ buy, pricing decision.

**Examination Scheme:**

Components	A	CT	C	H	EE
Weightage (%)	5	10	10	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# PRODUCTION AND OPERATIONS MANAGEMENT

**Course Code: MBF2402**

**CreditUnits: 03**

## **Course Objective:**

The course is oriented to familiarize the students with fundamentals of Production and Operations Management, and tools and techniques used in taking decisions in operating and controlling the Production and Service Industries. Further this course will familiarize the students with Quality Management and Current Quality Tools used in Production and Service Industries.

## **Course Contents:**

### **Module I: Overview of Production and Operation Management**

Brief history of Production and Operation Management, Service Revolution, Definition, Factors Affecting Operations Management, Role- Scope and Function of Production and Operation Management, Criteria of Performance for the Production and Operation Management, Operation Strategies, Effect of Growth of Service Sector on Operations Management

### **Module II: Demand Forecasting & Capacity Planning**

Qualitative Forecasting Methods (Educated Guess, Consensus, Delphi Method, Historical Analogy, Market Research), Quantitative Forecasting (Linear Regression, Moving Average, Weighted Moving Average, Exponential Smoothing with Numerical), Definition of Production Capacity

### **Module III: Facility Location and Facility Layout**

Factors Affecting Location Decisions, Quantitative Techniques in Facility Location (Factor Rating Method, Centre of Gravity Method, Load Distance Method, Break Even Analysis Method – Numerical for each method), Utilization of GIS in Plant Location.

Principles of Facility Layout, Types of Layout (Process Layout, Product or Line Layout, Fixed Position Layout), Basics of Line Balancing –(No Numerical), Merits and Demerits of Product and Process Layout

### **Module IV: Production Planning and Control**

Capacity Planning, Aggregate Planning, Master Production Scheduling.

Production Planning and Control Systems (Push System, Pull System)

Job Shop Scheduling and its Criteria (Mean Flow Time, Mean Tardiness, Number of Tardy Jobs - Numerical), Single Processor Job Shop Scheduling (Due Date Method, Shortest Processing Time Method - Numerical).

Two Machines Scheduling – Johnson's Rule – (Numerical).

General Job Shop Scheduling – Earliest Due Date Method – (Numerical)

### **Module V: Inventory Management, Supply Chain Management & Logistics Management**

Basic Concepts of Inventory Management, Lead time, Safety Stock, Elements of Inventory Costs, Inventory Models – EOQ –(Derivation and Numerical), EOQ with Quantity Discount – (Numerical), Fixed Order Quantity Model - No Numerical, Fixed Order Period Model - (No Numerical).

Basic Concepts, Objectives of Supply Chain Management, Decision Phases in Supply Chain Management. Basic Concepts of Logistics Management, Warehousing, Material Handling Equipments

### **Module VI: Foundations of Quality, Quality Control, TQM**

Concept of Quality - Gurus of quality a Comparative Discussion on Edward Deeming, David Juran and Philip Crosby - their Philosophy contribution and limitations.

Statistical Quality Control (Mean and Range Charts, c Chart, p Chart – (Numerical), Basic Concepts of Acceptance Sampling, OC Curves – (No Numerical).

Basic Concepts of TQM, 5 –S and Kaizen, 6-Sigma.

ISO Standards, and ISO Certification.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# RESEARCH METHODOLOGY AND REPORT PREPARATION

Course Code: MBF2403

Credit Units: 03

## Course Objective:

To provide an exposure to the students pertaining to the nature and extent of research orientation, which they are expected to possess when they enter the industry as practitioners. To give them an understanding of the basic techniques and tools of marketing research. To train the students in evaluating and developing the marketing information system.

## Course Contents:

### Module I: Introduction

Nature and scope of marketing research, Marketing research as input in decision making process, Marketing research and marketing information system. Applications of marketing research, Planning a research project, Problem identification and formulation of Research Design, introduction to Research Design, Market research on the Internet.

### Module II: Data collection methods

Attitudes measurement and scaling techniques, Ratio, Interval, Ordinal and Nominal scales, Likert's scale, Thurstone scale, Semantic differentiation method, Observation methods and questionnaire method, Questionnaire design, Steps in constructing a questionnaire, Types of questions, introduction to Projective techniques and perceptual mapping.

### Module III: Sampling

Sampling decisions, Sampling frame, Sample selection methods - Probability and non probability, Sample size, sampling error, Application of sampling methods to marketing problems.

### Module IV: Data Collection Field Force

Data collection field force, Fieldwork procedure, common sources of error in the fieldwork, minimizing fieldwork errors, Tabulation of collected data.

### Module V: Data Analysis

Data analysis-I, Test of significance Z, t, F and chi-square, Data analysis-II, Correlation and Regression techniques, Data analysis – III – Cluster Analysis, Introduction to Statistical Package

### Module VI: Report Writing

Research presentation and research process examination; Report writing - Types of research report. Examination of the research procedure, Selected applications of marketing research, identifying market segments, Product research, Advertising research.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# BANKING LAW AND PRACTICES

**Course Code: MBF2404**

**CreditUnits: 03**

## **Course Objective:**

The course aims to acquaint the student with a basic and elementary knowledge of the banking laws and practices.

## **Course Contents:**

### **Module I**

Overview, Legal Framework of Regulation of Banks, Reserve Bank of India Act 1930

### **Module II**

Banking Regulation Act, 1949, Negotiable Instruments Act 1860.

### **Module III**

Cyber Laws relating to Banking, Banking Companies Act, 1970/ 1980.

### **Module IV**

Securitization Act, 2002., Recent trends in Banking Industry (Legal).

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>C</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# INTERNATIONAL FINANCIAL MANAGEMENT

Course Code: MBF2405

CreditUnits: 03

## Course Objective:

The possibility for companies to look beyond domestic markets while making the financial decisions has given new dimensions to the way these decisions are taken. This has essentially led to changes in financial environment by linking domestic markets to global markets causing unprecedented increase in opportunities as well as risks. Management in such environment requires understanding of innovative conceptual and physical tools for better financial decision-making. The course on International Financial Management aims at equipping the financial manager with concepts, tools that enable financial decisions making in a global market and help better achieve the objectives of the firm. International boundaries are blurring therefore MNCs can raise funds from international financial management. The purpose of this paper is to equip the students with financial and investment decisions of MNCs.

## Course Contents:

### Module I: International Financial Environment

An overview of multinational financial management, Finance functions in multinational firms, International Monetary System, International Financial Markets and Instruments, Balance of Payments, Recent Developments.

### Module II: International Working Capital Management

International working capital management; international cash management; international receivable management; managing short term assets and liabilities; international capital money markets; euro dollar and currency market; financial market instruments – GDRs, ADRs, Euro issues, CP and ECB

### Module III: International Capital Budgeting

Multinational capital budgeting, cost of capital and capital structure decisions; dividend policy of multinational firm; Management of funds of MNC's operating in different countries; Political Risk Analysis

### Module IV: Foreign Exchange Markets

Spot and Forward Foreign Exchange Markets, Speculation and Arbitrage in Foreign Exchange Markets and Implications of Market Efficiency, Currency Swaps, Currency Futures and Options

### Module V: Foreign Exchange Rate Exposure and Risk Management

Transaction, Translation and Operating Exposure, Exposure from Equity and Borrowing in International Financial Markets, Hedging tools for Management of Transaction Exposure and Interest Rate Exposure, Degree of Hedge

### Module VI: Finance of Foreign Trade

Income terms, foreign letters of credit, export & import finance, rules governing letters of credit

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# Syllabus – Fifth Semester

## OPERATIONS RESEARCH

**Course Code: MBF2501**

**Credit Units: 03**

**Course Objective:**

The objective of this paper is to make students familiar with basic concepts and tools in Operations Research. These techniques assist in solving complex problems and help in decision making.

**Course Contents:**

**Module I: Introduction**

Introduction to Operations Research, Definition, scope and limitations of Operations Research

**Module II: Linear Programming**

Linear Programming – Basic Concepts, Model formulation; Solution methods – Graphical Solution method, Simplex method (problems involving only upto 3 constraints and of inequality <), Application of LPP in business decision making.

**Module III: Transportation Problem**

Transportation problem- Initial Basic feasible solution (North - West corner rule, Vogels approximation method), Test for optimality (Modified Distribution (MODI) method)

**Module IV: Assignment Problem**

Assignment Problem – Introduction, Approach of the Assignment model, Solution Methods (Hungarian method)

**Module V: Game Theory**

Game Theory - Concept and definition; Solution methods of Pure Strategy games (with saddle point), Significance of Game Theory.

**Module VI: Queuing & Simulation**

Introduction, Elementary queuing system, Introduction to Single – channel queuing model (with Poisson arrivals and Exponential service times), (no numerical); Introduction to Simulation, applications, advantages and drawbacks of simulation, Introduction to Monte – Carlo Simulation, Role of computers in Simulation.

**Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# INTERNATIONAL BUSINESS MANAGEMENT

**Course Code: MBF2502**

**CreditUnits: 03**

## **Course Objective:**

To introduce students to the contemporary issues in International Business that illustrate the unique challenges faced by managers in the international business environment.

## **Course Contents:**

### **Module I: Introduction to International Business**

Nature and scope of international business. International business environment, Classical theory of international trade: Absolute cost advantage theory, comparative cost theory, and Modern theory of international trade. Michael Porter model of competitive advantage of nations, Globalization – forces, Meaning, dimensions and stages in Globalization.

### **Module II: International Business Environment**

Tariff and non-tariff barriers, General Agreement on Trade and Tariffs (GATT), World Trade Organization, Important Ministerial Conferences & their outcomes, Dispute settlement mechanism under WTO, Regional Integrations, Trade Blocks – nature and levels of integration, arguments for and against regional integration.

### **Module III: Modes of International Entry**

International Business – Entry modes, Franchising, Exporting, Licensing, International Agents, International Distributors, Cross Border Mergers & Acquisitions, Strategic Alliances, Joint Ventures, Overseas Manufacture and International Sales Subsidiaries, Outsourcing, FDI, FII, PN

### **Module IV: International Financial Management**

Introduction to International Financial Management –International Monetary System, exchange rate system (floating and fixed) Financial Markets and Instruments- Introduction to Export and Import Finance – ECGC & EXIM Bank, Methods of payment in International Trade: Letter of Credit, Banker's Acceptance, Draft.

### **Module V: Forex Exposure**

Country Risk Analysis, Political, Social and Economic, Types of Forex Exposure: Accounting, Operating & Transaction – their management, An introduction to interest rate exposure.

### **Module VI: Foreign Trade Procedure**

An Introduction to Foreign trade Policy and its impact on different sectors of the Economy. Documentation Framework: Types, Characteristics of Document, Export Contract - INCO Terms - Processing of an Export Order.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# ENTREPRENEURSHIP DEVELOPMENT

**Course Code: MBF2503**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to provide students an understanding of entrepreneurship & the process of creating and growing a new venture. The course also focuses on giving the students the concept of an entrepreneur who is willing to accept all the risks & put forth the effort necessary to create a new venture.

## **Course Contents:**

### **Module I: Basic Concepts**

Qualities, Characteristics of an entrepreneur, Venture idea generation, Ideas and the entrepreneurship, Women entrepreneurs, Preliminary Screening, Drawbacks or Problems of entrepreneurship, Reasons of failure, Overview of setting up an enterprise with organizational forms – MSMED Act and SMERA Overview.

### **Module II: Project Appraisal**

Pre-feasibility Report, Project Report, Comparative Rating of Product ideas, Cash Flow, Financial Analysis and Planning, Sources of Finance, Stages of Project Feasibility Analysis-Market, Technical, Financial, Social Analysis, Project Implementation Stages

### **Module III: Financial Analysis**

Financing the project, Sources of finance, Venture Capital Sources, What Investor looks in the Investment Proposal, Outline for a Venture Capital Proposal, Sources of finance from different banks, Proposal with IDBI etc.

### **Module IV: Market and Materials Management Analysis**

Vendor development, vendor selection decision factors, methods of price determination, direct and hidden cost in material management, market development, market feasibility, activities and decisions in materials management – International Markets.

### **Module V: Project Management**

Steps and procedure for setting up small scale, Role of Banks and Financial Institutions in Development, E-Commerce, E-Business, E-Auction, Project management problems. SEZ, Cluster Development.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# RETAIL BANKING

**Course Code: MBF2504**

**CreditUnits: 03**

## **Course Objective:**

The basic objectives of the course are to acquaint the students about the concept of Retail Management and Retail Banking and the various types of Retail Banking Products. It will also develop our understanding about Bancassurance among the students.

## **Course Contents:**

### **Module I: Retail Management**

Retail Management – An Introduction, Functions of Retailing, Types of Retailers, Retailing Strategies for emerging markets, Organized Retail formats in India, Challenges ahead for Retailing

### **Module II: Changing Retail Environment**

Environmental Analysis, Retail Branding, Retail Selling, Relationship Marketing for Retailers, Type of Merchandise.

### **Module III: Retail Banking**

Retail Banking – An Introduction, Open market conditions and role of Banks and Financial Institutions, Retail Banking – Concept and Importance.

Retail Banking Products- Housing Loan, Conveyance Loan, Personal Loan, Educational Loan, Loan for Retail Traders, Plastic Money.

### **Module IV: e-Banking**

e-Banking – An Overview, Concept of ATMs and 24 hours Banking, Online Banking, Online banking and e-Banking, Bancassurance, SSI financing.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>C</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# PRINCIPLES OF INVESTMENT MANAGEMENT

Course Code: MBF2505

Credit Units: 03

## Course Objective:

The course aims at equipping the undergraduate students with financial tools, which help in making decisions for investment in financial securities. It is also aimed at imparting a basic understanding of the influence of changing economic scenario on the decisions and important theories and models, techniques and regulations underlying these decisions.

## Course Contents:

### Module I: Introduction to Investments

Investments: Introduction, Avenues for Investment including introduction to derivatives, Investments and Speculation, Features of a Good Investment programme, Process of Investment Decision Making, Risks involved in Investments including the concept of beta, Principle of Dominance.

### Module II: The Stock Markets in India

Nature and Functions of the Stock Market, OTCEI & BSE, NSE & Role of Depositories, Market Indices, Brokerage Business

### Module III: Valuation of Securities

Bond Valuation and Analysis, Preference share Valuation and Analysis, Equity Share Valuation

### Module IV: Security Analysis

Fundamental Security Analysis, Technical Security Analysis

### Module V: Portfolio Analysis and Management

Portfolio Analysis: Risk and Return, Portfolio Choice: Utility Theory and Indifference Curves, Markowitz: Portfolio Selection Model, Capital Asset Pricing Model, Sharpe's Single Index Model and Portfolio Evaluation Treynor, Sharpe and Jensen.

# SUMMER INTERNSHIP EVALUATION

Course Code: MBF2535

CreditUnits: 06

## Objective:

The basic objective of a summer internship is to provide first hand practical exposure of the corporate functioning and to acquaint students with the culture of corporate. The summer training will also provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus, this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

## General Guidelines:

Every student of under graduate courses will be required to undergo a practical training in a corporate organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the fourth semester examinations. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific project to the candidate, which will be completed by him/her during the period of training. The work done by the candidate during the training period shall be submitted in the form of a report as per the guidelines provided by the Department.

## Chapter Scheme for the SIP Report:

Chapter I: Introduction	- 20 marks
Chapter II: Conceptual Framework/National/International Scenario	- 5 marks
Chapter III: Presentation, Analysis and Findings	- 35 marks
Chapter IV: Conclusion and Recommendations	- 15 marks

The report has to be written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise of a maximum of 70 pages and has to be submitted in two copies.

## THE COMPONENTS OF A SIP REPORT

The outcome of Summer Internship is the Project Report. A project report should have the following components:

- 1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
- 3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main sections along with their page numbers.
- 4) Body of the Report:** The body of the report should have these four logical divisions
  - a. *Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
  - b. *Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
  - c. *Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
  - d. *Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexure:** Questionnaires (if any), relevant reports, etc.

## Evaluation Scheme:

SIP Report	Power Point Presentation & Viva
75 marks	25 marks

# Syllabus – Sixth Semester

## BUSINESS LAW

**Course Code: MBF2601**

**Credit Units: 03**

**Course Objective:**

The objective of the course is to acquaint the students with the fundamentals of business related laws, which have an important role over smooth conduct of business.

**Course Contents:**

**Module I: Legal Environment of Business**

Importance of Law, Legal environment of business, Sources of law, Function of law.

**Module II: Indian Contract Act, 1872**

Nature and kinds of Contracts, Concepts related to offer, Acceptance and Consideration, Principles Governing Capacity of Parties and Free Consent, Legality of Objects, Performance and Discharge of Contract, Breach of Contract and its Remedies, Basic Elements of Law Relating to Agency, Guarantee and Pledge.

**Module III: Indian Sale of Goods Act, 1930**

Sale and Agreement to Sell, Hire Purchase, Pledge, Mortgage, Hypothecation Lease, Goods, Different types of Goods, Passing of Property in Goods, Conditions and Warranties, Doctrine of Caveat emptor, Rights of an unpaid Seller.

**Module IV: Negotiable Instruments Act, 1881**

Meaning of Negotiability and Definition of Negotiable Instruments, Features, Cheques, Bill of Exchange and Promissory Note, Holder in Due Course, Crossing of Cheques, Endorsement and Dishonour of Cheques.

**Module V: Elements of Company Law**

Meaning and types of companies, Formation of a company, Memorandum and Articles of Association, Prospectus and Issue of Shares, Share Capital and Shareholders, Company Meetings and Proceedings, Powers and Liabilities of Directors, meeting, Managerial Remuneration and Winding up of Company.

**Module VI: Consumer Protection Act 1986 and Torts**

Need for Consumer Protection, Meaning of Consumer, Different Redressal Forums for Consumers, Rights of Consumers, Unfair Trade Practices, and Procedure for Filing Complaints, Meaning of tort, Application of Tortious Liability in Business Situations.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

# BUSINESS POLICY AND STRATEGIC MANAGEMENT

Course Code: MBF2602

CreditUnits: 03

## Course Objective:

The aim of the course is to orient the students in theories and practices of Strategic Management so as to apply the acquired knowledge in formulation and implementation of strategies for better decision-making. This is a gateway to the real world of management and decision-making.

## Course Contents:

### Module I: Introduction

Planning, Evolution of strategic management, Concept of Corporate Strategy: Intended & Emergent, Patterns of Strategy Development, Levels of strategy.

### Module II: Mission & Vision

Concept of Strategic Intent, Vision and Mission, Formulation of Vision and Mission Statements, Different Perspectives on Vision and Mission, Business Definition and concept of a Business Model.

### Module III: Strategic Analysis

Industry Analysis, Competitor Analysis using Porter's 5-Forces model, Market Analysis, Environmental Threat and Opportunity Profile (ETOP), Internal Analysis: Building Organization Capability Profile and Strategic Advantage Profile (SAP), Building competencies using Value chain Analysis, Environmental Analysis and dealing with uncertainty, Scenario Analysis, SWOT Analysis.

### Module IV: Strategic Choice

Strategic alternatives at corporate level: Expansion, Stability, Retrenchment and Combination, Strategic choice models for dominant single- Business companies- Strickland's Grand Strategy Selection Matrix, Model of Grand Strategy Clusters, Strategic choice models for multi-business companies- BCG, GE Nine Cell Matrix, Hofer's Model, Coevolving, Patching, Strategy as simple rules, Strategic alternatives at business level: Michael Porter's Generic competitive strategies, Building Sustainable Competitive Advantage.

### Module V: Strategic Implementation

Operationalizing strategy and Institutionalizing strategy- Developing short-term objectives and policies, Functional tactics, and Rewards, Structural Implementation, Strategic Control, Mc Kinsey 7-S Framework.

### Module VI: Recent Developments

Recent Developments in the Field of Strategy: Use of Balanced Scorecard approach, Corporate Governance and Corporate Social Responsibility, Corporate sustainability.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# E-BANKING

**Course Code: MBF2603**

**CreditUnits: 03**

## **Course Objective:**

To enable the students to understand the role of information and technology in banking. To impart them with skill related to IT implementation in banking industry. To make them aware about the various security measures and laws related.

## **Course Contents:**

### **Module I: Introduction**

Concept, Definition & Origin of E-Banking, Scope and Type of E-Banking – Internet Banking, Mobile Banking etc., Issues and Challenges in E-Banking, Advantages and Limitations of E-Banking, Future of E-Banking in India.

### **Module II: Electronic Payment System**

Concept of Electronic Payment, Basic elements of electronic payment system, Types of Electronic Payment Systems – Electronic Cash, Electronic Cheque, EFT, RTGS, Credit Card, Smart Card, Concept of Payment Gateway and Paypal, Concept & Working of ATM.

### **Module III: Cyber Security and Legal Issues**

Cyber Crimes & Security, Cyber Attacks – Trojan, Virus, Worm, Spam, Hacking – Phishing, IP Spoofing, Safety Measures – Firewalls, Intrusion Detection, Systems, Secure Sockets Layer, Authentication & Assurance of Data Integrity, Cryptography, Digital Signatures, Overview of Information Technology Act – 2000

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>C</b>	<b>V</b>	<b>A</b>	<b>EE</b>

# ADVANCED CORPORATE FINANCE

**Course Code: MBF2604**

**Credit Units: 03**

## **Course Objective:**

The basic objective of this course is to acquaint the students with the latest developments in the field of corporate finance. This course will be a step above Financial Management II where they will learn advanced topics related to behavioural finance, corporate restructuring & corporate governance

## **Course Contents:**

### **Module I: Introduction**

Objectives of Corporate finance, Shareholder wealth maximization, Agency Problems, Management Compensation & measurement of Performance

### **Module II: Valuation Concepts**

Valuation Models, Application of Valuation Model, EVA/MVA, Balanced scorecard and other methods/measures of financial performance.

### **Module III: Corporate restructuring**

Differential Efficiency & Financial Synergy: Theory of Mergers, Operating Synergy & Pure Diversification: Theory of mergers, Costs and Benefits of Merger, Evaluation of Merger as a Capital Budgeting Decision, Poison Pills, Turnaround Strategies, Tax Planning relating to mergers and Amalgamation

### **Module IV: Corporate Governance & Business Ethics**

Implementation of Corporate Governance, Ethics and finance, Ethical practices in market place, Corporate Responsibility, Social Audit and Ethical Investing.

### **Module V: Behavioural Finance**

Introduction and Expected Utility, Non-Expected Utility Preferences, A review of classical probability theory, Beliefs, Biases and Heuristics, Preferences and Anomalies in the Financial markets

### **Module VI: Strategic Cost management**

Financial aspects of Supply Chain Management, Operations management perspective on Costs, Strategic cost analysis (using activity based costing, target costing and life cycle costing) and Product pricing at Different stages of product's life cycle.

## **Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

# PROJECT WORK/ DISSERTATION

Course Code: MBF2637

CreditUnits: 09

## Objectives:

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	- 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	- 5 marks
Chapter 3: Presentation, Analysis & Findings	- 25 marks
Chapter 4: Conclusion & Recommendations	- 10 marks

## THE COMPONENTS OF A PROJECT REPORT

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## THE STEPS OF PROJECT WORK

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III:** Collection of information and data relating to the topic and analysis of the same.

**STEP IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**STEP V :** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Annexures, References / Bibliography**

#### **Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she have to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Project Work separately, obtaining minimum marks of 40 (Project Report and Viva-Voce taken together).

#### **Evaluation Scheme:**

<b>Dissertation</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

# COMPUTERS IN MANAGEMENT

**Course Code: MGT2101**

**CreditUnits: 03**

## **Course Objective:**

The objective of this subject is to provide conceptual knowledge of the information technology to the future Managers. This subject highlights the topics like Database Management, Networking, Internet, E-commerce etc., which can help managers to take routine decisions very efficiently.

## **Course Contents:**

### **Module I: World of Computers**

Introduction to world of Computers, Computers in Home (Reference, Education & Communications, Entertainment and Digital Media Delivery, Smart Appliances, Home Computers), Computers in Education, Computers in workplace (productivity and decision making, customer services, communications), Computers on the move (Portable and Hand held computers, Self-Service kiosks, GPS Applications), Computer Peripherals, Memory Management.

### **Module II: Computer Networks**

Introduction to Computer Networks, Networking Components, Classification and Types of Networks, Network Topologies – Overview with Advantages and Disadvantages, Communication Channels, Client Server Architecture, LAN concepts.

### **Module III: Internet Technology & World Wide Web**

Introduction to Internet Intranet and Extranet, Myths about the Internet, Basic Concepts of Internet, Domain Name Service, Internet Protocols and Addressing, Services of internet, Internet and support Technologies, Censorship and Privacy issues.

### **Module IV: E-commerce**

Introduction, E-Commerce Vs E-Business, Advantages & Disadvantages, E-Commerce Business Models, E-Commerce Technologies, Hosting E-Commerce Site – Planning and constructing web services, E-Commerce Applications, E-Core Values – Ethical, Legal, Taxation and International issues, E-Commerce Security Issues, Internet based Payment System.

### **Module V: Enterprise Resource Planning**

Introduction, Scope and Benefit, ERP and related technologies (BPR, MIS, DSS, EIS, SCM, OLAP, etc), ERP implementation methodology – implementation life cycle, ERP and its success factors, Pitfalls and management concerns, ERP Market – renowned vendors and the packages.

### **Module VI: Database Management System**

Introduction, Need for DBMS, Components of DBMS, Benefits of DBMS over Tradition File System, classification and types of Database Models, Database Approach – Its benefits and Disadvantages.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

# FINANCIAL ACCOUNTING

Course Code: MGT2102

Credit Units: 03

## Course Objective:

To understand the basics of accounting and concepts of double entry system. The students will be given a detailed grounding on recording of transactions and preparation of final accounting statements for business organizations.

## Course Contents:

### Module I: Introduction to Accounting

Understanding the meaning, nature, functions and usefulness of accounting, branches of Accounting, Accounting Equation, Accounting Concepts and Generally Accepted Accounting Principles. Difference between Indian GAAP and US GAAP

### Module II: Recording of Transactions and Subsidiary Books

Concept of Double Entry System. Understanding the Accounting cycle, Preparation of Voucher, Journal, Ledger and Trial Balance and Numerical on the Same. Preparation of subsidiary Books including Purchase Book, Sales Book, Purchase Returns Book and Sales Return Books (and numerical on the same), Cash book, types of cash book and balancing of cashbook. Numerical on single column cashbook, Double column cashbook, triple column cashbook and petty cash book.

### Module III: Reconciliation of Bank Accounts

Causes for difference in the Balance as per Pass book and balance as per cashbook, Procedure for preparation of bank reconciliation statement when there is favorable balance and in case of overdraft (and numerical on the same).

### Module IV: Financial Statements

Preparation of Trading Account, Manufacturing Account, Profit And Loss Account and balance sheet along with adjustments (and numerical on the same) and non-profit making organizations an overview. AS-1, AS-21 (no numerical)

### Module V: Accounting For Partnership

Introduction to Partnership Accounts, Partnership Deed. **Admission of a new partner**- Revaluation account, Computation of New Profit Sharing Ratio and Sacrificing Ratio, Proportionate Capital, Treatment of goodwill in partnership accounts and its valuation. **Retirement and Death of a partner**: Determining the gaining ratio, Revaluation of assets and liabilities, Reserve, Final payment to retiring partner, Treatment and adjustment of goodwill. Numericals on preparation of various accounts in case of retirement and death of a partner. **Dissolution of the firm**: Circumstances leading to dissolution of partnership, Settlement of the accounts, Capital ratio on insolvency, Insolvency of all partners and Garner Vs Murray decision.

# MANAGERIAL ECONOMICS

**Course Code: MGT2103**

**CreditUnits: 03**

## **Course Objective:**

The purpose of this course is to apply managerial economics concepts and techniques in evaluating business decision taken by firms. The emphasis is on explaining how the tools of standard price theory can be employed to formulate a decision problem, evaluate alternative courses of action and finally choose among alternatives.

## **Course Contents:**

### **Module I: Introduction to Managerial Economics**

Nature, Scope, Definitions of Managerial Economics, Application of Managerial Economics to Business, Micro Vs. Macro Economics, Opportunity Costs, Time Value of Money, Marginalism, Incrementalism, Market Forces and Equilibrium.

### **Module II: Consumer Behaviour and Demand Analysis**

Cardinal Utility Approach: Diminishing Marginal Utility, Law of Equi-Marginal Utility, Ordinal Utility Approach: Indifference Curves, Marginal Rate of Substitution, Budget Line and Consumer Equilibrium, Theory of Demand, Law of Demand, Movement along vs. Shift in Demand Curve, Concept of Measurement of Elasticity of Demand, Factors Affecting Elasticity of Demand, Income Elasticity of Demand, Cross Elasticity of Demand. Production with one variable input, Production and optimal input proportions, two variable inputs, Law of variable proportions and law of return to scale, Cost Concepts, Theory of costs in short run and long run.

### **Module III: Theory of Production, Cost and Firm's Behaviour**

Meaning and concept of Production, Factors of Production and Production Function, Fixed and Variable Factors, Law of Variable Proportion (Short Run Production Analysis), Law of Returns to a Scale (Long Analysis), Concept of Cost, Cost Function, Short Run Cost, Long Run Cost, Economics and Diseconomies of Scale, Explicit cost and Implicit Cost, Private and Social Cost

### **Module IV: Macro Economics and Business Decisions**

Phases of Business cycle - Evil effects of cyclical fluctuations on business firms - Minimizing effects of Business cycles, Economic and Business forecasting - uses of economic forecasts - Methods of economic forecasting - selecting a forecast - evaluating forecasts.

### **Module V: Price and Output Decisions under Different Market Structures**

Price and Output Decisions under Perfect Competition, Monopoly and Monopolistic Competition - Pricing under Oligopoly - Kinked Demand Curve - Price Leadership - Pricing under Collusion.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# E-COMMERCE

**Course Code: COM2103**

**CreditUnits: 03**

## **Course Objective:**

In the changed business environment of today, it has become imperative for businesses to understand, appreciate and learn to create their presence in cyber space. This course focuses on exposing the students to the world of e-commerce, the opportunities, and the threats and teaches them the strategies of making businesses viable and successful.

## **Course Contents:**

### **Module I: E-Commerce Concept**

Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services. Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI, Software Concept of Electronic Signature, Access Control.

### **Module II: Types of E-Commerce**

Meaning of B2C, B2B, C2C, P2P, Applications in B2C- E-Banking, E-Trading. E-Auction - Introduction and overview of these concepts, Application of B2B- E-distributor, B2B service provider, benefits of B2B on Procurement, Just in time delivery, Consumer to consumer and peer to peer business model introduction and basic concepts.

### **Module III: E-Marketing**

Traditional Marketing V/S E-Marketing, Impact of Ecommerce on markets, Marketing issue in E-Marketing, Promoting your E-Business, Direct marketing, one to one marketing.

### **Module IV: E-Finance**

Areas of E-Financing, E-Banking, traditional v/s E-Banking, operations in E-Banking, E-Trading- Stock marketing, Trading v/s E-Trading, Importance of E-Trading, Advantages of E-trading, operational aspects of E-Trading.

### **Module V: E-Payment**

Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; V - Viva; CT - Class Test; A - Attendance; EE - End Semester Examination)

# BUSINESS MATHEMATICS

**Course Code: MGT2104**

**Credit Units: 03**

## **Course Objective:**

The course is designed to orient the students towards the basic concepts of mathematics and its applications in the business world.

## **Course Contents:**

### **Module I: Set Theory & Mathematical Induction**

Theory of Sets; Meaning; Elements; Types; Presentation and Equality of sets; Subsets; Super sets & Power sets; Finite, Countable or Infinite sets; Union; Intersection; Compliment & Difference of sets; Venn diagrams; Cartesian product of sets; Cardinality; Inclusion – Exclusion principle; Applications of set theory; Mathematical induction

### **Module II: Techniques of counting**

Basic counting principle; Factorial notation; Binomial coefficient; Pascal's triangle; Permutations and Combination; Permutation with restriction; Circular permutation and Combination with restriction; Concept of tree diagram

### **Module III: Logarithms & Sequence – A.P.; G.P.**

Indices & Logarithms; Definition and properties, Common logarithms; Arithmetic and Geometric Progression- General term, Summation, Business Application.

### **Module IV: Matrices & Determinants**

Matrices; concepts and types; properties; Addition; Multiplication; Transpose and inverse of matrix; Algebra of matrices; Adjoint of a matrix; Determinants; Properties of determinants; Solution of simultaneous Linear Equations; Business applications of matrices; Homogeneous System of Linear equations; Condition for Uniqueness for the homogeneous system; Solution using inverse of the coefficient matrix; Problems

### **Module V: Differentiation & Differential Calculus**

Differentiation - definition, Derivatives of Algebraic, Logarithmic and exponential function, Business application of differentiation; Optimization using calculus; Point of inflexion absolute and local optima

## **Examination Scheme:**

Components	CT	HA	C	P	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; V - Viva; CT - Class Test; P – Project; A- Attendance; EE - End Semester Examination)

# ECONOMIC SYSTEM AND SOCIETY

**Course Code: ECO2104**

**CreditUnits: 03**

## **Course Objective:**

This course will reflect the socio-economic change in historical perspective, capitalism as an economic system, structure of capitalism and capitalism in global context.

## **Course Contents:**

### **Module I**

Analyzing Socio-Economic Change in Historical Perspective

### **Module II**

Capitalism as an economic system

Origins, nature and structure of capitalism; Accumulation and crisis; Alternative perspectives on capitalism

### **Module III**

The transition from feudalism to capitalism

### **Module IV: The evolving structure of capitalism**

Monopoly capitalism, The modern corporation: Divorce between ownership and control; The institutional diversity of capitalism; Alternative perspectives on the role of state.

### **Module V: Capitalism in Global Context**

Multinational corporations and their impact on the developing economics; Imperialism

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>HA</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**HA** - Home Assignment; **P** - Project; **CT** - Class Test; **A**- Attendance; **EE** - End Semester Examination

## **Text & References:**

## READINGS IN MANAGEMENT

**Course Code: MGT2130**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. The selection of the book will be department specific so that it can be discipline specific.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters (if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### **Evaluation Scheme:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

# TERM PAPER

**Course Code: MGT2131**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from any Indian industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGT2132

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	– 25 marks
Chapter 4: Conclusion & Recommendations	– 10 marks
Chapter 5: Bibliography	– 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- a) *Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- b) *Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- c) *Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- d) *Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for Evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

**Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGT2133**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held.
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of at least 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

## MARKETING MANAGEMENT

**Course Code: MGT2251**

**Credit Units: 03**

### **Course Objective:**

The main objective of this course is to give students an elementary knowledge of the fundamentals in the field of marketing. The focus will be both on developing and helping them imbibe basic marketing principles and establishing an appreciation of contemporary realities.

### **Course Contents:**

#### **Module I: Introduction to Marketing**

Meaning of marketing, Core concepts of marketing, Evolution and its role in the changing business environment, various marketing management philosophies, viz., the production concept, the product concept, selling concept and the marketing concept, Newer definitions of marketing- societal marketing and relationship marketing, Strategies planning in marketing, Formulation of marketing plan.

#### **Module II: Analyzing Marketing Opportunities**

Internal and External Marketing Environment Analysis, Introduction to Marketing Information System and Marketing Research, BCG matrix, GE 9 cell model.

#### **Module III: Studying Consumer Behaviour and Selecting Markets**

Buying Behaviour for Consumer Markets and Industrial Markets, Types of Buying Situations, Buying Decision Process and Factors Affecting Buyer Behaviour, Consumer Adoption Process, Concept of Market Segmentation, Bases for segmenting Consumer and Business markets, Approaches for Targeting, Differentiation and Positioning.

#### **Module IV: Product Mix Strategy**

Product: concept & levels, Classification of consumer and industrial products, Product Differentiation, Product Mix, Product Life Cycle and various strategies, Branding: concept and challenges, Brand decisions, Packaging and Labeling.

#### **Module V: Product Development Decision and Pricing**

Product Line Decisions, New Product Development: Challenges & Process; Consumer Adoption Process, Diffusion of Innovation, Pricing Strategies; Setting the price, Understanding various pricing strategies and their application.

#### **Module VI: Distribution and Logistics Decision and Integrated Communication Mix**

Nature of Marketing Channels, Channel Functions and Flows, Channel Design and Management Decisions, Channel Dynamics, Introduction to Wholesaling, Retailing and Logistics, Marketing communication mix and Introduction to various elements of integrated marketing communications briefly

#### **Module VII: Emerging Marketing Paradigms**

E-marketing, Global marketing, Mobile marketing, Kiosk marketing, Green marketing, Tele marketing, Multi level marketing, Rural marketing.

### **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# HUMAN RESOURCE MANAGEMENT

**Course Code: MGT2201**

**CreditUnits: 03**

## **Course Objective:**

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

## **Course Contents:**

### **Module I: Fundamentals of HRM**

Introduction, Concept and Functions, Scope and Significance of Human Resource Management, Personnel Management and HRM, Overview of basic HRM Model, Role and responsibilities of the Human Resource Manager and Essentials of Sound HR Policies.

### **Module II: Acquisition of Human Resources**

Objectives, Policies and Process of Human Resource Planning, Job Analysis, Recruitment (process, methods: internal, external), Selection (process, tests, interviews), Placement, Induction.

### **Module III: Development of Human Resources**

Training and Development(process, methods: On-the job, Off-the job), Evaluation of training (Kirkpatrick model) and Performance Appraisal (concept, significance, process, methods-Graphic rating scales, Essays, Confidential report, BARS, 360 Degree, etc, errors during appraisal, reducing errors).

### **Module IV: Maintenance of Human Resources**

Job Evaluation: concept, process, compensation: concept, components, Designing and Administering the Wage and Salary Structure, Grievance Procedure and Handling.

### **Module V: Retention and Separation Processes**

Procedure of separation: Discharge, Retirement, Layoff, Retrenchment, VRS, Promotion and Transfer, Exit interview, Attrition and Retention (concept, significance, determinants and strategies).

### **Module VI: Current Issues in HRM**

Increased concern for HRM (Sound IR, dual career couples, flexi-working hours, work-from home facility), International Human Resource Management-Managing inter country differences, SHRM, Talent management, Employee engagement, Competency mapping, HR accounting-cases of Indian organizations, HRIS, HR audit.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# BUSINESS STATISTICS

**Course Code: MGT2202**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to familiarize the students with various statistical tools which can help them in analysis and interpretation of business data. This course will provide students with hands-on experience to promote the use of statistical thinking and techniques to apply them to make educated decisions whenever there is variation in business data. Therefore, it is a course in statistical thinking via a data-oriented approach.

## **Course Contents:**

### **Module I: Introduction to Statistics**

Definitions, Functions of Statistics, Statistics and Computers, Limitation of Statistics, Application of Statistics.

### **Module II: Data Collection and Analysis**

Methods of Data Collection, Primary and Secondary Data, Graphic Representation of Data, Measures of Dispersion-Range, Quartile Deviation, Mean Deviation, Standard Deviation, Coefficient of Variation.(Absolute & Relative Measure of Dispersion), Skewness-Karl-Pearson's Coefficient of Skewness, Bowley's Coefficient of Skewness, Kurtosis.

### **Module III: Correlation Analysis and Regression Analysis**

Introduction-Importance of Correlation, Types of Correlation, Scatter Diagram Method, Karl Pearson's coefficient of Correlation (Grouped and Ungrouped). Spearman's Coefficient of Rank Correlation, Rank Correlation for Tied Ranks, Regression Analysis- Concepts of Regression, Difference b/w Correlation and Regression, Regression Lines.

### **Module IV: Time Series Analysis**

Meaning and Significance, Components of Time Series, Trend Measurement, Moving Average Method, Least Square Method (Fitting of Straight Line Only).

### **Module V: Probability**

Introduction, Terminology used in Probability, Definitions of Probability, Mathematical, Statistical and Axiomatic Approach to Probability, Probability Rules-Addition Rule, Multiplication Rule of Probability, Conditional Probability- Bayes Theorem, Problems on Bayes Theorem.

### **Module VI: Probability Distribution**

Discrete Probability Distributions-Binomial Probability Distribution, Poisson Probability Distribution, Properties, Applications, Continuous Probability Distributions-Normal Probability distribution, Properties of the Normal Curve, Applications, Relation b/w distributions.

## **Examination Scheme:**

Components	CT	HA	Q	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# CORPORATE ACCOUNTING

**Course Code: MGT2203**

**Credit Units: 03**

## **Course Objective:**

This course enables the students to develop awareness about Corporate Accounting in conformity with the Provision of Companies' Act and latest amendments thereto with adoption of Accounting Standards that are likely to be introduced from time to time.

## **Course Contents:**

### **Module I**

Statutory records to be maintained by a company, Accounting standards - relevance and significance; National and international accounting standards.

### **Module II**

Accounting for share capital transactions - issue of shares at par, at premium and at discount; forfeiture and re-issue of shares; buy-back of shares; redemption of preference shares - Statutory requirements, Disclosure in balance sheet; Rights issue, Underwriting.

### **Module III**

Issue of debentures - accounting treatment and procedures; Redemption of debentures; Conversion of debentures into shares.

### **Module IV**

Preparation and presentation of final accounts of joint stock companies as per company law requirements; Provisions and reserves; Determination of managerial remuneration; Appropriation out of profits; Transfer of profits to reserves; Payment of dividend, Transfer of unpaid dividend to Investor Education and Protection Fund; Bonus shares and payment of interest out of capital.

### **Module V**

Holding and subsidiary companies - Accounting treatment and disclosures; Consolidation of accounts.

### **Module VI**

Valuation of goodwill and shares

Good will – Meaning, Definition, Elements, Types and Methods of Valuation of Goodwill, Methods of share valuation (Equity & preference shares).

### **Module VII**

Accounting treatment for amalgamation, Absorption and reconstruction of companies; Internal and external reconstruction, Liquidation- Preparation of liquidators statement & affairs, Deficiency/surplus statement, Calculation of pro rata treatment of uncalled capital.

## **Examination Scheme:**

Components	HA	CT	C	A	EE
Weightage (%)	5	10	10	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# ANALYSIS AND DESIGN OF BUSINESS SYSTEM

**Course Code: MGT2204**

**CreditUnits: 03**

## **Course Objective:**

The course aims at preparing students conceptualize and define scope and domain of system analysis and design. It also focuses on system development life cycle using conventional and structural look.

## **Course Contents:**

### **Module I: Systems Development Environment. (Information system development life cycle)**

System & its parts, Types of Systems, Characteristics of a System, System Analyst in system Development, Developing Systems- SDLC, Approaches to System Development (Prototyping, Joint Application Design (JAD), Participatory Design (PD)), System Development Models (Waterfall model & Spiral Model), System Planning & Selection (Identifying, Selecting, Initiating & Planning System Development Project).

### **Module II: System Planning and Selection (Graphic technology modeling tool)**

Identifying and Selecting Projects (Identifying potential development projects, classifying and ranking projects, and selecting projects for development), Methods for project identification and selection, Evaluation criteria for classifying and ranking projects, Initiating and Planning System Development Projects (Process & performed Activities, Deliverables & Outcomes), Assessing Project Feasibility (Economic, Operational, Technical, Schedule, Legal & Contractual, Political Feasibility)

### **Module III: System & Data Analysis (Data Analyzing Modeling)**

Determining System Requirements (Traditional Methods, Modern & Radical Methods), Structuring System Requirements (Process Modeling – DFD, Logic Modeling – Structured English & Decision Tables, Conceptual Modeling – ER Model), Data Analysis & Techniques (Interpretive, Coding, Recursive Abstraction and Mechanical Technique), Types of Analysis (Descriptive, Exploratory, Confirmatory and Predictive), Modeling Methodologies (Bottom Up method & Top Down Method), Generic and Schematic Data Modeling.

### **Module IV: System & Database Design**

System Design (Design Objectives, Phases in Designing, Purpose of System Design), System Design Goals, Type of Design, Design Strategy, System Decomposition (Modeling, Connection and Coupling of a System), System Design Methodologies, Database Design, Database Management System – an introduction, Overview of Data Models, Relational Database Model – Well structured relations, Keys, Schema & Subschema, Structure, Facilities & Users, Constraints, Anomalies, Functional Dependency, Normalization, Roles & Duties of System Administration.

### **Module V: System Implementation & Operation (System Management)**

Activities in implementing (Coding, Testing & Installation, Documentation, Training, Support, Maintenance), Types of testing, planning installation, approaches to installation, Documenting a system, Training and Supporting users, Types & Frequencies of Training Methods, Reasons of System Implementation Failures, Project Closedown, Conducting System Maintenance – Types of Maintenance (Corrective, Adaptive and Perfective Maintenance), effective maintenance, Evaluation of System's Success, System Enhancement, Quality Assurance in System Cycle.

### **Module VI: System Security and Auditing**

System Security: Data Security, Backup & Recovery during System & Database failure, Ethical Issues in System Development, Threat and Risk Analysis, Audit, System Audit, System Audit Standards (Planning, Implantation and Reporting Standards), System Analysis and Programming (Overview, Role & Duties of System Experts as Analyst and Programmer).

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

**Text & References:****Text:**

# INNOVATION & CREATIVITY MANAGEMENT

**Course Code: MGT2205**

**CreditUnits: 03**

## **Course Objective:**

To develop an appreciation for new ideas and out of the box thinking so that students can successfully imbibe the habit of innovative and creative thinking in situations.

## **Course Contents:**

### **Module I**

Innovation Management- Introduction, Characteristics, Components, Types, Models of Innovation process, Innovation Environment-Originators of Innovation, Key Drivers of Innovation, Factors influencing innovation, Nurturing innovation in e-business.

### **Module II**

Organizing for Innovation- Organizational theories and structures, Traits of innovative organizations, Current trends, Factors influencing organizational design and size decisions, Need & Characteristics for creative organization, 7S framework, Creativity crushers, Fostering innovation climate and culture, The creativity Hit List.

### **Module III**

Research and Development management- Significance, Prerequisites, Process, Technology development approaches, Management of R &D, In source to open source environment, R&D in small industry, Managing Creative employees, Significance and challenges of managing creative employees, Traits of a creative person, Motivation to creativity, Strategies for unblocking creativity, Factors influencing group creativity, Promoting group creativity, Left and right thinking, Linear and non-linear thinking process, Creative thinking, Traditional vs Creative thinking.

### **Module IV**

Individual creativity techniques- Inner and Directed creativity techniques, Group Creativity Techniques-creativity methods, Writing techniques, Techniques based on pictures, maps and networks, Product innovation-types of new products, Target markets for Disruptive Innovation, Technology strategies for innovation, New product development, Packaging and Positioning innovations, Beyond product innovation, New product failures.

### **Module V**

Innovation Diffusion- Concept of diffusion and adaptation, diffusion types, Innovation diffusion theory, Innovation adoption by organizations, Innovation adoption across countries, Marketing strategy and the diffusion process.

### **Module VI**

Legal aspects of innovation- IPR, Indian Patents Act, Trademark, Copyrights, Trade secrets, Towards Innovative Society-Innovation for social development, Spirit of innovation in India, Favourable and Unfavourable factors.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

**Text & References:*****Text:***

- Krishnamacharyulu and Lalitha, (2007), Innovation Management, Himalaya Publishing House, New Delhi- 2007

***References:***

- Plsek, (2003) Creativity, Innovation and Quality, Prentice Hall of India, New Delhi.

**Salient Pedagogical Features-**

1. Classroom teaching to focus on enhancing out of the box thinking.
2. Assignments: Practical tasks emphasising on honing up creative thinking.
3. Case study analysis: To enable students to appreciate the application of concepts in real life environment.
4. Active student participation in class discussions.
5. Role plays to boost spontaneity.

# HUMAN VALUES AND PROFESSIONAL ETHICS

**Course Code: MGT2206**

**CreditUnits: 03**

## **Course Objective:**

The aim of this course is to facilitate the development of a Holistic perspective among students towards life, profession and happiness, based on a correct understanding of the Human reality and the rest of Existence. Such a holistic perspective forms the basis of value based living in a natural way. Recognize the need for lifelong learning and have the knowledge and skills that prepare them to identify the Moral issues involved in Management areas and to provide an understanding of the interface between Social, Technological and Natural environments.

## **Course Contents:**

### **Module I: Human Values**

Morals, Values, Types of values, Evolution of human values, Ethics, Integrity, Work Ethic, Honesty, Courage, Empathy, Self-Confidence, Character, Challenges at Work place

### **Module II: Values in Management**

Relevance of values in Management, Need for values in global change, Values for managers, Holistic approach for managers in decision making, Problems related to stress in corporate management.

### **Module III**

**Workplace Rights and Responsibilities:** Organizational complaint procedures. Government agencies, Resolving Employee concerns, Limits on acceptable behavior in large corporation.

**Work environment:** Ethical and legal considerations, Organizational responses to offensive behavior and harassment, Ethics in a Global Context.

### **Module IV: Industrial Integrity**

The epitome of industrial success, Integrity and organization, Exploring learning process of integrity, Consequences of lack of integrity.

## **Examination Scheme:**

Components	C	V	HA	A	ME	EE
Weightage (%)	5	5	5	5	10	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## READINGS IN MANAGEMENT

**Course Code: MGT2230**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective is to inculcate reading habit along with value addition to the existing understanding of the subject. The book would be a kind of knowledge enhancer that would envision the student about some current thoughts related to the discipline. The book reading and its critical analysis would help broaden the intellectual horizon of the student. The selection of the book will be department specific so that it can be discipline specific.

### **Guidelines:**

The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters(if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing. Headings in Font Size 16

### **Evaluation:**

<b>Report on the Book in 3000 words</b>	<b>Written Test</b>
50 marks	50 marks

# TERM PAPER

**Course Code: MGT2231**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from any Indian industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGT2232

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	– 25 marks
Chapter 4: Conclusion & Recommendations	– 10 marks
Chapter 5: Bibliography	– 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

**a) Introduction:** This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

**b) Conceptual Framework / National and International Scenario:** (relating to the topic of the Project).

**c) Presentation of Data, Analysis and Findings:** (using the tools and techniques mentioned in the methodology).

**d) Conclusion and Recommendations:** In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

**Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGT2233**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

## ORGANISATIONAL BEHAVIOUR

**Course Code: MGT2351**

**Credit Units: 03**

**Course Objective:**

The objective of this course is to familiarize the students with the behavioural patterns of Human beings at individual and group levels.

**Course Contents:**

**Module I: Understanding Human Behaviour**

Concept, Nature and Significance of Human Behaviour, Factors Affecting Human Behaviour, Levels of Human Behaviour; Disciplines contributing to OB.

**Module II: Individual Behaviour**

Individual Differences; Personality and Theories of Personality; Perception; Learning and Behaviour reinforcement, Values.

**Module III: Motivation & Attitude**

Concept, Significance and Theories of Motivation, Motivation and Behaviour, Motivation at Work, Attitudes, Meaning and nature, Formation and change in attitudes, Job related attitudes.

**Module IV: Interpersonal Behaviour, Power & Politics**

Interpersonal Dimensions of Behaviour; Transactional Analysis Implications of TA, Organizational communication, making communication effective, Power: Concept, determinants, types; Organizational Politics: Tactics, Impression Management.

**Module V: Group Behaviour and Leadership**

Group Behaviour; Types, Functions, Determinants of Group Behaviour, Inter Group Problems, Leadership: Nature and Significance of Leadership, Leadership Styles, Theories of Leadership; Trait Theory, Behavioural Theory, Managerial Grid.

**Module VI: Change and Conflicts**

Organizational conflict, Nature and types of conflict, Management of organizational conflict, Approaches to conflict management, Organizational culture, Learning and maintaining organizational culture, Organizational change, Planned change, Resistance to change, Organization development, Definition, Need for organization development, Organization development process.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# FINANCIAL MANAGEMENT

**Course Code: MGT2301**

**CreditUnits: 03**

## **Course Objective:**

To take decisions which are effective, a manager in any of the functional areas be it Marketing, HR or IT requires a thorough cost and benefit analysis and a feel for Finance so as to look at the long term implications of his/her decision. This course is a "nut and bolts" course on Finance where the basic Financial decisions will be explained through problems and exercises, thus giving the student an understanding and a feel for Financial decision making.

## **Course Contents:**

### **Module I: Introduction to Financial Management**

Evolution of Financial Management, Key activities of Finance Manager Changing Role of Finance Managers, Key Decision Areas in Financial Management, Objectives of the firm.

### **Module II: Financial Statement Analysis**

Introduction, objectives of financial statement analysis, Techniques-Ratio analysis, Comparative analysis and limitations of financial statement analysis, AS-20 (**no numerical**)

### **Module III: Valuation Concepts**

Concept of Time value of Money, Process of Compounding and Discounting, Future Value of a Single amount, Future Value of an Annuity, Present Value of a Single Amount, Present Value of an Annuity, Cost of capital, Weighted average cost of capital, Leverage Analysis

### **Module IV: Financing Decision**

Capital structure, Factors affecting Capital Structure decisions, Theory of Capital Structure Decisions, MM Theory, NI, NOI and Traditional theory, Pecking order theory.

### **Module V: Investment Decision**

Basics of Capital Budgeting, Types of capital budgeting decisions, Estimating cash flows for project appraisal, Green capital budgeting, Non-discounted Cash Flow Techniques: Payback Period, ARR, Discounted Cash Flow Techniques: NPV, IRR, PI. Risk Analysis of Capital Budgeting: Risk adjusted discount rate, Certainty Equivalent Approach.

### **Module VI: Working Capital Management**

Meaning and importance of adequate working capital, Excess or Inadequate working capital, Determinants of working capital requirement, Cash management, Receivable management and Inventory management – Sources of working capital.

### **Module VII: Dividend Decisions**

Importance of dividend decisions, Theories of Dividend decisions: Irrelevance theory, Optimal dividend decision, Relevance theory, Determinants of dividend policy: Bonus Shares, Stock Splits & Buyback of shares. Tax considerations.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# MANAGEMENT INFORMATION SYSTEMS

**Course Code: MGT2302**

**CreditUnits: 03**

## **Course Objective:**

This course focuses on the relationships among management, information, and systems as well as the relationship between a manager's need for information and his/her position in the organization, how hardware, software, data, people, and procedures are combined to form an information system, how information technology can be used by a business organization to gain a competitive advantage why a knowledge of information systems is crucial to anyone who plans a career in business Organization.

## **Course Contents:**

### **Module I: Organizations, Management and Information**

Meaning of MIS, Components of MIS, IS in Business, Data Information and knowledge, Characteristics of Information in context, Issues with Information, System and Subsystems, Organization as a System, Different Organizational Structures: Hierarchical Structure – (Different Levels of Management, Information disposition at different levels), Matrix Structure, Business Process (Management, Operational and Support).

### **Module II: Information Technology Architecture**

Managing Hardware Assets – Considerations in Procurement and installation, Managing Software Assets – Consideration in procurement and configuration, Data Resource Management (Database Management System – Types and Structure of Database, Data Warehousing – Phases in building Data Warehouses in an organization, Data Mining – Data Mining Applications, Data Banking)

### **Module III: Management and Organizational Support Systems for the Firm**

Information, Decision and Management, Decision Support System (Phases in Decision Making, Problems and Decision Types, DSS components, and Analytical Models in Decision Making), Executive Information System – Characteristics and benefits, Managing Knowledge (Knowledge Engineering, Knowledge Management Activities and Knowledge Representation Methodologies), Artificial Intelligence (Domains of AI, AI in Business), Expert System (Components, Benefits and Limitations, Suitability Criteria for ES)

### **Module IV: Building Information Systems in the Digital Firm**

Organizational Planning – Planning at distinct Managerial Levels, Approaches in Planning (Top Down, Bottom Up, Planning through CSF), IT and IS Planning – Prerequisites and factors, IT and IS Architecture (Centralized, Decentralized and Distributed), Implementing IT and IS (Factors and Resistance in implementation), Change Management with BPR, System Development (System Development Life Cycle-Overview, Prototyping), Evaluating Factors for IT and IS services.

### **Module V: Managing Information Systems in the Digital Firm**

Managing Security (Security Challenges of IT, Business and Technological Ethics), Computer Crime (Tools for Computer Crime, Tools for Security Management), IS Security Management Control (Information System Control, Auditing the Security), Managing World Wide Information System (Managing Multi Site IT and IS – Cultural and Technical Differences), World Wide IT and IS Strategies (Multinational, International and Global Strategies)

### **Module VI: Key System Applications for the Digital Age**

Enterprise Systems – Supply Chain Management & Customer Relationship Management Systems, Using Enterprise Applications and Achieving Operational Excellence & Customer Intimacy, E-Commerce: Digital Market & Digital Goods, M-Commerce: Services & Applications, Enterprise Applications: New Opportunities and Challenges.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>C</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# COST ACCOUNTING

**Course Code: MGT2303**

**CreditUnits: 03**

## **Course Objective:**

To get an expert knowledge in the area of cost management and cost control to enable effective management decisions.

## **Course Contents:**

### **Module I: Cost Accounting**

Introduction – Meaning of Cost, costing and Cost Accounting, Comparison between Financial Accounts and Cost Accounts, Application of Cost Accounting, Designing and installing a Cost Accounting system, Cost concepts and Classification of Costs, Cost Module, Cost Center, Elements of Cost, Preparation of cost sheet, Tenders and Quotations, Problems.

### **Module II: Material Costing**

Classification of materials, Material Control, Purchasing procedure, store keeping, techniques of Inventory control, Setting of stock levels, EOQ, Methods of pricing materials issues, LIFO, FIFO, Weighted Average Method, Simple Average Method, Problems.

### **Module III: Labour Costing**

Control of labour cost, Labour Turn Turnover, Causes and effects of labour turnover, Meaning of Time and Motion Study, Merit Rating, Job Analysis, Time keeping and Time booking, Idle time, causes and treatment, Overtime, Methods of Wage Payment, Time rate and Piece Rate, Incentive Schemes.

### **Module IV: Overhead Costing**

Definition, Classification of overheads, Procedure for accounting and control of overheads, Allocation of overheads, Apportionment of overheads, Apportionment of Service department costs to production departments, Repeated Distribution method, Simultaneous equation method, absorption of OH's, Methods of Absorption, Percentage of direct material cost, Direct Labour Cost, Prime Cost, Direct Labour hour rate and Machine Hour Rate, Problems.

### **Module V**

Costing Methods Introduction, Job Costing, Batch Costing, Contract Costing, Process Costing, principles, distinction between Process and Job, Preparation of process accounts, treatment of normal loss, abnormal loss, abnormal gain, Joint and By-products, Service costing.

### **Module VI**

Reconciliation of Cost and Financial Accounts, Need for reconciliation, Reasons for difference in profits, Problems on preparation of Reconciliation statements including Memorandum Reconciliation account.

### **Examination Scheme:**

Components	A	CT	C	H	EE
Weightage (%)	5	15	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# ANALYTICAL DECISION MAKING

**Course Code: MGT2304**

**Credit Units: 02**

## **Course Objective:**

To develop in students skills of analytical and logical reasoning this will be a great asset for them in their future careers.

## **Course Contents:**

### **Module I: Quantitative Reasoning**

Number System & Number Theory, Percentage method, Profit & Loss, Speed, Time & Distance

### **Module II: Quantitative Reasoning**

Ratio, Proportion, Mixtures & Alligations, Set Theory, Co-ordinate Geometry (2-D only), Mensuration

### **Module III: Data Interpretation**

Bar Graph, Line Graph, Pie Chart, Table, Table Three Dimensional or Triangular Bar Diagram, Misc. (Radar, Area, Network), Caselets.

### **Module IV: Data Sufficiency & Logical reasoning**

Mathematical, reasoning based, Data Decoding: Analytical: Assumption, Courses of Action, Argument, Weak/ Strong, Pictorial Analysis

### **Module V: Verbal Ability, Reasoning & Reading Comprehension**

Vocabulary based questions, English Usage, Grammar Types of statements and their relationship / Reversibility of idea, Re-arranging sentences of a paragraph, Paraphrasing, Fact, Inference, Judgment & deductions. Four types of Passages: The social science passage, The Science passage, the business passage & the entertainment passage.

### **Module VI: General Awareness and Current Affairs**

Economic, Political, Financial & Social Affairs based on International & Indian Issues.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

- This course is aimed at enhancing students' skills in the area of English, General knowledge and Quantitative aptitude. No textbooks or reference books are required as the course is carried out in the form of classroom exercises, which are circulated by the faculty himself.

# MERGERS AND ACQUISITIONS

**Course Code: ECO2304**

**CreditUnits: 03**

## **Course Objective:**

The main objective of this course is to familiarize the students with the basic aspects of mergers and acquisitions.

## **Course Contents:**

### **Module I: Mergers and Acquisitions – Overview**

Introduction – Forms of Corporate Restructuring, Expansion, Mergers and Acquisitions, Tender Offers, Joint Ventures, Sell Offs, Spin Offs, Split Offs, Split Ups, Divestitures, Equity Carve outs, Corporate Control, Premium Buy Backs, Standstill Agreements, Anti Takeover Amendments, Proxy Contests, Changes in Ownership Structures, Share Repurchases, Exchange Offers, Leveraged Buy, out, Going Private, Issue Raised by Restructuring, History of Merger Movements.

### **Module II: Mergers and Acquisitions**

Economic Rationale for Major Types of Mergers, Horizontal Mergers, Vertical Mergers, Conglomerate Mergers, Concentric Mergers.

### **Module III: Theories of Mergers**

Efficiency Theories, Differential Efficiency, Inefficient Management, Operating Synergy, Pure Diversification, Financial Synergy, Strategic Realignment to Changing Environments, Undervaluation, Information and Signaling, Agency Problems and Managerialism, Takeovers as a Solution to Agency Problems

### **Module IV: Divestment of Public Sector Undertakings and Leveraged Buy-outs**

General Economic and Financial Factors illustration of an LBO

#### **Takeover Defenses**

Anti-Takeover Amendments, Any case study

## **Examination Scheme:**

Components	CT	C	HA	A	EE
Weightage (%)	10	10	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# INDUSTRIAL PSYCHOLOGY

**Course Code: MGT2305**

**CreditUnits: 03**

## **Course Objective:**

This course is designed to provide an overview of I/O Psychology including individual, group, and organizational issues resulting in enhanced understanding of the world of business and related career concerns. The main aim is to create awareness about the role and importance of Psychological factors and processes in the world of work

## **Course Contents:**

### **Module I: Introduction**

Nature and scope of organizational Psychology, History and development of field, Major problems of Industrial Psychology, Current trends in organizational Psychology

### **Module II: Types of Psychology**

Mental psychology, Male & Female psychology, Impact on behavior and efficiency

### **Module III: Test of Psychology**

Types of Tests, Effectiveness of these tests, Measures to control the tests steps to improve the psychology

### **Module IV: Individual and group behavior**

Interaction and psychology involved in individuals, Improving psychology, Group Dynamics, Characteristics of group behavior, Attitude measurement, Methods of measuring attitudes, Leadership and supervision, Theories of Leadership.

### **Module IV: Performance Management**

Performance appraisal- Introduction, types, importance, Training and development- Introduction, significance and categories/types.

## **Examination Scheme:**

Components	C	HA/P	CT	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TERM PAPER

**Course Code: MGT2331**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from Indian any industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

# PROJECT

Course code: MGT2332

Credit Units:03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexure:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

### Declaration

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGT2333**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

## BUSINESS ENVIRONMENT

**Course Code: MGT2451**

**CreditUnits: 03**

### Course Objective:

The aim of the course is to orient the students towards the basic concepts of Indian and global business environment.

### Course Contents:

#### Module I: Overview of Business Environment

Meaning and types of business environment, Internal and external environment, Micro and macro environment, Factors (Cultural, social, Political economic legal, demographic and technological) effecting business environment.

#### Module II: Indian Industrial environment

Industrial policy up to 1991, New industrial policy, Liberalization, Privatization and Globalization process in India, Disinvestment, Industrial sickness, MRTP act 1969, Competition law 2002, Foreign Exchange Regulation Act and Foreign Exchange Management Act (FERA and FEMA).

#### Module III: Financial Environment

Indian money and capital markets: meaning, functions and constituents, Stock exchange- importance and functions, SEBI, Capital market reforms and development, Industrial financial institutions (IDBI, SIDBI, ICICI, IFCI etc.).

#### Module IV: Labour Environment

Labour legislation in India, Social security benefits, Industrial disputes- causes and preventive measures, Settlement of disputes, International Labour Organisation (ILO), Trade union- meaning and functions, Trade Union Act.

#### Module V: Economic Planning and Development

Planning in India- needs and objectives, five year plans, planning commission, 11<sup>th</sup> five year plan, Green and white revolution- achievements and failures, Second green revolution, foreign trade policy 2009, Export processing zones, Export oriented units, Special economic zones (EPZ's, EOU's, SEZ's) and trading houses in India.

#### Module VI: Global Environment

Bretton woods system, features of Uruguay round of negotiations, GATT/ WTO- role, functions and ministerial conferences, IMF, World Bank (International Bank for Reconstruction and Development), Regional economic cooperation institutions, SAARC, EU, NAFTA and ASEAN.

### Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# PRODUCTION AND OPERATIONS MANAGEMENT

**Course Code: MGT2401**

**CreditUnits: 03**

## **Course Objective:**

The course is oriented to familiarize the students with fundamentals of Production and Operations Management, and tools and techniques used in taking decisions in operating and controlling the Production and Service Industries. Further this course will familiarize the students with Quality Management and Current Quality Tools used in Production and Service Industries.

## **Course Contents:**

### **Module I: Overview of Production and Operation Management**

Brief history of Production and Operation Management, Service Revolution, Definition, Factors Affecting Operations Management, Role- Scope and Function of Production and Operation Management, Criteria of Performance for the Production and Operation Management, Operation Strategies, Effect of Growth of Service Sector on Operations Management

### **Module II: Demand Forecasting & Capacity Planning**

Qualitative Forecasting Methods (Educated Guess, Consensus, Delphi Method, Historical Analogy, Market Research), Quantitative Forecasting (Linear Regression, Moving Average, Weighted Moving Average, Exponential Smoothing with Numerical), Definition of Production Capacity

### **Module III: Facility Location and Facility Layout**

Factors Affecting Location Decisions, Quantitative Techniques in Facility Location (Factor Rating Method, Centre of Gravity Method, Load Distance Method, Break Even Analysis Method – Numerical for each method), Utilization of GIS in Plant Location.

Principles of Facility Layout, Types of Layout (Process Layout, Product or Line Layout, Fixed Position Layout), Basics of Line Balancing –(No Numerical), Merits and Demerits of Product and Process Layout

### **Module IV: Production Planning and Control**

Capacity Planning, Aggregate Planning, Master Production Scheduling.

Production Planning and Control Systems (Push System, Pull System)

Job Shop Scheduling and its Criteria (Mean Flow Time, Mean Tardiness, Number of Tardy Jobs - Numerical), Single Processor Job Shop Scheduling (Due Date Method, Shortest Processing Time Method - Numerical).

Two Machines Scheduling – Johnson's Rule – (Numerical).

General Job Shop Scheduling – Earliest Due Date Method – (Numerical)

### **Module V: Inventory Management, Supply Chain Management & Logistics Management**

Basic Concepts of Inventory Management, Lead time, Safety Stock, Elements of Inventory Costs, Inventory Models – EOQ –(Derivation and Numerical), EOQ with Quantity Discount – (Numerical), Fixed Order Quantity Model - No Numerical, Fixed Order Period Model - (No Numerical).

Basic Concepts, Objectives of Supply Chain Management, Decision Phases in Supply Chain Management.

Basic Concepts of Logistics Management, Warehousing, Material Handling Equipments

### **Module VI: Foundations of Quality, Quality Control, TQM**

Concept of Quality - Gurus of quality a Comparative Discussion on Edward Deeming, David Juran and Philip Crosby - their Philosophy contribution and limitations.

Statistical Quality Control (Mean and Range Charts, c Chart, p Chart – (Numerical), Basic Concepts of Acceptance Sampling, OC Curves – (No Numerical).

Basic Concepts of TQM, 5 –S and Kaizen, 6-Sigma.

ISO Standards, and ISO Certification.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# RESEARCH METHODOLOGY AND REPORT PREPARATION

**Course Code: MGT2402**

**Credit Units: 03**

## **Course Objective:**

To provide an exposure to the students pertaining to the nature and extent of research orientation, which they are expected to possess when they enter the industry as practitioners. To give them an understanding of the basic techniques and tools of marketing research. To train the students in evaluating and developing the marketing information system.

## **Course Contents:**

### **Module I: Introduction**

Nature and scope of marketing research, Marketing research as input in decision making process, Marketing research and marketing information system. Applications of marketing research, Planning a research project, Problem identification and formulation of Research Design, introduction to Research Design, Market research on the Internet.

### **Module II: Data collection methods**

Attitudes measurement and scaling techniques, Ratio, Interval, Ordinal and Nominal scales, Likert's scale, Thurstone scale, Semantic differentiation method, Observation methods and questionnaire method, Questionnaire design, Steps in constructing a questionnaire, Types of questions, introduction to Projective techniques and perceptual mapping.

### **Module III: Sampling**

Sampling decisions, Sampling frame, Sample selection methods - Probability and non probability, Sample size, sampling error, Application of sampling methods to marketing problems.

### **Module IV: Data Collection Field Force**

Data collection field force, Fieldwork procedure, common sources of error in the fieldwork, minimizing fieldwork errors, Tabulation of collected data.

### **Module V: Data Analysis**

Data analysis-I, Test of significance Z, t, F and chi-square, Data analysis-II, Correlation and Regression techniques, Data analysis – III – Cluster Analysis, Introduction to Statistical Package

### **Module VI: Report Writing**

Research presentation and research process examination; Report writing - Types of research report. Examination of the research procedure, Selected applications of marketing research, identifying market segments, Product research, Advertising research.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# MANAGEMENT ACCOUNTING

**Course Code: MGT2403**

**Credit Units: 03**

## **Course Objective:**

To provide the students knowledge about the use of costing data for planning, control and decision making.

## **Course Contents:**

### **Module I: Management Accounting**

Meaning and Definition, Nature & Scope: Objectives of Management Accounting, Management Accounting and Financial Accounting, Management Accounting and Cost Accounting, Utility of Management Accounting, Limitations of Management Accounting, Position of Management Accountant in the Organization.

### **Module II: Cash Flow Analysis**

Distinction of Cash from Funds, Utility of Cash Flow Statement, Construction of Cash Flow Statement

### **Module III: Budgets and Budgetary Control**

Concept of Budgets and Budgetary Control, Nature and Objectives of Budgetary Control, Advantages and Limitations of Budgetary Control, Establishing a system of Budgetary Control, Preparation of Sales Budget, Selling and Distribution Cost Budget, Production Budget, Purchase Budget, Cash Budget, Flexible Budgets and Master Budgets.

### **Module IV: Responsibility Accounting**

Concept of Responsibility Accounting, Cost Centers and Profit Centers, Contribution by Segments

### **Module V: Marginal Costing**

Meaning, assumptions, cost- volume profit analysis, Break- Even analysis, Decision making areas- product mix, make/ buy, pricing decision.

## **Examination Scheme:**

Components	A	CT	C	H	EE
Weightage (%)	5	10	10	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# BUSINESS INFORMATION AND DATABASE SYSTEM

**Course Code: MGT2404**

**CreditUnits: 03**

## **Course Objective:**

The aim of this course is to introduce the students to the managerial issues relating to information systems, its role in organization and how information technology can be leveraged to provide business value.

## **Course Contents:**

### **Module I:**

MIS need and concepts, characteristics, Typology of MIS, Structure of MIS. Planning for MIS, System Development Methodologies, Conceptual and detailed designs of MIS, System Implementation strategies and process, System Evaluation and Maintenance.

### **Module II:**

Introduction to data base management system- Data versus information, record, file; data dictionary, database administrator, functions and responsibilities, file-oriented system versus databases system.

### **Module III:**

Advanced Concepts in Information Systems: Enterprise Resource Planning, Supply Chain Management, Customer Relationship Management, Data, Warehousing and Data Mining.

### **Module IV:**

Database system architecture- Introduction, schemas, sub schemas and instances; data base architecture, data independence, mapping, data models, types of database systems.

### **Module V:**

Data base security- Threats and security issues, firewalls and database recovery; techniques of data base security; distributed data base.

## **Examination Scheme:**

Components	C	H	CT	V	A	EE
Weightage (%)	5	5	10	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# PERSONAL FINANCIAL PLANNING

Course Code: MGT2405

CreditUnits: 03

## Course Objective:

Post Liberalization, India has witnessed a phenomenal growth in her GDP. With the advent of MNC's, and growth in private business, individual's income and saving pattern has changed. Therefore the need arises to manage these funds in a manner that it is no more called as savings but addressed as a need for Personal financial planning. This course is essential for every student irrespective of the specialization as every individual needs to plan his finances.

## Course Contents:

### Module I: Introduction to personal financial planning and personal accounting

Concept of Personal Financial Planning: Need, Significance, Scope; Ethical issues in Personal Financial Planning; Changing per capita investors. Need to maintain Accounts, Methods: Traditional & Using Electronic Media. Applying for PAN & filing of Income Tax returns.

### Module II: Investment Avenues

**Real Assets:** Investment in Real Assets: Real Estate, Precious Metals, Other Fixed assets. Their relative merits & demerits. Change in their returns over the past few years.

**Financial Assets:** Investments in securities: Through IPO, Secondary Market. Investment in G-sec; Debt instruments, Post Office instruments, Insurance Policies, Mutual Funds, Certificate of Deposits, Foreign Market.

### Module III: Introduction to Income tax and Income from salary

Introduction to Income tax act 1961 and Finance Act. Previous year, Assessment year, Income, Total Income, Gross Total Income, Capital and Revenue Receipts / Expenditures, Exempted Incomes, Residential Status and incidence of Tax.

Salary, Exemption:- Leave encashment, Gratuity, Pension, Annuity, Pension fund, Allowance (HRA, Entertainment, Special allowance – dependent of expense ad not dependent on expense, perquisites – rent free accommodation, Leave travel concession, medical facility), Deductions 80c to 80u. ). Sections (2(9), 2(31), 2(7), 2(24), 3, 6, 14, 288A, 288B, 2(17), 4, 9, 45, 9(1)(ii), 9(1)(iv), 9(1)(v), 10, 11, 12, 17(1), 22,

### Module IV: Income from house property, capital gains and other sources

Income from House Property (Types of house property, Exempted house property income, Computation of GAV and NAV, Treatment of unrealized, recovered and arrears of rent), Capital Gains and other Sources (Short term & Long term capital gain, Cost of acquisition, Cost of improvement, Index cost, Income that are taxed under other sources, Deduction under other sources, Tax treatment of lotteries, puzzles. Sections 23, 24, 25, 28, 30, 31, 32.

### Module V: Tax planning

Concept, significance and problems of tax planning, Tax evasion and tax avoidance, Individual Taxation Slabs, Wealth Tax, Gift Tax, Capital Gains Tax, Service tax, Recent Tax saving schemes

### Module VI: Retirement & Goal Planning

Concept of risk assessment of individual, Introduction to portfolio management, Retirement planning & investment: Income generation after retirement, liability management, anticipation of expenses. Investment for major goals: House, Family, Education, Medical, Wealth Management/ Financial Advisory companies. Their role, significance & growth.

## Examination Scheme:

Components	P	C	CT	A	EE
Weightage (%)	10	5	10	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# SALES AND DISTRIBUTION MANAGEMENT

**Course Code: MGT2406**

**Credit Units: 03**

## **Course Objective:**

The major objective of this course is to acquaint the students with the theory and practice of Management of Sales Operations.

## **Course Contents:**

### **Module I: Introduction**

Sales management- Concept, Objectives and functions. Evolution of sales management. Nature and role of Sales Manager's job. Sales management as a career. Emerging trends in sales management.

### **Module II: Sales Organization**

Purpose of sales organization. Setting sales organization. Types of sales organization. Coordination of selling functions with other marketing activities. Sales forecasting.

### **Module III: Controlling sales effort**

Sales Budget: Purpose and budgetary procedure. Quotas: Concept, Objectives and Types. Sales Territory: Concept and procedure of devising sales territories, Routing and Scheduling of Sales force. Sales Audit.

### **Module IV: Managing Sales Force**

Concept of sales force management. Recruitment and Selection of sales personnel (domestic and international perspective). Cross Cultural challenges. Sales training. Compensating and motivating sales personnel. Controlling and evaluating sales personnel.

### **Module V: Distribution Management and channel control**

Distribution channels: Concept and need. Distribution Channel Strategy. Managing distribution channel. Features of effective channel design. Channel Conflict: Concept and stages. Conflict management.

### **Module VI: Logistics Management**

Objectives of logistics. Concept of logistics planning: inventory management decisions, transportation decisions, Location decisions.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TERM PAPER

**Course Code: MGT2431**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from any Indian industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organization and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGT2432

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

### Declaration

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been  
submitted earlier to any other University /Institution for the fulfilment of the requirement for any  
course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report  
from any earlier work done by others or by me. However, extracts of any literature which has been  
used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGT2433**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of at least 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

## OPERATIONS RESEARCH

**Course Code: MGT2551**

**Credit Units: 03**

**Course Objective:**

The objective of this paper is to make students familiar with basic concepts and tools in Operations Research. These techniques assist in solving complex problems and help in decision making.

**Course Contents:**

**Module I: Introduction**

Introduction to Operations Research, Definition, scope and limitations of Operations Research

**Module II: Linear Programming**

Linear Programming – Basic Concepts, Model formulation; Solution methods – Graphical Solution method, Simplex method (problems involving only upto 3 constraints and of inequality <), Application of LPP in business decision making.

**Module III: Transportation Problem**

Transportation problem- Initial Basic feasible solution (North - West corner rule, Vogels approximation method), Test for optimality (Modified Distribution (MODI) method)

**Module IV: Assignment Problem**

Assignment Problem – Introduction, Approach of the Assignment model, Solution Methods (Hungarian method)

**Module V: Game Theory**

Game Theory - Concept and definition; Solution methods of Pure Strategy games (with saddle point), Significance of Game Theory.

**Module VI: Queuing & Simulation**

Introduction, Elementary queuing system, Introduction to Single – channel queuing model (with Poisson arrivals and Exponential service times), (no numerical); Introduction to Simulation, applications, advantages and drawbacks of simulation, Introduction to Monte – Carlo Simulation, Role of computers in Simulation.

**Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# INTERNATIONAL BUSINESS MANAGEMENT

**Course Code: MGT2501**

**CreditUnits: 03**

## **Course Objective:**

To introduce students to the contemporary issues in International Business that illustrate the unique challenges faced by managers in the international business environment.

## **Course Contents:**

### **Module I: Introduction to International Business**

Nature and scope of international business. International business environment, Classical theory of international trade: Absolute cost advantage theory, comparative cost theory, and Modern theory of international trade. Michael Porter model of competitive advantage of nations, Globalization – forces, Meaning, dimensions and stages in Globalization.

### **Module II: International Business Environment**

Tariff and non-tariff barriers, General Agreement on Trade and Tariffs (GATT), World Trade Organization, Important Ministerial Conferences & their outcomes, Dispute settlement mechanism under WTO, Regional Integrations, Trade Blocks – nature and levels of integration, arguments for and against regional integration.

### **Module III: Modes of International Entry**

International Business – Entry modes, Franchising, Exporting, Licensing, International Agents, International Distributors, Cross Border Mergers & Acquisitions, Strategic Alliances, Joint Ventures, Overseas Manufacture and International Sales Subsidiaries, Outsourcing, FDI, FII, PN

### **Module IV: International Financial Management**

Introduction to International Financial Management –International Monetary System, exchange rate system (floating and fixed) Financial Markets and Instruments- Introduction to Export and Import Finance – ECGC & EXIM Bank, Methods of payment in International Trade: Letter of Credit, Banker's Acceptance, Draft.

### **Module V: Forex Exposure**

Country Risk Analysis, Political, Social and Economic, Types of Forex Exposure: Accounting, Operating & Transaction – their management, An introduction to interest rate exposure.

### **Module VI: Foreign Trade Procedure**

An Introduction to Foreign trade Policy and its impact on different sectors of the Economy. Documentation Framework: Types, Characteristics of Document, Export Contract - INCO Terms - Processing of an Export Order.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# ENTREPRENEURSHIP DEVELOPMENT

**Course Code: MGT2502**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to provide students an understanding of entrepreneurship & the process of creating and growing a new venture. The course also focuses on giving the students the concept of an entrepreneur who is willing to accept all the risks & put forth the effort necessary to create a new venture.

## **Course Contents:**

### **Module I: Basic Concepts**

Qualities, Characteristics of an entrepreneur, Venture idea generation, Ideas and the entrepreneurship, Women entrepreneurs, Preliminary Screening, Drawbacks or Problems of entrepreneurship, Reasons of failure, Overview of setting up an enterprise with organizational forms – MSMED Act and SMERA Overview.

### **Module II: Project Appraisal**

Pre-feasibility Report, Project Report, Comparative Rating of Product ideas, Cash Flow, Financial Analysis and Planning, Sources of Finance, Stages of Project Feasibility Analysis-Market, Technical, Financial, Social Analysis, Project Implementation Stages

### **Module III: Financial Analysis**

Financing the project, Sources of finance, Venture Capital Sources, What Investor looks in the Investment Proposal, Outline for a Venture Capital Proposal, Sources of finance from different banks, Proposal with IDBI etc.

### **Module IV: Market and Materials Management Analysis**

Vendor development, vendor selection decision factors, methods of price determination, direct and hidden cost in material management, market development, market feasibility, activities and decisions in materials management – International Markets.

### **Module V: Project Management**

Steps and procedure for setting up small scale, Role of Banks and Financial Institutions in Development, E-Commerce, E-Business, E-Auction, Project management problems. SEZ, Cluster Development.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# SUMMER INTERNSHIP EVALUATION

Course Code: MGT2535

CreditUnits: 06

## Objectives:

The basic objective of a summer internship is to provide first hand practical exposure of the corporate functioning and to acquaint students with the culture of corporate. The summer training will also provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus, this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

## General Guidelines:

Every student of under graduate courses will be required to undergo a practical training in a corporate organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the fourth semester examinations. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific project to the candidate, which will be completed by him/her during the period of training. The work done by the candidate during the training period shall be submitted in the form of a report as per the guidelines provided by the Department.

## Chapter Scheme for the SIP Report:

Chapter I: Introduction	- 20 marks
Chapter II: Conceptual Framework/National/International Scenario	- 5 marks
Chapter III: Presentation, Analysis and Findings	- 35 marks
Chapter IV: Conclusion and Recommendations	- 15 marks

The report has to be written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise of a maximum of 70 pages and has to be submitted in two copies.

## THE COMPONENTS OF A SIP REPORT

The outcome of Summer Internship is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexure:** Questionnaires (if any), relevant reports, etc.

**Evaluation Scheme:**

<b>SIP Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

# CONSUMER BEHAVIOUR

**Course Code: MGT2503**

**Credit Units: 03**

## **Course Objective:**

To develop an understanding of how consumers behave and use the knowledge to adopt appropriate marketing strategies.

## **Course Contents:**

### **Module I: Introduction**

Consumer Behaviour: Definition and significance, Understanding consumer and market, Difference in individual buyer behaviour and organizational buyer behaviour, Market segmentation: lifestyle and demographic segmentation, usage segmentation, benefit segmentation, Product positioning.

### **Module II: Environmental influences**

Culture: Meaning and Characteristics, Cross Cultural understanding of Consumer Behaviour, Subculture, Social Groups: Meaning and formation of a group, Reference groups, Influence of reference groups on consumer behaviour, Family: Lifecycle and its significance on consumer behaviour, Family purchase decision process.

### **Module III: Personal influence and Diffusion of Innovation**

Concept, nature and significance of personal influence, Opinion leadership and its role in consumer behaviour, Concept of product adoption and adoption process, Diffusion of innovation and process of diffusion.

### **Module IV: Individual determinants of Consumer Behaviour**

Personality and self concept and its relevance in consumer behaviour, Motivation: Nature and role of motives and their significance in marketing, Information processing: Concept and Process, Attitudes: Characteristics, functions and its importance in buyer behaviour.

### **Module V: Consumer Decision process**

Consumer decision process model, Problem Recognition, Search and Evaluation, Purchasing Process, Post-purchase Behaviour: Post Purchase evaluation and Product disposition.

### **Module VI: Organizational Buyer Behaviour**

Nature of Organizational Buying Behaviour, Factors influencing organizational buyer behaviour, Types of decision situations, Organizational buyers decision process.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# SERVICE MARKETING

**Course Code: MGT2504**

**Credit Units: 03**

## **Course Objective:**

The course has been designed to familiarize students with characteristics of services, their design and delivery and the complexities of handling intangibles.

## **Course Contents:**

### **Module I: Services an Overview**

Services: concept, characteristics, Marketing of goods v/s marketing of services, Significance of services marketing, Role of services sector in economy, Growth of service sector, Services- Global and Indian Scenario, Introduction to service marketing mix; classification of services.

### **Module II: Consumer Behaviour in Services**

Consumer decision-making process, Consumer Expectations: Concept, Factors influencing customer expectation of services, Service encounter and moments of truths, Managing Customer Satisfaction, Service failure and recovery.

### **Module III: Service Quality & Productivity**

Managing service operations. Concept of productivity in service context. Approaches to improve productivity, Managing service demand and capacity: Understanding capacity constraints, understanding demand patterns, Strategies for matching demand and supply; service blueprinting, physical evidence & Servicescape.

### **Module IV: Service Quality**

Concept of service quality, Gap model of service quality, Measuring & improving service quality, Concept of SERVQUAL system, Concept of CRM & enhancing quality through it, Introduction to Six Sigma.

### **Module V: Managing service personnel**

Role of service personnel and developing customer-focused personnel, Job characteristics, Internal marketing, strategies for delivering quality through people.

### **Module VI: Pricing and Distribution for services**

Price determinants, pricing modifications, Approaches to pricing services, Pricing strategies linking to value definitions, Customer-focused pricing, Channel structures, distribution-growth options.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# TERM PAPER

**Course Code: MGT2531**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from any Indian industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGT2532

Credit Units: 03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- e. *Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- f. *Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- g. *Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- h. *Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

### **Guidelines for Evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

### **Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

**Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# FINANCIAL SERVICES

**Course Code: MGT2506**

**CreditUnits: 03**

## **Course Objective:**

The aim of the course is to orient the student to the recent changes in the financial institutions and financial services industry and their link to economic development. The financial institutions and services are changing rapidly. A course that merely describes the existing institutions and services will not prepare you for the change. Thus you must familiarize yourself with the services available in the industry today and understand why they are the way they are and why they are changing. An Indian perspective will be given.

## **Course Contents:**

### **Module I: Financial Services**

Role of Financial Services in economic development, Evolution of Financial Services Sector in India, Marketing of Financial Services (Introduction)

### **Module II: Venture Capital**

Venture Capital Financing, International Experiences in Venture Capital Financing, Venture Capital Financing in India, Pitfalls to be avoided, Preparation & evaluation of Business Plan

### **Module III: Factoring & Forfaiting**

Factoring Services - Features Merits and Demerits, Cost Benefit Analysis, Forfaiting: Features, merits & Limitations

### **Module IV: Leasing and Hire Purchase**

Development of Leasing and Hire Purchase, Types of Leasing, Pricing Methodology and Financial analysis, Taxation, Legal Framework for Leasing and Hire Purchase Companies

### **Module V: Mutual Funds**

The concept & Role of M/Fs, History of M/Fs in India, Types of M/Fs, Fund Structure & constituent, Selecting the right Investment Products for Investors, Comparison of Investment products, Measuring of Risk In M/Fs, Recommending model Portfolios & selecting the right funds.

### **Module VI: Credit Rating & other Financial Services**

Credit rating concept of Credit rating, Types of credit rating, Advantages and Disadvantages of credit rating, Credit rating agencies and their methodology and process, Individual Credit rating, Sovereign Credit Rating Practices. Custodial Services, Credit Cards

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE

# PRINCIPLES OF INVESTMENT MANAGEMENT

**Course Code: MGT2507**

**Credit Units: 03**

## **Course Objective:**

The course aims at equipping the undergraduate students with financial tools, which help in making decisions for investment in financial securities. It is also aimed at imparting a basic understanding of the influence of changing economic scenario on the decisions and important theories and models, techniques and regulations underlying these decisions.

## **Course Contents:**

### **Module I: Introduction to Investments**

Investments: Introduction, Avenues for Investment including introduction to derivatives, Investments and Speculation, Features of a Good Investment programme, Process of Investment Decision Making, Risks involved in Investments including the concept of beta, Principle of Dominance.

### **Module II: The Stock Markets in India**

Nature and Functions of the Stock Market, OTCEI & BSE, NSE & Role of Depositories, Market Indices, Brokerage Business

### **Module III: Valuation of Securities**

Bond Valuation and Analysis, Preference share Valuation and Analysis, Equity Share Valuation

### **Module IV: Security Analysis**

Fundamental Security Analysis, Technical Security Analysis

### **Module V: Portfolio Analysis and Management**

Portfolio Analysis: Risk and Return, Portfolio Choice: Utility Theory and Indifference Curves, Markowitz: Portfolio Selection Model, Capital Asset Pricing Model, Sharpe's Single Index Model and Portfolio Evaluation Treynor, Sharpe and Jensen.

## **Examination Scheme:**

# FINANCIAL DERIVATIVES

**Course Code: MGT2508**

**CreditUnits: 03**

## **Course Objective:**

This course attempts to give an overview of the derivatives market with special reference to India. A financial manager must understand how derivatives can be used to the advantage of the firm. An introduction to Derivatives will equip the students to understand the mechanics of this highly intriguing & innovative field of study

## **Course Contents:**

### **Module I: Introduction to financial derivatives**

Introduction to derivative trading, Characteristics of derivatives, Underlying assets (Equity Bonds/loans, Foreign Currency, and Commodity), Importance of derivatives as an investment option, introduction to types of derivatives, Participants in derivatives market (Hedgers, Speculators, Arbitrageurs), Evolution of Derivative markets in India

### **Module II: Forwards & Futures**

Forward contracts: Limitations of forward markets, Differences between forwards and futures, Futures terminology, Pricing of futures contract, Introduction to currency futures, Interest rate futures, Treasury bond futures, Eurodollar futures, Commodity futures, Index futures & Stock Futures (Hedging, speculation and arbitrage).

### **Module III: Options: Fundamentals**

Terminology - call, put, writer, buyer, premium, intrinsic value, time value, expiry date, settlement date, strike price, ATM, OTM & ITM, Options positions (payoff graphs), Types of Stock options, Futures options vs Spot options, Options on stock Indices, Currencies & futures, Warrants & Executive stock options, Exotic options

### **Module IV: Principles of trading & Hedging with Options**

Option Valuation: The BS-Merton Model (Solving for BS model, assumption application and criticism), Trading strategies - Option trading using bull and bear spreads (payoff graphs)

### **Module V: Swaps**

Terminology: LIBOR, MIBOR, Swap basis, Interest rate swaps, Determining LIBOR/MIBOR swap zero rates, Currency swaps: Various types of swaps & features, Introduction to Swaptions.

### **Module VI: Recent Developments**

New Derivative contracts including Credit Derivatives, Weather Derivatives, Energy Derivatives etc, Role of derivatives in the economic meltdown of 2007 - 2008, Major Derivative mishaps in the world including The Barrings Bank disaster, The Sumitomo Corporation Scandal, the Swiss Bank Scam

## **Examination Scheme:**

Components	P	C	CT	A	EE
Weightage (%)	10	5	10	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# ORGANISATIONAL DEVELOPMENT AND CHANGE

**Course Code: MGT2509**

**Credit Units: 03**

## **Course Objective:**

It aims to provide a conceptual input of meaning, characteristics, process and influences of organizational development and change management. It gives comprehensive overview of human capital from the prospective of organizational excellence in the light of transitional phase of Indian Industries. It gives the imperatives, assumptions, role and skills of O.D. specialists through experiential learning methods. It facilitates teamwork, team building and the concepts of transformational Leadership.

## **Course Contents:**

### **Module I: Organizational Development**

Nature, Assumptions, Characteristics & Importance, Values and assumption.

### **Module II: Organizational Development Process**

Steps involved in OD, Role of Managers, Factors affecting OD.

### **Module III: Implementation of Change Models**

Lewin's force field analysis, Kotler's eight step model, action research model.

### **Module IV: Structural and Comprehensive OD Interventions**

Classification of OD interventions: Human Process, Techno structural, HRM, Strategic interventions, Evaluation and institutionalization of interventions.

### **Module V: Change Management**

Need for the change, Factors causing change, environmental, Technological, Legal, Political, Social and cultural factors of change, Models and Techniques involved in change management, Total Quality Management, Business Process Reengineering, Learning Organization.

### **Module VI: OD Process**

OD process, Role & styles of OD practitioners, contemporary OD issues for today's managers.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TRAINING AND DEVELOPMENT

**Course Code: MGT2510**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to help students acquire and enhance their knowledge of how to plan, develop, carry out, and evaluate training and executive development programmes in Business Organizations.

## **Course Contents:**

### **Module I: Introduction**

Meaning and definition of training, Training vs Education, Culture and Context, Introduction to training Strategy.

### **Module II: Process of Training**

Establishing objectives, Training need assessment, Designing the programs, Training methods, Trainers and training styles, Introduction to Management Development program.

### **Module III: Evaluation of Training & Development**

Training Evaluation – Need for evaluation, Measuring Training Effectiveness, Concept of Return on Investment, Cost – Benefit Analysis, Models of Training Evaluation.

### **Module IV: Training Systems**

Action Research for better training, Knowledge management, Career development, Succession planning, Diversity training, Orientation training.

### **Module V: Changes in Training Needs for Modern Organizations**

Concept and Need for Learning Organizations, Training for Trainers, Leadership, Team Playing and Group Dynamics, Basics of Sensitivity Training, Computer Based Training.

### **Module VI: Development**

Executive Development – significance & nature, Identifying development needs and setting objectives. Techniques of development and advantages, Role of HRD in 21<sup>st</sup> Century.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# INTERNATIONAL HUMAN RESOURCE MANAGEMENT

**Course Code: MGT2511**

**CreditUnits: 03**

## **Course Objective:**

The main objective of this course is to explore the dynamics of global business development and to prepare the students about examining significant business investment opportunities and maximization of returns in context with human resources.

## **Course Contents:**

### **Module I: Internationalization**

Broad overview of International Human Resource Management features, Elements, Benefits and Limitations, Domestic and International HRM, Factors influencing the global work environment.

### **Module II: Strategic Human Resource Management**

Strategic HRM, Aims of SHRM, Integrating the business and HR strategies, Formulating HR strategy, Content of HR strategies, Relationship between International Strategy and SIHRM

### **Module III: Cross-Cultural Management**

Cultural diversity in consortia formation, Developing cognitive framework to appreciate the impact of culture on managerial behaviour, Introduction, Understanding Culture, Key Concepts, Determinants of Cultural Identity, Frameworks for Mapping the Culture, Concept of Geert Hofstede

### **Module IV: International Recruitment, Training and Rewards**

Recruiting from Host country, Reward strategies for international execution, The expatriate approach, International values and reward policy, Designing rewards for the international business unit, Training Global executives.

### **Module V: Performance Management and Compensation in International Business**

Context for international performance management, framework for performance management, Compensation, Issue of double taxation.

### **Module VI: Best HR Practices**

Emerging Trends, North America, South America, Some key pointers, Northern Europe, Value based management in Nordic countries, China emerging economy, Japan – a culture of enfolding relationship, Trends and Future of HR in high performing Co., Essay on Dream Organisational.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# RELATIONAL DATABASE MANAGEMENT SYSTEM

**Course Code: MGT2512**

**CreditUnits: 03**

## **Course Objective:**

The objective of the course is to give knowledge of the Relational Database Management Software, in particular ORACLE. It is expected that a student at the end of the course would attain a good conceptual and practical understanding of databases.

## **Course Contents:**

### **Module I: Introduction to RDBMS**

RDBMS: Introduction, Relational Model concept and Relational data structure, Relational Model constraints as domain constraints, Key constraints, Entity integrity constraints, Referential Integrity constraints.

### **Module II: Introduction to Oracle**

Tools of Oracle, Features of oracle.

### **Module III: SQL**

Overview of SQL, Component of SQL (DDL, DML, DCL), Advantage of SQL, Basics of syntax writing, Data Definition Language, Create command, Data type, Constraints, ALTER & DROP, UPDATE & DELETE Commands, Substitutions variables, Run time Environments variables, SELECT Commands Basic Constructs, Functions, Nested Queries, Correlated queries, Views, Sequence, User Management Commands.

### **Module IV: PL/SQL**

Basic features, Block Structure of a PL/SQL Programs, Control Structures, Exception Handling, Cursor, Procedure, Functions and Triggers, Internet features of Oracle.

### **Module V: Database Technologies**

Client/Server Databases, Distributed Databases, Web Databases

### **Module VI: Administration of Oracle databases**

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>Q</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

# SOFTWARE PROJECT DESIGN AND ANALYSIS

**Course Code: MGT2513**

**Credit Units: 03**

## **Course Objective:**

This module will introduce and develop concepts that are seen as central to the effective management of software projects. You will be expected to develop an appreciation of key, generic project management concepts and techniques as well as those techniques and approaches that are specific to the management of software projects. As well as knowing the core techniques, you will be expected to apply them across a limited range of software project management scenarios.

## **Course Contents:**

### **Module I: An Introduction to Software Project Management**

Management Spectrum, People, Product, Process, Project the W5HH Principle, The Profile of a Project, Project start-up, Development, Completion Operation, Role of SDLC models (such as the waterfall model, incremental model, spiral model) and Structured methods (such as SSADM)

### **Module II: Project Metrics**

Measures, Metrics & Indicators, Metrics in the process & Project domain, Metrics for software quality.

### **Module III: Software Project Planning**

Discussion of network diagrams and critical path analysis (CPA), Planning aids, Simple manual techniques such as Gantt Charts through to more complex and sophisticated planning tools, Estimation tools (Delphi technique, CoCoMo)

### **Module IV: Risk Analysis & Management**

Risks Risk Identification, Risk Projection, Risk Refinement, Mitigation, Monitoring & Management.

### **Session V: Scheduling and Resourcing**

Concepts of lateness, Defining task set for software project, Defining a Task Network, Scheduling, Earned value analysis, Error tracking, Project plan

### **Module VI: Software Configuration Management**

Baselines, SCM Process, Identification of objects in s/w configuration, Version control, Change control, Configuration audit, Status reporting, Hands on MS-Project.

## **Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

# PROGRAMMING WITH MICROSOFT VISUAL BASIC

**Course Code: MGT2514**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to offer the students all key concepts and capabilities to be bound in Microsoft Visual Basic. This course seeks to provide very clear and straightforward implementation of key features of Visual Basic with explanations of each work. The student should walk away with an in-depth understanding of how to utilize all of Visual Basic's capabilities for building industrial strength enterprise application and understand the process of software development. The course will make the students learn real world context.

## **Course Contents:**

### **Module I: Visual Basic Overview**

Opening, writing and running Visual Basic Program, Working with controls and defining their properties, Working with menus and dialog boxes.

### **Module II: Programming Fundamentals**

Visual Basic Variables and Operators, Using Decision Structure, Using Iterations and Timers.

### **Module III: Creating the Perfect User Interface**

Working with Forms, Printers and Error Handling, Adding Artwork and Special Effects

### **Module IV: Managing Corporate Data**

Using Modules and Procedures, Working with Arrays, Exploring text files and string processing, Managing access databases.

### **Module V: Professional Edition Tools and Techniques**

Word Processing with the Rich Text box control, Displaying progress and status information, Integrating music and video with the multimedia MCI control, Using the windows API.

### **Module VI: Advanced Database Programming**

Managing data with the Flex Grid Control, Exploring database handling using DAO, RDO and ADO, Handling the Recordset.

## **Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# LAW OF CRIMES

**Course Code: MGT2515**

**Credit Units: 03**

## **Course Objective:**

The basic objective of this course is to give an insight of the basic principles of crime and the law determining criminal liability and punishment.

## **Course Contents:**

### **Module I: Introduction to Law of Crimes**

Extent and operation of the Indian Penal Code, Definition of Crime, Fundamental elements of crime, Stages in commission of a crime, Intention, Preparation, Attempt: Essentials of the attempt, Impossible attempt, Attempt and preparation distinguished

### **Module II: General Explanations and Exceptions**

Definitions, Constructive joint liability, Mistake, Judicial and Executive acts, Accident, Necessity, Infancy, Insanity, Intoxication, Consent, Good faith Private Defense

### **Module III: Abetment and Criminal Conspiracy**

Law relating to Abetment, Accomplice vs. Co-accused.

### **Module IV: Punishment**

Theories: Deterrent, Retributive, Preventive, Expiatory and Reformatory Theory Punishment under the IPC: Fine, Life Imprisonment, And Death Sentence/Capital Punishment

### **Module V: Offences affecting Body**

Offences affecting the Human body, Offences against Women and Offences against Property.

### **Module VI: Offences: Defamation and related to property**

Defamation and offences relating to documents and property marks.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# INVESTMENT AND COMPETITION LAW

**Course Code: MGT2516**

**CreditUnits: 03**

## **Course Objective:**

Understanding the basics of investment and competition laws of India in the context of new economic order.

## **Course Contents:**

### **Module I: Competition Law**

Background, Prohibitions and Competition Commission of India

### **Module II: Corporate Finance and Regulatory Framework**

Security Contract (Regulation) Act 1956, Depositories Act 1996, The Securitization and Reconstruction of Financial Assets and enforcement of security Interest Act, 2002

### **Module III: Regulatory Framework for Foreign Trade, Multinational Companies**

Foreign Trade (Development & Regulation) Act 1992, UNCTAD Draft Model on Trans – national Corporations, Control and regulation of foreign companies in India, Foreign collaborations and joint ventures

### **Module IV: Foreign Exchange Management**

Background, Policies and Authorities and FERA Vs FEMA

### **Module V: Investor's Protection Law**

Provisions under SEBI Act, Important provisions of Consumer Protection Act, IRDA

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>C</b>	<b>V</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

# LAW AND TECHNOLOGY

**Course Code: MGT2517**

**Credit Units: 03**

## **Course Objective:**

Understanding the legal measures for handling issues related Technological development in various fields. To develop a better understanding of Techno- legal aspects for the development of society and business.

## **Course Contents:**

### **Module I: E-Commerce**

Online contracting, Online securities offering and E-Banking

### **Module II: Cyber Crimes**

Obscenity, Defamation, Hacking and Cracking Crime through Mobile Phones

### **Module III: Genetic and Medical Technologies**

Regulation of Genetic Technology and Laws for Medical Technology

### **Module IV: Broadcasting**

Regulation and Control of Broadcasting and Law relating to Cable Television Network

### **Module V: Jurisdiction**

Concept of Territorial Jurisdiction for Handling Technological issues, and Protection against the anticipated threats (outcome of technological advancement)

### **Module VI: Information Technology Act, 2000**

Introduction to Information Technology Act: Meaning and Definition, Digital Signature, Electronic governance, Offences Cyber regulation Appellate Tribunal

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

## BUSINESS LAWS

**Course Code: MGT2651**

**Credit Units: 03**

**Course Objective:**

The objective of the course is to acquaint the students with the fundamentals of business related laws, which have an important role over smooth conduct of business.

**Course Contents:**

**Module I: Legal Environment of Business**

Importance of Law, Legal environment of business, Sources of law, Function of law.

**Module II: Indian Contract Act, 1872**

Nature and kinds of Contracts, Concepts related to offer, Acceptance and Consideration, Principles Governing Capacity of Parties and Free Consent, Legality of Objects, Performance and Discharge of Contract, Breach of Contract and its Remedies, Basic Elements of Law Relating to Agency, Guarantee and Pledge.

**Module III: Indian Sale of Goods Act, 1930**

Sale and Agreement to Sell, Hire Purchase, Pledge, Mortgage, Hypothecation Lease, Goods, Different types of Goods, Passing of Property in Goods, Conditions and Warranties, Doctrine of Caveat emptor, Rights of an unpaid Seller.

**Module IV: Negotiable Instruments Act, 1881**

Meaning of Negotiability and Definition of Negotiable Instruments, Features, Cheques, Bill of Exchange and Promissory Note, Holder in Due Course, Crossing of Cheques, Endorsement and Dishonour of Cheques.

**Module V: Elements of Company Law**

Meaning and types of companies, Formation of a company, Memorandum and Articles of Association, Prospectus and Issue of Shares, Share Capital and Shareholders, Company Meetings and Proceedings, Powers and Liabilities of Directors, meeting, Managerial Remuneration and Winding up of Company.

**Module VI: Consumer Protection Act 1986 and Torts**

Need for Consumer Protection, Meaning of Consumer, Different Redressal Forums for Consumers, Rights of Consumers, Unfair Trade Practices, and Procedure for Filing Complaints, Meaning of tort, Application of Tortious Liability in Business Situations.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# BUSINESS POLICY AND STRATEGIC MANAGEMENT

**Course Code: MGT2601**

**CreditUnits: 03**

## **Course Objective:**

The aim of the course is to orient the students in theories and practices of Strategic Management so as to apply the acquired knowledge in formulation and implementation of strategies for better decision-making. This is a gateway to the real world of management and decision-making.

## **Course Contents:**

### **Module I: Introduction**

Planning, Evolution of strategic management, Concept of Corporate Strategy: Intended & Emergent, Patterns of Strategy Development, Levels of strategy.

### **Module II: Mission & Vision**

Concept of Strategic Intent, Vision and Mission, Formulation of Vision and Mission Statements, Different Perspectives on Vision and Mission, Business Definition and concept of a Business Model.

### **Module III: Strategic Analysis**

Industry Analysis, Competitor Analysis using Porter's 5-Forces model, Market Analysis, Environmental Threat and Opportunity Profile (ETOP), Internal Analysis: Building Organization Capability Profile and Strategic Advantage Profile (SAP), Building competencies using Value chain Analysis, Environmental Analysis and dealing with uncertainty, Scenario Analysis, SWOT Analysis.

### **Module IV: Strategic Choice**

Strategic alternatives at corporate level: Expansion, Stability, Retrenchment and Combination, Strategic choice models for dominant single- Business companies- Strickland's Grand Strategy Selection Matrix, Model of Grand Strategy Clusters, Strategic choice models for multi-business companies- BCG, GE Nine Cell Matrix, Hofer's Model, Coevolving, Patching, Strategy as simple rules, Strategic alternatives at business level: Michael Porter's Generic competitive strategies, Building Sustainable Competitive Advantage.

### **Module V: Strategic Implementation**

Operationalizing strategy and Institutionalizing strategy- Developing short-term objectives and policies, Functional tactics, and Rewards, Structural Implementation, Strategic Control, Mc Kinsey 7-S Framework.

### **Module VI: Recent Developments**

Recent Developments in the Field of Strategy: Use of Balanced Scorecard approach, Corporate Governance and Corporate Social Responsibility, Corporate sustainability.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# DISSERTATION

Course Code: MGT2637

CreditUnits: 09

## Objectives:

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	- 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	- 5 marks
Chapter 3: Presentation, Analysis & Findings	- 25 marks
Chapter 4: Conclusion & Recommendations	- 10 marks

## THE COMPONENTS OF A PROJECT REPORT

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## THE STEPS OF PROJECT WORK

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II** : Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III** : Collection of information and data relating to the topic and analysis of the same.

**STEP IV** : Writing the report dividing it into suitable chapters, viz.,  
Chapter 1: Introduction,  
Chapter 2: Conceptual Framework / National & International Scenario,  
Chapter 3: Analysis & Findings  
Chapter 4: Conclusion and Recommendations.

**STEP V** : The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Annexures,**

**References / Bibliography**

**Guidelines for Evaluation:**

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Project Work separately, obtaining minimum marks of 40 (Project Report and Viva-Voce taken together).

**Evaluation Scheme:**

<b>Dissertation</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

# BRAND MANAGEMENT

**Course Code: MGT2602**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to help the students understand and appreciate the theoretical concepts of brands. To generate the ability to apply the concepts in real life.

## **Course Contents:**

### **Module I: Introduction**

Meaning and importance of brands, Brands v/s products, Challenges and opportunities of branding, Concept of Brand Equity, Brand management process, Role of CRM in building brands.

### **Module II: Brand Positioning and value**

Sources of brand equity, Brand Building, Implications of brand building, Brand positioning: Brand value, Internal branding.

### **Module III: Brand Marketing**

Criteria for choosing Brand elements, Building brand equity: Product strategy, pricing strategy, Integrated marketing communication, Celebrity endorsements, Concept of co-branding

### **Module IV: Brand Performance and Branding strategies**

Brand value chain, Brand equity management system, Brand hierarchy, Designing branding strategy, Brand extension: Concept, Advantages and disadvantages, Evaluating opportunities of brand extension, Branding strategy over PLC.

### **Module V: Managing Brands**

Reinforcing Brands, Brands revitalization Managing brands internationally, Advantages and disadvantages of global marketing, Standardization v/s customization, Global Brand strategy.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# TERM PAPER

**Course Code: MGT2631**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face.

## **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.
4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)
  - Management practices
  - Talent management
  - HR cases from Indian any industry
  - Employee motivation
  - Managerial competencies
  - Employability skills
  - Industrial relations
  - Knowledge management
  - Social media
  - Green marketing
  - Six Sigma
  - Sustainable branding practices
  - Training and development
  - Relationship management
  - CSR
  - Performance management system
  - Balanced Score Card
  - Corporate Governance
  - Employee retention
  - NGOs.

## **Evaluation Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
30	30	20	20	100

# PROJECT

Course code: MGT2632

Credit Units:03

## Objectives:

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## Chapter Scheme and distribution of marks:

Chapter 1: Introduction	– 10 marks
Chapter 2: Conceptual Framework/ National/International Scenario	– 25 marks
Chapter 3: Presentation, Analysis & Findings	-- 25 marks
Chapter 4: Conclusion & Recommendations	-- 10 marks
Chapter 5: Bibliography	-- 05 marks

## Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:

**1) Cover Page:** This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.

**2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

**3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

**4) Body of the Report:** The body of the report should have these four logical divisions

- Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
- Conceptual Framework / National and International Scenario:* (relating to the topic of the Project).
- Presentation of Data, Analysis and Findings:* (using the tools and techniques mentioned in the methodology).
- Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

**5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.

**6) Annexures:** Questionnaires (if any), relevant reports, etc.

(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

## The Steps of a Project Report

**Step I:** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

**Step IV:** Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,

Chapter 2: Conceptual Framework / National & International Scenario,

Chapter 3: Analysis & Findings

Chapter 4: Conclusion and Recommendations.

**Step V:** The following documents are to be attached with the Final Project Report.

1) Approval letter from the supervisor (Annexure-IA)

2) Student's declaration (Annexure-IB)

3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below:

- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bounded.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme:**

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>	<b>Total</b>
75 marks	25 marks	100

**Declaration**

I .....hereby declare that the Project Work with the title (in block letters).....  
submitted by me for the partial fulfilment of the degree of BBA is my original work and has not been submitted earlier to any other University /Institution for the fulfilment of the requirement for any course of study.

I also declare that no chapter of this manuscript in whole or in part has been incorporated in this report from any earlier work done by others or by me. However, extracts of any literature which has been used for this report has been duly acknowledged providing details of such literature in the references.

# WORKSHOP

**Course Code: MGT2633**

**Credit Units: 01**

## **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **Major Themes for Workshop:**

The workshop may be conducted on any of the following major themes:

- Accounting
- Finance
- Human Resources
- Marketing
- Economics
- Operations
- Supply Chain Management

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## **Guidelines for Workshop:**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions to be held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of atleast 500 words about the learning outcome from the workshop.

## **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Evaluation Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions/ Quiz</b>	<b>Solving the case/ Assignment/ Write up</b>	<b>Total</b>
10	30	30	30	100

# CORPORATE TAX PLANNING

Course Code: MGT2605

CreditUnits: 03

## Course Objective:

To provide understanding of Direct Tax including Rules pertaining there to and application to different business situations. To understand principles underlying the Service Tax and concepts of VAT

## Course Contents:

### Module I: Introduction to Tax Management

Concept of tax planning, Tax avoidance and tax evasions, Corporate taxation.

### Module II Income from Business

Residential Status of companies, Taxable income under Business and Profession, Computation of Profit and Gains from business profession, Deemed business profits, Assessment of Retail Business, Deemed incomes (cash credit, unexplained investments, unexplained money and other assets, unexplained expenditures, investments and valuable articles not fully disclosed in books of accounts).

### Module III: Deductions Allowed Under Business and Profession

Deduction Expressly allowed section 30-35, Depreciation deduction calculation, Setoff and carry forward of unabsorbed depreciation section 32(2). Determining Actual Cost 43(1), Set-off and Carry Forward Losses, Bonus or commission to employees section, Interest on borrowed capital, Insurance premium 36(1(i)), Employees contribution to provident fund, Bad debts 36, Revenue expenditure incurred by statutory corporation, Banking transaction tax, Security transaction tax, Commodity transaction tax, provision for admissibility of general deduction 37(1),

### Module IV: International Accounting and Taxation

Analysis of foreign financial statement, Accounting standard: US GAAP, Indian GAAP, IAS, IFRS. # PERFORMANCE MANAGEMENT SYSTEM

**Course Code: MGT2609**

**Credit Units: 03**

## **Course Objective:**

This course will help students understand the significance of appraisal for an organization and individuals. It will develop an understanding of various Performance Appraisal tools and their applications and potential appraisal. Further it will develop a right perspective in them towards managing and improving performance.

## **Course Contents:**

### **Module I: Overview of Performance Management**

Employee Motivation & Needs (Vroom's & Adam's Theory of Motivation), Performance Appraisal: The past & the future, Human Resource Development & Performance Appraisal, Planning Performance & Role Clarity, Accountability and Effectiveness.

### **Module II: Process of Performance Appraisal**

Measuring Performance Appraisal – Objectives & Indicators, Methods of Appraisal – Contemporary & Modern methods, Performance feedback & counseling, PMS.

### **Module III: 360 Degree Feedback**

Definition, methodology, advantages/disadvantages of Feedback, RSDQ Model, and Criteria for success, Experiences in 360 appraisals.

### **Module IV: Potential Appraisal**

Concept, Difference between performance appraisal and potential appraisal, Competency mapping & Potential appraisal –case studies

### **Module V: Performance Management in Application**

Performance Management and development, Performance Management and Pay, Creating High Performance organization.

### **Module VI: Emerging Concerns & Performance Management**

Appraisal for future – Going beyond tangible performance, HR Scorecard.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# COMPENSATION AND REWARD MANAGEMENT

**Course Code: MGT2610**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to familiarize students with the dynamics of wage and salary administration and current trends in India.

## **Course Contents:**

### **Module I: Introduction**

Overview of Compensation Management, Wage and Salary Administration – Nature, Importance, Philosophy, Objectives, Definition, Goals Role of various parties – Employees, Employers, Unions & Government and Legislations for compensation.

### **Module II: Developing Compensation Programs**

Job Evaluation, Basic systems Time wage, Piece wage, Incentives, Wage payments and Total Salary Structure, Compensation Surveys, Hay Plan, Developing Competitive Compensation Programs, Developing Salary Structures

### **Module III: Derivatives of Compensation**

Pay for Performance, Merit pay and Performance Appraisal, Performance based rewards, Performance Criteria Choices, and Competency Mapping & Developing Performance Matrix, Performance based Compensation Schemes.

### **Module IV: Incentive Plans**

Incentive Plans: individual and group incentive plans, Productivity Gain sharing plans, Profit Sharing Plans, Non - Financial and Financial incentives, Measuring Cost- to – Company (CTC).

### **Module V: Employee Benefits**

Employee Benefits: Supplemented Pay benefits (pay for time not worked) insurance benefits, Retirement benefits, Employees' service benefits, Introduction to ESOPs, Flexible benefits and Benefit Surveys.

### **Module VI: Current Trends**

Current Trends in Compensation and Reward Management

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# OBJECT ORIENTED PROGRAMMING WITH JAVA

**Course Code: MGT2611**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to give knowledge of the Object Oriented approach to development of software using Java Language. It is expected that a student at the end of the course would attain a good conceptual understanding and logical approach of software development.

## **Course Contents:**

### **Module I: Basics of OOPS**

Object, Class, Abstraction & Encapsulation, Inheritance, Polymorphism Genesis and overview of Java. The creation of Java, Java's importance to the Internet, Lexical issues (White space, Identifiers, Literals, Comments, Separators, Keywords), The Java Class Libraries.

### **Module II: Data types, Variables and Arrays**

Integer Data Type, Floating Data Type, Characters, Booleans, Literals, Variables, Type Conversion & Casting, Arrays & Strings Operators Arithmetic Operators, Bitwise Operators, Relational Operators, Boolean Logical Operators, the Assignment Operator, Operator.

### **Module III: The Control Statements**

Selection Statements, Iteration Statements, Jump Statements. Classes, Class Fundamentals, Declaration of Object, Methods, Constructors, A Stack Class, Overloading Methods and Constructors, Argument Passing, Objects as Parameters, Returning Objects, Introducing Final & Understanding Static.

### **Module IV: Inheritance**

Inheritance Basics, Using Super, Multilevel Hierarchy, Method Overriding, Dynamic Method Dispatch, using Abstract Classes, Exception handling Fundamentals of Exception Handling, Exception Types, using Try and Catch, Throw and Throws, nested Try statements.

### **Module V: I/O Applets**

I/O basics, Reading console inputs and outputs, The Print Writer Class, Applet fundamentals, the Transient and Volatile modifiers, native methods and their problems, The Java Libraries String Handling, Exploring Java.lang, the collections framework with java.util, managing Input/ Output by exploring java.io.

### **Module VI: The Applet Class**

Applet architecture, an applet skeleton, Applet display methods, passing parameters to Applets, Applet context and show Document, Networking, Java and the net, InetAddress, TCP/IP Client and Server Socket, URL Connections.

## **Examination Scheme:**

Components	CT	HA	Q	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# DATA COMMUNICATION AND NETWORK

**Course Code: MGT2612**

**CreditUnits: 03**

## **Course Objective:**

The objective of the course is to give knowledge of the Object Oriented approach to development of software using C++ Language. It is expected that a student at the end of the course would attain a good conceptual understanding and logical approach of software development.

## **Course Contents:**

### **Module I: Introduction**

Introduction to Computer Networking, Computing Models and Network development, Required Network Elements, Networking Services, Common Networking Services File Service, Print Services, Message services, Application Services, Database services Centralized versus Distributed Network Services.

### **Module II: Transmission Media**

Transmission Media, Introduction to Transmission Media, Common Computer Network Transmission Media, Public and Private Network, Transmission Media Connections Introducing Transmission Media Connections, Networking Connectivity Hardware.

### **Module III: Networking Protocol and Models**

Networking Protocol and Models, Need of Rules, Moving from Rules to Models, OSI Model, Leading Protocol Stack for Computer Networking, Internet protocol, Transmission Control Protocol.

### **Module IV: LAN Terminology & Components**

LAN terminology & Components, LAN architecture, Protocols and Addressing, Ethernet LANs, Token Ring & FDDI, LAN Networking Devices, Common approaches to LAN Management, Concept of N/w Design, Introduction to WAN: Private & Public, VPN: How it works, VPN security, Technologies.

### **Module V: Overview of ATM Technology**

Overview of ATM Technology, VoIP, Frame Relay, Gigabit Ethernet, Wireless Communications Convergence of Telecom, IT & Management, Telecommunication as a strategic weapon-some, Satellite communication, V-SAT.

## **Examination Scheme:**

Components	CT	HA	Q	C	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

### **Text:**

- Computer Networks & Internets, D.E. Comer
- Data & Computer Communications, William Stallings

### **References:**

- Introduction to Networking, Barry Nance
- Computer Communication Networks, A. Shanmugam and S. Rajeev
- Computer Networks, Tanenbaum

# WEB DATABASE PROGRAMMING WITH ASP

**Course Code: MGT2613**

**CreditUnits: 03**

## **Course Objective:**

The objective of the course is to capacitate students to build and deploy dynamic web applications that interact with a powerful database. The modules provide background on subjects such as HTML, client side scripting and relational databases. At the end of the course, the students will be able to set up their own personal dynamic web site using a Microsoft web server to illustrate web site creation and administration principles. The curriculum will make the students learn real world context.

## **Course Contents:**

### **Module I: ASP Fundamentals**

Software requirements, Installing personal web server, Installing IIS, IIS service features, Hardware requirement, ASP connection with IIS, Built in objects. Understanding request and response objects, The ASP request object, Requesting information from forms, QueryString collection & Server variables, cookies, ASP response object, response object methods and properties.

### **Module II: Understanding VB Script Language**

Scripting, VB Scripting, Understanding variables, Integrating Script with HTML, Client side and server side scripting, Converting variable types, Operators, Message Box, Accessing objects, Using built in functions and statements, Program control statements.

Error Handling: Error Handling, ASP.

### **Module III:**

#### **Understanding Procedures and Classes**

Understanding procedures, Sub-procedures, Functions, Classes, Methods, Events.

#### **Session and Application Objects**

The Session Object and collection of Session Object, Methods, properties and events, The Application object collections and methods, Using session and application objects.

### **Module IV: The ADO connect Object**

Data Access components, Universal data access architecture, ADO, DAO, RDO architectures, OLE DB and ODBC, The ADO connection object, Creating and opening connection object, Creating DSN, connection with ODBC, connecting with OLE DB, using ADO connection and SQL statements.

### **Module V: ADO Record set Object**

Creating and opening a record set object, Moving through a record set, The fields collection, using ADO record set, Bookmarks, Filtering Record sets, Searching for records, Modifying Records, The Get String method.

The ADO command object: Creating a command object, using a stored procedure, using stored procedure with parameters, return values, Output parameters and the command object.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>HA</b>	<b>Q</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

# INTELLECTUAL PROPERTY RIGHTS

**Course Code: MGT2614**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to acquaint the students with basics of intellectual property rights with special reference to Indian law and practice.

## **Course Contents:**

### **Module I: Introduction**

Types of Intellectual Property Rights, Inventions vs. Discoveries, Conventions .

### **Module II: Copyright**

Nature and Meaning, Scope of protection, Procedure for protection, Enforcement and Remedies.

### **Module III: Patents**

Nature and Meaning, Scope of protection, Procedure for protection, Enforcement and Remedies .

### **Module IV: Trademarks**

Nature and Meaning, Scope of protection, Procedure for protection, Enforcement and Remedies .

### **Module V: Designs**

Nature and Meaning, Scope of protection, Procedure for protection, Enforcement and Remedies.

### **Module VI: Current Scenario:**

Role of WTO and essential elements under TRIPS.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

## **Text & References:**

# HUMAN RIGHTS

**Course Code: MGT2615**

**Credit Units: 03**

**Course objective:**

The objective of this course is to lay the foundation of the Human Rights Law and acquaint the students with basic human rights institutions.

**Course Contents:**

**Module I: Introduction**

Concept & Development of Human Rights.

**Module II: UN Charter and Human Rights**

Contribution of United Nations in the Development & Implementation of Human Rights, Universal Declaration of Human Rights, International Covenants

**Module III: Human Rights and the Indian Constitution**

Fundamental Rights & Directive principles of State Policy.

**Module IV: Protection of Human Rights Act 1993**

Meaning & scope, Nature of Human Rights violations Role of National Human Rights Commission.

**Module V: Group Rights**

Rights of Marginalised Groups

Women

Children

Refugees

Refugees

Prisoners

Disabled

**Module VI: Protection of Human Rights**

Role of National Human Rights Commission, role of NGO's, the role of Judiciary, Recent developments in Human Rights.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

**Text & References:**

# INDUSTRIAL RELATIONS AND LABOUR LAW

**Course Code: MGT2616**

**Credit Units: 03**

## **Course Objective:**

The objective of the course is to acquaint student's with the origin and importance of Labour laws governing general functioning of employees in an organisation. And also to educate student with the important provisions under these laws. This will enable them to develop the right perspective of this delicate responsibility to deal with union constructively and to maintain industrial democracy.

## **Course Contents:**

### **Module I: Basic Concepts**

Industrial Relations, Industrial Peace, Industrial Unrest and Industrial Discipline

### **Module II: Laws Relating to Industry**

The Factories Act, 1948 – Definition, Approval licensing and registration of factories, Notice by occupier, Health, and welfare measures, weekly holidays, Leave with wages, Employment of women and young person, Penalties and returns, The Industrial Disputes Act, 1947 – Definition, Persuasive, conciliation and voluntary process for the settlement of industrial disputes, power of the Govt. under ID Act, Instrument of economic coercion, Strike & lock out, Lay off Retrenchment, Transfer and closures, Discharge and Dismissal, Managements prerogative during pendency of proceeding.

### **Module III: Laws Relating to Remuneration**

The Payment of Wages Act, 1936 – Definition, Rules for payment of wages and deductions from wage, The Minimum Wages Act 1948 - Fixing of minimum wages, Procedure for raising minimum wage, Concept of living wages, Fair wage and minimum wage, The Employees State Insurance Act 1948 – Definition, Applicability of the Act - Insurable workmen, Contribution Benefit, Penalties, The Employees Provident Fund and Miscellaneous Provisions Act, 1952 and Employees family pension scheme – definition, Coverage of the organization and employees under the Act - Employees Provident Fund and pension fund scheme, Calculation of contribution withdrawal of Provident Fund amount, Penalties for offence, The Payment of Gratuity Act, 1972 – Definition, Scope and Coverage of the Act - Eligibility criteria, Calculation of Gratuity Nomination, The Payment of Bonus Act 1965 - Applicability of Act, Coverage of employee, Calculation of bonus Rate of Payable bonus, available surplus, allocable surplus.

### **Module IV: Laws Relating to Trade Union**

The Trade Union Act 1926, Statutory Definition - Registration of TU Immoduley granted to Registered Trade Union - Recognition of TU.

### **Module V: Compensation and Insurance**

The workmen's compensation act 1923 – Definition, Rules regarding workmen's compensation, Defense available to employer and employees, E.S.I.C. Act, 1948, The Maternity Benefit Act 1961

### **Module VI: Miscellaneous Acts**

The Industrial Employment (standing order) Act 1946 - Scope and coverage of the Act, Concept of standing order, its certification process, Modification, interpretation and enforcement of standing orders.

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

C - Case Discussion/ Presentation; HA - Home Assignment; P - Project; S - Seminar; V - Viva; Q - Quiz; CT - Class Test; A - Attendance; EE - End Semester Examination

# Master of Arts Economics

## Syllabus - First Semester

### MICRO ECONOMIC THEORY & APPLICATION

Course Code: ECO4101

Credit Unit: 03

#### Course Objective:

This paper analyses the economic behaviour of individuals, firms and markets. It is mainly concerned with the objective of equipping the students in a rigorous and comprehensive manner with the various aspects of consumer behaviour and demand analysis, production theory and behaviour of costs, the theory of traditional markets and equilibrium of firm in modern non-profit maximizing framework.

#### Course Contents:

##### Module I: Demand Analysis

Introduction to Economics, Definitions, Economic Problems. Demand and its determinates. Elasticities (price, cross, income) of demand — theoretical aspects and empirical estimation; elasticity of supply; Theories of demand — utility; indifference curve (income and substitution effects, Slutsky theorem, compensated demand curve) and their applications; Revealed preference theory; Revision of demand theory by Hicks; Characteristics of goods approach; consumer's choice involving risk; Indirect utility functions (duality theory); Recent developments in demand analysis (pragmatic approach and linear expenditure systems); Consumer's surplus; Inter-temporal consumption; Recent developments in demand; Elementary theory of price formation — demand and supply equilibrium; Cobweb theorem; lagged adjustment in interrelated markets.

##### Module II: Production and Costs

Technology, isoquants, production with one and more variable inputs, returns to scale, short run and long run costs, cost curves in the short run and long run. Total, average and marginal product, cost minimization and expansion path, elasticity of substitution, Cobb – Douglas Linear and CES production function.

##### Module III: Market Structure

Marginal analysis as an approach to price and output determination: perfect competition — short run and long run equilibrium of the firm and industry, price and output determination, supply curve; Perfect competition: short run and long run equilibrium of a firm and industry. Monopoly: short run and long run equilibrium of a monopolist, price discrimination under monopoly: first degree, second degree and third degree discrimination; welfare aspects, monopoly control and regulation. Monopolistic Competition.

##### Module IV: Oligopoly

Theory of games, zero-sum and non-zero sum games; Nash equilibrium; Mixed strategies; Oligopoly-Cournot, Bertrand and Stacklberg models; Cartels - Joint profit maximization and market sharing cartels; Price leadership - low cost price and dominant price leadership;

#### Examination Scheme:

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

# MACRO ECONOMIC THEORY & APPLICATION

Course Code: ECO4102

Credit Unit: 03

## Course Objective:

This course aims to lead students to arena of macro- economic theories, policies and models in a historical perspective. It will enable the students to develop a critical insight on classical – Keynesian macroeconomic models.

## Course Contents:

### Module I: National Income and Social Accounting

Macroeconomics nature and scope- Circular flow of National Income - National Product—Productive and non- productive activities, The components of final product, Equality and distribution of national income, GNP, Social accounting— concept and importance, The System of Accounts and economic theory, matrix presentation of social accounting.

### Module II: Basic Classical Model and Keynes Model

Classical theory of Output and Employment; Say's law of market and Quantitative theory of Money, Classical model without saving and Investment - effects of a change in money supply, labour demand and labour supply, effects of rigid money wage, classical theory with saving and Investment; National Income Determination: The Keynesian Model - The Aggregate Demand and Supply Approach. Saving and Investment Approach.

### Module III: Theory of Multiplier

Static and Dynamic Multipliers, Super Multiplier, Paradox of Thrift, Government Purchases, Transfer Payments and Tax Multipliers, Balance Budget Multiplier; Theories of Consumption – Absolute income, Relative Income, Permanent Income and Life cycle Hypotheses.

### Module IV: Inflation

Demand Pull and Cost – Push Approaches. Philips Curve: tradeoff between Inflation and unemployment, Keynesian Explanation of Philips curve. Natural Unemployment Hypothesis and Adaptive Expectation (Friedman's view) Long – run Phillip's curve – Rational Expectation. Relationship between Short run and Long run Phillip's curve.

## Examination Scheme:

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

## Text & References:

# COMPUTER APPLICATION IN ECONOMIC ANALYSIS

**Course Code: ECO4103**

**Credit Unit: 03**

## **Course Objective:**

The objective of the course is to demonstrate knowledge of the computer applications in economic analysis and be able to choose the appropriate application for a given task.

## **Course Content:**

### **Module 1: Computers and Peripherals**

Basic components of computer – CPU, input-output devices, keyboard, mouse and scanner, Video display, printers and plotters, data storage and retrieval, hard disk, floppy disk and CD ROM; Types of computers and their applications; Computer networking and resource sharing, Hardware and software - Operating system.

### **Module 2: Data Processing, Techniques and Algorithms**

Concept of data, record and file; Types of data and data structures, data analysis; File handling and appending and cascading, closing and attribute control; Data storage and retrieval; Data operations; Algorithms like sorting, merging, joining and bifurcation; Database concepts and operation on database; DBMS and RDBMS. Introduction to MS Excel and MS Access

### **Module 3: Software-based Analysis**

SPSS/STATISTICA: A package for Statistical Analysis in Social Sciences. Basic Operations; File, Edit, View, Data, Transformation, Graph and Utilities. Statistical Analysis using SPSS/STATISTICA: Summary, Tabulation and Comparison of Summary Statistics; Correlation and Regression (Linear and Non-linear) using SPSS/STATISTICA; Discriminant analysis, Principal Components, Factor Analysis and Cluster analysis by SPSS/STATISTICA; Use of MATLAB.

### **Module 4: IT Application to Economics**

On line banking; ATM's Electronic stock exchange; Electronic trading; Data sharing and dissemination; Electronic transaction; Document delivery; Authentication and validation transaction processing – Electronic trading and marketing; On line shopping and malls, B2B, B2C, models, Document and transaction security and digital signature; Integrated transaction on mobile platforms. E-Commerce applications in India

## **Examination Scheme:**

# MATHEMATICS FOR ECONOMICS

**Course Code: ECO4104**

**Credit Unit: 04**

**Course Objective:** The main objective of inclusion of this course in Economics is to familiarize the students with basic quantitative & algebraic tools & techniques which will be needed for the understanding of the core subject and the students can apply the quantitative techniques in the analysis of managerial problems

## **Course Content:**

### **Module 1**

Basics: real number system, sets and set operations, relations and functions, inverse functions; solution of linear equations in two variables, solution of quadratic equations, logarithms and exponents; exogenous and endogenous variables; Fundamentals of Matrices; Determinants; Solution of a system of upto 3 equations by matrix inversion and Cramer's rule.

### **Module 2**

Differential equation - basic concepts, solution of first order linear differential equation; Non-linear differential equation - exact and variable separable type only; Linear differential equation of second order with constant coefficient and term

### **Module 3**

Differentiation-idea of limit (but not its evaluation), meaning and economic interpretations of derivative; Rules of differentiation including logarithms and exponential functions; Unconstrained optimization - single choice variable; global and local

### **Module 4**

Integration - meaning and economic interpretation; Indefinite and definite integration; Simple techniques including integration by substitution and integration by parts

### **Module 5**

Linear Programming - Relevance and basic concepts, graphic, simplex and dual solution. Economic interpretation

## **Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

# INDIAN ECONOMY-ISSUES & POLICY

**Course Code: ECO4105**

**Credit Unit: 04**

## **Course Objective:**

The objective of this course is to provide to students the basic knowledge of the structure of Indian Economy and its current developments.

## **Course Contents**

### **Module I: Growth and Structure of Indian Economy Since 1950**

Growth of Indian economy since 1950; Measures for raising economic growth; Trends in the nature and magnitude of poverty, inequality and unemployment; Changes in occupational Pattern, Demographic trends and economic development; Rate and trend in saving, Investment and growth rate

### **Module II: Growth of Agricultural and Industrial Sectors**

Trends in agricultural production and productivity; Food policy and Public Distribution System (PDS); Impact of liberalization in agricultural sector; Industrial Growth performance and problems; Industrial concentration; its nature and extent; Cottage and small scale industries; Impact of liberalization and privatization on the Industrial sector

### **Module III: Money Supply, Inflation and Public Policies**

Factors determining interest rates; Money supply and inflation in India; financial sector reforms during 1990's Recent tax reforms; Growth and structure of Subsidies in India; Macro-economic policies – fiscal policy, income policy and Stabilization policy; Parallel economy and its implications

### **Module IV: International Trade Policies**

Composition and directions of India's foreign trade; Factors determining the Balance of payment. Is equilibrium in the balance of payment? Causes, consequences; and policy measure; India's policies towards foreign capital; collaboration, export; Promotion and import substitution. Exchange rate policy and the convertibility of Rupee

### **Module V: Development Policies**

India's planned development; Successes and failures. Policies for social justice (With special reference to the alleviation of poverty, inequality and unemployment) Sectoral policies: Industrial and agrarian. Policies for liberalization and privatization

## **Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weight age (%)	5	5	5	15	70

# Syllabus - Second Semester

## STATISTICS FOR ECONOMICS

**Course Code: ECO4201**

**CreditUnits: 04**

### Course Objective:

This subject will deal with all fundamental statistical methods or tools which the students have to use in economic analysis and decision making problems.

### Course Contents:

#### Module I: Elementary Distribution Theory

Nature and scope of statistics; Frequency and Cumulative frequency distributions, Measures of Central Tendency, Dispersion, Skewness and Kurtosis

#### Module II: Bivariate Distribution and Simple Linear Regression

Covariance and Correlation: rank correlation etc Simple Linear Regression; method of least squares; derivation of normal equations; standard error of regression (SER), properties of least square estimator

#### Module III: Time Series Analysis & Forecasting

Time Series Analysis, Time Series Decomposition Models – Multiplicative and Additive model, Linear and Exponential trend, Forecasting: Different methods of forecasting: Quantitative methods – freehand method, smoothing method, exponential smoothing method, trend projection methods; Qualitative methods. Steps of Forecasting

#### Module IV: Index Numbers

Concept of an Index Number. Laspeyer's, Paasche's and Fisher's Index Numbers; Time Reversal, Factor Reversal and Circular tests; Chain base index; Problems in the construction of index numbers;; Base shifting and use of index number for deflating other series.

### Examination Scheme:

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

### Text & References:

# MATHEMATICAL ECONOMICS

**Course Code: ECO4202**

**CreditUnits: 03**

## **Course Objective:**

A thorough knowledge of mathematics is essential for understanding almost all fields of economics. Mathematics is essential in the expression and communication of ideas in economics. The goal of this course is to help students understand and use the mathematics required for studying economics at the master's level. As a way of demonstrating the importance of mathematics in economics, the mathematical concepts studied will be illustrated with applications in economics.

## **Course Content:**

### **Module I**

Types of utility functions; Ordinal utility maximization; Demand functions- ordinary and compensated; Slutsky equation- income, substitution, and price effects; Consumer surplus; Elasticity of demand; Linear expenditure systems; Indirect utility function.

### **Module II**

Production function; Properties of Cobb-Douglas, CES and Translog production functions; Producers equilibrium; Behaviour of cost curves; Derivation of Cost functions from production function (using CD function).

### **Module III**

Price and output determination with marginalist rule; Equilibrium of a price discriminating monopolist; Cournot model; Multi-plant model; Baumol's sales maximization model; Williamsons model.

### **Module IV**

Pricing of factors under different types of competitions; product exhaustion theorems – Euler, Clark-Wicksteed; Derivation of Pareto-optimal conditions

## **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

# PUBLIC FINANCE IN INDIA

**Course Code: ECO4203**

**CreditUnits: 03**

## **Course Objective:**

This subject deals with the broad understanding of the current theories and practices in Public Finance. It will help students to understand taxation policy, management of public expenditure and public debt. The coverage of the subject will be with special emphasis on Indian experience.

## **Course Contents:**

### **Module I: Introduction to Public Finance**

Economic systems—concepts—Capitalism, Socialism and Mixed Economy— Characteristics; Public and Private Finances: meaning, difference and similarities. Indian Federal Finance: concepts of three layers of government; Market failure and role of government; Characteristics of public and private goods, merits goods; Government budget, its importance. Various concepts of deficit: revenue deficit, budgetary deficit, fiscal deficit, primary deficit, their uses and effects.

### **Module II: Taxation**

Direct and indirect taxes: meaning and its characteristics—concepts of progressive, Proportional and regressive taxes. Present Indian tax structure: its characteristics and defects; Role of taxation in economic development. Meaning of tax avoidance and tax evasion

### **Module III: Income and Public Expenditure**

Sources of income of local government, state government and central government; Public expenditure: purpose, importance and causes of increase in public expenditure. Meaning of Fiscal Responsibility and Budget Management Act (FRBM Act).Privatization and disinvestment: concept and importance.

### **Module IV: Public Debt**

Public debt—meaning and types of public debt; Economic effects of public debt; Difference between taxation and debt; Burden of public debt—Learner's and Buchanan's view point

## **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

## **Texts & References:**

### **Texts:**

- Public finance in Theory & Practice: R.A. Musgrave & P.G. Musgrave
- Introduction to Public Finance: Carl C. Plehn

# ADVANCED MICRO ECONOMIC THEORY & APPLICATION

**Course Code: ECO4204**

**CreditUnits: 03**

## **Course Objective:**

The main objective of the course is to provide deeper knowledge on some specific field of microeconomics so that they can apply economic theory and models in the execution of managerial problems and functions.

## **Course Contents:**

### **Module I: Uncertainty and Information**

Contingent consumption; catastrophe bonds; utility functions and probabilities; Expected utility; Why expected utility is reasonable; Risk aversion; Risk spreading; Asymmetric information-Market for lemons; Market signalling. Principle- agent problems Moral Hazard;

### **Module II: Managerial theories of firm**

Marginalism - attacks and defence; Average cost pricing- the mark up rule; Limit pricing-Bain's concept of entry and barriers to entry; Model of Sylos-Labini and Franco Modigliani; Baumol's static and dynamic models of sales revenue maximization; Marris's model of managerial enterprise; Williamson's simplified model of managerial discretion;

### **Module III: Theory of Distribution**

Marginal productivity theory, the general theory of factor price discrimination under competition, monopoly and monopsony; Determination of rent wages and interest; Concept of exploitation of labour and role of labour unions in wage determination; The nature of profit; Euler's Product – Exhaustion theorem

### **Module IV: General Equilibrium**

Meaning, partial v/s general equilibrium approach, Walrasian General Equilibrium model, Tatonnement, Existence, Uniqueness and stability of equilibrium; A graphical treatment of the 2 – factor, 2 – commodity, 2 – consumer general equilibrium system (2x2x2 model)

### **Module V: Welfare Economics**

Criteria of social welfare – value judgments in welfare economics, basic theorems of new welfare economics – Pareto Optimality and necessary conditions to achieve it; Market forms and welfare. Compensation principle: Kaldor – Hicks criterion, Little's criterion, the Bergson criterion: social welfare function.

## **Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

## **Text & References:**

### **Text:**

- W.S. Baumol, 'Economic Theory And Operational Analysis', Prentice hall
- Ferguson, 'Microeconomic Theory', Cambridge University Press

# ADVANCED MACRO ECONOMIC THEORY & APPLICATION

**Course Code: ECO4205**

**Credit Units: 03**

## **Course Objective:**

This course aims to lead students to arena of macro- economic theories, policies and models such as investment demand, New classical model, New Keynesian model and macro economics of an open economy.

## **Course Contents:**

### **Module I: The Economy in the Long Run**

The classical analysis of the real sector, determination of employment, income and interest rate; Golden rule of accumulation, impact of change in saving propensity, population growth and technological progress

### **Module II: Investment Demand**

Theories of investment – Accelerator and Profit Theories; Theories of Business Cycle: Samuelson, Hicks and Kaldor

### **Module III**

The New classical Model (Lucas View); The New Keynesian Model

### **Module IV: Equilibrium in Money Market**

The Keynesian Model, Liquidity Trap. Simultaneous equilibrium in money and product market – IS-LM Model; Relative Effectiveness of monetary and Fiscal policies; Fiscal Policy and Crowding out

### **Module V: Exploring the Macroeconomics of an Open Economy**

Balance of Payment - the current and capital account: Determining equilibrium output in an open economy; open economy with flexible exchange rates - markets for foreign exchange, factors affecting exchange rates, effects of exchange rates on the economy.

## **Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

## **Text & References:**

### **Text:**

- Gardner Ackeley, “Macro Economics”.

# ECONOMICS OF GROWTH AND DEVELOPMENT

**Course Code: ECO4206**

**Credit Units: 03**

## **Course Objective:**

This course will enable the students to acquire knowledge as to how policies facilitate growth and development in advanced countries. It also enables the students to understand important growth models and help them to familiarize with factors that contribute to economic growth.

## **Course Contents:**

### **Module-I: Introduction to Development**

Economic Growth, Economic Development and Sustainable Development – measurement of development: convectional HDI and Physical Quality of Life Indices (PQLI) – Factors determining economic development – obstacles of economic development: vicious circle of poverty

### **Module-II: Growth Theories**

Adam Smith – Ricardo – Malthus – Karl Marx – Schumpeter's theory of development – Keyens – Rostow's stages of economic growth – Big Push theory

### **Module-III**

Doctrine of balanced growth – Concept of unbalanced growth – Dualistic theories – Myrdal theory – Growth models – Harrod – Domar – Joan Robinson's model of capital accumulation – Meade's neo classical model – Solow model long run growth – Kaldor's model of growth.

### **Module-IV: Special Topics in Economic Development**

Poverty and inequality, Education and Economic Development, Health and Economic Development.

## **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

## **Text & References:**

# TERM PAPER/ REVIEW OF DISSERTATION-I

Course Code: ECO4231

Credit Units: 02

## GUIDELINES FOR TERM PAPER

A term (or research) paper is primarily a record of intelligent articulation through several sources on a particular topic of a given subject.

The students will choose the topic at the beginning of the session in consultation with the faculty assigned/chosen. The progress of the paper will be monitored regularly by the faculty. At the end of the semester the detailed paper on the topic will be submitted to the faculty assigned/chosen. The evaluation will be done by Board of examiners comprising of the faculties.

The procedure for writing a term paper may consists of the following steps:

Choosing a topic

1. Finding sources of material
2. Collecting the notes
3. Outlining the paper
4. Writing the first draft
5. Editing & preparing the final paper

### 1. Choosing a Topic

The topic chosen should not be too general. Student will normally consult the faculty guide while finalizing the topic.

### 2. Finding Sources of material

- The material sources should be not more than 5 years old unless the nature of the paper is such that it involves examining older writings from a historical point of view.
- Begin by making a list of subject-headings under which you might expect the topics to be listed.
- The sources could be books and magazines articles, news stories, periodicals, journals, internet etc.

### 3. Collecting the notes

Skim through sources, locate the useful material, make notes of it, including quotes and information for footnotes.

- *Get facts, not just opinions.* Compare the facts with author's conclusion(s)/recommendations.
- In research studies, notice the methods and procedures, results & conclusions.
- Check cross references.

### 4. Outlining the paper

- Review notes to find main sub-divisions of the topic.
- Sort the collected material again under each main division to find sub-sections for outline so that it begins to look more coherent and takes on a definite structure. If it does not, try going back and sorting again for main divisions, to see if another general pattern is possible.

### 5. Writing the first draft

Write the paper around the outline, being sure that you indicate in the first part of the paper what its purpose is. You may follow the following:

- statement of purpose/objectives
- main body of the paper
- statement of summary and possible conclusion(s)/recommendations

Avoid short, bumpy telegraphic sentences and long straggling sentences with more than one main ideas.

## **6. Editing & preparing the final paper**

- a) Before writing a term paper, you should ensure you have an issue(s) which you attempt to address in your paper and this should be kept in mind throughout the paper. Include only information/ details/ analyses that are relevant to the issue(s) at hand. Sometimes, the relevance of a particular section may be clear to you but not to your readers. To avoid this, ensure that you briefly explain the relevance of every section.
- b) Read the paper to ensure that the language is not awkward, and that it "flows" smoothly.
- c) Check for proper spelling, phrasing and sentence construction.
- d) Check for proper form on footnotes, quotes, and punctuation.
- e) Check to see that quotations serve one of the following purposes:
  - (i) Show evidence of what an author has said.
  - (ii) Avoid misrepresentation through restatement.
  - (iii) Save unnecessary writing when ideas have been well expressed by the original author.
- f) Check for proper form on tables and graphs. Be certain that any table or graph is self-explanatory.

### **Term papers should be composed of the following sections:**

1. Title page
2. Abstract
3. Introduction
4. Review of the Literature
5. Discussion&Conclusion
6. References
7. Appendix

Generally, the introduction, discussion, conclusion and references should account for a third of the paper and the review part should be two thirds of the paper.

### **Discussion**

The discussion section either follows the results or may alternatively be integrated in the results section. The section should consist of a discussion of the results of the study focusing on the question posed in the paper.

### **Conclusion**

The conclusion is often thought of as the easiest part of the paper but should by no means be disregarded. There are a number of key components which should not be omitted. These include:

- a. summary of objectives and issues raised.
- b. summary of findings
- c. summary of limitations of the study at hand
- d. details of possibilities for related future research

### **References**

From the very beginning of the research work, one should be careful to note all details of articles or any other material gathered. The Reference part should list ALL references included in the paper. References not included in the text in any form should NOT be listed here. The key issue here is consistency. Choose a particular convention and stick to this.

### **The Conventions**

#### **Monographs**

Crystal, D. (2001), *Language and the internet*. Cambridge: Cambridge University Press.

### **Edited volumes**

Gass, S./Neu, J. (eds.) (1996), *Speech acts across cultures. Challenges to communication in a second language*. Berlin/ NY: Mouton de Gruyter.

[(eds.) is used when there is more than one editor; and (ed.) where there is only one editor. In German the abbreviation used is (Hrsg.) for Herausgeber].

### **Edited articles**

Schmidt, R./Shimura, A./Wang, Z./Jeong, H. (1996), Suggestions to buy: Television commercials from the U.S., Japan, China, and Korea. In: Gass, S./Neu, J. (eds.) (1996), *Speech acts across cultures. Challenges to communication in a second language*. Berlin/ NY: Mouton de Gruyter: 285-316.

### **Journal articles**

McQuarrie, E.F./Mick, D.G. (1992), On resonance: A critical pluralistic inquiry into advertising rhetoric. *Journal of consumer research* 19, 180-197.

### **Electronic book**

Chandler, D. (1994), *Semiotics for beginners* [HTML document]. Retrieved [5.10.'01] from the World Wide Web, <http://www.aber.ac.uk/media/Documents/S4B/>.

### **Electronic journal articles**

Watts, S. (2000) Teaching talk: Should students learn 'real German'? [HTML document]. *German as a Foreign Language Journal [online] 1*. Retrieved [12.09.'00] from the World Wide Web, <http://www.gfl-journal.com/>.

### **Other websites**

Verterhus, S.A. (n.y.), Anglicisms in German car advertising. The problem of gender assignment [HTML document]. Retrieved [13.10.'01] from the World Wide Web, <http://olaf.hiof.no/~sverrev/eng.html>.

### **Appendix**

The appendix should be used for data collected (e.g. questionnaires, transcripts etc.) and for tables and graphs not included in the main text due to their subsidiary nature or to space constraints in the main text.

### **The Layout Guidelines for the Term Paper**

- A4 size Paper
  - Font: Arial (10 points) or Times New Roman (12 points)
  - Line spacing: 1.5
  - Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Assessment Scheme:**

#### **Continuous Evaluation:**

40%

(Based on abstract writing, interim draft, general approach, research orientation, readings undertaken etc.)

#### **Final Evaluation:**

60%

(Based on the organization of the paper, objectives/ problem profile/ issue outlining, comprehensiveness of the research, flow of the idea/ ideas, relevance of material used/presented, outcomes vs. objectives, presentation/ viva etc.)

## Syllabus - Third Semester

### FUNDAMENTALS OF ECONOMETRICS

**Course Code: ECO4301**

**CreditUnits: 04**

**Course Objective:**

This course presents the basic econometrics techniques emphasizing numerical estimation of economic relationships as applied to practical economic and managerial problems

**Course Contents:**

**Module I: Basic Econometrics**

Nature, meaning and scope of econometrics; Simple and general linear regression model — Assumptions, Estimation (through OLS approach) and properties of estimators; Gauss-Markov theorem; Concepts and derivation of  $R^2$  and adjusted  $R^2$ ; Concept and analysis of variance approach and its application in regression analysis;

**Module II: Problems in Regression Analysis**

Nature, test, consequences and remedial steps of problems of heteroscedasticity; Multicollinearity and auto-correlation; Problems of specification error; Errors of measurement

**Module III: Regressions with Qualitative Independent Variables**

Dummy variable technique — Testing structural stability of regression models comparing to regressions, interaction effects, seasonal analysis, piecewise linear regression, use of dummy variables, regression with dummy dependent variables; The LPM, Logit, Probit and Tobit models — Applications.

**Module IV: Dynamic Econometric Model**

Autoregressive and distributed lag models — Koyak model, Partial adjustment model, adaptive expectations; Instrumental variables; Problem of auto-correlation — Application; Almon approach to distributed-lag models; Error correlation mechanism, Causality test, Granger test and Sim's test

**Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

# MONEY AND FINANCIAL MARKETS

**Course Code: ECO4302**

**Credit Units: 03**

## **Course Objective:**

The main objective of the course is to impart knowledge about money and financial markets, financial instruments and money, financial deepening etc.

## **Course Contents:**

### **Module I: Money in the financial system**

Role of Money in the economy, Financial Markets - Need, scope and types. Financial instruments- Futures, Forwards, Option and Swaps, financial deepening.

### **Module II: Financial markets**

Role and structure of money market – call money market, Treasury bill market and commercial bill market. An introduction to new instruments in money market

Capital markets: Role, Structure, Primary and Secondary market for securities. An Introduction to reforms in capital market (with special reference to India)

### **Module III: Monetary Management in an Open Economy**

International Financial Institutions: International Monetary fund; Objectives, Functions and an assessment of the working of IMF, IMF and India.

World Bank: Functions, Role of bank in developing countries, World Bank and India.

Emergence of a new world economic order; Setting up of World Trade Organization. WTO and India, Euro- Dollar Market.

### **Module IV: International Financial Market**

The structure & role of Global financial environment, Global effects of monetary policy on financial market, Foreign Exchange market, International Money, Credit & bond market.

## **Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

## **Text & References:**

### **Text:**

# RESEARCH METHODS IN ECONOMICS

**Course Code: ECO4303**

**Credit Units: 03**

## **Course Objective:**

The need of this subject is for those concerned with research to pay due attention to the designing and adhering to the appropriate methodology for improving the quality of research and specifically for introducing the different techniques of doing marketing research.

## **Course Contents:**

### **Module I -Preliminaries**

Meaning and definition of research- classification of research(pure, applied, exploratory, descriptive, historical, diagnostic, experimental, qualitative, quantitative) - importance, applications and limitations of social science research- interdisciplinary and trans-disciplinary approaches Statistics and information -communication technology in research- Basic elements of the scientific method-theory and research- the meaning of methodology

### **Module II- Research problem and design**

An overview of the different steps in research process-selection of the topic and formulation of the research problem in Economics with illustrations- review of literature- Research design, features of a good design-different research designs for exploratory, descriptive, diagnostic and experimental research

### **Module III -Collection and analysis of data**

Sample design- probability and non probability sampling- complex random sampling designs-Methods of collecting primary data- questionnaire and schedules- sources of secondary data on Indian economy- case study method -processing of data- sources of hypothesis-Testing of hypothesis – procedure for testing hypothesis-one tailed and two tailed tests – basics of the important parametric and non-parametric tests- basic awareness of SPSS

### **Module IV- Interpretation and preparation of the report**

Interpretation, drawing conclusions and reporting it-Structure of the research report- Types of reports-Methods of footnotes and referencing

## **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

## **Text & References:**

## **GROUP A: INDUSTRIAL AND AGRICULTURE ECONOMICS**

### **INDUSTRIAL ECONOMICS**

**Course Code: ECO4304**

**Credit Units: 03**

**Course Objective:** The objective of Industrial Economics is to understand about the Organization of industry, changing forms of industrial organization, Process of industrialization, Rationale, objectives, strategies and policies. Employment implications of industrialization; Appropriate industrial technology for LDCs. Industrialization and economic development. Patterns and phases of industrial growth and changes in industrial structure

#### **Course Contents:**

##### **Module I: Theory of firm and pricing**

Objectives of the firm profit and non-profit, Maximizing models of the firm. Bains theory of limit pricing; Marginal cost versus full cost pricing; Allocation of costs in case of joint products; Welfare implications of monopoly pricing; Investment decision; conventional and modern approaches; risk, uncertainty and investment decision.

##### **Module II: Market structure, conduct and performance**

Industrial concentration: concepts and measurement; Extent, causes and likely effects of concentration. Analysis of diversification, Vertical integration and mergers in Industry; Extent of monopoly and concentration in India; Public policy towards Industrial concentration and monopoly power in India

##### **Module III: Industrial location**

Theories and factors affecting location; infrastructure for industrialization; Regional growth of industry in India; Tools of public policy; Indian policy for backward areas. Industrial finance in India; Role of term-leading institutions in industrial development of India; Indian capital market

##### **Module IV: Issues in Indian industry**

Phases of industrial growth and changes in industrial structure India. Public sector rationale and organization; Public sector pricing policies; The question of efficiency in the context of special constraints; Overall performance of public sector in India; The concept of joint-sector in India; The problems of industrial sickness; Capacity utilization. Foreign collaborations; Multinationals in Indian joint ventures abroad; The recent liberalization trends; Large versus small scale industry debate in India.

#### **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

#### **Text & References:**

# AGRICULTURAL ECONOMICS OF INDIA: INCENTIVES & DECISION MAKING

**Course Code: ECO4305**

**Credit Units: 03**

## **Course Objective:**

The Objective of Agricultural Economics is to make students aware about the Agricultural setup of India and the various decision making processes of India at different levels.

## **Course Contents:**

### **Module I**

Nature and scope of agricultural economics; Role of agriculture in economic development; Interdependence between agriculture and industrial development; Systems of farming Farm size and productivity debate; Land reforms in India

### **Module II**

Agricultural production functions. Input output relationships; factor-factor relationships and product-product relationships; Measures of farm efficiency; Risk and uncertainty in agriculture

### **Module III**

Models of agricultural development (Lewis, Fei-Ranis, Jorgenson, Mellor, Schultz, and Boserup. Models); Technological change and new agricultural strategy (green revolution) in India, Agro-climatic zonal planning in India

### **Module IV**

Agricultural price policy in India; Criteria to fix agricultural prices; Intersectoral terms of trade; Measures to increase marketable surplus; Functions of agricultural marketing; Efficiency criteria for agricultural marketing. Problems of Indian agricultural marketing; Measures to improve the efficiency of agricultural marketing in India

### **Module V**

Importance of agricultural finance; Source of agricultural finance, Defects of rural money lending system; problems of agricultural cooperative societies; Government policy for agricultural credit; Problems and suggestions to improve agricultural finance; Causes of rural indebtedness; Measures to reduce rural indebtedness; Objective and impact of integrated rural development programme; Resource mobilisation from agricultural sector

## **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

## **Text & References:**

### **Text:**

## **GROUP B: DEVELOPMENT ECONOMICS**

### **ECONOMIC DEVELOPMENT & POLICY IN INDIA**

**Course Code: ECO4306**

**Credit Units: 03**

#### **Course Objective:**

The main focus of this subject is on different concepts of Growth and Development, to understand different models of Development and Development Process of India as far as its various Plans are concerned.

#### **Course Contents:**

##### **Module I**

Economic growth, development and sustainable economy; Various traditional and modern criteria and measure of development, Major features of structural change and economic development; Measurement of absolute poverty and income inequality; Growth and equality trade –off

##### **Module II**

Classical, Marxian and Schumpeterian theories of economic development; Stages of economic growth (Rostow and Marx); approaches to the theory of underdevelopment and development underdevelopment; The big-push theory; Critical minimum effort thesis, Low level equilibrium trap. Lewis and Ranis- Fei models of economic development

##### **Module III**

Planning and the market mechanism State intervention vs. liberalization, and privatization debate; The core areas of State intervention under liberalization; Process of plan formulation; Investment criteria for plan projects, cost-benefit analysis; Determination of size, growth rate and priorities in planning; Use of input-output and linear programming techniques in planning.

##### **Module IV**

Models in economic planning: policy models, projection models and development planning models. Models underlying various Indian Plans: Harrod-Domar model; Mahalanobis model, and the model underlying current Five Years Plan. Resource mobilization for planning: Domestic resources; mobilization of resources through fiscal measures and monetary regulation; Savings and inflationary finance; External resources-Dual gap analysis and foreign borrowings. Foreign borrowings vs. foreign direct investment

##### **Module V**

India's Five Year Plans: Objectives, strategies, achievements and constraints. Decentralized planning and people's participation; Saving-investment rates-trends and Problems; The policy debate in the post liberalization period and disinvestments in public sector undertaking MNCs Vs.Swadeshi movement benefits and pitfalls of globalization and international finance

#### **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

#### **Text & References:**

# LABOUR ECONOMICS

**Course Code: ECO4307**

**Credit Units: 03**

## **Course Objective:**

The course deals with issues pertaining to the labour market, wage theories, employment policies trade unions and collective bargaining in the globalized economy which have become vitally important for developing countries. In a country like India where the bulk of the labour force is in the unorganized sector and the organized sector is witnessing “jobless” growth, the importance of issues such as employment and unemployment as well as livelihood and social security for the growing millions continues to assume significance. This paper exposes students to theoretical as well as empirical issues relating to the labour market with special reference to India

## **Course Content:**

### **Module I: Introduction**

Meaning, Concept, Significance & Peculiarities of Labour; Nature, Scope & Importance of Labour Economics; Characteristics of the Indian Labour Market

### **Module II: Wage Determination -**

Marginal Productivity Theory, Theory of Collective Bargaining, Modern Theory of Wages; Concept of Minimum Wage and Fair Wage; Wage Determination in Various Sectors- Rural, Urban, Organized, Unorganized and Informal Sector; Wages in Relation to Cost and Productivity; Wage Policy in India

### **Module III: Migration & Absenteeism**

Approaches to Labour Migration , Effects of Migration; Absenteeism of Industrial Labour in India , Causes , Effects and Remedies of Absenteeism; Labour Turnover – Causes of Low Labour Turnover in India, Remedies to Improve the Labour Turnover

### **Module IV: Industrial Relations:-**

Growth, Pattern, Structure & Achievements of Labour Unions in India; Causes of Industrial Disputes, their Settlement & Prevention Mechanism; Role of Tripartism; Current Trends in Collective Bargaining

### **Module V: Labour Market Reforms:-**

Measures, Imparting and Flexibility in Labour Markets; Exit Policy; Need of Safety Nets  
Second National Commission on Labour, Globalization and Labour Market

## **Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

## **Text & References:**

### **Text:**

## **GROUP C: PUBLIC ECONOMICS**

### **PUBLIC FINANCIAL ADMINISTRATION**

**Course Code: ECO4308**

**Credit Units: 03**

**Course Objective:** the course objective shall be to provide the students a broad understanding of the current theories and practices in Public Financial Administration, helping them to identify contemporary issues in Public Financial Administration in India and to formulate solutions in the light of theories and practices; Helping the participants to understand taxation policy, management of public expenditure, public debt and budgetary techniques and practices. The coverage of the subject will be with special emphasis on Indian experience.

#### **Course Contents:**

##### **Module I: Public Financial Administration**

Public Finance - Theory & Principles, Fiscal functions, Public choice - provision for social goods, Principles of federal finance Public financial administration in federal set up, Budgeting: Objectives & types of budget, Constitutional provisions for preparation and presentation of Budget, Finance Act & Appropriation Act.

Linkage with Accounting and Economic Classification

##### **Module II: Modern Techniques in Budgeting**

Zero Base Budgeting, Performance Budgeting, Cash budgeting: Cash management and Treasury functions in Government, Other budgeting techniques, Budgetary reforms and New Public Management

##### **Module III: Central Government Budgeting Process**

Plan & Non-Plan expenditure, Capital and revenue expenditure, Preparation of budget, Implementation and monitoring of budget, Public Investment – Programming and Management Concept and purpose: Role of Planning Commission, its Fiscal Responsibility.

##### **Module IV: Finance Commission's Recommendations**

Principles of Federal Finance, 13<sup>th</sup> Finance Commission, Centre-State relations, Grants-in-Aid; Parliamentary Financial Committees: Estimates Committee, Public Accounts Committee, Committee on Public Undertakings, Standing Committee for scrutiny of demands for grants .

#### **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

# ENVIRONMENTAL ECONOMICS

**Course Code: ECO4309**

**Credit Units: 03**

## **Course Objective:**

The course will provide an insight into basics of environmental problems environmental management and interrelationship between environment and economic development.

## **Course Contents:**

### **Module I: Introduction**

Environmental Economics - Meaning, nature and Historical development of environmental economics. Structure of environment, Characteristics of Environment, Sustainable development: concept, indicator and measurement.

### **Module II: Waste management**

Pollution prevention, physical operations of waste treatment, Water pollution, Air pollution and control, Global Environmental Issues

### **Module III: Environmental Management**

Environmental Legislations in India, Environment Quality Objectives and standards, Institutional Environmental agreements; Tools for environmental management; Environmental economics

### **Module IV: Environment and Economic Development**

Interrelationship between environment and economic development; Environmental pollution in global perspective; Case studies on environmental management – Textile Industries and Tanneries

## **Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

## **Text & References:**

### **Text:**

## TERM PAPER/ REVIEW OF DISSERTATION-II

**Course Code: ECO4331**

**Credit Units: 02**

### GUIDELINES FOR TERM PAPER

A term (or research) paper is primarily a record of intelligent articulation through several sources on a particular topic of a given subject.

The students will choose the topic at the beginning of the session in consultation with the faculty assigned/chosen. The progress of the paper will be monitored regularly by the faculty. At the end of the semester the detailed paper on the topic will be submitted to the faculty assigned/chosen. The evaluation will be done by Board of examiners comprising of the faculties.

The procedure for writing a term paper may consists of the following steps:

Choosing a topic

1. Finding sources of material
2. Collecting the notes
3. Outlining the paper
4. Writing the first draft
5. Editing & preparing the final paper

#### 1. Choosing a Topic

The topic chosen should not be too general. Student will normally consult the faculty guide while finalizing the topic.

#### 2. Finding Sources of material

- The material sources should be not more than 5 years old unless the nature of the paper is such that it involves examining older writings from a historical point of view.
- Begin by making a list of subject-headings under which you might expect the topics to be listed.
- The sources could be books and magazines articles, news stories, periodicals, journals, internet etc.

#### 3. Collecting the notes

Skim through sources, locate the useful material, make notes of it, including quotes and information for footnotes.

- *Get facts, not just opinions.* Compare the facts with author's conclusion(s)/recommendations.
- In research studies, notice the methods and procedures, results & conclusions.
- Check cross references.

#### 4. Outlining the paper

- Review notes to find main sub-divisions of the topic.
- Sort the collected material again under each main division to find sub-sections for outline so that it begins to look more coherent and takes on a definite structure. If it does not, try going back and sorting again for main divisions, to see if another general pattern is possible.

#### 5. Writing the first draft

Write the paper around the outline, being sure that you indicate in the first part of the paper what its purpose is. You may follow the following:

- statement of purpose/objectives
- main body of the paper
- statement of summary and possible conclusion(s)/recommendations

Avoid short, bumpy telegraphic sentences and long straggling sentences with more than one main ideas.

## **6. Editing & preparing the final paper**

- a. Before writing a term paper, you should ensure you have an issue(s) which you attempt to address in your paper and this should be kept in mind throughout the paper. Include only information/ details/ analyses that are relevant to the issue(s) at hand. Sometimes, the relevance of a particular section may be clear to you but not to your readers. To avoid this, ensure that you briefly explain the relevance of every section.
- b. Read the paper to ensure that the language is not awkward, and that it "flows" smoothly.
- c. Check for proper spelling, phrasing and sentence construction.
- d. Check for proper form on footnotes, quotes, and punctuation.
- e. Check to see that quotations serve one of the following purposes:
  - (i) Show evidence of what an author has said.
  - (ii) Avoid misrepresentation through restatement.
  - (iii) Save unnecessary writing when ideas have been well expressed by the original author.
- f. Check for proper form on tables and graphs. Be certain that any table or graph is self-explanatory.

### **Term papers should be composed of the following sections:**

1. Title page
2. Abstract
3. Introduction
4. Review of the Literature
5. Discussion&Conclusion
6. References
7. Appendix

Generally, the introduction, discussion, conclusion and references should account for a third of the paper and the review part should be two thirds of the paper.

### **Discussion**

The discussion section either follows the results or may alternatively be integrated in the results section. The section should consist of a discussion of the results of the study focusing on the question posed in the paper.

### **Conclusion**

The conclusion is often thought of as the easiest part of the paper but should by no means be disregarded. There are a number of key components which should not be omitted. These include:

- a) summary of objectives and issues raised.
- b) summary of findings
- c) summary of limitations of the study at hand
- d) details of possibilities for related future research

### **References**

From the very beginning of the research work, one should be careful to note all details of articles or any other material gathered. The Reference part should list ALL references included in the paper. References not included in the text in any form should NOT be listed here. The key issue here is consistency. Choose a particular convention and stick to this.

### **The Conventions**

#### **Monographs**

Crystal, D. (2001), *Language and the internet*. Cambridge: Cambridge University Press.

### **Edited volumes**

Gass, S./Neu, J. (eds.) (1996), *Speech acts across cultures. Challenges to communication in a second language*. Berlin/ NY: Mouton de Gruyter.

[(eds.) is used when there is more than one editor; and (ed.) where there is only one editor. In German the abbreviation used is (Hrsg.) for Herausgeber].

### **Edited articles**

Schmidt, R./Shimura, A./Wang, Z./Jeong, H. (1996), Suggestions to buy: Television commercials from the U.S., Japan, China, and Korea. In: Gass, S./Neu, J. (eds.) (1996), *Speech acts across cultures. Challenges to communication in a second language*. Berlin/ NY: Mouton de Gruyter: 285-316.

### **Journal articles**

McQuarrie, E.F./Mick, D.G. (1992), On resonance: A critical pluralistic inquiry into advertising rhetoric. *Journal of consumer research* 19, 180-197.

### **Electronic book**

Chandler, D. (1994), *Semiotics for beginners* [HTML document]. Retrieved [5.10.'01] from the World Wide Web, <http://www.aber.ac.uk/media/Documents/S4B/>.

### **Electronic journal articles**

Watts, S. (2000) Teaching talk: Should students learn 'real German'? [HTML document]. *German as a Foreign Language Journal [online] 1*. Retrieved [12.09.'00] from the World Wide Web, <http://www.gfl-journal.com/>.

### **Other websites**

Verterhus, S.A. (n.y.), Anglicisms in German car advertising. The problem of gender assignment [HTML document]. Retrieved [13.10.'01] from the World Wide Web, <http://olaf.hiof.no/~sverrev/eng.html>.

### **Appendix**

The appendix should be used for data collected (e.g. questionnaires, transcripts etc.) and for tables and graphs not included in the main text due to their subsidiary nature or to space constraints in the main text.

### **The Layout Guidelines for the Term Paper**

- A4 size Paper
  - Font: Arial (10 points) or Times New Roman (12 points)
  - Line spacing: 1.5
  - Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Assessment Scheme:**

#### **Continuous Evaluation: 40%**

(Based on abstract writing, interim draft, general approach, research orientation, readings undertaken etc.)

#### **Final Evaluation: 60%**

(Based on the organization of the paper, objectives/ problem profile/ issue outlining, comprehensiveness of the research, flow of the idea/ ideas, relevance of material used/presented, outcomes vs. objectives, presentation/ viva etc.)

## SUMMER INTERNSHIP EVALUATION

Course Code: ECO4335

Credit Units: 06

### GUIDELINES FOR INTERNSHIP FILE AND INTERNSHIP REPORT

(These guidelines will be useful for undertaking an internship programme during the summer or at any other time wherein the student/ researcher works full time with a company/organisation)

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**).

#### INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. *Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.*

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include *five sections* in the order described below.

1. **The Title Page** – An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content** – An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed through the programme, the daily tasks performed, major projects contributed to, dates

and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.

5. **Appendices** – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

## **INTERNSHIP REPORT**

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (In case a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The layout of the report should be as per the standard layout prescribed by the organization wherein the student undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

➤ **Title or Cover Page.**

The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

➤ **Acknowledgements**

Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

➤ **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate

titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in “point” form.

While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

➤ **Conclusion(s) & Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly. Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

➤ **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

➤ **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**The Layout Guidelines for the Internship File & Internship Report:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

**Assessment Scheme:**

<b>Continuous Evaluation:</b>	30%
(based on Internship File and the observations of the faculty guide/ supervisor)	

<b>Feedback from Company/ Organization:</b>	10%
---	-----

<b>Final Evaluation:</b>	
(Based on Internship Report, Viva/ Presentation)	60%

# Syllabus - Fourth Semester

## ADVANCED ECONOMETRICS

**Course Code: ECO4401**

**Credit Units: 04**

### Course Objective:

This course will enable the students to learn techniques relating to the estimation of parameters. On successful completion of the course the students will understand the estimation techniques, difficulties involved in estimation process, evaluation of parameters. All this will enhance the understanding of scientific decision making process.

### Course Contents:

#### Module I: Simultaneous Equation Models

Introduction and examples; The simultaneous equation bias and inconsistency of OLS estimators; The identification problem; Rules of identification — order and rank conditions

#### Module II: Methods of Estimating Simultaneous Equation

System Recursive Methods and OLS; Indirect Least Squares (ILS), Instrumental Variables (IV) 2SLS and 3SLS Methods

#### Module III: Time Series Analysis

Stationarity, unit roots, co-integration-spurious regression, Dickey-Fuller test, Engle-Granger test, Random walk model

#### Module IV: Forecasting Techniques

Forecasting with ARIMA modelling; Box-Jenkins methodology; Vector autoregression; Problems with VAR modelling — Applications; Time varying parameters and Kalman filter

#### Module V: Panel Data Techniques

Panel data techniques — Random coefficients model; Fix effects model; Random effect model

### Examination Scheme:

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

### Text & References:

# MONETARY ECONOMICS

**Course Code: ECO4402**

**Credit Units: 03**

## **Course Objective:**

The main objective of the course is to impart knowledge about the monetary theories and policy, demand and supply of money, functions of a central bank, neutrality of money etc.

## **Course Contents:**

### **Module I: Money**

Meaning, functions and significance; Theories of Money and Prices: Traditional quantity theory of money (Fisher's and Cambridge Versions), Keynesian theory, Modern theory (Friedman's approach)

### **Module II: Demand for Money**

Classical approach, Keynesian approach and Post Keynesian: Tobin's approach.

### **Module III: Supply of Money**

Components and measures of money supply; The 'H' theory of money supply, money multiplier - process and determinants. Factors affecting 'H'; RBI's analysis of money supply

### **Module IV: Monetary Policy**

Functions of central bank; Definition, Goals, targets and indicators of monetary policy; Measures of credit control; Transmission mechanism of monetary policy - Keynesian and portfolio mechanisms; Lags in monetary policy. The neutrality of money, Discriminatory effects of monetary policy.

## **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

## **Text & References:**

# INTERNATIONAL ECONOMICS

**Course Code: ECO4403**

**Credit Units: 03**

**Course Objective:**

The course focuses on the basic issues, concepts and theories related to the international economics; it includes concepts like gains from trade, terms of trade and exchange rate.

**Course Contents:**

**Module I**

Nature of International Economics; Theories of International Trade – Absolute and Comparative Cost Advantage Theory. Haberler's Opportunity Cost Theory. Mill's Reciprocal Demand Theory. Heckscher Ohlin Theorem – Factor Abundance in terms of price and physical. Factor Intensity, Factor Price Equalisation theorem; Leontief paradox

**Module II**

New Theories of International Trade: KRAVIS theory of Availability, Linders theory of the volume of trade and Demand Pattern. Posner's Technological gap theory; Gains from Trade: Measurement - Ricardian, Mill's and Modern Approach. Factors affecting Gains from Trade

**Module III: Terms of Trade**

Types, determination of Terms of Trade; Factors affecting terms of trade; Economic Growth and International Trade: Effects of Growth on Trade – Production and Consumption effects. Effects of growth on terms of trade, immiserising growth; Increase in factor endowments and International Trade: Rybezynski theorem

**Module IV: Exchange Rate**

Types, Pegged, Spot, Forward. Determination of exchange rate – Mint Power Parity, theory of Purchasing Power Parity; Fixed v/s Flexible Exchange Rate

**Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

**Text & References:**

**Text:**

## **GROUP A: INDUSTRIAL AND AGRICULTURE ECONOMICS**

### **ENTREPRENEURSHIP & SMALL SCALE BUSINESS**

**Course Code: ECO4404**

**Credit Units: 03**

**Course Objective:** The purpose of this paper is to prepare a ground where the students view Entrepreneurship as a desirable and feasible career option. In particular the paper seeks to build the necessary competencies and motivation for a career in Entrepreneurship.

**Course Content:**

**Module I:** Er.-Entrepreneurship-Enterprise: Conceptual issues. Entrepreneurship vs. Management. Roles and functions of er in relation to the enterprise and in relation to the economy. Entrepreneurship is an interactive process between the individual and the environment. Small business as seedbed of Entrepreneurship; Entrepreneur competencies, Entrepreneur motivation, performance and rewards

**Module II:** Opportunity scouting and idea generation: role of creativity and innovation and business research. Sources of business ideas; Entrepreneur opportunities in contemporary business environment, for example opportunities in net-work marketing, franchising, business process outsourcing in the early 21 century. The process of setting up a small business: Preliminary screening and aspects of the detailed study of the feasibility of the business idea and financing/non-financing support agencies to familiarize themselves with the policies/programs and procedures and the available schemes.

**Module III:** Management roles and functions in a small business. Designing and re-designing business process, location, layout, operations planning and control. Basic awareness on the issues impinging on quality, productivity and environment; Managing business growth; The pros and cons of alternative growth options: internal expansion, acquisitions and mergers, integration and diversification; Crisis in business growth

**Module IV:** Sources of risk/venture capital, fixed capital, working capital and a basic awareness of financial services such as leasing and factoring.

**Module V:** Issues in small business marketing. The concept and application of product life cycle [plc], advertising and publicity, sales and distribution management; The idea of consortium marketing, competitive bidding/tender marketing, negotiating with principal customers. The contemporary perspectives on Infrastructure Development, Product and Procurement Reservation, Marketing Assistance, Subsidies and other Fiscal and Monetary Incentives. National state level and grass-root level financial and non-financial institutions in support of small business development.

**Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

# INDIAN AGRICULTURE-MARKETS, INSTITUTIONS & TECHNOLOGY

**Course Code: ECO4405**

**Credit Units: 03**

## **Course Objective:**

The Objective of Agricultural Economics is to make students aware about the Agricultural setup of India and the various decision making processes of India at different levels with regard to its commodity Markets, Reorganization of Rural Credit, Agricultural Productivity, Demand& Supply of Farm Products.

## **Course Content:**

### **Module I: Introduction**

Nature and Problems of Agricultural Commodity Markets –Types; Group, Global, Corporate & Forward - agricultural marketing and price system in India - Marketing Margins and Marketing Margin Determinants; and Evaluation of Marketing Efficiency .

### **Module II: Rural Money Markets**

Reorganization of rural credit – co-operatives, commercial banks, regional rural banks, micro finance, Role of NABARD and Vaidynathan committee - Credit fragmentation - Organized and unorganized sectors -Report of Radhakrishna Committee - Credit rationing \_ Moral hazards, Evolution of credit systems in India - Imperfections in rural credit markets

### **Module III: Agricultural Production and Productivity**

Agricultural production – Resource and efficiency in traditional agriculture, Production function analysis in agriculture, factor combination and resource substitution, cost and supply curves - Size of farm and laws of returns –Theoretical and empirical findings - Farm budgeting and cost concepts, supply response of individual crops and aggregate supply - Technical change and agricultural productivity

### **Module IV: Demand for Farm Products**

Characteristics of demand for farm products - Concept and measurement of own price cross \_ Price and income elasticities of demand and their interrelationship \_Quantity and quality components of demand for food - Growth in demand for food in developing and developed countries - Forecasting of demand for food products -  
Rationale for and types of government intervention for food and nutrition security in developing countries

### **Module V: Supply of Farm Products**

Characteristics of supply of farm products - Issues relating to specification of supply response function (Distributed lags, acreage vs. production response etc.) -Rigidities in farm supply response - Supply response of individual crops and aggregate production Market supply of a subsistence crop - Supply responin Indian agriculture - Price vs. non-price factors in inducing aggregate supply growth - Characteristics of farm product markets in India Role of farmers' marketing co-operatives - Futures trading - Towards free trade in agricultural commodities

**Examination Scheme:**

## **GROUP B: DEVELOPMENT ECONOMICS**

### **COMPARATIVE ECONOMIC DEVELOPMENT**

**Course Code: ECO4406**

**Credit Units: 03**

#### **Course Objective:**

This course investigates selected issues in comparative historical perspective over the 19th century and the first few decades of the 20th century. The course focuses on a set of countries, which followed clearly diverse trajectories and patterns of growth to achieve their industrial transition and compares the outcomes of these diverse trajectories on sectoral change, intersectoral relations, labour processes and industrial relations and also compares the role of the state in facilitating the respective trajectories.

#### **Course Content:**

##### **Module I**

An overview of economic development of the countries selected for case studies -- Britain, U.S.A., Japan and USSR. Major features of structural changes and their interrelations- labour, productivity, capital formation, output, consumption, income and distribution of income.

##### **Module II**

Changes in the structure of agriculture and economic development -- Britain, Japan and U.S.S.R  
Role and pattern of industrialisation in Britain, Japan and U.S.S.R

##### **Module III**

Labour markets and processes - Britain and Japan  
Financial institutions and economic development in U.S.A and Japan

##### **Module IV**

Foreign trade and economic development -- Britain, Japan and USA; Role of the State in economic development (regulatory and developmental role) -- Japan, USA and USSR

**Module V:** Emergence of regional groupings with special reference to SARC, SAPTA, SAFTA, ASEAN in changing economic scenario

#### **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>

# URBAN ECONOMICS

**Course Code: ECO4407**

**Credit Units: 03**

## Course Objective:

This objective behind introducing this course is to acquaint the underlying theories, propositions and issues that usually arise in studying an urban situation. The course will equip the student with the basic theoretical premises and analytical tools (borrowed from the standard micro and macro economics) that are used by an urban economist. The course therefore is not necessarily grounded in any particular reality (except where explicitly mentioned), however for pedagogical purposes, explanation and illustrations will naturally come from the Indian situation.

## Course Content:

**Module I:** Historical emergence of urban economics and regional development as academic disciplines – Spatial structure and growth – Comparison between developed and developing countries

**Module II:** Decentralisation of economic decisions (arguments for and against) –Regional inequality – Rural/urban inter linkages – Indian situation.

**Module III:** Analytical techniques in urban economics and difficulties in measurement of Urban growth – Regional I/O tables – difficulties and uses – Multi-regional models – Statistical/econometric/qualitative models in regional and urban studies – Data sources and techniques – Geographical Information System (GIS).

**Module IV:** City functions and structure – Size/distribution/growth – Concept of Urbanisation – Urban morphology (sub/ de/ re/ over/ urbanisation) – Classical models – Location of residential and industrial activities – Industrial productivity and agglomeration –Tertiary sector – Metropolitan/mega cities – Trends world wide – Indian situation –The case of Mumbai.

**Module V:** Urban labour markets – Developed and developing economies – Informal sector – Segmentation and hierarchy – Dualism – Impact of globalisation – Todaro model –Migration theory and empirical trends in India

## Examination Scheme:

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

## **GROUP C: PUBLIC ECONOMICS**

### **APPLIED WELFARE ECONOMICS**

**Course Code: ECO4408**

**Credit Units: 03**

#### **Course Objective:**

The learning outcome of this course is to use economic theory (Welfare Economics, Public Choice and Social Choice) to explain the foundation of economic policy, the design and the efficiency of different policy instruments, welfare consequences of economic policy, and the process of policy-making.

#### **Course Content:**

**Module I:** Introduction: welfare economics and welfare, concepts of utility; Competitive equilibrium and Pareto optimality: the fundamental theorems of welfare economics, alternatives to efficiency, efficient allocations with public goods

**Module II:** Externalities and market failures: The Coase theorem, markets for externalities, theory of second best

**Module III:** Introduction to social choice: the Arrow theorem - why it is impossible to make everyone happy, social welfare functions

**Module IV:** State intervention: reasons for state intervention, types of intervention, reasons for redistribution: redistribution as insurance, redistribution as a public good, redistribution as a fairness concept

**Module V:** Social decision-making: voting, voting systems, welfare implications of voting, fair social contracts; Implications of voting: theory vs. practice: interest groups, rent-seeking and bureaucracy

#### **Examination Scheme:**

<b>Components</b>	<b>P0(Att.)</b>	<b>P1</b>	<b>C1</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	15	70

# RESOURCE ECONOMICS

**Course Code: ECO4409**

**Credit Units: 03**

## **Course Outline:**

The course begins by exposing students to basic concepts in optimization and relevant introductory topics in microeconomics. Different categories of natural resources are covered separately with focus on forestry, fishery and exhaustible energy resources. This is followed by discussions on stock pollutants, issues of risk and uncertainty and biodiversity conservation and valuation. The course includes additional modules relating to: (a) the sustainable development concepts, relevant indicators (such as genuine savings) and natural resource accounting and (b) to the economics of property rights regimes (with focus on common property rights). It is expected that the course will help bridge the gap between theoretical models and empirical study of resource allocation and management issues in a real-world context.

## **Course Content:**

**Module I:** Basics concepts in static & dynamic optimization; Introduction: Asset markets, issues of discounting, the resource allocation problem; Malthus and the commons problem; Economic Surpluses and Market distortions;

**Module II:** Renewable resources: basic optimal harvest problem; economics of fishery; economics of forestry

**Module III:** Non-renewable resources: basic optimal depletion problem; Hotelling's rule; exhaustible energy resources

**Module IV:** Stock pollutants, risk and uncertainty

**Module V:** Efficiency and Sustainability; OPEC and the political economy of oil; Energy markets and policies; Resource exploitation in LDC's; war and famine

## **Examination Scheme:**

Components	P0(Att.)	P1	C1	CT	EE

# DISSERTATION

**Course Code: ECO4437**

**Credit Units: 06**

## **GUIDELINES FOR DISSERTATION**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### **Selecting the Dissertation Topic**

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

### **Planning the Dissertation**

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

### **The Dissertation plan or outline**

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.

- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

### **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct quotation and what is your paraphrase.

### **Dissertation format**

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**.
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required:

Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

### **The Layout Guidelines for the Dissertation:**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

### **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

### **Assessment Scheme:**

<b>Continuous Evaluation:</b> (Based on Abstract, Regularity, Adherence to initial plan, Records etc.)	40%
<b>Final Evaluation:</b> Based on,	60%
Contents & Layout of the Report,	25
Conceptual Framework,	10
Objectives & Methodology and	10
Implications & Conclusions	15

# **Master of Business Administration (Business Analytics)**

**FLEXILEARN**

**-Freedom to design your degree**

**Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

## **Master of Business Administration (Business Analytics)**

### **Programme Mission:**

The mission of the MBA programme is to foster an environment of academic excellence in Business Management through research and innovation, industry integration, internationalization and extension activities and develop highly trained and employable professionals with specialization in the area of Marketing & Sales, Finance, Banking & Finance, Human Resource Management, International Business, Information Technology, E-Commerce and Hospital & Healthcare, who are socially responsible and globally minded professional to meet the current and emerging needs of business and society.

### **Programme Description:**

The two year full time Masters in Business Administration programme is to educate and prepare students with the knowledge, analytical ability, and management perspectives and skills needed to lead, to motivate and to manage diversified workforce, rapid technological change and competitive marketplace while considering the principles of ethical, legal and corporate governance fundamentals.

### **Programme Outcome (PO):**

<b>PO1</b>	Apply the knowledge of marketing, human resource management, finance and other functional areas of management to solve complex management issues in volatile business environment
<b>PO2</b>	Student shall have ability to acquire & evaluate new knowledge through Business Research Methods, have the ability to identify, define, investigate, and solve critical business issues using management principles, analyse data/information and interpret results for reaching optimum solutions.
<b>PO3</b>	Student shall be able to understand global issues from different perspectives, recognize the opportunities to improve the business value chain as an entrepreneur and shall develop and display basic business acumen & business skills and be able to apply different forms of communication in diversified cultural settings.
<b>PO4</b>	Student shall able to critically thinkto assess societal, health, safety, legal, and cultural issues and apply range of strategies for solving a problem and decision making
<b>PO5</b>	Student shall be able to practice ethical principles and commit to professional ethics and responsibilities and norms of the management practice.
<b>PO6</b>	Student shall develop range of Leadership skills and shall demonstrate excellent interpersonal skills, understanding of group dynamics and effective teamwork, including awareness about personal strengths and limitations.
<b>PO7</b>	Student shall be able to communicate effectively on complex management activities with various stakeholders being able to comprehend and write effective reports, design documentation, make effective presentations, and give & receive clear instructions.
<b>PO8</b>	Student shall recognize the need for, and have the ability to engage in independent and life-long learning in the broadest context of technological change.
<b>PO9</b>	Student shall be able to create, select, and apply appropriate techniques, resources, and modern management and IT tools including prediction and modeling to make decisions.

**Supporting document for PSOs (Programme Specific Outcomes) of MBA BA**

<b>PSO 1</b>			<b>PSO 2</b>		<b>PSO 3</b>	<b>PSO4</b>	
Student shall be able to describe fundamental knowledge of general and functional management courses & relevant technological tools to identify opportunities and apply appropriate business strategies & solutions.			Student shall be able to apply knowledge of business analytics to solve business problems using appropriate technology such as machine learning/artificial intelligence and software solutions such as R, Python, SPSS, SAS to make holistic judgment. Student shall also apply technical skills to design effective advanced analytics models and simulations for effective decision making.		Student shall be able to apply specific and cross functional knowledge to solve critical business and management issues, write effective reports, demonstrate leadership and interpersonal skills, understanding of group dynamics and effective teamwork, including awareness about personal strengths and limitations.	Student shall be able to communicate effectively on complex management issues, make effective presentation with various stakeholders being able to comprehend and shall be able to practice ethical principles, professional values and fulfil social responsibilities and engage in life-long learning

BUA4101	<b>MANAGEMENT PROCESS &amp; ORGANIZATIONAL BEHAVIOR</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic knowledge of general Management				
Co-requisites	Student must have basic understanding of General Management.				

### Catalog Description

To help the students to develop cognizance of the importance of human behaviour.

### Course Objective:

The objective of this course is to:

1. Help the students in gaining understanding of the functions and responsibilities of the manager.
2. Provide the student understanding of Human Behaviour in organizations so as to improve his/her managerial effectiveness.

### Course Outcome:

Upon successful completion of the course a student will be able to:

CO1: Demonstrate the applicability of the concept of organizational behavior to understand the behavior of people in the organization and diversified cultural settings.

CO2: Enable students to describe how people behave under different conditions.

CO3: Analyze the complexities associated, critically evaluate and apply decisions appropriately.

CO4: Enable students to synthesize related information and evaluate options for the most logical and optimal solution so that they would be able to predict and control human behaviour and improve results.

Modules	Blooms level*	Number of hours
<b>Module I: Management vs. Manager</b> Evolution of management thought, Functions of management, Roles and Skills of a manager, Emerging challenges of management.	L1, L2	6
<b>Module II: Organization</b> Nature and structure of organization, Types of organizations, Line and staff relationships, Formal and informal organizations.	L1, L2,	6
<b>Module III: Introduction to Organization Behaviour</b> Overview of organization behaviour and its importance, Organization models.	L1, L2,	6
<b>Module IV: Individual Behaviour</b> Individual behaviour, Perception and learning, Personality, Values & attitudes, Motivation: Concept theory and application	L1, L2, L3, L4, L5, L6	6
<b>Module V: Group Behaviour</b> Group dynamics, Communication, Leadership, Power and politics, Conflicts and negotiation.	L1, L2, L3, L4, L5, L6	6

<b>Module VI: Organizational Culture and Change Management</b> Organisational culture, Organisational change and development, Work stress and its management.	L1, L2, L3, L4, L5, L6	6
---	------------------------------	---

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

BUA4102	<b>ACCOUNTING FOR MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic knowledge of general Management				
Co-requisites	Student must have basic understanding of General Management.				

### Catalog Description

The intent of this course is to acquaint the students with fundamental concepts and processes of accounting so that they are able to appreciate the nature of item presented in the annual accounts of an organization. The student will be able to familiarize with the significant tools and techniques of financial analysis further useful in the interpretation of the financial statements. The aim of this course does not focus on to make the student's expert accountant but to have a good comprehension on the management planning and control systems. However, the principal focus will be related to the interpretation and use of the financial data by non-accounting students to gain the ability of using accounting information as a tool in applying solutions for managerial problems, evaluating the financial performance, and interpreting the financial structure.

### Course Objectives

The objective of this course is to:

1. Equip the students to develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, students will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts.
2. Develop skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

### Course Outcome:

On completion of this course, the students will be able to:

CO1: Enable the students to combine practice and theoretical knowledge of financial accounting.

CO2: Demonstrate the decision-making skills to the students in the financial analysis context,

CO3: Develop an ability to identify and analyze complex financial accounting problems and opportunities in real life situations.

CO4: Develop skills in applying management accounting techniques to assist in decision making.

Modules	Blooms Level	Number of Hours
<b>Module 1: Introduction</b> The Financial Accounting Framework, Accounting Policies, Need of Accounting. Users of Accounting Information, Accounting Cycle, Accounting and Management Control.	L1, L2, L3	8

Balance sheet- Classification Items of Balance Sheet, Formats of Balance Sheet. Preparation of Balance Sheet. Income Statement- Realization vs. Accrual Principle, Format of Income Statement), Preparation of Income Statement (IAS,GAAP&IFRS), Depreciation Accounting.		
<b>Module 2: Measuring and Reporting</b> Measuring and Reporting Assets, Liabilities & Equity: Cost of sales and Inventories, Debentures, Investments, Shareholder Equity; Human Resource Accounting: Valuation of Human Resources, Recording and Disclosure in Financial Statements.	L1, L2, L5	8
<b>Module 3: Analyzing and Interpreting Financial Statements</b> Financial Statement Analysis – Basic Relationship, Overall Measures, Profitability Ratios, Investment Utilization Ratios, Financial Condition Ratios, Making Comparisons. The Statement of Cash Flows-Profit versus Cash, Purpose and Use of Cash Flow Statement, Format of Cash Flow Statement (AS-3), Preparation of Cash Flow Statement (IAS,GAAP&IFRS).	L4, L5, L6	9
<b>Module 4: Management Accounting</b> Emergence of Management Account, Managerial costing and Cost-Volume-Profit Analysis, Budgeting and Budgetary control, Variance Analysis .	L1, L2, L5	5
<b>Module 5: Cost Accounting:</b> Elements of Cost, Cost Classification and Allocation, Cost sheet, Process Costing, Job Costing.	L1, L2, L5	5

\*Bloom's Level: L1 – Knowledge; L2-Comprehension, L3 – Application, L4 – Analysis, L5 – Synthesis, L6 – Evaluation

BUA4103	<b>MARKETING MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### **Catalog Description**

Marketing management emphasizes upon the practical aspects of marketing concepts and management functions performed by professionals. This is a beginner's course in Marketing and shall cover the basics. The course helps in developing an understanding of the challenges of marketing management in manufacturing and service industries: analyzing marketing environments; evaluating strategic alternatives and designing and implementing marketing programmes involving decisions about products/services, pricing, distribution and promotion. The course serves to familiarize participants with basic marketing concepts, environment, strategies and methodology.

### **Course Objectives**

The objectives of this course are to:

1. Provide the students exposure to modern marketing concepts, tools and techniques.
2. Enhance student's knowledge to prepare for general management responsibilities by focusing on the input of the marketing perspective across all functions.
3. Explain different consumer-specific characteristics as well as certain psychological processes influencing buying behavior.
4. Provide different dimensions of marketing such as STP, business environment, distribution channels, marketing communication, and social media marketing to enable the students to design and analyze the functional aspects in emerging market.

### **Course Outcomes**

On completion of this course, the students will be able to:

CO1: Define the holistic marketing efforts to develop, design and implement marketing programs. They will also be able to examine challenges, responsibilities, and risks managers face in today's workplace.

CO2: Illustrate a comprehensive knowledge about how values are created, communicated and delivered to the target audiences.

CO3: Explain how to control the elements of the marketing mix—product policy, channels of distribution, communication, and pricing—to satisfy customer needs profitably

CO4: Design strategic approaches to manage different marketing dimensions in uplifting the consumer as well as business market.

CO5: Describe the marketing communication and its applicability along with understanding new-age media, advertising, sales promotion, personal selling etc.

<b>Modules</b>	<b>Blooms Level*</b>	<b>Number of hours</b>
----------------	----------------------	------------------------

<b>Module I: Understanding Marketing in New Perspective</b> Fundamentals of Marketing, Customer Value and Satisfaction, Customer Delight, Conceptualizing Tasks and Philosophies of Marketing Management, Value Chain, Scanning the Marketing Environment, Marketing Mix Elements, Difference between marketing and Selling, Relationship marketing, Social marketing, Strategic Planning in marketing, formulating the marketing plan.	L1, L2	8
<b>Module II: Analyzing Consumers &amp; Selecting Markets</b> The factors influencing consumer behavior. The stages in the buying process, the buying decision making process, factors effecting the buying decision., Market Segmentations, Levels of Market Segmentations, Patterns, Procedures, Requirement for Effective Segmentation, Evaluating the Market Segments, Selecting the Market Segments, Tool for Competitive Differentiation, Developing a Positioning Strategy.	L1, L2, L4	7
<b>Module III: Managing Product &amp; Pricing Strategies</b> Classification of products, New Product development, stages of product development, Adoption process, Product mix decisions and line management, Length, width and depth of a line, line analysis, and brand management, product life cycle, stages in lifecycle and factors affecting each stage, Managing product life cycles. Setting the price, adapting the price, initiating and responding the price changes.	L1, L2, L3	7
<b>Module IV: Designing: Managing the Integrated Communication</b> Channel functions and flows. Channel design decisions. Channel management decisions. Channel dynamics; vertical horizontal and multi channel marketing systems. Market Logistics decisions. Effective Communication, Integrated Marketing Communication, Marketing Communication Process, Promotion mix, Advertising, Personal Selling, Sales Promotion and Publicity and Public Relations, Direct Marketing.	L1, L2, L3	7
<b>Module VI: Emerging Trends in Marketing</b> An Introduction to Internet Marketing, Multi Level Marketing, E-Marketing, Green Marketing, Event Marketing, Types of Events, Sponsorship, Cause Related Marketing, Marketing for Non Profit Organizations Marketing Strategies for Leaders, Challengers, Followers and Nichers.	L1, L2, L5	7

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analylysis; L5-Synthesis; L6-Evaluation

### Text Book

BUA4104	<b>STATISTICAL TECHNIQUES</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers the understanding on identification of data, analysis and interpretation of data using basic quantitative tools & techniques. In this course, students can apply the quantitative techniques in the analysis of statistical and economic problems. Probability and hypothesis testing are major topics to be covered. Basic understanding of statistical concepts helps in deciding on the suitable technique for data analysis and also to interpret results.

### Course Objectives

The objectives of this course are to

1. Familiarize the students with basic quantitative tools & techniques for data analysis.
2. Equip the students with the concept of probability, hypothesis testing, data identification, and data analysis and interpretation using statistical tools.
3. Facilitate hands on experience to various statistical problems.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the basic concepts of probability and Bayes Theorem and manipulate the probability models that are most widely used in economics, and apply them correctly and carry out the appropriate statistical analysis.

CO2: Apply the appropriate statistical tools and techniques for data analysis of economic models.

CO3: Apply graphical, numerical methods and Excel to make calculate and illustrate descriptive statistics and critically evaluate the basis for these calculations.

CO4: Identify the appropriate regression model to apply to an economics dataset and also the problems associated with these models such as autocorrelation. Multicollinearity, heteroscedasticity, non Stationarity data series that may affect regression analyses.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Probability Theory</b> Elements of Probability Theory: Sample space Events, meaning of probability Classical definition of probability, The addition rule, Multiplication Rule, Theorems of total probability, conditional and statistical independence, limitation of classical definition, Bayes formula, random variable, expectation and variance of random variable (for random sampling with or without replacement)	L1, L2,L3	9
<b>MODULE 2: Random Variables and Probability Distributions</b> Defining random variables; probability distributions; expected	L1, L2,L3	9

values of random variables and of functions of random variables; properties of commonly used discrete and continuous distributions (uniform, binomial, normal, poisson and exponential random variables).		
<b>MODULE 3: Introduction to Estimation</b> Methods of sampling; sampling distribution of a statistic; distribution of the sample mean; sampling error and standard error of a statistic with special reference to the mean; Point and interval estimation of parameters; properties of an estimator; unbiasedness, relative efficiency and consistency.	L1, L2, L3	9
<b>MODULE 4: Hypothesis Testing</b> Testing of Hypothesis; type I and type II errors, power of a test; large sample tests, “t” test for the mean; one tail and two tail tests for difference of means; z-test, f-test, Chi-square test for (i) goodness of fit and (ii) independence of two attributes.	L1, L2, L3	9

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

### Text Books

1. Gupta S.C, *Fundamentals of Statistical Methods*, Sultanchand & Sons.
2. Allen Webster, *Applied Statistics for Business and Economics*, (3rd edition), McGraw Hill, International Edition 1998.
3. Pitman, Australia. M.R. Spiegel (2nd edition), *Theory and Problems of Statistics*, Schaum Series.

### Reference Books

1. P.H. Karmel and M. Polasek, *Applied Statistics for Economists* (4th edition)
2. N.G.Das, *Statistical Methods* (Edition 1&2), Tata McGraw Hill

### Modes of Evaluation: Quiz/Assignment/ Seminar/Written Examination

#### Examination Scheme:

Components	A	CT	S/V/Q	HA	EE

BUA4105	<b>EXCEL FOR DECISION MAKING</b>	L	T	P	C
Version 1.1	Latest Approved	1	0	2	2
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets.

### Course Objectives

The course enables students to:

1. Explore the Microsoft Excel as a tool for facilitating solutions for business problems/decision making
2. Have an understanding on the advanced functions of excel through guided demonstration.
3. Enhance excel skills of students and develops a set of fundamental skills that are essential for survival in business amid global uncertainty.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Manage data in excel.

CO2: Explore the functions of basic and advanced excel.

CO3: Analyze the real time series dataset.

CO4: Explain insights about decision making in business.

Modules	Blooms level*	Number of hours
<b>Module 1: Overview of Excel</b> <b>Contents:</b> Introduction to Spreadsheets: data entry using autofill, sort & filter feature, widening rows and columns, inserting & deleting rows and columns, creating lists, wrapping & merging text and cells. Introduction to basic data formatting, saving work in excel. Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel, page orientation and print area in Excel. How to adding hyperlinks to cells, inserting images, objects, equations and symbols. Introduction to Figures and Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart.	L1, L3, L4	4
<b>Module 2: Data Cleansing and Lookups</b> <b>Contents:</b> Textual functions- TRIM, SUBSTITUTE, CLEAN, STORED AS TEXT, DE-DUPLICATING, LEN & FIND, CONCATENATE, UPPER, LOWER, REPLACE functions and	L1, L3, L4	4

Data validation; Look up functions- VLookup, multiple VLook up together and HLookup with index and match; Basics of Macros.		
<b>Module 3: Logical Functions and Pivot Tables</b> <b>Contents:</b> Basic functions- ROUNDING, SUM, PRODUCT, MIN, MAX, AVERAGE, CONDITIONAL COUNTS, LARGE, RANK, VAR, Std Dev, CONDITIONAL SUMS. Date functions and Time functions. Logical functions- IF, THEN, AND, OR, NOT, COUNTIFS, SUMIFS, TRUE, FALSE Functions. Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager. Pivot table, pivot charts and conditional formatting.	L1, L3, L4	4
<b>Module 4: Simulation and Decision Making</b> <b>Contents:</b> Basics of simulation, Monte Carlo Experiment, Decision Analysis (DA): Terminology, DA without probabilities (Maximax, Maximin, Minimax Regret), DA with probabilities: (Decision point / branch, chance event / branch, Decision tree with examples.	L1, L3, L4	4

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4106	<b>OPTIMIZATION TECHNIQUES</b>	L	T	P	C
Version 1	Latest approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

The main objective of the course is to provide the students the insight into structures and processes that management science can offer and the enormous practical utility of its various utility. The course is designed to introduce the fundamental tools of MS and their application to real life business problems. It will help students to take well informed decisions in their corporate life.

### Course Objective:

The main objectives of this course are to:

1. Take decision under certain, uncertain and risky environment
2. Understand various business problems and applying a suitable MS model
3. Formulate Linear Programming Problem and solving using graphical and Simplex methods
4. Design the transportation and assignment problem, solve them and interpret the result
5. Design and solving the problems of game theory for the optimal solution
6. Describe the application of simulations.

### Course Outcomes

On completion of this course, students shall be able to:

- CO1. To recall the evolution of OR and specify currently used OR models for different business situations
- CO2. To describe a business problem and analyzing it for the optimum solution
- CO3. To illustrate different prevailing constraints while finding out optimum solution
- CO4. To evaluate various models to take better and improved decisions

Modules	Blooms level*	Number of hours
<b>Module I: Introduction</b> Optimization Techniques: uses, scope, applications in managerial decision making; assumptions of management science models, decision making environments: decisions under certainty, uncertainty and risk situation; decision tree approach and its applications.	L1, L2, L3	6
<b>Module II: Linear Programming Problems</b> Linear Programming Problems: Modeling and Solution Methods- graphical method, simplex methods, problems with maximization and minimization objects, duality and its managerial interpretation; Sensitivity analysis: meaning, Change in Objective Function Coefficients, Change in Right Hand Side Values, Change in Availability of resources and Addition of a new variable.	L1, L2, L3, L4, L6	8
<b>Module III: Transportation and Assignment Model</b>	L1, L2,	8

Transportation model: various methods of finding initial basic feasible solution and optimal solution, MODI method, degeneracy, unbalanced problems, prohibited route problems, maximization transportation problems Assignment Model: Hungarian method for solution, unbalanced assignment problems, restrictions on assignments, travelling salesman problem.	L3, L4, L6	
<b>Module IV: Game Theory</b> Two-Person Zero Sum Games, Pure Strategies: Games with Saddle Point, Mixed Strategies: Games without Saddle Point, Principle of Dominance, and Solution Methods for Games without saddle point – Algebraic Method, Arithmetic Method, Graphical Method.	L1, L2, L3, L4, L6	8
<b>Module VI: Simulation</b> Simulation: meaning, types of simulation, steps of simulation process, Monte Carlo simulation, applications of simulation	L1, L2, L3, L4, L6	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

BUA 4107	<b>DATABASE MANAGEMENT SYSTEMS</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

In this course the students will learn about the importance and usage of database management systems in the modern day organizations. The students shall grasp sound knowledge of various types of databases that exist, creation of data warehouse and application areas of data mining. Also, the students will be learning SQL, the language of databases.

### Course Objectives

The course aims to make the students

1. Understand the basic and advanced concepts in databases and database management systems
2. Analyze the importance of databases in day to day life.
3. Get a hands-on experience on the SQL-the language of databases.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Define the basic terminology used in databases.

CO2: Describe the concepts related to databases architecture.

CO3: Apply the knowledge of SQL in creating databases using DBMS software for a business organization.

CO4: Compare and contrast various types of keys used in database creation.

CO5: Review and assess the organization's data and network security aspects.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction to DBMS</b> Definition of DBMS, Concept and Goals of DBMS, Data Independence, DBMS Architecture, Levels, Database Administrator, File System Approach Vs DBMS Approach, Advantages of Using a DBMS, Data Models, Schemas, and Instances, Database Languages, Database Users, Database Abstraction.	L1, L2	6
<b>Module II: Relational Database &amp; ER Model</b> <b>Relational Database:</b> Relational System, Codd's Rule, Relational Model, Optimization, Tables and Views <b>ER Model:</b> Entity Type, Entity Set, Relationship type, Relationship sets, Constraints: Cardinality Ratio and Participation Constraint, Keys, Mapping, Design of ER diagrams.	L2, L3	7

<b>Module III: Relational Model Objects</b> Domains and Relations, Relations and predicates, Relational Data Integrity; Primary Key, Candidate Key, Foreign Key and their rules, Relational operators, Relational Algebra	L1, L2	7
<b>Module 4: SQL</b> SQL Language, DDL, DML and DCL commands. Data definition, Data retrieval and update operations on MS ACCESS and SQL Server DBMS.	L1, L2	8
<b>Module 5: Database Applications and Types</b> Distributed Database, Object Oriented Database, Multimedia Database, Data Mining, Digital Libraries. Data Warehouse.	L1, L2	8

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4108	<b>HUMAN RESOURCE MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

**Catalog Description:** The course provides insight into managing Human Resources, Recruitment, Selection, Performance Appraisal, Training & Development and Compensation.

**Course Objective:**

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

**Course Outcomes:**

On completion of the course the students will be able to:

CO1: Explain and apply the concepts of human resources management in the financial sector.

CO2: Demonstrate a basic understanding of different tools and techniques used in forecasting and planning human resource requirements especially in context to the banking industry.

CO3: Interpret the industry regulations of the banking sector that will effect employees and employers and apply them effectively.

CO4: Analyze and solve key issues related to the human elements, both nationally and internationally such as employee acquisition, retention compensation, appraisal, training, career planning and diversity.

Modules	Blooms level*	Number of hours
<b>Module I: Human Resource Management in Perspective</b> Nature and scope of HRM, HRM functions, HRM models, understanding concepts of Personnel Management, Human Resource Development and Strategic Human Resource Management, HR Environment, Changing Role of HR.	L1, L2	7
<b>Module II: Meeting Human Resource Requirements</b> Job Analysis, Job Description, Strategic Human Resource Planning, Recruitment, Selection Process, Methods – Interview, Tests, Placement and Induction	L1, L2	6
<b>Module III: Training &amp; Developing of Employees</b> Training and Development, Understanding of Performance Management Systems, Potential Appraisal, Career Development	L1, L2	8
<b>Module IV: Managing Compensation</b> Job evaluation, Methods of Job Evaluation, Strategic Compensation, Equity Theory, Components of Pay Structure, Designing and	L1,L2	4

Administration of Wage and Salary Structure, Wage Regulations in India		
<b>Module V: Employee Relations</b> Overview of Industrial Relations, Industrial disputes, Collective Bargaining, Workers Participation and Management, Grievance handling	L1, L2	5
<b>Module VI: Emerging Trends in HRM</b> Overview of Human Resource Information System (HRIS), Introduction to HR Audit, IHRM Practices, Cross- Cultural and Diversity Management, Work-life integration, Human Resource Outsourcing	L1, L2	6

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

CSS 4151	Basics of Communication	Structure			
		L	T	P	Total
Version	Latest Approved	1	0	0	1
Pre requisite /Exposure					
Co- requisite					

### Catalog Description

In this course of Communication Skills, we would like students to understand the basic concepts of Communication skills and to use different tools to enhance their vocabulary and strengthen their spoken and written communication.

### Course Objectives

The objective of this course is to

1. Explain students to communicate effectively by emphasizing on practical communication through refurbishing their existing language skills and also to bring one and all to a common take-off level.
2. Develop skills for effective word choice and sentence and avoid common errors in written communication.

### Course Outcomes

On completion of this course the students will be able to:

CO1. Develop competency to write and speak grammatically correct English that will enable them to communicate effectively and solve issues that arise due to miscommunication.

CO2. Apply the different models of communication to facilitate effective communication throughout the organization.

CO3. Develop the capability of customizing communication in different situations like social, legal, cultural.

CO4. Demonstrate the capability of using different tools of communication, particularly related to technology

CO5. Demonstrate the ability to effectively communicate in complex situations.

Modules		Blooms'Level*	Credit Hours
<b>Module 01</b>	Fundamentals of communication Relevance of communication Effective communication Models of communication Effective use of language	L1, L3	4
<b>Module 02</b>	Tools of communication Proficiency in English – The international Language of business Building vocabulary (Denotative & connotative) Extensive vocabulary drills	L1, L3	4

	(Synonyms / Antonyms / Homonyms) One Word substitution Idioms & phrases Mechanics and Semantics of sentences Writing sentences that really communicate (Brevity, Clarity, and Simplicity) Improving the tone and style of sentences		
<b>Module 03</b>	Barriers to Effective use of language Avoiding clichés Removing redundancies Getting rid of ambiguity Euphemism Jargons Code switching	L1,L3	4

***Bloom's Level** L1: Knowledge; L2: Comprehension; L3: Application L4: Analysis; L5: Synthesis, L6: Evaluation*

**SECOND SEMESTER**

BUA4201	<b>FINANCIAL MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course introduces an investigation of the firm's acquisition and financial activities, to include working capital management, capital budgeting, capital structure strategies, and valuation theory. The practical application of financial policy is stressed for decision-making purposes.

### Course Objectives

The objective of this course is to

1. Provide the students relevant, systematic, efficient and actual knowledge of financial management that can be applied in practice with making financial decisions and resolving financial problems.
2. Help the students to acquire the basic knowledge by means of combining theoretical cognitions and practical attitudes to enable them to understand the financial problems in business practice.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Describe the financial environment within which organisations must operate.

CO2: Critically evaluate the financial objectives of various types of organisations and the respective requirements of stakeholders

CO3: Explain alternative sources of finance and investment opportunities and their suitability in particular circumstances

CO4: Assess the factors affecting investment decisions and opportunities presented to an organisation.

CO5: Select and apply techniques in managing working capital

CO6: Analyse a company's performance and make appropriate recommendations.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction</b> A Framework for Financial Decision-Making- Financial Environment, Changing Role of Finance Managers, Objectives of the firm.	L1,L2	4
<b>Module II: Valuation Concepts</b> Time Value of Money, Risk and Return, Financial and Operating Leverage.	L1, L2 ,L3	4
<b>Module III: Financing Decisions</b> Capital Structure and Cost of Capital, Marginal Cost of Capital.	L1, L2,L3	7

<b>Module IV: Capital Budgeting</b> Estimation of Cash Flows, Criteria for Capital Budgeting Decisions, Issues Involved in Capital Budgeting, Risk analysis in Capital Budgeting – An Introduction.	L1,L2,L3	10
<b>Module V: Working Capital Management</b> Factors Influencing Working Capital Policy, Operating Cycle Analysis, Management of Inventory, Management of Receivables, Management of Cash and Marketable Securities, Financing of Working Capital.	L1,L2,L3	5
<b>Module VI: Dividend Policy Decisions</b> An introduction: Different Schools of Thought on Dividend Policy.	L1,L2,L3	6

*\*Bloom's Level: L1-Knowledge;L2-Comprehension;L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA 4202	<b>OPERATIONS AND SUPPLY CHAIN MANAGEMENT</b>	L	T	P	C
Version 1	Latest approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Operations and supply chain management deals with the design and operation of the systems for production of goods and services. It will explore the approaches and analyze strategic decisions in operations management with a focus on designing products and processes, allocating scarce resources to strategic alternatives, and do long-range capacity and facility planning. These operations functions help in achieving the organization's long-range objectives. Subsequent focus will be on medium and short term planning and controlling. Care will be taken to strike a balance between theoretical and practical perspectives in manufacturing and service organizations.

### Course Objectives

The main objectives of this course are to:

1. Develop an understanding of how the operations, have strategic importance and can provide a competitive advantage in the workplace.
2. Understand the relationship between operations and other business functions.
3. Understand techniques of location and facility planning, line balancing, job designing, and capacity-planning in operations management.
4. Understand the supply chain function starting from Demand Management through Inventory Management.

### Course Outcomes

On completion of this course, the students will be able to

CO1. Define the elements of operations management and various transformation processes to enhance productivity and competitiveness

CO2. Classify and apply various facility alternatives and their capacity decisions, develop a balanced line of production & scheduling and sequencing techniques in operation environments

CO3. Illustrate aggregate capacity plans and MPS in operation environments

CO4. Analyze suitable supply chain principles and practices in the operations.

CO5. Compare and apply various inventory control methods

Modules	Blooms level*	Number of hours
---------	---------------	-----------------

<b>Module I: Introduction</b> Operations in manufacturing and services, responsibility of Operations Manager, Operations strategy and competitiveness, process analysis, manufacturing process and service process selection and design, job design and work measurement	L1, L2, L3	6
<b>Module II: Strategic Decisions</b> Facility location decisions, factors affecting location, location techniques: factor rating method, centroid method, facility layout, process layout, systematic layout planning, product layout, line balancing, fixed position layout, service operations layout, types of capacity, capacity planning: long term and short term, economies of scale	L1, L2, L3	8
<b>Module III: Operating Decisions</b> Aggregate Planning, production planning and control (PPC), benefits of PPC, Master Production Scheduling, Operations scheduling: loading, sequencing, priority rules and techniques, Materials Requirement Planning (MRP), concerns in MRP	L1, L2, L3	8
<b>Module IV: Supply Chain Management</b> Recent issues in SCM: Role of IT in SCM, CRM Vs SCM, structure of supply chain, benchmarking concept, features and implementation, outsourcing decisions, value addition in SCM	L1, L2, L4, L5	8
<b>Module V: Inventory Management</b> Inventory management: Objectives, factors, process, inventory costs, inventory models, inventory control techniques: ABC, VED, EOQ, SED analysis, Just-in-Time (JIT), JIT vs traditional systems of operations, JIT in services	L1, L3, L4, L6	6

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4203	<b>ECONOMETRICS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers the both fundamental and strategic understanding on identification of business problem and how to approach that problem using econometric techniques. This course facilitates a good learning on the estimation of parameters and forecasting of any indicator/variable related to business/ economy at both micro and macro level. Also, this course covers the quantitative analysis, model building and policy making for any economic/business problem. The course starts with simple and multiple linear regressions, followed by topics of special interest to deal with model specification, endogenous variables, binary choice data, and time series data. The aim of the course is to make the students familiar with statistical techniques and quantitative analysis.

### Course Objectives

The objective of this course is to

1. Provide a good understanding on identification of problem, estimation of parameters and interpretation of results.
2. Equip the students with major statistical tools and techniques using various statistical software such as STATA, R, SPSS, Eview, SAS.
3. Explore the mathematical background of these concepts and techniques, and demonstrate their use through practical examples and interactive experiments.
4. Facilitate hands on experience to various real world business problems.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Translate data into models to make forecasts and to support decision making in a wide variety of fields, ranging from macroeconomics to finance and marketing.

CO2: Use statistical software or programming languages to combine data sets and estimate econometric models.

CO3: Analyse binary response data, panel and time series data using appropriate statistical models.

CO4: Explain problems imposed by endogeneity and simultaneity bias and how to resolve these problems using appropriate statistical models.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Parametric Tests</b> Nature, meaning and scope of econometrics; Simple and general linear regression model —Assumptions, Estimation (through OLS approach) and properties of estimators; Gauss-Markov theorem; Concepts and derivation of R <sup>2</sup> and adjusted R <sup>2</sup> ; Concept and	L1, L2, L3	8

analysis of variance approach and its application in regression analysis.		
<b>MODULE 2: Autocorrelation</b> Nature, test, consequences and remedial steps of problems of autocorrelation	L1, L2,L3,L4	7
<b>MODULE 3: Heteroscedasticity</b> Nature, test, consequences and remedial steps of problems of heteroscedasticity.	L1, L2,L3,L4	7
<b>MODULE 4: Multicollinearity</b> Nature, test, consequences and remedial steps of problems of Multicollinearity.	L1, L2,L3,L4	7
<b>MODULE 5: Non-Parametric Tests</b> Dummy variable technique, Testing structural stability of regression models, Stationarity Tests, Logit, Probit and Tobit models — Applications.	L1, L2, L3,L4	7

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation

BUA4204	<b>BUSINESS RESEARCH METHOD</b>	L	T	P	C
Version 1.1	Latest Approved	1	0	2	2
Pre-requisites/Exposure					
Co-requisites					

### **Catalog Description:**

The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

### **Course Objectives:**

The objectives of this course are to ensure that students are able to:

1. Understand the basic framework of research process.
2. Comprehend of various research designs and techniques.
3. Identify various sources of information for literature review and data collection.
4. Understand some basic concepts of research and its methodologies
5. Understand as how to organize and conduct research in a more appropriate manner and write a research report, thesis and a research proposal

### **Course Outcomes (CO):**

On completion of this course, the students will be able to:

CO1: Apply a range of quantitative and / or qualitative research techniques to business and management problems / issues

CO2: Determine and apply research approaches, techniques and strategies in the appropriate manner for managerial decision making

CO3: Demonstrate knowledge and understanding of data analysis and interpretation in relation to the research process

CO4: Develop necessary critical thinking skills in order to evaluate different research approaches utilised in the different industries and be able to critically assess the overall process of designing a research study from its inception to its final report preparation.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
Module I: Introduction Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal	L1, L2	2
Module II: Measurement and Data Collection Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques,	L1, L2, L3, L4, L5	8

measures of central tendency mean, median, mode; measures of dispersion, data processing		
Module III: Data Analysis I Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi- square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test	L1, L2,L3,L4,L5	6
Module IV: Data Analysis-II Simple linear regression: coefficient of determination, significance tests, residual analysis, Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)	L1,L2,L3,L4, L5	4
Module V: Report Writing Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report	L1,L2,L3,L4, L5	4

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

BUA4205	<b>ECONOMICS FOR MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic knowledge of economic science preferred but not compulsory				
Co-requisites					

### Catalog Description

In this course the students are introduced with various concepts of economic science that relates to decision making process in management of business organization. To begin with, introductory concepts of economic theory and their implications on managerial decision process are analyzed. Thereafter concepts related to demand analysis, demand forecasting supply analysis, and equilibrium market conditions are discussed in detail. The next phase deals extensively concepts related to production theory, cost theory and revenue aspects. Third, various concepts related to market structure are discussed in detail. Finally, various macroeconomic concepts, policy perspectives of government and other institutions are explored in detail. The overall aim of this course is to make the students familiar with working knowledge of economic decision process based on rational choice approach in workplace.

### Course Objectives:

The objective of this course is to:

1. Equip the students with theoretical concepts of economic science so that they can analyze situations and improve upon their managerial decision making process in workplace.
2. Provide students with extensive exposure about the micro and macro level variables and government policies that influence business operations and strategies of the firm under dynamic business environment in an increasingly globalized and integrated business architecture.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain basic concepts of economic analysis, demand and supply dynamics, demand forecasting techniques and their application, and analyze the working of free market mechanism and appreciate how forces of demand and supply reinforce each other for attaining market equilibrium.

CO2: Analyze rationally the dynamics of production and cost aspects in order to make a holistic assessment of the complexities inherent in production system.

CO3: Describe the various forms of market structure and their implications in managerial decision process.

CO4: Discuss holistically the various macroeconomic aspects of business, economic variables affecting business operations, and implications of government policies in shaping the dynamics of business environment.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Managerial Economics, Demand</b>	L1, L2	7

<p><b>Analysis and Demand Forecasting:</b>  <i>Introduction to Managerial Economics:</i> Meaning and Nature of Managerial Economics, Significance of Managerial Economics, Scope of Managerial Economics. <i>Demand Analysis:</i> Meaning of Demand, Determinants of Demand, Individual and Market Demand Functions, Individual and Market Demand Curves, Law of Demand, Exception of Law of Demand. <i>Elasticity of Demand:</i> Types of Elasticity of Demand, Significance of Elasticity of Demand. <i>Demand Forecasting:</i> Purpose of Demand Forecasting , Steps Involved in Forecasting, Determinants of Demand Forecasting, Methods of Demand Forecasting.</p>		
<p><b>MODULE 2: Theory of Supply, Production, Cost and Revenue Analysis:</b>  <i>Supply:</i> Law of Supply, Determinants of Supply, Shift of Supply and Change in Supply, Elasticity of Supply, Kinds of Elasticity of Supply, Determinants Elasticity of Supply. <i>Theory of Production:</i> Meaning of Production, Short –run Analysis of Production, Law of Variable Proportion, the Three Stages of Production, Returns to Scale. <i>Analysis of Cost:</i> Cost and Managerial Decision-making, Types of Cost, Cost Function, Relationship between Production and Cost, Short Run Cost Function, Long Run Cost Function, Relation between Short-run and Long-run Cost Curves,.<i>Economies of Scale.</i> Break-Even Analysis. Concept of Revenue.</p>	L1, L2	11
<p><b>MODULE 3:Market Structure and Price Determination</b>  <i>Perfect Competition:</i> Introduction of Perfect Competition, Characteristics of Perfect Competition, Demand Curve of Firm and Industry, Equilibrium of the Firm in the Short Run and Long Run. Effects of Tax Imposition under Perfect Competition. <i>Monopoly:</i> Assumptions, Causes of Monopoly, Demand, Average Revenue and Marginal Revenue of a Monopolistic, Profit Maximization Price Determinants of the Monopolist in Short-run and Long-run. Measures of Monopoly Power. <i>Monopolistic Competition:</i> Assumptions, Product Differentiation, Demand Curve, Equilibrium of the Firm in Short-run and Long-run, Selling cost and Monopolistic Competition. <i>Oligopoly:</i> Assumptions, Non-collusive Oligopoly and Collusive Oligopoly, Kinked Demand Curve Analysis.</p>	L1, L2, L3	8
<p><b>MODULE 4: Macroeconomics Analysis</b>  <i>National Income:</i> An Indicator of Economic Activity, The Parameters that Influence Level of Economic Activity. <i>Business Cycles:</i> Characteristics of Business Cycle, Phases of Business Cycle, Ill Effects of Business Cycles, General Measure to Control Business Cycles.  <i>The Role of Government in Market Economy and Strategic Business Implications:</i> Rationale of Government Intervention, Government Macroeconomic Policy Measures – GST, Demonetization – and their impact on Business; Macro Economic variables and their functional relationship; Economic Functions of Government in a Market Economy, Legal and Social Framework, Restraining Unfair Competition and Increasing Market Power, Reallocation of</p>	L1, L2, L3, L4	10

Resources in the Presence of Externalities, Redistribution of Income, Regulation of Natural Monopoly, Stabilization of Economy; <i>Macroeconomic Variables affecting Business:</i> Consumption Function, Saving Function, Investment Multiplier; Transaction, Precautionary, Speculative Demand for Money; Liquidity Preference; Components of Money Supply; Fiscal Policy & Monetary Policy and their implications on business and management; Inflation and Deflation - Demand pull and Cost push inflation; Government policies to control inflation. <i>International Trade Regime and its implications on Business:</i> GATT, World Trade Organization, Regional Trade Agreements – EU, NAFTA, ASEAN, SAFTA, MERCUSOR

BUA4206	<b>PROGRAMMING FOR ANALYTICS USING R</b>	L	T	P	C
Version 1.1	Date of Approval: Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers the specialization on R (powerful language used widely for data analysis and statistical computing). This course facilitates a good understanding on the process of data manipulation and visualization. The course provides ample working examples on statistical data analysis using R.

### Course Objectives

The objective of this course is to:

1. Provide learning on how to program in R, how to use R for effective data analysis, how to install and configure software necessary for a statistical programming environment.
2. Provide applications on statistical computing which includes programming in R, reading data into R, accessing R packages, writing R functions, debugging, profiling R code, and organizing and commenting R code.
3. Facilitate hands on experience to various real world business problems using R.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Analyze different datasets using R

CO2: Explore real time data at various levels using appropriate visualizations

CO3: Apply critical programming language concepts such as data types, iteration, control structures, functions, and boolean operators by writing R programs and through examples

Modules	Blooms level*	Number of hours
<b>MODULE 1:</b> Introduction: Introducing to R , R Data Structures , Help functions in R , Vectors , Scalars , Declarations , recycling , Common Vector operations , Using all and any, Vectorized operations , NA and NULL values , Filtering , Vectorized if-then else , Vector Equality , Vector Element names	L1, L2,L3	8
<b>MODULE 2:</b> Matrices, Arrays And Lists: Creating matrices , Matrix operations , Applying Functions to Matrix Rows and Columns , Adding and deleting rows and columns , Vector/Matrix Distinction , Avoiding Dimension Reduction , Higher Dimensional arrays , lists , Creating lists , General list operations , Accessing list components and values , applying functions to lists , recursive lists	L1, L2,L3	7
<b>MODULE 3:</b> Data Frames: Creating Data Frames , Matrix-like operations in frames , Merging Data Frames , Applying functions to Data frames , Factors and Tables , factors and levels , Common functions used with factors , Working with tables - Other factors and	L1, L2,L3	7

table related functions - Control statements , Arithmetic and Boolean operators and values , Default values for arguments - Returning Boolean values , functions are objects , Environment and Scope issues , Writing Upstairs - Recursion , Replacement functions , Tools for composing function code , Math and Simulations in R		
<b>MODULE 4:</b> OOP: S3 Classes , S4 Classes , Managing your objects , Input/ Output , accessing keyboard and monitor , reading and writing files , accessing the internet , String Manipulation , Graphics , Creating Graphs , Customizing Graphs , Saving graphs to files , Creating three-dimensional plots	L1, L2,L3	7
<b>MODULE 5:</b> Interfacing: Interfacing R to other languages , Parallel R , Basic Statistics , Linear Model , Generalized Linear models , Non-linear models , Time Series and Auto-correlation , Clustering	L1, L2, L3	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

BUA4207	<b>PROGRAMMING FOR ANALYTICS USING PYTHON</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course is designed in such a way that leads the students from the basics of writing and running Python scripts to more advanced features such as file operations, regular expressions, working with binary data, and using the extensive functionality of Python modules.

### Course Objectives

The objective of this course is to:

1. Equip students with the concepts of the fundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming language.
2. Provide applications on statistical, machine learning, information visualization, text analysis, and social network analysis techniques through popular python toolkits such as pandas, matplotlib, scikit-learn, nltk, and networkx to gain insights into data analysis process.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Create applications for data retrieval and processing

CO2: Conduct an inferential statistical analysis of various business problems

CO3: Explain fundamental Python functionality and features used for data science

CO4: Apply techniques such as lambdas and manipulate csv files

Modules	Blooms level*	Number of hours
<b>MODULE 1:</b> Installing Python; basic syntax, interactive shell, editing, saving, and running a script, Concept of data types; variables, assignments; immutable variables; numerical types; arithmetic operators and expressions; comments in the program; understanding error messages Conditions, boolean logic, logical operators; ranges; Control statements: if-else, loops (for, while); short-circuit (lazy) evaluation	L1, L2, L3	8
<b>MODULE 2:</b> Strings and text files; manipulating files and directories, os and sys modules; text files: reading/writing text and numbers from/to a file; creating and reading a formatted file (csv or tab-separated).String manipulations: subscript operator, indexing, slicing a string; strings and number system: converting strings to numbers and vice versa. Binary, octal, hexadecimal numbers	L1, L2, L3	7
<b>MODULE 3:</b> Lists, tuples, and dictionaries; basic list operators,	L1,	7

replacing, inserting, removing an element; searching and sorting lists; dictionary literals, adding and removing keys, accessing and replacing values; traversing dictionaries. Design with functions: hiding redundancy, complexity; arguments and return values; formal vs actual arguments, named arguments, Program structure and design, Recursive functions	L2,L3	
<b>MODULE 4:</b> Simple Graphics and Image Processing: “turtle” module; simple 2d drawing - colors, shapes; digital images, image file formats, image processing Simple image manipulations with 'image' module (convert to bw, greyscale, blur, etc).Classes and OOP: classes, objects, attributes and methods; defining classes; design with classes, data modeling; persistent storage of objects OOP, continued: inheritance, polymorphism, operator overloading (_eq_, _str_, etc); abstract classes; exception handling, try block	L1, L2,L3	7
<b>MODULE 5:</b> Graphical user interfaces; event-driven programming paradigm; tkinter module, creating simple GUI; buttons, labels, entry fields, dialogs; widget attributes - sizes, fonts, colors layouts, nested frames Multithreading, Networks, and Client/Server Programming; introduction to HTML, interacting with remote HTML server, running html-based queries, downloading pages; CGI programming, programming a simple CGI form. Searching, Sorting, and Complexity Analysis	L1, L2, L3	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4208	<b>CONSUMER BEHAVIOR</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic Marketing concepts				
Co-requisites	NA				

### Catalog Description:

The increasing trend of customer centric organizations makes it imperative to understand the psyche of consumer to the fullest. Virtually all companies are striving to gain maximum knowledge about the way consumer thinks and behave so that proper direction can be given to the marketing strategy. This paper on consumer behaviour aims to familiarize students about the importance of understanding consumers for the success of an organization. It makes a connection between customer behaviour principles and the elements of marketing strategy.

### Course Objectives:

The objectives of this course are to:

- 1:** Make the student understand the concepts/theories pertaining to consumer behaviour and reveal its importance in the context of marketing.
- 2:** Make the student well versed with the various factors that influence consumer behaviour.
- 3:** Enable the student to examine the consumer decision-making process.
- 4:** Provide with knowledge to the student so that he may describe the target market and determine the positioning strategy according to consumer characteristics and behaviour.

### Course Outcomes (CO):

On completion of this course, the students will be able to:

- CO1:** Memorize the various concepts and discuss the rationale for studying consumer behaviour.
- CO2:** Identify and explain factors which influence consumer behaviour inclusive of society and culture.
- CO3:** Demonstrate how knowledge of consumer behaviour can be applied to marketing.
- CO4:** Employ communication skills both orally and in writing within marketing contexts.

Modules	Blooms level*	Number of hours
<b>Module I</b> Consumer Behavior: Understandings and Applications, Consumer Research	L1, L2	5
<b>Module II</b> Consumer as an Individual: Consumer Motivation, Consumer Personality, Consumer Perception, Consumer Learning, Consumer Attitude formation and change.	L1, L2,L3,L4	13

<b>Module III</b> Consumers in their Social Setting: Reference Groups and Family Influences, Social Class and Consumer Behavior, Influence of Culture and Sub Cultures on Consumer Behavior.	L1, L2,L3,L4	13
<b>Module IV</b> Consumer Decision Making Process	L1,L2,L3,L4,L5	3
<b>Module V</b> Opinion Leadership, Diffusions of Innovations and Adoption	L1,L2	2

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

CSS4251	<b>Corporate Communication</b>	L	T	P	C
Version 1.1	Latest Approved	1	0	0	1
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course covers the basics of Corporate Communication. Through these students come to know about written aspect of communication at workplace like letter writing, report writing and official correspondence. They also develop skills on social networking.

### Course Objectives

The objective of this course is to:

1. Practice on communication skills as much as possible.
2. Understand the 7 C's of communication.
3. Estimate the real life situations, class exercises.

### Course Outcomes

On completion of this course, the students will be able to

CO 1: Describe writing assignments ranging from business letters, reports, memos, circulars and notices.

CO 2: Describe different formats of business letters.

CO 3: Construct agendas and circulars for meetings.

CO 4: write project reports and summer training reports.

CO 5: Analyze the effects of social networking.

<b>Modules</b>	<b>Blooms' Level*</b>	<b>Credit Hours</b>
<b>Module I: Introduction to Writing Skills</b> <ul style="list-style-type: none"> <li>• Effective Writing Skills</li> <li>• Avoiding Common Errors</li> <li>• Paragraph Writing</li> <li>• Note Taking</li> <li>• Writing Assignments</li> </ul>	L1,L2,L3	2

**THIRD SEMESTER**

BUA4301	<b>STRATEGIC MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course introduces the key concepts, tools, and principles of strategy formulation and competitive analysis. It is concerned with managerial decisions and actions that affect the performance and survival of business enterprises. The course is focused on the information, analyses, organizational processes, and skills and business judgment managers must use to devise strategies, position their businesses, define firm boundaries and maximize long-term profits in the face of uncertainty and competition.

### Course Objectives

The objective of this course is to

1. Introduce students to the key concepts, tools and principles of business policy and strategic management.
2. Expand the student's capacity to integrate and appreciate the changes in the environment that shape the strategy of a business and lead to developing a competitive edge.
3. Develop the perspective of students towards understanding the culmination of different functional areas into building up of a corporate strategy.
4. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how companies use what-if analysis to evaluate action alternatives and make sound strategic decisions.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Identify and recognise the various levels at which strategic decision making happens in an organization.

CO2: Analyse the internal and external environment of business that will lead to formulation of strategic plans.

CO3: Analyze the suitability of strategies that firms have developed in the real world scenario to achieve valueable outcomes.

CO4: Prepare strategic analysis and choice in order to determine alternative courses of action that could best enable the firm to achieve its mission and objectives.

CO5: Analysis of strategy implementation and evaluation to gain competitive advantage.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction and Purpose of Strategy Formulation</b> Evolution and Introduction of strategic management, Concept of Strategy, corporate, Business and Functional Levels of Strategy,	L1,L2	7

Mission, Vision, Objectives, Approaches to four Phases in Strategic Management Process, Stakeholders in business and their roles in strategic management, Strategic decision making.		
<b>Module II: Environmental Analysis</b> Analysing company's External Environment: PESTLE Analysis; Preparing an Environmental Threat and Opportunity Profile (ETOP), Analysing Industry Environment: Industry Analysis – Porter's Five Forces Model of competition, Strategic Group analysis.	L1, L2 ,L3	7
<b>Module III: Analysis of Organizational Competencies</b> Analysing Company's Internal Environment Resource based view of a firm, meaning, types & sources of competitive advantage, analysing company's Resources and Competitive Position, VRIO Framework; Benchmarking as a method of comparative analysis, Competitive advantage; Concept of a Core competence and Distinctive competitiveness, Characteristics of Core Competencies; Value Chain Analysis Using Porter's Model; Organizational Capability Profile: Strategic Advantage Profile.s	L1, L2,L3	7
<b>Module IV: Strategic Analysis and Choice</b> Generic Competitive Strategies: Meaning of Generic competitive strategies, Low cost, Differentiation, Focus – when to use which strategy; Grand Strategies: Stability, Growth (Diversification Strategies, Vertical Integration Strategies, Mergers, Acquisition & Takeover Strategies, Strategic alliances & Collaborative Partnerships), Retrenchment – Turnaround, Divestment, Liquidation, Outsourcing Strategies; Offensive and Defensive Strategies, Blue Ocean Strategy, Strategy in the age of Internet and E-commerce; Portfolio Analysis Business Portfolio Analysis – BCG Matrix – GE 9 Cell Model; Evaluation of Strategic Alternatives: SWOT Analysis, Grand Strategy Selection Matrix.	L1,L2,L3	8
<b>Module V: Strategy Implementation and Evaluation</b> Strategy Implementation, Barriers to implementation of strategy, Mc Kinsey's 7s Framework; Organization Structures for Strategy Implementation, Leadership Implementation, Functional Implementation, Strategic evaluation review and control.	L1, L2	7

*\*Bloom's Level: L1-Knowledge;L2-Comprehension;L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA 4302	<b>DATA MINING</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Every business organization is realizing the importance of data. They are harnessing the benefits offered by Data Mining as it allows them to see hidden patterns from the data and helps in framing business policies. This course emphasizes on utilizing the techniques offered by Data Mining.

### Course Objectives

This course enable students to:

1. Understand the basic concepts, principles, methods, implementation techniques, and applications of data mining, with a focus on major data mining functions such as cluster analysis.
2. Develops skills to use data mining software and other data mining techniques to solve business problems.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Evaluate and implement a wide range of emerging and new technologies to facilitate the knowledge discovery.

CO2: Assess raw input data, and process it to provide suitable input for a range of data mining algorithms.

CO3: Compare and evaluate different data mining techniques like classification, prediction, clustering and association rule mining

CO4: Discover and measure interesting patterns from different kind of databases.

CO5: Determine data mining functionalities.

CO6: Identify appropriate data mining algorithms, and apply and interpret and report the output appropriately.

CO7: Describe complex data types with respect to spatial and web mining

CO8: Analyze data using the powerful data mining tool Weka.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction to Data Mining</b> What is data mining? Related technologies - Machine Learning, DBMS, OLAP, Statistics, Data Mining Goals, Stages of the Data Mining Process, Data Mining Techniques, Knowledge Representation Methods, Applications, Example: weather data, Data Warehouse and DBMS, Multidimensional data model, OLAP operations, Example: loan data set. Data cleaning, Data transformation, Data reduction, Discretization and generating	L1, L2	6

concept hierarchies, Installing Weka 3 Data Mining System, Experiments with Weka - filters, discretization		
<b>Module II: Data mining knowledge representation and Attribute oriented Analysis</b> <b>Data mining knowledge representation</b> Task relevant data, Background knowledge, Interestingness measures, Representing input data and output knowledge, Visualization techniques, Experiments with Weka – visualization. <b>Attribute oriented Analysis:</b> Attribute generalization, Attribute relevance, Class comparison, Statistical measures, Experiments with Weka - using filters and statistics.	L2, L3	7
<b>Module III: Data mining algorithms</b> <b>Association rules:</b> Motivation and terminology, Example: mining weather data , Basic idea: item sets, Generating item sets and rules efficiently, Correlation analysis, Experiments with Weka - mining association rules <b>Classification:</b> Basic learning/mining tasks, Inferring rudimentary rules: 1R algorithm, Decision trees, Covering rules, Experiments with Weka - decision trees, rules <b>Prediction:</b> The prediction task, Statistical (Bayesian) classification, Bayesian networks, Instance-based methods (nearest neighbor), Linear models, Experiments with Weka - Prediction	L1, L2, L3	7
<b>Module IV: Cluster Analysis: Concepts and Methods</b> Basic issues in clustering, First conceptual clustering system: Cluster/2, Partitioning methods: k-means, expectation maximization (EM), Hierarchical methods: distance-based agglomerative and divisible clustering, Density Based, Grid based Methods, Conceptual clustering: Cobweb, Experiments with Weka - k-means, EM, Cobweb	L1, L2, L3	8
<b>Module V: Advanced techniques- Data Mining software and applications</b> Text mining: extracting attributes (keywords), structural approaches (parsing, soft parsing), Bayesian approach to classifying text, Web mining: classifying web pages, extracting knowledge from the web, Data Mining software and applications	L1, L2, L3	8

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4303	<b>PREDICTIVE ANALYTICS-I MACHINE LEARNING USING R</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers fundamental and applied evidence based knowledge to improve professional practice of students. It provides a detailed understanding of both supervised and unsupervised learning as it is vital for a data scientist. This course offer insight on text mining using “tidytext.”

### Course Objectives

The objective of this course is to:

1. Facilitate an introduction to machine learning techniques using several popular algorithms.
2. Internalize a core set of practical and effective machine learning methods and concepts, and apply them to solve some real world problems.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain and apply a set of unsupervised learning concepts and methods, classification methods of increasing complexity (rules, trees, random forests), and associated optimization methods (gradient descent and variants)

CO2: Explain the common idioms of large-scale graph analytics, including structural query, traversals and recursive queries, PageRank, and community detection

CO3: Apply the popular algorithms of machine learning using R

CO4: Analyze and interpret the results using specific statistical tools and techniques in R.

Modules	Blooms level*	Number of hours
<b>MODULE 1:</b> Linear Methods for Regression and Classification: Overview of supervised learning, Linear regression models and least squares, Multiple regression, Multiple outputs, Subset selection, Ridge regression, Lasso regression , Linear Discriminant Analysis , Logistic regression, Perception learning algorithm	L1, L2,L3,L4	8
<b>MODULE 2:</b> Model Assessment and Selection: Bias, Variance, and model complexity, Bias-variance trade off, Optimism of the training error rate, Estimate of In-sample prediction error, Effective number of parameters, Bayesian approach and BIC, Cross- validation, Boot strap methods, conditional or expected test error	L1, L2,L3,L4	7
<b>MODULE 3:</b> Additive Models, Trees and Boosting: Generalized additive models, Regression and classification trees, Boosting methods-exponential loss and AdaBoost, Numerical Optimization via gradient boosting	L1, L2,L3,L4	7

<b>MODULE 4:</b> Neural Networks (NN), Support Vector Machines (SVM), and K-nearest Neighbor: Fitting neural networks, Back propagation, Issues in training NN, SVM for classification, Reproducing Kernels, SVM for regression, K-nearest –Neighbour classifiers (Image Scene Classification)	L1, L2,L3,L4	7
<b>MODULE 5:</b> Implementation of following methods using R Simple and multiple linear regression, Logistic regression, Linear discriminant analysis, Ridge regression, Cross-validation and boot strap, Fitting classification and regression trees, K-nearest neighbours, Principal component analysis, K-means clustering	L1, L2, L3,L4	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

BUA4304	<b>PREDICTIVE ANALYTICS-II MACHINE LEARNING USING PYTHON</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers the specialization of Python starting with data strategy. This course covers the two core paradigms that account for most business applications of predictive modeling: classification and prediction. It also covers the use of partitioning to divide the data into training data (data used to build a model), validation data (data used to assess the performance of different models, or, in some cases, to fine tune the model) and test data (data used to predict the performance of the final model).

### Course Objectives

The objective of this course is to:

1. Facilitates a good learning to students on how to make meaningful predictions for a wide range of business purposes.
2. Provide provides a sufficient understanding on development of statistical models and how to devise data-driven workflows.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Apply data science techniques to extract insights from a wide range of data sources and to provide an assessment basis for predictive models. Also, students shall be able to explain how ensemble models improve predictions

CO2: Visualize and explore data to better understand relationships among variables

CO3: Identify and implement appropriate performance measures for predictive models with popular algorithms

Modules	Blooms level*	Number of hours
<b>MODULE 1:</b> Data Cleaning: Reading the data – variations and examples, Data frames, Delimiters, Various methods of importing data in Python: csv method, open method in Python, reading data from a URL, reading .xls or .xlsx files, Reading from an .xls or .xlsx file, Writing to a CSV or Excel file. Handling missing values, Creating dummy variables, Visualizing a dataset by basic plotting, Scatter plots, Histograms, Boxplots	L1, L2,L3,L4	8
<b>MODULE 2:</b> Data Wrangling: Subsetting a dataset, Selecting columns, Selecting rows, Selecting a combination of rows and columns, Creating new columns, Generating random numbers and their usage, Seeding a random number, Generating random numbers following probability distributions, Probability density	L1, L2,L3	7

function, Cumulative density function, Uniform distribution, Normal distribution, Using the Monte-Carlo simulation to find the value of pi, Geometry and mathematics behind the calculation of pi, Generating a dummy data frame, Grouping the data: aggregation, filtering, and transformation		
<b>MODULE 3:</b> Statistical Concepts for Predictive Modelling, Random sampling and the central limit theorem, Hypothesis testing, Null versus alternate hypothesis, Linear Regression with Python: Understanding the math behind linear regression, Linear regression using simulated data, Fitting a linear regression model and checking its efficacy, Finding the optimum value of variable coefficients ,Making sense of result parameters, p-values, F-statistics, Residual Standard Error, Implementing linear regression with Python, Linear regression using the stats model library, Multiple linear regression, Multi-collinearity, Variance Inflation Factor, Model validation, Training and testing data split , Handling categorical variables, Transforming a variable to fit non-linear relations	L1, L2,L3,L4	7
<b>MODULE 4:</b> Logistic Regression with Python, Linear regression versus logistic regression, Understanding the math behind logistic regression, Contingency tables, Conditional probability, Odds ratio, Moving on to logistic regression from linear regression, Estimation using the Maximum Likelihood Method, Likelihood function: Log likelihood function, Building the logistic regression model from scratch, Making sense of logistic regression parameters, Wald test, Likelihood Ratio Test statistic, Chi-square test, Implementing logistic regression with Python, Processing the data, Data exploration, Data visualization, Creating dummy variables for categorical variables, Feature selection, Implementing the model, Model validation and evaluation, Cross validation, Model validation, The ROC curve, Confusion matrix.	L1, L2,L3,L4	7
<b>MODULE 5:</b> Trees and Random Forests with Python: Introducing decision trees, A decision tree Understanding the mathematics behind decision trees, Homogeneity, Entropy, Information gain, ID3 algorithm to create a decision tree, Gini index, Reduction in Variance, Pruning a tree, Handling a continuous numerical variable, Handling a missing value of an attribute, Implementing a decision tree with scikit-learn, Visualizing the tree, Cross-validating and pruning the decision tree, Understanding and implementing regression trees, Regression tree algorithm, Implementing a regression tree using Python, Understanding and implementing random forests, The random forest algorithm, Implementing a random forest using Python, Why do random forests work?, Important parameters for random forests	L1, L2, L3,L4	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4305	<b>BIG DATA ANALYTICS- HADOOP</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course familiarizes the students on how to perform analytical operations on structured and unstructured data to gain insights from data processed through Hadoop. This offers a specialization on Big Data Platform and its use cases providing an overview of Apache Hadoop.

### Course Objectives

The objective of this course is to:

1. Equip students with the concepts of how to use Pig, Hive, and Impala to practice and examine tremendous datasets stored in the HDFS, and use Sqoop and Flume for data ingestion.
2. Provide applications on components of Hadoop and Hadoop Eco-System such as Hadoop Cluster Architecture, Important Configuration files in a Hadoop Cluster, Data Loading Techniques, how to setup single node Hadoop clusterl installation of VM player and Hadoop, Important Configuration files in a Hadoop Cluster, Linux commands, Importing Hadoop Jars, Data Loading Techniques

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Identify Big Data and its Business Implications

CO2: Access and Process Data on Distributed File System

CO3: Manage Job Execution in Hadoop Environment

CO4: Develop Big Data Solutions using Hadoop Eco System

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Big Data</b> Definition of Big Data, The 5 V's of Big Data(Volume, Variety, Velocity, Veracity, Value), Comparison of Traditional Data with Big Data, Management of Big Data, Analyzing Big Data, and Technology Challenges for Big Data. Big Data Sources, Big Data Applications, Big Data Architecture	L1, L2,L3	8
<b>MODULE 2: Technologies for Handling Big Data</b> Introduction to Traditional RDBMS, OLTP, OLAP, Data Mining, Data Warehouse, Basic SQL Commands and queries: CREATE, INSERT, DELETE, UPDATE, SELECT Cloud Computing : Definition, Characteristics, Applications, Deployment Model, Service Models	L1, L2,L3	7
<b>MODULE 3:Distributed Computing Using Hadoop</b>	L1,	7

Introduction, Hadoop Framework, Hadoop Distributed File System, Map Reduce, Hive, Pig Sample Map Reduce Application, HIVE language capabilities, Pig Language capabilities, HIVE query examples, Pig Scripts examples	L2,L3	
<b>MODULE 4: Big Data in Business</b> Case Studies: Big Data in Marketing, Retail Hospitality, Customer Services, Decision Support using Big Data. Developing a Big Data Strategy/ Defining a Big Data strategy for your organization, Big Data Platform for Internet of Things	L1, L2,L3	7
<b>MODULE 5: Visualization and Analytics</b> Visualizations - Visual Data Analysis Techniques - Interaction Techniques; Systems and Analytics Applications - Analytics using Statistical packages-Approaches to modeling in Analytics – correlation, regression, decision trees, classification, association-Intelligence from unstructured information	L1, L2, L3	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

BUA4306	<b>FINANCIAL DECISION ANALYSIS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Financial decision making involves analyzing the financial problems that the company faces and deciding which course of action should be taken. In order to make financial decisions, you must be able to identify potential financial problems and analyze the effects of alternative courses of action.

### Course Objectives

This course provides a specialization on financial tools to apply to decision-making within organizations. The course helps the student to

1. Develop a range of financial analysis skills through a combination of class discussions and analyses of case studies of specific organizations.
2. Demonstrates the complex relationships between finance, impact, strategy, and governance in business organizations.

### Course Outcomes

By the end of the course the participants should be better able to:

CO1: Explain how organisations make value optimising financial decisions, and reflectively and critically assess the ethical issues arising from these decisions.

CO2: Critically analyse and evaluate various financial models and decision making techniques and their impact on different constituencies of stakeholder. Apply financial analysis skills in the facilitation of strategic decision making.

CO3: Review Assess the features of alternative and diverse sources of finance and critically evaluate their appropriateness under different circumstances and evaluate elements of risk, return and value in a range of strategic operational financial decisions and understand the implications in regulatory and governance terms of the consequences of doing so.

Modules	Blooms level*	Number of hours
<b>Module I : Financial governance: objectives and environment</b> The role of shareholder wealth maximisation in modern financial management, Shareholder v stakeholder perspectives, Role of the finance , function Balancing risk and return, Shareholder wealth maximisation and ethical behaviour Ethics and the finance function, Corporate Governance : Corporate Governance and the agency problem, Financial aspects of the Indian Corporate Governance Code New public management, Listing requirements in the Stock Exchanges.	L1,L2, L3	5

<p><b>Module II: Management performance measurement</b>  Financial ratio analysis – Profitability – Efficiency – Liquidity - Investment performance. Operating, Financial and Combined Leverage. Financial distress and insolvency, including the use of financial ratios based on univariate and multivariate analysis to predict financial failure. Analysis of Risk and Uncertainty in Capital Budgeting, Description and Measurement of Risk; and Risk Evaluation Approaches. Risk and Return - Conceptual Framework of Risk and Return: Type of Risks; Risk and Return of a Single Asset; Risk and Return of Portfolio (only two asset portfolio); Portfolio Selection; and Capital Asset Pricing Model (CAPM)</p>	L1, L2, L3	6
<p><b>Module III:-Making distributions to shareholders</b>  Dividend policy and shareholder wealth – Traditional v Modigliani and Miller arguments Reasons for the importance of dividends, Factors determining the level of dividends Scrip dividends, Special dividends and share buybacks, Tax Aspects associated with Dividend Decision</p>	L1, L3	6
<p><b>Module IV: - Long term investment decisions</b>  The nature of investment decisions - Investment appraisal methods - Payback period (including discounted payback period) - Accounting rate of return - Net present value - Internal rate of return – MIRR – XIRR- CAGR, Investment opportunities and risk - Risk and Return preferences of investors. Risk appraisal methods – Sensitivity analysis – Scenario analysis –Simulations - Expected net present value - Risk-adjusted discount rate.  <b>Shareholder value analysis:</b> Shareholder value and the need for new forms of measurement-Shareholder value analysis and net present value -Comparison of shareholder value analysis and Economic value added -Total shareholder return (TSR) and market value added (MVA) , Cash Value added, Market to Book Value , Evaluation of the shareholder value approach. <b>Analysis of securities:</b> Cost method and market method. Equity method of accounting and analysis of minority interest.</p>	L1, L3, L4	7
<p><b>Module V: Business combinations and share valuation</b>  <b>Business Valuation:</b> Conceptual Framework of Valuation; Approaches/Methods of Valuation; and other Approaches to Value Measurement,  <b>Corporate Restructuring:</b> Conceptual Framework; Financial Framework; Tax Aspect of Amalgamation; Merger and Demergers; Legal and Procedural Aspects of Mergers/Amalgamations and Acquisition/Takeovers; and other forms of Corporate Restructuring. Economic rationale for mergers and acquisitions, forms of purchase consideration with DCF model. <b>Option Valuation:</b> Concept and Types of Options; Option Payoffs; Call Option Boundaries; Factors Influencing Option Valuation; and The Black-Scholes Option Pricing Model. <b>Valuation and forecasting</b> - Valuation models: Asset based models, DCF models and abnormal earnings or Edwards-Bells-Ohlson model. Forecasting models: Extrapolative models and index models, Forecasting with disintegrated data,</p>	L1, L3, L4	5

Comparison with financial analysts' forecast.		
<b>Module VI: Capital markets and long-term financing decisions</b> Financial markets and institutions-The role of the Stock Exchange Advantages and disadvantages of a Stock Exchange listing Stock market efficiency – Long term sources of financing – Shares– Debts - Debentures – Personal financing -		7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4307	<b>VISUAL ANALYTICS- TABLUE /POWER BI</b>	L	T	P	C
Version 1.1	Latest Approved	1	0	2	2
Pre-requisites/ Exposure					
Co-requisites					

### Catalog Description

This course familiarizes the students on data visualization tools. This course is designed to provide a fundamental and strategic understanding on the concepts of Business Intelligence using Tablue.

### Course Objectives

The objective of this course is to:

1. Equip students with the concepts of BIs and its types and how to connect to and import data, author reports using Power BI Desktop, and publish those reports to the Power BI service
2. Emphasize on how to create dashboards and share with business users—on the web and on mobile devices

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Connect, import, shape, and transform data for business intelligence (BI)

CO2: Visualize data, author reports, and schedule automated refresh of your reports

CO3: Create and share dashboards based on reports in Power BI desktop and Excel

CO4: Use natural language queries and create real-time dashboards

Modules	Blooms level*	Number of hours
<b>MODULE 1: Tableau:</b> Introduction, Getting Started with Tableau, Connecting to Data, Data Prep with Excel, Overview of the Tableau User Interface, Working with Discrete vs. Continuous Data, Calculated fields <b>Power BI:</b> Understanding key concepts in business intelligence, data analysis, and data visualization, Importing data and automatically creating dashboards from services such as Marketo, Salesforce, and Google Analytics, Connecting to and importing your data, then shaping and transforming that data, Enriching your data with business calculations.	L1, L2,L3	8
<b>MODULE 2: Tableau:</b> Introduction to data visualization, the evolution of the BI industry, Understanding the business value of visual analytics, Data visualization best practices (overview), Power BI: Visualizing your data and authoring reports, Scheduling automated refresh of your reports, Creating dashboards based on reports and natural language queries, Sharing dashboards across	L1, L2,L3	7

your organization, Consuming dashboards in mobile apps		
<b>MODULE 3: Tableau:</b> Basic charts, Design considerations for effective data visualization, Human cognition and visual perception, Using Maps to Visualize Spatial Data, <b>Power BI:</b> Leveraging your Excel reports within Power BI, Creating custom visualizations that you can use in dashboards and reports, Collaborating within groups to author reports and dashboards, Sharing dashboards effectively based on your organization's needs.	L1, L2, L3	7
<b>MODULE 4: Tableau:</b> The visual storytelling framework, the business value of visual stories, Creating dashboards and story points, Formatting worksheets and dashboards. <b>Power BI:</b> Exploring live connections to data with Power BI, Connecting directly to SQL Azure, HD Spark, and SQL Server Analysis Services, Introduction to Power BI Development API, Leveraging custom visuals in Power BI	L1, L2, L3	7
<b>MODULE 5:</b> Common pitfalls of data visualization, Common pitfalls of data narratives, Share and critique an example of a data visualization, Provide your Tableau Public URL, Share data visualization on Tableau Public, Building a Dashboard in Tableau and Power BI, Develop a data story pitch	L1, L2, L3	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

BUA4335	<b>SUMMER INTERNSHIP EVALUATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Latest Approved	0	0	0	6
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

### Course Objectives

The objective of this course is to:

1. Offer students the opportunity to apply their knowledge in real-life environments through an industry placement for eight-weeks.
2. Provided desired skills to students that will help them perform better on their jobs after graduation.

### Course Outcomes

On completion of Summer Internship, the students will be able to:

CO1: Get hands-on experience about real world problems in a field relevant to their major of studies.

CO2: Acquire confidence for employment after graduation.

CO3: Acquire skills important for time management, discipline, self-learning, effective communication and so on.

CO4: Learn practically about team-work, collaboration, and leadership.

**Credit Hours:** 6 hours

**Course Duration:** Six-Eight weeks

**Semester Offered:** Summer

<b>Format for Report Writing</b>	<b>Blooms level*</b>	<b>Number of hours</b>
1. Title of the project 2. About the organization 3. Introduction and objectives of the project/ programme / organization	L1, L2 ,L3,L4,L5,L6	6hours (Duration- 6-8 weeks during

4. Funding agency—about the agency, how to get funding, Nature of funding agency 5. Staffing pattern of the project with their functions 6. Major activities going under project 7. Results achieved so far (target Vs achievement) 8. Role of the candidate in the project/programme / organization 9. Evaluation by the candidate		summer)
--	--	---------

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

### **SIP Guidelines**

1. Every student is required to write an Internship report upon completion of their internship and required to submit two copies (student copy + department copy) of the report to concerned department HOD (along with internal marks certificate given by the company) for final evaluation and awarding of end examination marks.

2. Before submitting the report to the HOD, the student required to go through multiple rounds of revision in collaboration with the industry guide and department internship mentor/coordinator/supervisor.

The Internship Report serves multiple purposes:

- Help the student develop written communication skills.
- Serve as an archival record of the internship experience.
- Give the student an opportunity to reflect on the professional aspects of the internship experience and the skills that were learned.
- Allow the student to describe the science content of the internship.
- Have the student to reflect on the initial goals of the internship and how they were (or were not) achieved during the internship.

### **Modes of Evaluation: Presentation/Viva/ Report /Assignment Examination**

CSS4351	<b>INTERPERSONAL COMMUNICATION</b>	L	T	P	Total
Version 1.1	Latest Approved	1	0	0	1
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Building our Interpersonal skills can, undoubtedly, improve our relationships socially and at workplace. How we interact and communicate with others is essential in determining how healthy our relationships will be, at work and socially. For effective communication verbal and non-verbal should align. In this course of interpersonal communication students will learn to use their body language effectively during interviews and presentations. They will also learn to participate in various discussions.

### Course Objectives

The objective of this course is to

1. Interpret students to understand non-verbal behavior and use it in various situations.
2. Improve conversational English of students.
3. Enable students to learn effective presentation skills.
4. Equip students with skills required for facing interviews and group discussions.

### Course Outcomes

On completion of this course the students will be able to:

CO1: State basics of interpersonal communication to explain and evaluate their own behavior in interpersonal communication.

CO2: Interpret their level of communication apprehension in interpersonal communication contexts.

CO3: Develop good conversational skills that will help them in social and workplace communication.

CO4: Assess skills required to participate in any formal discussions.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
Module I: Non - Verbal Communication Principles of non- verbal communication Kinesics Proxemics Paralanguage and visible code	L1, L3	4
Module II: Speaking Skills Pronunciation drills (Neutralizing regional pulls) Conversational English Guidelines to an effective presentation	L1, L3	4
Module III: Interviews and GDs Interview types and styles Guidelines for facing interview	L1, L3	4

**FOURTH SEMESTER**

BUA4401	<b>TOTAL QUALITY MANAGEMENT</b>	L	T	P	C
Version 1.1		2	0	0	2
Pre-requisites/Exposure					
Co-requisites					

**Catalog Description:** This course teaches the students the methodology and system of tools aimed to create and maintain mechanism of organization's continuous improvement.

**Course Objective:**

The aim of this course is to:

1. Provide a structured learning framework to students in order that they can understand that total quality management is a philosophy, methodology and system of tools aimed to create and maintain mechanism of organization's continuous improvement.
2. Help the students to understand the main principles of business and social excellence; generate knowledge and skills to use models and quality management methodology for the implementation of total quality management in any sphere of business and public sector.

**Course Outcomes:**

On completion of the course the students will be able to:

CO1: Evaluate the principles of quality management and to explain how these principles can be applied within quality management systems.

CO2: Identify the key aspects of the quality improvement cycle and to select and use appropriate tools and techniques for controlling, improving and measuring quality.

CO3: Critically appraise the organizational, communication and teamwork requirements for effective quality management.

CO4: Critically analyze the strategic issues in quality management nationally and internationally, including current issues and developments, and use the appropriate statistical techniques to evaluate quality implementation plans.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction</b> Definition of quality, brief history, quality in manufacturing and service industries, quality and price, quality and market share, quality and cost, quality and competitive advantage Evolution of the concept of total quality management, elements of total quality management, benefits of total quality management, the Deming management philosophy, the Juran philosophy, the Crosby philosophy	L1, L2	7
<b>Module II: Organization for Quality</b> Quality objectives, quality policy, leadership for quality, quality and organization culture, cross functional teams, quality circles, suppliers/customers partnership	L1, L2	5
<b>Module III: Quality Control</b> Concept of quality control, quality assurance, concept of process	L1, L2	6

variation, sampling inspection vs. 100% inspection, acceptance sampling by attributes: Operating Characteristics (OC) curves; producer risk: AQL, RQL, TQL, AOQL Statistical Process Control: advantages of SQC, construction of control charts: X-R chart, np chart, C- chart, U chart, Pareto analysis (20/80 rule)		
<b>Module IV: Benchmarking and Kaizen</b> Benchmarking, rationale of benchmarking, approach and process, prerequisite of benchmarking, obstacles of successful benchmarking, perceptual benchmarking, concept of Kaizen, kaizen vs innovation, Kaizen practice	L1,L2	3
<b>Module V: Quality Management Systems</b> Quality certification, quality management principles, ISO 9001:2000, ISO 14000, Capability Model Maturity Integration (CMMI): Fundamentals and Concepts, quality system audit, types of quality audit	L1, L2	3

BUA 4402	<b>FINANCIAL ANALYTICS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### **Catalog Description**

Every business in the industry is generating loads of financial data and they understand the significance of deriving logical inferences out of it to streamline their decision making process. Lately, accurate financial data analysis is not enough for a business to sail through. They need predictive insights which can improve their real time day to day decision making. Financial analytics helps in combining internal and external financial information by using social media and big data to provide predictive insights. Whether it is with respect to stock market prediction or customer profitability, finance analytics enables to provide a direction in predicting all. This course blends easy-to-use statistical tools with complex machine learning tools and algorithms to equip the participants with the requisite skill set in analysing data. By the end of this course, the participants should be able to perform financial analysis using powerful tools like R and Python.

### **Course Objectives**

The objective of this course is to:

1. Make students understand and diagnose the information contained in financial statement with a view to judge the profitability and financial soundness of the firm, and to make forecast about future prospects of the firm.
2. Provide understanding on diverse needs of the traditional financial department, and advancements in technology, all point to the need for financial analytics.
3. Help students to shape up the business' future goals and to improve the decision-making strategies for various business situations.
4. Emphasize on measuring and managing business' tangible assets such as cash and equipment.
5. Provides an in-depth insight into the organization's financial status and improves the cash flow, profitability, and business value.

### **Course Outcomes**

On completion of this course, the students will be able to:

CO1: Understand and interpret the financial data about the company

CO2: Forecast the firm financial position and interpret accordingly

CO3: Evaluate the financial position with the support of various financial tools like financial statement analysis, time value of money, bond valuation and valuation of the firm

CO4: Equip the requisite skill set in analyzing data in terms of finance

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module I: Introduction to Financial Analytics and Time Series Data</b> Subjective Forecasting, Business Forecasting and Time Series Data, Introduction to Financial Analytics, Forecasting Performance Measurements: Distance, Forecasting Performance Measurements: Metrics.	L1,L2,L3	7
<b>Module II: Performance Measures and Holt-Winters Model</b> Introduction to Forecasting: Average Method, Naive Method, Linear regression, R example, Moving Averages, Introduction to Exponential Smoothing, Simple Exponential Smoothing, R example on Simple exponential smoothing, Holt's Exponential Smoothing, Holt-Winter's Forecasting Model, Holt-Winter's Model: R Example, Autoregression: Introduction, Autoregression: R Example	L1, L2, L3,L4, L6	8
<b>Module III : Financial Statement Analysis</b> Balance Sheet, Income Statement, Cash Flow Statement, Understanding the Financial Statements and their interlinking, Financial Ratios, Ratio Analysis Present Value (single and multiple cash flows), Future Value (single and multiple cash flows), Annuity, Perpetuity, Growing Annuity. Application: Loan Amortization, Compounding the interest rate	L1, L2, L4, L6	7
<b>Module IV: Modern Portfolio Theory and Introduction to Algorithmic Trading</b> Portfolio Theory: Introduction, Expected Returns, Risk of a Security, Efficient Frontier, Portfolio Weights, Capital Allocation Line, Diversification, Introduction to Algorithmic Trading, Trend Following Strategy, Backtesting, R Example	L1, L2, L3,L4	7
<b>Module V:Linear Regression, Predicting Binary Outcomes (Credit Prediction)</b> Single and Multiple Linear Regression, Modelling and Prediction (Examples using financial data), Logistic Regression, Multiple Logistic Model, Historical Simulation, Simple Variance based approach, Risk Metrics, Monte Carlo Simulation, Value-at-Risk Estimation and Backtesting	L1, L2, L3,L4	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4403	<b>SUPPLY CHAIN ANALYTICS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course provides foundational knowledge associated with the operations analytics. The course offers insights on the various tools and techniques for implementation of analytics based on the supply chain drivers such as location, logistics and inventory.

### Course Objectives

The objective of this course is to:

1. Manage uncertainty and risk within supply chain management
2. Segment different customers, products, and channels and design an optimal portfolio of logistics approaches and strategies for these various segments
3. Understand the appropriate forecasting methodology for each segment

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Describe the various techniques for analytics based on the Multi Attribute Decision Making (MADM) and risk.

CO2: Identify the inventory techniques for analytics and the different network models.

CO3: Analyze the inventory using aggregate production model.

CO4: Illustrate the transportation problems for analytics in network design.

CO5: Analyze the different dimensions using Analytic Hierarchy Process.

Modules	Blooms level*	Number of hours
Module I: Warehousing Decisions, Mathematical Programming Models, P-Median Methods, Guided LP Approach, Balmer – Wolfe Method, Greedy Drop Heuristics, Dynamic Location Models, Space Determination and Layout Methods.	L1, L2	7
Module II: Inventory Management, Inventory aggregation Models, Dynamic Lot sizing Methods, MultiEchelon Inventory models, Aggregate Inventory system and LIMIT, Transportation Network Models, Notion of Graphs, Minimal Spanning Tree.	L1, L2	8
Module III: Shortest Path Algorithms, Maximal Flow Problems, Multistage Transshipment and Transportation Problems, Set covering and Set Partitioning Problems, Traveling Salesman Algorithms, Advanced Vehicle Routing Problem Heuristics, Scheduling Algorithms-Deficit function Approach and Linking Algorithms.	L1, L2	6

Module IV: Analytic Hierarchy Process, Data Envelopment Analysis, Risk Analysis in Supply Chain, Measuring transit risks, supply risks, delivering risks	L1,L2	5
Module V: Risk pooling strategies, Fuzzy Logic and Techniques-Application in SCM	L1, L2	6

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

<b>BUA4404</b>	<b>HR ANALYTICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### **Catalogue Description:**

Developing the right HR metrics and analytics for your specific context which support long-term performance and improving the decision making is a key competitive edge in the modern economy. HR is increasingly difficult in an era of talent wars, complex environments and a deluge of information.

### **Course Objective:**

The course aims to:

1. Give students a good understanding on the concepts and techniques of human resource analytics.
2. Familiarize the students on how to prepare HR reports and identify decision technologies.
3. Develop a structured approach among students to apply judgment, and generate insight from data for enhanced decision making.

### **Course Outcomes:**

On successful completion of the course a student will be able to:

CO1. Explain internal and external human resource metrics benchmarks and indicators.

CO2. Reproduce knowledge on relational databases and make recommendations regarding the appropriate HRIS to meet organization's human resource needs.

CO3. To identify appropriate software to record, maintain, retrieve and analyze human resources information (e.g., staffing, skills, performance ratings and compensation information).

CO4. To describe both the quantitative and qualitative analysis to understand trends and indicators in human resource data.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module I: Introduction to HR Analytics</b> Basics of HR Analytics: Concept and Evolution of HR Analytics & data sources - HCM: 21Model, Use of workforce analytics to improve decision making, Analytics and Prediction, Introduction to HR Metrics and predictive analytics, Importance of HR Analytics, Data Analytic techniques using software packages, Future of Human Resource Analytics. HR Metrics and HR Analytics; Intuition versus analytical thinking.	L1, L2	7
<b>Module II: Creating business understanding for HR initiatives</b>	L1, L2	6

Workforce segmentation and search for critical job roles; Statistical driver analysis – association and causation; Linking HR measures to business results; choosing the right measures for scorecards; Identifying and using key HR Metrics.		
<b>Module III:Forecasting budget numbers for HR costs</b> Workforce planning including internal mobility and career pathing; training and development requirement forecasting and measuring the value and results of improvement initiatives; optimizing selection and promotion decisions	L1, L2	8
<b>Module IV:Predictive modelling in HR</b> Employee retention and turnover; workforce productivity and performance; scenario planning.	L1,L2	6
<b>Module V:Communicating with data and visuals</b> Data requirements; identifying data needs and gathering data; HR data quality, validity and consistency; Using historical data; Data exploration; Data visualization; Association between variables; Insights from reports; Root cause analysis of HR issues	L1, L2	4

### Catalog Description

This course provides an understanding on the use of analytics in Marketing Management. The course offers insights to the students on the use of predictive analysis in decision making. The course familiarizes the students on the concept of the market place, various segments of products and services in the markets, and changing consumer needs in the markets.

### Course Objectives

The objective of this course is to

1. Develop the ability to critically evaluate business problems and to determine the most appropriate analytical technique address marketing problems.
2. Acquaint the students to develop and implement the marketing strategy by providing a framework from which to identify and evaluate strategic options and programs.
3. Enable students to solve real-world marketing problems across a wide range of industries, giving them a competitive edge.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Identify various methods followed build CRM practices and various positioning strategies followed by the companies.

CO2: Contrast the characteristics of industrial and consumer goods.

CO3: Identify and apply the various techniques of predictive analysis in the different market situations.

CO4: Explain the need for digital evolution in marketing.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module 1: Introduction to Marketing</b> Understanding the marketplace and consumer needs, Designing a Customer Driven Marketing Strategy, Building Customer Relationships, Consumer Behaviour and Business Buyer Behaviour	L2,L5	7
<b>Module 2: Marketing Strategy</b> Market Segmentation and Product Positioning, Market Segmentation, Market Targeting, Target Market Strategies, Product Positioning and Differentiation, Choosing a Differentiation and Positioning Strategy.	L1, L4	8
<b>Module 3: Product and Service</b> Products and services, product and service classifications, consumer products, industrial products, product and service decisions, product	L2,L4	7

and service attributes, product support services, services marketing – the nature and characteristics of a service.		
<b>Module 4: Retail Analytics – I</b> Customer Analytics Overview; Quantifying Customer Value, Using Stata for Basic Customer Analysis, Predicting Response with RFM Analysis, Statistics Review, Predicting Response with Logistic Regression, Predicting Response with Neural Networks, Predicting Response with Decision Trees.	L2,L3, L5	6
<b>Module 5: Retail Analytics – II</b> The digital evolution of retail marketing, Digital natives, Constant connectivity Social interaction, Predictive modelling, Keeping track, Data availability, Efficiency optimization.	L2,L4	8

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4406	<b>DATA PRIVACY AND DATA SECURITY LAWS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	0	2
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course is designed to familiarize the students with the basic concepts of data privacy issues and security laws including current and proposed laws and regulations that govern data security and privacy.

### Course Objectives

The objective of this course is to:

1. Provide the foundational knowledge based on data security investigation and data policy questions concerning the value of data security and data privacy regulations.
2. Emphasize on the real world effects of data breaches on individuals and businesses.
3. Provide an understanding on how to secure data and balancing of interests among individuals, government, and enterprises from the technical and legal perspective.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain the fundamental concepts of data security and security laws.

CO2: Explain the business needs for data privacy and security investigation.

CO3: Assess the risk for data security.

CO4: Identify the legal, professional and ethical issues related to data.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Data Security</b> History of data security, Meaning of data Security and data privacy, Critical Characteristics and components of Data security, Need for Security, Business Needs, Threats, Attacks, Meaning of term personal data, data processing, data protection, NSTISSC Data Security Model, Balancing Security and Access to data, The SDLC model, The Security SDLC	L1, L2	6
<b>MODULE 2: Introduction to Data Security Laws</b> Introduction of the General Data Protection Regulation (GDPR), rationale for the introduction of the GDPR , primary objectives of the General Data Protection Regulation, scope of data processing activities covered by the GDPR, territorial scope of the GDPR regarding the location of personal data processing and data subjects, GDPR impact on Indian Companies, Data protection Laws in India	L1, L2	6

<b>MODULE 3: Data Privacy: Legal Issues and Landscape</b> Development of Privacy Laws (historical and legal context), Fair Information Principles, The Statutory Landscape in the US, Indian IT Act, Adjudication under Indian IT ACT, IT Service Management Concept, IT Audit standards, ISO/IEC 27000 Series, COBIT, HIPPA, SOX, System audit, Information security audit, ISMS, SoA (Statement of Applicability), BCP (Business Continuity Plan), DR (Disaster Recovery), RA (Risk Analysis/Assessment)	L1, L2	6
<b>MODULE 4: Data Security Analysis and Risk Management</b> <b>Risk Management:</b> Identification, Assessment and controlling of Risk <b>Logical Design:</b> Blueprint for Security, Information Security Policy, Standards and Practices, ISO17799/BS 7799, NIST Models, VISA International Security Model, Design of Security Architecture, Planning for Continuity <b>Physical Design:</b> Security Technology, IDS, Scanning and Analysis Tools, Cryptography, Access Control Devices, Physical Security, Security and Personnel	L1, L2	6

BUA4437	<b>DISSERTATION (ANALYTICS PROJECT)</b>	L	T	P	C
Version 1.1		0	0	0	6
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Under this, it is usual to give the student some discretion in the choice of topic for the dissertation and the approach to be adopted. The dissertation topic is related to the field of specialization. Deciding this is often the most difficult part of the dissertation process, and requires thorough preparation and background research.

The aim of the dissertation is to provide the students with an opportunity to further their intellectual and personal development in their chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of their degree.

### Course Objectives

The objective of this course is to:

1. Understand and apply theoretical frameworks to the chosen area of study.
2. Produce a coherent and logically argued piece of writing that demonstrates competence in research and the ability to operate independently.

### Course Outcomes

On completion of Dissertation, the students will be able to

CO1: Describe a relevant area of career development, career coaching, coaching or work-related learning studies.

CO2: Identify research methods and state research questions.

CO3: Critically analyze and evaluate the knowledge and understanding in relation to the agreed area of study.

CO4: Integrate theory and practice for the development of responses on the basis of the evaluation and analysis undertaken.

CO5: Communicate in written form by integrating, analyzing and applying key texts and practices.

CO6: Demonstrate advanced critical research skills in relation to career development or work-related learning studies.

<b>Planning the dissertation</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<ul style="list-style-type: none"> <li>• Selecting a topic for investigation.</li> <li>• Establishing the precise focus of the study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. CSS4451	<b>CROSS CULTURAL COMMUNICATION</b>	L	T	P	Total
Version 1.1	Latest Approved	1	0	0	1
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Cross-cultural communication has become important to companies due to the growth of global business and technology. This type of communication involves an understanding of how people from different cultures speak, communicate, and perceive the world around them.

### Course Objectives

The objective of this course is to:

1. Define importance of cross-cultural communication to students.
2. Classify the types of behaviors that must be accounted for within cross-cultural communication.
3. Distinguish between high-context cultures and low-context cultures.
4. Explain the role nonverbal communication plays in cross-cultural communication.
5. Illustrate students the roles played by language barriers and power distance in cross-cultural communication.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Arrange a forum for frank discussions about culture and its impact on workplace communication.

CO2: Develop an overview of cross cultural fundamentals and Suggest tools for communicating better in person and in writing.

CO3: Demonstrate techniques for better listening when communicating with challenging speakers

Modules	Blooms level*	Number of hours
Module I: Importance of Culture in Communication Principles of effective cross cultural communication Developing Communication Competence	L1, L3	4
Module II: Barriers to effective communication Sender, Receiver and Situation related barriers Measures to overcome the barriers Listening skills	L1, L3	4
Module III: Cross cultural communication Characteristics of culture Social differences Contextual differences	L1, L3	4

Nonverbal differences Ethnocentrism

## **Master of Business Administration (Business Analytics)**

### **Programme Mission:**

The mission of the MBA programme is to foster an environment of academic excellence in Business Management through research and innovation, industry integration, internationalization and extension activities and develop highly trained and employable professionals with specialization in the area of Marketing & Sales, Finance, Banking & Finance, Human Resource Management, International Business, Information Technology, E-Commerce and Hospital & Healthcare, who are socially responsible and globally minded professional to meet the current and emerging needs of business and society.

### **Programme Description:**

The two year full time Masters in Business Administration programme is to educate and prepare students with the knowledge, analytical ability, and management perspectives and skills needed to lead, to motivate and to manage diversified workforce, rapid technological change and competitive marketplace while considering the principles of ethical, legal and corporate governance fundamentals.

### **Programme Outcome (PO):**

<b>PO1</b>	Apply the knowledge of marketing, human resource management, finance and other functional areas of management to solve complex management issues in volatile business environment
<b>PO2</b>	Student shall have ability to acquire & evaluate new knowledge through Business Research Methods, have the ability to identify, define, investigate, and solve critical business issues using management principles, analyse data/information and interpret results for reaching optimum solutions.
<b>PO3</b>	Student shall be able to understand global issues from different perspectives, recognize the opportunities to improve the business value chain as an entrepreneur and shall develop and display basic business acumen & business skills and be able to apply different forms of communication in diversified cultural settings.
<b>PO4</b>	Student shall able to critically thinkto assess societal, health, safety, legal, and cultural issues and apply range of strategies for solving a problem and decision making
<b>PO5</b>	Student shall be able to practice ethical principles and commit to professional ethics and responsibilities and norms of the management practice.
<b>PO6</b>	Student shall develop range of Leadership skills and shall demonstrate excellent interpersonal skills, understanding of group dynamics and effective teamwork, including awareness about personal strengths and limitations.
<b>PO7</b>	Student shall be able to communicate effectively on complex management activities with various stakeholders being able to comprehend and write effective reports, design documentation, make effective presentations, and give & receive clear instructions.
<b>PO8</b>	Student shall recognize the need for, and have the ability to engage in independent and life-long learning in the broadest context of technological change.
<b>PO9</b>	Student shall be able to create, select, and apply appropriate techniques, resources, and modern management and IT tools including prediction and modeling to make decisions.

**Supporting document for PSOs (Programme Specific Outcomes) of MBA BA**

<b>PSO 1</b>			<b>PSO 2</b>		<b>PSO 3</b>	<b>PSO4</b>	
Student shall be able to describe fundamental knowledge of general and functional management courses & relevant technological tools to identify opportunities and apply appropriate business strategies & solutions.			Student shall be able to apply knowledge of business analytics to solve business problems using appropriate technology such as machine learning/artificial intelligence and software solutions such as R, Python, SPSS, SAS to make holistic judgment. Student shall also apply technical skills to design effective advanced analytics models and simulations for effective decision making.		Student shall be able to apply specific and cross functional knowledge to solve critical business and management issues, write effective reports, demonstrate leadership and interpersonal skills, understanding of group dynamics and effective teamwork, including awareness about personal strengths and limitations.	Student shall be able to communicate effectively on complex management issues, make effective presentation with various stakeholders being able to comprehend and shall be able to practice ethical principles, professional values and fulfil social responsibilities and engage in life-long learning

**FIRST SEMESTER**

BUA4101	<b>MANAGEMENT PROCESS &amp; ORGANIZATIONAL BEHAVIOR</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic knowledge of general Management				
Co-requisites	Student must have basic understanding of General Management.				

### Catalog Description

To help the students to develop cognizance of the importance of human behaviour.

### Course Objective:

The objective of this course is to:

1. Help the students in gaining understanding of the functions and responsibilities of the manager.
2. Provide the student understanding of Human Behaviour in organizations so as to improve his/her managerial effectiveness.

### Course Outcome:

Upon successful completion of the course a student will be able to:

CO1: Demonstrate the applicability of the concept of organizational behavior to understand the behavior of people in the organization and diversified cultural settings.

CO2: Enable students to describe how people behave under different conditions.

CO3: Analyze the complexities associated, critically evaluate and apply decisions appropriately.

CO4: Enable students to synthesize related information and evaluate options for the most logical and optimal solution so that they would be able to predict and control human behaviour and improve results.

Modules	Blooms level*	Number of hours
<b>Module I: Management vs. Manager</b> Evolution of management thought, Functions of management, Roles and Skills of a manager, Emerging challenges of management.	L1, L2	6
<b>Module II: Organization</b> Nature and structure of organization, Types of organizations, Line and staff relationships, Formal and informal organizations.	L1, L2,	6
<b>Module III: Introduction to Organization Behaviour</b> Overview of organization behaviour and its importance, Organization models.	L1, L2,	6
<b>Module IV: Individual Behaviour</b> Individual behaviour, Perception and learning, Personality, Values & attitudes, Motivation: Concept theory and application	L1, L2, L3, L4, L5, L6	6
<b>Module V: Group Behaviour</b> Group dynamics, Communication, Leadership, Power and politics, Conflicts and negotiation.	L1, L2, L3, L4, L5, L6	6

<b>Module VI: Organizational Culture and Change Management</b> Organisational culture, Organisational change and development, Work stress and its management.	L1, L2, L3, L4, L5, L6	6
---	------------------------------	---

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

BUA4102	<b>ACCOUNTING FOR MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic knowledge of general Management				
Co-requisites	Student must have basic understanding of General Management.				

### Catalog Description

The intent of this course is to acquaint the students with fundamental concepts and processes of accounting so that they are able to appreciate the nature of item presented in the annual accounts of an organization. The student will be able to familiarize with the significant tools and techniques of financial analysis further useful in the interpretation of the financial statements. The aim of this course does not focus on to make the student's expert accountant but to have a good comprehension on the management planning and control systems. However, the principal focus will be related to the interpretation and use of the financial data by non-accounting students to gain the ability of using accounting information as a tool in applying solutions for managerial problems, evaluating the financial performance, and interpreting the financial structure.

### Course Objectives

The objective of this course is to:

1. Equip the students to develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, students will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts.
2. Develop skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

### Course Outcome:

On completion of this course, the students will be able to:

CO1: Enable the students to combine practice and theoretical knowledge of financial accounting.

CO2: Demonstrate the decision-making skills to the students in the financial analysis context,

CO3: Develop an ability to identify and analyze complex financial accounting problems and opportunities in real life situations.

CO4: Develop skills in applying management accounting techniques to assist in decision making.

Modules	Blooms Level	Number of Hours
<b>Module 1: Introduction</b> The Financial Accounting Framework, Accounting Policies, Need of Accounting. Users of Accounting Information, Accounting Cycle, Accounting and Management Control.	L1, L2, L3	8

Balance sheet- Classification Items of Balance Sheet, Formats of Balance Sheet. Preparation of Balance Sheet. Income Statement- Realization vs. Accrual Principle, Format of Income Statement), Preparation of Income Statement (IAS,GAAP&IFRS), Depreciation Accounting.		
<b>Module 2: Measuring and Reporting</b> Measuring and Reporting Assets, Liabilities & Equity: Cost of sales and Inventories, Debentures, Investments, Shareholder Equity; Human Resource Accounting: Valuation of Human Resources, Recording and Disclosure in Financial Statements.	L1, L2, L5	8
<b>Module 3: Analyzing and Interpreting Financial Statements</b> Financial Statement Analysis – Basic Relationship, Overall Measures, Profitability Ratios, Investment Utilization Ratios, Financial Condition Ratios, Making Comparisons. The Statement of Cash Flows-Profit versus Cash, Purpose and Use of Cash Flow Statement, Format of Cash Flow Statement (AS-3), Preparation of Cash Flow Statement (IAS,GAAP&IFRS).	L4, L5, L6	9
<b>Module 4: Management Accounting</b> Emergence of Management Account, Managerial costing and Cost-Volume-Profit Analysis, Budgeting and Budgetary control, Variance Analysis .	L1, L2, L5	5
<b>Module 5: Cost Accounting:</b> Elements of Cost, Cost Classification and Allocation, Cost sheet, Process Costing, Job Costing.	L1, L2, L5	5

\*Bloom's Level: L1 – Knowledge; L2-Comprehension, L3 – Application, L4 – Analysis, L5 – Synthesis, L6 – Evaluation

BUA4103	<b>MARKETING MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Marketing management emphasizes upon the practical aspects of marketing concepts and management functions performed by professionals. This is a beginner's course in Marketing and shall cover the basics. The course helps in developing an understanding of the challenges of marketing management in manufacturing and service industries: analyzing marketing environments; evaluating strategic alternatives and designing and implementing marketing programmes involving decisions about products/services, pricing, distribution and promotion. The course serves to familiarize participants with basic marketing concepts, environment, strategies and methodology.

### Course Objectives

The objectives of this course are to:

1. Provide the students exposure to modern marketing concepts, tools and techniques.
2. Enhance student's knowledge to prepare for general management responsibilities by focusing on the input of the marketing perspective across all functions.
3. Explain different consumer-specific characteristics as well as certain psychological processes influencing buying behavior.
4. Provide different dimensions of marketing such as STP, business environment, distribution channels, marketing communication, and social media marketing to enable the students to design and analyze the functional aspects in emerging market.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Define the holistic marketing efforts to develop, design and implement marketing programs. They will also be able to examine challenges, responsibilities, and risks managers face in today's workplace.

CO2: Illustrate a comprehensive knowledge about how values are created, communicated and delivered to the target audiences.

CO3: Explain how to control the elements of the marketing mix—product policy, channels of distribution, communication, and pricing—to satisfy customer needs profitably

CO4: Design strategic approaches to manage different marketing dimensions in uplifting the consumer as well as business market.

CO5: Describe the marketing communication and its applicability along with understanding new-age media, advertising, sales promotion, personal selling etc.

Modules	Blooms Level*	Number of hours
---------	---------------	-----------------

<b>Module I: Understanding Marketing in New Perspective</b> Fundamentals of Marketing, Customer Value and Satisfaction, Customer Delight, Conceptualizing Tasks and Philosophies of Marketing Management, Value Chain, Scanning the Marketing Environment, Marketing Mix Elements, Difference between marketing and Selling, Relationship marketing, Social marketing, Strategic Planning in marketing, formulating the marketing plan.	L1, L2	8
<b>Module II: Analyzing Consumers &amp; Selecting Markets</b> The factors influencing consumer behavior. The stages in the buying process, the buying decision making process, factors effecting the buying decision., Market Segmentations, Levels of Market Segmentations, Patterns, Procedures, Requirement for Effective Segmentation, Evaluating the Market Segments, Selecting the Market Segments, Tool for Competitive Differentiation, Developing a Positioning Strategy.	L1, L2, L4	7
<b>Module III: Managing Product &amp; Pricing Strategies</b> Classification of products, New Product development, stages of product development, Adoption process, Product mix decisions and line management, Length, width and depth of a line, line analysis, and brand management, product life cycle, stages in lifecycle and factors affecting each stage, Managing product life cycles. Setting the price, adapting the price, initiating and responding the price changes.	L1, L2, L3	7
<b>Module IV: Designing: Managing the Integrated Communication</b> Channel functions and flows. Channel design decisions. Channel management decisions. Channel dynamics; vertical horizontal and multi channel marketing systems. Market Logistics decisions. Effective Communication, Integrated Marketing Communication, Marketing Communication Process, Promotion mix, Advertising, Personal Selling, Sales Promotion and Publicity and Public Relations, Direct Marketing.	L1, L2, L3	7
<b>Module VI: Emerging Trends in Marketing</b> An Introduction to Internet Marketing, Multi Level Marketing, E-Marketing, Green Marketing, Event Marketing, Types of Events, Sponsorship, Cause Related Marketing, Marketing for Non Profit Organizations Marketing Strategies for Leaders, Challengers, Followers and Nichers.	L1, L2, L5	7

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation

BUA4104	<b>STATISTICAL TECHNIQUES</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers the understanding on identification of data, analysis and interpretation of data using basic quantitative tools & techniques. In this course, students can apply the quantitative techniques in the analysis of statistical and economic problems. Probability and hypothesis testing are major topics to be covered. Basic understanding of statistical concepts helps in deciding on the suitable technique for data analysis and also to interpret results.

### Course Objectives

The objectives of this course are to

1. Familiarize the students with basic quantitative tools & techniques for data analysis.
2. Equip the students with the concept of probability, hypothesis testing, data identification, and data analysis and interpretation using statistical tools.
3. Facilitate hands on experience to various statistical problems.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the basic concepts of probability and Bayes Theorem and manipulate the probability models that are most widely used in economics, and apply them correctly and carry out the appropriate statistical analysis.

CO2: Apply the appropriate statistical tools and techniques for data analysis of economic models.

CO3: Apply graphical, numerical methods and Excel to make calculate and illustrate descriptive statistics and critically evaluate the basis for these calculations.

CO4: Identify the appropriate regression model to apply to an economics dataset and also the problems associated with these models such as autocorrelation. Multicollinearity, heteroscedasticity, non Stationarity data series that may affect regression analyses.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Probability Theory</b> Elements of Probability Theory: Sample space Events, meaning of probability Classical definition of probability, The addition rule, Multiplication Rule, Theorems of total probability, conditional and statistical independence, limitation of classical definition, Bayes formula, random variable, expectation and variance of random variable (for random sampling with or without replacement)	L1, L2, L3	9
<b>MODULE 2: Random Variables and Probability Distributions</b> Defining random variables; probability distributions; expected	L1, L2, L3	9

values of random variables and of functions of random variables; properties of commonly used discrete and continuous distributions (uniform, binomial, normal, poisson and exponential random variables).		
<b>MODULE 3: Introduction to Estimation</b> Methods of sampling; sampling distribution of a statistic; distribution of the sample mean; sampling error and standard error of a statistic with special reference to the mean; Point and interval estimation of parameters; properties of an estimator; unbiasedness, relative efficiency and consistency.	L1, L2, L3	9
<b>MODULE 4: Hypothesis Testing</b> Testing of Hypothesis; type I and type II errors, power of a test; large sample tests, “t” test for the mean; one tail and two tail tests for difference of means; z-test, f-test, Chi-square test for (i) goodness of fit and (ii) independence of two attributes.	L1, L2, L3	9

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

BUA4105	<b>EXCEL FOR DECISION MAKING</b>	L	T	P	C
Version 1.1	Latest Approved	1	0	2	2
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets.

### Course Objectives

The course enables students to:

1. Explore the Microsoft Excel as a tool for facilitating solutions for business problems/decision making
2. Have an understanding on the advanced functions of excel through guided demonstration.
3. Enhance excel skills of students and develops a set of fundamental skills that are essential for survival in business amid global uncertainty.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Manage data in excel.

CO2: Explore the functions of basic and advanced excel.

CO3: Analyze the real time series dataset.

CO4: Explain insights about decision making in business.

Modules	Blooms level*	Number of hours
<b>Module 1: Overview of Excel</b> <b>Contents:</b> Introduction to Spreadsheets: data entry using autofill, sort & filter feature, widening rows and columns, inserting & deleting rows and columns, creating lists, wrapping & merging text and cells. Introduction to basic data formatting, saving work in excel. Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel, page orientation and print area in Excel. How to adding hyperlinks to cells, inserting images, objects, equations and symbols. Introduction to Figures and Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart.	L1, L3, L4	4
<b>Module 2: Data Cleansing and Lookups</b> <b>Contents:</b> Textual functions- TRIM, SUBSTITUTE, CLEAN, STORED AS TEXT, DE-DUPLICATING, LEN & FIND, CONCATENATE, UPPER, LOWER, REPLACE functions and	L1, L3, L4	4

Data validation; Look up functions- VLookup, multiple VLook up together and HLookup with index and match; Basics of Macros.		
<b>Module 3: Logical Functions and Pivot Tables</b> <b>Contents:</b> Basic functions- ROUNDING, SUM, PRODUCT, MIN, MAX, AVERAGE, CONDITIONAL COUNTS, LARGE, RANK, VAR, Std Dev, CONDITIONAL SUMS. Date functions and Time functions. Logical functions- IF, THEN, AND, OR, NOT, COUNTIFS, SUMIFS, TRUE, FALSE Functions. Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager. Pivot table, pivot charts and conditional formatting.	L1, L3, L4	4
<b>Module 4: Simulation and Decision Making</b> <b>Contents:</b> Basics of simulation, Monte Carlo Experiment, Decision Analysis (DA): Terminology, DA without probabilities (Maximax, Maximin, Minimax Regret), DA with probabilities: (Decision point / branch, chance event / branch, Decision tree with examples.	L1, L3, L4	4

### Catalog Description

The main objective of the course is to provide the students the insight into structures and processes that management science can offer and the enormous practical utility of its various utility. The course is designed to introduce the fundamental tools of MS and their application to real life business problems. It will help students to take well informed decisions in their corporate life.

### Course Objective:

The main objectives of this course are to:

1. Take decision under certain, uncertain and risky environment
2. Understand various business problems and applying a suitable MS model
3. Formulate Linear Programming Problem and solving using graphical and Simplex methods
4. Design the transportation and assignment problem, solve them and interpret the result
5. Design and solving the problems of game theory for the optimal solution
6. Describe the application of simulations.

### Course Outcomes

On completion of this course, students shall be able to:

- CO1. To recall the evolution of OR and specify currently used OR models for different business situations
- CO2. To describe a business problem and analyzing it for the optimum solution
- CO3. To illustrate different prevailing constraints while finding out optimum solution
- CO4. To evaluate various models to take better and improved decisions

Modules	Blooms level*	Number of hours
<b>Module I: Introduction</b> Optimization Techniques: uses, scope, applications in managerial decision making; assumptions of management science models, decision making environments: decisions under certainty, uncertainty and risk situation; decision tree approach and its applications.	L1, L2, L3	6
<b>Module II: Linear Programming Problems</b> Linear Programming Problems: Modeling and Solution Methods- graphical method, simplex methods, problems with maximization and minimization objects, duality and its managerial interpretation; Sensitivity analysis: meaning, Change in Objective Function Coefficients, Change in Right Hand Side Values, Change in Availability of resources and Addition of a new variable.	L1, L2, L3, L4, L6	8
<b>Module III: Transportation and Assignment Model</b>	L1, L2,	8

Transportation model: various methods of finding initial basic feasible solution and optimal solution, MODI method, degeneracy, unbalanced problems, prohibited route problems, maximization transportation problems Assignment Model: Hungarian method for solution, unbalanced assignment problems, restrictions on assignments, travelling salesman problem.	L3, L4, L6	
<b>Module IV: Game Theory</b> Two-Person Zero Sum Games, Pure Strategies: Games with Saddle Point, Mixed Strategies: Games without Saddle Point, Principle of Dominance, and Solution Methods for Games without saddle point – Algebraic Method, Arithmetic Method, Graphical Method.	L1, L2, L3, L4, L6	8
<b>Module VI: Simulation</b> Simulation: meaning, types of simulation, steps of simulation process, Monte Carlo simulation, applications of simulation	L1, L2, L3, L4, L6	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

BUA 4107	<b>DATABASE MANAGEMENT SYSTEMS</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

In this course the students will learn about the importance and usage of database management systems in the modern day organizations. The students shall grasp sound knowledge of various types of databases that exist, creation of data warehouse and application areas of data mining. Also, the students will be learning SQL, the language of databases.

### Course Objectives

The course aims to make the students

1. Understand the basic and advanced concepts in databases and database management systems
2. Analyze the importance of databases in day to day life.
3. Get a hands-on experience on the SQL-the language of databases.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Define the basic terminology used in databases.

CO2: Describe the concepts related to databases architecture.

CO3: Apply the knowledge of SQL in creating databases using DBMS software for a business organization.

CO4: Compare and contrast various types of keys used in database creation.

CO5: Review and assess the organization's data and network security aspects.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction to DBMS</b> Definition of DBMS, Concept and Goals of DBMS, Data Independence, DBMS Architecture, Levels, Database Administrator, File System Approach Vs DBMS Approach, Advantages of Using a DBMS, Data Models, Schemas, and Instances, Database Languages, Database Users, Database Abstraction.	L1, L2	6
<b>Module II: Relational Database &amp; ER Model</b> <b>Relational Database:</b> Relational System, Codd's Rule, Relational Model, Optimization, Tables and Views <b>ER Model:</b> Entity Type, Entity Set, Relationship type, Relationship sets, Constraints: Cardinality Ratio and Participation Constraint, Keys, Mapping, Design of ER diagrams.	L2, L3	7

<b>Module III: Relational Model Objects</b> Domains and Relations, Relations and predicates, Relational Data Integrity; Primary Key, Candidate Key, Foreign Key and their rules, Relational operators, Relational Algebra	L1, L2	7
<b>Module 4: SQL</b> SQL Language, DDL, DML and DCL commands. Data definition, Data retrieval and update operations on MS ACCESS and SQL Server DBMS.	L1, L2	8
<b>Module 5: Database Applications and Types</b> Distributed Database, Object Oriented Database, Multimedia Database, Data Mining, Digital Libraries. Data Warehouse.	L1, L2	8

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4108	<b>HUMAN RESOURCE MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

**Catalog Description:** The course provides insight into managing Human Resources, Recruitment, Selection, Performance Appraisal, Training & Development and Compensation.

**Course Objective:**

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

**Course Outcomes:**

On completion of the course the students will be able to:

CO1: Explain and apply the concepts of human resources management in the financial sector.

CO2: Demonstrate a basic understanding of different tools and techniques used in forecasting and planning human resource requirements especially in context to the banking industry.

CO3: Interpret the industry regulations of the banking sector that will effect employees and employers and apply them effectively.

CO4: Analyze and solve key issues related to the human elements, both nationally and internationally such as employee acquisition, retention compensation, appraisal, training, career planning and diversity.

Modules	Blooms level*	Number of hours
<b>Module I: Human Resource Management in Perspective</b> Nature and scope of HRM, HRM functions, HRM models, understanding concepts of Personnel Management, Human Resource Development and Strategic Human Resource Management, HR Environment, Changing Role of HR.	L1, L2	7
<b>Module II: Meeting Human Resource Requirements</b> Job Analysis, Job Description, Strategic Human Resource Planning, Recruitment, Selection Process, Methods – Interview, Tests, Placement and Induction	L1, L2	6
<b>Module III: Training &amp; Developing of Employees</b> Training and Development, Understanding of Performance Management Systems, Potential Appraisal, Career Development	L1, L2	8
<b>Module IV: Managing Compensation</b> Job evaluation, Methods of Job Evaluation, Strategic Compensation, Equity Theory, Components of Pay Structure, Designing and	L1,L2	4

Administration of Wage and Salary Structure, Wage Regulations in India		
<b>Module V: Employee Relations</b> Overview of Industrial Relations, Industrial disputes, Collective Bargaining, Workers Participation and Management, Grievance handling	L1, L2	5
<b>Module VI: Emerging Trends in HRM</b> Overview of Human Resource Information System (HRIS), Introduction to HR Audit, IHRM Practices, Cross- Cultural and Diversity Management, Work-life integration, Human Resource Outsourcing	L1, L2	6

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

CSS 4151	Basics of Communication	Structure			
		L	T	P	Total
Version	Latest Approved	1	0	0	1
Pre requisite /Exposure					
Co- requisite					

### Catalog Description

In this course of Communication Skills, we would like students to understand the basic concepts of Communication skills and to use different tools to enhance their vocabulary and strengthen their spoken and written communication.

### Course Objectives

The objective of this course is to

1. Explain students to communicate effectively by emphasizing on practical communication through refurbishing their existing language skills and also to bring one and all to a common take-off level.
2. Develop skills for effective word choice and sentence and avoid common errors in written communication.

### Course Outcomes

On completion of this course the students will be able to:

CO1. Develop competency to write and speak grammatically correct English that will enable them to communicate effectively and solve issues that arise due to miscommunication.

CO2. Apply the different models of communication to facilitate effective communication throughout the organization.

CO3. Develop the capability of customizing communication in different situations like social, legal, cultural.

CO4. Demonstrate the capability of using different tools of communication, particularly related to technology

CO5. Demonstrate the ability to effectively communicate in complex situations.

Modules		Blooms'Level*	Credit Hours
<b>Module 01</b>	Fundamentals of communication Relevance of communication Effective communication Models of communication Effective use of language	L1, L3	4
<b>Module 02</b>	Tools of communication Proficiency in English – The international Language of business Building vocabulary (Denotative & connotative) Extensive vocabulary drills	L1, L3	4

	(Synonyms / Antonyms / Homonyms) One Word substitution Idioms & phrases Mechanics and Semantics of sentences Writing sentences that really communicate (Brevity, Clarity, and Simplicity) Improving the tone and style of sentences		
<b>Module 03</b>	Barriers to Effective use of language Avoiding clichés Removing redundancies Getting rid of ambiguity Euphemism Jargons Code switching	L1,L3	4

***Bloom's Level** L1: Knowledge; L2: Comprehension; L3: Application L4: Analysis; L5: Synthesis, L6: Evaluation*

**SECOND SEMESTER**

BUA4201	<b>FINANCIAL MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course introduces an investigation of the firm's acquisition and financial activities, to include working capital management, capital budgeting, capital structure strategies, and valuation theory. The practical application of financial policy is stressed for decision-making purposes.

### Course Objectives

The objective of this course is to

1. Provide the students relevant, systematic, efficient and actual knowledge of financial management that can be applied in practice with making financial decisions and resolving financial problems.
2. Help the students to acquire the basic knowledge by means of combining theoretical cognitions and practical attitudes to enable them to understand the financial problems in business practice.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Describe the financial environment within which organisations must operate.

CO2: Critically evaluate the financial objectives of various types of organisations and the respective requirements of stakeholders

CO3: Explain alternative sources of finance and investment opportunities and their suitability in particular circumstances

CO4: Assess the factors affecting investment decisions and opportunities presented to an organisation.

CO5: Select and apply techniques in managing working capital

CO6: Analyse a company's performance and make appropriate recommendations.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction</b> A Framework for Financial Decision-Making- Financial Environment, Changing Role of Finance Managers, Objectives of the firm.	L1,L2	4
<b>Module II: Valuation Concepts</b> Time Value of Money, Risk and Return, Financial and Operating Leverage.	L1, L2 ,L3	4
<b>Module III: Financing Decisions</b> Capital Structure and Cost of Capital, Marginal Cost of Capital.	L1, L2,L3	7

<b>Module IV: Capital Budgeting</b> Estimation of Cash Flows, Criteria for Capital Budgeting Decisions, Issues Involved in Capital Budgeting, Risk analysis in Capital Budgeting – An Introduction.	L1,L2,L3	10
<b>Module V: Working Capital Management</b> Factors Influencing Working Capital Policy, Operating Cycle Analysis, Management of Inventory, Management of Receivables, Management of Cash and Marketable Securities, Financing of Working Capital.	L1,L2,L3	5
<b>Module VI: Dividend Policy Decisions</b> An introduction: Different Schools of Thought on Dividend Policy.	L1,L2,L3	6

*\*Bloom's Level: L1-Knowledge;L2-Comprehension;L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA 4202	<b>OPERATIONS AND SUPPLY CHAIN MANAGEMENT</b>	L	T	P	C
Version 1	Latest approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Operations and supply chain management deals with the design and operation of the systems for production of goods and services. It will explore the approaches and analyze strategic decisions in operations management with a focus on designing products and processes, allocating scarce resources to strategic alternatives, and do long-range capacity and facility planning. These operations functions help in achieving the organization's long-range objectives. Subsequent focus will be on medium and short term planning and controlling. Care will be taken to strike a balance between theoretical and practical perspectives in manufacturing and service organizations.

### Course Objectives

The main objectives of this course are to:

1. Develop an understanding of how the operations, have strategic importance and can provide a competitive advantage in the workplace.
2. Understand the relationship between operations and other business functions.
3. Understand techniques of location and facility planning, line balancing, job designing, and capacity-planning in operations management.
4. Understand the supply chain function starting from Demand Management through Inventory Management.

### Course Outcomes

On completion of this course, the students will be able to

CO1. Define the elements of operations management and various transformation processes to enhance productivity and competitiveness

CO2. Classify and apply various facility alternatives and their capacity decisions, develop a balanced line of production & scheduling and sequencing techniques in operation environments

CO3. Illustrate aggregate capacity plans and MPS in operation environments

CO4. Analyze suitable supply chain principles and practices in the operations.

CO5. Compare and apply various inventory control methods

Modules	Blooms level*	Number of hours
---------	---------------	-----------------

<b>Module I: Introduction</b> Operations in manufacturing and services, responsibility of Operations Manager, Operations strategy and competitiveness, process analysis, manufacturing process and service process selection and design, job design and work measurement	L1, L2, L3	6
<b>Module II: Strategic Decisions</b> Facility location decisions, factors affecting location, location techniques: factor rating method, centroid method, facility layout, process layout, systematic layout planning, product layout, line balancing, fixed position layout, service operations layout, types of capacity, capacity planning: long term and short term, economies of scale	L1, L2, L3	8
<b>Module III: Operating Decisions</b> Aggregate Planning, production planning and control (PPC), benefits of PPC, Master Production Scheduling, Operations scheduling: loading, sequencing, priority rules and techniques, Materials Requirement Planning (MRP), concerns in MRP	L1, L2, L3	8
<b>Module IV: Supply Chain Management</b> Recent issues in SCM: Role of IT in SCM, CRM Vs SCM, structure of supply chain, benchmarking concept, features and implementation, outsourcing decisions, value addition in SCM	L1, L2, L4, L5	8
<b>Module V: Inventory Management</b> Inventory management: Objectives, factors, process, inventory costs, inventory models, inventory control techniques: ABC, VED, EOQ, SED analysis, Just-in-Time (JIT), JIT vs traditional systems of operations, JIT in services	L1, L3, L4, L6	6

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4203	<b>ECONOMETRICS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers the both fundamental and strategic understanding on identification of business problem and how to approach that problem using econometric techniques. This course facilitates a good learning on the estimation of parameters and forecasting of any indicator/variable related to business/ economy at both micro and macro level. Also, this course covers the quantitative analysis, model building and policy making for any economic/business problem. The course starts with simple and multiple linear regressions, followed by topics of special interest to deal with model specification, endogenous variables, binary choice data, and time series data. The aim of the course is to make the students familiar with statistical techniques and quantitative analysis.

### Course Objectives

The objective of this course is to

1. Provide a good understanding on identification of problem, estimation of parameters and interpretation of results.
2. Equip the students with major statistical tools and techniques using various statistical software such as STATA, R, SPSS, Eview, SAS.
3. Explore the mathematical background of these concepts and techniques, and demonstrate their use through practical examples and interactive experiments.
4. Facilitate hands on experience to various real world business problems.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Translate data into models to make forecasts and to support decision making in a wide variety of fields, ranging from macroeconomics to finance and marketing.

CO2: Use statistical software or programming languages to combine data sets and estimate econometric models.

CO3: Analyse binary response data, panel and time series data using appropriate statistical models.

CO4: Explain problems imposed by endogeneity and simultaneity bias and how to resolve these problems using appropriate statistical models.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Parametric Tests</b> Nature, meaning and scope of econometrics; Simple and general linear regression model —Assumptions, Estimation (through OLS approach) and properties of estimators; Gauss-Markov theorem; Concepts and derivation of R <sup>2</sup> and adjusted R <sup>2</sup> ; Concept and	L1, L2, L3	8

analysis of variance approach and its application in regression analysis.		
<b>MODULE 2: Autocorrelation</b> Nature, test, consequences and remedial steps of problems of autocorrelation	L1, L2,L3,L4	7
<b>MODULE 3: Heteroscedasticity</b> Nature, test, consequences and remedial steps of problems of heteroscedasticity.	L1, L2,L3,L4	7
<b>MODULE 4: Multicollinearity</b> Nature, test, consequences and remedial steps of problems of Multicollinearity.	L1, L2,L3,L4	7
<b>MODULE 5: Non-Parametric Tests</b> Dummy variable technique, Testing structural stability of regression models, Stationarity Tests, Logit, Probit and Tobit models — Applications.	L1, L2, L3,L4	7

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation

BUA4204	<b>BUSINESS RESEARCH METHOD</b>	L	T	P	C
Version 1.1	Latest Approved	1	0	2	2
Pre-requisites/Exposure					
Co-requisites					

### **Catalog Description:**

The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

### **Course Objectives:**

The objectives of this course are to ensure that students are able to:

1. Understand the basic framework of research process.
2. Comprehend of various research designs and techniques.
3. Identify various sources of information for literature review and data collection.
4. Understand some basic concepts of research and its methodologies
5. Understand as how to organize and conduct research in a more appropriate manner and write a research report, thesis and a research proposal

### **Course Outcomes (CO):**

On completion of this course, the students will be able to:

CO1: Apply a range of quantitative and / or qualitative research techniques to business and management problems / issues

CO2: Determine and apply research approaches, techniques and strategies in the appropriate manner for managerial decision making

CO3: Demonstrate knowledge and understanding of data analysis and interpretation in relation to the research process

CO4: Develop necessary critical thinking skills in order to evaluate different research approaches utilised in the different industries and be able to critically assess the overall process of designing a research study from its inception to its final report preparation.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
Module I: Introduction Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal	L1, L2	2
Module II: Measurement and Data Collection Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques,	L1, L2, L3, L4, L5	8

measures of central tendency mean, median, mode; measures of dispersion, data processing		
Module III: Data Analysis I Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi-square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test	L1, L2,L3,L4,L5	6
Module IV: Data Analysis-II Simple linear regression: coefficient of determination, significance tests, residual analysis, Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)	L1,L2,L3,L4, L5	4
Module V: Report Writing Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report	L1,L2,L3,L4, L5	4

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

BUA4205	<b>ECONOMICS FOR MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic knowledge of economic science preferred but not compulsory				
Co-requisites					

### Catalog Description

In this course the students are introduced with various concepts of economic science that relates to decision making process in management of business organization. To begin with, introductory concepts of economic theory and their implications on managerial decision process are analyzed. Thereafter concepts related to demand analysis, demand forecasting supply analysis, and equilibrium market conditions are discussed in detail. The next phase deals extensively concepts related to production theory, cost theory and revenue aspects. Third, various concepts related to market structure are discussed in detail. Finally, various macroeconomic concepts, policy perspectives of government and other institutions are explored in detail. The overall aim of this course is to make the students familiar with working knowledge of economic decision process based on rational choice approach in workplace.

### Course Objectives:

The objective of this course is to:

1. Equip the students with theoretical concepts of economic science so that they can analyze situations and improve upon their managerial decision making process in workplace.
2. Provide students with extensive exposure about the micro and macro level variables and government policies that influence business operations and strategies of the firm under dynamic business environment in an increasingly globalized and integrated business architecture.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain basic concepts of economic analysis, demand and supply dynamics, demand forecasting techniques and their application, and analyze the working of free market mechanism and appreciate how forces of demand and supply reinforce each other for attaining market equilibrium.

CO2: Analyze rationally the dynamics of production and cost aspects in order to make a holistic assessment of the complexities inherent in production system.

CO3: Describe the various forms of market structure and their implications in managerial decision process.

CO4: Discuss holistically the various macroeconomic aspects of business, economic variables affecting business operations, and implications of government policies in shaping the dynamics of business environment.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Managerial Economics, Demand</b>	L1, L2	7

<p><b>Analysis and Demand Forecasting:</b>  <i>Introduction to Managerial Economics:</i> Meaning and Nature of Managerial Economics, Significance of Managerial Economics, Scope of Managerial Economics. <i>Demand Analysis:</i> Meaning of Demand, Determinants of Demand, Individual and Market Demand Functions, Individual and Market Demand Curves, Law of Demand, Exception of Law of Demand. <i>Elasticity of Demand:</i> Types of Elasticity of Demand, Significance of Elasticity of Demand. <i>Demand Forecasting:</i> Purpose of Demand Forecasting , Steps Involved in Forecasting, Determinants of Demand Forecasting, Methods of Demand Forecasting.</p>		
<p><b>MODULE 2: Theory of Supply, Production, Cost and Revenue Analysis:</b>  <i>Supply:</i> Law of Supply, Determinants of Supply, Shift of Supply and Change in Supply, Elasticity of Supply, Kinds of Elasticity of Supply, Determinants Elasticity of Supply. <i>Theory of Production:</i> Meaning of Production, Short –run Analysis of Production, Law of Variable Proportion, the Three Stages of Production, Returns to Scale. <i>Analysis of Cost:</i> Cost and Managerial Decision-making, Types of Cost, Cost Function, Relationship between Production and Cost, Short Run Cost Function, Long Run Cost Function, Relation between Short-run and Long-run Cost Curves, <i>Economies of Scale</i>. Break-Even Analysis. Concept of Revenue.</p>	L1, L2	11
<p><b>MODULE 3: Market Structure and Price Determination</b>  <i>Perfect Competition:</i> Introduction of Perfect Competition, Characteristics of Perfect Competition, Demand Curve of Firm and Industry, Equilibrium of the Firm in the Short Run and Long Run. Effects of Tax Imposition under Perfect Competition. <i>Monopoly:</i> Assumptions, Causes of Monopoly, Demand, Average Revenue and Marginal Revenue of a Monopolistic, Profit Maximization Price Determinants of the Monopolist in Short-run and Long-run. Measures of Monopoly Power. <i>Monopolistic Competition:</i> Assumptions, Product Differentiation, Demand Curve, Equilibrium of the Firm in Short-run and Long-run, Selling cost and Monopolistic Competition. <i>Oligopoly:</i> Assumptions, Non-collusive Oligopoly and Collusive Oligopoly, Kinked Demand Curve Analysis.</p>	L1, L2, L3	8
<p><b>MODULE 4: Macroeconomics Analysis</b>  <i>National Income:</i> An Indicator of Economic Activity, The Parameters that Influence Level of Economic Activity. <i>Business Cycles:</i> Characteristics of Business Cycle, Phases of Business Cycle, Ill Effects of Business Cycles, General Measure to Control Business Cycles.  <i>The Role of Government in Market Economy and Strategic Business Implications:</i> Rationale of Government Intervention, Government Macroeconomic Policy Measures – GST, Demonetization – and their impact on Business; Macro Economic variables and their functional relationship; Economic Functions of Government in a Market Economy, Legal and Social Framework, Restraining Unfair Competition and Increasing Market Power, Reallocation of</p>	L1, L2, L3, L4	10

Resources in the Presence of Externalities, Redistribution of Income, Regulation of Natural Monopoly, Stabilization of Economy; <i>Macroeconomic Variables affecting Business:</i> Consumption Function, Saving Function, Investment Multiplier; Transaction, Precautionary, Speculative Demand for Money; Liquidity Preference; Components of Money Supply; Fiscal Policy & Monetary Policy and their implications on business and management; Inflation and Deflation - Demand pull and Cost push inflation; Government policies to control inflation. <i>International Trade Regime and its implications on Business:</i> GATT, World Trade Organization, Regional Trade Agreements – EU, NAFTA, ASEAN, SAFTA, MERCUSOR

BUA4206	<b>PROGRAMMING FOR ANALYTICS USING R</b>	L	T	P	C
Version 1.1	Date of Approval: Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers the specialization on R (powerful language used widely for data analysis and statistical computing). This course facilitates a good understanding on the process of data manipulation and visualization. The course provides ample working examples on statistical data analysis using R.

### Course Objectives

The objective of this course is to:

1. Provide learning on how to program in R, how to use R for effective data analysis, how to install and configure software necessary for a statistical programming environment.
2. Provide applications on statistical computing which includes programming in R, reading data into R, accessing R packages, writing R functions, debugging, profiling R code, and organizing and commenting R code.
3. Facilitate hands on experience to various real world business problems using R.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Analyze different datasets using R

CO2: Explore real time data at various levels using appropriate visualizations

CO3: Apply critical programming language concepts such as data types, iteration, control structures, functions, and boolean operators by writing R programs and through examples

Modules	Blooms level*	Number of hours
<b>MODULE 1:</b> Introduction: Introducing to R , R Data Structures , Help functions in R , Vectors , Scalars , Declarations , recycling , Common Vector operations , Using all and any, Vectorized operations , NA and NULL values , Filtering , Vectorized if-then else , Vector Equality , Vector Element names	L1, L2,L3	8
<b>MODULE 2:</b> Matrices, Arrays And Lists: Creating matrices , Matrix operations , Applying Functions to Matrix Rows and Columns , Adding and deleting rows and columns , Vector/Matrix Distinction , Avoiding Dimension Reduction , Higher Dimensional arrays , lists , Creating lists , General list operations , Accessing list components and values , applying functions to lists , recursive lists	L1, L2,L3	7
<b>MODULE 3:</b> Data Frames: Creating Data Frames , Matrix-like operations in frames , Merging Data Frames , Applying functions to Data frames , Factors and Tables , factors and levels , Common functions used with factors , Working with tables - Other factors and	L1, L2,L3	7

table related functions - Control statements , Arithmetic and Boolean operators and values , Default values for arguments - Returning Boolean values , functions are objects , Environment and Scope issues , Writing Upstairs - Recursion , Replacement functions , Tools for composing function code , Math and Simulations in R		
<b>MODULE 4:</b> OOP: S3 Classes , S4 Classes , Managing your objects , Input/ Output , accessing keyboard and monitor , reading and writing files , accessing the internet , String Manipulation , Graphics , Creating Graphs , Customizing Graphs , Saving graphs to files , Creating three-dimensional plots	L1, L2,L3	7
<b>MODULE 5:</b> Interfacing: Interfacing R to other languages , Parallel R , Basic Statistics , Linear Model , Generalized Linear models , Non-linear models , Time Series and Auto-correlation , Clustering	L1, L2, L3	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

### Text and Reference Books

BUA4207	<b>PROGRAMMING FOR ANALYTICS USING PYTHON</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course is designed in such a way that leads the students from the basics of writing and running Python scripts to more advanced features such as file operations, regular expressions, working with binary data, and using the extensive functionality of Python modules.

### Course Objectives

The objective of this course is to:

1. Equip students with the concepts of the fundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming language.
2. Provide applications on statistical, machine learning, information visualization, text analysis, and social network analysis techniques through popular python toolkits such as pandas, matplotlib, scikit-learn, nltk, and networkx to gain insights into data analysis process.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Create applications for data retrieval and processing

CO2: Conduct an inferential statistical analysis of various business problems

CO3: Explain fundamental Python functionality and features used for data science

CO4: Apply techniques such as lambdas and manipulate csv files

Modules	Blooms level*	Number of hours
<b>MODULE 1:</b> Installing Python; basic syntax, interactive shell, editing, saving, and running a script, Concept of data types; variables, assignments; immutable variables; numerical types; arithmetic operators and expressions; comments in the program; understanding error messages Conditions, boolean logic, logical operators; ranges; Control statements: if-else, loops (for, while); short-circuit (lazy) evaluation	L1, L2, L3	8
<b>MODULE 2:</b> Strings and text files; manipulating files and directories, os and sys modules; text files: reading/writing text and numbers from/to a file; creating and reading a formatted file (csv or tab-separated).String manipulations: subscript operator, indexing, slicing a string; strings and number system: converting strings to numbers and vice versa. Binary, octal, hexadecimal numbers	L1, L2, L3	7
<b>MODULE 3:</b> Lists, tuples, and dictionaries; basic list operators,	L1,	7

replacing, inserting, removing an element; searching and sorting lists; dictionary literals, adding and removing keys, accessing and replacing values; traversing dictionaries. Design with functions: hiding redundancy, complexity; arguments and return values; formal vs actual arguments, named arguments, Program structure and design, Recursive functions	L2,L3	
<b>MODULE 4:</b> Simple Graphics and Image Processing: “turtle” module; simple 2d drawing - colors, shapes; digital images, image file formats, image processing Simple image manipulations with 'image' module (convert to bw, greyscale, blur, etc).Classes and OOP: classes, objects, attributes and methods; defining classes; design with classes, data modeling; persistent storage of objects OOP, continued: inheritance, polymorphism, operator overloading (_eq_, _str_, etc); abstract classes; exception handling, try block	L1, L2,L3	7
<b>MODULE 5:</b> Graphical user interfaces; event-driven programming paradigm; tkinter module, creating simple GUI; buttons, labels, entry fields, dialogs; widget attributes - sizes, fonts, colors layouts, nested frames Multithreading, Networks, and Client/Server Programming; introduction to HTML, interacting with remote HTML server, running html-based queries, downloading pages; CGI programming, programming a simple CGI form. Searching, Sorting, and Complexity Analysis	L1, L2, L3	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4208	<b>CONSUMER BEHAVIOR</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic Marketing concepts				
Co-requisites	NA				

### Catalog Description:

The increasing trend of customer centric organizations makes it imperative to understand the psyche of consumer to the fullest. Virtually all companies are striving to gain maximum knowledge about the way consumer thinks and behave so that proper direction can be given to the marketing strategy. This paper on consumer behaviour aims to familiarize students about the importance of understanding consumers for the success of an organization. It makes a connection between customer behaviour principles and the elements of marketing strategy.

### Course Objectives:

The objectives of this course are to:

- 1:** Make the student understand the concepts/theories pertaining to consumer behaviour and reveal its importance in the context of marketing.
- 2:** Make the student well versed with the various factors that influence consumer behaviour.
- 3:** Enable the student to examine the consumer decision-making process.
- 4:** Provide with knowledge to the student so that he may describe the target market and determine the positioning strategy according to consumer characteristics and behaviour.

### Course Outcomes (CO):

On completion of this course, the students will be able to:

- CO1:** Memorize the various concepts and discuss the rationale for studying consumer behaviour.
- CO2:** Identify and explain factors which influence consumer behaviour inclusive of society and culture.
- CO3:** Demonstrate how knowledge of consumer behaviour can be applied to marketing.
- CO4:** Employ communication skills both orally and in writing within marketing contexts.

Modules	Blooms level*	Number of hours
<b>Module I</b> Consumer Behavior: Understandings and Applications, Consumer Research	L1, L2	5
<b>Module II</b> Consumer as an Individual: Consumer Motivation, Consumer Personality, Consumer Perception, Consumer Learning, Consumer Attitude formation and change.	L1, L2,L3,L4	13

<b>Module III</b> Consumers in their Social Setting: Reference Groups and Family Influences, Social Class and Consumer Behavior, Influence of Culture and Sub Cultures on Consumer Behavior.	L1, L2,L3,L4	13
<b>Module IV</b> Consumer Decision Making Process	L1,L2,L3,L4,L5	3
<b>Module V</b> Opinion Leadership, Diffusions of Innovations and Adoption	L1,L2	2

CSS4251	<b>Corporate Communication</b>	L	T	P	C
Version 1.1	Latest Approved	1	0	0	1
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course covers the basics of Corporate Communication. Through these students come to know about written aspect of communication at workplace like letter writing, report writing and official correspondence. They also develop skills on social networking.

### Course Objectives

The objective of this course is to:

1. Practice on communication skills as much as possible.
2. Understand the 7 C's of communication.
3. Estimate the real life situations, class exercises.

### Course Outcomes

On completion of this course, the students will be able to

CO 1: Describe writing assignments ranging from business letters, reports, memos, circulars and notices.

CO 2: Describe different formats of business letters.

CO 3: Construct agendas and circulars for meetings.

CO 4: write project reports and summer training reports.

CO 5: Analyze the effects of social networking.

<b>Modules</b>	<b>Blooms' Level*</b>	<b>Credit Hours</b>
<b>Module I: Introduction to Writing Skills</b> <ul style="list-style-type: none"> <li>• Effective Writing Skills</li> <li>• Avoiding Common Errors</li> <li>• Paragraph Writing</li> <li>• Note Taking</li> <li>• Writing Assignments</li> </ul>	L1,L2,L3	2

**THIRD SEMESTER**

BUA4301	<b>STRATEGIC MANAGEMENT</b>	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course introduces the key concepts, tools, and principles of strategy formulation and competitive analysis. It is concerned with managerial decisions and actions that affect the performance and survival of business enterprises. The course is focused on the information, analyses, organizational processes, and skills and business judgment managers must use to devise strategies, position their businesses, define firm boundaries and maximize long-term profits in the face of uncertainty and competition.

### Course Objectives

The objective of this course is to

1. Introduce students to the key concepts, tools and principles of business policy and strategic management.
2. Expand the student's capacity to integrate and appreciate the changes in the environment that shape the strategy of a business and lead to developing a competitive edge.
3. Develop the perspective of students towards understanding the culmination of different functional areas into building up of a corporate strategy.
4. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how companies use what-if analysis to evaluate action alternatives and make sound strategic decisions.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Identify and recognise the various levels at which strategic decision making happens in an organization.

CO2: Analyse the internal and external environment of business that will lead to formulation of strategic plans.

CO3: Analyze the suitability of strategies that firms have developed in the real world scenario to achieve valueable outcomes.

CO4: Prepare strategic analysis and choice in order to determine alternative courses of action that could best enable the firm to achieve its mission and objectives.

CO5: Analysis of strategy implementation and evaluation to gain competitive advantage.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction and Purpose of Strategy Formulation</b> Evolution and Introduction of strategic management, Concept of Strategy, corporate, Business and Functional Levels of Strategy,	L1,L2	7

Mission, Vision, Objectives, Approaches to four Phases in Strategic Management Process, Stakeholders in business and their roles in strategic management, Strategic decision making.		
<b>Module II: Environmental Analysis</b> Analysing company's External Environment: PESTLE Analysis; Preparing an Environmental Threat and Opportunity Profile (ETOP), Analysing Industry Environment: Industry Analysis – Porter's Five Forces Model of competition, Strategic Group analysis.	L1, L2 ,L3	7
<b>Module III: Analysis of Organizational Competencies</b> Analysing Company's Internal Environment Resource based view of a firm, meaning, types & sources of competitive advantage, analysing company's Resources and Competitive Position, VRIO Framework; Benchmarking as a method of comparative analysis, Competitive advantage; Concept of a Core competence and Distinctive competitiveness, Characteristics of Core Competencies; Value Chain Analysis Using Porter's Model; Organizational Capability Profile: Strategic Advantage Profile.s	L1, L2,L3	7
<b>Module IV: Strategic Analysis and Choice</b> Generic Competitive Strategies: Meaning of Generic competitive strategies, Low cost, Differentiation, Focus – when to use which strategy; Grand Strategies: Stability, Growth (Diversification Strategies, Vertical Integration Strategies, Mergers, Acquisition & Takeover Strategies, Strategic alliances & Collaborative Partnerships), Retrenchment – Turnaround, Divestment, Liquidation, Outsourcing Strategies; Offensive and Defensive Strategies, Blue Ocean Strategy, Strategy in the age of Internet and E-commerce; Portfolio Analysis Business Portfolio Analysis – BCG Matrix – GE 9 Cell Model; Evaluation of Strategic Alternatives: SWOT Analysis, Grand Strategy Selection Matrix.	L1,L2,L3	8
<b>Module V: Strategy Implementation and Evaluation</b> Strategy Implementation, Barriers to implementation of strategy, Mc Kinsey's 7s Framework; Organization Structures for Strategy Implementation, Leadership Implementation, Functional Implementation, Strategic evaluation review and control.	L1, L2	7

*\*Bloom's Level: L1-Knowledge;L2-Comprehension;L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA 4302	<b>DATA MINING</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Every business organization is realizing the importance of data. They are harnessing the benefits offered by Data Mining as it allows them to see hidden patterns from the data and helps in framing business policies. This course emphasizes on utilizing the techniques offered by Data Mining.

### Course Objectives

This course enable students to:

1. Understand the basic concepts, principles, methods, implementation techniques, and applications of data mining, with a focus on major data mining functions such as cluster analysis.
2. Develops skills to use data mining software and other data mining techniques to solve business problems.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Evaluate and implement a wide range of emerging and new technologies to facilitate the knowledge discovery.

CO2: Assess raw input data, and process it to provide suitable input for a range of data mining algorithms.

CO3: Compare and evaluate different data mining techniques like classification, prediction, clustering and association rule mining

CO4: Discover and measure interesting patterns from different kind of databases.

CO5: Determine data mining functionalities.

CO6: Identify appropriate data mining algorithms, and apply and interpret and report the output appropriately.

CO7: Describe complex data types with respect to spatial and web mining

CO8: Analyze data using the powerful data mining tool Weka.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction to Data Mining</b> What is data mining? Related technologies - Machine Learning, DBMS, OLAP, Statistics, Data Mining Goals, Stages of the Data Mining Process, Data Mining Techniques, Knowledge Representation Methods, Applications, Example: weather data, Data Warehouse and DBMS, Multidimensional data model, OLAP operations, Example: loan data set. Data cleaning, Data transformation, Data reduction, Discretization and generating	L1, L2	6

concept hierarchies, Installing Weka 3 Data Mining System, Experiments with Weka - filters, discretization		
<b>Module II: Data mining knowledge representation and Attribute oriented Analysis</b> <b>Data mining knowledge representation</b> Task relevant data, Background knowledge, Interestingness measures, Representing input data and output knowledge, Visualization techniques, Experiments with Weka – visualization. <b>Attribute oriented Analysis:</b> Attribute generalization, Attribute relevance, Class comparison, Statistical measures, Experiments with Weka - using filters and statistics.	L2, L3	7
<b>Module III: Data mining algorithms</b> <b>Association rules:</b> Motivation and terminology, Example: mining weather data , Basic idea: item sets, Generating item sets and rules efficiently, Correlation analysis, Experiments with Weka - mining association rules <b>Classification:</b> Basic learning/mining tasks, Inferring rudimentary rules: 1R algorithm, Decision trees, Covering rules, Experiments with Weka - decision trees, rules <b>Prediction:</b> The prediction task, Statistical (Bayesian) classification, Bayesian networks, Instance-based methods (nearest neighbor), Linear models, Experiments with Weka - Prediction	L1, L2, L3	7
<b>Module IV: Cluster Analysis: Concepts and Methods</b> Basic issues in clustering, First conceptual clustering system: Cluster/2, Partitioning methods: k-means, expectation maximization (EM), Hierarchical methods: distance-based agglomerative and divisible clustering, Density Based, Grid based Methods, Conceptual clustering: Cobweb, Experiments with Weka - k-means, EM, Cobweb	L1, L2, L3	8
<b>Module V: Advanced techniques- Data Mining software and applications</b> Text mining: extracting attributes (keywords), structural approaches (parsing, soft parsing), Bayesian approach to classifying text, Web mining: classifying web pages, extracting knowledge from the web, Data Mining software and applications	L1, L2, L3	8

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4303	<b>PREDICTIVE ANALYTICS-I MACHINE LEARNING USING R</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers fundamental and applied evidence based knowledge to improve professional practice of students. It provides a detailed understanding of both supervised and unsupervised learning as it is vital for a data scientist. This course offer insight on text mining using “tidytext.”

### Course Objectives

The objective of this course is to:

1. Facilitate an introduction to machine learning techniques using several popular algorithms.
2. Internalize a core set of practical and effective machine learning methods and concepts, and apply them to solve some real world problems.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain and apply a set of unsupervised learning concepts and methods, classification methods of increasing complexity (rules, trees, random forests), and associated optimization methods (gradient descent and variants)

CO2: Explain the common idioms of large-scale graph analytics, including structural query, traversals and recursive queries, PageRank, and community detection

CO3: Apply the popular algorithms of machine learning using R

CO4: Analyze and interpret the results using specific statistical tools and techniques in R.

Modules	Blooms level*	Number of hours
<b>MODULE 1:</b> Linear Methods for Regression and Classification: Overview of supervised learning, Linear regression models and least squares, Multiple regression, Multiple outputs, Subset selection, Ridge regression, Lasso regression , Linear Discriminant Analysis , Logistic regression, Perception learning algorithm	L1, L2,L3,L4	8
<b>MODULE 2:</b> Model Assessment and Selection: Bias, Variance, and model complexity, Bias-variance trade off, Optimism of the training error rate, Estimate of In-sample prediction error, Effective number of parameters, Bayesian approach and BIC, Cross- validation, Boot strap methods, conditional or expected test error	L1, L2,L3,L4	7
<b>MODULE 3:</b> Additive Models, Trees and Boosting: Generalized additive models, Regression and classification trees, Boosting methods-exponential loss and AdaBoost, Numerical Optimization via gradient boosting	L1, L2,L3,L4	7

<b>MODULE 4:</b> Neural Networks (NN), Support Vector Machines (SVM), and K-nearest Neighbor: Fitting neural networks, Back propagation, Issues in training NN, SVM for classification, Reproducing Kernels, SVM for regression, K-nearest –Neighbour classifiers (Image Scene Classification)	L1, L2,L3,L4	7
<b>MODULE 5:</b> Implementation of following methods using R Simple and multiple linear regression, Logistic regression, Linear discriminant analysis, Ridge regression, Cross-validation and boot strap, Fitting classification and regression trees, K-nearest neighbours, Principal component analysis, K-means clustering	L1, L2, L3,L4	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

BUA4304	<b>PREDICTIVE ANALYTICS-II MACHINE LEARNING USING PYTHON</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course offers the specialization of Python starting with data strategy. This course covers the two core paradigms that account for most business applications of predictive modeling: classification and prediction. It also covers the use of partitioning to divide the data into training data (data used to build a model), validation data (data used to assess the performance of different models, or, in some cases, to fine tune the model) and test data (data used to predict the performance of the final model).

### Course Objectives

The objective of this course is to:

1. Facilitates a good learning to students on how to make meaningful predictions for a wide range of business purposes.
2. Provide provides a sufficient understanding on development of statistical models and how to devise data-driven workflows.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Apply data science techniques to extract insights from a wide range of data sources and to provide an assessment basis for predictive models. Also, students shall be able to explain how ensemble models improve predictions

CO2: Visualize and explore data to better understand relationships among variables

CO3: Identify and implement appropriate performance measures for predictive models with popular algorithms

Modules	Blooms level*	Number of hours
<b>MODULE 1:</b> Data Cleaning: Reading the data – variations and examples, Data frames, Delimiters, Various methods of importing data in Python: csv method, open method in Python, reading data from a URL, reading .xls or .xlsx files, Reading from an .xls or .xlsx file, Writing to a CSV or Excel file. Handling missing values, Creating dummy variables, Visualizing a dataset by basic plotting, Scatter plots, Histograms, Boxplots	L1, L2, L3, L4	8
<b>MODULE 2:</b> Data Wrangling: Subsetting a dataset, Selecting columns, Selecting rows, Selecting a combination of rows and columns, Creating new columns, Generating random numbers and their usage, Seeding a random number, Generating random numbers following probability distributions, Probability density	L1, L2, L3	7

function, Cumulative density function, Uniform distribution, Normal distribution, Using the Monte-Carlo simulation to find the value of pi, Geometry and mathematics behind the calculation of pi, Generating a dummy data frame, Grouping the data: aggregation, filtering, and transformation		
<b>MODULE 3:</b> Statistical Concepts for Predictive Modelling, Random sampling and the central limit theorem, Hypothesis testing, Null versus alternate hypothesis, Linear Regression with Python: Understanding the math behind linear regression, Linear regression using simulated data, Fitting a linear regression model and checking its efficacy, Finding the optimum value of variable coefficients ,Making sense of result parameters, p-values, F-statistics, Residual Standard Error, Implementing linear regression with Python, Linear regression using the stats model library, Multiple linear regression, Multi-collinearity, Variance Inflation Factor, Model validation, Training and testing data split , Handling categorical variables, Transforming a variable to fit non-linear relations	L1, L2,L3,L4	7
<b>MODULE 4:</b> Logistic Regression with Python, Linear regression versus logistic regression, Understanding the math behind logistic regression, Contingency tables, Conditional probability, Odds ratio, Moving on to logistic regression from linear regression, Estimation using the Maximum Likelihood Method, Likelihood function: Log likelihood function, Building the logistic regression model from scratch, Making sense of logistic regression parameters, Wald test, Likelihood Ratio Test statistic, Chi-square test, Implementing logistic regression with Python, Processing the data, Data exploration, Data visualization, Creating dummy variables for categorical variables, Feature selection, Implementing the model, Model validation and evaluation, Cross validation, Model validation, The ROC curve, Confusion matrix.	L1, L2,L3,L4	7
<b>MODULE 5:</b> Trees and Random Forests with Python: Introducing decision trees, A decision tree Understanding the mathematics behind decision trees, Homogeneity, Entropy, Information gain, ID3 algorithm to create a decision tree, Gini index, Reduction in Variance, Pruning a tree, Handling a continuous numerical variable, Handling a missing value of an attribute, Implementing a decision tree with scikit-learn, Visualizing the tree, Cross-validating and pruning the decision tree, Understanding and implementing regression trees, Regression tree algorithm, Implementing a regression tree using Python, Understanding and implementing random forests, The random forest algorithm, Implementing a random forest using Python, Why do random forests work?, Important parameters for random forests	L1, L2, L3,L4	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4305	<b>BIG DATA ANALYTICS- HADOOP</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course familiarizes the students on how to perform analytical operations on structured and unstructured data to gain insights from data processed through Hadoop. This offers a specialization on Big Data Platform and its use cases providing an overview of Apache Hadoop.

### Course Objectives

The objective of this course is to:

1. Equip students with the concepts of how to use Pig, Hive, and Impala to practice and examine tremendous datasets stored in the HDFS, and use Sqoop and Flume for data ingestion.
2. Provide applications on components of Hadoop and Hadoop Eco-System such as Hadoop Cluster Architecture, Important Configuration files in a Hadoop Cluster, Data Loading Techniques, how to setup single node Hadoop clusterl installation of VM player and Hadoop, Important Configuration files in a Hadoop Cluster, Linux commands, Importing Hadoop Jars, Data Loading Techniques

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Identify Big Data and its Business Implications

CO2: Access and Process Data on Distributed File System

CO3: Manage Job Execution in Hadoop Environment

CO4: Develop Big Data Solutions using Hadoop Eco System

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Big Data</b> Definition of Big Data, The 5 V's of Big Data(Volume, Variety, Velocity, Veracity, Value), Comparison of Traditional Data with Big Data, Management of Big Data, Analyzing Big Data, and Technology Challenges for Big Data. Big Data Sources, Big Data Applications, Big Data Architecture	L1, L2,L3	8
<b>MODULE 2: Technologies for Handling Big Data</b> Introduction to Traditional RDBMS, OLTP, OLAP, Data Mining, Data Warehouse, Basic SQL Commands and queries: CREATE, INSERT, DELETE, UPDATE, SELECT Cloud Computing : Definition, Characteristics, Applications, Deployment Model, Service Models	L1, L2,L3	7
<b>MODULE 3:Distributed Computing Using Hadoop</b>	L1,	7

Introduction, Hadoop Framework, Hadoop Distributed File System, Map Reduce, Hive, Pig Sample Map Reduce Application, HIVE language capabilities, Pig Language capabilities, HIVE query examples, Pig Scripts examples	L2,L3	
<b>MODULE 4: Big Data in Business</b> Case Studies: Big Data in Marketing, Retail Hospitality, Customer Services, Decision Support using Big Data. Developing a Big Data Strategy/ Defining a Big Data strategy for your organization, Big Data Platform for Internet of Things	L1, L2,L3	7
<b>MODULE 5: Visualization and Analytics</b> Visualizations - Visual Data Analysis Techniques - Interaction Techniques; Systems and Analytics Applications - Analytics using Statistical packages-Approaches to modeling in Analytics – correlation, regression, decision trees, classification, association-Intelligence from unstructured information	L1, L2, L3	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

BUA4306	<b>FINANCIAL DECISION ANALYSIS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Financial decision making involves analyzing the financial problems that the company faces and deciding which course of action should be taken. In order to make financial decisions, you must be able to identify potential financial problems and analyze the effects of alternative courses of action.

### Course Objectives

This course provides a specialization on financial tools to apply to decision-making within organizations. The course helps the student to

1. Develop a range of financial analysis skills through a combination of class discussions and analyses of case studies of specific organizations.
2. Demonstrates the complex relationships between finance, impact, strategy, and governance in business organizations.

### Course Outcomes

By the end of the course the participants should be better able to:

CO1: Explain how organisations make value optimising financial decisions, and reflectively and critically assess the ethical issues arising from these decisions.

CO2: Critically analyse and evaluate various financial models and decision making techniques and their impact on different constituencies of stakeholder. Apply financial analysis skills in the facilitation of strategic decision making.

CO3: Review Assess the features of alternative and diverse sources of finance and critically evaluate their appropriateness under different circumstances and evaluate elements of risk, return and value in a range of strategic operational financial decisions and understand the implications in regulatory and governance terms of the consequences of doing so.

Modules	Blooms level*	Number of hours
<b>Module I : Financial governance: objectives and environment</b> The role of shareholder wealth maximisation in modern financial management, Shareholder v stakeholder perspectives, Role of the finance , function Balancing risk and return, Shareholder wealth maximisation and ethical behaviour Ethics and the finance function, Corporate Governance : Corporate Governance and the agency problem, Financial aspects of the Indian Corporate Governance Code New public management, Listing requirements in the Stock Exchanges.	L1,L2, L3	5

<p><b>Module II: Management performance measurement</b>  Financial ratio analysis – Profitability – Efficiency – Liquidity - Investment performance. Operating, Financial and Combined Leverage. Financial distress and insolvency, including the use of financial ratios based on univariate and multivariate analysis to predict financial failure. Analysis of Risk and Uncertainty in Capital Budgeting, Description and Measurement of Risk; and Risk Evaluation Approaches. Risk and Return - Conceptual Framework of Risk and Return: Type of Risks; Risk and Return of a Single Asset; Risk and Return of Portfolio (only two asset portfolio); Portfolio Selection; and Capital Asset Pricing Model (CAPM)</p>	L1, L2, L3	6
<p><b>Module III:-Making distributions to shareholders</b>  Dividend policy and shareholder wealth – Traditional v Modigliani and Miller arguments Reasons for the importance of dividends, Factors determining the level of dividends Scrip dividends, Special dividends and share buybacks, Tax Aspects associated with Dividend Decision</p>	L1, L3	6
<p><b>Module IV: - Long term investment decisions</b>  The nature of investment decisions - Investment appraisal methods - Payback period (including discounted payback period) - Accounting rate of return - Net present value - Internal rate of return – MIRR – XIRR- CAGR, Investment opportunities and risk - Risk and Return preferences of investors. Risk appraisal methods – Sensitivity analysis – Scenario analysis –Simulations - Expected net present value - Risk-adjusted discount rate.  <b>Shareholder value analysis:</b> Shareholder value and the need for new forms of measurement-Shareholder value analysis and net present value -Comparison of shareholder value analysis and Economic value added -Total shareholder return (TSR) and market value added (MVA) , Cash Value added, Market to Book Value , Evaluation of the shareholder value approach. <b>Analysis of securities:</b> Cost method and market method. Equity method of accounting and analysis of minority interest.</p>	L1, L3, L4	7
<p><b>Module V: Business combinations and share valuation</b>  <b>Business Valuation:</b> Conceptual Framework of Valuation; Approaches/Methods of Valuation; and other Approaches to Value Measurement,  <b>Corporate Restructuring:</b> Conceptual Framework; Financial Framework; Tax Aspect of Amalgamation; Merger and Demergers; Legal and Procedural Aspects of Mergers/Amalgamations and Acquisition/Takeovers; and other forms of Corporate Restructuring. Economic rationale for mergers and acquisitions, forms of purchase consideration with DCF model. <b>Option Valuation:</b> Concept and Types of Options; Option Payoffs; Call Option Boundaries; Factors Influencing Option Valuation; and The Black-Scholes Option Pricing Model. <b>Valuation and forecasting</b> - Valuation models: Asset based models, DCF models and abnormal earnings or Edwards-Bells-Ohlson model. Forecasting models: Extrapolative models and index models, Forecasting with disintegrated data,</p>	L1, L3, L4	5

Comparison with financial analysts' forecast.		
<b>Module VI: Capital markets and long-term financing decisions</b> Financial markets and institutions-The role of the Stock Exchange Advantages and disadvantages of a Stock Exchange listing Stock market efficiency – Long term sources of financing – Shares– Debts - Debentures – Personal financing -		7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4307	<b>VISUAL ANALYTICS- TABLUE /POWER BI</b>	L	T	P	C
Version 1.1	Latest Approved	1	0	2	2
Pre-requisites/ Exposure					
Co-requisites					

### Catalog Description

This course familiarizes the students on data visualization tools. This course is designed to provide a fundamental and strategic understanding on the concepts of Business Intelligence using Tablue.

### Course Objectives

The objective of this course is to:

1. Equip students with the concepts of BIs and its types and how to connect to and import data, author reports using Power BI Desktop, and publish those reports to the Power BI service
2. Emphasize on how to create dashboards and share with business users—on the web and on mobile devices

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Connect, import, shape, and transform data for business intelligence (BI)

CO2: Visualize data, author reports, and schedule automated refresh of your reports

CO3: Create and share dashboards based on reports in Power BI desktop and Excel

CO4: Use natural language queries and create real-time dashboards

Modules	Blooms level*	Number of hours
<b>MODULE 1: Tableau:</b> Introduction, Getting Started with Tableau, Connecting to Data, Data Prep with Excel, Overview of the Tableau User Interface, Working with Discrete vs. Continuous Data, Calculated fields <b>Power BI:</b> Understanding key concepts in business intelligence, data analysis, and data visualization, Importing data and automatically creating dashboards from services such as Marketo, Salesforce, and Google Analytics, Connecting to and importing your data, then shaping and transforming that data, Enriching your data with business calculations.	L1, L2,L3	8
<b>MODULE 2: Tableau:</b> Introduction to data visualization, the evolution of the BI industry, Understanding the business value of visual analytics, Data visualization best practices (overview), Power BI: Visualizing your data and authoring reports, Scheduling automated refresh of your reports, Creating dashboards based on reports and natural language queries, Sharing dashboards across	L1, L2,L3	7

your organization, Consuming dashboards in mobile apps		
<b>MODULE 3: Tableau:</b> Basic charts, Design considerations for effective data visualization, Human cognition and visual perception, Using Maps to Visualize Spatial Data, <b>Power BI:</b> Leveraging your Excel reports within Power BI, Creating custom visualizations that you can use in dashboards and reports, Collaborating within groups to author reports and dashboards, Sharing dashboards effectively based on your organization's needs.	L1, L2, L3	7
<b>MODULE 4: Tableau:</b> The visual storytelling framework, the business value of visual stories, Creating dashboards and story points, Formatting worksheets and dashboards. <b>Power BI:</b> Exploring live connections to data with Power BI, Connecting directly to SQL Azure, HD Spark, and SQL Server Analysis Services, Introduction to Power BI Development API, Leveraging custom visuals in Power BI	L1, L2, L3	7
<b>MODULE 5:</b> Common pitfalls of data visualization, Common pitfalls of data narratives, Share and critique an example of a data visualization, Provide your Tableau Public URL, Share data visualization on Tableau Public, Building a Dashboard in Tableau and Power BI, Develop a data story pitch	L1, L2, L3	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

BUA4335	<b>SUMMER INTERNSHIP EVALUATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Latest Approved	0	0	0	6
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

### Course Objectives

The objective of this course is to:

1. Offer students the opportunity to apply their knowledge in real-life environments through an industry placement for eight-weeks.
2. Provided desired skills to students that will help them perform better on their jobs after graduation.

### Course Outcomes

On completion of Summer Internship, the students will be able to:

CO1: Get hands-on experience about real world problems in a field relevant to their major of studies.

CO2: Acquire confidence for employment after graduation.

CO3: Acquire skills important for time management, discipline, self-learning, effective communication and so on.

CO4: Learn practically about team-work, collaboration, and leadership.

**Credit Hours:** 6 hours

**Course Duration:** Six-Eight weeks

**Semester Offered:** Summer

<b>Format for Report Writing</b>	<b>Blooms level*</b>	<b>Number of hours</b>
1. Title of the project 2. About the organization 3. Introduction and objectives of the project/ programme / organization	L1, L2 ,L3,L4,L5,L6	6hours (Duration- 6-8 weeks during

4. Funding agency—about the agency, how to get funding, Nature of funding agency 5. Staffing pattern of the project with their functions 6. Major activities going under project 7. Results achieved so far (target Vs achievement) 8. Role of the candidate in the project/programme / organization 9. Evaluation by the candidate		summer)
--	--	---------

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

### **SIP Guidelines**

1. Every student is required to write an Internship report upon completion of their internship and required to submit two copies (student copy + department copy) of the report to concerned department HOD (along with internal marks certificate given by the company) for final evaluation and awarding of end examination marks.

2. Before submitting the report to the HOD, the student required to go through multiple rounds of revision in collaboration with the industry guide and department internship mentor/coordinator/supervisor.

The Internship Report serves multiple purposes:

- Help the student develop written communication skills.
- Serve as an archival record of the internship experience.
- Give the student an opportunity to reflect on the professional aspects of the internship experience and the skills that were learned.
- Allow the student to describe the science content of the internship.
- Have the student to reflect on the initial goals of the internship and how they were (or were not) achieved during the internship.

### **Modes of Evaluation: Presentation/Viva/ Report /Assignment Examination**

#### **Examination Scheme:**

Components	Content & Layout of Report	Conceptual Framework	Objectives & Methodology	Implications & Conclusions	Presentation
Weightage	30	10	15	15	30

CSS4351	<b>INTERPERSONAL COMMUNICATION</b>	L	T	P	Total
Version 1.1	Latest Approved	1	0	0	1
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Building our Interpersonal skills can, undoubtedly, improve our relationships socially and at workplace. How we interact and communicate with others is essential in determining how healthy our relationships will be, at work and socially. For effective communication verbal and non-verbal should align. In this course of interpersonal communication students will learn to use their body language effectively during interviews and presentations. They will also learn to participate in various discussions.

### Course Objectives

The objective of this course is to

1. Interpret students to understand non-verbal behavior and use it in various situations.
2. Improve conversational English of students.
3. Enable students to learn effective presentation skills.
4. Equip students with skills required for facing interviews and group discussions.

### Course Outcomes

On completion of this course the students will be able to:

CO1: State basics of interpersonal communication to explain and evaluate their own behavior in interpersonal communication.

CO2: Interpret their level of communication apprehension in interpersonal communication contexts.

CO3: Develop good conversational skills that will help them in social and workplace communication.

CO4: Assess skills required to participate in any formal discussions.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
Module I: Non - Verbal Communication Principles of non- verbal communication Kinesics Proxemics Paralanguage and visible code	L1, L3	4
Module II: Speaking Skills Pronunciation drills (Neutralizing regional pulls) Conversational English Guidelines to an effective presentation	L1, L3	4
Module III: Interviews and GDs Interview types and styles Guidelines for facing interview	L1, L3	4

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

(BUSINESS ANALYTICS)**

**FOURTH SEMESTER**

BUA4401	<b>TOTAL QUALITY MANAGEMENT</b>	L	T	P	C
Version 1.1		2	0	0	2
Pre-requisites/Exposure					
Co-requisites					

**Catalog Description:** This course teaches the students the methodology and system of tools aimed to create and maintain mechanism of organization's continuous improvement.

**Course Objective:**

The aim of this course is to:

1. Provide a structured learning framework to students in order that they can understand that total quality management is a philosophy, methodology and system of tools aimed to create and maintain mechanism of organization's continuous improvement.
2. Help the students to understand the main principles of business and social excellence; generate knowledge and skills to use models and quality management methodology for the implementation of total quality management in any sphere of business and public sector.

**Course Outcomes:**

On completion of the course the students will be able to:

CO1: Evaluate the principles of quality management and to explain how these principles can be applied within quality management systems.

CO2: Identify the key aspects of the quality improvement cycle and to select and use appropriate tools and techniques for controlling, improving and measuring quality.

CO3: Critically appraise the organizational, communication and teamwork requirements for effective quality management.

CO4: Critically analyze the strategic issues in quality management nationally and internationally, including current issues and developments, and use the appropriate statistical techniques to evaluate quality implementation plans.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction</b> Definition of quality, brief history, quality in manufacturing and service industries, quality and price, quality and market share, quality and cost, quality and competitive advantage Evolution of the concept of total quality management, elements of total quality management, benefits of total quality management, the Deming management philosophy, the Juran philosophy, the Crosby philosophy	L1, L2	7
<b>Module II: Organization for Quality</b> Quality objectives, quality policy, leadership for quality, quality and organization culture, cross functional teams, quality circles, suppliers/customers partnership	L1, L2	5
<b>Module III: Quality Control</b> Concept of quality control, quality assurance, concept of process	L1, L2	6

variation, sampling inspection vs. 100% inspection, acceptance sampling by attributes: Operating Characteristics (OC) curves; producer risk: AQL, RQL, TQL, AOQL Statistical Process Control: advantages of SQC, construction of control charts: X-R chart, np chart, C- chart, U chart, Pareto analysis (20/80 rule)		
<b>Module IV: Benchmarking and Kaizen</b> Benchmarking, rationale of benchmarking, approach and process, prerequisite of benchmarking, obstacles of successful benchmarking, perceptual benchmarking, concept of Kaizen, kaizen vs innovation, Kaizen practice	L1,L2	3
<b>Module V: Quality Management Systems</b> Quality certification, quality management principles, ISO 9001:2000, ISO 14000, Capability Model Maturity Integration (CMMI): Fundamentals and Concepts, quality system audit, types of quality audit	L1, L2	3

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA 4402	<b>FINANCIAL ANALYTICS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### **Catalog Description**

Every business in the industry is generating loads of financial data and they understand the significance of deriving logical inferences out of it to streamline their decision making process. Lately, accurate financial data analysis is not enough for a business to sail through. They need predictive insights which can improve their real time day to day decision making. Financial analytics helps in combining internal and external financial information by using social media and big data to provide predictive insights. Whether it is with respect to stock market prediction or customer profitability, finance analytics enables to provide a direction in predicting all. This course blends easy-to-use statistical tools with complex machine learning tools and algorithms to equip the participants with the requisite skill set in analysing data. By the end of this course, the participants should be able to perform financial analysis using powerful tools like R and Python.

### **Course Objectives**

The objective of this course is to:

1. Make students understand and diagnose the information contained in financial statement with a view to judge the profitability and financial soundness of the firm, and to make forecast about future prospects of the firm.
2. Provide understanding on diverse needs of the traditional financial department, and advancements in technology, all point to the need for financial analytics.
3. Help students to shape up the business' future goals and to improve the decision-making strategies for various business situations.
4. Emphasize on measuring and managing business' tangible assets such as cash and equipment.
5. Provides an in-depth insight into the organization's financial status and improves the cash flow, profitability, and business value.

### **Course Outcomes**

On completion of this course, the students will be able to:

CO1: Understand and interpret the financial data about the company

CO2: Forecast the firm financial position and interpret accordingly

CO3: Evaluate the financial position with the support of various financial tools like financial statement analysis, time value of money, bond valuation and valuation of the firm

CO4: Equip the requisite skill set in analyzing data in terms of finance

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module I: Introduction to Financial Analytics and Time Series Data</b> Subjective Forecasting, Business Forecasting and Time Series Data, Introduction to Financial Analytics, Forecasting Performance Measurements: Distance, Forecasting Performance Measurements: Metrics.	L1,L2,L3	7
<b>Module II: Performance Measures and Holt-Winters Model</b> Introduction to Forecasting: Average Method, Naive Method, Linear regression, R example, Moving Averages, Introduction to Exponential Smoothing, Simple Exponential Smoothing, R example on Simple exponential smoothing, Holt's Exponential Smoothing, Holt-Winter's Forecasting Model, Holt-Winter's Model: R Example, Autoregression: Introduction, Autoregression: R Example	L1, L2, L3,L4, L6	8
<b>Module III : Financial Statement Analysis</b> Balance Sheet, Income Statement, Cash Flow Statement, Understanding the Financial Statements and their interlinking, Financial Ratios, Ratio Analysis Present Value (single and multiple cash flows), Future Value (single and multiple cash flows), Annuity, Perpetuity, Growing Annuity. Application: Loan Amortization, Compounding the interest rate	L1, L2, L4, L6	7
<b>Module IV: Modern Portfolio Theory and Introduction to Algorithmic Trading</b> Portfolio Theory: Introduction, Expected Returns, Risk of a Security, Efficient Frontier, Portfolio Weights, Capital Allocation Line, Diversification, Introduction to Algorithmic Trading, Trend Following Strategy, Backtesting, R Example	L1, L2, L3,L4	7
<b>Module V:Linear Regression, Predicting Binary Outcomes (Credit Prediction)</b> Single and Multiple Linear Regression, Modelling and Prediction (Examples using financial data), Logistic Regression, Multiple Logistic Model, Historical Simulation, Simple Variance based approach, Risk Metrics, Monte Carlo Simulation, Value-at-Risk Estimation and Backtesting	L1, L2, L3,L4	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4403	<b>SUPPLY CHAIN ANALYTICS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course provides foundational knowledge associated with the operations analytics. The course offers insights on the various tools and techniques for implementation of analytics based on the supply chain drivers such as location, logistics and inventory.

### Course Objectives

The objective of this course is to:

1. Manage uncertainty and risk within supply chain management
2. Segment different customers, products, and channels and design an optimal portfolio of logistics approaches and strategies for these various segments
3. Understand the appropriate forecasting methodology for each segment

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Describe the various techniques for analytics based on the Multi Attribute Decision Making (MADM) and risk.

CO2: Identify the inventory techniques for analytics and the different network models.

CO3: Analyze the inventory using aggregate production model.

CO4: Illustrate the transportation problems for analytics in network design.

CO5: Analyze the different dimensions using Analytic Hierarchy Process.

Modules	Blooms level*	Number of hours
Module I: Warehousing Decisions, Mathematical Programming Models, P-Median Methods, Guided LP Approach, Balmer – Wolfe Method, Greedy Drop Heuristics, Dynamic Location Models, Space Determination and Layout Methods.	L1, L2	7
Module II: Inventory Management, Inventory aggregation Models, Dynamic Lot sizing Methods, MultiEchelon Inventory models, Aggregate Inventory system and LIMIT, Transportation Network Models, Notion of Graphs, Minimal Spanning Tree.	L1, L2	8
Module III: Shortest Path Algorithms, Maximal Flow Problems, Multistage Transshipment and Transportation Problems, Set covering and Set Partitioning Problems, Traveling Salesman Algorithms, Advanced Vehicle Routing Problem Heuristics, Scheduling Algorithms-Deficit function Approach and Linking Algorithms.	L1, L2	6

Module IV: Analytic Hierarchy Process, Data Envelopment Analysis, Risk Analysis in Supply Chain, Measuring transit risks, supply risks, delivering risks	L1,L2	5
Module V: Risk pooling strategies, Fuzzy Logic and Techniques-Application in SCM	L1, L2	6

<b>BUA4404</b>	<b>HR ANALYTICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

### **Catalogue Description:**

Developing the right HR metrics and analytics for your specific context which support long-term performance and improving the decision making is a key competitive edge in the modern economy. HR is increasingly difficult in an era of talent wars, complex environments and a deluge of information.

### **Course Objective:**

The course aims to:

1. Give students a good understanding on the concepts and techniques of human resource analytics.
2. Familiarize the students on how to prepare HR reports and identify decision technologies.
3. Develop a structured approach among students to apply judgment, and generate insight from data for enhanced decision making.

### **Course Outcomes:**

On successful completion of the course a student will be able to:

CO1. Explain internal and external human resource metrics benchmarks and indicators.

CO2. Reproduce knowledge on relational databases and make recommendations regarding the appropriate HRIS to meet organization's human resource needs.

CO3. To identify appropriate software to record, maintain, retrieve and analyze human resources information (e.g., staffing, skills, performance ratings and compensation information).

CO4. To describe both the quantitative and qualitative analysis to understand trends and indicators in human resource data.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module I: Introduction to HR Analytics</b> Basics of HR Analytics: Concept and Evolution of HR Analytics & data sources - HCM: 21Model, Use of workforce analytics to improve decision making, Analytics and Prediction, Introduction to HR Metrics and predictive analytics, Importance of HR Analytics, Data Analytic techniques using software packages, Future of Human Resource Analytics. HR Metrics and HR Analytics; Intuition versus analytical thinking.	L1, L2	7
<b>Module II: Creating business understanding for HR initiatives</b>	L1, L2	6

Workforce segmentation and search for critical job roles; Statistical driver analysis – association and causation; Linking HR measures to business results; choosing the right measures for scorecards; Identifying and using key HR Metrics.		
<b>Module III:Forecasting budget numbers for HR costs</b> Workforce planning including internal mobility and career pathing; training and development requirement forecasting and measuring the value and results of improvement initiatives; optimizing selection and promotion decisions	L1, L2	8
<b>Module IV:Predictive modelling in HR</b> Employee retention and turnover; workforce productivity and performance; scenario planning.	L1,L2	6
<b>Module V:Communicating with data and visuals</b> Data requirements; identifying data needs and gathering data; HR data quality, validity and consistency; Using historical data; Data exploration; Data visualization; Association between variables; Insights from reports; Root cause analysis of HR issues	L1, L2	4

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### Catalog Description

This course provides an understanding on the use of analytics in Marketing Management. The course offers insights to the students on the use of predictive analysis in decision making. The course familiarizes the students on the concept of the market place, various segments of products and services in the markets, and changing consumer needs in the markets.

### Course Objectives

The objective of this course is to

1. Develop the ability to critically evaluate business problems and to determine the most appropriate analytical technique address marketing problems.
2. Acquaint the students to develop and implement the marketing strategy by providing a framework from which to identify and evaluate strategic options and programs.
3. Enable students to solve real-world marketing problems across a wide range of industries, giving them a competitive edge.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Identify various methods followed build CRM practices and various positioning strategies followed by the companies.

CO2: Contrast the characteristics of industrial and consumer goods.

CO3: Identify and apply the various techniques of predictive analysis in the different market situations.

CO4: Explain the need for digital evolution in marketing.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module 1: Introduction to Marketing</b> Understanding the marketplace and consumer needs, Designing a Customer Driven Marketing Strategy, Building Customer Relationships, Consumer Behaviour and Business Buyer Behaviour	L2,L5	7
<b>Module 2: Marketing Strategy</b> Market Segmentation and Product Positioning, Market Segmentation, Market Targeting, Target Market Strategies, Product Positioning and Differentiation, Choosing a Differentiation and Positioning Strategy.	L1, L4	8
<b>Module 3: Product and Service</b> Products and services, product and service classifications, consumer products, industrial products, product and service decisions, product	L2,L4	7

and service attributes, product support services, services marketing – the nature and characteristics of a service.		
<b>Module 4: Retail Analytics – I</b> Customer Analytics Overview; Quantifying Customer Value, Using Stata for Basic Customer Analysis, Predicting Response with RFM Analysis, Statistics Review, Predicting Response with Logistic Regression, Predicting Response with Neural Networks, Predicting Response with Decision Trees.	L2,L3, L5	6
<b>Module 5: Retail Analytics – II</b> The digital evolution of retail marketing, Digital natives, Constant connectivity Social interaction, Predictive modelling, Keeping track, Data availability, Efficiency optimization.	L2,L4	8

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4406	<b>DATA PRIVACY AND DATA SECURITY LAWS</b>	L	T	P	C
Version 1.1	Latest Approved	2	0	0	2
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course is designed to familiarize the students with the basic concepts of data privacy issues and security laws including current and proposed laws and regulations that govern data security and privacy.

### Course Objectives

The objective of this course is to:

1. Provide the foundational knowledge based on data security investigation and data policy questions concerning the value of data security and data privacy regulations.
2. Emphasize on the real world effects of data breaches on individuals and businesses.
3. Provide an understanding on how to secure data and balancing of interests among individuals, government, and enterprises from the technical and legal perspective.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain the fundamental concepts of data security and security laws.

CO2: Explain the business needs for data privacy and security investigation.

CO3: Assess the risk for data security.

CO4: Identify the legal, professional and ethical issues related to data.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Data Security</b> History of data security, Meaning of data Security and data privacy, Critical Characteristics and components of Data security, Need for Security, Business Needs, Threats, Attacks, Meaning of term personal data, data processing, data protection, NSTISSC Data Security Model, Balancing Security and Access to data, The SDLC model, The Security SDLC	L1, L2	6
<b>MODULE 2: Introduction to Data Security Laws</b> Introduction of the General Data Protection Regulation (GDPR), rationale for the introduction of the GDPR , primary objectives of the General Data Protection Regulation, scope of data processing activities covered by the GDPR, territorial scope of the GDPR regarding the location of personal data processing and data subjects, GDPR impact on Indian Companies, Data protection Laws in India	L1, L2	6

<b>MODULE 3: Data Privacy: Legal Issues and Landscape</b> Development of Privacy Laws (historical and legal context), Fair Information Principles, The Statutory Landscape in the US, Indian IT Act, Adjudication under Indian IT ACT, IT Service Management Concept, IT Audit standards, ISO/IEC 27000 Series, COBIT, HIPPA, SOX, System audit, Information security audit, ISMS, SoA (Statement of Applicability), BCP (Business Continuity Plan), DR (Disaster Recovery), RA (Risk Analysis/Assessment)	L1, L2	6
<b>MODULE 4: Data Security Analysis and Risk Management</b> <b>Risk Management:</b> Identification, Assessment and controlling of Risk <b>Logical Design:</b> Blueprint for Security, Information Security Policy, Standards and Practices, ISO17799/BS 7799, NIST Models, VISA International Security Model, Design of Security Architecture, Planning for Continuity <b>Physical Design:</b> Security Technology, IDS, Scanning and Analysis Tools, Cryptography, Access Control Devices, Physical Security, Security and Personnel	L1, L2	6

BUA4437	<b>DISSERTATION (ANALYTICS PROJECT)</b>	L	T	P	C
Version 1.1		0	0	0	6
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Under this, it is usual to give the student some discretion in the choice of topic for the dissertation and the approach to be adopted. The dissertation topic is related to the field of specialization. Deciding this is often the most difficult part of the dissertation process, and requires thorough preparation and background research.

The aim of the dissertation is to provide the students with an opportunity to further their intellectual and personal development in their chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of their degree.

### Course Objectives

The objective of this course is to:

1. Understand and apply theoretical frameworks to the chosen area of study.
2. Produce a coherent and logically argued piece of writing that demonstrates competence in research and the ability to operate independently.

### Course Outcomes

On completion of Dissertation, the students will be able to

CO1: Describe a relevant area of career development, career coaching, coaching or work-related learning studies.

CO2: Identify research methods and state research questions.

CO3: Critically analyze and evaluate the knowledge and understanding in relation to the agreed area of study.

CO4: Integrate theory and practice for the development of responses on the basis of the evaluation and analysis undertaken.

CO5: Communicate in written form by integrating, analyzing and applying key texts and practices.

CO6: Demonstrate advanced critical research skills in relation to career development or work-related learning studies.

<b>Planning the dissertation</b>	<b>Blooms level*</b>	<b>Number of hours</b>

### Course Catalogue:

Human Resource Management links people-related activities to business strategy. The course develops a critical understanding of the role and functions of the various human resource activities in an organisation, providing students with a comprehensive review of key HRM concepts, techniques and issues.

### Course Objective:

The course aims to:

1. The objective of this course is to help the students develop an understanding of the management of human resources, with particular reference to HR functions like recruitment, selection, training, development and appraisal.
2. To help the students focus on and analyze the issues and strategies required to develop effective compensation structures.
3. To give students an overview of human resource information system (HRIS), HR Audit, cross- cultural practices in HR and managing diversity.

### Course Outcomes:

On completion of the course the students will be able to:

CO1: Understand the processes of acquisition, performance management, retention, reward strategy and training and development.

CO2: Reproduce the contemporary knowledge in basic and strategic HR issues, nationally & internationally that are suggested through the latest research findings.

CO3: Explain HR strategies that will be aligned with the overall organizational strategies and serve the long-term interests of the firm.

CO4: Define a strategic direction, particularly in relation to people and to embed operational plans.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module I:</b> Human Resource Management in Perspective Nature and scope of HRM, HRM functions, HRM models, understanding concepts of Personnel Management, Human Resource Development and Strategic Human Resource Management, HR Environment, Changing Role of HR.	L1,L2	7
<b>Module II:</b> Meeting Human Resource Requirements Job Analysis, Job Description, Strategic Human Resource Planning, Recruitment, Selection Process, Methods – Interview, Tests, Placement and Induction	L1, L2	6
<b>Module III:</b> Training & Developing of Employees Training and Development, Understanding of Performance	L1, L2	8

Management Systems, Potential Appraisal, Career Development		
<b>Module IV:</b> Managing Compensation Job evaluation, Methods of Job Evaluation, Strategic Compensation, Equity Theory, Components of Pay Structure, Designing and Administration of Wage and Salary Structure, Wage Regulations in India	L1,L2	6
<b>Module V:</b> Employee Relations Overview of Industrial Relations, Industrial disputes, Collective Bargaining, Workers Participation and Management, Grievance handling	L1, L2	4
<b>Module VI:</b> Emerging Trends in HRM Overview of Human Resource Information System (HRIS), Introduction to HR Audit, IHRM Practices, Cross- Cultural and Diversity Management, Work-life integration, Human Resource Outsourcing	L1, L2	5

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### Catalog Description

In this course the students will learn the concepts of computer evolution, database management systems, networking fundamentals, e-commerce, electronic data interchange, electronic payment systems and security issues related to computer systems. The aim of this course is to make the students familiar with the basic concepts of Information Technology and E-commerce.

### Course Objectives

This course will enable students to:

1. Grasp the latest developments in computer technology and understand the working of a computer system.
2. Understand various technologies like internet, telecom & networking, DBMS concepts, e-commerce etc.
3. Grasp the latest trends in e-business models, electronic payment systems and data & information security.

### Course Outcomes

On completion of this course, the students will be able to

CO1: State the strategic use of Information Technology in Business and differentiate between functional and cross functional information systems.

CO2: Describe the concepts related to databases and networking.

CO3: Apply the knowledge of Information Technology in managing the broad array of responsibilities in the business organization.

CO4: Design the e-commerce website for various e-business organization using e-commerce models.

CO5: Review and assess the organization's data and network security aspects.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module I: Modern Computer Systems</b> Evolution of Computer Systems, Input, output and storage technologies, Computer Assisted Control and Automation, (e.g. Delhi Metro , Digitally Controlled Car engines etc.), Computer Controlled Biometric/RFID based Access Control , Contemporary hardware and software platforms(Open Source, Web Software etc.), Storage of Data Resources	L1, L2	6

<b>Module II: Data Resource Management</b> Introduction to DBMS, Benefits of DBMS over traditional file system, Types of DBMS, Application of DBMS using MS-ACCESS / ORACLE as a tool for understanding of DBMS concepts. SQL Query handling, Forms, Concept of Data Warehouses and Data Marts, Introduction to Data Centers. Storage Technologies and Architecture (DAT, NAS, SAN etc. ). Live examples of storage strategies of companies like Google, Amazon Wal-Mart dealing with storage crisis	L2, L3	6
<b>Module III: Telecommunications and Computer Networks</b> Networked Enterprise :- Components, Types of networks, Advantages of Network Environment, Business Uses of Internet, Intranet and Extranet, Network Topologies, Web 2.0/3.0, Distributed/Cloud/Grid Computing, GSM & CDMA, GPRS ,Features of 3G & 4G technologies, VOIP and IPTV.	L1, L2	6
<b>Module IV: Electronic Commerce Systems</b> Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services.	L1, L2	6
<b>Module V: E-Commerce Business Models &amp; EDI</b> Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI. Various business models in Ecommerce like B2C, B2B, C2C.	L1, L2, L5	6
<b>Module VI: E-Payment Systems and Security Management</b> Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards. The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software, Hacking etc.) and counter measure. Definition of Cyber Crime and Types. Antivirus, Firewalls, Anti-Spyware, Security Audit, Discussion on Overview of IT-ACT 2000.	L1, L2, L6	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Marketing management emphasizes upon the practical aspects of marketing concepts and management functions performed by professionals. This is a beginner's course in Marketing and shall cover the basics. The course helps in developing an understanding of the challenges of marketing management in manufacturing and service industries: analyzing marketing environments; evaluating strategic alternatives and designing and implementing marketing programmes involving decisions about products/services, pricing, distribution and promotion. The course serves to familiarize participants with basic marketing concepts, environment, strategies and methodology.

### Course Objectives

The objectives of this course are to:

1. Provide the students exposure to modern marketing concepts, tools and techniques.
2. Enhance student's knowledge to prepare for general management responsibilities by focusing on the input of the marketing perspective across all functions.
3. Explain different consumer-specific characteristics as well as certain psychological processes influencing buying behavior.
4. Provide different dimensions of marketing such as STP, business environment, distribution channels, marketing communication, and social media marketing to enable the students to design and analyze the functional aspects in emerging market.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Define the holistic marketing efforts to develop, design and implement marketing programs. They will also be able to examine challenges, responsibilities, and risks managers face in today's workplace.

CO2: Illustrate a comprehensive knowledge about how values are created, communicated and delivered to the target audiences.

CO3: Explain how to control the elements of the marketing mix—product policy, channels of distribution, communication, and pricing—to satisfy customer needs profitably

CO4: Design strategic approaches to manage different marketing dimensions in uplifting the consumer as well as business market.

CO5: Describe the marketing communication and its applicability along with understanding new-age media, advertising, sales promotion, personal selling etc.

<b>Modules</b>	<b>Blooms Level*</b>	<b>Number of hours</b>
----------------	----------------------	------------------------

<b>Module I: Understanding Marketing in New Perspective</b> Fundamentals of Marketing, Customer Value and Satisfaction, Customer Delight, Conceptualizing Tasks and Philosophies of Marketing Management, Value Chain, Scanning the Marketing Environment, Marketing Mix Elements, Difference between marketing and Selling, Relationship marketing, Social marketing, Strategic Planning in marketing, formulating the marketing plan.	L1, L2	8
<b>Module II: Analyzing Consumers &amp; Selecting Markets</b> The factors influencing consumer behavior. The stages in the buying process, the buying decision making process, factors effecting the buying decision., Market Segmentations, Levels of Market Segmentations, Patterns, Procedures, Requirement for Effective Segmentation, Evaluating the Market Segments, Selecting the Market Segments, Tool for Competitive Differentiation, Developing a Positioning Strategy.	L1, L2, L4	7
<b>Module III: Managing Product &amp; Pricing Strategies</b> Classification of products, New Product development, stages of product development, Adoption process, Product mix decisions and line management, Length, width and depth of a line, line analysis, and brand management, product life cycle, stages in lifecycle and factors affecting each stage, Managing product life cycles. Setting the price, adapting the price, initiating and responding the price changes.	L1, L2, L3	7
<b>Module IV: Designing: Managing the Integrated Communication</b> Channel functions and flows. Channel design decisions. Channel management decisions. Channel dynamics; vertical horizontal and multi channel marketing systems. Market Logistics decisions. Effective Communication, Integrated Marketing Communication, Marketing Communication Process, Promotion mix, Advertising, Personal Selling, Sales Promotion and Publicity and Public Relations, Direct Marketing.	L1, L2, L3	7
<b>Module VI: Emerging Trends in Marketing</b> An Introduction to Internet Marketing, Multi Level Marketing, E-Marketing, Green Marketing, Event Marketing, Types of Events, Sponsorship, Cause Related Marketing, Marketing for Non Profit Organizations Marketing Strategies for Leaders, Challengers, Followers and Nichers.	L1, L2, L5	7

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

### **Catalog Description**

This course not only exposes the students to the theory of probability and sampling distribution but also includes the various types of statistical tools which are to be used in the present rapidly changing business environment. Its main focus is on the application of data analytic tools to enable the students to make correct decision making under the complex and dynamic business scenario. The content of the course will also include the different forecasting techniques with main focus on the quantitative technique that would be immensely beneficial for the students to make the predictions correctly. Numerous empirical examples and real business cases are used to illustrate applications of the material covered.

### **Course Objectives**

The objective of this course is to

1. Appreciate the problems of obtaining or gathering the desired information or data.
2. Learn the theoretical basis of sampling, various sampling techniques, their merits and demerits.
3. Understand the types of classification of data, representation of data in the form of diagrams, graphs or tables.
4. Appreciate the basics of central value, dispersion, skewness etc and their applications in real business problems.
5. To examine the problems related to theory of probability, various types of probability distribution and particularly Baye's theorem and their application in real-life problems.
6. Know the process of hypothesis testing for large and small samples and its uses in business problems
7. Equip with the knowledge of correlation, regression and time series; enabling them to make the correct future predictions

### **Course Outcomes**

The students will be able to:

CO1. Define types of data, representation of data, treatment of data

CO2. Classify sampling process and methods

CO3. Identify different types of probability distributions

CO4. Analyze a given business problem and applying required statistical tool accordingly

CO5. Make prediction using various forecasting techniques

<b>Modules</b>	<b>Blooms</b>	<b>Number</b>
----------------	---------------	---------------

	level*	of hours
<b>MODULE 1: Introduction</b> Application of Statistics in Business; Classification of Data; Interpretation of computer output of diagrammatic and graphical presentation of data, measures of central tendency, measures of dispersion and skewness.	L1, L2	8
<b>MODULE 2: Probability and Probability Distributions</b> Concepts of Probability, addition theorem, multiplication theorem, Baye's Theorem; continuous and discrete probability distribution: Binomial Probability Distribution, Poisson Probability Distribution and Normal Probability Distribution.	L1, L2, L3	6
<b>MODULE 3: Sampling and Sampling Distribution</b> Sampling: Basic Concept, Types of Sampling, Errors and Precautions in sampling, size of sample, Parameter and Statistic, Sampling Distribution of the mean, Sampling distribution of proportion, Estimation – point estimation, Interval Estimation,	L1, L2, L3, L4	6
<b>MODULE 4: Tests of Hypothesis</b> Null and Alternative hypothesis, One-Tailed and Two-Tailed tests of hypothesis, Type I and Type II error, rejection rule using p – Value and critical value approach. Hypothesis Testing to compare two populations: Test for one sample mean, Test for two population means (Independent Samples), Tests for two population means (Dependent Samples), Tests for two population proportions (Independent Samples), Tests for two population variances (Dependent Samples), F-test, Chi – Square Test	L1, L2, L3, L4, L5, L6	6
<b>MODULE 5: Forecasting Techniques</b> Correlation - Karl Person, Spearman's Rank methods, simple linear regression analysis – Estimated regression equation, least squares method, coefficient of determination, interpretation of computer output for Regression, Introduction to time series, trend analysis	L1, L2, L3, L4, L5, L6	6
<b>MODULE 6: Lab Work</b> Introduction to SPSS, performing univariate and bivariate analysis on SPSS	L5, L6	4

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### Catalog Description

In this course of Communication Skills, we would like students to understand the basic concepts of Communication skills and to use different tools to enhance their vocabulary and strengthen their spoken and written communication

### Course Objectives

The objective of this course is to

1. Explain students to communicate effectively by emphasizing on practical communication through refurbishing their existing language skills and also to bring one and all to a common take-off level.
2. Develop skills for effective word choice and sentence and avoid common errors in written communication.

### Course Outcomes

On completion of this course the students will be able to:

CO1: Develop competency to write and speak grammatically correct English that will enable them to communicate effectively and solve issues that arise due to miscommunication.

CO2: Apply the different models of communication to facilitate effective communication throughout the organization.

CO3: Develop the capability of customizing communication in different situations like social, legal, cultural.

CO4: Demonstrate the capability of using different tools of communication, particularly related to technology

CO5: Demonstrate the ability to effectively communicate in complex situations.

<b>Modules</b>		<b>Blooms' Level*</b>	<b>Credit Hours</b>
<b>Module 01</b>	MODULE I: INTRODUCTION Communication, Importance Principles of effective communication, Effective use of language, Language of Business, Contemporary dynamics affecting communication contingencies	L1, L3	4

### Catalog Description

This course introduces the key concepts, tools, and principles of strategy formulation and competitive analysis. It is concerned with managerial decisions and actions that affect the performance and survival of business enterprises. The course is focused on the information, analyses, organizational processes, and skills and business judgment managers must use to devise strategies, position their businesses, define firm boundaries and maximize long-term profits in the face of uncertainty and competition.

### Course Objectives

The objective of this course is to

1. Introduce students to the key concepts, tools and principles of business policy and strategic management.
2. Expand the student's capacity to integrate and appreciate the changes in the environment that shape the strategy of a business and lead to developing a competitive edge.
3. Develop the perspective of students towards understanding the culmination of different functional areas into building up of a corporate strategy.
4. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how companies use what-if analysis to evaluate action alternatives and make sound strategic decisions.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Identify and determine the various levels at which strategic decision making happens in an organization.

CO2: Analyze the internal and external environment of business that will lead to formulation of strategic plans.

CO3: Analyze the suitability of strategies that firms have developed in the real world scenario to achieve valuable outcomes.

CO4: Design strategic analysis and choice in order to determine alternative courses of action that could best enable the firm to achieve its mission and objectives.

CO5: Review of strategy implementation to gain competitive advantage.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>

EMF4203	<b>BUSINESS RESEARCH METHODS</b>	L	T	P	C
Version	Latest Version	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course will provide an opportunity for participants to establish or advance their understanding of research through critical exploration of research language, ethics, and approaches. The course introduces the language of research, ethical principles and challenges, and the elements of the research process within quantitative, qualitative, and mixed methods approaches. Participants will use these theoretical underpinnings to begin to critically review literature relevant to their field or interests and determine how research findings are useful in informing their understanding of their environment (work, social, local, global).

### Course Objectives

The course aims to

1. Provide a thorough understanding of the essential characteristics and the basic tenets of research methodology and report preparation.
2. Focus on quantitative and descriptive research methods and techniques that are essential for the validity and reliability of the research process.
3. Understand the components essential for preparation of research proposals, research reports, business proposals and feasibility studies in order to develop report writing and formal presentation skills of the research projects undertaken.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Define the nature of research methods and research methodologies

CO2: State the components and problems/constraints underlying a research project and report proposal.

CO3: Identify the suitable sampling method to market problems/constraints underlying a research project and report proposal.

CO4: Explain and apply hypothesis technique to analyze the data.

CO5: Define and analyse data to interpret and conclude research findings and provide relevant recommendations.

Modules	Blooms level*	Number of hours
<b>Module I: Research Methodology and Research Methods</b> Objective, significance and types of research Research Methods vis-à-vis Methodology Research Process and criterion for good research Ethics in Business Research	L1, L2	5
<b>Module II: Research Problem and Research Design</b> Identifying and Defining the Research Problem	L1, L2	5

Developing the Hypotheses Meaning of Research Design Steps to Design the Research		
<b>Module III: Sampling Design and Scaling Techniques</b> Census and sample survey Criteria for selecting a sampling procedure Measurement and Scaling techniques Classification and importance of scaling techniques	L1,L2	5
<b>Module IV: Statistical Inference- Test of Significance</b> Procedure for Testing a Hypothesis Parametric Test: Z-test, F-test, T-test Non-Parametric: Chi-Square Test	L1,L4	4
<b>Module V: Design and Analysis of Experiments</b> Basic Principles of ANOVA ANOVA Technique Interpreting ANOVA (One Way and Two Way ANOVA) and its application in various fields of management Completely Randomized Design Randomised Block Design	L1,L4	4

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

<b>EMF4216</b>	<b>MANAGERIAL ECONOMICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic knowledge of economic science preferred but not compulsory				
Co-requisites					

### Catalog Description

In this course the students are introduced with various concepts of economic science that relates to managerial decision process based on rational choice approach. To begin with, introductory concepts of economic theory and their implications on managerial decision process are analyzed. Thereafter concepts related to demand analysis, demand forecasting supply analysis, and equilibrium market conditions are discussed in detail. The next phase deals extensively concepts related to production theory, cost theory and revenue aspects. Third, various concepts related to market structure are discussed in detail. Finally, various macroeconomic concepts, policy perspectives of government and other institutions are explored in detail. The overall aim of this course is to make the students familiar with working knowledge of the fundamentals of managerial economics.

### Course Objectives:

The objective of this course is to:

1. Equip the students with theoretical concepts of economic science so that they can analyze situations and improve upon their managerial decision process in workplace.
2. Provide students with extensive exposure about the micro and macro level variables that influence business operations and strategies of the firm and business environment under which they operate.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain basic concepts of economic analysis, demand and supply dynamics, demand forecasting techniques and their application, and analyze the working of free market mechanism and appreciate how forces of demand and supply reinforce each other for attaining market equilibrium.

CO2: Analyze rationally the dynamics of production and cost aspects in order to make a holistic assessment of the complexities inherent in production system.

CO3: Describe the various forms of market structure and their implications in managerial decision process.

CO4: Discuss holistically the various macroeconomic aspects of business and implications of government policies in shaping the dynamics of business environment.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to Managerial Economics, Demand Analysis and Demand Forecasting:</b> Introduction to Managerial Economics: Meaning and Nature of Managerial Economics, Significance of Managerial Economics, Scope of Managerial Economics. Demand	L1, L2, L4	7

Analysis: Meaning of Demand, Determinants of Demand, Individual and Market Demand Functions, Individual and Market Demand Curves, Law of Demand, Exception of Law of Demand. Elasticity of Demand: Types of Elasticity of Demand, Significance of Elasticity of Demand. Demand Forecasting: Purpose of Demand Forecasting , Steps Involved in Forecasting, Determinants of Demand Forecasting, Methods of Demand Forecasting.		
<b>MODULE 2: Theory of Supply, Production, Cost and Revenue Analysis:</b> Supply: Law of Supply, Determinants of Supply, Shift of Supply and Change in Supply, Elasticity of Supply, Kinds of Elasticity of Supply, Determinants Elasticity of Supply. Theory of Production: Meaning of Production, Short –run Analysis of Production, Law of Variable Proportion, the Three Stages of Production, Returns to Scale. Analysis of Cost: Cost and Managerial Decision-making, Types of Cost, Cost Function, Relationship between Production and Cost, Short Run Cost Function, Long Run Cost Function, Relation between Short-run and Long-run Cost Curves,. Economies of Scale. Break-Even Analysis. Concept of Revenue.	L1, L2,L4,L6	12
<b>MODULE 3: Market Structure and Price Determination</b> Perfect Competition: Introduction of Perfect Competition, Characteristics of Perfect Competition, Demand Curve of Firm and Industry, Equilibrium of the Firm in the Short Run and Long Run. Effects of Tax Imposition under Perfect Competition. Monopoly: Assumptions, Causes of Monopoly, Demand, Average Revenue and Marginal Revenue of a Monopolistic, Profit Maximization Price Determinants of the Monopolist in Short-run and Long-run. Measures of Monopoly Power. Monopolistic Competition: Assumptions, Product Differentiation, Demand Curve, Equilibrium of the Firm in Short-run and Long-run, Selling cost and Monopolistic Competition. Oligopoly: Assumptions, Non-collusive Oligopoly and Collusive Oligopoly, Kinked Demand Curve Analysis.	L1, L2, L3,L4	8
<b>MODULE 4: Macroeconomics Analysis</b> National Income: An Indicator of Economic Activity, The Parameters that Influence Level of Economic Activity. Business Cycles: Characteristics of Business Cycle, Phases of Business Cycle, Ill Effects of Business Cycles, General Measure to Control Business Cycles. The Role of Government in Market Economy: Rationale of Government Intervention, Economic Functions of Government in a Market Economy, Legal and Social Framework, Restraining Unfair Competition and Increasing Market Power, Reallocation of Resources in the Presence of Externalities, Redistribution of Income, Regulation of Natural Monopoly, Stabilization of Economy.	L1, L2, L3,L4,L5,L6	9

Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

This course introduces an investigation of the firm's acquisition and financial activities, to include working capital management, capital budgeting, capital structure strategies, and valuation theory. The practical application of financial policy is stressed for decision-making purposes.

### Course Objectives

The objective of this course is to

1. Provide the students relevant, systematic, efficient and actual knowledge of financial management that can be applied in practice with making financial decisions and resolving financial problems.
2. Help the students to acquire the basic knowledge by means of combining theoretical cognitions and practical attitudes to enable them to understand the financial problems in business practice.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Describe the financial environment within which organizations must operate.

CO2: Analyse the financial objectives of various types of organizations and the respective requirements of stakeholders

CO3 :Explain and analyse the alternative sources of finance and investment opportunities and their suitability in particular circumstances

CO4: Assess the factors affecting investment decisions and opportunities presented to an organization.

CO5: Apply techniques in managing working capital

CO6: Analyse a company's performance and make appropriate recommendations.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>

<b>EMF 4218</b>	<b>OPERATIONS MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1	Latest approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Operations Management deals with the design and operation of the systems for production of goods and services. It will explore the approaches and analyze strategic decisions in operations management with a focus on designing products and processes, allocating scarce resources to strategic alternatives, and do long-range capacity and facility planning. These operations functions help in achieving the organization's long-range objectives. Subsequent focus will be on medium and short term planning and controlling. Care will be taken to strike a balance between theoretical and practical perspectives in manufacturing and service organizations.

### Course Objectives

The main objectives are:

1. To develop an understanding of how the operations, have strategic importance and can provide a competitive advantage in the workplace.
2. To understand the relationship between operations and other business functions.
3. To understand techniques of location and facility planning, line balancing, job designing and capacity planning in operations management.
4. To understand the supply chain function starting from Demand Management through Inventory Management.

### Course Outcomes

On completion of this course, the students will be able to

CO1. Define the elements of operations management and various transformation processes

CO2. Classify various facility layout alternatives and their capacity decisions,

CO3. Illustrate aggregate capacity plans and MPS in operation environments

CO4. Appraise suitable supply chain principles and practices in the operations.

CO5. Compare various inventory control methods

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
----------------	----------------------	------------------------

<b>Module I: Introduction</b> Operations in manufacturing and services, responsibility of Operations Manager, Operations strategy and competitiveness, process analysis, manufacturing process and service process selection and design, job design and work measurement	L1, L2, L3	6
<b>Module II: Strategic Decisions</b> Facility location decisions, factors affecting location, location techniques: factor rating method, centroid method, facility layout, process layout, systematic layout planning, product layout, line balancing, fixed position layout, service operations layout, types of capacity, capacity planning: long term and short term, economies of scale	L1, L2, L3	8
<b>Module III: Operating Decisions</b> Aggregate Planning, production planning and control (PPC), benefits of PPC, Master Production Scheduling, Operations scheduling: loading, sequencing, priority rules and techniques, Materials Requirement Planning (MRP), concerns in MRP	L1, L2, L3	8
<b>Module IV: Supply Chain Management</b> Recent issues in SCM: Role of IT in SCM, CRM Vs SCM, structure of supply chain, benchmarking concept, features and implementation, outsourcing decisions, value addition in SCM	L1, L2, L4, L5	6
<b>Module V: Inventory Management</b> Inventory management: Objectives, factors, process, inventory costs, inventory models, inventory control techniques: ABC, VED, EOQ, SED analysis, Just-in-Time (JIT), JIT vs traditional systems of operations, JIT in services	L1, L3, L4, L6	8

<b>EMF4206</b>	<b>SALES AND DISTRIBUTION MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

### Catalog Description

Sales and distribution management is a practical course to learn. This course intends to expose students to various theories and practices of sales and distribution management prevalent in current economic and business scenario. The course is designed especially for exceptionally talented professionals who have earned reputation for their special analytical intellect, brilliant communication skill and excellent managerial capacity. The course is devised to provide different concept of improving interface between sales and marketing, use of sales technologies; sales force training, their motivation & compensation and marketing channels. It aims to offer practical approaches and tools to develop sales and channel strategies.

### Course Objectives

The objectives of this course are to:

1. Provide students with a firm foundation for understanding all main components of sales and distribution management.
2. Offer practical approaches and tools to develop sales strategies and key customer relationships.
3. Help students to deal with solving business problems and to function as effective managers.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: State the sales management objectives, strategies & tactics, effective communication skills, and sales related marketing policies.

CO2: Explain different practices to lead a sales force enhancing its performance.

CO3: Describe how sales managers and the distribution channels work together to manage the demand and supply sides of operations.

CO4: Explain the concept of and reasons for establishing sales territories.

CO5: Identify the objectives of compensation plan and how to design an effective compensation plan.

CO6: Identify and interpret channel systems.

### Catalogue Description:

In congruence with the aim of marketing to convert a commodity into an identifiable product and to a subsequent brand, the course involves the objective of imparting comprehensive understanding of the process of product strategy and the fundamentals of building, measuring, and managing a brand.

As products, pricing and distribution increasingly become commodities, the new competitive arena is brand value, which creates long-term profitable brand relationships. Building brand equity involves managing brands within the context of other brands, as well as managing brands over multiple categories, over time, and across multiple market segments

### Course Objectives :

The objectives of this course are to-

- 1:** Make the student understand the concepts/theories pertaining to product management as well of managing a brand and reveal their significance in the context of marketing.
- 2:** Make the student well versed with the various factors that influence product development.
- 3:** Enable the student to comprehend the process of branding..
- 4:** Provide with knowledge to the student so that he may describe the target market and determine the product development strategy according to consumer characteristics and behaviour.

### Course Outcomes (CO):

On completion of this course, the students will be able to-

**CO1:** Memorize the various concepts and discuss the rationale for product and brand management.

**CO2:** Identify and explain factors which influence brand image.

**CO3:** Demonstrate how to make a product and create a brand out of it.

**CO4:** Interpret, relate and evaluate product and brand strategies in an array of customer contexts and competitive contexts.

### **Catalog Description**

This course gives a better understanding of contemporary communications thinking and integrated marketing communications (IMC), as practiced by marketing managers. IMC is a methodology and a way of thinking about communication which was created to manage brands in the new brand communication landscape. IMC looks at the different ways for companies to communicate about their product, in an integrated fashion, which takes advantage of the differences between media and leverages their strengths. This course will profile a number of frameworks and theories to elaborate and evaluate communication initiatives. The main aim of this course is to familiarize the students with the role of advertising in the context of promoting products and services. This course will also provide students with a comprehensive understanding of the fundamentals needed to build an integrated marketing communications plan.

### **Course Objectives**

The objectives of this course are to:

1. Help students understand the principles and practices of marketing communications, involving tools used by marketers to inform consumers and to provide a managerial framework for integrated marketing communications planning.
2. Understand the importance of integrating the various marketing disciplines within a marketing campaign
3. Have an understanding of the role of paid, earned and owned media channels.
4. Build an integrated marketing campaign taking into account the role of each marketing discipline.
5. Know how to evaluate the effectiveness of an integrated marketing communications campaign.

### **Course Outcomes**

On completion of this course, the students will be able to:

CO1: Demonstrate their understanding of how the communication component plays a vital role in the conceptualization, development and ultimate success of a marketing campaign by describing and critically evaluating previous campaigns and applying theories to concrete cases.

CO2: Gain an appreciation of how different media and platforms orient and impact the communication process.

CO3: Apply marketing communication theories and concepts to understand the business environment for a company and understand marketing communication objectives.

CO4: Identify, analyse and evaluate data, information based on evidence to develop relevant marketing communications.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction to Integrated Marketing Communication</b> Integrated Marketing Communications (IMC): Understanding marketing, understanding marketing communication and integrated marketing communication. The Role of IMC in Marketing Process: Marketing strategy, Marketing mix strategies, integrating IMC in marketing mix.	L1, L2, L3	7

## HUMAN RESOURCE MANAGEMENT:

EMF4209	CROSS CULTURAL MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	An understanding of cross cultural functions is deemed to be there in the students.				
Co-requisites					

### Catalog Description

This course examines the ways in which cultural differences impact on the process of doing business and managing internationally. A range of conceptual frameworks are developed, including mental models and schemata as the source of cultural differences and difficulties in managing intercultural interactions. Using evidence and business practice, the course explores the nature of culture and how cultural differences impact on interpersonal interactions, intergroup interactions and the management of multi-cultural workforces (including expatriates). This course analyses the practice of management and negotiation in an international cross-cultural context, and the challenges of managing international business relationships are critically analyzed.

### Course Objectives

The objectives of this course are:

1. The functions, systems, policies and applications of Human Resource Management in cross cultural organizations.
2. An overview of theoretical foundations of key areas associated with HR development in the organizations,
3. Develop cross-cultural intelligence, which is an essential quality of any global leader.

### Course Outcomes

On completion of this course, the students will be able to:

CO1: Outline an integrative understanding of the ethical and social issues in cross-cultural management and negotiation.

CO2: Explain the key issues raised by international business cases in cross-cultural management.

CO3: Apply analytical and theoretical frameworks to cross-cultural management.

CO4: Interact with team members within a problem-based learning structure to effectively coordinate and communicate project and case study outcomes.

CO5: Identify, analyse, evaluate and communicate information reflective of negotiation and management formats and in cross cultural contexts.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction</b> The Concept of International Comparative Management Definition of Culture and impact of the culture on International Business	L1, L2	4

### Catalogue Description:

The increasing trend of customer centric organizations makes it imperative to understand the psyche of consumer to the fullest. Virtually all companies are striving to gain maximum knowledge about the way consumer thinks and behave so that proper direction can be given to the marketing strategy. This paper on consumer behaviour aims to familiarize students about the importance of understanding consumers for the success of an organization. It makes a connection between customer behaviour principles and the elements of marketing strategy.

### Course Objectives:

The objectives of this course are to-

- 1:** Make the student understand the concepts/theories pertaining to consumer behaviour and reveal its importance in the context of marketing.
- 2:** Make the student well versed with the various factors that influence consumer behaviour.
- 3:** Enable the student to examine the consumer decision-making process.
- 4:** Provide with knowledge to the student so that he may describe the target market and determine the positioning strategy according to consumer characteristics and behaviour.

### Course Outcomes (CO):

On completion of this course, the students will be able to-

- CO1:** Memorize the various concepts and discuss the rationale for studying consumer behaviour.
- CO2:** Identify and explain factors which influence consumer behaviour inclusive of society and culture.
- CO3:** Demonstrate and evaluate how knowledge of consumer behaviour can be applied to marketing.
- CO4:** Use communication skills both orally and in writing within marketing contexts.

### Catalog Description

Under this, it is usual to give the student some discretion in the choice of topic for the dissertation and the approach to be adopted. The dissertation topic is related to the field of specialization. Deciding this is often the most difficult part of the dissertation process, and requires thorough preparation and background research.

The aim of the dissertation is to provide the students with an opportunity to further their intellectual and personal development in their chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of their degree.

### Course Objectives

The objective of this course is to

1. Understand and apply theoretical frameworks to the chosen area of study.
2. Produce a coherent and logically argued piece of writing that demonstrates competence in research and the ability to operate independently.

### Course Outcomes

On completion of Dissertation, the students will be able to

CO1: Describe a relevant area of career development, career coaching, coaching or work-related learning studies.

CO2: Identify research methods and state research questions.

CO3: Critically analyze and evaluate the knowledge and understanding in relation to the agreed area of study.

CO4: Integrate theory and practice for the development of responses on the basis of the evaluation and analysis undertaken.

CO5: Communicate in written form by integrating, analyzing and applying key texts and practices.

CO6: Demonstrate advanced critical research skills in relation to career development or work-related learning studies.

Planning the dissertation	Blooms level*	Number of hours

### MANAGEMENT PROCESS AND ORGANIZATION BEHAVIOUR

**Course Code: MBF4101**

**Credit Units: 03**

**Course Objective:**

To help the students gain understanding of the functions and responsibilities of the manager and to provide the student understand Human Behaviour in organizations so as to improve his managerial effectiveness.

**Course Contents:**

**Module I: Management vs. Manager**

Evolution of management thought, Functions of management, Roles and Skills of a manager, Emerging challenges of management.

**Module II: Organization**

Nature and structure of organization, Types of organizations, Line and staff relationships, Formal and informal organizations.

**Module III: Introduction to Organization Behaviour**

Overview of organization behaviour and its importance, Organization models.

**Module IV: Individual Behaviour**

Individual behaviour, Perception and learning, Personality, Values & attitudes, Motivation: Concept theory and application

**Module V: Group Behaviour**

Group dynamics, Communication, Leadership, Power and politics, Conflicts and negotiation.

**Module VI: Organizational Culture and Change Management**

Organisational culture, Organisational change and development, Work stress and its management.

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## ACCOUNTING FOR MANAGEMENT

**Course Code: MBF4102**

**Credit Units: 03**

### **Course Objective:**

Participants in this course will develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, participants will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts. In addition the course develops skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

### **Course Contents:**

#### **Module I: Introduction**

The Financial Accounting Framework, Accounting Policies, Need of Accounting. Users of Accounting Information, Accounting Cycle, Accounting and Management Control. Balance sheet- Dual Aspect principle, Classification Items of Balance Sheet, Formats of Balance Sheet. Preparation of Balance Sheet. Income Statement- Realization vs. Accrual Principle, Format of Income Statement), Preparation of Income Statement (IAS, GAAP & IFRS) Depreciation Accounting.

#### **Module II: Measuring and Reporting**

Measuring and Reporting :Cost of sales and Inventories, Debentures, Investments, Shareholder Equity. Human Resource Accounting-Valuation of Human Resources, Recording and Disclosure in Financial Statements

#### **Module III: Management Accounting**

Contrast between Management Accounting and Financial Accounting and Reporting, Types of Management Accounting Information and their uses, General Observation on Management Accounting. Statement of Cash Flows-Profit versus Cash, Purpose and Use of Cash Flow Statement, Format of Cash Flow Statement (AS-3), Preparation of Cash Flow Statement (IAS, GAAP & IFRS).

#### **Module IV: Analyzing and Interpreting Financial Statements**

Financial Statement Analysis – Basic Relationship, Overall Measures, Profitability Ratios, Investment Utilization Ratios, Financial Condition Ratios, Making Comparisons. Du-pont analysis. Interpretations of calculated Ratios.

**Module V: Cost Accounting:** The behavior of cost- Relation of cost to volume, BEP & Profit graph- CVP analysis, Full cost and its uses. Techniques of costing. Standard costing. Strategic planning and budgeting.

### **Examination Scheme:**

Components	Assessment 1 Group Presentation	Assessment 2 In Class Quiz	Class Test/Mid Term Exam	Attendance	External
Weightage (%)	10	5	10	5	70

# MARKETING MANAGEMENT

**Course Code: MBF4104**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to provide the students exposure to modern marketing concepts, tools, and techniques, and help them develop abilities and skills required for the performance of marketing functions.

## **Course Contents:**

### **Module I: Understanding Marketing in New Perspective**

Fundamentals of Marketing, Customer Value and Satisfaction, Customer Delight, Conceptualizing Tasks and Philosophies of Marketing Management, Value Chain, Scanning the Marketing Environment, Marketing Mix Elements, Difference between marketing and Selling, Relationship marketing, Social marketing, Strategic Planning in marketing, formulating the marketing plan.

### **Module II: Analyzing Consumers & Selecting Markets**

The factors influencing consumer behavior. The stages in the buying process, the buying decision making process, factors effecting the buying decision., Market Segmentations, Levels of Market Segmentations, Patterns, Procedures, Requirement for Effective Segmentation, Evaluating the Market Segments, Selecting the Market Segments, Tool for Competitive Differentiation, Developing a Positioning Strategy.

### **Module III: Managing Product & Pricing Strategies**

Classification of products, New Product development, stages of product development, Adoption process, Product mix decisions and line management, Length, width and depth of a line, line analysis, and brand management, product life cycle, stages in lifecycle and factors affecting each stage, Managing product life cycles. Setting the price, adapting the price, initiating and responding the price changes,

### **Module IV: Designing: Managing the Integrated Communication**

Channel functions and flows. Channel design decisions. Channel management decisions. Channel dynamics; vertical horizontal and multi channel marketing systems. Market Logistics decisions. Effective Communication, Integrated Marketing Communication, Marketing Communication Process, Promotion mix, Advertising, Personal Selling, Sales Promotion and Publicity and Public Relations, Direct Marketing,

### **Module V: Emerging Trends in Marketing**

An Introduction to Internet Marketing, Multi Level Marketing, E-Marketing, Green Marketing, Event Marketing, Types of Events, Sponsorship, Cause Related Marketing, Marketing for Non Profit Organizations Marketing Strategies for Leaders, Challenges, Followers and Nichers

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# QUANTITATIVE TECHNIQUES IN MANAGEMENT

**Course Code: MBF4106**

**Credit Units: 03**

## **Course Objective:**

The aim of this course is to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the business environment using contemporary software.

## **Course Contents:**

### **Module I: Introduction**

Application of Statistics in Business; Classification of Data; Interpretation of computer output of diagrammatic and graphical presentation of data, measures of central tendency, measures of dispersion and skewness.

### **Module II: Probability and Probability Distributions**

Concepts of Probability, addition theorem, multiplication theorem, Baye's Theorem; continuous and discrete probability distribution: Binomial Probability Distribution, Poisson Probability Distribution and Normal Probability Distribution.

### **Module III: Sampling and Sampling Distribution**

Sampling: Basic Concept, Types of Sampling, Errors and Precautions in sampling, size of sample, Parameter and Statistic, Sampling Distribution of the mean, Sampling distribution of proportion, Estimation – point estimation, Interval Estimation,

### **Module IV: Tests of Hypothesis**

Null and Alternative hypothesis, One-Tailed and Two-Tailed tests of hypothesis, Type I and Type II error, rejection rule using p – Value and critical value approach. Hypothesis Testing to compare two populations: Test for one sample mean, Test for two population means (Independent Samples), Tests for two population means (Dependent Samples), Tests for two population proportions (Independent Samples), Tests for two population variances (Dependent Samples), F-test, Chi – Square Test

### **Module V: Forecasting Techniques**

Correlation - Karl Person, Spearman's Rank methods, simple linear regression analysis – Estimated regression equation, least squares method, coefficient of determination, interpretation of computer output for Regression, Introduction to time series, trend analysis

### **Module VI: Introduction to SPSS, performing univariate and bivariate analysis on SPSS**

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# FINANCIAL ENVIRONMENT

**Course Code: MBF4107**

**Credit Units: 02**

## **Course Objectives:**

Financial system of a country is closely related to the economic development. There is drastic change in the functioning of financial system in this era of liberalization, privatization and globalisation. The purpose to study Indian financial environment is to give a clear understanding and knowledge of financial system in the present scenario.

## **Course Contents:**

### **Module I: Financial System**

Financial System: Meaning and Significance-Functions of the financial system -Financial Assets-Financial markets- Classification-Financial instruments-weakness of Indian Financial System.

### **Module II: Money Market**

Money market: Definition-Features-Objectives-Features of a developed money market- Importance of Money market-Composition of Money market-Operations and Participants- Money market Instruments-features of Indian money market-Recent developments.

### **Module III: Capital Market**

Primary, Secondary and Capital Markets: New issue market-meaning-functions-methods floating new issue - intermediaries in the new issue market-merchants bankers and their functions -Recent trends in new issue market - Stock Exchanges-Functions-Structure of stock exchanges-BSE-NSE- listing of securities-Advantages of listing-methods of trading in stock exchanges-on line trading-stock indices

### **Module IV: Financial System**

Financial Institutions: commercial banks- development financial institutions- Non-banking financial corporation-Mutual Funds, insurance companies – Objectives and functions.

### **Module V: Monetary Policy and Regulatory Institutions**

Monetary Policy of India: Objectives, Monetary Operations- Open Market Operations, CRR, SLR, Bank Rate Policy, Credit Ceiling, Credit Authorization Scheme, Moral Suasion, Repo Rate and Reverse Repo Rate.

Regulatory Institutions – RBI – Role and Functions. The Securities and Exchange Board of India – Objectives –Functions –Powers -SEBI guidelines for Primary and Secondary Market.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# HUMAN RESOURCE MANAGEMENT

**Course Code: MBF4108**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

## **Course Contents:**

### **Module I: Human Resource Management in Perspective**

Nature and scope of HRM, HRM functions, HRM models, understanding concepts of Personnel Management, Human Resource Development and Strategic Human Resource Management, HR Environment, Changing Role of HR.

### **Module II: Meeting Human Resource Requirements**

Job Analysis, Job Description, Strategic Human Resource Planning, Recruitment, Selection Process, Methods – Interview, Tests, Placement and Induction

### **Module III: Training & Developing of Employees**

Training and Development, Understanding of Performance Management Systems, Potential Appraisal, Career Development

### **Module IV: Managing Compensation**

Job evaluation, Methods of Job Evaluation, Strategic Compensation, Equity Theory, Components of Pay Structure, Designing and Administration of Wage and Salary Structure, Wage Regulations in India

### **Module V: Employee Relations**

Overview of Industrial Relations, Industrial disputes, Collective Bargaining, Workers Participation and Management, Grievance handling

### **Module VI: Emerging Trends in HRM**

Overview of Human Resource Information System (HRIS), Introduction to HR Audit, IHRM Practices, Cross- Cultural and Diversity Management, Work-life integration, Human Resource Outsourcing

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# INFORMATION TECHNOLOGY AND E-COMMERCE

**Course Code: MBF4109**

**Credit Units: 02**

## **Course Objective:**

This course will expose students to developments in computer technology and understand the working of a computer system. It will introduce end-user computing and build skills in using IT and understanding various technologies like internet, telecom, DBMS concepts, e-commerce etc. The course will expose the students to the latest trends in e-business models, electronic payment systems and data & information security

## **Course Contents:**

### **Module I: Modern Computer Systems**

Evolution of Computer Systems, Input, output and storage technologies, Computer Assisted Control and Automation, (e.g. Delhi Metro , Digitally Controlled Car engines etc.), Computer Controlled Biometric/RFID based Access Control , Contemporary hardware and software platforms(Open Source, Web Software etc.), Storage of Data Resources

### **Module II: Data Resource Management**

Introduction to DBMS, Benefits of DBMS over traditional file system, Types of DBMS, Application of DBMS using MS-ACCESS / ORACLE as a tool for understanding of DBMS concepts. SQL Query handling, Forms, Concept of Data Warehouses and Data Marts, Introduction to Data Centers. Storage Technologies and Architecture (DAT, NAS, SAN etc. ). Live examples of storage strategies of companies like Google, Amazon Wal-Mart dealing with storage crisis

### **Module III: Telecommunications and Computer Networks**

Networked Enterprise :- Components, Types of networks, Advantages of Network Environment, Business Uses of Internet, Intranet and Extranet, Network Topologies, Web 2.0/3.0, Distributed/Cloud/Grid Computing, GSM & CDMA, GPRS ,Features of 3G & 4G technologies, VOIP and IPTV.

### **Module IV: Electronic Commerce Systems**

Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services.

### **Module V: E-Commerce Business Models & EDI**

Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI. Various business models in Ecommerce like B2C, B2B, C2C.

### **Module VI: E-Payment Systems and Security Management**

Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards.

The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software, Hacking etc.) and counter measure. Definition of Cyber Crime and Types. Antivirus, Firewalls, Anti-Spyware, Security Audit, Discussion on Overview of IT-ACT 2000.

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# Syllabus - Second Semester

## FINANCIAL MANAGEMENT

**Course Code: MBF4201**

**Credit Units: 03**

### Course Objective:

The objective of this course is to develop an understanding of short-term and long-term financial decisions of a firm and various financial tools used in taking these decisions. It is also aimed to develop the understanding of the financial environment in which a company operates and how it copes with it.

### Course Contents:

#### Module I: Introduction

A Framework for Financial Decision-Making- Financial Environment, Changing Role of Finance Managers, Objectives of the firm.

#### Module II: Valuation Concepts

Time Value of Money, Risk and Return, Financial and Operating Leverage.

#### Module III: Financing Decisions

Capital Structure and Cost of Capital, Marginal Cost of Capital.

#### Module IV: Capital Budgeting

Estimation of Cash Flows, Criteria for Capital Budgeting Decisions, Issues Involved in Capital Budgeting, Risk analysis in Capital Budgeting – An Introduction.

#### Module V: Working Capital Management

Factors Influencing Working Capital Policy, Operating Cycle Analysis, Management of Inventory, Management of Receivables, Management of Cash and Marketable Securities, Financing of Working Capital.

#### Module VI: Dividend Policy Decisions

An introduction: Different Schools of Thought on Dividend Policy.

### Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

### Text &References:

## BUSINESS RESEARCH METHODS

**Course Code: MBF4203**

**Credit Units: 02**

**Course Objective:**

The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

**Course Contents:****Module I: Introduction**

Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal

**Module II: Measurement and Data Collection**

Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques, measures of central tendency mean, median, mode; measures of dispersion, data processing

**Module III: Data Analysis I**

Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi- square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test

**Module IV: Data Analysis-II**

Simple linear regression: coefficient of determination, significance tests, residual analysis, Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)

**Module V: Report Writing**

Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

Case study must be included in the discussion.

## INTERNATIONAL BUSINESS ENVIRONMENT & PRACTICES

Course Code: MBF4204

Credit Units: 03

**Course Objective:**

This course provides a comprehensive overview of the role that international business plays in the global economy. This knowledge shall help to understand the complexities, risks and opportunities of international business and provide a global perspective on international trade, including foreign investments, impact of financial markets, international marketing, and the operation of MNC's. Learn business practices organizations adopt to tap global opportunities. Create awareness on career opportunities that exist in international business.

**Course Contents:****Module I: Introduction to International Business**

Globalisation - Meaning and implications ; Globalisation of markets and production ; Drivers of Globalisation; Importance, nature and scope of International business; Modes of entry into International Business; Internationalization process and managerial implications; Multinational Corporations and their involvement in International Business: Issues in foreign investments, technology transfer, pricing and regulations; International collaborative arrangements and strategic alliances.

**Module II Theoretical Foundations of International Trade**

Reasons for international trade: Mercantilist and neo-mercantilist view; Theories of international trade: Absolute and comparative advantage theories: Modern theories of trade; Gains from trade; Foreign trade multiplier; Terms of trade. The new product life cycle theory, The new trade theory, Porter's diamond model ; Instruments of International trade policy – tariffs, subsidies, local content requirements, administrative policies, anti dumping policies, political and economic arguments for intervention.

**Module III: International Business Environment**

Economic, Political, Cultural and Legal environments in International Business. Framework for analyzing international business environment. World trade and protectionism – Tariff and non-tariff barriers; Foreign investments-Pattern, Structure and effects; Movements in foreign exchange and interest rates and their impact on trade and investment flows. Introduction to Export and Import Finance – Methods of payment in International Trade.

**Module IV: International Economic Institutions and Agreements**

WTO, WTO and Developing Countries, IMF, World Bank, UNCTAD, International commodity trading and agreements. Instruments of International trade policy – tariffs, subsidies, local content requirements, administrative policies, anti dumping policies, political and economic arguments for intervention ; GATT, WTO, IPR, TRIPS, TRIMS, GATS, Ministerial Conferences, Uruguay round of negotiations. WTO dispute settlement mechanism.

**Module V: Regional Economic Groupings in Practice:**

Levels of Regional Economic Integration; Regionalism vs. Multilateralism; Important Regional Economic Groupings in the World, Regional Integrations, Trading Blocks - European Union, ASEAN, APEC, NAFTA, SAARC, ANDEAN PACT and MERCOSUR.

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

**OPERATIONS MANAGEMENT**

**Course Objective:**

The course aims at developing an understanding of the strategic and functional issues in the operational environment of any organization, of the various decisions involving the operational activities, and of the methods enabling them taking the best possible alternative decision.

**Course Contents:****Module I: Introduction**

Operations in manufacturing and services, responsibility of Operations Manager, Operations strategy and competitiveness, process analysis, manufacturing process and service process selection and design, job design and work measurement

**Module II: Strategic Decisions**

Facility location decisions, factors affecting location, location techniques: factor rating method, centroid method, facility layout, process layout, systematic layout planning, product layout, line balancing, fixed position layout, service operations layout, types of capacity, capacity planning: long term and short term, economies of scale

**Module III: Operating Decisions**

Aggregate Planning, production planning and control (PPC), benefits of PPC, Master Production Scheduling, Operations scheduling: loading, sequencing, priority rules and techniques, Materials Requirement Planning (MRP), concerns in MRP

**Module IV: Supply Chain Management**

Recent issues in SCM: Role of IT in SCM, CRM Vs SCM, structure of supply chain, benchmarking concept, features and implementation, outsourcing decisions, value addition in SCM

**Module V: Inventory Management**

Inventory management: Objectives, factors, process, inventory costs, inventory models, inventory control techniques: ABC, VED, EOQ, SED analysis, Just-in-Time (JIT), JIT vs traditional systems of operations, JIT in services

**Examination Scheme:**

# ECONOMICS FOR MANAGEMENT

**Course Code: MBF4209**

**Credit Units: 02**

## **Course Objective:**

To familiarize the students with theoretical concepts of modern Economic Analysis for Management so that they can use these as inputs in managerial decision making process. In this course adequate emphasis has been given on making students understand and critically analyze key economic variables both at micro and macro levels in the domestic and international domains. The idea is that such comprehensive understanding of economic concepts will allow them to apply the acquired knowledge in business operations and make strategies for the firm operating under a dynamic business environment.

## **Course Contents:**

### **Module I: Introduction to Managerial Economics, Demand Analysis and Demand Forecasting**

Introduction to Managerial Economics: Meaning and Nature of Managerial Economics, Significance of Managerial Economics, Scope of Managerial Economics. Demand Analysis: Meaning of Demand, Determinants of Demand, Individual and Market Demand Functions, Individual and Market Demand Curves, Law of Demand, Exception of Law of Demand. Elasticity of Demand: Types of Elasticity of Demand, Significance of Elasticity of Demand. Demand Forecasting: Purpose of Demand Forecasting, Steps Involved in Forecasting, Determinants of Demand Forecasting, Methods of Demand Forecasting.

### **Module II: Theory of Supply, Production, Cost and Revenue Analysis**

Supply: Law of Supply, Determinants of Supply, Shift of Supply and Change in Supply, Elasticity of Supply, Kinds of Elasticity of Supply, Determinants Elasticity of Supply. Theory of Production: Meaning of Production, Short –run Analysis of Production, Law of Variable Proportion, the Three Stages of Production, Returns to Scale. Analysis of Cost: Cost and Managerial Decision-making, Types of Cost, Cost Function, Relationship between Production and Cost, Short Run Cost Function, Long Run Cost Function, Relation between Short-run and Long-run Cost Curves, Economies of Scale. Break-Even Analysis. Concept of Revenue.

### **Module III: Market Structure and Price Determination**

Perfect Competition: Introduction of Perfect Competition, Characteristics of Perfect Competition, Demand Curve of Firm and Industry, Equilibrium of the Firm in the Short Run and Long Run. Effects of Tax Imposition under Perfect Competition. Monopoly: Assumptions, Causes of Monopoly, Demand, Average Revenue and Marginal Revenue of a Monopolistic, Profit Maximization Price Determinants of the Monopolist in Short-run and Long-run. Measures of Monopoly Power. Monopolistic Competition: Assumptions, Product Differentiation, Demand Curve, Equilibrium of the Firm in Short-run and Long-run, Selling cost and Monopolistic Competition. Oligopoly: Assumptions, Non-collusive Oligopoly and Collusive Oligopoly, Kinked Demand Curve Analysis.

### **Module IV: Macroeconomics Analysis**

National Income: An Indicator of Economic Activity, The Parameters that Influence Level of Economic Activity. Business Cycles: Characteristics of Business Cycle, Phases of Business Cycle, III Effects of Business Cycles, General Measure to Control Business Cycles.

The Role of Government in Market Economy and Strategic Business Implications: Rationale of Government Intervention, Government Macroeconomic Policy Measures – GST, Demonetization – and their impact on Business; Macro Economic variables and their functional relationship; Economic Functions of Government in a Market Economy, Legal and Social Framework, Restraining Unfair Competition and Increasing Market Power, Reallocation of Resources in the Presence of Externalities, Redistribution of Income, Regulation of Natural Monopoly, Stabilization of Economy;

Macroeconomic Variables affecting Business: Consumption Function, Saving Function, Investment Multiplier; Transaction, Precautionary, Speculative Demand for Money; Liquidity Preference; Components of Money Supply; Fiscal Policy & Monetary Policy and their implications on business and management; Inflation and Deflation - Demand pull and Cost push inflation; Government policies to control inflation.

International Trade Regime and its implications on Business: GATT, World Trade Organization, Regional Trade Agreements – EU, NAFTA, ASEAN, SAFTA, MERCUSOR.

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# BUSINESS ANALYTICS

Course Code: MBF4210

Credit Units: 02

## Course Objective:

The course provides an introduction to data analytics to be used in business. The students will learn how data analysts describe, predict and make informed business decisions in various business domains like marketing, human resources, finance and operations. The aim of the course is to develop basic data literacy and an analytic mindset in students that will help them to make strategic decisions based on data.

## Course Contents:

### Module I: Introduction to Business Analytics

Importance and role of data driven decisions. Business Analytics – Definition, Market, Trends; Paradigm Shift from Data to Insight and from Business Intelligence to Business Analytics; Examples and Types of Business Analytics Analysis- Forecasting & Predictive Modeling; Descriptive, Prescriptive and Predictive Analytics. Data Summarization, Data visualization – Various visualization techniques, standardized reporting and Pivot Tables – Using Excel

### Module II: Data Mining

Introduction to Data Mining; Crucial processes in data mining; Data Warehousing; Data Mining Techniques and Exploratory Data Analysis; Data Mining Tool – XL Miner.

### Module III: Decision Making & Optimization

Decision making under uncertainty – Decision Trees and Risk Profiles; Sensitivity Analysis; Optimizing complex decisions – Optimization of a large number of decisions while accounting for different kinds of physical and business decisions. Introduction to Optimization Techniques –Linear Programming; Optimization – Use of Excel to solve business problems like marketing mix, capital budgeting and portfolio optimization.

### Module IV: Big Data and Introduction to R

Introduction to Big Data, Big Data driven decisions in business organizations – Benefits and Security/Privacy concerns.

Building Business and Economic Models –Tools to leverage data for Prediction purposes; Logistic Regression.

Introduction to Machine Learning; Statistical Learning vs. Machine Learning; Major classes of Learning Algorithms –Supervised Vs Unsupervised Learning.

Introduction to R Programming

### Module V: Simulation using R and Excel

Hands on Regression using R; Introduction to Simulation; Applications of Simulation and Building a Simulation Model. (Using Excel and R)

Capstone Project.

# EXCEL FOR MANAGERS

**Course Code: MBF4211**

**Credit Units: 01**

## **Course Overview:**

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets. After completion of this course, students will be able to learn the various methods for entering and editing data and also learn the various ways to write simple formulas.

## **Course Contents:**

### **Module-I: Getting Started with Excel**

Introduction to Spreadsheets: Launching Excel, entering data in spreadsheet, widening rows and columns, applying basic formatting in spreadsheet, saving work in excel. Entering Data into cells: Using autofill, sort & filter feature, creating lists, inserting & deleting rows and columns. Wrapping & merging text and cells,

### **Module-II: Basics in excel**

Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel. Setting the page orientation and print area. Adding hyperlinks to cells, inserting images, objects, equations and symbols.

### **Module-III: Charts & Formulas in Excel**

Understanding Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart. Using Basic functions- average, sum, min, max, product etc. date functions, time functions. Math Operators in Excel, combining mathematical operators.

### **Module-IV: Functions in Excel**

Logical- using IF, AND, OR, NOT, TRUE, FALSE Functions. Textual- using TRIM, UPPER, LOWER, REPLACE Functions. Import data into excel, Look up functions with index and match. Rounding, sum product, conditional counts and conditional sums, Filtering data, pivot table, pivot charts, conditional formatting.

### **Module-V: Financial and Statistical Functions in Excel**

Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager, IRR. Statistical functions: Max, Min, Average, Large, Rank, Small, Var, Std Dev.

# Syllabus - Third Semester

## STRATEGIC MANAGEMENT

**Course Code: MBF4301**

**Credit Units: 03**

### Course Objective:

The course is designed to help students to understand the concept of strategy and strategic management process. Acquaint students with basic concepts and principles of strategic management, develop and prepare organizational strategies that will be effective for the current dynamic environment and likewise to impart the strategic management conceptual framework which will increase students' skills and knowledge in identifying and describing organizations' strategic posture and direction.

### Course Contents:

#### Module I: Introduction and Purpose of Strategy Formulation

Evolution and Introduction of strategic management, Concept of Strategy, corporate, Business and Functional Levels of Strategy, Mission, Vision, Objectives, Approaches to four Phases in Strategic Management Process, Stakeholders in business and their roles in strategic management, Strategic decision making.

#### Module II: Environmental Analysis

Analyzing company's External Environment: PESTLE Analysis; Preparing an Environmental Threat and Opportunity Profile (ETOP), Analyzing Industry Environment: Industry Analysis – Porter's Five Forces Model of competition, Strategic Group analysis.

#### Module III: Analysis of Organizational Competencies

Analyzing Company's Internal Environment Resource based view of a firm, meaning, types & sources of competitive advantage, analyzing company's Resources and Competitive Position, VRIO Framework; Benchmarking as a method of comparative analysis, Competitive advantage; Concept of a Core competence and Distinctive competitiveness, Characteristics of Core Competencies; Value Chain Analysis Using Porter's Model; Organizational Capability Profile: Strategic Advantage Profile;

#### Module IV: Strategic Analysis and Choice

Generic Competitive Strategies: Meaning of Generic competitive strategies, Low cost, Differentiation, Focus – when to use which strategy; Grand Strategies: Stability, Growth (Diversification Strategies, Vertical Integration Strategies, Mergers, Acquisition & Takeover Strategies, Strategic alliances & Collaborative Partnerships), Retrenchment – Turnaround, Divestment, Liquidation, Outsourcing Strategies; Offensive and Defensive Strategies, Blue Ocean Strategy, Strategy in the age of Internet and E-commerce; Portfolio Analysis Business Portfolio Analysis – BCG Matrix – GE 9 Cell Model; Evaluation of Strategic Alternatives: SWOT Analysis, Grand Strategy Selection Matrix.

#### Module V: Strategy Implementation and Evaluation

Strategy Implementation, Barriers to implementation of strategy, Mc Kinsey's 7s Framework; Organization Structures for Strategy Implementation, Leadership Implementation, Functional Implementation, Strategic evaluation review and control.

# TECHNOLOGY IN BANKING

**Course Code: MBF4303**

**Credit Unit: 02**

## **Course Objectives:**

Revolutionary developments in technology continue to transform the banking and financial industry. Distribution of banking services through the Internet is an important part of this transformation. Through this course students will be able to understand various tools & techniques of e-banking. Students will also understand various types of cyber law.

## **Course Contents:**

### **Module I: Branch Operation and Core Banking**

Introduction and Evolution of Bank Management - Technological Impact in Banking Operations - Total Branch Computerization - Concept of Opportunities - Centralized Banking - Concept, Opportunities, Challenges & Implementation

### **Module II: Delivery Channels**

Overview of delivery channels - Automated Teller Machine (ATM) - Phone Banking - Call centers - Internet Banking - Mobile Banking - Payment Gateways - Card technologies - MICR electronic clearing

### **Module III: Back office Operations**

Bank back office management - Inter branch reconciliation - Treasury Management - Forex Operations - Risk Management - Data centre Management - Net work Management - Knowledge Management - Customer Relationships Management (CRM)

### **Module IV: Interbank Payment System**

Interface with Payment system Network - Structured Financial Messaging system - Electronic Fund transfer - RTGS - Negotiated Dealing Systems & Securities Settlement Systems - Electronic Money, E Cheques

### **Module V: Contemporary Issues in Banking Techniques**

Analysis of Rangarajan Committee Reports - E Banking - Budgeting - Banking Softwares

### **Module VI: Overview of Cyber Law**

Scope of Cyber Law: Nature of Cyber Space; Cyber Property; Cyber Personality; Cyber Transactions; Cyber Jurisprudence: Concepts of Historical, Analytical and Ethical Jurisprudence; Relationship between Meta Society Laws and Cyber Law; How Cyber Law need to be developed. Cyber Crimes and Cyber Laws; Types of Cyber Crimes; Legal Provisions regarding Cyber Crimes; Investigation and adjudication of cyber crimes; Digital evidence; Methodology of Cyber Crime Investigation; Basic Investigation Techniques.

# RETAIL ASSETS & RURAL BANKING

Course Code: MBF4305

Credit Units: 03

## Course Objective:

Rural Banking enjoys a special place in the Indian Banking. Expansion of Rural Credit Post Bank Nationalization of Bank has been phenomenal. This will expose the students to Rural Banking & Micro Finance

## Course Contents:

### Module I: Home Loans

Introduction and Overview of Housing Finance, Basics of Housing Finance, Essentials of Housing Loan Proposals, Process of Home Loans, Assessment of Housing Loans, Housing Finance in metro branches, Rural Housing Finance, Documentation, Recovery.

### Module II: Vehicle / Consumer Finance

Introduction and Overview, Essential of consumer loans and vehicle loans-Processing of loans-quantum of finance-margin-rate of interest-Disbursement, Insurance, Security Collaterals and other securities. Documentation, Inspection-recovery-legal issues. Securitization of consumer loans.

### Module III : Financing in Rural Areas

Basics of financing in Rural Areas –Role of Information and communication Technology Sources, Credit delivery channels – Money Lenders in rural society, Role of commercial Banks, RRBS, Co-operative Banks, Role of NABARD and SIDBI, Banking Correspondents Direct Selling Agents, Mobile Money. Lead Bank Scheme – objectives Implementation and Impact, Service Area Approach – objectives, Implementation and Impact

### Module IV: Agriculture Credit

Important Financial Parameters and Financial Analysis of the Farmers- Concepts and Terminology, Important Schemes Kissan Credit Cards, Investment Credit, Loans for Farm Mechanization and Minor Irrigation Schemes, Dairy Loans and Cold Storages, Micro Finance Institutions - Concept of self Help Group, MFIS and Banks, Micro Finance Delivery Channels, Recent Crisis in Micro Finance Model, RBI & Recent Crisis .

### Module V: Micro Finance

Financial Inclusion and Inclusive growth for Rural Development Rural Micro Insurance Scheme RSBY. Bank Finance for SME-- Introduction, Financial requirements of SME's, Appraisal of SME Proposals, Credit Rating of SME Borrowers CGTMSE

### Module VI: Emerging Trends in Rural Banking

Emerging Trends in Rural Banking – Bottom of the Pyramid financing the poor as they are Bankable, guidelines of GOI & RBI on Financial Inclusion

# INTERNATIONAL FINANCIAL MANAGEMENT

**Course Code: MBF4306**

**Credit Units: 03**

## **Course Objective:**

The possibility for companies to look beyond domestic markets while making the financial decisions has given new dimensions to the way these decisions are taken. This has essentially led to changes in financial environment by linking domestic markets to global markets causing unprecedented increase in opportunities as well as risks. Management in such environment requires understanding of innovative conceptual and physical tools for better financial decision-making. The course on International Finance aims at equipping the financial manager with concepts, tools that enable financial decisions making in a global market and help better achieve the objectives of the firm.

## **Course Contents:**

### **Module I: International Financial Environment**

Finance function in global business scenario, International Monetary System, International Financial Markets and Instruments, Balance of Payments, Recent Developments.

### **Module II: Foreign Exchange Markets**

Spot and Forward Foreign Exchange Markets, Speculation and Arbitrage in Foreign Exchange Markets and Implications of Market Efficiency, Currency Swaps, Currency Futures and Options.

### **Module III: Foreign Exchange Rate Determination**

Theories of Exchange Rate Determination, Fundamental International Parity Conditions – Purchasing Power and Interest Rate Parity, Forecasting Exchange Rates - Technical Forecasting, Time Series Modelling, Fundamental Forecasting.

### **Module IV: Foreign Exchange Rate Exposure and Risk Management**

Transaction, Translation and Operating Exposure, Exposure from Equity and Borrowing in International Financial Markets, Hedging tools for Management of Transaction Exposure and Interest Rate Exposure, Degree of Hedge.

### **Module V: Issues in Foreign Investments Analysis**

Examination of International Investment Proposals, Discounted Cash Flow Analysis, Tax Adjusted Present Value Approach, Political Risk Analysis, External Investment Decision – Measuring Total Returns on Foreign Investments, Optimal International Asset Allocation.

### **Module VI: Finance of Foreign Trade**

Income terms, foreign letters of credit, export & import finance, rules governing letters of credit, export import policy (Case Studies)

## **Examination Scheme:**

# MANAGEMENT OF FINANCIAL SERVICES

Course Code: MBF4307

Credit Units: 03

## Course Objective:

At the end of this course the students will understand: Role of Financial Services in producing and maximizing value. Understanding basic Financial Services and their need. Factors determining dynamism in the Financial Services industry. Understanding the interface of regulators and managers for quantifying and dealing with critical factors affecting the Financial Services industry.

## Course Contents:

### Module I: Introduction

Financial services and Value production, Value added in Financial Services, ROI in Financial Services, Elements in the Financial Services value chain, Role of Financial Services in Economic Development

### Module II: Merchant & Investment Banking

Meaning, Importance & Role in the Indian Financial System, Corporate Counselling, Project Counselling and Appraisal, Loan Syndication and Accessing Debt and Capital Markets, Procedural aspects of public issues, bought out deals, Book Building, Pre-Issue Decision; Post Issue Management and related provisions of Companies Act and SEBI guidelines for Protection of Interests of Investors, New Products in Capital Markets

### Module III: Leasing Hire Purchase and Consumer Credit

Development of Leasing Hire Purchase and Consumer Credit, Types of Leasing, Pricing Methodology and Financial Analysis, Taxation, Legal Framework for Leasing and Hire Purchase Companies, Leasing Vs. Buying- NPV, Securitization, Banking Services related to leasing

### Module IV: Venture Capital Financing

International Experiences in Venture Capital Financing, Venture Capital Financing in India, Pitfalls to be Avoided, Private Equity and growth of Entrepreneurship

### Module V: Mutual Funds

Mutual Funds types, Exchange Traded Funds, Fund of Funds, Organization and Management, Regulations of Mutual Funds

### Module VI: Other Financial services

Factoring Services - Features, Merits and Demerits, Cost Benefit Analysis, Forfeiting – Features, Merits and Demerits, Credit Rating: Concept of Credit Rating, Types of Credit Rating, Advantages and Disadvantages of Credit Rating, Credit Rating Agencies and Their Methodology and Process, Individual Credit Rating, Sovereign Credit Rating Practices, Indian Experience up to now, Housing Finance, Custodial Services.

### Module VII: An introduction to marketing of Financial Services Features

Marketing Of Financial Services, Cross Selling of Banking Services, Up-Selling, Wealth Management

# SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

Course Code: MBF4308

Credit Units: 03

## Course Objective:

This course aims at providing a clear understanding of the changing domestic and global investment scenario in general and Indian capital market in particular with reference to availability of various financial products and operations of stock exchanges. Important theories, techniques, regulations and certain advancements in theory of investment will be covered with an aim of helping the participants make sound investment decisions both in the context of individual security and portfolio investment.

## Course Contents:

### Module I: Background of Capital market/Corporate Governance and Methods of Fund Raising

Importance of Strong Capital market in Economy, Investment opportunities available to Investors, relation of demographic characteristics with investment pattern of individuals, Process of investment in Financial assets, intermediaries and Role of SEBI/OTCEI/ROC/Stock exchanges-Listing agreement, clause 49, Importance of Corporate Governance and changes taking place/required in the law. Salient features and operation of stock exchanges, Trading arrangements, Changing scenario of Indian stock market. Relationship of Primary market with Secondary market, raising of Funds by IPO/FPO/Right issue and intermediaries involved. Merchant banking and its functions, contemporary issue in Capital market.

### Module II: Debt

Malkiel's Law, Interrelationship of Bond Market and Stock market, International events and its impact on security market Risk and return in the context of Portfolio, Common stock valuation models, Term structure of Interest Rates, Role of FII'S, DII/MF /QIB in Capital market. Participatory notes and its Impact, index formation..

### Module III

Fundamental analysis-Economic & industry analysis, concept of Business Cycles, Indicators of economic prosperity, Industry analysis, Company analysis, Company valuation. DOW's Theory, Various Technical analysis tools like Moving averages, Volume Analysis, Indicators, RSI, Pattern analysis, Candlesicks, Market breadth analysis, Trend analysis, Elliot wave Rules Fibonacci numbers, ROC/RSI, CAPM and Fama and French challenge, lagging indicators and leading indicators analysis, reading and interpretations of technical patterns and charts, Other tools to Forecast the market and take Entry and exit decisions.

### Module IV

Arbitrage pricing theory, Generating the efficient frontier, Efficient market theory, Valuation by PE ratio /Book value to price value analysis, Motivation for partitioning of risk, Markowitz Risk -return optimisation,

### Module V

Types of Mutual Funds--SIP/ELSS, Tax Implications. , Investment Banking, Role of Fund Manager, Portfolio management services, Churning and revision of Portfolio, Portfolio re balancing and up gradation, Sharpe's performance Index, Treynor's performance Index, Jensen's performance Index.

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# PROJECT PLANNING, APPRAISAL AND CONTROL

Course Code: MBF4309

Credit Units: 03

## Course Objective:

The objective of the course is to make the students familiar with the planning, analysis, selection, implementation and review the capital expenditure investments. The aim is to acquaint the student with the application of mathematical and statistical tools for analyzing managerial problems in order to arrive at a decision w.r.t. the capital expenditures.

## Course Contents:

### Module I: Planning of Projects

Capital Expenditures, Phases of Capital Budgeting, Levels of Decision Making, Facets of Project Analysis, Portfolio Planning Tools, Strategic Position and Action Evaluation (SPACE), Generation of Ideas, Monitoring the Environment, Corporate Appraisal, Project Rating Index, Demand Forecasting, Market Planning

### Module II: Technical Analysis

Material Inputs and Utilities, Manufacturing Process, Product Mix, Plant Capacity, Location and Site, Machineries and Equipments, Structures and Civil Work, Project Charts and Layouts, Work Schedule

### Module III: Financial Analysis

Cost of Project, Means of Finance, Estimates of Sales and Production, Cost of Production, Working Capital Requirements and its Financing, Profitability Projections, Break Even Point, Projected Balance Sheets, Muti Year Projections, Basic Principles for Measuring Project Cash Flows, Components of the Cash Flow Stream, Biases in Cash Flow Estimation

### Module IV: Project Risk

Types and Measures of Project Risk, Sensitivity Analysis, Scenario Analysis, Optimal Timing, Social Cost Benefit Analysis, Net Benefit in terms of Economic Prices, Measurement of the Impact on Distribution, Savings Impact and its value, Income Distribution Impact, Little-Mirrlees Approach, Shadow Prices

### Module V: Project Management and Review

Forms of Project Organization, Project Planning, Project Control, Human Aspects of Project Management, Pre-requisites for Successful Project Implementation, Performance Evaluation, Abandonment Analysis, Administrative Aspects of Capital Budgeting

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# ADVANCE CORPORATE FINANCE

Course Code:MBF4310

Credit Units: 03

## Course Objective:

The goal of this course is to develop the analytical skills for making corporate investment with regards to financial decisions and risk analysis. This course will examine various theories including the concept of present value, the opportunity cost of capital, discounted cash flow analysis, a consortium of valuation techniques, issues between short & long term financial management, risk and return, capital asset pricing model, capital budgeting, corporate capital structure and financing decisions, dividend policy, investment and financial decisions in the international context, including exchange rate/interest rate risk analysis, and issues of corporate governance and control. In essence, we will explore the very patterns of corporate finance that has shaped the familiar yet complex terrain of today's global economy. An equally important component of this course is its emphasis on developing your critical auditory and erudite writing skills to a level that is commensurate with university standards. The course teaching methodologies will be composed of lectures, homework assignments and a group project.

## Course Contents:

### Module-I: Introduction

Finance and Finance Manager, role of a Finance Manager, Ownership vs. Management, Do Managers really look after interest of shareholders. Expectations from a Finance Manager, Concepts of risk and return, Concepts of Time value of money.

### Module-II: Common Stocks

How common stocks are traded, Valuation of common stocks, pricing vs valuation, today's price vs next year's price. Capitalization rate, DCF valuation and varying growth rates, link between stock price and earning per share, valuation format, Mini Case: Reeby Sports. Issuance of common stocks,

### Module-III: Project Evaluation

Accounting Income vs Cash flows, Pros and cons of investment decision criteria, Why NPV leads to better decision making, Verdict on IRR, NPV vs IRR, XIRR, MIRR, Mutually Exclusive vs Independent Projects, Note on depreciation in estimating cash flows, choosing between long term and short term Equipments, optimal timing of investment, where positive NPV come from, Making sure managers maximize NPV,

### Module-IV: Dividend Policy and Capital Structure

How Dividends are paid, Dividend controversy, stocks repurchase, relevance of dividends in perfect capital markets, dividend and taxes, how much a firm should borrow, cost of financial distress, does debt policy matter, effect of leverage in tax free economy, pecking order of financing choices,

### Module-V: Short term financial planning and cash management

Links between short term and long term financial financing decisions, comforts of surplus cash, options for short term financing, dynamic financing, how much cash should firm hold, investing idle cash, money market investments,

### Module-VI: Corporate control and governance

Financial goals and strategy, shareholder value analysis,, managerial implications of shareholder value, corporate governance and balanced scorecard.

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Required Texts:

- Principles of Corporate Finance, 12 th edition, Richard Brealey and Stewart Myers, McGraw-Hill Financial, 2017
- Corporate Finance, by Stephen A. Ross, Randolph W. Westerfield and Jeffrey Jaffe (RWJ), 10<sup>th</sup> edition, McGraw-Hill 2013.

# BUSINESS VALUATION

Course Code: MBF4311

Credit Units: 03

## COURSE DESCRIPTION AND OBJECTIVES:

The objective of this course is to develop a detailed understanding of the tools used by market professionals and corporate managers to analyze the value of companies and stocks. The central theme of the course will be the pricing of equity securities using discounted cash flow and relative valuation techniques. Students will apply what they've learned to the valuation of a specific company, with the goal of becoming an expert on that firm. After completing this course, students should be able to: (i) Develop quantitative models for firm and equity valuation based on DCF and multiples. (ii) Identify and interpret accounting and non-accounting information necessary for valuation. (iii) Identify and interpret the key value drivers for a firm or industry. (iv) Critically analyze firm and equity valuation models and assumptions developed by others. (v) Present valuation analyses and assumptions in a professional manner.

## Course Contents:

### Module-I: Introduction to Valuation

Valuation vs. Pricing. A philosophical basis for Valuation, Misconceptions about Valuation, Biasness in Valuation, Uncertainties in Valuation. Approaches to Valuation, Understanding Financial Statements, Basics of Risk.

### Module-II: Discounted Cash Flow Valuation

Discounted Cashflow Valuation: Basis for Approach, Going Concern versus Liquidation Valuation, Equity Valuation versus Firm Valuation, Three pathways to DCF value, Advantages & Disadvantages of DCF Valuation, Riskless Rates and Risk Premiums, Estimating Risk Parameters and Costs of Financing, Measuring Earnings, Earnings to Cash Flows, Estimating Growth, Closure in Valuation: Estimating Terminal Value, Free Cash flow to Equity Models,

### Module-III: Relative Valuation

Fundamental Principles of Relative Valuation, Choices with multiples- Earnings Multiples, Book Value Multiples, Choosing the Comparable firm: Making the comparison, Revenue and Sector-Specific Multiples, Advantages & Disadvantages of Relative Valuation, DCF vs Relative valuation.

**Module-IV: Applicability of Valuation** ( Cases and research papers); Valuing Financial Services firm, Valuing Firms with Negative Earnings, Valuing Young and Start-up Firms, Valuing Private Firms, valuing Acquisitions and Takeovers,

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Required Textbook

- Investment Valuation: Tools and Techniques for Determining the Value of Any Asset, Second Edition, University Edition
- by Aswath Damodaran

## Recommended other Textbook

- Krishna G. Palepu and Paul M. Healy: *Business Analysis & Valuation Using Financial Statements*, Text Only (PHB) 5th Edition, Cengage Learning 2012.
- Joshua Rosenbaum and Joshua Pearl: *Investment Banking: Valuation, Leveraged Buyouts, and Mergers and Acquisitions*, John Wiley & Sons; 2nd edition (2013), ISBN: 1118656210

# CORPORATE RESTRUCTURING

Course Code:MBF4312

Credit Units: 03

## Description

The significance of Merger, Acquisition and Corporate Restructuring cannot be overemphasized in a rapidly changing economic environment and consequent pressure on companies to cope with the emerging challenges. This subject deals with the different strategies of corporate restructuring and its impact on the shareholders' value.

## Objectives

1. To understand the various types of activities that falls under the purview Corporate Restructuring
2. To understand intricacies of Corporate Restructuring
3. To understand motives and methods of M&A
4. To deal with Issues involved in takeover

## Assessment

The subject would comprise of both theory and numerical solving. The assessment of the learner would be done through assignments, case discussion, articles on current research & issues, problem solving and simulation. The students would be expected to do a project, quiz and comprehend the application part of the concepts taught in the class.

## Course Contents:

**Module-I:** Introduction: Corporate Restructuring: Concept and Form: Merger, Consolidation, Acquisition, Divestiture, Demerger, Carve out, Joint venture, Delisting of Securities. M&A as a Growth Strategy, Takeover and Defence Tactics, Funding of Acquisition, LBO and MBO.

## Module-II:

Growth strategy and Merger & Acquisition: Growth strategy: Intensive, integrative and Diversification growth, Theory of M&A: Monopoly theory, Efficiency Theory, Valuation theory, Raider Theory and Empire Building Theory, Case study.

## Module-III:

Takeover and Defence Tactics: Friendly Vs Hostile Takeover, Takeover Tactics: Dawn Raid, Bear hug, Saturday night special, proxy fight, Successful Takeover Tactics in India - Defence Tactics: Crown jewels, blank cheque, Shark repellents, Poison pill and put, people pill, Green nail and buy-back as takeover defence tactic - Intents of Target Companies.

## Module-IV:

Legal aspect: Companies Act, 2013, SEBI (Buy -back of Securities) Regulation, 1998, SEBI (Substantial Acquisition of Shares and Takeover) Regulation, 1997, SEBI (Delisting of Securities) Guidelines, 2003 and Listing agreement clauses of NSE and BSE (40 A and 40 B)

## Module-V:

Accounting and Taxation aspect: Methods of Accounting for M&A, Accounting for Demerger, Tax issues relating to M&A: Capital Gain, Carry forward and Set Off Losses, Numerical Problems

## Module-VI:

Funding and Valuation: Payment Consideration, Sources of Fund, LBO and Going Private. Valuation of Target Company: Concept of Value of a Company, Methods of Enterprise and Equity Valuation, Dividend Discount Model, DCF Model, Shareholder's Value Creation: MVA Approach and EVA Approach.

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# FINANCIAL MODELING USING MS- EXCEL/SPREADSHEET

Course Code:MBF4313

Credit Units: 03

## Introduction

Modeling techniques for accurate financial forecasting are used in many areas of finance, such as derivatives, valuation, project evaluation, deal structuring, portfolio management and the like. In the course, the participants will learn the model building skills required to build powerful models in finance with the help of excel. There are many features of model building that are common irrespective of the final model that one intends to build. In the course we will also emphasize on the different model building skills that one should have irrespective of the final use that one is going to make of it.

**By the end of the course the participants should be better able to:**

- Understand the basic and advanced features of excel
- Understand how to build models in excel to suit one's purpose
- Building models in different areas of finance including investments, corporate finance and derivatives
- Identifying and controlling the key sensitivities with advanced spreadsheet simulation
- Understand how risk can be built into the model to enhance decision making process

## Course Contents:

**Module-I: Understanding the Basic Features of Excel :** Introduction to Modeling, Introduction to Excel, Database Functions in Excel Creating Charts Using Forms and Control Toolbox Understanding Finance Functions present in Excel Creating Dynamic Models

**Module-II: Simulation using Excel:** Different Statistical Distributions used in Simulation Generating Random Numbers that follow a particular distribution Building Models in Finance using Simulation

**Module-III: Excel in Capital Budgeting, valuation:** Preparing common size statements directly from Trial Balance Forecasting Financial Statements using Excel Analysing Financial Statements by using Spreadsheet Model ; Determining Project Viability Risk Analysis in Project Appraisal Simulation in Project Appraisal; Determination of Value Drivers, DCF Valuation, Risk Analysis in Valuation; Determining Efficient Portfolio, Creating Dynamic Portfolios Portfolio Insurance Fixed Income Portfolio Management using Excel.

**Module-IV: Understanding Subroutines and Functions** and building simple financial models using subroutines and functions Recording and Editing Macros Subroutines and Functions Decision Rules Message Box and Input Box Debugging, **Designing Advanced Financial Models** using VBA User Forms Other Advanced Features Actual Model Building.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# FINANCIAL RISK MANAGEMENT

**Course Code: MBF4314**

**Credit Units: 03**

## **Course Objectives:**

The FRM challenges candidates to understand and apply a range of knowledge and skills necessary to function effectively as a risk manager. Its curriculum is updated annually by a group of distinguished risk professionals and leading academics with diverse backgrounds, ensuring that the designation meets the evolving demands of the financial industry. The FRM helps professionals in risk management, investment management, or other critical areas of the financial services industry to broaden their knowledge of the different types of financial risk and enhance their current skill set. Those who are just beginning their careers benefit from the breadth of the curriculum, which exposes candidates to the major strategic aspects of risk management. More established practitioners often choose to become Certified FRMs in order to ensure that they are apprised of the latest trends in risk management, or because they want to challenge themselves by testing their knowledge against an elite pool of risk managers.

## **Course Contents:**

### **Module I: Foundations of Risk Management**

Basic risk types, measurement and management tools, Creating value with risk management; The role of risk management in corporate governance; Enterprise Risk Management (ERM); Financial disasters and risk management failures; The Capital Asset Pricing Model (CAPM); Risk-adjusted performance measurement; Multifactor models; Data aggregation and risk reporting; Ethics and the GARP Code of Conduct.

### **Module II: Financial Markets and Products**

Structures and functions of financial institutions, Structure and mechanics of OTC and exchange markets Structure, mechanics, and valuation of forwards, futures, swaps, and options ; Hedging with derivatives; Interest rates and measures of interest rate sensitivity; Foreign exchange risk; Corporate bonds; Mortgage-backed securities

### **Module III : Valuation and Risk Models**

Value-at-Risk (VaR)-VaR mapping • Expected shortfall (ES), Stress testing and scenario analysis • Option valuation • Fixed income valuation • Hedging • Country and sovereign risk models and management • External and internal credit ratings • Expected and unexpected losses • Operational risk

### **Module IV: Basel-I, Basel-II, Solvency-II, Basel 2.5, Basel-III:**

The reasons for regulating Banks, Bank Regulation Pre-1988, 1988BIS Accord, The G-30 Policy recommendation, Netting, 1996 Amendment, Basel II, Credit Risk capital under Basel II, Operational Risk capital under Basel II, Pillar 2- Supervisory Review, Pillar 3- Market Discipline, Basel 2.5, Basel-III.

### **Module V: Credit Risk Measurement and Management**

• Credit analysis • Default risk: Quantitative methodologies • Expected and unexpected loss • Credit VaR • Counterparty risk • Credit derivatives • Structured finance and securitization

### **Module VI: Operational and Integrated Risk Management**

Risk-adjusted return on capital (RAROC) • Economic capital frameworks and capital planning • Liquidity risk measurement and management • Failure mechanics of dealer banks • Stress testing banks • Third-party outsourcing risk • Risks related to money laundering and financing of terrorism • Regulation and the Basel Accords  
Banking Resolution and Deposit Insurance Act (BRDI) 2017, Insolvency and Bankruptcy Code (IBC).

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# FIXED INCOME SECURITIES ANALYSIS

Course Code: MBF4315

Credit Units: 03

## Course Objectives:

This course is intended to analyze the fixed income securities markets and its implications for investments. It will analyze the market characteristics, instruments, selling techniques, pricing and valuation issues, floating rate instruments, relations with money market instruments, risk and return of fixed income securities, portfolio management techniques, term structure modeling, bond indexing, corporate debt and convertibles, bonds with embedded options, municipal bonds markets, corporate bonds & credit risk analysis, interest rate risk management with swaps, options and futures, bond management & trading. The course intends to cover the specific features of the Indian Fixed Income Securities Markets. The course will construct several Excel based techniques to analyze bond valuation, term structure, portfolio statistics and risk mapping

## Course Contents:

**Module-I:** Overview of Fixed Income Securities, The Grammar of Fixed Income Securities, Fixed Income Markets, Institutional Arrangements, Market Participants and Instruments, Investors Perspectives, & Market Conventions, features of a government securities market

**Module-II:** Bond Valuation, Time Value of Money, Price and Yield Conventions, Bond Valuation under flat term structure, Yield & return, & horizon return, Valuation of other Bonds, Floating Rate securities, index bonds, illiquid bonds

**Module-III:** Understanding market linkages, bonds and money market instruments, MIFOR Curve Risk Identification in Bonds: Duration, Convexity, and Immunization Risk measurement in fixed income securities using value at risk, Corporate Debt, Valuation, valuation of convertibles  
Yield Curve Analysis: Par Value, Zero, Spot Curve, Bootstrapping, spot & forward rates, (Nelson-Seigel model of the Indian NSE)

**Module-IV:** Government securities auction & Bidding, Uniform vs discriminatory auction, bidding behavior, winners curse analysis Auction Game: students run a game in groups, with bidding an upcoming auction, using real time market prices, and finalist selected based on their success, performance in WI trade, Bond Indexing, methodology for constructing a bond index, index return comparison

**Module-V:** Portfolio construction, setting portfolio objectives, interpreting portfolio parameters, Passive vs Active portfolio management strategies, bullet vs barbell, other strategies. Global Bond Markets, foreign currency bonds, dual currency bonds, analysis of global bond spread behavior in recent times.

**Module-VI:** Fixed Income Derivative Markets: FRAs, Interest rate Swaps, swap pricing and swap curve, Fixed Income Derivative Markets: Interest rate futures, Fixed Income Derivative Markets: Interest Rate Options, Caps & Floors pricing

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Required Textbook:

- Frank Fabozzi, Bond Markets, Analysis, and Strategies, Seventh or Eighth Edition,
- Pearson Suresh Sundaresan, Fixed Income Markets and Their Derivatives, 2009,

# SUMMER INTERNSHIP EVALUATION

Course Code: MBF4335

Credit Units: 06

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**)

## INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. **Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.**

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include **five sections** in the order described below.

1. **The Title Page** – An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content** – An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.
5. **Appendices** – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

## INTERNSHIP REPORT

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (Incase a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report should be as per the standard layout prescribed by the organization wherein the student

undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

➤ **Title or Cover Page**

The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

➤ **Acknowledgements**

Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

➤ **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form.

While presenting the results, write at length about the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

➤ **Conclusion(s) & Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly. Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

➤ **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

➤ **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**Examples**

**For research article**

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic Escherichia coli O157: H7. ClinMicrobiol Infect, 8(suppl 1): 116–117.

**For book**

Kowalski,M.(1976) Transduction of effectiveness in Rhizobium meliloti. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), 7: 63-67

**The Layout Guidelines for the Internship File & Internship Report**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

**Examination Scheme:**

Continuous Evaluation by faculty guide	15%
Continuous evaluation by CRC	15%
Feedback from industry guide	35%
Report, Presentation & Viva Voce	35%
<b>TOTAL</b>	<b>100%</b>

# Syllabus - Fourth Semester

## BANK ACCOUNTING & AUDIT

**Course Code: MBF4401**

**Credit Units: 02**

### Course Objectives:

The course will help the students to understand the concepts of accounting and auditing of banks and their applications. The course will help students in analysis of the work of an auditor of a bank as well as interpretation of the financial.

### Course Contents:

#### Module I: Overview of Auditing

Meaning, Objects, Basic Principles, Auditing and Assurance Standards and Techniques. Classification of Audit, Audit planning, qualities of auditor, advantages and limitations of audit.

#### Module II: Internal Control, Internal Check and Internal Audit

Introduction, Necessity of Internal Check: Difference between Internal Check and Internal Control, Fundamental Principles of Internal Check, Difference between Internal check and Internal audit.

#### Module III: Audit Procedure

Vouching, definition, features, examining vouchers, Vouching of Cash book and trading transactions, Verification and Valuation of Assets & Liabilities: Meaning, definition and objects, Vouching vs. Verification

#### Module IV: Bank Accounting

Accounting concepts and conventions, Accounting in Banks and Balance Sheet, Preparation of financial statements, Significant features of accounting systems of banks, Principal books of accounts, Discussion with final accounts of public sector, private sector and private banks in India

#### Module V: Special Areas of Audit

Tax audit and Management audit - Recent Trends in Auditing – Basic considerations of audit in EDP Environment. Credit Audit

# RISK MANAGEMENT IN BANKING

**Course Code: MBF4403**

**Credit Units: 03**

## **Course Objectives:**

The basic objective to be met is to make the students understand the various risks associated with banks and to create a fundamental awareness about identification, measurement and management of various banking risks.

## **Course Contents**

### **Module I: Risk Management in Banks**

Structure of Risk Management, Concept and types of Banking Risk, Importance of Risk Management, Risk Management Process, Various operations of Banks in relation to risk, Banking Regulations on Risks.

### **Module II: Risk Management Frame work in Banks**

Elements of Risk Management Frame work; Systematic Risk Management in Banks; Involvement of the management in the Risk Management Frame work. Tools and Techniques for Managing different risks in banks, Risk Management Strategies.

### **Module III: Market Risk Management in Banks**

Interest Rate Risk: Types of Interest rate risks; Identification of Interest Rate Risk, Management of Interest Rate Risk; Gap Methodology; Duration Analysis. BASEL-I, BASEL-II, BASEL-III, Capital Adequacy

Liquidity Risk: Liquidity Risk identification and the Need for managing it in the Long/short Run; Fundamental Approach to Long Run Liquidity Risk Management; Technical Approach to short Run Liquidity Risk Management

Foreign Exchange Risk: Nature and Magnitude of Exchange risk; Tools and Techniques for Managing Forex Risk; Managing the currency risk

### **Module IV: Credit Risk Management in Banks**

Identification of Credit Risk: Drivers of Credit Risk; Capital Adequacy Requirements; Bank for International Settlements (BIS) Risk-Based Capital Requirements Frame Work

### **Module V: Operational Risk Management in Banks**

Operational Risk and Its Evolution; Major Sources of Operational Risk; Measurement of Operational Risk; Management of Operational Risk. Market Risk Management in Banks- Operational Risk and Sources of Risk Measuring operational Risk and Value-at-Risk (VaR); Approach to VaR

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# TREASURY BANKING

**Course Code: MBF4405**

**Credit Units: 03**

## **Course Objective:**

To Equip students proficient in understanding of the IPO process. Learn how IPOs are arranged, managed, priced and distributed. The sequence of the issue process, with timelines. The role of merchant bankers in the issue process. Key regulations and documentation requirements To make students acquainted with depository receipts and basics of their issuance process. To understand the nitty-gritty of merger and acquisition & role of an Investment bank in facilitating the deal.

## **Course Contents:**

### **Module I: Introduction**

Overview of investment Banking, Forms of Bank investment, Key Elements of Investment Banking, Principles and Culture of Investment Banking Regulation of Investment Banking, Short-term investment, Long-term investment, Investment in Foreign Exchange.

### **Module II: Initial Public Offering - Issuance Process**

IPO, Preparation/approvals stage- Decision to go for IPO Appointment of lead manager and legal counsel Due Diligence Draft red herring prospectus Filing with SEBI and stock exchanges Marketing and estimation of price range- Pre-marketing Road shows Book building Launch and completion- Pricing and allocation ROC filing of final prospectus Listing

### **Module III:**

Depository receipts- ADR GDR EDR IDR-need, ADR- issuance process, tax treatment, regulations, Fungibility, reverse fungibility. Form 20F, F6. IDR-Guidelines.

### **Module IV:**

Bonds Issuance process. Redemption/ Rollover of Debentures. FCCB, Commercial paper- Issuance process, Commercial paper- Redemption process.

### **Module V:**

Merger and Acquisition overview. Types of transactions under M&A. M&A deal drivers. Role of an Investment bank in M&A transaction.

### **Module VI:**

Offer document, Key features of offer documents, Cover page-General risk clause, issuer absolute responsibility. Inner page information, No complaint information.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# DISSERTATION

**Course Code: MBF4437**

**Credit Units: 06**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Selecting the Dissertation Topic**

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

## **Planning the Dissertation**

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

## **The Dissertation plan or outline**

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

## **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct quotation and what is your paraphrase.

## **Dissertation format**

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required:

Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

## **The Layout Guidelines for the Dissertation**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

## **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion from the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

**Examination Scheme:**

Contents & Layout of the Report	30
Conceptual Framework	10
Objectives & Methodology	15
Implications & Conclusions	15
Viva/ Presentations	30
<b>TOTAL</b>	<b>100</b>

# FINANCIAL ENGINEERING

**Course Code:MBF4406**

**Credit Units: 03**

## **Course Objective:**

Finance has evolved as an exciting discipline in terms of innovations it has witnessed in recent past. This aspect known as Financial Engineering starts where financial analysis ends. The objective of the course is to enable the students to think in terms of innovative solutions to financial problems with particular emphasis on understanding new risks, which the changing scenario of finance is creating for individuals and firms and equip them with innovative tools of financial engineering called derivatives and skills to use them in forming effective strategies to cope with the changing environment and hedge against the financial risks.

## **Course Contents:**

### **Module I: Introduction**

Changing Environment and Increasing Price Risks, Financial Engineering as a response to Increased Risks, Types of Risks and Risk Management, Tools of Risk Management, Conceptual and Physical Tools of Financial Engineering, Effect of Speculation and Arbitrage on Market Efficiency, Derivative Market in India

### **Module II: Futures and Forwards**

The Futures Markets, Buying and Selling Futures, Devising a Hedging Strategy Using Futures, Stock Index Futures, Value at Risk, Short Term and Long Term Interest Rate Futures, Foreign Currency Futures and Commodity Futures

### **Module III: Swaps**

Structure of a Swap, Interest Rate Swaps, Currency of Swaps, Commodity Swaps, Other Swaps, Credit Risk, Role of a Swap Dealer.

### **Module IV: Options**

Options Markets; Properties of Stock Option Prices; Option Pricing Models – Binomial Model, Black-Scholes; Model, Single Period Options – Calls and Puts, Payoff Diagrams of Simple and Complex Option Strategies, Cash Settled Options, Multi-Period Options – Caps, Floors, Collars, Captions, Swaptions and Compound options, Cross-currency Futures and Options.

### **Module V: Other Innovations**

Debt Market Innovations, Mortgage Backed Securities, Hybrid Securities, Asset-Liability Management

### **Module VI: Recent Trends**

Exotic Options, Synthetic Instruments, Developments in Equity-Based Strategies, Direct and Cross Hedges, Future Trends and Issues in Financial Engineering.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# CORPORATE TAX PLANNING

**Course Code: MBF4408**

**Credit Units: 03**

## **Course Objective:**

At the end of the course, the students should be able to understand Indian accounting Standards and the impact of USGAAP on Financial Statements. To create an understanding of the accounting of Mergers and Acquisitions and Valuation of goodwill & Shares.

In addition to Corporate Accounting the students should be able to demonstrate an understanding of the tax provisions enabling them to make use of legitimate tax shelters, deductions, exceptions, rebates and allowances; with the ultimate aim of minimizing the corporate tax liability.

## **Course Contents:**

### **Module I: Accounting Norms**

Various Accounting Standards in India and comparison with International accounting Standards and US.GAAP.

### **Module II: Accounting for Merger and Acquisitions**

Accounting for Acquisition of Business, Calculation of Purchase consideration and Profit (Loss) Prior to Incorporation. Accounting for Amalgamation in the nature of Merger and in the nature of Purchase.

### **Module III: Valuation of Goodwill and Shares**

Valuation of Goodwill – Different Methods of Valuation of Goodwill, Valuation of Shares – Net Asset Backing Method and Yield Method.

### **Module IV: Basic Concepts of Income Tax**

Introduction to Income Tax Act, 1961, Residential Status, Exempted Incomes of Companies An overview of various provisions of Business & profession & Capital gains – applicable to companies Goods and Services Tax – Features - Implications - Rate slap - Model - Products Excluded From GST – Registration Procedure

### **Module V: Assessment of Companies**

Computation of taxable income, MAT, Set off & carry forward of losses in companies, Deductions from Gross total income applicable to companies, Tax planning with reference to new projects/expansions/rehabilitation plans including mergers, amalgamation or de-mergers of companies, Concept of avoidance of double taxation.

## **Examination Scheme:**

# INVESTMENT BANKING

**Course Code: MBF4409**

**Credit Units: 03**

## **Course Objective:**

To Equip students proficient in understanding of the IPO process. Learn how IPOs are arranged, managed, priced and distributed. The sequence of the issue process, with timelines. The role of merchant bankers in the issue process. Key regulations and documentation requirements To make students acquainted with depository receipts and basics of their issuance process. To understand the nitty-gritty of merger and acquisition & role of an Investment bank in facilitating the deal.

## **Course Contents:**

### **Module I: Introduction**

Overview of investment Banking, Forms of Bank investment, Key Elements of Investment Banking, Principles and Culture of Investment Banking Regulation of Investment Banking, Short-term investment, Long-term investment, Investment in Foreign Exchange.

### **Module II: Initial Public Offering - Issuance Process**

IPO, Preparation/approvals stage- Decision to go for IPO Appointment of lead manager and legal counsel Due Diligence Draft red herring prospectus Filing with SEBI and stock exchanges Marketing and estimation of price range- Pre-marketing Road shows Book building Launch and completion- Pricing and allocation ROC filing of final prospectus Listing

### **Module III**

Depository receipts- ADR GDR EDR IDR-need, ADR- issuance process, tax treatment, regulations, Fungibility, reverse fungibility. Form 20F, F6. IDR-Guidelines.

### **Module IV**

Bonds Issuance process. Redemption/ Rollover of Debentures. FCCB, Commercial paper- Issuance process, Commercial paper- Redemption process.

### **Module V**

Merger and Acquisition overview. Types of transactions under M&A. M&A deal drivers. Role of an Investment bank in M&A transaction.

### **Module VI**

Offer document, Key features of offer documents, Cover page-General risk clause, issuer absolute responsibility. Inner page information, No complaint information.

## **Examination Scheme:**

# BEHAVIOURAL FINANCE

Course Code:MBF4410

Credit Units: 03

## Course Description:

This course is intended to complement other finance courses that are mainly based on the traditional paradigm which assumes that investors and managers are generally rational. Specifically, this course has three main objectives. First, we aim to examine how the insights of behavioural finance theories shed light on the behaviour of individual investors and finance professionals in investment decision-making and corporate financial decision-making. Second, we explore the possibility to improve investment performance and corporate performance by recognising the cognitive biases and applying appropriate 'debiasing' techniques. Finally, we investigate the implications of behavioural finance for the construction of good corporate governance mechanisms.

## Course Objectives:

After this students will be able to:

- Identify persistent or systematic behavioral factors that influence investment behavior
- Understand and critically discuss the differences between a behavioural finance perspective and a traditional finance perspective
- Understand and critically discuss the cognitive biases and errors of judgment that affect financial decisions
- Critically evaluate behavioural influences involving individuals in investment decisions
- Critically evaluate behavioural influences involving corporate (executive) financial decisions
- Critically discuss important developments in this new area and the associated practical insights they provide

## Course Contents:

**Module I: Psychology & Finance:** Behavioral Finance an overview, Traditional vs behavioral finance, Morals & Ethics: why they matter in the business world.

**Module II: Behavioral Corporate Finance:** Corporate Governance, Loyalty issues, corporate ethics issues, agency conflicts, Behavioral portfolio management.

**Module III: Behavioral Biases in Finance:** Definition of average investor; Behavioral Biases & corporate decision (valuation, capital budgeting, capital structure, dividend policy and Mergers & Acquisition), Belief biases: Biases of average investor, Forecasting Biases, overconfidence, self control, Limited attention and categorization.

**Module IV: Investors Decision:** Perceived risk on financial product, Social interactions and positional concerns. The role of advisors, advertising, Emotion & Investment Decision, Investment decision cycle: judgment under uncertainty, group behavior: Conformism, herding, fatal attraction.

**Module V: Supply by firms and managerial decisions:** Supply of securities and firm investment characteristics (market timing, catering) by rational firms; Associated institutions; Relative horizons and incentives; Biased managers.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# FINTECH: TECHNOLOGY INNOVATION IN FINANCIAL SERVICES

Course Code:MBF4411

Credit Units: 03

## Introduction

**Financial technology**, also known as **fintech**, is an economic industry composed of companies that use technology to make financial services more efficient. Financial technology companies are generally startups trying to disrupt incumbent financial systems and challenge traditional corporations that are less reliant on software.

This course aims to give an insight in the financial technology revolution, and the disruption, innovation and opportunity therein. We will see the global fintech investment space; this course will aggregate diverse industry expertise into a single informative course to provide students with the answers they need to capitalize on this lucrative market. Key industry developments are explained in detail, and critical insights from cutting-edge practitioners offer first-hand information and lessons learned.

The financial technology sector is booming, and entrepreneurs, bankers, consultants, investors and asset managers are scrambling for more information: Who are the key players? What's driving the explosive growth? What are the risks? This course collates insights, knowledge and guidance from industry experts to provide the answers to these questions and more.

## By the end of the course the participants should be better able to:

- Get up to speed on the latest industry developments
- Grasp the market dynamics of the 'fintech revolution'
- Realize the sector's potential and impact on related industries
- Gain expert insight on investment and entrepreneurial opportunities
- Learn about the modeling skills and emerging technologies

## Course Contents:

### Module-I : Introduction to fintech :

#### FinTech – Breaking the financial services value chain.

Payments; Deposits and Lending; Capital Raising; Investment Management; Market Provisioning; Insurance

#### FinTech Hubs

#### The history of fintech

**Module-II:** Technology :Blockchain, wearables and other emerging technologies, Financial modeling and Fintech : Big Data 102 and Artificial Intelligence 102

### Module-III: FinTech Solutions

- Robo-Advisors
- Rewiring the Deal – The Path Forward for B2B Supply Chains
- Payments and Point of Sales (POS) Innovation
- Predictive Algorithms – Building Innovative Online Banking Solutions
- Big Data is the Cornerstone of Regulatory Compliance Systems
- FinTech Solutions in Complex Contracts Optimization
- Behavioural Biometrics – A New Era of Security
- Ultra-Fast Text Analytics in Trading Strategies
- Regulated Crowdfunding Ecosystems
- Remittances – International FX Payments at Low Cost
- Payment Solutions Including Apple Pay
- FinTech Innovation for Wearables

### Module-IV: The future of Fintech

- Using emerging technologies
- The future of financial services
- Innovation through big data
- The API economy

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

### MANAGEMENT PROCESS AND ORGANIZATION BEHAVIOUR

**Course Code: MBF4101**

**Credit Units: 03**

**Course Objective:**

To help the students gain understanding of the functions and responsibilities of the manager and to provide the student understand Human Behaviour in organizations so as to improve his managerial effectiveness.

**Course Contents:**

**Module I: Management vs. Manager**

Evolution of management thought, Functions of management, Roles and Skills of a manager, Emerging challenges of management.

**Module II: Organization**

Nature and structure of organization, Types of organizations, Line and staff relationships, Formal and informal organizations.

**Module III: Introduction to Organization Behaviour**

Overview of organization behaviour and its importance, Organization models.

**Module IV: Individual Behaviour**

Individual behaviour, Perception and learning, Personality, Values & attitudes, Motivation: Concept theory and application

**Module V: Group Behaviour**

Group dynamics, Communication, Leadership, Power and politics, Conflicts and negotiation.

**Module VI: Organizational Culture and Change Management**

Organisational culture, Organisational change and development, Work stress and its management.

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## ACCOUNTING FOR MANAGEMENT

**Course Code: MBF4102**

**Credit Units: 03**

### **Course Objective:**

Participants in this course will develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, participants will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts. In addition the course develops skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

### **Course Contents:**

#### **Module I: Introduction**

The Financial Accounting Framework, Accounting Policies, Need of Accounting. Users of Accounting Information, Accounting Cycle, Accounting and Management Control. Balance sheet- Dual Aspect principle, Classification Items of Balance Sheet, Formats of Balance Sheet. Preparation of Balance Sheet. Income Statement- Realization vs. Accrual Principle, Format of Income Statement), Preparation of Income Statement (IAS, GAAP & IFRS) Depreciation Accounting.

#### **Module II: Measuring and Reporting**

Measuring and Reporting :Cost of sales and Inventories, Debentures, Investments, Shareholder Equity. Human Resource Accounting-Valuation of Human Resources, Recording and Disclosure in Financial Statements

#### **Module III: Management Accounting**

Contrast between Management Accounting and Financial Accounting and Reporting, Types of Management Accounting Information and their uses, General Observation on Management Accounting. Statement of Cash Flows-Profit versus Cash, Purpose and Use of Cash Flow Statement, Format of Cash Flow Statement (AS-3), Preparation of Cash Flow Statement (IAS, GAAP & IFRS).

#### **Module IV: Analyzing and Interpreting Financial Statements**

Financial Statement Analysis – Basic Relationship, Overall Measures, Profitability Ratios, Investment Utilization Ratios, Financial Condition Ratios, Making Comparisons. Du-pont analysis. Interpretations of calculated Ratios.

**Module V: Cost Accounting:** The behavior of cost- Relation of cost to volume, BEP & Profit graph- CVP analysis, Full cost and its uses. Techniques of costing. Standard costing. Strategic planning and budgeting.

### **Examination Scheme:**

Components	Assessment 1 Group Presentation	Assessment 2 In Class Quiz	Class Test/Mid Term Exam	Attendance	External
Weightage (%)	10	5	10	5	70

# MARKETING MANAGEMENT

**Course Code: MBF4104**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to provide the students exposure to modern marketing concepts, tools, and techniques, and help them develop abilities and skills required for the performance of marketing functions.

## **Course Contents:**

### **Module I: Understanding Marketing in New Perspective**

Fundamentals of Marketing, Customer Value and Satisfaction, Customer Delight, Conceptualizing Tasks and Philosophies of Marketing Management, Value Chain, Scanning the Marketing Environment, Marketing Mix Elements, Difference between marketing and Selling, Relationship marketing, Social marketing, Strategic Planning in marketing, formulating the marketing plan.

### **Module II: Analyzing Consumers & Selecting Markets**

The factors influencing consumer behavior. The stages in the buying process, the buying decision making process, factors effecting the buying decision., Market Segmentations, Levels of Market Segmentations, Patterns, Procedures, Requirement for Effective Segmentation, Evaluating the Market Segments, Selecting the Market Segments, Tool for Competitive Differentiation, Developing a Positioning Strategy.

### **Module III: Managing Product & Pricing Strategies**

Classification of products, New Product development, stages of product development, Adoption process, Product mix decisions and line management, Length, width and depth of a line, line analysis, and brand management, product life cycle, stages in lifecycle and factors affecting each stage, Managing product life cycles. Setting the price, adapting the price, initiating and responding the price changes,

### **Module IV: Designing: Managing the Integrated Communication**

Channel functions and flows. Channel design decisions. Channel management decisions. Channel dynamics; vertical horizontal and multi channel marketing systems. Market Logistics decisions. Effective Communication, Integrated Marketing Communication, Marketing Communication Process, Promotion mix, Advertising, Personal Selling, Sales Promotion and Publicity and Public Relations, Direct Marketing,

### **Module V: Emerging Trends in Marketing**

An Introduction to Internet Marketing, Multi Level Marketing, E-Marketing, Green Marketing, Event Marketing, Types of Events, Sponsorship, Cause Related Marketing, Marketing for Non Profit Organizations Marketing Strategies for Leaders, Challenges, Followers and Nichers

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# QUANTITATIVE TECHNIQUES IN MANAGEMENT

**Course Code: MBF4106**

**Credit Units: 03**

## **Course Objective:**

The aim of this course is to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the business environment using contemporary software.

## **Course Contents:**

### **Module I: Introduction**

Application of Statistics in Business; Classification of Data; Interpretation of computer output of diagrammatic and graphical presentation of data, measures of central tendency, measures of dispersion and skewness.

### **Module II: Probability and Probability Distributions**

Concepts of Probability, addition theorem, multiplication theorem, Baye's Theorem; continuous and discrete probability distribution: Binomial Probability Distribution, Poisson Probability Distribution and Normal Probability Distribution.

### **Module III: Sampling and Sampling Distribution**

Sampling: Basic Concept, Types of Sampling, Errors and Precautions in sampling, size of sample, Parameter and Statistic, Sampling Distribution of the mean, Sampling distribution of proportion, Estimation – point estimation, Interval Estimation,

### **Module IV: Tests of Hypothesis**

Null and Alternative hypothesis, One-Tailed and Two-Tailed tests of hypothesis, Type I and Type II error, rejection rule using p – Value and critical value approach. Hypothesis Testing to compare two populations: Test for one sample mean, Test for two population means (Independent Samples), Tests for two population means (Dependent Samples), Tests for two population proportions (Independent Samples), Tests for two population variances (Dependent Samples), F-test, Chi – Square Test

### **Module V: Forecasting Techniques**

Correlation - Karl Person, Spearman's Rank methods, simple linear regression analysis – Estimated regression equation, least squares method, coefficient of determination, interpretation of computer output for Regression, Introduction to time series, trend analysis

### **Module VI: Introduction to SPSS, performing univariate and bivariate analysis on SPSS**

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# FINANCIAL ENVIRONMENT

**Course Code: MBF4107**

**Credit Units: 02**

## **Course Objectives:**

Financial system of a country is closely related to the economic development. There is drastic change in the functioning of financial system in this era of liberalization, privatization and globalisation. The purpose to study Indian financial environment is to give a clear understanding and knowledge of financial system in the present scenario.

## **Course Contents:**

### **Module I: Financial System**

Financial System: Meaning and Significance-Functions of the financial system -Financial Assets-Financial markets- Classification-Financial instruments-weakness of Indian Financial System.

### **Module II: Money Market**

Money market: Definition-Features-Objectives-Features of a developed money market- Importance of Money market-Composition of Money market-Operations and Participants- Money market Instruments-features of Indian money market-Recent developments.

### **Module III: Capital Market**

Primary, Secondary and Capital Markets: New issue market-meaning-functions-methods floating new issue - intermediaries in the new issue market-merchants bankers and their functions -Recent trends in new issue market - Stock Exchanges-Functions-Structure of stock exchanges-BSE-NSE- listing of securities-Advantages of listing-methods of trading in stock exchanges-on line trading-stock indices

### **Module IV: Financial System**

Financial Institutions: commercial banks- development financial institutions- Non-banking financial corporation-Mutual Funds, insurance companies – Objectives and functions.

### **Module V: Monetary Policy and Regulatory Institutions**

Monetary Policy of India: Objectives, Monetary Operations- Open Market Operations, CRR, SLR, Bank Rate Policy, Credit Ceiling, Credit Authorization Scheme, Moral Suasion, Repo Rate and Reverse Repo Rate.

Regulatory Institutions – RBI – Role and Functions. The Securities and Exchange Board of India – Objectives –Functions –Powers -SEBI guidelines for Primary and Secondary Market.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# HUMAN RESOURCE MANAGEMENT

**Course Code: MBF4108**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

## **Course Contents:**

### **Module I: Human Resource Management in Perspective**

Nature and scope of HRM, HRM functions, HRM models, understanding concepts of Personnel Management, Human Resource Development and Strategic Human Resource Management, HR Environment, Changing Role of HR.

### **Module II: Meeting Human Resource Requirements**

Job Analysis, Job Description, Strategic Human Resource Planning, Recruitment, Selection Process, Methods – Interview, Tests, Placement and Induction

### **Module III: Training & Developing of Employees**

Training and Development, Understanding of Performance Management Systems, Potential Appraisal, Career Development

### **Module IV: Managing Compensation**

Job evaluation, Methods of Job Evaluation, Strategic Compensation, Equity Theory, Components of Pay Structure, Designing and Administration of Wage and Salary Structure, Wage Regulations in India

### **Module V: Employee Relations**

Overview of Industrial Relations, Industrial disputes, Collective Bargaining, Workers Participation and Management, Grievance handling

### **Module VI: Emerging Trends in HRM**

Overview of Human Resource Information System (HRIS), Introduction to HR Audit, IHRM Practices, Cross- Cultural and Diversity Management, Work-life integration, Human Resource Outsourcing

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# INFORMATION TECHNOLOGY AND E-COMMERCE

**Course Code: MBF4109**

**Credit Units: 02**

## **Course Objective:**

This course will expose students to developments in computer technology and understand the working of a computer system. It will introduce end-user computing and build skills in using IT and understanding various technologies like internet, telecom, DBMS concepts, e-commerce etc. The course will expose the students to the latest trends in e-business models, electronic payment systems and data & information security

## **Course Contents:**

### **Module I: Modern Computer Systems**

Evolution of Computer Systems, Input, output and storage technologies, Computer Assisted Control and Automation, (e.g. Delhi Metro , Digitally Controlled Car engines etc.), Computer Controlled Biometric/RFID based Access Control , Contemporary hardware and software platforms(Open Source, Web Software etc.), Storage of Data Resources

### **Module II: Data Resource Management**

Introduction to DBMS, Benefits of DBMS over traditional file system, Types of DBMS, Application of DBMS using MS-ACCESS / ORACLE as a tool for understanding of DBMS concepts. SQL Query handling, Forms, Concept of Data Warehouses and Data Marts, Introduction to Data Centers. Storage Technologies and Architecture (DAT, NAS, SAN etc. ). Live examples of storage strategies of companies like Google, Amazon Wal-Mart dealing with storage crisis

### **Module III: Telecommunications and Computer Networks**

Networked Enterprise :- Components, Types of networks, Advantages of Network Environment, Business Uses of Internet, Intranet and Extranet, Network Topologies, Web 2.0/3.0, Distributed/Cloud/Grid Computing, GSM & CDMA, GPRS ,Features of 3G & 4G technologies, VOIP and IPTV.

### **Module IV: Electronic Commerce Systems**

Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services.

### **Module V: E-Commerce Business Models & EDI**

Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI. Various business models in Ecommerce like B2C, B2B, C2C.

### **Module VI: E-Payment Systems and Security Management**

Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards.

The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software, Hacking etc.) and counter measure. Definition of Cyber Crime and Types. Antivirus, Firewalls, Anti-Spyware, Security Audit, Discussion on Overview of IT-ACT 2000.

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# Syllabus - Second Semester

## FINANCIAL MANAGEMENT

**Course Code: MBF4201**

**Credit Units: 03**

### Course Objective:

The objective of this course is to develop an understanding of short-term and long-term financial decisions of a firm and various financial tools used in taking these decisions. It is also aimed to develop the understanding of the financial environment in which a company operates and how it copes with it.

### Course Contents:

#### Module I: Introduction

A Framework for Financial Decision-Making- Financial Environment, Changing Role of Finance Managers, Objectives of the firm.

#### Module II: Valuation Concepts

Time Value of Money, Risk and Return, Financial and Operating Leverage.

#### Module III: Financing Decisions

Capital Structure and Cost of Capital, Marginal Cost of Capital.

#### Module IV: Capital Budgeting

Estimation of Cash Flows, Criteria for Capital Budgeting Decisions, Issues Involved in Capital Budgeting, Risk analysis in Capital Budgeting – An Introduction.

#### Module V: Working Capital Management

Factors Influencing Working Capital Policy, Operating Cycle Analysis, Management of Inventory, Management of Receivables, Management of Cash and Marketable Securities, Financing of Working Capital.

#### Module VI: Dividend Policy Decisions

An introduction: Different Schools of Thought on Dividend Policy.

### Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## BUSINESS RESEARCH METHODS

**Course Code: MBF4203**

**Credit Units: 02**

**Course Objective:**

The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

**Course Contents:****Module I: Introduction**

Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal

**Module II: Measurement and Data Collection**

Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques, measures of central tendency mean, median, mode; measures of dispersion, data processing

**Module III: Data Analysis I**

Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi- square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test

**Module IV: Data Analysis-II**

Simple linear regression: coefficient of determination, significance tests, residual analysis, Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)

**Module V: Report Writing**

Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

Case study must be included in the discussion.

**OPERATIONS MANAGEMENT**

**Course Objective:**

The course aims at developing an understanding of the strategic and functional issues in the operational environment of any organization, of the various decisions involving the operational activities, and of the methods enabling them taking the best possible alternative decision.

**Course Contents:****Module I: Introduction**

Operations in manufacturing and services, responsibility of Operations Manager, Operations strategy and competitiveness, process analysis, manufacturing process and service process selection and design, job design and work measurement

**Module II: Strategic Decisions**

Facility location decisions, factors affecting location, location techniques: factor rating method, centroid method, facility layout, process layout, systematic layout planning, product layout, line balancing, fixed position layout, service operations layout, types of capacity, capacity planning: long term and short term, economies of scale

**Module III: Operating Decisions**

Aggregate Planning, production planning and control (PPC), benefits of PPC, Master Production Scheduling, Operations scheduling: loading, sequencing, priority rules and techniques, Materials Requirement Planning (MRP), concerns in MRP

**Module IV: Supply Chain Management**

Recent issues in SCM: Role of IT in SCM, CRM Vs SCM, structure of supply chain, benchmarking concept, features and implementation, outsourcing decisions, value addition in SCM

**Module V: Inventory Management**

Inventory management: Objectives, factors, process, inventory costs, inventory models, inventory control techniques: ABC, VED, EOQ, SED analysis, Just-in-Time (JIT), JIT vs traditional systems of operations, JIT in services

**Examination Scheme:**

# ECONOMICS FOR MANAGEMENT

**Course Code: MBF4209**

**Credit Units: 02**

## **Course Objective:**

To familiarize the students with theoretical concepts of modern Economic Analysis for Management so that they can use these as inputs in managerial decision making process. In this course adequate emphasis has been given on making students understand and critically analyze key economic variables both at micro and macro levels in the domestic and international domains. The idea is that such comprehensive understanding of economic concepts will allow them to apply the acquired knowledge in business operations and make strategies for the firm operating under a dynamic business environment.

## **Course Contents:**

### **Module I: Introduction to Managerial Economics, Demand Analysis and Demand Forecasting**

Introduction to Managerial Economics: Meaning and Nature of Managerial Economics, Significance of Managerial Economics, Scope of Managerial Economics. Demand Analysis: Meaning of Demand, Determinants of Demand, Individual and Market Demand Functions, Individual and Market Demand Curves, Law of Demand, Exception of Law of Demand. Elasticity of Demand: Types of Elasticity of Demand, Significance of Elasticity of Demand. Demand Forecasting: Purpose of Demand Forecasting, Steps Involved in Forecasting, Determinants of Demand Forecasting, Methods of Demand Forecasting.

### **Module II: Theory of Supply, Production, Cost and Revenue Analysis**

Supply: Law of Supply, Determinants of Supply, Shift of Supply and Change in Supply, Elasticity of Supply, Kinds of Elasticity of Supply, Determinants Elasticity of Supply. Theory of Production: Meaning of Production, Short –run Analysis of Production, Law of Variable Proportion, the Three Stages of Production, Returns to Scale. Analysis of Cost: Cost and Managerial Decision-making, Types of Cost, Cost Function, Relationship between Production and Cost, Short Run Cost Function, Long Run Cost Function, Relation between Short-run and Long-run Cost Curves, Economies of Scale. Break-Even Analysis. Concept of Revenue.

### **Module III: Market Structure and Price Determination**

Perfect Competition: Introduction of Perfect Competition, Characteristics of Perfect Competition, Demand Curve of Firm and Industry, Equilibrium of the Firm in the Short Run and Long Run. Effects of Tax Imposition under Perfect Competition. Monopoly: Assumptions, Causes of Monopoly, Demand, Average Revenue and Marginal Revenue of a Monopolistic, Profit Maximization Price Determinants of the Monopolist in Short-run and Long-run. Measures of Monopoly Power. Monopolistic Competition: Assumptions, Product Differentiation, Demand Curve, Equilibrium of the Firm in Short-run and Long-run, Selling cost and Monopolistic Competition. Oligopoly: Assumptions, Non-collusive Oligopoly and Collusive Oligopoly, Kinked Demand Curve Analysis.

### **Module IV: Macroeconomics Analysis**

National Income: An Indicator of Economic Activity, The Parameters that Influence Level of Economic Activity. Business Cycles: Characteristics of Business Cycle, Phases of Business Cycle, III Effects of Business Cycles, General Measure to Control Business Cycles.

The Role of Government in Market Economy and Strategic Business Implications: Rationale of Government Intervention, Government Macroeconomic Policy Measures – GST, Demonetization – and their impact on Business; Macro Economic variables and their functional relationship; Economic Functions of Government in a Market Economy, Legal and Social Framework, Restraining Unfair Competition and Increasing Market Power, Reallocation of Resources in the Presence of Externalities, Redistribution of Income, Regulation of Natural Monopoly, Stabilization of Economy;

Macroeconomic Variables affecting Business: Consumption Function, Saving Function, Investment Multiplier; Transaction, Precautionary, Speculative Demand for Money; Liquidity Preference; Components of Money Supply; Fiscal Policy & Monetary Policy and their implications on business and management; Inflation and Deflation - Demand pull and Cost push inflation; Government policies to control inflation.

International Trade Regime and its implications on Business: GATT, World Trade Organization, Regional Trade Agreements – EU, NAFTA, ASEAN, SAFTA, MERCUSOR.

# BUSINESS ANALYTICS

Course Code: MBF4210

Credit Units: 02

## Course Objective:

The course provides an introduction to data analytics to be used in business. The students will learn how data analysts describe, predict and make informed business decisions in various business domains like marketing, human resources, finance and operations. The aim of the course is to develop basic data literacy and an analytic mindset in students that will help them to make strategic decisions based on data.

## Course Contents:

### Module I: Introduction to Business Analytics

Importance and role of data driven decisions. Business Analytics – Definition, Market, Trends; Paradigm Shift from Data to Insight and from Business Intelligence to Business Analytics; Examples and Types of Business Analytics Analysis- Forecasting & Predictive Modeling; Descriptive, Prescriptive and Predictive Analytics. Data Summarization, Data visualization – Various visualization techniques, standardized reporting and Pivot Tables – Using Excel

### Module II: Data Mining

Introduction to Data Mining; Crucial processes in data mining; Data Warehousing; Data Mining Techniques and Exploratory Data Analysis; Data Mining Tool – XL Miner.

### Module III: Decision Making & Optimization

Decision making under uncertainty – Decision Trees and Risk Profiles; Sensitivity Analysis; Optimizing complex decisions – Optimization of a large number of decisions while accounting for different kinds of physical and business decisions. Introduction to Optimization Techniques –Linear Programming; Optimization – Use of Excel to solve business problems like marketing mix, capital budgeting and portfolio optimization.

### Module IV: Big Data and Introduction to R

Introduction to Big Data, Big Data driven decisions in business organizations – Benefits and Security/Privacy concerns.

Building Business and Economic Models –Tools to leverage data for Prediction purposes; Logistic Regression.

Introduction to Machine Learning; Statistical Learning vs. Machine Learning; Major classes of Learning Algorithms –Supervised Vs Unsupervised Learning.

Introduction to R Programming

### Module V: Simulation using R and Excel

Hands on Regression using R; Introduction to Simulation; Applications of Simulation and Building a Simulation Model. (Using Excel and R)

Capstone Project.

# EXCEL FOR MANAGERS

**Course Code: MBF4211**

**Credit Units: 01**

## **Course Overview:**

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets. After completion of this course, students will be able to learn the various methods for entering and editing data and also learn the various ways to write simple formulas.

## **Course Contents:**

### **Module-I: Getting Started with Excel**

Introduction to Spreadsheets: Launching Excel, entering data in spreadsheet, widening rows and columns, applying basic formatting in spreadsheet, saving work in excel. Entering Data into cells: Using autofill, sort & filter feature, creating lists, inserting & deleting rows and columns. Wrapping & merging text and cells,

### **Module-II: Basics in excel**

Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel. Setting the page orientation and print area. Adding hyperlinks to cells, inserting images, objects, equations and symbols.

### **Module-III: Charts & Formulas in Excel**

Understanding Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart. Using Basic functions- average, sum, min, max, product etc. date functions, time functions. Math Operators in Excel, combining mathematical operators.

### **Module-IV: Functions in Excel**

Logical- using IF, AND, OR, NOT, TRUE, FALSE Functions. Textual- using TRIM, UPPER, LOWER, REPLACE Functions. Import data into excel, Look up functions with index and match. Rounding, sum product, conditional counts and conditional sums, Filtering data, pivot table, pivot charts, conditional formatting.

### **Module-V: Financial and Statistical Functions in Excel**

Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager, IRR. Statistical functions: Max, Min, Average, Large, Rank, Small, Var, Std Dev.

## **Examination Scheme:**

# Syllabus - Third Semester

## STRATEGIC MANAGEMENT

**Course Code: MBF4301**

**Credit Units: 03**

### Course Objective:

The course is designed to help students to understand the concept of strategy and strategic management process. Acquaint students with basic concepts and principles of strategic management, develop and prepare organizational strategies that will be effective for the current dynamic environment and likewise to impart the strategic management conceptual framework which will increase students' skills and knowledge in identifying and describing organizations' strategic posture and direction.

### Course Contents:

#### Module I: Introduction and Purpose of Strategy Formulation

Evolution and Introduction of strategic management, Concept of Strategy, corporate, Business and Functional Levels of Strategy, Mission, Vision, Objectives, Approaches to four Phases in Strategic Management Process, Stakeholders in business and their roles in strategic management, Strategic decision making.

#### Module II: Environmental Analysis

Analyzing company's External Environment: PESTLE Analysis; Preparing an Environmental Threat and Opportunity Profile (ETOP), Analyzing Industry Environment: Industry Analysis – Porter's Five Forces Model of competition, Strategic Group analysis.

#### Module III: Analysis of Organizational Competencies

Analyzing Company's Internal Environment Resource based view of a firm, meaning, types & sources of competitive advantage, analyzing company's Resources and Competitive Position, VRIO Framework; Benchmarking as a method of comparative analysis, Competitive advantage; Concept of a Core competence and Distinctive competitiveness, Characteristics of Core Competencies; Value Chain Analysis Using Porter's Model; Organizational Capability Profile: Strategic Advantage Profile;

#### Module IV: Strategic Analysis and Choice

Generic Competitive Strategies: Meaning of Generic competitive strategies, Low cost, Differentiation, Focus – when to use which strategy; Grand Strategies: Stability, Growth (Diversification Strategies, Vertical Integration Strategies, Mergers, Acquisition & Takeover Strategies, Strategic alliances & Collaborative Partnerships), Retrenchment – Turnaround, Divestment, Liquidation, Outsourcing Strategies; Offensive and Defensive Strategies, Blue Ocean Strategy, Strategy in the age of Internet and E-commerce; Portfolio Analysis Business Portfolio Analysis – BCG Matrix – GE 9 Cell Model; Evaluation of Strategic Alternatives: SWOT Analysis, Grand Strategy Selection Matrix.

#### Module V: Strategy Implementation and Evaluation

Strategy Implementation, Barriers to implementation of strategy, Mc Kinsey's 7s Framework; Organization Structures for Strategy Implementation, Leadership Implementation, Functional Implementation, Strategic evaluation review and control.

# TECHNOLOGY IN BANKING

**Course Code: MBF4303**

**Credit Unit: 02**

## **Course Objectives:**

Revolutionary developments in technology continue to transform the banking and financial industry. Distribution of banking services through the Internet is an important part of this transformation. Through this course students will be able to understand various tools & techniques of e-banking. Students will also understand various types of cyber law.

## **Course Contents:**

### **Module I: Branch Operation and Core Banking**

Introduction and Evolution of Bank Management - Technological Impact in Banking Operations - Total Branch Computerization - Concept of Opportunities - Centralized Banking - Concept, Opportunities, Challenges & Implementation

### **Module II: Delivery Channels**

Overview of delivery channels - Automated Teller Machine (ATM) - Phone Banking - Call centers - Internet Banking - Mobile Banking - Payment Gateways - Card technologies - MICR electronic clearing

### **Module III: Back office Operations**

Bank back office management - Inter branch reconciliation - Treasury Management - Forex Operations - Risk Management - Data centre Management - Net work Management - Knowledge Management - Customer Relationships Management (CRM)

### **Module IV: Interbank Payment System**

Interface with Payment system Network - Structured Financial Messaging system - Electronic Fund transfer - RTGS - Negotiated Dealing Systems & Securities Settlement Systems - Electronic Money, E Cheques

### **Module V: Contemporary Issues in Banking Techniques**

Analysis of Rangarajan Committee Reports - E Banking - Budgeting - Banking Softwares

### **Module VI: Overview of Cyber Law**

Scope of Cyber Law: Nature of Cyber Space; Cyber Property; Cyber Personality; Cyber Transactions; Cyber Jurisprudence: Concepts of Historical, Analytical and Ethical Jurisprudence; Relationship between Meta Society Laws and Cyber Law; How Cyber Law need to be developed. Cyber Crimes and Cyber Laws; Types of Cyber Crimes; Legal Provisions regarding Cyber Crimes; Investigation and adjudication of cyber crimes; Digital evidence; Methodology of Cyber Crime Investigation; Basic Investigation Techniques.

# RETAIL ASSETS & RURAL BANKING

Course Code: MBF4305

Credit Units: 03

## Course Objective:

Rural Banking enjoys a special place in the Indian Banking. Expansion of Rural Credit Post Bank Nationalization of Bank has been phenomenal. This will expose the students to Rural Banking & Micro Finance

## Course Contents:

### Module I: Home Loans

Introduction and Overview of Housing Finance, Basics of Housing Finance, Essentials of Housing Loan Proposals, Process of Home Loans, Assessment of Housing Loans, Housing Finance in metro branches, Rural Housing Finance, Documentation, Recovery.

### Module II: Vehicle / Consumer Finance

Introduction and Overview, Essential of consumer loans and vehicle loans-Processing of loans-quantum of finance-margin-rate of interest-Disbursement, Insurance, Security Collaterals and other securities. Documentation, Inspection-recovery-legal issues. Securitization of consumer loans.

### Module III : Financing in Rural Areas

Basics of financing in Rural Areas –Role of Information and communication Technology Sources, Credit delivery channels – Money Lenders in rural society, Role of commercial Banks, RRBS, Co-operative Banks, Role of NABARD and SIDBI, Banking Correspondents Direct Selling Agents, Mobile Money. Lead Bank Scheme – objectives Implementation and Impact, Service Area Approach – objectives, Implementation and Impact

### Module IV: Agriculture Credit

Important Financial Parameters and Financial Analysis of the Farmers- Concepts and Terminology, Important Schemes Kissan Credit Cards, Investment Credit, Loans for Farm Mechanization and Minor Irrigation Schemes, Dairy Loans and Cold Storages, Micro Finance Institutions - Concept of self Help Group, MFIS and Banks, Micro Finance Delivery Channels, Recent Crisis in Micro Finance Model, RBI & Recent Crisis .

### Module V: Micro Finance

Financial Inclusion and Inclusive growth for Rural Development Rural Micro Insurance Scheme RSBY. Bank Finance for SME-- Introduction, Financial requirements of SME's, Appraisal of SME Proposals, Credit Rating of SME Borrowers CGTMSE

### Module VI: Emerging Trends in Rural Banking

Emerging Trends in Rural Banking – Bottom of the Pyramid financing the poor as they are Bankable, guidelines of GOI & RBI on Financial Inclusion

# INTERNATIONAL FINANCIAL MANAGEMENT

**Course Code: MBF4306**

**Credit Units: 03**

## **Course Objective:**

The possibility for companies to look beyond domestic markets while making the financial decisions has given new dimensions to the way these decisions are taken. This has essentially led to changes in financial environment by linking domestic markets to global markets causing unprecedented increase in opportunities as well as risks. Management in such environment requires understanding of innovative conceptual and physical tools for better financial decision-making. The course on International Finance aims at equipping the financial manager with concepts, tools that enable financial decisions making in a global market and help better achieve the objectives of the firm.

## **Course Contents:**

### **Module I: International Financial Environment**

Finance function in global business scenario, International Monetary System, International Financial Markets and Instruments, Balance of Payments, Recent Developments.

### **Module II: Foreign Exchange Markets**

Spot and Forward Foreign Exchange Markets, Speculation and Arbitrage in Foreign Exchange Markets and Implications of Market Efficiency, Currency Swaps, Currency Futures and Options.

### **Module III: Foreign Exchange Rate Determination**

Theories of Exchange Rate Determination, Fundamental International Parity Conditions – Purchasing Power and Interest Rate Parity, Forecasting Exchange Rates - Technical Forecasting, Time Series Modelling, Fundamental Forecasting.

### **Module IV: Foreign Exchange Rate Exposure and Risk Management**

Transaction, Translation and Operating Exposure, Exposure from Equity and Borrowing in International Financial Markets, Hedging tools for Management of Transaction Exposure and Interest Rate Exposure, Degree of Hedge.

### **Module V: Issues in Foreign Investments Analysis**

Examination of International Investment Proposals, Discounted Cash Flow Analysis, Tax Adjusted Present Value Approach, Political Risk Analysis, External Investment Decision – Measuring Total Returns on Foreign Investments, Optimal International Asset Allocation.

### **Module VI: Finance of Foreign Trade**

Income terms, foreign letters of credit, export & import finance, rules governing letters of credit, export import policy (Case Studies)

## **Examination Scheme:**

# MANAGEMENT OF FINANCIAL SERVICES

Course Code: MBF4307

Credit Units: 03

## Course Objective:

At the end of this course the students will understand: Role of Financial Services in producing and maximizing value. Understanding basic Financial Services and their need. Factors determining dynamism in the Financial Services industry. Understanding the interface of regulators and managers for quantifying and dealing with critical factors affecting the Financial Services industry.

## Course Contents:

### Module I: Introduction

Financial services and Value production, Value added in Financial Services, ROI in Financial Services, Elements in the Financial Services value chain, Role of Financial Services in Economic Development

### Module II: Merchant & Investment Banking

Meaning, Importance & Role in the Indian Financial System, Corporate Counselling, Project Counselling and Appraisal, Loan Syndication and Accessing Debt and Capital Markets, Procedural aspects of public issues, bought out deals, Book Building, Pre-Issue Decision; Post Issue Management and related provisions of Companies Act and SEBI guidelines for Protection of Interests of Investors, New Products in Capital Markets

### Module III: Leasing Hire Purchase and Consumer Credit

Development of Leasing Hire Purchase and Consumer Credit, Types of Leasing, Pricing Methodology and Financial Analysis, Taxation, Legal Framework for Leasing and Hire Purchase Companies, Leasing Vs. Buying- NPV, Securitization, Banking Services related to leasing

### Module IV: Venture Capital Financing

International Experiences in Venture Capital Financing, Venture Capital Financing in India, Pitfalls to be Avoided, Private Equity and growth of Entrepreneurship

### Module V: Mutual Funds

Mutual Funds types, Exchange Traded Funds, Fund of Funds, Organization and Management, Regulations of Mutual Funds

### Module VI: Other Financial services

Factoring Services - Features, Merits and Demerits, Cost Benefit Analysis, Forfeiting – Features, Merits and Demerits, Credit Rating: Concept of Credit Rating, Types of Credit Rating, Advantages and Disadvantages of Credit Rating, Credit Rating Agencies and Their Methodology and Process, Individual Credit Rating, Sovereign Credit Rating Practices, Indian Experience up to now, Housing Finance, Custodial Services.

### Module VII: An introduction to marketing of Financial Services Features

Marketing Of Financial Services, Cross Selling of Banking Services, Up-Selling, Wealth Management

# SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

Course Code: MBF4308

Credit Units: 03

## Course Objective:

This course aims at providing a clear understanding of the changing domestic and global investment scenario in general and Indian capital market in particular with reference to availability of various financial products and operations of stock exchanges. Important theories, techniques, regulations and certain advancements in theory of investment will be covered with an aim of helping the participants make sound investment decisions both in the context of individual security and portfolio investment.

## Course Contents:

### Module I: Background of Capital market/Corporate Governance and Methods of Fund Raising

Importance of Strong Capital market in Economy, Investment opportunities available to Investors, relation of demographic characteristics with investment pattern of individuals, Process of investment in Financial assets, intermediaries and Role of SEBI/OTCEI/ROC/Stock exchanges-Listing agreement, clause 49, Importance of Corporate Governance and changes taking place/required in the law. Salient features and operation of stock exchanges, Trading arrangements, Changing scenario of Indian stock market. Relationship of Primary market with Secondary market, raising of Funds by IPO/FPO/Right issue and intermediaries involved. Merchant banking and its functions, contemporary issue in Capital market.

### Module II: Debt

Malkiel's Law, Interrelationship of Bond Market and Stock market, International events and its impact on security market Risk and return in the context of Portfolio, Common stock valuation models, Term structure of Interest Rates, Role of FII'S, DII/MF /QIB in Capital market. Participatory notes and its Impact, index formation..

### Module III

Fundamental analysis-Economic & industry analysis, concept of Business Cycles, Indicators of economic prosperity, Industry analysis, Company analysis, Company valuation. DOW's Theory, Various Technical analysis tools like Moving averages, Volume Analysis, Indicators, RSI, Pattern analysis, Candlesicks, Market breadth analysis, Trend analysis, Elliot wave Rules Fibonacci numbers, ROC/RSI, CAPM and Fama and French challenge, lagging indicators and leading indicators analysis, reading and interpretations of technical patterns and charts, Other tools to Forecast the market and take Entry and exit decisions.

### Module IV

Arbitrage pricing theory, Generating the efficient frontier, Efficient market theory, Valuation by PE ratio /Book value to price value analysis, Motivation for partitioning of risk, Markowitz Risk -return optimisation,

### Module V

Types of Mutual Funds--SIP/ELSS, Tax Implications. , Investment Banking, Role of Fund Manager, Portfolio management services, Churning and revision of Portfolio, Portfolio re balancing and up gradation, Sharpe's performance Index, Treynor's performance Index, Jensen's performance Index.

## Examination Scheme:

# PROJECT PLANNING, APPRAISAL AND CONTROL

Course Code: MBF4309

Credit Units: 03

## Course Objective:

The objective of the course is to make the students familiar with the planning, analysis, selection, implementation and review the capital expenditure investments. The aim is to acquaint the student with the application of mathematical and statistical tools for analyzing managerial problems in order to arrive at a decision w.r.t. the capital expenditures.

## Course Contents:

### Module I: Planning of Projects

Capital Expenditures, Phases of Capital Budgeting, Levels of Decision Making, Facets of Project Analysis, Portfolio Planning Tools, Strategic Position and Action Evaluation (SPACE), Generation of Ideas, Monitoring the Environment, Corporate Appraisal, Project Rating Index, Demand Forecasting, Market Planning

### Module II: Technical Analysis

Material Inputs and Utilities, Manufacturing Process, Product Mix, Plant Capacity, Location and Site, Machineries and Equipments, Structures and Civil Work, Project Charts and Layouts, Work Schedule

### Module III: Financial Analysis

Cost of Project, Means of Finance, Estimates of Sales and Production, Cost of Production, Working Capital Requirements and its Financing, Profitability Projections, Break Even Point, Projected Balance Sheets, Muti Year Projections, Basic Principles for Measuring Project Cash Flows, Components of the Cash Flow Stream, Biases in Cash Flow Estimation

### Module IV: Project Risk

Types and Measures of Project Risk, Sensitivity Analysis, Scenario Analysis, Optimal Timing, Social Cost Benefit Analysis, Net Benefit in terms of Economic Prices, Measurement of the Impact on Distribution, Savings Impact and its value, Income Distribution Impact, Little-Mirrlees Approach, Shadow Prices

### Module V: Project Management and Review

Forms of Project Organization, Project Planning, Project Control, Human Aspects of Project Management, Pre-requisites for Successful Project Implementation, Performance Evaluation, Abandonment Analysis, Administrative Aspects of Capital Budgeting

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# ADVANCE CORPORATE FINANCE

Course Code:MBF4310

Credit Units: 03

## Course Objective:

The goal of this course is to develop the analytical skills for making corporate investment with regards to financial decisions and risk analysis. This course will examine various theories including the concept of present value, the opportunity cost of capital, discounted cash flow analysis, a consortium of valuation techniques, issues between short & long term financial management, risk and return, capital asset pricing model, capital budgeting, corporate capital structure and financing decisions, dividend policy, investment and financial decisions in the international context, including exchange rate/interest rate risk analysis, and issues of corporate governance and control. In essence, we will explore the very patterns of corporate finance that has shaped the familiar yet complex terrain of today's global economy. An equally important component of this course is its emphasis on developing your critical auditory and erudite writing skills to a level that is commensurate with university standards. The course teaching methodologies will be composed of lectures, homework assignments and a group project.

## Course Contents:

### Module-I: Introduction

Finance and Finance Manager, role of a Finance Manager, Ownership vs. Management, Do Managers really look after interest of shareholders. Expectations from a Finance Manager, Concepts of risk and return, Concepts of Time value of money.

### Module-II: Common Stocks

How common stocks are traded, Valuation of common stocks, pricing vs valuation, today's price vs next year's price. Capitalization rate, DCF valuation and varying growth rates, link between stock price and earning per share, valuation format, Mini Case: Reeby Sports. Issuance of common stocks,

### Module-III: Project Evaluation

Accounting Income vs Cash flows, Pros and cons of investment decision criteria, Why NPV leads to better decision making, Verdict on IRR, NPV vs IRR, XIRR, MIRR, Mutually Exclusive vs Independent Projects, Note on depreciation in estimating cash flows, choosing between long term and short term Equipments, optimal timing of investment, where positive NPV come from, Making sure managers maximize NPV,

### Module-IV: Dividend Policy and Capital Structure

How Dividends are paid, Dividend controversy, stocks repurchase, relevance of dividends in perfect capital markets, dividend and taxes, how much a firm should borrow, cost of financial distress, does debt policy matter, effect of leverage in tax free economy, pecking order of financing choices,

### Module-V: Short term financial planning and cash management

Links between short term and long term financial financing decisions, comforts of surplus cash, options for short term financing, dynamic financing, how much cash should firm hold, investing idle cash, money market investments,

### Module-VI: Corporate control and governance

Financial goals and strategy, shareholder value analysis,, managerial implications of shareholder value, corporate governance and balanced scorecard.

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Required Texts:

- Principles of Corporate Finance, 12 th edition, Richard Brealey and Stewart Myers, McGraw-Hill Financial, 2017
- Corporate Finance, by Stephen A. Ross, Randolph W. Westerfield and Jeffrey Jaffe (RWJ), 10<sup>th</sup> edition, McGraw-Hill 2013.

# BUSINESS VALUATION

Course Code: MBF4311

Credit Units: 03

## COURSE DESCRIPTION AND OBJECTIVES:

The objective of this course is to develop a detailed understanding of the tools used by market professionals and corporate managers to analyze the value of companies and stocks. The central theme of the course will be the pricing of equity securities using discounted cash flow and relative valuation techniques. Students will apply what they've learned to the valuation of a specific company, with the goal of becoming an expert on that firm. After completing this course, students should be able to: (i) Develop quantitative models for firm and equity valuation based on DCF and multiples. (ii) Identify and interpret accounting and non-accounting information necessary for valuation. (iii) Identify and interpret the key value drivers for a firm or industry. (iv) Critically analyze firm and equity valuation models and assumptions developed by others. (v) Present valuation analyses and assumptions in a professional manner.

## Course Contents:

### Module-I: Introduction to Valuation

Valuation vs. Pricing. A philosophical basis for Valuation, Misconceptions about Valuation, Biasness in Valuation, Uncertainties in Valuation. Approaches to Valuation, Understanding Financial Statements, Basics of Risk.

### Module-II: Discounted Cash Flow Valuation

Discounted Cashflow Valuation: Basis for Approach, Going Concern versus Liquidation Valuation, Equity Valuation versus Firm Valuation, Three pathways to DCF value, Advantages & Disadvantages of DCF Valuation, Riskless Rates and Risk Premiums, Estimating Risk Parameters and Costs of Financing, Measuring Earnings, Earnings to Cash Flows, Estimating Growth, Closure in Valuation: Estimating Terminal Value, Free Cash flow to Equity Models,

### Module-III: Relative Valuation

Fundamental Principles of Relative Valuation, Choices with multiples- Earnings Multiples, Book Value Multiples, Choosing the Comparable firm: Making the comparison, Revenue and Sector-Specific Multiples, Advantages & Disadvantages of Relative Valuation, DCF vs Relative valuation.

**Module-IV: Applicability of Valuation** ( Cases and research papers); Valuing Financial Services firm, Valuing Firms with Negative Earnings, Valuing Young and Start-up Firms, Valuing Private Firms, valuing Acquisitions and Takeovers,

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Required Textbook

- Investment Valuation: Tools and Techniques for Determining the Value of Any Asset, Second Edition, University Edition
- by Aswath Damodaran

## Recommended other Textbook

- Krishna G. Palepu and Paul M. Healy: *Business Analysis & Valuation Using Financial Statements*, Text Only (PHB) 5th Edition, Cengage Learning 2012.
- Joshua Rosenbaum and Joshua Pearl: *Investment Banking: Valuation, Leveraged Buyouts, and Mergers and Acquisitions*, John Wiley & Sons; 2nd edition (2013), ISBN: 1118656210

# CORPORATE RESTRUCTURING

Course Code:MBF4312

Credit Units: 03

## Description

The significance of Merger, Acquisition and Corporate Restructuring cannot be overemphasized in a rapidly changing economic environment and consequent pressure on companies to cope with the emerging challenges. This subject deals with the different strategies of corporate restructuring and its impact on the shareholders' value.

## Objectives

1. To understand the various types of activities that falls under the purview Corporate Restructuring
2. To understand intricacies of Corporate Restructuring
3. To understand motives and methods of M&A
4. To deal with Issues involved in takeover

## Assessment

The subject would comprise of both theory and numerical solving. The assessment of the learner would be done through assignments, case discussion, articles on current research & issues, problem solving and simulation. The students would be expected to do a project, quiz and comprehend the application part of the concepts taught in the class.

## Course Contents:

**Module-I:** Introduction: Corporate Restructuring: Concept and Form: Merger, Consolidation, Acquisition, Divestiture, Demerger, Carve out, Joint venture, Delisting of Securities. M&A as a Growth Strategy, Takeover and Defence Tactics, Funding of Acquisition, LBO and MBO.

## Module-II:

Growth strategy and Merger & Acquisition: Growth strategy: Intensive, integrative and Diversification growth, Theory of M&A: Monopoly theory, Efficiency Theory, Valuation theory, Raider Theory and Empire Building Theory, Case study.

## Module-III:

Takeover and Defence Tactics: Friendly Vs Hostile Takeover, Takeover Tactics: Dawn Raid, Bear hug, Saturday night special, proxy fight, Successful Takeover Tactics in India - Defence Tactics: Crown jewels, blank cheque, Shark repellents, Poison pill and put, people pill, Green nail and buy-back as takeover defence tactic - Intents of Target Companies.

## Module-IV:

Legal aspect: Companies Act, 2013, SEBI (Buy -back of Securities) Regulation, 1998, SEBI (Substantial Acquisition of Shares and Takeover) Regulation, 1997, SEBI (Delisting of Securities) Guidelines, 2003 and Listing agreement clauses of NSE and BSE (40 A and 40 B)

## Module-V:

Accounting and Taxation aspect: Methods of Accounting for M&A, Accounting for Demerger, Tax issues relating to M&A: Capital Gain, Carry forward and Set Off Losses, Numerical Problems

## Module-VI:

Funding and Valuation: Payment Consideration, Sources of Fund, LBO and Going Private. Valuation of Target Company: Concept of Value of a Company, Methods of Enterprise and Equity Valuation, Dividend Discount Model, DCF Model, Shareholder's Value Creation: MVA Approach and EVA Approach.

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# FINANCIAL MODELING USING MS- EXCEL/SPREADSHEET

Course Code:MBF4313

Credit Units: 03

## Introduction

Modeling techniques for accurate financial forecasting are used in many areas of finance, such as derivatives, valuation, project evaluation, deal structuring, portfolio management and the like. In the course, the participants will learn the model building skills required to build powerful models in finance with the help of excel. There are many features of model building that are common irrespective of the final model that one intends to build. In the course we will also emphasize on the different model building skills that one should have irrespective of the final use that one is going to make of it.

**By the end of the course the participants should be better able to:**

- Understand the basic and advanced features of excel
- Understand how to build models in excel to suit one's purpose
- Building models in different areas of finance including investments, corporate finance and derivatives
- Identifying and controlling the key sensitivities with advanced spreadsheet simulation
- Understand how risk can be built into the model to enhance decision making process

## Course Contents:

**Module-I: Understanding the Basic Features of Excel :** Introduction to Modeling, Introduction to Excel, Database Functions in Excel Creating Charts Using Forms and Control Toolbox Understanding Finance Functions present in Excel Creating Dynamic Models

**Module-II: Simulation using Excel:** Different Statistical Distributions used in Simulation Generating Random Numbers that follow a particular distribution Building Models in Finance using Simulation

**Module-III: Excel in Capital Budgeting, valuation:** Preparing common size statements directly from Trial Balance Forecasting Financial Statements using Excel Analysing Financial Statements by using Spreadsheet Model ; Determining Project Viability Risk Analysis in Project Appraisal Simulation in Project Appraisal; Determination of Value Drivers, DCF Valuation, Risk Analysis in Valuation; Determining Efficient Portfolio, Creating Dynamic Portfolios Portfolio Insurance Fixed Income Portfolio Management using Excel.

**Module-IV: Understanding Subroutines and Functions** and building simple financial models using subroutines and functions Recording and Editing Macros Subroutines and Functions Decision Rules Message Box and Input Box Debugging, **Designing Advanced Financial Models** using VBA User Forms Other Advanced Features Actual Model Building.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# FINANCIAL RISK MANAGEMENT

**Course Code: MBF4314**

**Credit Units: 03**

## **Course Objectives:**

The FRM challenges candidates to understand and apply a range of knowledge and skills necessary to function effectively as a risk manager. Its curriculum is updated annually by a group of distinguished risk professionals and leading academics with diverse backgrounds, ensuring that the designation meets the evolving demands of the financial industry. The FRM helps professionals in risk management, investment management, or other critical areas of the financial services industry to broaden their knowledge of the different types of financial risk and enhance their current skill set. Those who are just beginning their careers benefit from the breadth of the curriculum, which exposes candidates to the major strategic aspects of risk management. More established practitioners often choose to become Certified FRMs in order to ensure that they are apprised of the latest trends in risk management, or because they want to challenge themselves by testing their knowledge against an elite pool of risk managers.

## **Course Contents:**

### **Module I: Foundations of Risk Management**

Basic risk types, measurement and management tools, Creating value with risk management; The role of risk management in corporate governance; Enterprise Risk Management (ERM); Financial disasters and risk management failures; The Capital Asset Pricing Model (CAPM); Risk-adjusted performance measurement; Multifactor models; Data aggregation and risk reporting; Ethics and the GARP Code of Conduct.

### **Module II: Financial Markets and Products**

Structures and functions of financial institutions, Structure and mechanics of OTC and exchange markets Structure, mechanics, and valuation of forwards, futures, swaps, and options ; Hedging with derivatives; Interest rates and measures of interest rate sensitivity; Foreign exchange risk; Corporate bonds; Mortgage-backed securities

### **Module III : Valuation and Risk Models**

Value-at-Risk (VaR)-VaR mapping • Expected shortfall (ES), Stress testing and scenario analysis • Option valuation • Fixed income valuation • Hedging • Country and sovereign risk models and management • External and internal credit ratings • Expected and unexpected losses • Operational risk

### **Module IV: Basel-I, Basel-II, Solvency-II, Basel 2.5, Basel-III:**

The reasons for regulating Banks, Bank Regulation Pre-1988, 1988BIS Accord, The G-30 Policy recommendation, Netting, 1996 Amendment, Basel II, Credit Risk capital under Basel II, Operational Risk capital under Basel II, Pillar 2- Supervisory Review, Pillar 3- Market Discipline, Basel 2.5, Basel-III.

### **Module V: Credit Risk Measurement and Management**

• Credit analysis • Default risk: Quantitative methodologies • Expected and unexpected loss • Credit VaR • Counterparty risk • Credit derivatives • Structured finance and securitization

### **Module VI: Operational and Integrated Risk Management**

Risk-adjusted return on capital (RAROC) • Economic capital frameworks and capital planning • Liquidity risk measurement and management • Failure mechanics of dealer banks • Stress testing banks • Third-party outsourcing risk • Risks related to money laundering and financing of terrorism • Regulation and the Basel Accords  
Banking Resolution and Deposit Insurance Act (BRDI) 2017, Insolvency and Bankruptcy Code (IBC).

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# FIXED INCOME SECURITIES ANALYSIS

Course Code: MBF4315

Credit Units: 03

## Course Objectives:

This course is intended to analyze the fixed income securities markets and its implications for investments. It will analyze the market characteristics, instruments, selling techniques, pricing and valuation issues, floating rate instruments, relations with money market instruments, risk and return of fixed income securities, portfolio management techniques, term structure modeling, bond indexing, corporate debt and convertibles, bonds with embedded options, municipal bonds markets, corporate bonds & credit risk analysis, interest rate risk management with swaps, options and futures, bond management & trading. The course intends to cover the specific features of the Indian Fixed Income Securities Markets. The course will construct several Excel based techniques to analyze bond valuation, term structure, portfolio statistics and risk mapping

## Course Contents:

**Module-I:** Overview of Fixed Income Securities, The Grammar of Fixed Income Securities, Fixed Income Markets, Institutional Arrangements, Market Participants and Instruments, Investors Perspectives, & Market Conventions, features of a government securities market

**Module-II:** Bond Valuation, Time Value of Money, Price and Yield Conventions, Bond Valuation under flat term structure, Yield & return, & horizon return, Valuation of other Bonds, Floating Rate securities, index bonds, illiquid bonds

**Module-III:** Understanding market linkages, bonds and money market instruments, MIFOR Curve Risk Identification in Bonds: Duration, Convexity, and Immunization Risk measurement in fixed income securities using value at risk, Corporate Debt, Valuation, valuation of convertibles  
Yield Curve Analysis: Par Value, Zero, Spot Curve, Bootstrapping, spot & forward rates, (Nelson-Seigel model of the Indian NSE)

**Module-IV:** Government securities auction & Bidding, Uniform vs discriminatory auction, bidding behavior, winners curse analysis Auction Game: students run a game in groups, with bidding an upcoming auction, using real time market prices, and finalist selected based on their success, performance in WI trade, Bond Indexing, methodology for constructing a bond index, index return comparison

**Module-V:** Portfolio construction, setting portfolio objectives, interpreting portfolio parameters, Passive vs Active portfolio management strategies, bullet vs barbell, other strategies. Global Bond Markets, foreign currency bonds, dual currency bonds, analysis of global bond spread behavior in recent times.

**Module-VI:** Fixed Income Derivative Markets: FRAs, Interest rate Swaps, swap pricing and swap curve, Fixed Income Derivative Markets: Interest rate futures, Fixed Income Derivative Markets: Interest Rate Options, Caps & Floors pricing

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Required Textbook:

- Frank Fabozzi, Bond Markets, Analysis, and Strategies, Seventh or Eighth Edition,
- Pearson Suresh Sundaresan, Fixed Income Markets and Their Derivatives, 2009,

# SUMMER INTERNSHIP EVALUATION

Course Code: MBF4335

Credit Units: 06

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**)

## INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. **Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.**

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include **five sections** in the order described below.

1. **The Title Page** – An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content** – An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.
5. **Appendices** – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

## INTERNSHIP REPORT

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (Incase a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report should be as per the standard layout prescribed by the organization wherein the student

undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

➤ **Title or Cover Page**

The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

➤ **Acknowledgements**

Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

➤ **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form.

While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

➤ **Conclusion(s) & Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly. Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

➤ **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

➤ **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**Examples**

**For research article**

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic Escherichia coli O157: H7. ClinMicrobiol Infect, 8(suppl 1): 116–117.

**For book**

Kowalski,M.(1976) Transduction of effectiveness in Rhizobium meliloti. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), 7: 63-67

**The Layout Guidelines for the Internship File & Internship Report**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

**Examination Scheme:**

Continuous Evaluation by faculty guide	15%
Continuous evaluation by CRC	15%

# Syllabus - Fourth Semester

## BANK ACCOUNTING & AUDIT

**Course Code: MBF4401**

**Credit Units: 02**

### Course Objectives:

The course will help the students to understand the concepts of accounting and auditing of banks and their applications. The course will help students in analysis of the work of an auditor of a bank as well as interpretation of the financial.

### Course Contents:

#### Module I: Overview of Auditing

Meaning, Objects, Basic Principles, Auditing and Assurance Standards and Techniques. Classification of Audit, Audit planning, qualities of auditor, advantages and limitations of audit.

#### Module II: Internal Control, Internal Check and Internal Audit

Introduction, Necessity of Internal Check: Difference between Internal Check and Internal Control, Fundamental Principles of Internal Check, Difference between Internal check and Internal audit.

#### Module III: Audit Procedure

Vouching, definition, features, examining vouchers, Vouching of Cash book and trading transactions, Verification and Valuation of Assets & Liabilities: Meaning, definition and objects, Vouching vs. Verification

#### Module IV: Bank Accounting

Accounting concepts and conventions, Accounting in Banks and Balance Sheet, Preparation of financial statements, Significant features of accounting systems of banks, Principal books of accounts, Discussion with final accounts of public sector, private sector and private banks in India

#### Module V: Special Areas of Audit

Tax audit and Management audit - Recent Trends in Auditing – Basic considerations of audit in EDP Environment. Credit Audit

### Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

### Text:

- Contemporary Auditing by Kamal Gupta, Tata McGraw Hill, 2004

### Reference:

# RISK MANAGEMENT IN BANKING

**Course Code: MBF4403**

**Credit Units: 03**

## **Course Objectives:**

The basic objective to be met is to make the students understand the various risks associated with banks and to create a fundamental awareness about identification, measurement and management of various banking risks.

## **Course Contents**

### **Module I: Risk Management in Banks**

Structure of Risk Management, Concept and types of Banking Risk, Importance of Risk Management, Risk Management Process, Various operations of Banks in relation to risk, Banking Regulations on Risks.

### **Module II: Risk Management Frame work in Banks**

Elements of Risk Management Frame work; Systematic Risk Management in Banks; Involvement of the management in the Risk Management Frame work. Tools and Techniques for Managing different risks in banks, Risk Management Strategies.

### **Module III: Market Risk Management in Banks**

Interest Rate Risk: Types of Interest rate risks; Identification of Interest Rate Risk, Management of Interest Rate Risk; Gap Methodology; Duration Analysis. BASEL-I, BASEL-II, BASEL-III, Capital Adequacy

Liquidity Risk: Liquidity Risk identification and the Need for managing it in the Long/short Run; Fundamental Approach to Long Run Liquidity Risk Management; Technical Approach to short Run Liquidity Risk Management

Foreign Exchange Risk: Nature and Magnitude of Exchange risk; Tools and Techniques for Managing Forex Risk; Managing the currency risk

### **Module IV: Credit Risk Management in Banks**

Identification of Credit Risk: Drivers of Credit Risk; Capital Adequacy Requirements; Bank for International Settlements (BIS) Risk-Based Capital Requirements Frame Work

### **Module V: Operational Risk Management in Banks**

Operational Risk and Its Evolution; Major Sources of Operational Risk; Measurement of Operational Risk; Management of Operational Risk. Market Risk Management in Banks- Operational Risk and Sources of Risk Measuring operational Risk and Value-at-Risk (VaR); Approach to VaR

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# TREASURY BANKING

**Course Code: MBF4405**

**Credit Units: 03**

## **Course Objective:**

To Equip students proficient in understanding of the IPO process. Learn how IPOs are arranged, managed, priced and distributed. The sequence of the issue process, with timelines. The role of merchant bankers in the issue process. Key regulations and documentation requirements To make students acquainted with depository receipts and basics of their issuance process. To understand the nitty-gritty of merger and acquisition & role of an Investment bank in facilitating the deal.

## **Course Contents:**

### **Module I: Introduction**

Overview of investment Banking, Forms of Bank investment, Key Elements of Investment Banking, Principles and Culture of Investment Banking Regulation of Investment Banking, Short-term investment, Long-term investment, Investment in Foreign Exchange.

### **Module II: Initial Public Offering - Issuance Process**

IPO, Preparation/approvals stage- Decision to go for IPO Appointment of lead manager and legal counsel Due Diligence Draft red herring prospectus Filing with SEBI and stock exchanges Marketing and estimation of price range- Pre-marketing Road shows Book building Launch and completion- Pricing and allocation ROC filing of final prospectus Listing

### **Module III:**

Depository receipts- ADR GDR EDR IDR-need, ADR- issuance process, tax treatment, regulations, Fungibility, reverse fungibility. Form 20F, F6. IDR-Guidelines.

### **Module IV:**

Bonds Issuance process. Redemption/ Rollover of Debentures. FCCB, Commercial paper- Issuance process, Commercial paper- Redemption process.

### **Module V:**

Merger and Acquisition overview. Types of transactions under M&A. M&A deal drivers. Role of an Investment bank in M&A transaction.

### **Module VI:**

Offer document, Key features of offer documents, Cover page-General risk clause, issuer absolute responsibility. Inner page information, No complaint information.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# DISSERTATION

**Course Code: MBF4437**

**Credit Units: 06**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

## **Selecting the Dissertation Topic**

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

## **Planning the Dissertation**

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

## **The Dissertation plan or outline**

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

## **Keeping records**

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct quotation and what is your paraphrase.

## **Dissertation format**

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required:

Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

## **The Layout Guidelines for the Dissertation**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

## **Guidelines for the Assessment of the Dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion from the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

**Examination Scheme:**

Contents & Layout of the Report	30
Conceptual Framework	10
Objectives & Methodology	15
Implications & Conclusions	15

<b>TOTAL</b>	<b>100</b>

# FINANCIAL ENGINEERING

**Course Code:MBF4406**

**Credit Units: 03**

## **Course Objective:**

Finance has evolved as an exciting discipline in terms of innovations it has witnessed in recent past. This aspect known as Financial Engineering starts where financial analysis ends. The objective of the course is to enable the students to think in terms of innovative solutions to financial problems with particular emphasis on understanding new risks, which the changing scenario of finance is creating for individuals and firms and equip them with innovative tools of financial engineering called derivatives and skills to use them in forming effective strategies to cope with the changing environment and hedge against the financial risks.

## **Course Contents:**

### **Module I: Introduction**

Changing Environment and Increasing Price Risks, Financial Engineering as a response to Increased Risks, Types of Risks and Risk Management, Tools of Risk Management, Conceptual and Physical Tools of Financial Engineering, Effect of Speculation and Arbitrage on Market Efficiency, Derivative Market in India

### **Module II: Futures and Forwards**

The Futures Markets, Buying and Selling Futures, Devising a Hedging Strategy Using Futures, Stock Index Futures, Value at Risk, Short Term and Long Term Interest Rate Futures, Foreign Currency Futures and Commodity Futures

### **Module III: Swaps**

Structure of a Swap, Interest Rate Swaps, Currency of Swaps, Commodity Swaps, Other Swaps, Credit Risk, Role of a Swap Dealer.

### **Module IV: Options**

Options Markets; Properties of Stock Option Prices; Option Pricing Models – Binomial Model, Black-Scholes; Model, Single Period Options – Calls and Puts, Payoff Diagrams of Simple and Complex Option Strategies, Cash Settled Options, Multi-Period Options – Caps, Floors, Collars, Captions, Swaptions and Compound options, Cross-currency Futures and Options.

### **Module V: Other Innovations**

Debt Market Innovations, Mortgage Backed Securities, Hybrid Securities, Asset-Liability Management

### **Module VI: Recent Trends**

Exotic Options, Synthetic Instruments, Developments in Equity-Based Strategies, Direct and Cross Hedges, Future Trends and Issues in Financial Engineering.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# CORPORATE TAX PLANNING

**Course Code: MBF4408**

**Credit Units: 03**

## **Course Objective:**

At the end of the course, the students should be able to understand Indian accounting Standards and the impact of USGAAP on Financial Statements. To create an understanding of the accounting of Mergers and Acquisitions and Valuation of goodwill & Shares.

In addition to Corporate Accounting the students should be able to demonstrate an understanding of the tax provisions enabling them to make use of legitimate tax shelters, deductions, exceptions, rebates and allowances; with the ultimate aim of minimizing the corporate tax liability.

## **Course Contents:**

### **Module I: Accounting Norms**

Various Accounting Standards in India and comparison with International accounting Standards and US.GAAP.

### **Module II: Accounting for Merger and Acquisitions**

Accounting for Acquisition of Business, Calculation of Purchase consideration and Profit (Loss) Prior to Incorporation. Accounting for Amalgamation in the nature of Merger and in the nature of Purchase.

### **Module III: Valuation of Goodwill and Shares**

Valuation of Goodwill – Different Methods of Valuation of Goodwill, Valuation of Shares – Net Asset Backing Method and Yield Method.

### **Module IV: Basic Concepts of Income Tax**

Introduction to Income Tax Act, 1961, Residential Status, Exempted Incomes of Companies An overview of various provisions of Business & profession & Capital gains – applicable to companies Goods and Services Tax – Features - Implications - Rate slap - Model - Products Excluded From GST – Registration Procedure

### **Module V: Assessment of Companies**

Computation of taxable income, MAT, Set off & carry forward of losses in companies, Deductions from Gross total income applicable to companies, Tax planning with reference to new projects/expansions/rehabilitation plans including mergers, amalgamation or de-mergers of companies, Concept of avoidance of double taxation.

## **Examination Scheme:**

# INVESTMENT BANKING

**Course Code: MBF4409**

**Credit Units: 03**

## **Course Objective:**

To Equip students proficient in understanding of the IPO process. Learn how IPOs are arranged, managed, priced and distributed. The sequence of the issue process, with timelines. The role of merchant bankers in the issue process. Key regulations and documentation requirements To make students acquainted with depository receipts and basics of their issuance process. To understand the nitty-gritty of merger and acquisition & role of an Investment bank in facilitating the deal.

## **Course Contents:**

### **Module I: Introduction**

Overview of investment Banking, Forms of Bank investment, Key Elements of Investment Banking, Principles and Culture of Investment Banking Regulation of Investment Banking, Short-term investment, Long-term investment, Investment in Foreign Exchange.

### **Module II: Initial Public Offering - Issuance Process**

IPO, Preparation/approvals stage- Decision to go for IPO Appointment of lead manager and legal counsel Due Diligence Draft red herring prospectus Filing with SEBI and stock exchanges Marketing and estimation of price range- Pre-marketing Road shows Book building Launch and completion- Pricing and allocation ROC filing of final prospectus Listing

### **Module III**

Depository receipts- ADR GDR EDR IDR-need, ADR- issuance process, tax treatment, regulations, Fungibility, reverse fungibility. Form 20F, F6. IDR-Guidelines.

### **Module IV**

Bonds Issuance process. Redemption/ Rollover of Debentures. FCCB, Commercial paper- Issuance process, Commercial paper- Redemption process.

### **Module V**

Merger and Acquisition overview. Types of transactions under M&A. M&A deal drivers. Role of an Investment bank in M&A transaction.

### **Module VI**

Offer document, Key features of offer documents, Cover page-General risk clause, issuer absolute responsibility. Inner page information, No complaint information.

# BEHAVIOURAL FINANCE

Course Code:MBF4410

Credit Units: 03

## Course Description:

This course is intended to complement other finance courses that are mainly based on the traditional paradigm which assumes that investors and managers are generally rational. Specifically, this course has three main objectives. First, we aim to examine how the insights of behavioural finance theories shed light on the behaviour of individual investors and finance professionals in investment decision-making and corporate financial decision-making. Second, we explore the possibility to improve investment performance and corporate performance by recognising the cognitive biases and applying appropriate 'debiasing' techniques. Finally, we investigate the implications of behavioural finance for the construction of good corporate governance mechanisms.

## Course Objectives:

After this students will be able to:

- Identify persistent or systematic behavioral factors that influence investment behavior
- Understand and critically discuss the differences between a behavioural finance perspective and a traditional finance perspective
- Understand and critically discuss the cognitive biases and errors of judgment that affect financial decisions
- Critically evaluate behavioural influences involving individuals in investment decisions
- Critically evaluate behavioural influences involving corporate (executive) financial decisions
- Critically discuss important developments in this new area and the associated practical insights they provide

## Course Contents:

**Module I: Psychology & Finance:** Behavioral Finance an overview, Traditional vs behavioral finance, Morals & Ethics: why they matter in the business world.

**Module II: Behavioral Corporate Finance:** Corporate Governance, Loyalty issues, corporate ethics issues, agency conflicts, Behavioral portfolio management.

**Module III: Behavioral Biases in Finance:** Definition of average investor; Behavioral Biases & corporate decision (valuation, capital budgeting, capital structure, dividend policy and Mergers & Acquisition), Belief biases: Biases of average investor, Forecasting Biases, overconfidence, self control, Limited attention and categorization.

**Module IV: Investors Decision:** Perceived risk on financial product, Social interactions and positional concerns. The role of advisors, advertising, Emotion & Investment Decision, Investment decision cycle: judgment under uncertainty, group behavior: Conformism, herding, fatal attraction.

**Module V: Supply by firms and managerial decisions:** Supply of securities and firm investment characteristics (market timing, catering) by rational firms; Associated institutions; Relative horizons and incentives; Biased managers.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# FINTECH: TECHNOLOGY INNOVATION IN FINANCIAL SERVICES

Course Code:MBF4411

Credit Units: 03

## Introduction

**Financial technology**, also known as **fintech**, is an economic industry composed of companies that use technology to make financial services more efficient. Financial technology companies are generally startups trying to disrupt intermediate incumbent financial systems and challenge traditional corporations that are less reliant on software.

This course aims to give an insight in the financial technology revolution, and the disruption, innovation and opportunity therein. We will see the global fintech investment space; this course will aggregate diverse industry expertise into a single informative course to provide students with the answers they need to capitalize on this lucrative market. Key industry developments are explained in detail, and critical insights from cutting-edge practitioners offer first-hand information and lessons learned.

The financial technology sector is booming, and entrepreneurs, bankers, consultants, investors and asset managers are scrambling for more information: Who are the key players? What's driving the explosive growth? What are the risks? This course collates insights, knowledge and guidance from industry experts to provide the answers to these questions and more.

## By the end of the course the participants should be better able to:

- Get up to speed on the latest industry developments
- Grasp the market dynamics of the 'fintech revolution'
- Realize the sector's potential and impact on related industries
- Gain expert insight on investment and entrepreneurial opportunities
- Learn about the modeling skills and emerging technologies

## Course Contents:

### Module-I : Introduction to fintech :

#### FinTech – Breaking the financial services value chain.

Payments; Deposits and Lending; Capital Raising; Investment Management; Market Provisioning; Insurance

#### FinTech Hubs

#### The history of fintech

**Module-II:** Technology :Blockchain, wearables and other emerging technologies, Financial modeling and Fintech : Big Data 102 and Artificial Intelligence 102

### Module-III: FinTech Solutions

- Robo-Advisors
- Rewiring the Deal – The Path Forward for B2B Supply Chains
- Payments and Point of Sales (POS) Innovation
- Predictive Algorithms – Building Innovative Online Banking Solutions
- Big Data is the Cornerstone of Regulatory Compliance Systems
- FinTech Solutions in Complex Contracts Optimization
- Behavioural Biometrics – A New Era of Security
- Ultra-Fast Text Analytics in Trading Strategies
- Regulated Crowdfunding Ecosystems
- Remittances – International FX Payments at Low Cost
- Payment Solutions Including Apple Pay
- FinTech Innovation for Wearables

### Module-IV: The future of Fintech

- Using emerging technologies
- The future of financial services
- Innovation through big data
- The API economy

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# ACCOUNTING FOR MANAGEMENT

**Course Code: MGT4102**

**Credit Units: 03**

## **Course Objective:**

Participants in this course will develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, participants will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts. In addition the course develops skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

## **Course Contents:**

### **Module I: Introduction**

The Financial Accounting Framework, Accounting Policies, Need of Accounting. Users of Accounting Information, Accounting Cycle, Accounting and Management Control. Balance sheet-Dual Aspect principle, Classification Items of Balance Sheet, Formats of Balance Sheet. Preparation of Balance Sheet. Income Statement- Realization vs. Accrual Principle, Format of Income Statement), Preparation of Income Statement (IAS, GAAP & IFRS) Depreciation Accounting.

### **Module II: Measuring and Reporting**

Measuring and Reporting :Cost of sales and Inventories, Debentures, Investments, Shareholder Equity. Human Resource Accounting-Valuation of Human Resources, Recording and Disclosure in Financial Statements

### **Module III: Management Accounting**

Contrast between Management Accounting and Financial Accounting and Reporting, Types of Management Accounting Information and their uses, General Observation on Management Accounting. Statement of Cash Flows-Profit versus Cash, Purpose and Use of Cash Flow Statement, Format of Cash Flow Statement (AS-3), Preparation of Cash Flow Statement (IAS, GAAP & IFRS).

### **Module IV: Analyzing and Interpreting Financial Statements**

Financial Statement Analysis – Basic Relationship, Overall Measures, Profitability Ratios, Investment Utilization Ratios, Financial Condition Ratios, Making Comparisons. Du-pont analysis. Interpretations of calculated Ratios.

**Module V: Cost Accounting:** The behavior of cost- Relation of cost to volume, BEP & Profit graph. CVP analysis, Full cost and its uses. Techniques of costing. Standard costing. Strategic planning and budgeting.

## **Examination Scheme:**

Components	Assessment 1 Group Presentation	Assessment 2 In Class Quiz	Class Test/Mid Term Exam	Attendance	External
Weightage (%)	10	5	10	5	70

**Core Text Book:**

# MARKETING MANAGEMENT

**Course Code: MGT4104**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to provide the students exposure to modern marketing concepts, tools, and techniques, and help them develop abilities and skills required for the performance of marketing functions.

## **Course Contents:**

### **Module I: Understanding Marketing in New Perspective**

Fundamentals of Marketing, Customer Value and Satisfaction, Customer Delight, Conceptualizing Tasks and Philosophies of Marketing Management, Value Chain, Scanning the Marketing Environment, Marketing Mix Elements, Difference between marketing and Selling, Relationship marketing, Social marketing, Strategic Planning in marketing, formulating the marketing plan.

### **Module II: Analyzing Consumers & Selecting Markets**

The factors influencing consumer behavior. The stages in the buying process, the buying decision making process, factors effecting the buying decision., Market Segmentations, Levels of Market Segmentations, Patterns, Procedures, Requirement for Effective Segmentation, Evaluating the Market Segments, Selecting the Market Segments, Tool for Competitive Differentiation, Developing a Positioning Strategy.

### **Module III: Managing Product & Pricing Strategies**

Classification of products, New Product development, stages of product development, Adoption process, Product mix decisions and line management, Length, width and depth of a line, line analysis, and brand management, product life cycle, stages in lifecycle and factors affecting each stage, Managing product life cycles. Setting the price, adapting the price, initiating and responding the price changes,

### **Module IV: Designing: Managing the Integrated Communication**

Channel functions and flows. Channel design decisions. Channel management decisions. Channel dynamics; vertical horizontal and multi channel marketing systems. Market Logistics decisions. Effective Communication, Integrated Marketing Communication, Marketing Communication Process, Promotion mix, Advertising, Personal Selling, Sales Promotion and Publicity and Public Relations, Direct Marketing,

### **Module V: Emerging Trends in Marketing**

An Introduction to Internet Marketing, Multi Level Marketing, E-Marketing, Green Marketing, Event Marketing, Types of Events, Sponsorship, Cause Related Marketing, Marketing for Non Profit Organizations Marketing Strategies for Leaders, Challenges, Followers and Nichers

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# QUANTITATIVE TECHNIQUES IN MANAGEMENT

**Course Code: MGT4106**

**Credit Units: 03**

## **Course Objective:**

The aim of this course is to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the business environment using contemporary software.

## **Course Contents:**

### **Module I: Introduction**

Application of Statistics in Business; Classification of Data; Interpretation of computer output of diagrammatic and graphical presentation of data, measures of central tendency, measures of dispersion and skewness.

### **Module II: Probability and Probability Distributions**

Concepts of Probability, addition theorem, multiplication theorem, Baye's Theorem; continuous and discrete probability distribution: Binomial Probability Distribution, Poisson Probability Distribution and Normal Probability Distribution.

### **Module III: Sampling and Sampling Distribution**

Sampling: Basic Concept, Types of Sampling, Errors and Precautions in sampling, size of sample, Parameter and Statistic, Sampling Distribution of the mean, Sampling distribution of proportion, Estimation – point estimation, Interval Estimation,

### **Module IV: Tests of Hypothesis**

Null and Alternative hypothesis, One-Tailed and Two-Tailed tests of hypothesis, Type I and Type II error, rejection rule using p – Value and critical value approach. Hypothesis Testing to compare two populations: Test for one sample mean, Test for two population means (Independent Samples), Tests for two population means (Dependent Samples), Tests for two population proportions (Independent Samples), Tests for two population variances (Dependent Samples), F-test, Chi – Square Test

### **Module V: Forecasting Techniques**

Correlation - Karl Person, Spearman's Rank methods, simple linear regression analysis – Estimated regression equation, least squares method, coefficient of determination, interpretation of computer output for Regression, Introduction to time series, trend analysis

### **Module VI: Introduction to SPSS, performing univariate and bivariate analysis on SPSS**

#### **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# LEGAL ASPECTS OF BUSINESS

**Course Code: MGT4107**

**Credit Units: 03**

## **Course Objective:**

To give insight to various Legal Aspects of Business so that the students are able to interpret the provisions of some of the important laws and apply the same in commercial and industrial enterprises.

## **Course Contents:**

### **Module I: Indian Contract Act, 1872**

Nature and kinds of Contracts, Concepts related to offer, Acceptance and Consideration, Principles Governing Capacity of Parties and Free Consent, Legality of Objects, Performance and Discharge of Contract, Breach of Contract and its Remedies, Special contracts of Bailment and Pledge, Indemnity and Guarantee, Contract of Agency.

### **Module II: Negotiable Instruments Act, 1881**

Meaning of Negotiability, Negotiable Instruments –Bill of Exchange, Promissory Note, Cheque: crossing of cheques, endorsement, dishonour of cheques

### **Module III: Sales and Goods Act, 1930**

Sale and Agreement to Sell, Hire Purchase – Pledge – Mortgage – Hypothecation Lease. Goods – Different types of Goods, Passing of Property in Goods, Conditions and Warranties, Doctrine of Caveat emptor, Rights of an unpaid Seller.

### **Module IV: Indian Partnership Act, 1932**

Meaning and definitions, Registration of partnerships, Types of partners, Dissolution, Limited Liability Partnership Act, 1932 – Meaning & definitions, Meaning of designated partner, Registration of LLP, Types of partners, Dissolution,

### **Module V: Intellectual Property Right**

Intellectual Property Laws (IPR), Overview of Law & Procedure relating to Patents, trademarks & Copyrights, Infringement

### **Module VI: Company Act 1956**

Companies Act, 1956-Meaning and types of companies, Formation of a company, Memorandum and Articles of Association, Share Capital and Shareholders, Prospectus and Issue of Shares, Buy Back of Shares, Debentures, Company Meetings and Proceedings, Powers, Duties, Liabilities of Directors and Winding up of Company.

### **Module VII: The Consumer Protection Act, 1986**

Definitions of consumer, complaints, goods, services, meaning of consumer dispute, complaint- unfair trade practices, restrictive trade practices, rights of consumers, consumer redressal agencies

# HUMAN RESOURCE MANAGEMENT

**Course Code: MGT4108**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to help the students develop an understanding of the dimensions of the management of human resources, with particular reference to HRM policies and practices in India.

## **Course Contents:**

### **Module I: Human Resource Management in Perspective**

Nature and scope of HRM, HRM functions, HRM models, understanding concepts of Personnel Management, Human Resource Development and Strategic Human Resource Management, HR Environment, Changing Role of HR.

### **Module II: Meeting Human Resource Requirements**

Job Analysis, Job Description, Strategic Human Resource Planning, Recruitment, Selection Process, Methods – Interview, Tests, Placement and Induction

### **Module III: Training & Developing of Employees**

Training and Development, Understanding of Performance Management Systems, Potential Appraisal, Career Development

### **Module IV: Managing Compensation**

Job evaluation, Methods of Job Evaluation, Strategic Compensation, Equity Theory, Components of Pay Structure, Designing and Administration of Wage and Salary Structure, Wage Regulations in India

### **Module V: Employee Relations**

Overview of Industrial Relations, Industrial disputes, Collective Bargaining, Workers Participation and Management, Grievance handling

### **Module VI: Emerging Trends in HRM**

Overview of Human Resource Information System (HRIS), Introduction to HR Audit, IHRM Practices, Cross- Cultural and Diversity Management, Work-life integration, Human Resource Outsourcing

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# INFORMATION TECHNOLOGY AND E-COMMERCE

**Course Code: MGT4109**

**Credit Units: 02**

## **Course Objective:**

This course will expose students to developments in computer technology and understand the working of a computer system. It will introduce end-user computing and build skills in using IT and understanding various technologies like internet, telecom, DBMS concepts, e-commerce etc. The course will expose the students to the latest trends in e-business models, electronic payment systems and data & information security

## **Course Contents:**

### **Module I: Modern Computer Systems**

Evolution of Computer Systems, Input, output and storage technologies, Computer Assisted Control and Automation, (e.g. Delhi Metro , Digitally Controlled Car engines etc.), Computer Controlled Biometric/RFID based Access Control , Contemporary hardware and software platforms(Open Source, Web Software etc.), Storage of Data Resources

### **Module II: Data Resource Management**

Introduction to DBMS, Benefits of DBMS over traditional file system, Types of DBMS, Application of DBMS using MS-ACCESS / ORACLE as a tool for understanding of DBMS concepts. SQL Query handling, Forms, Concept of Data Warehouses and Data Marts, Introduction to Data Centers. Storage Technologies and Architecture (DAT, NAS, SAN etc. ). Live examples of storage strategies of companies like Google, Amazon Wal-Mart dealing with storage crisis

### **Module III: Telecommunications and Computer Networks**

Networked Enterprise :- Components, Types of networks, Advantages of Network Environment, Business Uses of Internet, Intranet and Extranet, Network Topologies, Web 2.0/3.0, Distributed/Cloud/Grid Computing, GSM & CDMA, GPRS ,Features of 3G & 4G technologies, VOIP and IPTV.

### **Module IV: Electronic Commerce Systems**

Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services.

### **Module V: E-Commerce Business Models & EDI**

Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI. Various business models in Ecommerce like B2C, B2B, C2C.

### **Module VI: E-Payment Systems and Security Management**

Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards.

The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software, Hacking etc.) and counter measure. Definition of Cyber Crime and Types. Antivirus, Firewalls, Anti-Spyware, Security Audit, Discussion on Overview of IT-ACT 2000.

**Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# Syllabus - Second Semester

## FINANCIAL MANAGEMENT

**Course Code: MGT4201**

**Credit Units: 03**

**Course Objective:**

The objective of this course is to develop an understanding of short-term and long-term financial decisions of a firm and various financial tools used in taking these decisions. It is also aimed to develop the understanding of the financial environment in which a company operates and how it copes with it.

**Course Contents:**

**Module I: Introduction**

A Framework for Financial Decision-Making- Financial Environment, Changing Role of Finance Managers, Objectives of the firm.

**Module II: Valuation Concepts**

Time Value of Money, Risk and Return, Financial and Operating Leverage.

**Module III: Financing Decisions**

Capital Structure and Cost of Capital, Marginal Cost of Capital.

**Module IV: Capital Budgeting**

Estimation of Cash Flows, Criteria for Capital Budgeting Decisions, Issues Involved in Capital Budgeting, Risk analysis in Capital Budgeting – An Introduction.

**Module V: Working Capital Management**

Factors Influencing Working Capital Policy, Operating Cycle Analysis, Management of Inventory, Management of Receivables, Management of Cash and Marketable Securities, Financing of Working Capital.

**Module VI: Dividend Policy Decisions**

An introduction: Different Schools of Thought on Dividend Policy.

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

**Text &References:**

# BUSINESS RESEARCH METHODS

**Course Code: MGT4203**

**Credit Units: 02**

## **Course Objective:**

The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

## **Course Contents:**

### **Module I: Introduction**

Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal

### **Module II: Measurement and Data Collection**

Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques, measures of central tendency mean, median, mode; measures of dispersion, data processing

### **Module III: Data Analysis I**

Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi- square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test

### **Module IV: Data Analysis-II**

Simple linear regression: coefficient of determination, significance tests, residual analysis, Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)

### **Module V: Report Writing**

Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

Case study must be included in the discussion.

# OPERATIONS MANAGEMENT

**Course Code:MGT4205**

**Credit Units: 03**

## **Course Objective:**

The course aims at developing an understanding of the strategic and functional issues in the operational environment of any organization, of the various decisions involving the operational activities, and of the methods enabling them taking the best possible alternative decision.

## **Course Contents:**

### **Module I: Introduction**

Operations in manufacturing and services, responsibility of Operations Manager, Operations strategy and competitiveness, process analysis, manufacturing process and service process selection and design, job design and work measurement

### **Module II: Strategic Decisions**

Facility location decisions, factors affecting location, location techniques: factor rating method, centroid method, facility layout, process layout, systematic layout planning, product layout, line balancing, fixed position layout, service operations layout, types of capacity, capacity planning: long term and short term, economies of scale

### **Module III: Operating Decisions**

Aggregate Planning, production planning and control (PPC), benefits of PPC, Master Production Scheduling, Operations scheduling: loading, sequencing, priority rules and techniques, Materials Requirement Planning (MRP), concerns in MRP

### **Module IV: Supply Chain Management**

Recent issues in SCM: Role of IT in SCM, CRM Vs SCM, structure of supply chain, benchmarking concept, features and implementation, outsourcing decisions, value addition in SCM

### **Module V: Inventory Management**

Inventory management: Objectives, factors, process, inventory costs, inventory models, inventory control techniques: ABC, VED, EOQ, SED analysis, Just-in-Time (JIT), JIT vs traditional systems of operations, JIT in services

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# MANAGEMENT SCIENCE

**Course Code:MGT4207**

**Credit Units: 03**

## **Course Objective:**

The main objective of the course is to provide the students the insight into structures and processes that management science can offer and the enormous practical utility of its various utility. The course is designed to introduce the fundamental tools of management science and their application to real life business problems. It will help students to take well informed decisions in their corporate life.

## **Course Contents:**

### **Module I: Introduction**

Management Science: uses, scope, applications in managerial decision making; assumptions of management science models, decision making environments: decisions under certainty, uncertainty and risk situation; decision tree approach and its applications.

### **Module II: Linear Programming Problems**

Linear Programming Problems: Modeling and Solution Methods- graphical method, simplex methods, problems with maximization and minimization objects, duality and its managerial interpretation; Sensitivity analysis: meaning, Change in Objective Function Coefficients, Change in Right Hand Side Values, Change in Availability of resources and Addition of a new variable.

### **Module III: Transportation and Assignment Model**

Transportation model: various methods of finding initial basic feasible solution and optimal solution, MODI method, degeneracy, unbalanced problems, prohibited route problems, maximization transportation problems

Assignment Model: Hungarian method for solution, unbalanced assignment problems, restrictions on assignments, travelling salesman problem.

### **Module IV: Game Theory**

Two-Person Zero Sum Games, Pure Strategies: Games with Saddle Point, Mixed Strategies: Games without Saddle Point, Principle of Dominance, and Solution Methods for Games without saddle point – Algebraic Method, Arithmetic Method, Graphical Method.

### **Module V: Markov Chains**

Markov Chains: introduction, characteristics, applications, state and transition probabilities, steady-state probability (equilibrium conditions), absorbing states and other applications of Markov Analysis.

### **Module VI: Simulation**

Simulation: meaning, types of simulation, steps of simulation process, Monte Carlo simulation, applications of simulation

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

**Text & References:**

# ECONOMICS FOR MANAGEMENT

**Course Code: MGT4209**

**Credit Units: 02**

## **Course Objective:**

To familiarize the students with theoretical concepts of modern Economic Analysis for Management so that they can use these as inputs in managerial decision making process. In this course adequate emphasis has been given on making students understand and critically analyze key economic variables both at micro and macro levels in the domestic and international domains. The idea is that such comprehensive understanding of economic concepts will allow them to apply the acquired knowledge in business operations and make strategies for the firm operating under a dynamic business environment.

## **Course Contents:**

### **Module I: Introduction to Managerial Economics, Demand Analysis and Demand Forecasting**

Introduction to Managerial Economics: Meaning and Nature of Managerial Economics, Significance of Managerial Economics, Scope of Managerial Economics. Demand Analysis: Meaning of Demand, Determinants of Demand, Individual and Market Demand Functions, Individual and Market Demand Curves, Law of Demand, Exception of Law of Demand. Elasticity of Demand: Types of Elasticity of Demand, Significance of Elasticity of Demand. Demand Forecasting: Purpose of Demand Forecasting, Steps Involved in Forecasting, Determinants of Demand Forecasting, Methods of Demand Forecasting.

### **Module II: Theory of Supply, Production, Cost and Revenue Analysis**

Supply: Law of Supply, Determinants of Supply, Shift of Supply and Change in Supply, Elasticity of Supply, Kinds of Elasticity of Supply, Determinants Elasticity of Supply. Theory of Production: Meaning of Production, Short –run Analysis of Production, Law of Variable Proportion, the Three Stages of Production, Returns to Scale. Analysis of Cost: Cost and Managerial Decision-making, Types of Cost, Cost Function, Relationship between Production and Cost, Short Run Cost Function, Long Run Cost Function, Relation between Short-run and Long-run Cost Curves,. Economies of Scale. Break-Even Analysis. Concept of Revenue.

### **Module III: Market Structure and Price Determination**

Perfect Competition: Introduction of Perfect Competition, Characteristics of Perfect Competition, Demand Curve of Firm and Industry, Equilibrium of the Firm in the Short Run and Long Run. Effects of Tax Imposition under Perfect Competition. Monopoly: Assumptions, Causes of Monopoly, Demand, Average Revenue and Marginal Revenue of a Monopolistic, Profit Maximization Price Determinants of the Monopolist in Short-run and Long-run. Measures of Monopoly Power. Monopolistic Competition: Assumptions, Product Differentiation, Demand Curve, Equilibrium of the Firm in Short-run and Long-run, Selling cost and Monopolistic Competition. Oligopoly: Assumptions, Non-collusive Oligopoly and Collusive Oligopoly, Kinked Demand Curve Analysis.

### **Module IV: Macroeconomics Analysis**

National Income: An Indicator of Economic Activity, The Parameters that Influence Level of Economic Activity. Business Cycles: Characteristics of Business Cycle, Phases of Business Cycle, Ill Effects of Business Cycles, General Measure to Control Business Cycles.

The Role of Government in Market Economy and Strategic Business Implications: Rationale of Government Intervention, Government Macroeconomic Policy Measures – GST, Demonetization – and their impact on Business; Macro Economic variables and their functional relationship; Economic Functions of Government in a Market Economy, Legal and Social Framework, Restraining Unfair

Competition and Increasing Market Power, Reallocation of Resources in the Presence of Externalities, Redistribution of Income, Regulation of Natural Monopoly, Stabilization of Economy;  
 Macroeconomic Variables affecting Business: Consumption Function, Saving Function, Investment Multiplier; Transaction, Precautionary, Speculative Demand for Money; Liquidity Preference; Components of Money Supply; Fiscal Policy & Monetary Policy and their implications on business and management; Inflation and Deflation - Demand pull and Cost push inflation; Government policies to control inflation.  
 International Trade Regime and its implications on Business: GATT, World Trade Organization, Regional Trade Agreements – EU, NAFTA, ASEAN, SAFTA, MERCUSOR.

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# BUSINESS ANALYTICS

**Course Code: MGT4210**

**Credit Units: 02**

## **Course Objective:**

**The course provides** an introduction to data analytics to be used in business. The students will learn how data analysts describe, predict and make informed business decisions in various business domains like marketing, human resources, finance and operations. The aim of the course is to develop basic data literacy and an analytic mindset in students that will help them to make strategic decisions based on data.

## **Course Contents:**

### **Module I: Introduction to Business Analytics**

Importance and role of data driven decisions. Business Analytics – Definition, Market, Trends; Paradigm Shift from Data to Insight and from Business Intelligence to Business Analytics; Examples and Types of Business Analytics Analysis- Forecasting & Predictive Modeling; Descriptive, Prescriptive and Predictive Analytics. Data Summarization, Data visualization – Various visualization techniques, standardized reporting and Pivot Tables – Using Excel

### **Module II: Data Mining**

Introduction to Data Mining; Crucial processes in data mining; Data Warehousing; Data Mining Techniques and Exploratory Data Analysis; Data Mining Tool – XL Miner.

### **Module III: Decision Making & Optimization**

Decision making under uncertainty – Decision Trees and Risk Profiles; Sensitivity Analysis; Optimizing complex decisions – Optimization of a large number of decisions while accounting for different kinds of physical and business decisions. Introduction to Optimization Techniques –Linear Programming; Optimization – Use of Excel to solve business problems like marketing mix, capital budgeting and portfolio optimization.

### **Module IV: Big Data and Introduction to R**

Introduction to Big Data, Big Data driven decisions in business organizations – Benefits and Security/Privacy concerns.

Building Business and Economic Models –Tools to leverage data for Prediction purposes; Logistic Regression.

Introduction to Machine Learning; Statistical Learning vs. Machine Learning; Major classes of Learning Algorithms –Supervised Vs Unsupervised Learning.

Introduction to R Programming

### **Module V: Simulation using R and Excel**

Hands on Regression using R; Introduction to Simulation; Applications of Simulation and Building a Simulation Model. (Using Excel and R)

Capstone Project.

## **Examination Scheme:**

# EXCEL FOR MANAGERS

Course Code: MGT4211

Credit Units: 01

## Course Objective:

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets. After completion of this course, students will be able to learn the various methods for entering and editing data and also learn the various ways to write simple formulas.

## Course Contents:

### Module-I: Getting Started with Excel

Introduction to Spreadsheets: Launching Excel, entering data in spreadsheet, widening rows and columns, applying basic formatting in spreadsheet, saving work in excel. Entering Data into cells: Using autofill, sort & filter feature, creating lists, inserting & deleting rows and columns. Wrapping & merging text and cells,

### Module-II: Basics in excel

Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel. Setting the page orientation and print area. Adding hyperlinks to cells, inserting images, objects, equations and symbols.

### Module-III: Charts & Formulas in Excel

Understanding Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart. Using Basic functions- average, sum, min, max, product etc. date functions, time functions. Math Operators in Excel, combining mathematical operators.

### Module-IV: Functions in Excel

Logical- using IF, AND, OR, NOT, TRUE, FALSE Functions. Textual- using TRIM, UPPER, LOWER, REPLACE Functions. Import data into excel, Look up functions with index and match. Rounding, sum product, conditional counts and conditional sums, Filtering data, pivot table, pivot charts, conditional formatting.

### Module-V: Financial and Statistical Functions in Excel

Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager, IRR. Statistical functions: Max, Min, Average, Large, Rank, Small, Var, Std Dev.

## Examination Scheme:

Components	Written Test	Practical	V/P	File/Assignment	Attendance
Weightage (%)	20	30	30	15	5

## **SPECIALISATION - FINANCE & ACCOUNTING** **CORPORATE FINANCIAL REPORTING & ANALYSIS**

**Course Code: FIN4201**

**Credit Units: 03**

### **Course Objective:**

The International Financial Reporting Standards (IFRS) issued by International Accounting Standards Board (IASB) are gaining recognition as Global Reporting Standards. While appreciating the emerging diversities and complexities in the world of accounting and the need for knowledge of IFRS in relation to the convergence of the Indian Accounting Standards. The objective of this Subject is to enhance the knowledge of IFRS issued by IASB as well as to provide practical framework to the student in the globalization scenario.

### **Course Content:**

#### **Module-I:**

Brief overview of Indian Accounting Standard and different accounting standards at international level. Rational of Accounting Standards. IFRS Framework, Features of IFRS, Genesis of IFRS, Journey of IAS to IFRS, Advantage of adopting. IFRS. Challenges in Adopting IFRS. Difference between Indian GAAP and IFRS.

#### **Module-II:**

Concept of Fair Value Accounting Concept of Adoption and convergence. Significant Difference between Ind AS and IFRS. Problem of Carve Out. Timeline for Adoption for Ind- As, Concept of Fair Value Accounting Presentation of Financial Statement as per Ind-AS1, Statement of Change in Equity, Cash Flow Statement and Ind AS 7.

#### **Module-III:**

Treatment of Inventories as per Ind AS 2-; Property plant and equipment- Ind AS 16, recognition, measurement, cost model, revaluation model, depreciation and impairment of assets and related disclosures, Revenue recognition Ind AS 18- scope, revenue from sales of goods, Services, interest royalties and dividends and disclosures, Financial Instruments: Presentation, Recognition and Measurement (Ind AS 32 and 39), Ind AS 33 Earnings per Share .

#### **Module-IV:**

First time adoption of accounting standard: Recognition and measurement, Presentation and Disclosure

#### **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>10</b>	<b>70</b>

# FINANCIAL MARKETS & INSTITUTIONS

**Course Code:FIN4202**

**Credit Units: 03**

## **Introduction**

This course is an introduction to the theory and principles of international financial markets and institutions. It covers basic theory and operation of financial systems. A practical approach is adopted in this course through the use of case studies and real life examples.

## **Course Objective:**

- To provide students with an introduction to the theory and practice of financial markets and institutions.
- To help students to gain a thorough understanding of the workings of financial markets and of financial instruments
- To introduce the students to the management of financial markets and institutions in an international context.

## **Course Contents:**

### **Module-I: Introduction to the Financial System**

Introduction to Indian Financial System, Assets and liabilities, portfolio, financial instruments, stocks and flows, lending, borrowing, and wealth, weakness of Indian Financial System.

### **Module-II: Money Market**

Call money market, Treasury bills market, Commercial bills market, Commercial papers and certificates of deposits, Discount and Finance House of India, Government Securities Market, Recent developments.

### **Module-III: Capital Market**

Impact of monetary policy, Industrial securities market, Primary market and Secondary market. Nature and role of financial system: Financial system and markets, Efficiency and stability, Technology, Government intervention in the financial system, SEBI, Discount market, 'parallel' markets, capital markets, stock markets, bonds, equities, mutual fund, hedge funds, private equity, financial crisis, custodial services, stock exchanges, depository services: NSDL, CDSL.

### **Module-IV: Institutions: Banking**

Evolution of modern commercial banks, Evolution of bank assets, liabilities and activities; Banking structure, Merchant Banking, Matching revenues and costs, capital adequacy; Accounting policies and related matters, Direct investments, and credit programmes. Central banking and monetary policy: Central banking functions; Money creation, process and control; monetary policy.

### **Module-V: Other Financial Institutions**

NBFC Evolution and present status. Insurance Companies: Economics of insurance, The insurance industry and its regulation; LIC, GIC. Development finance institutions: Concept, role of DFIs, Sources of funds, DFIs in India, Khan Committee Report and Universal banking; Recent trends. Ministry of Finance- Fiscal Policy, IRDA, NPS

### **Module-VI: International Financial Markets**

The world capital market, the New Tiger Economics, Trends in the global financial markets

## **Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; V - Viva; CT - Class Test; A - Attendance; EE - End Semester Examination)

# FINANCIAL STATEMENT ANALYSIS

**Course Code: FIN4203**

**Credit Units: 03**

## **Course Objective:**

This course is designed to prepare students to interpret and analyze financial statements for tasks such as credit and security analyses, lending and investment decisions, and other decisions that rely on financial data. This course explores in greater depth financial reporting from the perspective of financial statement users. Students develop a sufficient understanding of the concepts and recording procedures and therefore are able to interpret various disclosures in an informed manner. Students learn to compare companies financially, understand cash flow, and grasp basic profitability issues and risk analysis concepts. Ultimately, students who complete this course develop a more efficient and effective approach to researching, interpreting, and analyzing financial statements.

## **Course Contents:**

### **Module-I: Introduction to Financial Statements**

Income Statement- Introduction, Revenue Recognition, Expense recognition, Comprehensive income, Accrual concept, Balance Sheet-Introduction, Components, measurement base of Balance sheet, Cash Flow statement- Format, Analysis of Cash flow statement.

### **Module-II: Financial Ratios**

Introduction, Financial Analysis tools and techniques, Internal liquidity ratios, operating profitability ratios, Return on investment ratios, financial risk ratios, growth potential ratios, Return on equity and du pont system, Basic earning per share, dilutive earning per share, uses and limitations of ratio analysis.

### **Module-III: Analysis of Assets**

Investment securities, Inventory analysis- conversion of inventory methods, long term assets- capitalizing vs. expensing, depreciation accounting, capitalizing intangible assets, Asset Impairment, natural assets.

### **Module-IV: Analysis of Liabilities**

Introduction, Income Tax- terminology, Deferred tax accounting, Long term bonds- total interest cost component, retirement or conversion of bonds, interest rate impact on bond value, Leases- operating vs. financing lease, determining the value of lease and lease assets.

### **Module-V: Red Flags**

Introduction, Accounting shenanigans, causes of accounting shenanigans, finding shenanigans.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## **Required text:**

- Prescribed Textbook:
- “The Analysis and use of Financial Statements”, (3rd Ed.), Gerald I. White, Ashinpaal C. Sondhi and Dov Fired, Wiley-India.
- Financial Reporting and Analysis CFA level 1, latest edition

## **SPECIALISATION- HUMAN RESOURCE**

### **MEASUREMENT IN HUMAN RESOURCE**

**Course Code: HRM4201**

**Credit Units: 03**

#### **Course Objective:**

This course helps practice the tools and techniques which can be subsequently used to quantify several parameters of the effective management of human capital, including the functions of HR. It provides a set of powerful skills to communicate with and influence key decision-makers within an organization.

#### **Course Contents:**

##### **Module I: Introduction and the Challenges of Measurement**

Introduction: Meaning & Definition of HR Measurement – Importance; Development of Concept. HR Measurement for HR Professionals; Investment in Human Resources. Efficient use of Human Resource, Adopting the Right Perspective: Understanding the Role of Workforce in Strategy Implementation

##### **Module II: Developing Measurement Metrics**

Understanding and Developing the Right Metrics: Tools to Manage the Implementation of Strategy, Implementing The Metrics. Benchmarking HR, Different Types of Scorecards- Balance Score Card, HR Score Card

##### **Module III: Designing the Metrics**

Principles of Good Measurement. Cost-Benefit Analyses for HR Interventions  
Measuring HR Alignment. Measuring Hiring and Staffing, Measuring the Value of Compensation and Benefits. Measurement of Training and Development

##### **Module IV: Specific Topics in Measurement**

Measuring the Value of Employee Relations and Retention Program, Models for Assessing Return on Investment, Assessing Value of Outsourcing and Call Centers .

##### **Module V: TQM and HR Audit**

Role of TQM in HR Measurement. HR Audit, Implementing HR Audit, Methodology and Issues, HRD Scorecard, HRD Audit – The Indian Experiences and Cases, People Capability Maturity Model (PCMM), Measuring Intellectual Capital and Web Based HR Systems

##### **Module VI: Human Resource Information System**

Role of Information System in Human Resource Decision Making, Designing and Implementation of HRIS, Organizing Data, Personnel Audit and Personnel Research, Computer Applications in HRM Functions (uses and trends)

#### **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

#### **Text & References:**

- Fitz-EnzJac,(2001), How to Measure Human Resource Management, McGraw Hill
- Mello Jeffrey A., (2008), Strategic Human Resource Management, Thompson Press.

# TALENT ACQUISITION AND DEVELOPMENT

**Course Code: HRM4202**

**Credit Units: 03**

## **Course Objective:**

The course aims at clear understanding of the concepts of recruitment, selection, retention and development of human capital from the perspective of organizational excellence.

## **Course Contents:**

### **Module I: Job Analysis and HR Planning**

Job Analysis, Writing Job Descriptions, Job Specification, Job Analysis in a Jobless World and Human Resource Planning and Forecasting

### **Module II: Recruiting and Selection**

Developing and Using Application Forms: The Application Blank, Information Technology and HR: Recruiting on the Internet, Global Talent Search, Selection Process, Basic Selection Model: The Decision Theory Approach, Basic Testing Concepts and Interviewing Candidates

### **Module III: Retention Management**

Basics of Absenteeism, Turnover, Attrition and Retention of HR, Importance of retention, Retention Determinants, Retention Management Process, Retention interventions

### **Module IV: Process and evaluation of Training and development**

Establishing objectives, preparing the parameters, designing the programs, methods, trainers and training styles, Training for Trainers, Trainer Certifications, Training Evaluation – Need for evaluation, Concept of Return on Investment, Cost – Benefit Analysis.

### **Module V: Training and Development for Modern Organizations**

Concept and Need for Learning Organizations, Creativity, Managing Change, Team Playing and Effective Group Dynamics, Managing differences at workplace, Effective Communication, Managing Cultural Diversity, Sensitivity Training, Total Quality Management, Computer Based Training.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## **Text & References:**

- Raymond Noe (2016) Employee Training & Development, McGraw-Hill Education.

# GLOBAL HUMAN RESOURCE MANAGEMENT

**Course Code: HRM4203**

**Credit Units: 03**

## **Course Objective:**

The main objective of this course is to inculcate deep understanding of International Human Resources and to explore the dynamics of global business development. It also aims at preparing students about examining significant business opportunities and maximization of returns with understanding of cross cultural management, as primary causes of failure in multinational ventures stem from lack of understanding of the essentials differences in managing human Resources, at all levels in foreign environment.

## **Course Contents:**

### **Module I: Internationalization**

Evolution of International Business, Stages of internationalization, Modes of entering International business Relationship between International Strategy and SIHRM- International Human Resource Management – Competencies for Global Manager

### **Module II: Organisation Structure, International HRP, Recruitment and Selection**

Organisation Structure and HRM, Global Human Resource Planning, Issues in Supply of International Human Resources, Recruitment and Selection

### **Module III: International Compensation Management**

Complexities, Objectives of International Compensation Management, Component and Structure of International Compensation Package, Executive Rewards and Compensation, Approaches to International Compensation Management

### **Module IV: Human Resource Professional – Molester Navigation**

Context for International Perfect Management, Framework for Performance Management, Re-patriation, Cross-Cultural issues across all continents

### **Module V: Understanding Cross Culture: Issues & Perspectives**

Understanding Culture, Introduction, Key Concepts, Determinants of Cultural Identity, Frameworks for Mapping the Culture, Geert Hofstede, Clyde Cluckhohn, TE Hall, Fons Trompenaars Studies of National Culture, Managing Workforce Diversity, Adjusting to the New Culture

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## **Text & References:**

- K. Aswathappa, Dash Sadhna (2007), International Human Resource Management: Text and Cases, Tata McGraw Hill Education.

## **SPECIALISATION – INTERNATIONAL BUSINESS**

### **INTERNATIONAL TRADE PROCEDURES AND DOCUMENTATION**

**Course Code: IBM4201**

**Credit Units: 03**

**Course Objective:**

Learning the importance and procedural & documentation aspects of export-import of goods and services; impart knowledge of governments, departments, international institutions involved ; teach an Export Manager to develop a systematic methodology to handle exports ; understand the relevance and importance of various government policy measures for export as well as import.

**Course Contents:**

**Module I: Introduction**

Export documentation Framework – the need, entities & documents as per requirement of (a) the contract (b) Govt. of India (c) Importing country d) for claiming export assistance.

**Module II: Documents for processing export order and legal implications**

Processing of Product enquiry/quotation, Purchase/Export Order, Letter of intent, Payment Terms, International Transport Modes, INCOTERMS, advising & scrutiny of a Letter of Credit (L/C), seeking L/C amendments, International Chamber of Commerce's UCPDC articles.

**Module III: Export/Import Documents**

How to make Commercial, Financial, Transport, Title, Official, Insurance, Export assistance Documents & Certificates for Exports. Ensuring error-free export documentation as per L/C. How to open L/C, apply for license and make Customs/ Sales Tax documents for imports. International Transactions involving Documents Against Payment and Document Against Acceptance. Negotiation of Export Bills, Bank realization, late payment follow-up.

**Module IV: Central Excise, Sales Tax, Customs and Port Clearances**

Clearance of Export & Import Cargo, Role of Clearing and Forwarding Agents, Shipment of Export Cargo, Excise, Sales Tax & Customs Department regulation compliance. Port and Shipping clearance of Export and Import cargo.

**Module V: EXIM Policy Framework**

EPCG Scheme, Duty Exemption Pass Book Scheme, Export Oriented Units, Export houses, Trading houses, Export Processing Zones, Special Economic Zone, Bank, RBI, DGFT, Customs & FEMA regulatory compliances.

**Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

**Text & References:**

# **GROWTH PROSPECTS OF THRUST AREAS OF INDIAN EXPORTS**

**Course Code: IBM4202**

**Credit Units: 03**

## **Course Objective:**

The course will enable the students to understand trend and composition of India's export and also the existing and potential export destination of Indian products. The course will also help the students to understand how Foreign Trade policy of India has promoted export from India.

## **Learning Outcomes:**

On the successful completion of this course the student will be able to:

- Examine the past and present scenario and trend of Indian exports
- Understand the factors effecting India's international trade
- Assess the status, potential, challenges and strategies for furthering exports in key thrust markets

## **Course Contents:**

### **Module I: Introduction**

India's International Trade-Present Scenario

Trends in India's Export

Future outlook.

Common Provisions for Export from India Schemes

### **Module II: Institutional Framework for Export Promotion of Thrust Sectors**

Role of EPCs and other Trade Promotion bodies in promoting Export from India

Role of EoUs, EHTPs, STPs, BTPs and SEZs in India's Export

### **Module III: Foreign Trade Policy-2015-20**

India's foreign trade and investment policy;

Policy making body and mechanism

Special Focus Initiatives

General Provisions Regarding Imports and Exports

Promotional Measures

Duty Exemption / Remission Schemes

Export Promotion Capital Goods Scheme

### **Module IV: Focus on Specific Growth Sectors**

Gems and Jewellery

Leather and Footwear

Apparel & Textiles

Agriculture and Processed Food

Marine Products

Engineering Sector

Pharmaceutical, Chemical and Allied Products

Handicrafts, Carpets and Handloom

IT Products

Services

### **Module V: Study of Specific Markets**

USA: World biggest importer and Exporter

EU: Single Largest market

Countries under Trade Promotion Program of Ministry of Commerce

Trade with Russia under Debt-Repayment Agreement.

Focus Latin American Countries

Focus African Countries  
Focus CIS  
Focus ASEAN

**Learning Methods:**

Tutorials, Interactive sessions, Case studies, Field visits, Management games, Extensive research projects, Seminars, Weekend experience in companies - the course is covered by adopting a combination of lecture methods, class presentation by groups of students, self study sessions. Each student is required to do the back ground reading from the specified chapters of the prescribed book before coming to class. Cases are also to be analyzed, discussed in groups (teams) outside the class as preparatory work.

**Examination Scheme:**

Components	P1	C1	A	H1	EE
Weightage (%)	10	10	5	05	70

# **PRINCIPLES OF GLOBAL BUSINESS MANAGEMENT**

**Course Code: IBM4203**

**Credit Units: 03**

## **Course Objective:**

The main purpose of this paper is to familiarize the participants with the various aspects of Principles of Global Management, with a view that conducting business is exciting, challenging and globally oriented. This course will provide the students with an integrated and practical approach to understand the concepts of Global Management and also to provoke critical thinking about various principles, guidelines and practices of Global Business Management.

## **Learning Outcomes:**

The learning outcomes that students are expected to achieve in this course include:

- Develop a clear understanding of the conceptual frameworks and definitions of specific terms that are integral to the international management literature.
- Attain a clear understanding of the various factors that help determine the appropriateness of different management strategies for different types of international ventures.
- Examine ethical issues that are pertinent to international business management practices and to the personal value system of the student.
- Explore and evaluate different career opportunities, specific regional locations, and organizations where the students may seek to pursue an international business management career

## **Course Contents:**

### **Module I: Globalization and trends in Management System**

Introduction to Globalization; Globalization of Business: Historical Perspective; Measuring Globalization; Drivers of Globalization; Concept of International Business; Domestic versus International Business; Managing in Global Marketplace

### **Module II: International Trade Theory**

Introduction and basis of Trade Theories; Theory of Mercantilism; Theory of Absolute Advantage; Heckscher-Ohlin Theory; The Product Life Cycle Theory; Theory of Competitive Advantage; Theory of Comparative Advantage; Porter's Diamond Model

### **Module III: International Institutions and Economic Integrations**

World Trade Organization; World Bank; International Monetary Fund and Concept of SDR; International Monetary System; Framework of PTAs and FTAs; India's Participation in PTA's; Major Regional Trade Agreements-NAFTA, SAFTA, APTA, GCC, SAARC, BRICS.

### **Module IV: Forms and Modes of Global Business Expansion**

Reasons for International Business Expansion; Entry Decisions; Different Entry Modes; Selecting an entry mode; Comprehensive Model for Market Entry; Strategic Alliances; Modes of FDI and FII; Concept and significance of balance of payments account; Balance of payment deficits and correction policies.

### **Module V: Elements of Global Business Environment & Functional Areas of Global Business**

The Cultural Environment; The concept of culture; The strategy for managing across culture; Cross-cultural differences & similarities; The Political and Legal Environment; The Political system and its functions; Impact of Political system on management decision; Legal & political strategies in International Business; The Economic Environment Facing Global Business; Classifying Economic System; Key Macroeconomic issues; Adapting to Foreign Economic System; Global Marketing; Global Production and Operational Strategies; Global Human Resource Management; Global Accounting and Financial Management; Global Strategic Management

**Learning Methods:**

Tutorials, Interactive sessions, Case studies, Field visits, Management games, Extensive research projects, Seminars, Weekend experience in companies - the course is covered by adopting a combination of lecture methods, class presentation by groups of students, self study sessions. Each student is required to do the back ground reading from the specified chapters of the prescribed book before coming to class. Cases are also to be analyzed, discussed in groups (teams) outside the class as preparatory work.

# **SPECIALISATION – INFORMATION TECHNOLOGY**

## **FUNDAMENTALS OF COMPUTERS**

**Course Code: ITM4201**

**Credit Units: 03**

**Course Objective:** The objective of this course module is to acquaint the students with the basics of computers system, its components, data representation inside computer and to get them familiar with various important features of computers.

### **Course Contents:**

#### **Module-I: Introduction to Computers**

Introduction of Computer, Generations of Computer, Importance, Characteristics, Block Diagram: Input unit, Output unit, Memory unit, CPU (ALU +CU), Input and output devices, Computer Memory: Cache, Primary memory and Secondary memory.

#### **Module-II: Number System**

Data Representation: Number systems, character representation codes, Binary, Octal, hexadecimal and their inter conversions. Binary addition & subtraction

#### **Module-III: Computer Software**

Introduction to computer software: Hardware/Software interaction, fetch-Decode-Execute Cycle, Software Classification- System software, Application Software, Utility Software, Communication Software, Performance monitoring Software, Freeware, shareware and open source software

#### **Module-IV: Operating Systems**

Introduction to Operating Systems, Functions- job management, batch processing, online processing, data management, virtual storage, I/O management. Classification- Desktop, server, mainframe, multitasking, multithreading, real time.

#### **Module-V: Applications of Computers**

Applications of Computers in business & industry, home, education & training, entertainment, science medicine & engineering, mobile computing, business on the web, web advertising, secure transactions.

### **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# MANAGEMENT INFORMATION SYSTEM

**Course Code: ITM4202**

**Credit Units: 03**

## **Course Objective:**

This course focuses on the relationships among management, information, and systems as well as the relationship between a manager's need for information and his/her position in the organization, how hardware, software, data, people, and procedures are combined to form an information system, how information technology can be used by a business organization to gain a competitive advantage why a knowledge of information systems is crucial to anyone who plans a career in business Organization.

## **Course Contents:**

### **Module I: Organizations, Management and Information**

Meaning of MIS, Components of MIS, IS in Business, Data Information and knowledge, Characteristics of Information in context, Issues with Information, System and Subsystems, Organization as a System, Different Organizational Structures: Hierarchical Structure – (Different Levels of Management, Information disposition at different levels), Matrix Structure, Business Process (Management, Operational and Support).

### **Module II: Information Technology Architecture**

Managing Hardware Assets – Considerations in Procurement and installation, Managing Software Assets – Consideration in procurement and configuration, Data Resource Management (Database Management System – Types and Structure of Database, Data Warehousing – Phases in building Data Warehouses in an organization, Data Mining – Data Mining Applications, Data Banking)

### **Module III: Management and Organizational Support Systems for the Firm**

Information, Decision and Management, Decision Support System (Phases in Decision Making, Problems and Decision Types, DSS components, and Analytical Models in Decision Making), Executive Information System – Characteristics and benefits, Managing Knowledge (Knowledge Engineering, Knowledge Management Activities and Knowledge Representation Methodologies), Artificial Intelligence (Domains of AI, AI in Business), Expert System (Components, Benefits and Limitations, Suitability Criteria for ES)

### **Module IV: Building Information Systems in the Digital Firm**

Organizational Planning – Planning at distinct Managerial Levels, Approaches in Planning (Top Down, Bottom Up, Planning through CSF), IT and IS Planning – Prerequisites and factors, IT and IS Architecture (Centralized, Decentralized and Distributed), Implementing IT and IS (Factors and Resistance in implementation), Change Management with BPR, System Development (System Development Life Cycle-Overview, Prototyping), Evaluating Factors for IT and IS services.

### **Module V: Managing Information Systems in the Digital Firm**

Managing Security (Security Challenges of IT, Business and Technological Ethics), Computer Crime (Tools for Computer Crime, Tools for Security Management), IS Security Management Control (Information System Control, Auditing the Security), Managing World Wide Information System (Managing Multi Site IT and IS – Cultural and Technical Differences), World Wide IT and IS Strategies (Multinational, International and Global Strategies)

### **Module VI: Key System Applications for the Digital Age**

Enterprise Systems – Supply Chain Management & Customer Relationship Management Systems, Using Enterprise Applications and Achieving Operational Excellence & Customer Intimacy, E-Commerce: Digital Market & Digital Goods, M-Commerce: Services & Applications, Enterprise Applications: New Opportunities and Challenges.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V** - Viva; **Q** - Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

**Text & References:**

# INTERNET FUNDAMENTALS

**Course Code: ITM4203**

**Credit Units: 03**

**Course Objectives:** The aim of this course is to provide conceptual and technological developments to the students in the field of Internet and web designing with the emphasis on comprehensive knowledge of Internet, its applications and the widely deployed protocols.

## **Course Contents:**

### **Module-I: Introduction to Internet:**

Internet, Growth of Internet, Owners of the Internet, Anatomy of Internet, ARPANET and Internet history of the World Wide Web, basic Internet Terminology, Net etiquette. Internet Applications – Commerce on the Internet, Governance on the Internet, Impact of Internet on Society – Crime on/through the Internet.

### **Module-II: ISP and IP Addressing**

Modes of Connecting to Internet, Internet Service Providers(ISPs), Internet address, standard address, domain name, DNS, IPv4, IPv6. Modems and time continuum, communications software; internet tools.

### **Module-III: Internet Protocols & Electronic Mail**

Introduction to email- creating User ids, Passwords, e-mail addresses, message components, message composition, mailer features, E-mail inner workings, E-mail management and protocols- SMTP, POP3, IMAP, MIME, Newsgroups, mailing lists, chat rooms. Introduction to internet protocols- TCP/IP, OSI, Telnet and FTP

### **Module-IV: Web Browsing and HTML**

Introduction, Miscellaneous Web Browser details, searching the www: Directories search engines and meta search engines, search fundamentals, search strategies and keywords, working of the search engines. Basics of HTML & formatting and hyperlink creation.

### **Module-V: Internet Security:**

Security and Privacy issues on Internet, Introduction to Cryptography, Public Key & Private Key Cryptography, Encryption schemes, Secure Web document security protocols, Digital Signatures, Firewalls.

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

## **Text Book:**

# WEB DESIGN USING HTML

**Course Code: ITM4204**

**Credit Unit: 03**

## **Course Objective:**

To make the students understand the basics of web designing and to impart knowledge about the web page and website creation and making the students aware about the technologies available and their applications.

## **Course Contents**

### **Module I: Web Design Introduction**

Basic principles involved in developing a web site, Planning process, Five Golden rules of web designing, Designing navigation bar, Page design, Home Page Layout, Design Concept, Brief History of Internet, What is World Wide Web. Why create a web site, Web Standards, Audience requirement.

### **Module II: HTML Basics**

What is HTML, HTML Documents, Basic structure of an HTML document, creating an HTML document, Mark up Tags, Heading-Paragraphs, Line Breaks, HTML Tags.

### **Module III: Elements of HTML**

Introduction to elements of HTML, Working with Text, Working with Lists, Tables and Frames, Working with Hyperlinks, Images and Multimedia, Working with Forms and controls. XML, Java Script

### **Module IV: CSS**

**CSS Introduction:** CSS Syntax, CSS Id & Class, CSS How. **CSS Styling:** Styling Backgrounds, Styling Text, Styling Fonts, Styling Links, Styling Lists, Styling Tables. **CSS Box Model:** CSS Border, CSS Outline, CSS Margin, CSS Padding

### **Module V: CSS Advanced**

CSS Grouping/Nesting, CSS Dimension, CSS Display, CSS Positioning, CSS Floating, CSS Align, CSS Pseudo-class, CSS Pseudo-element, CSS Navigation Bar, CSS Image Gallery, CSS Image Opacity, CSS Image Sprites. CSS Media Types, CSS Attribute Selectors

### **Module VI: Dreamweaver & Web Site**

Dreamweaver Basics, Dreamweaver shortcuts, Dreamweaver panels, Dreamweaver toolbars, Dreamweaver automation, Source code formatting

Web Site: Creating the Web Site, Saving the site, working on the web site, Creating web site structure, Creating Titles for web pages, Themes-Publishing web sites.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>S/V/Q</b>	<b>HA</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	8	7	70

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, EE: End Semester Examination; Att: Attendance

## **SPECIALISATION – MARKETING & SALES**

### **MARKETING RESEARCH**

**Course Code : MKT4201**

**Credit Units: 03**

#### **Course Objective:**

To facilitate the understanding and learning of fundamental concepts in the area of marketing research. To provide the students with research tools and techniques to conduct research and make effective analysis for effective decision making.

#### **Course Contents:**

##### **Module-I: Introduction and Early Phases of Marketing Research**

Introduction to Marketing Research: Objectives , Overview , Definition of Marketing Research , A Classification of Marketing Research, The Marketing Research Process; Defining the Marketing Research Problem and Developing an Approach: Importance of Defining the Problem ,The Process of Defining the Problem and Developing an Approach, Marketing Research Problem ,Defining the Marketing Research Problem, Components of the Approach.

##### **Module-II: Research Design Formulation**

**Research Design** : Definition, Exploratory Research, Descriptive Research, Cross-Sectional Designs, Longitudinal Designs, Relative Advantages and Disadvantages of Longitudinal and Cross-Sectional Designs, Causal Research, Relationships Among Exploratory, Descriptive, and Causal Research, Potential Sources of Error, Marketing Research Proposal; **Exploratory Research Design-Secondary Data**: Criteria for Evaluating Secondary Data, Classification of Secondary Data; **Exploratory Research Design- Qualitative Research**: Primary Data: Qualitative Versus Quantitative Research, Rationale for Using Qualitative Research , A Classification of Qualitative Research Procedures; **Descriptive Research Design**: Survey and Observation; **Causal Research Design**: Experimentation; Measurement and Scaling: Fundamentals and Comparative Scaling and non-comparative Scaling Techniques; **Questionnaire**: Preparations and errors; **Sampling**: Design and Procedures , Final and Initial Sample Size Determination.

##### **Module-III: Data Collection and Preparation**

Fieldwork, Data Preparation, The Data-Preparation Process, Questionnaire Checking, Editing ,Treatment of Unsatisfactory Responses, Coding, Coding Questions , Developing a Data File, Transcribing, Data Cleaning, Consistency Checks, Treatment of Missing Responses, Statistically Adjusting the Data, Scale Transformation, Selecting a Data Analysis Strategy .

##### **Module-IV: Analysis**

Frequency Distribution, Cross-Tabulation, and Hypothesis Testing, Analysis of Variance and Covariance, Correlation and Regression, Discriminant and Logit Analysis, Factor Analysis, Cluster Analysis, Multidimensional Scaling and Conjoint Analysis, Structural Equation Modeling and Path Analysis,

##### **Module-V: Reporting**

Report Preparation and Presentation, Importance of the Report and Presentation The Report Preparation and Presentation Process, Report Preparation, Report Format.

#### **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# MARKETING OF SERVICES

**Course Code: MKT4202**

**Credit Units: 03**

## **Course Objective:**

The course has been designed to equip students to become more effective managers of any service organization by familiarizing them with the basic characteristics of services, their implications on design and delivery, and the ways to achieve sustainable competitive advantage by managing critical parameters.

## **Course Contents:**

### **Module I: Understanding Services and Consumer Behavior**

Service Sector and its structure. Drivers of service sector growth. Nature of services: Tangibility Spectrum; Defining the service offering; Flower of Service. Goods vs. Services; the service marketing challenges and implications for marketers for each service characteristic. Categorizing Service Processes. Self Service Technologies. Consumer behavior in services; Search, Experience and Credence attributes. Service Encounters and the types; Moments of Truth. The expanded Services Mix.

### **Module II: Focus on Customers**

Customers' expectations of service. Desired and Adequate service, Zone of Tolerance. Managing customer expectations and perceptions in services. Service Quality Dimensions. Customer Satisfaction vs. Service Quality. The impact of service failure and recovery. Types of Customer Complaint Actions and Complainers. Service Guarantees. Service Recovery Strategies.

### **Module III: Aligning Strategy, Design and Delivery**

Service Blueprinting. Operational service product designing and adding value. Evidence of service and Servicescape. The Service Triangle. Boundary–Spanning Roles. Strategies for closing the delivery gap.

### **Module IV: Delivering Services through Intermediaries. Managing Demand and Capacity. Pricing Services**

Role of Distribution in Services. Channel Conflicts and other key problems. Key Intermediaries for Service Delivery. Understanding Demand and Capacity constraints. Strategies for matching Capacity and Demand. Approaches to Pricing Services

### **Module V: Service Sector Study (Group Project)**

Exposure to various growing Service Sectors, viz.: Banking, Insurance, Hospitality, Education, Telecom, and Health Care etc. Live-Project by each group, on any one of the growing sectors of services; Group Presentations / Viva on assigned date.

# DISTRIBUTION AND LOGISTICS MANAGEMENT

**Course Code: MKT4203**

**Credit Units: 03**

## **Course Objective:**

The course is meant for managers under formation. Rapid innovations in technology, especially in the field of distribution and logistics, have made corporate operations complex. Thus, this course develops the framework for channel creation and formation. It reflects the importance of channel management issues and helps the students in understanding the company's route to markets and the downstream part of value chain.

## **Course Contents:**

### **Module I: Introduction to Distribution**

Distribution System- Role, Scope, Functions & Structure, Types of channels, Levels of channels, Cost, Control and Customer service, Selection of Channels, partners, Motivation of channels, Factors affecting channel design. Channel Design and Implementation – segmenting, targeting, gap analysis, establishment of new channels or refining existing channels, Recent developments in information technology

### **Module II: Channel Flows and Concepts**

Channel Flows – definition and concepts, Relevance of channel structure on Membership Issues. Vertical Integration of Marketing Channels – costs, benefits, and need.

### **Module III: Channel Institutions**

Retailing: Strategic Issues in Retailing. Merchandising Techniques: Franchising; nature and scope, Wholesaling, Assorting, Distribution of supplementary services, and Intermediaries for service delivery. New age technologies: SAP, ERP and Electronic channels. Vendor rating and Management

### **Module IV: Power, Conflict & Controlling**

Channel Conflict – nature and degree, sources, consequences, conflict resolution strategies, Channel Performance: Monitoring & evaluation, identifying power sources, and channel coordination.

### **Module V: Logistics System**

Logistics System – concept, objective and scope, the system elements, transportation, warehousing, inventory management, packing and unitization, communication and control, importance, Strategic Logistics Planning – logistics strategy, implementation and management. Containerization and Chartering Containerization

## **Examination Scheme:**

# STRATEGIC BRAND MANAGEMENT

**Course Code: MKT4204**

**Credit Units: 03**

## **Course Overview:**

Countless ideas are generated every second. But only a few are able to materialize as real brands. With the proliferation of a wide variety of brands, consumers today are spoilt by choices. New brands are the lifeblood of all businesses. It is essential for an organization to develop new or modify existing brands to meet changing consumer needs and competitor's actions. Investing in their development isn't an optional extra – it is crucial to long term business growth and profitability. But embarking on the development process is risky. It needs considerable planning and proper management

## **Course Coverage:**

This course will give an in-depth understanding of the development and management of brands. It traces and highlights the intricacies involved in balancing both brand and company strategic objectives. Students will be introduced to the meanings of new brands, why some new brands fail and others succeed, and the problems faced by marketers during the various stages of the development process. Finally, concepts and theories on branding, such as the naming of new brands, brand awareness, brand personality, brand loyalty, and how to build brand equity, will be discussed.

## **Learning Outcomes:**

The overall objective of the course is to introduce students to fundamental concepts and principles of product and brand Management

- How product and branding strategies can be applied in the decision making framework
- Understanding of strategic branding process
- Various elements and components of brand and how they interact
- Analyze branding techniques and extension strategies
- Understanding of Brand equity

## **Course Contents:**

### **Module I: Product Strategy Development**

Elements of Product Strategy, Product Mix and Line decisions, Positioning Strategy, Product Strategy over Life Cycle, New Product Development Process

### **Module II: Introduction to Strategic Brand Management**

Concept of branding, the challenges faced by brand managers, the value of a brand to customers and the organization, Branding Challenges & Opportunities, Strategic Brand Management Process

### **Module III: Elements to build Effective Brands**

Criteria to choose brand elements, Creation of brand personality, brand personality scale, brand image sources, Brand identity dimensions

### **Module IV: Brand Re-vitalization**

Brand & Line Extensions, Marketing Mix for Brand Extensions, Co – Branding. Upward and Downward stretching of brands.

### **Module V: Managing the Brand Systems**

The brand equity concept, Brand Equity Models – Customer Based Brand Equity, Aaker Model, Brand hierarchy Brand Awareness, Brand Loyalty, Brand Associations, Brand Recognition, Recall. Brand Architecture.

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

**Text & References:**

- Students are advised to keep up-to-date in the subject matter by reading articles published in newspapers, marketing magazines, business newsletters, market visits, and even checking out new brand launches.

## **SPECIALISATION - E-COMMERCE**

### **E-BUSINESS ESSENTIALS**

**Course Code: ECM4201**

**Credit Units: 3**

#### **Course Objectives**

The course aims to make the students understand the nuts and bolts of forming an e-business and prepares students to evaluate the requirements of an e-business and develop e –business plans. As business environment is witnessing so many changes every day, it gets vital for business organizations to recognize and learn to create their presence in cyber space. This course pays particular attention to introducing the students to the world of e-business, the openings and the risks and makes them learn the strategies of making businesses successful worldwide.

#### **Course Contents**

##### **Module-I: Introduction to E-Business**

The impact of the electronic communications on traditional businesses, difference between e-commerce and e-business, E-business opportunities, Business adoption of digital technologies for e-commerce and e-business, E-business risks and barriers to business adoption, Management responses to e-commerce and e-business, Business models for e-commerce.

##### **Module-II: Database & Network Requirements for E-Business**

Database approach to data management, using databases to improve business performance and decision making, managing data resources, designing databases. Networking and Communication Trends, Key Digital Networking Technologies, communication networks,

##### **Module-III: E-Business Web Design**

Elements of site design, site navigation, site structure, page and content design, web accessibility. Components of a business model, classification of business webs, comparison and valuation of networks, price formation process. Internet, intranet and extranet, choosing an ISP and Internet terminology Acquiring e-business systems, development of web based content and services, Software and services for web-site development and testing , testing process, environment, database creation and data migration, content management and maintenance

##### **Module-IV: E-Marketing & E-Procurement**

E-Marketing: comparison of communication media, development model for online customers, online promotion strategies. E-procurement: strategic and operational procurement, information support for e-procurement, types, catalog management.

##### **Module-V: E-Payment Systems**

E-payments: credit card based procedures, SSL, SET, paypal and very-sign, Secure e-commerce transactions, principles, approaches to develop secure systems, digital certificates, symmetric and asymmetric encryption, digital signatures, PKI's and CA's

##### **Module-VI: E-Distribution & M-Business**

E-Distribution: components and types, online, offline and hybrid types, SCM and ESD: architecture, functions and services, digital watermarks. M-Business: mobile devices, mobile applications and mobile communication, mobile payments, mobile ticketing, mobile websites

#### **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# MANAGEMENT INFORMATION SYSTEM

**Course Code: ECM4202**

**Credit Unit: 03**

## **Course Objective:**

This course focuses on the relationships among management, information, and systems as well as the relationship between a manager's need for information and his/her position in the organization, how hardware, software, data, people, and procedures are combined to form an information system, how information technology can be used by a business organization to gain a competitive advantage why a knowledge of information systems is crucial to anyone who plans a career in business Organization.

## **Course Contents:**

### **Module I: Organizations, Management and Information**

Meaning of MIS, Components of MIS, IS in Business, Data Information and knowledge, Characteristics of Information in context, Issues with Information, System and Subsystems, Organization as a System, Different Organizational Structures: Hierarchical Structure – (Different Levels of Management, Information disposition at different levels), Matrix Structure, Business Process (Management, Operational and Support).

### **Module II: Information Technology Architecture**

Managing Hardware Assets – Considerations in Procurement and installation, Managing Software Assets – Consideration in procurement and configuration, Data Resource Management (Database Management System – Types and Structure of Database, Data Warehousing – Phases in building Data Warehouses in an organization, Data Mining – Data Mining Applications, Data Banking)

### **Module III: Management and Organizational Support Systems for the Firm**

Information, Decision and Management, Decision Support System (Phases in Decision Making, Problems and Decision Types, DSS components, and Analytical Models in Decision Making), Executive Information System – Characteristics and benefits, Managing Knowledge (Knowledge Engineering, Knowledge Management Activities and Knowledge Representation Methodologies), Artificial Intelligence (Domains of AI, AI in Business), Expert System (Components, Benefits and Limitations, Suitability Criteria for ES)

### **Module IV: Building Information Systems in the Digital Firm**

Organizational Planning – Planning at distinct Managerial Levels, Approaches in Planning (Top Down, Bottom Up, Planning through CSF), IT and IS Planning – Prerequisites and factors, IT and IS Architecture (Centralized, Decentralized and Distributed), Implementing IT and IS (Factors and Resistance in implementation), Change Management with BPR, System Development (System Development Life Cycle-Overview, Prototyping), Evaluating Factors for IT and IS services.

### **Module V: Managing Information Systems in the Digital Firm**

Managing Security (Security Challenges of IT, Business and Technological Ethics), Computer Crime (Tools for Computer Crime, Tools for Security Management), IS Security Management Control (Information System Control, Auditing the Security), Managing World Wide Information System (Managing Multi Site IT and IS – Cultural and Technical Differences), World Wide IT and IS Strategies (Multinational, International and Global Strategies)

### **Module VI: Key System Applications for the Digital Age**

Enterprise Systems – Supply Chain Management & Customer Relationship Management Systems, Using Enterprise Applications and Achieving Operational Excellence & Customer Intimacy, E-Commerce: Digital Market & Digital Goods, M-Commerce: Services & Applications, Enterprise Applications: New Opportunities and Challenges.

**Examination Scheme:**

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

**C** - Case Discussion/ Presentation; **HA** - Home Assignment; **P** - Project; **S** - Seminar; **V**-Viva; **Q**-Quiz; **CT** - Class Test; **A** - Attendance; **EE** - End Semester Examination

**Text & References:****Text:**

- MIS by O'Brien, Ninth Edition, McGraw Hill

# INTERNET FUNDAMENTALS

**Course Code: ECM4203**

**Credit Units: 3**

## **Course Objectives**

The aim of this course is to provide conceptual and technological developments to the students in the field of Internet and web designing with the emphasis on comprehensive knowledge of Internet, its applications and the widely deployed protocols.

## **Course Contents:**

### **Module-I: Introduction to Internet**

Internet, Growth of Internet, Owners of the Internet, Anatomy of Internet, ARPANET and Internet history of the World Wide Web, basic Internet Terminology, Net etiquette. Internet Applications – Commerce on the Internet, Governance on the Internet, Impact of Internet on Society – Crime on/through the Internet.

### **Module-II: ISP and IP Addressing**

Modes of Connecting to Internet, Internet Service Providers(ISPs), Internet address, standard address, domain name, DNS, IPv4, IPv6. Modems and time continuum, communications software; internet tools.

### **Module-III: Internet Protocols & Electronic Mail**

Introduction to email- creating User ids, Passwords, e-mail addresses, message components, message composition, mailer features, E-mail inner workings, E-mail management and protocols- SMTP, POP3, IMAP, MIME, Newsgroups, mailing lists, chat rooms. Introduction to internet protocols- TCP/IP, OSI, Telnet and FTP,

### **Module-IV: Web Browsing and HTML**

Introduction, Miscellaneous Web Browser details, searching the www: Directories search engines and meta search engines, search fundamentals, search strategies and keywords, working of the search engines. Basics of HTML & formatting and hyperlink creation.

### **Module-V: Internet Security:**

Security and Privacy issues on Internet, Introduction to Cryptography, Public Key & Private Key Cryptography, Encryption schemes, Secure Web document security protocols, Digital Signatures, Firewalls.

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

## **Text Book:**

- Fundamentals of the Internet and the World Wide Web, Raymond Greenlaw and Ellen Hepp – 2001, TMH
- Internet & World Wide Programming, Deitel, Deitel & Nieto, 2000, Pearson Education

## **Reference Books:**

# WEB DESIGN USING HTML

**Course Code: ECM4204**

**Credit Units: 03**

**Course Objective:** To make the students understand the basics of web designing and to impart knowledge about the web page and website creation and making the students aware about the technologies available and their applications.

## **Course Contents:**

### **Module I: Web Design Introduction**

Basic principles involved in developing a web site, Planning process, Five Golden rules of web designing, Designing navigation bar, Page design, Home Page Layout, Design Concept, Brief History of Internet, What is World Wide Web. Why create a web site, Web Standards, Audience requirement.

### **Module II: HTML Basics**

What is HTML, HTML Documents, Basic structure of an HTML document, creating an HTML document, Mark up Tags, Heading-Paragraphs, Line Breaks, HTML Tags.

### **Module III: Elements of HTML**

Introduction to elements of HTML, Working with Text, Working with Lists, Tables and Frames, Working with Hyperlinks, Images and Multimedia, Working with Forms and controls. XML, Java Script

### **Module IV: CSS**

**CSS Introduction:** CSS Syntax, CSS Id & Class, CSS How. **CSS Styling:** Styling Backgrounds, Styling Text, Styling Fonts, Styling Links, Styling Lists, Styling Tables. **CSS Box Model:** CSS Border, CSS Outline, CSS Margin, CSS Padding

### **Module V: CSS Advanced**

CSS Grouping/Nesting, CSS Dimension, CSS Display, CSS Positioning, CSS Floating, CSS Align, CSS Pseudo-class, CSS Pseudo-element, CSS Navigation Bar, CSS Image Gallery, CSS Image Opacity, CSS Image Sprites. CSS Media Types, CSS Attribute Selectors

### **Module VI: Dreamweaver & Web Site**

Dreamweaver Basics, Dreamweaver shortcuts, Dreamweaver panels, Dreamweaver toolbars, Dreamweaver automation, Source code formatting

Web Site: Creating the Web Site, Saving the site, working on the web site, Creating web site structure, Creating Titles for web pages, Themes-Publishing web sites.

## **Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, EE: End Semester Examination;  
Att: Attendance

## Syllabus - Third Semester

### STRATEGIC MANAGEMENT

**Course Code: MGT4301**

**Credit Units: 03**

**Course Objective:**

The course is designed to help students to understand the concept of strategy and strategic management process. Acquaint students with basic concepts and principles of strategic management, develop and prepare organizational strategies that will be effective for the current dynamic environment and likewise to impart the strategic management conceptual framework which will increase students' skills and knowledge in identifying and describing organizations' strategic posture and direction.

**Course Contents:**

**Module I: Introduction and Purpose of Strategy Formulation**

Evolution and Introduction of strategic management, Concept of Strategy, corporate, Business and Functional Levels of Strategy, Mission, Vision, Objectives, Approaches to four Phases in Strategic Management Process, Stakeholders in business and their roles in strategic management, Strategic decision making.

**Module II: Environmental Analysis**

Analyzing company's External Environment: PESTLE Analysis; Preparing an Environmental Threat and Opportunity Profile (ETOP), Analyzing Industry Environment: Industry Analysis – Porter's Five Forces Model of competition, Strategic Group analysis.

**Module III: Analysis of Organizational Competencies**

Analyzing Company's Internal Environment Resource based view of a firm, meaning, types & sources of competitive advantage, analyzing company's Resources and Competitive Position, VRIO Framework; Benchmarking as a method of comparative analysis, Competitive advantage; Concept of a Core competence and Distinctive competitiveness, Characteristics of Core Competencies; Value Chain Analysis Using Porter's Model; Organizational Capability Profile: Strategic Advantage Profile;

**Module IV: Strategic Analysis and Choice**

Generic Competitive Strategies: Meaning of Generic competitive strategies, Low cost, Differentiation, Focus – when to use which strategy; Grand Strategies: Stability, Growth (Diversification Strategies, Vertical Integration Strategies, Mergers, Acquisition & Takeover Strategies, Strategic alliances & Collaborative Partnerships), Retrenchment – Turnaround, Divestment, Liquidation, Outsourcing Strategies; Offensive and Defensive Strategies, Blue Ocean Strategy, Strategy in the age of Internet and E-commerce; Portfolio Analysis Business Portfolio Analysis – BCG Matrix – GE 9 Cell Model; Evaluation of Strategic Alternatives: SWOT Analysis, Grand Strategy Selection Matrix.

**Module V: Strategy Implementation and Evaluation**

Strategy Implementation, Barriers to implementation of strategy, Mc Kinsey's 7s Framework; Organization Structures for Strategy Implementation, Leadership Implementation, Functional Implementation, Strategic evaluation review and control.

**Examination Scheme:**

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

## SUMMER INTERNSHIP EVALUATION

Course Code: MGT4335

Credit Units: 06

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**)

### INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. **Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.**

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include **five sections** in the order described below.

1. **The Title Page** – An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content** – An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.
5. **Appendices** – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

## **INTERNSHIP REPORT**

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (Incase a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report should be as per the standard layout prescribed by the organization wherein the student undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

➤ **Title or Cover Page**

The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

➤ **Acknowledgements**

Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

➤ **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Materials and Methods**

This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form.

While presenting the results, write at length about the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporting or contradicting the present case of research.

➤ **Conclusion(s) & Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly.

Check that your work answers the following questions:

- Did the research project meet its aims (check back to introduction for stated aims)?
- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

➤ **Implications for Future Research**

This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

➤ **Appendices**

The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References**

References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**Examples**

**For research article**

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic Escherichia coli O157: H7. Clin Microbiol Infect, 8(suppl 1): 116–117.

**For book**

Kowalski,M.(1976) Transduction of effectiveness in Rhizobium meliloti. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), 7: 63-67

**The Layout Guidelines for the Internship File & Internship Report**

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

**Examination Scheme:**

Continuous Evaluation by faculty guide	15%
Continuous evaluation by CRC	15%
Feedback from industry guide	35%
Report, Presentation & Viva Voce	35%
<b>TOTAL</b>	<b>100%</b>

## **SPECIALISATION: FINANCE & ACCOUNTING**

### **ADVANCE CORPORATE FINANCE**

**Course Code: FIN4301**

**Credit Units: 03**

#### **Course Objective:**

The goal of this course is to develop the analytical skills for making corporate investment with regards to financial decisions and risk analysis. This course will examine various theories including the concept of present value, the opportunity cost of capital, discounted cash flow analysis, a consortium of valuation techniques, issues between short & long term financial management, risk and return, capital asset pricing model, capital budgeting, corporate capital structure and financing decisions, dividend policy, investment and financial decisions in the international context, including exchange rate/interest rate risk analysis, and issues of corporate governance and control. In essence, we will explore the very patterns of corporate finance that has shaped the familiar yet complex terrain of today's global economy. An equally important component of this course is its emphasis on developing your critical auditory and erudite writing skills to a level that is commensurate with university standards. The course teaching methodologies will be composed of lectures, homework assignments and a group project.

#### **Course Contents:**

##### **Module-I: Introduction**

Finance and Finance Manager, role of a Finance Manager, Ownership vs. Management, Do Managers really look after interest of shareholders. Expectations from a Finance Manager, Concepts of risk and return, Concepts of Time value of money.

##### **Module-II: Common Stocks**

How common stocks are traded, Valuation of common stocks, pricing vs valuation, today's price vs next year's price. Capitalization rate, DCF valuation and varying growth rates, link between stock price and earning per share, valuation format, Mini Case: Reeby Sports. Issuance of common stocks,

##### **Module-III: Project Evaluation**

Accounting Income vs Cash flows, Pros and cons of investment decision criteria, Why NPV leads to better decision making, Verdict on IRR, NPV vs IRR, XIRR, MIRR, Mutually Exclusive vs Independent Projects, Note on depreciation in estimating cash flows, choosing between long term and short term Equipments, optimal timing of investment, where positive NPV come from, Making sure managers maximize NPV,

##### **Module-IV: Dividend Policy and Capital Structure**

How Dividends are paid, Dividend controversy, stocks repurchase, relevance of dividends in perfect capital markets, dividend and taxes, how much a firm should borrow, cost of financial distress, does debt policy matter, effect of leverage in tax free economy, pecking order of financing choices,

##### **Module-V: Short term financial planning and cash management**

Links between short term and long term financial financing decisions, comforts of surplus cash, options for short term financing, dynamic financing, how much cash should firm hold, investing idle cash, money market investments,

##### **Module-VI: Corporate control and governance**

Financial goals and strategy, shareholder value analysis,, managerial implications of shareholder value, corporate governance and balanced scorecard.

**Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

**Required Texts:**

- Principles of Corporate Finance, 12 th edition, Richard Brealey and Stewart Myers, McGraw-Hill Financial, 2017
- Corporate Finance, by Stephen A. Ross, Randolph W. Westerfield and Jeffrey Jaffe (RWJ), 10<sup>th</sup> edition, McGraw-Hill 2013.

# BUSINESS VALUATION

**Course Code: FIN4302**

**Credit Units: 03**

## Course Objective:

The objective of this course is to develop a detailed understanding of the tools used by market professionals and corporate managers to analyze the value of companies and stocks. The central theme of the course will be the pricing of equity securities using discounted cash flow and relative valuation techniques. Students will apply what they've learned to the valuation of a specific company, with the goal of becoming an expert on that firm. After completing this course, students should be able to: (i) Develop quantitative models for firm and equity valuation based on DCF and multiples. (ii) Identify and interpret accounting and non-accounting information necessary for valuation. (iii) Identify and interpret the key value drivers for a firm or industry. (iv) Critically analyze firm and equity valuation models and assumptions developed by others. (v) Present valuation analyses and assumptions in a professional manner.

## Course Contents:

### Module-I: Introduction to Valuation

Valuation vs. Pricing. A philosophical basis for Valuation, Misconceptions about Valuation, Biasness in Valuation, Uncertainties in Valuation. Approaches to Valuation, Understanding Financial Statements, Basics of Risk.

### Module-II: Discounted Cash Flow Valuation

Discounted Cashflow Valuation: Basis for Approach, Going Concern versus Liquidation Valuation, Equity Valuation versus Firm Valuation, Three pathways to DCF value, Advantages & Disadvantages of DCF Valuation, Riskless Rates and Risk Premiums, Estimating Risk Parameters and Costs of Financing, Measuring Earnings, Earnings to Cash Flows, Estimating Growth, Closure in Valuation: Estimating Terminal Value, Free Cash flow to Equity Models,

### Module-III: Relative Valuation

Fundamental Principles of Relative Valuation, Choices with multiples- Earnings Multiples, Book Value Multiples, Choosing the Comparable firm: Making the comparison, Revenue and Sector-Specific Multiples, Advantages & Disadvantages of Relative Valuation, DCF vs Relative valuation.

**Module-IV: Applicability of Valuation** ( Cases and research papers); Valuing Financial Services firm, Valuing Firms with Negative Earnings, Valuing Young and Start-up Firms, Valuing Private Firms, valuing Acquisitions and Takeovers,

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## Required Textbook

- Investment Valuation: Tools and Techniques for Determining the Value of Any Asset, Second Edition, University Edition by Aswath Damodaran

## Recommended other Textbook

- Krishna G. Palepu and Paul M. Healy: *Business Analysis & Valuation Using Financial Statements*, Text Only (PHB) 5th Edition, Cengage Learning 2012.
- Joshua Rosenbaum and Joshua Pearl: *Investment Banking: Valuation, Leveraged Buyouts, and Mergers and Acquisitions*, John Wiley & Sons; 2nd edition (2013), ISBN: 1118656210

# CORPORATE RESTRUCTURING

**Course Code: FIN4303**

**Credit Units: 03**

## **Description**

The significance of Merger, Acquisition and Corporate Restructuring cannot be overemphasized in a rapidly changing economic environment and consequent pressure on companies to cope with the emerging challenges. This subject deals with the different strategies of corporate restructuring and its impact on the shareholders' value.

## **Objectives**

- To understand the various types of activities that falls under the purview Corporate Restructuring
- To understand intricacies of Corporate Restructuring
- To understand motives and methods of M&A
- To deal with Issues involved in takeover

## **Assessment**

The subject would comprise of both theory and numerical solving. The assessment of the learner would be done through assignments, case discussion, articles on current research & issues, problem solving and simulation. The students would be expected to do a project, quiz and comprehend the application part of the concepts taught in the class.

## **Course Contents**

**Module-I:** Introduction: Corporate Restructuring: Concept and Form: Merger, Consolidation, Acquisition, Divestiture, Demerger, Carve out, Joint venture, Delisting of Securities. M&A as a Growth Strategy, Takeover and Defence Tactics, Funding of Acquisition, LBO and MBO.

### **Module-II:**

Growth strategy and Merger & Acquisition: Growth strategy: Intensive, integrative and Diversification growth, Theory of M&A: Monopoly theory, Efficiency Theory, Valuation theory, Raider Theory and Empire Building Theory, Case study.

### **Module-III:**

Takeover and Defence Tactics: Friendly Vs Hostile Takeover, Takeover Tactics: Dawn Raid, Bear hug, Saturday night special, proxy fight, Successful Takeover Tactics in India - Defence Tactics: Crown jewels, blank cheque, Shark repellents, Poison pill and put, people pill, Green nail and buy-back as takeover defence tactic - Intents of Target Companies.

### **Module-IV:**

Legal aspect: Companies Act, 2013, SEBI (Buy -back of Securities) Regulation, 1998, SEBI (Substantial Acquisition of Shares and Takeover) Regulation, 1997, SEBI (Delisting of Securities) Guidelines, 2003 and Listing agreement clauses of NSE and BSE (40 A and 40 B)

### **Module-V:**

Accounting and Taxation aspect: Methods of Accounting for M&A, Accounting for Demerger, Tax issues relating to M&A: Capital Gain, Carry forward and Set Off Losses, Numerical Problems

### **Module-VI:**

Funding and Valuation: Payment Consideration, Sources of Fund, LBO and Going Private.

Valuation of Target Company: Concept of Value of a Company, Methods of Enterprise and Equity Valuation, Dividend Discount Model, DCF Model, Shareholder's Value Creation: MVA Approach and EVA Approach.

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# INTERNATIONAL FINANCIAL MANAGEMENT

**Course Code: FIN4304**

**Credit Units: 03**

## **Course Objective:**

The possibility for companies to look beyond domestic markets while making the financial decisions has given new dimensions to the way these decisions are taken. This has essentially led to changes in financial environment by linking domestic markets to global markets causing unprecedented increase in opportunities as well as risks. Management in such environment requires understanding of innovative conceptual and physical tools for better financial decision-making. The course on International Finance aims at equipping the financial manager with concepts, tools that enable financial decisions making in a global market and help better achieve the objectives of the firm.

## **Course Contents:**

### **Module I: International Financial Environment**

Finance function in global business scenario, International Monetary System, International Financial Markets and Instruments, Balance of Payments, Recent Developments.

### **Module II: Foreign Exchange Markets**

Spot and Forward Foreign Exchange Markets, Speculation and Arbitrage in Foreign Exchange Markets and Implications of Market Efficiency, Currency Swaps, Currency Futures and Options.

### **Module III: Foreign Exchange Rate Determination**

Theories of Exchange Rate Determination, Fundamental International Parity Conditions – Purchasing Power and Interest Rate Parity, Forecasting Exchange Rates - Technical Forecasting, Time Series Modelling, Fundamental Forecasting.

### **Module IV: Foreign Exchange Rate Exposure and Risk Management**

Transaction, Translation and Operating Exposure, Exposure from Equity and Borrowing in International Financial Markets, Hedging tools for Management of Transaction Exposure and Interest Rate Exposure, Degree of Hedge.

### **Module V: Issues in Foreign Investments Analysis**

Examination of International Investment Proposals, Discounted Cash Flow Analysis, Tax Adjusted Present Value Approach, Political Risk Analysis, External Investment Decision – Measuring Total Returns on Foreign Investments, Optimal International Asset Allocation.

### **Module VI: Finance of Foreign Trade**

Income terms, foreign letters of credit, export & import finance, rules governing letters of credit, export import policy (Case Studies)

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

**Course Code: FIN4305**

**Credit Units: 03**

## **Course Objective:**

This course aims at providing a clear understanding of the changing domestic and global investment scenario in general and Indian capital market in particular with reference to availability of various financial products and operations of stock exchanges. Important theories, techniques, regulations and certain advancements in theory of investment will be covered with an aim of helping the participants make sound investment decisions both in the context of individual security and portfolio investment.

## **Course Contents:**

### **Module I: Background of Capital market/Corporate Governance and Methods of Fund Raising**

Importance of Strong Capital market in Economy, Investment opportunities available to Investors, relation of demographic characteristics with investment pattern of individuals, Process of investment in Financial assets, intermediaries and Role of SEBI/OTCEI/ROC/Stock exchanges-Listing agreement, clause 49, Importance of Corporate Governance and changes taking place/required in the law. Salient features and operation of stock exchanges, Trading arrangements, Changing scenario of Indian stock market. Relationship of Primary market with Secondary market, raising of Funds by IPO/FPO/Right issue and intermediaries involved. Merchant banking and its functions, contemporary issue in Capital market.

### **Module II: Debt**

Malkiel's Law, Interrelationship of Bond Market and Stock market, International events and its impact on security market Risk and return in the context of Portfolio, Common stock valuation models, Term structure of Interest Rates, Role of FII'S, DII/MF /QIB in Capital market. Participatory notes and its Impact, index formation..

### **Module III**

Fundamental analysis-Economic & industry analysis, concept of Business Cycles, Indicators of economic prosperity, Industry analysis, Company analysis, Company valuation. DOW's Theory, Various Technical analysis tools like Moving averages, Volume Analysis, Indicators, RSI, Pattern analysis, Candlesicks, Market breadth analysis, Trend analysis, Elliot wave Rules Fibonacci numbers, ROC/RSI, CAPM and Fama and French challenge, lagging indicators and leading indicators analysis, reading and interpretations of technical patterns and charts, Other tools to Forecast the market and take Entry and exit decisions.

### **Module IV**

Arbitrage pricing theory, Generating the efficient frontier, Efficient market theory, Valuation by PE ratio /Book value to price value analysis, Motivation for partitioning of risk, Markowitz Risk -return optimisation,

### **Module V**

Types of Mutual Funds--SIP/ELSS, Tax Implications. , Investment Banking, Role of Fund Manager, Portfolio management services, Churning and revision of Portfolio, Portfolio re balancing and up gradation, Sharpe's performance Index, Treynor's performance Index, Jensen's performance Index.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# FINANCIAL MODELING WITH MS-EXCEL

Course Code:FIN4306

Credit Units: 03

## Introduction

Modeling techniques for accurate financial forecasting are used in many areas of finance, such as derivatives, valuation, project evaluation, deal structuring, portfolio management and the like. In the course, the participants will learn the model building skills required to build powerful models in finance with the help of excel. There are many features of model building that are common irrespective of the final model that one intends to build. In the course we will also emphasize on the different model building skills that one should have irrespective of the final use that one is going to make of it.

**By the end of the course the participants should be better able to:**

- Understand the basic and advanced features of excel
- Understand how to build models in excel to suit one's purpose
- Building models in different areas of finance including investments, corporate finance and derivatives
- Identifying and controlling the key sensitivities with advanced spreadsheet simulation
- Understand how risk can be built into the model to enhance decision making process

## Course Contents:

**Module-I: Understanding the Basic Features of Excel :** Introduction to Modeling, Introduction to Excel, Database Functions in Excel Creating Charts Using Forms and Control Toolbox Understanding Finance Functions present in Excel Creating Dynamic Models

**Module-II: Simulation using Excel :** Different Statistical Distributions used in Simulation Generating Random Numbers that follow a particular distribution Building Models in Finance using Simulation

**Module-III: Excel in Capital Budgeting, valuation:** Preparing common size statements directly from Trial Balance Forecasting Financial Statements using Excel Analysing Financial Statements by using Spreadsheet Model ; Determining Project Viability Risk Analysis in Project Appraisal Simulation in Project Appraisal; Determination of Value Drivers, DCF Valuation, Risk Analysis in Valuation; Determining Efficient Portfolio, Creating Dynamic Portfolios Portfolio Insurance Fixed Income Portfolio Management using Excel.

**Module-IV: Understanding Subroutines and Functions** and building simple financial models using subroutines and functions Recording and Editing Macros Subroutines and Functions Decision Rules Message Box and Input Box Debugging, **Designing Advanced Financial Models** using VBA User Forms Other Advanced Features Actual Model Building.

## Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; HA - Home Assignment; Q – Quiz; V - Viva; CT - Class Test; A- Attendance; EE - End Semester Examination)

# FINANCIAL RISK MANAGEMENT

**Course Code: FIN4307**

**Credit Units: 03**

## **Course Objectives:**

The FRM challenges candidates to understand and apply a range of knowledge and skills necessary to function effectively as a risk manager. Its curriculum is updated annually by a group of distinguished risk professionals and leading academics with diverse backgrounds, ensuring that the designation meets the evolving demands of the financial industry. The FRM helps professionals in risk management, investment management, or other critical areas of the financial services industry to broaden their knowledge of the different types of financial risk and enhance their current skill set. Those who are just beginning their careers benefit from the breadth of the curriculum, which exposes candidates to the major strategic aspects of risk management. More established practitioners often choose to become Certified FRMs in order to ensure that they are apprised of the latest trends in risk management, or because they want to challenge themselves by testing their knowledge against an elite pool of risk managers.

## **Course Contents:**

### **Module I : Foundations of Risk Management**

Basic risk types, measurement and management tools, Creating value with risk management; The role of risk management in corporate governance; Enterprise Risk Management (ERM); Financial disasters and risk management failures; The Capital Asset Pricing Model (CAPM); Risk-adjusted performance measurement; Multifactor models; Data aggregation and risk reporting; Ethics and the GARP Code of Conduct.

### **Module II: Financial Markets and Products**

Structures and functions of financial institutions, Structure and mechanics of OTC and exchange markets Structure, mechanics, and valuation of forwards, futures, swaps, and options ; Hedging with derivatives; Interest rates and measures of interest rate sensitivity; Foreign exchange risk; Corporate bonds; Mortgage-backed securities

### **Module III : Valuation and Risk Models**

Value-at-Risk (VaR)- VaR mapping • Expected shortfall (ES), Stress testing and scenario analysis • Option valuation • Fixed income valuation • Hedging • Country and sovereign risk models and management • External and internal credit ratings • Expected and unexpected losses • Operational risk

### **Module IV : Basel-I, Basel-II, Solvency-II, Basel 2.5, Basel-III:**

The reasons for regulating Banks, Bank Regulation Pre-1988, 1988BIS Accord, The G-30 Policy recommendation, Netting, 1996 Amendment, Basel II, Credit Risk capital under Basel II, Operational Risk capital under Basel II, Pillar 2- Supervisory Review, Pillar 3- Market Discipline, Basel 2.5, Basel-III.

### **Module V : Credit Risk Measurement and Management**

• Credit analysis • Default risk: Quantitative methodologies • Expected and unexpected loss • Credit VaR • Counterparty risk • Credit derivatives • Structured finance and securitization

### **Module VI : Operational and Integrated Risk Management**

Risk-adjusted return on capital (RAROC) • Economic capital frameworks and capital planning • Liquidity risk measurement and management • Failure mechanics of dealer banks • Stress testing banks • Third-party outsourcing risk • Risks related to money laundering and financing of terrorism • Regulation and the Basel Accords

Banking Resolution and Deposit Insurance Act (BRDI) 2017, Insolvency and Bankruptcy Code (IBC).

**Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# FIXED INCOME SECURITIES ANALYSIS

**Course Code: FIN4308**

**Credit Units: 03**

## **Course Objectives:**

This course is intended to analyze the fixed income securities markets and its implications for investments. It will analyze the market characteristics, instruments, selling techniques, pricing and valuation issues, floating rate instruments, relations with money market instruments, risk and return of fixed income securities, portfolio management techniques, term structure modeling, bond indexing, corporate debt and convertibles, bonds with embedded options, municipal bonds markets, corporate bonds & credit risk analysis, interest rate risk management with swaps, options and futures, bond management & trading. The course intends to cover the specific features of the Indian Fixed Income Securities Markets. The course will construct several Excel based techniques to analyze bond valuation, term structure, portfolio statistics and risk mapping

## **Course Contents:**

**Module-I:** Overview of Fixed Income Securities, The Grammar of Fixed Income Securities, Fixed Income Markets, Institutional Arrangements, Market Participants and Instruments, Investors Perspectives, & Market Conventions, features of a government securities market

**Module-II:** Bond Valuation, Time Value of Money, Price and Yield Conventions, Bond Valuation under flat term structure, Yield & return, & horizon return, Valuation of other Bonds, Floating Rate securities, index bonds, illiquid bonds

**Module-III:** Understanding market linkages, bonds and money market instruments, MIFOR Curve Risk Identification in Bonds: Duration, Convexity, and Immunization Risk measurement in fixed income securities using value at risk, Corporate Debt, Valuation, valuation of convertibles  
Yield Curve Analysis: Par Value, Zero, Spot Curve, Bootstrapping, spot & forward rates, (Nelson-Seigel model of the Indian NSE)

**Module-IV:** Government securities auction & Bidding, Uniform vs discriminatory auction, bidding behavior, winners curse analysis Auction Game: students run a game in groups, with bidding an upcoming auction, using real time market prices, and finalist selected based on their success, performance in WI trade, Bond Indexing, methodology for constructing a bond index, index return comparison

**Module-V:** Portfolio construction, setting portfolio objectives, interpreting portfolio parameters, Passive vs Active portfolio management strategies, bullet vs barbell, other strategies. Global Bond Markets, foreign currency bonds, dual currency bonds, analysis of global bond spread behavior in recent times.

**Module-VI:** Fixed Income Derivative Markets: FRAs, Interest rate Swaps, swap pricing and swap curve, Fixed Income Derivative Markets: Interest rate futures, Fixed Income Derivative Markets: Interest Rate Options, Caps & Floors pricing

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## **Required Textbook:**

- Frank Fabozzi, Bond Markets, Analysis, and Strategies, Seventh or Eighth Edition,
- Pearson Suresh Sundaresan, Fixed Income Markets and Their Derivatives, 2009,

# MANAGEMENT OF FINANCIAL SERVICES

**Course Code: FIN4309**

**Credit Units: 03**

## **Course Objective:**

At the end of this course the students will understand: Role of Financial Services in producing and maximizing value. Understanding basic Financial Services and their need. Factors determining dynamism in the Financial Services industry. Understanding the interface of regulators and managers for quantifying and dealing with critical factors affecting the Financial Services industry.

## **Course Contents:**

### **Module I: Introduction**

Financial services and Value production, Value added in Financial Services, ROI in Financial Services, Elements in the Financial Services value chain, Role of Financial Services in Economic Development

### **Module II: Merchant & Investment Banking**

Meaning, Importance & Role in the Indian Financial System, Corporate Counselling, Project Counselling and Appraisal, Loan Syndication and Accessing Debt and Capital Markets, Procedural aspects of public issues, bought out deals, Book Building, Pre-Issue Decision; Post Issue Management and related provisions of Companies Act and SEBI guidelines for Protection of Interests of Investors, New Products in Capital Markets

### **Module III: Leasing Hire Purchase and Consumer Credit**

Development of Leasing Hire Purchase and Consumer Credit, Types of Leasing, Pricing Methodology and Financial Analysis, Taxation, Legal Framework for Leasing and Hire Purchase Companies, Leasing Vs. Buying- NPV, Securitization, Banking Services related to leasing

### **Module IV: Venture Capital Financing**

International Experiences in Venture Capital Financing, Venture Capital Financing in India, Pitfalls to be Avoided, Private Equity and growth of Entrepreneurship

### **Module V: Mutual Funds**

Mutual Funds types, Exchange Traded Funds, Fund of Funds, Organization and Management, Regulations of Mutual Funds

### **Module VI: Other Financial services**

Factoring Services - Features, Merits and Demerits, Cost Benefit Analysis, Forfeiting – Features, Merits and Demerits, Credit Rating: Concept of Credit Rating, Types of Credit Rating, Advantages and Disadvantages of Credit Rating, Credit Rating Agencies and Their Methodology and Process, Individual Credit Rating, Sovereign Credit Rating Practices, Indian Experience up to now, Housing Finance, Custodial Services.

### **Module VII: An introduction to marketing of Financial Services Features**

Marketing Of Financial Services, Cross Selling of Banking Services, Up-Selling, Wealth Management

## **Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# PROJECT PLANNING, APPRAISAL AND CONTROL

Course Code: FIM4310

Credit Units: 03

## Course Objective:

The objective of the course is to make the students familiar with the planning, analysis, selection, implementation and review the capital expenditure investments. The aim is to acquaint the student with the application of mathematical and statistical tools for analyzing managerial problems in order to arrive at a decision w.r.t. the capital expenditures.

## Course Contents:

### Module I: Planning of Projects

Capital Expenditures, Phases of Capital Budgeting, Levels of Decision Making, Facets of Project Analysis, Portfolio Planning Tools, Strategic Position and Action Evaluation (SPACE), Generation of Ideas, Monitoring the Environment, Corporate Appraisal, Project Rating Index, Demand Forecasting, Market Planning

### Module II: Technical Analysis

Material Inputs and Utilities, Manufacturing Process, Product Mix, Plant Capacity, Location and Site, Machineries and Equipments, Structures and Civil Work, Project Charts and Layouts, Work Schedule

### Module III: Financial Analysis

Cost of Project, Means of Finance, Estimates of Sales and Production, Cost of Production, Working Capital Requirements and its Financing, Profitability Projections, Break Even Point, Projected Balance Sheets, Multi Year Projections, Basic Principles for Measuring Project Cash Flows, Components of the Cash Flow Stream, Biases in Cash Flow Estimation

### Module IV: Project Risk

Types and Measures of Project Risk, Sensitivity Analysis, Scenario Analysis, Optimal Timing, Social Cost Benefit Analysis, Net Benefit in terms of Economic Prices, Measurement of the Impact on Distribution, Savings Impact and its value, Income Distribution Impact, Little-Mirrlees Approach, Shadow Prices

### Module V: Project Management and Review

Forms of Project Organization, Project Planning, Project Control, Human Aspects of Project Management, Pre-requisites for Successful Project Implementation, Performance Evaluation, Abandonment Analysis, Administrative Aspects of Capital Budgeting

## Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

## **SPECIALISATION – HUMAN RESOURCE**

### **SOCIAL AND INDUSTRIAL PSYCHOLOGY**

**Course Code: HRM4301**

**Credit Units: 03**

**Course Objective:**

The Objectives of this course are to understand human behaviour in social and industrial settings. A student will be able to comprehend the causes of behaviour as well as the methods of improvement by going through this course.

**Course Contents:**

**Module I: Social and Industrial Psychology**

Definition, Nature and Background.

**Module II: Social Perception & identity**

Non-Verbal Communication, Theories of Attribution, Impression Formation and Impression Management. Self Concept, Self-esteem, Self-Efficacy, Self-Monitoring and Self-Focusing.

**Module III: Social Influence**

Conformity, Compliance and Obedience.

**Module IV: Employment Testing**

Testing Abilities, Testing Personality, Testing Skills and Achievements, Using and not Using Tests. The Interview, Application Blanks and Biographical Inventories, References and Background Investigations.

**Module V: Safety Psychology**

Safety Management and Safety Psychology, Differential Accident Liability.

**Module VI: Human Performance**

Time & Motion Study, Resistance to Time and Motion Studies, Breaking Resistance, Human Engineering, Coding Displays and Control, Principles Of Human Performance. Perceptual – Motor Skills, Information Processing Behaviour, Monitoring Behaviour.

**Module VII: Ergonomics and Work Conditions**

Ergonomics Approach Work Design Anthropometrics Approach, Biomechanical Approach, Psychological Approach, Human and Computer Interaction in the Work Place

**Examination Scheme:**

<b>Components</b>	<b>CPA</b>	<b>TP</b>	<b>Q/S</b>	<b>A</b>	<b>ME</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	5	5	10	70

# INDUSTRIAL RELATIONS

**Course Code: HRM4302**

**Credit Units: 03**

**Course Objective:** The objective of the course is to familiarize students with the anatomy of industrial relations and how to deal with the issues and problems involved in the management of industrial relations, especially in the context of industrial structure in our country.

## **Course Contents:**

### **Module I: Evolution and Structure of Industrial Relations**

Concept; Theoretical perspective – Unitary, Pluralistic, Marxist, and Trusteeship perspectives; Approaches to industrial relations; Structure of industrial relations system in India; Major actors and their role in industrial relations; Industrial relations since globalization in India; Industrial relations policy in India; Pre-requisites and functional requirements of good IR programme.

### **Module II: Industrial Conflict and Dispute Resolution**

Definition of industrial disputes; Causes and classification of industrial disputes; Prevention of industrial disputes; Industrial disputes in India; Recent development; Industrial Disputes Act, 1947 – Machinery for resolution of industrial disputes (conciliation, adjudication, and arbitration); Strikes; lock-outs; lay-off; Retrenchment; Authorities and their powers and procedures under the Act

### **Module III: Trade Unionism and Collective Bargaining**

Trade unions – Characteristics, functions, Types/Structure; Trade unions and Productivity; Trade Unions Act, 1926 – Definition, Registration of trade unions, Authorities and their Powers and Procedures under the Act; Penalties for offence under the Act; Collective Bargaining – Definition, legal framework, Bargaining forms and Tactics, negotiating skills, Process of Collective bargaining, collective bargaining as an integral part of IR strategy, Pre-requisites for the successful functioning of collective bargaining.

### **Module IV: Discipline and Grievance Handling**

Discipline – Definition, Difficult employees, Approaches to Discipline, Causes, Disciplinary Process, Essentials of Good Disciplinary System, Code of Discipline and Industrial Relations. Grievance Handling – Definition of grievance, Legal framework, Need, Causes of grievance, Tracing the grievance, Model Grievance Procedure, Grievance management in Indian industries.

### **Module V: Industrial Democracy, Internal Labour Organisation, Labour Policy, Labour Administration**

Industrial Democracy – Concept and significance; Workers' Participation in Management – concept, rational, status of workers' participation in management in India; Experience of Yugoslavia; Labour Policy of Government of India; Labour Administration – Central Machinery, States/ Union Territories Machinery; Consultative Machinery.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# ORGANIZATIONAL CHANGE AND DEVELOPMENT

**Course Code: HRM4303**

**Credit Units: 03**

## **Course Objective:**

The Objective of the course is to provide a conceptual input of meaning, characteristics, processes & influences of Organizational Development & Change Management. The course also intends to impart skill sets through experiential learning. The course gives various OT theoretical frameworks in detail which provides comprehensive overview of human capital from the perspective of organizational excellence in the light of transitional phases of Indian Industries.

## **Course Contents:**

### **Module I: An Introduction to Organisation change and development**

Meaning of Change, Why Organization Change, Factors causing & Need for Change, Content & Process Levers of Change, Nature, basic assumptions, Characteristics & Techniques, Historical framework of OD, The Lab Training Stem, The Survey Research & Feedback Stem, The Action Research Stem, , Factors affecting OD, Role of Managers

### **Module II: Change Management Models**

Managing Planned Change **Models & Techniques involved in Change Mgmt,**

Total Quality Management, Systems Model of Change, Lewin's Force Field Analysis Model, The Continuous Change Process Model, Change and Transition Management Model, Business Process Reengineering.

### **Module III: Typology of OD Interventions**

Interventions designed at Individuals, Dyads, and Triads, Teams & Groups. Team Interventions, Inter-Group Interventions, Structural Interventions, Comprehensive Interventions, Issues in Client-Consultant Relationship.

### **Module IV: Process of Organisational Development**

Meaning of Change Agents, Types of Change Agents, Characteristics of Successful Change Agents, Advantages and Disadvantages of Internal and External Change Agents, Steps in organisation development process, Process Consultation, The Process of Organisation Development,

### **Module V: Action Research**

Introduction to Action Research, AR as Process & Approach.

### **Module VI: Future of OD**

Changing Values & Cultural Model, Theories of Planned Change, Organizing for the Future, Organization as Learning Systems, Implications for Future Managers.

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# PERFORMANCE AND COMPETENCY MANAGEMENT

**Course Code: HRM4304**

**Credit Units: 03**

## **Course Objective:**

This course will help students to understand the significance of appraisal for an Organization and Individual. It will develop an understanding of various appraisal methods and measurements to manage the performances of employees. It would also provide an insight into the fundamentals of competency management.

## **Course Contents:**

### **Module I: Introduction to Performance Management**

Conceptual Approach to Performance Management, Determinants of Job Performance: Person and System Factor, Components of Effective Performance Management, Performance Management Cycle Linkage of performance management system with HR Practices.

### **Module II: Process of Performance Appraisal**

Need And Methods for Performance Appraisal, RSDQ Model, Performance Review - Reengineering Performance Appraisal System, Performance Analysis, Performance Review Discussion, Performance Monitoring and Feedback. Linkage pays with performance

### **Module III: Competency Mapping**

Concept and Definition of Role and Competency, Characteristics of Competency, Competency Versus Competence, Performance Versus Competency, Types of Competencies, Context and Relevance of Competencies in Modern Organizations.

### **Module IV: Competency Management Framework**

Macro View of Competency Management Framework, Strategic Framework, Lancaster Model of Managerial Competence, Competency Modeling Framework

### **Module V: Competency Mapping as a Performance Management Tool**

Building Competency Models, TheMcBer Generic Managerial Competency Model, Competency Causal Flow Model, Factors Affecting The Human Performance System, Profiling Competency Framework for a Particular Role, Competency Gap

## **Examination Scheme:**

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

# TRAINING AND DEVELOPMENT

**Course Code: HRM4305**

**CreditUnits: 03**

## **Course Objective:**

This course is designed to provide in depth understanding and enable the students to manage training processes and system for developing human resource of the organization.

## **Course Contents:**

### **Module I: Introduction to Training and Development**

Training – concept, and rationale; training process: role of stakeholders in training programme; Organization and Management of training function; Training needs assessment – organizational analysis, operational analysis, person analysis; competency mapping; Learning theories, learning process.

### **Module II: Training Design**

Designing the training programme: process of learning in training programme – attributes and factors influencing; learning process; learning styles; training climate and pedagogy; developing training modules; Training aids

### **Module III: Training Methods and Techniques**
