## Syllabus - First Semester

	<b>FUNDAMENTALS OF URBAN AND REGIONAL PLANNING (PLN2101)</b>	L	T	S	P	C
Version 1.1		4	0	0	0	4
Pre-requisites/Exposure	Planning and Design Lab- I					
Co-requisites	Statistical and Quantitative Methods for Planning					

### Catalog Description

The aim of the course is to study the concepts and principles of urban and regional planning. The course deals about the aim, objectives and scope of town planning. The Course comprises of different types of plan and discusses different categories of land use. In other words, course provides comprehensive knowledge to the students about various fields of urban and regional planning and related norms, regulation and standards for spatial development.

### Course Objectives

The objectives of this course are

- To understand the Rationales and Foundations of Planning.
- To introduce the Hierarchy of Development Plans and Planning Process; and Theories of Urbanization.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the concept of town planning, spatial planning, need, scope and various field of planning.

**CO2:** Explain the various forms of planning in context of space, time and location.

**CO3:** Discuss various type of development plan and implication of development control regulations in planning.

**CO4:** Explain the role of local governance at all levels of planning in India.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Definitions and Rationales of Planning</b> Various definitions of town and country planning; Goals and objectives of planning; Components of planning; Benefits of planning; Arguments for and against planning.	L1, L2	12

<b>MODULE 2: Foundations of Planning</b> Orthodoxies of planning including the Lamps of Planning; Sustainability and rationality in planning; Components of sustainable urban and regional development; Defining what counts as planning knowledge: various sources of planning knowledge, various forms of planning knowledge; Reasoning and its various forms in planning; Space, place and location.	L1, L2	12
<b>MODULE 3: Development Plans and Development Regulations</b> Definition of development plan; Types of development plans: master plan, city development plan, structure plan, district plan, action area plan, subject plan, town planning scheme, regional plan, sub-regional plan; Planning Advisory Group report and the UDPFI Guidelines; Sector plans and spatial plans; Defining development and development control regulations, types of development control; Implications of violations of development control regulations; Conforming and Nonconforming land uses; Compatible and non-compatible land uses, LULU and NIMBY.	L1, L2, L4	12
<b>MODULE 4: Governance of Planning and Theories of Urbanization</b> Local government in India; District Planning Committees and Metropolitan Planning Committees; Introduction to Internationalization and globalization of planning; meanings and forms of globalization; Characteristics of a global city; Principles for planning for a global city. Theories of urbanization including Concentric Zone Theory; Sector Theory; Multiple Nuclei Theory and other latest theories; Land Use and Land Value Theory of William Alonso; City as an organism: a physical entity, social entity and political entity.	L1, L2	12

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>FUNDAMENTAL OF BUILDING STRUCTURES, MATERIALS AND CONSTRUCTION (PLN2102)</b>	L	T	S	P	C
Version 1.1		2	0	0	0	2
Pre-requisites/Exposure						
Co-requisites						

### Catalog Description

The aim of this course is to provide students a fundamental knowledge of building structures. In this course, concepts of beam, slabs, tension and compression are discussed in detail. This course deals suitable condition of soil required for the foundation of buildings. It is more focuses on various structures system involved in especially high-rise structures.

### Course Objectives

The objectives of this course are

- To introduce the definitions of basic terms of building structure.
- To understand the materials and construction techniques

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain and analyze the building structure in terms of forces and foundations

**CO2:** Identify the types of beam and its characteristics

**CO3:** Explain the various materials used to construct different types of structure

**CO4:** Explain the principles of design of RCC beams and slabs.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Fundamental of Building Structure</b> Forces of compression and tension, concept of equilibrium forces and conditions of equilibrium, concept of elasticity and plasticity, Hooke's law, stress – strain relationship of tension and compression; Different types of foundation; Columns and struts, short and long columns	L1, L2, L6	6
<b>MODULE 2: Design Principles</b> Beams and bending, various types of beams and their behavior; Design principles of RCC beams and slabs. Construction system: reinforced concrete, pre-stressed concrete and prefabricated system	L1, L2	6
<b>MODULE 3: Introduction to Building Materials</b> Brick, timber, stone, cement, lime, glass, R.C.C., asbestos, paints and varnishes, Fiber Reinforced Plastic (FRP)	L1, L2	6

<b>MODULE 4: Principles of Construction</b> Foundations, Footings, D.P.C., flooring, sills, lintel, roofing, parapets, coping, cladding expansion joints, waterproofing of roofs, external wall sections with details, beams, columns, slabs, retaining walls, etc.	L1,L2, L3,	6
--	------------	---

	<b>STATISTICAL AND QUANTITATIVE METHODS IN PLANNING-I (PLN2104)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Planning and Design Lab-I					
Co-requisites	Fundamentals of Urban and Regional Planning					

### Catalog Description

The aim of this course is to study basic statistical and quantitative methods and applications in planning. In this course concepts of quantitative data and methods of data collection are discussed in detail. This course deals with basic statistical applications and methods which is required for the analysis of collected data in order to draw out results. It is more focuses on methodological part of the planning which is one of the important steps in the planning process.

### Course Objectives

The objectives of this course are

- To study the data collection process and methods for data presentation.
- To study time series analysis and probability distributions

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the procedure of data collection.

**CO2:** Explain the various methods of data presentation.

**CO3:** Describe the important quantitative measures used in planning?

**CO4:** Discuss time series data analysis and its application in planning.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Data Collection</b> Statistical Data and methods; collection of data, record, file, sources of data; questionnaire design, design of sample surveys; simple random sampling, stratified sampling, systematic samples, etc.; data coding, data verification.	L1, L2	8
<b>MODULE 2: Basic Data Presentation</b> Statistical tables; types of tables, comparisons, methods of presentation, graphic presentation; types of charts; plotting a curve, rules for drawing curves; bar charts, pictography, pie charts, histograms.	L1, L2	8

<b>MODULE 3: Statistical Methods and Time Series Analysis</b> Raw data, frequency distribution, selecting number of classes, class limits, curves, cumulative frequency distribution and ogives, measures of central tendency; arithmetic mean, median, mode, geometric mean and harmonic mean; measures of absolute dispersion, range, quartile deviation, average deviation, standard deviation, skewness and kurtosis. Statistical Programme for Social Sciences (SPSS) genstat and statistician and its application for statistical methods. Variation in time series, trend analysis, cyclical variation, seasonal variation, irregular variation, time series analysis forecasting; Applications in planning.	L1, L3, L4, L5	10
<b>MODULE 4: Probability Theory and Probability Distribution</b> Introduction, addition rule, conditional probability, multiplication rule, random variables and probability distribution, mathematical expectation; Binomial distribution, poisson distribution; and normal distribution.	L4, L5, L6	10

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>PLANNING AND DESIGN LAB-I (GRAPHIC AND PRESENTATION TECHNIQUES) (PLN2107)</b>	L	T	S	P	C
Version 1.1		0	0	8	0	8
Pre-requisites/Exposure						
Co-requisites	Fundamentals of Building Structures					

### Catalog Description

The aim of the course is to study spatial aspect at building level. This Course will provide the architecture knowledge to the planning students with basic understanding of different concepts of architecture, design simple layouts and make various basic architectural drawings. This course also introduces the concepts and fundamentals of architectural drawing and develops representation skills and to nurture the understanding of the nature of geometrical forms and simple building forms.

### Course Objectives

The objectives of this course are

- To study Anthropometrics and its Relationship with Building.
- To study various Space Standards, Expression of Built Mass through Plan.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the difference between ergonomics and anthropometry.

**CO2:** Explain the basic concept of form and functions in building design.

**CO3:** Discuss the importance of architectural space standards for designing of simple buildings.

**CO4:** Discuss various measurements of drawings, plans, sections and elevations

Modules	Blooms level*	Number of hours
<b>MODULE 1: Study and Application of Elements and Principles of Design in Basic Composition</b> Elements of design in basic composition, Application of principles of design, Positive and Negative spaces, Additive and Subtractive spaces and Exercises primarily through 2-D & 3-D models of simple geometric.	L1, L2	24
<b>MODULE 2: Anthropometry</b> Anthropometrical study of various spaces, Application of Anthropometrics, Design of Anthropometrics Cell with minimum space requirements of single unit for a single person and Study the interior spaces by making 3-D views (axonometric and isometric)	L1, L2	24
<b>MODULE 3: Measured Drawing</b> Introduction to fundamentals of measured drawing, line value, lettering, drawing representation, format for presentation methods and technique of	L1, L2, L4	24

measuring buildings and their details. Measured drawing of simple objects like furniture, detailing in terms of construction, ornamentation, measured drawing of building components like column, door, window, cornice, etc.		
<b>MODULE 4: Scale and Order</b> Analyzing single activity, anthropometrical data, designing the elements of building e.g. entrance gate design, floor design, door design, Table-Chair, Drafting table etc. Living space, Home stay, Shop, Small Activity space, etc.	L1, L4, L5	24

*\*Bloom's Level:*

Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Fundamentals of Building Structure					
Co-requisites	Planning and Design Lab I					

### Catalog Description

The aim of this course is to provide the students with the basic tools and techniques for free hand drawing and technical drawings. The subject covers concept of scales and lettering and familiarize them with planar and solid geometry to conceptualize the 3D forms in to 2D with the help of Orthographic Projections of Planes and Solids including sections of solids as well.

### Course Objectives

The objective of this course is

- To familiarize the students with various drawing tools and accessories used in drafting and lettering techniques to produce and visualize geometrical composition and form.
- To provide a clear understanding about the scale measurement; plane geometry, solid geometry and projections used as drawing technique.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Draw free hand drawing and lettering.

**CO2:** Project points, lines and planes in different positions in 1<sup>st</sup> angle projection system.

**CO3:** Project regular rectilinear and circular solids in different positions.

**CO4:** Apply their knowledge in making sections, intersections and interpretations of solids.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Free Hand Drawing and Lettering</b> Free hand and mechanical lettering cycle.	L1	6
<b>MODULE 2: Basic Technical Drawing</b> Concept and types of line, Division of lines and angles, Drawing polygons, Inscribing and circumscribing circles in polygons, Drawing geometrical curves helix, Conoid etc.	L1, L2	6
<b>MODULE 3: Orthographic Projections- Planes and Solids</b> Definition, Meaning and concept, Planes of Projections, First angle projections, Projection of points, Lines and planes in different positions. Projection of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc.) in different positions. Sections of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc) in varying conditions of sectional plane.	L1, L2, L3	18

<b>MODULE 4: Solid Geometry</b> Construction of section, Intersection and interpenetration of solid.	L1, L2, L3	6
---	---------------	---

## Syllabus - Second Semester

	<b>SURVEYING AND PHOTOGRAMMETRY (PLN2202)</b>	L	T	S	P	C
Version 1.1		2	0	0	0	2
Pre-requisites/Exposure	Fundamentals of Building Structures, Materials and Principles of Construction					
Co-requisites	Planning and Design Lab – II (Graphics and Presentation Techniques)					

### Catalog Description

The aim of this course is to study the Preparation of Base Map from data obtained through Field Survey. The course will convey the theory of map projections and coordinated systems as well as the theoretical basis for data capture within surveying and photogrammetry.

### Course Objectives

The objectives of this course are

- To learn the Methods of Techniques of Physical Survey and Preparation of Base Maps and Planning
- To study the Techniques and use of Aerial Photography and GIS for Preparation of Maps and Plans

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the need and concept of scaling, measurement and units

**CO2:** Carry out basic surveying tasks using Chain Surveying and Compass

Surveying equipment's

**CO3:** Evaluate areas based on Plain Table Surveying using Digital Planimeter.

**CO4:** Explain the concept of levelling and need of contouring

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to surveying</b> Introduction to surveying, its practicality in the profession. Classification of various survey instruments, techniques & equipment. Reading of survey maps, understanding of features and undulations of ground. Scaling of survey measurements and errors in surveying. Concept of trigonometry, traversing & tachometry in surveying.	L1, L2	6
<b>MODULE 2: Measurements</b> Measurements in horizontal plane, linear measurements with chain & tape,	L1, L2	6

setting-out & survey stations, survey accessories, survey lines, open & closed traverse, chaining & offsetting, direct & indirect ranging, logbooks, field boundaries, field area estimation. Chain Surveying: Principles of survey, equipment required selection of station, methods of taking offsets. Compass Surveying: The prismatic compass, its construction and uses and other types of compasses.		
<b>MODULE 3: Basic and advanced surveying techniques</b> Plane table surveying (equipment, methods, advantage & disadvantage, errors etc.), Theodolite Surveying (temporary & permanent adjustment, measuring of magnetic bearings, horizontal & vertical angles and Theodolite traverse & balancing closing error). Tachometric surveying (general instruments, different systems of tachometric measurements, stadia method). The concept of total station survey and its multi-functioning in surveying. Introduction to Use of DGPS, automated & digital surveying, G.P.S, Aerial Photography, etc.	L1, L2	6
<b>MODULE 4: Contours and Slope Analysis</b> Contouring methods & equipment, contour intervals, direct & indirect methods of contouring, block contour surveys, profile levelling, longitudinal & traverse cross sections, and gradients. Measurements along sloping landforms, principles, definitions, methods, instruments required for simple & differential levelling.	L1, L2	6

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5:Synthesis, L6:Evaluation*

	<b>STATISTICAL AND QUANTITATIVE METHODS IN PLANNING – II (PLN2204)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Statistical and Quantitative Methods in Planning – I					
Co-requisites	Planning and Design Lab – II (Graphics and Presentation Techniques)					

### Catalog Description

The aim of this course is to provide exposure to the students to basic understanding of correlation and regression models. Along these, Different types of statistical inference and ANOVA for statistical and quantitative method in planning. This course will enable the students all the techniques used for data analysis through different types of statistical and quantitative method in urban and regional planning. Students will be able to apply these techniques in their planning studios in each of the semesters for major and minor planning exercise.

### Course Objectives

The objectives of this course are to

- Learn the Correlation and Regression Analysis.
- Get familiar with different Statistical Inference for Planning.
- Equip students with ANOVA distribution in Planning.
- Learn the Decision Theory and its application in Planning.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Define essential analysis for different types of planning.

**CO2:** Provide an overview about the Hypothesis, large and small tests for means and proportion.

**CO3:** Utilize their knowledge in conduction of Chi-square and ANOVA distribution method.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Correlation and Regression Analysis</b> Degree of correlation, Scoffer Diagram, correlation analysis, correlation co-efficient, co-efficient of rank correlation, partial correlation analysis and multiple correlation, simple Linear and nonlinear regression, lines of regression, coefficient of regression; Multiple Regression Analysis; Applications in planning.	L1, L3, L4	9

**CO4:** Incorporate Mathematical Programming models in planning.

<b>MODULE 2: Statistical Inference</b> Types of estimation; point, interval, testing of hypothesis, statistical hypothesis, simple and composite tests of significance, null hypothesis, alternative hypothesis, types of errors, level of significance, critical region; two tailed and one tailed test, large and small sample tests for mean and proportion; Applications in planning.	L1, L3, L4	9
<b>MODULE 3: Chi-Square Test and Analysis of Variance (ANOVA)</b> Chi-square distribution: applications of chi-square distribution; test of goodness of fit; ANOVA distribution; Applications in planning.	L1, L3, L4	9
<b>MODULE 4: Mathematical Programming Techniques and Decision Theory</b> Mathematical Programming models, linear programming problems, transportation problems, assignment problems, applications in planning. Decision making under conditions of certainty, uncertainty, and conditions of risk, decision trees, pay off matrix, applications in planning.	L3, L4	9

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	<b>EVOLUTION OF AESTHETICS, CULTURE AND TECHNOLOGY (PLN2205)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Fundamentals of Urban and Regional Planning					
Co-requisites	Techniques of Planning – I					

### Catalog Description

The aim of this course is to provide exposure to the students to fundamental understanding of Arts and Aesthetics. This course will also focus on the role of culture and their technology in Planning for India. This course will enable the students with development of aesthetics outside of India region and their character in respective country and India as well. Students will be able to apply or reference these techniques in their planning studios in each of the semesters for major and minor planning exercise.

### Course Objectives

The objectives of this course are

- Learn the fundamentals of Arts and Aesthetics.
- Get familiar with different concepts of Aesthetics.
- Equip students with role of culture and technology in Planning.
- Learn the Aesthetics and Culture in Ancient India Planning.
- Acquire know-how to use Asian, European and American Aesthetics, Culture and Technology for Indian Context.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Define creative and visual arts with their social and artistic expression.

**CO2:** Provide an overview about the different types of concepts and theory for scale, form and structure.

**CO3:** Utilize their knowledge in conduction different culture, their symbols, expression in built form for contemporary development.

**CO4:** Incorporate role of climate and Indian Aesthetics Culture in Planning for India.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Fundamentals of Arts and Aesthetics</b> Importance of creative and visual arts; Art as a medium of communication; Art as a means of social expression; Human habitat as an artistic expression. Concepts of beauty and ugliness; Classical theories of aesthetics; Relationship of aesthetics with other cultural values; Concepts of scale, space, form and	L1, L2, L3	9

structure; Concepts of time as a dimension of built form; Role of climate in evolution of settlement form.		
<b>MODULE 2: Role of Culture and Technology in Planning</b> Definition and symbols of culture; Transmission of culture; Cultural traits of ethnic groups and their expression in built form; Aesthetics of mixed culture and global culture; Cultural pollution; Role of technology in changing arts, culture, aesthetics, built form and structure of human habitat.	L1, L2, L3	9
<b>MODULE 3: Aesthetics, Culture and Technology in India</b> Aesthetics, culture and advancement of technology in ancient India and their impact on planning of settlements; Planning principles of the Manasara Treatise and Indus Valley Civilization. Aesthetics, culture and advancement of technology during the Mughal and British periods and their impact on planning of human settlements; Aesthetics, culture and advancement of technology in independent India and their impact on planning of human settlements.	L3, L4, L5, L6	9
<b>MODULE 4: Asian, European and American Aesthetics, Culture and Technology</b> Evolution of aesthetics, culture and technology in Europe and North America and their impact on city planning principles; Greek cities, Roman cities, European medieval cities; Planning during Renaissance and Baroque period. Evolution of aesthetics, culture and technology and their impact on city planning principles in America, Africa, Asia, the Middle East.	L1, L2, L3	9

	<b>TECHNIQUES OF PLANNING - I (PLN2206)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Fundamentals of Urban and Regional Planning					
Co-requisites	Planning and Design Lab – II (Graphics and Presentation Techniques)					

### Catalog Description

The aim of this course is to provide exposure to the students to Basic Techniques of Planning such as preparation of base maps, preparation of checklist and questionnaire, conduction of various kinds of surveys, techniques for data analysis and presentation. This course will enable the students a thorough understanding of all the techniques used for data collection, analysis and presentation in urban and regional planning. Students will be able to apply these techniques in their planning studios in each of the semesters.

### Course Objectives

The objectives of this course are

- Learn the Methods and Contents of Preparation of Base Maps.
- Get familiar with different Database required for Planning.
- Equip students with various survey techniques pertaining to Socio-economic and physical surveys.
- Acquire know-how of analyzing and presenting statistical and spatial data.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Define essential elements and preparation of Base Maps.

**CO2:** Provide an overview about the data requirements, availability and methods for collection.

**CO3:** Utilize their knowledge in conduction of socio-economic and physical surveys.

**CO4:** Incorporate learnt techniques of statistical and spatial data presentation in planning studios.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Techniques of Preparing Base Maps</b> Choice of appropriate scale for region and settlement level plans; town development plans, zonal development plans, layout plans; graphical, linear and areal scales; contents of base maps at various scales, notations - basic disciplines of maps; Measurement of Areas.	L1, L2, L3	9
<b>MODULE 2: Data Base for Planning and Socio - Economic Surveys</b> Data requirements for urban and regional planning; sources of primary and secondary data; questionnaire design, measurement scale and their	L1, L2, L3	9

application, sampling techniques, types of socio-economic surveys; self-surveys, interviews, mailed questionnaires and observer participation.		
<b>MODULE 3: Physical Surveys</b> Techniques of conducting surveys for land use, building use, density, structural condition of buildings, heights of building, land utilization and physical features of land; Data requirement for various types of regional plans; Techniques for conducting regional surveys.	L1, L2, L3	8
<b>MODULE 4: Techniques of Graphic Presentation of Statistical Data and Spatial Data</b> Tabulation of data, graphical presentation of data; pie diagrams, histograms, bar charts, normal, semi-log and double log graphs and their uses; colour, black and white presentation techniques; basis disciplines of illustration and tables. Land use classification, coding and analysis; residential and non-residential density patterns and analysis; colour, black and white presentation techniques; basis disciplines of illustration; Presentation of spatial data, analysis and proposals.	L3, L4, L5	10

	<b>APPLIED GEOLOGY AND HYDROLOGY (PLN2207)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1		2	0	0	0	2
Pre-requisites/Exposure	Materials and Principles of Construction					
Co-requisites	Surveying and Photogrammetry					

### **Catalog Description**

The aim of the course is to study basics of Geology and Hydrology related to Planning. The course deals about topography, terrain and climatic conditions of a region which are essential to understand while preparing a plan. The Course deals about the physical processes on the surface and below the surface of the earth. It is a multidisciplinary course aims to some part of Geology (Rock formation, soil formation, aquifer, layer of Earth etc.), Geography (Interaction between Man and Environment and other natural features) and Hydrology (Surface and Ground water). The Course comprises of various types landforms and geological structure exists on the earth surface as well as features located below the surface. The course provides a comprehensive knowledge to the students about relevance of geological structure and hydrology in spatial planning.

### **Course Objectives**

The objectives of this course are

- To learn Earth Science and Meteorology and their Components.
- To provide knowledge on Geological Structures, Landform, Land Slide, Ground Water Characteristics, etc.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Explain earth as a planet, its rotation, revolution, solar system, atmosphere and its composition and geological structure etc.

**CO2:** Explain the various types of landform affects the implementation of a plan.

**CO3:** Describe spatial distribution of earthquakes zones in India?

**CO4:** Explain the role of spatial planning in the ground water distribution?

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introductory Earth Science and Meteorology</b> Earth as a planet, the solar system, movement of the earth, atmosphere and its composition, composition of the earth; the earth processes, geological cycles, igneous activities, volcanoes, minerals and their properties; rock types and their character; bedding, outcrop and strikes; rock cycle; geological and time scale; Indian stratigraphy.	L1, L2	6
<b>MODULE 2: Geological Structure, Landforms, Weathering, Landslides and Mass Wasting</b> Description and classification of folds, faults, joints, unconformities, fault planes, geometrical destruction, etc; land form types; erosional, depositional fluvial, glacial, aeolian and marine; rock weathering and climate; mechanical and chemical processes, soil formation, landslides, sources and causes of crystal displacements, soil formation, landslides, sources and causes of crystal displacements, types, characters and effects, instability of hill slopes, prevention.	L1, L2	6
<b>MODULE 3: Earthquakes</b> Historical account, tectonic behavior and seismic belts; causes, intensity and magnitude of earthquakes, seismic zoning in India, earthquake waves and their character, particle motion and behavior in various geological formations; seismography, accelerograms and their interpretation, prediction and prevention; earthquake resistant structures. General considerations, sources of preliminary geological data particularly related to Indian stratigraphic sequences and the types of foundations, nature and preparation of foundation for road, bridge, building and other geo-technical structures; geophysical explorations.	L1, L2, L4	6
<b>MODULE4: Ground Water</b> Concept and role in town planning of different types of terrain, hydrologic cycle, vertical distribution of groundwater, interstices; Groundwater bearing properties of different lithological formations, porosity, permeability, specific yield, specific retention, transmissivity and storage coefficient; ground water in igneous, sedimentary and metamorphic rocks; aquifers; types and classification (geological), aquiclude, aquitard; aquifuge, water table and piezometric surface; surface water reservoirs and springs; artificial recharge and ground water mound hydrological features in relation of seepage, fluctuation of water table and hydrographs, geological structure and underground passages for water supply.	L1, L3, L4	6

	<b>COMPUTER AIDED DESIGN (CAD) IN PLANNING (PLN2209)</b>	L	T	S	P	C
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Planning and Design Lab II					
Co-requisites	Techniques of Planning I					

### Catalog Description

The course aims to study fundamentals of utilizing CAD tools in layout plans and regional plans. The main objective of the course is to develop understanding and details of master plan and Regional plan and all other maps by the use of drafting software's like AutoCAD. The course deals with technical aspect and gives a brief on the preparation of base map with the help of command and tools used in the software.

### Course Objectives

The objectives of this course are

- To study the basic tools of automated design and drafting in CAD.
- To study the application of CAD in layout plans and regional plans and its limitations.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain different basic commands which can be used in Automated drafting.

**CO2:** Explain different tools and commands used in editing and controlling of drafting

**CO3:** Discuss how to digitize layout plans made on paper by hand drafting

**CO4:** Describe use of base map for region, scanning of maps, symbolization and layering in the software.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Drafting in CAD</b> Need for Computer Applications in Planning; Need for automated design and drafting; Tools for automated designs and drafting; Elements of spatial data in CAD - Arcs, lines, rectangles, polylines, points, circles, donuts, layers, grids, snaps and object snaps, etc.	L1, L2	9
<b>MODULE 2: Editing and Controlling Display in CAD</b> Move, scale, copy, offset, change, trim, extend, mirror, divide, measure, array, break, hatch, block, zoom, regen, view, pan, fonts, etc.	L1, L2, L3	9
<b>MODULE 3: Case Studies of Lay-out Plans</b> Paper maps, digital layout maps, on screen digitization; 2D and 3D conversion, perspective view, walk through of layout.	L1, L2, L3	9

<b>MODULE 4: Limitations</b> Limitations of Computer Aided Design and Drafting in Planning; Non-linking of spatial and attribute data; Need for GIS packages for handling spatial and attribute data.	L1, L2	9

	<b>PLANNING AND DESIGN LAB-II (PLN2208)</b>	L	T	S	P	C
Version 1.1		0	0	8	0	8
Pre-requisites/Exposure	Planning and Design Lab I					
Co-requisites	Materials and Principles of Construction					

### Catalog Description

This course aims to study graphics presentation techniques and learn communication skills through planning exercises. The Course deals about the appreciation of an area in terms of compatibility of land use, availability of infrastructural facilities and amenities according to the planning standard and benchmarks. The course will enhance the knowledge of applying statistical techniques on database and the representation of the work. This course helps student in the preparation base map and key map at different level. The area appreciation exercise in the course will give a comprehensive knowledge about land use and infrastructure services in the area

### Course Objectives

The objectives of this course are

- To do area Appreciation of a Neighbourhood and make Graphical Presentation of the Data.
- To learn about the Communication Skills Verbal as well as Non-verbal.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain which particular statistical diagram applicable on what type of dataset.

**CO2:** Describe various component of base map and why key map is important in a map.

**CO3:** Explain major principles of a good presentation.

**CO4:** Appreciate different uses of land, their description and analysis for the given area.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Graphic Presentation, Base Maps and Key Maps</b> Graphic presentation of statistical data, Preparation of Base Maps at the levels of Site, Area, Zone, City, Region, etc; Preparation of Key Maps;	L1, L2	20
<b>MODULE 2: Composition of Drawings and Photographs</b> Composition of Drawings, Proportions of Lettering and Line thickness, Standard symbols, Line styles, Colour-coding; Legend, Drawing Formats; Appreciation of Thematic Maps of various levels of Planning; Introduction to Photography, Basic Principles, Composition for Architectural Building Photographs and Planning / Site Photographs	L1, L2	25

<b>MODULE 3: Communication Skills</b> Graphic presentation and communication skills; Use of Power Point and Multi-Media Projections;	L1, L3, L4	25
<b>MODULE 4: Appreciation Studies</b> Appreciation studies of Residential, Commercial, Institutional areas in small urban and / or rural Settlements	L1, L3, L6	26

## Syllabus - Third Semester

	<b>PLANNING THEORY-I (PLN2301)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Techniques of Planning I					
Co-requisites	Fundamentals of Urban and Regional Planning					

### Catalog Description

The main aim of the course is to study theoretical foundations of planning theory. This course is to study and analyse the concept of planning theory. The course aims to give comprehensive knowledge about planning theories in Indian context. The role of public participation in planning process is to be studied in this course and its effectiveness in the plan for social welfare in a sustainable manner. Learning from advanced nations in the planning, implementation and evaluation is also included in this course.

### Course Objectives

The objectives of this course are

- To comprehend theorization process in planning and centrality of participation in planning theory.
- To understand sustainability, rationality and globalization.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the role of planning theory in guiding development process in developing countries like India.

**CO2:** Explain the importance of participation in any development plan.

**CO3:** Describe sustainable urban development.

**CO4:** Discuss the advantage and disadvantage of compact city.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module 1: Defining Planning Theory and Theories of City Development</b> Definitions of theory in general; Definitions of planning theory including theory of planning, theory in planning and theory about planning; Definition of paradigm and its various stages of development by Kuhn; Significance of planning theory; Espoused theories and theories in use. Compact city approach: concept, advantages and limitations; Forms of cities in developing world, Forms of cities in the developed world; Forms of cities in the former and present socialist countries.	L1, L2	10

<b>Module 2: Participation and Planning</b> Public interest and its forms; History and significance of public participation; Methods of public participation; Impediments to public participation and conditions for effective public participation; Public participation and empowerment; Participation, policy formulation and implementation	L1, L2	8
<b>Module 3: Sustainability, Rationality and Globalization</b> Sustainability and rationality in planning; Components of sustainable urban and regional development; Globalization, internationalization, modernism and postmodernism debate; Pragmatism in planning; Regime theory and urban politics	L1, L2	8
<b>Module 4: Planning, Implementation and Evaluation</b> Need for evaluation; Inseparability of planning and evaluation; Planning theories and evaluation; Methods of evaluating development plans; Theories of implementation of planning policies and development plans.	L1, L2	10

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>SETTLEMENT GEOGRAPHY (PLN2302)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Fundamentals of Urban and Regional Planning					
Co-requisites	Evolution of Aesthetic, Culture and Technology					

### Catalog Description

This course aims at studying Extent, Location, Spatial Distribution and Internal Structure of Human Settlements and their regions. This course comprehends analytically the settlement hierarchy and settlement patterns in a region and evaluates the internal structures of cities, land Value and Land Use Theory.

### Course Objectives

The objectives of this course are

- To comprehend analytically the Settlement Hierarchy and Settlement Patterns.
- To understand the Internal Structures of Cities, Land Value and Land Use Theory.
- To develop the ability to Critically Analyze Settlement Systems embedded in the Urban and Regional Planning.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain Site and Situation in the context of settlement pattern.

**CO2:** Explain spatial distribution and arrangement of settlements.

**CO3:**Examine the urban land use studies and their applicability in the context of Indian cities.

**CO4:**Assess the image of a city with respect to its socio-economic and physical characteristics.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction</b> Need for study of settlement geography; definition of settlement; ranking of towns; site and situation patterns; settlement morphology.	L1, L2	8
<b>MODULE 2: Spatial Distribution of Settlements</b> Settlement in regional; context; spatial models of location, size and spacing of settlements; Central Place Theory; Characteristic of rural – urban fringe; rural– urban continuum; inter – urban inequalities; Interaction among settlements; Gravity model, classification of settlements.	L1, L3, L4	12
<b>MODULE 3: Urban Land Use Studies</b> Classification of land use in urban area; analysis of location and structure and models of growth patterns of CBD, industrial areas and residential areas; intra – urban inequalities.	L1, L2	5

<b>MODULE 4: Image of the City</b> Typology of urban perception, impact of socio – economic status of people on the image of a city; components forming the image of a city; land marks, edges, etc.	L1, L2	5
---	--------	---

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>TECHNIQUES OF PLANNING-II (PLN2303)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Understanding of Techniques of Planning-I					
Co-requisites	Demography and Urbanization					

### Catalog Description

The Course aims to study advanced planning techniques. This course give exposure to the students about the techniques for understanding various phenomenon in planning. The course aims to make students aware about the plan preparation techniques in urban as well as regional planning. Formulation of spatial standards in planning has also been focused upon. The course also briefs about applications of advanced techniques used in planning.

### Course Objectives

The objectives of this course are

- To understand Advanced Planning Techniques.
- To develop the ability to professionally examine the Urban and Regional Planning Issues.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the Locational attributes of activity/population and urban structure.

**CO2:** Explain spatial standards for residential, industrial, commercial and recreational areas and their importance in planning.

**CO3:** Discuss the methodology of Master and Regional Plan.

**CO4:** Describe retail location analysis, industrial location analysis, gravity analysis etc.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Methods of Analysis</b> Methods of analysis of Socio-Economic and Physical data; Use of techniques of Location Quotient, Coefficient of Localization; Locational attributes of activity and population; Techniques for understanding structure of urban areas, land values and density patterns	L1, L2, L4	10
<b>MODULE 2: Spatial Standards</b> Formulation of spatial standards for residential, industrial, commercial and recreational areas, space standards for facility areas, utilities and networks; Population, Distance criteria; Performance standards; Case studies.	L1, L4	8

<b>MODULE 3: Plan Preparation Techniques</b> Setting of Goals and Objectives; Methodologies for preparation of urban/regional development plans, master plans, structure plan and strategy plan techniques; plan implementation techniques; public participation and plan implementation; techniques of urban renewal and central area redevelopment; Contents of a Master Plan, Regional Plan, etc.	L1, L2	10
<b>MODULE 4: Introduction to Advanced Techniques</b> Thresholds analysis, retail location and industrial location analysis; intervening opportunity models; Linear programming; Simulation, Gravity Models; Applications in planning.	L1, L3, L4	8

	<b>DEMOGRAPHY AND URBANISATION (PLN2305)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Fundamentals of Urban and Regional Planning					
Co-requisites	Techniques of Planning					

### Catalog Description

The course aims to make students aware about population structure, its composition, urbanization, and urban systems in Indian context. This course gives exposure to usage of socio-economic data in planning and enhances their knowledge regarding population, evolution of urbanization trends in a settlement and its related planning theories. The course consists of five modules which assists student in understanding various dimension of population in a city or region, related issues and analyses settlement system rooted in urban and regional planning.

### Course Objectives

The objectives of this course are

- To study varied relationships between demography and urbanization in India.
- To develop the ability to critically analyze settlement systems embedded in the urban and regional planning.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Discuss population structure, its composition and usage of socio-economic data in urban and regional planning.

**CO2:** Describe the various demographic variables, their implication in planning and role of Census in defining the urban places in region.

**CO3:** Explain the history of urbanization, its process and functional classification of urban places

**CO4:** Discuss legal sphere of urban planning such as state level policy, national Urbanization Policy, five years plans etc.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Study of Population</b> Demographic variables: fertility, mortality, migration; evolution of population study, contribution of Malthus; mortality-trends, biological and social factors and mortality-gender, race, social structure, life style, social status, occupation etc; measures of mortality-crude and age-specific death rates;	L1, L2	12

infant mortality, adjusted or standardized death rates; neonatal mortality rate; fertility: fertility trends, fertility and social and biological behavior; differential fertility, ethnic groups, socio-economical group mobility, location etc.; measures of fertility, crude birth rate; Age-specific fertility rate; total fertility rate, net reproduction rate; migration-causes and consequences of population movement; reasons and types of migration trends; methods of measuring volumes of migration; direct and indirect measures; effect of migration of composition of population.		
<b>MODULE 2: Study of Demography</b> Source of demographic data; Census of India and its role as a data warehouse; population structure and composition - age sex composition, sex ratio, dependency ratio, child-woman ratio; measures of age-sex structure, age-sex pyramid, population composition; marital status, caste, region, literacy level, etc; life table techniques; techniques in preparing life table, abridged life table; population estimation, projection and population forecasting; basic cohorts survival model, inter regional cohorts survival model.	L1, L2	8
<b>MODULE 3: Urbanization in India</b> A brief history of urbanization in India; Mughal and British influences of India cities; post-independence urbanization; urbanization process as influenced by socio-cultural, political, economic and administrative factors; definition of urban centers, concepts of rural-urban continuum and dichotomy; census definition of urban places town, cities, town groups, urban agglomeration, standard urban area metropolis, megalopolis, etc; functional classification of urban places.	L1, L2	8
<b>MODULE 4: Policies and Strategies for Directing Urbanization Trends in India</b> Over view of world urbanization, National Urbanization policy, basic issues in urbanization policy; role of national and state level policies; five year plans, latest attempts at urbanization policy formulation in the country; salient features of the report of the National Commission of Urbanization.	L1, L2	8

	<b>TRAFFIC AND TRANSPORTATION PLANNING-I (PLN2306)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Techniques of Planning I					
Co-requisites	Fundamentals of Urban and Regional Planning					

### Catalog Description

This course aims at to study essential components of traffic and transportation planning including field surveys, facility design and traffic management. The course gives a brief on prediction of usage demand in future travel and to ensure all the necessary facilities and services to cater to that demand. Transport planning is highly essential in shaping cities, enabling economic activities, promoting community interaction, and enhancing quality of life. It is also essential for sustainable development and ensuring safe accessibility at various levels for all individuals.

### Course Objectives

The objectives of this course are

- To familiarize students about different Transport Systems and Road Capacity.
- To provide basic Concepts for Designing Transport Facilities and Traffic Management Systems.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain urban structure and mobility levels, concept of accessibility, land use – Transport Cycle.

**CO2:** Explain Comprehensive Mobility Plan (CMP) contents and characteristics.

**CO3:** Examine techniques for estimating direct and indirect road user costs and benefits, value of travel time?

**CO4:** Describe the major source of air and noise pollution?

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Transport System and its Development</b> Role and importance of transport, characteristics and role of various forms of	L1, L2	5

transport systems - road, rail, air, water; evolution of mass transport development in India, urbanization and transport demand, motorization trends.		
<b>MODULE 2: Road Capacity and Traffic Survey and Studies Power absorbing devices:</b>  Concept of PCU & level of services, capacity of uninterrupted flow conditions, factors affecting capacity and level of service; capacity of rural and urban roads, capacity at intersections. Traffic Volume Count, origin destination survey, speed and delay study, parking surveys, road network inventory, accident study - need, design of survey proforma, methods of conducting surveys, analysis and interpretation.	L1, L2, L4	7
<b>MODULE 3: Transport Facility Design</b> Roads: Road hierarchy, design control and criteria, geometric design elements, sight distance and control of access; at grade and grade separated intersections Parking: Parking space norms and standards, design standards for on-street and off-street parking facilities.  Pedestrian Facilities: Capacity guidelines for at-grade and grade separated facilities, design Considerations Cycling Facilities: Capacity guidelines and design considerations for cycle tracks Public Transport / Para Transit Facilities: Design standards for bus stops, auto rickshaw, taxi, cycle-rickshaw stands.	L1, L2, L4	12
<b>MODULE 4: Traffic Management and Control</b> Traffic Management measures; Arterial Management; Traffic Signs - principles, types and design considerations, road markings; Traffic Signals - types, optimal cycle length and signal settings, warrants; Regulation of Traffic - speed regulation, regulation of vehicle, parking regulations, Case Studies.	L1, L2	7

*\*Bloom's Level:*

	<b>PLANNING AND DESIGN LAB-III (PLN2307)</b>	L	T	S	P	C
Version 1.1		0	0	8	0	8
Pre-requisites/Exposure	Specification, Estimation and Valuation, Planning and Design Lab I and II					
Co-requisites	Understanding of concept of design					

### Catalog Description

This course aims to learn basic designing concepts and principles of neighbourhood planning and provide a practical experience of Neighbourhood Planning and preparation of Site Plans. This course also gives a brief to understand different methods to conduct survey for a site and its neighbourhood characteristics. The course also includes report and sheets having all the basic requirements of Site planning and Neighbourhood planning.

### Course Objectives

The objectives of this course are

- To introduce the Fundamentals of preparation of Site Plans and Neighborhood Plans.
- To familiarize the students about Standards and Space requirement of different Land Uses and Facilities for a Target Population for preparation of a Site Plans.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Prepare methodology, checklist, questionnaire and base map for the study area.

**CO2:** Examine the existing site analysis on the basis of collected data.

**CO3:** Identify issues and potential which are essential for preparation of neighbourhood plan.

**CO4:** Prepare neighbourhood plan and submission of final report for the same.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Designing, Preparation and Presentation of Drawings</b> Design and preparation of plan, sections and elevation of low rise and high-rise apartments taking into account the building bye-laws and zoning regulations; Preparation of presentation drawings. Introduction to the working drawings; Preparation of plans, sections, elevations, and important details of an apartment unit.	L1, L2	20

<b>MODULE 2: Site Analysis and Conceptual Approach to Site Planning</b> Site analysis, development standards and preparation of the design brief; various considerations for site layout, conceptual approach to site planning.	L1, L4	20
<b>MODULE 3: Layouts and Area Analysis</b> Preparation of preliminary layout and area analysis; Final layout showing the circulation and basic infrastructure.	L1, L6	40
<b>MODULE 4: Costing and Preparation of Model</b> Rough costing of the scheme, and preparation of the model to an appropriate scale.	L1, L4	16

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Pre-requisites/Exposure	Computer Aided Design (CAD) in Planning					
Co-requisites	Planning and Design Lab – V (Area Planning)					

### Catalog Description

This course gives exposure to the students about Remote Sensing and Geographic Information System (GIS) along with its application in spatial planning. The knowledge acquired in this subject can also be used by the students in their thesis exercises as well as it can also help them in getting jobs after the completion of the course.

### Course Objectives

The objectives of this course are

- To study the concepts of Remote Sensing and photo interpretation as well as their uses in Spatial Planning
- To study planning information systems in India and its applications in planning.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the basic principles of Remote Sensing.

**CO2:** Describe the photo-interpretation and use the knowledge in their studio exercises.

**CO3:** Demonstrate planning information system.

**CO4:** Explain the relationship between Human settlements and Planning Information System.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Remote Sensing</b> Limitations of Traditional Surveys for Planning; Remote Sensing - Definition, Aerial and Satellite Remote Sensing, Aerial Remote Sensing	L1, L2	6
<b>MODULE 2: Photo Interpretation</b> Aerial Photo-Interpretation, Qualitative and Quantitative Elements of Photo-Interpretation; Satellite Remote sensing, Geo-Stationary and Sun-Synchronous Satellites, Principles of Electro Magnetic Radiations, Resolutions; Introduction to Digital Image Processing; Salient Features of Popular Remote Sensing Satellites; Applications in Planning; Laboratory	L1, L2, L3	10

Exercises		
<b>MODULE 3: Human Settlements and Planning Information Systems</b> Human Settlements' Information Needs, Scales and Levels, Pre-Conditions for Using Planning Information Systems; Introduction to various Planning Information Systems.	L3, L4	10
<b>MODULE 4: Planning Information Systems in India</b> Systems Approach to Planning as basis for Planning Information Systems; Systems, Hierarchy, Types; Data and Information, Value of Information, Information Flows, Loops; Information Security and Sharing; Information Systems, Types, Limitations; Planning Information Systems -NNRMS, NUIS, National Urban Observatory, Municipal Information Systems, Land Information Systems, Cadastre Systems; Applications and Limitations; Tools for Spatial Data Handling, Introduction to GISs.	L1, L2	10

	<b>ELEMENTS OF ECONOMICS (PLN2309)</b>	L	T	S	P	C
Version 1.1		2	0	0	0	2
Pre-requisites/Exposure	Fundamentals of Urban and Regional Planning					
Co-requisites	Techniques of Planning - I, Statistical and Quantitative Methods in Planning - II					

### Catalogue Description

The aim of this course is to provide exposure to the students to basic concepts of economics such as micro and macro-economics. This course will enable the students a thorough understanding of all the theories and definitions of terms relating to economics in planning and their usage in urban and regional planning. The students will know about the market factors of supply and demand and how it effects planning.

### Course Objectives

The objective of this course is to

- To study the economics; micro and macroeconomic decisions; use of economics in planning.
- To study the Law of demand and supply, elasticity of demand and supply, its use in planning.
- To study the theory of production and concept of the income and employment.
- To study the urban and regional economics.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Understand the theory of supply and demand and its use in planning.

**CO2:** Know the theory of firm production and factors of production and economics of scale.

**CO3:** Understand the concept of Income and employment and its role in planning and development.

**CO4:** Learn basic concepts of urban and regional economics and its significance in planning.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Module 1: Definition and Scope of Economics</b> Central problems of economics; micro and macroeconomic decisions; use of economics in planning.	L1, L2, L3	6
<b>Module 2: Theory of Demand and Supply and Firm Production</b> Law of demand and supply, elasticity of demand and supply, its use in planning. Perfect and imperfect market types, market demand and supply; pricing under different market conditions, theory of production; factors of	L1, L2, L3	6

production, costs, scale of production, and economies of scale.		
<b>Module 3: Concept of Income, Employment and Money</b> Classical and modern approaches, growth and development indicators; measures of national income, defining development and under development.	L1, L2, L3	6
<b>Module 4: Introduction to Urban and Regional Economics</b> Use of economic concepts in urban planning, housing, transport, taxes, land use, location, etc.; use of economic concepts in regional planning; location disparities in development, input-output techniques, sectoral development, etc.	L1, L2, L3	6

*\*Bloom's Level:*

## Syllabus - Fourth Semester

	<b>PLANNING THEORY-II (PLN2401)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Planning Theory I					
Co-requisites	Fundamentals of Urban and Regional Planning					

### Catalog Description

The main aim of the course is to study advanced planning theory. This course is to study and analyze the development control regulation at all levels. The course aims to give comprehensive knowledge about functions and spatial jurisdictions of development authorities. The role of coordination in planning practice is to be studied in this course and its effectiveness in the plan. Learning from advanced nations in the planning, implementation and evaluation is also included in this course. The course assists students in understanding the role of private sector in infrastructure development.

### Course Objectives

The objectives of this course are

- To understand Rational Planning Model.
- To understand Advocacy Planning and Equity Planning and Collaborative Planning Theory.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the relevance of public policy and policy formulation at center and state level.

**CO2:** Explain functions and spatial jurisdictions of development authorities

**CO3:** Describe development control regulation.

**CO4:** Discuss the role of coordination in planning practice.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>Modules I Scientific Rationalism and Planning</b> Defining instrumental rationality; Systems view of planning with a focus on contributions of J.B. McLoughlin and others; Chief characteristics of Comprehensive Rational Planning Model and implications for planning practice; Systemic change	L1, L2	9
<b>Modules II Advocacy Planning, Pluralism and Equity Planning, Collaborative and Communicative Planning</b> Meaning, historical background and purposes of Advocacy Planning Model;	L1, L4	9

Main features of Advocacy Planning Model; Relevance for planning practice; Equity and its various definitions; Major components of the Equity Planning Model; Implications on the role of planners in planning practice Various components of Collaborative Planning Model; Contributions of Patsy Healey and Judith Innes and others; Deliberative policy analysis; Role of trust in planning; Planning as persuasive storytelling		
<b>Modules III Political Economy Theories and the City</b> Defining the term political economy; Role of the state in planning; Contributions of David Harvey, Manuel Castells and others; Richard Foglesong and the property contradiction	L1, L6	9
<b>Modules IV Capabilities, Race, Gender, Religion and Caste</b> Defining functioning's and capabilities; Exploring relevance of Sen and Nussbaum's capabilities to planning; Role of planning and planners in enhancing capabilities of the poor; Capabilities perspective on slums and squatters; Feminist planning theory; Planning, caste and religion; Planning rights and responsibilities	L1, L4	9

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>PLANNING PRACTICE-I (PLN2402)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Planning Theory – I, Techniques of Planning – I					
Co-requisites	Planning Theory - II					

### Catalog Description

The aim of this course is to Study Development Regulations and the role of various Agencies in the practice of Urban and Regional Planning. This course objective to provide the foundation, knowledge and skills needed to work in planning Organisation. It is designed to build understanding of the complex interactions and uncertainties of the development process.

### Course Objectives

The objectives of this course are

- To understand the roles of Central Town and Country Planning Organization; State Town and Country Planning Departments / Directorates; Development Authorities and Local Bodies in Urban and Regional Plan formulation and implementation.
- Identify the agencies that involves in planning process and development plan, execution and operation and maintenance
- To understand Type and Role of Private Sector Participation in Spatial Planning Practice.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the role of planning organization and their policies

**CO2:** Identify the functions and jurisdictions of development authorities

**CO3:** Explain different development regulations with the help of NBC & URDPFI

**CO4:** Explain the role and need of coordination in planning

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Framing Planning Policies</b> Role of Town and country planning organization at central level and town and country planning department at state level. Actors framing public planning policies; Influences of various stakeholders on policy formulation; Implementation of public policies.	L1, L2	10
<b>MODULE 2: Development Authorities</b> Types, functions and spatial jurisdictions of development authorities; Reasons for the establishment of development authorities; Place of development	L1, L2	8

authorities in local government.		
<b>MODULE 3: Development and Development Regulations</b> Working of building bye-laws in planning practice; Requirements for grant of building permissions; Streamlining the development control regulations; Making development control regulations work for the poor; UDPFI Guidelines; National Building Code and its implementation.	L1, L2,	10
<b>MODULE 4: Coordination and Privatization in Planning Practice</b> Meaning and types of co-ordination; Mechanisms of coordination; Case examples of coordination from planning practice. History of privatization of planning; Special Economic Zones; Retail sector developments; Infrastructure development by the private sector such as Metro, etc.	L1, L2, L5	8

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>TRAFFIC AND TRANSPORTATION PLANNING-II (PLN2403)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Traffic and Transportation Planning I					
Co-requisites	Planning and Design Lab – IV (Transportation Planning)					

### Catalog Description

The aim of this course is to provide exposure to the students to essential understanding Transportation System for the development of particular specific location and society. This course will enable the students with development of transportation management system. Economic relevance and different types of policies related to City Planning. Students will be able to apply or reference these techniques in their planning studios in each of the semesters for major and minor planning exercise.

### Course Objectives

The objectives of this course are to

- Learn the fundamentals of urban form and structure.
- Get familiar with different types of surveys used in transportation planning.
- Equip students with role of economic evaluation in any transport development.
- Learn the impacts of the transport development on environment.
- Acquire know-how to develop new policies and transportation management plan effectively.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Define different types of Urban Structure and Transportation System.

**CO2:** Provide an overview about the Comprehensive Transport Planning.

**CO3:** Utilize their knowledge in conduction role of Economic Evaluation

**CO4:** Incorporate the impact of Transport on Environment.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Urban Structure and Transport System</b> Types of Urban Form and Structure, Impact of urban form and structure on transport system development, urban structure and mobility levels, concept of accessibility, land use – Transport Cycle, Transit Oriented Development (TOD), Case Studies.	L1, L2, L3	8

<b>MODULE 2: Comprehensive Transport Planning</b> Study area definitions, surveys and studies, survey techniques; and transport planning process – trip generation, trip distribution, modal split, trip assignment; land use transport models, Scenario development, Comprehensive Mobility Plan (CMP) Components, Case studies.	L1, L2, L3	7
<b>MODULE 3: Transport and Environment</b> Traffic noise - factors affecting noise, noise abatement measures, standards; air pollution – factors affecting air pollution levels, abatement measures, standards; Traffic Safety- accident reporting and recording systems, factors affecting road safety; Transport Planning for Target groups - Children, adults, handicapped and women; Norms and Guidelines for highway landscape; Street lighting type - standards and design considerations.	L3, L4, L5, L6	8
<b>MODULE 4: Transport Policy, Management and Economic Evaluation</b> Review of national, state and local level transport policies and their relevance in spatial and economic planning; pricing and funding of transport systems; energy and environment implications in transport; existing organizational and legal framework, transport co-ordination; Transport System Management (TSM) Plans. Economic appraisal of transport projects, techniques for estimating direct and indirect road user costs and benefits, value of travel time.	L3, L4, L5, L6	7

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	<b>SETTLEMENT SOCIOLOGY (PLN2406)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Settlement Geography					
Co-requisites	Planning Theory I					

### Catalog Description

The aim of the course is to study social aspects of human settlements. The course assists students in preparing the settlement centric plans. This course deals with social aspects of people who lives in a settlement and controlled by several determinants of sociology such as social status, social institutions, gender inequality etc. This course gives a comprehensive knowledge on sociology as a discipline in the context of settlement which is a spatial entity.

### Course Objectives

The objectives of this course are

- To understand the principles of sociology.
- To sensitize on community development.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the need of sociology in the settlement centric plans.

**CO2:** Explain the sociological perspective and social life in urban and rural settlement.

**CO3:** Assess the role of community participation in decision-making process.

**CO4:** Analyse how gender inequality affects the development of a settlement.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Understanding Sociology</b> Sociology as a science; Sociological imagination and rethinking; Applied sociology.	L1, L2	5
<b>MODULE 2: Sociological Perspective and Organizing Social Life</b> Functionalist perspective, Conflict perspective, Internationalist perspective; Culture of space and cultural ecology; Social structure and social control; Stratification and social inequality; Social mobility and Social defiance.	L1, L2, L3	8
<b>MODULE 3: Social Institutions</b> Family, kinship pattern and authority; Religion as social work and significance in planning; Voluntary associations (identifying NGOs and involving them as partners of development, operational issues); Groups (primary, secondary and reference groups).	L1, L2	7
<b>MODULE 4: Community and Gender Development</b> Development induced displacement (anthrop-social considerations);	L1, L2,	10

Resettlement and rehabilitation; Neighbourhood pattern and development strategy; Rural and urban issues; Community based and workshop based methods; Qualitative data Analysis; Report writing. Gender and sex; Gender Sensitivity; Gender and development planning; Gender implications on spatial planning.	L4, L5	
---	--------	--

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>PLANNING AND DESIGN LAB - IV (TRANSPORTATION PLANNING) (PLN2407)</b>	L	T	S	P	C
Version 1.1		0	0	8	0	8
Pre-requisites/Exposure	Traffic and Transportation Planning – I					
Co-requisites	Traffic and Transportation Planning – II					

### Catalog Description

The aim of this course is to provide practical experience on various aspects of transport planning including road geometrics layouts and area circulation plan on real life projects. This course will not focus on a specific transportation mode but will use the various modes to apply the theoretical and analytical concepts presented in the lectures and readings.

### Course Objectives

The objectives of this course are

- To provide Students with Basic understanding about Roads, Road Geometrics and Layout Preparation.
- To train students in Preparation of Area Circulation Plan including Geometric Design and Low Cost Traffic Management Measure.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Describe the different classifications of roads in urban and rural areas.

**CO2:** Conduct the surveys required for planning of a transportation system.

**CO3:** Layout the road network for designing the cities

**CO4:** Evaluate an area with respect to circulation plan with the help of surveys and geometric design

Modules	Blooms level*	Number of hours
<b>Module 1: Classification of Roads and Road Layouts</b> Understanding of functional and geometric classifications of urban and rural roads and their cross sectional elements, Design and preparation of layout for road intersections, rotaries and signalized intersections.	L1, L2	15
<b>Module 2: Types of Transport Surveys</b> Methods, surveys, analysis, presentation of data and also to prepare reports relating to different types of transport surveys.	L1, L2,	15
<b>Module 3: Road Geometrics and Surveys</b> Road geometrics and road components, traffic volume, origin destination, spot speed, speed and delay, parking and pedestrian;	L2, L3, L4	15

<b>Module 4: Area Circulation Plan</b> Preparation of an area circulation plan by studying the existing land use, existing circulation pattern, geometric design, level of services for a small area through networks improvement and low cost traffic management measures.	L5, L6	51
--	--------	----

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>GEO-INFORMATICS FOR PLANNING-II</b> <b>(PLN2408)</b>	L	T	S	P	C
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Computer Aided Design (CAD) in Planning					
Co-requisites	Planning and Design Lab – V (Area Planning)					

### Catalog Description

The aim of this subject is to equip the students with the know-how of Geographic Information System and its application in spatial planning. This course will enable students to understand the need and potential uses of GIS in Urban and Regional Planning. They will learn to generate digital spatial data base for their planning studio exercises and methods for spatial data analysis. Students will be able to apply GIS techniques and methods in their planning studios and thesis in each of the semesters.

### Course Objectives

The objectives of this course are

- Learn the need and applications of GIS in spatial planning.
- Get familiar with ArcGIS software and technical knowledge of basic tools.
- Learn GIS modelling for various kinds of spatial analysis.
- Acquire knowledge of integrating GIS with Digital Image Processing and GPS.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Apply GIS in spatial planning.

**CO2:** Use GIS for digital spatial data base creation.

**CO3:** Execute GIS modelling for various kinds of spatial analysis.

**CO4:** Utilise Digital Image Processing and use of GPS in spatial analysis.

Modules	Blooms level*	Number of hours
<b>Module 1: Need for GISs</b> Maps and Spatial Information, Limitations of Typical DBMS Packages and CAD Packages; Need for GISs.	L1,L2	9
<b>Module 2: Introductions to GISs</b> Geographic Information Systems, Introduction, Components, Benefits;	L3,L4	9

Computerized GISs, Input and Output Devices; Spatial Data Entry into GIS, Spatial Information Security and Sharing; Data Structure for GIS, Vector and Raster Data Structures, Comparative Advantages and Disadvantages; Maps, Base Maps and Thematic Maps, Mapping and Spatial Analysis Software, Linking of Attribute Data, Spatial Data Aggregation; Spatial Data Generalization; Limitations of GISs.		
<b>Module 3: GIS Modelling</b> Overlay functions in GIS; using attribute over spatial data in Modelling; case study-based land suitability analysis; Modelling service area for social infrastructures; impact analysis.	L3,L4	9
<b>Module 4: Advanced Concepts in GISs</b> Introduction to Dynamic GISs; Integration of GIS and Digital Image Processing; Integration of GIS and GPS.	L3,L4	9

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>SUSTAINABLE URBAN DEVELOPMENT (PLN2409)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Ecology, Environment and Resource Development and Management					
Co-requisites	Planning and Management of Utilities and Services					

### Catalog Description

The course intends to create awareness amongst the students to the various issues and adversities faced by the environment due to extensive and irresponsible use of natural resources such as water, land, energy, etc. The course focuses on the implications on surrounding done by the urban industrial processes, changes in land use and transportation, such as air and water pollution and solid waste management. The course also includes in training the students to suggest and work upon the Environmental Impact Assessment and Strategic Environmental Assessment for urban areas through sustainable strategies such as SDG, Eco- city Approaches, etc.

### Course Objectives

The objectives of this course are

- To study Concept and Issues of Sustainable Urban Development.
- To understand the concern for ensuring Sustainability of Land, Water and Energy Sources

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Plan and develop cities using the sustainable and eco-city approaches of development.

**CO2:** Suggest and work upon the Environmental Impact Assessment and Strategic Environmental Assessment for urban areas.

**CO3:** Explain the importance of Land and Energy Resources in day to day life and its diverse implications on the urban development.

**CO4:** Describe the concepts of Solid waste management, water pollution, Air Pollution, rain water harvesting, water treatment and recycling, etc.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Concept and Issues</b> Changing perspectives in man-environment relationship with focus on issues of population, urbanization, resource depletion and pollution; limits to growth vis-a-vis sustainable economy; growth and environmental imperatives of	L1, L2	6

developing vs. developed countries; definitions, concepts and parameters in sustainable development with particular reference to Brundtland Commission, Agenda 21, Eco-City approach, etc.		
<b>MODULE 2: Methods and Techniques</b> Application of ecological principles in sustainability: energy and resource cycles, food webs, ecological pyramids and evolution and succession of natural ecosystems; Carrying Capacity based planning: concept, parameters and indicator measures, models and case studies in urban and regional development; Environmental Impact and Strategic Environmental Assessment for urban areas; Ecological Footprint Analysis of cities; Sustainable Lifestyle Assessment and behavioural modifications at household levels.	L1, L2, L3	10
<b>MODULE 3: Land, Energy and Water as a Resources</b> Land capability and suitability analysis in location and planning of urban land uses; implications of urban form, density, land use pattern and transportation system in land and energy conservation, Urban interference in hydrological cycle, with particular reference to water pollution, water resources, drainage and natural ecosystems; urban water treatment, recycling and harvesting; use of non-conventional energy sources in urban development	L1, L2	10
<b>MODULE 4: Air Quality &amp; Solid Waste Management</b> Sources, types and effects of air pollution and solid waste disposal in cavities, urban industrial processes and land use and transportation implications in air and solid waste pollution; norms, standards, laws, organizations and policies in urban air quality control and solid waste management; examples of best practices	L1, L2	10

	<b>TECHNICAL REPORT WRITING (PLN2410)</b>	L	T	S	P	C
Version 1.1		2	0	0	0	2
Pre-requisites/Exposure	Planning and Design Lab-I					
Co-requisites	Statistical and Quantitative Methods in Planning					

### Catalog Description

The aim of the course is to study the technical aspect of report writing and role of methodology in research. This course gives an idea of writing skills. The course will introduce the students to all types of technical, scientific and legal writings. The course will enable the students to conduct systematic research and write technical reports.

### Course Objectives

The objectives of this course are

- To understand the types of reports and style of writing technical reports
- To understand the methods used for conducting research.
- To know about presentation of research.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain differences between different writing formats for reports.

**CO2:** Explain important elements to give a comprehensive understanding of purpose of report.

**CO3:** Describe the differences between different writing styles for articles, papers and other texts.

**CO4:** Explain the basis for selecting appropriate research method and criteria for a good research design.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Types and Classification of Reports</b> Types of reports, difference between technical, scientific, legal and other types of communications; specific characteristics of writing technical reports. English comprehension and oral communication. Presentation techniques in digital and oral format for group discussion in seminars and meetings.	L1, L2	6

<b>MODULE 2: Format and Elements of Reports</b> Preface, acknowledgements, contents, indexing, key word indexing, introduction, body terminal section, appendices, references; Use of Word Processing software; Literature surveys: Use of libraries, knowledge of indexing and available reference materials.	L1, L2	6
<b>MODULE 3: Special Type of Writing</b> Special type of writing: articles and manuals; Planning and preparation of technical articles for publications; Popular articles; Formal letters and specifications: Business and official letters, styles and formats; Requests for specifications and other types of business enquiries; Replies to bidding for tenders and conduct of meetings; Agendas and minutes of official records and meetings.	L1, L2, L6	6
<b>MODULE 4: Research Methodology</b> Intuition and research; Scientific research, need for scientific approach to research; Research methods; Hypotheses, testing of hypotheses; Reporting of research; Research in planning.	L1, L4, L5	6

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

## Syllabus - Fifth Semester

	<b>REAL ESTATE PLANNING AND MANAGEMENT (PLN2501)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Housing and Community Planning					
Co-requisites	Planning and Design Lab – V (Area Planning)					

### Catalog Description

This course objective to provide the foundation, knowledge and skills needed to work in real estate sector. It is designed to build understanding of the complex interactions and uncertainties of the development process. It provides students with the essential knowledge components of economics, valuation, planning, law, and regeneration and sustainability principles. It also develops an appreciation of the skills and tasks inherent in development projects, including community participation, satisfying the statutory planning considerations, undertaking the necessary financial appraisals, and achieving funding to make it happen.

### Course Objectives

The objectives of this course are

- Introduce the basic Definitions and Concepts of Real Estate Planning and Management.
- Provide a basic understanding of Real Estate Markets.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the term land economics and evaluate the process and cost of development.

**CO2:** Describe the Heterogeneity and imperfections of land and valuation of real property

**CO3:** Identify the location of specific uses and urban development programme

**CO4:** Analyze the real estate development through case studies

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Developments of Land and Real Property</b> Economic concepts of land, objectives and scope of land economics;	L1, L2	10

relevance for spatial planning; economic principles of land uses; economic rent, land use and land values, market mechanism and land use pattern. Process, cost of development, source of finance, and financial calculation for real estate developer.		
<b>MODULE 2: Real Property Markets</b> Heterogeneity and imperfections, valuation of real property -principles and practices; private ownership and social control of land; disposal of land; land development charges and betterment levy; land use restrictions, compensation and requisition taxation of capital gain on land versus public ownerships, economic aspects of land policies at various levels of decision making.	L1, L2	10
<b>MODULE 3: Factors Influencing Locational Decisions</b> Analysis of location of specific uses like residential, industrial, commercial and institutional in the light of location theories in intra-regional and inter-regional context; Techniques of cost benefit analysis of urban development programme.	L4	8
<b>MODULE 4: Case Studies</b> Case studies of real estate development in public, private, partnership sectors; Real estate as a facilitator of development; Development of real estate as a tool for controlling land and property prices; Transaction and renting of real estate, Lease deeds/ sale deeds, sale documents, registration; Mortgage and pledging.	L1, L2	8

	<b>PLANNING AND MANAGEMENT OF UTILITIES AND SERVICES (PLN2502)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Housing and Community Planning					
Co-requisites	Planning and Design Lab – V (Area Planning)					

### Catalog Description

This course gives a detailed information regarding planning and management of water supply, storm water, sewer, sanitation and solid waste management.

### Course Objectives

The objectives of this course are

- To introduce basics of Utilities and Services Planning
- To give exposure to Innovative Techniques for provision of Water Supply, Waste Water Treatment, Storm Water Management, Sanitation and Solid Waste Management, etc.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the role of planner in the management of services and utilities while assessing the storm water through proper layout design.

**CO2:** Demonstrate the importance of water and planning and management of water supply system.

**CO3:** Describe the need of planning as per demand and low-cost measure to tackle the sanitation issues

**CO4:** Review CPHEEO guidelines and explain the process of solid waste management including calculation of waste generation and area required for solid waste disposal.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to basic concepts and Storm Water System</b>	L1, L2,	10

<p>Role of physical planner in planning of utilities and services, objectives of utilities and services planning and its implications for public health and environmental protection. Urban water cycle; Types precipitation, measurement of precipitation, intensity-duration-frequency relationships, rainfall formula, rainfall maps, significance of interpretation and presentation of rain fall data; Surface water runoff, hydrograph, measurement of discharge for small and big rivers, rational method for estimating run off, unit hydrograph and its application, definition of watershed; Flood frequencies, flood protection measures in urban areas. Estimating storm run-off, run-off coefficient, rainfall intensity, time of concentration; Gravity flow, hydraulic gradient line, Manning's formula and nomographs, full flow and partial flow; layout and design of stormwater system; General considerations, inlets, self cleansing velocity, non-scouring velocity, physical layout-design principles, data requirement; hydraulic design of storm water system and computation procedure.</p>	L3	
<p><b>MODULE 2: Water Supply Systems</b></p> <p>Surface and ground water sources, quality and quantity, location of sources and water intakes, area requirements of the components of water intakes; Water requirement for different land uses, factors affecting water demand, per capita requirement and its relationship with population sizes, variation of water consumption; seasonal &amp; hourly, peak factor; demand of water for fire fighting; Water treatment system, location and space requirements; Components of water distribution systems, water storage location, capacity, fire fighting components, fire hydrants location, spacing, pressure requirement in pipe; Pumps types, efficiency, head loss, pump selection criteria, site selection and space requirements for pump house; Planning of water supply system, organizations and their jurisdictions, basic design guide line and layout of water supply distribution system; Financing water supply system, public and private partnership of providing water; Legal aspects and government policy for urban and rural water supply. Case study discussion on innovative methods and successful urban water supply system; Significance and methods and advantages of water harvesting system Design of water harvesting systems; Government initiatives for water harvesting system and case study discussion.</p>	L1, L2, L3	9
<p><b>MODULE 3: Sanitation and Sewer Systems</b></p> <p>Methods of sanitation, advantages and limitations; On-site detention, design procedure for on-site detention, Off-site and on-site technology up gradation; Low cost appropriate technologies for sanitation; Quantity of sewage, standards for Indian cities; Sanitary sewer system network and layout, data needs and procedure of planning; Sewer appurtenances; sewer lift station, sewer pumping and forced main manholes; Sewage disposal methods and their advantages and disadvantages, location criteria and capacity; Case study of innovative approaches of sewage disposal in urban area; Approaches for financing and cost recovery for sewer system.</p>	L1, L2, L3	8
<p><b>MODULE 4: Solid Waste Management</b></p> <p>Solid waste management for Indian cities, issues and database, quantity of solid waste and its character; Methods of solid waste management's, collection and transportation, disposal of solid waste; Land filling and composting, pre and post treatment; Indore and Bangalore methods, incineration, pyrolysis and recycling park; Area requirements, location and cost aspects of different methods of solid waste disposal systems; Community participation and involvement of Non- Governmental Organizations or NGOs in efficient</p>	L1, L2, L3	9

solid wastemanagement. Familiarizing toCPHEEO manual and guidance.		
--	--	--

	<b>PLANNING LEGISLATION (PLN2503)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Planning Practice - I					
Co-requisites	Real Estate Planning and Management					

### Catalog Description

This course gives a detail idea of evolution, preparation and implementation of different legal aspects in Planning. This course helps gaining the understanding on issues and problems occurring in various transactions and make ways to resolve the issues and encouraging entire urban and regional development. Also, the course focuses on professional ethics and practices to be followed in planning profession.

### Course Objectives

The objectives of this course are

- To understand the basic Concept of Law and Indian Constitution.
- To understand the Roles, Responsibilities of various Plan Preparation and Implementation Authorities / Agencies.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the basic concept and need of law related to planning

**CO2:** Describe the different acts and laws enlisted in Indian constitution with respect to Planning.

**CO3:** Describe the need of acts relevant to planning and development and assess the legal aspect of land acquisition and related case studies.

**CO4:** Assess the role of different local and regional bodies responsible for plan implementation.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Concept of Law</b> Sources of law (custom, legislation and precedent); meaning of the term of	L1, L2	8

law, legislation, ordinance, bill, act, regulations and bye-laws; significance of law and its relationship to planning; benefits of statutory backing for planning schemes; eminent domain and police powers.		
<b>MODULE 2: Indian Constitution</b> Concepts and contents of Indian Constitution; provisions regarding property rights; evolution of planning legislation and overview of legal tools connected with urban planning and development; model town planning laws.	L1, L2,	7
<b>MODULE 3: Laws and Acts for Planning and Development</b> Introduction, scope and relevance of various laws and acts relevant to planning; Model Town and Country Planning Acts, Development Authorities Act, Municipal Acts, Environmental and Pollution Control Acts, etc.; Land Acquisition Act, 1984, Historical background, need, advantages, limitations; Relevance in today's context; Case studies highlighting nature of contention, parties in dispute and the decisions in specific planning dispute.	L1, L2, L3, L4	12
<b>MODULE 4: Organizations for Plan Implementation</b> Special purpose bodies for plan implementation such urban / metropolitan development authorities, improvement trusts, water and sewerage boards, housing boards, slum improvement / clearance boards, transport undertakings; regional development boards.	L1, L2	9

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	<b>PLANNING AND DESIGN LAB - V (AREA PLANNING) (PLN2507)</b>	L	T	S	P	C
Version 1.1		0	0	8	0	8
Pre-requisites/Exposure	Fundamentals of Urban and Regional Planning, Planning and Management of Utilities and Services					
Co-requisites	Geo-Informatics for Planning					

### Catalog Description

The overall main objective of this course is area development plan with case study of particular area. In this course, students will learn the different types of plan and its approaches particularly in Indian context. Students will develop the survey techniques for data collection and do the analysis of data collected from the various sources and plan to develop the area.

### Course Objectives

The objectives of this course are

- To study plan preparation and its relationship of higher order plan with lower order plans such as Master Plan with Zonal Plan and Area Plan.
- To develop the lower order plan within the framework of Master Plan.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Describe the different approaches in plan making; the concepts of master plan, comprehensive development plan - the structure plan, the sector plan, the area/ zonal plan, and other types of plan making processes and relationship among plans.

**CO2:** Evaluate a master plan, zonal plan or any area plan.

**CO3:** Use the relevant planning standards for different land uses for area planning.

**CO4:** Prepare methodology and collect data for site planning such as land use survey, household's survey etc., and analyze the data for area plan.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Approaches to Plan Making and Relationship among Plans</b>	L1, L2	16

The different approaches to plan making; the concepts of master plan, comprehensive development plan - the structure plan, the sector plan, the area/zonal plan, and other types of plan making processes, Relationship of higher order plans with lower order plans		
<b>MODULE 2: Framework for Zonal Plans</b> The approach to developing the area/ zonal plan within the framework of Master Plan.	L2, L3, L4	15
<b>MODULE 3: Planning Standards</b> The study and development of the relevant planning standards for different land uses	L4, L5	15
<b>MODULE 4: Zonal Plans / Area Plans</b> Detailing of specific sites in the proposed Zonal Plans / Area Plans, covering different land uses.	L5, L6	50

*\*Bloom's Level:*

	<b>TRAINING SEMINAR – I (PLN2508)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1		0	0	0	0	2
Pre-requisites/Exposure	Planning and Design Lab – IV (Transportation Planning), Computer Aided Design (CAD) in Planning					
Co-requisites	Planning and Design Lab – V (Area Planning), Geo-Informatics for Planning					

### **Catalog Description**

Each student shall undertake Mandatory Training in a planning (or related) office during summer vacation between the Sixth and Seventh semester. The period of Training will be eight weeks. The exact period and place of training will be decided in consultation with the Co-ordinator-in-charge of training. The objective of Training is to expose the students to live planning projects and working environment at planning offices. The students are required to submit a ‘Satisfactory’ certificate from the relevant Planning Office after completion of training. The student will also submit a Report highlighting the Profile of the Planning Office, its organization, key work areas, etc; Introduction to the project(s) worked upon during training; planning brief; methods employed; and planning -design solutions / proposals. The students will also be required to present their work through drawings / visuals, power point presentations in the form of a Seminar to the faculty and students of the Department over the seventh semester, as per directions of the Co-ordinator-in-charge of training.

### **Course Objectives**

The objectives of this course are

- To understand the profile of the Planning Office / Planning Authority / Local Body / Planning Professional.
- To participate in a Live Project of Planning Office / Planning Authority / Local Body / Planning Professional

	<b>DISASTER RISK MANAGEMENT AND CLIMATE CHANGE ADAPTATIONS (PLN2509)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Ecology, Environment and Resource Development and Management					
Co-requisites	Planning and Design Lab – VII (Regional Planning)					

### **Catalog Description**

This course aims at developing a systematic understanding for identifying, assessing and reducing the risks of disaster. It helps in assessing physical, socio-economic and environmental vulnerabilities and mitigation mechanisms for various types of disasters. The course also aims at giving a general understanding of climate change and strategies for mitigating the effects of climate change.

### **Course Objectives**

The objectives of this course are

- To understand the basic concepts of disaster management.
- To understand disaster management mechanisms; disaster risk mitigation; and post disaster measures
- Explain the fundamentals of climate change science.
- Present the international climate change legal and policy framework and explain key issues under negotiation.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Explain the concepts, prevention strategies and post disaster management for various types of disasters.

**CO2:** Describe the role of government authorities and other organizations in disaster management

**CO3:** Explain the basic concepts of climate change science and analyse different climate change scenarios and their implications

**CO4:** Explain the importance and mechanisms of adaptation in preparing for and coping with climate change

Modules	Blooms level*	Number of hours
<b>MODULE 1: Basic Concepts of Disaster Management</b> Disaster –related terms, definitions, concepts; Types and classifications of disasters- causes and consequences; Overview of disasters across the world; Disaster management cycle, Phases of disasters; Disaster Vulnerability: physical vulnerability, socio-economic vulnerability, environmental vulnerability; Disaster Risk Mapping; Emergency phase of disasters; Disaster Rescue and Relief; Post disaster recovery and rebuilding process	L1, L2	9
<b>MODULE 2: Disaster Management Mechanisms</b> Recent initiatives at national and state level; Kyoto Framework of disaster mitigation and management; Disaster Management Act – national and states; Roles and Responsibilities of National Disaster Management Authority, State Disaster Management Authorities, District Disaster Management Authorities; Various role players in disaster management – NGOs / CBOs and Armed Forces; Community Based Disaster Preparedness (CBDP); Physical planning and disaster management plans; Applications of Remote sensing and GIS in disaster management.	L1, L2,	9
<b>MODULE 3: Introduction to Climate Change</b> Basics of climate change science; Concepts of climate and weather, greenhouse gas; Impact of climate change on surface temperature, precipitation, ocean pH, sea-level; Energy and climate change; Water and climate change; Soil and climate change; Landscape and climate change	L1, L2	9
<b>MODULE 4: Climate Change Adaptations</b> Introduction to the concept of climate change adaptation; Assessing climate vulnerability; Introduction to linkages between climate change adaptation and development; Important international adaptation initiatives and programmes; International climate change negotiations; The 4 United Nations Framework Convention on Climate Change (UNFCCC); The Kyoto Protocol and its associated bodies	L1, L2	9

\*Bloom's Level:

	<b>HOUSING AND COMMUNITY PLANNING (PLN2510)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Planning and Design Lab III					
Co-requisites	Settlement Sociology					

### **Catalogue Description**

The aim of this course is to introduce to the students to the theory and practice of specifications, estimation, and quantity surveying; along with its importance in the field of building construction. The procedure of writing specification document for materials, labour, budgets and; estimating the cost and time of construction works shall be covered. The preparation of bill of quantities, optimum resource consumptions and introduction to BIS and other standardized institutions is also a part of the course. Calculating the land value and building values; finding their depreciation values using various methods would also be elaborated in the curriculum of the subject.

### **Course Objectives**

The objectives of this course are

- To study the housing in National Development Goals; Equity and efficiency parameters of housing; Current issues in housing
- To study the housing development process in India – plan and policies / schemes etc
- To study the housing standard and design in India context

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Discuss the importance and usage of housing.

**CO2:** Describe the terms related to housing.

**CO3:** Describe housing processes in detail.

**CO4:** Describe the housing standards and policies in India.

Modules	Blooms level*	Number of hours
<b>Module I: Introduction and Assessing Housing</b> Significance of housing in National Development Goals; Equity and efficiency parameters of housing; Current issues in housing. Existing Housing Statistics; definitions; urban and rural housing statistics; Introduction to concepts of Housing Shortage, Housing Need, quantitative and qualitative aspects of housing; Housing Demand - Understanding current methods of demand assessment; Knowledge of data sources and their use and interpretation; census, NSSO and other data; Limitations of existing methods of assessments.	L1, L2	8
<b>Module II: Housing Development Process</b> Understanding of factors affecting residential location, theoretical knowledge of ecological, neoclassical, institutional approach to housing; Housing subsystems and their characteristics: formal and non-formal housing; Process of Public and private sector housing development process; policy context, actors and their interrelationships; Inner city housing, Slums, Squatter housing, Unauthorized Housing; Role of different institutions in housing; International agencies, NGOs, State, Financing Organizations, Private developers, co-operatives.	L3	10
<b>Module III: Housing Standards and Design</b> Factors determining residential densities; Densities, costs and development control regulations; Housing designs parameters and their relationship to costs; Housing design and climate; Housing for disaster prone areas. Communities; its characteristics and housing; socio-economic implication of slums, clearance/ improvement of slum; sites and services schemes, squatter upgrading, incremental approach.	L1, L2	8
<b>Module IV: Housing Policy Analyses</b> Understanding and evaluation of Housing Policy and programmes in India; five year plans, Central government policy; Policy framework for urban and rural housing; Comparative policy analysis; Housing for the low income groups; Co-operative housing, objectives and principles; management and financing of housing projects; investment in housing in public and private sectors.	L1, L2	10

*\*Bloom's Level:*

	<b>ECOLOGY, ENVIRONMENT AND RESOURCE DEVELOPMENT AND MANAGEMENT (PLN2511)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Environmental Studies-I, Applied Geology and Hydrology					
Co-requisites	Settlement Sociology					

### **Catalogue Description**

The aim of this course is to provide exposure to the students to basic concepts of ecology, ecosystems, environment and Resource Development. This course will enable the students a thorough understanding of all the theories and definitions of terms relating to ecology and environment in planning and their usage in urban and regional planning. The students will know about the impact of development on environment and its significance in planning.

### **Course Objectives**

The objectives of this course are

- To understand various types of components in Ecology, Environment.
- To the role of Ecology and Environment for the resource development and management.
- To enhance the knowledge for EIA. (Environment Impact Assessment)

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Define the meaning and scope of ecology and identification of ecological parameters for planning at different levels.

**CO2:** Understand the ecosystem and its relevance to environment in planning.

**CO3:** Understand the concept of environmental impact assessment and its role in planning and development.

**CO4:** Learn the various environmental policies in planning.

Modules	Blooms level*	Number of hours
<b>Module 1: Introduction</b> Meaning and scope of ecology; evolution of ecology; man, environment and ecosystem; components of nature and basic concepts and processes of ecology; identification of ecological parameters for planning at different levels; site planning, settlement planning and regional planning; data needs and format for data collection; types of analysis required to evolve ecological parameters.; Environmental zones.	L1, L2, L3	8
<b>Module 2: Ecosystem and its Relevance to Environment</b> Resources and human settlements impact of advanced agricultural methods, urbanization and industrialization on nature; urban ecosystem approach evolution and significance; soil, water, land, vegetation and solar, biomass, wind, hydro energy resources; settlement planning and energy conservation; development and management. Introduction to quantitative ecology	L1, L2, L3	9
<b>Module 3: Environmental Impact Studies</b> Planning for environmentally sensitive areas, EIA - meaning, significance and framework; Methodologies - checklist, matrices, network and social cost-benefit analysis; sources and acquisition of environmental information; Environmental land use classification; Environment impact studies of development projects.	L1, L2, L3	9
<b>Module 4: Environmental Policies</b> Global and national policies on environment; Five year plans in relation to environmental aspects; Legal measure for protection of environment; Environmental awareness and education in India; Agencies involved in environment protection; Public participation; Role of planners in shaping the future environment.	L1, L2, L3	10

	<b>COMMUNITY PARTICIPATION IN PLANNING PROCESS (PLN2512) (ELECTIVE)</b>	L	T	S	P	C
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Settlement Sociology					
Co-requisites	Planning and Design Lab -V					

### **Catalog Description**

The aim of this course is to offer assessment of communities, their crucial role in planning process and successful implementation. This particular subject will be very useful for learning techniques of primary data collection for planning studio exercises. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be inculcating students with the capabilities of effective community interaction and getting their support in data collection. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course, students will be working with small communities either urban or rural, conducting participatory meetings with them and formulating a small project with the help of community participation. Finally, students will demonstrate project to the concerned faculties, participatory community and other key stakeholders. They will be able to choose and apply the most effective PRA techniques for data collection. They will incorporate and utilise important insights provided by the local communities in plan formulation. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objectives of this course are

1. To grasp effective role of community participation in planning process.
2. To analyze contribution of community in successful plan implementation.

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Apply community participation techniques during field visits for primary data collection.

**CO2:** Collect sufficient and significant data for panning studio research.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Concept and Techniques of Community Participation</b> Definitions and diverse dimensions of communities; Understanding concept of social inclusion and participatory planning process, Techniques of effective communication and engaging communities in planning process; Role of community based organisations in participatory planning such as NGOs, Residents welfare associations (RWA), Self-help groups (SHG), Gram-panchayat; Techniques of conducting Participatory Rural Appraisal (PRA).	L3, L4 L5	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L3, L4, L5	24

Pre-requisites/Exposure	Planning and Design Lab I, Planning and Design Lab II					
Co-requisites	Planning and Design Lab V					

### **Catalog Description**

The aim of this course is to offer opportunities and skillset in effective infographics and storytelling techniques. This particular subject will be greatly useful in planning and producing effective studio sheets. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will evolving rationale thinking capabilities of the students with respect to delivering students' findings/insights and the best presentation method. The course would be conducted through literature survey, case studies, and hands on exercises with available infographic software in the university. During the course, students will be working in interdisciplinary groups. In this course, students will discuss how to incorporate a story in their presentation to help them capture the attention of the audience. They will be able to choose and apply the most effective analytical method for delivering their insights/ideas. They will incorporate data visualization best practices and use tips and tricks when presenting at various platforms to decision makers and stakeholders.

### **Course Objectives**

The objectives of this course are

- To equip students with effective utilization of infographic techniques.
- To demonstrate effective presentation skills and deliver insights

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Apply story telling techniques in planning studio presentations.

**CO2:** Synthesize research findings and develop effective insights

Modules	Blooms level*	Number of hours
<b>MODULE 1: Synthesizing the Findings and Deriving the Insights</b> Synthesizing findings of student research and derive valid/actionable insights, Finding story in the data, Shaping it to contribute to a compelling research presentation, Providing actionable comparisons, Weighing the pros and cons, Deriving insights to address a problem/problems, Methods for developing research-based recommendations, testing and refining ideas. Techniques of reviewing the essential sections of various reports, designing visualizations of data, Understanding the requisite for targeting specific audience, Applying storytelling strategies, Recognize the drawbacks of poor data visualization.	L3, L4 L5	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

	<b>ECO-TOURISM (PLN2514) (ELECTIVE)</b>	L	T	S	P	C
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Disaster Risk Management and Climate Change Adaptation					
Co-requisites	Planning and Design Lab V					

### **Catalog Description**

The aim of this course is to offer the principles of planning for eco-tourism in the context of sustainable tourism development. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course is getting the insights of relationships between tourism and environment, tourism and urban development, tourism and economic development. In this course, students will be able to grasp planning requirements for developing sustainable eco-tourism hubs and circuits. They will be able to incorporate community needs and sustainable eco-tourism requirements in planning process. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objectives of this course are

1. To apply planning strategies and tools with reference to sustainable tourism development.
2. To grasp the role of public and private sector as well as community participation in eco-tourism planning and development

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Apply concept of eco-tourism for sustainable tourism development.

**CO2:** Identify and plan eco-tourism hubs and circuits.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction and Planning for Eco-Tourism</b> Definitions, scope, nature, key determinants, characteristics; problems and prospects of eco-tourism; eco-tourism hubs in India; impacts of eco-tourism in developed and developing regions; relationship between tourism and urban development, relationship between tourism and economic development, relationship between tourism and environment; concept of carrying capacity and its significance in eco-tourism. Circuit identification and destination planning; assessment of infrastructure requirement for eco-tourism planning; analysing tourism impacts in transforming local livelihood and lifestyle; role of Government institutions and agencies in eco-tourism development.	L3, L4 L5	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

## Syllabus - Sixth Semester

	<b>URBAN MANAGEMENT I (PLN2601)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Planning Legislation, Planning Practice - I					
Co-requisites	Planning and Management of Informal Sector					

### Catalog Description

The aim of this course is to study Management and Financing of Urban Development. This course explores important substantive areas and concepts in the field of urban management and current urban planning and policy issues and debate. This course will provide the knowledge needed for value based management of spatial transformation process, it comprises, every aspects of a city in terms of economic, Environmental, social and infrastructure of an urban area.

### Course Objectives

The objectives of this course are

1. To understand the importance of Management of Urban Development
2. To study the role of Private Sector in Urban Development and explore the various sources of Financing Urban Development

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Describe the role of management in Urban Development.

**CO2:** Identify the different urban local bodies at different levels in India and describe their functions, powers and organizational structure etc.

**CO3:** Identify the role of NGO's and private organizations in urban development.

**CO4:** Identify the sources for financing urban development project.

Modules	Blooms level*	Number of hours
<b>Module 1: Role of Management in Urban Development</b> Definition, objectives and scope of management; Role of management in developing economy; Meaning and theory of organization; Urban development as a decision making process and a corporate activity; Application of management techniques in urban planning and development.	L1, L2	6
<b>Module 2: Urban Developments in India and organizations for Urban Development</b> Urban development in India: problems and issues, policies, programmes and provisions in the national five year plans; processes of decision making for urban development at national, regional, state, district and local levels. Various national, state, regional, district and local level organizations involved in urban development and management in India, their background, functions, powers, organization structure and resources; Case studies.	L1, L2	11
<b>Module 3: Urban Developments and Public/ Private Sector</b> Urban development bodies; urban development authorities: background, functions, powers, organization structure and resources, Case studies; Role of NGOs and private organizations in urban development, relationships with local and state governments.	L4	9
<b>Module 4: Financing Urban Development</b> Financing urban development projects; Sources of funding: cost recovery, cost subsidization, medium and long term financing; Private investments in urban development projects: prospects and limitations; Municipal financing: sources of revenue and items of expenditure; Financial resource mobilization for urban development particularly for municipal/ local bodies.	L1, L2	10

	<b>URBAN RENEWAL AND CONSERVATION (PLN2602)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Landscape Planning and Design					
Co-requisites	Introduction to Urban Design					

### **Catalogue Description**

The aim of this course is to make students familiar with, how an urban area degrades over a period of time as well as available infrastructure facilities. Also, they will learn about various schemes initiated by Centre and State government for renewal and conservation in urban areas. Economic and social aspects of conservation, traffic and management issues etc are one of the major learning of this course.

### **Course Objectives**

The objectives of this course are

- To introduce the basic concepts of conservation.
- To make them understand about the process of urban renewal and conservation of historically important monuments.
- To get knowledge about slum clearance and improvement schemes.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Discuss scope and basic technique of urban conservation.

**CO2:** Describe Economic implications of urban renewal programs and social aspects of conservation?

**CO3:** Discuss several government schemes on Slums and their critical evaluation.

**CO4:** How National and international experiences are important for implementing urban renewal programs.

Modules	Blooms level*	Number of hours
<b>Module 1: Introduction</b> Overview and introduction of the basic concepts of conservation; values, attitudes and principles for judging the conservation importance of sites, areas and related typology; scope and basic technique of urban conservation; Urban renewal as apart of metropolitan plan; identification of urban renewal areas; conservation, rehabilitation and redevelopment urban renewal policies and strategies, JNNURM.	L1, L2	10
<b>Module 2: Economic, Financial and Management Aspects and Conservation</b> Economic and social aspects of conservation, Economic and spatial implications of urban renewal programs, mobilization of resources; incentive zoning - management of urban renewal areas, traffic and management issues; ; Conservation policies - case studies.	L1, L2, L3	10
<b>Module 3: Slums</b> Clearance and improvement schemes, planning aspects, land management, social economic issues, public participation, government schemes and their critical evaluation.	L3, L4	8
<b>Module 4: Legal and Administrative Aspects</b> National and international experience in implementing urban renewal programs; Legal and administrative aspects, archaeological acts/ charters pertaining to conservation, development and conservation; Case studies of proposals for urban conservation of sites/ areas in India and abroad.	L3, L4	8

\*Bloom's Level:

L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>INTRODUCTION TO URBAN DESIGN (PLN2604)</b>					L	T	S	P	C
Version 1.1						3	0	0	0	3
Pre-requisites/Exposure	Sustainable Urban Development									
Co-requisites	Urban Renewal and Conservation									

### Catalogue Description

The aim of this course is to make students understand urban design theories and its elements. This course will also help them to learn how to organize any spaces and their articulation in the form of squares, streets, vistas and focal points.

### Course Objectives

The objectives of this course are

- To understand the basic difference between urban planning and urban design.
- To learn to organize any spaces and their articulation in the form of squares, streets, vistas and focal points.
- To have an introduction of urban design theories, Concepts and Contemporary practices

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Discuss the Study of volumes and open spaces at all spatial levels

**CO2:** Explain the basic concepts of “Image of the City”

**CO3:** Discuss any Case study of urban design characteristics of cities in India or abroad.

**CO4:** Identify agencies which are responsible for ensuring better urban design, their roles, powers and describe bylaws, policies and special rules required for heritage and hill areas development.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Urban Design Theory</b> Urban design as interface between architecture and planning. City as a three dimensional entity; Study of volumes and open spaces at all spatial levels; A brief historic review of the development of the urban design discipline and principles.	L1,L2	8
<b>MODULE 2: Elements of Urban Design</b> Urban form as determined by inter – play of masses, voids, building typology; scale, harmony, symmetry, color, texture, light and shade,; dominance, height, urban signage and graphics; organization of spaces and their articulation in the form of squares, streets, vistas and focal points; image of the city and its components such as edges, paths, landmarks, street features, sky – line, etc,; urban transportation.	L1, L2	8
<b>Module 3: Physical and Non – Physical Determinants of Urban Forms</b> Activity and the morphology of places; form, size and structure of cities and the related geometry co – related with their determinants; case studies of urban design characteristics of cities in India and abroad; related issues for public intervention.	L1,L2	9
<b>Module 4: Control of Urban Design and Contemporary Practices</b> Urban design and its control; Control of visual pollution; Agencies responsible for ensuring better urban design, their roles, powers and limitations. Townscape policies, building byelaws and regulations for existing and emerging areas of development; Special rules for heritage and hill areas.	L3,L4	11

	<b>PLANNING AND MANAGEMENT OF INFORMAL SECTORS (PLN2605)</b>					L	T	S	P	C
Version 1.1						3	0	0	0	3
Pre-requisites/Exposure	Planning and Design Lab – V (Area Planning)									
Co-requisites	GIS for Planning, Planning and Design Lab – VI (Urban Development Plan)									

### Catalog Description

The aim of this course is to study the problems and issues of urban informal sector along with its planning and management. The course provides an overview of different dimensions of urban poverty, concept of basic needs, various approaches for delivery of basic services to the urban poor. Student will be able to learn design layout for infrastructure services and amenities for urban poor and their implication in physical planning. The course also deals with the migratory impulses and factors behind spontaneous living and working in urban context.

### Course Objectives

The objectives of this course are

- To study the concept and dimensions of urban poverty.
- To study migratory impulses and impact on informal sector.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain various dimensions of poverty and urban poverty alleviation programmes.

**CO2:** Identify basic needs of poor and their provision for target groups and discuss community planning and institutional approach for delivery of basic services to urban poor.

**CO3:** Explain the characteristics of migrants and assess their association with growth of informal sector.

**CO4:** Describe planning and development of urban settlements in respect of the spontaneous growth.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Urban Poverty</b> Dimensions of urban poverty, magnitude of problem, urban poverty alleviation programmes, impact of macro-economic structural adjustment policies on poor urban households.	L1, L2	5
<b>MODULE 2: Basic Needs and alternative approaches for Delivery of Basic Services to Urban Poor</b> Development of the concept of basic needs; identification of basic needs and their provision for various target groups and informal sectors; standards for basic needs, NGO's and voluntary organizations associated with provision of basic needs. Community planning approach, low cost alternatives and institutional reforms approach.	L1, L2, L3	8
<b>MODULE 3: Migratory Impulses and Impact on Informal Sector</b> Characteristics of migrants and their association with growth of informal sector; socio-economic deprivation and informal sector; development of informal sector concept; Role of informal sector in housing stock, economy, commercial activities, etc.; Implications in physical planning.	L1, L2	6
<b>MODULE 4: Consequences of Spontaneous Growth</b> Study of major aspects; spontaneous living and working, their characteristics and functions in urban context, actions for improvement; appraisal of the role of government, private and voluntary organizations; existing management; their organizational set-up and limitations; planning and development of urban settlements in respect of the spontaneous growth; case studies from India and other developing countries.	L1, L2, L4	5

*\*Bloom's Level:*

Version 1.1		0	0	8	0	8
Pre-requisites/Exposure	Planning and Design Lab – V (Area Planning), Sustainable Urban Development					
Co-requisites	GIS for Planning, Urban Management - I					

### **Catalog Description**

The aim of this course is to impart knowledge and Hands-on Skills for Conducting various Field Surveys; Analysis Data and preparation of Urban Development Plans. This course will also focus on various types and hierarchy of Urban Plans, their Characteristics and Contents. It will also help students to evolve Development Policies; Land Use Plan, priorities and Implementation Mechanism for a selected Urban Area.

### **Course Objectives**

The objectives of this course are

- To introduce different parameters of UDP.
- To collect necessary data from their field visit and surveys.
- To use different methods to conduct survey and also to learn different ways to do data analysis.
- To have a different perception and understanding to how local people are approaching development plan.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Describe the contents of various types of development plans and prepare questionnaire required for Urban Development plan preparation.

**CO2:** Conduct the survey and collect data from their respective sectors.

**CO3:** Evaluate the area based on the data collected

**CO4:** Propose the policy based guidelines and recommendation for further development.

Modules	Blooms level*	Number of hours
<b>Module 1: Studying Development Plans and Gathering Secondary Source Information for a Selected City</b> The study shall involve understanding of contents of various types of development plans and explore their foci; Identification and preparation of secondary source information of the towns or cities selected for the study.	L1, L2	21
<b>Module 2: Organization of Field Surveys</b> Visit to the case study area, collection of primary and secondary data and information on various aspects such as demography, social, economic, housing, transportation, etc.; conduct of primary and secondary surveys.	L2, L3, L4	15
<b>Module3: Analysis and Synthesis</b> Analysis and synthesis of data and information collected on various aspects; projections of population and workforce; trends and issues identification.	L4, L5	40
<b>Module 4: Plan, Policies and Proposals</b> Preparation of policies and proposals with different scenarios and identification of priorities and action areas; phasing and monitoring; governance structures for implementation; land use plan and the plan document.	L5, L6	20

	<b>METROPOLITAN PLANNING, DEVELOPMENT AND MANAGEMENT (PLN2608)</b>						L	T	S	P	C
Version 1.1							3	0	0	0	3
Pre-requisites/Exposure	Introduction to Regional Planning										
Co-requisites	Planning and Design Lab – VII (Regional Planning)										

### Catalog Description

The Course deals about the development of a region because a city can't flourish its own. The course gives the understanding to study the characteristics of a region, nature, components and spatial patterns. It also discusses about the tools and constraints in the implementation of metropolitan development plan in terms of administration, legal and financial aspects.

### Course Objectives

The objectives of this course are

- To understand the Process of Metropolitanisation and Evolution of Metropolitan Cities and their respective Regions using Case Studies.
- To introduce the Techniques of Delineation of Metropolitan Regions and study their Structure, Form and Characteristics with the help of Case Studies

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the concept of Metropolitanisation and its regional structures

**CO2:** Explain the Forms and concepts for metropolitan planning and development.

**CO3:** Identify the different hierarchy of growth poles and growth centres in regional planning.

**CO4:** Explain the need of special planning for special regions through different case studies

Modules	Blooms level*	Number of hours
<b>MODULE 1: Metropolis and its Region</b> Introduction to metropolis and related concepts, growth and scale; Complexities: social, economic, physical and administrative; Metropolitanisation in India: general trends and distribution; Issues and problems in metropolitan planning and development. Service area of a metropolis; Metropolis as a primate city; Metropolitan region and delineation techniques; Metropolitan regional structures: characteristics, components and spatial patterns	L1, L2	11
<b>MODULE 2: Forms</b> Metropolitan centralization and decentralization processes; Concepts of ring and satellite towns, counter-magnets; Forms and concepts for metropolitan planning and development: Sheet, Galaxy, Core, Star, Ring and Multi-nucleated; Merits and demerits; Efficient functioning of metropolis	L1, L2	8
<b>MODULE 3: Metropolitan Planning, Development and Management Strategy</b> Metropolitan planning: spatial planning studies and surveys; Concepts and techniques of preparation of metropolitan city plans; Metropolitan planning, development and management strategies at regional and settlement levels; Tools and constraints in the implementation of metropolitan development plan in terms of administration, legal and financial aspects; Role and function of public participation.	L1, L2	9
<b>MODULE 4: Case Studies in Metropolitan Planning and Development</b> Metropolitan planning, development and management in India; Appraisal of planning and development efforts in case of some of the metropolises, viz. Kolkata, Mumbai, Delhi and Chennai, etc	L1, L2	8

\*Bloom's Level:

L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>REGIONAL PLANNING AND MANAGEMENT (PLN2609)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Fundamentals of Urban and Regional Planning					
Co-requisites	Planning and Design Lab – VII (Regional Planning), Metropolitan Planning, Development and Management					

### **Catalog Description**

The aim of this course is to study the concepts, characteristics and process of regional planning. This course gives a detail idea of evolution, preparation and implementation of regional planning in India. A regional plan takes into account the economic, spatial and environmental goals and tries to address national level issues. It mainly focuses on resources management and economic development of a region for its balanced growth. This course also has some case study of how regional plans were prepared and what was the need behind the preparation of regional planning.

### **Course Objectives**

The objectives of this course are

- Understand Regionalization and Growth of Regions and study their Nature, Types and Structure using Case Studies
- Identify Regional Planning Process through different case studies.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Explain the contribution of regional development in regional economy

**CO2:** Describe the different scopes of regional plans at district level, state level, sub-national level and national level.

**CO3:** Identify the different hierarchy of growth poles and growth centres in regional planning.

**CO4:** Explain the need of special planning for special regions through different case studies

Modules	Blooms level*	Number of hours
<b>MODULE 1: Regional Planning and Developments</b> Concept of regional planning: nature, objectives, levels and aims; Concept of a region, types, and regionalization, Regional Networks; Regional development; Balanced and unbalanced development; Under-development; Regional multiplier, input-output model; Core-periphery model; Growth poles and centers	L1, L2	6
<b>MODULE 2: Planning Processes</b> Regional planning processes: Identification of plan objectives; collection, classification and analysis of data; Norms and standards for regional planning; Formulation of alternative plan proposals with respect to population distribution, location of new regional economic activities, infrastructure, plan implementation, etc. Case studies.	L1, L2	6
<b>MODULE 3: Introduction to Rural Development</b> Meaning, nature and scope of development; Nature of rural society in India; Hierarchy of Rural settlements; Social, economic and ecological constraints for rural development, Three tier system of rural local Government; Need and scope for people's participation and <i>Panchayati Raj</i> , 73rd Constitution Amendment Act, including - XI schedule, devolution of powers, functions and finance; <i>Panchayati Raj</i> institutions - organizational linkages; Institutionalization; resource mapping, resource mobilization including social mobilization; Information Technology and rural planning	L1, L2, L3	6
<b>MODULE 4: Rural Development Initiatives in Five Year Plans</b> Five Year Plans and Rural Development; Planning process at National, State, Regional and District levels; Planning, development, implementing and monitoring organizations and agencies; Urban and rural interface- integrated approach and local plans; Development initiatives and their convergence; Special component plan and sub-plan for the weaker section; Data base for local planning; Need for decentralized planning; Sustainable rural development.	L1, L2	6

\*Bloom's Level:

	<b>SPECIAL AREA PLANNING (PLN2610) (ELECTIVE)</b>	L	T	S	P	C
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Introduction to Regional Planning					
Co-requisites	Metropolitan Planning, Development and Management					

### **Catalog Description**

The aim of this course is to introduce the students to various Special Areas with their specific planning needs and priorities and the implication on development in these areas. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be on studying the need and process required for special area planning. This course will provide the students hands-on experience Special area that required a different planning process in a built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objectives of this course are

- To understand the need of special area planning in Indian context.
- To familiarize students with planning process required for special area.
- To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Understand the need and legislation required for special area planning

**CO2:** Prepare the detail report and presentation on a given project related to Special area planning.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to SAP and its Management</b> Special Areas under consideration would include Formal and Functional Regions (Hill Areas, Coastal Areas, Desert Areas, Special Economic Zones, Port City, Aerotropolis, Medi-City, Knowledge City etc.), Types of special areas and their defining characteristics, Legislations and norms for Special Area Development in the Indian context, Capital investment and funding methods, public private partnerships in development process, Governance and Management aspects, Case Studies of various typologies of Special Area Development Plans in Indian and international context.	L1, L2	24
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

*\*Bloom's Level:*

	<b>APPLICATION OF SPSS IN PLANNING (PLN2611) (ELECTIVE)</b>	L	T	S	P	C
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	-					
Co-requisites	Planning and Design Lab - VI					

### Catalog Description

The aim of this course is to introduce the students to learn the SPSS (Statistical package for the social sciences). It is a set of software programs that are combined together in a single package. The basic application of this program is to analyze scientific data related with the social science. This data can be used for market research, surveys, data mining, etc. The importance of SPSS is that students can import data from other sources, when data is organized as a database, including Excel. Importing an Excel spreadsheet to SPSS for the data analysis is a fairly simple process, requiring some preparation and a few basic steps. This course of learning is mainly Statistical software allows researchers to avoid routine mathematical mistakes and produce accurate figures in their research if they input all data correctly. This course is to learn the practical knowledge base on the theory and also students must able to operate this software.

### Course Objectives

The objectives of this course are

- To understand the SPSS features for Data Analysis base on the theory knowledge
- To familiarize the SPSS in order to perform this SPSS software for data analyze to produce the summary statistics and chart.

- To learn the statistical tests (means, T Test, One way ANOVA, non parametric tests and normality test), correlation and regression, multiple analysis such as factor and cluster analysis

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** understand the SPSS software and able to operate for data analyze

**CO2:** exercise in testing such as the statistical tests (means, T Test, One way ANOVA, non parametric tests and normality test), correlation and regression, multiple analysis such as factor and cluster analysis through the SPSS knowledge

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to SPSS software and its application for planning</b> Introduction of SPSS, Data Analysis with SPSS. General Description and Function of SPSS, SPSS file Management; Input and data cleaning, definition variable, manual input of data, Automated input of data and file import; Data Manipulation such as Data Transformation, Syntax files and scripts and Output management; Statistical Tests- Means, T Test, One-way ANOVA, Non parametric Tests and Normality Test, Correlation and regression-Linear correlation and regression and multiple regression (linear).	L1, L2	24
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation*

	URBAN DESIGN AND LANDSCAPE (PLN2612) (ELECTIVE)					L	T	S	P	C
Version 1.1						0	0	3	0	3
Pre-requisites/Exposure	Introduction to Urban Design									
Co-requisites	Planning and Design Lab -VI									

### Catalog Description

The aim of this course is to introduce the students to learn the urban design. It is the design of towns and cities, streets and spaces, collaborative and multi-disciplinary process of shaping the physical setting for life in cities, towns and villages, the art of making places, design in an urban context. This course is to learn the quality of urban design - creates safe, attractive and secure pathways and links between centres, landmarks and neighbourhoods, facilitates green networks that link public and private open space, places a high priority on walking, cycling and public transport. During the course the students will be able work on live projects in groups which are preferably interdisciplinary of architect, planner engineer etc.

### Course Objectives

The objectives of this course are

- To learn the shape and form public and communal spaces. Its realm is anything and everything outside of your private living spaces.
- To create an attractive harbour front with high quality development in a luxuriant landscape setting and To create a vibrant harbour front with a mix of uses and diverse activities
- To ensure a sustainable design and greening and to create a harmonious visual and physical relationship with the ridgeline, harbour setting and the CBD

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Understand the concept, challenges and solutions for Urban Design and Landscape

**CO2:** Students should be able to work on Urban design and landscape in shape and form public and communal spaces and create an attractive harbour front with high quality development in a luxuriant landscape setting and To create a vibrant harbour front with a mix of uses and diverse activities

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Urban Design and Landscape</b> Urban History and Development Theories, Urban Design Methodologies, Digital Skills for Urban Design and Landscape, Research Methodology, Site Planning, Case Studies of Urban Design and Landscape in Indian and international context.	L1, L2	24
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation*

## Syllabus - Seventh Semester

	<b>URBAN GOVERNANCE (PLN2702)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Planning Legislation, Urban Management – I					
Co-requisites	Urban Finance					

### Catalog Description

The course intends to create awareness amongst the students to the concept and meaning of governance and government, stating its evolution in history since the British rule in India. The course deals with the changes brought about due to urbanization and role of governance in urban management. The course aims in enlightening the students regarding a transparent governing system and the need for collaborative public participation.

### Course Objectives

The objectives of this course are

- To understand the Significance of Governance in Urban Development
- To ascertain the Role of Governance in view of 74th Constitutions Amendment Act, 1992

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the concept and meaning of governance and government, stating its evolution, transparent governing system and need for collaborative public participation.

**CO2:** Describe the evolution of development and management systems at the National, state and local levels

**CO3:** Explain the concepts of urbanization and the system deficiencies resulting in urban poverty and exclusion from planning processes

**CO4:** Describe the 74th Constitution Amendment Act, including - XII schedule, decentralization of powers and functions

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Urban Governance</b> Meaning of governance and government; Scope of governance, evolution of concept of governance; Theories of local government; History of urban local bodies in India, Evolution of modern urban local governments during British rule; Decentralization of local government; Recommendations of various committees; Politics and progress of decentralization.	L1, L2	9
<b>MODULE 2: Governance for Urban Management</b> Evolution of development and management systems; Scope of development management at the National, state and local levels; Hierarchy of urban settlements; Institutions and organizations; Stakeholders, their perceptions and role in urban management.	L1, L2	8
<b>MODULE 3: Governance and Urbanization</b> Government, governing and governance; Determinants and indicators of good governance; Citizens charter and other instruments; Decision making processes; Need for openness and transparency; People's participation, collaborative management; Local governance. Processes of urbanization, developmental conflicts, resource constraints, systems deficiencies; Urban poverty and exclusion from development process;; Defects in planning approaches, multiplicity of organizations and authorities	L1, L2	10
<b>MODULE 4: Governance in Post 74th Amendment Scenario</b> 74th Constitution Amendment Act, including - XII schedule, decentralization of powers and functions; Local and participatory planning, bottom up, decentralized and integrated planning processes; Planning, governance and spatial strategy; Best practices of planning and quality of governance.	L1, L2	9

\*Bloom's Level:

L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>URBAN FINANCE (PLN2703)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Urban Governance					
Co-requisites	Metropolitan Planning, Development and Management					

### **Catalog Description**

This course is to study and analysis the urban governance and it importance to deliver the services in India. To study the decentralization of local government is also includes in this course. The governance and government relationship is to study and analysis. In the course, governance and urban management challenges in a urbanization process is to study along with governance in post 74<sup>th</sup> Amendment Act scenario in India.

### **Course Objectives**

The objectives of this course are

- Analyze Multiple Sources of Urban Finance for Urban Development
- Introduce Urban Reforms and their Implications on Liquidity and Application of Urban Finance

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Describe the urban governance and it's important for development and services delivery.

**CO2:** Describe the additional funding resources and challenges in urban reforms.

**CO3:** Explain the importance for urban management through good governance

**CO4:** Discuss the 74<sup>th</sup> CAA and it's important to governance in India

Modules	Blooms level*	Number of hours
<b>MODULE 1: Multiple Finance</b> Nature and composition of income and expenditure, limitations and need for revenue enhancements; Expenditure control methods and mechanisms; Budgetary allocation from Central and State Governments for urban development; Assistance from foreign donors and Multi National agencies; Non-traditional sources of funding; Market access; Pool finance and prerequisite conditions for accessing non-traditional funds.	L1, L2	10
<b>MODULE 2: Additional Funding sources and Urban Reforms</b> Types of partnership approaches; Privatization of civic services; public private partnership mechanisms; Types of contracts and ownerships; Emerging cost effective technology interventions; User charged projects; Pricing of services. Role of state government and urban local bodies; City's challenge fund; Urban reforms; Implications on resources, incentive fund and state level pooled finance development fund.	L1, L2,	10
<b>MODULE 3: Institutional Capacity Enhancement</b> Better finance management, management process; Accounting and budgeting, asset management, receivables management, cost centre approach; Computerization as tool for resource enhancement; Role of Management Information Systems.	L1, L2	8
<b>MODULE 4: Plan forms and Indices</b> Financial operating plan, city corporate plan; Development of urban indicators; Infrastructure pricing and financing – financing mechanisms in addition to tax and grants; private public partnerships like BOT, BOOT, BOLT etc.; Impact fee, subsidies.	L1, L2	8

\*Bloom's Level:

L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>PLANNING AND DESIGN LAB - VII (REGIONAL PLANNING) (PLN2706)</b>	L	T	S	P	C
Version 1.1		0	0	8	0	8
Pre-requisites/Exposure	Fundamentals of Urban and Regional Planning, Introduction to Regional Planning					
Co-requisites	Planning Thesis					

### Catalog Description

This course gives exposure to the students about the preparation of regional plans. They will be aware of the process for preparing checklist for data collection as well as conducting field visits and various methods to collect primary as well as secondary data collection. Students need to do data synthesis, analysis, finding of potentials & issues and drawing conclusions. They need to suggest strategies and proposals as per the findings. At the end they also need to submit a detailed report on District Development plan.

### Course Objectives

The objectives of this course are

- To understand Role and Relevance of Regional Planning in general and the Context of 73rd and 74th CAA in particular.
- To study District / Metropolitan Area / Regional Development Policies and Land Utilization Plan along with Phasing, Monitoring Mechanism, and Governance Structure for Implementation

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Describe the various types of regional plans and their linkages with higher and lower order plans and constitutional provisions.

**CO2:** Utilise the primary and secondary data obtained through field visit, for the sectoral and spatial planning; detailed data analysis.

**CO3:** Evaluate the present their data analysis and drawn inferences

**CO4:** Prepare proposals as per the identified thrust areas and potential of the study area along with a detailed report of District development plan.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Context of Regional Plans and Constitutional Provisions</b> Role and relevance of regional planning at district or block level for regional planning, critical appraisal of district or block level plans; Understanding the contents of various types of regional plans and their linkages with higher and lower order plans; District planning in the context of 73rd and 74th Constitution Amendment Acts; District Planning Committees (DPCs); Metropolitan Planning Committees (MPCs) and Ward Committees	L1, L2	15
<b>MODULE 2: Organization of Field Surveys</b> Formulation of goals, objectives, methodologies; identification of data and sources of information; Collection of secondary and primary data for sectoral and spatial planning; detailed data analysis.	L2, L3, L4	15
<b>MODULE 3: Analysis and Synthesis</b> Identification of development issues, potential thrust areas and constraints: sectoral and spatial; designing of alternative planning strategies, settlement patterns and development strategies; Sectoral and spatial prioritization, phasing, financial plans, institutional mechanisms, legislative framework, management plans.	L4, L5	40
<b>MODULE 4: Plan, Policies and Proposals</b> Preparation of Regional Plan Document along with drawings, etc; Preparation of policies and proposals with different scenarios and identification of priority areas; phasing and monitoring; governance structures for implementation; regional land utilization plan and the plan document	L5, L6	26

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>TRAINING SEMINAR – II</b> <b>(PLN2707)</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
Version 1.1		0	0	0	2
Pre-requisites/Exposure	Urban Governance, Urban Finance, Urban Management - I				
Co-requisites	Planning and Design Lab – VII (Regional Planning)				

### **Catalog Description**

Each student shall undertake Mandatory Training in a planning (or related) office during summer vacation between the Sixth and Seventh semester. The period of Training will be eight weeks. The exact period and place of training will be decided in consultation with the Co-ordinator-in-charge of training. The objective of Training is to expose the students to live planning projects and working environment at planning offices. The students are required to submit a ‘Satisfactory’ certificate from the relevant Planning Office after completion of training. The student will also submit a Report highlighting the Profile of the Planning Office, its organization, key work areas, etc; Introduction to the project(s) worked upon during training; planning brief; methods employed; and planning -design solutions / proposals. The students will also be required to present their work through drawings / visuals, power point presentations in the form of a Seminar to the faculty and students of the Department over the seventh semester, as per directions of the Co-ordinator-in-charge of training.

### **Course Objectives**

The objectives of this course are

- To understand the profile of the Planning Office / Planning Authority / Local Body / Planning Professional.
- To participate in a Live Project of Planning Office / Planning Authority / Local Body / Planning Professional

	<b>LANDSCAPE PLANNING AND DESIGN (PLN2710)</b>	L	T	S	P	C
Version 1.1		2	0	0	0	2
Pre-requisites/Exposure	Housing and Community Planning					
Co-requisites	Planning and Design Lab – V (Area Planning)					

### **Catalog Description**

This course introduces the theoretical and practical aspects of Landscape Planning, Design and their importance in the urban planning process.

### **Course Objectives**

The objectives of this course are

- Overview of Principles and Techniques of Landscape Design, Open Spaces, etc.
- Significance of Landscape Planning as component of Urban and Regional Development, Ecology and elements of Landscape.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Explore various aspects of landscape elements in genera with relation to Social, Environmental and urban quality of life aspects.

**CO2:** Analyze Bio-mimicry design concepts; learn specific aspects of sustainable design approaches.

**CO3:** Describe the landscape planning and its importance in terms of quality of life and explain the various best practices in traditional landscape planning.

**CO4:** Assess impacts as per sustainable development principles and urban planning in India.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Elements and History of Landscape</b> Study of Landscape elements such as land, vegetation, water, earth & climate, Natural & manmade elements, etc. Principles of landscape design such as unity, simplicity, variety, balance, proportion, sequence, etc. Social and economic factors. Psychological considerations of spaces and enclosures. History of Landscape Architecture including natural & cultural factors of the place, development of landscape architecture through history in different parts of the world such as China, Japan, Europe, Italy, France, England, Persia, Egypt, Greece, Rome. Study of landscape architecture in Medieval period in India such as Mughal. Modern & Contemporary Landscape architecture. Cultural aspects of the landscape architecture with contextual understanding.	L1, L2	8
<b>MODULE 2: Hardscapes, Softscapes and Urban Landscape</b> Hardscapes - pergolas, garden furniture, fences, rocks, masonry, paving & surfacing, roads & parking lots, walks & plazas; Softscapes such as plantation, turfing, water features. Design criteria for landscape design such as visual, functional, micro-climatic, ecological and aesthetic. Basic horticultural idea about plants, plant selection, planting design and care of plants; Urban Landscape - Characteristics and components of open space patterns in towns and cities (traditional and contemporary) basic types: streets, squares, plazas, gardens, ghats and maidans, public parks at district, local and neighborhood levels; park systems; landscape design related to land-use, circulation networks and activity; street furniture as a component of urban landscape.	L1, L2	8
<b>MODULE 3: Landscape Design and Services</b> Macro and micro-climatic considerations in landscape architecture. Effect of climate on landscape and various components of landscape on the microclimate. Landscape Services & Sustainability: Introduction; Outdoors lighting, surface water drainage, irrigation, soil management techniques.	L2, L3, L4	3
<b>MODULE 4: Landscape Aspects of Site Planning</b> Principles of understanding and evaluating and existing landscape; development as a response to constraints and opportunities offered by the site; the landscape concept and open space structure as a basic component of the site plan; The role of vegetation: environmental benefits, functional requirements, aesthetic considerations; typical situations and criteria for design with plants and selection of species; grading; in relation to existing contours, plinth levels, road alignment and storm water drainage; principles of cut and fill.	L1, L2	5

	<b>PROJECT FORMULATION, APPRAISAL AND MANAGEMENT (PLN2711)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Real Estate Planning and Management, Planning and Management of Utilities and Services					
Co-requisites	Planning and Management of Informal Sector					

### **Catalogue Description**

The aim of this course is to provide exposure to the students to basic concepts of project planning, appraisal and management. This course will enable the students a thorough understanding of all the theories and definitions of terms relating to project planning and management and their usage in urban and regional planning. The students will know about the impact of project appraisal, formulation and management and its significance in planning.

### **Course Objectives**

The objectives of this course are

- To study the project formulation and appraisal and management
- To study the project planning and implementation
- To study the project evaluation

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Define the meaning and scope of project formulation, appraisal and management in planning.

**CO2:** Understand the process of project formulation and appraisal in planning.

**CO3:** Understand the process of project implementation and monitoring in planning.

**CO4:** Learn the process of project evaluation.

Modules	Blooms level*	Number of hours
<b>Module 1: Introduction to Project Formulation, Appraisal and Management</b>  The concept of projects, Importance of project formulation, Project formulation: definition, objectives; Stages of project formulation and their significance; Methodology for project identification and formulation; Feasibility studies, input analysis, financial cost-benefit analysis, social-cost benefit analysis; Project appraisal and report.	L1, L2, L3	7
<b>Module 2: Project Appraisals</b>  Need for project appraisal; Project formulation: definition, objectives; Stages of project form Network analysis; CPM, PERT, resource leveling and allocation, time-cost trade off aspects; Bar charts, Milestones, Standard oriented cost control techniques; Techno-economic analysis of projects; appraisal and management; reasons for shortfall in its performance; scientific management, life cycle of project; detailed project report, and feasibility studies; techniques of financial appraisal, payback period, IRR, DCF, NPV, CBR.	L1, L2, L3	12
<b>Module 3: Project Implementation and Monitoring</b>  Project implementation, stages of implementation, Teamwork, actors in project implementation; Project monitoring: meaning objectives and significance; Monitoring techniques: integrated reporting, Milestones, time and cost overrun and under runs, unit index techniques.	L1, L2, L3	9
<b>Module 4: Project Evaluations</b>  Project evaluation: meaning, objectives, scope, stages, approach and steps, Life of a project; Techniques of project evaluation: input analysis, financial cost-benefit analysis, social-cost benefit analysis; case studies in urban and regional development projects.	L1, L2, L3	8

	<b>SPECIFICATION, ESTIMATION AND VALUATION (PLN2712)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Fundamentals of Building Structures, Materials and Principles of Construction					
Co-requisites	Project Formulation, Appraisal and Management					

### Catalogue Description

The aim of this course is to introduce to the students to the theory and practice of specifications, estimation, and quantity surveying; along with its importance in the field of building construction. The procedure of writing specification document for materials, labour, budgets and; estimating the cost and time of construction works shall be covered. The preparation of bill of quantities, optimum resource consumptions and introduction to BIS and other standardized institutions is also a part of the course. Calculating the land value and building values; finding their depreciation values using various methods would also be elaborated in the curriculum of the subject.

### Course Objectives

The objectives of this course are

- To study the quantity surveying and specifications for planners and general specifications.

- To study the details specifications, estimations and valuation.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Discuss the importance, usage of specification and detailed specification of various building materials.

**CO2:** Describe the detailed specification of various construction works.

**CO3:** Describe terms, types of estimating and methods of estimating.

**CO4:** Discuss the terms related to valuation and its types

Modules	Blooms level*	Number of hours
<b>Module I: Introduction</b> Why the knowledge of quantity surveying and specifications is necessary for architects and planners? Significance and methods of writing specifications, classifications of specifications, sources of specifications; Types and methods of cost estimation for different types of projects, rates and sources of rates for different components of projects; Cost Index.	L1, L2	8
<b>Module 2: Specifications</b> Specifications for common building materials and building trades, earthwork, structure (framing), flooring, stonework, plasters, waterproofing of basements and terraces, roofing, doors and windows, elevators. Site development and earth works; Water supply network and distribution systems; Sewer systems; Electrical and telephone networks; Landscaping, roads, pathways, boundary wall, pools, lighting.	L3	10
<b>Module 3: Estimation</b> Calculation of plinth area, floor area, carpet area and circulation area, Preliminary estimates- plinth area rates and cost indices, Detailed estimate-modes of measurement, taking off quantities from drawings, Bill of Quantities (BOQ) and Bill of Materials (BOM), Deriving rates for items from labour and material costs based on CPWD Schedule of Rates, scheduled and non-scheduled items, Establishing market rates. Cost estimation and determination of rates for different types of housing; Cost estimation and determination of rates of works involved in the infrastructure services (roads, water supply, sewer systems, etc.); Costing procedure for different land use categories, development works, interest on investment, and phasing.	L1, L2	10
<b>Module 4: Valuation</b> Value and purpose of valuation; Definition and importance of valuation of land and buildings; Factors affecting property and land value at a city and clarity level; Legal, fiscal and administrative measures of land value; Sinking fund; Betterment; Scrap value, salvage value, outgoings; Capitalized value of buildings; appreciation, depreciation and their types, methods of calculating depreciation.	L1, L2	8

	<b>DISSERTATION (PLN2737)</b>	L	T	S	P	C
Version 1.1		2	0	0	0	2
Pre-requisites/Exposure	Technical Report Writing, Training Seminar I, Training Seminar II					
Co-requisites	Thesis					

### **Catalog Description**

The aim of the course is to study the technical aspect of report writing and role of methodology in research. This course gives an idea of writing skills. The course will introduce the students to all types of technical, scientific and legal writings. The course will enable the students to conduct systematic research and write technical reports.

### **Course Objectives**

The objectives of this course are

- To introduce students to basic literature, research process, techniques and colloquial arguments, so as to help them finalise a topic for their thesis in the subsequent semester.
- To understand the types of reports and style of writing technical reports
- To understand the methods used for conducting research.
- To know about presentation of research.

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain differences between different writing formats for reports.

**CO2:** Explain important elements to give a comprehensive understanding of purpose of report.

**CO3:** Describe the differences between different writing styles for articles, papers and other texts.

**CO4:** Explain the basis for selecting appropriate research method and criteria for a good research design.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Thesis Programming</b> Identification of topic of interest having relevance to planning profession, integration and application of the learnt research process to the pre- thesis work. Planning colloquium: Exposure to the colloquial arguments by the stakeholders, decision makers, urban managers, advocates, technocrats, user groups, etc. Based on the inputs from the colloquial arguments, the topics shall be finalized for thesis in the subsequent semester.	L1, L2	6
<b>MODULE 2: Research Techniques</b> Data collection and analysis: Sample determination, data tabulation (coding, de- coding, etc.), quantitative and qualitative data analysis. Introduction to advanced statistical techniques such as, decision trees, factor analysis, fuzzy logic, multiple regression, multi variance, cobweb, logit and probit models, etc. Testing of hypothesis: Statistical hypothesis, simple and composite tests of significance, null hypothesis, types of errors, level of significance, critical region, chi- square distribution, goodness of fit, applications in planning.	L1, L2	6
<b>MODULE 3: Research Process</b> Problem identification, formulation of problem statement, literature review, working hypothesis, research brief, research methodology, sample determination, data collection and analysis, report structuring.	L1, L2, L6	6
<b>MODULE 4: Research Methodology</b> Intuition and research; Scientific research, need for scientific approach to research; Research methods; Hypotheses, testing of hypotheses; Reporting of research; Research in planning.	L1, L4, L5	6

	<b>SETTLEMENT SOCIOLOGY AND INCLUSIVE DEVELOPMENT (PLN2713) (ELECTIVE)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Development, Management and Finance, Infrastructure Planning					
Co-requisites	Public Policy in Planning, Urban Finance					

### **Catalog Description**

The aim of this course is to offer opportunities in specialized or advance learning in sociological aspects which are of concern to physical planning. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skilldevelopments. The focus of the course will be on studying social aspects of human settlements and empowering marginalised sections of the population by improving the institutions of social structure. The course will provide the students hands-on experience of cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During

the course the students will be working on live projects in groups which are preferably interdisciplinary.

### Course Objectives

The objectives of this course are

- To understand the principles of sociology of settlement with a focus on social development as the key concern for inclusive growth.
- To familiarize students with decisive strategies that brings inclusivity and equality in the Plan.
- To expose the students to various tools and techniques which are used in the field of sociology.
- To develop interdisciplinary understanding and sensitivities of future planners.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Understand the various determinants of sociology and various elements of inclusive development by reviewing and conducting various case studies.

**CO2:** To prepare the detail report and presentation on a given project related to settlement sociology and inclusive development.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Settlement Sociology and Inclusive Development</b> Basic introduction to various critical social aspects; Role of sociology in settlement planning; Determinants of sociology- social structure, social status, social control, social institutions, social mobility; Vulnerable and Marginalized groups in society; Elements of inclusive growth; Challenges in achieving inclusive growth; Methods to measure inclusive growth; Indicators of inclusive development; Various case studies related to gender inequality and development planning, community development- community response towards development strategy etc.	L1, L2	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>SMART CITIES AND ADVANCED TECHNOLOGIES FOR EMERGING PLANNING ISSUES (PLN2714) (ELECTIVE)</b>	L	T	S	P	C
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Development, Management and Finance, Infrastructure Planning					
Co-requisites	Public Policy in Planning, Urban Governance					

### **Catalog Description**

The aim of this course is to introduce the students to smart cities concepts and solutions with their specific planning needs and priorities and the implication on development in these areas. Besides, this course also offers opportunities in specialized or advance learning in emerging spatial planning issues and planners need to give special attention to them while preparing the plans. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skilldevelopments. The course will provide the students hands-on experience of infrastructural, environmental problems emerging in a city. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

## Course Objectives

The objective of this course is

- To grasp Smart city concept as well as understanding emerging challenges in a city/region and finding out ways to resolve them.
- To develop interdisciplinary understanding and sensitivities of future planners.

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Apply smart city planning as well as critically analyze immerging multifaceted planning issues and technology-based solution to address them.

**CO2:** Prepare the detail report and presentation on a given project with an emphasis on smart solutions in order to achieve the goal of sustainable development.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Smart Cities, Advance Technologies and Emerging Planning Issues</b> Introduction to smart cities, the city as a system of systems, smart citizens, Infrastructure, technology and data, Innovation and enterprise, smart leadership and strategy, standards and capacity building, smart measurement, and learning. Case Studies of various smart cities in Indian and international context. Challenges and problems faced by Mega city and its region, Issues-rapid unplanned growth, urban sprawl, infrastructure related issues such as shortage of Water Supply, Public transport, Parking Issue, Shortage of housing, Solid waste management, environmental issues such as deforestation, land conversion, depletion of ground water etc. Advanced Solution- Advanced Transport Planning system, Smart Mobility, Application technology for improving agriculture productivity, Rain water harvesting, green roofs Sustainable housing affordability, Zero-carbon city, Use of Information and Communication Technology in Planning and Governance- E- Governance, E-Planning, Case studies covering various planning issues at different level of Planning	L1, L2	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

	<b>ENVIRONMENTAL IMPACT ASSESSMENT AND TOD (PLN2715) (ELECTIVE)</b>	L	T	S	P	C
Version 1.1		0	0	3	0	3
Pre-requisites/Exposure	Land Economics and Real Estate Planning, Disaster Risk Mitigation and Management					
Co-requisites	Project Formulation, Appraisal and Management, Planning Design Lab VII					

### Catalog Description

The aim of the course is to provide advance learning on the field of Environment Planning especially EIA which is one of the key concern of policy makers and land use planner. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skilldevelopments. The aim of this course is to provide exposure to the students to essential understanding of Environmental Impact Assessment (EIA). UNEP defines Environmental Impact Assessment (EIA) as a tool used to identify the environmental, social and economic impacts of a project prior to decision-making. This course will enable the students using EIA as tool for both environmental and economic benefits, such as reduced cost and time of project implementation and design, avoided treatment/clean-up costs and impacts of laws and regulations. Students will also be able to apply or reference these techniques in their planning studios. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits,

community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### Course Objectives

The objectives of this course are

- To learn with different methods and process of Environment Impact Assessment.
- To develop interdisciplinary understanding and sensitivities of future planners.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Apply EIA techniques while assessing the impacts on land use, resources, health and social conditions.

**CO2:** Prepare the detail report and presentation on a given project related to Environment Impact Assessment.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction</b> Role of Environmental Impact Assessment in the planning and decision-making process; Definition and need, evolution and objectives and scope. Different methods of Environmental Impact Assessment; Advantages and limitations; Public - private - people's participation in EIA, Impact assessment on land use, resources, social and health impacts.	L1, L2	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study by reviewing case studies from India and abroad on projects of various types covering different levels of planning and practical exercises on Environmental Impact Assessments. Formulation of aim and objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

## Syllabus - Eighth Semester

	<b>URBAN MANAGEMENT-II (PLN2801)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Urban Management - I					
Co-requisites	Human Values in Planning, Planning Thesis					

### **Catalog Description**

The aim of this course is to provide an in-depth understanding of the Basic Themes and Issues in Urban Management. This course explores important substantive areas and concepts in the field of urban management and current urban planning and policy issues and debate. This course will provide the knowledge needed for value-based management of spatial transformation process, it comprises, every aspects of a city in terms of economic, Environmental, social and infrastructure of an urban area.

### **Course Objectives**

The objectives of this course are

- To understand the Importance of Decision Making in Urban Management
- To appreciate role of Leadership and Communications in Urban Management

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the role of planner in decision making and approaches to leadership.

**CO2:** Evaluate the features and essential of effective communication.

**CO3:** Discuss the difference between socialism and planning.

**CO4:** Explain the nature and mode of resolution of conflicts in planning.

Modules	Blooms level*	Number of hours
<b>Module 1: Decision Making and Leadership</b> Decision-making; definition, features, factors, essentials and hindrances in sound decision-making; structure of decisions and types of decisions; theories of decision making - rational theory, incremental theory, systems theory, game theory, conflict theory, Herbert Simon's contribution in decision making; role of planner in the decision-making process and decision making bodies related to urban and regional planning at national, state and local level; Planner's functions as a leader, urban development manager, public bureaucrat, policy analyst and social reformer; approaches to study leadership — trait-approach, behavioral approach and situational approach;	L1, L2	10
<b>Module 2: Communication</b> Importance of communications; elements, types, features and essentials of effective communications; hindrances to effective communication; theories of motivation; carrot and stick approach, need based theory, motivational system; integration versus disintegration; co-ordination and co-operation; centralization and decentralization; single versus plural supervision; elements and types of organization; theories of organization — scientific management theory, bureaucratic theory, classis theory, human relations theory; behavioral approach and systems approach.	L1, L2	10
<b>Module 3: Political Systems, Social Systems and Planning</b> Democracy and planning, socialism and planning, fascism and planning; Tribal society, peasant society, industrial society; Spatial segregation in India	L4	8
<b>Module 4: Conflicts and Resolutions</b> Nature and mode of resolution of conflicts; public participation in planning as an aid to better understanding planning and implementation; political nature of planning and implementation problems in India; Case studies; examples from the other parts of the world highlighting situations where such problems have been minimized.	L1, L2	8

Pre-requisites/Exposure	Real Estate Planning and Management, Project Formulation, Appraisal and Management					
Co-requisites	Human Values in Planning, Planning Thesis					

### **Catalog Description**

The aim of this course is to study role and responsibilities of Professional Planner and to attain the knowledge of project formulation, valuation and conditions of engagement and scale of professional charges. This course objective to provide the foundation, knowledge and skills needed to work in planning organisation. It is designed to build understanding of the complex interactions and uncertainties of the development process.

### **Course Objectives**

The objectives of this course are

- Understand the roles of planner for plan and development in India cities and towns
- Identify the agencies that involves in planning process and development plan, execution and operation and maintenance
- Understand the need of Valuation, Methods of Real Property Valuation, Contract Documents and Project Formulation

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Explain the role and responsibility of planners as decision maker.

**CO2:** Evaluate the scale of charges for different plans prepared at different levels

**CO3:** Describe the heterogeneity and imperfections of land and methods of valuation in real property

**CO4:** Describe the process involved in project formulation

Modules	Blooms level*	Number of hours
<b>Module 1: Role of Planner</b> Planner's input as professional at various levels and organizations, his role in decision making processes, relevant issues: generalists vs. specialists, professionals vs. technocrats, planner as decision maker vs. advisor to decision maker, relationship with client, developers, institutions and contractors; relationship with other experts such as engineers, architects, sociologists, economist, lawyers, etc; for specialized studies related to planning.	L1, L2	8
<b>Module 2: Organization, Scope and Scale of Charges</b> Aims and objectives of professional institutes, sister bodies; professional roles and responsibilities of planning consultants; professional ethics; responsibilities towards clients, fellow professionals and general public; Scope of services for different projects like master plan for urban area, zonal / district plan, sector / neighbourhood; layout, group housing schemes, commercial centers, industrial estates, etc; Consultancy agreements and safeguards; Fees and scales of professional charges, competitions and copyrights.	L1, L2	8
<b>Module 3: Valuation and Methods of Real Property Valuation</b> Fundamentals of valuation, Purpose of valuation; Valuation for wealth & income tax, capital gains tax, property & gift tax etc, ownership of land, compound interest theory, calculating of present value, concepts of economic rents and social rents, property taxes, sinking fund, annuity, depreciation, valuation tables; Legislative framework-rent control, easements and their effects on properties; Income capitalization methods, land and building method and other methods of valuation;	L1, L2, L3	12
<b>Module 4: Contract Documents and Project Formulation</b> Tenders, contracts, arbitration, schedule of rates for construction; Materials, labor and equipment for land development, unit and mode of measurements, rate analysis; Formulations of project proposals and outline; Preparation of and response to Notice Inviting Tenders, Expression of Interest, Terms of Reference, Penalty clauses, etc.	L1, L2	8

	<b>RURAL DEVELOPMENT AND MANAGEMENT (PLN2804)</b>	L	T	S	P	C
Version 1.1		3	0	0	0	3
Pre-requisites/Exposure	Regional Planning					
Co-requisites	Planning Practice – II					

### **Catalogue Description**

The course attempts to understand the theoretical basis for various concepts Rural Development and learn the practice of rural planning in the Indian context. The course provides an in-depth understanding of the issues of rural development, regional disparity and the need for balanced regional development in the context of globalization and rapid economic transformations in the country. Rural policies and sectoral policies are also discussed. Metropolitan regions, districts as planning regions and rural planning issues are discussed in the wider spectrum of holistic rural development and management.

### **Course Objectives**

The objectives of this course are

- To understand the importance of rural area
- To analyze the post-independence scenario of rural areas
- To examine the initiatives of five-year plans for rural development
- To understand the post 73<sup>rd</sup> CAA scenario

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Explain the importance of rural development

**CO2:** Describe the post-independence scenario of rural areas

**CO3:** Describe initiatives of five-year plans for rural development

**CO4:** Describe the post 73<sup>rd</sup> CAA scenario

Modules	Blooms level*	Number of hours
<b>Module 1: Introduction to Rural Development and its roots in India</b> Meaning, nature and scope of development; Nature of rural society in India; Hierarchy of Rural settlements; Social, economic and ecological constraints for rural development. Rural reconstruction and <i>Sarvodaya</i> programme before independence; Impact of voluntary effort and <i>Sarvodaya</i> Movement on rural development; Constitutional direction, directive principles; <i>Panchayati Raj</i> - beginning of planning and community development; National extension services.	L1, L2, L3	8
<b>Module 2: Post Independence rural Development</b> Balwant Rai Mehta Committee - Three tier system of rural local Government; Need and scope for people's participation and <i>Panchayati Raj</i> ; Ashok Mehta Committee - linkage between <i>Panchayati Raj</i> , participation and rural development.	L1, L2, L3	10
<b>Module 3: Rural Development Initiatives in Five Year Plans</b> Five Year Plans and Rural Development; Planning process at National, State, Regional and District levels; Planning, development, implementing and monitoring organizations and agencies; Urban and rural interface-integrated approach and local plans; Development initiatives and their convergence; Special component plan and sub-plan for the weaker section; Data base for local planning; Need for decentralized planning; Sustainable rural development.	L1, L2, L3	9
<b>Module 4: Post 73<sup>rd</sup> Amendment Scenario</b> 73 <sup>rd</sup> Constitution Amendment Act, including - XI schedule, devolution of powers, functions and finance; <i>Panchayati Raj</i> institutions - organizational linkages; Institutionalization; resource mapping, resource mobilization including social mobilization; Information Technology and rural planning.	L1, L2, L3	9

	<b>PLANNING THESIS (PLN2837)</b>	L	T	S	P	C
Version 1.1		0	0	18	0	18
Pre-requisites/Exposure	PDL VII, PDLVI, PDL V					
Co-requisites	Human Values in Planning, Planning Practice - II					

### **Catalog Description**

The aim of this course is to Equip Students to Conduct Independent Research. This course will help students of identifying his or her own area of interest; able to explore a subject in depth; manage a research project; define a suitable question and use the appropriate research tools. This course will also contribute to the standards for academic writing. Each student of Bachelor of Planning is required to prepare a thesis on the subject of his / her choice, concerning urban, regional or rural planning. The topic shall be approved by the concerned department. Thesis will provide an opportunity to the student to conduct independent research by using the skills of analysis and synthesis learnt through various theory and practical courses. Thesis will be completed under the guidance of an approved research supervisor allotted by the Department. Thesis will be prepared by the student as per Thesis Manual prepared by the Department. The students will be required to present thesis orally, graphically and through written report. The student will also be required to present her thesis before the external jury appointed by the concerned University / Institute / School.

### **Course Objectives**

The objectives of this course are

- To study and understand the scientific research method to carry out proper research to solving issues and problems in the context of urban and regional area.
- To study and learns the details research methodology such literature, cases study area, data collection, data analysis and result/finding particularly in urban / regional areas for addressing issues and problems and its challenges.
- To study and learns the formulation of policies, plan, suggestion / recommendation based on the research work.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Identify the need of their dissertation and formulate the aim and objectives respectively.

**CO2:** Organize field surveys and collect data from their related fields.

**CO3:** Analyze the data collected and find the gap .

**CO4:** Propose and recommend for the gap identified.

Module	Blooms level*	Number of hours
<b>Module 1: Need for the Study and Methodology and Literature Research</b> Clear goals and objectives along with scope of each objective should be outlined before establishing the need for conducting a research study; Substantive limitations of the research work should also be stated. Previous published work on the subject area has to be critically examined for finding out existing thought processes of other authors and trends (proper acknowledgements by authors).	L2,L3	-
<b>Module 2: Field Surveys</b> Depending on the research topic, field surveys have to be designed and field work has to done after conducting appropriate sample surveys.	L4, L5, L6	-
<b>Module 3: Synthesis of Data and Information and Findings</b> Field data and information and literature research findings should be synthesized to make final arguments and identification of planning issues.	L4, L5, L6	-
<b>Module 4: Proposals and Recommendations</b> Final, specific planning proposals and recommendations should be made at various geographical levels. Proposals should directly emanate from analysis and should not be generalized. Thesis should contain a list of references as per international practice.	L4, L5, L6	-

## Examination Rules and Regulations

### 1. QUALIFYING STANDARDS

1.1 Progressive marks refer to the marks given to a student on a continuous basis during a semester by the concerned subject teacher/teachers.

- 1.1.1 In the case of subjects which are mainly studio based as per the scheme of teaching and examinations, the progressive marks shall be the total of marks given to the various jury/reviews from time to time in sheets and report format.
- 1.1.2 In the case of subjects which are mainly lecture based as per the scheme of teaching and examinations, the progressive marks shall be based on the average of two tests conducted normally at the end of 8th and 12th weeks of each semester. Provided that, the teacher may give assignments instead of tests which may include topic/case presentation, book reviews, write-ups etc.
- 1.1.3 In the case of subjects which are mainly practical based as per the scheme of teaching and examinations, the progressive marks shall be based on the assignments submitted by the students. A minimum of two assignments per semester shall be given.
- 1.1.4 In all the above mentioned three cases, viz studio based, lecture based and practical based subjects:
  - The concerned teacher shall give a reasonable opportunity to the student to improve his/ her progressive marks, for example by re-doing the assignments or taking an additional test etc, within the time frame of the given semester with approval of HOD/HOI.
  - The relevant records and submissions of students which have been assessed for progressive marks shall be produced as and when they are sought by the university within 12 months, after 12 months that no records shall be retained/ produced.

- 1.2 If a candidate fails to secure a **minimum of 50% of marks** in progressive marks in any subject, he /she shall not be eligible to take up theory/viva voce/end term examination in that subject.
- 1.3 It shall be the responsibility of concerned Head of the Department to implement clause “1.2” in the event of an ineligible candidate inadvertently being allowed to appear for the theory/ viva voce /end term examination, the result of the concerned examination shall be considered as null and void.
- 1.4 Such candidates shall correct, improve, redo the concerned works on the advice of subject teacher and re- submit them during subsequent semester of the next year in order to secure the minimum required progressive marks in that subject.
- 1.5 Once a candidate secures ‘minimum’ or ‘more than the minimum’ progressive marks in any subject, the marks shall be made permanent and shall not be changed under any circumstances.
- 1.6 To pass a subject, a candidate shall secure a minimum of 50% marks in Progressive marks and 50% marks in the end term examination (Theory examination/ Practical examination/ viva voce examination/ Total marks) ie Internal Marks: External Marks: Total marks :: 50:50:50.
- 1.7 Candidates who do not fulfil above cited clause no. 1.6 shall be deemed to have failed in that subject and have to re-appear for the Theory examination / practical examination or viva voce examination in which he/she has secured less than the minimum prescribed marks.
- 1.8 A minimum of 4.00 SGPA shall be secured by the student to be eligible for the award of degree.

## 2. THESIS EXAMINATION

- 2.1 The ‘Thesis’ of every student in the final semester shall be evaluated on thesis presentation by the student through viva-voce examination by the panel of the jury in accordance with the Regulations issued separately.
- 2.2 The jury shall include two external jury members and one internal member (Thesis Coordinator) from the faculty, in addition to the Chairman/HOD/HOI. Out of the four jury members, at least two must be present to complete the proceedings of the jury.
- 2.3 A student who fails in the thesis evaluation shall be allowed to resubmit the modified thesis after a minimum period of two months with due approval by the management, Amity University Haryana.

## 3. SUMMER TRAINING

- 3.1 Each student shall undertake mandatory training in a planning (or related) office during summer vacation after fourth and sixth semester. The period of training will be **minimum six weeks and maximum eight weeks**. The exact period and place of training will be decided in consultation with the Co-ordinator-in-charge of training. The students are required to submit a ‘Satisfactory’ certificate from the relevant Planning Office after completion of training. The student will also submit a report highlighting the profile of the Planning Office, its organization, key work areas, etc; be required to proceed on ‘Summer training’. A Final Viva shall be conducted after each successful summer training.

- 3.2 The marks for Summer training shall be awarded to each student in accordance with the Regulations and guidelines issued by the Training Coordinator in consultation with HOI ASAP, Amity University Haryana.

#### **4. PROMOTION RULES**

- 4.1 A Student not satisfying the requirement of qualifying standards, at any semester, as per the Clause 1.6, shall be detained from appearing at the semester examination for that particular subject.
- 4.2 Such a student shall have to repeat the particular subject, as a ex-student student with the next batch of students.
- 4.3 A student satisfying all the standards as provided in Clause 1 shall be declared to have 'Passed' the semester examination.
- 4.4 A student not satisfying all the criteria of qualifying standards of Clause 1 in conjunction with the provisions of Clause 4.2, but failing in any number of subjects of both the semesters of a class taken together shall be declared to have been 'Promoted With Back-Papers' (PBP) and, shall be governed by Clause 5. A student so declared as PBP shall have to clear the back papers, as and when the examination of the concerned semester is held next.
- 4.5 A student not satisfying all the criteria of qualifying standards of Clause 1.1 in conjunction with the provisions of Clause 4.2, and has invoked the provisions of Clause no. 6, shall be declared as 'Promoted with Grace marks' (PWG), and shall be promoted to the next higher class.
- 4.6 The students who are not covered by provisions of Clause 4.1 to 4.5 shall be declared to have 'Failed'. Such students shall be required to repeat both the semesters of the said class, either as a 'regular student' or as an 'ex-student', in accordance with the Clause 5 and 6.

#### **5. PROMOTION UNDER CARRY- OVER SYSTEM**

- 5.1 A candidate covered under Clause 4.4 shall become eligible for provisional promotion to the next higher class of the course and shall get another chance to clear the said 'Back-Papers' in the next examination of the concerned semester under the carry-over system.
- 5.2 On failing again in any of the 'Back-papers' examination of a semester, the provisional admission granted to the concerned student in the higher class shall automatically stand cancelled and he/she shall have to clear the 'Back-papers' as an 'ex-student' or as a 'regular student', in accordance with the Clause 6.
- 5.3 Marks obtained by a student to clear his/her back paper shall replace the original marks, secured earlier by the student only to the extent of the minimum qualifying marks for computation of his/her result.

#### **6. EX-STUDENTSHIP**

- 6.1 A student opting to clear his/her examinations as an ex-student shall be required to inform the college, in writing, within 15 days of start of the next academic session.
- 6.2 An ex-student shall be required to appear at the 'Theory' and 'Practical /viva-voce' examination of all the subjects of both the semesters of the concerned class. However, the marks, for the 'Mid Term Examination' of all the subjects in the earlier regular attempt shall be retained as obtained by him/her.
- 6.3 If a student opts to repeat the semester as a regular student, the new marks awarded to him for 'Mid Term Examination' shall replace the old marks obtained by him in the earlier attempt.

#### **7. GRACE MARKS**

7.1 Grace Marks shall be allotted to the students within the policy directives of the Amity University Haryana.

## **8. MIGRATION**

8.1 Migration of students from one Institute to other shall not be allowed unless it falls within the policy directives of the Amity University Haryana.

## **9. COURSE DURATION**

9.1 Minimum duration of the course will be 4 years.

9.2 If any students fail to clear all the subjects as per clause 9.1, student have to clear remaining subjects in N+2 years where N will be the minimum course duration as per Amity University Gurgaon guidelines.

## Overview

B.Arch. (Bachelor of Architecture) is a 5 years long undergraduate level Degree course. This professional course is related to the field of Architecture. Architecture deals with design, planning and construction of buildings and other physical structures. Usually buildings and physical structures are said to be the product of architectural work. Sometimes, other than buildings, even construction of non-building structures becomes a part of architecture. We have comfortable homes where we live. We go to schools and colleges to study. We go for shopping to the nearest shopping mall. We go to hospital to avail treatment. These different types of buildings are creations of architects. Each type of building has its own design and distinctive style. It is the task of an architect to create such designs and bring those plans to reality. In short, architecture plays a huge role in the design and construction of humble homes and buildings to imposing dams, bridges and tunnels! An architect is a professional, who through his/her skills, is able to perform the tasks of planning, designing and constructing buildings, physical structures and non-building structures.

## Programme Objectives (PO's)

The graduates will

- |             |   |
|-------------|---|
| <b>PO 1</b> | <b>Architecture knowledge:</b> Apply the knowledge of humanities, science, architecture fundamentals to the solution of complex architectural problems.   |
| <b>PO 2</b> | <b>Problem analysis:</b> Identify, formulate, research literature and analyze complex architectural problems reaching substantiated conclusions using principles and elements of design.  |
| <b>PO 3</b> | <b>Design/ Development of Solutions:</b> Ability to identify social, economic, environmental and cultural issues related to architectural design process.   |
| <b>PO 4</b> | <b>Conducting Investigations of complex problems:</b> use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions. |
| <b>PO 5</b> | <b>Modern tool usage:</b> Create, select and apply appropriate techniques, resources and modern software with an understanding of the limitations.  |

- PO 6**      **The architect and society:** Apply reasoning informed by the contextual knowledge to assess social, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional architectural practice.
- PO 7**      **Environment and sustainability:** Understand the impact of the professional architectural solutions in societal and environmental contexts, and demonstrate the knowledge and need for sustainable development.
- PO 8**      **Ethics:** Apply ethical and professional responsibilities of the architectural practice.
- PO 9**      **Individual and team work:** Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.
- PO 10**      **Communication:** Ability to communicate effectively on complex architectural activities with the architectural community and with society at large, such as, being able to comprehend and write reports and design documentation, make effective presentations and give and receive clear instructions.
- PO 11**      **Project management and finance:** Demonstrate knowledge and understanding of the architecture and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO 12**      **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

## **Programme Specific Outcomes (PSOs)**

On completion of the Bachelor of Architecture, the student will be able to:

- PSO1**      Create and evaluate architectural designs and represent designs through different manual and digital mediums.
- PSO2**      Apply technical knowledge to demonstrate a comprehensive application of life safety, accessibility and sustainability issues in making sound design decisions across varying scales and levels of complexity.

- PSO3** Relate the architectural knowledge to historical and contemporary context of theories, practices, movements, styles and environmental practices existing globally through different eras.
- PSO4** Work professionally by using leadership and communication skills or to identify specialized fields of architecture and pursue higher studies.

### Supporting document for PSOs (Programme Specific Outcomes)

PSO 1			PSO 2			PSO 3			PSO 4		
Create and evaluate architectural designs and represent designs through different manual and digital mediums. ## Syllabus - First Semester

	<b>ARCHITECTURAL DESIGN – I (ARC2101)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	3	1	6
Pre-requisites/Exposure	NA					
Co-requisites	Visual Arts – I					

### Catalog Description

The aim of this subject is to familiarize students with visual grammar, elements of design and methods of visual composition with various mediums and color. In addition to the earlier, the intention of space design activity will be limited to the level of visual composition of architectural spaces considering human activity and anthropometry. There would be several studio/ design thinking exercises based on the module contents as is described below. The module may be taken up by the faculty in order of preference. The order should be common in both the sections of the same year. The faculty may achieve stated minimum outcome using various strategies and approaches.

***Design Exercise: Small living space, Home stay, Small showroom, Shop, Small Activity space***

### Course Objectives

The objective of this course is

- To understand the application of visual grammar in the domain of Visual design
- To create composition with various 2D and 3D media with various mediums.
- To develop the ability to translate abstract principles of design into architectural solutions for simple problems.

### Course Outcomes

On completion of this course, students will be able to

**CO1:** Define principles of design and architectural aesthetics

**CO2:** Evaluate the human activities in built environment

**CO3:** Measure drawings of simple objects

**CO4:** Evaluate and analyze 3D form with visual grammar.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Study and Application of Elements and Principles of Design in Basic Composition</b> Elements of design in basic composition, Application of principles of design, Positive and Negative spaces, Additive and Subtractive spaces, Exercises primarily through 2-D & 3-D models of simple geometric.	L1, L2	10
<b>MODULE 2: Anthropometry</b> Anthropometrical study of various spaces, Application of Anthropometrics, Design of Anthropometrics Cell with minimum space requirements of single unit for a single person, Study the interior spaces by making 3-D views (axonometric and isometric)	L1, L2, L3	20
<b>MODULE 3: Measured Drawing</b> Introduction to fundamentals of measured drawing, line value, lettering, drawing representation, format for presentation methods and technique of measuring buildings and their details. Measured drawing of simple objects like furniture, detailing in terms of construction, ornamentation, measured drawing of building components like column, door, window, cornice, etc.	L3, L4	24
<b>MODULE 4: Scale and Order in Architecture</b> Analyzing single activity, anthropometrical data, designing the elements of building e.g. entrance gate design, floor design, door design, Table-Chair, Drafting table etc. Living space, Home stay, Shop, Small Activity space, etc	L4, L5, L6	18

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

Version 1.1	Date of Approval:	1	0	2	2	5
Pre-requisites/Exposure	NA					
Co-requisites	Architectural Design – I					

### Catalog Description

The aim of this subject is to familiarize the students with basic concepts of building materials and construction techniques in the field. This subject will enable students to familiarize with building elements of superstructure and Sub-Structure, to apply the construction techniques involved in masonry work with different materials like brick, stone and composite materials in different locations like T- junctions, independent piers and corner junctions.

### Course Objectives

The objective of this course is

- To make students familiar with basic building elements.
- Students will understand the importance of various bonds through brick models and the assembling of these brick models in the form of courses and bonds.
- To introduce brick as building material for super and sub structure construction.
- To know and understand the basic characteristics and classification of timber as a construction material.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Define basic building elements

**CO2:** Recognize the various types of masonry made up of suitable materials

**CO3:** Explain the types and necessity of timber as building material

**CO4:** Explain the principles of construction.

Modules	Blooms	Number
---------	--------	--------

	level*	of hours
<b>MODULE 1: Introduction to Super- Structure, Sub- Structure and Building materials</b> Introduction to basic elements of buildings and their importance; Brief introduction to Bricks, different types of bricks, stone, glass, R.C.C., asbestos, paints and varnishes, Fiber Reinforced Plastic (FRP), <b>Lime:</b> Sources of lime, Classification and manufacturing process of lime, Fat and hydraulic lime – properties and use, tests on lime, etc. <b>Cement:</b> Composition of ordinary cement, function of cement ingredients, properties of cement – soundness, setting time, strength, etc. Grade of cement and different types of cement used in construction. <b>Mortar:</b> Sand, sources of sand and its classification, tests on sand, classification of mortar – lime mortar, mud mortar, surkhi mortar, cement mortar, preparation of mortar and its properties, use and selection of mortar for different construction work, etc.	L1, L2	15
<b>MODULE 2: Introduction to different types of Masonry, Brick Masonry and Stone Masonry</b> Introduction to bonds, principle and applications, Brick walls in different bonds, ends, corners and junctions. Composition of brick earth and their properties, manufacturing process of bricks, classification of bricks, test for bricks, special type of bricks, substitutes for bricks, etc Rubble work: Random Rubble, built-to-course and coursed masonry, miscellaneous, Classification, characteristics and properties of stones, quarrying of stone, artificial stones	L1, L2, L3	20
<b>MODULE 3: Timber</b> Types of timber, defects, seasoning and preservation of timber. Ecological impact due to use of wood, deforestation etc. Study of engineered wood used in buildings, i.e., Plywood, block boards, particleboards, and other types. Application of timber in building components.	L1, L3, L4	10
<b>MODULE 4: Principles of Construction and Building Elements</b> Foundations, Footings, D.P.C., flooring, sills, lintel, roofing, parapets, coping, cladding expansion joints, waterproofing of roofs, external wall sections with details, beams, columns, slabs, retaining walls, etc. External Wall Section.	L1, L3, L4	15

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### Catalog Description

The aim of this course is to provide the students with the basic tools and techniques for free hand drawing and technical drawings. The subject covers concept of scales and lettering and familiarize them with planar and solid geometry to conceptualize the 3D forms in to 2D with the help of Orthographic Projections of Planes and Solids including sections of solids as well.

### Course Objectives

The objective of this course is

- To familiarize the students with various drawing tools and accessories used in drafting and lettering techniques to produce and visualize geometrical composition and form.
- To provide a clear understanding about the scale measurement; plane geometry, solid geometry and projections used as drawing technique.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Draw free hand drawing and lettering.

**CO2:** Project points, lines and planes in different positions in 1<sup>st</sup> angle projection system.

**CO3:** Project regular rectilinear and circular solids in different positions.

**CO4:** Apply their knowledge in making sections, intersections and interpretations of solids.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Free Hand Drawing and Lettering</b> Free hand and mechanical lettering cycle.	L1	6

<b>MODULE 2: Basic Technical Drawing</b> Concept and types of line, Division of lines and angles, Drawing polygons, Inscribing and circumscribing circles in polygons, Drawing geometrical curves helix, Conoid etc.	L1, L2	6
<b>MODULE 3: Orthographic Projections- Planes and Solids</b> Definition, Meaning and concept, Planes of Projections, First angle projections, Projection of points, Lines and planes in different positions. Projection of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc.) in different positions. Sections of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc) in varying conditions of sectional plane.	L1, L2, L3	18
<b>MODULE 4: Solid Geometry</b> Construction of section, Intersection and interpenetration of solid.	L1, L2, L3	6

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

### Catalog Description

The aim of this course is to provide practical learning in creative thinking. The course intends to build student interest in think creative and express freedom of expression in Art, Paintings, and model making. The design and creative thinking course helps analyse complex shapes, design and application of colour.

### Course Objectives

The objective of this course is

- To understand the elements and principles of Basic Design as the building blocks of creative design through exercises that will develop the originality, expression, skill and creative thinking.
- To familiarize with principles and theories of arts and architectural composition
- To develop presentation skills, visual expression and representation, imaginative thinking and creativity through free hand sketching and painting on various mediums and materials.
- To familiarize students with the grammar of art by involving them in a series of free hand exercises both indoor and outdoor to understand form, proportion, scale, etc.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Create 2d, 3D Graphic forms, size, and their proportions

**CO2:** Create object based painting and develop creative art forms

**CO3:** Apply architectural graphics skills and improve presentation skills

**CO4:** Create life-long connection in one's pursuit for painting and other art forms

Modules	Blooms level*	Number of hours
<b>MODULE 1: Free Hand Sketching</b> Warm-up module for students to gain exposure to the importance of sketching and drawings in architecture. Free hand still life sketching of composition of solids, cubes, cylinders etc. Study of light, shade and shadow. Free hand sketching in pencil of elements of scale like trees, shrubs, human, figures, vehicles etc. Indoor and Outdoor Sketching.	L1, L2, L3	9
<b>MODULE 2: Live Sketching</b> Live sketching in pencil of elements of scale like trees, shrubs, human, figures, vehicles etc. Indoor and Outdoor Sketching.	L1, L2, L3	9
<b>MODULE 3: Colour Theory and Colour Wheel</b> Properties of colour – Colour schemes – Types of colours -primary, secondary and tertiary colours. Application and visual effects of colour.	L1, L2, L3, L4	9
<b>MODULE 4: Color Course</b> Introduction to Hue, Tint, Tone and Shades. Exercises for the same to study their impacts on still objects, buildings, etc	L1, L2, L3, L4	9

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### **Catalog Description**

The aim of this course is to make students aware of different style of architecture of various regions. The architecture of the world can be categorized as per the timeline of the respective regions of the world with the rock shelters and ancient civilizations of the world with a theoretical framework and the prominent people of architecture who have significantly contributed in the establishment of major distinct architectural styles and features thereby, resulting in a holistic approach and comprehensive and exhaustive analysis of the Indian architecture. The course covers Pre-historic period, Dravidian Style, Indo-Aryan Style, etc.

### **Course Objectives:**

The objective of this course is:

- To introduce Architectural elements, forms, development trends, characteristics of construction techniques and technologies, buildings, civilization transformation over the time period.
- To familiarize socio-economic, historical, political influences of time period in Architectural development.
- To identify the buildings and the major works of the period.
- To understand architecture as evolving within specific cultural contexts including aspects of politics, society, religion and climate
- To gain knowledge of the development of architectural form with reference to technology, style and character in the prehistoric world and in ancient Egypt, West Asia, Greece and Islamic Period

### **Course Outcomes:**

On completion of this course, the students will be able to

**CO1:** Identify and define the world's earliest civilizations, including the Neolithic, Paleolithic, Mesolithic and Iron Age.

**CO2:** Identify prominent historic buildings by their components of design.

**CO3:** Describe prominent historic buildings of Indo-Aryan Style

**CO4:** Analyze prominent historic buildings of Dravidian Style.

<b>.Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: History of Civilizations</b> The type of Architectural development during the period taking few building examples of the different periods –Paleolithic, Neolithic, Mesolithic and Iron age. <b>Indus Valley Civilization:</b> Town planning principles, cultural ethos, and economy exemplified with examples from Mohenjodaro and Harappa.	L1, L2	5
<b>MODULE 2: Buddhist and Jain Architecture</b> The techniques used for rock-cut spaces and free-standing built masses. The spatial and functional connotations. The Buddhist philosophy and its imprint in built space. The temple cities of Palitana, Mount Abu and Girnar. The Jain philosophy and its imprint in built form. The Jain mandalas.	L1, L2	5
<b>MODULE 3: Hindu Architecture- Indo-Aryan</b> The evolution of the temple form, evolution of the shikhara in north India. The three schools of architecture - the Gujarat, the Khajuraho, and the Orrisan styles. Comparison in spatial attributes, scale and detail.	L1, L2	6
<b>MODULE 4: Hindu Architecture-Dravidian</b> The evolution of the vimana and the contributions of the Chalukyas, the Pallavas, the Pandyas and the Cholas. The contributions of the Nayaks to the temple cities. The city morphology, spatial diversity and planning criteria. Hindu philosophy and its imprint in temples/traditional houses and other built structures. Mandala and the geometric grid in temple plans. The proportional theory in temple elevation.	L1, L2	8

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

### Catalog Description

The aim of this course is to enable students to understand various principles of strength of materials. The course covers Engineering mechanics, stress and strain of beams, shear force and bending moment theory. The subject will be taught in congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

### Course Objectives

The objective of this course is

- To introduce the structural system in a building with all the basic components.
- To understand the functions of various elements and building technologies used in various types of buildings.
- To study of stresses and strains and their effect in various elements.
- To give an introduction to the basic principles governing structural systems.
- To introduce basic prefabricated and high-rise structure.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain basics of engineering mechanics

**CO2:** Define stresses and strains with their effects in various elements

**CO3:** Explain force and bending moment diagrams.

**CO4:** Understand prefabricated and high-rise building structure.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Engineering mechanics</b> Introduction , force, resultant force, parallelogram ,triangle, and polygon law of forces, system of forces, Lami's theorem, moment of forces, parallel forces , couple , center of gravity , moment of inertia, friction , angle of friction, angle of repose, basics of pulley centripetal and centrifugal force, super elevation ,work,	L1, L2	06

power, energy. Frame- perfect and imperfect frame, motion of a lift, lifting machine		
<b>MODULE 2: Stress and strain</b> Introduction, direct stress and strain , shear stress and strain, stress strain diagram for mild steel, young's modulus , poisson's ratio, shear modulus, bending equation for beam in simple bending volumetric strain, bulk modulus, stress in bass of varying section, shear stress diagram, stresses in composite bass, flinched beams, stresses due to change in temperature, principal of superposition, principal stress and strain , Mohr's circle of stresses , resilience.	L1, L2	06
<b>MODULE 3:Shear Force and bending moment diagram, theory of yielding and failure</b> Types Of Beams, Supports, Loadings, Assumption Of Theory Of Bending ,SFD And BMD, Material Failure, Structural Failure, Max Principal Stress (Rankine's theory), Max Principle Stress (Saint-Venant's principle), Maximum Shear Stress , Total Strain Energy Theory , Shear And Distortion Strain (von Mises and Hencky)	L1, L2	06
<b>MODULE 4: Design principles and elementary concept for building construction systems</b> Design principles of RCC beams and slabs. Construction system: reinforced concrete, pre-stressed concrete and prefab system and modular co-ordination. Load action and high-rise buildings, various structural systems for high rise buildings.	L1, L2	06

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	<b>MODEL MAKING (ARC2111)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	1	0	1	1	3
Pre-requisites/Exposure	Basic Drawing and Sketching					
Co-requisites	Basic Design & Visual Arts					

## Catalog Description

The aim of this course is to provide the foundation, knowledge and skills needed to work in Carpentry & Model Making. The course covers modelling aspects with the focus on understanding the scale and proportions. The modelling making can be taught using various materials in a workshop-based activity. The students would produce/create several 3D, Architectural Designs and experimental innovative aspects to create unique visual presentation of specializing in the subject.

## Course Objectives

The objective of this course is

- To teach the modeling aspects with the focus on understanding the scale and proportions.
- To guide students in modeling making can be taught using various materials in a workshop-based activity.

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Sketching and developing 2D, 3D Graphical forms in scales, size, and their proportions

**CO2:** Create object based models and develop creative art forms

**CO3:** Applying architectural graphics skills in model making presentations

**CO4:** Create life-long connection in one's pursuit for model making and other art forms

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction</b> Introduction to the art of model making and its allied tools, techniques and	L1, L2, L3	9

materials.		
<b>MODULE 2: Design Evolution</b> Conceptual sketching/ planning, design and developing various three-dimensional geometries in the model making; in context of understanding the scale and proportion.	L1, L2, L3	9
<b>MODULE 3: Workshop</b> The workshop based activity will help in understanding the qualities of different materials, different types of joints and model making to relevant scales and proportions. Students may use different materials such as – Paper, Thermocol, Clay, Wood, Plaster of Paris, metals, and use of different colors in model making.	L1, L2, L3, L4	9
<b>MODULE 4: Presentation</b> Teaching and developing the presentation skills of the models, using various techniques and materials. The students may also incorporate the same for their Architectural Design studio problem	L1, L2, L3, L4	9

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

## Syllabus – Second Semester

	<b>ARCHITECTURAL DESIGN – II (ARC2201)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	3	1	6
Pre-requisites/Exposure	Architectural Design – I					
Co-requisites	Building Materials & Construction Technology - I					

### Catalog Description

The aim of this subject is to familiarize the students with architectural design process through small scale projects of human habitat. The design activity will be limited to the level of visual composition of architectural spaces considering human activity and anthropometry, building material exploration, colour etc. The projects would connect horizontal circulation reflecting their creative approach drawn from data analysis and climatic consideration to the physical setting.

***Examples of project: Clinic, Residence, Bank, Canteen, Studio Apartment, etc.***

### Course Objectives

The objective of this course is

- To involve students in a design project(s) that will involve simple space planning and the understanding of the functional aspects of good design.
- To involve students in a small scale building project(s) which will sensitize them to intelligent planning that is responsive to the environmental context.
- To involve students in building case study by choosing appropriate examples to enable them to formulate and concretize their concepts
- To enable the presentation of concepts through various modes and techniques that will move constantly between 2D representation and 3D modeling

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Understand the application of the architectural design process for small scale projects of human habitat.

**CO2:** Transform the human behavioral needs into architectural program requirements.

**CO3:** Analyze the information on context and the human space relationship.

**CO4:** Compose the architectural spaces in a design project.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Design Process and Human as user of space</b> Study and differentiate human needs, wants and desire, study of cases for different user's requirements, Transform the behavioural requirements into space form, Study of relationship among spaces with proximity chart, Storytelling etc.	L1, L2,	10
<b>MODULE2: Human Activity and Context</b> Study if a context and its surroundings and collect information, Analyse the above information in favour of the usage perspective, Understanding of human scale to the context.	L!, L2	10
<b>MODULE 3:Planning of Spaces</b> Distribution of the human activity spaces along the context considering the context as visual background, Analyse the relationship among the spaces. Verbal presentation on planning of built environment with different mediums.	L4, L5, L6	20
<b>MODULE 4: Detail Design of Interior Spaces with a theme</b> Detail planning and design of interior spaces considering human needs and human anthropometric data with a theme. Application of building materials with colour and texture in detail design. Verbal presentation of Interior Spaces.	L4, L5, L6	20

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>BUILDING MATERIALS &amp; CONSTRUCTION TECHNOLOGY – II (ARC2202)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	2	5
Pre-requisites/Exposure	Building Materials & Construction Technology – I					
Co-requisites	Architectural Design – II					

### Catalog Description

The aim of this course is to make students familiar with basic concepts of building materials and construction techniques in the field. The study in the semester increases in complexity from shallow and spread foundations to deep foundations. Study of openings will proceed to the study of Arches and its classification, to familiarize the students with the temporary supporting structures required for construction.

### Course Objectives

The objective of this course is

- To introduce students to details of shallow and deep foundations.
- To understand openings and the use and construction details of doors and windows with timber shutters and frames.
- To understand the use of construction building materials like clay and timber.
- Students will also learn about arches.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** To develop understanding about foundations and the constructions techniques involved.

**CO2:** To recognize the various types of temporary supporting structures used in different locations in the building industry

**CO3:** To understand the importance of wooden carpentry joinery details used in openings

**CO4:** To evaluate the best suitable Joinery in openings and become aware of conventional and new clay products used.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Foundations: Shallow, spread &amp; Deep</b> Shallow foundation: Types, Isolated, combined and raft foundations and their construction techniques. Deep Foundation: Grillage foundations, Piles foundations, Caisson foundations, etc.	L1, L2, L3	15
<b>MODULE 2: Temporary Supporting Structures</b> Form work and shuttering for different types of RCC elements, trench timbering, scaffolding, shoring and underpinning.	L1, L2	10
<b>MODULE 3: Timber Doors and Windows</b> Timber: Structure and timber trees, varieties of timber, defects in timber, decay of timber, Qualities of timber for construction, seasoning, storage and preservation of timber, properties and strength of manufactured products, veneers, plywood, block boards, fiberboard, etc. • Doors: classification of doors; (a) paneled doors. (b) ledged and battened doors, (c) ledged, braced and battened doors, (d) framed, ledged, braced, and battened doors (e) flush doors • Windows: Timber windows; Casement window and its details	L1, L3, L4	20
<b>MODULE 4: Arches and Clay Product</b> Classification of Arches on the basis of geometrical shape, materials, construction techniques, viz. flat, segmental, semi-circular, Tudor, circular, elliptical, semi-elliptical, venetian, Florentine arches, etc. Illustration of terminology for arches, construction detailing and methods of centring. Clay Products: Flooring and roofing tiles, their properties, manufacturing process, laying of tiles, etc.. Clay products like terra-cotta, earthenware, stoneware, porcelain, mud – its stabilization and uses, etc.	L1, L3, L4	15

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### **Catalog Description**

The aim of this course is to provide the theoretical, practical and pictorial aspect of the architectural drawings to the students. The subject covers concepts of metric drawings and development surfaces familiarize them with isometric and axonometric views and development of the surfaces of basic forms. The subject will be taught in congruence with the design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

### **Course Objectives**

The objective of this course is:

- To familiarize the students with theoretical, practical and pictorial aspects of architectural drawings.
- To develop the perception and presentation of simple architectural forms and buildings.
- To introduce the development of the basic forms in architecture.
- To equip the students with visualization and surface development of complex forms.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Recognize the need to combine the use of manual drawing tools and techniques for drafting and freehand drawing for architectural design communication.

**CO2:** Produce 3- Dimensional Architectural drawings and forms by using drawings/sketching and manual techniques.

**CO3:** Produce surface development of the simple geometric forms.

**CO4:** Produce and visualize the surface development of the complex architectural forms.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Metric Drawing</b> Types, uses and advantages, Isometric, Axonometric and Pictorial views, Metric Drawing and projection and their Dimensioning, Metric of plane figures composed of straight lines, Metric of circles, Metric of simple and complex block.	L1, L2, L3	06
<b>MODULE 2: Isometric and Axonometric Drawings</b> Preparation of Isometric and Axonometric views of the 3d composition of simple geometric forms, architectural manifestation and exploded Isometric of furniture and architectural plans.	L2, L3, L4	12
<b>MODULE 3: Development of Surfaces of simple form</b> Development of surfaces of cubes, prisms, cylinders, pyramids, cones and spheres.	L1, L2, L3	12
<b>MODULE 4: Development of Surfaces of complex composition of form</b> Development of surfaces of composition of cubes, prisms, cylinders, pyramids, cones and spheres.	L3, L4, L5	6

\***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### **Catalog Description**

The aim of this course is to provide practical learning in creative thinking. The course intends to build student interest in think creative and express freedom of expression in Art, Paintings, and model making. The design and creative thinking course helps analyze complex shapes, design and application of colour.

### **Course Objectives**

The objective of this course is to

- To introduce Art and appreciation its philosophies.
- To develop sensitivity towards sculpture and mural as an integral part of architecture.
- To familiarize with principles and theories of arts and architectural composition.
- To utilize the skills for rendering and paintings.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Create 2d, 3D Graphic forms, size, and their proportions

**CO2:** Create art forms with different mediums

**CO3:** Apply rendering techniques for indoor and outdoor painting.

**CO4:** Create life-long connection in one's pursuit for painting and other art forms

Modules	Blooms level*	Number of hours
<b>MODULE 1: Art and Philosophy</b> An introduction to the basic formal concepts in the two-dimensional arts and the principles of aesthetic organization. Using Shapes to construct aesthetically pleasing compositions	L1, L2, L3	9
<b>MODULE 2: 2D Compositions</b> An introduction to the basic formal concepts in the two-dimensional arts and the principles of aesthetic organization. Using Shapes to construct aesthetically pleasing composition	L1, L2, L3	9
<b>MODULE 3: Rendering</b> Rendering techniques, dot rendering, point rendering of still and live objects	L1, L2, L3, L4	9
<b>MODULE 4: Painting</b> Different types of painting styles and their masters and philosophy, Indoor and outdoor painting – Exercise involving Water colour – Water soluble colour pencil – Tempra – Acarali – Water soluble oil colour – Oil colour – Pen and ink – Brush – Air brush – Mixed mediums – Study of multi-colour and 3D effects from nature and built environment	L1, L2, L3, L4	9

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	History Of Architecture – I					
Co-requisites	Visual Arts – II					

### Catalog Description

The aim of this course is to make students familiar with the characteristics of the history of World and Indian Architecture, Urbanism, and the built environment from pre-history to the present; this course explores buildings and cities in their cultural, social, political, and religious contexts. This course will introduce the development of Indian architecture styles, provinces of India to cities and citadels to Mughal architecture and Islamic cities and monuments. The understanding of space development and structural quality based design approach would enable students to design smaller basic structures / houses with applicable structural principles and construction techniques in mind. Innovation in the use of conventional material in non-conventional way, as portrayed in the landmark historic buildings, would also help students to think out of the box.

### Course Objectives

The objective of this course is:

- To introduce architectural elements, forms, development trends, characteristics of construction techniques and technologies, buildings, civilization transformation over the time period.
- To familiarize the students with the socio-economic, historical, political influences of time period in Architectural development and identify the buildings and the major works of the period.
- To understand architecture as evolving within specific cultural contexts including aspects of politics, society, religion and climate
- To familiarize the students with the development of architectural form with reference to technology, style and character in Islamic Architecture, Provincial Architecture, Mughal Architecture, Islamic cities & Monuments.

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Analyze the contributing factors for the design development of the Islamic Architecture.

**CO2:** Identify and analyze the development of Sultanate Period.

**CO3:** Critically analyze the development of colonial styles in various provinces of India.

**CO4:** Identify and analyze the features of Mughal Period.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Islamic Period</b> Introduction and understanding of 'Islam's' philosophy and its consequent rituals and their interpretation in building type e.g. mosque, tomb, fort and their elements like domes, minarets, arch, squinch, landscape, motif, calligraphy, directionality, symmetry, geometry, material, court, water, patterns etc. <b>Islamic cities &amp; Monuments:</b> Concepts of city Planning of various Islamic towns example- Shahajahanabad, Fatehpur Sikri etc. Monuments – Qutab Complex, Tughlakabad, Taj Mahal, Gol Gumbaz, Golconda Fort, Jami Masjid etc.	L1,L2	3
<b>MODULE 2: The Sultanate Style</b> With reference to the Slave, Khalji, Tughlaq, Lodi and Sher Shah Suri (who ruled from Delhi), architecture at Punjab, Gujarat, Bijapur and Deccan.	L1,L2	3
<b>MODULE 3: Provincial Architecture</b> Development of colonial styles in various provinces of India like Punjab, Jaunpur, Gujarat, Bengal, Bijapur, Bidar and Deccan.	L1,L2	3
<b>MODULE 4: Mughal Architecture</b> The architecture of the Timurids in India-Babur, Humayun, Akbar, Jahangir and Shahjahan, which was the culmination of the Indo-Islamic paradigm. The proportions, structure systems, landscape, materials, scale and distinct features.	L1,L2	3

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Structure – I					
Co-requisites	Building Materials & Construction Technology – II					

### Catalog Description

The aim of this course is to enable students to understand various principles of strength of materials especially in case of beams, columns and trusses. The course covers deflection of beams, forces in members of truss, condition of equilibrium and displacement methods. The subject will be taught in congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

### Course Objectives

The objective of this course is

- To understand the basic principles of structural system so that it forms the basis for study of structural design.
- To help students to understand the basic principles of structural behavior and requirements of buildings with emphasis laid on the principles of various load distribution in beams and columns.
- To understand the basic principles of structural mechanics that would be pertinent to simple design elements and understanding the structural behavior of buildings.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Calculate deflection of beams through analytical method.

**CO2:** Analyze the resolution of forces as well as various study of various theorem related to equilibrium.

**CO3:** Explain force and bending moment diagrams.

**CO4:** Calculate deflection in beams and trusses through graphic and conjugate method.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Deflection of Beams</b> Equation for deflection of beams, formula for maximum deflection under various loading conditions, shear stress in shaft, stiffness of a spring- leaf and helical spring. Column and struts – effective length, buckling load, short or long column, slenderness ratio, Rankine's formula, Euler's formula, dams and retaining walls, Rankine's theory for active earth pressure	L1, L2	09
<b>MODULE 2: Forces in Members Of Trusses</b> Types of Trusses, Method of Section, Method of Joint, Analytical Method, Graphical Method, Analysis of Plane Trusses and Space Trusses	L1, L2	09
<b>MODULE 3:Statically Determinate and In-determinate Structures</b> Condition of equilibrium, compatibility conditions, simple and compound systems, linear and nonlinear systems, sway and sinking, analysis of statically determinate formulas.	L1, L2	09
<b>MODULE 4: Displacements – Geometric Methods</b> Deflected shapes, moment area method, conjugate beam method, deflection of trusses – graphical method.	L1, L2	09

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	<b>SURVEYING AND LEVELLING (ARC2212)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	1	0	1	1	3
Pre-requisites/Exposure	Structure – II					
Co-requisites	Structure – III					

### **Catalog Description**

The aim of this subject is to make students understand the ground situation before preparing an architectural design of any type of structure. The survey maps will be foundation documents for selection of technique of design based on ground elevation and contour pattern of proposed site. This subject covers the conceptual theory and practical application of surveying and leveling on ground with help of various survey concepts, techniques, methods and instruments. The subject will be taught is congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

### **Course Objectives**

The objective of this course is

- To understand the role of surveying and leveling in architecture
- To introduce the techniques and equipment for land surveying.
- To understand the practical surveying in the field.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Enable the students to understand land topography and its connection with surveying & leveling exercises.

**CO2:** Enable the students to understand the primary basic surveying techniques adopted in past years.

**CO3:** Enable the students to understand essentials parameters (basic and advanced) of leveling with various instruments & methods and concept of contouring.

**CO4:** Enable to do contour and slope analysis for a building.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to surveying</b> Introduction to surveying, its practicality in the profession. Classification of various survey instruments, techniques & equipment. Reading of survey maps, understanding of features and undulations of ground. Scaling of survey measurements and errors in surveying. Concept of trigonometry, traversing & tachometry in surveying.	L1, L2	04
<b>MODULE 1: Measurements</b> Measurements in horizontal plane, linear measurements with chain & tape, setting-out & survey stations, survey accessories, survey lines, open & closed traverse, chaining & offsetting, direct & indirect ranging, log-books, field boundaries, field area estimation. Chain Surveying: Principles of survey, equipment required selection of station, methods of taking offsets. Compass Surveying: The prismatic compass, its construction and uses and other types of compasses.	L1, L2	09
<b>MODULE 3: Basic and advanced surveying techniques</b> Plane table surveying (equipment, methods, advantage & disadvantage, errors etc.), Theodolite Surveying (temporary & permanent adjustment, measuring of magnetic bearings, horizontal & vertical angles and Theodolite traverse & balancing closing error). Tachometric surveying (general instruments, different systems of tachometric measurements, stadia method). The concept of total station survey and its multi-functioning in surveying. Introduction to Use of DGPS, automated & digital surveying, G.P.S, Aerial Photography, etc.	L1, L2	14
<b>MODULE 4: Contours and Slope Analysis</b> Contouring methods & equipment, contour intervals, direct & indirect methods of contouring, block contour surveys, profile levelling, longitudinal & traverse cross sections, and gradients. Measurements along sloping landforms, principles, definitions, methods, instruments required for simple & differential levelling.	L1, L2	09

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

## Syllabus – Third Semester

	<b>ARCHITECTURAL DESIGN – III (ARC2301)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	3	1	6
Pre-requisites/Exposure	Architectural Design –II					
Co-requisites	Architectural Climatology					

### Catalog Description

The aim of this course is to involve formulation of design concepts and developing simple single storied load bearing structure. The semester focuses on the understanding of context and elements of built form in an existing setting. The projects would connect horizontal circulation reflecting their creative approach drawn from data analysis and climatic consideration to the physical setting. The subject will be integrated with Visual Arts, History of Architecture, Structure, Climatology, Water Supply and Sanitation.

***Design Exercise: Primary School, Restaurant, Nursing Home, Primary Health Centre, etc.***

### Course Objectives

The objective of this course is

- To develop sensitivity towards existing informal settings and elements of built space.
- To critique the materials, construction techniques and structural system used in the elements of built forms.
- To create an understanding of the inter relationships amongst various elements of architecture – form, function, space planning, user perception and behavior and culture.
- To understand the relationship between form and spaces and the importance of aesthetics.
- To enable the presentation of concepts through sketches and models and drawings.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Collect data from standards, case studies for the current project.

**CO2:** Analyze data collected with relevance to the current project.

**CO3:** Integrate learning from other allied subjects to the design proposal.

**CO4:** Complete the architectural project with all given requirements for the given project.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to the Design Problem</b> Introduction to the design problem. Case studies. Collecting relevant data for the given design problem. Synthesising and analysing the collected data.	L4.L5,L6	16
<b>MODULE 2:Site study and Area Programming</b> Site visit and Site analysis. Driving area requirements for the design exercise.	L4.L5,L6	16
<b>MODULE 3: Design Development</b> Relation to various functional aspects of the design problem. Use of bubble diagram, flow diagrams, zoning of site, etc. conceptual design. Finalization of design proposals – schematic 2D/3D single line/conceptual level site plan, floor plan, elevations, sections.	L4.L5,L6	20
<b>MODULE 4: Final design Proposals</b> Final developed to the scale drawings of Site Plan, Floor Plans, Elevations, Sections, Views. Detailed site plan with built and un-built spaces and landscaping features. Model of the proposed design	L4.L5,L6	20

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>BUILDING MATERIALS AND CONSTRUCTION TECHNOLOGY - III (ARC2302)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	1	0	2	2	5
Pre-requisites/Exposure	Building Materials & Construction Technology – II					
Co-requisites	Architectural Design– III					

### Catalog Description

The aim of this subject is to introduce students with the classification, types and details of construction of roofs. And to give complete knowledge about the various types of flooring and its construction details. To familiarize students with different types of vertical circulation possibilities. Types and construction details of all vertical circulation elements will be dealt with in detail. Students will also learn about water proofing methods and techniques at all building levels.

### Course Objectives

The objective of this course is

- To understand timber single and double roofs and timber floors.
- To comprehend the various modes of vertical circulation through live examples.
- To learn properties of various construction materials like waterproofing materials, clay used as flooring materials and timber used in the building industry.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** To understand timber single and double roofs.

**CO2:** To understand timber floor and partition

**CO3:** Make students aware of various types of staircases with reference to its placement, geometry and material used.

**CO4:** To understand importance, stages, methods and techniques of waterproofing,

Modules	Blooms level*	Number of hours
<b>MODULE 1: Timber: Roofs</b> Classification of roofs: (a) Single roofs; flat roofs, lean-to roofs, double lean-to, couple, close couple and collar roofs (b) Double or Purlin Roofs. (c) Trussed rafter roofs (d) Triple or framed roofs (e) Common roof coverings with its laying Waterproofing, rainwater gutter details. King post and Queen post roof trusses	L1, L2	15
<b>MODULE 2: Timber- Floor &amp; Partitions</b> Timber floors: construction techniques, types of timber floors: single, double and triple joist timber floors, Furnishing of floors with different floor finishes like cement, coloured cement, mosaic, terrazzo, tiles etc. special consideration for rubber and PVC flooring, methods of laying  Types of timber partitions: Single, double and flushed timber partitions	L1, L2, L3	20
<b>MODULE 3: Introduction to Vertical transportation and Staircases</b> Description of staircases, technical terminology involved, classification of staircases based on shape, material and its construction details. • Vertical section through staircases with detailing at various levels of staircases-Dog legged, Circular, Open Well, Spiral, Elliptical, etc. Classification also based on materials like wooden, steel and RCC • Staircase layout and its construction details, different elements of staircases, etc. • Design and details of construction of staircases in timber, stone, RCC and steel. • Cladding materials using traditional and contemporary materials	L1, L3, L4	10
<b>MODULE 4: Water Proofing Materials</b> • Waterproofing details in different levels: details in simple foundations, walls, roofs, sills, lintels and roofs in RCC, RB and steel, damp proof details of plinth, sill, lintel, and roof level. • Water proofing materials and systems for basement	L1, L3, L4	15

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>ARCHITECTURAL GRAPHICS SKILLS-III (ARC2304)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	1	1	3
Pre-requisites/Exposure	Architectural Graphic Skills – II					
Co-requisites	Architectural Design – III					

### Catalog Description

The aim of this course is to develop essential manual skills such as proficiency in drawing, largely used as primary mode of communication of ideas in architectural design. Students will be introduced to a variety of tools and techniques for visual expression with emphasis on manual drawing. Architectural Graphics-II introduces advanced techniques for architectural drawing such as perspective projection, mix-media renderings etc. The course would help students identify suitable methods of representation and methods in different built environment scenarios.

### Course Objectives

The objective of this course is

- To familiarize the students with One Point Perspective visualization of architectural drawing.
- To familiarize the students with Two Point Perspective visualization of architectural drawing.
- To introduce a variety of tools and techniques for visual expression with emphasis on manual drawing.
- To introduce the geometrical method of producing shadows in Architectural Drawings.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Recognize the need to combine the use of manual drawing tools and techniques for drafting architectural design communication.

**CO2:** Apply the projected drawing method of exterior and interior perspective

**CO3:** Render the drawings in different mediums.

**CO4:** Draw views demonstrating the play of light and shadows.

Modules	Blooms level*	Number of hours
<b>MODULE 1: One Point Perspective Drawing</b> One perspectives of combination of geometrical forms, Building exterior and interior perspectives.	L3, L4	12
<b>MODULE 2: Two Point Perspective Drawing</b> Two perspectives of combination of geometrical forms, Building exterior and interior perspectives. Introduction to three-point perspective and basic exercises based on the same	L3, L4	12
<b>MODULE 3: Rendering</b> Rendering perspectives in different media (Dry and water based color and ink etc.). Presentation techniques in different types of rendering and materials. Variation in color/ ink, as per light position. Use of basic plantation, vehicles etc to introduce scale to building perspectives.	L4,L5	6
<b>MODULE 4: Sciography</b> Values in shades and shadows, constructing plan shadows (point, line and plane), Constructing shadows in elevations (Point, line and Plane). Short- cut methods for constructing shadows. Introduction of sciography in perspective drawings.	L4,L5	6

### Catalog Description

The aim of this course is to provide practical learning in creative thinking. The course intends to build student interest in think creative and express freedom of expression in Art, Paintings, and model making. The design and creative thinking course helps analyse complex shapes, design and application of colour.

### Course Objectives

The objective of this course is

- To introduce the concept of perspectives and perspective drawings.
- To develop architectural skills of perspectives
- To familiarize with principles and theories of arts and its appreciation techniques.
- To introduce the concept of shades and shadows in architecture drawing.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Appreciate art and art works and re-create them in form of logos, symbols, etc.

**CO2:** Create perspectives for surroundings and buildings

**CO3:** Understand the importance of shading devices in architecture

**CO4:** Understand the role of shades and shadows in building construction

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Art Appreciation</b> Graphic representations – Visual composition and Abstraction- Exercises involving Logo design, collage, calligraphy and printing.	L1, L2, L3	9
<b>MODULE 2: Perspective (Free-Hand)</b> Free-hand perspective drawing and rendering of imagined objects, in pencil and pen/ink. One and two point perspective drawings of solids and of different room	L1, L2, L3	9

interiors.		
<b>MODULE 3:Perspective (Free-Hand)</b> Free-hand perspective drawing of complex composition of solids. One and two point perspective view of the exterior of the building with understanding of the basic human proportion and scale. Introduction to three point perspective.	L1, L2, L3, L4	9
<b>MODULE 4: Sciography</b> Values in shades and shadows, Constructing plan shadows (point, line and plane), Constructing shadows in elevations (Point, line and Plane). Short- cut methods for constructing shadows Presentation techniques in different types of rendering techniques and materials.	L1, L2, L3, L4	9

### Catalog Description

The aim of this course is to make students aware of different style of architecture of various regions. The architecture of the world can be categorized as per the timeline of the respective regions of the world with the ancient civilizations of the world with a theoretical framework and the prominent people of architecture who have significantly contributed in the establishment of major distinct architectural styles and features thereby, resulting in a holistic approach and comprehensive and exhaustive analysis of the world architecture.

### Course Objectives

The objective of this course is

- To identify different styles of historic architecture.
- To familiarize with the socio-economic, historical, political influences of time period in Architectural development.
- To identify prominent / important historic buildings by their components / style of design

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Describe prominent / important historic buildings

**CO2:** Analyze the contributing factors for the design development of different styles

**CO3:** Identify and describe the characteristics of the Roman Kingdom, Roman Empire, and Imperial Rome.

**CO4:** Design buildings in the historic architectural styles.

Modules	Blooms level*	Number of hours
---------	---------------	-----------------

<p><b>MODULE 1: Introduction to Mesopotamian and Egyptian Architecture</b></p> <p>Introduction to Mesopotamian civilizations, their social systems and cultures</p> <ul style="list-style-type: none"> <li>• Salient building types – Mesopotamian: <ul style="list-style-type: none"> <li>• Ziggurats and their development – White Temple, Ziggurat of Ur, Urnammu and Khorsabad</li> <li>• Generic Temple Layout - Temple Oval and Khafaje</li> <li>• Palace Complex/Citadel of Khorsabad, Nebuchadnezzar's Babylon, Persepolis</li> </ul> </li> <li>• Introduction to Egyptian civilization, their social systems and cultures</li> <li>• Salient building types – Egyptian: <ul style="list-style-type: none"> <li>• Temples &amp; temple complexes - Cult Temple and Mortuary Temple</li> <li>• Mastaba – development and typical components</li> <li>• Pyramids – Complex of Zoser, Pyramid of Cheops and Cephren, Standard mortuary complex layout of pyramids</li> </ul> </li> </ul>	L1, L2	6
<p><b>MODULE 2: Greek Architecture</b></p> <ul style="list-style-type: none"> <li>• Introduction to Greek civilization, their social systems and cultures</li> <li>• Classical Order – Doric, Ionic, Corinthian</li> <li>• Salient building types: <ul style="list-style-type: none"> <li>• Temple types on basis of column layout – case example of Acropolis, Athens</li> <li>• Discussion of Hellenic Temple (Parthenon, Athens) versus Hellenistic Temple (Athena Polias, Priene)</li> <li>• Public Buildings and Square – Agora, Stoa, Prytaneum, Bouleuterion, Tholos, Gymnasium, Theatre</li> </ul> </li> </ul>	L1, L2	6

	<b>STRUCTURE - III (ARC2308)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure – II					
Co-requisites	Building Materials & Construction Technology – III					

### Catalog Description

The aim of this course is to understand the ground situation before preparing an architectural design of any type of structure. In this course basic principles of structural mechanics that would be pertinent to simple design elements and understanding the structural behavior of buildings. The survey maps will be foundation documents for selection of technique of design based on ground elevation and contour pattern of proposed site. This subject covers the conceptual theory and practical application of surveying and leveling on ground with help of various survey concepts, techniques, methods and instruments.

### Course Objectives

The objective of this course is

- To understand an informal choice regarding the most appropriate structural system for the building design due to different types of loading.
- To provide a basic understanding about the structural modeling and research techniques in the field of Architecture.
- To understand the role of surveying and leveling in architecture and will be introduced to the techniques and equipment's for land surveying.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the calculation of concentrated loads

**CO2:** Define the basis of arches and cables

**CO3:** Analyze Frame – With Lateral Translation and With No Lateral Translation of Joints by Slope deflection method and Moment deflection method

**CO4:** Explain frames with and without lateral translation of joints

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Loads and spans</b> Introduction, single concentrated load, udl longer than the span, UDL shorter than the span, two concentrated spans, series of concentrated loads, equivalent UDL	L1, L2	06
<b>MODULE 2: Arches and Cables</b> Basis of arches, cables and suspension in bridges, basic concept, frames with and without lateral translations of joints, general case – 1 story column slender in height and bases fixed or hinged.	L1, L2	08
<b>MODULE 3: Slope deflection method and Moment distribution Method</b> Slope Deflection Method and Moment Distribution Method, Development of Slope Deflection, Equation, Analysis Of Frame – With Lateral Translation And With No Lateral Translation Of Joints. MDM- Development of Method, Analysis Of Frames With Lateral Translation And With No Lateral Translation Of Joints, Symmetrical Frames, Multi Storey Frames, No Shear Moment Distribution	L1, L2	14
<b>MODULE 4: Kani's Method</b> Basic concept, frames with and without lateral translation of joints, general cases, story column unequal in height and bases fixed or hinged	L1, L2	08

	<b>ARCHITECTURAL CLIMATOLOGY (ARC2311)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Architectural Design -II					
Co-requisites	Architectural Design – III					

### **Catalog Description**

The aim of this course is to obtain knowledge required for understanding the influence of climate on architecture. This course helps to acquaint students to various concepts of climate and its use in architecture and makes them understand the concept of human thermal comfort as an essential function of the buildings in accordance with climate responsive architecture, ventilation and air movement. The students are exposed to the various design strategies for building in different types of climatic zones. The subject will be taught is congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

### **Course Objectives**

The objective of this course is

- To acquaint the students to various concepts of climate analysis and its use in Architecture.
- To familiarize students with human thermal comfort as an essential function of building.
- To familiarize students with the design and settings for buildings for daylight and factors that influence temperature.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Analyze factors affecting climate and its elements.

**CO2:** Analyze different climatic zones and their characteristics and design shelters in response to various climate zones. And analyze relation between transfer of heat between buildings and environment and design buildings for thermal comfort.

**CO3:** Analyze movement of sun in relation to earth and design shading devices. And analyze how to avoid sun's heat but utilize maximum daylight.

**CO4:** Analyze the effect of water bodies, vegetation and topography on micro urban climate. And Determine orientation of the building with respect to sun and wind for passive cooling and heating techniques for energy efficient, green and sustainable architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to climate</b> Importance of climate in architecture, factors affecting climate, elements of climate- Solar radiation, temperature, wind, humidity and precipitation and their measurement.	L1, L2	3
<b>MODULE 2: Climatic zones and human thermal comfort</b> Climatic zones, macro and micro climate, elements of climate and climatology data required for design of buildings in different climatic zones, Characteristics of tropical climate, macroclimate and microclimate. Study of various shelters in response to various climate zones in the tropical belt of India. Study of body's heat production and heat loss, comfort zone, bio-climatic chart and effective temperature, Isopleths.	L1, L2, L3, L4	6
<b>MODULE 3: Solar chart, shading devices and Daylight</b> Method of recording the position of sun in relation to earth, solar chart, azimuth, altitude, incidence, using shadow angle protractor for designing shading devices. Apparent movement of sun, solar radiation and intensity on surfaces and buildings in different latitude, sun path diagram, shading device and its design, heliodon and its use; Opaque building and heattransfer through its multi-layered envelope; Transparent surface and solar radiation on it, absorbance, reflectance, transmittance and remittance. Fenestration, lighting level and glare, amount of light, sky as a source of light and daylight factor, effect of different types of fenestrations, their size, shape in different planes with and without obstructions, Principles of day lighting in Tropics.	L1, L2, L3, L4	8
<b>MODULE 4: Site climate and passive design strategies</b> Microclimate, site climate data, local factors, presence of water body and vegetation, topography, special characteristics, urban climate cooling degree days and heating degree days. Orientation-sitting of building with respect to sun, wind and view, use of evaporative cooling, ground cooling-earth air tunnel, thermal mass-cavity wall, natural ventilation of attic space, night time cooling, reflective surfaces and radiant barrier, cool roof and green roof, solar radiation and sun space. Introduction to ECOTECT and Design Builder software.	L1, L2, L3, L4	7

*\*Bloom's Level:*

	<b>BUILDING SERVICES – I (ARC2312)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Building Materials And Construction Technology –II					
Co-requisites	Architectural Design – III					

### **Catalog Description**

The aim of this subject is to give architects an overview and introduction to Plumbing systems and architectural considerations and their co-ordination with other services and architectural designs. Architectural services are the systems installed in buildings to make them comfortable, functional, efficient and safe. The course covers Water Supply and Sanitation system design in the buildings

### **Course Objectives**

The objective of this course is

- To understand the need and importance of building services.
- To understand the water supply system at urban level.
- To understand the importance of sanitation and sewerage system.
- To understand the treatment process of waste water.

### **Course Outcomes**

On completion of this course, the students will be able to

- CO1:** Apply knowledge gained on water supply system in small buildings.  
**CO2:** Design sewage system for a residential building.  
**CO3:** Design drainage system at urban level.  
**CO4:** Prepare and understand principles of waste water management.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Water Supply</b> Need to protect water supply, Requirements of water supply to different types of buildings. Sources of water supply, Quantity and quality of water as per NBC. Conveyance and distribution of water, Overhead tank, Underground tanks, Pipe appurtenances. Hot and cold water supply system in a low rise and high rise buildings. Distribution system in campus, Pipes their size, Jointing and different fittings.	L1, L2	6
<b>MODULE 2: Sanitary Engineering</b> Purpose and principles of sanitation, Collection and conveyance of waste matter. Quantity and Quality of refuse, Design and construction of sewer's and sewer appurtenances. Garbage and sewage disposal. Sanitary appliances, Traps their variety, Pipes and joints, Sanitary pipes works below and above ground level.	L1, L2	6
<b>MODULE 3: Road and Drainage systems</b> Introduce to the basic concepts of municipal drainage system, road pattern at city level. Roof and surface water drainage. Rain water storage and water harvesting principles and methods.	L4, L5, L6	6
<b>MODULE 4: Waste Management System</b> Introduction of different type of wastes produced at Urban level. Its management skills and criteria's for collections, Disposal and treatment of wastes. Reduce–Reuse–Recycle, Waste collection, Treatment & disposal. Thermal treatment Dumps and Landfills. Biological waste treatment. Waste water treatment	L4, L5, L6	6

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

## Syllabus - Fourth Semester

	<b>ARCHITECTURAL DESIGN – IV (ARC2401)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	2	8
Pre-requisites/Exposure	Architectural Design – III					
Co-requisites	Building Materials & Construction Technology, Architectural Graphic Skills-IV					

### **Catalog Description**

The aim of this course is to make students familiar with the characteristics of site and the importance of site planning which includes built form and open space and context. This course will introduce methods of site analysis and research, new generative drawing techniques as well as architectural and disciplinary conventions associated with site work. The course is important as it will familiarize the students with architecture, landscape architecture, planning, structural and electrical engineering and the related issues that contribute to the built environment for our society. The projects would connect horizontal circulation reflecting their creative approach drawn from data analysis and climatic consideration to the physical setting.

***Design Exercise: Informal Market area, Haat, Showrooms, Museums, Library, etc.***

### **Course Objectives**

The objectives of this course are:

- To develop sensitivity towards existing informal settings and elements of built space.
- To critique the materials, construction techniques and structural system used in the elements of built forms.
- To create an understanding of the inter relationships amongst various elements of architecture – form, function, aesthetics, space planning, user perception and behavior and culture.
- To enable the presentation of concepts through sketches and models and drawings.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Collect data from standards, case studies for the current project.

**CO2:** Analyze data collected with relevance to the current project.

**CO3:** Integrate learning from other allied subjects to the design proposal.

**CO4:** Complete the architectural project with all given requirements for the given project.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to the Design Problem</b> Introduction to the design problem. Case studies. Collecting relevant data for the given design problem. Synthesising and analysing the collected data.	L4,L5,L6	20

<b>MODULE 2: Site study and Area Programming</b> Site visit and Site analysis. Driving area requirements for the design exercise.	L4.L5,L6	20
<b>MODULE 3: Design Development</b> Relation to various functional aspects of the design problem. Use of bubble diagram, flow diagrams, zoning of site, etc. conceptual design. Finalization of design proposals – schematic 2D/3D single line/conceptual level site plan, floor plan, elevations, sections.	L4.L5,L6	28
<b>MODULE 4: Final design Proposals</b> Final developed to the scale drawings of Site Plan, Floor Plans, Elevations, Sections, Views. Detailed site plan with built and un-built spaces and landscaping features. Model of the proposed design	L4.L5,L6	28

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>BUILDING MATERIALS &amp; CONSTRUCTION TECHNOLOGY – IV (ARC2402)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	1	0	2	2	5
Pre-requisites/Exposure	Building Materials & Construction Technology – III					
Co-requisites	Architectural Services					

### Catalog Description

The aim of this course is to develop understanding with RCC elements like column, beam etc. The knowledge about RCC is also enhanced through comprehension of RCC framed structures and reinforcement details in building elements like columns, beams, slab and lintels. The course gives complete knowledge about the various types of Cladding, false ceiling and surface finishes. Market survey and site visit studies shall be an essential part of the teaching – learning strategy.

### Course Objectives

The objective of this course is

- To make students aware of joining details of columns, beams and slabs.
- To develop the ability to analyze the building construction methods and their applications.
- To equip students about the methods of designing various structural members using reinforced cement concrete.

### Course Outcomes

On completion of this course, the students will be able to

- CO1:** Apply basic information about construction procedures and reinforcement detailing about RCC elements like Columns, Beams and Slabs.
- CO2:** Apply various materials and fixing details of surface cladding
- CO3:** Explain joinery and fixing details of false ceiling.
- CO4:** Describe uses of different surface finished in interior and exterior surfaces.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to RCC elements like Columns, Beams and Slabs</b> Reinforcement detailing of RCC building elements like columns, beams and slabs through sketches and site visits.	L1, L2	15
<b>MODULE 2: Cladding and Panelling</b> • Details of cladding of wall with stone, tiles, timber and steel framing • Construction of cavity wall with different thermal and acoustical system • Various types of panelling (glazed, wooden etc.), details for panelling	L1, L2, L3	20
<b>MODULE 3: False Ceiling</b> Advantages and disadvantages of False Ceiling, Detail understanding of Reflected Ceiling Plan, joinery and fixing details.	L1, L3, L4	10
<b>MODULE 4: Finishing Materials</b> SURFACE FINISHES: Paints and surface finishes; Composition, properties and methods of application of different types of paints: Oil, synthetic enamels, acrylic and other plastic emulsions and formulations, interior and exterior grade paints. Natural and synthetic clear varnishes, French polish. Cement based paints • FLOOR FINISHES: PCC, terrazzo, stone slabs, brick and terracotta tiles, Synthetic materials (PVC, Timber). Floors of industrial buildings & warehouses. Ceramic wall & floor tiles. • PLASTIC: Classification of plastic, moulding and fabrication, properties of plastic, use of plastic, PVC. Fiber glass. • MISCELLANEOUS MATERIALS: Cork, rubber, Gypsum, sealants, heat and sound insulation materials. • GLASS AND GLASS PRODUCTS: Plain, sheet, plate, textured, laminated, wired and shock resistant glass. Glass blocks, glass tiles, mirrors, heat reflecting glasses and Glass wool.	L1, L3, L4	15

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

Co-requisites	Structure – V					

### Catalog Description

The aim of this course is to enable students to understand various principles of strength of materials especially in case of beams, columns and trusses. The course covers deflection of beams, forces in members of truss, condition of equilibrium and displacement methods.

### Course Objectives

The objective of this course is

- To understand rational basis of the design of reinforced concrete members and structures through advanced materials and structural behavior.
- To enable students to undertake problems, identify, formulate and solve the critical thought, rational inquiry and self-directed learning.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Describe the building materials used in construction such as cement, fine and coarse aggregate, reinforcement, etc.

**CO2:** Design a slab for given building floor for different end support conditions.

**CO3:** Design a column for given axial load and moments.

**CO4:** Develop understanding about complex foundations and the construction techniques involved.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Material and Design Method</b> Cement, Fine and Coarse Aggregate, Water, Admixtures, Reinforcements, Properties and Tests For Concrete, WSM Vs LSM, Soil Mechanics, Basis Of Soil Properties, Soil Type, Bearing Capacity, Terzaghi's And Skempton's Formula.	L1, L2	09
<b>MODULE 2: Beams and Slabs Using LSM and WSM</b> Singly Beam, Doubly Beams, T, L Beams, Slabs – Rectangle, Circular, One Way, Two Way, Flat. Using IS 456:2000 And SP -16, Continuous Beams and Slabs.	L1, L2	09
<b>MODULE 3: Column and Footing</b> Short column and long column, minimum eccentricity, column subjected to combined axial load, uniaxial bending and biaxial bending, design of footing.	L1, L2	09
<b>MODULE 4: Pile and Raft Foundation</b> Design Of RCC Piles, Pile Caps, Raft Foundation (Theory)	L1, L2	09

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

### Catalog Description

The aim of this course is to understand the available software technologies and their applications in Architectural Designs. In order to enable students to use computer systems, software's and hardware, teaching necessary digital skills are important aspect of the course. This course will help learners to prepare presentation drawings, generating 2D and rendered views in a short time. This would finally help them in Design studio to develop conceptual as well as final Plan.

### Course Objectives

The objective of this course is

- To introduce the students with the Photo editing software.
- To develop theoretical understanding of AutoCAD and its relevance in Architecture.
- To practice various commands of the Autocad.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Develop understanding of minimum system requirements and computer aided drafting

**CO2:** Comprehend Photoshop and its parameter as tools and its application in architecture

**CO3:** Comprehend computer aided drafting and its parameter as tools and its application in architecture

**CO4:** Evaluate CAD techniques for quicker methods and presentation skills

Modules	Blooms level*	Number of hours
<b>MODULE 1:Introduction to Use of Photo Editing Software</b> Introduction to Photo editing, montaging as well as preparation of 2-D presentations.	L1, L2	2
<b>MODULE 2:Workshop on Photo Editing Software</b> Practice on Photo editing as well as preparation of 2-D presentations onPhotoshop.	L1, L2	6
<b>MODULE 3: Introduction to Auto Cad (2-D) Software</b> Introduce to the drafting software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Introduce to 2D-3D drawing concepts. Students learn the ability to Drafting, Editing and modification work to be done in the graphic presentation. Practice on the various AutoCAD commands through software User Interface. Conduct 2D Skills Workshop to train the students. Introduce to the draft skills and minimize errors in the presentation skills.	L1, L2,L3	8
<b>MODULE 4:Workshop on 2D drafting</b> Practice on the various Auto Cad commands through software User Interface. Conduct 2D Skills Workshop to train the students. Introduce to the Modelling skills and minimize errors in the presentation skills.	L4, L5, L6	20

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

### **Catalog Description**

The aim of this course is to provide practical learning in creative thinking. The course intends to build student interest in think creative and express freedom of expression in Art, Paintings, and model making. The design and creative thinking course helps analyse complex shapes, design and application of colour.

### **Course Objectives**

The objective of this course is

- To Create 2d, 3D Graphical forms in form of sculptures, murals, etc.
- To study the principles and understand the importance of audio visuals and photography in presenting architectural drawings.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Create 2d, 3D Graphic forms, size, and their proportions

**CO2:** Create sculptural art forms with different mediums

**CO3:** Apply photography techniques for better presentations

**CO4:** Understand the importance of ergonomics in designing

Modules	Blooms level*	Number of hours
<b>MODULE 1: 3D Compositions</b> Basic components of 3-dimensional art, including subject, form, and content. Discussions centered on 3-dimensional design and concepts	L1, L2, L3	9
<b>MODULE 2: Sculpture</b> Different types of Sculpture, their masters and philosophy. Live scale murals and their uses in building with examples.	L1, L2, L3	9
<b>MODULE 3: Photography and Audio-Visual Presentation</b> Importance of photography, angles, views in field of art and architecture. Techniques to combine photography and audio into audio-visual presentations using softwares or in form of animated magazine.	L1, L2, L3, L4	9
<b>MODULE 4: Ergonomics and Furniture Design</b> Golden mean ratio, Principles of ergonomics and its importance in history of architecture. Studying furniture design through examples from Schools of Architecture. Exercises incorporating both terminologies.	L1, L2, L3, L4	9

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>HISTORY OF ARCHITECTURE - IV (ARC2415)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	History of Architecture - III					
Co-requisites	Visual Arts – IV					

### **Catalog Description**

The aim of this course is to make students familiar with the characteristics of the history of World and the built environment from pre-history to the present; this course explores buildings and cities in their cultural, social, political, and religious contexts. This course will introduce the development of World architecture styles from the early Christian era to the Gothic era. The understanding of space development and structural quality based design approach would enable students to design smaller basic structures / houses with applicable structural principles and construction techniques in mind.

### **Course Objectives**

- To introduce architectural elements, forms, development trends, characteristics of construction techniques and technologies, buildings, civilization transformation over the time period.
- To familiarize the students with the socio-economic, historical, political influences of time period in Architectural development and identify the buildings and the major works of the period.
- To understand architecture as evolving within specific cultural contexts including aspects of politics, society, religion and climate
- To familiarize the students with the development of architectural form with reference to technology, style and character in Byzantine Architecture, Romanesque Architecture, Gothic Architecture, Renaissance and Baroque Architecture.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Identify and analyze the construction of domes and pendentives in Byzantine Architecture.

**CO2:** Identify and analyze the various Gothic churches and their important architectural features.

**CO3:** Identify prominent historic building of Renaissance period.

**CO4:** Identify and analyze Baroque architecture and their important architectural features.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Byzantine Architecture</b> Contribution of Byzantine architecture in the development of structural system – dome construction over square plan, Adoption of Greek cross in church layout, Use of mosaic and mural in interior. Salient buildings – Santa Sophia, Istanbul; St. Mark's Cathedral, Venice.	L1, L2	6
<b>MODULE 2: Gothic Architecture</b> Introduction to society and culture of 1150 – 1350 AD in Europe. Development of Gothic church and its new elements: Pointed Arch window, Different arch types – lancet, equilateral, depressed, Trefoil arch, Cluster column and intersecting vault roof, Clerestory window and triforium, Flying buttress, Glazed window, stone and metal trellis, flamboyant window, rose window, Entrance of church. Salient buildings: Cathedrals of St. Dennis, Cathedrals of Chartres, Cathedrals of Notre Dame (Paris), Cathedrals of Reims.	L1, L2	6
<b>MODULE 3: Basic Introduction to Renaissance Architecture and its Classical Revivalism, Neo-Classicism</b> Introduction to society and culture of 1400 -1800 AD, Division of Renaissance architecture into Early, Mature and Late periods. Contribution in structural system, e.g., ribbed dome, lantern dome. Revival of classical orders and principles – Neo-Classicism	L1, L2	6
<b>MODULE 4: Baroque Architecture</b> Dynamism and systemization of Baroque architecture vitality and spatial richness with underlying systematic organization. Space as constituent element of architecture, as a complex totality and indivisible figure, comprising of interacting spatial elements based on inner and outer forces. Sensitivity to effects of texture, color, light and water. Study of important urban spaces and churches in Italy and Germany	L1, L2	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Building Materials And Construction Technology –III, Architectural Services- I					
Co-requisites	Architectural Design – IV					

### Catalog Description

The aim of this course is to give an overview and introduction of Noise Control, Acoustics, Gas installation and fire-fighting systems. In today's architectural environment, good acoustical design isn't a luxury – it's a necessity. This course deals with the science behind sound and its application to achieve desired acoustical performance in a specific building by using different building materials, systems and technologies.

### Course Objectives

The objective of this course is

- To introduce to the theory and practices of Acoustics and Noise reduction.
- To introduce various building elements and their application in the built environment.
- To get familiarized with Gas installation techniques and requirements
- To understand the importance of Fire safety in a building.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Describe the theory of acoustics and its implementations in buildings like Auditorium, Lecture halls, etc.

**CO2:** Describe the different types of noise, their transmission and the measure to isolate and control them.

**CO3:** Design Gas installation system at residential and non-residential buildings.

**CO4:** Describe the installation of Fire safety measures in a building.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Building Acoustics</b> Terminology and unit. Characteristics of audible sound – Propagation, Velocity, Frequency, Pitch, Quality/timbre, Loudness and Intensity. Behavior of audible sound in enclosures – Reflection, Absorption, Diffraction and Transmission of sound. Common acoustical defects and recommended remedies– Echo, Sound foci, Dead spots, Sound shadows, Resonance, Insufficient loudness, External noise and Reverberation. Sabine’s expression for calculation of Reverberation time. Absorbents and absorption coefficient. Acoustical requirements as per NBC	L1, L2	6
<b>MODULE 2: Noise Control</b> Noise and its types, Noise pollution. Sources of indoor noise, Indoor noise levels, Planning and design against indoor noise. Sources of outdoor noise, Traffic noise levels, Planning and design against outdoor (traffic & buildings in built-up area) noise. Identification of various sources of noise and recommendations to control them in various types of buildings e.g. – Residential, Educational, Hospital, Office, Hotels & Hostels, Industrial, Laboratories & Test houses, Miscellaneous buildings etc.	L1, L2	6
<b>MODULE 3: Gas Installation</b> L.P.G / Bio-gas installations, their location and layouts in residential and non-residential buildings	L4, L5, L6	6
<b>MODULE 4: Fire Safety System</b> Causes and spread of fire. Fire triangle/ tetrahedron. Classes of fire. Combustibility of materials and fire resistance. Building Plans, Drawings, and Schematics. Fire Detection Equipment- Heat &Smoke sensors. Fire Alarm Systems. Firefighting pump and water storage, Hose and hose fittings, Dry and wet risers, Automatic sprinklers. Fire Extinguishers - Portable fire extinguisher and other firefighting equipments. Means of escape, Fire escape, Fire doors and Water curtain. Passive means of fire fighting and building design criteria as per NBC.	L4, L5, L6	6

*\*Bloom’s Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

## Syllabus - Fifth Semester

	<b>ARCHITECTURAL DESIGN – V</b> <b>(ARC2501)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	2	8
Pre-requisites/Exposure	Architectural Design – IV					
Co-requisites	Architectural Graphic Skills - V					

### **Catalog Description**

The aim of this subject is to emphasize be on creative and rational skills for problem solving in architectural buildings on real site. Design-problem may focus on form follows function and horizontal and vertical zoning. The first step of the design phase is the schematic design. The schematic design is where the student will gathers information on the needs, style, and wants for the project and from there they will create design options. Then second phase will be Design Development In the design development, the students will take the schematic designs and develop them to an approved design concept. Design focuses to create a space that flows with its surroundings. Also it merges with the aesthetic and function of the structure.

***Design Exercises: Sports Complex, Exhibition hall, Interpretation Centre, Showrooms, Cultural Centre, etc.***

### **Course Objectives**

The objective of this course is to

- To explore the design of buildings addressing the socio – cultural & economic needs of contemporary society.
- To enable the students to understand the importance of spatial planning within the constraints of Development Regulations in force for urban areas.
- To enable the students to design for large groups of people in a socially and culturally sensitive manner, taking into account aspects such as user perception, crowd behavior, large scale movement of people and identity of buildings.
- To emphasis on the importance of understanding the relationship between open space and built form, built form to build form and site planning principles involving landscaping circulation network and parking.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Design a Project involving multiple space utilization like Sports Complex, Exhibition hall, Interpretation Centre, Showrooms, Cultural Centre, etc.

**CO2:** Build with precision block models, study models, site models

**CO3:** Demonstrates architectural and composite structural system and services.

**CO4:** Communicate through drawings or models.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction</b> Design problem may be introduced, Site visit, Site analysis, Designing the design programme.	L4, L5, L6	15
<b>MODULE 2: Development of Concept</b> Collecting and analysing data of various spaces, Area programming, Flow diagram, Single line graphics and study models.	L4, L5, L6	15
<b>MODULE 3: Design Development</b> Integrate the knowledge gained from previous theory based subjects like Building services, Building materials and Construction Technology, Structure, etc., and apply to detail out their design proposal.	L4, L5, L6	30
<b>MODULE 4: Final Design Proposal</b>	L4, L5,	36

The final design proposal is prepared after conducting various informal and formal reviews at individual and at group level. The drawing and detail physical model explaining the approach and consideration of urban setting to achieve the requirements with various other restrictions may be submittals.	L6	
--	----	--

	<b>BUILDING MATERIALS AND CONSTRUCTION TECHNOLOGY – V (ARC2502)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	2	5
Pre-requisites/Exposure	Building Materials And Construction Technology – IV					
Co-requisites	Architectural Services – III					

### **Catalog Description**

The aim of this course is to continue with metal as the main building material. The study is concerned with special doors and windows to steel doors, windows and partitions. The knowledge about RCC is also enhanced through comprehension of RCC framed structures and reinforcement details in building elements like columns, beams, slab and lintels. Students are familiarized with the types of metal shutters and partitions, doors and windows, their application and construction details in steel and aluminium sections. The subject should be integrated with ongoing subjects like Architectural Design and Building services.

### **Course Objectives**

The objective of this course is to

- To familiarize the students with various types of metal doors.
- To develop understanding about framed structure in terms of reinforcement and construction details.
- To familiarize students with doors and windows in steel and aluminum sections. Also integration of openings with partitions in steel and aluminum used in interior of buildings

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Define various types of door and windows used in different situations from day to day life.

**CO2:** Comprehend the details of metal doors.

**CO3:** Comprehend the details/ arrangements of reinforcement.

**CO4:** Evaluate the best suitable material and type of Door, Window and Partitions.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Special Doors and Shutters</b> Different types of doors; sliding, sliding and folding, revolving doors, collapsible shutters, rolling shutters, types of rolling shutters in conventional and contemporary materials. The installation, working and mechanism of such doors and shutter	L1, L2, L3	10
<b>MODULE 2: Metal Doors</b> Doors in steel, aluminum along with technical terminology involved. Types and varieties of available sections in steel and aluminum in market and their application in providing doors. Design considerations and construction details in congruence to IS codes and manuals provided by CPWD and other organizations.	L1, L2, L3	10
<b>MODULE 3: RCC Details of Framed Structures</b> Reinforcement and design details of Footings, Columns, beams, slab and lintels. Buttresses and Retaining Walls: Details of construction of Buttresses and retaining walls.	L1, L2, L3, L4	20
<b>MODULE 4: Metal Windows and Partitions</b> Windows and Partitions in steel, aluminum along with technical terminology involved. Types and varieties of available sections in steel and aluminum in market and their application in providing windows and partitions. Design considerations and construction details in congruence to IS codes and manuals provided by CPWD and other organizations.	L1, L2, L3	20

### **Catalog Description**

The aim of this course is to enable students to design steel structures and also an overview of alternative building materials. The course covers knowledge of materials such as cement, aggregate, grades of concrete, steel structures. The course would enable students to design simple RCC structures and their basic components, viz, columns, beams, slabs and staircases. This course covers staircase design, retaining wall, portal frames, masonry structures, pre-stressed and post stressed concrete.

### **Course Objectives**

The objective of this course is

- To understand the analysis of in-determinant structures and their use in field in greater depth.
- To design different types of staircase with various materials.
- To make students aware of column footing.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Design a dogleg staircase for given stair well space in residential or public building.

**CO2:** Explain the alternatives of long span structures.

**CO3:** Apply composite materials for masonry works.

**CO4:** Summarize the conceptual idea behind the development of pre-stressed structural component for general use.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Design of Staircase and Retaining Wall</b> General Features, Types of Staircase, Distribution of Loading on Stairs, Wall Proportions, Design Principles, Counterfort Retaining Walls.	L1, L2	09
<b>MODULE 2: Portal Frames</b> Design of Portal Frames with Hinged Base, Design of Portal Frames with Fixed Base, Structural Analysis and Design of Grid Floor, Slab Culvert Rectangular – Beam Deck.	L1, L2	09
<b>MODULE 3: Masonry Structures</b> Introduction, Masonry Walls, Design of Wall and Column Footing	L1, L2	09
<b>MODULE 4: Design principles and high-rise structures</b> Elements of Pre-Stressed and post tensioning Concrete, Principles and System, Loss, Analysis and Design of Pre-Stress and post tensioned Beam.	L1, L2	09

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	<b>COMPUTER APPLICATIONS- II</b> <b>(ARC2513)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	1	0	1	1	3
Pre-requisites/Exposure	Computer Applications - I					
Co-requisites	Landscape Design					

### Catalog Description

The aim of this subject is to introduce techniques for further refinement of computer generated graphics covered in the previous semester. In addition to that, this course also trains students for developing photorealistic modeling using popular software in the field of architecture. Advanced technologies and concepts using computers as an essential tool are also introduced such as Building Information Modeling. This course equips students with soft skills which increase their productivity and expression in design related subjects.

### Course Objectives

The objective of this course is

1. To introduce and make students learn about graphic presentation tools
2. To introduce Sketch up as 3D drafting software.
3. To introduce Revit as 3D drafting software and its allied rendering plugins.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Prepare building design through sketch up software..

**CO2:** Prepare building design through revit software.

**CO3:** Render the drawings in various rendering plugins.

**CO4:** Train others in various types of softwares such as revit, sketch up.

Modules	Blooms level*	Number of hours
<b>MODULE 1:Introduction to SketchUp (3-D) Software</b> Introduce to the Sketch up 3D software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Introduce to 3D drawing concepts. Students learn the ability to Model, Editing and modification work to be done in the graphic presentation.	L1, L2	12
<b>MODULE 2:Introduction to Revit (3-D) Software</b> Introduce to the Revit 3D software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Students learn the ability to Building Information Modeling.	L4, L5, L6	8
<b>MODULE 3:Introduction to Rendering Plugins</b> Introduce to the Lumion and Twilight Render software for the Rendering.	L1, L2	4
<b>MODULE 4:Workshop</b> Practice on the various Revit and Sketch Up commands through software User Interface. Conduct 3D Skills Workshop to train the students. Introduce to the Modelling skills and minimize errors in the presentation skills.	L4, L5, L6	12

\***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>THEORY OF ARCHITECTURE – I (ARC2517)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	History of Architecture					
Co-requisites	Architectural Design – V					

### Catalog Description

The aim of the course is to provide the fundamental concepts of design, elements of design & theory of design with their application in design projects. Also this course will introduce the works of great master's like- Frank Lloyd Wright, Le-Corbusier, Louis Sullivan etc. with the reference of National and International case studies.

### Course Objectives

The objective of this course is

1. To have knowledge of Roman, Romanesque, Baroque, Colonial style of architecture.
2. To understand, different architectural theories given by practicing architects.
3. To understand the elements of architecture
4. To introduce the work of Indian Architects like- Charles Chorra, B.V. Doshi, Raj Rewal

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain basic architectural features of public buildings in Britain and France.

**CO2:** Knowledge about different theories like- Five points of Architecture by Le-Corbusier

**CO3:** Differentiate building materials and construction technology adopted in high rise structures.

**CO4:** Students will be able to discuss the work of B.V. Doshi & Raj Rewal

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Historical study</b> Purity of form with structural honesty obtained in different periods – Roman, Romanesque, baroque, Colonial Architecture etc. leading to modern Architecture. Study of important palaces and public buildings in Britain and France.	L1, L2	6

<b>MODULE 2: Architectural Theory</b> Discuss the evolution and development in design process from past to present. Discuss the principles and Elements of design followed in buildings in past and how the trend changed over the period as per demand. Compare the buildings of past with the present and study the technological, form, shape, design, planning and construction material etc. from earlier days to present day	L1, L2,	6
<b>MODULE 3: Modern Architecture</b> Belief in creation of “new” and “ideal” world through the fundamentals of true and original. Origin of geometry, nature, simplicity, abstraction, non-objective, construction and technology available at that times. Equating technology and progress with present functionalism and appropriateness. Works of great masters – Frank Lloyd Wright, Le-Cobusier, Alvar Alto, Mies Vender, Louis Kahn, Louis Sullivan, Edwin Lutyen etc.	L1, L2,L4	6
<b>MODULE 4: Great Masters of the period</b> Works of the great masters of the period in India i.e.- Charles Chorrea, B.V. Doshi, Raj Rewal, Achyut Knvinde, Hafeez Contractor etc.	L1, L3, L4	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Building Materials And Construction Technology –IV, Architectural Services- II					
Co-requisites	Architectural Design – V					

### **Catalog Description**

The aim of this course is to introduce the basic concepts of Electrical system design at the building planning level. Building services engineers are responsible for the design, installation, and operation and monitoring of the mechanical, electrical and public health systems required for the safe, comfortable and environmentally operation of modern buildings. The course module can help students to understand the basic concepts of electrical and mechanical circulation systems to make the building comfortable, functional, efficient and safe for use.

### **Course Objectives**

The objective of this course is

- To familiarize the student with theoretical and practical aspects of Electrical Systems and Components of Home Electrical Design.
- To develop perception regarding the various norms and standards for Electrical Systems and Lighting.
- To increase knowledge capacity of the students in the, HVAC system and Ventilation.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Discuss the active and passive components of Electrical system and various principles.

**CO2:** Develop understanding for Electrical and illumination system for Small building.

**CO3:** Discuss the active and passive components of HVAC and their underlying principles.

**CO4:** Discuss the importance of ventilation systems in buildings.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Electrical System</b> Terminology and architectural symbols (as per NBC/NEC) for electric installations in buildings. Need to generate and save electricity, transmission and distribution of electricity (single and three phases), procuring service connection. Familiarization to various lighting accessories, wires and cables, metering, distribution panels / boards etc. for single and three phase supply. Basic considerations. Various types of internal wiring systems e.g. cleat, casing and capping, batten and conduit (surface & concealed). Introduction to various types of protection devices e.g. switches, fuses and circuit breakers.	L1, L2, L3	6
<b>MODULE 2: Lighting and Illumination</b> Terminology and unit. Light and its characteristics – scattering, propagation, transmission, reflection, absorption, refraction and dispersion of light. Different types of source of lights: Thermal radiators - Incandescent, Halogen. Discharge lamps– Low pressure (fluorescent, compact fluorescent, sodium, cold cathode neon), High pressure (mercury, metal halide, sodium). New technologies - LED, Fiberoptics. Luminaries – Types of Luminaries – Indirect, Semi-indirect, General diffusing, Semi-direct and Direct. Types of illumination schemes e.g. Ambient, Task, Focal and Decorative etc. Design considerations for illumination Schemes. Methods for lighting calculation – Watts per square meter, Light flux and Point to point method.	L1, L2, L3	6
<b>MODULE 3: HVAC</b> Introduce to the basic concepts of Air Conditioning, function, scope and purpose. Share relevant Indian BIS and ASHRAE standards. Study relationship of Human Comfort, Dry/Wet/Dew Bulb Temperature, Climatology principles, Psychrometric Chart Analysis, and study HVAC design considerations in typical building case	L1, L2, L3	6
<b>MODULE 4: Ventilation</b> Introduction of the importance on ventilation in a building. Types and means of ventilation systems. Natural ventilation, Stack effect, Direct and Indirect ventilation, Placement of windows and openings.	L1, L2, L3	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	History of Architecture, Architectural Design – III					
Co-requisites	Theory of Architecture					

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in psychological and sociological aspects which are of concern to Architecture. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding society and various built forms produced by society. The course will also provide the students hands-on cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross fertilization with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To understand the basic principles of psychology, sociology and culture of settlement.
- The course intends to study and understand the typical components of city in order to appreciate how these elements contribute to the quality of life of urban communities.
- To familiarize students with decisive strategies that brings inclusivity and equality in the designs of built forms.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Develop a relationship between man and his larger social environment, with special emphasis on aspects that are likely to affect intervention in or creation of, the built environment (predominantly urban)

**CO2:** Develop a language and vocabulary for discussions/ analysis on the sociological/ psychological dimensions of architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Psychology, Sociology and Built Environment</b> Basic introduction to various critical social aspects; Role of psychology in architecture; Role of sociology in built environment; Determinants of sociology- social structure, social status, social control, social institutions, social mobility; Inclusive Built Environment; Barrier free designs and built environments; Various case studies related to gender and architecture, community development- community response towards development strategy etc.	L1, L2	8
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Pre-requisites/Exposure	Environmental Sciences, Building Services-1, Building Services-2					
Co-requisites	Architectural Design, Building Services-3					

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in ecology, environment and sustainable aspects which are of concern to Architecture. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding ecology and various environmental problems faced by settlements. The course will also provide the students hands-on ecological and environmental studies of built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To understand the basic principles of ecology, environment and sustainable development.
- The course intends to study and understand the different components of city in order to understand how these elements contribute to environment quality.
- To establish the significance of the ecological issues, their impact and initiatives to address the same in the built environs to achieve sustainable development.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

- CO1:** Develop a relationship between man and ecology, will understand critical environmental issues and need to address the m by using advanced technology.

**CO2:** Produce reports and presentation.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Ecology, Environment and Sustainable Development</b> Basic introduction to ecology; Interrelation between natural and built environment; Importance of environment sustainability in built environment; Energy conservation, renewable sources: wind, solar, geo-thermal, bio-fuels; Materials minimizing, recycling, reducing energy content, etc; Other environmental issues related to solid waste management, water resources, air quality, storm water drainage etc; Various case studies related to traditional / vernacular buildings and settlements demonstrating relationship between climate, local material resources and settlement/ building forms.	L1, L2	8
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in computer applications and advance technologies which are of concern to Architecture. The course will generally be conducted in the tutorial mode to encourage exploration and skill developments. The aim of this course is to provide students the exposure to understanding new technological innovations and their applications in field of architecture. The course will also provide the students hands-on experience of new software and applications. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through data base creation, analysis, presentation. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To familiarize students with use of computers in architecture and with impact of Information Technology on architectural knowledge system and practice.
- To critically explore current advancements in smart technologies available for sustainable built environments.
- To sensitize students about strategies for innovations by using latest technologies.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Comprehend the latest software and computer applications available in the field of architecture.

**CO2:** Explain new advanced technologies available for architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to computer applications and advance technologies</b> Basic introduction to information technology in architecture; Introduction to smart technologies in field of architecture; Applications of information technology in architecture; applications of smart technologies in architecture; Case studies related to use of information technology and advance technology in architecture and built environment. .	L1, L2	9
<b>MODULE 2: Project Work</b> Selection and understanding of project; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L3, L4, L5, L6	18

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

## Syllabus - Sixth Semester

	<b>ARCHITECTURAL DESIGN – VI</b>  <b>(ARC2601)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	2	8
Pre-requisites/Exposure	Architectural Design – V					
Co-requisites	Structure – VI					

### Catalog Description

The aim of this course is to make students familiar with the characteristics of site and the importance of site planning which includes built form and open space and context. This course will introduce methods of site analysis and research, new generative drawing techniques as well as architectural and disciplinary conventions associated with site work.

Design-problem may focus but not limited to a multi-functional, service (advanced services) oriented building like convention hall, shopping complex, resort, habitat centre, office building, mixed use occupancy buildings etc. in an urban setting including application of urban development, controls, codes and bye-laws.

### *Design Exercise: Mixed-use Building*

#### Course Objectives

The objective of this course is

- To create an awareness with regard to the design of green buildings and sustainable architecture.
- To inculcate the importance of services integration and construction in spatial planning in the context of design of High-rise buildings and service intensive buildings.
- To highlight on the importance of High rise buildings as elements of identity in urban areas and urban design principles that govern their design.
- To explore computer aided presentation techniques involving 2D and 3D drawings, walk through and models as required.

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Design a Project involving multiple space utilization like a multi-functional, service (advanced services) oriented building like convention hall, shopping complex, resort, habitat centre, office building, mixed use occupancy buildings etc.

**CO2:** Build with precision block models, study models, site models

**CO3:** Demonstrates architectural and composite structural system and services.

**CO4:** Communicate through drawings or models.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction</b> Design problem may be introduced, students may visit site for collecting context specific data for getting better understanding of real-life project details. The collected data may be analysed and presented for evaluation.	L4, L5, L6	30
<b>MODULE 2: Development of Concept</b> Flow diagram to explore relation of various spaces, bubble diagram for locating various zones on site, re-create for analysing spaces in all dimensions through block models and single line graphics and study models for choosing the right option.	L4, L5, L6	42
<b>MODULE 3: Design Development</b> Integrate the knowledge gained from previous theory based subjects like Building services, Building materials and Construction Technology, Structure, etc., and apply to detail out their design proposal.	L4, L5, L6	30
<b>MODULE 4: Final Design Proposal</b> The final design proposal is prepared after conducting various informal and formal reviews at individual and at group level. The drawing and detail physical model explaining the approach and consideration of urban setting to achieve the requirements with various other restrictions may be submittals.	L4, L5, L6	42

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>BUILDING MATERIALS AND CONSTRUCTION TECHNOLOGY – VI (ARC2602)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	2	5
Pre-requisites/Exposure	Building Materials And Construction Technology –V					
Co-requisites	Architectural Services – III					

### **Catalog Description**

The aim of this course is to familiarize students with steel structures for the construction of steel columns, beams, trusses etc. It also aims to make students aware of the construction fundamentals to construct steel framed structures and its applications. The studies proceed with sensitizing students about the construction details of the contemporary / modern methods of constructing factory sheds/ large span structures, etc with modern materials and technologies. This course also talks about alternative building materials used in construction of building. The course covers introduction of steel structures such as design of columns, beams and foundations.

### **Course Objectives**

The objective of this course is

- To introduce different alternative building materials.
- To introduce the concepts of designing with steel structures and its components.
- To elucidate the role of steel ropes/strands in pre-stressing in concrete members.
- To enable students to understand and design components such as staircases with steel structural members.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Explain different building material others than the regular one.

**CO2:** Analyze the components of roof structure.

**CO3:** Explain the alternatives of long span structures in steel.

**CO4:** Compare the various types of steel roofing systems.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Alternative Building materials</b> Different types alternative Building materials like Fly ash bricks, Concrete blocks, Mud construction, energy efficient materials, etc.	L1, L2, L3	15
<b>MODULE 2: Steel Structures</b> Construction of steel structures, Details of Roof and roof trusses , Water proofing and rain water disposal from roofs, Steel columns, portal frames, etc., North light truss, tubular monitor roof truss	L1, L2, L3	20
<b>MODULE 3: Modern Factory Shed/ Large Span Construction</b> Introduction to a wide range of modern building construction systems incorporating the use of metals like steel, aluminum and composite materials. Introduction to modern materials for roof covering, supporting structures.	L1, L2, L3, L4	10
<b>MODULE 4: Multi Storied Steel Framed Structures</b> Introduction to Multi- storied steel frame structures connections and their components, Steel Monitor Trusses, Space Frames	L1, L2, L3, L4	15

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>STRUCTURE - VI (ARC2609)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure – V					
Co-requisites	Building Materials & Construction Technology – VI					

### Catalog Description

The aim of this course is to enable students to design simple RCC structures and their basic components viz, columns, beams, slabs and staircases. This course will help student to understand RCC structures and its application in consecutive design project. The course covers limit state method and working stress method, partial safety factor, stress and strain relationship for concrete and steel, design of simply reinforced L&T beams, RCC columns and beams, foundation and footings.

### Course Objectives

The objective of this course is

- To understand the analysis of intermediate structures and their use in field in greater depth.
- To design simple elevated water tanks
- To understand the application of RCC structure in consecutive design project.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Describe Three Moment theorem and their application in fixed and continuous beams.

**CO2:** Analyze the structural geometry based on strength and stability criteria.

**CO3:** Design the effective use of structural systems for complex architectural need.

**CO4:** Design the effective use of Truss structure for residential and commercial purpose.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Theory of Beams and Frames</b> Continuous beams, curved beams, portal frames, multistory building frames.	L1, L2	09
<b>MODULE 2: Elevated Water Tanks</b> Introduction of Tanks, Conical or Funnel Shaped Tanks.	L1, L2	09
<b>MODULE 3: Shells and Floors</b> Shells, Hyperbolic, Parabolic, Folded Plates, Grid or Coffered Floors, Girders.	L1, L2	09
<b>MODULE 4: Truss</b> Design principles of Truss Roof, Truss for Residential use, Truss for commercial use, Truss for long span structure like Railway shed, hanger etc.	L1, L2	09

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

	<b>SITE PLANNING AND LANDSCAPE (ARC2617)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	1	1	3
Pre-requisites/Exposure	Architectural Design - IV					
Co-requisites	Architectural Services - III					

### Catalog Description

The aim of this course is to make the students understand the role of landscape architecture in the creation of better environments. This course shall have a direct application in the design studio of the same semester as well as in the Thesis. The course covers basic introduction to landscape architecture, landscape graphics, planting design. This course will help students to understand the concepts of landscape architecture and to study and analyze site in relation to landscape design and be able to design and detail various architectural and planning landscape projects.

### Course Objectives

The objective of this course is

- To understand various types of Landscape and the role of natural and manmade landscape for Land Development;
- To provide different methods for site planning at regional and micro level;
- To understand landscape design as an allied field of architecture and planning;
- To understand process of landscape design for small and large areas.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain the role and scope of Landscape architect.

**CO2:** Identify the development processes and cycles in the urban landscapes.

**CO3:** Conduct a landscape analysis and evaluate it with required functions.

**CO4:** Develop a site plan with landscape design and relate with environment and ecology.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Elements and History of Landscape</b> Study of Landscape elements such as land, vegetation, water, earth & climate, Natural & manmade elements, etc. Principles of landscape design such as unity, simplicity, variety, balance, proportion, sequence, etc. Social and economic	L1, L2, L3	9

factors. Psychological considerations of spaces and enclosures. History of Landscape Architecture including natural & cultural factors of the place, development of landscape architecture through history in different parts of the world such as China, Japan, Europe, Italy, France, England, Persia, Egypt, Greece, Rome. Study of landscape architecture in Medieval period in India such as Mughal. Modern & Contemporary Landscape architecture. Cultural aspects of the landscape architecture with contextual understanding.		
<b>MODULE 2: Hardscapes, Softscapes and Urban Landscape</b> Hardscapes - pergolas, garden furniture, fences, rocks, masonry, paving & surfacing, roads & parking lots, walks & plazas; Softscapes such as plantation, turfing, water features. Design criteria for landscape design such as visual, functional, micro-climatic, ecological and aesthetic. Basic horticultural idea about plants, plant selection, planting design and care of plants; Urban Landscape - Characteristics and components of open space patterns in towns and cities (traditional and contemporary) basic types: streets, squares, plazas, gardens, ghats and maidans, public parks at district, local and neighbourhood levels; park systems; landscape design related to land-use, circulation networks and activity; street furniture as a component of urban landscape.	L1, L2, L3	9
<b>MODULE 3: Landscape Design and Services</b> Macro and micro-climatic considerations in landscape architecture. Effect of climate on landscape and various components of landscape on the microclimate. Landscape Services & Sustainability: Introduction; Outdoors lighting, surface water drainage, irrigation, soil management techniques.	L1, L2, L3	9
<b>MODULE 4: Landscape Aspects of Site Planning</b> Principles of understanding and evaluating and existing landscape; development as a response to constraints and opportunities offered by the site; the landscape concept and open space structure as a basic component of the site plan; The role of vegetation: environmental benefits, functional requirements, aesthetic considerations; typical situations and criteria for design with plants and selection of species; grading; in relation to existing contours, plinth levels, road alignment and storm water drainage; principles of cut and fill.	L1, L2, L3	9

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>THEORY OF ARCHITECTURE – II</b> <b>(ARC2618)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of approval:	2	0	0	0	2
Pre-requisites/Exposure	Theory of Architecture - II					
Co-requisites	Architectural Design - VI					

### Catalog Description

The aim of the course will be on understanding the main theoretical concepts in vernacular architecture. Key theoretical paradigms, methodologies and modes of enquiries will be introduced. Ability to comprehend some of the main theoretical moorings of 20th and 21st century in architecture, analyze built works and critically examine the ideas and view of practice they represent as a precursor to shaping one's own design approach.

### Course Objectives

The objective of this course is

- To acquaint students with knowledge of Vernacular Architecture.
- To understand the development of Architecture with time.
- To introduce the different theories prevalent related to Architectural Design.
- To equip the students with their own Design Philosophy.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain basic architectural features of Vernacular Architecture.

**CO2:** Apply the knowledge of demand and supply in profession as per need.

**CO3:** Apply the architecture theories in Architecture Design.

**CO4:** Develop their own Design Philosophy

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Vernacular Architecture</b> Vernacular architecture including primitive or aboriginal architecture; indigenous architecture; ancestral or traditional architecture; folk, popular, or rural architecture;	L1, L2	6

<b>MODULE 2: Architecture Growth</b> Understanding the Need, demand and supply in different periods by various great designers.	L1, L2	6
<b>MODULE 3: Architecture Theories</b> Theory and criticism, theories in relation to practice, writing and theory as design tools in professional practice.	L1, L2,L4	6
<b>MODULE 4: Architecture Philosophy</b> Theory as a basis of the student's personal philosophy as an architect	L1, L3, L4	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### Catalog Description

The aim of this course is to give architect an overview and introduction to escalators, lifts, mechanized parking. This course also covers about security surveillance systems of building using cameras. The course covers Elevators, lift, escalators, mechanized parking system, Mechanical ventilation system and security surveillance model.

### Course Objectives

The objective of this course is

- To discuss the working of escalators and lifts including location and criteria for their design.
- To develop an understanding of the advanced building services and their application in the design proposals of buildings of slight complex nature such as multistoried.
- To understand the principles and techniques related to mechanized parking and mechanized ventilation.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Comprehend the various modes of vertical circulation through live examples

**CO2:** Develop understanding for techniques and systems for Security and surveillance.

**CO3:** Apply principles of mechanized parking

**CO4:** Discuss the importance of ventilation systems in buildings.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Lifts and Escalators</b> Basic Principles of Elevators working, definitions, NBC's recommendations, location and service, Method of working, various shapes and sizes available,	L1, L2, L3, L4	8

sketches – plans, sections, elevations of different types of lifts including construction and installation details. Basic Principles of Escalator working, definitions, NBC's recommendations, location and service, Method of working, various shapes and sizes available, sketches – plans, sections, elevations of different types of escalators including construction and installation details.		
<b>MODULE 2: Security and Surveillance</b> Perimeter Protection - Barriers, Doors, Gates, Turnstiles and Fences. Intrusion Detection Sensors and Systems - Outdoor & Indoor. Introduction to Access Control Systems, Locks & Emergency Exits. Visitor Management Systems. Identification Systems – PIN, Card, Wireless systems and Biometric system. Security Lighting, Illumination including Infra-red. Understanding CCTV cameras - Pan, Tilt & Zoom mechanisms. Recording Systems – Digital and Analog Recording. Components of Basic systems.	L1, L2, L3, L4	8
<b>MODULE 3: Mechanical Parking</b> Basic Principles of Mechanized Parking system working, definitions, NBC's recommendations, location and service, Method of working, various shapes and sizes available, sketches of different types of parking	L1, L2, L3, L4	4
<b>MODULE 4: Mechanical Ventilation</b> Standard requirements of ventilation for different conditions of living and works. Conditions for comfort. Control of quality, quantity, temperature and humidity of air.	L1, L2, L3, L4	4

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Pre-requisites/Exposure	Architectural Design - V					
Co-requisites	Building Material and Construction Technology-VI					

### Catalog Description

The aim of this course is to prepare students for writing a paper based on secondary research and literature review and its oral and visual presentation. Students would be able to identify and go in depth into specific and appropriate aspects relating to the discipline of architecture and discuss how it is reflected in the realm of design. Students learn how to research a subject area through readings; learn description, analysis and synthesis of readings; citation of authors in their writing. The importance of the course is also in understanding what constitutes plagiarism research writing and in imbibing the ethics of publication. Literature review is seen as the first step in preparation of understanding research methods.

### Course Objectives

The objective of this course is

- To introduce research work to the students
- To identify a specific aspect relating to the discipline of architecture.
- To make them aware of the constitutes of plagiarism.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Identify research papers published in Journals for a study.

**CO2:** Apply the projected drawing method of exterior and interior perspective.

**CO3:** Organize a study based on literature survey

**CO4:** Apply research methods in case study and Develop ethics of publication

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Foundations of Research</b> Meaning, Objectives, Motivation, Utility of research. – Understanding the language of research – Concept, Construct, Definition, Variable. Research	L1, L2, L3	6

Process		
<b>MODULE 2: Problem Identification and Formulation</b> Research Question – Investigation Question – Measurement Issues – Hypothesis – Qualities of a good Hypothesis – Null Hypothesis & Alternative Hypothesis. Hypothesis Testing – Logic & Importance.	L1, L2, L3	6
<b>MODULE 3: Surveys and Sampling</b> Types of surveys in details for various types of research; Concepts of Statistical Population, Sample, Sampling Frame, Sampling Error, Sample Size, Non-Response. Characteristics of a good sample. Probability Sample – Simple Random Sample, Systematic Sample, Stratified Random Sample & Multi-stage sampling. Determining size of the sample – Practical considerations in sampling and sample size.	L1, L3, L4	6
<b>MODULE 4: Analysis, Interpretation of Data and Paper Writing</b> Univariate analysis (frequency tables, bar charts, pie charts, percentages); Layout of a Research Paper, Journals in Computer Science, Impact factor of Journals, When and where to publish. Ethical issues related to publishing, Plagiarism and Self-Plagiarism.	L1, L2, L3	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	History of Architecture, Architectural Design – III					
Co-requisites	Theory of Architecture					

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in psychological and sociological aspects which are of concern to Architecture. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding society and various built forms produced by society. The course will also provide the students hands-on cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross fertilization with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To understand the basic principles of psychology, sociology and culture of settlement.
- The course intends to study and understand the typical components of city in order to appreciate how these elements contribute to the quality of life of urban communities.
- To familiarize students with decisive strategies that brings inclusivity and equality in the designs of built forms.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Develop a relationship between man and his larger social environment, with special emphasis on aspects that are likely to affect intervention in or creation of, the built environment (predominantly urban)

**CO2:** Develop a language and vocabulary for discussions/ analysis on the sociological/ psychological dimensions of architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Psychology, Sociology and Built Environment</b> Basic introduction to various critical social aspects; Role of psychology in architecture; Role of sociology in built environment; Determinants of sociology- social structure, social status, social control, social institutions, social mobility; Inclusive Built Environment; Barrier free designs and built environments; Various case studies related to gender and architecture, community development- community response towards development strategy etc.	L1, L2	8
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Environmental Sciences, Building Services-1, Building Services-2					
Co-requisites	Architectural Design, Building Services-3					

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in ecology, environment and sustainable aspects which are of concern to Architecture. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding ecology and various environmental problems faced by settlements. The course will also provide the students hands-on ecological and environmental studies of built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To understand the basic principles of ecology, environment and sustainable development.
- The course intends to study and understand the different components of city in order to understand how these elements contribute to environment quality.
- To establish the significance of the ecological issues, their impact and initiatives to address the same in the built environs to achieve sustainable development.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Develop a relationship between man and ecology, will

understand critical environmental issues and need to address the m by using advanced technology.

**CO2:** Produce reports and presentation.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Ecology, Environment and Sustainable Development</b> Basic introduction to ecology; Interrelation between natural and built environment; Importance of environment sustainability in built environment; Energy conservation, renewable sources: wind, solar, geo-thermal, bio-fuels; Materials minimizing, recycling, reducing energy content, etc; Other environmental issues related to solid waste management, water resources, air quality, storm water drainage etc; Various case studies related to traditional / vernacular buildings and settlements demonstrating relationship between climate, local material resources and settlement/ building forms.	L1, L2	8
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Co-requisites	Architectural Design, Building Materials and Construction Technology					

### **Catalog Description**

The objective of this course is to offer opportunities in specialized or advance learning in computer applications and advance technologies which are of concern to Architecture. The course will generally be conducted in the tutorial mode to encourage exploration and skill developments. The aim of this course is to provide students the exposure to understanding new technological innovations and their applications in field of architecture. The course will also provide the students hands-on experience of new software and applications. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through data base creation, analysis, presentation. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### **Course Objectives**

The objective of this course is

- To familiarize students with use of computers in architecture and with impact of Information Technology on architectural knowledge system and practice.
- To critically explore current advancements in smart technologies available for sustainable built environments.
- To sensitize students about strategies for innovations by using latest technologies.
- To develop interdisciplinary understanding and sensitivities of future architects.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Students will be exposed to the latest software and computer applications available in the field of architecture.

**CO2:** Students will be aware of new advanced technologies available for architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to computer applications and advance technologies</b> Basic introduction to information technology in architecture; Introduction to smart technologies in field of architecture; Applications of information technology in architecture; applications of smart technologies in architecture; Case studies related to use of information technology and advance technology in architecture and built environment. .	L1, L2	9
<b>MODULE 2: Project Work</b> Selection and understanding of project; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L3, L4, L5, L6	18

## Syllabus - Seventh Semester

	<b>ARCHITECTURAL DESIGN - VII (ARC2701)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	2	8
Pre-requisites/Exposure	Building Materials & Construction Technology – VII					
Co-requisites	Advanced Building Services					

### **Catalog Description**

The aim of the course is to emphasize on creative and rational skills for problem solving in architectural buildings on real site. Design-problem may focus on multifunctional, multi storied structure and services with application at site and building level like multi star hotels, multi specialist hospitals, high rise mall etc. in an urban setting including application of urban development controls, codes and bye-laws. The design proposal will be taken up with byelaws, master plan or any other restriction on large site.

### ***Design Exercise: Housing***

### **Course Objectives:**

The objective of this course is

- To create an awareness with regard to the design of green buildings and sustainable architecture.
- Integration of structures into design development.
- To inculcate the Complex services integration and construction.
- To integration of technology to make the building intelligent and secured.

## Course Outcomes:

On completion of this course, the students will be able to

**CO1:** Design a Project involving multiple space utilization like 5 Star Hotel, Multi-specialty hospital.

**CO2:** Build with precision block models, study models, site models

**CO3:** Demonstrates architectural and composite structural system and services.

**CO4:** Communicate through drawings or models.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction</b> Design problem may be introduced, students may visit site for collecting context specific data for getting better understanding of real-life project details. The collected data may be analysed and presented for evaluation.	L4, L5, L6	30
<b>MODULE 2: Development of Concept</b> Flow diagram to explore relation of various spaces, bubble diagram for locating various zones on site, re-create for analysing spaces in all dimensions through block models and single line graphics and study models for choosing the right option.	L4, L5, L6	42
<b>MODULE 3: Design Development</b> Integrate the knowledge gained from previous theory based subjects like Building services, Building materials and Construction Technology, Structure, etc., and apply to detail out their design proposal.	L4, L5, L6	30
<b>MODULE 4: Final Design Proposal</b> The final design proposal is prepared after conducting various informal and formal reviews at individual and at group level. The drawing and detail physical model explaining the approach and consideration of urban setting to achieve the requirements with various other restrictions may be submittals.	L4, L5, L6	42

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5:Synthesis, L6:Evaluation*

	<b>BUILDING MATERIALS AND CONSTRUCTION TECHNOLOGY – VII (ARC2702)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	2	5
Pre-requisites/Exposure	Building Materials And Construction Technology –VI					
Co-requisites	Architectural Services – III, Architectural Design – VII					

### **Catalog Description**

The aim of this course is to make students aware of the requirement of drawings at the site for the execution of the construction work. The Design of a building prepared needs to be executed and constructed on the site. The building drawings so prepared become part of the contract documents with proper labeling and dimensioning, specifications, detailing. The drawings shall be based on building design prepared as design studio assignment in the previous semester. The learning of building material and construction will be implemented for preparing various drawings through the semester.

### **Course Objectives**

The objective of this course is

- To train the students to prepare detailed Working drawings for effective execution at construction site
- To integrate all services and structure system in the working drawing project.
- To understand the value of detailing for various types of drawings and methods of transmittals and record keeping.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Demonstrate the preparation of execution drawings in the process of realization of a designed building.

**CO2:** Select the appropriate construction details as per the various services.

**CO3:** Interpret and translate drawings based on the structural and other practical considerations.

**CO4:** Integrate all the drawings prepare for the execution purpose.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Architectural working drawing</b> Making complete set of submission drawing for the residence or any other project complying all the local building byw-laws and NBC.  Making complete set of working drawings for the residence or any other project designed by the student. The drawings to incorporate all necessary information complete with schedule and all specifications. The Working Drawings to include: 1. Site plan. 2. Foundation layout with details of foundations and DPC. 3. Ground floor Plan. 4. First Floor Plan. 5. Terrace Plan 6. Sections 7. Elevations	L3, L4, L5, L6	15
<b>MODULE 2: Services drawing</b> Making complete set of services drawings for the above said project. The drawings to incorporate services details complete with schedule and all specifications. The Services Drawings to include: 1. Electrical Layout. 2. Plumbing Layout. 3. Sanitary Layout. 4. Drainage Layout. 5. Rain Water Disposal / Harvesting Layout and Details. 6. Toilet details. 7. Kitchen / Pantry Details.	L3, L4, L5, L6	15
<b>MODULE 3: Working details</b> Making complete set of working details for the above said project. The drawings to incorporate details complete with schedule and all specifications. The Working Details to include: 1. Doors and Windows Drawings and Details. 2. Staircase Details including railings. 3. Details of Grills, Parapet or railings. 4. Typical wall section showing foundation, DPC, skirting, sill, lintel, slab and terracing details.	L3, L4, L5, L6	15
<b>MODULE 4: Finishing Drawings</b> Making complete set of finishing drawings for the above said project. The drawings to incorporate finishing details complete with schedule and all specifications. The Finishing Details to include: 1. Doors and Windows Frame and Shutter details. 2. Flooring & Skirting pattern and fixing details. 3. Dado / Wall tile pattern and fixing details.	L3, L4, L5, L6	15

4. Wall Cladding pattern and fixing details.		
5. Plaster Pattern with Colour schemes.

Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure – VI					
Co-requisites	Building Materials & Construction Technology – VII					

### **Catalog Description**

The aim of this course is to enable students to design simple steel structures and their basic components. The fundamental aspects of analysis and design and also discusses the practical requirements such as safety, feasibility and economy of steel structures. The subject will be taught in congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

### **Course Objectives**

The objective of this course is

- To understand the design of steel structures.
- To learn the behavior and design of structural steel components (members and connections in two - dimensional (2D) truss and frame structures)
- To gain an educational and comprehensive experience in the design of simple steel structures.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Design building structure.

CO2: Design simple connections, rivets, welds, bolts and pins.

CO3: Design column base and footing.

CO4: Design beams and gantry girders.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Design Principles</b> Introduction to Design Specification for Steel Members, Bolted Connections, Welded Connections.	L1, L2, L3	09
<b>MODULE 2: Structural Connections</b> Beam to beam connections, beam to column connection, bolted bracket connection, welded crane bracket connection.	L1, L2, L3	09
<b>MODULE 3: Shear Force and bending moment diagram, theory of yielding and failure</b> Design Of Laced Column, Battered Column, Design Of Slab Base And Gusseted Base.	L1, L2, L3	09
<b>MODULE 4: Design principles and high-rise structures</b> Laterally restrained beam, gantry girder, plate girder with -thick web plate and thin web plate. Design of steel roof truss and tubular truss.	L1, L2, L3	09

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

### **Catalog Description**

The aim of this course is to prepare students for writing a paper based on secondary research and literature review and its oral and visual presentation. Students would be able to identify and go in depth into specific and appropriate aspects relating to the discipline of architecture and discuss how it is reflected in the realm of design.

Students learn how to research a subject area through readings; learn description, analysis and synthesis of readings; citation of authors in their writing. The importance of the course is also in understanding what constitutes plagiarism research writing and in imbibing the ethics of publication. Literature review is seen as the first step in preparation of understanding research methods.

### **Course Objectives**

The objective of this course is

- To introduce research work to the students
- To identify a specific aspect relating to the discipline of architecture.
- To conduct a research

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Identify area of research for thesis

**CO2:** Identify a research problem, formulation of hypothesis and organize a study based on literature survey

**CO3:** Apply research methods in case study and analyze the data collected from different sources

**CO4:** Develop ethics of publication

Modules	Blooms level*	Number of hours
<b>MODULE 1: Identifying research topic, Research Gap and Project Formulation</b> Choose any topic of the interest in consultation to the faculty concern; Research Question – Investigation Question – Measurement Issues – Hypothesis – Qualities of a good Hypothesis –Null Hypothesis & Alternative Hypothesis. Hypothesis Testing – Logic & Importance.	L1, L2, L3	6
<b>MODULE 2: Literature Review</b> Review of research paper, books, journals etc related to the topic	L1, L2, L3	6
<b>MODULE 3: Surveys, Data Collection and Data Analysis</b> Questionnaire to be prepared and Surveys to be conducted related to research. Other related data to be collected from appropriate resources. Collected data to be analysed using proper software. frequency tables, bar charts, pie charts, percentages etc	L1, L2, L3, L4	6
<b>MODULE 4: Paper Writing</b> Research paper writing in appropriate format. Ethical issues related to publishing, Plagiarism and Self-Plagiarism to be checked	L1, L2, L3	6

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

### Catalog Description

The aim of this course is to provide fundamental knowledge about natural and built environment. And also introduces fundamental concepts to understand environmental processes. The curriculum further incorporates understanding in relation to Indian context. Course will be interdisciplinary and flexible.

### Course Objectives

The objective of this course is

- To acquaint the student with the factors to be taken into consideration
- To understand the applications of an intelligent building.
- To familiarize the students to the Green Building rating systems, design processes, regulations and prevailing best practices

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Define the fundamental of green building design.

**CO2:** Identify the role of USGBC, GBCI and their structure.

**CO3:** Identify the criteria for the selection of site

**CO4:** Review the fundamental concepts of waste management system.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to Green Building &amp; Green Building Rating Systems</b> Introduction to Course, Syllabus and assessment, Fundamental concepts of Green Building Design and Sustainability. Green Rating regime and their scope (regional and global), Policies and legislations	L1, L2	6

<b>MODULE 2: LEED Lab &amp; Processes</b> LEED Systems: Organization, fundamentals & Role USGBC/GBCI, Structure of LEED rating (credit, prerequisites and requirements) and Impact categories, LEED Certification & registration process, What, How and where to collect data for LEED certification	L1, L2, L3	6
<b>MODULE 3: Site, Location and Transportation</b> Scope and criterion of sustainable site, Transport and resource footprint	L1, L3, L4	6
<b>MODULE 4: Buildings Material and Resources</b> Fundamental concepts (LCA), Waste management, 3Rs and Health), Procurement, declarations and documentations of Materials according to requirement of LEED certification	L1, L3, L4	6

	<b>INTERIOR DESIGN (ARC2718)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	1	0	1	1	3
Pre-requisites/Exposure	Architectural Design - IV					
Co-requisites	Architectural Design - V					

### **Catalog Description**

The aim of this course is to make students understand the application of design principles in interiors. The subject Interior Design is a specialized course offered in architecture which deals with functionality, safety and provides an aesthetically pleasing space for users. This semester will deal with minute details and construction techniques involved in interior design. The subject will also be integrated with a small component of design exercise with the current or previous semester design works. The course will include several exercises in relation to sit visits, market surveys, presentation, reports, etc.

### **Course Objectives:**

The objective of this course is

1. To equip the students with varied aspects of theory and practice of Interior Design, and develop skills to deal with diverse interior spaces.
2. To understand qualities of spaces and develop their skills in designing for functional and meaningful interior space.
3. To initiate students into theory and practice of Interior design.
4. To merge theoretical and practical knowledge of interior design of a building.

**Course Outcomes:**

On completion of this course, the students will be able to

**CO1:** Apply elements of interior design in their design process.

**CO2:** Explain the application of design principles in interiors.

**CO3:** Create interior design model with the help of furniture, lighting fixtures, furnishings, paintings, sculptures, etc.

**CO4:** Design modern interiors using modern materials and techniques.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction and basic principles of design</b> Purpose, scope, objectives, history and importance of Interior Design. Elements and principles of interior design and their application in the context of buildings. Aesthetic order, functional Value and Psychological impact of various elements of Interior Design. Application of Colour, Texture, Landscaping, Artificial and Natural Lighting in the Building interiors.	L1, L2	9
<b>MODULE 2: Principles and Elements of Interior Design</b> Elements of Interior Design, Role in interiors. Space making elements like wall, column, partition screen, floor, furniture, interior landscaping etc., their design value, colour theories and schemes, light	L2, L3, L4	9
<b>MODULE 3: Understanding Furniture work and furnishings in Interior</b> Understanding furniture layout, furniture design with the construction technique, types of furniture and their usage, construction materials and fabrics used in furniture designing, cost estimation, understanding works of great masters. Furniture, Furnishings, Fabrics, Murals, Paintings, Sculpture, Lighting Fixtures, Floor coverings, Wall coverings and related materials. Study of furniture designs, Built-in furniture, Movable furniture, Modular furniture.	L2, L3, L4	9

<b>MODULE 4: Modern trends in Interior design</b> Understanding and designing modern interiors using modern materials and techniques. Study Report of an existing DESIGN PROJECT. Space organization in interiors--presentation of the complete interior scheme of a given projects such as Library, Public Halls, Conference Room, Commercial buildings etc.	L4, L5, L6	9
--	---------------	---

	<b>SPECIFICATION, ESTIMATION AND VALUATION (ARC2720)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Building Materials & Construction Technology - V, Workshop Practice & Site Exposure					
Co-requisites	Building Material and Construction Technology-VI					

### Catalog Description

The aim of this course is to make students familiar with the theory and practice of specifications and estimation, and quantity surveying; along with its importance in the field of building construction. The process of writing specification document for materials, labour, budgets and; estimating the cost and time of construction works shall be covered. The preparation of bill of quantities, optimum resource consumptions and introduction to BIS and other standardized institutions is also a part of the course.

### Course Objectives

The objective of this course is

- To develop a real-time judgment of quantity surveying, details specifications, estimations and valuation
- To develop skill for precise and approximate estimations and be able to estimate and specify quantities of various items of material and work involved in architectural and planning projects

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Discuss the importance and usage of specification, estimation, valuation and depreciation

**CO2:** Describe the detailed specification of various common building materials

**CO3:** Execute and implement the appropriate methods for preparing the estimates.

**CO4:** Compare, evaluate and interpret the building typologies for doing the valuation.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction</b>	L1, L2,	9

Why the knowledge of quantity surveying and specifications is necessary for architects and planners? Significance and methods of writing specifications, classifications of specifications, sources of specifications; Types and methods of cost estimation for different types of projects, rates and sources of rates for different components of projects; Cost Index.	L3	
<b>MODULE 2: Specification</b> Specifications for common building materials and building trades, earthwork, structure (framing), flooring, stonework, plasters, waterproofing of basements and terraces, roofing, doors and windows, elevators. Site development and earth works; Water supply network and distribution systems; Sewer systems; Electrical and telephone networks; Landscaping, roads, pathways, boundary wall, pools, lighting.	L1, L2, L3	9
<b>MODULE 3: Estimating</b> Calculation of plinth area, floor area, carpet area and circulation area, Preliminary estimates- plinth area rates and cost indices, Detailed estimate-modes of measurement, taking off quantities from drawings, Bill of Quantities (BOQ) and Bill of Materials (BOM), Deriving rates for items from labour and material costs based on CPWD Schedule of Rates, scheduled and non-scheduled items, Establishing market rates. Cost estimation and determination of rates for different types of housing; Cost estimation and determination of rates of works involved in the infrastructure services (roads, water supply, sewer systems, etc.); Costing procedure for different land use categories, development works, interest on investment, and phasing.	L1, L2, L3	9
<b>MODULE 4: Valuation</b> Value and purpose of valuation; Definition and importance of valuation of land and buildings; Factors affecting property and land value at a city and clarity level; Legal, fiscal and administrative measures of land value; Sinking fund; Betterment; Scrap value, salvage value, outgoings; Capitalized value of buildings; appreciation, depreciation and their types, methods of calculating depreciation.	L1, L2, L3	9

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	History of Architecture, Architectural Design – III					
Co-requisites	Theory of Architecture					

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in psychological and sociological aspects which are of concern to Architecture. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding society and various built forms produced by society. The course will also provide the students hands-on cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross fertilization with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To understand the basic principles of psychology, sociology and culture of settlement.
- The course intends to study and understand the typical components of city in order to appreciate how these elements contribute to the quality of life of urban communities.
- To familiarize students with decisive strategies that brings inclusivity and equality in the designs of built forms.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Develop a relationship between man and his larger social environment, with special emphasis on aspects that are likely to affect intervention in or creation of, the built environment (predominantly urban)

**CO2:** Develop a language and vocabulary for discussions/ analysis on the sociological/ psychological dimensions of architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Psychology, Sociology and Built Environment</b> Basic introduction to various critical social aspects; Role of psychology in architecture; Role of sociology in built environment; Determinants of sociology- social structure, social status, social control, social institutions, social mobility; Inclusive Built Environment; Barrier free designs and built environments; Various case studies related to gender and architecture, community development- community response towards development strategy etc.	L1, L2	8
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>ELECTIVE- ECOLOGY, ENVIRONMENT AND SUSTAINABLE DEVELOPMENT – III (ARC2722)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Environmental Sciences, Building Services-1, Building Services-2					
Co-requisites	Architectural Design, Building Services-3					

### Catalog Description

The aim of this course is to offer opportunities in specialized or advance learning in ecology, environment and sustainable aspects which are of concern to Architecture. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding ecology and various environmental problems faced by settlements. The course will also provide the students hands-on ecological and environmental studies of built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To understand the basic principles of ecology, environment and sustainable development.
- The course intends to study and understand the different components of city in order to understand how these elements contribute to environment quality.
- To establish the significance of the ecological issues, their impact and initiatives to address the same in the built environs to achieve sustainable development.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Develop a relationship between man and ecology, will understand critical environmental issues and need to address the m by using advanced technology.

**CO2:** Produce reports and presentation.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Ecology, Environment and Sustainable Development</b> Basic introduction to ecology; Interrelation between natural and built environment; Importance of environment sustainability in built environment; Energy conservation, renewable sources: wind, solar, geo-thermal, bio-fuels; Materials minimizing, recycling, reducing energy content, etc; Other environmental issues related to solid waste management, water resources, air quality, storm water drainage etc; Various case studies related to traditional / vernacular buildings and settlements demonstrating relationship between climate, local material resources and settlement/ building forms.	L1, L2	8
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Architectural Graphic Skills					
Co-requisites	Architectural Design, Building Materials and Construction Technology					

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in computer applications and advance technologies which are of concern to Architecture. The course will generally be conducted in the tutorial mode to encourage exploration and skill developments. The aim of this course is to provide students the exposure to understanding new technological innovations and their applications in field of architecture. The course will also provide the students hands-on experience of new software and applications. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through data base creation, analysis, presentation. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To familiarize students with use of computers in architecture and with impact of Information Technology on architectural knowledge system and practice.
- To critically explore current advancements in smart technologies available for sustainable built environments.
- To sensitize students about strategies for innovations by using latest technologies.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Students will be exposed to the latest software and computer applications available in the field of architecture.

**CO2:** Students will be aware of new advanced technologies available for architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to computer applications and advance technologies</b> Basic introduction to information technology in architecture; Introduction to smart technologies in field of architecture; Applications of information technology in architecture; applications of smart technologies in architecture; Case studies related to use of information technology and advance technology in architecture and built environment. .	L1, L2	9
<b>MODULE 2: Project Work</b> Selection and understanding of project; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L3, L4, L5, L6	18

## Syllabus - Eighth Semester

	<b>BUILDING MATERIALS AND CONSTRUCTION TECHNOLOGY – VIII (ARC2801)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	2	5
Pre-requisites/Exposure	Building Materials And Construction Technology –VII					
Co-requisites	Architectural Design – VII					

### Catalog Description

The aim of this course is to make students familiar with modern techniques of building construction and modern materials usage. This course will introduce aspects related to construction terminology types, application of technique, detailing, site visit and material collection. The course is important as it will familiarize the students with the new and latest terminologies of Architectural construction like Pre-fabrication and pre-stressed construction.

### Course Objectives

The objective of this course is

- To understand different technology used in latest construction methods
- To study modern construction techniques used.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Discuss about Modular construction techniques.

**CO2:** Discuss the process of pre-fabrication in advanced building construction process

**CO3:** Summarize the conceptual idea behind the development of pre-stressed structural component for general use.

**CO4:** Prepare and understand drawings of dia-grid, domes and arches.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Modular construction</b> Introducing current construction technique like Modular construction and fast pace construction. Discussion about terminologies used and their meanings	L1, L2, L3	15
<b>MODULE 2: Introduction to Pre-fabrication Technology</b> Introduction to the topic and its relevance in the construction field. Aspects such as – construction terminology, types, Applications, Detailing. Site visits and material collection from Pre-Fabrication manufacturing units and live examples	L1, L2, L3	15
<b>MODULE 3: Introduction to Pre-stressed Technology</b> Introduction to the topic and its relevance in the construction field. Aspects such as – construction terminology, types, Applications, Detailing. Site visits and material collection from Pre-Stressed manufacturing units and live examples.	L1, L2, L3	15
<b>MODULE 4: Introduction to Advanced Structural Designs</b> Introduction to the Diagrid Structures, domes structures, arches. Introduction to the Design of culverts, overhead water tanks	L1, L2, L3	15

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Pre-requisites/Exposure	Building Materials & Construction Technology – VII					
Co-requisites	Construction Management					

### **Catalog Description**

The aim of the design studio is to expose the students to Urban scale problems and to enable them to visualize the contextual part of a built form. They need to understand, as to what goes beyond the premise of a single building or an area and where its boundaries merge into surrounding built form with different land uses and activities. The studio problem therefore will focus on study and intervention within areas that have the context of design issues like, pedestrian and traffic movement, mixed activities etc. and have the scope of redevelopment.

The design problem of Urban design scale is to be introduced, example; Redesigning of existing Urban area by studying and identifying the problems associated with it. The project would be a medium sized urban design intervention. The design solution would address issues like demography, market value, land use patterns etc. Other design issues are the detailing of open and built areas after studying human and movement patterns. The project should be substantiated by detailed site surveys and reading about urban design principles.

### ***Design Exercise: Urban Design Studio***

### **Course Objectives:**

The objective of this course is

- To understand the city under study, read the issues in a given area after a methodical analysis and propose housing /urban design/ campus design solutions.

- To compare the built and un-built environment around.
- To formulate and highlight the issues of Urban areas.
- To justify the environment for sensitivity.

### Course Outcomes:

On completion of this course, the students will be able to

**CO1:** Compare the built and un-built environment.

**CO2:** Demonstrate their understanding of urban issues relating to the built environment.

**CO3:** Prepare quantitative data for existing and future proposals.

**CO4:** Prepare a vision statement

Modules	Blooms level*	Number of hours
<b>MODULE 1: Identify the study area</b> Pilot survey of an area to identify the project, Survey the existing urban environment. Delineate the study area, collect initial data, prepare brief questions for responses, Reading the area for commonalities, Take response from the users.	L4, L5, L6	30
<b>MODULE 2: Presenting and Analysing the collected data</b> Mapping of collected data using techniques and methods, Use of both qualitative and qualitative data. Co-relating the various data for inter-relationship, Using different methods for analysis, Prepare activity wise layers	L4, L5, L6	36
<b>MODULE 3: Drawing inferences for interventions</b> Picking up issues for addressing, Thinking about developing sensitive responses to the identified issues, Take case of examples for better understanding, Prepare models for spatial analysis, Prepare quantitative data for existing and future proposals.	L4, L5, L6	42
<b>MODULE 4:Formulation of the Design Programme and Strategies for intervention</b> Prepare the vision statement, phasing of the project, before and after images, Public Private Participation, Implementation of the design solution.	L4, L5, L6	36

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5:Synthesis, L6:Evaluation*

	<b>STRUCTURE - VIII (ARC2815)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure – VII					
Co-requisites						

### Catalog Description

The aim of this course is to enable students to design advanced structures system and their basic components. This subject covering three major different types of structures i.e. Pneumatic structure, Geodesic Dome and Bridges. The fundamental aspects of analysis and design and also discusses the practical requirements such as safety, feasibility and economy these structures. Along this some iconic examples as a case study will also cover in this course. The subject will be taught in congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

### Course Objectives

The objective of this course is

- To understand the design of Pneumatic structures.
- To learn the behavior and design of Geodesic Dome.
- To understand the design of Bridges.
- To gain an educational and comprehensive experience with the various types of Iconic Structure.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Design Pneumatic structures.

**CO2:** Design Geodesic Dome structures.

**CO3:** Design various types of Bridges.

**CO4:** Understanding of different types of modern and contemporary iconic buildings.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Pneumatic Structure</b> Introduction to Design Specification for Pneumatic Structure, Design principles, Components, Limitations in Design, Economic parameters, Case Studies.	L1, L2, L3	09
<b>MODULE 2: Geodesic Dome</b> Introduction to Design Specification for Geodesic Dome, Design principles, Components, Limitations in Design, Economic parameters, Case Studies.	L1, L2, L3	09
<b>MODULE 3: Space Frames</b> Introduction to Design Specification for Space Frames, Design principles, Components, Limitations in Design, Economic parameters, Case Studies.	L1, L2, L3	09
<b>MODULE 4: Modern &amp; Contemporary Structures</b> Case studies of different Indian buildings structure like Hall of nation, STC building, Lotus temple, Cricket Stadium Ahmedabad etc, Case Studies of various International buildings structure like Eiffel tower, Louvere, Guggenheim Museum, Burj Khalifa, Habitat 67, Dupli Casa etc. (at least 10 different typology building structures Indian and Internationally focused on mainly roof system.	L1, L2, L3	09

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	History of Architecture – III					
Co-requisites	Building Bye-laws					

### **Catalog Description**

The aim of this course is to familiarize the students with Planning concepts and process in urban and regional planning. The course provides insights into ancient Town Planning to the contemporary best practices. The aim is to familiarize the students with the process of evolution of cities, concepts related to humanitarian planning processes and skill development to identify planning issues in existing areas and develop solutions at basic levels. The subject will be taught in congruence with the Design studio and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same

### **Course Objectives**

The objective of this course is to

- To familiarize the students with Planning concepts and process in Urban and Regional Planning.
- To understand the various elements, classifications and typology of humans settlements.
- To develop research interest in the theory of urban planning and development studies.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Define the various elements, classification and typology of planning

**CO2:** Define types of settlements based on different criteria and different parameters.

**CO3:** Review the condition of development/status of urbanization.

**CO4:** Classify constituents of town or city and develop different type of Plans.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to Planning and its concepts</b> Definitions, planning as hierarchical process, essential features of planning, town planning as a practice, Regional Planning, Rural Planning, Transport Planning, Housing. Various Roles that Planners Play- in Development Authority. Planning concepts and their relevance to Indian Planning practice in respect of Ebenezer Howard – Garden city concepts and contents – Patrick Geddes – Conservative surgery – case study – C.A. Perry – Neighborhood concept Le Corbusier – concept and case studies	L1, L2	5
<b>MODULE 2: Classification and history of Cities</b> Definitions of urbanization such as world cities, city-regions, global cities; Census definitions such as Class-I, Class-III cities. Example of good planned cities and their planner. Analysis of old– Egyptian, Mesopotamian, Greek, Roman, Renaissance, and Modern cities - Garden cities, Chandigarh etc.	L1, L2	5
<b>MODULE 3: Planning process and standards</b> Identification of values, norms, goals and objectives, methodology of plan formulation, site selection, land use mapping, population projection, calculation of housing and community services, calculation and laying of physical infrastructure, public participation, plan visioning exercise, community dispute resolution as per URDPFI guidelines	L1, L2	6
<b>MODULE 4: Types of Plans and modern approach</b> Comprehensive plans, development plans, local plans, district plans, public participation, people and plans, regional planning, Five Year Plans, District Development Plans, Regional Plans, Master Plans, Strategic Plans, Zonal Plans, Urban Renewal Plan – Meaning, Redevelopment, Rehabilitation and Conservation – JNNURM, SEZ – case studies. Introduction, Benefits and Planning components of Green City (e.g. Vancouver), Compact City (e.g. Sky city, China) and Smart City (e.g. Malta)	L1, L2	8

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	LEED Lab – I					
Co-requisites	Architectural Design – VIII					

## Catalog Description

The aim of this course is to provide fundamental knowledge about natural and built environment. And also introduces fundamental concepts to understand environmental processes. The curriculum further incorporates understanding in relation to Indian context. Course will be interdisciplinary and flexible.

## Course Objectives

The objective of this course is

- To understand the concept of an Energy and climate
- To understand the importance of Water Efficiency
- To familiarize the students with LEED Arc

## Course Outcomes

On completion of this course, the students will be able to

**CO1:** Define basic concepts of building loads, energy efficiency, environmental concern

**CO2:** Prepare a documentation plan of water efficiency.

**CO3:** Calculate the indoor environmental quality for comfort and health.

**CO4:** Define basic concepts for building data analysis and prepare a report on environment impact on built up area.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Energy and Climate</b> Basic concepts I (Building loads, Energy efficiency, Environmental concerns), Basic concept II (Electrical systems, Visual & thermal comfort and other concepts), Energy commissioning & performance management Energy audit process, equipment and tools	L1, L2	6
<b>MODULE 6: Water Efficiency</b>	L1, L2,	6

Water use pattern, source and conservation scope (including water harvesting and treatment), Water flow, fixtures and plumbing networks and water efficient appliances, Water Audit: Performance management and monitoring, LEED requirement and documentation plan	L3	
<b>MODULE 7: Indoor Environment &amp; Human Comfort</b> Fundamentals of Indoors environmental quality (ventilation, air quality, indoor emission, green cleaning) Health and occupational comfort (Natural lighting, Thermal, Quality view & assessment-survey)	L1, L3,L4	6
<b>MODULE 4: LEED Arc and Project Communication</b> Basic concepts and pre-requisites, Buildings Data Analysis, Demonstration of input Data in Arc Platform and create output result for the 5 sustainability indicators. Environmental/Building codes, Impact of built environment, sustainable & regional design Project Documentation follow-up	L1, L3,L4	6

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>DISSERTATION (ARC2837)</b>	<b>L</b>	<b>T</b>	<b>S</b>	<b>P</b>	<b>C</b>
Version 1.1	Date of Approval:	2	1	3	0	6
Pre-requisites/Exposure	Research - I					
Co-requisites	Research - II					

### Catalog Description

The aim of this course is to enable students to establish a strong theoretical foundation, clarity of thought and also to orient the students to structured research in a focused manner. The process of study shall enable students to conduct in depth analysis and objective research on a topic of their interest. Students may be encouraged to select the topic which may eventually culminate in the Architectural Design Thesis in the subsequent semester.

### Course Objectives

The objective of this course is

- To enable students to establish a strong theoretical foundation, clarity of thought.
- To orient the students to structured research in a focused manner.
- To enable students to conduct in depth analysis and objective research on a topic of their interest.
- To select the topic this may eventually culminate in the Architectural Design Thesis in the subsequent semester.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Identify area of research for thesis

**CO2:** Identify a research problem, formulation of hypothesis and organize a study based on literature survey

**CO3:** Apply research methodology, tools and techniques to conduct a research

**CO4:** Present the research work carried out in a report format.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Selection of Topic</b> Students may choose a topic of their interest, related to Architecture and allied subjects; stating proper justification	L1, L2, L3	6
<b>MODULE 2: Background study/ Literature Review and Case Studies</b> Review of research paper, books, journals etc related to the topic. Studying, analysing and interpreting various similar case studies, nationally and internationally	L1, L2, L3	6
<b>MODULE 3: Research Design</b> Data Collection, Data Analysis and Data Interpretation; the extensive methodology to be adopted for conducting the research along with various tools and techniques	L1, L2, L3, L4	12
<b>MODULE 4: Presentation</b> Presenting the research work done on identified topic which may eventually culminate in the Architectural Design Thesis of the subsequent semester. Students can thus utilise this as an opportunity for pre-Thesis study, amounting to literature review and relevant case studies which are otherwise required for Thesis.	L1, L2, L3	48

Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	History of Architecture, Architectural Design – III					
Co-requisites	Theory of Architecture					

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in psychological and sociological aspects which are of concern to Architecture. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding society and various built forms produced by society. The course will also provide the students hands-on cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross fertilization with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To understand the basic principles of psychology, sociology and culture of settlement.
- The course intends to study and understand the typical components of city in order to appreciate how these elements contribute to the quality of life of urban communities.
- To familiarize students with decisive strategies that brings inclusivity and equality in the designs of built forms.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Develop a relationship between man and his larger social environment, with special emphasis on aspects that are likely to affect intervention in or creation of, the built environment (predominantly urban)

**CO2:** Develop a language and vocabulary for discussions/ analysis on the sociological/ psychological dimensions of architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Psychology, Sociology and Built Environment</b> Basic introduction to various critical social aspects; Role of psychology in architecture; Role of sociology in built environment; Determinants of sociology- social structure, social status, social control, social institutions, social mobility; Inclusive Built Environment; Barrier free designs and built environments; Various case studies related to gender and architecture, community development- community response towards development strategy etc.	L1, L2	8
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

### Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in ecology, environment and sustainable aspects which are of concern to Architecture. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding ecology and various environmental problems faced by settlements. The course will also provide the students hands-on ecological and environmental studies of built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To understand the basic principles of ecology, environment and sustainable development.
- The course intends to study and understand the different components of city in order to understand how these elements contribute to environment quality.
- To establish the significance of the ecological issues, their impact and initiatives to address the same in the built environs to achieve sustainable development.
- To develop interdisciplinary understanding and sensitivities of future architects.

### Course Outcomes

On completion of this course, the students will be able to

- CO1:** Develop a relationship between man and ecology, will understand critical environmental issues and need to address the m by using advanced technology.

**CO2:** Produce reports and presentation.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Ecology, Environment and Sustainable Development</b> Basic introduction to ecology; Interrelation between natural and built environment; Importance of environment sustainability in built environment; Energy conservation, renewable sources: wind, solar, geo-thermal, bio-fuels; Materials minimizing, recycling, reducing energy content, etc; Other environmental issues related to solid waste management, water resources, air quality, storm water drainage etc; Various case studies related to traditional / vernacular buildings and settlements demonstrating relationship between climate, local material resources and settlement/ building forms.	L1, L2	8
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	16

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>ELECTIVE - COMPUTER APPLICATIONS AND ADVANCE TECHNOLOGIES – IV (ARC2820)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Architectural Graphic Skills					
Co-requisites	Architectural Design, Building Materials and Construction Technology					

### **Catalog Description**

The objective of this course is to offer opportunities in specialized or advance learning in computer applications and advance technologies which are of concern to Architecture. The course will generally be conducted in the tutorial mode to encourage exploration and skill developments. The aim of this course is to provide students the exposure to understanding new technological innovations and their applications in field of architecture. The course will also provide the students hands-on experience of new software and applications. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through data base creation, analysis, presentation. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

### **Course Objectives**

The objective of this course is

- To familiarize students with use of computers in architecture and with impact of Information Technology on architectural knowledge system and practice.
- To critically explore current advancements in smart technologies available for sustainable built environments.
- To sensitize students about strategies for innovations by using latest technologies.
- To develop interdisciplinary understanding and sensitivities of future architects.

### **Course Outcomes**

On completion of this course, the students will be able to

**CO1:** Students will be exposed to the latest software and computer applications available in the field of architecture.

**CO2:** Students will be aware of new advanced technologies available for architecture.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to computer applications and advance technologies</b> Basic introduction to information technology in architecture; Introduction to smart technologies in field of architecture; Applications of information technology in architecture; applications of smart technologies in architecture; Case studies related to use of information technology and advance technology in architecture and built environment. .	L1, L2	9
<b>MODULE 2: Project Work</b> Selection and understanding of project; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L3, L4, L5, L6	18

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

## Syllabus - Ninth Semester

	<b>PRACTICAL TRAINING (ARC2937)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	0	0	0	0	14
Pre-requisites/Exposure	Architectural Design – VIII					
Co-requisites	NA					

### Catalog Description

The aim of the 'Practical Training' is to enable the students to gain the kind and range of practical experience which will prepare them for their likely responsibilities, immediately after qualifying B. Arch. Course. The trainee student has the responsibility to use his/her own initiative in making the best use of the opportunities which he gets during training period and prepare himself/herself for profession. The core of the professional training is architectural one. Student is expected to get well versed with the realm of architectural discipline ranging from generation of idea, preparation of drawings to the final execution of design on site. A Training Manual shall provide the details of the expected outline of work and other procedures.

• **Mandatory Requirements:** Student shall have to undergo Professional Training for a period of at least 06 months

### Course objectives

The objective of this course is

- To expose the students to the practical environment and works by working under an Architect.
- To gain a practical knowledge and involved in all aspects of office works.
- To design for situation specific problems.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Formulate and theorize the principles into practices.

**CO2:** Apply the professional aspects of an architecture office/company and the multiple issues in conception, preparation and execution of project on a site.

**CO3:** Develop a skill that helps to adapt to fit special requirements.

**Examination Scheme:**

Evaluation Scheme								Total Marks	Credits	Duration of Exam (hr)
Internal Assessment					External Assessment					
CT		TA	A	Total	ESE	ESJ	Total

## Syllabus - Tenth Semester

	<b>ARCHITECTURAL THESIS (ARC2037)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	2	6	10	0	18
Pre-requisites/Exposure	Professional Practice- II					
Co-requisites	Architectural Design – VIII					

### Catalog Description

The aim of this course is to provide an opportunity to the students to handle a complete design project. Project Thesis is the final stage of learning Architectural Design. With the help of a thesis project, students are expected to demonstrate the understanding of a systematic design process which includes identification of project requirements, site study and analysis, case studies, programming, schematic design and Design Development. It provides the students with an opportunity to culminate the nine semesters of architectural education by demonstrating the body of knowledge and skills gained during their education and the professional training.

### Course objectives

The objective of this course is

- To prepare a student to independently handle and present all aspects of an architectural design, from its evolution to final solution in totality.
- To understand the importance of the evolutionary stages of a design process and various techniques required for a successful presentation of an architectural design.
- To develop in students the ability to handle specific aspects / thrust area of design relevant to the topic.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Design a Thesis project responsive to the contextual and program requirements.

- CO2:** Evaluate data and information gathered from primary and secondary data collection
- CO3:** Combine the systematic methodology from various stages of study and analysis in design process towards culmination of an informed design.
- CO4:** Produce detail estimation and specification data of a building unit.
- CO5:** Demonstrate the ideas clearly using detailed physical model.

	<b>PROFESSIONAL PRACTICE</b> <b>(ARC2001)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	4	0	0	0	4
Pre-requisites/Exposure	Town Planning					
Co-requisites	Architectural Thesis					

### Catalog Description

This course aim is to provide the foundation, knowledge and skills needed to professional practice. It is designed to build understanding of the complex interactions and uncertainties of the professional practice. It provides students with the essential knowledge components of role of COA, IIA, Uttar Pradesh architect association, Architects Act 1972, Tendering & Contract and Valuation. It also develops an appreciation of the skills and tasks inherent in development Conditions of engagement of Architect – Duties, Responsibilities, Liabilities of the profession, scale of charges, mode of payment etc. Clauses governing conduct of professional practice

### Course Objectives

The objective of this course is

- To understand the role of Professional bodies.
- To acquaint the students with the responsibility, scale of charges and Architect's conduct in Architectural practice.
- To understand the office and administration of an Architect's office, Tenders and contracts.
- To analyze judicial process involved in arbitration.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Gain a comprehensive understanding of the Professional Practice in India.

**CO2:** Explain different role of Architect's Act 1972 in professional conduct and all the work related to scales of charges.

**CO3:** Compare and float tenders and contract for the Architectural project.

**CO4:** Compare difference between Arbitration, Conciliation and Mediation.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Role of professional bodies</b> Role of different bodies i.e. COA, IIA, Uttar Pradesh Architect Association, their working constitution and bye-laws, categories of membership and election procedures.	L1, L2	06
<b>MODULE 2: Architect's Act 1972 &amp; Office and administration</b> Detail study of the Act and procedures of membership. Office set up and administration, Filing and recording, nature of partnership, registration of firm and dissolution, copy rights of drawings, practice procedures and conduct etc. Conditions of engagement of Architect, discuss the Duties, Responsibilities, Liabilities of the Architect profession, Fee (scale of charges), mode of payment etc. Clauses governing conduct of professional practice.	L1, L2,	12
<b>MODULE 3:Tendering and Contract</b> Tendering - Types of tenders and tender documents, tender drafts notices, Inviting Tenders, Procedure of opening and selection process and report of owner. Contract – Types, conditions of contract – Earnest money, Security deposit, Retention money, Mobilization fund, Bank Guarantee, Architect's Instructions, Defects, Certificates and payments, Penalties, Insurance, Liquidated damages, Termination of contract, breach of contract.	L1, L2, L3	15
<b>MODULE 4:Arbitration</b> Introduction, Techniques, elements and factors affecting valuation, Methods, Types – renewal or lease/ extension of lease, standard rent, easement right, dilapidation, Property valuation techniques, circle rate analysis, comparable cost of scale. Share knowledge on the concept of property purchase and mortgage, Goods and Service Tax, Capital gain tax, wealth tax, property tax and other taxes etc. Arbitration, Arbitrator, nature of arbitration, appointment, conduct, powers and duties of arbitrator and umpire amended from time to time. Procedure of arbitration. Mediation & Reconciliation	L1, L2, L3	15

### Catalog Description

The aim of this course is to enable students to understand future after completing architecture study. It also includes knowledge the legal and regulatory body. The subject will be taught in a way so that they are able to build a concrete portfolio, and assignments for the subject will be linked to the design presentation exercises to achieve higher level of representation in real world.

### Course Objectives

The objective of this course is

- To introduce the scope after completing architecture.
- To understand the functions of various national and international regulatory bodies.
- To study the cyber security.
- To provide portfolio development.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Explain career after completing architecture.

**CO2:** Define national and international regulatory bodies.

**CO3:** Explain cyber security and its role in architectural field.

**CO4:** Understanding of portfolio development.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to area of specialized course</b> Architecture, Scope for architecture stream, careers in govt. sector and private sector for architects, higher education in different fields (i.e. planning, construction, management, conservation, software development and analysis etc.) Research in different specialized area.	L1, L2, L3	06

<b>MODULE 2: International Architecture Practice and role of regulatory</b> Role of different bodies i.e. COA, IIA, their working constitution and bye-laws, categories of membership and election procedures. Introduce to the relevant Act and procedures of membership. Conditions of engagement of Architect, discuss the Duties, Responsibilities, Liabilities of the Architect profession, Fee (scale of charges), mode of payment etc.	L1, L2, L3	06
<b>MODULE 3: Cyber security</b> Introduction to information systems, Need for Information security, Threats to Information Systems, Information Assurance, Cyber Security, and Security Risk Analysis. Security Policies, WWW policies, Email Security policies, Policy Review Process-Corporate Policies, Information Security Standards-ISO, IT Act, Copyright Act, Patent Law, IPR. Cyber Laws in India; IT Act 2000 Provisions, Intellectual Property Law: Copy Right Law, Software License.	L1, L2, L3	06
<b>MODULE 4: Portfolio development</b> Analyse, critically evaluate and articulate assessments of their own design works. Composition, Colour schemes, Sizes, Sequences, Software, Logo and style development	L1, L2, L3	06

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	<b>ELECTIVE - UNDERSTANDING CULTURAL LANDSCAPES FOR URBAN RENEWAL AND CONSERVATION (ARC2003)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure						
Co-requisites						

### Catalog Description

The aim of this course is to understand the definition and concept of Culture Landscapes for urban renewal and conservation. It explain the culture of landscape to renewal/redevelopment of the existing environment and its surrounding to sustain the better quality of life though proper plan or documentation. This course has explained about the cultural heritage conservation particularly heritage site. It also deals about the urban area development through the literature study of Renewal, Redevelopment Revitalization and Rejuvenation. In this course, development approaches are comprises of social, environment and economy dimensions. The learning and outcome of this course is exploring in the field of Culture Landscapes, Heritage site and Urban Environment aspects in order to plan for development. The students must learn through literature review of research articles, professional documents, books related to urban renewal. It needs to carry out the field work and preparing the development report in this particular subject.

### Course Objectives

The objectives of this course are

- To assess the urban renewal/redevelopment approaches at old city and historical sites in the context of having better access to services and sustainable urban development.
- To critically analyze the best practices of urban re-development for furthering utilization and formulation of a redevelopment plan.

### Course Outcomes

At the end of this course, students will be able to

**CO1:** Digest and apply the knowledge of development approaches such as urban renewal/redevelopment/revitalization/rejuvenation.

**CO2:** To prepare the detail report and presentation on a given project related to urban renewal and urban re-development.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction of Cultural Landscape for Urban Renewal and Conservation.</b> Introduction to definition and concept of Cultural Landscape, Urban Renewal, and Conservation, Development Approaches of Old City, A brief history of the landscape concept, Principle for Conservation and Renewal of decay areas within City Area, Principles and methods for the assessment of the cultural landscape, Landscape resources, management and planning structure, Mechanism for Development of Historical Area includes the Environment, Social, Culture and Economic aspect; Infrastructure and Services Facilities System of Old Area within City. Governance System and Planning aspect to build new Plan. Case Studies of various Plan and Documents for Renewal and Redevelopment in Developed Countries and Development Nations particularly Indian cities context.	L1, L2	12
<b>MODULE 2: Project Work</b> Selection of Study Areas, Literature Review, Formulation of Aim and Objectives through Proper Scientific Approaches, Collection of data through various techniques such as primary and secondary sources; Conducting survey (Focus Group Discussion, Households Survey etc), Documentation; Develop the data Base to Analyze the relevant by using the advance software; Analyze the Qualitative and quantitative approaches and formulating the new plan through scientific manner and; Report writing and presentations.	L4, L5, L6	24

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation*

Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure						
Co-requisites						

### Catalog Description

The aim of this course is to introduce the students to smart cities concepts and solutions with their specific planning needs and priorities and the implication on development in these areas. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be on **exploring the role of technology and data in cities, and learn how you can participate in the creation of smart cities**. This course will provide the student's hands-on experience on smart city planning that required a different planning process in a built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To investigate, analyze and explore Smart City concepts and solutions important for urban development sectors
- To learn about state-of-the-art strategies for effectively managing the transition from legacy infrastructures to smart urban systems.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Comprehend the concept, challenges and solutions for smart cities planning

**CO2:** Prepare the detail report and presentation on a given project related to Special area planning.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Smart Cities Concept and analysis of smart technologies</b> Introduction to smart cities, the city as a system of systems, smart citizens, Infrastructure, technology and data, Innovation and enterprise, smart leadership and strategy, standards and capacity building, smart measurement, and learning. Case Studies of various smart cities in Indian and international context.	L1, L2	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

	<b>ELECTIVE: TRANSIT ORIENTED DEVELOPMENT (ARC2005)</b>	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure						
Co-requisites						

### Catalog Description

The aim of this course is to introduce the students to transit oriented development concepts and solutions with their specific planning needs and priorities and the implication on development in urban transportation sectors. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be on **exploring the role of TOD and learn how this can be implemented**. This course will provide the students hands-on experience on planning for TOD that required a different planning process in a built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### Course Objectives

The objective of this course is

- To investigate, analyze and explore TOD concepts and solutions important for urban transportation sectors
- To develop interdisciplinary understanding and sensitivities of future planners.

### Course Outcomes

On completion of this course, the students will be able to

**CO1:** Comprehend the concept, challenges and solutions for TOD planning

**CO2:** Prepare the detail report and presentation on a given project related to TOD planning.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction and Planning of TOD</b> Introduction to TOD, need of transit-oriented development, Factors driving the trend, components of TOD, Principles, Benefits, government policies, Case Studies of various TOD's in Indian and international context.	L1, L2	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations. # Ordinance- Examination Rules

## Bachelor of Architecture

### Amity School of Architecture and Planning

*Following rules are in addition to regulations for conduct of examinations & Scheme of Evaluation of Amity University Haryana which shall be applicable only for B.Arch Course (Batch 2018-2023 onwards).*

#### 1. QUALIFYING STANDARDS

1.1. Progressive marks refer to the marks given to a student on a continuous basis during a semester by the concerned subject teacher/teachers.

1.1.1. In the case of subjects which are mainly **studio based** as per the scheme of teaching and examinations, the progressive marks shall be the total of marks given to the various drawings (plates) submitted from time to time by a student on tracing sheets/ butter sheets/drawing sheets or computer printouts. However, if the subject teachers so desire, they shall give some weight age for time problems/tests in these subjects.

1.1.2. In the case of subjects which are mainly **lecture based** as per the scheme of teaching and examinations, the progressive marks shall be based on the average of two tests conducted normally at the end of 8<sup>th</sup> and 12<sup>th</sup> weeks of each semester. Provided that, the teacher may give assignments instead of tests which may include sketching, book reviews, write-ups etc.

1.1.3. In the case of subjects which are mainly **practical based** as per the scheme of teaching and examinations, the progressive marks shall be based on the assignments submitted by the students. A minimum of two assignments per semester shall be given.

1.1.4. In all the above mentioned three cases, viz studio based, lecture based and practical based subjects:

- The concerned teacher shall give a reasonable opportunity to the student to improve his/ her progressive marks, for example by re-doing the assignments or taking an additional test etc, within the time frame of the given semester with approval of HOD/HOI.
- The relevant records and submissions of students which have been assessed for progressive marks shall be produced as and when they are sought by the university within 12 months, after 12 months that no records shall be retained/ produced.

- 1.2. If a candidate fails to secure a **minimum of 50% of marks** in progressive marks in any subject, he /she shall not be eligible to take up theory/viva voce/end term examination in that particular subject.
- 1.3. It shall be the responsibility of concerned Head of the Architecture Department/Principal to implement clause “1.2” in the event of an ineligible candidate inadvertently being allowed to appear for the theory/ viva voce /end term examination, the result of the concerned examination shall be considered as null and void.
- 1.4. Such candidates shall correct, improve, redo the concerned works on the advice of subject teacher and re- submit them during subsequent semester of the next year in order to secure the minimum required progressive marks in that subject.
- 1.5. Once a candidate secures ‘minimum’ or ‘more than the minimum’ progressive marks in any subject, the marks shall be made permanent and shall not be changed under any circumstances.
- 1.6. To pass a subject, a candidate shall secure a minimum of 50% marks in Progressive marks and 50% marks in the end term examination (Theory examination/ Practical examination/ viva voce examination/ Total marks) ie Internal Marks: External Marks: Total marks :: 50:50:50.
- 1.7. Candidates who do not fulfil above cited **clause no. 1.6** shall be deemed to have failed in that subject and have to re-appear for the Theory examination / practical examination or viva voce examination in which he/she has secured less than the minimum prescribed marks.
- 1.8. In B. Arch course a minimum of 5.00 SGPA shall be secured by the student to be eligible for the award of degree.

## 2. THESIS EXAMINATION

- 2.1. The ‘Thesis’ of every student in the final semester shall be evaluated on thesis presentation by the student through viva-voce examination by the panel of the jury in accordance with the Regulations issued separately.
- 2.2. The jury shall include two (1:20) external jury members and one internal member (Thesis Coordinator) from the faculty, in addition to the Chairman/HOD/HOI. Out of the four jury members, at least three must be present to complete the proceedings of the jury.
- 2.3. A student who fails in the thesis evaluation shall be allowed to resubmit the modified thesis after a minimum period of two months with due approval by the management, Amity University Haryana.

## 3. PRACTICAL TRAINING

- 3.1. Each student shall be required to proceed on ‘Practical training’ for the IX semester after appearing at the VIII semester examination. The HOI/ Chairman ASAP, Amity University Haryana approve the office of the ‘Practical training’ for the student.

- 3.2. The marks for Practical training shall be awarded to each student in accordance with the Regulations and guidelines issued by the Training Coordinator in consultation with HOI ASAP, Amity University Haryana.

#### **4. PROMOTION RULES**

- 4.1. A Student not satisfying the requirement of qualifying standards, at any semester, as per the Clause 1.6, shall be detained from appearing at the semester examination for that particular subject.
- 4.2. Such a student shall have to repeat the particular subject, as a ex-student student with the next batch of students.
- 4.3. A student satisfying all the standards as provided in Clause 1 shall be declared to have 'Passed' the semester examination.
- 4.4. A student not satisfying all the criteria of qualifying standards of Clause 1 in conjunction with the provisions of Clause 4.2, but failing in any number of subjects of both the semesters of a class taken together shall be declared to have been 'Promoted With Back-Papers' (PBP) and, shall be governed by Clause 5. A student so declared as PBP shall have to clear the back papers, as and when the examination of the concerned semester is held next.
- 4.5. A student not satisfying all the criteria of qualifying standards of Clause 1.1 in conjunction with the provisions of Clause 4.2, and has invoked the provisions of Clause no. 6, shall be declared as 'Promoted with Grace marks' (PWG), and shall be promoted to the next higher class.
- 4.6. The students who are not covered by provisions of Clause 4.1 to 4.5 shall be declared to have 'Failed'. Such students shall be required to repeat both the semesters of the said class, either as a 'regular student' or as an 'ex-student', in accordance with the Clause 5 and 6.

#### **5. PROMOTION UNDER CARRY- OVER SYSTEM**

- 5.1. A candidate covered under Clause 4.4 shall become eligible for provisional promotion to the next higher class of the course and shall get another chance to clear the said 'Back-Papers' in the next examination of the concerned semester under the carry-over system.
- 5.2. On failing again in any of the 'Back-papers' examination of a semester, the provisional admission granted to the concerned student in the higher class shall automatically stand cancelled and he/she shall have to clear the 'Back-papers' as an 'ex-student' or as a 'regular student', in accordance with the Clause 6.
- 5.3. Marks obtained by a student to clear his/her back paper shall replace the original marks, secured earlier by the student only to the extent of the minimum qualifying marks for computation of his/her result.

## **6. EX-STUDENTSHIP**

- 6.1. A student opting to clear his/her examinations as an ex-student shall be required to inform the college, in writing, within 15 days of start of the next academic session.
- 6.2. An ex-student shall be required to appear at the 'Theory' and 'Practical /viva-voce' examination of all the subjects of both the semesters of the concerned class. However, the marks, for the 'Mid Term Examination' of all the subjects in the earlier regular attempt shall be retained as obtained by him/her.
- 6.3. If a student opts to repeat the semester as a regular student, the new marks awarded to him for 'Mid Term Examination' shall replace the old marks obtained by him in the earlier attempt.

## **7. GRACE MARKS**

- 7.1. Grace Marks shall be allotted to the students within the policy directives of the Amity University Haryana.

## **8. MIGRATION**

- 8.1. Migration of students from one Institute to other shall not be allowed unless it falls within the policy directives of the Amity University Haryana.

## **9. COURSE DURATION**

- 9.1 Minimum duration of the course will be 5 years.
- 9.2 If any students fail to clear all the subjects as per clause 9.1, students have to clear remaining subjects in N+2 years where N will be the minimum course duration as per Amity University Gurgaon guidelines.

## **Master of Planning (Urban & Regional)**

**FLEXILEARN**

**-Freedom to design your degree**

**Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

## **Master of Planning (Urban and Regional)**

### **Programme Mission:**

The mission of the Planning programme is to foster an environment of academic excellence in Urban and Regional Planning at bachelors and masters level through research and innovation, industry integration, internationalization and extension activities and develop highly trained and employable professionals with specialization in the area of Urban and Regional Planning, who are socially responsible and nationally/globally competent professional to meet the contemporary and emerging needs of society and the nation.

### **Programme Description:**

The two-year full-time Masters programme in planning with specialization in Urban and Regional Planning, is to educate and prepare students with the knowledge, analytical ability, and management perspectives and skills needed to address and solve urban and regional issues, to motivate and to manage diversified workforce, multiple stakeholders, emerging trends, rapid technological change and competitive marketplace while considering the principles of ethical, legal and governance fundamentals.

### **Programme Outcome (PO):**

- PO1      Planning knowledge:** Apply the fundamentals knowledge of physical, socio-economic, environmental, legal and institutional framework and an urban-regional planning specialization to the solution of complex problems at city and regional level.
- PO2      Problem analysis:** Identify, formulate, research literature, as well as analyze complex urban and regional planning problems and reaching substantiated/concrete conclusions.
- PO3      Design/development of solutions:** Planning/Design solutions for various urban and regional planning problems that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO4      Conduct investigations of complex problems:** Use research-based knowledge and research methods including data analysis and interpretation as well as synthesis of the information to provide valid conclusions.
- PO5      Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern planning, statistical, thematic mapping and design tools (SPSS, GIS, Infographics software), including prediction and modeling to complex planning activities.
- PO6      The Planner and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional planning practice.
- PO7      Environment and sustainability:** Understand the impact of the professional planning solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO8      Ethics:** Apply ethical principles and commit to professional ethics and

responsibilities and norms of the planning practice.

- PO9 Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO10 Communication:** Communicate effectively on complex planning activities with the planning professionals and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO11 Project management and finance:** Demonstrate knowledge and understanding of the planning and development principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO12 Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of contemporary changes.

#### **Programme Specific Outcomes (PSOs)**

- PSO1.** Explain the physical, socio-economic, environmental, legal and institutional dimensions of an urban area and a region as well as their complexities of governance.
- PSO2.** Demonstrate the use of contemporary software like Geo-Informatic System (GIS) in spatial planning, infrastructure management and transport planning as well as utilizing Storytelling techniques for effective case presentation in planning studios.
- PSO3.** Formulate an urban and regional plan through live case studies by analysing and evaluating comprehensive as well as micro level development issues.
- PSO4.** Apply the principles of soft skills like creative thinking, team building, leadership and decision making in career development.

**Supporting document for PSOs(Programme Specific Outcomes)**  
**Masters of Planning (Urban and Regional)**

#### **PROFESSIONAL TRAINING / SUMMER INTERNSHIP**

Students must undergo a Professional training during their summer break after second semester. They will need to submit their professional training / summer internship report immediately at the onset of third semester in first week of August. Student will have to present a seminar on the same which would be evaluated by the Jury.

## Syllabus – First Semester

	<b>PLANNING HISTORY AND THEORY (PLN4101)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Planning Theory -II (B.Plan.)					
Co-requisites	-					

### Catalog Description

The aim of this course is to initiate the student to the historic growth and development of urban and regional settlements, the evolution of civic planning through theories and concepts of contemporary planning thoughts. At the end of the course students will be able to integrate planning theories to current and future planning practises. The course will be delivered through theoretical inputs, class discussions and seminar presentations by students on selected topics.

### Course Objectives

The objective of this course is

1. To assess human settlements and its evolution.
2. To critically evaluate urban and regional planning theory models.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Comprehend evolution of settlements and need for town and country planning.

CO2: Appraise theories and models of urban settlements planning.

CO3: Apply theories and models of regional settlement planning.

CO4: Utilize concept of city region while working on particularly bigger cities.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Evolution of Human Settlements</b> Definitions of Settlements and their types; Origin and growth of cities; factors affecting the growth of cities; Settlements in Different Civilizations, Overview of City Planning in Mesopotamian, Egyptian, Greek and Roman Civilizations. Renaissance and Its Impact on City Form and Structure, Town Planning Thought and Principles in Ancient and Medieval India, Post Industrial Revolution Settlement Planning: Impact of Industrial Revolution on City Form, Population Density and Infrastructure Breakdown, Birth of Town and Country Planning.	L1, L2 L3	9
<b>MODULE 2: Theories of Settlements in Urban Context</b> Concepts of City Form- Concepts of Garden City, City Beautiful, Linear City and others. Contribution to Modern City Planning by Lewis Mumford, Patrick Geddes, Peter Hall, Jane Jacobs, Chadwick and others, Theories of Urban Structure and Land Use- Concentric Zone Theory, Sector Theory, Multiple Nuclei Theory, Land Use and Land Value Theory etc.	L1, L2 L3	9
<b>MODULE 3: Theories of Settlements in Regional context</b> Spatial Models of Location, Size and Spacing of Settlements; Rank Size Rule; Central Place Theory; Loschian Theory; Cumulative Causation Theory; Core Periphery Model; Growth Poles and Centres; Gravity Model; Classification of Settlements at regional level.	L1, L2 L3	9

<b>MODULE 4: Concept of City Region</b> Definitions, City-Region Relationships, Structure of City Regions, Area of Influence, Dominance; Rural-Urban Fringes; Metropolitan Region; Socio-Economic Impacts of Growth of Urban Areas; Push and Pull Factors; Rural-Urban Migration; Location of New Regional Economic Activities; Impact of Technology on Urban Forms; Transportation and Urban Form; Other Emerging Issues with respect to city-region planning.	L1, L2 L3	9
--	--------------	---

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>SOCIO-ECONOMIC DIMENTIONS IN PLANNING (PLN4102)</b>					L	T	P	S	C
Version 1.1	Date of Approval:					2	1	0	0	2
Pre-requisites/Exposure	Settlement Sociology (B.Plan.)									
Co-requisites	Elements of Economics (B.Plan.)									

### Catalog Description

The aim of this course is to offer exposure to concepts, theories and issues relating to socio-economic aspects towards planning of settlements. It also provide insight to society and regional economy and its significance in spatial planning. At the end of the course the students will be able to effectively utilise socio-economic component for sustainable and inclusive planning.

### Course Objectives

The objective of this course is

1. To comprehend sociological concepts in the context of planning.
2. To apply development economics in spatial planning.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Grasp important sociological concepts relating to planning.

CO2: Relate sociological concepts and theories with reference to urban& regional planning.

CO3: Apply basic principles of economics in planning.

CO4: Analyse economics of location in planning.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Sociology and Anthropology</b> Definitions and scope of sociology; Concept of Sociology, Social system, social institutions and organisations, contemporary sociological theories, social change, social relations, social stratification and social inequality, Marginalised, weak and vulnerable social groups; Concept of space and people, Principles of anthropology with the discipline of Planning, involving people in development process and implementations, identification of community needs.	L1, L2 L3	9
<b>MODULE 2: Urban Sociology and Urban Anthropology</b> Industrial Revolution and the Birth of Urban Sociology; Urbanism and Urban Sociology; Urban Anthropology and its various dimensions; Disparities and Equal Opportunities: <i>Disparities</i> – Gender, Race, Religion, Social Disparities; <i>Gender</i> – Gender Discrimination; Feminist Planning Theory; <i>Caste and Religion</i> – Characteristics, Disadvantaged Castes and Ethnic Minorities; <i>Special Needs</i> – Lack of Supportive Assistance, Issues; Assessing Specific and Special Needs; Planning and Designing for the Differently Abled, Elderly, Children, and Pregnant Women; Planning Rights and Responsibilities; Provision of Equal Opportunities; Social Sustenance; Social Impact Assessment.	L1, L2 L3	9

<b>MODULE 3: Economics</b> Economics related to Urban and Regional Planning. Basics of Micro v/s Macro Economics; Twin Themes of Economics – Scarcity and Efficiency; Market Demand and Supply; Equilibrium in the Market; Elasticity of Demand and Supply; Price, Income and Cross Elasticity; Average, Marginal and Total Costs and Revenue; Use of economics in spatial planning; Basic Economic Growth Models (concept only), cost-benefit analysis , Quality of life, Human Development Index;.	L1, L2 L3	9
<b>MODULE 4: Economics of Location and Planning</b> Concept of land economics, Concept of Spatial and Regional Economics; economic principles of land uses, relevance of spatial planning; Market mechanism and land use pattern; locational theories of economics in inter-regional and intra-regional context.	L1, L2 L3	9

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>PLANNING TECHNIQUES AND COMPUTER APPLICATIONS (PLN4103)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Techniques of Planning I & II (B.Plan.)					
Co-requisites	Computer Aided Design (CAD) in Planning(B.Plan.)					

### **Catalog Description**

The aim of this course is to introduce and be familiar with techniques used for planning at various stages from preliminary to advanced. Students will learn appropriate data mining for their studio exercises, pre-preparation for planning field visits and selecting analysis techniques. Appropriate Software applications in CAD and GIS are also part of the course. They will be able to apply excel, CAD and GIS in their planning studio. At the end of the course student should be able to use all the learnt techniques in respective planning studio works.

### **Course Objectives**

The objective of this course is

1. To prepare students for planning studio exercise by providing them significant base of planning techniques.
2. To equip students with key skill set for conducting field visits, data collection and analysis.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Explore and use various planning information systems available.

CO2: Prepare base maps for their studio exercise and to do effective pre-field visit planning.

CO3: Apply excel and Cad techniques in planning studios.

CO4: Perform basic analysis and map preparations in GIS.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<p><b>MODULE 1: Information Systems for Planning and Literature Review</b></p> <p>Introduction to Basic Terminologies used in Planning; Definition and components of Information System in Planning; Data warehousing and Data mining for Planning; various data sources like, National Urban Information System – Bhuvan, Natural Resource Data Management System, National Sample Survey (NSSO), Directorate of Economics and Statistics, Census of India, National Family Health Survey (NRHS), Central Pollution Control Boards reports, Indian Metrology Department, World Bank Open Data; Introduction and utilisation of spatial standards-URDPFI; Components and Techniques of literature review; Finding useful insights from the literature review; Exercises on inscribing and presenting reviewed literature</p>	L1, L2 L3	9
<p><b>MODULE 2: Basemap Preparation and Survey Techniques</b></p> <p>Base map Preparation: Representation of Spatial Data; Choice of Appropriate Scales: Graphical, Linear and Areal Scales; Contents of Base Maps at Various Scales; Notations - Basic Disciplines of Maps; Setting of Goals and Objectives; Methodologies for Preparation of Urban Regional Development Plans, Plan Implementation Techniques; Selecting appropriate Indicators; Preparation of Checklist for data collection; Preparation of good Questionnaire; Data coding and methods for data analysis.</p>	L1, L2 L3	9
<p><b>MODULE 3: Computer Applications in Planning</b></p> <p>Computer Applications for Data Collection and Analysis: Tools of Analyzing Different Types of Data; Use of Excel Software for Analyzing Data; Applications of Features of Excel- Basic and Selected Advanced Features; CAD Applications for Base Map preparation: Applications of CAD tools- drawing, editing, modifying, layer management etc.; Scaling Drawings and Images; Plotting and</p>	L1, L2 L3	9

Printing technicalities.		
<b>MODULE 4: Introduction to Geoinformatics</b> Image Interpretation – Qualitative and Quantitative Elements; Resolutions – Spatial, Temporal, Spectral, Radiometric; Geo- Rectification – Coordinate System, Selection of Ground Control Points (GCPs), Geo-Referencing and Map Projections; Geometric Distortions, Spatial Data Presentation Techniques: Layout Preparation – Grids, Legend, Symbolology; Printing – Sheet, Size, Scale.	L1, L2 L3	9

	<b>INFRASTRUCTURE PLANNING AND MANAGEMENT (PLN4104)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Infrastructure Planning, Development and Management (B.Plan)					
Co-requisites	-					

### **Catalog Description**

The course would include three sub-components of infrastructure and utility Planning i.e. Physical Infrastructure, Social Infrastructure and Transportation. The aim of this course is on principles of design of utilities and services in urban and regional context and familiarising with Indian standards. The course will focus on acquainting students to assess infrastructure planning techniques and their utilisation in planning studios. The objective of Transportation Planning module is to provide basic information on transportation issues. Students will be familiarized with (i) geometric design of road networks and (ii) traffic characteristics. Techniques of data collection and analysis would be taught as part of this course.

### **Course Objectives**

The objective of this course is

1. To familiar with infrastructure and its sub-sector Planning.
2. To utilize the knowledge in physical planning studios.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Comprehend concept of infrastructure planning and its relevance in physical planning.

CO2: Identify and project the demand and spatial need of physical infrastructure

CO3: Assess the need for social infrastructure for sustainable and inclusive planning.

CO4: Utilise transport planning techniques.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to Infrastructure Planning</b> Importance of Infrastructure, objectives of the utilities, services planning and implications on public health and environment; Economic-introduction to policies and programmes in infrastructure planning; issues and concerns of maintaining the utilities and services, need and importance of service level benchmarks of water supply, sanitation, sewage, solid waste and transportation; Impact of technology on infrastructure, Green infrastructure and its significance.	L1, L2 L3	9
<b>MODULE 2: Physical Infrastructure</b> Role of physical planner in planning of utilities and services; water supply distribution system, storm water drainage system, sewerage system, solid waste management, electricity distribution system.	L1, L2 L3	9
<b>MODULE 3: Social Infrastructure</b> Types of social infrastructure; Health care-essential service, availability, access and utilisation, standards, public and private institutions, policies, national Rural Healthcare Mission, Hierarchy of health care establishments, Education-primary, secondary educational institutions, standards, policies, rights to education (RTE); Public and community spaces-recreational, safety and security – fire management.	L1, L2 L3	9
<b>MODULE 4: Transportation</b> Introduction to transport and travel; Understanding travel from the mobility, economic, social-psychologist, time/space perspective; Transportation planning process; Introduction to four stage modelling; land use and transportation integration; Demand and Supply of Transport; Congestion pricing, transit-oriented development, transport Pricing, Basic transport economic Model. Role of NHAI in regional transport.	L1, L2 L3	9

	<b>HOUSING AND ENVIRONMENTAL PLANNING (PLN4105)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Housing and Community Planning (B.Plan.)					
Co-requisites	Ecology, Environment and Resource Development and Management (B.Plan.)					

### Catalog Description

The aim of this course to two-fold, i) Housing ii) Environment.

**Housing:** First segment is to impart knowledge and skills to create an efficient housing/neighborhood planning which gives equal access to housing for everyone. At the end of the course students will be able to identifies the gaps, problems in providing housing for all. They will be able to focus on various dimensions of housing sector and create efficient and sustainable residential structures and neighborhood designs.

**Environment:** Second Segment deals with environment and its planning which aims to initiate the students to a discreet understanding of the environment and its interactions with human settlements. All social, cultural and technological activities being carried by human beings have profound influence on the environment. This course will enable a thorough understanding and utilization of all these aspects.

### Course Objectives

The objective of this course is

1. To provide a basic understanding of Housing at the Neighborhood and City level and to create an ability to work on the Housing Sector in Town Planning System.
2. To grasp the role of public and private sector as well as community participation in eco-tourism planning and development

### Course Outcomes

On completion of this course, the students will be able to

CO1: Apply varied housing concepts in neighbourhood and urban planning.

CO2: Analyse policy and governance framework with reference to housing sector.

CO3: Justify the relevance of ecology, ecosystem and environment in planning.

CO4:Utilise acquired knowledge to conceptualise and to create sustainable planning designs.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<p><b>MODULE 1: Concept of Housing with reference to Planning</b></p> <p>Current Issues in Housing: Health and Safety Related Issues in Housing, Shift of Housing from Social Sector to Private Sector Participation Housing Design - Housing Typology, Housing Layouts, Housing Density, Community Facilities, Public and Private Sector Housing Development, Social Aspects of Housing, Built Environment and Human Behaviour, Housing Norms and Standards Housing for the Poor-Issues in Slums and Squatter Settlements; Government Initiatives for Providing Housing, Housing Demand- Housing Need Assessment, Estimating and Forecasting Housing Requirements (Qualitatively and Quantitatively); Understanding Current Methods of Housing Demand Assessment, Household Affordability and Concept and performance of Affordable Housing in India, Affordable Housing Policy 2009, Affordable Housing in Public Private Participation, Emerging thoughts. Case Studies of Neighbourhood Planning in Indian and Global Context.</p>	L1, L2 L3	9
<p><b>MODULE 2: Housing Policies and Institutional Framework</b></p> <p>Understanding Five Year Plans with respect to Housing Policy, National Housing Policy- Review, Policy Framework for Urban and Rural Housing, Comparative Policy Analysis; Rental Housing in India: An Overview, Current Practices and Upcoming Initiatives; Role of Informal Sector in Housing Stock, Economy, Commercial Activities, Etc.; Implications in Physical Planning, Informal Sector Housing and Basic Needs - Lack of Essential Infrastructure; Poor Condition of Existing Services; Identification of Basic Needs; Provision for Various Target Groups; Standards for Basic Needs; Investment for Housing; Essential Components; Ownership and Tenure Security; Service Delivery - Gaps in Existing Institutional Systems of Delivery; Sustainable Development Goals with reference to Housing for All.</p>	L1, L2 L3	9

<b>MODULE 3: Environmental Components and Resources</b> Environmental resources and ecosystem services; Fundamentals of Ecosystem-Its Structure and Function; Consumption, conservation and recycling of resources; Man, and Environment interrelations; Changing Perspectives in Man-Environment Relationship with Focus on Issues of Population, Urbanization, Resource Depletion and Pollution; Concept of Ecology; Environmental Degradation (Environmental Concerns and Challenges) and Its Impact on Various Ecosystems.	L1, L2 L3	9
<b>MODULE 4: Environmental Planning</b> Planning for Global and Local environmental concerns; Planning for Environmentally Sensitive Zones (Resources Availability, Settlements Pattern, Problems and Potentials, Regulating Mechanisms for Development); Carrying Capacities in environmental context; Tools and Techniques for Environmental Planning and Management- Brief Introduction to Environmental Impact Assessment, Strategic Environment Assessment and Environmental Management Plans; Providing brief about environmental policies; Green Agenda and Global environmental movements.	L1, L2 L3	9

	<b>PLANNING STUDIO-I (AREA PLANNING, VILLAGE DEVELOPMENT PLAN) (PLN4108)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	8	10
Pre-requisites/Exposure	Planning and Design Lab – V (Area Planning)					
Co-requisites	-					

### **Catalog Description**

The planning studio is an introductory studio for giving basic idea related to urban and regional planning studios. It aims to bring students of diverse backgrounds to a common platform and develop the essential skills of planning amongst the students opting for different specializations of planning. The objective of the studio is to introduce the general concepts associated with physical planning and develop the skills of data collection, data analysis, spatial representation, documentation as well as written and verbal communication. Students will be able to apply the knowledge gained through theoretical subjects in their studio planning.

### **Course Objectives**

The objective of this course is

1. To relate theoretical knowledge of planning with planning practices.
2. To conceptualize and prepare development plan for the given levels.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Preparation of Area Plan/Zonal Plan in urban context.

CO2: Preparation of Village Development Plan.

Modules	Blooms level*	Number of hours
<p><b>MODULE 1: Area Planning (Urban Context)</b></p> <p>The assignment would identify different urban zones based on land use characteristics and could also include predefined ‘zones’ for zonal plans. The objective of this exercise would be to learn various methods of surveying to collect different types of data and represent and interpret them to give meaningful observations on the planning and development of the area.</p> <p>Thrust of the exercise would be on:</p> <ul style="list-style-type: none"> <li>• Understanding the zone in the context of the city.</li> <li>• Mapping of Regional Networks and Linkages</li> <li>• Preparation of Base Map of the area through primary surveys and updating secondary data</li> <li>• Socio-economic profiling of the area through surveys</li> <li>• Physical and Social infrastructure mapping</li> <li>• Gap Analysis and issue identification</li> <li>• Formulation of broad outlines of Intervention Strategies and Development Blueprint.</li> </ul>	L4, L5 L6	60
<p><b>MODULE 2: Rural Planning</b></p> <p>The main goal of the assignment is to expose students to the life and living in rural area as it is different from urban areas. This would help in conceptualising the integration of urban and rural areas for regional planning. Students will undertake study of a particular village in groups and conduct a primary survey on demographic profile, household income level, socio-cultural practices, etc. Information about development programmes shall be collected and resource mapping will be done. This exercise will aim at improving the understanding about the requirements of different categories of rural population. Conducting the primary survey will provide exposure to research methodology, techniques of data collection, data processing and analysis.</p>	L4, L5 L6	60

<p>Thrust of the exercise would be on:</p> <ul style="list-style-type: none"> <li>• Understanding the socio-economic aspects of the rural settlement</li> <li>• Importance of location, spatial and economic linkages of the village.</li> <li>• Explaining the social and physical infrastructure of the village.</li> <li>• Understanding the availability and usage of local resources.</li> <li>• Exposure to government programmes and institutional mechanism working for rural</li> <li>• planning and development</li> <li>• Identifying the present problems and future possibilities in the village.</li> <li>• Proposing a strategy of improvement in the condition and development of the villages.</li> </ul>		
--	--	--

	<b>COMMUNITY PARTICIPATION IN PLANNING (PLN4109) (ELECTIVE)</b>	L	T	P	S	C
Version 1.1		1	0	2	0	2
Pre-requisites/Exposure	Settlement Sociology					
Co-requisites	Planning and Design Lab -V, B. Plan					

### **Catalog Description**

The aim of this course is to offer assessment of communities, their crucial role in planning process and successful implementation. This particular subject will be very useful for learning techniques of primary data collection for planning studio exercises. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be inculcating students with the capabilities of effective community interaction and getting their support in data collection. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course, students will be working with small communities either urban or rural, conducting participatory meetings with them and formulating a small project with the help of community participation. Finally, students will demonstrate project to the concerned faculties, participatory community and other key stakeholders. They will be able to choose and apply the most effective PRA techniques for data collection. They will incorporate and utilise important insights provided by the local communities in plan formulation. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objective of this course is

1. To grasp effective role of community participation in planning process and plan implementation.
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Apply community participation techniques during field visits for primary data collection.

CO2: Prepare the detail report and presentation on a given project related to Community participation.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Concept and Techniques of Community Participation</b> Definitions and diverse dimensions of communities; Understanding concept of social inclusion and participatory planning process, Techniques of effective communication and engaging communities in planning process; Role of community based organisations in participatory planning such as NGOs, Residents welfare associations (RWA), Self-help groups (SHG), Gram-panchayat; Techniques of conducting Participatory Rural Appraisal (PRA).	L3, L4 L5	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Conducting community participation exercises in small groups with varied stakeholders, Organising consultative meetings, Focus group discussion, Preparing small scale project with the help of local community and demonstration of the same. Collection of data through primary sources; Conducting survey; Database development; Qualitative and quantitative data analysis; Report writing and presentations.	L3, L4, L5	24

	<b>INFOGRAPHIC AND STORYTELLING TECHNIQUES (PLN4110) (Elective)</b>	L	T	P	S	C
Version 1.1		1	0	2	0	2
Pre-requisites/Exposure	Planning and Design Lab I, B. Plan					
Co-requisites	Planning and Design Lab -V, B. Plan					

### **Catalog Description**

The aim of this course is to offer opportunities and skillset in effective infographics and storytelling techniques. This particular subject will be greatly useful in planning and producing effective studio sheets. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will evolving rationale thinking capabilities of the students with respect to delivering students' findings/insights and the best presentation method. The course would be conducted through literature survey, case studies, and hands on exercises with available infographic software in the university. During the course, students will be working in interdisciplinary groups. In this course, students will discuss how to incorporate a story in their presentation to help them capture the attention of the audience. They will be able to choose and apply the most effective analytical method for delivering their insights/ideas. They will incorporate data visualization best practices and use tips and tricks when presenting at various platforms to decision makers and stakeholders.

### **Course Objectives**

The objective of this course is

1. To equip students with infographic techniques for effective presentation skills and delivering communicable insights.
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Apply story telling techniques in planning studio presentations for synthesizing research findings and develop effective insights

CO2: Utilise infographics techniques in the preparation of the detail report and presentation on a given project.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Synthesizing the Findings and Deriving the Insights</b> Synthesizing findings of student research and derive valid/actionable insights, Finding story in the data, Shaping it to contribute to a compelling research presentation, Providing actionable comparisons, Weighing the pros and cons, Deriving insights to address a problem/problems, Methods for developing research-based recommendations, testing and refining ideas. Techniques of reviewing the essential sections of various reports, designing visualizations of data, Understanding the requisite for targeting specific audience, Applying storytelling strategies, Recognize the drawbacks of poor data visualization; Effective ways of communicating research/findings.	L3, L4 L5	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

	<b>ECO-TOURISM (PLN4111) (Elective)</b>	L	T	P	S	C
Version 1.1		1	0	2	0	2
Pre-requisites/Exposure	Disaster Risk Management and Climate Change Adaptation					
Co-requisites	Planning and Design Lab -V, B. Plan					

### **Catalog Description**

The aim of this course is to offer the principles of planning for eco-tourism in the context of sustainable tourism development. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course is getting the insights of relationships between tourism and environment, tourism and urban development, tourism and economic development. In this course, students will be able to grasp planning requirements for developing sustainable eco-tourism hubs and circuits. They will be able to incorporate community needs and sustainable eco-tourism requirements in planning process. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objective of this course is

1. To demonstrate planning strategies in the context of sustainable tourism development for eco-tourism planning and development
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Applicate concept of eco-tourism for sustainable tourism development.

CO2: Prepare the detail report and presentation on a given project related to eco-tourism.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction and Planning for Eco-Tourism</b> Definitions, scope, nature, key determinants, characteristics; problems and prospects of eco-tourism; eco-tourism hubs in India; impacts of eco-tourism in developed and developing regions; relationship between tourism and urban development, relationship between tourism and economic development, relationship between tourism and environment; concept of carrying capacity and its significance in eco-tourism. Circuit identification and destination planning; assessment of infrastructure requirement for eco-tourism planning; analysing tourism impacts in transforming local livelihood and lifestyle; role of Government institutions and agencies in eco-tourism development.	L3, L4 L5	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations. ## Syllabus – Second Semester

	<b>APPLICATIONS OF GEOINFORMATICS (PLN4208)</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>S</b>	<b>C</b>
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Planning Techniques and Computer Applications					
Co-requisites	Planning Studio I, II, III and Planning Thesis					

### Catalog Description

The aim of this course is to equip students with advanced concepts of Geoinformatics with special emphasis on applications in Urban and Regional Planning. Students will have hands on experience in ArcGIS and QGIS.

### Course Objectives

The objective of this course is

1. To grab basic knowledge of Remote Sensing and GIS and relate its utilization in Urban and Regional Planning.
2. To get hands-on experience of the functions of Geoinformatics software.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Describe basic knowledge and terminology of Remote Sensing and GIS

CO2: Comprehend planning Information system and its utilities.

CO3: Work on the linking of spatial and nonspecial attribute data.

CO4: Create spatial database in geoinformatics software and perform geo-spatial analysis.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to Geo-informatics</b> Overview: Principles and Applications of Remote Sensing (RS); Geographic Information Systems (GIS); Organisational Aspects for Planning; Systems, Nature, Hierarchy, Value and Type of Required	L1, L2 L3	9

Spatial Data; Raster and Vector Data Structures; Spatial Data Models; Geo-Database; Global Navigation Satellite Systems; Electromagnetic Spectrum, Band Combination, Reflectance; Image Interpretation and Analysis; Integration of GIS and Digital Image Processing; Integration of GIS and GPS; Analysing Tools and Software; Ground Control Points and their selection Criteria.		
<b>MODULE 2: Planning Information System</b> Information Systems - Information Needs, Scales and Levels; Pre-Conditions for Using Planning Information Systems; Representing, Modelling and Impact Analysis of the Data; Structure Models; Query Measurement and Transformations; Summary Statistics and Inference; Terrain Modelling, Spatial Data Infrastructure Systems.	L1, L2 L3	9
<b>MODULE 3: Use of GIS Data Focusing on Urban and Regional Planning</b> Data Creation and Checking - Base Maps and Thematic Maps; Mapping and Spatial Analysis; Linking of Attribute Data, Spatial Data Aggregation; Spatial Information, Database Creation; Geo-Coding and Data Accuracy, Topology Creation; Topography and Landforms; Spatio-temporal Change Detection; Suitability Analysis; Landuse / Landcover Analysis.	L1, L2 L3	9
<b>MODULE 4: Laboratory Exercises</b> Practical Exercises – in Selected Packages of Image Processing and GIS; Georeferencing, Data Base creation, Data Linking, Performing Analysis, Working in Symbology and Thematic Map Creation, Functions and working in Layout View; Dynamic GIS; Web Enabled GIS Applications	L3, L4 L5, L6	9

	<b>REGIONAL PLANNING AND DEVELOPMENT (PLN4209)</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>S</b>	<b>C</b>
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Introduction to Regional Planning (B.Plan.)					
Co-requisites	Planning and Design Lab – III (Regional Planning)					

### Catalog Description

The course aims to expose the theoretical basis for various concepts and analytical tools of Regional Planning and learn the practice of regional planning in the Indian context. Elements of settlement system in the regional context are also incorporated in this course. The course provides an in-depth understanding of the issues of regional development, regional disparity and the need for balanced regional development in the context of globalization and rapid economic transformations in the country. Regional policies and sectoral policies are also discussed. Metropolitan regions, districts as planning regions and rural planning issues are discussed in the wider spectrum of holistic regional planning and development.

### Course Objectives

The objective of this course is

1. To comprehend concepts and significance of Regional planning.
2. To provide in-depth understanding of the issues of regional development, regional disparity and the need for balanced regional development.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the concepts of Region and elements of settlement system in regional context.

CO2: Describe regional equalities, their characteristics and relevance of regional planning policies.

CO3: Appreciate Regional growth process and their applications in India

CO4: Comprehend requirements and significance of rural planning as well as critically define regional plan implementation mechanism

Modules	Blooms	Number
---------	--------	--------

	level*	of hours
<b>MODULE 1: Concepts of Region</b> Definition, Region Types and Regionalization; Concept of Regional Planning: Nature, Objectives, Levels and Aims; Elements of Settlement System: Function, Spacing, Linkage, Settlement Pattern and Factors Responsible Thereof; Potentials and Centrality of Settlements; Regional Inequalities – Growth, Density and Spatial Inequalities of Population Distribution, Spatial Patterns and Characteristics of Occupational Types; Regional Planning Policies and Its Relevance.	L1, L2 L3	9
<b>MODULE 2: Economic and Regional Growth</b> Introduction to Economic and Regional Growth Processes: Some Approaches of Rostow, Hirschman, Myrdal, Friedman, Haggerstand; Concept of Growth Centres, Growth Pole, Service Centre and Agro-Politan District and their Application in India Regional Development Strategies: Centralized and Decentralized; Regional Planning Process: Location of New Regional Economic Activities; Tools and Techniques of Regional Analysis; Metropolitan Regions- : Concept of Degree of Primacy, Area of Influence, Service Area; City Regions and Delineation Techniques; Centralization and Decentralization Processes; Concepts of Ring and Satellite Towns, Counter-Magnets; Forms and Concepts for Metropolitan Planning and Development	L1, L2 L3	9
<b>MODULE 3: District Planning</b> District Planning Process: Identification of Plan Objectives; Collection, Classification and Analysis of Data; Norms and Standards for District Planning; Components of District Planning in the Context of 73rd CAA, 1992, Planning Process Under District Planning Committee, Metropolitan Planning Committee; Plan Implementation: Five Year Plans and Rural Development; Planning Process, Policies and Programmes at National, State, Regional and District Levels; Planning, Development, Implementing and Monitoring Organizations and Agencies: National and State	L1, L2 L3	9
<b>MODULE 4: Concept of Rural Development and Implementation of Regional Plans</b>	L1, L2	9

<p>Concepts of Rural Area and Rural Development; Scope of Rural Development; Causes of Rural Backwardness; Historical Evolution of Rural Development and Rural Settlement Pattern in Indian Context; Economic Issues of Rural Development - Differentiating Economic Growth and Economic Development; Rural Jobs and Income Sources; Rural Economic Policy Infrastructure and Plan Implementation;</p> <p>Tools and Constraints in the Implementation of Plans in Terms of Administration; Schemes, Programmes, Policies for development of regions, districts, villages and cities; Selected Case Studies in Indian Context</p>	L3

	<b>LAND MANAGEMENT AND REAL ESTATE (PLN4210)</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>S</b>	<b>C</b>
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Real Estate Planning and Management (B.Plan.)					
Co-requisites	Planning and Design Lab – II (Urban Planning)					

### **Catalog Description**

This course aims to introduce students to the concept of land markets and development of cities with private developers with the interests of profit, as key players in the development process. One of the prime concerns of urban development is the issue of land availability. In addition to government policies on land, market forces guide and force development on different patterns based solely on the equilibrium of demand, supply and pricing. Hence this subject becomes very important to be understood thoroughly. At the end of the course students will be able to utilise this knowledge in their urban planning studio.

### **Course Objectives**

The objective of this course is

1. To define the concept of land markets and land development in cities.
2. To cover the relationship of real estate and land market in urban areas.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Define the economic concept of land.

CO2: Relate real estate and land market and draw important insights for planning urban areas.

CO3: Explain land valuation techniques and methods.

CO4: Comprehend Real estate dynamics in India.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Economic Concept of Land</b> Economic Concepts of Land; Objectives and Scope of Land Economics; Land Use and Land Values: Market Dynamics and Impact on Land Use Pattern; Land Use Restrictions Affecting Land Availability; Development of Land and Real Property Process - Cost of Development, Source of Finance; Economic Aspects of Land Policies at Various Levels of Decision Making; Private Ownership and Social Control of Land.	L1, L2 L3	9
<b>MODULE 2: Real Estate and Land Market</b> Definition of Real Estate - Physical, Financial and Social Perspectives; Comparison of Real Estate to Other Investment Avenues; Real, Local, National and Global Factors Affecting Real Estate; Real Estate as Facilitator of Development; Concepts of Real Estate Analysis - Mapping Supply to Understand Markets; Demand; Factors Affecting Real Estate Development, Demand-Supply Gap Analysis; Methods of Technical and Financial Feasibility Analysis for Different Product and Project Types.	L1, L2 L3	9
<b>MODULE 3: Valuation of Land</b> Valuation of Land and Property; Methods of Valuation: Comparison Method, Residual Method, Discounted Cash Flow Method; Transaction and Renting of Real Estate: Lease Deeds/ Sale Deeds, Sale Documents, Registration; Mortgage and Pledging.	L1, L2 L3	9
<b>MODULE 4: Real Estate Dynamics in India</b> Real Estate Dynamics, Profiling of Metropolitan Cities, Tier I, Tier II And Tier III Cities; Changing Cycles of Real Estate Development; Emerging Areas of Real Estate Development: Diversification to Logistic Hubs, Industrial Parks, Hospitality Sector, Health and Education Sector by Private Players; Introduction to Financial Models Divided cities- the concept of affordability and housing as against shelter as a basic requirement; towards inclusive cities.	L1, L2 L3	9

	<b>TRANSPORTATION PLANNING AND MANAGEMENT (PLN4211)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Traffic and Transportation Planning – I & II(B.Plan.)					
Co-requisites	Planning and Design Lab – II& II					

### **Catalog Description**

The aim of this course is to introduce to the students of planning with the integration of transportation planning and its interface of land use planning. Another objective is to ensure that students have a sound understanding of the key issues affecting the planning, management and financing of public transport in developed and developing countries. At the end of the course, students will be able to analyse on transport related plans and policies.

### **Course Objectives**

The objective of this course is

1. To equip students with an integration of transportation planning and its interface of land use planning.
2. To prepare students to analyze the key issues affecting the planning, management and financing of public transport.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Define the concept of sustainable transport planning and its relevance in Indian Context

CO2: Apply transport planning process while preparing transport plans.

CO3: Calculate External Cost of Urban Transportation and plan for urban and regional freight

CO4: Utilize transport planning software.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Sustainable Transport Planning</b> Understanding Sustainable Development and Sustainable Transport; Land-Use and Transport Planning – Key Relationships; Land Use Transport Integration Models; Transport and its Relationships with the Economy, Environment and Social Progress; Accessibility Measures, Indicators of Progress, Frameworks of Assessment, Development Control and Travel Planning.	L1, L2 L3	9
<b>MODULE 2: Transportation Planning Process</b> Area Delineation, Zoning (TAZ); Four Stage Planning Process: Trip Generation, Trip Distribution, Trip Assignment and Modal Split; Traffic Management- Signal design; Phasing and Time cycles; Principles of one-way system design; Pedestrianization and non-motorized transportation- Issues, policies and case studies; Towards more inclusive cities; Comprehensive Mobility Plan.	L1, L2 L3	9
<b>MODULE 3: External Cost of Urban Transportation and Freight Transport</b> Introduction to External Cost of Urban Transportation: Issues, Level of Service and Transport Pricing, Congestion Pricing, Policy Issues, Emission Standards and Energy Policy; National Urban Transport Policy 2006; Pricing and Revenue in Transport- Pricing; Revenue and Forecasting; Willingness to Pay.  Introduction to Freight Transport- differences from passenger transport; location choice of transport hubs in relation to regional distribution linkages, Regional Transport Issues: Intercity Connectivity; Urban –Rural Linkages and Road Hierarchy; Road and Rail as Competing/Complementary Modes; Highway Standards in Indian Context.	L1, L2 L3	9

<b>MODULE 4: Software Applications</b> Software Applications: E.G. Cube 6- Network Coding, Creation of Models, Data Base and Scenarios in Cube Base, Cube Voyager Modelling Functions; Urban Land Use & Transportation Planning Applications.	L1, L2 L3, L4	9
--	------------------	---

	<b>DEMOGRAPHY AND QUANTITATIVE ANALYSIS (PLN4212)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Planning Studio II <sup>nd</sup> and III <sup>rd</sup> Sem.					
Co-requisites	Statistical Data Analysis Software (Elective)					

### Catalog Description

The course consists of two parts of Demography and Statistics, dealing with each independently and as well as connecting the applications of statistics to demography.

**Demography:** The aim of the section on Demography is to provide the students with an understanding of basic concepts on demography. This course would make the students aware of the importance of population geography in economic development, the various theories that explain the growth of population in a country and demographic techniques applied. The course aims to help students identify appropriate sources of data, perform basic demographic analyses using various techniques and ensure their comparability across populations. The student will also be able to produce population projections and interpret the information gathered by the different demographic methods.

**Quantitative Methods:** The emphasis of the section on Statistics shall be on conceptual underpinnings of statistics with a focus on defining different statistical tools indispensable for urban planning. In view of the course according more emphasis on inferential statistics than descriptive statistics, the objective of the course will be to introduce the most useful and commonly employed statistical tools and discuss the conditions under which use of those tools is appropriate. The course has been so designed as to train the students interpret the results of an analysis to provide insight into the answer to the problem at hand. Use of SPSS is also included in the program, but will be taught separately as an elective subject in second semester itself.

### Course Objectives

The objective of this course is

1. To overview concepts of demography and its relation as well as utilization in planning.
2. To demonstrate various methods for quantitative/demographic data analysis.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Acquire knowledge on demographic parameters used in planning.

CO2: Appreciate demographic theories, trends and impacts of migration as well as project population.

CO3: Use statistical methods of data analysis which are utilised in planning.

CO4: Apply statistical sampling techniques and advanced data analysis methods.

Module	Blooms level*	Number of hours
<b>Module 1: Demography and Planning</b> Distribution and Density of Population - Measures of Population Distribution and Concentration; Factors Affecting Population Distribution and Density; World Population Distribution; Density Distribution in India Population Change - Fertility and Its Measures; Mortality and Its Measures; Mobility; Factors Affecting Population Change; Determinants of Fertility and Mortality.	L1, L2, L3	9
<b>Module 2: Demographic Theories, Migration, Population Composition and Projections</b> Demographic Transition Theory; Some Population Theories (Overview only); Migration - Types of Migration; Determinants of Migration; Migration Models; Population Composition - Age and Sex Composition and Its Determinants; Age Pyramids; Working Force and Its Determinants; Composition of Work Force and Occupational Composition; Population Projections – Assumptions, Methods, Techniques.	L1, L2, L3	9
<b>Module 3: Quantitative Methods-I</b> Measures of Central Tendency and Dispersion - Arithmetic Mean; Weighted Mean; Geometric and Harmonic Mean; Median and Mode; Variance and Standard Deviation; Time Series and Forecasting - Trend Analysis - Cyclical Variation, Seasonal Variation, Irregular Variation; Various Methods in Time Series Analysis – Moving Average, Ratio to Trend, Link Relative and Residual; Factor Analysis	L1, L2, L3	9

- Principal Component Analysis		
<b>Module 4: Quantitative Methods-II</b> Probability Distribution and Sampling Distribution - Use of Expected Value in Decision Making; Binomial, Poisson and Normal Distribution (only application); Determination of Sample Size and Types of Sampling; Sampling Distribution (concept only); Design of Experiments (concept only); Correlation and Regression - Two Variable versus Multiple Linear Regression; Simple and Multiple Correlation; Estimation of Parameters – The Method of Ordinary Least Squares; Hypothesis Testing, Goodness of Fit; Applications of Features of Excel for statistical analysis.	L1, L2, L3	9

\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	<b>PLANNING STUDIO II - URBAN (PLN4206)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	8	10
Pre-requisites/Exposure	Planning Studio I					
Co-requisites	-					

### **Catalog Description**

The studio is designed to expose the students to issues of urban planning and equip them with knowledge and techniques to enable them to analyse urban situations and develop logical decision making processes to address the complex overlays of conceptualisation, implementation and finance. The studio is designed to study one particular urban area and analyse its issues and develop spatial plans with thrust on critical sectors. It focuses on the preparation of integrated development plan for a selected urban area analysing all aspects of physical planning including socio-economic factors and physical infrastructure and also formulation of methods of implementation and projectisation. The course deliverables would be designed based on specific projects undertaken, keeping in mind the overall objective of the course.

### **Course Objectives**

The objective of this course is

1. To relate theoretical knowledge of planning with urban planning practices.
2. To conceptualize and prepare an urban development plan for the given study area.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Applying learnt planning concepts for the conceptualization and designing of an urban plan.

CO2: Present and document meaningful inferences and strategies/proposals for sustainable urban development.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Pre-Field visit Stage</b> Identification of an urban area; Identification and Formulation of Planning Objectives for the project; Field Visit and Survey of the study area. Data collection through primary and secondary surveys.	L3, L4 L5	40
<b>MODULE 2: Post-Field visit Stage</b> Analyses and presentation of data and information; Review of Planning Objectives post data analysis; Redefining objectives; Planning for urban area and its region (structure plan / development plan) with emphasis on: Land use, transportation networks and Infrastructure networks; Preparation of Detailed Project Report (case specific); Identification and Detailing of Action Area, Local Area plans or Project Plans (case specific); Plan Implementation strategies: Stake holder participation, project funding options; Implementation strategies including urban governance and management issue.	L3, L4 L5	80

\*Bloom's Level:

L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

#### Essential Elements/Deliverables:

- Defining characteristics of identified areas
- Case study and literature review of planning concepts and norms for the selected area/special area
- Formulation of Aim, Objectives and Methodology
- Selection of site and collection data (field trip of 1-week duration)
- Data analysis and presentation
- Outline framework of development – sectoral and spatial
- Implementation framework – capital investment and funding methods
- Governance and management aspects.

	<b>SPECIAL AREA PLANNING (PLN4213) (Elective)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Introduction to Regional Planning					
Co-requisites	Metropolitan Planning, Development and Management					

### **Catalog Description**

The aim of this course is to introduce the students to various Special Areas with their specific planning needs and priorities and the implication on development in these areas. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be on studying the need and process required for special area planning. This course will provide the students hands-on experience Special area that required a different planning process in a built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objective of this course is

1. To familiarize students with planning process required for special areain Indian context.
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Appreciate the need, planning process and legislation required for special area planning

CO2: Prepare the detail report and presentation on a given project related to Special area planning.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to SAP and its Management</b> Special Areas under consideration would include Formal and Functional Regions (Hill Areas, Coastal Areas, Desert Areas, Special Economic Zones, Port City, Aerotropolis, Medi-City, Knowledge City, TOD etc.), Types of special areas and their defining characteristics, Legislations and norms for Special Area Development in the Indian context, Capital investment and funding methods, public private partnerships in development process, Governance and Management aspects, Case Studies of various typologies of Special Area Development Plans in Indian and international context.	L1, L2, L3	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation*

### **Text Books**

	<b>STATISTICAL DATA ANALYSIS IN PLANNING (PLN4214)(Elective)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Demography and Quantitative Analysis					
Co-requisites	Planning and Design Lab -V &VI					

### **Catalog Description**

The aim of this course is to expose students to learn the SPSS (Statistical Package for the Social Sciences)/any other available software for statistical data analysis. The basic application of this program is to analyse statistical data related with the social sciences. Planning students rigorously work on census data, hence learning of SPSS software will enhance their data analysis skill. Furthermore, leaning SPSS will increase students chances of employability. This course is to learn the practical knowledge base on the theory and also students must be able to utilise this software for statistical data analysis in planning domain. The course would be conducted through literature survey, case studies, site visits, and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objectives of this course are

1. To familiarize with the functioning of Statistical data analysis software for performing different quantitative data analysis methods on census data.
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Operate SPSS/other statistical analysis software for handling census data analyse and drawing meaningful inferences.

CO2: Prepare the detail report and presentation on a given project related to available census data.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Statistical data analysis software and its applications in planning</b> Introduction to SPSS/any other available software, Data Analysis with SPSS/other available software. General Description and Function of SPSS, SPSS file Management; Input and data cleaning, definition variable, manual input of data, Automated input of data and file import; Data Manipulation such as Data Transformation, Syntax files and scripts and Output management; Methods for statistical data analysis e.g. Correlation, Regression, Hypothesis testing; Interpretation of results and drawing meaningful inferences. Students needs to work on census data for learning the functionality of SPSS.	L2, L3, L4	15
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	21

\*Bloom's Level:

L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

	<b>URBAN DESIGN, RENEWAL AND CONSERVATION (PLN4215)(Elective)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Introduction to Urban Design (B.Plan)					
Co-requisites	Planning and Design Lab II					

### **Catalog Description**

The aim of this course is to introduce the students to learn the urban design. It is the design of towns and cities, streets and spaces, collaborative and multi-disciplinary process of shaping the physical setting for life in cities, towns and villages, the art of making places, design in an urban context. This course is to learn the quality of urban design - creates safe, attractive and secure pathways and links between centres, landmarks and neighbourhoods, facilitates green networks that link public and private open space, places a high priority on walking, cycling and public transport. During the course the students will be able work on live projects in groups which are preferably interdisciplinary of architect, planner engineer etc.

### **Course Objectives**

The objectives of this course are

1. To assess the urban renewal/redevelopment approaches at old city and historical sites in the context of having better access to services and sustainable urban development.
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Apply the concept, challenges and solutions for Urban Design, Renewal and Conservation.

CO2: Prepare the detail report and presentation on a given project related to urban design, Renewal and Conservation.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction to Urban Design, Renewal and Conservation</b> Urban History and Development Theories, Urban Design Methodologies, Digital Skills for Urban Design and Landscape, Research Methodology, Site Planning, Case Studies of Urban Design and Landscape in Indian and international context. Urban Renewal, and Conservation, Development Approaches of Old City, A brief history of the landscape concept, Principle for Conservation and Renewal of decay areas within City Area, Principles and methods for the assessment of the cultural landscape, Landscape resources, management and planning structure, Mechanism for Development of Historical Area includes the Environment, Social, Culture and Economic aspect; Infrastructure and Services Facilities System of Old Area within City. Governance System and Planning aspect to build new Plan. Case Studies.	L1, L2, L3	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

## Syllabus – Third Semester

	<b>PROJECT PLANNING AND FINANCE MANAGEMENT (PLN4302)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Project Formulation, Appraisal and Management (B.Plan.)					
Co-requisites	Urban Finance (B.Plan.)					

### Catalog Description

The aim of the course on Project Planning and Financial Management is to train the students in managing a project right from its conception to evaluation. The organisation of the course has been so designed that it graduates from concept to application on all aspects of project management. Besides, this course also exposes the students to the various concepts, mechanism and role of development finance and its relevance with various hierarchy of government system.

### Course Objectives

The objective of this course is

1. To assess skillset of conceptualizing and managing projects related to planning.
2. To grasp development and channelization mechanism of financial and other resources for planning projects and schemes.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Apply Project Planning and Project appraisal techniques.

CO2: Utilise Project formulation and evaluation techniques.

CO3: Comprehend Financial Management, Resources mobilisation and Municipal Finance with reference to planning projects.

CO4: Explain concept of Investment Planning and Financing Mechanism.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Project Planning and Appraisal</b> Introduction to Project and Project Management; Importance of Project Management; Stages of Project Life Cycle; Causes of Project Delay; Behavioural Aspects of Project Management; Role of Project Manager; Attributes of a Successful Project Manager; Introduction to Project Planning; Process of Project Planning; Project Planning during Investment Phase; Planning for Project Work (Work Breakdown Structure); Planning for Manpower and Organisation; Planning for Project Finance; Planning for Information System; Introduction to Project Appraisal; Types of Feasibility; Financial and Economic Appraisals; Ascertaining Project Costs and Benefits; Project Financial Appraisal Techniques – Payback Period, Benefit Cost Ratio, Net Present Value, Internal Rate of Return; Components of a Feasibility Study; Social Cost Benefit Analysis.	L1, L2 L3	9
<b>MODULE 2: Project Formulation and Evaluation</b> Process of Project Formulation; Constraints in Project Formulation; Breakeven Analysis; Sensitivity Analysis; Project Budgeting and Performance Budgeting; Definition of Project Scheduling; Steps in Project Scheduling; Network Techniques in Project Scheduling; Activity on Arc/Node; Forward Pass and Backward Pass; Critical Path and Slack; CPM Simulation; PERT (Concept only); Gantt Chart (Concept only); Definition of Project Monitoring; Criteria for Decision Making; Parameters and Tools of Control; Use of Network Analysis in Project Monitoring; Analysis of Cost and Time; Reporting and Corrective Actions; Resource Management – Resource Loading and Resource Levelling; Project Reporting; Types of Project Evaluation; Tools of Project Evaluation; Time Frame in Evaluation; Project Cash Flows – Elements of Cash Flow Stream; Principles of Cash Flow Estimation; Project Benefits; Sources of Funds – Disposition of	L1, L2 L3	9

Funds; Financial Closure		
<b>MODULE 3: Financial Management, Resources and Municipal Finance</b> Concept of development of finance; Approaches; Development administration at National, State and Local Level and the process of Formulation; Financial Institutions: concept, typology and their role; Structure of finances; Fiscal Problems and issues of financial management; Implementation of 74 <sup>th</sup> Amendment for Municipal Finance, expenditure Pattern, mobilising resources for a project – financial resources, land resources, project resources etc.; Finance Commissions, Fiscal agenda of development schemes and Sources of revenues; equities; loans; debt financing; Pooled finance development fund, national urban infrastructure fund; municipal bonds and miscellaneous sources.	L1, L2 L3	9
<b>MODULE 4: Investment Planning and Financing Mechanism</b> Links with Spatial Plans, Process, Components, Investment needs, Budgeting; Financial investments in infrastructure and services; Financing of Urban and Regional Development, infrastructure and services – Mechanism and Instruments, Subsidy reduction, cost recovery, Public Private Partnership (PPP), Micro Finance, Financial Appraisal, Investment Appraisal; Financial Risks- Sources, measures and perspectives on risk, Sensitivity Analysis, Property Tax Administration, Rent Control System.	L1, L2 L3	9

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>PUBLIC POLICY IN PLANNING (PLN4304)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Urban Governance, Planning Practice I & II (B.Plan.)					
Co-requisites	Planning and Design Lab – II& III					

### **Catalog Description**

This course aims to provide an in-depth study of the various approaches for policy formulation, implementation and evaluation. It addresses issues in policy analysis, and explains the forces that influence the functioning of executive, legislature, judiciary, civil society, NGOs and administration. It will also cover a critical analysis of policies that are directly connected with inclusive sustainable urban development.

### **Course Objectives**

The objective of this course is

1. To observe and compare various approaches for policy formulation, implementation and evaluation.
2. To cover critical analysis of policies relating to inclusive and sustainable urban development.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Define Policy concept and significance in planning.

CO2: Use Policy Monitoring and evaluation techniques.

CO3: Explain Policy making and implementation techniques.

CO4: Compare between different case studies of Policy implementation and monitoring.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Policy Analysis: Nature and Significance</b> Policy Analysis: Nature, Scope, Significance and Contextual Perspectives; Policy Making Approaches and Models: Power Approaches to Policy-Making, Institutional Approaches to Policy Analysis, Strategic Planning Approach for Improving Public Policy, Rational Approach and Simon's Rationality Model; Decision-Making Process and Techniques	L1, L2 L3	9
<b>MODULE 2: Policy Monitoring and Evaluation</b> Policy Monitoring: Approaches and Techniques; Policy Evaluation: Techniques and Approaches; Policy Evaluation: Role, Process and Criteria; Policy Performance: Evaluating Impact.	L1, L2 L3	9
<b>MODULE 3: Policy Making and Implementation</b> Policy-Making Techniques: Structure of Power and Public Policy-Making Process; Power and Role of Non-Officials in Policy-Making; Policy-Making Power within the Executive; Intergovernmental Relations and Public Policy Issues Public Policy Implementation: Approaches and Models; Inter-Organizational Relations and Public Policy Implementation; Public Policy Delivery Agencies and Implementers; Public Policy Implementation: Gaps and Problems.	L1, L2 L3	9
<b>MODULE 4: Case Studies</b> International Agencies and Globalization of Policy Agendas Critical Analysis of Making, Implementation and Monitoring of following Policies:- National Urban Sanitation Policy, National Urban Housing & Habitat Policy 2007 National Policy for Urban Street Vendors-2009, National Environmental Policy 2006 National Urban Transport Policy 2006, National Water Policy 2002 and 2012 (draft) Policy on Energy. Pre-requisites/Exposure	Ecology, Environment and Resource Development and Management (B.Plan.)					
Co-requisites	Planning and Design Lab – II& III					

### **Catalog Description**

This course aims at developing a systematic understanding for identifying, assessing and reducing the risks of disaster. It helps in assessing physical, socio-economic and environmental vulnerabilities and mitigation mechanisms for various types of disasters and making out settlements more resilient. The course also aims at giving a general understanding of climate change and strategies for mitigating the effects of climate change.

### **Course Objectives**

The objective of this course is

1. To understand the basic concepts of disaster management.
2. To appreciate disaster management mechanisms; disaster risk mitigation; and post disaster measures
3. To explain the fundamentals of climate change science.
4. To present the international climate change legal and policy framework and explain key issues under negotiation.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Explain the concepts, prevention strategies and post disaster management for various types of disasters.

CO2: Describe the role of government authorities and others organizations in disaster management

CO3: Explain the basic concepts of climate change science and analyse different climate change scenarios and their implications

CO4: Incorporate the importance and mechanisms of adaptation in preparing for and coping with climate change

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Basic Concepts of Disaster Management</b> Disaster –related terms, definitions, concepts; Types and classifications of disasters- causes and consequences; Overview of disasters across the world; Disaster management cycle, Phases of disasters; Disaster Vulnerability: physical vulnerability, socio-economic vulnerability, environmental vulnerability; Disaster Risk Mapping; Emergency phase of disasters; Disaster Rescue and Relief; Post disaster recovery and rebuilding process	L1, L2 L3	9
<b>MODULE 2: Disaster Management Mechanisms</b> Recent initiatives at national and state level; Kyoto Framework of disaster mitigation and management; Disaster Management Act – national and states; Roles and Responsibilities of National Disaster Management Authority, State Disaster Management Authorities, District Disaster Management Authorities; Various role players in disaster management – NGOs / CBOs and Armed Forces; Community Based Disaster Preparedness (CBDP); Physical planning and disaster management plans; Applications of Remote sensing and GIS in disaster management.	L1, L2 L3	9
<b>MODULE 3: Introduction to Climate Change</b> Basics of climate change science; Concepts of climate and weather, greenhouse gas; Impact of climate change on surface temperature, precipitation, ocean pH, sea-level; Energy and climate change; Water and climate change; Soil and climate change; Landscape and climate change	L1, L2 L3	9
<b>MODULE 4: Climate Change Adaptations</b> Introduction to the concept of climate change adaptation; Assessing climate vulnerability; Introduction to linkages between climate change adaptation and development; Important international adaptation initiatives and programmes; International climate change negotiations; The 4 United Nations Framework Convention on Climate Change (UNFCCC); The Kyoto Protocol and its associated bodies	L1, L2 L3	9

	<b>URBAN AND REGIONAL GOVERNANCE (PLN4309)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Urban Governance (B.Plan.)					
Co-requisites	Planning Studio II & III					

### **Catalog Description**

The aim of this course is to discuss the evolution of governance arrangements, in the context of urbanization trends in India; producing equitable, inclusive and sustainable urban environments. Emphasis is on comprehending Indian constitutional foundation of urban bodies as democratic institutions, and not merely as providers of urban services within the prevailing institutional dimension of urban Politics. At the end of the course students will be able to utilise governance and institutional mechanism for giving proposals for the effective plan execution. The course will be delivered through theoretical inputs, class discussions and seminar presentations by students on selected topics.

### **Course Objectives**

The objective of this course is

1. To assess available urban and regional governance mechanism
2. To observe national and international e-governance experiences in rural and urban areas.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Compare government and governance mechanism.

CO2: Appraise national and local government framework.

CO3: Comprehend Urban and Regional perspectives of governance system

CO4: Utilize concept of municipal governance, public participation and e-governance prospects in plan/policy implementations.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Government versus Governance</b> Definitions, concepts and types-Indian government-Administration and Political boundaries of India- Democracy and Government, Electoral system and formation of government in India and abroad.	L2, L3 L4	9
<b>MODULE 2: National and Local Government</b> Central-State-Local government relations and Controls; Pre-independence and post-independence government system in India; Theories and methods of Administration system; 74 <sup>th</sup> CAA Government of India-Municipal Acts and structure of Local government; Municipal election governance system- City Mayor and Commissioner elections.	L2, L3 L4	9
<b>MODULE 3: Governance: Urban and Regional Perspectives</b> Urban government and urban system; Administration set-up; Institutional arrangement of urban local government; Urban development management and UN habitat initiatives; Municipal Infrastructure development and service delivery system- water, health, sanitation, security and poverty reduction; Urban disaster preparedness and management; Panchayati Raj, Governance at rural levels.	L2, L3 L4	9
<b>MODULE 4: Municipal Governance, Public Participation and e-Governance</b> Evolution of centralised versus decentralisation of governments; Government Reforms, Lessons from JNNURM; Demography and participating demography, participatory governance, Role of people in government decision making process. Network Governance and Multi-stakeholders Governance; information communication system and local government; National and international experiences of e-governance; e-Readiness of local government; e-governance for smart cities in India and abroad.	L2, L3 L4	9

*\*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>RESEARCH METHODOLOGY AND THESIS PLANNING (PLN4310)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	0	2	2
Pre-requisites/Exposure	Technical Report Writing and Research Methodology(B.Plan.)					
Co-requisites	Planning Thesis					

### **Catalog Description**

The aim of this course is to introduce students to literature review, research processes, techniques and colloquial arguments, so as to help them finalise a topic for their thesis in the subsequent semester. Two seminars would be conducted in the course of the semester to initiate the process of literature review related to student areas of interest culminating in selection of an appropriate thesis topic. Students will also be taught reference management software-Mendeley as a part of this course.

### **Course Objectives**

The objective of this course is

1. To equip students with good research qualities and ethics.
2. To prepare students to plan their thesis in an effective manner well in advance.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Absorb basic qualities and requirement of a good research.

CO2: Use research communication Techniques.

CO3: Develop their thesis with a good research design.

CO4: Present two seminars based on the proposed research conceptual plan.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Introduction to Research and Research Ethics</b> Definition of Research, types, Basics of academic and applied research; Different Approaches to research; Elements of research: epistemology, theoretical perspective, methods, methodology; Justification of Choice and use of Methods and Methodology; Paradigms in Research. Knowledge on act of plagiarism; Prior permission and intimation from the source; Time management in research; Conduct of interview, asking right question, confidentiality, elimination of researcher biases; Role and Responsibility of Researcher.	L1, L2 L3	6
<b>MODULE 2: Research Communication</b> Research vocabulary, Reading- notes taking, material organisation, indexing; Technical Writing- Content synthesising, paraphrasing, citation and referencing; APA referencing system, Use of Mendeley in Reference Management; Academic writing- Research Proposal, Synopsis, Abstract writing, Report Writing and mapping; Presentation: effective content structuring, oral communication, voice modulation, body language, audio-visual aids, handouts.	L1, L2 L3	6
<b>MODULE 3: Developing Thesis</b> <ul style="list-style-type: none"> <li>• Identification of topic of interest having relevance to planning profession, integration and application of the learnt research processes to the pre-thesis work</li> <li>• Book reviews and journal article compilation to establish the body of work existing in the selected area of work</li> <li>• Collection of data and opinions by the stakeholders, decision makers, urban managers, advocates, technocrats, user groups, etc. on the topic selected.</li> <li>• Based on the literature review and inputs from the colloquial arguments, the topics shall be finalised for thesis in the subsequent semester.</li> </ul>	L3, L4 L5	12

<ul style="list-style-type: none"> <li>• Selection of study area, identification of extent and spread of intervention; collection of data for preparation of base map.</li> <li>• Development of research thrust and work methodology. Identification of data sources.</li> <li>• Data collection and analysis: sample determination, data tabulation (coding, de-coding, etc.), quantitative and qualitative data analysis. Appropriate and relevant data analysis methods would need to be studied by individual students based on thesis topic and research area.</li> </ul>		
<p><b>MODULE 4: Professional Practice</b></p> <p>Finalisation of topic; formulation of problem statement, literature review, working hypothesis, research brief, research methodology, sample determination, data collection and analysis, report structuring.</p> <p>The student will be required to make two seminar presentations and submit a report at the end of the semester which will qualify as the literature review and research methodology component of his/her thesis in the forthcoming semester.</p>	L3, L4 L5	12

	<b>PLANNING STUDIO-III - REGIONAL (PLN4307)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	8	10
Pre-requisites/Exposure	Planning Studio I& II					
Co-requisites	-					

### **Catalog Description**

The course aims to understand the theoretical basis for various concepts and analytical tools of Regional Planning and learn the practice of regional planning in the Indian context. Elements of settlement system in the regional context are also incorporated in this course. The course provides an in-depth understanding of the issues of regional development, regional disparity and the need for balanced regional development in the context of globalization and rapid economic transformations in the country. Regional policies and sectoral policies are also discussed. Metropolitan regions, districts as planning regions and rural planning issues are discussed in the wider spectrum of holistic regional planning and development. Students will be able to apply the knowledge gained through theoretical subjects in their studio planning.

### **Course Objectives**

The objective of this course is

1. To relate theoretical knowledge of planning with regional planning practices.
2. To conceptualize and prepare regional development plan for the given study area.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Applying learnt planning concepts for the conceptualization and designing of a regional plan.

CO2: Present and document meaningful inferences and strategies/proposals for sustainable regional development.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Concept of Regional Planning</b> <ul style="list-style-type: none"> <li>• Concept of Region: Region Types and Regionalization; Concept of Regional Planning: Nature, Objectives, Levels and Aims</li> <li>• Elements of Settlement System: Function, Spacing, Linkage, Settlement Pattern and Factors Responsible Thereof; Potentials and Centrality of Settlements</li> <li>• Regional Inequalities – Growth, Density and Spatial Inequalities of Population Distribution, Spatial Patterns and Characteristics of Occupational Types; Regional Planning Policies and Its Relevance</li> <li>• Introduction to Economic and Regional Growth Processes: Some Approaches of Rostow, Hirschman, Myrdal, Friedman, Haggerstand; Concept of Growth Centres, Growth Pole, Service Centre and Agro-Politan District and their Application in India</li> <li>• Regional Development Strategies: Centralized and Decentralized; Regional Planning Process: Location of New Regional Economic Activities; Tools and Techniques of Regional Analysis</li> <li>• Metropolitan Regions: Concept of Degree of Primacy, Area of Influence, Service Area; City Regions and Delineation Techniques; Centralization and Decentralization Processes</li> <li>• Concepts of Ring and Satellite Towns, Counter-Magnets; Forms and Concepts for Metropolitan Planning and Development</li> </ul>	L2, L3 L4	40
<b>MODULE 2: Governance Mechanism and Implementation</b> <ul style="list-style-type: none"> <li>• District Planning Process: Identification of Plan Objectives; Collection, Classification and Analysis of Data; Norms and Standards for District Planning; Components of District Planning in the Context of 73rd CAA, 1992, Planning Process Under District Planning.</li> <li>• Committee, Metropolitan Planning Committee; Plan Implementation: Five Year Plans and Rural Development; Planning Process, Policies and Programmes at National, State, Regional and District Levels; Planning, Development, Implementing and Monitoring Organizations and Agencies: National and State.</li> <li>• Concepts of Rural Area and Rural Development; Scope of Rural Development; Causes of Rural Backwardness; Historical Evolution of Rural Development and Rural Settlement Pattern in Indian Context; Economic Issues of Rural Development -</li> </ul>	L2, L3 L4	80

Differentiating Economic Growth and Economic Development; Rural Jobs and Income Sources; Rural Economic Policy. • Infrastructure and Plan Implementation; Tools and Constraints in the Implementation of Plans in Terms of Administration; Schemes, Programmes, Policies for development of regions, districts, villages and cities; Selected Case Studies in Indian Context.		
---	--	--

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis,  
 L6:Evaluation*

### **Essential Elements/Deliverables:**

- Defining characteristics of identified areas
- Case study and literature review of planning concepts and norms for the selected area/special area
- Formulation of Aim, Objectives and Methodology
- Selection of site and collection data (field trip of 1 week duration)
- Data analysis and presentation
- Outline framework of development – sectoral and spatial
- Implementation framework – capital investment and funding methods
- Governance and management aspects.

	<b>SETTLEMENT ANTHROPOLOGY AND INCLUSIVE DEVELOPMENT (PLN4311) (ELECTIVE)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Development, Management and Finance, Infrastructure Planning					
Co-requisites	Public Policy in Planning, Urban Finance					

### **Catalog Description**

The aim of this course is to offer opportunities in specialized or advance learning in anthropological aspects which are of concern to physical planning. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be on studying social aspects of human settlements and empowering marginalised sections of the population by improving the institutions of social structure. The course will provide the students hands-on experience of cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objective of this course is

1. To expose the students to various techniques and decisive strategies that brings inclusivity and equality in the Plan.
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Apply various determinants of anthropology and elements of inclusive development by reviewing and conducting different case studies.

CO2: Prepare the detail report and presentation on a given project related to inclusive planning.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Settlement Anthropology and Inclusive Development</b> Basic introduction to various critical social aspects; Role of anthropology in settlement planning; Determinants of sociology-social structure, social status, social control, social institutions, social mobility; Vulnerable and Marginalized groups in society; Elements of inclusive growth; Challenges in achieving inclusive growth; Methods to measure inclusive growth; Indicators of inclusive development; Various case studies related to gender inequality and development planning, community development- community response towards development strategy etc.; Strategies for involving people in development planning process and thereafter in policy/program/plan/scheme implementation.	L1, L2, L3	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

	<b>SMART CITIES AND ADVANCED TECHNOLOGIES FOR EMERGING PLANNING ISSUES (PLN4312) (ELECTIVE)</b>	L	T	P	S	C
Version 1.1		1	0	2	0	2
Pre-requisites/Exposure	Development, Management and Finance, Infrastructure Planning					
Co-requisites	Public Policy in Planning, Urban Finance					

### **Catalog Description**

The aim of this course is to introduce the students to smart cities concepts and solutions with their specific planning needs and priorities and the implication on development in these areas. Besides, this course also offers opportunities in specialized or advance learning in emerging spatial planning issues and planners need to give special attention to them while preparing the plans. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The course will provide the students hands-on experience of infrastructural, environmental problems emerging in a city. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objective of this course is

1. To grasp Smart city concept as well as understanding emerging challenges in a city/region and finding out ways to resolve them.
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Apply smart city planning as well as critically analyze immerging multifaceted planning issues and technology-based solution to address them.

CO2: Prepare the detail report and presentation on a given project with an emphasis on smart solutions in order to achieve the goal of sustainable development.

Modules	Blooms level*	Number of hours
<p><b>MODULE 1: Smart Cities, Advance Technologies and Emerging Planning Issues</b></p> <p>Introduction to smart cities, the city as a system of systems, smart citizens, Infrastructure, technology and data, Innovation and enterprise, smart leadership and strategy, standards and capacity building, smart measurement, and learning. Case Studies of various smart cities in Indian and international context.</p> <p>Challenges and problems faced by Mega city and its region, Issues-rapid unplanned growth, urban sprawl, infrastructure related issues such as shortage of Water Supply, Public transport, Parking Issue, Shortage of housing, Solid waste management, environmental issues such as deforestation, land conversion, depletion of ground water etc. Advanced Solution- Advanced Transport Planning system, Smart Mobility, Application technology for improving agriculture productivity, Rain water harvesting, green roofs Sustainable housing affordability, Zero-carbon city, Use of Information and Communication Technology in Planning and Governance- E-Governance, E-Planning, Case studies covering various planning issues at different level of Planning</p>	L1, L2, L3	12
<p><b>MODULE 2: Project Work</b></p> <p>Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.</p>	L4, L5, L6	24

The aim of the course is to provide advance learning on the field of Environment Planning in the context of EIA which is one of the key concern of policy makers and land use planner. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide exposure to the students to essential understanding of Environmental Impact Assessment (EIA). UNEP defines Environmental Impact Assessment (EIA) as a tool used to identify the environmental, social and economic impacts of a project prior to decision-making. This course will enable the students using EIA as tool for both environmental and economic benefits, such as reduced cost and time of project implementation and design, avoided treatment/clean-up costs and impacts of laws and regulations. Students will also be able to apply or reference these techniques in their planning studios. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

### **Course Objectives**

The objective of this course is

1. To learn with different methods and process of Environment Impact Assessment.
2. To develop interdisciplinary understanding and sensitivities of future planners.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Apply EIA techniques while assessing the impacts on land use, resources, health and social conditions.

CO2: Prepare the detail report and presentation on a given project related to Environment Impact Assessment.

Modules	Blooms level*	Number of hours
<b>MODULE 1: Introduction</b> Role of Environmental Impact Assessment in the planning and decision-making process; Definition and need, evolution and objectives and scope. Different methods of Environmental Impact Assessment; Advantages and limitations; Public - private - people's participation in EIA, Impact assessment on land use, resources, social and health impacts.	L1, L2, L3	12
<b>MODULE 2: Project Work</b> Selection and understanding of case study by reviewing case studies from India and abroad on projects of various types covering different levels of planning and practical exercises on Environmental Impact Assessments. Formulation of aim and objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

*\*Bloom's Level:*

## Syllabus – Fourth Semester

	<b>PLANNING LEGISLATION AND PROFESSIONAL PRACTICE (PLN4403)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Planning Legislation (B.Plan)					
Co-requisites	Planning Practice I & II, Human Values in Planning (B.Plan)					

### Catalog Description

The aim of this course is to introduce the significance of planning laws, legislations, acts, regulations and professional practices in planning. As students are passing out after this semester, therefore, the relevance of this subject becomes very crucial at this stage. At the end of the course student will be able to utilise the learnt skills of planning legislations and professional practice in their career.

### Course Objectives

The objective of this course is

1. To prepare students to deal with legal dimensions of planning.
2. To equip students with professional planning ethics to transform them into committed and responsible future planner.

### Course Outcomes

On completion of this course, the students will be able to

CO1: Grasp basic legal terminologies for enhanced understanding of legislation.

CO2: Comprehend land related legislations as well as getting an enriched knowledge of Urban and Regional planning Acts.

CO3: Analyze environmental planning regulations and laws.

CO4: Absorb professional planning ethics/values and transforming into a professional planner.

<b>Modules</b>	<b>Blooms level*</b>	<b>Number of hours</b>
<b>MODULE 1: Basic Terminologies and Legislation</b> The meaning, significance and objectives of planning legislation; Evolution of planning legislation and overview; Concept of Law; Sources of law; meaning of the term of law, legislation, ordinance, bill act, regulations and bye-laws; doctrine of separation of powers; judiciary, legislature and executive-rule of law, Judicial precedents; PIL; significance of law and its relationship to urban planning; Indian Constitution.	L3, L4 L5	9
<b>MODULE 2: Land related Legislation, Urban and Regional Planning Acts</b> Land Acquisition Act 1894; Betterment charges and compensation provisions in planning law; Legislation controlling use of land, ULCRA; Tools of development control-zoning, sub-division regulations, building regulations, model building byelaws, Special regulations like TDR, Rent Control Acts; Apartment Ownership Acts; Transfer of Property Right Act; The estate duty Act; Easement Act; Slum improvement and clearance Act, Indian Contract Act; Arbitration and conciliation Act  Municipal Acts; Improvement Trust and Development Authority Acts; Model town and Country planning Acts; Legislations relating to urban art commissions; 73 <sup>rd</sup> and 74 <sup>th</sup> Constitutional Amendments; Cooperative Societies Act; Special Purpose Legislations viz; Special Economic Zones Act; Special Investment Region Act.	L3, L4 L5	9

<b>MODULE 3: Environmental Legislations</b> Evolution of environmental Law in India; Law of Torts; the first environmental law; Pollution control Act- air, water and environmental protection acts; Forest and wildlife acts; other important international environmental laws; Hazardous waste management and handling rules/biomedical rules/solid waste management rules; Environment tribunal act; Archaeological sites and remains of national importance; Conservation of natural resources including mining and forestry acts; MOEF guidelines and notifications.	L3, L4 L5	9
<b>MODULE 4: Professional Practice</b> Role of a Planner; relationship with client, developers, institutions contractors and experts; Role and responsibilities of planning consultants, professional ethics, code of conduct and scale of professional charges; Role in interdisciplinary groups; Formulation of project proposal and outlines; consultancy agreements, contracts and inviting tenders; Nature of Engagements, agreements and safeguards, completion and copyrights; Aims and Objectives of the professional institute.	L3, L4 L5	9

*\*Bloom's Level:*

*L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	<b>PLANNING THESIS (PLN4437)</b>	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	16	18
Pre-requisites/Exposure	Planning Studio I, II & III					
Co-requisites	All Theory and Elective Subjects					

### **Catalog Description**

The aim of thesis is to develop independent critical thinking and design/research abilities and apply the knowledge gained, skills developed and professionalism inculcated over the last three semesters in an exercise of own interest and significant complexity. The thesis project is to be undertaken independently by each student on a topic of his/her choice related to urban and regional planning, selected and approved by the faculty during the previous semester as part of course requirements of the subject seminar. The students' needs to present and defend their thesis research work in periodic juries conducted by the department as well as in the external jury appointed by the University/School. They are also expected to write a thesis report with the constant guidance of respective guides. Students will submit the same before external jury in a hard bound prescribed format, given by the department.

### **Course Objectives**

The objective of this course is

1. To utilize acquired knowledge in planning and reviewed literature for conceptualizing and pursuing good research.
2. To provide viable solutions to the undertaken research problem and document the entire work.

### **Course Outcomes**

On completion of this course, the students will be able to

CO1: Conceptualise a rationale research problem and creating a good research Design.

CO2: Drawing meaningful insights as well as communicate and document practical ideas to solve the selected problem.

Module	Blooms level*	Number of hours
<b>Module 1: Research Problem and Research Design</b> <ul style="list-style-type: none"> <li>• Conceptualization of Research problem for Thesis work.</li> <li>• Background and Need of the study area.</li> <li>• Rigorous Literature review</li> <li>• Formulation of Aim and objectives.</li> <li>• Writing objective based Research Questions.</li> <li>• Constructing Research Methodology.</li> <li>• Designing Analytical Framework.</li> <li>• Sampling and Sample selection.</li> <li>• Preparations of Check list and Questionnaire.</li> <li>• Methods of data collection.</li> </ul>	L3, L4, L5	26
<b>Module 2: Data Analysis, Proposals and Report Writing</b> <ul style="list-style-type: none"> <li>• Processing and Interpretation of data.</li> <li>• Data Analysis.</li> <li>• Findings and Results.</li> <li>• Identification of Issues</li> <li>• Conclusions.</li> <li>• Formulation of policies/Proposal Plans.</li> <li>• Strategies and Recommendations.</li> <li>• Suggestion for Future Research, if any</li> <li>• Report Writing.</li> </ul>	L4, L5, L6	190

	<b>TOTAL</b>				<b>3</b>

# DISASTER MANAGEMENT

## Syllabus

### DISASTER MANAGEMENT

**Course Code: DSM2051**

**Credit Units: 03**

#### **SINGLE SEMESTER COURSE**

#### **Introduction**

This course is being introduced at the UG level to enable students and citizens to recognize the increasing vulnerability of the planet in general and India in particular to disasters. This, it is expected would create a basis to work towards preparedness and also help us develop a culture of safety and prevention. The adoption of a disaster risk reduction perspective in the teaching of the course would be useful. While disasters are generally seen as an outcome of catastrophic natural events, the idea of pre-existing vulnerabilities is equally important. These need to be understood and addressed if disaster impacts are to be minimized. There has been a considerable policy level intervention in India in recent years and if teachers and young people in each city, district block or village can understand and explore avenues of reducing disaster risks and work towards preparedness the efforts would contribute towards minimizing losses and saving lives.

Disaster Management is a highly multidisciplinary subject wherein rich contributions have been made by the fields of environmental sciences, medicine, geography, geology, sociology, political science, economics, social work profession, psychology, public administration, law, gender studies, engineering sciences, demography, media studies and so on. Therefore, this course at the undergraduate level could be easily taught by faculty members from any discipline. They must be interested in the subject matter and willing to look at disaster management issues from both a theoretical perspective as well as from a practical standpoint. This would enrich the teaching learning process. While this course has been developed keeping diverse disciplines in mind the teachers in consultation with the college curriculum committee are welcome to improvise and modify the content. Encouraging creativity or teachers is important.

#### **Course Details**

The course will be of 50 lectures of about 45 minutes each following the UGC pattern. It will be taught in a single semester. It may be located in any of the 3 years of graduation based on availability of teachers and structure of the broader courses on offer in each University/ College.

The course may be taught by a teacher of any discipline as Disaster Management (DM) is multi disciplinary and draws its knowledge base from a range of disciplines.

#### **Course Objectives:**

- To provide students an exposure to disasters, their significance and types
- To ensure that students begin to understand the relationship between vulnerability, disasters, disaster prevention and risk reduction.
- To gain a preliminary understanding of approaches of Disaster Risk Reduction (DRR)
- To enhance awareness of institutional processes in the country and
- To develop rudimentary ability to respond to their surroundings with potential disaster response in areas where they live, with due sensitivity.

## **Course Contents:**

### **Module-I: Introduction to Disasters (No. of lectures: 6)**

Concepts, and definitions (Disaster, Hazard, Vulnerability, Resilience, Risks)

### **Module-II: Disasters: Classification, Causes, Impacts (No. of lectures: 12)**

(Including social, economic, political, environmental, health, psychosocial, etc.)

Differential impacts-in terms of caste, class, gender, age, location, disability. Global trends in disasters urban disasters, pandemics, complex emergencies, Climate change.

### **Module-III: Approaches to Disaster Risk Reduction: (No. of lectures: 10)**

Disaster cycle- its analysis, Phases, Culture of safety, prevention, mitigation and preparedness, community based DRR, Structural- nonstructural measures, roles and responsibilities of community, Panchayati Raj Institutions/ Urban Local Bodies (PRIs/ULBs), States, Centre, and other stake-holders.

### **Module-IV: Inter-relationship between Disasters & Development (No. of lectures: 6)**

Factors affecting Vulnerabilities, differential impacts, Impact of Development projects such as dams, embankments, changes in Land-use etc. Climate Change Adaptation. Relevance of indigenous knowledge, appropriate technology and local resources

### **Module-V: Disaster Risk Management in India: (No. of lectures: 8)**

Hazard and Vulnerability profile of India

Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management

Institutional arrangements (Mitigation, Response and Preparedness, DM Act and Policy, Other related policies, plans, programmes and legislation)

### **Module-VI: Project Work: Field Work, Case Studies (No. of lectures: 8)**

The project/ filed work is meant for students to understand vulnerabilities and to work on reducing disaster risks and to build a culture of safety. Projects must be conceived creatively based on the geographic location and hazard profile of the region where the college is located. A few ideas or suggestions are discussed below:

Several governmental initiatives require Urban Local Bodies (ULBs) and Panchayati Raj Institutions (PRIs) to be proactive in preparing DM Plans and community based disaster preparedness plans. Information on these would be available with the district Collector or Municipal Corporations. The scope for students to collaborate on these initiatives is immense. Teachers may explore possibilities.

Teachers could ask students to explore and map Disaster prone areas, vulnerable sites, vulnerability of people (specific groups) and resources. The students along with teachers could work on ways of addressing these vulnerabilities, preparing plans in consultation with local administration or NGOs.

Students could conduct mock drills in schools, colleges or hospitals. They could also work on school safety, safety of college buildings, training in first aid.

Other examples could be identifying how a large dam, road/highway or an embankment or the location of an industry affects local environment and resources or how displacement of large sections of people creates severe vulnerabilities may be mapped by student project work.

### Teaching Resources

A range of Films- documentaries and feature films related to disasters and their impacts and on vulnerabilities of people are available which a teacher could choose with care and screen. This could form a basis for classroom discussion.

### Examination Scheme:

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	15	5	5	70

A-Attendance; CT-Class Test; S/V/Q-Seminar/Quiz/Viva; HA-Home Assignment; EE-End Semester Examination

## PATTERN MAKING AND DRAFTING-I

**Course Code: FST2101**

**Credit Units: 02**

### **Course Objective:**

This study makes students understand the skills of developing the ideas into real garments by draping and pattern making to get the required style, shape and fit. This course gives the full knowledge of basic bodice blocks, sleeve blocks, yokes, collars and dart manipulation.

### **Course Content:**

#### **Module I : Basic elements to make drafts or patterns**

Pattern making tools; Workroom terminology- Name of each section-Symbol key, Pattern making term, Fabric terms; Accurate measurements - How to take measurements; Pattern making methods; Types of patterns; Standard body measurements; Completing the pattern.

#### **Module II : Drafting of Bodice Block**

Basic fitted bodice block; Easy fitting bodice block; Dart less bodice block; Basic necklines; Lowering necklines; Centre front openings.

#### **Module III : Master patterns**

Giving details like grain, notches, style marks, dart marks, balance marks, seam allowances, turnings etc.

#### **Module IV : Dart manipulation**

Introducing the slash and spread patternmaking technique to transfer the darts excess from one location to another for design variation; Suppression positions; Single dart series - common dart positions and shaped darts; two dart series

#### **Module V : Drafting of skirt block**

Straight skirt; Circular skirts - Full circular skirt, half circular skirt, Quarter circular skirt.

#### **Module VI : Different types of pockets & Drafting of Sleeves**

**Pockets-** Size specifications Patch pocket, Flap pocket, Side seam pocket, Kurta pockets and cross pockets. **Sleeves** - Introduction, Development of sleeve block, Sleeve Terminology, Sleeve length variation; Set insleeves-Puff at the crown, Puff at hem, Puff at cap and hem, Short and Long Lantern, Bishop, Bell, Leg-o-mutton sleeve; Grown on sleeve-Kimono, Dolman ,Raglan , Batwing ,Dropped shoulder/ Cap /Extended

### **Submission of practical work records - (Compulsory)**

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

# INTRODUCTION TO APPAREL MANUFACTURING TECHNIQUE

**Course Code: FST2102**

**Credit Units: 02**

## **Course Objective:**

The study of this course develops understanding of sewing techniques in relation to the garment construction. It gives knowledge of sewing machines and its functioning, various hand and machine seams, plackets, pockets, tucks, gathers, pleats, belt, hems and finishing and decorations through lectures and practical.

## **Course Content:**

### **Module I : Introduction to sewing machine**

Its various parts and functions; Understanding the simple problems of sewing machine and its maintenance

### **Module II : Basic stitches with hand and sewing machines**

Temporary and Permanent Basting - even and uneven, Diagonal and Thread mark stitch, Hemming - visible and invisible, Running, Buttonhole (plain, bound, corded), Backstitches -full, half, prick and pick, Slip stitch, Overcast and overhand stitches etc

### **Module III : Basic machine seams used for stitching or finishing of the garments**

Plain seam, Lapped seam, French seam, Run and fell seam

### **Module IV : Fabric manipulation like gathers, pleats, darts and tucks**

Pleats - Knife, Box, Accordion, Inverted box, Kick pleats; Tucks- Pin, Space, Cross, Shell and Release.

### **Module V : Necklines**

Various kinds of necklines, stitches and trimmings used for various shapes. Use and differences between the basic methods used for finishing necklines - Shaped facing, Bias facing and Piping.

### **Module VI : Plackets and Pockets**

Even hem placket, Wrap and projection placket, Continuous placket Different types of pockets - their construction and size specifications; Patch pocket, Flap pocket, Side seam pocket, Kurta pockets and cross pockets.

### **Module VII : Fixing belts**

### **Module VIII : Construction of basic bodice**

## **Submission of practical work records - (Compulsory)**

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

# COMPUTER APPLICATIONS

**Course Code: FST2103**

**Credit Units: 02**

## **Course Objective:**

This course introduces students with computer and its importance in the present world. Fundamentals of computers are learnt through lectures and practical assignments. Different applications of computers are used to make them skilled.

## **Course Content:**

### **Module I : Overview of the working of a computer**

Basic concepts in stored program execution, Input, output, storage devices, RAMS, ROM etc.

### **Module II : History of computers and its emergence**

### **Module III : Working knowledge of Microsoft Word & Excel**

### **Module III : Working knowledge of PowerPoint and learn making presentation in PPT**

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# DESIGN AND COLOUR CONCEPT

Course Code: FST2104

Credit Units: 02

## Course Objective

This course involves an interdisciplinary approach to the study of design and color by dealing with reasoned application of knowledge and skills in the areas of fashion design and technology which foster positive values and attitudes for enterprise, creativity and innovation through design-and-make activities.

## Course Contents:

### Module I : The Language of Design.

**Visual language** – Define Design, Designer, Visual art, Visual Design, Image, **Interactivity of Design** – Design as communication, Information; **Concept of good design; Kinds of design** - Structural design, Decorative design, Types of Decorative Design – Naturalistic, Conventional, Abstract, Historic, and Geometric; **Design disciplines, Design Industry** – Structure & Classification.

### Module II : The Power of Design

**Visual Literacy** - Creative thinking, Problem solving, Innovation; **Design Methods; The design process; Design process models** – (1) Spiral process models (2) Double diamond' process models; **Dimension of Design**- 2D, 3D and concept of 4D; **Design Governance in India** - National Design Policy, Design Act 2000, Intellectual property right, Professional Design Associations, Design Promotion Agencies.

### Module III : Terminology of Colour

**Understanding colour** –Define color, **Colour perception key elements** – (1) Light, (2) Substance, (3) Human vision and responses, **Fundamental categories of colour; Physical or surface qualities of color ; The color making attributes** - Hue, Value, and Saturation. **Dimensions of color** – (1) Colour Systems (2) Colour Space (4) Colour Gamut, (5) Colour Models. **Color management** – Application for Computer Aided Designing, Colour management in fashion designing.

### Module IV : Colour in visual design.

**Colour Theory** – Introduction, History, Derivation of modern colour theories – Newton's Colour wheel and its formation, Additive System & Light theory, Subtractive System & Pigment theory, CMY & CMYK, Introduction to Pigment theory of RYB colour model, **A System Perspective** – Choice of the Colour system in Visual Design. Colour qualities, Uses of colours.

## Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# FUNDAMENTALS OF TEXTILES

Course Code: FST2105

Credit Units: 02

## Course Objective:

To understand the tactile and behavioral characteristics of various fibers and yarns in relation to their application and end use

## Course Contents:

### Module I : The Overview of Textile Industry

Introduction to textiles; Major segments of the textile industry; Market planning for apparels; Primary and secondary sources of fabric buying and selling of finished fabric.

### Module II : The Textile Fibers

**Introduction** - Definition of textile fibers, classification of Textile fibers; **Desirable properties of an Ideal Textile fiber** – Staple fiber, filament; **Natural Cellulosic Fibers** - Seed hair fibers- Cotton, Kapok, Coir. Bast fibers- Flax, Ramie, Jute, Kenaf, and Hemp, Leaf fibers; **Natural Protein Fibers** - Animal hair fibers- Wool, Speciality hair fibers, Silk- Sericulture and type of silks. **Natural Mineral Fibers**, **Manmade Synthetic Fibers** –Polyamides - Nylon, Types of Nylon- Nylon-6 and Nylon-66, Aramid, Polyesters, Varieties and modifications of Polyester, Acrylic, Modacrylics and other vinyl fibers, Polypropylene, Polyolefin, Elastomers – Rubber, Spandex; **Manmade Regenerated Fibers**- Viscose Rayon, High-well-modules Rayon, Cupromonium Rayon, Layocell, Acetate, Triacetate, Manmade Protein fibers- Azlon, New fibers- Saron, Vinyon, Novoloid; **Identification of Textile Fibers** – Microscopy, Burning tests, Solubility tests.

### Module III : The Textile Yarns.

**Introduction** - Definition of yarns, Classification of yarns; **Yarn Manufacturing** – Yarn from staple fibers –Fiber preparation - Ginning, Spinning, Alternate spinning process – Rotor air jet, Friction, Twisters spinning, Self twist spinning, Yarn without twist. Filament yarns – manufacturing techniques – Twisted filaments, Textured filaments. **Properties of yarns** – Yarn count or yarn number – Indirect system, Direct system, Neo Metric count, Wool system, British worsted system. Yarn torque – S twist, Z twist, Flexibility, Cover factor. **Types of Yarns**- Simple and complex yarns, Types of complex yarns, Textured Yarns. **Fiber Blends**- General characteristics, Production. **Threads** - Difference between thread and yarn, Sewing threads- Types and properties.

## Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

## Text & References:

### Text:

## BASICS OF FASHION

**Course Code: FST2106**

**Credit Units: 02**

### **Course Objective:**

This subject helps the students to get acquainted to the basic terminology of fashion, relate to its application, customer types and fashion market segmentation. A simple preview of fashion career scope is given that would be useful later in to choose the relevant area of fashion career.

### **Course Contents:**

#### **Module I : Fashion Terminology**

**The Language of Fashion** – Introduction to Fashion concept; **Fashion** - Definitions and meaning, Style, Change, Acceptance, Taste, Fashion Look, Fashion trends, Fashion season; **Classification of Fashion**.

#### **Module II : Fashion Cycles & Fashion Motivation**

**Consumer Identification** – Fashion leaders, Fashion Innovators, Fashion motivators or Role models, Fashion victims, Fashion followers; **Consumer Buying Motivation; Methods of Fashion Selection** – Aesthetic Appeal, Color, Texture, Style, Price, Fit, Comfort, Appropriateness, Brand or Designer Label, Fabric performance and care, Quality, Convenience.

#### **Module III : Fashion Clothing Categories**

**Women's Wear**- Dresses, Social apparel, Suits, Outer wear, Sportswear, Active wear, Swimwear, Lingerie, Accessories. **Styling** – Couture, Designer, Traditional Styling. **Size Range** - Junior, Missy, Petite, Large or Women. **Men's Wear** – Tailored, Furnishings, Sportswear, Active sportswear, Work cloths, Accessories. **Styling** – Designer Styling, Traditional Styling, Contemporary. **Size Range** – Men's suits, Dress shirts. **Children's Wear** – Girls dress, Boy's Clothing, Sportswear, Swimwear, Outerwear, Sleepwear, Accessories. **Styling** – Infants, Toddlers and Young children, Older children. **Size Range** – Newborn, Infant, Toddler, Girls', Boys'.

#### **Module IV : Fashion Career Scope - Work Details & Skills Required**

Fashion Designer, Merchandiser, Fashion technologist - Pattern maker, Technical Designer/spec-tech, CAD/Operator, Fashion Research & Development Professionals – Colorist, Fashion Forecaster, Fashion Communication - Fashion Stylist, Fashion Photographer, Fashion Journalist, Fashion Editor. Costume Designer/Coordinator.

#### **Module V : Applied Learning Assignments.**

Make the influential list of Indian and International fashion designers and trace their fashion and style from the News papers and Magazines.

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>L</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; L- Learning Assignments; CT-Class Test; EE-End Semester Examination)

# SOCIAL AND PSYCHOLOGICAL ASPECTS OF CLOTHING

**Course Code: FST2107**

**Credit Units: 02**

## **Course Objective**

The object of this course is to be able to relate aspects of clothing to the society and to expand student's perspective in fashion, in keeping with present roles, personal lifestyles, and social clothing concepts.

## **Course Contents:**

### **Module I : Origin of clothing & Clothing Theories.**

**Origin of Clothing-** Theories of clothing – Theory of modesty, Immodesty, Protections, Adornment, Combined need theory, Other theories in fashion; **Relation between clothing and other disciplines-** (a) Physical Health (b) Mental Health; **Clothing and first impressions.**

### **Module II : Relation between clothing, fashion and the wearer.**

**Personality and Self concept,** - Motivation in clothing choices. Individual values, Interests and attitudes related to clothing. **Behavior and clothing choices** - Practices and effect of fashion and clothing on the individual; **Introduction to cosmetology and Fashion Grooming.**

### **Module III : Clothing and Society.**

**Clothing and Social behavior** - Clothing influenced by religion and culture, Clothes and conformity, Clothes and occupation, Concept of uniforms, Cloths and social class, Clothes & color and its impact.

### **Module IV : Case study**

**Influence of global fashion in Indian cloth wearing. (Compulsory)**

## **Examination Scheme:**

Components	A	CS	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

# FASHION ART ILLUSTRATION AND MODEL DRAWING-I

**Course Code: FST2108**

**Credit Units: 03**

## **Course Objective:**

The study of this course develops the student's ability to visualize the ideas and putting them in concepts for fashion garments. It gives an understanding to different illustration techniques and explores other media for creating concepts through practical assignments. Whereas Model Drawing is introduced with the concept of drawing normal figures in movement and different postures.

## **Course Content:**

<b>Module I</b>	:	Sketching of Block and Flesh Figures
<b>Module II</b>	:	Photo Analysis
<b>Module III</b>	:	Rendering of Prints into flat illustration
<b>Module IV</b>	:	Detailed drawing of Basic Styles
<b>Module V</b>	:	Draping of Garments
<b>Module VI</b>	:	Introduction to Garment Drawing
<b>Module VII</b>	:	Use of different colour medium

## **Submission of practical work records - (Compulsory)**

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A** - Attendance; **H** -Home Assignment; **R**- Practical work records; **EE**-End Semester Examination)

## **Text & References:**

### **Text:**

- Kathryn McKelvey, Fashion Source book.

### **References:**

- Bina Abling, Fashion Sketch Book

## Syllabus - Second Semester

### FASHION ART ILLUSTRATION AND MODEL DRAWING-II

**Course Code: FST2201**

**Credit Units: 02**

**Course Objective:**

This course deals with the study of the basic styles and the optical illusion they create the identification of styles – when, where and how to use. They must understand the relevance of working drawings and learn to use them appropriately. The students start with market surveys and researches to collect various fabrics and trimmings and learn to draw and use them effectively. After the students learn the basic skills of figure drawing and proportions, they now start working on stylized sketches and experimenting with different colour mediums to exhibit the desired fabric texture.

**Course Content:**

<b>Module I</b>	<b>:</b>	<b>Draping of different types of dresses in various silhouettes</b>
<b>Module II</b>	<b>:</b>	<b>Use of textures</b>
<b>Module III</b>	<b>:</b>	<b>Designing of casual shirts and t-shirts for teenagers</b>
<b>Module IV</b>	<b>:</b>	<b>Designing of casual and formal skirts for teenagers</b>
<b>Module V</b>	<b>:</b>	<b>Designing of casual and formal one piece dresses for teenagers</b>
<b>Module VI</b>	<b>:</b>	<b>Designing of casual and formal trousers for teenagers</b>

**Submission of practical work records - (Compulsory)**

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

**Text &References:**

**Text:**

- By Patrick John Ireland, Encyclopaedia of Fashion Detail

**Reference:**

- Inside fashion design
- Fashion Design and Illustrations
- Ritu Bhargava, Design Ideas and accessories
- Bina Abbing, Advanced Fashion sketch book

## **PATTERN MAKING & DRAFTING-II**

**Course Code: FST2202**

**Credit Units: 02**

### **Course Objective:**

This study makes students understand the skills of developing the ideas into real garments by draping and pattern making to get the required style, shape and fit. The students now learn to interpret designs and learn to create the patterns for those designs.

### **Course Content:**

#### **Module I : Drafting of Collars**

Collars -Introduction, Collar terms and classifications Flat Peter Pan collar, Flat sailor's collar, Roll Peter pan collar, Shawl collar, Mandarin collar Gents shirt collar

#### **Module II : Torso draft**

Combined bodice and skirt to produce torso draft; Torso Front and Torso Back

#### **Module III : Dresses without waistline seams**

Close fitting dress block (Sheath silhouette), Semi fitted dress block (Shift silhouette); Straight line dress block (Box fitting silhouette)

#### **Module IV : Princess Line foundation**

Pattern Plot and development, Princess Line foundation. A-Line princess

#### **Module V : Dart manipulation**

Other forms of suppression dart folds, dart tucks, gathers, pleats, flares etc.; Development of styles through dartmanipulation-Connecting darts to create seam lines; Style developments

#### **Module VI : Skirt variations**

Partly and fully flared skirts; Low waisted skirts; High waisted skirts; Flared skirts based on basic patterns (dartsconverted into flares); Skirts with gathered waistline; Gored skirts, adding flare to gored skirts; Godet skirt –Basic and variations, Godet to seams and slits; Wrap skirt, Draped skirt with cascade wrap; Pleated skirt – Knife pleats, Inverted pleat

#### **Module VII : Drafting of Capes, Ponchos, Kaftans, Kurta**

#### **Submission of practical work records - (Compulsory)**

#### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

# GARMENT CONSTRUCTION-I

**Course Code: FST2203**

**Credit Units: 02**

## **Course Objective:**

The study of this course develops application of sewing techniques in relation to the garment construction. This course gives the idea of converting two dimensional block figure into a three dimensional garment.

## **Course Content:**

<b>Module I</b>	<b>:</b>	<b>Construction of Gathered Skirt</b>
<b>Module II</b>	<b>:</b>	<b>Construction of Fitted Skirt with a slit and a placket</b>
<b>Module III</b>	<b>:</b>	<b>Construction of fitted Skirt Blouse with collar</b>
<b>Module IV</b>	<b>:</b>	<b>Construction of Resort Wear- Semi fitted or fitted dress</b>
<b>Module V</b>	<b>:</b>	<b>Construction of Cape/ Ponchos/ Kaftans/ Kurta</b>
<b>Module VI</b>	<b>:</b>	<b>Construction of a Formal 2 piece dress</b>

**Submission of practical work records - (Compulsory)**

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A** - Attendance; **H** -Home Assignment; **R**- Practical work records; **EE**-End Semester Examination)

# COMPUTER-AIDED DESIGN

**Course Code: FST2204**

**Credit Units: 01**

## **Course Objective:**

This course focuses on the usage of Usage of computers in Fashion & Apparel Industry

## **Course Content:**

<b>Module I</b>	<b>:</b>	<b>Corel Draw - Tool Introduction and usage.</b>
<b>Module II</b>	<b>:</b>	<b>Functions of tools and its usage.</b>
<b>Module III</b>	<b>:</b>	<b>Figure Drawing - Block figure and Flesh figure</b>
<b>Module IV</b>	<b>:</b>	<b>Working with layouts</b>
<b>Module V</b>	<b>:</b>	<b>Creating Prints and textures</b>
<b>Module VI</b>	<b>:</b>	<b>Tutorials</b>

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A**-Attendance; **H** -Home Assignment; **CT**-Class Test; **EE**-End Semester Examination)

## **Text & References:**

- Winifred Aldrich, CAD in Clothing and Textiles

# FABRIC ARTISTRY & EMBROIDERY

Course Code: FST2205

Credit Units: 02

## Course Objective

The students will develop a thorough understanding of various techniques used to impart various decorative skills on fabric through practical exercises.

## Course Contents:

### Module I : Introduction to fabric decoration.

**Embroidery** - Basic stitches- Running, Back stitch, split stitch, Simple couching, Stem, Satin, Cross, Blanket and Crossed buttonhole Closed buttonhole, Framed, Buttonhole, Chain, Feather, Fly, Herring bone, French knot bullion. **Transferring and Tracing techniques of Designs** - Practical exercise.

### Module II : Techniques of thread embroidery

**Mirror Work** - Mirror work places of India, Types of mirrors, stitches and designs. **Bead Works** – Definition, Bead work places of India, Articles, materials and stitches used for bead work. **Metal thread embroidery** - Definition, Metal thread embroidery places of India, Articles, materials and stitches used for Metal thread embroidery. **Smocking** – Definition, stitches used for smocking – Honey comb smocking.

### Module III : Lace Work, Appliqué Work & Quilting

**Lace Work** – Types of hand and machine made laces, Attaching laces to fabrics; **Appliqué Work** - Definition and Traditional examples- Raw edge appliqué, Satin stitched appliqué, Couched appliqué, Buttonhole appliqué, Chain stitched appliqué, Lined appliqué, Patch Work. **Quilting** – Definition and Traditional examples – Kantha and Sujni – executing various designs using running stitch.

### Module IV : Basic Hand Stitches

**Hand Stitches** - Running stitch, Basting, Gathering, Overcasting, Fagoting, and Hemming.

### Module V : Basics of Fabric Embellishment. (Theory)

**Constructed Artistry** - Yarn design, Weave design, Knitwear design; **Dye & Print Artistry** - Tie & Dye, Batik, Stencil, Screen, Block Printing. **Indian Hand-Painted Artistry** – Pichvai of Rajasthan, Pad of Rajasthan, Kalamkari of Andhra Pradesh, Patachitra of Orissa.

**Submission of practical work records - (Compulsory)**

### Examination Scheme:

Components	A	H	R	V	EE
Weightage (%)	05	05	15	05	70

(A - Attendance; H -Home Assignment; R- Practical work records; V- Viva voce, EE-End Semester Examination)

# DESIGN PROCESS & APPLICATION OF COLOUR THEORY

Course Code: FST2206

Credit Units: 03

## Course Objective:

This course focuses on the practical application on the theory subjects of design and colour in the fashion design studio. It aims at allowing the students must be able to document the design process verbally and visually through sketches, written notes, and analysis showing the practical development of a theme, concept, or idea of both design and colour.

## Course Contents:

### Module I : Design Theory applicable to Fashion Art.

Basic elements & principles of design and application in studio work.

### Module II : Design in textiles and clothing.

**Design Pattern** - Basic repeat structures – Straight repeat, Half drop, Tile (or brick) repeat, Repeat mirrored vertically and horizontally. **Design layouts** - Tossed patterns, All-over designs, Foulards, Ogees, Stripes, Borders, Engineered designs. Centering of Design repeats. **Classification of printed textile designs** - Motifs and styles- Florals, Pictorial and figurative designs, Paisleys, Geometrics, Abstracts, Ethnic designs, Co-ordinating designs. **Different types of Textile designs** – Traditional, Contemporary, Stylized, Naturalistic.

### Module III : Colour Theory applicable to Fashion Art.

**Pigment Wheel** - Classification of hues in the pigment wheel, Primary colours, Secondary colours, and Tertiary colours. **Color properties** - Hue, Value, Tints and Shades, Tones, Intensity or Saturation, Colour Temperature- Warm and cool colours, Color Interaction, Color Contrast, **Colour Harmony and Color Schemes**- (1) Basic Colour schemes - Chromatic Colours, Achromatic, Monochromatic, Polychromatic, Analogous, Complementary- Direct complements. (2) Advanced color schemes- Split complements, Triadic, Tetradic, Square, Dyadic or Dyad, Neutral, Earth Tone, Pale colour scheme.

### Module IV : Colour in Design Process.

**Colour in Design Principles** - Principle of rhythm, Balance, Proportion and scale, Emphasis, **Colour Interaction and Colour Effects** - Contrast of hue, Light-dark contrasts, Cold- Warm contrasts, Complementary contrast, Simultaneous contrast, Contrast of saturation, Contrast of extension. **Color schemes in designing** - Four F's in design: First impressions, Form, Function, and Fashion. **Interpretation of International Colours.**

Submission of practical work records - (Compulsory)

## Examination Scheme:

Components	A	H	R	EE
Weightage (%)	05	10	15	70

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

# TECHNOLOGY OF TEXTILES MANUFACTURING

Course Code: FST2207

Credit Units: 03

## Course Objective:

This course imparts the knowledge about two major technologies of fabric manufacturing – Woven and Knits that develop the foundation for fabric application in fashion.

## Course Contents:

### Module I : Introduction to Fabrics

**Fabrics** –Classification, Types, Properties. **Woven Fabrics - design and structure**- Idea of fabric structure, Warp, Weft, Interlacement diagram – Warp way and weft way, Creation of draft, peg plan and tie-up from the weave repeat. **Classification of Weaves – (1) Basic/Simple Weaves- Plain Weave**, Study of derivative structures of plain – **Twill Weave**, Classification and derivatives of twill weaves; **Satin Weave** – Satin & Sateen. **(2) Compound/Complex/Novelty Weaves** - Dobby Weave, Jacquard Weave, Double Cloth & Double Weave, Pique, Pile Fabrics- Classification, Loop & cut pile; warp & weft pile.

### Module II : Mechanism of Weaving

**Different forms of yarn packages and use** - Hanks, Cones, Cheeses, and Spools. **Loom**- Classification of looms, Parts of Loom, Passage of warp in a loom. **Basic loom mechanisms**- Primary motions, Secondary motions, Auxiliary motion; **Handlooms** - Loom Types, Essential features of handloom Fabrics; **Power looms** - Loom Types, Essential features of Power loom Fabrics; **Dobby, Jacquard; Special Purposed looms** - Circular Looms, Multiphase loom, Magazine loom, Ribbon loom, Needle loom, Swivel loom, Box loom; **Weaving Preparatory Process**.

### Module III : Woven Fabric Types and Analysis

**Fabric Types** - Buckram, Cambric, Casement, Cheese Cloth, Chiffon, Chintz, Corduroy, Crepe, Denim, Drill, Flannel, Gabardine, Georgette, Kashmir Silk, Khadi, Lawn, Mulmul, Muslin, Organdy, Poplin, Sheeting, Taffeta, Tissue, Velvet, **General principles of woven cloth analysis** - Parts of woven Fabric - Body, Selvedge, Method of identifying warp and weft, Assumption of count of warp and weft, Determination of ends/inch and pick/inch, weave analysis of fabrics .

### Module IV : Knitted Fabric & Mechanism of Knitting

**Introduction to Knit design and structure** – Definition, comparison between knitting and weaving ,Classification of knitting Machines; **Important terms in knitting** – course- wales – gauge-face loop-back loop- loop length, texture. **Weft Knitting**- Plain Knit stitch, Purl stitch, Rib stitch, Novelty stitches; **Warp knitting**- Tricot, Raschel, Crochet, Milanese; **Pile knitting**- Terry, Velour, **Jacquard Knitting**.

### Module V : Knitted Fabric Types and Analysis

**Knitted Fabric Types** - Jersey Knit, Rib knits, Double knit, Knitted fur fabrics, **Blended Fabrics** - Reasons why fabrics are blended; Types of Blended Fabrics - Terry Cotton, Terry-wool Suiting Fabrics, Poly- Viscose Rayon. **Common fabric defects and its causes** - Major and Minor Defects.

## Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

**Text & References:****Text:**

# FASHION- BUSINESS LAWS, ETHICS AND COMMUNICATION

Course Code: FST2208

Credit Units: 03

## Course Objective:

This Course intends to make the students aware of legal background relating to fashion business and company law also to develop good business communication skills and a sound understanding of related legal deeds and documents.

## Module I : Fashion - Business Laws

**Law of Contract** – Concept and its role in society; Consideration and capacity; Free consent and Public Policy; Public & Government Contracts and Quasi Contracts; Discharge of Contracts : Performance & Non Performance; Breach of Contract & Remedies; Representative Contracts; Special Contracts : Indemnity, Guarantee & Bailment, Electronic Contracts. **Industrial Relation Laws** – Industrial Relations and contract of Employment; Trade Union Law; Industry and Industrial Disputes & Resolution Mechanism; Regulation of Managerial Prerogatives; Job Losses and their Regulations; Discipline and Misconduct; Contract Labour, Wages Act, Injury Compensation **Intellectual Property Laws** – Introduction to Intellectual Property; International Conventions on Intellectual Property Protection; Copyrights & Neighboring rights; Patent Act; Design Act; Trademarks Act; Emerging areas of Intellectual Property Protection. **Law relating to Foreign Trade** – Introduction and Carriage of Goods by Sea; Carriage by Air and Multi Modal Transportation of Goods; International Sales & Payments; Settlement of Commercial disputes; The World Trade Organization and India

## Module II : Business Ethics

**Introduction to Business Ethics** - The nature, purpose of ethics and morals for organizational interests; Ethics and Conflicts of Interests; Ethical and Social Implications of business policies and decisions; Corporate Social Responsibility; Ethical issues in Corporate Governance. **Environment issues** - Protecting the Natural Environment; Prevention of Pollution and Depletion of Natural Resources; Conservation of Natural Resources. **Ethics in Workplace** - Individual in the organization, discrimination, harassment, gender equality. **Ethics in Marketing and Consumer Protection** - Healthy competition and protecting consumer's interest. **Ethics in Accounting and Finance** - Importance, issues and common problems.

## Module III : Business Communications

**Communication in Business Environment** – Business Meetings – Notice, Agenda, Minutes, Chairperson's speech; Press releases, Corporate announcements by stock exchanges; Reporting of proceedings of a meeting. **Basic understanding of legal deeds and documents** - Partnership deed, Power of Attorney, Lease deed, Affidavit, Indemnity bond, Gift deed, Memorandum and articles of association of a company, Annual Report of a company.

## Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

## References:

# FASHION THEORY

**Course Code: FST2209**

**Credit Units: 03**

## **Course Objective:**

To provide a broad foundation to acquire the knowledge of fashion theory and its growth which develop the students' potential for professional activities that demand considerable independence or for fashion research work

## **Course Contents:**

### **Module I : Fashion Development**

Origin of the Fashion, Effect of Industrial Revolution on Fashion; Mass production of clothing; Introduction of Retailing; Changes caused by communications, leisure, and Industry; Effect of world War-i; Effect of depression on Fashion; Effect of world War –ii; Reactionary Postwar Fashion; Fashion at 1960s; Anti fashion at 1970s; Fashion 1980s; Fashion 1990s.

### **Module II : Fashion Evaluation & Adoption.**

**Introduction** - Fashion Cycles, Length of Fashion Cycles; **Adoption**- Traditional Fashion adaption (Trickle – Down Theory), Reverse Adaption (Trickle-up or Bottom-up Theories), Mass Dissemination (Trickle-across Theory); James Laver and Laws on the Timeline of Style

### **Module III : Study of International Fashion Centers.**

France, Italy, England, Germany, Canada, United States.

### **Module IV : Applied Learning Assignments.**

Visit fashion malls and analyze current fashion styles and find social, economical, technological influence on it. Also refer the fashion magazines and newspapers for trend review. Make a report with views and reasons.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>L</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; L- Learning Assignments; CT-Class Test; EE-End Semester Examination)

## Syllabus - Third Semester

### FASHION ART ILLUSTRATION AND MODEL DRAWING-III

**Course Code: FST2301**

**Credit Units: 02**

**Course Objective:**

The students are very much aware of fashion forecast and now can start experimenting in their own way. The designing skills of the students now get more polished and they start designing more formal and highly priced garments. Now that students are perfect with female croquis they now start working with male croquis. After their perfection they start working in their own stylized form.

**Course Content:**

<b>Module I</b>	<b>:</b>	<b>Optical illusions</b>
<b>Module II</b>	<b>:</b>	<b>Designing of casual shirts and T-shirts for adults</b>
<b>Module III</b>	<b>:</b>	<b>Designing of casual blouses and tops for adults</b>
<b>Module IV</b>	<b>:</b>	<b>Designing of casual and formal dresses for adults</b>
<b>Module V</b>	<b>:</b>	<b>Designing of executive wear</b>
<b>Module VI</b>	<b>:</b>	<b>Designing a range of sportswear for adults</b>
<b>Module VII</b>	<b>:</b>	<b>Sketching of male block/flesh figures</b>
<b>Module VIII</b>	<b>:</b>	<b>Use of textures</b>

**Submission of practical work records - (Compulsory)**

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A** - Attendance; **H** -Home Assignment; **R**- Practical work records; **EE**-End Semester Examination)

**Text &References:**

## ADVANCE PATTERN MAKING-I

Course Code: FST2302

Credit Units: 02

### Course Objective:

This part of pattern making course enables students to learn about details of construction of patterns for important and most commonly worn women's garments like saree blouse and its variations, kurta, churidar etc. The course also gives an insight into design feature like pleats, seams, cuffs etc.

### Course Content:

<b>Module I</b>	<b>:</b>	<b>Pleats</b> Definition, Purpose, Identification & how to cut patterns, Box, Knife, Inverted, Double, kick etc.
<b>Module II</b>	<b>:</b>	<b>Fitted and non-fitted seams</b> Seams within the silhouette- vertical, Horizontal, Diagonal, Straight, Curved, Angular
<b>Module III</b>	<b>:</b>	<b>Waist bands &amp; Cuffs</b> Straight & Shaped
<b>Module IV</b>	<b>:</b>	<b>Drafting of variations of skirt blouse with collars</b>
<b>Module V</b>	<b>:</b>	<b>Drafting of sari blouse</b> Four dart, Katori, Princesses line, Choli cut, Long blouse
<b>Module VI</b>	<b>:</b>	<b>Designing a range of sportswear for adults</b>
<b>Module VII</b>	<b>:</b>	<b>Drafting of Kurta/ female shirt</b> Semi fitted or fitted with neckline and style line variations
<b>Module VIII</b>	<b>:</b>	<b>Drafting of salwar/chudidar/parallel</b>

Submission of practical work records - (Compulsory)

### Examination Scheme:

Components	A	H	R	EE
Weightage (%)	05	10	15	70

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

### Text & References:

#### Text:

- Ann Hagar, Pattern Cutting for Lingerie, Beachwear and Leisurewear

## **GARMENT CONSTRUCTION-II**

**Course Code: FST2303**

**Credit Units: 02**

### **Course Objective:**

This part of garment construction helps to give a final shape or form to a fabric according to one's aesthetic sense and creativity.

### **Course Content:**

<b>Module I</b>	<b>:</b>	<b>Construction of fitted Skirt Blouse with collar</b>
<b>Module II</b>	<b>:</b>	<b>Construction of Sari Blouse (Cotton) &amp; Sari blouse with lining (Silk)</b>
<b>Module III</b>	<b>:</b>	<b>Construction of suit with Salwar/ Chudidar</b>
<b>Module IV</b>	<b>:</b>	<b>Construction of Ethnic wears</b>
<b>Module V</b>	<b>:</b>	<b>Construction of Fusion wears</b>

**Submission of practical work records - (Compulsory)**

### **Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A** - Attendance; **H** -Home Assignment; **R**- Practical work records; **EE**-End Semester Examination)

# HISTORY OF INDIAN COSTUMES

**Course Code: FST2304**

**Credit Units: 03**

## **Course Objective**

This course aims to provide students with the appropriate vocabulary to describe costume as well as to develop the students' capacity to recognize the characteristic styles of each century, thereby enabling them to accurately describe the images. They will be more sensitive to the influence of culture, art and history on trends and to the various facets fashion can have in an Indian society.

**Course Methodology : Research Project**

## **The Research Project Guidelines:**

1. The students will have to submit and present a Research Project Assignment; this will give the students the opportunity to demonstrate their ability to carry out some interesting and creative research in History of Indian Costumes.
2. The students will have to make sketches, collect pictures with brief points of each period and submit in a standard size file.
3. The students are asked to give a brief oral presentation with 'Power Point' to the class about their research. They have to explain, what kind of interests they want to develop in the research and a debate will follow as well. The submission of project assignment file and presentation will be part of student's Examination Scheme.
4. The students will have to visit various historical places and museums for the part of their research.

**The project contents will be broken down into three modules which out lined below.**

### **Module - I : Ancient Indian costumes**

1. Indus valley civilization & Vedic Period. - Men's and Women's costumes, jewellery, hairstyles and footwear.
2. Mauryan and Sunga period. - Men's and Women's costumes, jewellery, hairstyles and footwear.
3. Kushan period. - Men's and Women's costumes, jewellery, hairstyles and footwear.
4. Satvahana period. - Men's and Women's costumes, jewellery, hairstyles and footwear.
5. Gupta period and footwear. - Men's and Women's costumes, jewellery, hairstyles

### **Module -II : Medieval Indian Costumes.**

- Mughal period and footwear. - Men's and Women's costumes, jewellery, hairstyles

### **Module-III : Colonial Indian Costumes.**

- British Period and footwear. - Men's and Women's costumes, jewellery, hairstyles

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>LR</b>	<b>B</b>	<b>P</b>	<b>Viva</b>	<b>Total</b>
<b>Weightage (%)</b>	<b>10</b>	<b>25</b>	<b>10</b>	<b>30</b>	<b>25</b>	<b>100</b>

(**A** - Attendance, **LR** - Literature Review, **B** - Bibliography, **P** – Presentation)

# TECHNOLOGY OF PROCESSING & CARE RENOVATION OF TEXTILES

**Course Code: FST2305**

**Credit Units: 03**

## **Course Objective:**

To develop the holistic understanding of the technology of textile processing and various kinds of finishes those enhance performance and aesthetics of the fabric.

## **Course Contents:**

### **Module I : Introduction to Textile Processing.**

**Fiber Chemistry-** Molecules of the fibers, bonding, covalent bonds, benzene ring, Polarity, Hydrogen bond, Ionic compounds, Vander Waals; Molecular orientation, structure and fiber properties – Crystallinity, Amorphous regions, Water affinity, Solubility, Oxidation and Reduction; **Preparatory Processing of Textiles-** Singing, Desizing, Scouring, Bleaching, Mercerization, Treatment with liquid Ammonia, Preparation of Silk and Wool.

### **Module II : Textile Dying.**

**Introduction to dying-** Dyes and Pigments, Classification of dyes – (1) Natural Dyes, (2) Synthetic Dyes - Direct, Acid, Mordant, Reactive, disperse, Vat, Azoic, Basic (cationic), Optical Brighteners; **Methods of Dyeing** – (1)Fiber dyeing – Dope, Top, (2) Yarn Dyeing – Skein (Hank), Package, Warp-beam, Space; (3)Fabric Dyeing (Piece Dyeing) – Winch, Jet Dyer, Beam dyer, Jig, Padding, Foam, Dyeing of Blends – Cross Dyeing, Union dyeing; Garment Dyeing; **Dyeing defects** – Identifications, Tests to determine colour fastness.

### **Module III : Textile Printing.**

**Introduction to Printing-** Dyes and Pigments for printing; **Classification of Printing styles**– Direct, Discharge, Resist; **Printing Methods** – Block, Roller, Duplex, Stencil, Screen, Transfer, Blotch, TAK dyeing, Jet Spray, Electrostatic, Photo printing, Differential printing, Warp Printing.

### **Module IV : Textile Finishing.**

**Introduction to Finishing** – Objectives, Classification, Finishing equipments; **Aesthetic Finishes** - Lustre, Drape, Texture, Hand; **Special Purpose or Functional Finishes** –Stabilization, Shape-retention, Appearance-retention, Comfort related, Biological control, Safety related.

### **Module V : Care Renovation of Textiles**

**Introduction to care of textiles** – Sunlight, Dampness, High temperature, Perspiration, Wear and Tear; Stains Removal Methods for different types of fabrics; **Laundering** – Soaps, Synthetic or non soap detergents, Pretreatment Products; Hand laundering, Washing Machine, Dry cleaning; **Storage-** Methods of textile storage; **Care symbols & Labeling** - Canadian care labeling, European care labeling, Japanese Industrial Standard care labeling, Australian care labeling, USA care labeling: ASTM D 5489.

## **Examination Scheme:**

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

**Text & References:**

# APPAREL PRODUCTION

Course Code: FST2306

Credit Units: 02

## Course Objective:

The students should be made aware of method of apparel production.

## Course Contents:

<b>Module I</b>	:	<b>Machinery and Equipment</b> Cutting, sewing, finishing, washing, stain removal, embellishment.
<b>Module II</b>	:	<b>Production methodology</b> Assembly line, individual garment manufacturing, job work, quality checkpoints.
<b>Module III</b>	:	<b>Production planning and control</b> Job batch and mass production, material planning and allocation, process planning and process sheet, production control, inventory control.
<b>Module IV</b>	:	<b>Quality Assurance</b> Understanding quality standards, analyzing test reports, basic fabric and sewing defects.
<b>Module V</b>	:	<b>Labelling and Packaging</b> Labelling, Packing and Packaging
<b>Module V</b>	:	<b>Garment Costing.</b>

## Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

## **BASICS OF MANAGEMENT**

**Course Code: FST2307**

**Credit Units: 01**

### **Course Objective:**

This subject deals with the basic applications and principles of management in the area of fashion

### **Course Contents:**

<b>Module I</b>	<b>:</b>	<b>Meaning &amp; Principles of management</b> Professional management of the fashion industry, Relevance of fashion management
<b>Module II</b>	<b>:</b>	<b>Structure of an organization</b> Function of different departments, Relationship between individual departments
<b>Module III</b>	<b>:</b>	<b>Leadership</b> Need for leadership, functions of a leader, and manager as a leader.
<b>Module IV</b>	<b>:</b>	<b>Communication</b> Importance of communications, communication process, barriers of communication, making communication effective.
<b>Module V</b>	<b>:</b>	<b>Authority</b> Types and features, relevance of authority in management
<b>Module VI</b>	<b>:</b>	<b>Motivation</b> Characteristics of motivation, methods of improving motivation, incentives, pay, promotion, rewards, job satisfaction and job enrichment

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

### **Text & References:**

# INTRODUCTION TO FASHION RESEARCH & PRODUCT DEVELOPMENT PROCESS

**Course Code: FST2308**

**Credit Units: 01**

## **Course Objective:**

This subject is designed to introduce the student to the language of design and a range of skills associated with research methods, application and development for a fashion outcome. The module will highlight the value of research in relation to the creative exploration of concepts and will provide a foundation which can be built upon and extended as the student progresses throughout the programme.

## **Course Contents:**

### **Module-I : Fundamentals of Design thinking.**

**Stages of Thinking**-Define, Research Ideate, Prototype, select, Implement, Learn, **Research**- Identifying drivers, Information gathering, Target Groups, Sample and feedbacks; **Idea generation**- Basic design directions, Themes for thinking, Inspiration and reference, Brainstorming, Value, Inclusion, Sketching, Presenting Ideas; **Creative Thinking Methods** - Innovation through Design Thinking - The Need for Creative and Design Thinking.

### **Module-II : The Research Method and Design Process.**

**Research** -Nature and Definition; **Research Process** – Preparation, Information gathering-Goal, Identification of Problems and Hypothesis, Exposition of facts and interpretation, Presentation of result and findings; **Research Methods** – Literature review, Collection of preliminary field data, Define the problem, Analyzes and Modification, Presentation of findings; **Design Process** – Study historic and contemporary examples, Experimentation with materials and visual Ideas, Visual analysis and identification of design problems, Created the work series and explore in subsequent work, Board presentation.

### **Module-III : Fashion Product Development.**

**Introduction to Product development process** – Target market, Merchandising, Season; **Design** – Concept boards, knockoffs, Fakes, Design elements – Color and Fabric selection, Design principles, Sketching Ideas – Style boards. Sample Development – Draping, Flat pattern, Prototype, Fit; **Tech packs** – Designer work sheets, **Line selection**- Editing, Reassessment of merchandising plan, Line presentation; **Manufacturing**- Duplicates the samples.

## **Examination Scheme:**

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

## COMPUTER-AIDED MANUFACTURING (CAM)

Course Code: FST2309

Credit Units: 03

### Course Objective:

This module makes the student know-how the Computer Applications in the Fashion & Apparel Industry.

### Course Content:

Module I	:	Adobe Photoshop - Functions of Tools & Working on layers
Module II	:	Photo-editing & its usage
Module III	:	Demo on 'TUKA cad' Module
Module IV	:	Mode conversation through editing
Module V	:	Demo on 'Opti Tex'
Module VI	:	Rendering & filter effects along tutorials

### Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# PROJECT PRESENTATION

**Course Code: FST2332**

**Credit Units: 03**

## **Guidelines for the project**

The purpose of this project is to help students to learn the procedure of doing research on a subject of their interest related to fashion field and then analyse & evaluate it in a presentable manner. They will have to submit a report and will have to give presentation for the same. This project will be conducted during their summer break.

## **In general, the File should be comprehensive and include:**

- A short account of the activities that were undertaken as part of the project.
- A statement about the extent to which the project has achieved its stated objectives.
- A statement about the outcomes of the evaluation and dissemination process engaged in as part of the project.
- Any problems that have arisen and may be useful to document for future reference.

## **Project Report**

**The project report is the final research report that the student prepares on the project he chose. Following components should be included in the project report:**

- **Title or Cover Page:** Title Page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide
- **Acknowledgement(s):** Acknowledgement to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.
- **Abstract:** A good abstract should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.
- Table of Contents
- Introduction
- Materials and Methods
- Result and Discussions
- Conclusions & Recommendations
- Implications for Future Research
- References

## **The Layout Guidelines for the Project File & Project Report**

- A4 Size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/2.5 cm; left & right margins: 1.25 inches/ 3 cm

## **Assessment Scheme:**

**Continuous Evaluation:** 40% (Based on punctuality, regularity of work, adherence to plan and methodology, refinements etc.)

**Final Evaluation:** 60% (Based on the Documentation in the file, Final report, analysis and results, achievement of objectives, presentation/viva)

## Syllabus - Fourth Semester

### FASHION ART ILLUSTRATION AND MODEL DRAWING-IV

**Course Code: FST2401**

**Credit Units: 02**

**Course Objective:**

The study of this course develops the student's ability to design for different category of people: casual and formal. This focuses on designing of a garment according to requirement of the industry keeping in mind the forecast of the season. After the students learn the draping of male figure and move to stylized sketching using different colour mediums.

**Course Contents:**

<b>Module I</b>	<b>:</b>	<b>Draping of male figures</b>
<b>Module II</b>	<b>:</b>	<b>Designing of uniforms</b>
<b>Module III</b>	<b>:</b>	<b>Designing of beach wear</b>
<b>Module IV</b>	<b>:</b>	<b>Designing of bridal wear</b>
<b>Module V</b>	<b>:</b>	<b>Ruff and tuff denim wear</b>
<b>Module VI</b>	<b>:</b>	<b>Inspirational and Innovative designing</b>
<b>Module VII</b>	<b>:</b>	<b>Designing of night wear</b>

**Submission of practical work records - (Compulsory)**

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

**Text & References:**

**Text:**

## ADVANCE PATTERN MAKING-II

Course Code: FST2402

Credit Units: 01

### Course Objective

This part of pattern making course enables students to learn about special ladies wear outfits like bath wear, bridal wear, evening wear and nightwear. Commonly worn men's wear outfits like jeans and trousers have also been included in the course.

### Course Contents:

<b>Module I</b>	:	<b>Yokes</b> Shoulder, midriff & hip yokes
<b>Module II</b>	:	<b>Drafting of jeans and trouser</b>
<b>Module III</b>	:	<b>Developing patterns for various styles</b> Dresses with waist seam lines, coordinates, and dresses without seam lines
<b>Module IV</b>	:	<b>Drafting of Evening Gown's variations</b>
<b>Module V</b>	:	<b>Drafting of bath robe</b>
<b>Module VI</b>	:	<b>Drafting of bridal wears</b>
<b>Module VII</b>	:	<b>Drafting of night wears (Male &amp; Female)</b>
<b>Module VIII</b>	:	<b>Drafting of men's shirt</b>

Submission of practical work records - (Compulsory)

### Examination Scheme:

Components	A	H	R	EE
Weightage (%)	05	10	15	70

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

### Text & References:

#### Text:

## **GARMENT CONSTRUCTION-III**

**Course Code: FST2403**

**Credit Units: 01**

### **Course Objective**

This course is an advancement of the third semester program. The study of this course develops understanding of sewing of more complex garments with further detailing.

### **Course Contents:**

<b>Module I</b>	<b>:</b>	<b>Construction of Evening gown</b>
<b>Module II</b>	<b>:</b>	<b>Construction of Princess line top</b>
<b>Module III</b>	<b>:</b>	<b>Construction of Bathrobe</b>
<b>Module IV</b>	<b>:</b>	<b>Construction of nightwear (Male &amp; Female)</b>
<b>Module V</b>	<b>:</b>	<b>Construction of men's shirt</b>

**Submission of practical work records - (Compulsory)**

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A** - Attendance; **H** -Home Assignment; **R**- Practical work records; **EE**-End Semester Examination)

### **Text & References:**

## COMPUTER-AIDED DESIGN (CAD)-III

**Course Code: FST2404**

**Credit Units: 02**

### **Course Objective:**

This study will introduce the student the usage of computer software in different areas of Fashion Designing & Technology.

### **Course Content:**

<b>Module I</b>	<b>:</b>	<b>Illustrator: Tool Introduction and usage</b>
<b>Module II</b>	<b>:</b>	<b>Functions of tools &amp; creating objects</b>
<b>Module III</b>	<b>:</b>	<b>Reach ERP</b>
<b>Module IV</b>	<b>:</b>	<b>Setting up artwork: Transparency, Gradients and patterns</b>
<b>Module V</b>	<b>:</b>	<b>Dobby/Jacquard</b>
<b>Module VI</b>	<b>:</b>	<b>Working on Color separation (2 D)</b>

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A**-Attendance; **H** -Home Assignment; **CT**-Class Test; **EE**-End Semester Examination)

# FASHION MERCHANDIZING-I

**Course Code: FST2405**

**Credit Units: 02**

## **Course Objective:**

The aim of this subject is to enable students to appreciate the unique aspects and concepts of business management. It focuses attention on apparel business giving a thorough knowledge of merchandising.

## **Course Contents:**

<b>Module I</b>	<b>:</b>	<b>Fashion Merchandising</b> Introduction, Functions and role of Merchandiser, Merchandising Process
<b>Module II</b>	<b>:</b>	<b>Marketing and merchandising concepts</b> Study of fashion principles and fashion cycle, Fad etc., Fashion movement. Study of domestic and international markets
<b>Module III</b>	<b>:</b>	<b>Environment and segmentation of fashion</b> Market segments and target markets
<b>Module IV</b>	<b>:</b>	<b>Merchandising systems</b> Wholesaling & retailing
<b>Module V</b>	<b>:</b>	<b>Merchandise Planning &amp; Buying</b> Sources of Consumer information, Merchandising Team, Merchandise Plan, Key trends in Merchandising and sourcing
<b>Module VI</b>	<b>:</b>	<b>The structure of the Retail Industry</b> Retail merchandising, Retail Formats & Locations, Communicating with Consumers, Value addition in the Supply Chain from Yarn/ Fabric to retail.
<b>Module VII</b>	<b>:</b>	<b>Organizational Structures</b> Structure of export house, buying house and domestic companies, Buyer's classification and buying network in exports

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# QUALITY CONTROL & PRODUCTION MANAGEMENT-I

Course Code: FST2406

Credit Units: 03

## Course Objective:

This subject provides a detailed knowledge to students regarding the quality aspects, production, planning and control, maintenance of equipment, material handling, utilization of resources etc of a garment so that the quality and cost both are in an equilibrium.

## Course Contents:

<b>Module I</b>	:	<b>Quality Control.</b> Meaning and Need for quality control; Approaches to quality control; Statistical quality control; Acceptance sampling, Types of defects
<b>Module II</b>	:	<b>Inspection and Testing</b> Quality of Indian clothing, manufacturers with respect to exports; Role & characteristics of Quality controller; Need and planning for inspection; Types of inspection; Role of operator and inspector in inspection; Difference between inspection and testing
<b>Module III</b>	:	<b>Concept of TQM</b> Need and Importance of Quality management in all areas of production; Procurement of raw materials; Fabric defects in spinning, weaving, dyeing and printing, TQM Tools Standards and codes. Quality control instruments; National and International Codes; ISO 9000 concepts and its evolution and its implications
<b>Module IV</b>	:	<b>Production Management</b> Meaning and need for production management; Types of production-Job, Batch and mass production
<b>Module V</b>	:	<b>Material Planning &amp; Allocation</b> Material planning and allocation; Process planning and process sheet; Production control
<b>Module VI</b>	:	<b>Workroom management</b> Marker planning and placement of markers; Line and sample development
<b>Module VII</b>	:	<b>Inventory control and Cost estimation</b> Need and advantages of inventory control; introduction and functions of cost estimation, estimation procedure, elements of cost and ladder of costs, method of calculating depreciation, overhead expenses and distribution of overhead expenses

## Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# HISTORY OF WESTERN COSTUMES

**Course Code: FST2407**

**Credit Units: 03**

## **Course Objective**

This course aims to provide students with the appropriate vocabulary to describe costume as well as to develop the students' capacity to recognize the characteristic styles of each century, thereby enabling them to accurately describe the images. Students are given the opportunity to develop both their observation and description skills from the history, as they are applied to costume, ornamentation and trends.

## **Course Methodology : Research Project**

### **The Research Project Guidelines**

1. The students will have to submit and present a Research Project Assignment; this will give the students the opportunity to demonstrate their ability to carry out some interesting and creative research in History of Western Costumes.
2. The students will have to make sketches, collect pictures with brief points of each period and submit in a standard size file.
3. The students are asked to give a brief oral presentation with 'Power Point' to the class about their research. They have to explain, what kind of interests they want to develop in the research and a debate will follow as well. The submission of project assignment file and presentation will be part of student's Examination Scheme.
4. The students will have to visit various historical places and museums for the part of their research.

**The project contents will be broken down into three parts which outlined below.**

### **Module I**

#### **: Ancient costumes of the Western world**

1. Egyptian clothing footwear. - Men's and Women's costumes, jewellery, hairstyles and
2. Greek clothing footwear. - Men's and Women's costumes, jewellery, hairstyles and
3. Roman and Italic clothing footwear. - Men's and Women's costumes, jewellery, hairstyles and
4. Byzantine Period footwear. - Men's and Women's costumes, jewellery, hairstyles and

### **Module II**

Renaissance Period  
footwear.

#### **: Costumes of the Medieval World**

- Men's and Women's costumes, jewellery, hairstyles and

### **Module III**

1. Victorian Period footwear.
2. Fashion – 1900s footwear.
3. Fashion – 1950s footwear.

#### **: Costumes of the Modern World**

- Men's and Women's costumes, jewellery, hairstyles and
- Men's and Women's costumes, jewellery, hairstyles and
- Men's and Women's costumes, jewellery, hairstyles and

4. Fashion – 2000s - Men's and Women's costumes, jewellery, hairstyles and footwear.

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>LR</b>	<b>B</b>	<b>P</b>	<b>Viva</b>	<b>Total</b>
<b>Weightage (%)</b>	<b>10</b>	<b>25</b>	<b>10</b>	<b>30</b>	<b>25</b>	<b>100</b>

(**A** - Attendance, **L** - Literature Review, **B** - Bibliography, **P** – Presentation)

# VISUAL MERCHANDISING

**Course Code: FST2408**

**Credit Units: 03**

## **Course Objective:**

Skill development in the creation of showroom or retail store window/interior displays that sell merchandise. Study of the basic techniques of store planning, mannequin dressing, alternate form design, and display space conceptualization and implementation

## **Course Contents:**

**Module I: Introduction to Visual Merchandising (VM):** Introduction, Objectives, Concept of Visual Merchandising, Objectives of Visual Merchandising, Growth of Visual Merchandising, Visual Merchandising in India, Scope of visual merchandising in India, Visual Merchandising as a Support for Positioning Strategy, Prospects of Visual Merchandising, Challenges in Visual Merchandising, The common challenges, Ways to overcome the visual merchandising challenges

**Module II: The Merchandise Mix:** Introduction, Objectives, Concept of Merchandise Mix, Merchandise line, The Assortment of Products, Assortment strategy, Merchandise Mix of Show Off, Role of a merchandiser, Other Atmospherics in Merchandising, Colour scheme, Lighting

**Module III: Store Management in Merchandising:** Introduction, Objectives, Types of Stores, Location of a Store, Types of retail locations, Planning a Store Layout, Various Types of Store Layouts, Grid layout, Forced-path layout, Free-form layout, Boutique layout, Combined layout, Store Space Allocation, Heads of space allocation in a store, Managing Customer Navigation in a Store, General Rules of Customer Traffic in a Store, The Loop for Guiding the Shoppers through a Store

**Module IV: Store Design and Display:** Introduction, Objectives, Concept of Store Design and Display, Objectives of store design, Purpose and importance of display, Rules of display planning, Display Settings, Store Design, Exterior of a store, Interior of a store, Window displays, Merchandise Presentation Strategies, Colour blocking, Other techniques of merchandise placement, Physical materials used to support the display, Components of display, Some Useful Display Fixtures, Shelves, Gondolas, Round racks, Four ways, Saccades and fixation, Replenishes, Planogramming

**Module V: Store Image & Security:** Introduction, Objectives, Concept of Image Mix, Elements of Image Mix, Merchandise, Fixtures, Sound/Music, Odour, Visuals, Employees, Elements that Levy Negative Impact on Shoppers, Change of Image, Security Issues

**Module VI: Managing Communication for a Retail Store Offering:** Introduction, Objectives, Marketing Communication, Thematic Communication, Methods of Communication, Graphics, Signage

**Module VII: The Present and Future of Visual Merchandising:** Introduction, Objectives, Visual Merchandising at Different Stores, Apparel store, Furniture store, Gift store, Future Prospects of Visual Merchandising

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

# FASHION MARKETING MANAGEMENT

**Course Code: FST2409**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to impart knowledge about fashion global market, fashion brand management, different pricing strategies, and necessary for successful employment in apparel businesses.

## **Course Contents:**

### **Module I : Fashion for global market**

Social, Cultural, Economic, Demographic factors relating to branded and licensed products, Analyzing potential or global market, identify target consumers and competition, market research and testing, customization

### **Module II : Fashion Marketing Concepts**

The concept of marketing, Utility, Marketing functions and related activities, The concepts of market segmentation and niche marketing, The marketing mix, The channels of distribution used in the fashion industry, Marketing and merchandising

### **Module III : Economics in the Fashion Industry**

The concept of economic goods/services, The concept of economic resources, The concept of supply and demand, Cost and retail, Gross profit and net profit.

### **Module IV : Fashion Promotional Mix**

Types of media used in fashion retail advertising, The importance of special promotional events

### **Module V : Consumer Demand for Fashion Marketing**

Consumer Groups - Demographic Trends & Psychographic Trends, Consumer spending – Personal Income, Disposable Income, Discretionary Income, Purchasing Power, Factors influencing consumer behaviour.

### **Module VI : Pricing strategies & Decisions**

Concept and importance of pricing, Factors affecting pricing decisions, Methods of pricing

### **Module VII : Fashion Brand Management**

Types and relevance of branding, Fashion & brand positioning, launching strategies, distribution, marketing campaigns for brand introduction

## **Examination Scheme:**

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

## **TRADITIONAL INDIAN TEXTILES DOCUMENTATION (CONCENTRATION ELECTIVES)**

**Course Code: FST2410**

**Credit Units: 03**

### **Course Objective:**

The conceptual idea behind this documentation project is to acquire a thorough understanding of the craft's historicity and explores the creative importance and poetic potential of Indian traditional textiles & handcrafts productions which function as an inspirational tool for fashion design students

**Course Methodology :** Research Documentation.

**Aim :** To appreciate, document and add value to any traditional textiles & crafts of India.

### **Course Guidelines:**

- The project will necessarily be a scientific, methodical documentation of a particular Textile and Craft traditions of India prevalent in the region, which will have the following core issues in the background.
  - Textile and Craft Tradition
  - Materials, Processes and Techniques
  - Craft survey and records the old –age craft of India
- Each section will be divided into groups, each group comprising minimum of 3 students.
- **The student's group has to choose any one of the state / region of India for Documentation topic.**

#### **Example List:**

ANDHRA PRADESH – Kalamkari & Pochampalli, BIHAR - Madhubani, GUJARAT - Block Printing, KASHMIR – Jamavar, ORISSA – Ikat, RAJASTHAN - Bandhini / Tie & Dye, TAMIL NADU – Kancheevaram, UTTAR PRADESH - Banaras Bocadoes, WEST BANGAL - Jamdani & Baluchar.

**The students can also prepare assignment of Textile and Craft traditions found at their town / village, artisans and crafts communities who live in their locality.**

- Visit to any craft village by each group to document any traditional craft of India. Students are expected to stay in the craft village & document the process & products of the craft.
- After the completion of documentation, students could make presentation at class.
- There will be an evaluation by a jury comprising of external experts and internal faculty guide from the department. Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination.
- **Each student will present the following on the day of evaluation.**
  1. The final document file - This must be prepared on plain A3 paper. Each page should be used in the same orientation (landscape or portrait), Keep this simple. Your folder should contain well produced drawings, motifs, sketches, diagrams, photographs, Textile / costume sample or Value added craft item, strike offs, Swatches and brief notes / points where appropriate. Additional marks will be awarded for neat presentation, clearly drawn designs and correct spelling, grammar and punctuation.
  2. Video / PPT of the craft's village (location, structure, socio-economic condition, work process, product range and market etc.)

**Examination Scheme:**

Evaluation Components	RA				A	P	V	Total Weightage (%)
	Internal Evaluation		External Evaluation					
Craft Document	10	20	15	30	10	20	20	100
Swatches and Products Presentation	10		15					

(RA – Research Analysis, A - Attendance, P – Presentation, V – Viva voce)

## **STUDY ON TRADITIONAL DRESSES OF INDIA (CONCENTRATION ELECTIVES)**

**Course Code: FST2411**

**Credit Units: 03**

### **Course Objective:**

The course objective is to familiarize students with aspects of the cultural past that still shape the present way to express an Indian identity in fashion which enable students to understand the relationship between tradition and contemporary trends, form and function, creator and consumer.

### **Course Methodology : Research Project**

**Aim :** To explore the linkages between, craft traditions and Indian fashion environment through project studies.

### **Course Guidelines:**

- Each of the students has to undertake a Project individually under the supervision of a faculty and to submit the same following the guidelines stated below.
- The projects taken up for this subject may have different stages of planning, execution and presentation. The projects may be taken up in a group of students where they can work on a particular craft tradition. Students may visit the crafts-persons in clusters in various regions. In the preparatory stage, students can discuss about various crafts traditions practiced in the region, their history, distribution etc., collect all information available through various sources including library, internet and resource persons. To avail comprehensive data on various aspects of the crafts, students may develop an interview schedule and decide on number of crafts persons to be interviewed, which all places they will be visiting etc. The students must equip on interaction with crafts persons and other people from the community, type of language they should use, how to be polite with them and while handling their materials etc. Students can buy some of the product from crafts persons, take photographs after seeking their permission, make drawings, etc. which later on they can use in presentation or submission of project report.
- **Following are the core issues for research and project background, the students can be choose the areas of study and topics based on this.**
  1. Craft Traditions
  2. Philosophy and Aesthetics
  3. Materials, Processes and Techniques
  4. Environment & Resource Management
  5. Social Structures
  6. Economy and marketing
  7. Textile Craft Traditions and their relevance in the cotemporary fashion.
- Language of Project Report and Viva-Voce Examination may be English. There will be an evaluation by a jury comprising of external experts and internal faculty guide from the department.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as “Absent” in the Examination.

**Examination Scheme:**

Evaluation Components	RA				A	P	V	Total Weightage (%)
	Internal Evaluation		External Evaluation					
Conceptual Framework	10	20	15	30	10	20	20	100
Presentation, Analysis & Findings	10		15					

**(RA - Research Analysis, A- Attendance, P – Presentation, V – Viva voce)**

## TERM PAPER

**Course Code: FST2431**

**Credit Units: 02**

### **Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face

### **Guidelines:**

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

### **Examination Scheme:**

<b>Organization and relevance of content</b>	<b>Literature Review</b>	<b>Bibliography</b>	<b>Total</b>
40	40	20	100

# WORKSHOP

**Course Code: FST2433**

**Credit Units: 01**

## **OBJECTIVES:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## **GUIDELINES FOR WORKSHOP**

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of at least 500 words about the learning outcome from the workshop.

## **METHODOLOGY**

The methodology followed at the workshop could be based on any one or more of the following:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

## **Examination Scheme:**

<b>Attendance</b>	<b>Active Participation</b>	<b>Multiple Choice Questions / Quiz</b>	<b>Solving the Case Assignment / Write up</b>	<b>Total</b>
<b>10</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>100</b>

## Syllabus - Fifth Semester

### FASHION ART ILLUSTRATION AND MODEL DRAWING-V

**Course Code: FST2501**

**Credit Units: 02**

**Course Objective:**

This module makes the students design accessories for different segment of people, along their display and story board.

**Course Content:**

- Module I** : **Designing a range of scarves, ties and stoles for teenagers**
- Module II** : **Designing a range of Uniforms for Hotel & Airlines employees, Hospital, Industrial apparels.**
- Module III** : **Designing a range of hats and caps for teenagers/adults**
- Module IV** : **Designing a range of contemporary wear for adults**

**Submission of practical work records - (Compulsory)**

**Examination Scheme:**

Components	A	H	R	EE
Weightage (%)	05	10	15	70

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

## **GARMENT CONSTRUCTION-IV**

**Course Code: FST2502**

**Credit Units: 01**

### **Course Objective:**

This course is further an advancement of fourth semester garment construction course. Every garment has its own features and style of construction. In this particular semester students are exposed to construct some special garments for both male and female.

### **Course Contents:**

<b>Module I</b>	<b>:</b>	<b>Construction of Jeans (Male &amp; Female)</b>
<b>Module II</b>	<b>:</b>	<b>Construction of Trouser with pockets</b>
<b>Module III</b>	<b>:</b>	<b>Construction of Bridal Wear (Indian /western)</b>
<b>Module IV</b>	<b>:</b>	<b>Construction of Pregnancy &amp; Maternity wears</b>
<b>Module V</b>	<b>:</b>	<b>Construction of Executive wear</b>
<b>Module VI</b>	<b>:</b>	<b>Construction of men's formal</b>

**Submission of practical work records - (Compulsory)**

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A** - Attendance; **H** -Home Assignment; **R**- Practical work records; **EE**-End Semester Examination)

## COMPUTER AIDED DESIGN (CAD)-IV

**Course Code: FST2503**

**Credit Units: 02**

### **Course Objective:**

This module will make the student use Fashion studio for compilation of portfolio for Graduation Design Collection undergoing various processes.

### **Course Contents:**

<b>Module I</b>	<b>:</b>	<b>Tools Introduction and usage</b>
<b>Module II</b>	<b>:</b>	<b>Cleaning &amp; Selection of fabric</b>
<b>Module III</b>	<b>:</b>	<b>Color Reduction</b>
<b>Module IV</b>	<b>:</b>	<b>Texture Mapping.</b>
<b>Module V</b>	<b>:</b>	<b>Mood board &amp; Color board</b>
<b>Module VI</b>	<b>:</b>	<b>Draping</b>

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# PATTERN DRAPING

Course Code: FST2504

Credit Units: 01

## Course Objective:

After the students have a thorough knowledge of flat pattern-making and its application they are now introduced to the concept of three dimensional process of pattern making by draping the material on to the mannequin.

## Course Contents:

<b>Module I</b>	:	<b>Introduction</b> Equipments needed, grain, seam allowances, preparation of fabric, dress form.
<b>Module II</b>	:	<b>Basic patterns</b> Basic bodice (front & back), Basic skirt (front & back), Basic sleeve
<b>Module III</b>	:	<b>Variations in necklines, armholes, waistlines, princess bodice and boned bodice</b>
<b>Module IV</b>	:	<b>Creating patterns by dart manipulations</b> Multiple darts, Dart tucks, Gathers, Pleats, Flare, Style lines and control seams
<b>Module V</b>	:	<b>Style lines and control seams</b> Use of style lines, Cowls and twists in bodice, Midriff & yoke styles
<b>Module VI</b>	:	<b>Variations in skirts</b> Variation of the basic skirt, flared, pegged, paneled, gathered, gored and pleated, Peplums- flared and gathered
<b>Module VII</b>	:	<b>Collars</b> The Mandarin collar, Convertible Collar, Peter Pan collar, Shawl collar, Notched Collar
<b>Module VIII</b>	:	<b>Sleeves - The Dolman sleeve, Raglan and Kimono sleeve</b>
<b>Module IX</b>	:	<b>The Shift</b> A Line, Tent, Blouson, Use of Facings, Closures and Pockets
<b>Module X</b>	:	<b>Final Presentation</b>

Submission of practical work records - (Compulsory)

## Examination Scheme:

Components	A	P	R	EE
Weightage (%)	05	10	15	70

(A - Attendance; P - Presentation; R- Practical work records; EE-End Semester Examination)

# PATTERN GRADING

**Course Code: FST2505**

**Credit Units: 01**

## **Course Objective:**

After the knowledge of flat pattern making the students now learn how to increase or decrease any pattern in proportion.

## **Course Contents:**

<b>Module I</b>	<b>:</b>	<b>Introduction to Grading</b> History, Sizes & Measurement Sizes & Development, Importance of grading, Methods of grading- Stack and Track methods, Different types of grading- horizontal, vertical and diagonal
<b>Module II</b>	<b>:</b>	<b>The Master Grades</b> Grading of adult bodice block- front and back, Inset and grown on sleeves
<b>Module III</b>	<b>:</b>	<b>Grading of collar s and lapels</b> Tailored lapel, Tailored Collar, Shawl Collar
<b>Module IV</b>	<b>:</b>	<b>Grading of skirts</b> Fitted skirt block-front and back, flared skirts, skirt variations, Grading of Sheeth Block
<b>Module V</b>	<b>:</b>	<b>Grading of Trouser Block</b> Basic Block; Trouser variation
<b>Module VI</b>	<b>:</b>	<b>Grading of Jacket</b> Paneled, Box and double breasted jackets
<b>Module VII</b>	<b>:</b>	<b>Computerized Grading Technology</b>

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A** - Attendance; **H** -Home Assignment; **R**- Practical work records; **EE**-End Semester Examination)

## FASHION MERCHANDIZING-II

**Course Code: FST2506**

**Credit Units: 03**

### **Course Objective:**

After the students have understood the relevance and functions of merchandising process, they are taught the skills related to sourcing, developing and presenting product lines, vendor and customer relationship and export documentation.

### **Course Contents:**

<b>Module I</b>	<b>:</b>	<b>Developing &amp; Presenting Product Lines</b> Traditional Line Planning, Contemporary Line Planning, Fundamental methods of product line planning, Concept of merchandise presentation
<b>Module II</b>	<b>:</b>	<b>Strategies and Decisions</b> Pricing strategies, Promotional strategies, sourcing of raw materials.
<b>Module III</b>	<b>:</b>	<b>Time Flow Management</b> Maintaining time schedule chart, Current Indian exports and India's position
<b>Module IV</b>	<b>:</b>	<b>Global sourcing</b>
<b>Module V</b>	<b>:</b>	<b>Customer / Vendor Relationship</b> Concept of Customer Service, Role of Personal Selling purposes.
<b>Module VI</b>	<b>:</b>	<b>Financial aspect of merchandising</b> Merchandise accounting, Inventory Valuation, Retail pricing
<b>Module VII</b>	<b>:</b>	<b>Merchandise Control &amp; Presentation</b> Merchandise Control & report Analysis
<b>Module VIII</b>	<b>:</b>	<b>Merchandising and related careers</b>

### **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A**-Attendance; **H** -Home Assignment; **CT**-Class Test; **EE**-End Semester Examination)

## QUALITY CONTROL & PRODUCTION MANAGEMENT-II

Course Code: FST2507

Credit Units: 03

### Course Objective:

This subject provides a detailed knowledge to students regarding the quality aspects, production, planning and control, maintenance of equipment, material handling, utilization of resources etc of a garment so that the quality and cost both are in an equilibrium.

### Course Contents:

<b>Module I</b>	<b>:</b>	<b>Production Management</b> Meaning and need for production management; Types of production-Job, Batch and mass production
<b>Module II</b>	<b>:</b>	<b>Material Planning &amp; Allocation</b> Material planning and allocation; Process planning and process sheet; Production control
<b>Module III</b>	<b>:</b>	<b>Workroom management</b> Marker planning and placement of markers; Line and sample development
<b>Module IV</b>	<b>:</b>	<b>Inventory control and Cost estimation</b> Need and advantages of inventory control; introduction and functions of cost estimation, estimation procedure, elements of cost and ladder of costs, method of calculating depreciation, overhead expenses and distribution of overhead expenses
<b>Module V</b>	<b>:</b>	<b>Various Production Systems</b> Study various production system with respect to quality. Eg. Lean, Sigma, 5S etc.

### Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# FASHION FORECASTING

**Course Code: FST2508**

**Credit Units: 03**

## **Course Objective:**

The students are made to start their work with the collection of data regarding fashion forecasting, trend analysis and presentations. They are then made to forecast the fashion trend and dictate fashion in their very own way.

## **Course Contents:**

### **Module-I : Concept of fashion forecasting (Theory)**

Awareness of fashion fairs and fashion centers, Knowledge of creative writing, Reading of fashion forecast magazine, Sources of information, Role of Exhibitions and Fashion shows

### **Module-II : Fashion Forecasting Process (Theory)**

**Market Research**- Consumer research, Shopping, Sales records; **Evaluating the collections**- Similar Ideas indicate fashion trends, Trends for target market; **Fashion services** – Collection reports, Trend books, consulting, Color services, Television/Video services, News letter services, Web sites, Directories and reference books, Fashion Magazines and news papers, Catalogs. **Design Sources**- Historic inspirations, Folk influences, Vintage clothing shops, Museums, Libraries and bookstores, Arts, Fabrics/Textiles, Travel, Form follows function, The street scene, The turn of the century, innovations and technologies.

### **Module-III : Applied Learning Assignments. (Practical)**

- |                                    |   |   |
|------------------------------------|---|---|
| <b>Market Research</b>             | - | On site visits to fashion retailers and cloth markets and study the market trends and collect various cloth samples, catalogs etc.  |
| <b>Forecasting Exploration</b>     | - | Students will explore a variety of sources like Magazines, News papers, Internet sites and in-site, their market research reports etc. to become familiar with apparel, textile, color, style, and general culture and consumer forecasting resources. Each student will identify and report trends found to class. |
| <b>Preparation of story boards</b> | - | Students will prepare story boards for specific target.   |
| <b>Presentation of designs</b>     | - | Students will prepare fashion forecast for different seasons.   |
| <b>Final Presentation</b>          | - | Each student have to submit their Research file in a standard format guided by the faculty for the final evaluation.  |

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CD</b>	<b>A &amp; F</b>	<b>P</b>	<b>Viva</b>	<b>Total</b>
<b>Weightage (%)</b>	<b>10</b>	<b>20</b>	<b>20</b>	<b>25</b>	<b>25</b>	<b>100</b>

(**A** - Attendance, **CD** - Concept Development, **A & F** - Analysis & Findings, **P** – Presentation)

## **CRAFT DOCUMENTATION (ORGANIZATIONAL PROJECTS)**

**Course Code: FST2535**

**Credit Units: 06**

### **Objective**

The objective of this programme is to bring about the transformational change from a practical application of the learned knowledge in real time corporate world and industry towards laying a focused and insightful planning for a strong foundation towards understanding and contributing towards Indian crafts.

### **Methodology**

- Market Visit
- Field Trip
- Documentation and Presentation
- Scope and Final Presentation

### **Guidelines**

- The Craft Documentation is scheduled between 4<sup>th</sup> and 5<sup>th</sup> semester.
- CD is a complete practical training programme with study of each and every aspects of the organization, and the training experience should be submitted as Organizational Project Report.
- There are two guides will be associate with CD. Faculty Guide for overall guidance and Company Guide for monitoring the SIP students in respective departments of the allocated company.
- Every student should attend the company allocated to him/her regularly and complete the project on given time lines. Disciplinary action will be initiated if any student is found to be absenting himself/herself without the permission from company guide / Faculty guide / HOS.
- Student in organizational Project (OP) / CD are the role ambassadors of Amity University Haryana (AUH). They carry the brand image of AUH and should always show high level of dignity at the work place.
- Every student is expected to carry a pen, notepad daily to the company where he/she assigned the project and should always note down the progress of him/her along with daily dosage of work schedule.
- The students in the OP/CD can be meeting the faculty guide in between the programme with prior permission from the company guide. Such cases the company guide should be inform to faculty guide/HOS
- The students by virtue of his/her carelessness fail to do the project, will not be awarded the graduation certificate and also kept out-of-placement services.

### **FINAL RECORD PREPARATION FORMAT**

#### **(Summery of Organizational Project Report content)**

1. Cover Page
2. Inner cover page
3. Company Certificate
4. Amity University Haryana Certificate
5. Table of contents / Index
6. Acknowledgement
7. Declaration
8. Executive Summery
9. Introduction

- Brief on the Industry
- Brief on the Company
- 10. Project Objective
  - Primary and Secondary
- 11. Methodology
- 12. Scope of the study
- 13. Significance of the study
- 14. Project Analysis
  - Work Done Analysis
  - Research Methodology analysis
- 15. Tabulation and Graphical Representation
- 16. Inference from Study
- 17. Contributions
- 18. Learning's
- 19. Suggestions
- 20. Conclusions
- 21. Achievements (In case of any appreciation letter, stipend achievement letter, Photographs on the significant occasions or any others)
- 22. Reference
- 23. Annexure.
- Language of Project Report and Viva-Voce Examination may be English. There will be an evaluation by a jury comprising of external experts and internal faculty guide from the department.
- Failure to submit the Project Report in proper manner / without company certificate / AUH certificate or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination.

**Examination Scheme:**

Evaluation Components	OPR				A	P	V	Total Weightage (%)
	Internal Evaluation		External Evaluation					
Project Analysis	10	20	15	30	10	20	20	100
Conclusion & Recommendations	10		15					

(OPR - Organizational Project Report, A - Attendance, P – Presentation, V – Viva voce)

# **MANUFACTURING PROCESS IN APPAREL INDUSTRY AND EXPORT MANAGEMENT (CONCENTRATION ELECTIVES – Group-I)**

**Course Code: FST2509**

**Credit Units: 01**

## **Course Objective:**

The basic objective of this course is to provide the students with necessary knowledge, skills and foundations for acquiring a wide range of rewarding careers into the rapidly expanding Apparel Industry.

## **Course Contents:**

### **Module I : Introduction to Apparel Industry.**

**Structure** - Size Structure, Manufacturing structure – Own account, Sub-contractor, Working Methods; **Sectors** – Based on garment types. **Product & Organization Types** – Unit size, Production run, Change in fabrics, New operations, Operator skills, Salary levels, Engineering, Marketing & Design.

### **Module II : Organizational structure & Process of Apparel Industry.**

Design Department - , Marketing Department, Finance Department, Purchase Department, Production Department, Operations (Planning) Department , Shipping Department.

### **Module III : Production Engineering.**

**Basic Method study** – Work study, Method study, Time standard, Principles of motion economy, Method records, Practical aspects, **Basic Work Measurement** – Management tools, Time study Procedure, Standard Minute, Standard performance, Watches, Timing elements, Timing errors, Rating allowances, Standard time calculation, Predetermined motion study

### **Module IV : Export Management**

**Export / Import (EXIM) Policy of India** – Benefits of International Marketing, Concepts of WTO and Globalization; **Export Promotion Activities** - Functions of TEXPROCIL, AEPC, PDEXIL and HEPC ,Textile Committee and Textile Commissioner's Office; **Export Finance** – Pre shipment and Post shipment Finances; **Documentary Credit** – Letter of Credit; **Pricing in export** - Export Price composition, Ex-Factory, FAS, FOB, C&F, CIF; **Export Procedures** – Export Order Processing, Export Documents, Export Incentives.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

## QUALITY ASSURANCE IN APPAREL INDUSTRY (CONCENTRATION ELECTIVES-GROUP-I)

**Course Code: FST2510**

**Credit Units: 01**

### **Course Objective:**

This course puts strong emphasis on further developing students understanding and working knowledge of techniques to identify the product defects, propose solutions to these problems and strategically handle the quality control with appropriate inspection systems.

### **Course Contents:**

#### **Module I : Introduction and Inspection Methods**

**Quality control** – Definition, Importance of quality, Raw material Inspection, **Fabric Inspection** - 4 point System , 10 point System; **Trims Inspection; In process Inspection, Final Inspection** – AQL random sampling inspection; Sampling Plans, Acceptance Sampling, Product Quality Audit, Comparability checks, Documents required before inspection.

#### **Module II : Testing of Garments**

Seam strength, Fabric Stretch properties, Dimensional changes due to Laundering, Dry cleaning and Steaming & Pressing, Durable Press Evaluation of Fabrics and Apparel, Needle cutting / yarn severance - Suability of fabrics, Bow and Skewness in Woven and Knitted fabrics, Distortion of yarn in Woven Fabrics, Fabric Streak Analysis, Soil/Stain release, Wrinkle Recovery, Water Resistance and Water Repellency, Fusible Interlinings, Testing of Zippers, Elastic Waist Band , Sewing Threads, Pantyhose, Wear Testing; 45° Degree Flammability & Vertical Flammability Tests.

#### **Module III : Use and parameters of Quality Packing Accessories**

**Packing** - Classification of Packing, Stand up pack, Flat pack, Hanger pack, Hanger with sandwich pack, Dead man pack ; **Packing materials** - Poly bag – Plain / Gazetted pack, Back support board, Window board - Plain board, Inner collar patty, PVC, Outer patty, Butterfly, Plastic clips, Plain and gripper - Pins - plain and ball head, Hang tags, Price ticket, Fabric tag, Tissue paper, Size sticker, Warning sticker, Cello tape, Cartons.

#### **Module IV : Care Labeling & Garment Defects.**

**Care labels** - Introduction to Care labels, Different systems of Care labeling – American, British, Canadian, Japanese, and International labeling, Eco-labeling; **Shade sorting**-Introduction, Importance Instrumental shade sorting. **Defects in garments** - Major and minor defects, Pattern defects, Spreading defects, Cutting defects, Stitching defects- Broken stitch, Unraveling seams, Re-stitched seams, Rolling pockets, Skipped stitch, Wavy seams; **Ways to minimize defects in garments.**

#### **Module V : Garment Industry Certification**

**Quality Control Program** - Seven tools of quality controls; ISO 9000 series standards, Procedure of obtaining ISO 9000 series standards, WRAP Certification & Procedures, SA 8000 certification. **Quality Management system**- Total Quality Management, Phases of TQM, 5S Concepts, Daily Work Management, Six sigma concepts. **Quality control tools** - Lean Production system, Comparison between Lean and Mass production system.

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A**-Attendance; **H** -Home Assignment; **CT**-Class Test; **EE**-End Semester Examination)

## **FASHION RETAILING AND VISUAL MERCHANDISING (CONCENTRATION ELECTIVES - GROUP-II)**

**Course Code: FST2511**

**Credit Units: 01**

### **Course Objective:**

The aim of the course is to provide an integrated curriculum frame work within which students are able to acquire a range of knowledge and transferable skills relevant to employment in retail industry.

### **Course Contents:**

#### **Module I : Introduction to Fashion Retailing & Strategies.**

**Fashion Retailing**-Definition, Concept, Importance, Functions – Indian Retails vs. Global Scenario, **Retail Location**- Factors affecting location decision, Site Selection. **Retail Directions** -Value directed retailing; Service oriented retailing, Unique Merchandising, Shopping as entertainment, Street retailing, Global expansion of retailing; **Types of Retail operations** – (1) Specialty stores- Single brand or Private label retailers, Secondary spin-offs, (2) Department stores, (3) Mass Merchants – Discounters, Off-Price retailers, Outlet stores, Warehouse clubs, (4) Promotional stores, (5) Non store retailing - Mail order merchants, Party plan retailing, Electronic retailing, Television shopping, Online shopping.

#### **Module II : Fashion Retail Functions & Organizations.**

**Retailing Functions** – Merchandising, Store operations, Marketing, Sales Promotion, Finance, Real estate or Store planning, Human resources. **Organizations** – (1) Shopping Centers – Traditional Malls, Diversified Malls, Value centers, Outlet Malls, Transportation centers, Recreational Malls, Town center malls; (2) The small stores, (3) The large stores, (4) Store with in a store – In store designer boutiques, Leased departments; (5) Multiple -unit stores – Chain stores, Department store groups, corporate ownerships. **Retail Buying** – Buyer's role, Duties & responsibilities of a retail buyer

#### **Module III : Introduction to Visual Merchandising.**

**Visual Merchandising** - Definition, Concept, Importance; **Store Planning** – Store Image, Target customers, Seasonal Visual merchandising, **Store Design** – (1) Windows – Special event windows, Fashion message windows, Direct-sell windows; (2) Interiors - Apparel fixtures, Folding and stacking, Accessories display

#### **Module IV : Managing Visual Merchandising.**

**Elements** - Mannequins, Standards Manuals, Presentation packages, Tele communications, Designer / Brand in-store shops, **Store Administration** - Floor space management, Managing store inventories and display.

#### **Module V : Case Study (Compulsory)**

**Impact of Foreign Direct Investment (FDI) in Indian Fashion Retail Industry.**

### **Examination Scheme:**

Components	A	CS	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

## **COUTURE DESIGN (CONCENTRATION ELECTIVES - GROUP-III)**

**Course Code: FST2514**

**Credit Units: 01**

### **Course Objective:**

This course offers students the opportunity to enhance their skills to the segment of the fashion industry known as the Couture /High fashion / Designer label market. This is an applied learning course and students need to experience this with concerned faculty experts.

### **Course Contents:**

#### **Module I : Introduction to Couture Design. (Theory)**

**Couture** – Definition, Origin of Couture, Function of couture, Chambre Syndicale de la Haute Couture, **Couture Design Concept** - High-End Luxury, Luxury Sociology and Ceremonies, Concept of ‘made-to-measure’ clothing; **Designer Clothing** - Definition, Concept, Designer Label, Designer Brands. Key Concept Innovation & Development of couture design. Study of Indian couture designers and International couture designers

#### **Module II : Couture Decorative Techniques & Embellishments. (Practical)**

Expands knowledge of the couture by exploring various decorative techniques, Apply glass seed beads, sequins, pearls, and faux gems on different types of fabrics. Create embellishments such as flowers and frog closures from fabric and ribbons, hand embroider original designs, and learn the arts of quilting, cartridge pleating, and quilting

#### **Module III : Couture Apparel Design - Advanced Illustration Techniques. (Practical)**

Study the muscular and skeletal functions of the human body and their relationships to the design and creation of haute couture apparel, visualizing how anatomy and aesthetics form the basis of designing a haute couture collection. Become proficient in the translation of ideas via the fashion design sketch and further develop a personal drawing style and various apparel silhouettes.

#### **Module IV : Couture Apparel Design - Advanced pattern Making & Sewing Techniques (Practical)**

Skill development in taking body measurements; Developing custom fittings for customized patterns; In depth coverage of the process of transferring a custom body fitted canvas to a couture or designer dress form and padding it for custom sizing; The sewing techniques practiced in the finest haute couture ateliers around the world.; Learn couture techniques in couture fabric selection, proper cutting procedures, hand stitching, seam and hem finishes, pocket construction, inner construction methods pressing, and finishing.

#### **Module V : Haute Couture Portfolio - Applied Learning Assignments.**

Write a short description of a person, which include age, build, job, place of residence, interests, and lifestyle. Consider that, this person will be the typical customer. Determine the price range and style range according to the customer life style. Designing a personal collection based on a theme: determine and carry out all the stages of product development from the design to the completed prototype. Apply knowledge of the couture to design, drape, fit, and construct. Develop styles and images through fabric sourcing, market research, and inspirational research for the project.

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>L</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A**-Attendance; **L**- Learning Assignments; **CT**-Class Test; **EE**-End Semester Examination)

## **FASHION STUDY APPLICABLE TO HOME FURNISHING**

**Course Code: FST2602**

**Credit Units: 03**

### **Course Objective:**

The objective for students is to make them understand the major home furnishings categories and the diverse consumer demand for fashionable and functional products. Information for interior designers, merchandisers, product developers, retailers, and consumers about the types of consumer goods for the home and the raw products used to make them.

**Module I:** Introduction to home furnishing industry, Home furnishings and the marketplace

**Module II:** Materials in home furnishings; Textiles, Wood, Glass, Metals, Pottery, Plastics, Other materials

**Module III:** The categories of home furnishings: Bedding, Linens, Carpet, rugs & flooring, Furniture

**Module IV:** The categories of home furnishings : Paints and wall-coverings, Lighting, Tableware

### **Examination Scheme:**

# LEATHER SCIENCE APPLICABLE TO FASHION ART

Course Code: FST2603

Credit Units: 03

## Course Objective:

The objective of this course is to impart knowledge about leather science which enables students to understand the designing of leather garments and accessories.

## Course Contents:

### Module I : Leather – Components and structure.

**Layers of Hides and Skins** – Epidermis/outer layer, Dermis/corium, Hyaline layer, Flesh/Adipose layer; **Grain Pattern** - Buff, Cow, Goat, Sheep; **Chemical Composition of Hides and Skins** – Water, Proteins, Fats, Minerals, Traces of pigments, carbohydrates; **Characteristics of surface** – Substance (Thickness), Colour, Tension and stretch, Quality.

### Module II : Types of Leather

**Garment leathers** – Grain Leather (Nappa), Natural Dry Milled leather (NDM), Printed Dry Milled leather (PDM), Oil pull up, Antique, Two-Tone. **Shoe Leathers** – Non-Grain leathers – Nubuck, Suede; **Split Leather**- Leathers for footwear- Cow, Buff, Goat, Sheep; Burnish, Corrected Grain (CG), Embossed, Softy. **Range of Thickness** – Footwear leather; Garments.

### Module III : Processing of Leathers.

**Pre-Tanning Operations (Beam house Operations)** – Sorting, soaking, Un haring or Liming, Fleshing, Pasting, De-liming, bating, Pickling. **Tanning** – Mineral tanning, Vegetable tanning. **Post-Tanning** – Neutralization, Re-tanning, Dyeing-types & methods, Oil, Chemical, Combinations, Drying, Conditioning, Staking. **Finishing** – Fat Liquoring, Setting, Finishing materials – Fixing Chemicals, Feel Modifiers, Types of Finishes-Aqueous, Non-aqueous, Methods of finishing –Auto spray, Roller coating, Brushing/Padding, Final plating. **Methods of Joining leather**- Wet and Dry adhesives. **Defects of Hides and Skins** - Ante mortem Defects; Post mortem Defects, Processing Defects

### Module IV : The Leather Industry

**Introduction** – History and Development, classification of leather goods. **Nature of leather Industry** – Organization, Operation, Sources of leather supply; Leather marketing and merchandising, Research and Development. **Industry Trends** – Enlarging markets; Increased competition from synthetics, Foreign Trade, Industry growth factors, **Indian leather goods Industry**- Locations, Nature, Products.

### Module V : Fur Clothing

History and Use, Fur Sources, Processing of Fur, Nature of Fur Trade, Anti-fur campaigns

## Examination Scheme:

Components	A	CS	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

# ENTREPRENEURSHIP

**Course Code: FST2604**

**Credit Units: 03**

## **Course Objective:**

Identify and apply the elements of entrepreneurship and to entrepreneurial processes. Recognize the importance of entrepreneurship and identify the profile of entrepreneurs and their role in economic growth. Use the entrepreneurial mind-set and behave responsibly and ethically in their roles as entrepreneurs. To enable them to identify the opportunities in apparel, textile and Accessories

## **Course Contents:**

**Module I : Introduction to Entrepreneurship:** What is Entrepreneurship, Why Entrepreneurship, Characteristics of Entrepreneur & Entrepreneurship

**Module II : Importance of Entrepreneurship:** Importance of Entrepreneurship, Common Myths about Entrepreneurship

## **Module III : Entrepreneurial Opportunities and Enterprise Creation**

Sensing Entrepreneurial Opportunities, Environment Scanning, Market Assessment, Identification of Entrepreneurial Opportunities

**Module IV: Enterprise Planning and Resourcing:** Business Planning - Preparation of a Project Report, Resource Assessment -Financial and Non – Financial, Fixed and Working Capital Requirement, Funds, Flows, Profit Ratios, Break Even Analysis etc., Mobilising Resources - Sources and Means of Fund, Facilities and Technologies for starting an Enterprise. Organising/Production of goods and services- quality, quantity and flow of inputs.

**Module V: Supply Chain and Logistics:** What is supply chain? What is the role and importance of Supply chain and logistics in fashion industry? Various challenges faced by fashion industry due to constraints in infrastructure of India

## **Examination Scheme:**

Components	A	CS	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

# NONWOVENS IN FASHION APPAREL APPLICATIONS

**Course Code: FST2605**

**Credit Units: 03**

## **Course Objective:**

The aim of this course is to provide the students with necessary knowledge associated with nonwoven fabrics with special reference to apparel applications, and fashion designers to assure nonwoven start gaining 'respect' in fashion apparel products.

## **Course Content:**

### **Module I : Overview of nonwovens**

**Nonwoven fabrics** –Introduction, Definition of nonwovens by EDANA, Comparison of nonwovens between other textiles, Nonwoven fabric properties, Specific properties; Usage; **Nonwoven Industry** – Market overview.

### **Module II : Production Process.**

**Introduction** – Process flow chart for producing nonwovens, **Web Formation** – Dry Laid –Carding, Air laying; Spun melt –In spun laid process, In melt blown; Wet laid; Other techniques. **Web Bonding** – Chemical bonding, Thermal Bonding (Cohesion Bonding) – Calendar bonding, Through-Air Thermal bonding, Drum & Blanket Systems, Sonic bonding, Mechanical Bonding –Needle punching, Hydro-entanglement, Stitch bonding.

### **Module III : Finishing Treatment.**

**Introduction-** Classification of Finishes, **Dry Finishing** –Shrinkage, Wrenching, Creeping, Crabbing, Calendaring, Pressing, Perforating, Slitting, Splitting, Graining and Velouring, Singing; **Wet Finishing** – Washing, Dyeing, Printing; **Chemical Finishing** – Antistats, Antimicrobials, Water repellents, Lubricants. UV absorbers and polymer stabilizers, Flame retardants, Softeners, Absorbency and rewetters, Thermoplastic binders, resins and emulsion polymers, Thermosetting resins and cross-linking agents, Soil release, Optical brighteners; **Coating, Laminating, Flocking.**

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CS</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

# DESIGNING AND DEVELOPMENT OF FASHION ACCESSORIES

**Course Code: FST2606**

**Credit Units: 03**

**Course Objective:** Students will be able to learn about different types of accessories that are relevant to fashion industry

**Module I:** Introduction to fashion accessories, Types of accessories

**Module II:** Functional and decorative importance of accessories

**Module III:** Designing and developing accessories: Sketching and rendering of headgear, hand wear, foot wear and hand bags (3 each) (Construction of any one)

**Module IV:** Sketching and rendering of belts, gloves and (construction of any one), Sketching of Indian jewellery- Mughal Jewellery, Thewa, Kundan Jewellery, Temple Jewellery, Sketching of accessories on women and men's croqui (2 each) Jewellery designing based on theme. (with Concept Board)

**Examination Scheme:**

Components	A	CS	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

References:

- John Peacock, Fashion Accessories: The Complete 20th Century Sourcebook
- Julia Kuo, 20 Ways to Draw a Dress and 44 Other Fabulous Fashions and Accessories

## PROJECT (CONCENTRATION ELECTIVES)

### Objectives

1. To understand the relationship of forecasting to product development and the need for forecasting knowledge for all aspects of apparel and textile businesses.
2. Integrate consumer, aesthetic and quantitative trend information into the product development process.
3. Engineer new value into an existing product or line while holding costs.

This course is a 'team project' integrated with Concentration Electives -1. The team size should be minimum of two. The team has to be choosing any one of the project from the following:

Course Code:	Concentration Electives -2	Credit Units:
FST2607	Sportswear Design and Development	03
FST2608	Costume Design pertaining to performing arts.	03
FST2609	Functions of Indian Buying Houses/Agents – A study	03

### Project Guideline

- Students' team has to complete the project through various research methods.
- **Research Project Idea Generation:** current (or perennial) problems and controversies in the apparel field with relevant chosen topic. This method allows historians the opportunity to explain how the current situation came about and to analyze contributing factors to the problem. To find perennial problems in the apparel industry, search through apparel-related journals. Based on this analysis, formulate the purpose of a potential research study. Think about WHY this topic is important to study (the "so what" question). Summarize the points (research question/purpose; why significant; brief literature review) in a one page outline – Design Brief. Critically think about the purpose of your research study.
- **The Final Research Paper:** This will include the updated sections: introduction, literature review/background, methods, and results with discussion, conclusion and ideas for future research. Students should include images as well as a complete reference list. All citations should comply with requirements for submitting a paper.
- **Professional Presentation:** Students will prepare a PowerPoint presentation for a maximum of 15 minutes (about 15-20 slides) including: introduction, brief literature review, methods, results and discussion, and conclusion. Images should be embedded within the PPT.

### Project Evaluation

- There will be an evaluation by a jury comprising of external experts and a committee of internal faculties from the department. Failure to submit the portfolio with final products or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination.

Evaluation Components	R A				A	P	V	Total Weightage (%)
	Internal Evaluation		External Evaluation					
Portfolio Presentation	10	20	15	30	10	20	20	100
Products Presentation	10		15					

(R A– Research & Analysis, A - Attendance, P – Presentation, V – Viva voce)

## Syllabus - Seventh Semester

### FABRIC MANUFACTURING TECHNOLOGY: CROCHET & NON-WOVEN

**Course Code: FST2701**

**Credit Units: 03**

**Course Objective:** Overview of nonwovens: Definition, Structure, and Creation, Staple-fibre based processes: fibre preparation and web formation, Web bonding processes: Mechanical Thermal, and Chemical, Polymer-extrusion based technologies: Spunbond and Meltblown, Finishing processes: Mechanical and chemical, Basics of crochet techniques

#### **Module 1: Apparel Applications**

**Nonwoven Apparels** – Introduction, Advantages; **Manifesting fashion apparel requirements** - Physical requirements, Thermo-physiological requirements, Biomechanical requirements, Psychological requirements, Nonwoven Performance from Apparel Perspective – Bending, Area Modification, **Nonwoven Fashion Apparels : From 1960 to 2012** - Disposable fashion garments, NCSU nonwoven fashion garments, Nonwoven woollen apparel, Fabrican Spray-on fabric.

**Module 2: Crochet Introduction:** Discussion of needle sizes, stitch sizes & types of yarn (weight, texture). Learn chains, slip stitch, single crochet, half double crochet, double crochet, treble crochet, joining new ball of yarn. Practice single crochet stitches

**Module 3: Crochet Advance Learning:** Learn finishing. Learn fringe application. Discuss mistakes: dropped stitch, added stitches, inconsistent stitches, etc. Practice half double crochet stitch. Learn how to read stitch patterns. Learn basic patterns: clusters, shells, popcorn, and more. Practice following pattern stitch instructions. Begin pattern stitch sampler scarf.

#### **Examination Scheme:**

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

#### **References:**

- S.J. Russell (Ed.), Handbook of Nonwovens, Woodhead Publishing, CRC Press, Washington DC, 2007.

- Linda P. Schapper, The Complete Book of Crochet Stitch Designs: 500 Classic & Original Patterns Paperback – 24 Nov 2011

## FIELD TRIP/VISIT DOCUMENT EVALUATION

**Course Code: FST2702**

**Credit Units: 04**

**Course Objective:** Students will get the practical exposure by visiting the field/market and need to submit a report on basis of that.

**Course Content:** Self study and practical observation by student in the industry.

**Teaching Tools:**

Self Study, Observation

**Learning outcome:** Students are exposed to practical aspects of the functional areas of fashion industry and expected to learn the work-flow of fashion business

## COMPUTER-AIDED DESIGN (CAD) - V

**Course Code: FST2703**

**Credit Units: 03**

**Course Objective:** Student will learn to present their learning during graduation project via help of coral draw

**Module:** Application of Coral Draw to enhance the learning in the industry and use of computer systems to assist in the creation, modification, analysis, or optimization of those designs

**Examination Scheme:**

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

**Text & References:**

- Winifred Aldrich, CAD in Clothing and Textiles

## GRADUATION DESIGN COLLECTION

**Course Code: FST2704**

**Credit Units: 10**

### **Course Objective:**

This programme focuses on the design and construction of the fashion garments for the partial fulfillment of the degree of B.Sc. in Fashion Design & Technology.

This course is practical application of creativity, Innovation, discovery, and expression in aesthetic or artistic design through the development of innovative garments that employ unique and sculptural shapes. The course will be assessed through critique and evaluation of design project in each topic area. Project components include inspirational research and development of aesthetic direction, ideation and sketching, garment construction and project presentation of the collection at a fashion show before and invited trade audience.

**Course Methodology :** Research Project & Product Development

**Aim :** To developing ideas from paper to object, theory to practice, and fabric to garment.

### **The projects taken up and have to develop through the following stages:**

- 1. Fashion Market Study** - Fashion market research information helps the students to understand what, where, and why consumers are buying across all retail channels. It combines point-of-sale (POS) market tracking with consumer panel insights so students can stay on top of fashion industry trends and effectively connect with the fashion consumer.
- 2. Field trip / Visit** - The students will have the opportunity to create or styles a collection of designs based on various design inspirations and trends, and learn how to put together presentation boards and portfolio pages.
- 3. Portfolio Development** - A portfolio is a collection of work that shows an applicant's skills and knowledge across a number of projects or studies. It is a visual representation of interests, exploration, experimentation, development and final pieces. So fashion portfolio is a critically important tool for successfully applying for additional education opportunities or landing your first internship or entry level job. It reflects your professional skills and best work.
- 4. Digital Design Techniques & Presentation** - Include Computer-generated (CAD) mood, color, textile, fashion plate, and flat drawing pages as separate pages or in combinations, these demonstrate the designer's skills with CAD programs. Pages should be all portraits or all landscape orientation, with a few exceptions if needed, to allow for easy viewing by interviewers.
- 5. Range Development** – The students will explore what makes a good range, taking into account customers, competitors, price points, fabrics, core items and seasonal specials.
- 6. Final presentation** - Fashion show.

**Project Evaluation**

- There will be an evaluation by a jury comprising of external experts and a committee of internal faculties from the department. Failure to submit the portfolio with final products or failure to appear at the Viva-voce Examination will be treated as “Absent” in the Examination.

Evaluation Components	R A				A	P	V	Total Weightage (%)
	Internal Evaluation		External Evaluation					
Portfolio Presentation	10	20	15	30	10	20	20	100
Products Presentation	10		15					

(R A– Research & Analysis, A - Attendance, P – Presentation, V – Viva voce)

## Syllabus - Eighth Semester

### GRADUATION PROJECT

**Course Code: FST2837**

**Credit Units: 16**

**Course objective:** To provide an opportunity to students to apply and relate the concepts and theoretical inputs from various contextual studies offered in Fashion Design programme. To involve the students in the day to day activities of the functional areas of fashion industry and familiarize the practical aspects of the same.

**Course Content:**

**Week 1 – Week 16:** Self study and practical observation by student in the industry.

**Week 17:** Internal Jury

**Week 18:** External Jury

**Teaching Tools:**

Self Study, Observation

**Learning outcome:** Students are exposed to practical aspects of the functional areas of fashion industry and expected to learn the operational methodology of exploring business opportunities, solving problems and making decisions

**Parameters to be considered in External Jury:**

- Title of the Project
- Objective
- Research Methodology and Design
- Appropriateness of data
- Scope and coverage of the survey
- Comprehension and analysis
- Findings and recommendations
- Innovative approach to the industrial problems

**Parameters to be considered in internal Jury:**

- Title page
- Objective
- Report framework and methodology
- Context and analysis
- Comprehension and interpretation
- Findings and recommendations
- Report presentation
- Meeting the time requirements of DP schedule

**Examination Scheme:**

Evaluation Components	PA		Total Weightage (%)
	Internal Evaluation	External Evaluation	
Project Evaluation	50	50	100

(PA – Project & Analysis)

## **Bachelor of Interior Design**

**FLEXILEARN**

-Freedom to design your degree

**Curriculum & Scheme of Examination  
2020**

**AMITY UNIVERSITY HARYANA  
GURUGRAM**

# Syllabus – First Semester

## LANGUAGE OF DESIGN

(Theory)

Course Code: IND2101

Credit Units: 03

### Course Objective:

Design is an activity of problem solving for the wellbeing of society and individuals. This course focuses to examine, analyze, study, and discuss how design can be understood, described, and developed as a process of inquiry, thought, and action. Each Module has an interdisciplinary approach to the study of design by dealing with the reasoned application of knowledge and skills.

### Course Contents:

#### Module I : Introduction to Design.

Visual language - Visual Literacy - Visual communication - Image, Imagery & Visual imagery – Art and its Classification - Visual Design - Basic Concepts of Design- Definitions and meaning of design - Importance of design - Define Designer. - Understanding the Difference between Art and Design – categories of Design: Drawing, Problem solving, & Ideal pursuing.

#### Module II : Design Concepts.

Design as a process - Design as creation - Design as Communication - Design as Information - Design as a strategic business tool- Product and Service design - Design for Manufacturing and Assembly (DFMA).

#### Module III : Scope of Design.

Concept of good design - Principles of Good Design-Kinds of design: Structural design & Decorative design - Design disciplines- Design Industry: Structure & Classification - Design Industry in India.

#### Module IV : Role of Design in Society.

Function of Design - Indigenous Design Practices - Role of design in the changing social scenario - Role and responsibility of Designers.

#### Module V : Design Governance in India.

National Design Policy - Design Act 2000 - Intellectual property right- Professional Design Associations - Design Promotion Agencies.

### Course Evaluation:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# DESIGN FUNDAMENTALS & ILLUSTRATION TECHNIQUES-I

(Practical)

Course Code: IND2102

Credit Units: 02

## Course Objective:

Drawing is a foundational course that is essential for mastering in any stream of design. The goal of this course is to develop, through a variety of media, fundamental drawing skills; to understand and apply pictorial organization; develop vocabulary and terminology, and to develop perceptual, observational, conceptual awareness, and critical thinking skills in design.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Introduction to Freehand drawing & Sketching.

Introduction to Different art media and materials - Method of holding pencil – Eye-Hand coordination - Line quality studies - Lines: Straight, Curvilinear, Angular, Thick-Thin, Plane, Volume - Straight Lines - Curvilinear Lines: Thick, Thin And Angular - Line Variety: Conveying movement of volume in terms of line.

### Module II : Basic Drawing Techniques

Contour- Principles of One, Two and Three Dimensional compositions- Perception: Visual perception, Intuitive perception -Positive/Negative- Gesture - Value - Perspective: Linear, Aerial.

### Module III : Methods of Sketching

Study and sketching various shapes, form and structure – Foreshortening – Study of Ellipses- Drawing through building and creating form - Sketching by method of seeing the shapes and forms- Sketching by using loose, circular strokes –Sketching by using free and scribbled lines – Sketching by using wide, bold strokes – Quick reference sketch - Conveying movement sketching - Rendering wave action – Sketching focusing on negative space - Sketching by filling in the negative spaces – Silhouetting - Drawing with a grid - Wire frame sketching - Spiral line sketching.

### Module IV : Study the use of Chiaroscuro

Techniques of adding shadow to the subject to give it depth and realism - Understanding lights and shadows – Highlighting- Shading - Shading consistently – Study of casting shadows – Methods of ‘quick thumbnail’ sketches – Methods of ‘quick reference sketches’ and detailed rendering.

### Module V : Composition Drawing (Self-study / Assignment)

Conduct a visual study of a man-made designed object. Develop a series of drawings in a composition that communicates information regarding form, size, materials, structure, texture, function, environment, etc. through freehand drawings and submit a portfolio file.

<b>Course Evaluation:</b>				
<b>Components</b>	<b>A</b>	<b>H</b>	<b>PR</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>
(A-Attendance; H -Home Assignment; PR- Practical work Record; EE-End Semester Examination)

# DESIGN ELEMENTS & PRINCIPLES

(Practical)

Course Code: IND2103

Credit Units: 02

## Course Objective:

This course is designed to familiarize the student with the elements and principles of design. The main objective of the course is to plan and produce good visual designs and artistically analyze designs produced by others.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Elements of Design (Part-1)

**Point and Line:** The meaning and Definition, Lines in a composition, Aspects, Lines as design components, Physical and Psychological effects, Reinforcement and countering with line aspects, Study of Line chart. **Space:** The meaning and Definition, Descriptive terms for space/shape relationships, Visual perception of spatial effects, Advancing or flattening cues, Space as Ground, Space as volume, Effects of Space, Spatial Effects. **Shape and Form:** The meaning and Definition, Mass and Volume, Type of shapes and forms, Attributes of Shape and Form, 2D shape Vs. 3D form.

### Module II : Elements of Design (Part-2)

**Texture and Pattern:**(i) *texture* - Three dimensions of texture, Texture on the medium, Aspects of Texture, Texture interaction with light, Texture and Color, Textural Language, Psychological Effects, Audible effects of texture, (ii) *Pattern* - Aspects of Pattern, Visual Effects of Pattern, Psychological Effects of Pattern, Pattern and structural design, Combining patterns in one composition.

### Module III : Elements of Design (Part-3)

**Light and Shadow :**(i) *Light* - The meaning and Definition , Visual perception of light, experience of light, The concept of Light and shadow, (ii) *Use of Light in Visual design* - Defines, Locates, Sculpts, Manipulation of light, (iii) *Psychological Effects of Light* – Lightness with openness, clarity, awareness, alertness, and knowledge, Darkness associated with gloom, mystery, quietness, seriousness, depression, threat, fear of the unknown, ignorance, age, sophistication, and experience, (iv) *Physical Effects of Light* – The quality of light, the source, accent, distort, subordinate, minimize and rearrange contours of shape. **Colour:**(i) *Color Definitions* - External Occurrence, Internal Sensation, Hue, Value, Intensity.

### Module IV : Principles of Design

**Directional Principles:**(i) *Repetition* - Visual Effects, Types of repetition, Uses of repetition, Psychological effects. (ii) *Parallelism*, (iii) *Sequence*, (iv) *Alternation*, (v) *Gradation* – Needs, effects, psychological effects, uses, (vi) *Transition* - Visual effects, Psychological effects, Using transition, (vii) *Radiation* - effects, (viii) *Rhythm*- effects, Psychological effects, Rhythmic Terms, **Highlighting Principles:**(i) *Concentricity*- Effects, Psychological, Practical uses, Concentricity is perpendicular to radiation, (ii) *Contrast* - Physical and Psychological effects, Samples of Contrast, (iii) *Emphasis* - Physical and Psychological effects, Usages. **Synthesizing Principles:**(i) *Proportion*- The relationship of distances, sizes, amounts, degrees, or parts in relation to each

other, (ii) *Scale* – Visual and Psychological effects, (iii) *Balance* - Four types of balance, Effects of balance, (iii) *Harmony* - Culturally subjective, Time period subjective, (iv) *Unity*- harmony without unity, Unity without harmony.

**Module V : Principles of Organization**

**Composition:** Picture plane, Picture frame, Balance. **Relationships:** Symmetrical & Asymmetrical, Scale, Proportion, Golden Mean. **Attributes:** (i) *Emotional* - Active, Passive. (ii) *Esthetic*: Realistic, Impressionistic, Abstract, and Decorative. (iii) *Spatial*- Depth, Flat.

**Course Evaluation:**

Components	A	H	PR	EE
Weightage (%)	05	10	15	70
(A - Attendance; H - Home Assignment; PR - Practical work Record; EE - End Semester Examination)

## DESIGN STUDIO-I (BASIC GRAPHICS)

(Studio)

Course Code: IND2104

Credit Units: 02

### Course Objective:

This is a practical course that focuses on creating intelligent and powerful graphic design, image processing and scientific Visualization. Students build a strong foundation for a design career by learning graphic design techniques, visual thinking, concept development, colour, composition, and typography. This course has been conducting through *design case studies and hands-on exercises* by using graphic softwares like Adobe Creative Suites and Corel Draw, etc.

### Course Contents:

*(NB: Submission of Practical work record / Graphic Portfolio is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### Module I : Introduction to the Basic Computer Skills

Computer Vocabulary; Introduce the basic computer hardware; Operating system; Opening and Saving Files; Skills and activities practice of MS Word, Excel, PowerPoint; Internet - Internet navigation and search engines; Internet safe practices - the major pitfalls and risks found online; Internet protocols.

#### Module II : Introduction to Graphics

What is computer graphics?, Area of computer graphics, Design and drawing, Simulation, How the pictures actually stored and displayed, Difficulties for displaying pictures; Definition of multimedia, multimedia systems; digital media and hyper media; Multimedia file formats, standards, communication protocols. Understanding vector graphics and bitmaps, Introduction to graphic design softwares - Image making & photo editing softwares, Illustration & Drawing softwares, and 3D product design softwares, Architectural illustration softwares; etc.

#### Module III : Digital Image Making

Image authoring and editing tools, image file formats, layers, RGB, CMYK; contrast, brightness, hue, slicing, contrast ratio, aspect ratio. Gray scale filters, blending tools, image enhancing, designing technique.

#### Module IV : Digital Illustration & Drawing

Features and applications of drawing & illustration software; vector and raster images: resolution in images: illustrator environment; documents; working with colours; interface and toolbox; common tasks; creating basic shapes: reshaping objects; applying colour fills and outlines; text tools; text formatting; embedding objects into text; text wraps; text object links. Applying effects – distortion effects, contour effects, transparency and lens effects; depth effects; working with bitmaps; editing and applying bitmaps.

#### Module V : Graphic portfolio File (Self-study / Project Assignment)

Refer various graphic design magazines, books, internet for the examples of design that inspire you and build a graphic design portfolio. All final work must be saved as PDF in your folder. Print your final design documents and submit a graphic portfolio file.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>PR</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

# COLOUR CONCEPT & APPLICATIONS

(Practical)

Course Code: IND2105

Credit Units: 02

## Course Objective:

This course is aimed to empower the students grasp the fundamentals of colour concepts as a basic creative activity and makes familiar with the language and tools necessary to communicate with design. This course covers such as science of colour, color fundamentals, etc.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : The Science of Colour

Understanding colour –Define color, Colour perception key elements – (1) Light, (2) Substance, (3) Human vision and responses, Fundamental categories of colour; Physical or surface qualities of color ; The color making attributes - Hue, Value, and Saturation. Dimensions of color – (1) Colour Systems (2) Colour Space (4) Colour Gamut, (5) Colour Models. Color management – Application for Computer Aided Designing, Colour management in designing.

### Module II : Color fundamentals

Introduction, History, Derivation of modern colour theories – Newton's Colour wheel and its formation, Additive System & Light theory, Subtractive System & Pigment theory, CMY & CMYK, Introduction to Pigment theory of RYB colour model, A System Perspective– Choice of the Colour system in Visual Design. Colour qualities, Uses of colours.

### Module III : Practical Exercise on Color Application

1. Colour mediums and its characteristics: To study and practice of various colour rendering with different colour media– Color Pencils, Pastels, water colours, Poster colours, Acrylic colours, Oils paints, Ink, Transparent Photo Colours, etc. Methods of colour mixing with different mediums.
2. Visual pattern and textures: Making various Visual pattern and textures by colours.
3. Principles of Addition, Subtraction: Newton's colour wheel, Pigment colour wheel, RGB & RYB.
4. Different colour rendering techniques: Monochrome and Wash rendering - Treatment of sky, Clouds, Landscape elements, Human figures, Foreground and surroundings - Shadow projections in renderings.

### Module IV : Color Symbolism and Psychology (Self-study / Assignment)

Use colour wheel / paint swatches / color aid paper or other printed matter as samples and conduct a survey to chart responses to color. Record results, design and make a chart that visually displays (info graphic) results. The completion of the project has to be fulfilled by determine demographic of the group to be surveyed. Create groups to compare on the basis of gender, age, and ethnicity. Write and format a survey that asks basic color naming questions which include: Name the color, What associations have

with this color, Like / Dislike (the color sample), Name of the favorite color, etc.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>PR</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>
(A - Attendance; H - Home Assignment; PR - Practical work Record; EE - End Semester Examination)

# INTRODUCTION TO CRAFT & MODEL MAKING

(Practical)

Course Code: IND2106

Credit Units: 01

## Course Objective:

This course aims to give the basic insights into the concepts of crafts and model making are increasingly being used by designers to evaluate designs and innovative products. This helps to simulate the impacts of alternative approaches. The course will introduce the hands-on activity of making models and crafts to from a product design idea.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Fundamentals of Crafts & Model Making (Theory)

Introduction to Crafts, Significance of craft in design, Significance of product design; Introduction to model making; Modeling: Concepts and Definitions, Advantages of model making.

### Module II : Design in Practice (Practical)

#### • Mood Board / Storyboard Making

Description:

Research: Visit galleries, exhibition, search Internet, Magazines, etc. - Take pictures of objects, scene and store front - Work off of a theme & keywords - Combine two theme to create something new - Cut out pictures that inspired- Picture organization - Coordinate and conquer to lay out the images- Various collage methods - Presentation of Mood Board.

Create a Design Description –Sketch and flesh out a more detailed interface to the idea - Show its usage in the context of performing real world tasks - Come in three alternatives which vary the interface, the scenario, or both. - Create model sketches - Create Storyboard.

#### • Working with Collage, Photomontage, Mural, 3-D Sculpturing & 3-D Crafts. (Practical)

Description:

Collage with paper and various waste materials with theme and presentation, Mural with different materials on live scale, Sculpture with different materials Clay, Plaster of Paris, Thermo coal, Paper Mache, Tin foil, Oil Colour, Acrylic colour, Fabric Waste material etc. Practice various Three-dimensional craft techniques by Additive process, Subtractive process, Constructional process

#### • Model Making (Practical)

Description:

Use a variety of simple building materials, such as Papers, Coloured cards, Foam core board, Balsa wood, Cardstock, Plasticine (Modeling Clay), hot glue, etc. Conduct the practical modeling activities and present the models / prototypes.

The prototype illustrates 3 major tasks for interface / interaction design, likely (but not necessarily) based on storyboards. The prototype should be complete enough to "run" a new user through each task. Design models / prototype with specific STUs "Situation, Task, and User" in mind. Be sure to iteratively refine prototype until feel

satisfied that it works.

# HISTORY OF DESIGN & CULTURE

(Theory)

Course Code: IND2107

Credit Units: 02

## Course Objective:

This course aims to have students acquire a familiarity with historical and philosophical aspects of design that contributed to the rise of design styles. This course will also explore the cultural studies that explore the relationship between the designs and the human culture and how the relationship may have evolved within different industries over time. *In-depth reading is highly recommended to gain deeper meaning and comprehension of this subject and research detailed information for an assignment.*

## Course Contents:

### Module I : Design Philosophy & History

Art and Aesthetics in Design, Applied Aesthetics & Technical Aesthetics, cognition and laws of beauty, Neurasthenics, Plato's Theory of Art; Historical Materials, Techniques and Methods of Design; Cave Art; Buddhist Art of Central Asia; Greeco-Roman Art; Renaissance to Baroque; Art of South and Southeast Asia; Western Art; Art of China and Japan; 'Art for Art's Sake'; Modern Art, Romanticism in Art; Modern Art to Design; Cubism; Cubist Sculpture; Collage (Synthetic Cubism); Piet Mondrian: 'Neo-plastic Art'; Rococo Design; Arts and craft movements; Renaissance Period & Industrial Design in Europe; Industrial Revolution & Technical Revolution; The Bauhaus and the Modern Design Education; Mid Century Modern Design, Mid Century Danish Industrial Design; Art Nouveau; Futurism; Dada cultural movement; Suprematism; Constructivism, Rise of corporate identity; Design After Modernism; History of Advertising, Identity & Branding; The Era of Information Design, Motion Graphics and User Interaction Design.

### Module II : The Art and Design Tradition in India

Introduction to the History of Indian Art; Sculpture and Architecture of North India, Art & Design of South India, High Medieval Architecture, Tribal and Folk Arts of India; Indian Painting, Modern Indian Art; Symbols and metaphors of Indian Art and Design.

### Module III : Culture: An introduction

The Concept and Meaning of Culture; Culture and Civilization; Culture and Heritage; General Characteristics of Culture; Importance of Culture in Human Life; Structure of Indian Society, Traditional Indian family; History of women in India, Tribal communities of India, Corporate culture; Socio-cultural issues in contemporary India.

### Module IV : Study of Design Philosophies & Iconic Design Works (Self-study / Assignment)

Study and submit a project file about various designers and their area of specialization, Important work etc. Examples: Avinash Godbole; Benoy Sarkar; Manu Desai; Mickey Patel; Ram Mohan; Sudarshan Dheer; Yeshwant Chaudary; Dashrath Patel; Mahendra Patel; R K Joshi; Sudhakar Nadkarni; Vikas Satwalekar, Ron Arad, Saul Bass, Manolo Blahnik, Robert Brown John, Sambard Kingdom Brunel, Matthew Carter, Sam Buxton, Luigi Colani, Joe Colombo, Christian Dior, Tom Dixon, Norman Foster, Alec Issigonis, David Mellor, Dieter Rams, Philip Treacy, Phyllis Pearsall, Robert Wilson, Philip Worthington, Luis Barragán, Flaminio Bertoni, Isamu Noguchi etc.

# CALLIGRAPHY EXPLORATION

(Practical)

Course Code: IND2108

Credit Units: 01

## Course Objective:

The objective of this course is to develop a basic proficiency in creating various graphic forms and objects using calligraphic lettering skills through analyze a calligraphic letterform, identifying its distinctive features. This course covers compose various letter form to demonstrate an understanding of calligraphic elements and the basic terminology of calligraphy and deployment of its various strokes.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Introduction to Calligraphy

Understanding calligraphy - Calligraphy definition – History of Calligraphy – Importance of calligraphy- Modern calligraphy - Tools required for calligraphy.

### Module II : Practice Exercises

#### Description:

Reading and writing are not naturally learned skills. They have to be taught specifically. Learn different a Calligraphy style of writing requires regular practice. Hence, the students are required to practice in class as well as by given Assignments.

#### Topics Covered:

- English Calligraphy (Compulsory);
- Hindi Calligraphy (Optional, not mandatory)

Basic Strokes of Practice- Scribbles with Kalam, Nib, Brush and Calligraphy Pen; Alphabet, sentences and composition of different types; Basic calligraphic strokes for English; Foundational Hand - Majuscules, Miniscules and Numbers; Calligraphic Upper case Alphabets; Calligraphic Lower case Alphabets; Composing Alphabets; Composing a calligraphic paragraph; Square Designed Letters – Majuscules; Digital – Majuscules, Miniscules and Numbers; Bubble Designed Letters – Majuscules; Rose Designed Alphabets – Majuscules; Old English Script Designs – Majuscules, Miniscules and Numbers; Italic Script Designs – Majuscules, Miniscules and Numbers.

# FUNDAMENTALS OF FORM STUDIES

(Practical)

Course Code: IND2109

Credit Units: 01

## Course Objective:

This course aims to enhance understanding of 3-dimensional visual perception to the students that develop the sense of structure, and understand how forms achieve their structural unity. This course helps the students to develop the sense of observation and capacity to retain and recall images and their co-ordination on basic fundamentals of 3 dimensional designs.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Introduction to Shapes, Space, Form

Basic Understanding of various Shapes, Space, Form and its relationships - Surfaces, Planes, Shapes - Size, Scale, and overall Proportion of Shapes – Shape as Plane - Geometric Shapes - Organic Shapes - Rectilinear Shapes - Irregular Shapes - Hand-drawn Shapes - Accidental Shapes - Relationships between 2D shape and 3D form - Transforming Various Shapes into visual Forms - Size, Scale and overall Proportion of Forms - Form as volume and Mass- Attributes of Shape and Form.

### Module II : Structure of forms

Point as a form, Line as form: Angular, Straight, Curved, Contour, Angular contour, Thick - The Overall Shape - The Body: parallel edges, Converging edges, regular bumps edges, Wavy edges, Irregular rough edges,- The extremities of line: Parallel cut extremes, Rounded extremes, Angular/slant cut extremes, Pointed extremes. Types of Shapes: Shape as Plane, Geometric Shapes: Square, Triangle, Circle, and Rhombus etc. - Organic Shapes- Rectilinear Shapes-Irregular Shapes- Hand-drawn Shapes- Accidental Shapes- Form as volume, Positive and negative space in a form

### Module III : Types of forms

Representational Form- Non-representational Form- Natural Forms- Human-made forms-Type font as form- Abstract forms- The inter-relationship of forms: Detachment, Touching, Overlapping (Opacity), Interpenetration (transparency), Union, Subtraction, Intersection, Coinciding.

### Module IV : Development of 3D Form Sketching(Self-study / Assignment)

Find, collect and archive any inspiration sources for an image idea - Think and find visual aesthetics through design elements such as linear, planar, volumetric considering key axes, and Positive and negative spaces from that sources – Think of any 3 dimensional form - Draw and represent this in black and white - Any details that the form has which make it look 3 dimensional are going to be the final details - Sketch or trace your form - Draw out the details that make sure that it look like it has dimension - Complete the drawing and shade in accordingly.

## Course Evaluation:

# Syllabus – Second Semester

## INTRODUCTION TO DESIGN THEORY

(Theory)

Course Code: IND2201

Credit Units: 03

### Course Objective:

The aim of this course is to help the students to understand various theories behind the design process, design professional practice and the way the design engage in the world. This course examines, analyze, study, and discuss how design can be understood, described, and developed as a process of inquiry, thought, and action.

### Course Contents:

#### Module I : Introduction to Design Concepts.

Art & design Terminology; Design approaches–Pure art to Applied science; Design Process – Discover, Design, Deliver; Design synthesis; Design synthesis methods- Concept mapping, Process Flow Diagramming, Reframing, Insight Combination;

#### Module II : The Science of Design

Introduction to Arteology; Descriptive and the Normative types of Arteological study; Format of Presentation of Design theory; Paradigms of Design theory.

#### Module III : Evolution of Design Theories.

Bauhaus and The 'language of vision; Paul Klee's Pedagogical Sketchbook; Wassily Kandinsky's Point and Line to Plane; Johannes Itten's Polar Contrasts; Charles & Ray Eames and The Powers of Ten; Lazlo Moholy-Nagy's Vision in Motion; Charles. W. Morris's the theory of 'semiotics'; Jacques Bertin's 'semiology of graphics'

#### Module IV : The Principles & Theories of Design Application.

Introduction to Gestalt Theory; Gestalt Principles: Similarity, Continuation, Closure, Proximity, Figure/Ground, Symmetry and order; Maslow's hierarchy of needs; Privacy regulation theory by Irwin Altman; Robert Sommer & Edward .T. Hall: Studies in personal space. Theory of Cognitive ergonomics; User Interface Design; Donald Norman's stages of action; Ben Shneiderman's Principles of Human-Computer Interface Design.

# TECHNICAL DRAWING & ILLUSTRATIONS

## (Practical)

Course Code: IND2202

Credit Units: 02

### Course Objective:

Basic technical drawing is essential as drawing is the language of designer. This course aims to enhance knowledge and any skill related in engineering drawing. More importantly, this course develops the ability to read drawing increases the productivity of a person besides enhancing confidence to perform task competently.

### Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### Module I : Introduction to Technical Drawing & Illustrations

Importance of Engineering drawing; Method of folding of Engineering drawing sheets as per BIS SP: 46-2003; Drawing Instruments and their Standard uses. **Drawing of Lines:** Definition, types and applications in Drawing as per BIS SP: 46-2003; Classification of lines (Hidden, Centre, construction, Extension, Dimension, Section); Drawing lines of given length (Straight, curved); Drawing of parallel lines, perpendicular line; Methods of Division of line segment. **Lettering & Numbering as per BIS SP46-2003:** Single Stroke, Double Stroke, inclined, Upper case and Lower case. **Sizes and Layout of Drawing Sheets:** Basic principle of Sheet Size, Designation of sizes, Selection of sizes, Title Block, its position and content, Borders and Frames (Orientation marks and graduations), Grid Reference, Item Reference on Drawing Sheet (Item List);

#### Module II : Free hand drawing of Geometrical Figures & Perception

**Free hand drawing** of Lines, polygons, ellipse, etc.; **Geometrical figures** and blocks with dimension; Transferring measurement from the given object to the free hand sketches. Depth **Perception:** Binocular disparity, Monocular cues- Interposition - Atmospheric Perspective- Texture Gradient -Depth Perception through Linear or one point Perspective - Linear or one point Perspective - Two-point Perspective - Three-point Perspective -Three perspective angles for clear visual understanding-Eye level; **Free Hand sketch of products** :Automobiles, electronic gadgets, furniture etc.

#### Module III : Technical Drawing of Geometrical Figures & Dimensioning:

Definition, nomenclature and practice of Angle: Measurement and its types, method of bisecting; Triangle -different types; Rectangle, Square, Rhombus, Parallelogram; Circle and its elements. Drawing of Solid figures (Cube, Cuboids, Cone, Prism, Pyramid, Frustum of Cone and Pyramid.) with dimensions. Dimensioning: Definition, types and methods of dimensioning (functional, non-functional and auxiliary); Types of arrowhead; Leader Line with text.

#### Module IV : Method of presentation of Engineering Drawing

Pictorial View; Orthogonal View; Isometric view

#### Module V : Symbolic Representation (As per BIS SP:46-2003)

Fastener (Rivets, Bolts and Nuts); Bars and profile sections;Weld, brazed and soldered

joints; Electrical and electronics element; Piping joints and fittings

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

## DESIGN FUNDAMENTALS & ILLUSTRATION TECHNIQUES-II (Practical)

Course Code: IND2203

Credit Units: 02

### Course Objective:

This course focuses students' understanding of how to employ drawing skills needed to create design projects and communicate ideas that influences every aspect of life. This course will further explore more to create art, which incorporates the fundamental elements and principles of design and select materials that express issues such as content and subject matter. The program culminates with a design-based physical, 'hard copy' portfolio.

### Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### Module I : Representational Drawing.

Understanding the characteristics of the objects, its material and texture including color and form.

Simplification Drawing:

#### Module II : Simplification Drawing.

Drawing complete details to represent that particular object but reduce/ simplify the complex character of the object to make the perception simpler.

#### Module III : Study of Subject Matter.

The object - The still life – Drapery - Faces and figures - Nature and the landscape- Memory drawing and quick sketching

#### Module IV : Society and Articulation.

Study, interact, observe and document the socio – cultural, prejudices and beliefs to form clear understanding of the role of design, motifs, patterns, etc. and place in communication system.

#### Module V : Study of Signs and Symbols.

Abstraction, Reduction, and Simplification –Translation of designed objects into Icons, Signs, and Symbols that share a common – Translation of designed objects into Logo.

#### Module VI : Study of Poster Design.

The poster as the quintessential communication tool - Methods and techniques of poster making.

#### Module VII : Design Visualization (Self-study / Assignment)

Find, collect and archive any inspiration sources such as image ideas, color swatches, font ideas etc. - Think about their relevance of uses as a product – Find similar products during a variety of time periods - Present many versions and approaching to an idea- create a rough of the design understanding the layout- Make a conclusion of the product selection - Create five thumbnails of different compositions - Choose one to render a detailed drawing of the design, including color, typeface, etc. - Make it artful - It should look polished and finished - Finally, edit, and produce a portfolio of product ideas and design ideas with the evidence of individual's increased

understanding and application of the sketching process, evidence of understanding linear perspective, and evidence of text and idea development.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>PR</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>
(A - Attendance; H - Home Assignment; PR - Practical work Record; EE - End Semester Examination)

6. Lockard, William Kirby. Design drawing. Pepper Pub., 1982.

## DESIGN STUDIO-II (PHOTOGRAPHY & VIDEOGRAPHY)

(Studio)

Course Code: IND2204

Credit Units: 02

### Course Objective:

The aim of this course is to develop knowledge, skills and understanding of Photography, Video and Digital imaging that enables students to gain an increasing accomplishment and independence in their representation of ideas in the fields of Design. This course enhances the students to visualize the concept of digital platform and various methods of image capture.

### Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Frame work for skill development in Photography, Video and Digital imaging.

Photography, Video and Digital imaging is encourage creative and systematic investigation of formal and conceptual issues in the field of design and act as a tool of inspiration. Studies of Photography, Video and Digital imaging is required different philosophical views and frameworks of belief that affect interpretations of meaning and value. They are:

1. **The subjective frame** — *Personal experience*: This is about deeply felt and sensory experience, intuition and imagination in relation to the inter-subjective experiences afforded to artists and audiences.
2. **The cultural frame** — *Cultural and social meaning*: This is to represent the collective interests of, cultural groups, ideologies, classes, political groups, genders, and spiritual and secular beliefs, events and objects in relation to the social perspective of the community out of which it grows.
3. **The structural frame** — *Communication and the systems of signs*: This is the representation of the visual language as a symbolic system. A system of relationships between signs and symbols that are read and understood by artists and audiences who are able to decode the texts in terms of the relationships of symbols used to refer to the world. Through this system, ideas are circulated and exchanged.
4. **The postmodern frame** — *Ideas that challenge mainstream values of histories*: This is about texts' that reconfigure and question previous texts and current narratives. These are woven together through such things as irony, parody and quotation through critique, exposing the patterns of authority and the assumptions of mainstream values to reveal inconsistencies, uncertainties and ironies.

### Module : Photography & Digital Imaging I

Different types of camera (DSLR) - Study of apertures, shutter speed and ISO. - Understanding white balance in DSLR their control - Understanding Focus: Depth of Field, Focal Length. - Types of Lens available: Zoom lens and Macro.-Use of tripod stand, study of panning tilt head. - Taking photographs: Outdoor and indoor subjects on films. - Photographing a subject with different lenses. - Types of lights: use of bounce and reflected lights. - Handling movie and video cameras.

**Practice:** Indoor & Outdoor shoot.

**Module : Videography**  
**II**

Types of cameras: HD. - Types of Framing: Framing, Angle of Framing, Aspect Ratio, Level of Framing, Canted Framing, and Following. - Use of White balance and their purpose. - Types of Shot, Reframing, and Point-Of-View shot, Scale, Extreme long shot, Long shot, Medium long shot, Medium Close-up, Close-up, and Extreme Close-up. - Working with Chroma-Green/Blue Screen. - Working with Audio, Capturing Audio while shooting, Recording Audio with HDSLR Video Camera, Importance of Audio while shooting.

**Practice:** Indoor & more on practical training like outdoor shoot with available lights

**Course Evaluation:**

# APPLICATION OF COLOR THEORY

(Practical)

Course Code: IND2205

Credit Units: 02

## Course Objective:

This course focuses the students to gain an understanding of application of colour theory through practical exercises aimed at experimentation. This course is designed to not only develop and refine visual presentations in applying color, but to reinforce basic design and drawing skills as well.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Colour Theory.

*Theories of Successive and Simultaneous Contrast:* Additive and Subtractive color; *The Physics of Color:* Color Systems-the Color Wheel: Munsell, Goethe, Runge, Itten; *Pigment Wheel* - Classification of hues in the pigment wheel, Primary colours, Secondary colours, and Tertiary colours. *Theories of Color properties:* Hue, Value, Tints and Shades, Tones, Intensity or Saturation, Colour Temperature- Warm and cool colours, Color Interaction, Color Contrast, Incremental differences in value gradation and match color values to an established gray scale. Show High/Low Value and High/Low Chroma. *Theories of Color Relationships:* Colour Harmony and Color Schemes- (1) Basic Colour schemes - Chromatic Colours, Achromatic, Monochromatic, Polychromatic, Analogous, Complementary- Direct complements. (2) Advanced color schemes- Split complements, Triadic, Tetradic, Square, Dyadic or Dyad, Neutral, Earth Tone, Pale colour scheme.

### Module II : Practical Exercise on Color Application

*Albers exercises & Visual Mixture:* Value / Brilliance Scale; Colour wheel; Tetrad and Complementary Colour; Neutralize colour through Complementary colour mixes; Split complementary colour mixes; Match any given colour. *Relativity of colour:* Colour perception and phenomenology - Change face of one colour by adjusting light, adjacent colour, and/or reflective colour. Make one colour appear as two, one colour appears as the opposite ground, two colours appear as one colour. *Compositional effects of colour* - The application of colour in three different colour harmonies on a repeat side to side pattern of one's original design; Understanding of colour proportion and extension. *Color and meaning in Design:* Principle of rhythm, Balance, Proportion and scale, Emphasis, Colour interaction and colour effects Contrast of hue, Light-dark contrasts, Cold- Warm contrasts, Complementary contrast, Simultaneous contrast, Contrast of saturation, Contrast of extension; Color Symbolism, Colour Psychology, Historical & Contemporary use of Color, Local colour and subjective use of color, Emotional effects, Personal Colour preferences, Interpretation of International Colours.

### Module III : Color Application in Design (Self-study / Assignment)

Select different hues with varying values and make four compositions with each measuring 4 x 2.5 inches. The compositions will be mounted on one board. Incorporating the same four colors, make four free studies in any Products, Packaging and Interior Design by applying the colour theory. Try to disguise the fact that the same four colors were utilized in all four compositions. The way of mounted four

compositions on the board, the use of colour psychology & symbolism, cultural & emotional effects and a neat presentation are the key for evaluation.

**Course Evaluation:**

# FUNDAMENTALS OF APPLIED ERGONOMICS

(Theory)

Course Code: IND2206

Credit Units: 02

## Course Objective:

Ergonomic is a scientific discipline concerned with the understanding of interactions among humans and the design of the system in order to optimize human well-being and overall system performance. The aim of this course is to provide basic concept about Ergonomics/Human Factors and its implementation in design and design process.

## Course Contents:

*(NB: Submission of Case study Report is compulsory for Module- V and will be part of the Final Course Evaluation)*

### Module I : Introduction to Ergonomics

The evolution of Ergonomics; Reasons to use ergonomics, Micro and Macro-ergonomics, Areas of ergonomics - Physical Ergonomics, Cognitive Ergonomics, Organizational Ergonomics; Applications and benefits of ergonomics; Principles of ergonomics.

### Module II : Feature of Ergonomics

Anthropology; Anthropometry - Static Anthropometry; Dynamic Anthropometry; The human body types – Somatotypes – Ectomorphs, Mesomorphs, Endomorphs, Ectomorphs; Measuring Procedures; Biomechanics; Factors to be considered in Biomechanics – Force, Joint: Simple Joint- Compound Joint- Complex Joint, Range of Motion; Physiology; Psychology; **Human Senses:** Body sensors, vision sense, color theories, auditory sense, and smelling sense, tasting sense, touching sense, human body interaction with environment, thermoregulation of human body, working in polluted air, working at high altitude, effect of vibration on human body.

### Module III : Office Workstation

Theories of healthy standing and sitting, free posturing, ergonomics design of the office computer workstation.

### Module IV : Methods, Standards and Work Design:

Determination of work content, workstation, work methods, and times required for various occupational jobs/tasks. Design of tasks/jobs, workplace, and work environment to increase productivity, eliminate waste, and decrease occupational injury/illness.

### Module V : Case study (Self-study / Assignment)

Plan a case study in three different areas of 'Human Factors Affecting Design' aims to improve the fit of products to their users and support user-centered design. Find out a core issues in relevant to the following aspects: Identify user preferences and usage-related phenomena and Product usage as a situated activity- User behavior in usage practices - Functional meaning attribution by users - The experience of comfort - Users' physical aspects in terms of body dimensions, strengths, and body joint motions.

# TYPOGRAPHY EXPLORATION

(Practical)

Course Code: IND2207

Credit Units: 01

## Course Objective:

The objectives of this course into equip students with aesthetic and conceptual problem solving skills in various areas of design that develops the skills in craftsmanship, professionalism, and composition as well as work habits. This course introduces the language of type, its practical use and historical grounding.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

Description:

Typography is, quite simply, the art and technique of arranging type. It's central to the work and skills of a designer and is about much more than making the words legible. Every designer needs to understand typography. Designing a typeface can be a long journey so it's prudent to have a clear vision of its purpose. You might begin with something purely self-expressive. However, the usual practice is to create a typeface in response to a brief. The students have to be follow the weekly assignments that will be graded on completion basis.

### Module I : Introduction to Lettering & Typography

Introduction to Typography. - Historical Perspective. - Anatomy of Letter Form – Typeface Classification: Usage and context. - Setting Text. - Digital Typography.-

### Module II : Lettering & Typography Design

The Grid Document Design. - Design Alphabets. - Typography and Logo Design. - Typography at rice. - Kinetic Typography. - Ambigrams

### Module III : Typographic Visualization (Self-study / Assignment)

Develop and submit a Typography Portfolio with previous selected class assignments and various creative ideas that include:

Visualize the meaning of a word, using only the graphic elements of the letters forming the word, without adding any outside parts; Typographic Poster Design - Create a poster for Print magazines based on any theme or requirement; Calligami - Refer various origami methods – Inspire from Specific form to create own typeface; Magazine layout with Typography; Book Cover layout with Typography.

The design should be own interpretation of the words, showing the origin of the text, the tone and whether agree with it or not. The methods of typography generation are entirely up to the student, they can be traditional, experimental, found, photographed made, but they must all be different from each other.

## Course Evaluation:

# INTRODUCTION TO PROTOTYPING TECHNIQUES

(Practical)

Course Code: IND2208

Credit Units: 03

## Course Objective:

This course is the continuation but further advanced from the last semester. The aim of this course is to introduce various design and prototyping techniques in action and spot various materials and processes. Audio-visual and workshop equipment has to be used to conduct this course.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Introduction to Prototyping (Theory)

Introduction to Product Prototyping; Prototypes in a product design process; Design parameters; Manufacturing materials & processes; Transforming ideas into product prototypes; Human Factors and Ergonomics consideration in prototyping; Advantages of Rapid prototyping; Prototyping Processes;

### Module II : Prototype Techniques and Orientation (Practical)

#### Pre-Activity Description:

Begin brainstorming with words and quick sketches – Use of Sketch book and several sticky notes - Use specific STUs “Situation, Task, and User – Use Investigating Questions: How would it look? What size would it be? What would be its features? Would these vary, depending on the target audience? - Capture the Challenge - Ideas recorded in paragraphs to begin a first draft of a design description- Make brainstorming poster (The way of developed ideas) - From initial sketches or outlines to generate more detailed sketches of envisioned prototypes - Finalize the prototype sketches in scale - Review the sketches and critique - labeling them with dimensions and materials.

#### Activity Description - Topics covered:

- Prototyping Techniques in -Clay, Metal, Wood, Plastics, Ceramics, Composites etc.
- Finishing Techniques.

#### Post-Activity Description:

**User Testing:** Is the prototype functional? What works? What does not work? Is the prototype used to explore several design alternatives? What improvements could be made?

**Discussion:** the factors for final production - evaluating costs, time to build, material function and actual environmental impact.

## Course Evaluation:

## SEMINAR / WORKSHOP / GUEST LECTURE FOR SKILL DEVELOPMENT

Course Code: IND2233

Credit Units: 01

### Course Objective:

This course aims to judge the understanding as well as application of the knowledge gained by the students. The students have to be participated either Seminar (1) or Workshop (2) to earn the credit. Guest lecture (3) is addition to this for enhancing their knowledge by examining and analysing various aspects of design.

### 1. SEMINAR

The seminars intended to equip the students with some knowledge in areas which are not covered otherwise in the curriculum, but topics which are of interest or currently significant. The students need to find few topics with the help of faculties. They have to review various literatures, books, journals, internets, etc.

#### Points to be covered:

- Effective methods of literature review & Methods of bibliography writing.
- Enable open discussion between students and the subject experts.
- Students are encouraged to test their knowledge and to listen to other's points of view.
- Develop effective communication and presentation techniques for seminar presentation.
- Effective presentation techniques & Develop efficiency in group discussions.

#### Major Themes for Seminar:

Role of a designer in a project. - Relation of a designer with other consultants. - Design as a response to social and technological forces. - User participation in design. - Design and sustainability. - Various environmental and social issues and design.

#### Evaluation Scheme:

Components	Organisation and Relevance of content	Literature Review	Bibliography	Presentation	Total
Weightage (%)	30	30	20	20	100

### 2. WORKSHOP

#### Objectives:

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. Workshop is undertaking a significant practical unit of examining and analyzing various aspects of design at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by jury of examiners comprising of the faculties.

#### Major Themes for Workshop are: -

Brainstorming./Design problem solving techniques./ Design Process. / Visual thinking./ Design

thinking./ Design Research techniques. / Effective prototyping./ Craft making. / Story telling. / Print making./ Textile Block Printing.

**Guidelines for Workshop :**

*The procedure for earning credits from workshop consists of the following steps:*

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of at least 500 words about the learning outcome from the workshop.

**Methodology**

*The methodology followed at the workshop could be based on any one or more of the following methods:*

Case Study /Group Activity. /Role Play. / Business Planning./Quiz.

**Evaluation Scheme:**

Components	A	AP	MCQ	Solving the case/ Assignment / Write up	Total
Weightage (%)	10	30	30	30	100

(A - Attendance; AP - Active Participation; MCQ - Multiple Choice Questions)

**3. GUEST LECTURE**

Eminent subject experts from the field may be invited to deliver the lectures on different topics of their choice and share their experience with the students

## Syllabus - Third Semester

### INTRODUCTION TO SPATIAL DESIGN

(Theory)

Course Code: IND2301

Credit Units: 03

#### Course Objective:

The object of this course is to make students understand the various aspects of spatial design. The course is interdisciplinary and experimental, enabling the students to become a designer who is comfortable working in teams, on a variety of Interior design projects.

#### Course Contents:

##### Module I : Introduction to Spatial Design

Spatial Design: Meaning and Definition; Space: Definition; Interior space-spatial qualities: Form, Scale, Outlook; Structuring space with interior design elements; Spatial form; Spatial dimension – Square, Rectangle, Curvilinear spaces; Height of space; Spatial transitions – Openings within wall planes, Doorways, Windows, Stairways. Concept of space: Factors influencing living space, Requirements, Need for space, Space occupancy, Ownership, Style and other general factors. Division of space – Private, Public; Work and traffic – Definition, Utility, Determinants, General principles in planning space for various activities; Spatial Design concepts: Design for Branded Spaces; Curation and Exhibition Design; Social and Environmental Design and Design for Living.

##### Module II : Space for living

Significance of housing: Functions of house, Selection of site, Types of house plans: Site plan, Floor plan, Elevation plan, Cross-section plan, Perspective plan and Landscape plan, Principles of planning a house to suit the basic requirements, components attributed to livability in life space: Comfort, Convenience, Safety, Workability, Maintenance, Lighting, Satisfaction; Individual houses, Multi-storied flats, Row houses.

##### Module III : Interior Design Principles

Form – Point, Line, Volume, Shape, Texture & Colour – in relation to Light, Pattern etc. and application of the same in designing interiors; Ratio; proportions – Golden section; Relationships; Scale; Balance – Symmetrical, Radial, Occult; Harmony; Unity; Variety; Rhythm; Emphasis.

##### Module IV : Anthropometrics

Definition, theory of standard dimension based on human figures for activities, Functions, Circulation, Furniture design, Spatial requirements etc. Study of ergonomics design of furniture for living, Dining, Kitchen, Office etc.

##### Module V : Design Control

Design process – Analysis, Synthesis, Design evaluation; Design criteria – Function and Purpose, Utility and Economy, Form and Style; Human factors - Human dimensions, Distance zones, Activity relationships; Fitting the space – Plan arrangements, Function, Aesthetics.

**Course Evaluation:**

# INTERIOR DESIGN MATERIALS & APPLICATIONS

(Theory)

Course Code: IND2302

Credit Units: 02

## Course Objective:

The objective of this course is to explore the diversity of interior building and finish materials, expanding the opportunities for creative design solutions. This course familiarizes the students to learn the technical vocabulary and scientific concepts associated with procedures used for their fabrication, testing and evaluation.

## Course Contents:

### Module I : Masonry

Mud, bricks; building tiles: roof, floor and wall tiles, stones, clay, lime, sand, mortars, cement and aggregates, concrete, gypsum based plaster etc.

### Module II : Wood & Timbers

Wood as a building material: Identification, selection, application, types of wood, Commercial Classification, Nomenclature, Structure, Anatomy and Ultra structure, Conversion figure and natural defects, Availability of wood products, Wood based panels such as Plywood, MDF, HDF, Particle board, pre laminated boards etc. – their properties, process of manufacture, tools and technology of its application and quality assessment; Finishes to reconstituted wood: Lamination, Polishing etc. Various insulating materials, their properties and applications; Surface finishes for wood products and derivatives etc., Coatings: clear and pigmented finishes technical or protective coatings etc. Timber, cane, bamboo – characteristics of good timber, defects, applications of timber like joints, floors, openings, staircases, roof forms, etc. Finishes in timber like flooring, paneling, etc. Finishes to timber.

### Module III : Paints, Varnishes & Adhesives

**Paints:** Protective coating paints, types of paints – water paints, distempers, cement based paints, emulsion paints, anti-corrosive paints etc. - Composition, functions, preparation and application method, painting on different surfaces, defects in painting; **Varnishes** : Oil and spirit; various types – French polish, damp proofing finishes etc. and methods of application. **Adhesives:** Natural and Synthetic, their varieties, thermoplastic and thermosetting adhesives, epoxy resin. Method of application, bond strength etc.

### Module IV : Glass and Glass Products

Composition and fabrication of glass, classification, types of glass- wired glass, fiber glass, rock wool, laminated glass, glass concrete blocks - their properties and uses in buildings. Commercial forms available – their physical and behavioral properties, tools and technology of its application in built forms. Materials and workmanship specifications

### Module V : Traditional & Rural Materials

**Roof:** Details of pitched roof and hipped roof with pan tiles and Mangalore tiles. Details of madras terrace roof for small and medium span. **Foundation and walls:** foundation and wall in stone masonry (Random rubble, SR & Ashlar) foundation and walls in stabilized mud and Compact earth blocks, various types of details for walls with bamboo and casuarinas Roofs in rural materials: Details of thatched roof with casuarinas/ bamboo / CEB frame work; Details of palm and hay roof with casuarinas / bamboo/ CEB.

**Course Evaluation:**

# ELEMENTS OF INTERIOR SPACE PLANNING & SCALING

(Practical)

Course Code: IND2303

Credit Units: 02

## Course Objective:

This course provides a specific design methodology for understanding the nature of spaces, scales and space within a space along with elements and organization. The aim of the course is to impart an understanding of perception of interior space through architectural elements.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Interior Ergonomics

Average measurements of human body in different postures – its proportion and graphic representation, application in the design of simple household and furniture. Role of mannequins in defining spatial parameter of design. Basic human functions and their implications for spatial planning. Minimum and optimum areas for various functions. Preparing user profile, bubble and circulation diagrams.

### Module II Introduction to Interior design Methodology

Detailed study of spaces such as living, dining, bedrooms, kitchen, toilet etc. including the furniture layout, circulation, clearances, lighting and ventilation, etc. Case study of existing house and analysis of the spaces.

### Module III : Visual analysis of Designed Spaces

Spaces noted for comfort and spatial quality; analysis of solid and void relations, positive and negative spaces. Integration of spaces and function in the design of Bus shelter, Milk booth, Watchman's cabin, traffic police kiosk, flower stall, ATM center, etc.

### Module IV : Interior Design: Symbols & Representation

Representation of building elements, openings, materials, accessories etc., terminology and abbreviations used in architectural presentation; representation of landscape elements such as trees, indoor plants, planters, hedges, foliage, human figures in different postures, vehicles, street furniture etc.; by using different media and techniques and their integration to presentation drawings.

### Module V : Measuring and Drawing to Scale

scales and construction of scales, simple objects, furniture, rooms, doors and windows etc. in plan, elevation and section etc. reduction and enlargement of drawings.

### Module VI : Interior Geometry

Study of points, lines and planes leading to simple and complex solid geometrical forms. Orthographic projections of points, lines, first angle projections of planes and solids, sections of solids, development of surfaces of solids and intersections of solids. Use of geometry in buildings - isometric, axonometric, and oblique views. Working with models to facilitate visualization.

**Course Evaluation:**

# PSYCHOLOGY OF LIVING ENVIRONMENTS

(Theory)

Course Code: IND2304

Credit Units: 02

## Course Objective:

Human beings are in constant interaction with the environment. With the growth of civilization, men are making more and more artificial environments, and interior designers play a significant role in this process. The object of this course is designed to acquaint the students with some fundamental aspects of Environmental Psychology in relation with interior designing.

## Course Contents:

### Module I : Introduction to Environmental Psychology

Emergence as a discipline, Importance in interior, Basic principles of psychology - changing understanding of man and his mental and emotional processes, corresponding relevance in design of built environment, Language of architecture (rhythm, balance, harmony, etc) and its elements (physical, aesthetic, sensory, colour, noise, light etc.), articulation of mass and space and its role in evoking emotions. Space syntax.

### Module II : Environment and Human response

Behavioral response to the built and un-built environment, Processes involved in assessing and appraisal of environment, Responses to environment - Individual (environmental perception, spatial cognition, comfort, anthropometrics), Social (proxemics, territoriality, crowding, privacy), and Societal (neighborhood, community, work). Inducing behaviour through design.

### Module III : Application in different environments

Design of spaces and places for occupants of varying ages, gender, use and group size, Educational (class room design, ambient noise, attention), Workplace (types of office design), Health care, religious, commercial, recreational, environments. Open spaces, cityscapes. Case studies

### Module IV : Research methods in Environmental Psychology of Interiors.

Use of research to enhance the interior quality, measure satisfaction levels, direct behaviour in specific environments. Post occupancy evaluation, behavioral mapping, cognitive mapping, semantic differential techniques, trace measures. Case studies.

## APPLICATION OF ANALYTIC GEOMETRY

Course Code: IND2305

Credit Units: 02

### Course Objective:

The course is aimed at developing basic Mathematical skills for interior design students to understand structural concepts complex form and geometry. This course helps to understand and identifying practical problems to obtain solutions involving trigonometric and exponential functions and the properties of lines & planes in space, along with sphere and providing a tool to understand 3D material.

### Course Contents:

*(NB: Submission of Work record is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### Module I : Matrices

Types of matrices, operation in matrices, Determinants, properties. Rank of Matrix: Elementary Transforms – Inverse of a matrix by gauss – Jordan method linear independence – consistency of system of equations – Rouche's Theorem ( statement only ) characteristic equation – Eigen values, Eigen vectors – clayey Hamilton Theorem (statement only)

#### Module II Differential Calculus & Applications

Function, Limit and continuity, derivatives and Differentiation, Functions, Successive differentiation, Maxima and Minima, Tangents and Normal, curvatures, asymptotes, curve tracing function of two variables, partial differentiation.

#### Module III : Solid Geometry

Straight Lines, Plains, coincides in simplified forms, sphere, cone, cylinder, ellipsoid, hyperboloid and paraboloid.

#### Module IV : Three Dimensional Analytical Geometry

Direction cosines and ratio's – Angle between two lines – Equations of a plane – Equations of a straight line – Coplanar lines – Shortest distance between skew lines – Sphere – Tangent plane – Plane section of a sphere.

#### Module V : Geometrical Applications of Differential Calculus

Curvature – Cartesian and polar co-ordinates – Centre and radius of curvature – Circle of curvature – Involute and evolutes – Envelopes.

#### Module VI : Numerical Integration & Applications

Numerical integration: Trapezoidal rule – Simpson's 1/3 rule & 3/8 rule – Weddle's rule – Error formula – order of error. Curve tracing – plane curves – Cartesian & polar form – procedure for curve tracing in parametric form. Area bounded by curve – Arc length of curve – volume & surface Area of solids of revolution. Introduction to sphere, cone, cylinder quadratic surface & solids of revolutions.

# HISTORY OF INTERIOR DESIGN & STUDY ON POPULAR STYLES

(Theory)

Course Code: IND2306

Credit Units: 02

## Course Objective:

This course aims to provide the knowledge on history of interior design, highlight the styles, and learn about some famous interior designers and their influence on design through the ages.

## Course Contents:

### Module I : Early Classical Period

Prehistoric Cave paintings – Primitive Designs- Interiors during Egyptian, Greek, Roman, Gothic, Early Christian & Renaissance Periods.

### Module II Middle Ages& Colonial to the Beginning Of The 20th Century

Interiors in Romanesque, Gothic, and Renaissance periods; Colonial, Victorian designs, Arts & Crafts movement, Art Nouveau, Eclecticism, Frank Lloyd Wright.

### Module III : Bauhaus To Post War Modernism

Walter Gropius/ Bauhaus, De Stijl, Mies Van Der Rohe, Le Corbusier, Art Deco, Postwar Modernism.

### Module IV : Non-European Traditions & Scandinavian Traditions

Interiors in China, Japan & the Islamic World – Influences of Pre Columbian American art & culture, African influences in interiors; Interior Design in Sweden, Finland, Norway. Contributions of Architects such as Alvar Alto, etc.

### Module V : Indian Traditional Designs

Traditional Styles of design & decorations of homes & accessories across the states in India including Rajasthan, Gujarat, Andhra, Tamil Nadu, Madhya Pradesh etc.

### Module VI : Popular Interior Design Styles &Design Movements

Shabby Chic; Retro; New York Style; Mediterranean; Scandinavian; New England; Classical Style, Art Nouveau, Art Deco, The Bauhaus, Modern (International Style), Post Modern, Traditional Arabic / Islamic / Parisian, Locality Styles, Postwar Modernism, Late Modernism, High Technology, Post - Modernism, De Constructivism; Minimalism and Contemporary;

### Module VII : Contemporary Interior Designers.

**Early Pioneers** : Art nouveau, Charles Renée Mackintosh, Antonio Gaudi, Gerrit Rietveld- expressionist interior design;**Bauhaus And Post War Modernists** : Walter Gropius/ Bauhaus, De Stijl, Mies Van Der Rohe, **Modernism**: Le Corbusier, Frank Lloyd Wright, Louis Khan, Kenzo Tange and Oscar Niemeyer; **International Style**: Alvar Alto, Phillip Johnson, Charles and Ray Eames , Eero Saarinen, Eero Aarnio, Arne Jacobsen; **Post Modernism And Minimalism**: Zaha Hadid, Santiago Calatrava, Frank Gehry and Peter Eisenmann.

# LIGHTING & COLOUR IN INTERIORS

(Theory)

Course Code: IND2307

Credit Units: 02

## Course Objective:

This course provides knowledge of the various types of lightings to effectively communicate their designs and understand the effect of various lights on colours and textures. The aim of this course is to equip the students to understand and successfully apply lighting techniques with colour effects.

## Course Contents:

### Module I : Introduction To Day Lighting

Lighting and vision; Nature of light – Wavelength, Photometric quantities – intensity, Flux, illumination and luminance, visual efficiency, sources of light, day light factor concept, design sky concept, day lighting requirements.

### Module II Artificial Lighting

Electric lamps – incandescent, fluorescent, sodium vapour, mercury, halogen and neon. Different types of lights in interior and exterior - task lighting, special purpose lighting. Calculation of artificial lighting, guidelines for lighting design, Glare in artificial lighting; Color characteristics of artificial lighting, integration of day lighting with artificial lighting, lighting controls, intelligent building systems for lighting, switches, dimmers.

### Module III : Effect of Colour In Lighting

Colour and light, colour and surface qualities, color and distances and scales. Problems with colour. Use of colour in various functional contexts – Residential interiors, Non Residential interiors. Use of color in special situations – out door/indoor spaces, accessories, art works etc.

### Module IV : Luminaires & Fixtures

Definition, different luminaires for lighting, lighting control system- benefits & application, Impact of lighting, fixture types - free standing or portable, fixed, light fixture control; Floor, table and desk, wall mounted, ceiling units, built in lighting, miscellaneous types, decorative lighting, spot lighting, task lighting, underwater lighting, etc.; Lighting accessories- switches, sockets, fused connection units, lamp holders, ceiling roses etc.

### Module V : Study of Lighting Concepts (Self-study / Assignment)

Study of projects based on different lighting concepts used in interiors and exteriors and survey of lamps available in the market with cost and technical specifications.

## Course Evaluation:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

5. Torquil Barker; Concepts of lighting, Lighting design in Architecture.

# PERSPECTIVE DRAWING TECHNIQUES & TECHNICAL SPECS-I

## (Practical - Graphics)

Course Code: IND2308

Credit Units: 02

### Course Objective:

The objective of this course is to train the students in the field of interior perspective drawing, sciography and scheme detailing. This course provides presentation skills, techniques for construction as a tool towards effective visualization and presentation.

### Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### Module I : Measured Drawing & Views

Measured Drawing of Simple objects like Cupboards etc. and building components like Columns, Cornices, Doors, Windows etc. Isometric View: like Tables, Chairs, Cylindrical & Spherical elements etc. Axonometric View: like Interior views for living room, Toilet, Dining Room etc.

#### Module II Perspective View & Drawings

Principles and Visual effect of 3D objects, Study of Picture plane, Station Point, Vanishing Point, Eye level etc. Characteristics of perspective drawings, perspectives of simple geometric solids and spaces and complex geometries. Advanced examples in one point or parallel perspective, two points or angular perspective. Introduction to three point perspective. Interior perspectives of rooms. Rendering of the perspectives in different media through drawing pencil, pen, brush, charcoal, crayons, color, monochrome, wash rendering etc., Integrating landscape elements, human figures, shadows, foreground etc. in the perspectives.

#### Module III : Introduction to Sciography

Study of shade and shadows of simple geometrical solids of various forms and groups of forms, Shadows of Circular/Cylindrical/Spherical elements. Shade and Shadows of Architectural elements in Interiors. Simple and composite forms, shadows on horizontal, vertical planes and on their own surfaces.

#### Module IV : Scheme Detailing

Working drawing of - **Building Components:** Different types of doors and windows; **Building Surfaces:** Wall murals, reflected ceiling plans and flooring patterns; **Furniture:** Work station, living room furniture, bedroom furniture and dining tables; **Detailing of Special Area:** Toilets with plumbing diagram, kitchen with detailing of shelves and cupboards; **Detailing of Storage Areas:** Wardrobes, TV cabinet and showcase, crockery shelves, cadenza, chest of drawers, dressing table.

#### Module V : Drawing from Imagination(Self-study / Assignment)

Study of speculative drawings, diagramming, drawing compositions, concept sketches, design development sketches, presentation sketches , Presentation drawings, Graphical presentations etc.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

# INTERIOR DESIGN STUDIO-I

(Studio - Graphics)

Course Code: IND2309

Credit Units: 02

## Course Objective:

The objective of this course is to develop understanding of the scale, function and options existing when designing small-scale spaces in residences. This studio course provides the interaction of two-and three-dimensional design of residential interiors.

## Course Description

In the studio, the learning process is learning by doing. The core part of this course incorporates exercises to develop manual and digital presentation skills in order to present design ideas and solutions. Every module is blended with hand on sketches as well as application of basic computer graphics. Each student has to maintain a sketchbook compulsorily. Process sketches are scanned and integrated into the final presentation by PPT. A hard copy of Design Studio Portfolio submission is compulsory.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Interior Design Studio Process

#### 1. Design Objectives:

Function; Cost Effectiveness; Durability, Maintainability; Compatibility; Design; Creativity; Flexibility; Timelessness.

#### 2. Design Approach:

Programming: Functional Requirements, Understanding the User's Needs; Concept Development: Physical and Behavioral Requirements, Space Planning, Architectural Design, Color Concept, Material Selection;

#### 3. Design Development & Presentation:

Design Narrative; Design Illustration; Color and Material Selection; Furnishings Selection; Concept Presentation- use of visual presentation materials, including renderings, floor plans, perspectives, finish and furniture boards, for the user / Client to gain a clear understanding of the design.

#### 4. Design Execution:

Statement of Work, Architectural Floor Plan, Finish Schedule and Color Legend, Finish Floor Plan, Elevations, Sections, and Details, Miscellaneous Drawings, Furniture Floor Plan, Installation Plans, Furnishings Specifications, Furnishings Cost Estimates, Furnishings Order Form

### Module II : Studio Project -1: Basic Residential Interior.

Use Module –I parameters and design Residential facilities, i.e. family housing and unaccompanied personnel housing (dormitories). Holistic concepts in residential interiors – ability to integrate various individual spaces into one theme – treatment of patios, courtyards, verandahs & other semi sheltered spaces – integration of built form and open spaces.

While the overall wear of finishes is reduced in family housing units, they still contain areas fitting all three categories of use:

- **Heavy-use areas:** Entrance foyers, kitchens, bathrooms, stairwells, and laundry areas.

- **Medium-use areas:** Corridors, hallways, dayrooms, family living, dining rooms and kids room, Home Theater.
- **Light-use areas:** Bedrooms.

**Module II : Studio Project -2: Different Types of House Designs (Self-study / Assignment)**

**Study, Identify the difference and Design of:**

Affordable House, Small house, Simplex Houses, Duplex House, Luxury Home, Double and Triple Story House, Multi Family House, Bungalow house, Farm house, Traditional houses, House Designs with garage, various Flats and Apartments, Villa, etc.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# INTERIOR WORKSHOP PRACTICE-I

(Practical)

Course Code: IND2310

Credit Units: 02

## Course Objective:

The course is intended to provide information on working with Wood and Bamboo which are among the major materials used in the interiors. This course aims to understanding the material and tools by making objects which allow students to explore the forms, surfaces, textures and patterns. Explore different joinery and support conditions.

## Course Contents:

*(NB: Submission of Practical work record / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Introduction to Safe Workshop Practice

General safety precaution inside the workshop: Suitable clothing - Eye Protection - Hearing Protection – Footwear - Dust Masks – Safe handling of Tools – Electric safety - Responsibility of individual.

### Module II : Study of Hand Tools and Measuring Instruments.

Fitting Shop: Holding tools; Marking and measuring tools; Cutting tools; Finishing tools; Miscellaneous tools; Safe practice; Models for preparation.

### Module III : Working with Wood and Wood Products

Understanding of wood as building material, finishing material for surfaces and as furniture material. The wood material parameters; Wooden joinery and its strength. Wood polishes and other finishes; color and surface quality; The safe and efficient use of the tools of the trade, Hand tools, portable power tools, Stationary power tools, Materials, Hardware. Safe working practices in a workshop. Joineries in wood – lap, butt, dowel, tenon& mortise, dovetail, etc. Exercises in plywood joinery; Wooden Paneling & Cladding; Wooden Flooring.

### Module IV : Working with Bamboo & Cane

Bamboo / Cane and their products to understand material parameters. Bamboo and cane joinery and its strength. Polishes and other finishes

### Module V : Carpentry

Introducing the techniques of planning, chiseling & jointing in timber to learn the use of hand tools.

Introduction to Timber; Marking and measuring tools; Holding tools; Planning tools; Cutting tools; Drilling and boring tools; Miscellaneous tools; Wood joints; Safe practice; Exercise involving the design of simple furniture and making a model of the same.

### Module VI : Industrial Visit.

Visit various timber industries, furniture manufactures and wood craft centers. Learn, absorb and recognize different stages of timber processing, manufacturing different types of natural wood, interior decoration elements, several models of doors and windows, pieces of furniture and wood works.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# Syllabus - Fourth Semester

## SUSTAINABLE DESIGN

(Theory)

Course Code: IND2401

Credit Units: 03

### Course Objective:

This course introduces the students to the theoretical and practical aspects of sustainable design and the various technologies involved in executing them. This course aims to equip the students with various tools of sustainable design such as design methodology, resource optimization and innovative approaches to eco-design.

### Course Contents:

#### Module I : Introduction to Sustainability

**Sustainability:** Definition and Meaning; **Scope of sustainability:** Sustainable development; Brundtland Report; Ethics and Visions of sustainability, The principle of integrating environmental, social, economic and political dimensions; Eco system and food chain, Natural cycles, Carrying capacity, Ecological foot print; Carbon footprint , Climate change and Sustainability.

#### Module II Sustainability and the Design

**Faces of Sustainable Design:** Design for Disassembly, Design for the Environment, Product stewardship, Cradle to Cradle, Bio-mimicry, Green chemistry, Green marketing; **Principles of Sustainable Design:** Economy of Resources, Life Cycle Design, Humane Design; **Sustainable Design Approaches:** Sustainable design strategies, Sustainable design innovation, Systems design, Trans-disciplinary collaboration in design, Life cycle design and life cycle assessment (LCA), Design for disassembly, Design for reuse, Design for sustainable manufacturing and construction, Design for remanufacturing.

#### Module III : Sustainable Design Considerations

Design for environment, Land use planning; Smart growth and urban design; Transportation policy and design; Environmental site design; Site assessment and selection; Brownfield redevelopment strategies and infill development, Eco-design. Biophilia and Biophilic Design Socially responsible design, User-centered design, Design education and sustainability, Design ethics and sustainability.

#### Module IV : Sustainable Design Strategies

Selection of low-impact materials; Reduction of materials usage; Optimization of production techniques; Optimization of distribution system; Reduction of impact during use; Optimization of initial lifetime; Optimization of end-of-life system.

### Course Evaluation:

# ADVANCED INTERIOR DESIGN MATERIALS & APPLICATIONS

(Theory)

Course Code: IND2402

Credit Units: 03

## Course Objective:

This course expose the students to different materials of construction, progressively and to enable them to represent the different interior components through relevant drawings. The objective of this course is to familiarize the students of Interior Design on material and construction methodology.

## Course Contents:

### Module I : Rubber & Plastics

Natural rubber, latex, coagulation, vulcanizing and synthetic rubber- properties and application. Adhesives – Natural and Synthetic, their varieties, thermoplastic and thermosetting adhesives, epoxy resin. Method of application, bond strength etc. Types, thermosetting and thermo plastics, resins, common types of moldings, fabrication of plastics, polymerization and condensation. Plastic coatings, reinforced plastic, plastic laminates – properties, uses and applications

### Module II : Metals

Steel, Iron, Aluminium, Bronze, Brass, Copper – Alloys, Characteristics, Form and uses, Properties, Definition of terms, Methods of working with metals, Fixing and joinery in metals, Finishing and treatment to metals. Application of metals to build form and interiors - Special doors and windows, Ventilators – Sliding, Sliding and folding, Revolving, Pivoted, Rolling, Collapsible, Dormer, Skylights, Clerestory etc.

### Module III : Fabrics and other Furnishing Materials

Fibers, Textiles, Fabric treatments, Carpets, Durries, Tapestries, Drapery, Upholstery, Wall coverings, etc. – Properties, Uses and application in the interiors. Other materials such as Cork, Leather, Paper, Rexene etc. – Their properties, uses and applications in the interiors. A brief overview of Green materials.

### Module IV : Thermal Insulation And Acoustics Insulation Materials

**Thermal insulation:** Heat transfer heat gain/ loss by materials - vapour barriers and rigid insulations, blanket, poured and reflective insulation – Properties and uses of Spun glass, Foamed glass, Cork, Vegetable fibers, Gypsum, Plaster of Paris, Hydride Gypsum. **Acoustics:** Definition of sound and noise, Reverberation time echo, Sound, Foci. **Acoustics insulation:** Porous, Baffle and Perforated materials such as Acoustic plastic, Acoustic tiles, wood, partition board, fiber board, cork, quilts and mats – their properties and uses – current developments. **Applications:** Applications of insulations in seminar hall, theater and cold storage.

### Module V : Interior Components

**Doors:** Braced, panel flush doors, carved entrance doors and partially glazed doors. **Windows:** casement window (without mullion), bay window, & French window. **Ventilator:** louvered & top hung ventilator. **Showcase & shelf:** TV shelf, showcase & room divider, dressing wardrobe. **Cupboard & Cabinets:** kitchen cupboard & wall cabinets. **Partitions:** simple paneled and glazed partitions – fixed sliding, folding, sliding & folding. **Shelves:** Show room shelves, Counters, cabinets, and storage. **Falls Ceiling:** Falls ceiling of interior spaces using Wood panels, Glass, Thermacol, Gypsum board, Plaster of Paris, Aluminum strips & Perforated metal sheets.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

# INTERIOR SERVICES

(Theory)

Course Code: IND2403

Credit Units: 02

## Course Objective:

The main objective of the subject is to help the student get an understanding the various methods of interior construction & its services so that this knowledge can be integrated with the design.

## Course Contents:

### Module I : Water Supply & Plumbing

Water Supply methods & Removal of impurities, Consumption of water, Service connection from mains, House-service design, Tube well, Pumping of water, Types of pumps, Cisterns for storage; Common hand tools used for plumbing and their description and uses, Joints for various types of pipes, Sanitary fitting standards; Different types of pipes and accessories, Valves & taps, etc. Fittings & materials for piping: Cast iron, Steel, Wrought iron, Galvanized lead, Copper, Brass, Cement concrete and Asbestos pipes, PVC pipes, Sizes of pipes and taps, Testing drainage pipes for leakage - smoke test, water test etc., CI pipes for soil disposal and rain water drainage.

### Module II : Electrical Systems

Single/ Three phase supply; Protective devices in electrical installation; ISI Specifications; Types of wires, Wiring systems, choice & methods; Planning electrical wiring; Main and distribution boards; Typical Electrical layout for interiors; Metering distribution boards, Circuits, MCB Cutouts; Conductors, Switch boards, Light and power circuits. Indian electricity rules, Preparation of electrical layout scheme for a interior using standard electrical symbols. Generator / battery backup system,

### Module III : Illumination and Lighting

Electric light sources: Brief description, characteristics and application of different types of lamps, methods of mounting and lighting control Luminaries classification/ - Lumen method for design – Room reflectance/ Glare – manufacturer's data on luminaries / luminaries cost.

### Module IV : Air-Conditioning System And Applications

Vapour compression cycle; Compressors; Evaporators; Refrigerant control devices; Electric motors; Air handling units; Cooling towers; Window type & Packaged air conditioners; Chilled water plants; Fan coiled systems; Water piping; Cooling load; AC systems for different types of buildings, Duct lay out, etc.

### Module V : Acoustics

Introduction to acoustics, Methods used for good acoustics. Basic theory, Room acoustics; Behaviour of sound in enclosed spaces, sound absorption, Acoustic Design process and different types of buildings – Auditoriums, Concert halls, Cinema halls, Seminar rooms, Lecture halls, Classroom and Open offices. Noise reduction, Sound isolation, Transmission loss. TL for walls, Sound leaks in doors, Noise reduction between rooms, Construction details for noise reduction.

**Module VI : Building Drainage & Solid Waste Disposal**

Layout, Principles of drainage, Trap type, materials and functions, Inspection chambers, Design of Septic tanks and soak pits, Ventilation of house drains Anti-syphonage or vent pipes, One and two pipe systems , Sinks, bath tub, water closets, flushing cisterns, urinals, wash basins, bidet, shower panel etc. Solid wastes collection and removal from buildings. On-site processing and disposal methods. Aerobic and Anaerobic decomposition.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

6. V.K.Jain, Fire Safety in Buildings

# ESTIMATION, COSTING & PROJECT MANAGEMENT

(Theory)

Course Code: IND2404

Credit Units: 02

## Course Objective:

This course aims to equip the students to prepare the Estimate in order to foresee the cost of the work or to implement an interior design project & also to monitor / control project cost. Also, this course exposes the students to the currently prevalent techniques in the planning, programming and management of a project.

## Course Contents:

### Module I : Introduction To Estimation

Estimation – definition, purpose, types of estimate, and procedure for Estimating the cost of work in order to implement an interior design project or to make products related to interior design like furniture, artifacts etc.

### Module II : Rate Analysis & Estimation Format

Rate Analysis – definition, method of preparation, quantity & labor estimate for woodwork, steelwork, Aluminum work, glass & its rate for different, thickness & sections, finishing (enamel paint, duco paints, melamine, DU coats, Hand polishing, veneering and laminating) for walls & ceilings. Electrical & plumbing products, wiring, ducting etc., and laying of tiles & wall paneling in the estimate format of the project.

### Module III : Detailed Estimate

Detailed Estimate – data required, factors to be considered, methodology of preparation, abstract of Estimate, contingencies, labor charges, bill of quantities, different methods of estimate for interior design works, methods of measurement of works.

### Module IV : Costing of Fixtures & Fittings

Cost of the following items: Luminaries, Fan, Cables, Switches etc.; Tiles in skirting & dado, Cement plaster, Wood, Steel & Aluminum, Painting to walls : Cement paint, Oil paints , Distemper, Acrylic emulsion, Enamel paint; painting to joinery, Varnishing, French polishing, Plumbing equipments: Piping, Shower panels ,Cubicles, Tubs, Jacuzzis, Taps, Motors, Fountains, False ceiling of Aluminum panels, Steel & Wooden frame work, Thermosol etc. Wall paneling of tiles, Partitions made of materials like Aluminum, Wood, Steel etc.

### Module V : Introduction To Specification

Specification: Definition, Purpose, Procedure for writing specification for the purpose of calling tenders, Types of specification. Specification for different item related to interior design project – woodwork for furniture window frames & pelmets, Partitions etc. Materials like steel aluminum glass of various kind. Wall paneling & false ceiling of materials like Aluminum, Steel, Wood, Electrical, Plumbing, Air-conditioning & Firefighting equipments.

### Module VI : Project Management

**Introduction:** Project planning and project scheduling and project controlling, Role of Decision in project management, Method of planning and programming, Human aspects of

project management, work breakdown structure, Life cycle of a project, disadvantages of traditional management system; Event, activity, dummy, network rules, graphical guidelines for network, numbering of events; **Critical Path Method And Pert Analysis:** CPM network analysis & PERT time estimates, time computation & network analysis; **project time reduction and optimization:** Project cost, Indirect project cost, direct project cost, slope of the direct cost curve, total project cost and optimum duration, contracting the network for cost optimization, steps in cost-time optimization; **project updating and allocation:** When to update? Data required for updating, steps in the process of updating; Resource usage profile: Histogram, Resource smoothing and Resource leveling, Computer applications in project management

## **PERSPECTIVE DRAWING TECHNIQUES & TECHNICAL SPECS-II**

**(Practical)**

**Course Code: IND2405**

**Credit Units: 03**

### **Course Objective:**

The objective of this course is to develop the skills related to the preparation of drawings meant for execution on the site and preparation of working drawings for building interiors with specific reference to code of practice and incorporating specifications as complementary to the working drawings.

### **Course Contents:**

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

**Module I : Preparation of Working Drawings**

Preparation of working drawings – Suitable scales of drawings, methods of giving dimensions and standards on plans, sections, elevations, details etc.

**Module II : Preparation of Plans**

Architectural plans, furniture layout floor plans with clearances, Scale of Floor Plans, Drafting Standards, different level floor plans, detailed floor plans of each room.

**Module III : Elevations and Sections**

Detailed sectional elevations of all the walls in the interior with all the required dimensions and specifications, Scale of Interior Elevations, Drafting Standards for Interior Elevations, Designation of Materials. Types of Section Drawings, Building Sections, Sections of Interior Spaces

**Module IV : Details of all Services**

layouts for flooring, ceiling, electrical, plumbing, lighting, firefighting etc., toilet details, kitchen details, staircase details, furniture details, Interior finishing details, material, color and texture details, fixture and fixing and joinery details.

**Module V : Specifications Writing**

Writing detailed clause by clause specifications for materials pre and post execution, tests, mode of measurements, manufacturer's details and specifications etc. Manufacturer's specifications for various materials

## **INTERIOR DESIGN STUDIO-II** (Studio-Graphics)

**Course Code: IND2406**

**Credit Units: 03**

### **Course Objective:**

This course focuses on planning a designing of a working space. Each module is designed as a studio project and students will learn the fundamentals of the various types of working environment and how to design a functional and aesthetically appealing working space.

### **Course Description**

In the studio, the learning process is learning by doing. The core part of this course incorporates exercises to develop manual and digital presentation skills in order to present design ideas and solutions. Every module is blended with hand on sketches as well as application of basic computer graphics. Each student has to maintain a sketchbook compulsorily. Process sketches are scanned and integrated into the final presentation by PPT. A hard copy of Design Studio Portfolio submission is compulsory

### **Course Contents:**

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### **Module I : Studio Project -1:OfficeInterior.**

Office facilities generally have the highest concentration of occupants. These areas vary from home offices, to open-bay work spaces filled with conventional and modular furniture, to large systems furniture (pre-wired) installations. The interior plans are either closed plan office or Open plan. office

Most administrative facilities will contain some combination of the three types depending on the functions performed by the occupants, as well as physical constraints of the facilities.

- **Heavy-use areas** - Entrances, foyers, lobbies, main circulation corridors, stairwells, elevators, rest rooms, large conference or meeting rooms, snack bars, and media production areas.
- **Medium-use areas** - Internal circulation, staff office areas, and small conference rooms.
- **Light-use areas** - Commanders' suites and private conference areas.

#### **Type of offices:**

- Professional offices: Law, Accounting, stockbrokers, Real estate brokers etc.
- Corporate and Executive offices: Any size of office for any kind of business other than professional office that involved a corporate identity.

#### **Module II Studio Project -2: Institutional Interiors**

Institutional interior design involves in depth programming, planning, design, and management of space used by public and private organizations. The student needs to recognize the emotional content and public response and familiar with the very specific needs and requirements associated with Institutional interiors

### **Educational Institutions:**

Educational facilities include grade and high schools for dependent children, specialized training facilities (such as simulators), professional and technical classrooms, and centers for college extension program.

- **Heavy-use areas:** Entrances foyers, Cafeteria, Rest rooms, Fitness areas, Technical classrooms.
- **Medium-use category:** Administrative offices, conference rooms, most other classrooms, Labs and corridors.
- **Light-use:** Principals' offices and commanders' suites.

**Module III      Studio Project -2: Other Institutions(Self-study / Assignment)**

Government offices; Banks, Daycare centers, Religious centers, Fire and Police stations, Courts, Public Libraries etc.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

## INTERIOR WORKSHOP PRACTICE-II

(Practical)

Course Code: IND2407

Credit Units: 03

### Course Objective:

The course provides an understanding of comparative analysis of various metals and their design parameters facilitating usage in the interiors. The aim of this course is to introduce various methods of working with metals with an exposure to fixing, joinery and treatment.

### Course Contents:

*(NB: Submission of Practical work record / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### Module I : Machine Shop

Lathe; Work holding devices; Measuring tools; Cutting parameters; Tool materials; Tool geometry; Lathe operations; Safety precautions.

#### Module II : Working with various Metals

Types of metals, Properties of metals, Definitions of terms with reference to properties and uses of metals, Various methods of working with metals, Fixing and joinery in metals, Finishing and treatment of metals., Finishes on metals; Standard specifications; Metals in built form activity: Horizontal, vertical and inclined surfaces - in interior environment elements- Products and furniture forms- Doors, windows, Jalties, Railing, stair etc. Metals and other materials – Form and joinery.

#### Module III : Metals: Fabrication

Cutting, Planning, Drilling and lathing of steel sections used in furniture. Aluminium sections and their use in doors, windows and partitions.

#### Module IV : Welding

Introduction; Arc welding; Welding tools; Techniques of welding; Types of joints; Welding positions; Advantages& disadvantages of arc welding; Safe practice.

#### Module V : Industrial Visit.

Visit various Forging and Stamping Industries, Architectural and Structural Metals Manufacturing, Fabricated Metal Product Manufacturing like Aluminium fabrication, steel fabrication, etc. Learn, absorb and recognize different stages of metal processing, manufacturing different types of metals, interior decoration elements, several models of doors and windows, pieces of furniture and welding works. Visit Glass industries and understand the manufacturing process and glass fabrication.

### Course Evaluation:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)				

### Text & References:

## SEMINAR / GUEST LECTURE / WORKSHOP FOR SKILL DEVELOPMENT

Course Code: IND2433

Credit Units: 04

### Course Objective:

The aim of this course is to develop various research skills to the student. They also expose to write a paper and present in a seminar. The workshops and guest lecturers aim to develop practical solutions in the field of interior design with more idea generations and innovations. The students have to be participated either Seminar (1) or Workshop (2) to earn the credit. Guest lecture (3) is addition to this for enhancing their knowledge by examining and analysing various aspects of design.

### SEMINAR

Each student would be required to select one of the below subjects and present a written paper (essay) and present in the seminar. This should be based on extensive literature reviews, case studies, interviews (wherever possible), etc. The student may choose any area of interest in consultation with the concerned faculty for research. The study would be presented as a term paper with supporting illustrations. It will be periodically reviewed and presented as a seminar for final assessment.

### *Suggested areas for research:*

1. Studies of Indian art & craft. Influence of location, tradition, culture and socio-economic development on art & craft in rural & urban India. Suggest suitable changes in technology to improve the products so as to make it acceptable in today's context.
2. Studies of the work of different interior designers through observation, interview and research. Understanding of the concepts of space, structure, organization, symbolism, form, colour, modes of presentation etc.

### Evaluation Scheme:

Components	Organisation and Relevance of content	Literature Review	Bibliography	Presentation	Total
Weightage (%)	30	30	20	20	100

### WORKSHOP

#### Objectives:

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. Workshop is undertaking a significant practical unit of examining and analyzing various aspects of design at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by jury of examiners comprising of the faculties.

#### Major Themes for Workshop are: -

Decorative accessories in interiors / Occupant health & safety in interiors / Signage & Graphics - Optical

Illusions - Modular Co-ordinations. / Kitchen & Bath design - Storage design. / New materials and application in Interior Design.

**Guidelines for Workshop :**

*The procedure for earning credits from workshop consists of the following steps:*

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of at least 500 words about the learning outcome from the workshop.

**Methodology**

*The methodology followed at the workshop could be based on any one or more of the following methods:*

Case Study /Group Activity. /Role Play. / Business Planning. /Quiz.

**Evaluation Scheme:**

Components	A	AP	MCQ	Solving the case/ Assignment / Write up	Total
Weightage (%)	10	30	30	30	100

(A - Attendance; AP - Active Participation; MCQ - Multiple Choice Questions)

**GUEST LECTURE**

Eminent subject experts from the field may be invited to deliver the lectures on different topics of their choice and share their experience with the students

## Syllabus - Fifth Semester

### DESIGN THINKING & CREATIVE PROBLEM SOLVING

(Theory & Activities)

Course Code: IND2501

Credit Units: 03

#### Course Objective:

The objective of this course is to develop deep insights about design thinking. This course provides the ability to gain about users to define and re-frame problems, and to generate solutions or alternative approaches towards design and innovation.

#### Course Contents:

##### Module I : Design Thinking Process

**Stages of thinking:** The design process; Stage 1- Define ; Stage 2- Research ; Stage 3- Ideate ; Stage 4- Prototype ; Stage 5- Select ; Stage 6- Implement ; Stage 7- Learn.  
**Research:** Identifying drivers; Information gathering; Target groups; Samples and feedback. **Idea generation:** Basic design directions; Themes of thinking; Inspiration and references; Brainstorming ; Value ; Inclusion; Sketching; Presenting ideas.  
**Refinement:** Thinking in images; Thinking in signs; Appropriation; Humour ; Personification; Visual metaphors ; Modification; Thinking in words; Words and language; Type ‘faces’; Thinking in shapes; Thinking in proportions ; Thinking in colour. **Prototyping:** Developing designs; ‘Types’ of prototype; Vocabulary.  
**Implementation:** Format; Materials; Finishing; Media; Scale; Series/Continuity.

##### Module II : Exploring Creativity

Definitions of creativity, Understanding components of creativity, Theories of creativity, Goals and objectives, Value judgments, Defining problems, Information gathering, Creative incubation, Creative thinking and creative process. Tools and techniques of creativity : Mind mapping, Brain storming with related stimuli and unrelated stimuli, Positive techniques for creativity, Creative pause, Focus, Challenge, Alternatives, Concepts, Provocation, Movement, Setting up provocations, Sensitizing techniques, Group or individual techniques. Simple design exercises.

##### Module III : Design Problems and Solutions

Definitions of problem solving; Formulation of problems, Nature of creative design problems, Design goals. Problem statements; Brain writing with unrelated stimuli, Idea mapping, Random input, Story boarding exercises, Problem solving techniques: Divide and conquer, Hill climbing strategy, Means - Ends analysis, Trial and error, Brain storming, Morphological analysis, Method of focal objects, Steps developed by Polya, Dekker, De Bono, Research, Analogy, Reduction (Complexity), TRIZ, Halpern’s techniques etc; Creative solutions applicable to designs; Conceptual design, Embodiment design, Detail design, Iterations; Simple Design exercises;

#### Course Evaluation:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# REVITALIZATION OF ARTS & CRAFTS

(Documentation Project)

Course Code: IND2502

Credit Units: 01

## Course Objective:

This course aims a detailed study of the characteristics of Indian arts and crafts and its application in the interiors that provides an understanding of the role of revitalization of Art/craft form in interior spaces through a project assignment.

## Course Contents:

*(NB: Submission of Project Report is compulsory for this course and will be part of the Final Course Evaluation)*

### Module I : Introduction to Creative Arts and Crafts in India

Creative arts and crafts in India and its application in interior design; Materials; Art movements through history; Traditional arts and crafts of India; Folk arts of India; Traditional arts and crafts of various states of India.

### Module II : Project Assignment

#### Description:

The project will consist of a general to the crafts traditions of India, details about the crafts, their classifications, regional distribution etc. that will applicable to art in interior spaces such as –Residence, Reception, Lobby spaces, Theme Boutiques, Hotel, Restaurants, etc. This project will necessarily be a scientific, methodical documentation of a particular craft tradition prevalent in the region, which will have the following core issues in the background:

Philosophy and Aesthetics - Materials, Processes and Techniques - Environment and Resource management – Social structures - Economy & Marketing – International examples.

#### Project Objective:

Document people, life, culture and craft and understand the materials, tools, technology, processes and forms. Suggest suitable changes in technology to improve the products so as to make it acceptable in today's context.

#### Procedure:

Select one of the art / craft form with the consultation of the faculty. Discuss about the crafts traditions practiced in the region, their history, distribution etc. along with faculty. Collect all information available through various sources including library, internet and resource persons. To avail comprehensive data on various aspects of the crafts, students may develop an interview schedule and decide on number of crafts persons to be interviewed, which all places they will be visiting etc. Faculty must equip the students on interaction with craftsperson and other people from the community, type of language they should use, how to be polite with them and while handling their materials etc. Students can buy some of the objects from craftsperson, take photographs after seeking their permission, make drawings, etc. which later on they can use in PPT presentation along with submission of final project report. The students can also make a short documentary film basis on their research for their final presentation.

#### Requirements:

- The work will be periodically reviewed.
- The study has to be presented in the form of a 'Documentation Report' with illustrations /images as a seminar for final Course Evaluation.
- The students are asked to give a brief oral presentation with 'Power Point' to the class about their

research.

- They have to explain, what kind of interests they want to develop in the research and a debate will follow as well.
- The submission of project assignment file and presentation will be part of student's Examination Scheme.
- The students will have to visit various craft places and museums for the part of their research.
- There will be an evaluation by a jury comprising of external experts and internal faculty guide from the department.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination.

**Course Evaluation:**

<b>Components</b>	<b>Conceptual Framework</b>	<b>Viva-Voce</b>	<b>Presentation</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>40</b>	<b>40</b>	<b>20</b>	<b>100</b>
<b>(EE-End Semester Examination)</b>

# INTERIOR SAFETY SYSTEMS AND BUILDING MANAGEMENT

(Theory)

Course Code: IND2503

Credit Units: 02

## Course Objective:

The objective of this course is a detailed study of, designs that eliminate or reduce hazards in the workplace to prevent mishaps and provide good indoor quality. This course also covers to make understanding of disaster management, seismic design principles and various building management systems.

## Course Contents:

### Module I : Safety Management.

Scope of Environmental safety; Need for public awareness; Elements of a safety and health management system applicable to interiors in the terms of design, components and selection of material; Interior structure and responsibilities; Interior designer responsibilities, Individual responsibilities, Safety Consultation; Minimum safety requirements for building interiors.

### Module II : Health and Safety Aspects

Define the term 'accident'; Reasons accidents inside the buildings; The factors of slips, trips and falls in the workplace and methods to prevent them; Dealing with electric shock; Methods for electrical safety; Types of health hazards; Common hazardous substances and the routes of entry; Health and safety aspects of the interiors structure; Design layout and services; Types of injuries; Define 'first aid' and practical training on 'first aid'

### Module III : Dealing of Fire Fighting Services

Mechanism of fire spread in building and prevention; Fire safety standards; Concepts in fire protection; Firefighting installation and requirements; Heat sensitive detectors; Smoke detectors; Automatic water sprinkler system; Foam systems; Fire proof materials for Interiors: Fabricated fire proof boards; Calcium silicate, Gypsum, Vermiculite, and Perlite boards; Fire protection of structural elements: Wooden, Steel, RCC, and Plastic structures; Fire and life safety requirements in different groups of buildings; Define LPG; Characteristics of LPG; LPG Installation; LPG - rules of usage; Dealing LPG in case of leakage; Dealing in the event of accident.

### Module IV : Disaster Management & Seismic Design Principles

Emergency planning: on-site and off-site; Need of a plan, possible approach, and objectives of emergency plan. On-site emergency planning, formulation of the plan and emergency services; Identification of resources, actions and duties, emergency procedure; Mock drills. Concept of seismic design; Stiffness; Strength; Period; Ductility; Damping; Hysteric energy dissipation; Center of mass and rigidity; Torsion; Design eccentricities; Ductility based design: Design of energy absorbing devices, Seismic base isolation and seismic active control.

### Module V : Building Management

*Fundamentals for interior and exterior treatments:* Termite proofing, Waterproofing, Acoustics, Thermal comfort, Fire protection. Walls- plastering, Putty, Curing – Before plastering, Painting and applying other finishes, Methods of curing; Roof- Plastering and curing; Factors influencing choice of treatments: Climate, Cost,

and Age. **Vertical transportation systems:** Lifts & Escalators- Definition, Location, Arrangement, Structure; **Security and safety systems:** Designing a security system; Burglar alarm; CCTV; Central alarm systems; Intrusion sensors and Space sensors; Cable TV, PABX, Computer labs: Access flooring, Server rooms. **Intelligent buildings:** Definition, Building environment, Architecture, IT, Artificial intelligence in intelligent buildings

# TEXTILE IN INTERIORS

(Theory)

Course Code: IND2504

Credit Units: 02

## Course Objective:

The objective of this course is to familiarize the students of Interior Design on textile materials used in interior. This course helps to gain knowledge and understanding of the functional and aesthetic requirements of textiles for a range of applications.

## Course Contents:

### Module I : Introduction To Fabrics

Fabric, yarn and fiber structure, Fabric structure- woven- warp, weft, selvedge, knitted- course, non-woven, Fabric types and classification- woven, including plain, twill, satin, Jacquard, crepe and pile weaves, Knitted- including single knit, double knit, tricot knit, pile knit, lace and net, Non-woven-including felts webs and films, identification and properties of fabrics, yarns and fibers.

### Module II : Textile Design Applicable to Interiors

Development of textile design in different cultures from primitive art to contemporary designs. Criteria of design of the elements and principles of textile design. Application of elements and principles of design across a range of textiles. Describe and analyze elements and principles of design -furnishings, textile arts. Functional and aesthetic requirements and features of textile range. Analysis of a motif, developing repeat as a basic unit of design.

### Module III : Colour on Fabrics

Fabric coloration and decoration- Dying and Printing; Principles of applying color to fabrics. Textile arts and crafts in interiors, traditional and modern materials and methods. Preparing samples on tie and die printing, batik printing, appliqué, macramé and braiding.

### Module IV : Textile Materials for Interiors.

Miscellaneous materials such as cork, leather, paper, Rexene etc. – their properties, uses and applications in the interiors. A brief overview of Green materials. Jute or hessian – dyed jute fabric and its applications – various kinds of processed leather, its application in interior design.

### Module V : Home Furnishings

Furnishings-Classification; Types of curtain; Curtain construction; Selection criteria relation to backgrounds in walls; Floors and ceilings; Slip covers; Cushion covers; Bed linen and table linen; Floor coverings -rugs and carpets, types selection; Care and maintenance; Installation of floor coverings.

## Course Evaluation:

# INTERIOR LANDSCAPE DESIGN

(Studio based Theory)

Course Code: IND2505

Credit Units: 02

## Course Objective:

This course aims to develop an understanding about the design of interior landscape with special emphasis on the choice and care of plant materials used in the interior spaces. This course covers study about the various landscaping elements and their application in interior spaces.

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Introduction to Interior Landscaping

Definition, classification of plants, indoor plants and their functions, layout & components, Floriculture – commercial, ornamental, Selection of plants & pest control.

### Module II : Study of plants in relation to landscape design

Physical requirements of plants – light, temperature, water, planting medium, soil separator, weight of plants, acclimatization & maintenance. Techniques to meet physical requirements.

### Module III : Interior Landscaping Elements & Principles

Various interior landscaping elements – water bodies - pools, fountains, cascades, Plants, rocks, artifacts, paving & lighting, Design guidelines- plant texture & colour, plant height, plant spacing.

### Module IV : Roof And Deck Landscape

Protection of the integrity of the roof and structure, provisions for drainage, light weight planting medium, irrigation, selection of materials, water proofing, provision for utilities and maintenance.

### Module V : Exercise on Interior Landscape (Self-study / Assignment)

Courtyard design - An outdoor room design - Terrace garden

## **INTERIOR DESIGN STUDIO-III**

**(Studio-Graphics)**

**Course Code: IND2506**

**Credit Units: 02**

### **Course Objective:**

Retail design is a very specialized discipline due to the heavy demands placed on retail space. The objective of this course is to introduce the basics of designing for Retail interiors and to develop skills required for the same that can apply into various interior design projects.

### **Course Description**

In the studio, the learning process is learning by doing. The core part of this course incorporates exercises to develop manual and digital presentation skills in order to present design ideas and solutions. Every module is blended with hand on sketches as well as application of basic computer graphics. Each student has to maintain a sketchbook compulsorily. Process sketches are scanned and integrated into the final presentation by PPT. A hard copy of Design Studio Portfolio submission is compulsory.

### **Course Contents:**

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### **Module I : Studio Project -1 : Malls and Shopping Centers**

The structure of retail space creates the constraints of the overall design. In retail one hundred percent of the space must be utilized and have a purpose. The floor plan creates the circulation which then directly controls the direction of the traffic flow based on the studied psychology of consumer movement pattern within a retail space. Circulation is important because it ensures that the consumer moves through the store from front to back, guiding them to important displays and in the end to the cashier. The basic store layouts and circulation plans that all provide a different experience:

- **Design Planning for Retail Activity:**

Straight plan - Pathway plan - Diagonal plan- Curved plan - Varied plan - Geometric plan

- **Design Elements:**

Ergonomics in Retail interiors; Types of Shop layouts; Modular units; Materials used in counters, shelves, worktops, their comparative study. Lighting & colour scheme – Natural & Artificial light. Design of commercial ambiance.

- **Visual Merchandising Display Techniques:**

The art of selling-displays/products/marketing, design of display units, design of boutiques, showrooms; Product display: Windows displays / Internal displays / Hierarchy of product display / Power of visual communication / Graphics; Theme displays. Exhibition spaces: Display for exhibition, Lighting design for commercial spaces: Task; Display, Atmospheric, Focal lighting; Coloring commercial spaces: Coding & Decoding. Visual branding of the store.

#### **Module II : Studio Project -2 : Other Retail formats (Self-study / Assignment)**

**Study, Identify the difference and Design of:**

Traditional mom and pop stores, kiosks, Convenience store, Department stores, Super markets and hyper markets, Speciality stores, Off-price retailers, Catalogue showroom, Gift shops, Tradeshowrooms, etc.

**Course Evaluation:**

# COMPUTER AIDED INTERIOR DESIGN & DRAFTING

(Studio based Practical)

Course Code: IND2507

Credit Units: 03

## Course Objective:

The main objective of this course is to construct drawings and design objects of interior spaces with special emphasis on presentation, visualization of interiors, rendering techniques using AutoCAD and Revit Architecture. This course enhances the students to use CAD that automates design & drafting task so that creating and revising drawing becomes easy.

## Course Contents:

*(NB: Submission of Practical work record / Graphic Portfolio is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Starting AutoCAD

Introduction to AutoCAD, AutoCAD : System requirements, AutoCAD screen, Command entry, Setting up of page size, Starting drawings from scratch, Creating and using templates, Opening a drawing, Saving the drawing & Exit from AutoCAD.

### Module II : Using Co-ordinate systems.

The UCS, Working with Cartesian and Polar coordinate systems, Using displays with shortcuts, Setting up the drawing environment, Setting the paper size, Setting units, Grid limits, Drawing limits, Snap controls, Use of paper space and Model space, Drawing tools.

### Module III : Setting up the Drawing Environment

Basic commands dealing with drawing properties: Layer control, Change properties, Line weight control, etc. Inquiry methods: Using data base information for objects, Calculating distance, Angle, Areas etc.

### Module IV : Dimensioning commands and blocks

Dimensioning the objects in linear, Angular fashions along with quick time dimensioning etc. Creating and working with blocks, Creating symbols, Use of blocks in creating a layout, of an area.

### Module V : Orientation towards 3D

2D to 3D conversion, Perspective view, Walk through the layout, Solid modeling : Concepts behind solid modeling, Composite solids creation and Modification, Solids display and Inquiry. Rendering and Presentation. Printing and plotting.

### Module VI : Introduction to Revit Architecture.

- Basics of BIM
- Revit Architecture Interface
- Basic Revit Concepts
- Modeling/Construction Techniques
- Annotations & Dimensions
- Page Layout & Printing

**Course Evaluation:**

# INTERIOR SPACE MODELING WORKSHOP-I

## (Practical)

Course Code: IND2508

Credit Units: 02

### Course Objective:

The Model-making is also part of the act of designing as assisting the designer's ability to pre-visualize. The objective of this course is to enhance the students to basics of model making with various materials and acquisition of hands on experience in model - building.

### Course Description

Model-making is a very practical subject, in that it involves the handling of materials to produce a physical outcome. It could be taught purely from that practical standpoint. Focusing on the materials and tools needed, and the methods or techniques employed to make specific things. Generating the idea through freehand sketching is important in model making. The initial sketches are compulsory for students to pre-visualization before starting the model making. The number of freehand sketches should use and select one for further technical sketching. All models are built to a predetermined scale. As with measured drawings, the level of realism depends on the scale. For example, a model at scale 1:5, should display a lot more details than a model at scale 1:50. It is also best practice to include a support for the model, either in the form of a single piece of board to will keep it sturdy, makes it easier to carry and view at different angle.

### Course Contents:

*(NB: Submission of Practical work record / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### Module I : Introduction to Model Making

Introduction to model making; Concepts; Need; Role of scale models in design; Various materials used for model making; General practices; Understanding of various tools and machines, Best practices and skills involved in operating the tools.

#### Module II : Model Making Exercises

- **Hand Building Techniques:**

Making a box with a lid- hollowing out, pinch pots – making a bowl, coiling – making a cylindrical pot, slab- building – making a cube shaped box, hand building with clay strips- making a vase. Introduction to block models of buildings involving the usage of various materials like Thermocol, Soap/Wax, Boards, Clay etc.;

- **Working in Scale:**

*Design and make the models of: Interior building components:* Steps or stairs; Rakes or ramps; Doors; Windows; Floorboards etc. *Furniture:* Dining / Table chair; Sofa; Barstool; Armchair; Table; Beds; Shelves; Cabinets; Kitchen Appliances; Mattresses.

#### Tools and Materials:

- **Measurements/Rulers:** Architectural Scale; Rulers; Triangular Rule;
- **Pens:** Sharp Pencil; Double-side Marker: Fine and Ultra-fine; Micron Pens 01, 03, and 08; Thick Marker;
- **Cutting Tool:** Snap-off Blade; Utility Knife; Scissors, Cutting Mat
- **Glues:** Rubber Cement Glue; Quick Dry Glue; Glue Gun; Transparent Cello Tape;

- **Board materials:** Thin Black and White Foam Board; Thick Black and White Foam Board; Chip Board; Thin Plywood; Clear Sheet Print.

**Procedure:**

Get an idea – Make number of initial freehand sketches - Select one for the finalization- Prepare base for models using wood or boards- Prepare tools and materials - Select a scale of model - Floor Plan and Section Cut Drawing - Add dimensions to drawing - Make sure safety as first concern while cutting - Cut - Labeling cut pieces - Keeping track of what is being glued to where - Getting and keeping right angles - Glue each pieces - Build interiors and structural model separately - Add colors and textures to finishing the model.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

# INTEGRATED PROJECT WORK

(Project)

Course Code: IND2532

Credit Units: 04

## Course Objective:

The student will be required to produce a project feasibility report for the specific design undertaken in the design studio. This course aims to sensitize the student to the technical and socio-economic feasibility of the design project.

## Course description:

This course for analyzing a design project for technical and socio-economic feasibility. The student has to submit a project feasibility report on the project done in the design studio including previous semesters by integrating the knowledge and skills acquired from all the subjects studied till date.

- Environmental impact assessment of the project following the standards and specifications.
- Socio-economic appraisal of the project and the design considering factors such as behavioral aspects, security considerations, costs for different user groups, aesthetic preferences etc.
- Technical feasibility – through execution and detailing of different spaces and elements of design, checking the feasibility of layout for service systems and specifications.
- Costing of the project – bill of quantities, schedule of rates, specifications etc. economic viability and financial viability.
- Space planning aspects/ issues – user activity spaces, access to physically challenged, fire safety, other services, green rating etc.

## The Steps of the Project Report

- Step I:**
- Suitability of the topic.
  - Relevance of the topic
  - Time available at the disposal.
  - Feasibility of data collection within the given time limit.
  - Challenges involved in the data collection

**Step II:** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**Step III:** Collection of information and data relating to the topic and analysis of the same.

- Step IV:**
- Writing the report dividing it into suitable chapters, viz.,
  - Chapter 1: Introduction,
  - Chapter 2: Conceptual Framework
  - Chapter 3: Analysis & Findings
  - Chapter 4: Conclusion and Recommendations.

- Step V:**
- The following documents are to be attached with the Final Project Report.
  - Bonafide Certificate cum Report Evaluation (From Faculty Guide & Internal and External Examiner)
  - Student's declaration.

***Evaluation Method for Dissertation Report:*****Chapter Scheme for the Training Report.****Marks Distribution.**

Overall Report Format / Layout	:	05
Chapter 1. The Introduction	:	10
Chapter 2. Conceptual Framework,	:	20
Chapter 3. The Conceptual Framework	:	15
Chapter 4. Research Methodology, Data Analysis & Interpretations.	:	10
Chapter 5. Conclusion and Recommendations	:	10
Total	:	70

***Procedure for evaluation:***

- Submission of project feasibility report, Presentation of project feasibility report & Viva-voce
- The project feasibility report will be reviewed by a jury consisting of external and internal examiner to be appointed by the Department / University. Failure to submit the Seminar Report or failure to appear at the Viva-voce Examination will be treated as “Absent” in the Examination.

**Course Evaluation:**

Components	Project Report	Viva-Voce	Presentation	Total
Weightage (%)	70	20	10	100

## Syllabus - Sixth Semester

### INTRODUCTION TO DESIGN MANAGEMENT

(Theory)

Course Code: IND2601

Credit Units: 03

#### Course Objective:

The course provides an understanding of Design management that enables innovation and creates effectively-designed products, services, communications, environments, and brands that enhance the quality of life and provide organizational success. This course helps the students to understand the business side of design.

#### Course Contents:

##### Module I : Introduction to Design Management

Defining Design Management; Evolution of design management; Role of the Design Manager; Levels of Design Management; Principles of Design Management

##### Module II : The Design Process

Design Process models & Methodology: Waterfall Methodology; Iterative Methodologies; Spiral Methodology; “Agile” Methodologies; “Design for Success” Methodology; “IBM Global Services” Methodology; Double diamond’ process models. Design Process Development: Phases, Objectives, Visual outputs; Factors in managing the design process.

##### Module III : Design Brings to Business

4C’s of Design Management: Creativity, Complexity, Compromise, Choice; 3P’s of Design Management: Patience, Persistence, Persuasion; Design Mix; Design Strategy; Design and Strategic Positioning; Principles of Design Management.

##### Module IV : Design and Innovation

Meaning and Definition of innovation; Introduction to the innovation Process; Human-Centered Design & Achieving Deep Customer Understanding; Identifying Opportunity Areas: Problem Framing & Definition; Idea Generation; Concept Development; Concept Development; Implementation; Managing Innovation.

##### Module V : Developing a Corporate Approach

Perceptions of Design; Design and brand identity; User experience (UX) design; Design and Product identity; Essential features of a corporate approach to design; Key issues of Design Management; Design and corporate Identity;

#### Course Evaluation:

# MARKETING & ENTREPRENEURSHIP DEVELOPMENT

(Theory)

Course Code: IND2602

Credit Units: 01

## Course Objective:

The objective of this course is to develop conceptual understanding of marketing and acquaint the students with various aspects of entrepreneurship business.

## Course Contents:

### Module I : Introduction to Marketing

**Marketing:** Nature & Scope of Marketing, Concepts – Production, Product, Selling, Marketing & Societal marketing, Marketing environment **Market segmentation:** need, concept, nature, basis & strategies, mass marketing vs. Segmentation. **Marketing mix:** 4ps of products & 7ps of services, components & factors affecting.

### Module II : Understanding Customers

Consumer decision making process (Five step model), Factors affecting buying behaviour, Purchase behaviour, Buyer's role.

### Module III : Introduction to Services Marketing

**Services:** Introduction, Role, characteristics and classifications of services, Goods Vs. Services,; **Services marketing:** Role of marketing in services, Service marketing mix, Service marketing triangle **Service quality:** Quality and productivity, Quality gaps and their closing; **Service delivery:** Managing demand and capacity, Importance of employees, Intermediaries and customer participation in effective delivery, Channel selection **Marketing strategies for service marketing:** Segmentation, Targeting and Positioning, Differentiation, Life cycle, Pricing and Market communication

### Module IV : Entrepreneurship Development

Meaning, Definition, Concept, Evolution of Entrepreneurship, Characteristics and Skills of Entrepreneurship, Concepts of Intrapreneurship, Entrepreneur Vs. Intrapreneur, Entrepreneur Vs. Entrepreneurship, Entrepreneur Vs. Manager, Role of Entrepreneurship in Economic Development, Women Entrepreneurship: Meaning, Characteristic features, Women Entrepreneurship in India.

### Module V : Role of Government in promoting Entrepreneurship

MSME policy in India, District Industries Centers (DIC), Small Industries Service Institute (SISI), Entrepreneurship Development Institute of India (EDII), National Institute of Entrepreneurship & Small Business Development (NIESBUD), National Entrepreneurship Development Board (NEDB), Financial Support System: Forms of Financial support, Long term and Short term financial support, Sources of Financial support and Financial Institutions, Investment Institutions.

### Module VI : Project Identification

Assessment of viability, formulation, evaluation, financing, field-study and collection of information, preparation of project report, demand analysis, material balance and output methods, benefit cost analysis, discounted cash flow, internal rate of return and net present value methods.

**Course Evaluation:**

# PROFESSIONAL PRACTICE & OFFICE MANAGEMENT

(Theory)

Course Code: IND2603

Credit Units: 01

## Course Objective:

The course objective is to develop legal, technical and financial aspects of Interior Design practice and management skills for professional practice. This course provides an overview of rules and regulations in Interior Design practice and technicalities of code of conduct in professional practice.

## Course Contents:

### Module I : Role of Interior Designer in Society

Interior Design Profession as compared to other professions. Difference between profession and business; Organizations related to interior design profession. Interior Designers approach to works, ways of getting works: types of works, works partly executed by other Interior Designers. : various precautions to be taken before taking up the work, conditions of engagement between interior Designer and client: commencement of work.

### Module II : Attributes of professional practice.

Professional behavior, Ethics, Types of clients, Contracts, Tenders, Arbitration etc. as defined in terms of Interior Design field and current day context. Career opportunities, styles of interior design practice, relationship between client and professional, type of fees, process of fees negotiations, billing methods, tax liabilities, contracts – types of contracts – item rate, labour, lumpsum, cost plus percentage etc.

### Module III : Designer's Tasks

Preparation of drawings; Interior Designer's relation with other parties connected with works such as client, contractor, sub-contractors, consultants and authorities. IIND Code of professional conduct: scale of charges: units and mode of measurements, clerk of work and his duties, inspection of work, certificate of payment to contractor, bill of quantities, schedule of rates, tenders, public, limited and negotiated tender documents and allied formalities. Preliminary knowledge of Consumer protection Act and other related acts on Interior Designers.

### Module IV : Office Management

Planning and Scheduling Office Work: Office routine, work flow and office manual. Staff structure, Filing of records, Correspondence and Drawings, Maintenance of accounts, Studio Management, Meeting: Meetings with special reference to agenda, Quorum, Motions, Resolutions, Drafting and writing of minutes. Presentations in meetings,. Dealing with financial institutions; Role and functions; Types of financial institutions.

### Module V : Visiting An Interior Designer's Office(Self-study / Assignment)

Gain practical knowledge of role of consultants and coordination between different consultants on a project. A report to be prepared by each student after visiting an interior designer's office.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

## INTERIOR DESIGN STUDIO-IV (Studio-Graphics)

Course Code: IND2604

Credit Units: 02

### Course Objective:

It involves the study of user types, user behavior concepts relevant to Health Care & Hospitality interiors. Students will learn the fundamentals of the various types of working environment and how to design a functional and aesthetically.

### Course Description

In the studio, the learning process is learning by doing. The core part of this course incorporates exercises to develop manual and digital presentation skills in order to present design ideas and solutions. Every module is blended with hand on sketches as well as application of basic computer graphics. Each student has to maintain a sketchbook compulsorily. Process sketches are scanned and integrated into the final presentation by PPT. A hard copy of Design Studio Portfolio submission is compulsory.

### Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

#### Module I : Studio Project -1 : Health Care Interiors

Design Medical facilities include Medical centers, Hospitals, Clinics, and Pharmacies.

- **High volume traffic areas:** Patient waiting areas, administrative and doctors' offices, etc.
- **Medium-use areas:** Corridors, wet areas (kitchens, toilets, etc.) and chemicals.
- **Light-use areas:** Medical conference rooms. Wet areas and chemicals.
- Study, design and detailing of special acoustics and functional materials and furniture detailing.

#### Module II : Studio Project -2 : Hospitality –Lodging

Design Lodging includes transient lodging facilities of all types: Quarters for visiting personnel, as well as temporary living facilities for families arriving at or leaving a base.

- **Heavy-use areas:** Registration desks, Lobbies, Entrance foyers, Stairwells, Elevators, and corridors, Wet areas such as Laundry rooms, Snack rooms, and Rest rooms.
- **Medium-use areas:** Management and Administrative offices.
- **Light-use areas:** Bedrooms, Suites, etc.
- Study, design and detailing of various work spaces, interactions zones.

#### Module III : Studio Project -3 : Hospitality –Food Service

Design Food Service facilities: The most areas in food service facilities are considered heavy-use because they are subject to high traffic and frequent food and beverage spills.

- **Heavy-use areas:** Dining halls, Flight kitchens, Open mess facilities, Clubs, Snack bars, and Cafeterias.
- **Medium-use areas:** Management and administrative areas.
- **Light-use areas:** Special/private dining areas.

### Course Evaluation:

# COMPUTER AIDED INTERIOR DESIGN & VISUALIZATION

(Studio based Practical)

Course Code: IND2605

Credit Units: 03

## Course Objective:

The objective of this course is to provide the students an opportunity for understanding the technological implication of 3D design. This course provides the visual context of design concepts for a more effective design validation and visual communication using Autodesk 3D Max and Google Sketch up.

## Course Contents:

*(NB: Submission of Practical work record / Graphic Portfolio is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Introduction to 3D Max

Defining 3D graphics, Understanding 3D space, 3D Objects Co-ordinate systems, Modeling concepts, Spline based modeling, Mesh modeling, Parametric modeling, Working with splines, Extrude, Lathe, Bevel, Loft, Basic editing methods, Boolean.

### Module II : 3D Modeling

Polygon modeling, Furniture modeling using polygon etc.

### Module III : Introduction to Material Textures and Maps

Introduction to texturing, Standard materials and shades, Creating uniform textures, Working on sofa, Floor, Glass and metal materials, Editing UV co-ordinates.

### Module IV : Digital Lighting

Introduction to digital lighting, Light theory, Creating 3 point lighting system in 3D graphics, Exposure controls, Basic lights and photometric lights, Light effects. Cameras.

### Module V : Animation Fundamentals

Key frame animation, Animating along trajectories, Modifying animation using function curves, Understanding the basic principles of animation like weight and squash & stretch etc., Animating cameras.

### Module VI : Introduction to Google Sketch up.

- **The fundamental tools:** Lines, Rectangles, and Circles, Move, Rotate and Offset, Push, Pull and Follow Me;
- **Understanding How Sketch Up Works:** Groups vs. Components, Creating and editing Groups, Creating and editing components;
- **Textures and Materials:**Applying colors and materials, Creating materials, Exporting images;
- **Sandbox Tools:** Creating landscaping, Importing trees;
- **Importing CAD files and Real World Modeling:** Good layer management, Cleaning up CAD files, Turning 2-D into 3-D.

**Course Evaluation:**

# INTERIOR SPACE MODELING WORKSHOP-II

(Practical)

Course Code: IND2606

Credit Units: 02

## Course Objective:

This course is continuation of the Interior Space Modeling Workshop – I. This course aims to enhance the student's ability to represent their own ideas in three dimensional forms and communicate these with potential clients. During the course each student will build an archive of complete models using different materials and techniques which will lead to the realization of a project using the knowledge and skills acquired during the previous semesters.

## Course Description

Model-making is a very practical subject, in that it involves the handling of materials to produce a physical outcome. It could be taught purely from that practical standpoint. Focusing on the materials and tools needed, and the methods or techniques employed to make specific things. Generating the idea through freehand sketching is important in model making. The initial sketches are compulsory for students to pre-visualization before starting the model making. The number of freehand sketches should use and select one for further technical sketching. All models are built to a predetermined scale. As with measured drawings, the level of realism depends on the scale. It is also best practice to include a support for the model, either in the form of a single piece of board to will keep it sturdy, makes it easier to carry and view at different angle.

## Course Contents:

*(NB: Submission of Practical work record / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Detailed Modeling

*Making detailed models which includes the representation of various building elements like:*

Walls, Columns, Steps, Windows/glazing, Sunshades, Handrails using materials like Mountboard, Snowwhite board, acrylic sheets; Representing various surface finishes like brick/stone representation, stucco finish etc.; Various site elements – Contour representation, Roads/Pavements, Trees/Shrubs, Lawn, Water bodies, Street furniture, Fencing etc.

### Module II : Models of Structural Design

Making models of the various structural systems used in Interior / buildings like:

Space frames: using Match sticks, wires; Different forms of shell roofs using POP, Clay, Soap; Tensile structures using fabric.

### Module III : Buildings & Interior Space Modeling Project (Self-study / Assignment)

*Making models of the various interior spaces such as:*

- Residences
- Offices
- Retail Spaces
- Recreational Spaces
- Scaled models of furniture.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

## SEMINAR / GUEST LECTURE / WORKSHOP FOR SKILL DEVELOPMENT

Course Code: IND2633

Credit Units: 04

### Course Objective:

This course provides a research orientation to the subjects related to interior design. The objective of this course is to develop the capacity of students to undertake research of subjects related to interior design. The students have to be participated either Seminar (1) or Workshop (2) to earn the credit. Guest lecture (3) is addition to this for enhancing their knowledge by examining and analysing various aspects of design.

### 1. SEMINAR

To present seminars supported by graphical presentation and documentation of research done.

#### Major Themes for Seminar:

Building Information Modeling (BIM). / Theory of Interior space. / Interior Design language of various cultures. / Influence of Fashion in Interior designing. / Use of rural technology in interiors.

#### Evaluation Scheme:

Components	Organisation and Relevance of content	Literature Review	Bibliography	Presentation	Total
Weightage (%)	30	30	20	20	100

### 2. WORKSHOP

#### Objectives:

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. Workshop is undertaking a significant practical unit of examining and analyzing various aspects of design at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by jury of examiners comprising of the faculties.

#### Major Themes for Workshop are: -

Graphics and space transformation. / Color and light interaction to change space. / Eco-friendly furniture. / Effective visualization by using Computer graphics. / Study on textures and interior materials. / Effective model making of interior spaces.

#### Guidelines for Workshop :

*The procedure for earning credits from workshop consists of the following steps:*

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.

- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of at least 500 words about the learning outcome from the workshop.

### **Methodology**

*The methodology followed at the workshop could be based on any one or more of the following methods:*

Case Study / Group Activity. / Role Play. / Business Planning. / Quiz.

### **Evaluation Scheme:**

Components	A	AP	MCQ	Solving the case/ Assignment / Write up	Total
Weightage (%)	10	30	30	30	100

(A - Attendance; AP - Active Participation; MCQ - Multiple Choice Questions)

### **3. GUEST LECTURE**

Eminent subject experts from the field may be invited to deliver the lectures on different topics of their choice and share their experience with the students

# FURNITURE ERGONOMICS & DESIGN

(Studio based Practical)

Course Code: IND2607

Credit Units: 03

## Course Objective:

Ergonomics is an integral part of design, manufacturing, and use. This course aims a better understanding of ergonomics applied to furniture design that related end-user needs.

## Course Contents:

*(NB: Submission of Practical work record / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Anthropometric Measurements

Introduction; Percentile Humans; Anthropometric Databases; Anthropometric Resources.

### Module II : Common Workplace Postures & Motions

Standing; Sitting; Reaching; Moving; Good and Bad Zones; Repetitive Motions

### Module III : Ergonomics Applied To Furniture Design

Study of Anthropometry & Design criteria involved in the design of:

- Chairs, Tables.
- Sofa, Settee, Couch, etc.
- Cot, Bedside lockers, Wardrobes
- Cupboards, Shelves
- Bunk beds, Study table
- Display furniture

### Module IV : Universal Design Considerations

Wheelchairs; Crutches, Canes, and Walkers; Knobs, Handles, and Controls; Access Ramps and Stairs; Resources on Universal Design.

## Course Evaluation:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70
(A-Attendance; H-Home Assignment; CT-Class Test; EE-End Semester Examination)

# HISTORY OF FURNITURE DESIGN

(Studio based Theory)

Course Code: IND2608

Credit Units: 03

## Course Objective:

Furniture design has been a part of the human experience since the beginning of history. It is important to learn the history of furniture for a good furniture designing. This course helps the students to understand the glimpses of the developments of various furniture design styles through a historical timeline.

## Course Contents:

(NB: Submission of Sketch Book / Portfolio is compulsory for all Modules and will be part of the Final Course Evaluation)

- Module I** {
- Study and track the main features, developments, styles and materials of:
  - Neolithic Furniture –Assyrian Furniture – Egyptian Furniture – Greek Furniture – Roman Furniture.
  - Sketch minimum three different furniture with brief descriptions about each relevant period and style
- Module II** {
- Study and track the main features, developments, styles and materials of:
  - Medieval Furniture –Renaissance Furniture–Jacobean Furniture –Colonial Furniture – Rococo Furniture.
  - Sketch Minimum three different furniture with brief description about each relevant period and style
- Module III** {
- Study and track the main features, developments, styles and materials of:
  - Revival Furniture – Art Nouveau Furniture–Bauhaus Furniture–Art Deco Furniture – Modern Furniture.
  - Sketch Minimum three different furniture with brief description about each relevant period and style
- Module IV : Visits.**  
Visit various Historical places, Museums, Palaces, Old mansions, and Antique furniture shops, etc. Study and recognize different types of furniture. Take the photographs in different angles and make sketches. Note the historical relevance of each furniture i.e. historical events, ownerships by kings / rulers, time line, made of materials, design styles, similarity of styles in interior decoration other than furniture, etc. Conclude the study and submit in a portfolio form and presentation in PPT along with a visit report as well.
- Module V : Indian Traditional Furniture. (Self-study / Assignment)**  
Make a list of Indian traditional furniture geographical wise/ state wise accordingly. Collect the pictures of each furniture design. Make a brief description that includes historical importance, timeline, design influence from western styles if any, made of material, about social relevancy, etc. Submit the study in a portfolio form and present in PPT as well.

# FURNITURE CONSTRUCTION AND DETAILING

(Theory & Practical)

Course Code: IND2609

Credit Units: 03

## Course Objective:

The course provides a framework to analyze and design furniture forms scientifically and sensitizes the students visual perception of furniture as a single form and as a system in a given interior space.. This course aims to familiarize the students of Interior Design on materials used in furniture and its design, construction and detailing

## Course Contents:

*(NB: Submission of Practical work record / Portfolio / Sketch Book is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Introduction to Furniture

Definition, Furniture categories, exploration of the idea of furniture, Role of furniture in interior design, Various stylistic transformations. Furniture designers and movements. Analysis of furniture in terms of human values, Social conditions, Technology and design criteria.

- **Design Practice: Measured** drawing of a piece of furniture: plan, elevation and drawings on full scale.

### Module II : Functional and Formal issues in Furniture Design

Study and evaluation of popular dictums such as “Form follows function”, Form and function are one”, “God is in Details” etc. Human factors, engineering and ergonomic considerations: principles of universal design and their application in furniture design.

### Module III : The Basics of Furniture Construction & Tools

Furniture Measurements and methods; Furniture material: Timber and Plywood, Detailed construction drawings & explaining construction and material finishes, Layout and machining plans; Fabrication: Stapling, Gluing; Furniture Joinery: screw joinery, nail joinery, Mortise & Tenon joints, Dovetail joints, Dowel joints, Edge joints. Furniture Construction: Drawers, Cadenza, Dining chairs, Sofa, Settee, Cots detail. Preparation for finishing, Other construction Techniques: Injection Molding, Investment casting, Sheet metal work, Die casting, Blow molding, Vacuum - forming etc.

- **Design Practice: Visit** various furniture manufacturers. Study and absorb different manufacturing methods. Take the photographs / Video; make sketches and notes for references.

### Module IV : Seating Design & Storage Systems

*Types of seating* focus on: Functionality, Aesthetics, Style, Human factors and ergonomics, cost. *Storage Systems:* Functional analysis of storage systems, Deriving types of cabinets needed for interior spaces: Kitchen cabinets, Wardrobes Closets, Book cases, Show cases, Display systems etc. *Modular kitchens:* components, Construction, Layouts, Car case, Hardware selection, Fixing details, Finishes and Special types such as Tall units, Grain trolleys, and Carousels fold outs, etc.

- **Design Practice:** A detailed project involving the design of a small kitchen using modular components.

**Module V : Modular approach to furniture design (Self-study / Assignment)**

Study and inspire modern furniture designers such as Ward Bennet, Alvar Aalto, Owen Jones, Florence Knoll, Mies van der Rohe, George Nelson, Henri van de Velde, Hans Wegner etc. Survey & study various styles, systems and products available in the market. Design furniture, based on ergonomics, materials, working parameters and visual perception. Draw details and models along with a measure drawing, including plan elevations, sections. Make details of the same cost criteria of design & mass production of furniture forms. Make a full size prototype of the same. Submit the study in a portfolio form and present in PPT as well. The portfolio should contain evidence of each stage of the process starting from Inspiration and survey to photograph of final prototypes, including sketches and technical drawings.

# SUSTAINABLE INTERIOR DESIGN & MATERIALS

(Theory)

Course Code: IND2610

Credit Units: 03

## Course Objective:

Careful selection of environmentally sustainable building materials is the easiest way for architects to begin incorporating sustainable design principles in buildings. This course helps the students to understand the sustainable interior materials and methods.

## Course Contents:

### Module I : Bio Climatic Design Concepts

**Environmental Impacts and Sustainable Design Strategies:** Natural Resource Depletion, Energy Use, Pollution; The Designer's Role beyond Design and Construction. **The principles of Life Cycle Design;** Phases of Building Materials, Life-cycle Assessment (LCA); Life-cycle Inventory (LCI); **LCA in Practice:** EIE, BEES; **Assessments tools:** BREEAM, SBTool, LEED, Eco Profile, Promise, Green Mark of Buildings, Green Star, CASBEE. **Certification Systems:** First party, Second party and Third party; **Third-party Certification Organizations:** The Forest Stewardship Council (FSC), Green guard Environmental Institute (GEI), Green Seal, Inc., and Scientific Certification Systems (SCS); The Carpet and Rug Institute (CRI); Resilient Floor Covering Institute (RFCI).

### Module II : Sustainable Interior Materials Selection

**Criteria:** Indoor Air Quality (IAQ); Reusable or Renewable Resources; Energy Efficiency; Water Conservation. **Features:** Pollution prevention; waste reduction; recycled content; embodied energy; Natural materials; Minimal construction waste; Locally produced materials; Non- or less-toxic materials; Durable materials; Rapidly Renewable Materials; Low Maintenance; Reusability; Recyclability; Biodegradability; **Harmful chemicals that can affect air quality in interior spaces:** Volatile Organic Compounds (VOCs); Brominated flame retardants, Halogenated plastics, Bisphenol A, Heavy metals, Toxic solvents in finishes and sealants, Formaldehyde.

### Module III : Key Sustainable Interior Materials and Methods

**Bricks & Blocks:** Recycled concrete bricks, Adobe bricks, Stabilized earth blocks, Compressed sand bricks, Hydra form bricks, Fly Ash Bricks, Wool Bricks; Wood Materials: **Engineered wood:** Plywood, Oriented strand board, Glued laminated timber (glulam), Laminated veneer lumber, Cross-Laminated Timber, Parallel strand lumber, Finger-jointed lumber, I-joists and wood I-beams, Roof trusses and floor trusses, Certified Wood; **Site and Landscaping:** Landscape pavers made from recycled plastic, Recycled asphalt and bitumen, Expanded polystyrene (EPS) foam; **Foundations:** rigid plastic foam, Concrete blocks with foam inserts; **Flooring:** Bamboo flooring, Cork flooring, Eco-friendly linoleum flooring; **Structural Framing:** Wood and steel open-web joist; **Roofing:** Solar Tiles Roofing, Sustainable Concrete, Fiber-resin composition roofing tiles, integrated sheathing and insulation, pre-tapered for flat roofs, Weatherproof shingles manufactured from recycled aluminum alloys; **Structural Envelopes:** Super-insulated stress-skin panels; Earth bag construction; **Insulation:** Homasote fiberboard, Cotton insulation, Hemp based products, Blown insulation; **Interior Finishes:** wallpapers, recycled gypsum board or wallboard, Natural Fiber

Reinforced Plastics, Casein paint, Sisal wall coverings, recycled burlap or virgin jute fiber carpet, recycled wool carpet, recycled ground-up tire rubber; **Plumbing:** Low flow shower heads, Solar hot water, Vacuum-assisted toilets; **Ventilation:** Heat-recovery ventilator, Triple-Glazed [(low-emissivity (low-E) glass] Windows.

# SUSTAINABLE INTERIOR RENOVATION

(Theory)

Course Code: IND2611

Credit Units: 03

## Course Objective:

Sustainable renovation needs special skills for diagnosis, conception, for using intelligent or new techniques, and then ensuring maintenance. This course provides an insight to the students about the need and importance as well as various concepts of sustainable renovation.

## Course Contents:

### Module I : Introduction to Sustainable Renovation.

**Sustainable Renovation:** Need, Meaning & Definition, Priorities for the renovation of housing, Definition of sustainable architecture, The inception of bioclimatic architecture, Typology of the existing housing, Constructive mode and materials, Renovation strategies.

### Module II : The Comfort of Life

**Increase the quality of the outdoor spaces:** Favour social interactions, Favour soft mobility, Favour and reintroduce biodiversity; **Increase the quality of indoor air:** Limiting sources of indoor pollution, Optimizing the ventilation system, **Acoustic comfort:** Basic notions, Principles of acoustic insulation and correction, Optimizing the Acoustic comfort.

### Module III : Energy Consumption.

**Increase the thermal performances of housing:** Optimizing the external walls performances, Optimizing the shape, : Additional insulation in housing renovation, Improving the air tightness, Reducing the thermal bridges, Thermal inertia in housing renovation, Optimizing the solar protections, : Natural night cooling, Optimizing the window conception, 'Passivhaus' standard in housing renovation; **Reduce fossil energies consumption:** Optimizing the heating system, Optimizing domestic hot water, : Heat pump for heating production, Hot water production by solar energy, Optimizing the lighting system, Renewable energies for generating electricity, Heat recovery on ventilation system, Air pre-heating by air ground exchanger.

### Module IV : Water Consumption.

Reduce the tap water consumption: Rational use of tap water, Recovery and use of rainwater; **Increase the water resources:** Water management on the parcel, Water recycling by plants, Water recycling in urban area.

### Module V : Reduce production of waste & Consumption of Territory Resources

**Reduce construction and demolition waste:** Preventive measures to reduce waste, Waste management on building site, **Reduce domestic waste:** Preventive measures to reduce domestic waste; **Reduce consumption of territory and resources:** Embodied energy consumption, Construction materials.

# ADAPTIVE REUSE AND RETROFIT

(Theory)

Course Code: IND2612

Credit Units: 03

## Course Objective:

The objective of this course is to give a comprehensive overview on how existing buildings can be adapted and retrofitted to function sustainably.

## Course Contents:

### Module I : Sustainable Retrofit for Existing Building

Retrofitting options for existing buildings; Structural retrofit; Façade; Services; Interior retrofit; Performance analysis of existing buildings; Physical audits; Building Simulation; Metering and tracking options; Analysis the building's current performance; Decision influencers for retrofit; Economic, social and environmental issues.

### Module II : Adaptive Reuse of old Building

Need for adaptive reuse; Issues to be explored in building adaption; Economic, social, environmental, and assessment models for adaptive reuse; Case studies of buildings with adaptive reuse.

### Module III : Technologies for Energy Efficiency In Existing Buildings

Improving energy efficiency in existing buildings; Facade improvements; HVAC improvements; Indoor Environment Improvements; Monitoring the performance of retrofits; Case studies on energy efficiency improvements in existing buildings.

### Module IV : Sustainable Conservation of Heritage Structures

Conservation of heritage structures; Sustainability in heritage structures; Adaptive reuse of heritage structures; Issues in adapting a heritage structure; Use of sustainable conservation techniques; Improving the energy performance of heritage structures; Case studies of sustainable conservation in heritage structures.

# PERFORMANCE SPACE DESIGN

(Studio based Theory)

Course Code: IND2613

Credit Units: 03

## Course Objective:

This course provides the opportunity for the students to develop their own individual design in relation to Performative Spaces like theatre and performance design, stage and set design, production design for film and television through independent and collaborative project work.

## Course Contents:

*(NB: Submission of Practical work record / Graphic Portfolio is compulsory for all Modules and will be part of the Final Course Evaluation)*

### Module I : Performance Space Design

**Introduction:** Scenic Design , The nature of theatre design, Theatre forms, The goals of theatre design, The house and front of house, Scenic design, Considerations for the Scenic Designer: Mood and Spirit (production concept) **Functional diversity of Performance Space:** Movies, Conferences/ Seminar Auditorium, Live performance event space, Hybrid Performance Space etc.

### Module II : Set Design and Stage Design Concept

**Theatre Terms:** Arena stage, Box set, Curtain set, Cyclorama, Drops, Flats, Minimal set, Permanent set, Prism set, Proscenium stage, Scrim, Set pieces, Teaser, Thrust stage, Unit set; **Stage Elements:** Act curtain, Apron acting, Back wall, Battens, Cyclorama or Cyc, Flies, Fly gallery, Gridiron or grid, Ground cloth, Leg, Pin rail, Proscenium arch, Tormentors, Trap, Wings; **The Design and Setting:** Provide adequate space for movement, Communicate the time and place, provide the audience with the mood and style of the play, Technically usable and safe.

### Module III : Functional Area Descriptions:

**Site and Building Exteriors:** Public Scale, Parking, Accessibility for disabled, marquee, Exterior Design and Materials, etc.; **Performance Space:** Ceiling configuration and floor plans, Stage Specifications, Back stage and artistic support areas, Theatrical lighting system, Architectural lightning system, Audio- Video systems, Acoustic Canopies and Orchestra shells, Orchestra Pits and Pit lifts, Special show related systems for purpose-built facilities, Sight lines, Acoustics, Curtains, Changing rooms, Makeup rooms, Toilet rooms, General storage, Production and Pre- Production areas, Receiving areas, Ceiling configuration etc.; **Audience Environment:** Ceiling configuration and floor plans, Seating and Seat Spacing plans including sightlines to the stage, Acoustical canopies; Lobby lay out, Box office, Toilet rooms, Ticket Sales Areas, Rest rooms, Managers office, , Exit requirements, Shop spaces etc.

### Module IV : Visualization of Scenic Design

**Visual Creation:** Principles of layout for creating effective visual signage and explore the unique problems, technique, theory, and approaches of signage in film, theatre, and other forms of mediated exhibition; Introduction to the design applications for building signage; **Visual Presentation:** Setting the Mood Sketches and Renderings, Photomontage/Collage, Computer Generated visualization, Scale models; **Designer's**

**Plans:** Ground Plan, Sectional, Center-Line Section, Front Elevations, Detail Drawings, Sight-line Drawings.

**Module V : Advanced or Specialized Design Practice (Self-study / Assignment)**

Select a thematic design concept suitable for any Performance. Develop a new type of performance space; an innovative space for the audience and performer to interact according to its function (E.g. Live performance event space, Film, Theater, Auditorium, TV/ Film Shooting floor, etc.). Apply the design ideas to a project and context in order to create excellent and relevant interior design outcomes. Consider audience perception of space. Use AutoCAD/ Revit Architecture/ Google sketch up/ 3DS Max etc. for the final visualization.

**Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

# PUBLIC ART

(Studio based Theory)

Course Code: IND2614

Credit Units: 03

## Course Objective:

This course approaches public art as an important part of an ongoing dialogue about cultural values, commerce, politics, and public life. This course aims to enhance the designing and artistic abilities towards Public Art either Indoor or outdoor.

## Course Contents:

*(NB: Submission of Practical work record / Graphic Portfolio is compulsory for Module IV & V that will be part of the Final Course Evaluation)*

### Module I : Introduction to Public Art

**The Concept Of Public Art:** Definition, The Social Dimension, **Types of Public Art:** Stand Alone, Applied, Integrated, Industrial, Heritage / Memorial, Interactive, Multimedia, Temporary, Ephemeral, Indigenous Art, Community Art; The Role and Benefits of Public Art; **Purpose of Public Art:** Functional, Decorative, Iconic, Integrated, Site specific, Interpretive, Commemorative, Temporary; Locations & Sites For Public Art. **Evolution of Public Art:** Renaissance Public Art (c.1400-1600), Baroque Public Art (c.1600-1700), Public Art 1700-1900, Public Art During the 20th Century: Socialist Realism, Degenerate Art, Fresco painting, Land Art, Skyscraper Architecture, Graffiti, Contemporary Public Art, Environmental public art.

### Module II : Public Art Strategy & Principles

**Strategy Objectives:** To inspire different locations, To enhance the design and function of the public realm, To enhance the appearance, Character and value of buildings, To support professional art practice, To provide a level of guidance to artwork design, To provide direction on the appropriateness, To guide the acquisition and location for artworks, **Principle Objectives:** Place Making, Site Specific, Scale, Universal Access, Attractors, Interaction, Management; **Key Values of Public Art:** Social, Environmental, Economic and Aesthetic values; **Public Art Project Types:** Artist Made Building Parts, Integrated Artworks, Design Teams.

### Module III : Developing a Concept for Public Art

**Concept Development:** Research-Developing a Theme , Public Art Stakeholders; **Conceptual Design Report:** Artist Statement, Vision, Description of concept & artwork, Alignment of concept, Project goals, Location of proposed artwork, Placement plan, Suitability, Design benefits includes safety, structural integrity and accessibility, Dimensions- including an explanation of suitability of scale, Types & form of materials, Durability and performance, Anticipated maintenance, Life-cycle cost, Proposed fabrication, Timelines, Budget, Implementation schedule; **Visual Presentation of Concept:** Renderings, Boards, Computer-generated 3D visualization, Marquette and models.

### Module IV : Case Study: Public Art in India. (Self-study / Assignment)

Make a list of famous public arts in India. Collect the images and brief of each one of them. Choose any appropriate three examples. Analyze its design and study what type

of contribution that given in the terms of Social, Environmental, Economic and Aesthetic.

#### **Module V : Public Art Project**

Consider a suitable place or circumstances in indoor or outdoor and select a theme. The selected theme should be innovative and convey some messages to the public. For example environmental concepts, commercial- advertisements, Big art, Contemporary, Modern-traditional-cultural fusions etc. Go through the previous modules, especially Module –IV. Prepare a detailed project from concept development to the final model. Make a full scale model if possible that can be considered as a public art. This activity can be a group project and during class students will give 10 minute presentations about their public art project. The presentations should include: A description of the Project Report, Images of the project stages and final object.

#### **Course Evaluation:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>
(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# PUBLIC SPACE DESIGN - CONTEXTUAL STUDIES

(Studio)

Course Code: IND2615

Credit Units: 03

## Course Objective:

This course aims to impart knowledge to students on Study of interior design with reference to the context of the building typology and its environs.

## Course Contents:

*(NB: Submission of Practical work record / Graphic Portfolio is compulsory for Module V that will be part of the Final Course Evaluation)*

### Module I : Entertainment Spaces

Study of interiors for entertainment buildings such as clubs, multiplex and amusement parks – schemes for video games parlor, food court areas and exclusive indoor game areas of clubs.

### Module II : Educational Spaces

Study of interiors for class rooms, seminar halls and AV halls – schemes for library, smart class rooms and discussion areas.

### Module III : Sporting Spaces

Study of interior requirements for gymnasium, indoor stadium and aquatic complex – schemes for interiors of stadium with focus on lighting requirements and visibility.

### Module IV : Commercial Spaces

Study of interiors in saloons, pubs, discotheque and banks, etc. - schemes for the same.

### Module V : Transportation Spaces

Study of interiors for airports, MRTS, railway stations and bus terminals – schemes for the same

## Course Evaluation:

## Syllabus - Seventh Semester

### ADVANCED INTERIOR DESIGN STUDIO

(Studio)

Course Code: IND2701

Credit Units: 02

#### Course Objective:

This studio course aims to impart knowledge to students on modular construction, industrialized construction and design of prefabricated elements and construction methods.

#### Course Contents:

*(NB: Submission of Practical work record / Graphic Portfolio is compulsory for all Modules will be part of the Final Course Evaluation)*

#### Module I : Introduction to Prefabrication

Prefabrication: Meaning and definition; Types of foundation; Modular co-ordination; Prefabrication systems, Structural schemes; Design considerations; Economy of prefabrication; Prefabrication of load-carrying members; Disuniting of structures; Structural behavior of pre-cast structures; Advantages and Disadvantages of Prefabrication; Prefab Vs. Conventional Structures

#### Module II : Prefabricated Components: Materials

Plywood, block board, particle board, hard board, laminates, MDF, HDF, HDPE wood wool, sound insulating materials, Bituminous products, Structural Insulated Panels, Insulating Concrete Forms, Color Coated Galvalume Sheets, Zinalume Steel, ColorbondSteel; PUF Panel, Sandwich Panel, Aerocon panels, FRP Corrugated Sheets.

#### Module III : Prefabricated Components: Construction

Detail of wardrobes, Modular kitchens, Cabinet shelves and show cases for residence, Offices, Book stores and Commercial buildings, Work stations. Internal finishes to wall and ceiling using plywood, PVC, Marble, Granite, Cement, Fiber board, Plaster of Paris, Particle board, Wood wool, Straw and any other materials introduced in the market. Partition systems, False ceiling systems. Introduction to prefabrication and post tensioning of building components. Advantages and relevance in the Indian context.

#### Module IV : Prefabricated Design Principles

Disuniting of structures- Design of cross section based on efficiency of material used – Problems in design because of joint flexibility – Allowance for joint deformation.

#### Module V : Interior Prefabrication Design (Self-study / Assignment)

Consider the end use/ purpose and design the following: Portable Cabins, Prefab House, Prefab Row Housing, Prefabricated Storage House, Prefab Platform Shelter, etc.

**Course Evaluation:**

# DESIGN RESEARCH METHODS & PRESENTATION TECHNIQUES

(Theory)

Course Code: IND2702

Credit Units: 03

## Course Objective:

The intention of this course is to introduce and initiate research thinking and to initiate the dissertation project. This course equips the student with adequate architectural design research methods for the realization of dissertation concept.

## Course Contents:

### Module I : Research

Introduction, Definition, Need, Aims, Importance, Scope, Classifications, Types, Characteristics, and Research Process.

### Module II : Research Design

Meaning, Need, Types, Factors Affecting, Basic Purpose, and Principles.

### Module III : Data Collection

Meaning, Need, Main Terminologies Used In Data Collection Population, Sample, Parameter, Variables, Etc., Types Of Data, Methods, Sources Of Various Types Of Data, Methods Of Data Collection: Observation Method, Interview Method, Data Collection Through Questionnaires, Collection Of Data Through Schedules, Case Study.

### Module IV : Data Analysis

Meaning, Need, Classification; *Only define and understand the Meaning of:* Tabulation, Array, Range, Frequency Distribution, Presentation of Data-Graphic, Histogram, Polygon, Ogive, Measurement of central tendency- Mean, Mode, Median, Dispersion / Skewness, Correlation and Regression Analysis of two variables, Characteristics ,Types, Values of , Formulae for calculation etc.

### Module V : Interpretation

Meaning, Definition, Significance, Techniques. Report Writing: Meaning, Significance, Steps, Types, Findings, Suggestions, Conclusion.

### Module VI : Research Procedures.

Recognize philosophical implications; Formalize research: Identifying and defining the problem- Questions need to be documented in relation to such issues in interior design as: time, cost, safety, materials, processes, function, appearance, and ergonomics, etc.; Conduct literature reviews; Select appropriate research methodology; Understanding of research design parameters; Procedures to collect, analyze, interpret the data; Present information through a report.

### Module VII : Design phases.

Research and produce Design Specifications; Sketch ideas and concepts; Develop detailed design; Produce a digital design presentation file for the final design; Make an oral presentation on their design.

### Module VIII : Research Presentation Techniques: Interrelated components.

1. Research Report Presentation: Dissertation components, Writing styles appropriate

- to research design, Style manuals, & Ethical considerations.
2. Design Presentation: Design Journal, Digital Design Presentation; Oral Presentation.

**Course Evaluation:**

# **INTERIOR DESIGN - DISSERTATION**

## **(Research)**

**Course Code: IND2737**

**Credit Units: 06**

### **Training Objective:**

The Interior Design Dissertation is one of the components of Interior Design Project. The core idea behind this course is to develop research aptitude of students and motivate students to involve in individual research and methodology. This course aims to train them in handling research projects independently to further their intellectual and personal development in the chosen field. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

### **SESSIONS –I : PRE- DISSERTATION SEMINAR**

The Pre- Dissertation Seminar provides students with a framework to understand some emerging concepts in Interior and projects of design complexity and equip the student with adequate Interior design research methods for the realization of thesis concept. During the Pre-Thesis Seminar, the subject of the thesis is developed and the project articulated. The Pre-Thesis Seminar should be conducted before the research work start. It is advised to conduct group-wise for the deep and healthy discussions.

#### **Guidelines:**

- Each student should submit minimum of 2 topics related to the research.
- Students are encouraged to pre-consult faculties in the department to choose and finalized their research topic.
- Each faculty can guide minimum of 3 students, depends the availability of facilities and no. of students in the class.
- The students should present their research topics / areas in the Pre-Thesis Seminar.
- A panel of faculty members has to judge the students' presentation and feasibility of research in the proposed topics.
- The individual faculty members of the panel can be selected the student with their preliminary choice of topic for further guidance through this process.

#### **Points to be covered:**

- Clear understanding of difference between design thesis and design studio.
- Selection of topics for Interior design thesis.
- Dissertation topics based on building typologies, Preparation of synopsis, Methodology of design.
- Emerging concepts in interiors due changes in social, economic, technological variables.
- Review of design projects related to real world instances and relevant to community at large.
- Review of projects of design complexity, involving themes, sub themes and interior expression.
- Research in Interior design: Tools and Methods required handling a Dissertation project.
- Scientific methods of research with special emphasis on interior design research methods.
- Interior enquiry visual, observations, questionnaire formats of enquiry, literature Review and case studies.

### **SESSIONS -II : DISSERTATION REPORT WRITING**

#### **Points to be considered:**

- Suitability of the topic.
- Relevance of the topic.
- Time available at the disposal & Feasibility of data collection within the given time limit.

- Challenges involved in the data collection (time & cost, possibility of getting responses, etc.)

**Guidelines:**

- The research problem: what is a research problem? How to raise the problem? How to state the problem?
- Spotting the research problem from the inconsistencies and contradictions that one observes in life.
- Library search for thesis and dissertations.
- Topic defense: Final selection of the topic most preferred by student.
- Writing the thesis using the American Psychological Association (APA) style.
- Defense of the chosen topic.
- Writing the bibliography of the proposed thesis in the APA style.
- Formation of dissertation Proposal / Synopsys.
- The parts of the dissertation proposal: Chapter and its sections
- Writing Chapter 1. The Introduction / Research background
- Writing Chapter 2. The Review of Related Literature
- Writing Chapter 3. The Conceptual Framework
- Writing Chapter 4. Research Methodology
- Writing Chapter 5. Data Analysis & Interpretations.
- Writing Chapter 6. Summary, Conclusions, Discussion, and Recommendations Results, conclusion, etc.
- Writing the other parts of the dissertation.
- Completing the dissertation& Final presentation.

**Note:** – The relevant Sketches, Technical drawings, Photograph of scale models / Prototypes, etc. can be included in the report. (PTO....)

**SESSIONS - : ORGANIZATION OF THE DISSERTATION REPORT** (....continuation)  
**III**

- Front Page
- Bonafide Certificate cum Report Evaluation (From Faculty Guide & Internal and External Examiner)
- Declaration
- Acknowledgement
- Abstract
- Table of Contents
- List of Tables (optional)
- List of Figures (optional)
- Body Structure of the Dissertation
  - Chapter 1. The Introduction / Research background
  - Chapter 2. The Review of Related Literature
  - Chapter 3. The Conceptual Framework
  - Chapter 4. Research Methodology
  - Chapter 5. Data Analysis & Interpretations.
  - Chapter 6. Results, Discussion, Conclusions and Recommendations, etc.
- Bibliography
- Appendix

**SESSIONS - : PRESENTATION & EVALUATION**  
**IV**

**Evaluation Method for Dissertation Report:****Chapter Scheme for the Training Report.****Marks Distribution.**

Overall Report Format / Layout	: 05
Chapter 1. The Introduction / Research background	: 10
Chapter 2 The Review of Related Literature	: 20
Chapter 3 The Conceptual Framework	: 15
Chapter 4, 5 Research Methodology, Data Analysis & Interpretations.	: 10
Chapter 6. Results, Discussion, Conclusions and Recommendations.	: 10
Total	: 70

**Report Format and Layout :**

A4 size has to be used with a good quality paper (minimum 80 gsm). Margins: 1.5 inches on the left-hand side, about 0.75 inches at right-hand side (the outer edge); and 1 inch at the top and bottom of the page. The report has to be written in font Times New Roman, 12 points with 1.5 lines spaced. Typescript should appear on one side only. Footnotes, quotations, references and photographic captions may be single spaced. Where appropriate, these should contain lists giving the locations of figures and illustrations. The font size of Chapter title: 20 points with bold, Heading: 14 with bold / sub-headings: 12 with bold. If applicable footnotes be given on the same page where reference is quoted and the footnote size to be used 10 points. Title page/ front page, certificate and declaration type style and formats are as per the University / Department standards. The report should comprise of a minimum of 70 pages and has to be submitted in three copies.

**Guidelines for Evaluation:**

- Each of the students has to undertake a project individually under the supervision of a faculty.
- Final Report Dissertation should minimum 10 working days before the scheduled date of presentation.
- The student has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- The late submission doesn't consider for the evaluation.
- Without prior approval from supervisor of final Dissertation Report will not be considered for the evaluation.
- Uncompleted / unorganized reports does not consider for the evaluation.
- Seminar presentation with 'Power Point' is compulsory.
- Language of Project Report and Viva-Voce Examination should be in English.
- Failure to submit the Dissertation Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination.
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by internal expert and external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Evaluation Scheme**

Components	Project Report	Viva-Voce	Presentation	Total
Weightage (%)	70	20	10	100

## SEMINAR

**Course Code: IND2733**

**Credit Units: 03**

### **Course Objective:**

The objective of the seminar is to judge the understanding as well as application of the knowledge gained by the students through their research work for the dissertation. The Seminar provides the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of interior design and its application at a level commensurate with the learning outcomes of the various courses taken up them in the on-going semester.

### **Course description:**

A seminar is primarily a record of intelligent reading in several sources on a particular subject followed by a presentation. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. Seminars enable open discussion between students and the subject experts. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face is recommended. Students are encouraged to test their knowledge and to listen to other's points of view, thus enabling their critical abilities to develop. Students should prepare well prior to their research presentation.

### **Guidelines:**

- The Seminar will be related to the contemporary issue and the topic will be given by the department.
- The presentation of the Seminar is scheduled to be held before the commencement of Semester examinations.
- The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review.
- The Bibliography shall form an important part of the paper.
- Examples of a few broad areas for Seminar (List is indicative, not exhaustive)
- Viva-voce by a jury consisting of external and internal examiner to be appointed by the Department / University.
- Failure to appear the seminar presentation & Viva-voce Examination will be treated as "Absent" in the Final Examination.

### **Major Themes for Seminar:**

- Building Information Systems.
- Ethics and Social Responsibility in interior designing
- Emotional and physical impacts of residential lighting.
- Identification of various lighting styles.
- Popular trends in fixtures.
- Selection of kid-friendly surfaces and finishes for kids' rooms.
- Product knowledge to select the right paint

### **Guidelines for Evaluation:**

- Seminar presentation with 'Power Point' is compulsory.
- Language of Project Report and Viva-Voce Examination should be in English.

- Failure to submit the Seminar Report or failure to appear at the Viva-voce Examination will be treated as “Absent” in the Examination.
- No marks will be allotted on the Seminar Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Seminar Report
- Evaluation of the Seminar to be done jointly by internal expert and external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

# **INTERIOR DESIGN PORTFOLIO DEVELOPMENT**

## **(Studio-Graphics)**

**Course Code: IND2736**

**Credit Units: 04**

### **Course Objective:**

The portfolio submission is a mandatory component of the graduation process for the B. Des (ID) program. This course is intensive visualization skill based course that requires a lot of time and commitment. This course aims to develop the student's ability to communicate their ideas, thoughts and feelings about the field of interior design in a visual form.

### **Course description:**

The Design Portfolio is not simply a collection of your work. Rather, it is a personal statement of creative ability and design thinking. The portfolio is a self-presentation tool that creatively communicates the students' design outlook and level of development through a variety of media and skill sets. The portfolio should include a selection of design works and at least one example of the development of design work in the area of interior design. The portfolio submits for consideration must clearly indicate students' potential for graduate study to the reviewers. Computer access is strongly recommended for this course, especially to visualization part.

\

Please note, there is no typical model of a successful portfolio. Students remember that the reviewer is curious to see their best work and will make a decision based on the creativity display. It is always better to edit the work by presenting each project in a clear, concise, and legible manner before include into the portfolio. Also, do not include too many sketches and images. Students need to think of the progression of their work; show how each project builds on another or stand-alone projects that show their diverse talents. There is no minimum or maximum number of required pages, but the content counted on the basis of a number of projects available in the portfolio. Minimum 7 graphic projects and 1 Standalone project (compulsory) are required. If a student's original work is done on a larger format, scan / digital-photo it and reduces it to the requested size format. A table of contents should be included.

### **Originality and Integrity of Portfolio**

Simply copying an image violates copyright law, is unethical, and constitutes plagiarism. Students are encouraged to create art and design from their imaginations, experiences and from direct observation of the world around them. It has make sure that all work should be the student's own.

In case students who make use of borrowed images, such as photographs in magazines, books or from the internet need to demonstrate a creativity and sophistication of approach that goes beyond mere copying. Students must show substantial and significant development that surpasses duplication.

## PORTFOLIO DEVELOPMENT - GUIDELINES

### I. Portfolio Format:

Students should submit their portfolio in two ways, electronic format and hard copy (paper format). The specifications are given below for each format.

**Electronic Format:** Use pdf. files with a maximum resolution of 300 dpi submitted on a CD-ROM.

#### Hard copy format:

Size	:	A3 / 11" × 17" Size is preferred.
Layout	:	Portrait or Landscape with removable page inserts.
Portfolio display case	:	Vinyl Back Ring Binder with transparent removable file storage folder.

**Note:** Premium quality paper should use to print out of computer generated images. Good quality Cartridge sheets need to use for illustrations and sketching. The use of wood, metal, glass, or plastic in hard copy portfolios is NOT acceptable.

### II. Portfolio Preparation

#### Things to consider:

1. Composition - Placement or arrangement of elements in a work
2. Drawing - Demonstration of line weights, mark-making, proportion and medium
3. Design - Overall unity achieved by combining elements of art and principles of design.
4. Value - Relative darkness or lightness of a color
5. Spatial perception - Understanding of the spatial relationships of objects, and foreground, middle and background
6. Technique - Skillfulness in the use of fundamental methods and media
7. Color perception - General sensitivity to color and sophistication in its application
8. Originality - Capacity to think independently and transform the predictable; the quality of being new and original
9. Conceptual awareness - Expression of a clear idea, effective use of materials & processes to strengthen the concept
10. Aesthetic awareness - Guiding principle in matters of artistic beauty and taste (PTO....)

### III. Portfolio Organization:

#### 1. Portfolio Title Page

This is the starting page of an interior design portfolio contains a brief profile of the student that includes: Name & Photograph; Registration Number; Program Name, Institution Name; Contact Address; Date of Submission; Declaration of ownership, etc.

#### 2. Table of Contents

#### 3. Bonafide Certificate cum Portfolio Evaluation (From Faculty Guide & Internal and External Examiner)

#### 4. Portfolio Work Contents

All the works included in the portfolio should be with the prior approval from the concerned faculty only. The organization of portfolio work can be segmented into 3 Parts:

## **Part-1 : Project (Standalone projects - that is presented from concept to completion)**

This is the first part, which is integrated to dissertation project. The students have to convert the research findings into various Interior design ideas and concepts as part of the application process. These design ideas and concepts need to visually narrate and demonstrates as student's creative work and process in the form of a portfolio. This part must include:

- **Highlight of research:** Title, Scope and significance of study, Objective of study, Findings within one page.
- **Design work Boards:** Statement of design work (Design Brief), Mood board and Story board, Architectural Floor Plan, Finish Schedule and Color Legend, Finish Floor Plan, Elevations, Sections, and Details, Miscellaneous Drawings, Furniture Floor Plan, Installation Plans, Furnishings Specifications, Furnishings Cost Estimates, Furnishings Order Form, Specification sheets, Cost sheets etc.

## **Part-2 : Graphics (Projects builds on another)**

The second part is mainly for to highlight what the students learned from the overall graduation studies. The students have to cover the major subject modules from the past semesters and visualize. It is not necessary to rework the entire modules. They can include the best works from their past assignment collections. But it is compulsory to consider each major area what they learned. Those who are lacking the sufficient collection of work, they may need to reproduce. The collection has to be presented as follows:

### **• Design Skills:**

*The design specialties most desirable to show as the following order of preferences:*

Office/Corporate; Residential/kitchen & Bath; Hospitality Restaurant; Health care; Commercial Spaces and Interior design specializations.

*All technical design skills that can be applied in a variety of building environments as above include:*

- Freehand drawing of an interior space to include an architectural element (2D)
- Freehand drawing of an interior space to include an architectural element (3D)
- Freehand drawing of a collection of items / furniture. (2D)
- Freehand drawing of a collection of items / furniture. (3D)
- Design work including pieces that student designed at class or on your own.
- Interior visualizations by computer generated- 3D S Max, Sketch up, etc.
- Photographs of 3D Objects, Models, Prototypes etc. that student designed and created.
- Architectural drafting by hand.
- Architectural drafting by computer generated- Auto CAD.
- Any other work student feels may support their application to interior design includes their specializations.

### **• Art Skills**

*All art skills that can be applied in a variety of medias include:*

- Freehand drawings.
- Artwork demonstrating use of colour by rendering with different colour media.

- 2D and 3D Drawings, Sketches, Posters, Graphics, Mural etc. (Manual)
- 2D and 3D Drawings, Sketches, Posters, Graphics, Mural etc. (Computer generated)
- Posters that explaining Typography and Calligraphy skills.
- Mood boards or Theme boards, Story boards that explaining Collage and Photomontage skills.
- Theme based Digital Photographs that explaining Photographic skill
- Photographs of Craft work that explaining Craft skill.

**Part-3 : Written Content**

The third part is to demonstrate students writing style and quality. The good hand written essay will be encouraged and gives the chance of more weightage. A 250 – 500 word essay discussing student's perspective of the Interior Design industry and why they are interested in Interior Design is essential.

**IV. Portfolio Evaluation:**

Strong presentation shows work in its best light and indicates students' ability to communicate in an effective manner.

*The following criteria use to assess portfolio:*

- Problem Solving & Creative Skills
- Drawing & Visual Skills
- Digital Literacy & Computer Skills
- Communication Skills
- Development of ideas - evidence of how you think
- An interest in contemporary interior design and the built environment.
- Experimental approach in your 3D work to handling materials in unusual combinations.
- Spatial awareness and an ability to think about interior design built environment.

***Procedure for evaluation:***

- Submission of priory approved portfolio hard copy.
- Make a presentation of their portfolio work (soft copy) in front of the examiners.
- Viva-voce
- The Portfolios will be reviewed by a jury consisting of external and internal examiner to be appointed by the Department / University.
- The jury will evaluate the soft copy presentation as well as a hard copy of portfolio.

**Course Evaluation:**

Components	Creative skill	Design Research	Presentation	Total
Weightage (%)	40	40	20	100

## Syllabus - Eighth Semester

### TRAINING & ONSITE LEARNING

(Practical Industrial Training)

Course Code: IND2837

Credit Units: 16

#### Training Objective:

This is an industrial training session, which provides the opportunity to learn and work within a professional environment with practicing interior designers. The basic objective of training is to provide first hand practical exposure of the professional functioning of Interior Design industry and to acquaint students with the culture of corporate. The training will also provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus, this training is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach. Students can be undertaken their practical training in India or abroad.

#### Training Contents:

(NB: Submission of Training Report will be part of the Final Training Evaluation)

SESSIONS – : TRAINING.

I

#### General Guidelines:

Every student of under graduate courses will be required to undergo a practical training in a interior design organization approved by the Institute for Minimum of '90 calendar days'. The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific project to the candidate, which will be completed by him / her during the period of training. The work done by the candidate during the training period shall be submitted in the form of a report as per the guidelines provided by the Department.

#### Attitude:

- A member of the faculty will supervise the candidates during their Training along with a supervisor from Industry.
- Students need to aware of work environment and constantly look for opportunities to learn more about interior design.
- An internship is a privilege - the firm is not receiving payment for the hours they spend to train the student.
- It is student responsibility to provide value to them (not necessarily the other way around).
- Students need to take responsibility for making training as informative as can.
- Students need to document what they observed, ask lots of questions and show initiative.
- Training and work should be creative, exciting, noteworthy and detailed.

#### Progress Report:

- Students have to compulsorily submit a summary report of their progress once in every two week undersigned by the industrial supervisor.

**Attendance:**

- Minimum of '90 calendar days' of training is compulsory for students as a 'full-time trainee'. Daily attendance is compulsory and to be marked daily and duly checked and signed by the industrial and faculty supervisor.
- Those who are failure to complete the training with minimum of 90 days will not be considered for final examination.

**The student will be required to repeat the training when:**

- (i) The report from the employer is not satisfactory.
- (ii) The attendance in the employer office is less than 70% of the number of days required for training.

**SESSIONS - : TRAINING REPORT EVALUATION AND PRESENTATION.****II**

The candidates will prepare a comprehensive Report. The Report and the certificate from the organization should be attested by the organization where the candidate did the Internship and the same will be submitted to the faculty for evaluation.

**Guidelines for Writing an Internship Report**

The Industrial Training Report should contain the items as suggested below and is to be presented in the manner and order listed. Students are advised to download the Microsoft Word template of the Industrial Training Report from the Industrial Training website and use the template to prepare the report.

**Contents of Training Report:**

1. Front Cover (Title Page)
2. Industrial Training Certificate (From Organization)
3. Declaration
4. Acknowledgements
5. Bonafide Certificate cum Report Evaluation (From Faculty Guide & Internal and External Examiner)
6. Abstract
7. Table of Contents
  - List of Tables (optional)
  - List of Figures (optional)
8. Body of the Industrial Training Report
  - Introduction/Learning Outcome.
  - Detail of Working Experience: Description of Tasks & Application of Theory and Soft Skills
  - Conclusion and Recommendations.
9. References
  - Citation in the text (if applicable)
10. Appendices
  - Summary of Daily Records, etc.

***Evaluation Method for Training Report:*****Chapter Scheme for the Training Report.****Marks Distribution.**

Overall Report Format / Layout	: 05Marks
Chapter I: Introduction // Learning Outcome.	: 20marks
Chapter II: Detail of Working Experience	: 30 marks
Chapter III: Conclusion and Recommendations	: 15 marks
Total	: 70 Marks

***Report Format:***

The report has to be written in font Times New Roman, 12 points, 1.5 lines spacing, Print / Type on both sides of the paper, Spiral Bound. The report should comprise of a maximum of 70 pages and has to be submitted in two copies.

***Evaluation and Presentation:***

- Submission of Training Report.
- Brief oral presentation with 'Power Point' about the training.
- Evaluation by a jury consisting of external and internal examiner to be appointed by the Department / University.
- Failure to submit the Training Report or failure to appear at the Presentation / Viva-voce Examination will be treated as "Absent" in the Final Examination.

**Evaluation Scheme:**

Components	Attendance	Training Report.	Presentation	Viva-Voce	Total
Weightage (%)	10	70	10	10	100

# ANNEXURE-I.- EXAMINATION SCHEME

## A. Exam Scheme of 30 % (Internal) + 70 % (External)

S. No.	Sem.	Course Code	Course Name	Mode	Components

## **B. Exam Scheme of 100% (Internal)**

### **1. Seminar**

(Common for Course code: IND2233 / IND2433 / IND2633 / IND2733)

Components	Organisation and Relevance of content	Literature Review	Bibliography	Presentation	Total
Weightage (%)	30	30	20	20	100

### **2. Workshop**

(Common for Course code: IND2233 / IND2433 / IND2633)

Components	A	AP	MCQ	Solving the case/ Assignment / Write up	Total
Weightage (%)	10	30	30	30	100

(A - Attendance; AP - Active Participation; MCQ - Multiple Choice Questions)

### **3. Documentation Project**

(Course code: IND2502/ / Semester: 05)

Components	Project Report	Viva-Voce	Presentation	Total
Weightage (%)	70	20	10	100

### **4. Integrated Project Work**

(Course code: IND2432 / Semester: 05)

Components	Project Report	Viva-Voce	Presentation	Total
Weightage (%)	70	20	10	100

**5. Interior Design  
Dissertation**

(Course code: IND2737 / Semester: 07)

Components	Project Report	Viva-Voce	Presentation	Total
Weightage (%)	70	20	10	100

**6. Interior Design Portfolio  
Development.**

(Course code: IND2736 / Semester : 07)

Components	Creative skill	Design Research	Presentation	Total
Weightage (%)	40	40	20	100

**7. Training & Onsite  
Learning**

(Course code: IND2837 / Semester : 08)

Components	Attendance	Training Report.	Presentation	Viva-Voce	Total
Weightage (%)	10	70	10	10	100

**ANNEXURE-II.– LIST OF HAND TOOLS AND EQUIPMENTS**

S. NO.	NAME OF THE ITEM	S. NO.	NAME OF THE ITEM
<b>I</b>	<b>ART MATERIALS FOR DESIGNING.</b>	<b>II</b>	<b>MATERIALS FOR TECHNICAL DRAWING</b>
1.	Pencil: H, HB, 2B, 3B, 4B, 5B, 6B	1.	Adjustable set square with beveled edge – 30 cm
2.	12" Plastic Transparent Scale.	2.	Compass with Long arm & pen holder
3.	12" Metal Steel Scale	3.	Protractor – 15 cm
4.	Staedtler colour pencil	4.	Graphic Pens / Ink / Stencil
5.	Fine Point Utility Marker, Black	5.	Triangular Scale 30 cm (feet / inch, metric)
6.	Drawing pens	6.	Clutch pencil – 0.5mm , 0.2 mm , 2mm.
7.	White Eraser- Large	7.	M.D / Parallel Bar / T scale – 1250 mm long
8.	Pocket-sized pencil sharpener	8.	Plastic French Curve with ink edge - set of 12
9.	1" & ½" Masking Tape	9.	Flexi curve- 80cm
10.	Tracing Paper	10.	Furniture template 1:50, 1:100,1:200
11.	Camlin Premium Poster Colours (12 colour)	11.	Circular and oval template
12.	Camlin Artist's Water Colour (12 Colour)	12.	Metric Tape-5M
13.	Crayons, Charcoal, Pastels, etc.	13.	Calculator Scientific
14.	Drawing Inks (06 Colours)	14.	Beam Compass with pen holder (Rotring / Staedtler made)
15.	Calligraphy Nibs and Pen set.	15.	Erasing shield small & Big sizes
16.	Letter template (Metal)		
17.	Set of Round and Flat Artist quality brushes	<b>IV</b>	<b>COMPUTER &amp; SOFTWARE</b>
18.	Medium size Artist's Palette	1.	Laptop
19.	Sponge	2.	16 GB Pen drive

- |     |  |     |                     |
|-----|--|-----|---------------------|
| 20. | Cartridge sheets (White / Off-white)<br>(A3 Size.)                                   | 3.  | Adobe Photoshop     |
| 21. | Spiral-bound Designer's Sketch book<br>(A4 size - 85 gsm paper with grid<br>pattern) | 4.  | Adobe Illustrator   |
| 22. | Artist Sketch book (A4 size)   | 5.  | Corel Draw          |
| 23. | A3 Size. Portfolio Case /folder  | 6.  | Autodesk 3D S Max   |
| 24. | Notebook & Pen, A4 Size White Plain<br>Paper   | 7.  | Google Sketch up    |
| 25. | Ring Binder/Box File.  | 8.  | AutoCAD             |
| 26. | Acrylic Colors (06 Colors)   | 9.  | Revit Architecture  |
|     |  | 10. | External Hard disk  |
|     |  | 11. | SLR Digital Camera. |

### ***III MODEL MAKING MATERIALS.***

1. Transparent cello tape
2. Medium sized Scissors
3. Glue Stick
4. Synthetic Adhesive - (UHU POR or  
POLY ZAP)
5. Bond Cyanoacrylate Adhesive  
(Feviquick / Super glue)
6. Medium sizes xacto knife
7. Cutting Mat.
8. Medium Gauge Round Copper Wire
9. Medium Gauge Round Aluminium  
Wire
10. Plasticine (Modeling Clay)
11. Balsa wood (Soft wood) blocks
12. Small measuring tapes / Inch tape
13. White Form board
14. Colour vinyl flexible sheets
15. Colour chart papers / Coloured cards
16. Old Magazines with variety of  
images.
17. Broachers and Catalogs with images.
18. Old newspapers.
19. Hacksaw wire blade and frame
20. Thermocol, Paper Mache, Tin foil
21. Heavy Duty Stapler& Pins
22. Small chisel, Hammer, Cutting Pliers
23. Screwdriver and small size screws
24. Steel Pins, small size nails etc.
25. Needle punch, Needle File Set
26. Engineers Square
27. Nose Pliers
28. Hard Wire & Cable Cutter
29. Junior Hacksaw & Blades
30. Razor Saws

## **Bachelor of Fine Arts**

-Freedom to design your degree

**Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

# Syllabus – First Semester

## DRAWING-I

**Course Code: FNA2101**

**Credit Units: 03**

### Course Objective:

Drawing is the basic element of learning art. Drawing exercises are to acquire accurate observation and skills to present representational art.

### Course Contents:

#### Module I

Drawing still life or object drawing to explore basic drawing tool 'Pencil'. Suggestion of solidity by line work as well as light and shade, realization for rhythmic relationship between line, mass, volume and texture, emphasis on various visual experiences.

- a) Learning basic elements of drawing.
- b) Still life or object drawing, Free hand drawing from nature.

#### Module II

Pencil work representing still life with familiar objects .like fruits, foliage drapery, books and flowers etc.

Emphasis on creating characteristics and volume (light and shade).

- a) Basic knowledge of drawing with pencil.
- b) Still life with from arranged objects like fruits, drapery etc.

**No. of works to be done - 06**

### Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### Text & References:

#### Text:

- Anatomy & Drawing, Victor Perard, Pitman Publishing, New York, 1955

#### References:

# GEOMETRICAL DRAWING AND PERSPECTIVE - I

**Course Code: FNA2102**

**Credit Units: 02**

## **Course Objective:**

Introduction to orthographic projections in simple positions, drawing of plan, elevation and section of simple objects to scale, full size, reduced or enlarged.

## **Course Contents:**

### **Module I**

Understanding and use of geometrical instruments. Simple exercise in angles and geometrical figures i.e. triangle, quadrilaterals, parallelograms, squares, rectangles, rhombus, polygons, circles etc.

### **Module II**

Projections of solids in simple positions. Drawing of plan, elevation and section of simple objects. Enlargement and reduction of drawings in different scales. One point, two point and three point perspective etc.

**No. of works to be done – 06**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

### **Text:**

- Geometrical Drawings, C. L. Martin, Macmillan Co, London, 1968.

### **References:**

- Artists Technique, Dr. Kurt Herbert

# DESIGN – I

**Course Code: FNA2103**

**Credit Units: 02**

## **Course Objective:**

Learning Design is to understand the basic visual language and various methods of form synthesis. It is to develop intellectual and imaginative abilities in creative thinking. It is to provide technical know-how about the principles of design, distribution of space, proportion, behaviour of force and energy contained in lines, form and colour. Organized design exercises in different media offer a wide range of opportunity to develop systematic and intuitive approaches to Creative Design work.

## **Course Contents:**

### **Module I**

Transformation of simple shapes into well balanced design. Understanding the subjective and objective value of applied art. Visualize complex forms into simple, primitive and basic forms from nature also.

### **Module II**

Repetition of a well composed square block, with simple shapes or image into different scale to create rational or systematic design. Concept of positive and negative areas.

**No. of works to be done - 06**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

### **Text:**

# PAINTING - I

**Course Code: FNA2104**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to acquire experience in basic knowledge to explore painting techniques. Structured exercises on painting include basic colour theory and pictorial composition, which enables students to be confident in the use and manipulation of colour. It also provides a clear idea of different painting techniques. Like water colour, Tempera and opaque colour.

## **Course Contents:**

### **Module I**

Understanding the colour and its possibilities. Practical approach to know primary, secondary and other colours to develop a clear perception about painting work. Painting from objects and nature; study of colours, forms, perspective, tone and texture. Experimenting with vibrant, fluorescent colours and passionate sophistication of opaque and transparent colours. Draw and paint with transparent or opaque colour on a theme (from memory & Nature)

### **Module II**

Handling the tools, application and control of a wide range of painting media. Understanding the detail complex possibilities exploiting different types of colours. Project works on monochromatic experimentations.

Still life with monochromatic.

## **No. of works to be done – 06**

- Colour knowledge and colour wheels
- Memory and landscape painting.
- Monochrome still life

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# SCULPTURE - I

**Course Code: FNA2105**

**Credit Units: 02**

**Course Objective:**

Clay Modeling to develop visual awareness in three dimensions, through manipulative skills in clay and plaster etc.

**Course Contents:**

**Module I**

Simple relief composition in clay, technique of terracotta and direct modeling in plaster.

**Module II**

Studies to understand three dimensional forms, texture and colour of the material, principle of weight, volume, space and contour.

**Module III**

Finishing of the final sculpture or relief and installation.

**No. of works to be done - 03**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

- Modelling a likeness in clay, Daisy Grubbs

**References:**

# PRINT MAKING - I

**Course Code: FNA2106**

**Credit Units: 02**

## **Course Objective:**

This hands-on course is to introduce basic techniques in surface printing in one and more colors. It is to learn and experience simple methods of making printing lino & wood cut technique.

## **Course Contents:**

### **Module I**

Learning basic studio techniques in print making, surface printing relief media and use of printing equipments and tools. Understanding the concept of design construction and composition in black and white. Simple method of making relief blocks for lino print based on final design layout.

### **Module II**

Handling the process of ink application on prepared block; experimenting with different colour-combination and paper surface. Wood cut printing in black and white.

**No. of works to be done - 04**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# HISTORY OF ART - I

**Course Code: FNA2107**

**Credit Units: 02**

## **Course Objective:**

The objective of teaching history of art is to acquaint the students with art and artists through the ages, from the earliest time to the present. The course is designed on the conviction that the learners can understand its relation to his own time and the technology at his command through an awareness of the relationship to his artistic predecessors.

## **Course Contents:**

### **Module I**

What is art?

Introduction to various forms of art. Basics on conceptual and representational Approach. Difference between history and art history. Comparative study of art in relation to social, political, aesthetic and philosophical aspects

### **Module II**

Theoretical analysis of visual elements, concept of space, line, colour and forms  
In works of art. Visual acquaintance of selected great works of art.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# VISUAL GRAPHICS - I

**Course Code: FNA2108**

**Credit Units: 02**

## **Course Objective:**

The objective of the course is to focus on the usage of the digital media. The course lay emphasis on the basics of designing software's to ensure that the students are updated with the technological aspect of the industry.

## **Course Contents:**

### **Module I**

Photoshop: Introduction to any designing software's.  
Getting familiar with the tools.

### **Module II**

Photoshop: Making various layouts using the tools

**No. of works to be done - 06**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

# PHOTOGRAPHY - I

**Course Code: FNA2109**

**Credit Units: 02**

## **Course Objective:**

The objective of the course is to introduce the fundamental technology, theory, history, techniques and applications of photography.

## **Course Contents:**

### **Module I**

Basic use of camera, its various parts and their functions.

### **Module II**

Observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

**No. of works to be done – 10**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# Syllabus – Second Semester

## DRAWING - II

**Course Code: FNA2201**

**Credit Units: 02**

**Course Objective:**

Drawing exercises are to learn accurate observation and skills to represent work of art from life or surroundings.

**Course Contents:**

**Module I**

Drawing human figures to study proportion. Centre of gravity, inclination of main mass based on anatomical structure. & Animal Study.

a) Sketches / drawing

**Module II**

Drawing from nature - Outdoor study

**No. of works to be done – Drawing 10 + Sketching 100**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

## GEOMETRICAL DRAWING AND PERSPECTIVE - II

**Course Code: FNA2202**

**Credit Units: 02**

### **Course Objective:**

This is to provide adequate knowledge on visual illusion depending upon the distance and point of view. It makes the learners well-equipped in measurement and scaling system related to visual art.

### **Course Contents:**

#### **Module I**

Isometric projection of simple objects like cube, prism, pyramids, cone etc.

#### **Module II**

Introduction of perspective - Parallel and angular perspective. Terminology like picture plane, station point, vanishing point. Perspective of simple geometrical objects and their combination.

**No. of works to be done - 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- Geometrical Drawings, C. L. Martin, Macmillan Co, London, 1968.

#### **References:**

- Artists Technique by Dr. Kurt Herbert

## DESIGN – II

**Course Code: FNA2203**

**Credit Units: 02**

### **Course Objective:**

The objective of learning Design and exercises is to develop spontaneity in creative thinking executing a meaningful construction of forms based on principles of design.

### **Course Contents:**

#### **Module I**

Creating conceptual design emphasizing the importance of lines and forms. Project on experimental design in creative forms

**No. of works to be done - 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

## PAINTING - II

**Course Code: FNA2204**

**Credit Units: 02**

**Course Objective:**

Learning colour techniques of transparent and opaque representing still life and social themes.

**Course Contents:**

**Module I**

Still life with multicolour in transparent water colour technique.

**Module II**

Developing opaque colour treatment on figurative composition based on social themes and Landscape painting.

Study of Indian Folk painting.

**No. of works to be done - 12**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## SCULPTURE - II

**Course Code: FNA2205**

**Credit Units: 02**

**Course Objective:**

Clay Modeling to develop visual awareness in three dimensions, through manipulative skills in clay and plaster etc.

**Course Contents:**

**Module I**

Simple relief composition in clay, technique of terracotta and direct modeling in plaster.

**Module II**

Studies for understanding the aesthetics of three dimensional forms, textures body, color of the material, principle of weight, volume, space and contour.

**Module III**

Finishing of the final sculpture or relief landscape and figurative composition and installation.

**No. of works to be done- 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## PRINT MAKING - II

**Course Code: FNA2206**

**Credit Units: 02**

### **Course Objective:**

To introduce more techniques of surface printing in one and more colours, creating blocks with cardboard, plywood or linoleum. Experimental printing with other materials.

### **Course Contents:**

#### **Module I**

Experimenting and exploring various texture of different surface using materials like wire, wire mesh, coarse cloth, cork, cardboard and ply wood on print surface. Taking monoprints.

#### **Module II**

Experimenting with different color-combination and paper surface.

**No. of works to be done- 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## HISTORY OF ART - II

**Course Code: FNA2207**

**Credit Units: 02**

### **Course Objective:**

Teaching history of art is to acquaint the students with the importance of art in human life and its evolution through the ages from primitive era to modern times analyzing the progressive development in different countries and also in India.

### **Course Contents:**

#### **Module I**

A detail study of Primitive art world wide.

Oriental Art:

Indus Valley Civilization

Japanese art

Chinese art.

#### **Module II**

Introduction to Middle Eastern art and Occidental art.

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## VISUAL GRAPHICS - II

**Course Code: FNA2208**

**Credit Units: 02**

### **Course Objective:**

The objective of the course is to focus the software's which are the core of every artist. The course lay emphasis on the basics of designing software's to ensure that the students are updated with the technological aspect of the industry.

### **Course Contents:**

#### **Module I**

Introduction to Coral Draw.  
Getting familiar with the tools.

#### **Module II**

Designing using Coral Draw.

**No. of works to be done - 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## PHOTOGRAPHY - II

**Course Code: FNA2209**

**Credit Units: 02**

### **Course Objective:**

The objective of the course is to introduce the fundamental technology, theory, history, techniques and applications of photography.

### **Course Contents:**

#### **Module I**

Rules of photography

Learning Camera and its basic components (Digital SLR & Beta Camera)

#### **Module II**

Learning the use of Camera Angles, Shots and lighting techniques while doing photography.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

# Syllabus – Third Semester

## HISTORY OF ART - III

**Course Code: FNA2301**

**Credit Units: 02**

### Course Objective:

The objective of teaching history of art is to acquaint the students with visual cultures from the earliest time to the present. The course is designed on the conviction that the learners can understand its relation to his own time and the technology at his command through an awareness of the relationship to his artistic predecessors.

### Course Contents:

#### Module I

Mauryan Period  
Sunga Period  
Kushan Period  
Gandhara Period

#### Module II

Ceylon  
Cambodia

#### Module III

Early Christian Period

### Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### Text & References:

# AESTHETICS - I

**Course Code: FNA2302**

**Credit Units: 02**

## **Course Objective:**

This course is essential for all the students acquiring fine arts skill to improve their sense of beauty. An artist must have a clear concept regarding theory of beauty to execute their idea in proper way.

## **Course Contents:**

### **Module I**

The importance of Aesthetics for a fine artist.

Introduction to Indian Aesthetics and its brief historical background.

Concept of beauty based ancient scriptures and their relevance of art.

### **Module II**

Elements of art- Five Schools of Indian Aesthetics.

Inter-relationship of Visual and performing art.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

## SUMMER PROJECT EVALUATION-I

**Course Code: FNA2335**

**Credit Units: 03**

### **Course Objective:**

The students have to prepare a summer assignment to develop their creative skills. They also have to prepare summer assignment and give a presentation highlighting the following:

- Balance
- Perspective
- Concept
- Value
- Texture
- Composition
- Art and Artist

### **Examination Scheme:**

Assignment	-	60
Viva voce	-	40
<b>Total</b>	<b>-</b>	<b>100</b>

# SPECILIZATION - SCULPTURE

## STUDY FROM LIFE - I

**Course Code: FNA2303**

**Credit Units: 03**

### **Course Objective:**

The objective of sculptural study from life is to learn human forms in details. It provides the skill to sculpt human figure in realistic way based on anatomy, planes, body masses, balance, posture and rhythm.

### **Course Contents:**

#### **Module I**

Life Drawing:- Bust & Portrait:- Study of Human Portrait and bust using different drawing tools to study blocks, posture and rhythm, unity of body parts, inter-related force of lines, foreshortening and finishing.

#### **Module II**

Head Study Male & Female, Building of Armature study in clay and direct plaster.

#### **Module III**

Understanding of structure and proportion and detail modeling of full figure. Waste mould technique & casting in PoP.

**No. of works to be done – 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

# COMPOSITION - I

**Course Code: FNA2304**

**Credit Units: 02**

## **Course Objective:**

The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

## **Course Contents:**

### **Module I**

Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

### **Module II**

Building of armature for direct work in plaster or cement on the given topic.

### **Module III**

Waste mould and piece mould technique and casting in wax.

**No. of works to be done – 06**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

### **Text:**

- The Sculptor's Handbook, Prof H. F. Ten Holt

### **References:**

- The Complete Guide to Sculpture. Modeling and Ceramics.
- Techniques and materials by Barry Midgley.

# CARVING - I

**Course Code: FNA2305**

**Credit Units: 02**

## **Course Objective:**

This course is to learn about working with woods and its various texture to create relief work as well as three-dimensional composition.

## **Course Contents:**

### **Module I**

Introduction to various kinds of wood and carving tools. Practical approach to the introductory phase.

### **Module II**

Simple compositions suitable for carving with appropriate emphasis on techniques.

**No. of works to be done – 04**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

### **Text:**

# MURAL - I

**Course Code: FNA2306**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to train the learners how to work on wall surface using various mural mediums emphasizing technical aspects in details. Mural is a permanent work on building walls inside or outside. It provides professional experience and good knowledge of handling fundamentals of working on vertical wall surface using specific materials.

## **Course Contents:**

### **Module I**

Making suitable layout designing for mural work as per the basic technical aspects of working on wall surface, which is to be viewed from wide eye level.

### **Module II**

Practical mural work on board using painting mediums.

**No. of works to be done – 04**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

# PHOTOGRAPHY - I

**Course Code: FNA2307**

**Credit Units: 02**

## **Course Objective:**

This course is designed to provide an adequate training on photography emphasizing on handling the camera, techniques and equipments. Advanced experiments on nature and indoor subjects based on various kinds of light effects.

## **Course Contents:**

### **Module I**

Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

### **Module II**

Introduction to the process of developing and printing, films and their sensitivity. Basic knowledge of photo printing papers and various chemicals.

**No. of works to be done – 10**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon
- Photo techniques by Lee Frost
- Location Photography Secrets by Andy Snow

# CERAMICS - I

**Course Code: FNA2308**

**Credit Units: 02**

**Course Objective:**

This course is designed to provide basic training on ceramics.

**Course Contents:**

**Module I**

Simple slab work and wheel work

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## ASSEMBLAGE - I

**Course Code: FNA2309**

**Credit Units: 02**

**Course Objective:**

This course is to provide basic concept on assemblage work.

**Course Contents:**

**Module I**

Introduction to various kinds of materials and their characteristics.

**Module II**

Practical method of assemblage.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

# SCULPTURE METHODS AND MATERIALS - I

**Course Code: FNA2310**

**Credit Units: 02**

## **Course Objective:**

The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

## **Course Contents:**

### **Module I**

Types of clay, Plaster of Paris, Cement & its properties

### **Module II**

Nature and types of wood its growth and process of seasoning use of various tools and equipment.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.
- Methods and Materials of Sculpture by David Raid.

## **SPECIALISATION– APPLIED ARTS** **DRAWING AND ILLUSTRATION – I**

**Course Code: FNA2311**

**Credit Units: 02**

**Course Objective:**

Drawing exercises are must to develop creative ability, which is essential for any artist. It is to develop accurate sense of observation and skills of graphic presentation.

**Course Contents:**

**Module I**

Life and object study to understand light and shade, half tone and colored. Sketching from nature. Quick sketches in limited time from life and nature - Outdoor as well as indoor.

**No. of works to be done – 06**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## DESIGN-III

**Course Code: FNA2312**

**Credit Units: 03**

**Course Objective:**

This will be student's first introduction to design. Students will do small basic level exercises to understand design.

**Course Contents:**

**Module I**

Introduction to logo Design and Overlapping of different forms identify proportions with texture black & white and Colour.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# LETTERING AND TYPOGRAPHY – I

**Course Code: FNA2313**

**Credit Units: 02**

## **Course Objective:**

Study and history of letter forms of both Roman and Vernacular as design form: spacing, study of basic type faces, study of fundamentals of layout and their practical application, preparation of simple typographical layout for News Papers.

## **Course Contents:**

### **Module I**

Study of basic type faces and exercise based on it

**No. of works to be done – 06**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

## PHOTOGRAPHY - III

**Course Code: FNA2314**

**Credit Units: 02**

### **Course Objective:**

This course is designed to provide an adequate training on photography emphasizing on handling the camera, techniques and equipments. Advanced experiments on nature and indoor subjects based on various kinds of light effects.

### **Course Contents:**

#### **Module I**

Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

#### **Module II**

Introduction to the process of developing and printing, films and their sensitivity. Basic knowledge of photo printing papers and various chemicals.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

# PRINTING TECHNIQUES – I

**Course Code: FNA2315**

**Credit Units: 02**

## **Course Objective:**

This course is designed for learning basic techniques in print making, surface printing relief media and use of printing equipment and tools. This course provides training on technical method of making relief blocks with linoleum, cardboard, plywood and also serigraphy techniques.

## **Course Contents:**

### **Module I**

Creative experimentation with different colour combinations and paper surface. Printing exercises using relief blocks made from various materials based on different layouts, basically working on serigraphy.

**No. of works to be done – 10**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# COMPUTER GRAPHICS – I

**Course Code: FNA2316**

**Credit Units: 02**

**Course Objective:**

Introduction to Design software related to designs.

**Course Contents:**

**Module I**

Application of Coral Draw software.

**No. of works to be done – 10**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

# ADVERTISING THEORY – I

**Course Code: FNA2317**

**Credit Units: 02**

## **Course Objective:**

This course is to acquaint students about general introduction to advertising.

## **Course Contents:**

### **Module I: Introduction to Advertising**

Definition and characterizes of advertising

Role of Advertising

Benefits of Advertising

Function of Advertising

Advertising and Society

Ethical issues of Advertising

### **Module II: Origin and growth of advertising**

Historical background and Future of Indian advertising

Changing trends of Indian Advertising

### **Module III: Economic and Social Implications of Advertising**

Economic effects of Advertising

Explicit role of advertising

Indirect role of advertising

Social Issues in advertising

### **Module IV: Advertising in Marketing Mix**

The Marketing concept

The Marketing Mix

Advertising Decisions

The Communication Spectrum

## **Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **SPECIALISATION – PAINTING**

### **DRAWING - III**

**Course Code: FNA2318**

**Credit Units: 02**

#### **Course Objective:**

The objective of Drawing Exercise is to learn to approach art in most direct way. It is an introduction to various aspects and techniques of drawing exploring variety of drawing tools and mediums such as pencil, charcoal, crayons, ink and color. This exercise provides accuracy in observation and great opportunity to study and experiment expressive force and spontaneity of line work. Drawing is the most significant basic skill of visual representation of real world.

#### **Course Contents:**

##### **Module I: Still Life**

Drawing exercises from selected arranged objects and drapery to learn and study using various drawing tools based on eye level, relative proportion, perspective, structure, form, volume, texture, source of light and its effect, balance and also tonal values.

##### **Module II: Portraiture**

Portraiture drawing study of human heads, construction of the skull, anatomy, proportion, planes, masses and specific feature; light and shade from different angles and finishing.

Life Drawing-Full Figure: Drawing study from full human figure based on human anatomy, proportion, planes and masses, building blocks, posture and rhythm, unity of body parts, inter-related force of lines, foreshortening and finishing.

##### **Module III: Landscape/ Nature Study (outdoor)**

Observation, finding the right view to study, addition and elimination, simplification, eye level and perspective, balance and rhythmic presentation with a unique aesthetic value.

**No. of works to be done – 12**

#### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

#### **Text & References:**

## PAINTING - III

**Course Code: FNA2319**

**Credit Units: 03**

### **Course Objective:**

This is an intensive training to equip the students with a great skill for original and creative visual expression using different painting mediums and tools. Mastery of technical aspects provides essential foundation for the learners, though it is only means, not the end. Painting is the visual expression of thoughts, dreams and experiences. It is an introductory exposure to different schools, traditions, techniques and media of painting practiced through the ages.

### **Course Contents:**

#### **Module I: Still Life**

Painting Study (Monochrome) from selected well arranged objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values, colour balance and colour perspective.

#### **Module II: Painting from life: portraiture and full figure**

Head study and full figure study (monochrome) same as drawing from life models (male & female)

#### **Module III: Landscape**

Outdoor study using different painting mediums (water colours/pastel/acrylic etc).

#### **Module IV: Mix Media**

Experimentation handling variety of painting mediums including collage and other innovative techniques working on still life, life or nature study to explore beyond traditional and academic method.

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

# COMPOSITION - I

**Course Code: FNA2320**

**Credit Units: 02**

## **Course Objective:**

Composition exercise is the most important to learn and study theory of composition, individual approach to the possibilities. Experimenting innovative arrangement of the thing around to create unique visual presentation improves artistic sense and concept of beauty.

## **Course Contents:**

### **Module I**

Composition Exercises working on still life, life and nature study –outdoor and indoor; The 2-D and 3-D objects and the structural possibilities, use of colour and textural values, form and content compositions, use of suitable objects. Exercises based on traditional formats

### **Module II**

Creative composition exercise from traditional paintings and imagination emphasizing on individual creative sense, transformation of simple shapes into well-balanced unique visual presentation.

**No. of works to be done – 06**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## PHOTOGRAPHY - III

**Course Code: FNA2321**

**Credit Units: 02**

### **Course Objective:**

This course is designed to provide an adequate training on photography emphasizing on handling the camera, techniques and equipments. Advanced experiments on nature and indoor subjects based on various kinds of light effects.

### **Course Contents:**

#### **Module I**

Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

#### **Module II**

Introduction to the process of developing and printing, films and their sensitivity. Basic knowledge of photo printing papers and various chemicals.

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## PRINT MAKING - III

**Course Code: FNA2322**

**Credit Units: 02**

### **Course Objective:**

This course is designed for learning basic techniques in print making, surface printing relief media and use of printing equipments and tools. This course provides training on technical method of making relief blocks with linoleum, cardboard, plywood and also making blocks using various metal sheets.

### **Course Contents:**

#### **Module I**

Creative experimentation with different colour combinations and paper surface. Printing exercises using relief blocks made from various materials based on different layouts, basically working on silkscreen.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# PAINTING METHODS AND MATERIALS - I

**Course Code: FNA2324**

**Credit Units: 02**

## **Course Objective:**

The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

## **Course Contents:**

### **Module I**

Importance of method & materials.

Permanence and deterioration of paint.

### **Module II**

Nature and characteristic of drawing and painting media such as Pencil, crayon, charcoal, pen and ink, water color, gouache, pastel and oil paint.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

- Method and Materials by Lynton Lamb.
  - A manual of Painting Materials & Techniques by Mark David Goattsegen

# DRAWING FOR 2D ANIMATION - I

**Course Code: FNA2325**

**Credit Units: 04**

## **Course Objective:**

The objective of this course is to develop 2D animation skills such as sketching and drawing for animation, basic principles of animation etc.

## **Course Contents:**

### **Module I**

Sketching and scribble drawings from life and movies.

### **Module II**

Constructive concept of a cartoon character and line of action.

### **Module III**

Perspective and animation principles.

### **Module IV**

Detail study of human forms, animal forms and birds.

### **Module V**

Animation exercises

**No. of works to be done – 10**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

## **Text & References:**

- Human Machine, Bridgeman.
- Anatomy & Drawing, Victor Parrade
- Anatomy in Drawing, Andrew Lumis
- Dynamic Figure Drawing, Burn Hoggarth
- Human watching, Edward Maybridge
- Animal watching, Edward Maybridge.
- How to Animate Film Cartoons-Preston Blair

# HISTORY OF ANIMATION – I

**Course Code: FNA2326**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to provide in depth knowledge on historical background of animation which is to lay the foundation of the animation. Course focuses on the evolution of Animation Industry and the stages of its growth.

## **Course Contents:**

### **Module I**

Evolution of Animation.

Contribution of various countries in the development of modern animation era.

### **Module II**

Animation history related to Walt Disney and other big companies that contributed in the development of modern animation era.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

- Enchanted Drawings: The History of Animation by Charles Solomon of Mice and Magic: A History of American Animated Cartoons; Revised and Updated (Plume Books) by Leonard Maltin and Jerry Beck

# BOOK ART – I

**Course Code: FNA2327**

**Credit Units: 03**

## **Course Objective:**

Objective of this course is to focus on drawing skills in print media as a form of book art such as illustration, comic strips, cartoon and caricature etc.

## **Course Contents:**

### **Module I**

Creating story concepts and characters (Manual)

### **Module II**

Story boarding and character designing (Manual)

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

- Story Boarding 101 (A crash course in professional story boarding), Michael Wise Production, James Fraoli
- Prepare to Board! (Create Story and Characters for Animated Features and Shorts) by: Nancy Beiman

# DIGITAL IMAGING – I

**Course Code: FNA2328**

**Credit Units: 02**

## **Course Objective:**

The course objective is to develop graphic skill and designing concept in order to create digital work using various tools of the software.

## **Course Contents:**

### **Module I**

Basics of Adobe Photoshop.

Getting familiar with Adobe Photoshop tools and its application

### **Module II**

Basics of Illustrator

Getting familiar with Adobe Illustrator tools and its application.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

- Adobe Photoshop CS4. Classroom in a Book : Adobe Creative Team

- Adobe Illustrator CS3 Classroom in a Book (Book & CD-ROM) by Adobe Creative Team*

## PHOTOGRAPHY - III

**Course Code: FNA2329**

**Credit Units: 02**

### **Course Objective:**

Objective of this course is to develop observation skill through photography which is very useful while making animation projects and short animation movies.

### **Course Contents:**

#### **Module I**

Rules of Photography

Learning Camera and its basic components (Digital SLR& Beta Camera)

#### **Module II**

Learning the use of Camera Angles, Shots and lighting techniques while doing photography

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

# PAINTING – I

**Course Code: FNA2330**

**Credit Units: 02**

## **Course Objective:**

This is an intensive training to equip the students with a great skill for original and creative visual expression using different painting mediums and tools. Mastery of technical aspects provides essential foundation for the learners, though it is only means, not the end. Painting is the visual expression of thoughts, dreams and experiences. It is an introductory exposure to different schools, traditions, techniques and media of painting practiced through the ages.

## **Course Contents:**

### **Module I: Still Life**

Painting Study (Monochrome) from selected well-arranged objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values, colour balance and colour perspective.

### **Module II: Painting from life: portraiture and full figure**

Head study and full figure study (monochrome) same as drawing from life models (male & female)

### **Module III: Landscape**

Outdoor study using different painting mediums (water colours/pastel/acrylic etc).

**No. of works to be done – 04**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

### **Text:**

- Notes on the techniques of Painting by Hilaire Hiler
- Painting Course by Ronald Pearsall

### **References:**

- Big book of drawing and painting by Francisco Asensio Cerver.

- The portrait by Norbert Schneider.

# Syllabus – Fourth Semester

## HISTORY OF ART - IV

**Course Code: FNA2401**

**Credit Units: 02**

**Course Objective:**

The objective of teaching history of art is to acquaint the students with visual cultures from the earliest time to the present. The course is designed on the conviction that the learners can understand its relation to his own time and the technology at his command through an awareness of the relationship to his artistic predecessors.

**Course Contents:**

**Module I**

Gupta Period

**Module II**

Java Art

**Module III**

Byzantine period

Romanesque period

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

## AESTHETICS - II

**Course Code: FNA2402**

**Credit Units: 02**

**Course Objective:**

This course is essential for all the students acquiring fine arts skill to improve their sense of beauty. An artist must have a clear concept regarding theory of beauty to execute their idea in proper way.

**Course Contents:**

**Module I**

Development of theories of Rasa, Dhvani, Bhava, Alankar, Auchitya, Riti, Guna-Dosh, Vyanjana etc.

**Module II**

Detail study on the applications of Rasa theories in Indian Art. Related study on Western art.

**Examination Scheme:**

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **SPECIALISATION – SCULPTURE**

### **STUDY FROM LIFE - II**

**Course Code: FNA2403**

**Credit Units: 03**

**Course Objective:**

The objective of sculptural study from life is to learn human forms in details. It provides the skill to sculpt human figure in realistic way based on anatomy, planes, body masses, balance, posture and rhythm.

**Course Contents:**

**Module I**

Life Drawing:- Bust & Portrait:- Study of Human Portrait and bust using different drawing tools to study blocks, posture and rhythm, unity of body parts, inter-related force of lines, foreshortening and finishing.

**Module II**

Head Study Male & Female, Building of Armature study in clay and direct plaster.

**Module III**

Understanding of structure and proportion and detail modeling of full figure. Waste mould technique & casting in PoP.

**No. of works to be done – 06**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

**Text:**

- Modeling a Likeness in Clay, Daisy Grubbs

**References:**

- Anatomy, Walter Foster
- The Sculptor's Handbook, Prof H. F. Ten Holt

## COMPOSITION - II

**Course Code: FNA2404**

**Credit Units: 03**

### **Course Objective:**

The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

### **Course Contents:**

#### **Module I**

Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

#### **Module II**

Building of armature for direct work in plaster or cement on the given topic.

#### **Module III**

Waste mould and piece mould technique and casting in wax.

**No. of works to be done – 6**

### **Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- The Sculptor's Handbook, Prof H. F. Ten Holt

#### **References:**

- Modeling a Likeness in Clay, Daisy Grubbs
- The Complete Guide to Sculpture. Modeling and Ceramics. Techniques and materials by Barry Midgley.

## CARVING - II

**Course Code: FNA2405**

**Credit Units: 01**

### **Course Objective:**

The course is designed to improve the skills in working with these two mediums based on textural values and technical differences chiseling out artist's own expressions.

### **Course Contents:**

#### **Module I**

To make the small maquettes on creative theme, and the concept of mix-media.

#### **Module II**

Uses of various carving tools on the given medium. Emphasis on techniques. Enlargement of the maquettes to create the final work.

#### **Module III**

Finishing & installing the final work.

**No. of works to be done – 6**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

#### **Text:**

- Dictionary of tools by R. A Salaman.
- The Sculptor's Handbook, Prof H. F. Ten Holt

#### **References:**

- Methods and Materials of Sculpture by David Raid.
- The Complete Guide to Sculpture. Modeling and Ceramics. Techniques and materials by Barry Midgley.

## MURAL - II

**Course Code: FNA2406**

**Credit Units: 02**

### **Course Objective:**

This course is to train the learners about working on wall surface using various mediums emphasizing technical aspects in details. Mural is a permanent work wall inside or outside. It provides professional experience and good knowledge of handling fundamentals of working on vertical wall surface.

### **Course Contents:**

#### **Module I**

Making suitable layout designing for mural work as per the basic technical aspects of working on wall surface, which is to be viewed from wide eye level.

#### **Module II**

Practical mural work on board using painting mediums.

**No. of works to be done – 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## PHOTOGRAPHY - II

**Course Code: FNA2407**

**Credit Units: 02**

### **Course Objective:**

This course is to provide a training on photography emphasizing on creative techniques using basic equipments. Experiments on nature and indoor subjects using specific Light arrangements.

### **Course Contents:**

#### **Module I**

Indoor project on photography experimenting with light effects.

#### **Module II**

Outdoor project exploring various possibilities.

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon
- Photo techniques by Lee Frost

## CERAMICS - II

**Course Code: FNA2408**

**Credit Units: 02**

**Course Objective:**

This course is designed to provide basic training on ceramics emphasizing on basic techniques.

**Course Contents:**

**Module I**

Slab work, wheel work, coil work and tile making in different textures and designs.

**Module II**

Ceramic clay body making.

**No. of works to be done – 10**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## ASSEMBLAGE - II

**Course Code: FNA2409**

**Credit Units: 02**

**Course Objective:**

This course is designed to provide basic training on assemblage.

**Course Contents:**

**Module I**

Practical assemblage training on working surface according to the layout.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## SCULPTURE METHODS AND MATERIALS - II

**Course Code: FNA2410**

**Credit Units: 02**

### **Course Objective:**

The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

### **Course Contents:**

#### **Module I**

Types of clay, Plaster of Paris, Cement & its properties

#### **Module II**

Nature and types of wood its growth and process of seasoning use of various tools and equipments.

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

#### **Text:**

- Dictionary of tools by R. A Salaman.
- The Sculptor's Handbook, Prof H. F. Ten Holt

#### **References:**

- Contemporary Stone Sculpture, Dona Z. Meliach
- Methods and Materials of Sculpture by David Raid.
- The Complete Guide to Sculpture. Modeling and Ceramics. Techniques and materials by Barry Midgley.

## **SPECIALISATION – APPLIED ARTS** **DRAWING AND ILLUSTRATION – II**

**Course Code: FNA2411**

**Credit Units: 02**

**Course Objective:**

Drawing exercises are must to develop creative ability, which is essential for any artist. It is to develop accurate sense of observation and skills of graphic presentation.

**Course Contents:**

**Module I**

Detailed portrait study and human figure, practicing planes, volume, and perspective in figure and foreshortening.

**No. of works to be done – 15**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

- Germany in winter time, Mario De Mirando, Tata Press, 1980

## DESIGN – IV

**Course Code: FNA2412**

**Credit Units: 03**

**Course Objective:**

This course provides a clear concept of various aspects of designing. It is specially planned for a graphic artist to enable students to develop a commercial skill in design work.

**Course Contents:**

**Module II**

Introduction to product poster.

**Module I**

Show cards and other exercises of creative concept.

**No. of works to be done – 10**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

## LETTERING AND TYPOGRAPHY – II

**Course Code: FNA2413**

**Credit Units: 02**

### **Course Objective:**

Study of letter forms as design form: spacing, study of basic type faces, study of fundamentals of layout and their practical application, preparation of simple typographical layout for News Papers.

### **Course Contents:**

#### **Module I**

Preparation of typographical layout, logo design, Book jacket and Book Cover.

**No. of works to be done – 09**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

- Letter Assembly in Printing-D. Wooldridge

#### **References:**

- INFA Press and Advertising Year Book

## COMPUTER GRAPHICS - II

**Course Code: FNA2414**

**Credit Units: 02**

**Course Objective:**

Introduction to Design Softwares

**Course Contents:**

**Module I**

Working with Coral Draw software for various design purpose.

**Module II**

Introduction to Adobe Photoshop CS4 or later version for various design purpose.

**No. of works to be done – 10**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Computer Graphics, Edward Angel

## PRINTING TECHNIQUES - II

**Course Code: FNA2415**

**Credit Units: 02**

### **Course Objective:**

This course is designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental serigraphy on various surfaces.

### **Course Contents:**

#### **Module I**

Exploring various texture of different surface by using various printing surfaces with serigraphy.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Serigraphy: Silk Screen Techniques for the Artist, Kenneth W. Auvil

## ADVERTISING THEORY – II

**Course Code: FNA2416**

**Credit Units: 02**

### **Course Objective:**

The objective of this courses to provide knowledge on Advertising Background, planning, and strategy.

### **Course Contents:**

#### **Module I: Advertising Process**

Advertising Impact  
Advertising and Psychology  
Effeteness of Advertising  
Advertising and Buyer Behavior  
Speed and response

#### **Module II: Advertising Strategy Planning and organization**

Advertising Strategy  
Advertising Planning  
Advertising Situations  
Factors Influencing Organizational Features

#### **Module III: Tools of Promotional mix**

Advertising, Publicity, Sales promotion, Personal Selling and Public Relation  
Differences between Advertising & Personal Selling  
Advertising & Public Relation  
Advertising & Sales Promotion  
Advertising & Publicity

#### **Module IV: The Advertising Budget**

Budget and Budget making process  
Methods of advertising budget Appropriation  
Retail Advertising Budget and Retail Budget Attrition

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **SPECIALISATION – PAINTING**

### **DRAWING - IV**

**Course Code: FNA2417**

**Credit Units: 02**

#### **Course Objective:**

The objective of Drawing Exercise is to learn to approach art in most direct way. It is an introduction to various aspects and techniques of drawing exploring variety of drawing tools and mediums such as pencil, charcoal, crayons, ink and colour. This exercise provides accuracy in observation and great opportunity to study and experiment expressive force and spontaneity of line work. Drawing is the most significant basic skill of visual representation of real world.

#### **Course Contents:**

##### **Module I: Still Life**

Drawing with pen and ink. Still life with pen and ink.

##### **Module II: Landscape/ Nature Study (outdoor)**

Nature with pen and ink

##### **Module III: Life drawing with charcoal /pencil.**

**No. of works to be done – 20**

#### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## PAINTING - IV

**Course Code: FNA2418**

**Credit Units: 03**

### **Course Objective:**

This is an intensive and advanced training to equip the students with a great skill for original and creative visual expression using different painting mediums and tools. Mastery of technical aspects provides essential foundation for the learners, though it is only means, not the end. Painting is the visual expression of thoughts, dreams and experiences. It is an introductory exposure to different schools, traditions, techniques and media of painting practiced through the ages.

### **Course Contents:**

#### **Module I: Still Life**

Painting Study ( Monochrome) from selected well arranged objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values, colour balance and colour perspective.

- Still life : multi-colour with water colour

#### **Module II: Painting from life**

Portraiture and full figure: Head study and full figure study (monochrome) same as drawing from life models (male & female)

- Portrait : multi-colour technique

#### **Module III: Landscape**

Copy work from traditional paintings.

Copy work (traditional painting)

#### **Module IV: Mix Media**

Copy work (Indian & western) from traditional paintings and opaque colour technique

**No. of works to be done – 16**

### **Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

## COMPOSITION – II

**Course Code: FNA2419**

**Credit Units: 02**

### **Course Objective:**

Composition exercise is the most important to learn and study theory of composition, individual approach to the possibilities. Experimenting innovative arrangement of the thing around to create unique visual presentation improves artistic sense and concept of beauty.

### **Course Contents:**

#### **Module I**

Composition, arrangement of objects, figures and architectures.

#### **Module II**

Creative composition exercise from imagination emphasizing on individual creative sense, transformation of simple shapes into well-balanced unique visual presentation with experimentation.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# MURAL - I

**Course Code: FNA2420**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to train the learners how to work on wall surface using various mural mediums emphasizing technical aspects in details. Mural is a permanent work on building walls inside or outside. It provides professional experience and good knowledge of handling fundamentals of working on vertical wall surface using specific materials.

## **Course Contents:**

### **Module I**

Making suitable layout designing for mural work as per the basic technical aspects of working on wall surface, which is to be viewed from wide eye level.

### **Module II**

Practical mural work on board using painting mediums.

**No. of works to be done – 06**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## PRINT MAKING - II

**Course Code: FNA2421**

**Credit Units: 02**

### **Course Objective:**

This course is designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

### **Course Contents:**

#### **Module I**

Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

#### **Module II**

Advanced experimentation with monochrome & multi-color lithography etching – intaglio/photo process, advanced print making, use of multicolor relief print and mixed media.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

- The art of the print by Fritz Eicherberg
- The bite of print by Frank and Dorothy Gettein
- The art of Print by Earl G. Mueller
- The art of Etching by E.S.Lumdsen
- Manual of woodcut printmaking by J. Hillier
- Screen Process Printing by Schwalbach

## PAINTING METHODS AND MATERIALS - II

**Course Code: FNA2422**

**Credit Units: 02**

### **Course Objective:**

The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of artwork practically.

### **Course Contents:**

#### **Module I**

Nature and characteristics of Drawing and Painting Media such as Pencils, Crayons, Charcoal, Pen and Ink, Water Colour, Gouache, Pastels and Oils.

#### **Module II**

Introduction to murals and Print making media.

#### **Module III**

Folk Art of India

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- A manual of Painting Materials & Techniques
- Method and Materials by Lynton Lamb.

#### **References:**

- Artist's Handbook by Ray Smith
- Artist's Encyclopedia by John Quick
- A manual of Painting Materials & Techniques
- Color by Edith Anderson Feisner.

## DRAWING FOR 2D ANIMATION - II

**Course Code: FNA2428**

**Credit Units: 04**

### **Course Objective:**

The objective of this to course introduction animation concepts, pre-production & production technique

### **Course Contents:**

#### **Module I**

Detail study of various forms in sketching.

#### **Module II**

Advance Animation

#### **Module III**

Effects animation and cycle animation.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Human Machine, Bridgeman.
- Anatomy & Drawing, Victor Parrade
- Anatomy in Drawing, Andrew Lumis
- Dynamic Figure Drawing, Burn Hoggarth
- Human watching, Edward Maybridge
- Animal watching, Edward Maybridge.
- Survival kit for animators- Richard Williams

## HISTORY OF ANIMATION – II

**Course Code: FNA2423**

**Credit Units: 02**

### **Course Objective:**

The objective of this course is to explain the students about the evolution of animation and contribution of various countries in evolution of modern animation era.

### **Course Contents:**

#### **Module I**

American and Canadian Animation.

Asian Animation (India, China, Philippines & Japan).

#### **Module II**

Asian history of Animation.

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

- Cartoons: One Hundred Years of Cinema Animation by Giannalberto Bendazzi.

## BOOK ART-II

**Course Code: FNA2424**

**Credit Units: 03**

### **Course Objective:**

Objective of this course is to focus on how to apply drawing skills in print media as a form of book art such as illustration, comic strips, cartoon and caricature digitally.

### **Course Contents:**

#### **Module I**

Creating a story and character concepts (Digital).

#### **Module II**

Story boarding and character designing (Digital).

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Story Boarding 101 (A crash course in professional story boarding), Michael Wise Production, James Fraoli
- Exploring Story Boarding (Design exploration series) by: Wendy Tumminello.

# DIGITAL IMAGING-II

**Course Code: FNA2425**

**Credit Units: 02**

## **Course Objective:**

The course objective is to inculcate the concept of motion graphics and 2D animation skills using any 2D animation software, so as to infuse life into character, environments and lots more. Using the software, you are enabled to create digital animation exercises by implementing classical animation skills and principles in your work.

## **Course Contents:**

### **Module I**

Introduction to the software and its interface.

Learning the tools of the software and its application.

### **Module II**

Learning the concept of key and frame by frame animation.

Creating projects on various topics.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

- Adobe Flash CS3 Professional Classroom in a Book. : Adobe Creative Team

## PHOTOGRAPHY-IV

**Course Code: FNA2426**

**Credit Units: 02**

### **Course Objective:**

Objective of this course is to enhance observation skills through photography which further help in drawing and creating CG elements using software.

### **Course Contents:**

#### **Module I**

Learning different types of photography with define set of lighting conditions.

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Photo techniques by Lee Frost
- Location Photography Secrets by Andy Snow

## PAINTING-II

**Course Code: FNA2427**

**Credit Units: 02**

**Course Objective:**

Learning colour techniques of transparent and opaque representing still life and social themes.

**Course Contents:**

**Module I: Still Life**

Still life with multicolor in transparent water colour technique.

**Module II: Painting from life: portraiture and full figure**

Developing opaque colour treatment on figurative composition based on social themes.

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

- Water colour painting step by step, Arthur Z Gupitill, Waston Gaoptill, New York, 1967.

**References:**

- Painting sea and sky, Jean Khanbegian, Grosset and Dunlop, New York, 1967

# Syllabus – Fifth Semester

## PRACTICAL TRAINING EVALUATION - I

**Course Code: FNA2535**

**Credit Units: 03**

### **Course Objective:**

It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critiqued by the faculty guide and corrected by the student at each stage.

### **BFA (Applied Art)**

- Practical work in concerned subject
- Visualization
- Concept of designing

### **BFA (Painting)**

- Concept
- Different technique of painting

### **BFA (Animation)**

- Apply the principle of animation, animation using software
- Short animation clip

### **Examination Scheme:**

Project Report:	60
Viva Voce:	40

<b>Total:</b>	<b>100</b>
---------------	------------

# HISTORY OF ART-V

**Course Code: FNA2501**

**Credit Units: 02**

## **Course Objective:**

The objective of teaching history of art is to acquaint the students with visual cultures from the earliest time to the present. The course is designed on the conviction that the learners can understand its relation to his own time and the technology at his command through an awareness of the relationship to his artistic predecessors.

## **Course Contents:**

### **Module I**

Pallava Period  
Chola Period  
Chalukya Period  
Rastrakuta Period  
Chandela Period

### **Module II**

Gothic Period

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## AESTHETICS-III

**Course Code: FNA2502**

**Credit Units: 02**

**Course Objective:**

This course is essential for all the students acquiring fine arts skill to improve their sense of beauty. An artist must have a clear concept regarding theory of beauty to execute their idea in proper way.

**Course Contents:**

**Module I**

Fundamentals of Indian art based on Hindu Silpa Texts.

**Module II**

Detail studies related to Rasa- Nishpathi.

**Module III**

Sadanga- The six limbs of Indian Art.

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **SPECIALISATION– SCULPTURE**

### **STUDY FROM LIFE - III**

**Course Code: FNA2503**

**Credit Units: 03**

**Course Objective:**

The objective of sculptural study from life is to learn human forms in details. It provides the skill to sculpt human figure in realistic way based on anatomy, planes, body masses, balance, posture and rhythm.

**Course Contents:**

**Module I:**

Life Drawing:- Bust & Portrait:- Study of Human Portrait and bust using different drawing tools to study blocks, posture and rhythm, unity of body parts, inter-related force of lines, foreshortening and finishing.

**Module II**

Head Study Male & Female, Building of Armature study in clay and direct plaster.

**Module III**

Understanding of structure and proportion and detail modeling of full figure. Waste mould technique & casting in PoP.

**No. of works to be done – 12**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

## COMPOSITION - III

**Course Code: FNA2504**

**Credit Units: 02**

### **Course Objective:**

The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

### **Course Contents:**

#### **Module I**

Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

#### **Module II**

Building of armature for direct work in plaster or cement on the given topic.

#### **Module III**

Waste mould and piece mould technique and casting in wax.

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

# METAL CASTING - I

**Course Code: FNA2505**

**Credit Units: 02**

**Course Objective:**

This course provides the knowledge on working with metals.

**Course Contents:**

**Module I**

Methods of casting – lost wax and sand process.

**No. of works to be done – 03**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

## MURAL - III

**Course Code: FNA2506**

**Credit Units: 02**

### **Course Objective:**

This course is to innovative training to work on wall surface using various mediums emphasizing technical aspects. It provides professional exposure and good knowledge of handling mural materials to work on wall surface.

### **Course Contents:**

#### **Module I**

Designing for mural work as per the advanced technique of working on wall surface with tempera, acrylic, encaustic, fiber glass etc.

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

## PHOTOGRAPHY - III

**Course Code: FNA2507**

**Credit Units: 02**

### **Course Objective:**

The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments on nature, depending upon time and mood. It also provides experimental experience on indoor subjects.

### **Course Contents:**

#### **Module I**

Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon
- Photo techniques by Lee Frost
- Location Photography Secrets by Andy Snow

## CERAMICS - III

**Course Code: FNA2508**

**Credit Units: 02**

**Course Objective:**

This course is to provide training on creative aspects on ceramics.

**Course Contents:**

**Module I**

Slab work, wheel work, coil work and tile making in different textures and designs.

**Module II**

Ceramic claybody making

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and Materials by Barry Midgley.

## ASSEMBLAGE - III

**Course Code: FNA2509**

**Credit Units: 02**

**Course Objective:**

This course is designed to provide experimental training on assemblage.

**Course Contents:**

**Module I**

Methods of various assemblage techniques

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## SCULPTURE METHODS AND MATERIALS - III

**Course Code: FNA2510**

**Credit Units: 02**

### **Course Objective:**

The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

### **Course Contents:**

#### **Module I**

Analysis of fundamentals of sculpture in various media.

#### **Module II**

Enlarging and reducing devices. Taking points for copying sculpture.

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

#### **Text:**

- The Sculptor's Handbook, Prof H. F. Ten Holt

#### **References:**

- Encyclopedia of Sculpture by John Mills
- Modeling a Likeness in Clay, Daisy Grubbs
- The Complete Guide to Sculpture. Modeling and Ceramics. Techniques and materials by Barry Midgley.

## **SPECIALISATION– APPLIED ARTS**

### **DRAWING AND ILLUSTRATION – III**

**Course Code: FNA2511**

**Credit Units: 02**

**Course Objective:**

Drawing exercises are must to develop creative ability which is essential for any artist. It is to develop accurate sense of observation and skills of graphic presentation. Exercises on illustration for various needs of the clients.

**Course Contents:**

**Module I**

Study of human figure draped and undraped to study volume, proportion, mass, weight, and anatomy with the aid of light and shade.

**Module II**

Developing compositions through studies working in colour mediums.

**No. of works to be done – 10**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

## DESIGN – V

**Course Code: FNA2512**

**Credit Units: 03**

### **Course Objective:**

This course provides a clear concept of various aspects of designing. It is specially planned for a graphic artist to enable students to develop a commercial skill in design work. To understand the needs of visual communications.

### **Course Contents:**

#### **Module I**

Comparatively study of different types of Indoor layouts like Designing for press, Brouchers and magazine advertisements etc.

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

#### **Text:**

# PACKAGING – I

**Course Code: FNA2513**

**Credit Units: 02**

**Course Objective:**

This will be student's first introduction to various packaging design according to the environment, occasions and need. Students will do small basic level layouts exercises to understand design of packaging.

**Course Contents:**

**Module I**

Study the basic layouts of Label Design, Box design and shopping Bags and their practical application.

**No. of works to be done – 08**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Packaging Art for Export, Nduka Nwosu
- Packaging: The art of the right proposition: An artistic from : Groser (HTML), Nicola Gordon-Seymour

## COMPUTER GRAPHICS – III

**Course Code: FNA2514**

**Credit Units: 02**

**Course Objective:**

To understand Computer Software related to Design.

**Course Contents:**

**Module I**

Tools interface and applications of Adobe Photoshop CS4 (or above) and Use of Adobe Photoshop CS4 (or above) software to create different types of layouts.

**No. of works to be done – 08**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Color Harmony for the Web, Cailin Boyle

## PRINTING TECHNIQUES-III

**Course Code: FNA2515**

**Credit Units: 02**

### **Course Objective:**

This course is designed for learning basic techniques in print making, surface printing relief media and use of printing equipment and tools. This course provides training on technical method of making relief blocks.

### **Course Contents:**

#### **Module I**

Originals for reproduction (monochrome, line originals)

Photographic materials and equipments.

Line negative making.

Line block-making

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Color Harmony for the Web, Cailin Boyle

# TEXTILE DESIGN-I

**Course Code: FNA2516**

**Credit Units: 02**

**Course Objective:**

To enable creation of various types of textile designs and patterns

**Course Contents:**

**Module I**

Fundamental of Textile Design: Motif, Repeat & Design Concept, Setting of Repeat & Change or Repeat into Design.

**Module II**

**Design for Weaving:**

- a. Weaving Texture
- b. Stripe & Check Effect
- c. Floral Design

**No. of works to be done – 08**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

## ADVERTISING THEORY - III

**Course Code: FNA2517**

**Credit Units: 02**

### **Course Objective:**

This course is to acquaint students about the introduction of Advertising agency, creativity in advertising, the role of advertising media and technical limitation in designing

### **Course Contents:**

#### **Module I: Creativity in Advertising**

Advertising creativity and activities in creative design process

Copywriting

Classification of copy

Components of an advertising copy

Various stages of layout and their functions

Selecting themes and appeals

Role of color in Advertisement

#### **Module II: Advertising Media**

Media planning and buying

Other promotional media and methods

#### **Module III: Various media of Advertising**

Print Advertising

Direct Mail advertising

Broadcasting media

#### **Module IV: Measuring Advertising Effectiveness**

Role of measuring advertising effectiveness

Pre-Test and Post Test of Advertising copy

Communication effect of Advertisement

#### **Module V: Advertising Agency**

Advertising Agency – An Introduction

History of Advertising Agency

The structure of an Ad agency

Functions and services

Agency Client Relationship

Types of ad agencies

### **Examination Scheme:**

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **SPECIALISATION – PAINTING**

### **DRAWING - V**

**Course Code: FNA2518**

**Credit Units: 02**

#### **Course Objective:**

The objective of Drawing Exercise is to practice the basic technique in direct way emphasizing on various aspects and techniques of drawing in advanced concept, exploring and experimenting variety of drawing tools and mediums in traditional way as well as innovative way. This exercise provides accuracy in observation and great opportunity to face the challenge and experiment possibilities in line work.

#### **Course Contents:**

##### **Module I: Still Life**

Study of selected assorted objects in advanced drawing techniques using various drawing tools based on eye level, relative proportion, perspective, structure, form, volume, texture, source of light and its effect, balance and also tonal values in analytical process.

##### **Module II: Landscape/ Nature Study (outdoor)**

Advanced training in landscape drawing depending upon artist's observation, concept of addition and elimination, simplification. Study from nature as a controlled design, difference of handling near and distant objects.

##### **Module III: Life Drawing- Portraiture**

Advanced drawing study of human heads based on proportion, masses and specific feature and character using various media with emphasize on manner of finished execution.

Life Drawing-Full Figure: Advanced drawing study from full human figure based on structure of human form and anatomy using life models

##### **Module IV: Sketching**

Quick sketches in limited time from life and nature exploring innovative possibilities emphasizing on advanced techniques - Outdoor and indoor.

**No. of works to be done – 20**

#### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# PAINTING - V

**Course Code: FNA2519**

**Credit Units: 03**

## **Course Objective:**

Painting is a visual experience with various medium and techniques .learning the fundamental methods of painting will lead to an individual style of painting .developing skill and experimenting different media of painting working in water colour , acrylic and oil colour technique.

## **Course Contents:**

### **Module I: Still Life**

Advanced Painting Study in water colour from selected assorted objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values with appropriate colour balance and colour perspective.

### **Module II: Painting from life**

Portraiture: Advanced study of human head using colours. The knowledge of advanced techniques of colour application

### **Module III: Landscape**

Figurative composition with opaque colour treatment.

### **Module IV: Mix Media**

Experimentation with various painting mediums exploring innovative techniques to represent thoughts in creative form. Use of various tools like roller, spatula etc.

**No. of works to be done – 16**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

## COMPOSITION – III

**Course Code: FNA2520**

**Credit Units: 02**

### **Course Objective:**

Composition exercise is the most important to learn and study theory of composition, individual approach to the possibilities. Experimenting innovative arrangement of the thing around to create unique visual presentation improves artistic sense and concept of beauty.

### **Course Contents:**

#### **Module I**

Composition, arrangement of objects, figures and architectures.

#### **Module II**

Creative composition exercise from imagination emphasizing on individual creative sense, transformation of simple shapes into well-balanced unique visual presentation with experimentation.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

## PHOTOGRAPHY- III

**Course Code: FNA2521**

**Credit Units: 02**

### **Course Objective:**

The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments on nature, depending upon time and mood. It also provides experimental experience on indoor subjects.

### **Course Contents:**

#### **Module I**

Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon
- Photo techniques by Lee Frost
- Location Photography Secrets by Andy Snow

## PRINT MAKING- III

**Course Code: FNA2522**

**Credit Units: 02**

### **Course Objective:**

This course is designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

### **Course Contents:**

#### **Module I**

Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

#### **Module II**

Advanced experimentation with monochrome & multi-color lithography etching – intaglio/photo process, advanced print making, use of multicolor relief print and mixed media and further experimentation.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

# TRADITIONAL PAINTING-I

**Course Code: FNA2523**

**Credit Units: 02**

**Course Objective:**

To introduce Indian traditional art and painting techniques and styles

**Course Contents:**

**Module I**

Rajasthani Miniature

Mughal Miniature

Pahari Miniature

Nathdwara and Tanjore Paintings

**No. of works to be done – 12**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

## PAINTING METHODS AND MATERIALS - III

**Course Code: FNA2524**

**Credit Units: 02**

### **Course Objective:**

The Course is planned to provide technical knowledge of various mediums, techniques and tools used for different kinds of artwork practically.

### **Course Contents:**

#### **Module I**

Preparation of canvas

Stretching and framing of canvas & Traditional and Folk Paintings making Process etc.

#### **Module II**

Lithography, silkscreen and etching methods and experimental approach.

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Notes on the techniques of painting by Hilaire Hiler

## **SPECIALISATION – ANIMATION**

### **COMPUTER ANIMATION – I**

**Course Code: FNA2525**

**Credit Units: 03**

**Course Objective:**

Introduction of 3D and its Prospectus and possibilities in visual world of Animation. The course is designed to focus of the elements of modeling, texturing, lighting and camera angles using 3 D Animation software.

**Course Contents:**

**Module I**

Introduction to 3D Animation software's its basics and its interface.

**Module II**

Modeling (Organic, Inorganic, Props Modelling)

**Module III**

Texturing (UV Unwrapping and Digital Texturing) Lighting & Cameras

**No. of works to be done – 08**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

# CLAY MODELING – I

**Course Code: FNA2526**

**Credit Units: 02**

## **Course Objective:**

Objective of this course is to develop visualization to observe things in 3-dimension way so that students can understand mass, volume etc while doing digital modeling. It also helps student to understand anatomy and muscles flow of human form.

## **Course Contents:**

### **Module I**

Basic 3D Shapes

Applying Animation Principles on Clay

### **Module II**

Creating Human Mannequin using Paper and Clay.

**No. of works to be done – 06**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

- Exploring character design - Kevin Hedgpeth, Stephen Missal - Art
- 3-D Human Modeling And animation by Peter Ratner - Performing Arts
- Modeling the Figure in Clay by Bruno Lucchesi

## DIGITAL IMAGING – III

**Course Code: FNA2527**

**Credit Units: 02**

### **Course Objective:**

The course objective is to impound web designing skills using the right set of digital tools of the web designing software. This enables you to create personal and commercial websites with full of interactivity.

### **Course Contents:**

#### **Module I**

Basics of Corel Draw

Getting familiar with tools and its Application

#### **Module II**

Creating web sites using Flash and others

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

# SCRIPT WRITING – I

**Course Code: FNA2528**

**Credit Units: 02**

**Course Objective:**

This course will provide a skill to prepare storylines and depicting the story as par characters. The course will enhance the visualization power of the student in terms of developing self created ideas.

**Course Contents:**

**Module I**

Illustration of a story and Character Designing (Manual)

**Module II**

Character designing and creating Story Boards as per the Frames. (Manual)

**No. of works to be done – 06**

**Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

**Text & References:**

- The Screen Writer's Bible: A complete guide to writing formatting, and selling your script-David Trottier

## PHOTOGRAPHY - IV

**Course Code: FNA2529**

**Credit Units: 02**

**Course Objective:**

The objective of this course is to provide advanced exposure on photography highlighting on all possible creative aspects on natural subjects and also indoor subjects.

**Course Contents:**

**Module I**

Introduction to the process of developing and printing, films and their sensitivity. Basic knowledge of photo printing papers and various chemicals.

**No. of works to be done – 12**

**Examination Scheme:**

Components	P	C	A	EE
Weightage (%)	10	15	5	70

**Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon
- Photo techniques by Lee Frost
- Location Photography Secrets by Andy Snow

## PAINTING-II

**Course Code: FNA2530**

**Credit Units: 02**

### **Course Objective:**

This is an intensive and advanced training to equip the students with a great skill for original and creative visual expression using different painting mediums and tools. Mastery of technical aspects provides essential foundation for the learners, though it is only means, not the end. Painting is the visual expression of thoughts, dreams and experiences. It is an introductory exposure to different schools, traditions, techniques and media of painting practiced through the ages.

### **Course Contents:**

#### **Module I: Still Life**

Painting Study ( Monochrome) from selected well arranged objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values, colour balance and colour perspective.

- Still life : multi-colour with water colour

#### **Module II: Painting from life**

Portraiture and full figure: Head study and full figure study (monochrome) same as drawing from life models (male & female)

- Portrait : multi-colour technique

#### **Module III: Landscape**

Copy work from traditional paintings.

Copy work (traditional painting)

#### **Module IV: Mix Media**

Copy work (Indian & western) from traditional paintings and opaque colour technique

**No. of works to be done – 16**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

# PROJECT-I

**Course Code: FNA2532**

**Credit Units: 03**

## **Course Objective:**

The objective of this course is to help the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issue, involving a systematic approach to gathering and analysis of information/data, leading to production of a structured Report.

## **Chapter Scheme and distribution of marks:**

Chapter 1: Introduction – 10 marks

Chapter 2: Conceptual Framework/National/International Scenario – 25 marks

Chapter 3: Presentation, Analysis & Finding – 25 marks

Chapter 4: Conclusion & Recommendations – 10 marks

Chapter 5: Bibliography – 05 marks

Selection of the Topic for the project by taking following points into consideration:

- Suitability of the topic
- Relevance of the Topic
- Time available at the disposal

## **Examination Scheme:**

<b>Components</b>	<b>Project Report</b>	<b>PowerPoint Presentation &amp; Viva</b>
<b>Weightage (%)</b>	75	25

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Note:-**

Marking is completely based on submitted project Report

# Syllabus - Sixth Semester

## DISSERTATION-I

**Course Code: FNA2637**

**Credit Units: 06**

**Course Objective:**

This course is to continue the research work to put the collected materials together for developing the body of the dissertation on the particular subject.

Putting up the necessary photographs, reproductions with the text materials.

**Course Contents:**

**Module I**

Preparing the final paper along with necessary photographs, reproductions with detail information.

**Module II**

Submission and review of printed dissertation paper.

**Examination Scheme:**

Components	PR	PS	V
Weightage (%)	70	15	15

(V- Viva; PR- Project Report; PS; Presentation)

# HISTORY OF ART - VI

**Course Code: FNA2601**

**Credit Units: 02**

## **Course Objective:**

To acquaint the students with cultures from the past to the present. The course is designed on the conviction that the learners can understand its relation to his own time bringing awareness about his artistic predecessors

## **Course Contents:**

### **Module I: Indian Art History**

Orissa

Hoysala

Rajput Miniature

Mughal Miniature

### **Module II: Western Art History**

Renaissance [Proto, Early, High] Painters and Sculptors

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## AESTHETICS - IV

**Course Code: FNA2602**

**Credit Units: 02**

### **Course Objective:**

The objective is to teach about fundamentals of Indian art based on Hindu silpa texts such as Vishnudharmotara-puran, Samaranaa, Sutracharana, Sukranitisara and Silparatham.

### **Course Contents:**

#### **Module I**

Detailed studies related to Rasa-Nishpathi.  
Sadanga-the six limbs of Indian Art.

#### **Module II**

Inter-relationship amongst the arts.  
Theories related to the origin and creation of Art, namely, Communications, expression, and release of emotion.

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **SPECIALISATION – SCULPTURE**

### **STUDY FROM LIFE - IV**

**Course Code: FNA2603**

**Credit Units: 02**

**Course Objective:**

The objective of sculptural study from life is to learn human forms in details. It provides the skill to sculpt human figure in realistic way based on anatomy, planes, body masses, balance, posture and rhythm.

**Course Contents:**

**Module I**

Life Drawing:- Bust & Portrait:- Study of Human Portrait and bust using different drawing tools to study blocks, posture and rhythm, unity of body parts, inter-related force of lines, foreshortening and finishing.

**Module II**

Head Study Male & Female, Building of Armature study in clay and direct plaster.

**Module III**

Understanding of structure and proportion and detail modeling of full figure. Waste mould technique & casting in PoP.

**No. of works to be done – 08**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

- Human Anatomy, James Horton
- The Sculptor's Handbook, Prof H. F. Ten Holt

## COMPOSITION - IV

**Course Code: FNA2604**

**Credit Units: 02**

### **Course Objective:**

The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

### **Course Contents:**

#### **Module I**

Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

#### **Module II**

Building of armature for direct work in plaster or cement on the given topic.

#### **Module III**

Waste mould and piece mould technique and casting in wax.

**No. of works to be done – 06**

### **Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- Modeling a Likeness in Clay, Daisy Grubbs
- The Complete Guide to Sculpture. Modeling and Ceramics. Techniques and materials by Barry Midgley.

## METAL CASTING - II

**Course Code: FNA2605**

**Credit Units: 02**

### **Course Objective:**

The course is designed to improve the skills in working with these two mediums based on textural values and technical differences chiseling out artist's own expressions.

### **Course Contents:**

#### **Module I**

Making maquettes in wax or clay alongwith addition, alteration & modification depending upon the layout. Enlargement of the maquette in round or relief

#### **Module II**

Student will learn the process of sand casting.

#### **Module III**

Finishing, grinding, buffing, and polishing.

**No. of works to be done – 03**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## MURAL - IV

**Course Code: FNA2606**

**Credit Units: 02**

**Course Objective:**

This course is to provide advanced training to work on wall surface using various mediums emphasizing all possible techniques. It provides professional exposure and professional knowledge of handling mural materials.

**Course Contents:**

**Module I**

Practical mural work on slab using mosaic tiles

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## PHOTOGRAPHY - IV

**Course Code: FNA2607**

**Credit Units: 02**

### **Course Objective:**

The objective of this course is to provide advanced exposure on photography highlighting on all possible creative aspects on natural subjects and also indoor subjects.

### **Course Contents:**

#### **Module I**

Introduction to the process of developing and printing, films and their sensitivity. Basic knowledge of photo printing papers and various chemicals.

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon
- Photo techniques by Lee Frost
- Location Photography Secrets by Andy Snow

## **CERAMICS - IV**

**Course Code: FNA2608**

**Credit Units: 02**

### **Course Objective:**

This course is to provide training on creative techniques on ceramics.

### **Course Contents:**

#### **Module I**

Creating innovative texture and design on claywork.

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## ASSEMBLAGE - IV

**Course Code: FNA2609**

**Credit Units: 02**

**Course Objective:**

This course is designed to provide creative experimental training on assemblage.

**Course Contents:**

**Module I**

Methods of technical assemblage aesthetically

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## SCULPTURE METHODS AND MATERIALS - IV

**Course Code: FNA2610**

**Credit Units: 02**

### **Course Objective:**

The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

### **Course Contents:**

#### **Module I**

Types of clay, Plaster of Paris, Cement & its properties

#### **Module II**

Nature and types of wood its growth and process of seasoning use of various tools and equipments.

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Fundamental of Indian Art by S. N. Dasgupta
- Dance of Shiva by A. K. Coomaraswamy
- Transformation of Nature in Art by A. K. Coomaraswamy

## **SPECIALISATION – APPLIED ARTS** **DRAWING AND ILLUSTRATION – IV**

**Course Code: FNA2611**

**Credit Units: 02**

**Course Objective:**

Drawing exercises are to learn accurate observation and skills of graphic presentation, and various exercises on illustrations.

**Course Contents:**

**Module I**

Illustrate children story book.

**No. of works to be done – 04**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## DESIGN – VI

**Course Code: FNA2612**

**Credit Units: 03**

### **Course Objective:**

This course provides a clear concept of various aspects of designing. It is specially planned for a graphic artist to enable students to develop a commercial skill in design work.

### **Course Contents:**

#### **Module I**

Comparatively study of different types of outdoor layouts like Hording, bus shelter, Poster etc

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- Graphic Arts Manual, Irwing E. Field, Arne Press, New York, 1980

#### **References:**

- Design Graphics, C. L. Martin, Macmillan Co. London.

## PACKAGING - II

**Course Code: FNA2613**

**Credit Units: 02**

**Course Objective:**

Making of various packaging according to products environment and needs

**Course Contents:**

**Module I**

Advanced exercises on packaging according to various shapes and styles.

**No. of works to be done – 08**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Packaging Art for Export by Nduka Nwosu
- Packaging: The art of the right proposition: An artistic from: Groser (HTML) – Nicola Gordon-Seymour

## PRINTING TECHNIQUES-IV

**Course Code: FNA2614**

**Credit Units: 02**

### **Course Objective:**

This course is designed for learning basic techniques in print making, surface printing relief media and use of printing equipment and tools. This course provides training on technical method of making relief blocks.

### **Course Contents:**

#### **Module I**

Originals for reproduction (Monochrome, half tone originals)

Half tone negative –making.

Half tone block making.

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

- Color Harmony for the Web, Cailin Boyle

## COMPUTER GRAPHICS – IV

**Course Code: FNA2615**

**Credit Units: 01**

**Course Objective:**

To work on design related software's for various purpose.

**Course Contents:**

**Module I**

Tools interface and Applications of Flash software.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Color Harmony for the Web, Cailin Boyle

## TEXTILE DESIGN-II

**Course Code: FNA2616**

**Credit Units: 02**

**Course Objective:**

To enable creation of various types of textile designs and patterns.

**Course Contents:**

**Module I**

Fundamental of Textile Design: Motif, Repeat & Design Concept, Setting of Repeat & Change or Repeat into Design.

**Module II**

Design for Block Printing :

- Design for Block Printing
- Design for Screen Printing

**No. of works to be done – 08**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

## ADVERTISING THEORY - IV

**Course Code: FNA2617**

**Credit Units: 02**

### **Course Objective:**

This course is to acquaint students about Printing process, how the international advertising works, public relation and future of advertising.

### **Course Contents:**

#### **Module I: Basic Principles of Printing Processes**

Line /Half tone copy

Relief or Letter Press (Introduction, Principle & Plate Making

Intaglio or Gravure (Introduction, Principle & Cylinder Making

#### **Module II: Off Set & Four Colour Process Reproduction**

- Planography or Offset (Introduction, Principle & Plate Making, Two Cylinder
- Three Cylinder & Four Cylinder Press System
- Colour mixing principles
- Colour separation method

#### **Module III: International Advertising**

#### **Module IV: Public Relation**

Definition of Public Relation

Comparison between Advertising & Public Relation

Need & Scope of Public Relation

Basic elements of Public Relation

Objectives of Public Relation

Public Relation Advertising

#### **Module V: Future of advertising in developing countries**

Relevance of marketing approach to national goals

Advertising regulation

Stage of development

### **Examination Scheme:**

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

## **SPECIALISATION – PAINTING**

### **DRAWING - VI**

**Course Code: FNA2618**

**Credit Units: 02**

**Course Objective:**

This course will be found on learning pen & ink drawing technique depicting various objects and nature. It is to develop skill in handling black and white distribution, tonal values and texture which will lead to expertise in visualization.

**Course Contents:**

**Module I: Still Life in pen & ink**

Study of selected assorted objects in advanced drawing techniques using various drawing tools based on eye level, relative proportion, perspective, structure, form, volume, texture, source of light and its effect, balance and also tonal values in analytical process.

**Module II: Landscape/ Nature Study (outdoor) in pen & ink**

Advanced training in landscape drawing depending upon artist's observation, concept of addition and elimination, simplification. Study from nature as a controlled design, difference of handling near and distant objects.

**Module III: Life Drawing- Portraiture in pen & ink**

Advanced drawing study of human heads based on proportion, masses and specific feature and character using various media with emphasis on manner of finished execution.

Life Drawing-Full Figure: Advanced drawing study from full human figure based on structure of human form and anatomy using life models.

**No. of works to be done – 20**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

# PAINTING - VI

**Course Code: FNA2619**

**Credit Units: 03**

## **Course Objective:**

This is an intensive and advanced training in painting using variety of painting mediums and tools. Mastery of technical aspects of painting provides advanced knowledge for the learners. It is an exposure to different schools, traditions, techniques and media of painting practiced through the ages in details.

## **Course Contents:**

### **Module I: Still Life**

Creative composition in acrylic or oil colour on canvas.

### **Module II: Painting from life**

Portraiture and full figure: Advanced study of human head and full figure using colours. The knowledge of advanced techniques of colour application in monochrome and full colour.

### **Module III: Landscape**

Exploring outdoor painting to capture the various moods of nature.

### **Module IV: Mix Media**

Experimentation with various painting mediums exploring innovative techniques to represent thoughts and dreams in creative form.

**No. of works to be done – 12**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

### **Text:**

- The portrait by Norbert Schneider.

## COMPOSITION - IV

**Course Code: FNA2620**

**Credit Units: 02**

### **Course Objective:**

The objective of composition exercise is to study theory of composition, individual approach to the possibilities. Exploration of creative composition of the real world and imaginary world in unique visual presentation, to improve concept of creative sense.

### **Course Contents:**

#### **Module I**

Composition Exercises working on still life, life and nature study – outdoor and indoor. The 2-D and 3-D objects, pictorial space, forms sub division and grouping. Use of colour and textural values

#### **Module II**

Creative composition exercise based on individual layouts using various painting mediums giving more stress on oil on canvas also on acrylic.

**No. of works to be done – 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

- The portrait by Norbert Schneider.
- Color by Edith Anderson Feisner.

## MURAL - II

**Course Code: FNA2621**

**Credit Units: 02**

### **Course Objective:**

This course is to innovative training to work on wall surface using various mediums emphasizing technical aspects. It provides professional exposure and good knowledge of handling mural materials to work on wall surface.

### **Course Contents:**

#### **Module I**

Designing for mural work as per the advanced techniques of working on wall surface with tiles, Arrangement of tiles and fixing on board for final execution.

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

## PRINT MAKING-II

**Course Code: FNA2622**

**Credit Units: 01**

### **Course Objective:**

This course is designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

### **Course Contents:**

#### **Module I**

Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

#### **Module II**

Advanced experimentation with monochrome & multi-color lithography etching – intaglio/photo process, advanced print making, use of multicolor relief print and mixed media and further experimentation.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- The art of the print by Fritz Eicherberg
- The bite of print by Frank and Dorothy Gettein
- The art of Print by Earl G. Mueller
- The art of Etching by E.S.Lumdsen
- Manual of woodcut printmaking by J. Hillier
- Screen Process Printing by Schwalbach

## PAINTING METHODS AND MATERIALS - IV

**Course Code: FNA2623**

**Credit Units: 02**

### **Course Objective:**

The Course is planned to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

### **Course Contents:**

#### **Module I**

Classification and variation of colours.

Chemical factors and cause of changing colours.

#### **Module II**

Techniques of fresco painting

Tempera Techniques

#### **Module III**

Cataloging, Concept of art galleries and auction houses.

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- The painter's handbook by Stan Smith & Prof. H. F. Tenhalt
- Materials and methods of painting by Lynton Lamb

#### **References:**

- A manual of painting Materials and techniques by Mark Daid Gaottsegen
- Notes on the techniques of painting by Hilaire Hiler

## **SPECIALISATION – ANIMATION**

### **COMPUTER ANIMATION – II**

**Course Code: FNA2624**

**Credit Units: 03**

**Course Objective:**

Objective of this course is to undergo Maya deformers, rigging, animation, dynamics, lighting, rendering so the student can have complete knowledge of the software.

**Course Contents:**

**Module I**

Deformers, Rigging, Animation

**Module II**

Dynamics, Lighting & Rendering

**No. of works to be done – 12**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

- Mastering Maya 2009 by Eric Kelly
- Character Animation Fundamentals (Digital) by Chris Kirshbaum.
- Character Rigging (Digital) Carlo Sansonetti
- Mental Ray. Global Illumination (Rendering Techniques) by Matt Hartle

## CLAY MODELING – II

**Course Code: FNA2625**

**Credit Units: 03**

### **Course Objective:**

Objective of this course is to teach to visualize in 3-dimension way so that student can understand mass, volume etc while doing digital modeling. It also helps student to know about anatomy and muscles flow of human form.

### **Course Contents:**

#### **Module I**

Creating 3D models using clay

Morphing of 3D Models

#### **Module II**

Creating a short Clay Animation.

**No. of works to be done – 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Exploring character design - Kevin Hedgpeth, Stephen Missal - Art
- 3-D Human Modeling and animation by Peter Ratner - Performing Arts

## SCRIPT WRITING – II

**Course Code: FNA2626**

**Credit Units: 02**

### **Course Objective:**

Objective of this course to know about story, story concept and scripting according to characters and their roles.

### **Course Contents:**

#### **Module I**

Illustration of a story and Character Designing (Digital)

#### **Module II**

Character design and creating Story Boarding as per the Frames.

Background and layout planes. (Digital)

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Scripting to screening
- The Complete Book of Scriptwriting by: J. Michael Straczynski

## DIGITAL IMAGING – IV

**Course Code: FNA2627**

**Credit Units: 02**

### **Course Objective:**

Video editing is the process of editing segments of video footage, special effects and sound recordings.

The objective is to edit a raw footage collected from a live shoot and Computer Graphics (Moving and still images) in order to get a final output.

### **Course Contents:**

#### **Module I**

Basics of Editing software and tools

Learning and implementing the concept of editing

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Adobe Premiere Pro CS4 Classroom in a Book by Adobe Creative Team
- Adobe Premiere Pro for Dummies by Keith Underdahl

## PHOTOGRAPHY-VI

**Course Code: FNA2628**

**Credit Units: 02**

### **Course Objective:**

The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments on figurative, depending upon time and mood. It also provides experimental experience on indoor subjects.

### **Course Contents:**

#### **Module I**

Composition exploring portrait situations including effects of light. Setting up studio lights and experimentation.

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

## PAINTING-II

**Course Code: FNA2629**

**Credit Units: 02**

### **Course Objective:**

This is an intensive and advanced training to equip the students with a great skill for original and creative visual expression using different painting mediums and tools. Mastery of technical aspects provides essential foundation for the learners, though it is only means, not the end. Painting is the visual expression of thoughts, dreams and experiences. It is an introductory exposure to different schools, traditions, techniques and media of painting practiced through the ages.

### **Course Contents:**

#### **Module I: Still Life**

Painting Study ( Monochrome) from selected well-arranged objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values, colour balance and colour perspective.

- Still life : multi-colour with water colour

#### **Module II: Painting from life**

Portraiture and full figure: Head study and full figure study (monochrome) same as drawing from life models (male & female)

- Portrait : multi-colour technique

#### **Module III: Landscape**

Copy work from traditional paintings.

Copy work (traditional painting)

#### **Module IV: Mix Media**

Copy work (Indian & western) from traditional paintings and opaque colour technique

**No. of works to be done – 16**

### **Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- The portrait by Norbert Schneider.

# Syllabus – Seventh Semester

## HISTORY OF MODERN ART - I

Course Code: FNA2701

Credit Units: 02

### Course Objective:

The objective of teaching history of art is to acquaint the students with visual cultures from the earliest time to the present. The course is designed on the conviction that the learners can understand its relation to his own time and the technology at his command through an awareness of the relationship to his artistic predecessors.

### Course Contents:

#### Module I: Indian Art

Company School

Kalighat

Calcutta School

Progressive Art Group, Shilpi Chakra

Indian Art Collages and Galleries

#### Module II: Western Art

Mannerism (El Greco, Tintoretto)

Baroque (Rembrandt, Vermeer, Rubens)

#### Module III

Post-Impressionism, Expressionism & Symbolism.

### Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## PRACTICAL TRAINING EVALUATION-II

**Course Code: FNA2735**

**Credit Units: 02**

### **Course Objective:**

The Practical Training can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. The students have to prepare a project and give a presentation highlighting the following:

#### **BFA (Applied Art)**

- Organizational structure
- Design Development
- Software's used for designing
- Type of printing machines used
- Industry feedback

#### **BFA (Painting)**

- About Senior Artist and his/her history, work style etc.
- Student's independent work style.

#### **BFA (Animation)**

- Organizational structure
- Demo reel
- Software's used for 2D / 3D animation
- Personal review of the students management skill
- Animation studio feedback

### **Assessment Scheme:**

Continuous Evaluation: (based on Internship File and the observations of the faculty guide/ supervisor)	15%
Feedback from Company/ Organization:	25%
Final Evaluation: (Based on Internship Report, Viva/ Presentation)	60%

## **SPECIALISATION – SCULPTURE**

### **STUDY FROM LIFE - V**

**Course Code: FNA2702**

**Credit Units: 02**

#### **Course Objective:**

The objective of sculptural study from life is to learn human forms in details. It provides the skill to sculpt human figure in realistic way based on anatomy, planes, body masses, balance, posture and rhythm.

#### **Course Contents:**

##### **Module I**

Life Drawing:- Bust & Portrait:- Study of Human Portrait and bust using different drawing tools to study blocks, posture and rhythm, unity of body parts, inter-related force of lines, foreshortening and finishing.

##### **Module II**

Head Study Male & Female, Building of Armature study in clay and direct plaster.

##### **Module III**

Understanding of structure and proportion and detail modeling of full figure. Waste mould technique & casting in PoP.

**No. of works to be done – 04**

#### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

#### **Text & References:**

##### **Text:**

- Modeling a Likeness in Clay, Daisy Grubbs

##### **References:**

- Human Figure, Walter Foster
- Anatomy, Walter Foster
- Figure Drawing, Patricia Monahan with Albany Wiseman
- Human Anatomy, James Horton
- The Sculptor's Handbook, Prof H. F. Ten Holt

## COMPOSITION - V

**Course Code: FNA2703**

**Credit Units: 02**

### **Course Objective:**

The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

### **Course Contents:**

#### **Module I**

Detailed and advance sketches in clay of given subjects and the enlargement in round and relief exploring various possible techniques of moulding and casting, direct building processes.

#### **Module II**

Building of armature for direct work in plaster or cement on the given topic.

#### **Module III**

Waste mould and piece mould technique and casting in wax.

**No. of works to be done – 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- The Sculptor's Handbook, Prof H. F. Ten Holt

#### **References:**

- The Complete Guide to Sculpture. Modeling and Ceramics. Techniques and materials by Barry Midgley.

## METAL CASTING - III

**Course Code: FNA2704**

**Credit Units: 02**

### **Course Objective:**

The course is designed to improve the skills in working with these two mediums based on textural values and technical differences chiseling out artist's own expressions.

### **Course Contents:**

#### **Module I**

Making maquettes in wax or clay alongwith addition, alteration & modification depending upon the layout. Enlargement of the maquette in round or relief.

#### **Module II**

Student will learn the process of sand casting

#### **Module III**

Finishing, grinding, buffing, polishing

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Contemporary Stone Sculpture, Dona Z. Meliach
- Dictionary of tools by R. A Salaman.
- Methods and Materials of Sculpture by David Raid.
- The Sculptor's Handbook, Prof H. F. Ten Holt
- The Complete Guide to Sculpture. Modeling and Ceramics. Techniques and materials by Barry Midgley.

## MURAL - V

**Course Code: FNA2705**

**Credit Units: 02**

**Course Objective:**

This course is to provide an advanced training on Mural.

**Course Contents:**

**Module I**

Experimentation on mural work in professional way with direct and indirect methods, designs, materials and techniques including Mosaic tiles, Fresco, Encaustic and assemblage along with glaze, distemper, plastering and installing on wall.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## PHOTOGRAPHY - V

**Course Code: FNA2706**

**Credit Units: 02**

**Course Objective:**

This course is to provide an advanced training on photography.

**Course Contents:**

**Module I**

Advanced training on photography capturing various moods from nature & indoor subjects with special light effects emphasizing on different types of lenses to explore experimental photographic techniques.

**No. of works to be done – 20**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon
- Photo techniques by Lee Frost
- Location Photography Secrets by Andy Snow

## **CERAMICS - V**

**Course Code: FNA2707**

**Credit Units: 02**

**Course Objective:**

This course is to provide training on creative techniques on ceramics.

**Course Contents:**

**Module I**

Working on 3D creative form, introduction to glazing.

**No. of works to be done – 06**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## ASSEMBLAGE - V

**Course Code: FNA2708**

**Credit Units: 02**

**Course Objective:**

This course is designed to provide creative experimental training on assemblage.

**Course Contents:**

**Module I**

Advanced creative assemblage.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## SCULPTURE METHODS AND MATERIALS - V

**Course Code: FNA2709**

**Credit Units: 02**

### **Course Objective:**

The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

### **Course Contents:**

#### **Module I**

System of indigenous casting foundry practice, metals and alloys.

#### **Module II**

Coppers and its alloys, metals and aluminium etc. melting points of different metals. Properties of bronze preparation of modeling was and reins, finishing and technical treatments.

### **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Fundamental of Indian Art by S. N. Dasgupta
- Dance of Shiva by A. K. Coomaraswamy
- Transformation of Nature in Art by A. K. Coomaraswamy

## DESIGN - VII

**Course Code: FNA2710**

**Credit Units: 05**

**Course Objective:**

Students will learn the various exercises of Design according to the promotion of products and services.

**Course Contents:**

**Module I**

Promotional campaign for any product (indoor as well as out door advertisement)

**No. of works to be done – 04**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

- Graphic Arts Manual, Irwing E. Field, Arne Press, New York, 1980

**References:**

- The Art of Human Illustration, Nick Meglin,
- Corporate Graphics, Mike Quon

## PACKAGING - III

**Course Code: FNA2711**

**Credit Units: 03**

**Course Objective:**

Various Packaging Designs.

**Course Contents:**

**Module I**

3D forms in thermo coal & card board etc.

**No. of works to be done – 08**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

- Packaging Art for Export by Nduka Nwosu
- Packaging: The art of the right proposition: An artistic from: Groser (HTML) – Nicola Gordon-Seymour

## DRAWING AND ILLUSTRATION-V

**Course Code: FNA2712**

**Credit Units: 02**

### **Course Objective:**

Drawing exercises are to learn accurate observation and skills of graphic presentation, and various exercises on illustrations.

### **Course Contents:**

#### **Module I**

Illustrate Graphic Novels and Book/Magazine Covers.

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

- Anatomy & Drawing, Victor Perard, Pitman Publishing, New York, 1955

#### **References:**

- The Art of Drawing Heads and Hands, Walter Brooks, M. Grumbacher, New York, 1966.

## COMPUTER GRAPHICS – V

**Course Code: FNA2713**

**Credit Units: 02**

**Course Objective:**

To work on design related software's for various purpose.

**Course Contents:**

**Module I**

Advance study of Flash software and Applications.

**No. of works to be done – 04**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Color Harmony for the Web, Cailin Boyle

# PHOTOGRAPHY-V

**Course Code: FNA2714**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments in darkroom on light control, developing and fixing the pictures. It also provides experimental experience on indoor and outdoor subjects.

## **Course Contents:**

### **Module I**

Experiments on indoor and outdoor subjects. Post Production research in dark room.

**No. of works to be done – 12**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon

# HISTORY OF DESIGN-I

**Course Code: FNA2715**

**Credit Units: 02**

## **Course Objective:**

History of Graphic Design provides an overview of the historical styles, movements, people, and events of design to help inspire one to design more creative, appropriate, and intelligent solutions to advertising and design problems.

## **Course Contents:**

### **Module I**

Medieval, Illuminated Manuscript

- Rococo
- Victorian
- Wood Type Poster
- Arts & Crafts, Mission, Craftsman
- Art Nouveau
- Minimalism
- Cubism
- Futurism
- Surrealism
- Constructivism
- De Stijl, Mondrian
- Propaganda poster
- Art Deco, Art Moderne
- Beck map (not a transit map)
- Fifties, Doo Wop
- International Typographic Style
- Lubalin type treatment
- Sixties
- New Wave, Post Modern
- Macrap
- Punk, Deconstructivism
- Information Graphics (not USA Today)
- Millennium
- Ornament

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

*Text:*

## **SPECIALISATION – PAINTING**

### **DRAWING - VII**

**Course Code: FNA2716**

**Credit Units: 03**

**Course Objective:**

Advanced drawing exercise is an exposure to various creative aspects and contemporary techniques of drawing exploring all available drawing tools and mediums such as pencil, charcoal, crayons, ink, colour and brush. This exercise provides accuracy in observation and wide opportunity to study and experiment variety of significant possibilities of line work.

**Course Contents:**

**Module I: Portrait study**

Portrait study with charcoal from model, life study.

**Module II: life study**

Life study from a model in different media of drawing.

**Module III: Full Figure**

Advanced drawing study of human head and full body (male & female) exploring complex detailing and finishing from different viewpoints and angles using suitable drapery background and surrounding.

**Module IV:** creative and individual composition using pen and ink

**No. of works to be done – 08**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

- An Introduction to Drawing by James Horton in association with the Royal Academy of Arts.

**References:**

# PAINTING & COMPOSITION - I

**Course Code: FNA2717**

**Credit Units: 05**

## **Course Objective:**

Painting is an activity which requires a long time involvement to achieve excellence. This stage to explore one's own ideas and style. Studying various schools of art, traditional to modern and contemporary. This stage is to focus in one particular style of his or her own after learning various techniques of paintings. The students would produce/create a number of works of art, paintings and drawings in a fashion of specializing in the subject. It is to specialize in thinking and imagination which create good art.

Advanced exercise on composition work provides thorough knowledge on theory of composition, individual approach to the possibilities and experimental innovative aspects to create unique visual presentation enriched with artistic and aesthetic value. Working with figurative and non-figurative arrangement of objects.

## **Course Contents:**

### **Module I**

Sketching/making layouts based on life experience, culture and people

**Medium:** Pastel (dry/oil)/water colour.

### **Module: II**

Painting on individual compositions based on the layouts

**Medium:** Acrylic/oil/tempera on canvas/paper/board.

### **Module III**

Composition Exercises working on objects from real life and nature. Creative transformation of real world according to the possibilities (2-D & 3-D), use of colour and textural values, form and individual expression

### **Module IV**

Creative composition exercise from imagination emphasizing on individual vision and concept, complete pictorial interpretation, theme, expression of moods, symbolism, dramatization, and distortion for emotional effect. Project on independent creative work.

**No. of works to be done – 16**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

- Big book of drawing and painting by Francisco Asensio Cerver
- Notes on the techniques of Painting by Hilaire Hiler
- Method and Materials by Lynton Lamb.

- Painting Course by Ronald Pearsall
- The portrait by Norbert Schneider.
- Color by Edith Anderson Feisner.

## MURAL - III

**Course Code: FNA2718**

**Credit Units: 02**

### **Course Objective:**

This course is for innovative training to work on wall surface using various mediums emphasizing technical aspects. It provides professional exposure and good knowledge of handling mural materials to work on wall surface.

### **Course Contents:**

#### **Module I**

Designing for mural work as per the advanced techniques of working on wall surface with tiles .arrangement of tiles and fixing on board.

#### **Module II**

Relief mural in P.O.P & mix media.

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Painting Murals: Image, Ideas & Techniques by Patrica Seligman
- Paintings Murals Fast & Easy: 21 (Design for walls, canvas you can paint with a sponge ) by Terrence Tse, Theodore
- Paintings Murals Step by Step by Charles Grund.

## PRINT MAKING - III

**Course Code: FNA2719**

**Credit Units: 02**

### **Course Objective:**

This course is designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

### **Course Contents:**

#### **Module I**

Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

#### **Module II**

Advanced experimentation with monochrome & multi-color lithography, etching – intaglio/photo process, aquatint, mezzotint, advanced print making, use of multicolor relief print and mixed media and further experimentation.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- The art of the print by Fritz Eicherberg
- The bite of print by Frank and Dorothy Gettein
- The art of Print by Earl G. Mueller
- The art of Etching by E.S.Lumdsen
- Manual of woodcut printmaking by J. Hillier
- Screen Process Printing by Schwalbach

# PAINTING METHODS AND MATERIALS - V

**Course Code: FNA2720**

**Credit Units: 02**

## **Course Objective:**

This course is designed to provide a thorough knowledge of methods and technical aspects of drawing and painting work. It helps the students to handle the materials and tools in scientific way.

## **Course Contents:**

### **Module I**

Technique of Jaipur Murals.

Ceramics, glass and terra-cotta tiles.

### **Module II**

Various modern techniques in Painting and Printmaking.

Restoration and Preservation.

### **Module III**

Exhibition Display and Lighting.

## **Examination Scheme:**

<b>Components</b>	<b>CT</b>	<b>P</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

### **Text:**

- The painter's handbook by Stan Smith & Prof. H. F. Tenhalt
- Materials and methods of painting by Lynton Lamb

### **References:**

- Artists Techniques by Dr. Kohei Aida
- A manual of painting Materials and techniques By Mark Daid Gaottsegen

## COMPUTER ANIMATION-III

**Course Code: FNA2721**

**Credit Units: 03**

### **Course Objective:**

Objective of this course is to undergo Maya deformers, rigging, animation, dynamics, lighting, rendering so the student can have complete knowledge of the software.

### **Course Contents:**

#### **Module I**

Dynamics, Lighting & Rendering

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

## CLAY MODELING-III

**Course Code: FNA2722**

**Credit Units: 03**

**Course Objective:**

**Course Contents:**

**No. of works to be done –**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

- 3-D Human Modeling and animation by Peter Ratner - Performing Arts

## CLAY ANIMATION-I

**Course Code: FNA2723**

**Credit Units: 02**

**Course Objective:**

**Course Contents:**

**Module I**

**No. of works to be done –**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

Action! Acting lessons for CG Animators by John Kundert-Gibbs

## DIGITAL IMAGING – V

**Course Code: FNA2724**

**Credit Units: 02**

### **Course Objective:**

The course objective is to instill the concept of compositing in students which is the process of combining different visual elements into one to give a complete one final scene.

### **Course Contents:**

#### **Module I**

Basics of Compositing software and tools

Learning and implementing the concept of compositing.

**No. of works to be done – 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Combustion Ground Rules -Michael Todd Peterson

# PHOTOGRAPHY-V

**Course Code: FNA2725**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments in darkroom on light control, developing and fixing the pictures. It also provides experimental experience on indoor and outdoor subjects.

## **Course Contents:**

### **Module I**

Experiments on indoor and outdoor subjects. Post Production research in dark room.

**No. of works to be done – 12**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## PROJECT - II

Course Code: FNA2732

Credit Units: 03

### FOR ANIMATION SPECIALIZATION

#### Course Objective:

The objective of this course is to help the student in their preparation of their Show Reel and let them understand the pipeline procedure of the industry by working in groups.

#### Methodology

Students are advised to work in small groups and make a short animation clip.

#### Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Note: -** Marking is based on submitted project work (Show reel)

# Syllabus – Eighth Semester

## HISTORY OF ART - VIII

**Course Code: FNA2801**

**Credit Units: 02**

### Course Objective:

The objective of teaching history of art is to acquaint the students with visual cultures from the earliest time to the present. The course is designed on the conviction that the learners can understand its relation to his own time and the technology at his command through an awareness of the relationship to his artistic predecessors.

### Course Contents:

#### Module I: Indian Art

Ravi Verma  
Madras School  
Progressive Artist Group

#### Module II: Western Art

Rococo (Reynolds, Hogarth)  
Classicism (David, Ingres)

#### Module III

Cubism, Fauvism, Surrealism & Abstractionism.

### Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **PORTFOLIO DEVELOPMENT AND PRESENTATION WITH EXHIBITIONS**

**Course Code: FNA2837**

**Credit Units: 5**

**Course Objective:**

Portfolio Development & Presentation is for the students who are in the final stage of specialization in a particular subject. The students are to prepare a portfolio which contains all type of works relating to the subjects studied by them.

**Course Contents:**

Submission & Presentation

**Module I**

As decided by faculty.

**Examination Scheme:**

<b>Components</b>	<b>C</b>	<b>P</b>	<b>A</b>	<b>EE (Presentation, Report &amp; Viva)</b>
<b>Weightage (%)</b>	15	10	5	70

### **FOR ANIMATION SPECIALIZATION**

**Course Objective:**

The objective of this course is to help the student in their preparation of their Demo Reel and let them understand the pipeline procedure of the industry by working in groups.

**Course Contents:**

**Methodology**

Students are advised to work on individual short animation clip.

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>C</b>	<b>A</b>	<b>FP</b>
<b>Weightage (%)</b>	10	15	5	70

**Note: -** Marking is based on submitted project work (Demo reel)

## **SPECIALISATION – SCULPTURE**

### **STUDY FROM LIFE - VI**

**Course Code: FNA2802**

**Credit Units: 02**

**Course Objective:**

The objective of sculptural study from life is to learn human forms in details. It provides the skill to sculpt human figure in realistic way based on anatomy, planes, body masses, balance, posture and rhythm.

**Course Contents:**

**Module I**

Drawing- study of full human figure based on human anatomy, proportion, planes and masses.

**Module II**

Study of Full Figure of Male & Female in clay, building of armature emphasizing on detail modeling and texture.

**Module III**

Waste mould technique, casting in plaster of Paris and cement.

**No. of works to be done – 06**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

## COMPOSITION - VI

**Course Code: FNA2803**

**Credit Units: 02**

### **Course Objective:**

The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

### **Course Contents:**

#### **Module I**

Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

#### **Module II**

Building of armature for direct work in plaster or cement on the given topic.

#### **Module III**

Waste mould and piece mould technique and casting in wax.

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## METAL CASTING - IV

**Course Code: FNA2804**

**Credit Units: 02**

### **Course Objective:**

The course is designed to improve the skills in working with these two mediums based on textural values and technical differences chiseling out artist's own expressions.

### **Course Contents:**

#### **Module I**

Taking a waste or piece moulds in PoP. Casting in this mould with wax and fixing runners and risers and preparation of mould for firing.

#### **Module II**

Firing of the mould in a kiln. And pouring of molten metal.

#### **Module III**

Breaking open the mold and cutting of runners and risers. Grinding buffing and polishing and patina.

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Contemporary Stone Sculpture, Dona Z. Meliach

- Methods and Materials of Sculpture by David Raid.
- The Sculptor's Handbook, Prof H. F. Ten Holt
- The Complete Guide to Sculpture. Modeling and Ceramics. Techniques and materials by Barry Midgley.

## MURAL-IV

**Course Code: FNA2805**

**Credit Units: 02**

**Course Objective:**

This course is to provide an advanced training on Mural.

**Course Contents:**

**Module I**

Experimentation on mural work in professional way with direct and indirect methods, designs, materials and techniques including Mosaic tiles, Fresco, Encaustic and assemblage along with glaze, distemper, plastering and installing on wall.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## PHOTOGRAPHY-IV

**Course Code: FNA2806**

**Credit Units: 02**

**Course Objective:**

This course is to provide an advanced training on photography.

**Course Contents:**

**Module I**

Advanced training on photography capturing various moods from nature & indoor subjects with special light effects emphasizing on different types of lenses to explore experimental photographic techniques in dark room and out door.

**No. of works to be done – 20**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Photomechanic & Printing by J.S. Mertle & Gordon
- Photo techniques by Lee Frost
- Location Photography Secrets by Andy Snow

## CERAMICS-IV

**Course Code: FNA2807**

**Credit Units: 02**

**Course Objective:**

This course is to provide training on creative techniques on ceramics.

**Course Contents:**

**Module I**

Working on 3D creative form, introduction to glazing.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## ASSEMBLAGE-IV

**Course Code: FNA2808**

**Credit Units: 02**

**Course Objective:**

This course is designed to provide creative experimental training on assemblage.

**Course Contents:**

**Module I**

Advanced creative assemblage.

**No. of works to be done – 06**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- The complete guide to Sculpture, Modeling and Ceramics: Techniques and materials by Barry Midgley.

## SCULPTURE METHODS AND MATERIALS-IV

**Course Code: FNA2809**

**Credit Units: 02**

### **Course Objective:**

The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

### **Course Contents:**

#### **Module I**

System of indigenous casting foundry practice, metals and alloys.

#### **Module II**

Coppers and its alloys, metals and aluminum etc. melting points of different metals. Properties of bronze preparation of modeling was and reins, finishing and technical treatments.

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

- Fundamental of Indian Art by S. N. Dasgupta
- Dance of Shiva by A. K. Coomaraswamy
- Transformation of Nature in Art by A. K. Coomaraswamy

## DESIGN-VIII

**Course Code: FNA2810**

**Credit Units: 05**

**Course Objective:**

Students will learn the various exercises of Design according to the promotion of products and services.

**Course Contents:**

**Module I**

Promotional campaign for any product (indoor as well as out door advertisement)

**No. of works to be done – 04**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

**Text:**

- Graphic Arts Manual, Irwing E. Field, Arne Press, New York, 1980

## PACKAGING-IV

**Course Code: FNA2811**

**Credit Units: 03**

**Course Objective:**

Various Packaging Designs

**Course Contents:**

**Module I**

3D forms in thermo coal & card board etc.

**No. of works to be done – 08**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

- Packaging Art for Export by Nduka Nwosu
- Packaging: The art of the right proposition: An artistic from: Groser (HTML) – Nicola Gordon-Seymour

## DRAWING AND ILLUSTRATION-VI

**Course Code: FNA2812**

**Credit Units: 02**

### **Course Objective:**

Drawing exercises are to learn accurate observation and skills of graphic presentation, and various exercises on illustrations.

### **Course Contents:**

#### **Module I**

Illustrate Graphic Novels and Book/Magazine Covers.

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

#### **Text:**

- Anatomy & Drawing, Victor Perard, Pitman Publishing, New York, 1955

#### **References:**

## COMPUTER GRAPHICS-VI

**Course Code: FNA2813**

**Credit Units: 02**

**Course Objective:**

To work on design related software's for various purpose.

**Course Contents:**

**Module I**

Advance study of Flash software and Applications.

**No. of works to be done – 04**

**Examination Scheme:**

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**Text & References:**

- Color Harmony for the Web, Cailin Boyle

# PHOTOGRAPHY-VI

**Course Code: FNA2814**

**Credit Units: 02**

## **Course Objective:**

The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments in darkroom on light control, developing and fixing the pictures. It also provides experimental experience on indoor and outdoor subjects.

## **Course Contents:**

### **Module I**

Experiments on indoor and outdoor subjects. Post Production research in dark room.

**No. of works to be done – 12**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## **Text & References:**

# HISTORY OF DESIGN-II

**Course Code: FNA2815**

**Credit Units: 02**

## **Course Objective:**

History of Graphic Design provides an overview of the historical styles, movements, people, and events of design to help inspire one to design more creative, appropriate, and intelligent solutions to advertising and design problems.

## **Course Contents:**

### **Module I**

Medieval, Illuminated Manuscript

- Rococo
- Victorian
- Wood Type Poster
- Arts & Crafts, Mission, Craftsman
- Art Nouveau
- Minimalism
- Cubism
- Futurism
- Surrealism
- Constructivism
- De Stijl, Mondrian
- Propaganda poster
- Art Deco, Art Moderne
- Beck map (not a transit map)
- Fifties, Doo Wop
- International Typographic Style
- Lubalin type treatment
- Sixties
- New Wave, Post Modern
- Macrap
- Punk, Deconstructivism
- Information Graphics (not USA Today)
- Millennium
- Ornament

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

*Text:*

## DRAWING-VIII

**Course Code: FNA2816**

**Credit Units: 03**

### **Course Objective:**

Advanced drawing exercise is an exposure to various creative aspects and contemporary techniques of drawing exploring all available drawing tools and mediums such as pencil, charcoal, crayons, ink, colour and brush. This exercise provides accuracy in observation and wide opportunity to study and experiment variety of significant possibilities of line work.

### **Course Contents:**

#### **Module I: Portrait study**

Portrait study with charcoal from model, life study.

#### **Module II: life study**

Life study from a model in different media of drawing.

#### **Module III: Full Figure**

Advanced drawing study of human head and full body (male & female) exploring complex detailing and finishing from different viewpoints and angles using suitable drapery background and surrounding.

**Module IV:** creative and individual composition using pen and ink

**No. of works to be done – 08**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

#### **Text:**

## PAINTING & COMPOSITION-II

**Course Code: FNA2817**

**Credit Units: 05**

### **Course Objective:**

Painting is an activity which requires a long time involvement to achieve excellence. This stage to explore one's own ideas and style. Studying various schools of art, traditional to modern and contemporary. This stage is to focus in one particular style of his or her own after learning various techniques of paintings. The students would produce/create a number of works of art, paintings and drawings in a fashion of specializing in the subject. It is to specialize in thinking and imagination which create good art.

Advanced exercise on composition work provides thorough knowledge on theory of composition, individual approach to the possibilities and experimental innovative aspects to create unique visual presentation enriched with artistic and aesthetic value. Working with figurative and non-figurative arrangement of objects.

### **Course Contents:**

#### **Module I**

Sketching/making layouts based on life experience, culture and people

**Medium:** Pastel (dry/oil)/water colour.

#### **Module: II**

Painting on individual compositions based on the layouts

**Medium:** Acrylic/oil/tempera on canvas/paper/board.

#### **Module III**

Composition Exercises working on objects from real life and nature. Creative transformation of real world according to the possibilities (2-D & 3-D), use of colour and textural values, form and individual expression

#### **Module IV**

Creative composition exercise from imagination emphasizing on individual vision and concept, complete pictorial interpretation, theme, expression of moods, symbolism, dramatization, and distortion for emotional effect. Project on independent creative work.

**No. of works to be done – 16**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

### **Text & References:**

## MURAL-IV

**Course Code: FNA2818**

**Credit Units: 02**

### **Course Objective:**

This course is for innovative training to work on wall surface using various mediums emphasizing technical aspects. It provides professional exposure and good knowledge of handling mural materials to work on wall surface.

### **Course Contents:**

#### **Module I**

Designing for mural work as per the advanced techniques of working on wall surface with tiles .arrangement of tiles and fixing on board.

#### **Module II**

Relief mural in P.O.P & mix media.

**No. of works to be done – 04**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

## PRINT MAKING-IV

**Course Code: FNA2819**

**Credit Units: 02**

### **Course Objective:**

This course is designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

### **Course Contents:**

#### **Module I**

Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

#### **Module II**

Advanced experimentation with monochrome & multi-color lithography, etching – intaglio/photo process, aquatint, mezzotint, advanced print making, use of multicolor relief print and mixed media and further experimentation.

**No. of works to be done – 10**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

- Screen Process Printing by Schwalbach

# PAINTING METHODS AND MATERIALS-VI

**Course Code: FNA2820**

**Credit Units: 02**

## **Course Objective:**

This course is designed to provide a thorough knowledge of methods and technical aspects of drawing and painting work. It helps the students to handle the materials and tools in scientific way.

## **Course Contents:**

### **Module I**

Technique of Jaipur Murals.

Ceramics, glass and terra-cotta tiles.

### **Module II**

Various modern techniques in Painting and Printmaking.

Restoration and Preservation.

### **Module III**

Exhibition Display and Lighting.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## **Text & References:**

### **Text:**

## COMPUTER ANIMATION-IV

**Course Code: FNA2821**

**Credit Units: 03**

### **Course Objective:**

Objective of this course is to undergo Maya deformers, rigging, animation, dynamics, lighting, rendering so the student can have complete knowledge of the software.

### **Course Contents:**

#### **Module I**

Advance Lighting, Rendering and Compositing.

**No. of works to be done – 12**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

### **Text & References:**

## CLAY MODELING-IV

**Course Code: FNA2822**

**Credit Units: 03**

**Course Objective:**

**Course Contents:**

**No. of works to be done –**

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

**Text & References:**

## DIGITAL IMAGING-VI

**Course Code: FNA2824**

**Credit Units: 02**

### **Course Objective:**

The course objective is to instill the concept of compositing in students which is the process of combining different visual elements into one to give a complete one final scene.

### **Course Contents:**

#### **Module I**

Basics of Compositing software and tools

Learning and implementing the concept of compositing.

**No. of works to be done – 06**

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

## SPECIALISATION - APPLIED ARTS

### VISUALIZATION - I

**Course Code: FNA4101**

**Credit Units: 08**

**Course Objective:**

Additionally for MFA students, to develop further an ability to pursue independent research and articulate ideas in writing through a sound understanding of a range of historical, theoretical and philosophical approaches to art and an understanding of the relevance of these to their work

**Course Contents:**

**Module I**

Introduction to Visualization

**Module II**

Execution of ONE advertising campaigns on consumer's Institutional (Services), related with any of the appropriate medias including Print, Television, Transit etc. and in various techniques available

**Module III**

Photography module:

- a) Product Shoot
- b) Models shoot
- c) Creative photography

These shoots are to be utilized in the campaign making process by the students.

**Module IV**

Advanced learning of Corel draw and Photoshop software

**Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

**Text & References:**

# GRAPHIC DESIGNING - I

**Course Code: FNA4102**

**Credit Units: 08**

## **Course Objective:**

Graphic designing is a creative field of work which involves imagination in communicating with users. It deals with working with object, shape, text, images etc. It is used to create corporate identity. Brochures, advertisements, print media, product, packaging and icon etc. The objective of this course is to make the students professionals and fully equipped with the software. So that the software's become just a more tool for them to execute the finished artworks.

## **Software's introduced:**

Adobe Illustrator: Adobe Photoshop, Corel Draw

## **Course Contents:**

### **Module I**

To edit photographs, create artistic imagery

### **Module II**

To create illustrations, logos

### **Module III**

Product window display for interactive media

## **Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

## **Text & References:**

### **Text:**

## PORTRAITURE SCULPTURE-II

**Course Code: FNA4212**

**Credit Units: 08**

**Course Objective:**

This is to provide about working on realistic sculpture.

**Course Contents:**

**Module I**

Realistic study work supported by preparatory studies and techniques.

**Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

## MURAL (SCULPTURE) - II

**Course Code: FNA4213**

**Credit Units: 08**

### **Course Objective:**

The objective of this course is to provide advanced techniques of working knowledge on wall surface. It gives a professional exposure about all kinds of mural work.

### **Course Contents:**

#### **Module I**

Preparing suitable layout for mural followed by modification required according to the materials to be used

#### **Module II**

Preparing the base and surface

#### **Module III**

Final work followed by the installation.

### **Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

# Syllabus - Third Semester

## DISSERTATION AND VIVA - I

**Course Code:** FNA4337

**Credit Units:** 02

### Course Objective:

#### PAINTING-

This course is about research work on a particular school of art, artist so on. It is for enrichment of professional knowledge through detail study and research about the field and artist as well. It focuses to put authentic information with analytical approach.

This paper is to be submitted in a form of a report, printed with necessary and authentic reproductions, photographs, or images as illustrations.

Portfolio development is also a part of this course. This project compiles the selected art works have been executed during MFA programme (first and second year both). The portfolio development project has the purpose of preparing students for future prospects in the professional field.

#### APPLIED ARTS & SCULPTURE-

This is to provide professional exposure for the researchers.

### Course Contents:

#### Module I

- a. Research work on the given topic from various sources like art institutes, galleries, libraries so on.
- b. Collecting materials like notes, photographs and reproductions.

#### Module II

Portfolio development project (compiling of selected art works).

### Examination Scheme:

Components	PR	PS	V
Weightage (%)	70	15	15

(V-Viva; PR-Project Report; PS-Presentation)

## VISUALIZATION - III

**Course Code: FNA4301**

**Credit Units: 08**

### **Course Objective:**

There will be students advanced understanding of design in relation to advertising. Students will do intensive exercises to understand design, market trends, target audience, consumer behavior. Each and every media will be explored. Learn new ways of thinking, processing and communicating ideas, emotions, and experiences through your discipline.

### **Course Contents:**

#### **Module I**

Execution of ONE advertising Campaigns on consumer's product or Institutional (Services)

Related with any of the appropriate Medias including Print, Television, Transit etc. and in various techniques available.

#### **Module II**

Perform the simple exercises on the software's, they will explore flash and illustrator software's in their campaign making process.

### **Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

### **Text & References:**

- The Art of Human Illustration, Nick Meglin,
- Corporate Graphics, Mike Quon

# Syllabus - Fourth Semester

## DISSERTATION AND VIVA - II

**Course Code:** FNA4437

**Credit Units:** 06

**Course Objective:**

This course is to continue the research work to put the collected materials together for developing the body of the dissertation on the particular subject.

Putting up the necessary photographs, reproductions with the text materials.

**Course Contents:**

**Module I**

Preparing the final paper along with necessary photographs, reproductions with detail information.

**Module II**

- a. Submission of printed dissertation paper.
- b. Reviewing dissertation paper.

**Examination Scheme:**

Components	PR	PS	V
Weightage (%)	70	15	15

(V-Viva; PR-ProjectReport; PS-Presentation)

## **SPECIALIZATION – APPLIED ARTS**

### **VISUALIZATION - IV**

**Course Code: FNA4401**

**Credit Units: 08**

**Course Objective:**

Encouraging a cross-disciplinary studio environment in which the workshop is a lab to collaboratively explore design and making processes, the Program welcomes students from a wide range of creative backgrounds to make original work with an applied purpose. Applied art transform ideas into symbols to convey specific messages for and in the public.

**Course Contents:**

**Module I: Preparation of a project and presentation**

This subject focuses on defining, researching and producing a project work with a formal structure for research and exploration in deciding upon any one topic chosen by the students. These projects are formally presented by all MFA students reflecting on their time and experience within the Program.

**Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

**Text & References:**

## **SPECIALIZATION – PAINTING**

### **DRAWING - IV**

**Course Code: FNA4406**

**Credit Units: 08**

**Course Objective:**

This course of drawing is in the final stage of learning in an art institute. Students are provided required space and freedom to express themselves. The drawings to be executed in this stage to focus on confined and individual perception. The drawings may be creating in a series, therefore, all the drawings to have a kind of continuation. This stage is after experimenting various techniques and possibilities of using different mediums for exploring individual and innovative ideas. Working in one particular style and media is advisable in this stage.

**Course Contents:**

**Module I: Creative Sketching**

Making layouts

**Module II: Creative Drawing**

Drawing figurative / non-figurative compositions.

**Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

**Text & References:**

- An Introduction to Drawing, James Horton in association with the Royal Academy of Arts.
- Grassroot of Art, Y. Herbert Read
- How to draw and paint, Hazel Harrison, from Art School
- Human Figure, Walter Foster
- Anatomy, Walter Foster
- Heads, Walter Foster
- Figure Drawing, Patricia Monahan with Albany Wiseman
- Human Anatomy, James Horton
- Big book of Drawing and painting, Francisco Asensio Cerver.

## CREATIVE PAINTING - IV

**Course Code: FNA4407**

**Credit Units: 08**

### Course Objective:

The course emphasizes the development of a sustained artistic practice through exploration, experimentation, and intensive studio work and study. Opportunities to investigate areas beyond one's concentration are made available.

The course is also to refine the technical aspect like developing individual style of colour application and introduce new treatment of theme and concept as reflection of life experience and social awareness.

This is to render conceptual art to explore new media of creative art like installation art or video art.

### Course Contents:

#### Module I

Painting in oil / acrylic colour on canvas (figurative /non-figurative).

#### Module II: Installation/video art

Creating conceptual art in installation/video art medium.

### Examination Scheme:

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

### Text & References:

- Big book of drawing and painting, Francisco Asensio Cerver
- Notes on the techniques of Painting, Hilaire Hiler
- Method and Materials, Lynton Lamb.
- Artist's Handbook, Ray Smith
- Artist's Encyclopedia, John Quick

- Art Class, Copy Right 1999, Harper Collins Publishers.
- Images of the human body, Pepin Van Roojen.
- A Concise History of Modern Painting, 1974 Thames & Hudson, London
- Painting Course, Ronald Pearsall
- The portrait, Norbert Schneider.
- Color, Edith Anderson Feisner.

## MURAL (PAINTING) - IV

**Course Code: FNA4408**

**Credit Units: 08**

### **Course Objective:**

The objective of this course is to provide advanced techniques of working knowledge on wall surface. It gives a professional exposure about all kinds of mural work including mixed materials.

### **Course Contents:**

#### **Module I**

Preparing suitable layout for mural followed by modification required according to the materials to be used.

#### **Module II**

Preparing the base and surface.

#### **Module III**

Final work followed by the installation.

### **Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

### **Text & References:**

- Ajanta Murals published by Indian Archeology Dept.
- Techniques of Indian paintings and Murals published by Indian Archeology Dept.
- Decorative Murals by Donna Dewberry

## PORTRAITURE - IV

**Course Code: FNA4409**

**Credit Units: 08**

**Course Objective:**

The objective of this course is to provide advanced training on portrait painting exploring all mediums.

**Course Contents:**

**Module I**

Portrait study in oil on canvas.

**Examination Scheme:**

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(A-Attendance; PT- Portfolio; HA-Home Assignment; CT-Class Test)

**Text & References:**

**Text:**

- Big book of Drawing and painting, Francisco Asensio Cerver

**References:**

- Figure Drawing, Patricia Monahan with Albany Wiseman
- Human Anatomy, James Horton

## ART CRITICISM (PAINTING) - II

**Course Code: FNA4410**

**Credit Units: 03**

### **Course Objective:**

The objective of this course is to provide Critical Study of Art.

### **Course Contents:**

#### **Module I**

History of criticism, Development of Art History as Human Discipline, Visual Analysis and Psycho-analytic point of View on Art.

#### **Module II**

Critical References on Painting and Sculpture (Indian and Western)

### **Examination Scheme:**

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

- Eligible for appearing assessment of Qualifications pack-occupational standards for a merchandiser (sub sector-Apparel) according to National Occupational Standards, NSQF level 5, approved by National Skill Development Corporation (NSDC)

# APPAREL MERCHANDISING

## Syllabus - Semester First

### INTRODUCTION TO APPAREL MERCHANDISING

**Course Code: VFD2151**

**Credit Units: 03**

**Course Objective:**

This course helps the students to get a preview to develop merchandising skills for apparel products. This course covers the basic knowledge of fashion; textile and apparel industry, Safety Management and introduction to merchandizing,

**Course Contents:**

**Module-I: Fashion Terminology**

**The Language of fashion** – Introduction to fashion concept; Definitions and meaning, Classification, Style, Change, Acceptance, Taste, Look, Trends, Season; Color, Texture, Fit, Comfort, Brand or Designer Label, Fashion cycles. **Adoption Theories** – Trickle down, Trickle up, Trickle-across and Laver's law. **Fashion clothing categories, Styling & Size range** - Women's wear, Men's wear Children's wear

**Module-II: Introduction to Textiles**

**Textile fibers & Yarns** - Definition & classification. **Woven fabrics** - Classification, fabric properties and identification of fabrics types. **Knit fabrics** – Classification, fabric properties and identification of fabrics types. **Textile processing** – Introduction to Dying, Printing and Finishing. **Care symbols & Labeling.**

**Module-III: The Overview of Apparel Industry & Apparel Production**

**Apparel industry** - Major segments; **Organizational structures** - Structure of Export house, Buying house and Domestic companies, Buyer's classification and buying network in exports. Sources of fabric buying and selling of finished fabric. **Apparel construction techniques** - Introduction to Drafting & Pattern making. **Machinery & Equipment** - Cutting, sewing, finishing, washing, stain removal, embellishment. **Production methodology** - Assembly line, individual garment manufacturing, job work, quality checkpoints. **Design & Tech-pack** - Introduction & Definition. Labelling & Packing.

**Module-IV: Workplace Safety Management Practices**

**Health and safety instructions** – Importance of sound health, hygiene and good habits. Ill-effects of alcohol, tobacco and drugs.. Occupational health and safety risks. Signage related to health and safety. Personal protective equipments & its use. Method of write report on the hazards and risks / threats faced at workplace. event of a mock drills, evacuation procedures, accident, emergency or fire **Environmental management system (EMS)** - EMS procedures. Proper disposal system for waste and by-products. Identification, handling and storage of hazardous substances.

**Module-V: Basics of Apparel Merchandising**

Introduction, Functions and role of Merchandiser, Merchandising Process, Meaning and Need for quality control in Merchandising process.

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>L</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(**A**-Attendance; **L**- Learning Assignments; **CT**-Class Test; **EE**-End Semester Examination)

**Text & References:**

## Syllabus - Semester Second

### APPAREL MARKET RESEARCH AND PRODUCT ANALYSIS

**Course Code: VFD2251**

**Credit Units: 03**

**Course Objective:**

This course focuses on the awareness about apparel business plans, market target is and design brief. Scopes of this course include Market trend assessment, Determine design brief, Identification of Design brief and analyze.

**Course Contents:**

**Module-I: Assessment of Market Trends**

**Research on market trends** - Conduct research on target market, materials, trims, better or new sources / suppliers for procurement; **Design review** - Review previous designs & samples developed by the business to assess relevance to current design/samples;

**Module-II: Determination of Key Criteria for Design Brief**

**Identify processes** - Identify business processes and client goals; Identify Quality standards for designs, Identify budget, cost points and timing constraints, **Tech-pack review** - Check the Tech-pack received and identify it with the design brief given by the designer and also checked if all specifications are there in the tech-pack, If not clarify and modify if needed.

**Module-III: Organizational Context & Technical Knowledge**

**Organizational processes** - Organization's policies, procedures, guidelines and standards for dealing with buyers/clients, Recognizing and adapting to cultural differences in the workplace, including modes of behavior and interactions, Production capacity and processes of business are identified. Systematically work completion with attention to detail without damage to goods and equipment. Awareness of Intellectual Property rights, **Technical processes** - Garment construction techniques and processes, Detailed knowledge of a range of fabrics and trims, An understanding on the cost process involved in making an apparel, Vendors, Compliance Standards.

**Examination Scheme:**

Components	A	L	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; L- Learning Assignments; CT-Class Test; EE-End Semester Examination)

**Text & References:**

- A J Chuter, Introduction to clothing production management

## Syllabus - Semester Third

### VENDOR MANAGEMENT AND PRODUCT EVALUATION

Course Code: VFD2351

Credit Units: 03

#### Course Objective:

This course is aimed to understand the merchandiser's way to set the objectives to develop the product given following the work flow and the norms required. This course covers preparation of Bill of Materials, Identification of Vendor or Supplier and Evaluation of different parameters.

#### Course Contents:

##### Module-I: Vendor Identification.

**Vendor database** - Method of Identify the vendors for initial development and confirmation on bulk if approved, Method of update the Vendor database, **Swatches collection** - Collect all kind of relevant swatches to meet the design brief from fabrics to trims and get confirmation on the same. **Appropriateness of Tech-pack** - Method of appropriate personnel are consulted with to confirm feasibility.

##### Module-II: Preparation & Evaluation of the Bill of Material (BOM)

**Bill of Material (BOM)** – Procedure and Method of preparation a well formed BOM (Bill of Material) for each of the styles in the collection. Method of specify all that is required like the raw material, parts, quantities of each needed to manufacture the end product. **Primary costing** - Method of initial costing of the sampling derived. **Consumption identification** - Appropriate personnel identified for the consumption to be made for making, **Follow up Procedures** - Required involvement of patternmaker and tailor, Determination of monitoring procedures and checking points, follow-ups with IE Department and calculation of the SAM (Standard Allowed Minute) of the sample. **TNA (Time and Action) calendar** – Method of TNA (Time and Action) calendar preparation made with the estimated details got to fix on the delivery date after confirmation on the sample.

##### Module-III: Organizational Context & Technical Knowledge

**Organizational processes** – Understand the protocol to obtain more information on work related tasks. Understand the limits of merchandiser's role and responsibilities in relation to IT service requests or incidents and reporting structure. **Technical processes** - Understand how to use equipment, templates and processes for preparing the tech-pack., understand the fabrics and garments that require stitching by hand or machine stitching. Understand Sewing and Pattern making techniques to put across ideology the tailor master to make the same, Understand concepts of product and pricing life cycle, Procedure for Pricing and costing.

#### Examination Scheme:

Components	A	L	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; L- Learning Assignments; CT-Class Test; EE-End Semester Examination)

#### Text & References:

- A J Chuter, Introduction to clothing production management.
- Gini Stephens Frings (1999): Fashion: From concept to consumer, Prentice-Hill Inc.
- Grace I kunz, Merchandising: Theory, Practice and Principles..
- V. D Dudeja, Professional Management of Fashion Industry.

## Syllabus - Semester Fourth

### PROTOTYPE PREPARATION AND MERCHANDISE PLAN

**Course Code: VFD2451**

**Credit Units: 03**

**Course Objective:**

This course helps the students to learn how to develop the samples against the design brief for analyzing and getting it confirmed for bulk production as well as how to plan and process for production. The scope of this course is Prototype Preparation and Merchandise plan.

**Course Contents:**

**Module-I: Prototype Preparation**

**Specification sheet follow-ups** - Procedure of check the specification sheet prepared in accordance with standard format. Preparation, coordination and confirmation of pattern cutting, detailed drawings and mini- markers. Preparation, coordination and confirmation of patterns developed are according to the shrinkage report, tested and received. Procedure and method of checking of assembled garments according to specifications sheet and accepted garment assembly techniques. **Prototype test report** – Procedure and method of Prototype sent for test report either according to company norms or as per the buyers standards requested.

**Module-II: Merchandise Plan.**

**Buyer approval process** - Preparation, coordination and confirmation Prototype checked with design team and sent to buyer for approval and accordingly changes done if any and confirmed for production. Size sets approved internally. **P.O (Purchase Order) & P.I (Performa Invoice)** - Procedure and Method of raise and receive P.O (Purchase Order) & P.I (Performa Invoice) after confirmation on the costing to buyer and vendor. **Approval and updating of work sheets** - Procedure and method of approval and updating of all the work sheets, like the trims sheet, fabric sheet, consumption sheet (fabric and thread) this also includes in tech-pack, if any. Procedure and method of actual TNA updating that sent for approval.

**Examination Scheme:**

Components	A	L	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; L- Learning Assignments; CT-Class Test; EE-End Semester Examination)

**Text & References:**

- A J Chuter, Introduction to clothing production management

# Syllabus - Semester Fifth

## PRE-PRODUCTION MANAGEMENT

Course Code: VFD2551

Credit Units: 03

### Course Objective:

This course focuses on the method of organizes and coordinates the pre-production meeting and a well prepared pre-production file.

### Course Contents:

#### Module-I: Updating Time & Action Calendar (TNA)

**Time & Action Calendar (TNA) Follow-ups-** Procedure and method of updated on the TNA prepared. Procedure and method of coordination with all departments in the organization. Procedure and method of check on mainly with status on the warehouse to know if the raw materials, trims and all necessary ordered are getting in-house on time.

#### Module-II: Preparation of pre-production file and pre-production meeting (PPM)

**Pre-production file** - Procedure and method of create a good and accurate and pre-production file. - Procedure and method of create Trims and accessories card, Procedure and method of create a card that contained all the approved swatches / lab dips and samples with strike offs etc. Procedure and method of maintaining the file with the tech-pack, production order sheet with size break up, cut plan and mini marker, packaging specification, washing instruction (if any), Test report, TNA Chart and important mail conversations etc. **Pre-production meeting** - Procedure and method of clarifies and address any potential issues if any at the pre-production meeting. Procedure and method of identify any other issues, raised if any from the other department personnel attending the meeting. Procedure and method of handling to sort out issue based PPM meeting, if any. Procedure and method of prepare minutes of the PPM meeting.

#### Module-III: Applied Learning Assignments. (Practical)

The students will have to prepare a pre-production file for the part of their study. Each student has to submit their file in a standard format guided by the faculty for the final evaluation. The students are asked to give a brief oral presentation with 'Power Point' to the class about their understanding. The submission of pre-production file and presentation will be part of student's internal examination scheme.

### Examination Scheme:

Components	A	L	Practical	EE
Weightage (%)	05	10	15	70

(A-Attendance; L- Learning Assignments; CT-Class Test; EE-End Semester Examination)

# Syllabus - Semester Sixth

## SHIPMENT & DOCUMENTATION MANAGEMENT

**Course Code: VFD2651**

**Credit Units: 03**

### Course Objective:

This course is aimed to understand how the merchandiser coordinates with the factory to check on the smooth running of it to meet the delivery line. This course discuss about how the merchandiser handles the program during shipment while the quality check is done and all approved.

### Course Contents:

#### Module-I: Buying House Coordination

**Buyer Coordination** - Procedure and method of coordinate with buyer or buying house if any clarification is required that is if any issue raised during production is not well identified internally. **QA or 3rd Party QA** - Procedure and method of coordinating with buying house QA or 3rd Party QA for initial/mid and final inspection of shipment. Procedures and methods of inspection

#### Module-II: Coordination and Management of Shipment

**Execution of orders** - Procedure and method of check execution of orders whether it is running on time. **Shipping and Documentation** - Procedure of shipping and documentation. Method of coordination with shipping and documentation department for forwarding approved shipment. Procedure and method of closely work with logistics and help shipping department with timely information of packing reports for preparation of shipping documents.

#### Module-III: Industrial Visits

The students will have to visit various export and buying houses for the part of their study.

The students are asked to give a brief oral presentation with 'Power Point' to the class about their Understanding. They have to explain, what kind of knowledge they want to develop in the field of merchandizing and a debate will follow as well. The submission of industrial visit report and presentation will be part of student's internal examination scheme.

### Examination Scheme:

Components	A	L	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; L- Learning Assignments; CT-Class Test; EE-End Semester Examination)

## Syllabus - Semester First

### DESIGN ECO-SYSTEM

**Course Code: VFD2152**

**Credit Units: 03**

**Course Objectives:**

The aim of the course is to provide Performance Criteria, Knowledge & Understanding and skills & abilities required to organize/maintain work areas and activities to ensure tools and machines are maintained as per norms to a Fashion Designer.

**Course Contents:**

**Module-I: Maintain the work area**

(1) Handle materials, drawing and pattern drafting tools, equipment and the system for computer designing with care (2.) Use correct handling procedures. (3.) Use materials to minimize waste (4.) Use of measuring devices effectively

**Module-II: Maintain the work Tools**

(1) Maintain tools and equipment (2) Carryout running maintenance within agreed schedules (3) Carryout maintenance and/or cleaning within one's responsibility (4) Report unsafe equipment and other dangerous occurrences (5) working a comfortable position with the correct posture.

**Module-III: Maintain the work equipment.**

(1) Use cleaning equipment and methods appropriate for the work to be carried out (2)Dispose of waste safely in the designated location (3) Carryout cleaning according to schedules and limits of responsibility

**Module-IV: Maintain the Self and work Computers**

(1.) Request for up gradation of system or software's when required for effective working (2.) Always a backup file to be maintained when working on various design software's (3.) All soft copies of design work to be maintained in files as well for future reference (4.) Personal hygiene and duty of care. (5.) Safe working practices and organizational procedures. (6.) Limits of your own responsibility, (7.) Ways of resolving with problems within the work area. (8.) The production process and the specific work activities that relate to the whole process (9.)The importance of effective communication with colleagues (10) the lines of communication, authority and reporting procedures

**Module-V: Case Study (Compulsory)**

Industrial visit and case presentation

**Examination Scheme:**

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

**Text:**

# Syllabus - Semester Second

## FASHION DESIGN-RESEARCH

**Course Code: VFD2252**

**Credit Units: 03**

**Course Objectives:** The aim of the course is the development of design concepts for commercial production. The Initial process includes conducting market research and trend analysis for the particular season and identifying a theme for the collection; then creating a mood board and color board based on the theme, develop an entire range according to the business plan and as per the theme board.

### **Course Contents:**

#### **Module-I: Designing Fashion Design Research**

(1) Review previous 10 years trends and their impact in terms of accuracy. (2) Research on fashion trends and identify the emerging theme (3.) Product range and previous designs developed by the business are reviewed to assess relevance to current design.

#### **Module-II: Conduct fashion design research**

(1) Business processes and client goals are identified. (2.) Research is conducted on target market, materials, designs, processes and marketing materials according to the needs of the design. (3.) Quality standards for designs are identified.

#### **Module-III: Design Brief**

(1) Design themes and style requirements of design are determined (2) Budget, cost points and timing constraints are identified. (3) Requirements for use of fabrics, materials, suppliers and production processes are determined. (4) Client Requirements are confirmed with the client

#### **Module-IV: Organize fashion design research.**

(1) Analyze the market trends and targets for the season (2) Rule-based decision-making processes (3) Complete accurate well written work with attention to detail

#### **Module-V: Case Presentation (Compulsory)**

Case presentation with complete mood boards and design presentation for the following season.

### **Examination Scheme:**

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

# Syllabus - Semester Third

## DESIGN PREPARATORY PROCESS

**Course Code: VFD2352**

**Credit Units: 03**

**Course Objectives:**

The aim of the course is to designs a clothing range and gets it finalized to make the prototype garments.

**Course Contents:**

**Module-I: Determine key criteria for design brief**

(1) Determined Design themes and style. (2) Recognizing and adapting to cultural differences in the workplace, including modes of behavior and interactions (3.) Identify improvements.

**Module-II: Technical Aspects**

(1.) To do the design by hand sketches or by Computer Aided Design (CAD). (2.) Garment construction techniques and processes. (3.) Detailed knowledge of a range of fabrics and trims

**Module-III: Financial Aspects**

(1) An understanding on the cost process involved in making an apparel (2) Costing of created designs / product ensembles with knowledge of sale ability of a product designed (3) Knowledge of Intellectual Property Rights with respect to designs.

**Module-IV: Pre proto Analyses**

(1) Provide opinions on work in a detailed and constructive way (2) communicate with others in the company and to clients in writing (3) Clarification on the design to be developed with the team members

**Module-V: Case Presentation (Compulsory)**

Case presentation for any two constructed garment with their technical details i.e. Teck-pack and Coasting

**Examination Scheme:**

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

**Text:**

- Winifred Aldrich, CAD in Clothing and Textiles

- Linnea Dayton, Cristen Gillespie, The Photoshop Cs/Cs2 Wow!

# Syllabus - Semester Fourth

## PROTOTYPE GARMENT DEVELOPMENT

**Course Code: VFD2452**

**Credit Units: 03**

### **Course Objectives:**

The aim of the course is about how technical package is made after garment range confirmation and process of how prototype garment is made for entire collection

### **Course Contents:**

#### **Module-I: Confirming Design Brief**

(1) Create techpack which clearly conveys all guidelines for development of the sample (2) Appropriate personnel are consulted with to confirm feasibility and appropriateness of techpack (3.) Sketches, drawings and samples are used to illustrate design requirements, as appropriate. (4) Given techpacks on the range to be finalised

#### **Module-II: Specify Design Processes**

(1.) Required involvement of sampling merchandiser, patternmaker, and tailor are identified, finalized and briefed about the collection (2.) Monitoring procedures and checking points are determined. (3.) Design development personnel selected are briefed and time constraints met (4.)

#### **Module-III: Proto- Type Construction**

(1) Construct the prototype and given to concerned dept for better understanding on the product, if required

#### **Module-IV: Implement Design Processes**

(1.) Development of sample is monitored to ensure budget and time constraints are met (2) Problems or inconsistencies in sample are identified and addressed. (3) Communicate with others in the company and to clients in writing (4) Evaluate the prototype sample.

#### **Module-V: Case Presentation (Compulsory)**

Case presentation for actually constructed garment with their technical details and Coasting

### **Examination Scheme:**

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

### **Text:**

- By Gillian Holman, Pattern cutting made easy
- Dorothy Wood, The Practical Encyclopaedia of Sewing

### **Reference:**

- Leila Aitken, Step by step dress making course

# Syllabus - Semester Fifth

## DESIGN DEVELOPMENT

**Course Code: VFD2552**

**Credit Units: 03**

### **Course Objectives:**

The aim of the course is about how to review the prototype garment developed for the collection

### **Course Contents:**

#### **Module-I: Evaluate Design Process**

(1) Analyze the prototype sample along with the design team (2) coordinate along with design team to check sample against the techpack given to the sampling merchandiser, the look and feel and fit of the sample (3.) Identify the prototype for the feasibility of the garment in terms of sourcing of the fabric and the trims available for the span of production.

#### **Module-II: Evaluate Development Process**

(1.) Identify various products testing to proceed with prototype (2.) Incorporate modification of the sample until approved for final production. (3.) Get approval on the prototype/final techpack, agreement finalized with the client

#### **Module-III: Complete Documentation**

(1) Document Design brief, development processes and outcomes (2) Complete Documentation processes, including filing and storing, Construct the prototype and given to concerned dept for better understanding on the product, if required

#### **Module-IV: Organization Process**

(1) Organization's policies, procedures and priorities for your area of work and your role and responsibilities in carrying out your work. (2) Limits of your responsibilities when coordinating with other department. (3) Your specific work requirements and who these must be agreed with

#### **Module-V: Industrial Case (Compulsory)**

Developing Standard Operating Procedure for an Fashion Design Team

### **Examination Scheme:**

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

### **Text**

- Tracy Diane and Tom Cassidy, Colour Forecasting

### **References:**

- Mike Easey, Fashion Marketing

## Syllabus - Semester Sixth

### HEALTH AND SAFETY EQUILIBRIUM

**Course Code: VFD2652**

**Credit Units: 03**

**Course Objectives:**

The aim of the course is to provide Performance Criteria, Knowledge, Understanding, Skills and Abilities required to comply with health, safety and security requirements at the workplace and Covers procedures to prevent, control and minimize risk to self and others.

**Course Contents:**

**Module-I: Comply with Health Requirements at Work**

1) Comply with health and safety related instructions applicable to the work place (2) Use and maintain personal protective equipment as per protocol (3) Carry out own activities in line with approved guidelines and procedures. (4) Maintain a healthy lifestyle and guard against dependency on intoxicants (5) Follow environment management system related procedures

**Module-II: Comply with Safety Requirements at work**

Identify and correct (if possible) malfunctions in machinery and equipment (2.)Report any service malfunctions that cannot be rectified. (3.) Store materials and equipment in line with manufacturer's and organizational requirements (4) safely handle and move waste and debris (5) Minimize health and safety risks to self and others due to own actions (6) Seek clarifications, from supervisors or other authorized personnel in case of perceived risks (7) Monitor the workplace and work processes for potential risks and threats

**Module-III: Comply with Security Requirements at work**

(1) Carry out periodic walk through to keep work area free from hazards and obstruction (2) Report hazards and potential risks/ threats to supervisors or other authorized personnel (3) Participate in mock drills/ evacuation procedures organized at the workplace (4) Undertake first aid, fire fighting and emergency response training (5) Take action based on instructions in the event of fire, emergencies or accidents. (6) Follow organization procedures for shutdown and evacuation when required

**Module-IV: Organization Process**

(1) To know and understand: (A) Occupational health and safety risks and methods. (B) Proper disposal system for waste and by-products (c) Signage related to health and safety and their meaning (2) limits of your responsibilities when coordinating with other department. (3) Identification, handling and storage of hazardous substances (4) effects of alcohol, tobacco and drugs

**Module-V: Industrial Case (Compulsory)**

Ill-effects of alcohol and tobacco (on Employ) – physiology & performance

**Examination Scheme:**

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

# FASHION MANAGEMENT

## Syllabus - Semester First

### FASHION ART ILLUSTRATION AND MODEL DRAWING

**Course Code: FDT2151**

**Credit Units: 03**

**Course Objective:**

The study of this course develops the student's ability to visualize the ideas and putting them in concepts for fashion garments. It gives an understanding to different illustration techniques and explores other media for creating concepts through practical assignments. Whereas Model Drawing is introduced with the concept of drawing normal figures in movement and different postures.

**Course Content:**

<b>Module I</b>	:	Sketching of Block and Flesh Figures
<b>Module II</b>	:	Photo Analysis
<b>Module III</b>	:	Rendering of Prints into flat illustration
<b>Module IV</b>	:	Detailed drawing of Basic Styles
<b>Module V</b>	:	Draping of Garments
<b>Module VI</b>	:	Introduction to Garment Drawing
<b>Module VII</b>	:	Use of different colour medium

**Submission of practical work records - (Compulsory)**

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>R</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A - Attendance; H -Home Assignment; R- Practical work records; EE-End Semester Examination)

**Text & References:**

# Syllabus - Semester Second

## FASHION THEORY

**Course Code: FDT2251**

**Credit Units: 03**

### Course Objective:

To provide a broad foundation to acquire the knowledge of fashion theory and its growth which develop the students' potential for professional activities that demand considerable independence or for fashion research work.

### Course Contents:

#### Module-I: Fashion Development

Origin of the Fashion, Effect of Industrial Revolution on Fashion; Mass production of clothing; Introduction of Retailing; Changes caused by communications, leisure, and Industry; Effect of world War-i; Effect of depression on Fashion; Effect of world War –ii; Reactionary Postwar Fashion; Fashion at 1960s; Anti fashion at 1970s; Fashion 1980s; Fashion 1990s.

#### Module-II: Fashion Evaluation & Adoption.

**Introduction** - Fashion Cycles, Length of Fashion Cycles; **Adoption**- Traditional Fashion adaption (Trickle – Down Theory), Reverse Adaption (Trickle-up or Bottom-up Theories), Mass Dissemination (Trickle-across Theory); James Laver and Laws on the Timeline of Style

#### Module-III: Study of International Fashion Centers.

France, Italy, England, Germany, Canada, United States.

#### Module-IV: Applied Learning Assignments.

Visit fashion malls and analyze current fashion styles and find social, economical, technological influence on it. Also refer the fashion magazines and newspapers for trend review. Make a report with views and reasons.

### Examination Scheme:

Components	A	L	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; L- Learning Assignments; CT-Class Test; EE-End Semester Examination)

# Syllabus - Semester Third

## COMPUTER-AIDED MANUFACTURING (CAM)

**Course Code: FDT2351**

**Credit Units: 03**

**Course Objective:**

This module makes the student know-how the Computer Applications in the Fashion & Apparel Industry.

**Course content:**

<b>Module I</b>	<b>:</b>	<b>Adobe Photoshop - Functions of Tools &amp; Working on layers</b>
<b>Module II</b>	<b>:</b>	<b>Photo-editing &amp; its usage</b>
<b>Module III</b>	<b>:</b>	<b>Demo on 'TUKA cad' Module</b>
<b>Module IV</b>	<b>:</b>	<b>Mode conversation through editing</b>
<b>Module V</b>	<b>:</b>	<b>Demo on 'Opti Tex'</b>
<b>Module VI</b>	<b>:</b>	<b>Rendering &amp; filter effects along tutorials</b>

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>H</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

# Syllabus - Semester Fourth

## FASHION MANAGEMENT

**Course Code: FDT2451**

**Credit Units: 03**

### Course Objective:

The objective of this course is to impart knowledge about fashion global market, fashion brand management, different pricing strategies, and necessary for successful employment in apparel businesses.

### Course Contents:

#### Module-I: Fashion for global market

Social, Cultural, Economic, Demographic factors relating to branded and licensed products, Analyzing potential or global market, identify target consumers and competition, market research and testing, customization

#### Module-II: Fashion Marketing Concepts

The concept of marketing, Utility, Marketing functions and related activities, The concepts of market segmentation and niche marketing, The marketing mix, The channels of distribution used in the fashion industry, Marketing and merchandising

#### Module-III: Economics in the Fashion Industry

The concept of economic goods/services, The concept of economic resources, The concept of supply and demand, Cost and retail, Gross profit and net profit.

#### Module-IV: Fashion Promotional Mix

Types of media used in fashion retail advertising, The importance of special promotional events

#### Module-V: Consumer Demand for Fashion Marketing

Consumer Groups - Demographic Trends & Psychographic Trends, Consumer spending – Personal Income, Disposable Income, Discretionary Income, Purchasing Power, Factors influencing consumer behaviour.

#### Module-VI: Pricing strategies & Decisions

Concept and importance of pricing, Factors affecting pricing decisions, Methods of pricing

#### Module-VII: Fashion Brand Management

Types and relevance of branding, Fashion & brand positioning, launching strategies, distribution, marketing campaigns for brand introduction

### Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(A-Attendance; H -Home Assignment; CT-Class Test; EE-End Semester Examination)

### Text & References:

#### Text:

# Syllabus - Semester Fifth

## FASHION FORECASTING

**Course Code: FDT2551**

**Credit Units: 03**

### Course Objective:

The students are made to start their work with the collection of data regarding fashion forecasting, trend analysis and presentations. They are then made to forecast the fashion trend and dictate fashion in their very own way.

### Course Contents:

#### Module-I: Concept of fashion forecasting (Theory)

Awareness of fashion fairs and fashion centers, Knowledge of creative writing, Reading of fashion forecast magazine, Sources of information, Role of Exhibitions and Fashion shows

#### Module-II: Fashion Forecasting Process (Theory)

Market Research- Consumer research, Shopping, Sales records; Evaluating the collections- Similar Ideas indicate fashion trends, Trends for target market; Fashion services – Collection reports, Trend books, consulting, Color services, Television/Video services, News letter services, Web sites, Directories and reference books, Fashion Magazines and news papers, Catalogs. Design Sources- Historic inspirations, Folk influences, Vintage clothing shops, Museums, Libraries and bookstores, Arts, Fabrics/Textiles, Travel, Form follows function, The street scene, The turn of the century, innovations and technologies.

#### Module-III: Applied Learning Assignments. (Practical)

- |                                    |   |   |
|------------------------------------|---|---|
| <b>Market Research</b>             | - | On site visits to fashion retailers and cloth markets and study the market trends and collect various cloth samples, catalogs etc.  |
| <b>Forecasting Exploration</b>     | - | Students will explore a variety of sources like Magazines, News papers, Internet sites and in-site, their market research reports etc. to become familiar with apparel, textile, color, style, and general culture and consumer forecasting resources. Each student will identify and report trends found to class. |
| <b>Preparation of story boards</b> | - | Students will prepare story boards for specific target.   |
| <b>Presentation of designs</b>     | - | Students will prepare fashion forecast for different seasons.   |
| <b>Final Presentation</b>          | - | Each student have to submit their Research file in a standard format guided by the faculty for the final evaluation.  |

### Course Evaluation:

Components	A	C	A & F	P	Viva	Total
Weightage (%)	10	20	20	25	25	100

(A - Attendance, C - Concept Development, A & F - Analysis & Findings, P – Presentation)

### References:

# Syllabus - Semester Sixth

## FASHION RETAILING AND VISUAL MERCHANDISING

**Course Code: FDT2651**

**Credit Units: 03**

### **Course Objectives:**

The aim of the course is to provide an integrated curriculum frame work within which students are able to acquire a range of knowledge and transferable skills relevant to employment in retail industry.

### **Course Contents:**

#### **Module-I: Introduction to Fashion Retailing & Strategies**

**Fashion Retailing**-Definition, Concept, Importance, Functions – Indian Retails vs. Global Scenario, **Retail Location**- Factors affecting location decision, Site Selection. **Retail Directions** -Value directed retailing; Service oriented retailing, Unique Merchandising, Shopping as entertainment, Street retailing, Global expansion of retailing; **Types of Retail operations** – (1) Specialty stores- Single brand or Private label retailers, Secondary spin-offs, (2) Department stores, (3) Mass Merchants – Discounters, Off-Price retailers, Outlet stores, Warehouse clubs, (4) Promotional stores, (5) Non store retailing - Mail order merchants, Party plan retailing, Electronic retailing, Television shopping, Online shopping.

#### **Module-II: Fashion Retail Functions & Organizations**

**Retailing Functions** – Merchandising, Store operations, Marketing, Sales Promotion, Finance, Real estate or Store planning, Human resources **Organizations** – (1) Shopping Centers – Traditional Malls, Diversified Malls, Value centers, Outlet Malls, Transportation centers, Recreational Malls, Town center malls; (2) The small stores, (3) The large stores, (4) Store with in a store – In store designer boutiques, Leased departments; (5) Multiple -unit stores – Chain stores, Department store groups, corporate ownerships. **Retail Buying** – Buyer's role, Duties & responsibilities of a retail buyer

#### **Module-III: Introduction to Visual Merchandising**

**Visual Merchandising** - Definition, Concept, Importance; **Store Planning** – Store Image, Target customers, Seasonal Visual merchandising, **Store Design** – (1) Windows – Special event windows, Fashion message windows, Direct-sell windows; (2) Interiors - Apparel fixtures, Folding and stacking, Accessories display **Managing Visual Merchandising Elements** - Mannequins, Standards Manuals, Presentation packages, Tele communications, Designer / Brand in-store shops

#### **Module-IV: General Principles of IPR**

**Introduction to Intellectual Property** 1.1 Concept of Intellectual Property 1.2 Kinds of Intellectual Property 1.3 Economic importance of Intellectual Property 2. **Philosophical Justification of Intellectual Property Western Theories on Private and IP** 2.1 Locke's Labour Theory of Property 2.2 Hegel's Personality Theory of Property 2.3 Marxian Theory on Private Property and IP. 3. **Indian Theory on Private Property** 3.1 Constitutional Aspects of Property 3.2 Constitutional Protection of Property and IP 4. **International Scenario** Introduction to the leading international instruments concerning intellectual property rights: the Berne Convention, Universal Copyright Convention, the Paris Convention, TRIPS, the World Intellectual Property Rights Organization (WIPO) and the UNESCO 5. **Economic Development and IPR Protection**

**6.Enforcement of Industrial Property in General** 6.1 Civil Court Procedures 6.2 Criminal Actions:  
**7.Counterfeiting Intellectual Property Rights and Human Rights** 7.1 Right to Health as Basic Human Rights and IPR 7.2 Right to Food as Basic Human Rights and IPR  
**Need for Protection of Industrial Designs** 8.1 Introduction 8.2 Justification for Protecting Design 9.  
**Subject Matter of Protection and Requirements** 9.1 Copyright on Registered Design 9.2 Industrial and International Exhibition 10. **The Designs Act, 2000** 10.1 Procedure for obtaining Design Protection 10.2 Revocation, Infringement and Remedies

**Module-V: Capstone Project (Compulsory)**

Model of Online retailing in Indian Fashion Retail Industry- Establishment and Procedural Working

**Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CS</b>	<b>CT</b>	<b>EE</b>
<b>Weight age (%)</b>	<b>05</b>	<b>10</b>	<b>15</b>	<b>70</b>

(A-Attendance; CS-Case Study; CT-Class Test; EE-End Semester Examination)

# PAINTING ARTS

## Syllabus - Semester First

### BASICS OF DRAWING AND ASIAN LANDSCAPE

**Course Code: FNA2151**

**Credit Units: 03**

**Course Objective:**

Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore painting techniques too. Structured exercises on painting include basic colour theory and pictorial composition, which enables students to be confident in the use and manipulation of colour. It also provides a clear idea of different painting practices. Like water colours and opaque colours.

**Course Contents:**

**Module I: Basics of Drawing**

Object drawing to explore basic drawing tool 'Pencil'. Suggestion of solidity by line work as well as light and shade, realization for rhythmic relationship between lines, mass, volume and texture, emphasis on various visual experiences. Quick Sketching to increase hand eye coordination and improving vision and observation skills.

- a) Learning basic elements of drawing.
- b) Object drawing.

**Module II: Asian Landscape**

Landscape drawing and rendering using pencil, charcoal pencil or colour pencils. Understanding the basic fundamentals of Asian style landscapes.

**Works to be done:**

- 1. Sketches – 20
- 2. Landscapes - 2

**Examination Scheme:**

Components	PT	CT	A	EE (Practical)
Weightage (%)	30	15	5	50

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## Syllabus - Semester Second

### BASICS OF DRAWING AND MONOCHROME FOLK COMPOSITION

Course Code: FNA2251

Credit Units: 03

#### Course Objective:

Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore Indian folk painting style & techniques too. Structured exercises on painting include basic colour theory, theme and pictorial composition, which enables students to be confident in the use and manipulation of colour of the folk traditions also provides a clear idea of different folk painting practices.

#### Course Contents:

##### Module I: Basics of Drawing

Object drawing to explore basic drawing tool 'Pencil'. Suggestion of solidity by line work as well as light and shade, realization for rhythmic relationship between lines, mass, volume and texture, emphasis on various visual experiences. Quick Sketching to increase hand eye coordination and improving vision and observation skills.

- a) Learning basic elements of drawing.
- b) Object drawing.

##### Module II: Monochrome Folk Composition

Indian folk style paintings in monochrome colours using any 2 mediums.

#### Works to be done:

- 1. Sketches – 20
- 2. Folk Paintings - 2

#### Examination Scheme:

Components	PT	CT	A	EE (Practical)
Weightage (%)	30	15	5	50

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## Syllabus - Semester Third

### ADVANCED DRAWING AND ILLUSTRATION OF INDIAN TEMPLE SCULPTURE

**Course Code: FNA2351**

**Credit Units: 03**

**Course Objective:**

Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore temple art & techniques too. It also provides a clear idea of different illustration/painting techniques. Also understanding the structural formation of objects as well as architectural structures is to be taught.

**Course Contents:**

**Module I: Drawing**

Quick Sketching to increase hand eye coordination and improving vision and observation skills.

- a) Figure Sketching
- b) Traditional architectural drawing.

**Module II: Illustration of Indian Temple Sculpture**

Illustrations and drawings related to the Indian Temple Sculpture of whole India. Understanding the various parts and formation along with architectural structure.

**Works to be done:**

- 1. Drawings – 20
- 2. Illustrations - 2

**Examination Scheme:**

Components	PT	CT	A	EE (Practical)
Weightage (%)	30	15	5	50

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## Syllabus - Semester Fourth

### ADVANCED DRAWING WITH INK & BRUSH ILLUSTRATION

**Course Code: FNA2451**

**Credit Units: 03**

**Course Objective:**

Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore illustrative techniques too. It also provides a clear idea of different Illustration style & techniques with ink and brush. Like transparent colours and opaque colours.

**Course Contents:**

**Module I: Basics of Drawing**

Quick Sketching to increase hand eye coordination and improving vision and observation skills.

- a) Figure Sketching
- b) Illustrative drawing.

**Module II: Ink and Brush Illustration**

Illustrations and drawings using ink and brush. Both single & multi-colour techniques.

**Works to be done:**

- 1. Sketches – 20
- 2. Illustrations - 2

**Examination Scheme:**

Components	PT	CT	A	EE (Practical)
Weightage (%)	30	15	5	50

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## Syllabus - Semester Fifth

### ADVANCED DRAWING & ILLUSTRATION WITH MURAL ART

**Course Code: FNA2551**

**Credit Units: 03**

**Course Objective:**

Drawing is the basic element of learning art. Advanced drawing exercises to acquire a sense of creative thinking and skills to present representational art of any style or format. Structured exercises on mural painting include basic Indian style application and composition, which enables students to be confident in the use and manipulation of Indian mural themes, style & techniques. Mural Art techniques are taught to liberate the students in context of mediums of expression.

**Course Contents:**

**Module I: Basics of Drawing**

Quick Sketching to increase hand eye coordination and improving vision and observation skills.

- a) Figure Sketching
- b) Line drawing

**Module II: Mural**

Illustrations and drawings as murals on wall or board in single/multi-colour.

**Works to be done:**

- 1. Sketches – 20
- 2. Mural - 1

**Examination Scheme:**

Components	PT	CT	A	EE (Practical)
Weightage (%)	30	15	5	50

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

## Syllabus - Semester Sixth

### ADVANCED DRAWING & ILLUSTRATION WITH VISUAL DESIGN

Course Code: FNA2651

Credit Units: 03

#### Course Objective:

Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore illustration as well as visual design styles & techniques too. Structured exercises on design include basic colour theory and visual composition, which enables students to be confident in the use and manipulation of colour and design elements. It also provides a clear idea of different design techniques and mediums. Other techniques like visual design are taught to help them develop a visual sense of design in general.

#### Course Contents:

##### Module I: Basics of Drawing

- a) Object Drawing
- b) Design Composition

##### Module II: Illustration with Visual Design

Illustrations and drawings using the basic elements of Visual Design along with developing a better sense of colour & form coordination to represent the subject.

#### Works to be done:

- 1. Drawings – 20
- 2. Illustrations - 2

#### Examination Scheme:

Components	PT	CT	A	EE (Practical)
Weightage (%)	30	15	5	50

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

# Bachelor of Science - Animation & Visual Graphics

## Syllabus - First Semester

### BASIS OF SKETCHING & DRAWING

**Course Code: ANI2151**

**Credit Units: 03**

**Course Objective:**

This course will cover the fundamentals of drawing with a focus on shapes. It will address line, tone, volume, space, scale, proportion and artistic expression. An emphasis on “process” will direct the momentum of this course

**Course Content**

**Module 1**

Introduction to pose to pose sketching (Action analysis). Rapid sketching from live models, Introduction to Acting, Modeling, Sketching from Acting, Sketching from live models, Introduction to Rapid Sketching Techniques, Sketching from Memory, live action. Basics of Acting - Style breaking, Movements.

**Module 2**

Shading in different angles of pencil strokes, formatting in different textures with pencil, shading, simple objects in drawing, simple shapes of geometrical shapes, roadsides, rivers, perspective in lines in landscapes, different head shapes, characters, human anatomy

**Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 0 marks

Part-B: Practical: 70 marks

**Text and References:**

**Text**

Drawing: The head and Figure; Jack Hamm; Penguin Publishers

**Reference**

Pencil Sketching: Thomas C Wang; John Wiley and Sons

# TYPOGRAPHY

**Course Code: ANI2101**

**CreditUnits: 03**

## **Course Objective:**

A reader rarely notices great typography, but its absence is keenly missed. Poor technique will kill even your best concept. This module will introduce you to fundamentals of Typography, concepts and give you an opportunity to polish and improve your designs

## **Course Content:**

### **Module 1**

Brief Historical overview, What is a Font?, Types classifications

Type Categories:

Serif; Sans Serif; Display; Script; Pi

Type Terminology

Type Families: Basic & Extended; Font Names; Ligatures; Text vs Display ; Text vs Display; Bold

Parts of Letters & the Optical Baseline

Noticing the Differences Between Similar Typefaces

Positive & Negative Space of Type

Figure-Ground with Type

Stretching or Squeezing Type?

Expert Sets : Lining & Oldstyle Figures, Swashes & Glyph Substitution

### **Module 2**

The Creative Brief : Project Name, Objectives, Target Audience, User Needs, Personality, Tone & Mood, Current Target Audience Mind Set, Key Target Audience Insights, Design Approach & Strategies

- Choosing an Effective Typeface

- The Personality/Mood of a Typeface

- Emotive Words

- Researching Type Online

- Legibility vs Readability

### **Module 3**

Designing with Type • Ligatures • White Space • Layout Hierarchy

- Grids

- Creating Contrasts with Type

Typeface; Weight; Size; Typeface Width; Caps/U&lc:

Soft/Hard; Straight/Oblique; Horizontal/Vertical; Few/Many; Order/Chaos; Color or

Shade; Positive/Negative

- Type Color

## **Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

### **Text**

Typography Essentials: 100 Design Principles for Working with Type (Design Essentials) by Ina Saltz

### **References**

## COMPUTER APPLICATIONS

**Course Code: ANI2102**

**Credit Units: 03**

### Course Objective:

This unit will give students a broad knowledge of the basics of computer usage in publication houses. How to work with computers, what are the design softwares? Students will study the design and layout of pages, taking into consideration the choice of typeface and positioning and choice of colour, images and text. Their work will include practical projects as well as investigations into current design and editing practices in a variety of print forms.

### Course Contents:

#### Module I: Basics of Computer

Hardware/Software, Input devices/ Output devices.

Windows, MSOffice: - Ms Word, Ms Power Point, Networking: - Lan, Wan concept.

#### Module II: Desk Top Publishing

What is DTP (Desk Top Publishing)? How it is linked with computers. Newspaper, Magazine, Book publishing is part of DTP. Software: page design packages (e.g. Adobe PageMaker, Adobe Indesign. “InDesign is a newer version of PageMaker”) to be used for design and layout purposes, text: generation and preparation for use, display, digital typesetting, editing, creation of headlines using appropriate font, creation of pages, importation and movement of copy and images, selection and cropping of photographs and graphics, use of text wrap, anchored graphics and rules, various palettes, master pages, templates etc.

### Examination Scheme:

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

# INTRODUCTION TO MULTIMEDIA AND ITS APPLICATION

(Illustrator, Coral Draw, Photoshop)

Course Code: ANI2103

Credit Units: 03

**Course Objective :** To give students a broad grounding in issues surrounding multimedia including the role of and design of multimedia systems.

## Course Content :

### Module 1

Graphics using lines. Graphics by combining basic shapes.

Make a perfect cropping of some images using Photoshop. Prepare a cut-out of images using Photoshop; use back ground for images. Colour adjustment of images. Convert a B & W image into colour.

### Module 2

Vector Graphics (Designing, Color Theory, Vector Designing & Editing, Text Formatting):

Interface: Working with menus, toolbars, Dockers. Document Setup: Setting Page Size& Orientation, Document Navigation

Rulers & Guidelines: Status Bar.

Text: Formatting, Text Layout, Skewing and rotating, Creating drop shadow, Text to Path, Extruding text.

Objects: Grouping & locking objects, Combining & breaking apart, Transforming & Shaping, Cutting objects apart, Trim, weld & Intersection of objects.

Lines & Curves: Using freehand & Bezier tool, Line properties, Arrowheads Eraser & artist media tools Nodes & Paths.

Color& Fills: Solid Color, Color Palettes, Eyedropper & Paint bucket, Fountain, Fills, Patterns, Texture Fills, Interactive Mesh Fill.

Special effects: Envelopes, Blends, Perspective, Shadow Objects, Power clip Command, Transparency, Distortion, Contour, Lens Docker.

Complex Shapes: Polygon & Stars Spirals Printing Menu.

### Module 3

Raster Graphics (Designing, Color Theory, Raster Designing & Editing, text Formatting: Adobe Photoshop, Colour modes, Colour, Using the tools, Selecting and using a tool from the toolbox, Using the tool options bar and other palettes, Customizing the workspace, Using Photoshop Help, Viewing and editing files in Adobe Bridge, Embedding information for easy identification, Automating routine tasks, Resolution and image size, Straightening and cropping an image, Making automatic adjustments, Manually adjusting the tonal range, Replacing colors in an image, etc.

## Examination Scheme:

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

# ART HISTORY

**Course Code: ANI2104**

**Credit Units: 03**

## **Course Objective :**

The objective of this course is to provide the historical understanding and foundation for students to be able to identify different art periods, describe the subject matter, form the content of these historical periods in their cultural context and to identify the media techniques used by artists during these historical periods.

## **Course Content:**

### **Module 1**

History of Western Art & Design methods

Key periods in Western Art and Design history: Prehistoric era

Classical period: Greece, Roman

Early Christian and Islamic

Medieval Art, Renaissance

Nineteenth and Twentieth century western art and design history

### **Module 2**

History of Indian Art and Design

History of Indian Art and Technique

History and Philosophy of art

### **Module 3**

Various Art movements (Renaissance, Art Deco, Art Nouveau, Bauhaus, Cubism, Futurism etc.)

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 70 marks

Part-B: Practical: 0 marks

# INTRODUCTION TO VISUAL COMMUNICATION

**Course Code : ANI2105**

**Credit Units: 03**

## **Course Objective:**

Seeing comes before words. We learn to see and recognize before we learn to speak. When we grow older as adults, the way we see things is affected by what we know and what we believe. Visual communication applies the fundamentals of major art forms for professional problem solving. It is the conveyance of ideas and information in forms that can be read or looked upon. This unit will introduce students to the history, forms, elements, theories, meaning, and principles of visual communication. Students will be given basic grounding through conventional classes and practical exercises in the form of scrapbooks so as to prepare them for undertaking the remaining courses in BJMC.

## **Course Contents:**

### **Module I: Introduction to Visual Communication**

Defining an image and visual communication (VC)

VC as integral part of human communication

Human Vision and 2 dimensional images

Human beings have highly developed seeing rather than hearing abilities

Historical trends and developments: from painting to installation art, from naturalism to impressionism to neo-realism, high-art and low-art, role of visual technologies, debates related to art and social reality

Science, Human beings, and Visual Information: how human body receives information: senses, brain, stimuli, heart, and body parts

### **Module II: Basics of Visual Communication**

Some Fields: chemical imaging, data, information, software, volume, and product visualization, technical drawing etc

Some Image Types: computer graphics, map, pictograph, photograph, moving image, table, drawing, diagram, ideogram, illustration, etc

Contemporary applications: cartography, spatial analysis, graphics, visual perception and analytics, advertising, politics, entertainment, business etc

Medium: digital, paper, electronic, electrical, web

Elements: line, shape, colour, space, form, depth, texture, light & shade, dimension, grey-scale, interactions of elements, continuity, and & proximity etc

Principles of design: contrast, harmony, proportion, balance, and movement

### **Module III: Power, Visual Representation & Society**

Human beings and visual information processing mechanism: registering selected information, processing thoughts and feelings, storing information and acting or speaking according to the information processed and stored.

Gestalt and constructivism, which are sensual, are early theories that explain the mechanics while semiotics and cognitive, which are perceptual, are more advanced modern theories that involve signs, intellect, and the mind

Consumer culture (from 19<sup>th</sup>-21<sup>st</sup> century) & growth of VC: changes in ways of seeing, ways of being seen & ways of telling

Concept of gaze: desire, voyeurism, critique of male gaze, and interactive gaze, masculine and feminine identities

Experience of images (signs: indexical, symbolic, and iconic), context in which images are interpreted (medium, form, socio-economic dimensions) and ways in which they are interpreted (cliché, stereotype, convention)

Politics of representation of mediated images: video's sensation, dreams, and manipulation; film's logic and rhetoric; advertising image's shock and seduction; political image's public image, public relations, and propaganda; and media image's persuasion and violence

#### Examination Scheme:

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 70 marks

Part-B: Practical: 0 marks

## PROJECT (WITH PRESENTATION & EVALUATION)

Course Code: ANI2132

Credit Unit:03

### GUIDELINES FOR MINI PROJECT/LIVE PROJECT

It must be based on either Industry or Creating Computer Graphics. After selecting this option a Faculty Guide will be allocated to the student by HOI and concern student will have to work with allocated faculty guide for proper guidance to complete this project. Student can choose topic as per his/her area of interest & as per the suggestion given by Faculty guide.

### EVALUATION PATTERN

#### Project Report: 70 Marks

In this report student will have give details of his/her Topic with proper Introduction, Industry overview along with proper details of his/her area. For example if he/she is working on 2D animation or clip art so they must give details on these. Following points should be covered in it:

1. The project itself on the computer
2. Report comprising of:
  1. Title page
  2. Concept note/ Ideation
  3. Storyboard
  4. Objectives
  5. Methodology
  6. Learning Outcome
  7. Conclusion

#### Presentation & Viva: 30 Marks

Students will have to make a Presentation (based on their Project Report) and it will be followed by a Viva Voice in front of a Panel of two or three faculty members.

### EVALUATION

Report	Viva	Total
70	30	100

# WORKSHOP

Course Code: ANI2133

Credit Units: 01

## OBJECTIVES

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## MAJOR THEMES FOR WORKSHOP

The workshop may be conducted on any of the following major themes:

- Acting for animation
- Lighting
- Photography
- Digital Painting
- Matt Painting
- Clay Animation
- Composting
- Painting / Oil / Water

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## GUIDELINES FOR WORKSHOP

The procedure for earning credits from workshop consists of the following steps:

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a *write up and showing the final output* which focuses on the learning outcome from the workshop.

## METHODOLOGY

The methodology followed at the workshop could be based on any one or more of the following methods:

1. Case Study
2. Simulation
3. Group Activity

## EVALUATION

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Assignment/ Write up & final output	Total
5	30	30	35	100

# Syllabus - Second Semester

## BASICS OF HTML

**Course Code: ANI2251**

**Credit Units: 03**

**Course Objective :**

Begins with an HTML overview, how HTML evolved, how to construct a basic HTML page, explore the ins and outs of formatting, Web colors, images, and links, essential elements of a Web page, to create files and folders using the correct directory structure, view source code to learn from the inspiration of others.

**Course Content:**

**Module 1:**

Course Introduction; Course software; What is a HTML and HTML 5; Getting started with tags; How to save web pages; Viewing your web pages; Basic HTML Tags ; Basic HTML template; Heading Tags; Paragraph and Break tags; Bold and Italics; HTML lists

**Module 2:**

Dealing with Images; Types of Images; Inserting Images; Image Attributes; Images and CSS; Text wrapping with CSS; CSS and image borders; Background Images; Adding captions to images

**Module 3**

Linking to other pages; Hyperlinks; Linking to other pages; Other types of hyperlinks; CSS and hyperlinks; External stylesheets; HTML lists and nav bars

**Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: A-A-Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

**Text and References:**

**Text**

# DIGITAL PHOTOGRAPHY

**Course Code: ANI2201**

**Credit Units: 02**

## **Course Objective :**

This course will help students take great photographs.

– Composition; People & nature; Lighting & color; Learn how to display pictures. Understand the mechanics of imaging; Unleash your creative potential.

## **Course Content:**

### **Module 1:**

Inside the digital camera: Image sensor and types, In-Built memory and memory cards. The Principles of Photography: The General Principles of Photography

### **Module 2:**

Types of cameras: Miniature Cameras, medium format cameras, large format camera and digital cameras. Comparative study of digital and analogue (SLR) camera. Advantages and applications of digital photography. Lenses: Normal, wide, tele, zoom, PC and TS lens. Working of a lens and angle of view of a lens.

### **Module 3:**

Camera Controls: Shutter speed aperture exposure control, auto winder or motorized camera, depth of field, selective focus. Exposure Meter: Incident meter and reflected meter. Metering System: Center weighted Spot and Matrix metering. Filters: UV Filter, Polarizing filter, special effect filters and tripod. Composition: Creative Composition, rule of thirds and Golden section. Managing Your Digital Assets: Managing digital cameras, Cleanliness, Precautions, Managing Images printouts, Burning CDs. Camera mounts, accessories. Camera care Difference between multi-camera and single camera setup.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

# WEB DESIGN

Course Code: ANI2202

Credit Units: 03

## Course Objective :

This will help us understand the importance of the web as a medium of communication and understand the principles of creating an effective web page, including an in-depth consideration of information architecture. Too also become familiar with graphic design principles that relate to web design and learn how to implement these theories into practice.

## Course Content:

### Module: Introduction to Web Design and Development: Workflow that Works

Whether or not you are new to Web site design and development, if you comprehend the overall picture; understand the workflow process and best practices for design; learn the software and technology; and can maintain a site that competes and communicates effectively on the Web, then you can launch your new or renewed career with confidence for great success. But all that does sound intimidating! So, in this introductory course to the Web Design and Development Certificate program, we'll go step-by-step through what it will take for you to become that topnotch professional who stands apart in your field.

### Module 2:WordPress: Creating a Dynamic Website

Students will learn how to set-up a WordPress website and develop the site to include a menu system with navigation bars, widgets for posts and comments, theme, calendar, and interactive forms. The class will be lecture style with some hands –on. If the student as established a WordPress site the student may use their site for the lessons. Some practice on a WordPress site is offered.

### Module 3: HTML and CSS (Basics)

Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS) are inseparable languages that together describe the structure and display of pages on the World Wide Web! This class introduces you to the syntax and explores techniques using both languages to create and format headings, body text, hyperlinks, images, tables, forms and more. You'll also learn to control the format and layout of elements on web pages using CSS stylesheets. Toward the end of the class you'll do several multi-column page layouts with an embedded video element. You can't design professional websites without knowing these critical technologies.

### Module 4:Dreamweaver: Introduction

Adobe Dreamweaver is the web development program used by over eighty percent of web professionals. Learn to use Dreamweaver to develop powerful websites using templates and style sheets that are easy to build and even easier to update. Topics include text formatting, dynamic graphics, hyperlinks, templates, tables, frames, style sheets, and forms. We'll also practice publishing your completed site to a web host.

## Examination Scheme:

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

# COMPUTER LAB ON 2D ANIMATION

**Course Code: ANI2203**

**Credit Units: 03**

## **Course Objective :**

Develop a storyline concept. Outline conceptual ideas through storyboarding. Apply theories, techniques, and practices of user interface design, information design, Navigation design, and integration of text, graphics, animation, and sound into complex interactive web---based user experience and environments.

## **Course Content:**

### **Module1:**

#### ***Flash workflow & Workspace***

- Introduction to flash
- Workspace overview
- Customize the workshop
- Using the Stage and Tools panel; Timeline

### **Module 2**

#### ***Working with Flash documents***

- Flash files
- Documents and set its properties/multiple documents
- Importing artwork into Flash: (Working with Photoshop PSD files)

### **Module 3**

- Flash short films to be made

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

# CREATING ANIMATION

**Course Code: ANI2204**

**Credit Units: 02**

## **Course Objective:**

It introduces students to various production techniques of 2D animation

## **Module 1 :**

### **Animation basics**

- Creating motion; Creating key frames ;Representations of animation in the Timeline
- Frame rates; Frame-by-frame animation ;
- Onion skinning; Extend still images ;Mask layers  
Using Timeline effects  
Twinned animation

## **Module 2**

- Special effects Filter; Animation Filters; Create preset filter libraries
- Blend modes in Flash
- Fundamentals of Flash Scripting for websites.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

## FOUNDATION COURSE IN CLASSICAL ANIMATION

**Course Code: ANI2205**

**Credit Units: 02**

### **Course Objective:**

Core understanding of animation principles : 2D Character Design, Placing character in a scene, Conceptual Design, Story boarding

### **Course Content :**

#### **Module 1 :**

Draw with the help of basic shapes, Animal study, Human anatomy, Shading techniques, Live model study, Procedure- How to approach, Importance of Guideline- Line of action, An Introduction on how to make drawings for animation, Shapes and forms.

#### **Module 2:**

About 2d and 3d drawings, Caricaturing – fundamentals, Exaggeration, Attitude, Silhouettes, Boundary breaking exercises and warm ups, gesture drawing, Line drawing and quick sketches, Drawing from observation, memory and imagination. History and aesthetics of animation, with references to related arts such as live-action cinema, puppetry and comics. Screenings include a wide range of commercial and experimental works produced throughout the world.

### **Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

# ACTION ANALYSIS

**Course Code: ANI2206**

**Credit Units: 03**

## **Course Objective :**

Key animation skills are demonstrated with in-depth illustrations, photographs and live action footage filmed with high speed cameras

## **Course Content:**

### **Module 1**

Drawing from life is at the foundation of understanding human and animal articulation, proportion, balance, weight and pose essential for the animator. By using observational drawing techniques to learn to see, students explore issues of human and animal pose and motion relevant to animation.

### **Module 2**

Action Analysis would be a characters swagger in a film (Eg Shrek). The animators/ students clearly understand (through action analysis) the type of walk achieved by a large and heavy individual (the real) and then apply their observations to the animated character ((of an ogre)). It is action analysis that enable the animation team to visually translate a real life situation into a character's(( ogre's)) walk, achieving such fantastic results. Case Studies, practical assignments and industry interviews ground action analysis methodology with real life examples.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 70 marks

Part-B: Practical: 0 marks

## **Text and References:**

### **Text**

The Animator's Survival Kit--Revised Edition: A Manual of Methods, Principles and Formulas for Classical, Computer... by Richard Williams

# LOCATION RESEARCH FOR ANIMATION

**Course Code: ANI2207**

**Credit Units: 03**

## **Course Objective :**

Location Research for Animation covers the basic concept or ideas of using different location or backgrounds for animation films.

## **Course Content:**

### **Module 1**

Location research and adaption lead to informed animation art direction and inspired storytelling. Through immersion in the visual culture of the course location, students develop concept art that informs the aesthetic of an animated film.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

### ***References***

Beginner's Guide to Digital Painting in Photoshop by Nikolai Aleksander and Richard Tilbury

# PRINCIPLES OF SCREEN DESIGN

**Course Code: ANI2208**

**Credit Units: 03**

## **Course Objective:**

Screen design is fundamental to animation communication. In this course, students expand upon traditional media skills and animation craft by adding the element of screen design.

## **Course Content:**

### **Module 1:**

Through individual approach and expression in traditional and digital media, students communicate by juxtaposing and sequencing imagery to develop a sense of artist-audience construct and consequence.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 70 marks

Part-B: Practical: 0 marks

# PROJECT

Course Code: ANI2232

Credit Units: 03

## GUIDELINES FOR MINI PROJECT/LIVE PROJECT

It must be based on either Industry or Creating Computer Graphics. After selecting this option a Faculty Guide will be allocated to the student by HOI and concern student will have to work with allocated faculty guide for proper guidance to complete this project. Student can choose topic as per his/her area of interest & as per the suggestion given by Faculty guide.

## EVALUATION PATTERN

### Project Report: 70 Marks

In this report student will have give details of his/her Topic with proper Introduction, Industry overview along with proper details of his/her area. For example if he/she is working on 2D animation or clip art so they must give details on these. Following points should be covered in it:

#### 1. The project itself on the computer

#### 2. Report comprising of:

- Title page
- Concept note/ Ideation
- Storyboard
- Objectives
- Methodology
- Learning Outcome
- Conclusion

### Presentation & Viva: 30 Marks

Students will have to make a Presentation (based on their Project Report) and it will be followed by a Viva Voice in front of a Panel of two or three faculty members.

## EVALUATION

Report	Viva	Total
70	30	100

# WORKSHOP

Course Code: ANI2233

Credit Units: 01

## OBJECTIVES

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## MAJOR THEMES FOR WORKSHOP

The workshop may be conducted on any of the following major themes:

1. Acting for animation
2. Lighting
3. Photography
4. Digital Painting
5. Matt Painting
6. Clay Animation
7. Composting
8. Painting / OilcolorsPainting/ Watercolors Painting

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## GUIDELINES FOR WORKSHOP

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a **write up and showing the final output** which focuses on the learning outcome from the workshop.

## METHODOLOGY

The methodology followed at the workshop could be based on any one or more of the following methods:

1. Case Study
2. Simulation
3. Group Activity

## EVALUATION

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Assignment/ Write up & final output	Total
5	30	30	35	100

# Syllabus - Third Semester

## INTRODUCTION TO 3D

**Course Code: ANI2351**

**Credit Units:03**

**Course Objective :**

This course is the first level of 3D animation and focuses on introducing 3D software and practicing each students existing motion skills.

**Course Content:**

**Module 1**

Introduction to 3D, Interface of 3D Max, Basics of 3D Max Modeling, Exporting, Using the menus. Floating and docking, Using drag and drop feature, Introduction to different workspaces. Geometry, sub objects, Extruding, welding, bridging etc. Recognizing the workspaces

**Module 2**

Introduction to modifiers and modifier gizmos. Familiarity with common modifier like bend, editpoly, Xform wave, lathe symmetry etc.

**Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

**Text and References:**

**Text**

- a) The Art of Max:An Introduction to 3D Computer Graphics; Autodesk Maya Press

**References**

- b) Introduction to 3D; James McBennet

# LIGHTING AND RENDERING

**Course Code: ANI2301**

**Credit Unit: 03**

## **Course Objective:**

This course gives students an advance knowledge of lighting how light behaves practically and in CG. Creating different modes of lighting like dramatic lighting, romantic and horror scene lighting. And also techniques of pulling out final output or rendering.

## **Course Content:**

### **Module 1**

Introduction to 3 point, 2 point and dramatic lighting. Creating photo real environments and textures. Applying on to a 3D objects. rendering the scene, rendering the effects, network rendering. Introduction to advance lighting effects. Mental ray rendering and Toon shade rendering.

### **Module 2**

Introduction to basic material types & procedurals. Study of concepts :- opacity, smoothness, specular and color. Drawing 2d art templates. Creating complex effects like water fire and smoke. Unwrapping the map for various 3D characters.

## **Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

### **Text**

Digital Lighting & Rendering (by Jeremy Birn)

### **References**

3ds Max 9 Bible (by Kelly L. Murdock)

# RIGGING AND ANIMATION

**Course Code: ANI2302**

**Credit Unit:03**

## **Course Objective:**

In this series of tutorials we will take an introductory look into rigging tools and techniques in 3D Max.

## **Course Content:**

### **Module 1**

Introduction to automated rigging systems and methods. Embedding small scripts in the hierarchy control system to save time and facilitate handling. Advanced rigging. Vertex weighting techniques. Understanding the basics, which include everything from how to establish solid naming conventions to how to utilize 3ds Max's bone and IK handle tools. Cover more complicated topics like setting up a enhanced IK rig, using expressions to create a counter twist rig that preserves volume, as well as skinning techniques. Also learn how 3ds Max's interface can be customized to work faster.

### **Module 2**

Animation, multimedia & virtual reality: Fundamental key frame animation, repeating animation over time, Hierarchical linking, Key frame, Parameters Out-of-Range, Setting Animation Keys, Animating the Rotation of the Dummy Object, Creating a Continuously Looping Animation.

### **Module 3**

Advanced Animation: The Fundamentals of Hierarchical Linking, Animation controllers, Track View Dope Sheet, Ease curves, Controllers, Constraints, Graph editors, Ease curves.

## **Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

### **Text**

3ds Max 9 Bible (by Kelly L. Murdock)

### **References**

Mastering Autodesk 3ds Max 2013 by Jeffrey Harper

# PARTICLES AND DYNAMICS

**Course Code: ANI2303**

**Credit Unit: 03**

## **Course Objective:**

In this section student will take an introductory look at particle flow to create custom particle systems.

## **Course Content:**

### **Module 1**

Create a Particle Flow Source and use how to navigate the Particle View interface. Learn how to use many of the most commonly used operators to create a particle system that fits specific needs in the projects.

### **Module 2**

Learn how to utilize space warps like gravity and wind with particle flow to modify the behaviors of our particle systems. Learn how to apply collisions to our particles and even cause there particles to spawn new particles when they collide with a deflector.

### **Module 3**

Dynamics in learning section can help guide you through learning many of the tools available to you. By the end of this learning path student will have a very solid understanding of the different particle and dynamics systems within 3ds Max and how you can use them to create there own simulations.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

### **Text**

# PRODUCTION PIPELINE

**Course Code: ANI2304**

**Credit Units: 02**

## **Course Objective:**

This course explores the production pipeline used to create a short or feature film in animation studios.

## **Course Content:**

### **Module 1**

Directing and Analyzing a film, Animation film techniques, Film language in action, Adaptation of film language into animation. Student project-Character Designs, Overview, Working with a script/screenplay, Camera angles.

### **Module 2**

Working with storyboard, Field size, Design and rendering the scenes layout and composition, Pans, Trucks and Multiple Pans, Scene planning, Realistic touches; character interaction with the scene and the backgrounds

### **Module 3**

Analyse film layouts, Design and layouts, clean up of BGs and BG painting, Sound concepts and effects for the film, The sound track, Sound equipment and theory, Dialogue and Voice-over, Exposure-sheet doping, reading the sound track. Editing- Image and voice, sound FX and Music.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 70 marks

Part-B: Practical: 0 marks

## **Text and References:**

# SUMMER PROJECT EVALUATION-I

Course Code: ANI2335

Credit Units: 03

## GUIDELINES FOR INTERNSHIP FILE AND ANIMATION/GRAPHIC FOLDER

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship program can best be described as an attempt to institutionalise efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain a file (**Internship File and Animation /Graphic Folder**). The Internship File aims to encourage students to keep a personal record of their learning and achievement throughout the Programme. It can be used as the basis for lifelong learning and for job applications. Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and their own personal contribution to the organization.

The **layout guidelines** for the Internship File:

- a. A4 size Paper
1. font: Arial (10 points) or Times New Roman (12 points)
2. line spacing: 1.5
3. top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

The File will include **five sections** in the order described below. The content and comprehensiveness of the main body and appendices of the report should include the following:

1. **The Title Page**--Title - An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content**--an outline of the contents by topics and subtopics with the page number and location of each section.
3. **Introduction**--short, but should include how and why you obtained the internship experience position and the relationship it has to your professional and career goals.
4. **Main Body**--should include but not be limited to daily tasks performed. Major projects contributed to, dates, hours on task, observations and feelings, meetings attended and their purposes, listing of tools and materials, and photographs if possible of projects/assignments.
5. **Appendices**--include pamphlets, forms, charts, advertisements, news stories with bylines or otherwise, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

The **Main Body** will have **three sections** and will include the following items which will be evaluated for the final assessment:-

1. An **analysis of the company/organization** in which the student is working

2. A **personal review** of the student's technical skills and how they have been developed through the programme.
3. The **report** that the student has prepared on the assignments/project assigned to him by the organization.

**Examination Scheme:**

**Report by Student (Internship File)**

- |  |    |
|--|----|
| 1. Organization & Presentation/Language and clarity /substance of Contents covered and Comprehensiveness | 20 |
| 2. Animation/Graphics Folder   | 30 |

## 3-D QUADRUPED ANIMATION

**Course Code:** ANI2306

**Credit Unit:**03

**Course Objective:**

In this course student will covers the technics of creating walk cycle of a quqdruped character.

**Course Content:**

**Module 1**

Using quadruped pre rigs, students produce a series of naturalistic animal motion exercises.

**Module 2**

Comparative action analysis studies are made on variety of quadruped mammals. Learning how to animate an animal for use in a live action shot.

**Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## MAYA FUNDAMENTALS

**Course Code: ANI2451**

**Credits Units: 03**

### **Course Objective:**

In this section, student will get an introductory look at the processes in Maya. Student will use a project-based approach as we cover the fundamentals of Maya, look at commonly used tools, and talk about some time-saving tips and techniques gleaned from production experience.

### **Course Content:**

#### **Module 1**

Introduction to the interface of Maya. Hotkeys. Using the spacebar. Manipulating a view. Creating objects. Simple primitives. Lights, cameras, selecting objects, types of selection- single selection, adding and subtracting selection, edit menu selection options. Marquee selection, Lasso selection, selection mask.

#### **Module 2**

Using hyper shade, relationship editor, hyper graph and outliner. The channel box. Duplicating objects, pivot points, introduction to snapping-2D snapping and 3D snapping. Using layers. Introduction to particles and materials.

### **Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

### **Text and References:**

#### **Text**

The Art of Maya: An Introduction to 3D Computer Graphics by Autodesk Maya Press

#### **References**

# LIGHTING AND RENDERING IN MAYA

Course Code: ANI2401

Credits Units: 03

## Course Objective:

In this section student will learn about the essential lighting tools and features found in Maya.

## Course Content:

### Module 1

Lighting tools in Maya ; Maya lighting tutorial, different types of 3D lights found in Maya, and methods for easily aiming and controlling lights. specialized attributes found in certain light types, different types of shadows available in Maya, how depth can be added for mood to our scenes through the use of volumetric light rays, as well as many other lighting tools and concepts that will help you establish a solid foundation in Maya

### Module 2

The core rendering tools and features of Maya that every rendering artist needs to be familiar with. foundational knowledge of rendering in Maya by talking about many of the key tools, features and concepts that every rendering artist in Maya really needs to be familiar with. I resolve some rendering-related issues that student may encounter, strong workflow practices that will be extremely beneficial to them as an emerging render artist.

## Examination Scheme:

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

# RIGGING AND ANIMATION IN MAYA

**Course Code: ANI2402**

**Credit Units: 03**

## **Course Objective:**

Student will also learn how Maya's interface can be customized to work faster. By the end of the section, student will be comfortable enough to utilize Maya's rigging features to rig their own assets!

## **Course Content**

### **Module 1:**

Rigging tools and techniques in Maya, start with the basics, which include everything from how to establish solid naming conventions to how to work with Maya's joint and IK handle tools. They then cover more complicated topics like setting up an enhanced IK rig, using the Node Editor to create a counter twist rig that preserves volume, as well skin weighting techniques, and more.

### **Module 2**

The intuitive and fun animation tools of Maya. How to set up animation preferences and create key frames, to learning how animation can be modified from Maya's Timeline and Graph Editor. Learn how to animate objects along a path, how to work non-linearly and non-destructively with the help of the Trax Editor and animation layers. how to animate with constraints and even cover helpful tips on how to improve your productivity.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

# PARTICLES AND DYNAMICS IN MAYA

Course Code: ANI2403

Credit Units: 03

## Course Objective:

Learn a how to create dynamic simulations and effects in maya

## Course Content:

### Module 1

using particles, fields, soft bodies, and rigid bodies. step-by-step through a proven approach to generating effects and simulations efficiently. Include: Introduction to Particle Systems; Understanding Rigid Body Simulations;

### Module 2

Overview of Dynamic Fields; Setting up Simulations; Particle Instancing; Rendering Particles with Maya Hardware; Software and Hardware Render Buffer; Fire Effects; Smoke Effects; Lightning; Fireworks; Explosive Effects; Attaching Particles to Curves; Creating Soft Body Effects; Colliding Particles with Surfaces; Rigid Body Simulations with Weighted Objects; Particles Interaction with Rigid Bodies

## Examination Scheme:

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

# STOP MOTION

**Course Code: ANI2404**

**Credit Unit: 03**

## **Course Objective:**

This course will help students enhance outcomes beyond just creative and artistic expression. This is an introductory course in stop-motion animation, a medium that requires a wide array of technical skills. We consider such techniques as sculpting, two part molds, foam rubber casting, armature configuration, set design, and lighting for small spaces. Through motion and movement tests, students explore the way in which three-dimensional objects move through space.

## **Course Content:**

**Module1:** Stop-motion basic technique, Mix equal parts digital camera, computer, and imagination. Introduction to many ways to go about shooting, editing and finalizing a stop-motion short film;.

## **Module 2**

Sculpting heads demo; make head armatures; Making molds demo molding and casting heads, casting multiples; Discuss body material, clothes; Begin Animation Introductory Project - Mr. Blob - students learn the SAM Animation software while creating a simple movie of a blob moving - come up with a funny dance or have Mr. Blob perform a trick.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

## PROJECT

Course Code: ANI2432

Credit Unit: 03

### GUIDELINES FOR MINI PROJECT/LIVE PROJECT

It must be based on either Industry or Creating Computer Graphics. After selecting this option a Faculty Guide will be allocated to the student by HOI and concern student will have to work with allocated faculty guide for proper guidance to complete this project. Student can choose topic as per his/her area of interest & as per the suggestion given by Faculty guide.

### EVALUATION PATTERN

#### Project Report: 70 Marks

In this report student will have give details of his/her Topic with proper Introduction, Industry overview along with proper details of his/her area. For example if he/she is working on 2D animation or clip art so they must give details on these. Following points should be covered in it:

1. **The project itself on the computer**
2. **Report comprising of:**
  1. Title page
  2. Concept note/ Ideation
  3. Storyboard
  4. Objectives
  5. Methodology
  6. Learning Outcome
  7. Conclusion

#### Presentation & Viva: 30 Marks

Students will have to make a Presentation (based on their Project Report) and it will be followed by a Viva Voice in front of a Panel of two or three faculty members.

# WORKSHOP

Course Code: ANI2433

Credit Units: 01

## OBJECTIVES

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## MAJOR THEMES FOR WORKSHOP

The workshop may be conducted on any of the following major themes:

1. Acting for animation
2. Lighting
3. Photography
4. Digital Painting
5. Matt Painting
6. Clay Animation
7. Composting
8. Painting / Oil / Water

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## GUIDELINES FOR WORKSHOP

The procedure for earning credits from workshop consists of the following steps:

- a) Relevant study material and references will be provided by the trainer in advance.
- b) The participants are expected to explore the topic in advance and take active part in the discussions held
- c) Attending and Participating in all activities of the workshop
- d) Group Activities have to be undertaken by students as guided by the trainer.
- e) Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- f) Submitting a *write up and showing the final output* which focuses on the learning outcome from the workshop.

## METHODOLOGY

The methodology followed at the workshop could be based on any one or more of the following methods:

1. Case Study
2. Simulation
3. Group Activity

## EVALUATION

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Assignment/ Write up & final output	Total
5	30	30	35	100

# Syllabus - Fifth Semester

## DIGITAL EDITING

**Course Code: ANI2551**

**Credits Units:03**

### **Course Objective:**

This course aims to guide student through the various stages of digital editing and post-production phase of documentary production. Students will actively participate in the editing of their own material.

### **Course Content**

#### **Module1**

Basics of editing, Pal Video for windows, Pal quick time multimedia QuickTime, Using Project Window, Video Settings, Audio Settings, Compressor, Depth, Frame Size, Frame Rate, Importing still images, Using the monitor window, Viewing safe zones, use of editing and full knowledge about video editing.

#### **Module 2**

Creating transitions, Transition Settings, Image Mask Transition, Applying transitions, viewing transitions.

#### **Module 3**

Making movie, finalizing sound and effects, rendering, making video CD

### **Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

### **Text and References:**

#### **Text**

Editing Digital Video; The complete creative and Technical guide; Robert M Goodman

#### **References**

The Technique of Film and Video Editing: History, Theory, and Practice (Ken Dancyger),

# DIGITAL COMPOSTING

**Course Code: ANI2501**

**Credits Units:03**

## **Course Objective:**

The objective is to teach students about different concepts involved in digital compositing, which will help them to apply these entire concepts practically.

## **Course Content:**

### **Module1**

Basic Image Manipulation and Compositing: Terminology, Color Manipulations, Spatial filters, geometric transformations, Expression Language, Filtering Algorithms, motion blur, Multi source Operators, Matte Image, The Integrated Matte Channel, Masks, Compositing With Pre multiplied Images, Morphing, Matte creation and manipulation: Rotoscoping, Procedural matte extraction, matte manipulations, Time and Temporal Manipulations: Apparent Motion, Temporal Resolution, Temporal Artifacts, Changing the Length or Timing of a Sequence, Key Framing.

### **Module 2**

Image Tracking and Stabilization: Tracking an Element into a Plate, Choosing the Feature to Track, Limiting the Search Area, Human Intervention, Using Tracking Curves Manually, Tracking Multiple Points, Stabilizing a Plate, Camera tracking, Interface Interactions: Workflow, the evolution of Interactivity, Methods of representing the compositing process, Timelines, Curve Editors, Working With Proxy Images, Image Viewing and Analysis Tools

### **Module 3**

Film Formats: Aspect Ratio: Non square Pixels, Deciding on a Resolution for an Aspect Ratio, Format Conversion Pipeline, Format Conversion Example, Film Formats: 35mm Formats ,16mm Formats, Specialized Film Formats, Video Formats: Fields, Color Resolution, Gamma, Common video formats, Other Formats, Working with non square pixels, converting and combining formats

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

Digital Compositing for Film and Video (by Steve Wright),

### **References**

Nuke 101: Professional Compositing and Visual Effects (by Ron Ganbar)

# SOUND EDITING

**Course Code: ANI2502**

**Credits Units:03**

## **Course Objective:**

This will teach students the aesthetics of sound and its use in graphics and animation.

## **Course Content:**

### **Module1**

Sound, Digital sound files, different sound formats, midi & digital audio, creating digital audio files, sound producing, sound extracting, Advantages and disadvantages of midi & digital, choosing between midi and digital audio.

Sound for the World Wide Web, adding the sound to your multimedia project, production tips, audio recording, keeping track of your sound, testing and evaluation.

### **Module 2**

Sound recording, editing digital recording, trimming, splicing and assembly, volume adjustments, format conversion, re sampling or downloading, fade-ins and fade –outs, equalization, time stretching, digital signal processing, reverting sound, making midi audio, audio file formats.

### **Module 3**

Adding effect automation enveloping, adding a volume envelop, adding a panning envelop, previewing effect automation, applying effect automation, adjusting envelope, adding envelop points, flipping a envelop points, setting fade properties, cutting, copying, pasting, envelope points, adding mirror and wave hammer, pan to left , pan to right, dry out, wet out, convert mono to stereo, looping. Burning the audio CD, mp3, making the remix sound track with using all the special FX from the software. Exporting the files in diff formats, save in wav, mp3 etc.

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## **Text and References:**

## SUMMER PROJECT EVALUATION-II

Course Code: ANI2535

Credit Units: 06

### GUIDELINES FOR INTERNSHIP FILE

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship program can best be described as an attempt to institutionalise efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain a file (**Internship File and Animation /Graphic Folder**). The Internship File aims to encourage students to keep a personal record of their learning and achievement throughout the Programme. It can be used as the basis for lifelong learning and for job applications. Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and their own personal contribution to the organization.

The **layout guidelines** for the Internship File:

- b. A4 size Paper
- c. font: Arial (10 points) or Times New Roman (12 points)
- d. line spacing: 1.5
- e. top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

The File will include **five sections** in the order described below. The content and comprehensiveness of the main body and appendices of the report should include the following:

1. **The Title Page**--Title - An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content**--an outline of the contents by topics and subtopics with the page number and location of each section.
3. **Introduction**--short, but should include how and why you obtained the internship experience position and the relationship it has to your professional and career goals.
4. **Main Body**--should include but not be limited to daily tasks performed. Major projects contributed to, dates, hours on task, observations and feelings, meetings attended and their purposes, listing of tools and materials, and photographs if possible of projects/assignments.
5. **Appendices**--include pamphlets, forms, charts, advertisements, news stories with bylines or otherwise, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

The **Main Body** will have **three sections** and will include the following items which will be evaluated for the final assessment:-

- a. An **analysis of the company/organization** in which the student is working
- b. A **personal review** of the student's technical skills and how they have been developed through the programme.
- c. The **report** that the student has prepared on the assignments/project assigned to him by the organization.

**Examination Scheme:**

**Report by Student (Internship File)**

- |   |    |

# ANIMATION POSTPRODUCTION

**Course Code: ANI2503**

**Credit Units:03**

## **Course Objective:**

Postproduction is the business of wrapping up production. This course represents the third phase of the senior project and the final phase of animation career preparation.

## **Course Content:**

### **Module1**

Students focus on the postproduction of their senior short including final edit and rendering, updating reel and self-promotional support items, and researching self-promotional opportunities such as competitions and festivals.

### **Module 2**

Adding all raw shorted shorts and clips all together, and add few finishing touch, even a small technique make an good effect, using some nice software for video editing, making fade in – outs, mixing the sound to video file , using diff angles of shorts for different emotions , happy or sorrow, trimming the video clips as per the audio or story, giving some seconds of blank space at the end of the video, make in concentration that text should not cover the video, lights, Illuminator, silver/ gold reflector, shotgun microphone, wireless microphone. Always use 5 second pre roll and post roll of blank space

## **Examination Scheme:**

<b>Components</b>	<b>A</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	15	5	70

**(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)**

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

## VIDEO: INTRODUCTION & ADVANCED

Course Code: ANI2504

Credits Units:03

### Course Objective:

This course will give students an advance knowledge of video cameras and video formats. Also about what are compressions and codecs.

### Course Content:

#### Module1

Sony PD 150 Cameras, miller Fluid-Head Tripods, DV Stead cam, handy cams, web cams, Beta cams, setting the temp grid on the floor, perspective view of cameras, panning the camera movements, zoom in the camera, dolly camera, and camera using the crane shots, camera shocking for making earthquake effect. Attaching camera on the tripod for the removal of shaking in the clips, giving the proper lightning effect, setting the lights and proper reflection, correct expose, Framing, Focus, Hand held shorts, Slow berating wile video shooting, shoulder pan, hip pan.

#### Module 2

Making the story board, just using the actions, emotions and happy moment's scene to making the story, can make a comedy video, short film etc to practice on it; can take the reference from some short film, comedy shows. Different uses of digital videos, making add films, documentaries, even feature films.

### Examination Scheme:

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

End Term Examination (Total: 70 marks)

Part-A: Theory: 50 marks

Part-B: Practical: 20 marks

### Text and References:

#### Text

Editing Digital Video; The complete creative and Technical guide; Robert M Goodman

#### References

# PROJECT

Course Code: ANI2532

Credit Units: 03

## GUIDELINES FOR MINI PROJECT/LIVE PROJECT

It must be based on either Industry or Creating Computer Graphics. After selecting this option a Faculty Guide will be allocated to the student by HOI and concern student will have to work with allocated faculty guide for proper guidance to complete this project. Student can choose topic as per his/her area of interest & as per the suggestion given by Faculty guide.

## EVALUATION PATTERN

### Project Report: 70 Marks

In this report student will have give details of his/her Topic with proper Introduction, Industry overview along with proper details of his/her area. For example if he/she is working on 2D animation or clip art so they must give details on these. Following points should be covered in it:

#### 1. The project itself on the computer

#### 2. Report comprising of:

1. Title page
2. Concept note/ Ideation
3. Storyboard
4. Objectives
5. Methodology
6. Learning Outcome
7. Conclusion

### Presentation & Viva: 30 Marks

Students will have to make a Presentation (based on their Project Report) and it will be followed by a Viva Voice in front of a Panel of two or three faculty members.

## EVALUATION

Report	Viva	Total
70	30	100

# WORKSHOP

Course Code: ANI2533

Credit Units: 01

## OBJECTIVES

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

## MAJOR THEMES FOR WORKSHOP

The workshop may be conducted on any of the following major themes:

- Acting for animation
- Lighting
- Photography
- Digital Painting
- Matt Painting
- Clay Animation
- Composting
- Painting / Oil / Water

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

## GUIDELINES FOR WORKSHOP

The procedure for earning credits from workshop consists of the following steps:

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a *write up and showing the final output* which focuses on the learning outcome from the workshop.

## METHODOLOGY

The methodology followed at the workshop could be based on any one or more of the following methods:

- Case Study
- Simulation
- Group Activity

## EVALUATION

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Assignment/ Write up & final output	Total
5	30	30	35	100

# Syllabus - Sixth Semester

## PROFESSIONAL PROJECT

**Course Code: ANI2601**

**Credit Units: 09**

**Course Objective:** To give an in-depth exposure to the area of specialization, in order to make the students “industry ready” immediately after the programme.

### Professional Project (Specialisation on any one)

- Creating Animation (2D animation)
- 3D Animation
- Compositing
- Lighting and Rendering

#### 2D Animation

**Course Objective:** It introduces students to various production techniques of 2D animation

#### 3D Animation

##### Course Objective :

This course is the first level of 3D animation and focuses on introducing 3D software and practicing each students existing motion skills

#### Compositing

##### Course Objective:

The objective is to teach students about different concepts involved in digital compositing, which will help them to apply these entire concepts practically.

#### Lighting and Rendering

##### Course Objective:

The above specialization will be conducted by guides and mentors responsible for a group of students and will include industry training, research and dissertation/project.

##### Examination Scheme:

<b>a) Total marks for professional project -</b>	<b>100 marks</b>
Break-up of marks	
Timely Submission	5 marks
Content Clarity	25 marks
Comprehensiveness	20 marks
Originality	5 marks
<b>b) Project Presentation</b>	<b>45 marks</b>

## INTERNSHIP / DISSERTATION

**Course Code: ANI2637**

**Credit Units: 09**

**Course Objective:** There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. ## Syllabus - First Semester

### PRINT MEDIA – REPORTING AND EDITING

**Course Code: JRN2151**

**Credit Units : 03**

**Course Objective:**

This course is aimed at introducing the students to the world of journalism- news and its handling in context of print media. It deals with basic news elements, news structure and also the newsroom set up. The student is taught about agency and magazine journalism. Editing is an integral part of this unit.

**Course Contents:**

**Module I: History of Journalism**

Journalism in pre-independence era in India

Role of English and vernacular press during freedom struggle

Growth of journalism post independence

**Module II: Growth and development of press**

Emergence of newspapers, magazines and publication houses

Emergence and growth of Indian news agencies

**Module III: The newsroom Set-up**

Various departments in Editorial set-up

Hierarchy in the Newsroom

Qualities and responsibilities of a reporter

Sources and beats

**Module III: News Reporting**

What is News, News Value and Sources of News

Basic elements of News

Writing a News Report

Types of leads & Body text

Interviewing skills required for reporting

Types of Reporting

**Module IV: Editing News**

Role and functions of desk

Role of copy editor

Electronic Copy-editing, Rewriting

Writing Headlines and captions

Understanding the importance of style guides

Newspaper design & Layout

**Examination Scheme:**

Components	H	C	CT	A	EE
Weightage (%)	5	10	10	5	70

H- Home Assignment, C- Case Discussion/Presentation/Analysis, CT-Class Test, A-Attendance, EE- End Semester Exam

# FUNDAMENTALS OF ADVERTISING

**Course Code: JRN2101**

**Credit Units: 03**

## **Course Objective:**

This module will help students understand the concepts of advertising. The students will understand the advertising scenario in India, organizational structure, and brand-management. Students will have an opportunity to explore various creative fields involved in making advertisements.

## **Course Contents:**

### **Module I: Fundamentals of Advertising**

What is Advertising?

Definition & Concepts of Advertisement

Types of Advertising

Classified

Corporate

Financial

Education/ NGO/Public Service /Institutional

Advertorial

Souvenirs/ Promotional Ads.

### **Module II: Aspects of Advertising**

Concepts of Advertising

Advertising Campaign

Celebrity Endorsement

Embedded Advertisements

### **Module: III Structure of advertising agencies**

Types of advertising agencies

Advertising agency structure

Functions of various departments

How agencies earn revenue

### **Module IV: Role of Marketing**

What is a market?

Types of markets.

Different Media's

(Print, electronic, ATL, BTL & Cyber Media)

### **Module V: Ethics in Advertising**

ASCII's code of Advertising Practice

Ethics in Advertising.

## **Examination Scheme:**

Components	H	C	CT	A	EE
Weightage (%)	5	10	10	5	70

H- Home Assignment, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

# COMPUTER APPLICATIONS-I

**Course Code: JRN2102**

**Credits Units: 03**

## **Course Objective:**

This unit will give students a broad knowledge of the basics of computer usage in publication houses. How to work with computers, what are the design softwares? Students will study the design and layout of pages, taking into consideration the choice of typeface and positioning and choice of colour, images and text. Their work will include practical projects as well as investigations into current design and editing practices in a variety of print forms.

## **Course Contents:**

### **Module I: Basics of Computer**

Hardware/Software, Input devices/ Output devices.

Windows, MSOffice: - Ms Word, Ms Power Point, Networking: - Lan, Wan concept.

### **Module II: Desk Top Publishing**

What is DTP (Desk Top Publishing)? How it is linked with computers. Newspaper, Magazine, Book publishing is part of DTP. Software: page design packages (e.g. Adobe PageMaker, Adobe Indesign. *"InDesign is a newer version of PageMaker"*) to be used for design and layout purposes, text: generation and preparation for use, display, digital typesetting, editing, creation of headlines using appropriate font, creation of pages, importation and movement of copy and images, selection and cropping of photographs and graphics, use of text wrap, anchored graphics and rules, various palettes, master pages, templates etc.

### **Module III: Graphics Creation**

Software: Adobe Illustrator is a powerful graphic design and drawing program that will help you create images or documentation with an artistic touch. It is used for creating vector graphic images. Also file formats. After creating graphic files, which format you are suppose to save and why? Images: choice of appropriate pictures/graphics, electronic scanning and manipulation using proper resolutions.

## **Examination Scheme:**

Components	P	Q	CT	A	EE
Weightage (%)	5	10	10	5	70

P- Project, Q- Quiz, CT- Class Test, A- Attendance, EE- End Semester Examination

## **Text & References:**

# FUNDAMENTALS OF RADIO JOURNALISM

**Course Code: JRN2103**

**Credit Units: 03**

## **Course Objective:**

The module is structured for the students to learn the basic Radio and radio technology. The genres in radio will be identified and explored so that the student is able to comprehend what are the core differences in implementation of information and entertainment in each specific genre. A brief background on the history of some institutions like All India Radio will also be discussed. This unit is aimed at laying the platform for further studies in the broadcast arena. At the end of this learning, the student will be able to understand all about radio.

## **Course Contents:**

### **Module I: Background of Radio**

History and growth of Radio in India  
Radio as a medium of mass communication  
Public broadcasting: All India Radio (AIR) as an institution  
Role of BBC radio in India  
The radio revolution in India: Private Players  
Different types of radio stations  
Concept of Community Radio  
Present Scenario: Role of PrasarBharati Corporation

### **Module II: Radio formats and genres**

Voice modulations  
News bulletins, live talk shows, & interviews  
Radio features & radio documentaries  
Jingles & radio plays  
Commentaries and magazines, countdowns  
Basics of sound: frequency, amplitude, wavelength  
Radio frequencies: AM and FM transmission  
Importance of speech (or human voice) in broadcast media  
Sound effects and its functions  
Importance of music & background score in visual imagination

### **Module III: Elements of Radio Production**

Radio ads/commercials  
Phone ins and radio bridges  
Steps of Radio news production  
Pre production, production, post production  
Idea: From conceptualization to broadcasting  
Difference between recorded and live broadcast  
Discussing eminent broadcasters and broadcasting channels  
Radio Journalism as a career  
Case studies about popular radio stations (scheduling, style, and content)

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>H</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	10	5	70

P- Project, H- Home Assignment, CT- Class Test, A- Attendance, EE- End Semester Examination

# INTRODUCTION TO VISUAL COMMUNICATION

**Course Code: JRN2104**

**Credit Units: 03**

## **Course Objective:**

Seeing comes before words. We learn to see and recognize before we learn to speak. When we grow older as adults, the way we see things is affected by what we know and what we believe. Visual communication applies the fundamentals of major art forms for professional problem-solving. It is the conveyance of ideas and information in forms that can be read or looked upon. This unit will introduce students to the history, forms, elements, theories, meaning, and principles of visual communication. Students will be given basic grounding through conventional classes and practical exercises in the form of scrapbooks so as to prepare them for undertaking the remaining courses in BJMC.

## **Course Contents:**

### **Module I: Introduction to Visual Communication**

Defining an image and visual communication (VC)

VC as integral part of human communication

Human Vision and 2 dimensional images

Human beings have highly developed seeing rather than hearing abilities

Historical trends and developments: from painting to installation art, from naturalism to impressionism to neo-realism, high-art and low-art, role of visual technologies, debates related to art and social reality

Science, Human beings, and Visual Information: how human body receives information: senses, brain, stimuli, heart, and body parts

### **Module II: Basics of Visual Communication**

Some Fields: chemical imaging, data, information, software, volume, and product visualization, technical drawing etc

Some Image Types: computer graphics, map, pictograph, photograph, moving image, table, drawing, diagram, ideogram, illustration, etc

Contemporary applications: cartography, spatial analysis, graphics, visual perception and analytics, advertising, politics, entertainment, business etc

Medium: digital, paper, electronic, electrical, web

Elements: line, shape, colour, space, form, depth, texture, light & shade, dimension, grey-scale, interactions of elements, continuity, and & proximity etc

Principles of design: contrast, harmony, proportion, balance, and movement

### **Module III: Power, Visual Representation & Society**

Human beings and visual information processing mechanism: registering selected information, processing thoughts and feelings, storing information and acting or speaking according to the information processed and stored.

Gestalt and constructivism, which are sensual, are early theories that explain the mechanics while semiotics and cognitive, which are perceptual, are more advanced modern theories that involve signs, intellect, and the mind

Consumer culture (from 19<sup>th</sup>-21<sup>st</sup> century) & growth of VC: changes in ways of seeing, ways of being seen & ways of telling

Concept of gaze: desire, voyeurism, critique of male gaze, and interactive gaze, masculine and feminine identities

Experience of images (signs: indexical, symbolic, and iconic), context in which images are interpreted (medium, form, socio-economic dimensions) and ways in which they are interpreted (cliché, stereotype, convention)

Politics of representation of mediated images: video's sensation, dreams, and manipulation; film's logic and rhetoric; advertising image's shock and seduction; political image's public image, public relations, and propaganda; and media image's persuasion and violence

**Examination Scheme:**

Components	H	Q	CT	A	EE
Weightage (%)	5	10	10	5	70

H- Home Assignment, Q- Quiz, CT- Class Test, A- Attendance, EE- End Semester Examination

# INTRODUCTION TO CULTURE & SOCIETY

**Course Code: JRN2105**

**Credit Units: 03**

## **Course Objective:**

Before stepping out into the field of mass communication and journalism, students need to have basic knowledge, curiosity, and awareness of politics, history, economics, and society. Various teaching methods and streams will be to make the students aware of contemporary issues so that they not only have opinions but also can intelligently analyze them from a broad perspective. Classes will be conducted in interesting and interactive ways where examples will be drawn from real life situations and from media texts (such as TV serials & movies).

## **Course Contents:**

### **Module I: (History)**

What do you know of Indian history?  
Main periods in Indian history  
Stories of some main events & personalities  
Colonial Rule  
Struggle for Independence  
Modern Independent India  
Division of States and the ongoing debates on autonomies of state  
Post-Liberalization India

### **Module II: (Politics)**

Parliamentary, Presidential, and Monarchy  
Single party, two party and Coalition Governments  
Federal and Centralized System  
3 wings of the Government: Judiciary, Legislation, and Executive  
Chief national personalities figuring in current news  
Bi-polar and uni-polar world after fall of communism  
Chief international personalities figuring in current news  
International debates in the media in last 5 years  
Role of UN umbrella over past 10 years

### **Module III: (Economics)**

India a mixed economy –feudalism, socialism, and capitalism  
Industrial and agricultural economies  
Developing, Developed, and Under-Developed economies  
Role of Private and Public Enterprise in the economy  
Role of Banks: RBI, World Bank, Asian Development Bank  
Regional economic groupings and their functioning  
The European Union and its expansion  
World Economic Forum  
Indian Economy: Growth Patterns

### **Module IV: (Society)**

What is Globalization and its cultural impact  
Global warming and environment  
Naxalism and Marxism  
Family, marriage, and gender relationships  
Cultural shifts in Indian society  
Urbanization & migration  
Reservation & Positive Affirmation  
New Age Spiritualism/ Health  
Growth of Entertainment Industry  
Shifts in the Indian Sports Scenario

### **Module V: (Science and Scientific Temper)**

Nanotechnology  
Latest developments in bio-technology

Nobel Prizes in Science  
Debates on Cloning  
Debates on Nuclear Non-Proliferation  
Criminalization of politics  
Modern day debates on War and warfare

**Examination Scheme:**

<b>Components</b>	<b>H</b>	<b>CD</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

H- Home Assignment, CD- Class Discussion, CT- Class Test, A- Attendance, EE- End Semester Examination

## READINGS IN MEDIA

**Course Code: JRN2130**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective on readings in media is to inculcate analytical bent of mind in students. This will also encourage reading habit along with value addition to the existing understanding of the subject. The exercise will help media students not only develop understanding of different important issues but also give an insight into content handling. Critical analysis of different genres of write ups would help broaden the intellectual horizon of the student.

### **Guidelines**

The student is required to critique a discipline-specific book and different genres of write ups (as specified) for which the student has to take prior approval of the faculty in-charge. The student is expected to have a detailed insight into the following:

- Content
- Content handling
- Information
- Writing style
- Thematic clarity
- Relevance of issue

### **Methodology**

The student shall be given high quality news articles, editorials and relevant national/international stories from newspapers and newsmagazines. He/she shall be required to critically review the same in terms of content, media handling and content presentation etc. The student may also be asked to critique any non-fiction book. The given assignments are required to be submitted in the form of reports. He/she will be assessed on the basis of the assignment reports and viva voce.

In order to earn the credits, the student will be required to submit reports on the following:

Book Review (1)

Editorial (1)

News articles published on the edit page of a national/international daily (2)

Cover story of a national/international newsmagazine (1)

The report submissions will be followed by viva voce by a panel of 2 faculty members.

### **Examination Scheme**

The student will be required to submit 5 assignments in all as per the details mentioned above. Each assignment will carry equal marks (20 marks each). The marks break up for each assignment will be as follows:

Written Report	Viva Voce
15 marks	5 marks

# PROJECT (WITH PRESENTATION & EVALUATION)

**Course Code: JRN2132**

**Credit Units: 03**

## **Course Objective:**

This concentration elective will help the student develop a critical and analytical eye when it comes to understanding issues/trends related to media. It will provide a platform to the student to interrogate and review various media concepts. The live project will help in giving hands-on training to the communication students.

## **Major Themes for Project**

The project may be based on any of the following major media streams:

- Print Media
- Electronic Media
- Advertising
- Event Management
- Corporate Communication & Public Relations
- Brand Management
- New Media
- Photography

## **Guidelines for Project**

It must be based on either Industry or Research. The student will work under the guidance of a Faculty Guide that will be assigned by HOI. Student can choose topic as per his/her area of interest under the guidance of the Faculty guide.

The student may also choose to undertake a live project in any of the major media streams.

## **Project Report/Portfolio: 75 Marks**

Before the end of the semester, the student will be expected to submit a project report. The project report shall have the following components.

- Title page
- Index
- Introduction
- Industry Overview
- Objectives
- Methodology
- Findings
- Conclusion
- Annexures (questionnaires, if any)
- Bibliography

In case the student undertakes a live project, he/she will have to submit the portfolio instead of the project report. The portfolio will carry 75 marks.

## **Presentation & Viva: 25 Marks**

Student will make a presentation (based on Project Report) and it will be followed by a Viva Voce in front of a Panel of one internal expert and one external expert.

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III :** Collection of information and data relating to the topic and analysis of the same.

**STEP IV :** Writing the report dividing it into suitable chapters

**STEP V :** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

- Each of the students has to undertake a Project/Live Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report/Portfolio or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report/Portfolio and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report/Portfolio unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report/Portfolio.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Examination Scheme**

**Chapter Scheme and distribution of marks (for Project Report):**

Chapter 1: Introduction with statement of objectives, limitations of the study & hypothesis – 10 marks

Chapter 2: Literature Review/Conceptual Framework/ National/International Scenario – 20 marks

Chapter 3: Research Design – 10 marks

Chapter 4: Findings& Results -- 20 marks

Chapter 5: Conclusion & Recommendations -- 10 marks

Chapter 6: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## WORKSHOP/ CERTIFICATION (DISCIPLINE/SPECIFIC)

**Course Code: JRN2133**

**Credit Units: 01**

### **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes For Workshop:**

The workshop may be conducted on any of the following major themes:

Print Journalism  
Broadcast Journalism  
Advertising  
Public Relations  
Event Management  
Brand Management  
Media Research  
Media Planning  
Photography  
New Media  
Designing Softwares

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

### **Guidelines For Workshop:**

The procedure for earning credits from workshop consists of the following steps:

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of at least 500 words about the learning outcome from the workshop.

### **Methodology:**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study  
Practical assignment  
Group Activity  
Role Play

### **Examination Scheme:**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# MEDIA PRODUCTION PORTFOLIO

**Course Code: JRN2136**

**Credit Units: 03**

## **Course Objective:**

This subject is an attempt to inculcate professional writing skills and knowledge in flowering buds of the media department. The subject will give hands on experience on different aspects of media writing to the students. The students may choose the option of this subject from their concentration electives.

## **Major Areas of Writing:**

The Media Production Portfolio has the following topics for writing:

	No. of items
1. Press Release	1
2. Feature	2
3. Editorial/Article	1
4. News Story	2
5. News Analysis	1
6. Ad Copy (TV/radio/print)	1
7. Letter to Editor	2
8. Movie Review	1

## **Guidelines for Media Production Portfolio:**

The following procedure should be followed for the credits:

1. Thorough reading of relevant study material and references.
2. Students will choose the current topics for every area of writing.
3. Students will discuss the topics with the guide and will take the approval.
4. Students will use the formal writing pattern i.e. 12 font size, 1.5 line spacing and Times New Roman.
5. Students will have to make proper formal document that includes
  - ❖ Title Page
  - ❖ Table of Contents
  - ❖ Acknowledgement
  - ❖ Write ups

## **Examination Scheme:**

The production portfolio will carry 100 marks. The marks break up is as follows:

- a) Complete Work 10
- b) Content
  - Creativity 15
  - Relevance 15
  - Clarity 15
  - Comprehensiveness 15
  - Originality 15
  - Presentation 15

# Syllabus - Second Semester

## BASIC PHOTOGRAPHY

**Course Code: JRN2251**

**Credit Units: 03**

### Course Objective:

This unit introduces to the basic techniques of photography and its applications in Mass Media with specialization in specific area. This course gives an opportunity to the student to get accustomed to this universal language of expression and communication and exhibit their skills to explore, understand the significance and utility of photographs as an effective medium of communication.

### Course Contents:

#### Module I: Introduction to photography

Brief History of photography

Uses of Photography

Principles of light

How photography works

- a. image capturing
- b. film processing
- c. print processing

#### Module II: Camera

Elements of a Camera (Introduction) – view finder, lens, iris, shutter, film chamber, light metre

Camera Designs –

- a. pinhole camera,
- b. view camera,
- c. compact camera,
- d. T L R
- e. S L R,
- f. Instant/Polaroid camera,
- g. digital camera

Exposure control in camera

#### Module III: Films & Camera Accessories

Film formats & their use

Lenses - prime & zoom lens

- a. angle of view
- b. Aperture & f-no.
- c. Depth of field, how depth of field works
- d. Depth of focus
- e. Lens care

Camera accessories

#### Module IV: Photography & Darkroom Practicals

Outdoor Photography Assignments

Introduction to Darkroom Equipments and their uses

Developing & Printing B&W Films

Developing, Printing and Enlarging B&W Prints

Portfolio and Presentation

### Examination Scheme:

Components	P	CD	CT	A	EE
Weightage (%)	5	10	10	5	70

P- Project, CD- Class Discussion, CT- Class Test, A- Attendance, EE- End Semester Examination

# UNDERSTANDING MASS COMMUNICATION

**Course Code: JRN2201**

**Credit Units: 03**

## **Course Objective:**

Students will be introduced to the basic aspects of human communication and especially mass communication. Mass Media industries have developed in unprecedented ways and they have been discussed systematically by thinkers so that we can make sense of how they influence the society and vice versa. While in other subjects, students will learn about contemporary forms, in this course they will also be introduced to the traditional modes of communication in India. With this basic grounding in place, students will be able to evaluate mass media within a wider context. They will be taught by using various teaching aids such as case studies, practical exercises, class presentations, screenings, and reading groups.

## **Course Contents:**

### **Module I: Introduction to Communication**

Process and elements of communications

Levels of communication

Barriers to effective communication

Future of communication studies

Forms and Functions of communication

### **Module II: Traditional Media**

Introduction to traditional media

Oral Tradition of story-telling since early civilization

Influence on contemporary forms of mass communication

Types: street theatre, puppetry, music, dance/ballads, folk and tribal art, local fairs

Case studies of each form

Strengths and limitations

Relationship with the society: tool for political, social, economic, and health awareness

Present Scenario

### **Module III: Understanding Mass Communication**

Definition and forms of mass communication

Growth of mass media in India

History of Western mass media

Four eras in mass communication theories

Era of mass society theory (1850-1940)

Era of scientific perspective on mass media (1940-1950)

Era of limited effects (1950-1960)

Era of cultural criticism (1960-1980)

Ongoing Debates about mass media

## **Examination Scheme:**

Components	A	P	H	CT	EE
Weightage (%)	5	10	5	10	70

P- Project, H- Home Assignment, CT- Class Test, A- Attendance, EE- End Semester Examination

# PRINT MEDIA- SPECIALIZED REPORTING & FEATURE WRITING

**Course Code: JRN2202**

**Credit Units: 03**

## **Course Objective:**

This unit is an extension of what was taught during the first semester in print journalism. It will give you the advanced elements of reporting and the concepts of magazine reporting. As future journalists, students must have a clear understanding of media management and structure. In order to work effectively, journalists must understand the legal framework within which they operate. Students will learn about the journalist's rights and restrictions under the law, court structure in India and court reporting. They will also learn in detail about contempt of court, defamation legislation, copyright and issues of privacy.

## **Course Contents:**

### **Module I: City Reporting**

Covering a news beat

Coverage of various beats: crime, education, health, civic affairs and local government.

### **Module II: National Reporting**

Political Reporting (Political structure in India, Covering political parties/events/rallies/ elections)

Parliament Reporting (Parliament Structure, reporting on legislature)

Covering the Government (PIB, Ministries)

*Legal Reporting (structure & jurisdiction of courts, reporting court hearings, precautions)*

### **Module III: Business & Sports Reporting**

Basic Business Knowledge & Business Bodies

Corporate Reporting

Covering Economic policy (ministries of commerce, finance, industry, company affairs and other infrastructure ministries)

Stock market coverage

How to develop good sports writing skills

Covering local, national and international level events

### **Module IV: Investigative Reporting**

Definition and elements

Tools of investigative reporting

Importance of Sources

Sting Operations and latest trends

Relevant Case studies: Indian and International

### **Module V: Feature Writing**

How to write a feature

Different types of features

Book reviews and film reviews

## **Examination Scheme:**

<b>Components</b>	<b>H</b>	<b>C</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

H- Home Assignment, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

# ELECTRONIC COMMUNICATION

**Course Code: JRN2207**

**Credit Units: 03**

## **Course Objective:**

The basic concepts and fundamental elements of Radio and TV production will be introduced to the students in this unit. The working mechanism of Video camera, principles of composition, need and role of lighting will be discussed and practically demonstrated. The purpose of the whole exercise is to familiarize the students with the broadcast equipment and inculcate in them the creative techniques to use them. This unit will also focus on enhancing the writing skills of the student. Writing being an integral part of journalism, the students will get an opportunity to write for various mediums and genres. The students will be expected to create a radio program of their choice as a showcase of their knowledge gained during this semester. Field visits to radio stations are a must during this semester

## **Course Contents:**

### **Module I: Audio Equipment**

General audio and sound microphone techniques  
Types of microphones  
Construction of microphones  
Positioning of microphones  
Mixers  
Considerations in Indoor and Outdoor recording  
Common audio problems

### **Module II: Basics of camera**

Basic parts of camera  
Working of the camera  
Types of camera  
Camera Mounts  
Camera accessories  
Camera movements, shots & angles  
Camera Care  
Principles of composition *and visual grammar*  
Difference between multi-camera and single camera set up  
Videotape Formats – *S-VHS, VHS, U-matic, Betacam&Betacam-SP, MINI-DV, DVCAM, DVC PRO, HD*

### **Module III: Lighting**

Difference between natural and artificial lighting  
Use of natural light and reflectors  
Factors that influence lighting needs  
Bouncing light  
Studio lighting instruments: Types of lights  
Basic lighting set up: Three point lighting  
Technical: - Color Temperature, Light intensity, *Filters*  
Lighting tips  
Taking Care of Lights and Yourself

### **Module IV: Pre-production**

Idea generation  
Research: location, budget, people, access, permission, insurance, resources, and time  
Set designing: floor plan etc  
Planning for the production  
TV Writing: - Writing and Thinking Visually  
Conventions of Writing  
Terminology and Formats  
Differences between writing for radio, TV, and print  
Writing for different formats  
Radio Writing - Writing for the Human Ear and Imagination  
Difference between radio script, TV script, and a novel

Different Styles of Writing  
Writing Process  
Radio scripts for different formats and genres

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>H</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	5	15	5	70

P- Project, CT- Class Test, A- Attendance, H- Home Assignment, EE- End Semester Examination

# PRINT MEDIA DESIGN & PRODUCTION

**Course Code: JRN2203**

**Credit Units: 02**

## **Course Objective:**

This topic will introduce the students to the various skills required to combine all the elements necessary to create an effective page for publication. They will also learn the terminology used in page layout and design and the importance of house style. Students will study design and layout of various pages, taking into consideration the choice of typeface, positioning, colors, images and text for Newspaper, Magazine, Book design etc.

## **Course Contents:**

### **Module I: What is Design?**

Design Elements, Design Principles, size of the publication – choice and considerations: - Grid, vertical, horizontal, modular, column widths, proportion of space given to headlines compared to length of copy, space given to advertising, relevant use of borders, tints, other layout techniques; showing how design elements combine to create an overall ‘look’ to the publication (Magazine, newspaper, leaflet, poster, pamphlet etc).

### **Module II: House styles**

What is style sheet? How to create style sheet? Style guide: examples from newspapers, magazines; own guide produced for new publication.

Styles: Typography, its history:- choice of typeface and masthead, choice and use of images and colour, positioning of articles and images on the page, use of headlines in an appropriate font, point size, number of lines etc, text manipulation, juxtaposition of text/images/advertising,.

### **Module III: Layouts**

What is layout? Stages of layout, how a layout of a newspaper and magazine is prepared? What is the difference between Newspaper & Magazine layouts? What needs to take care when creating layouts for Fashion feature or Business articles or News pages. Creating layouts using design softwares. Which software is to be used for making layouts, creating vector graphics and raster images?

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>H</b>	<b>EE</b>
<b>Weightage (%)</b>	10	10	5	5	70

P- Project, CT- Class Test, A- Attendance, H- Home Assignment, EE- End Semester Examination

# ADVERTISING PRINCIPLES & PRACTICE

**Course Code: JRN2204**

**Credit Units: 03**

## **Course Objective:**

The unit will stress on the core concepts like segmentation, targeting and positioning. Students will learn the strategy that goes behind creation of an ad.

## **Course Contents:**

### **Module I: Advertising and Present Trends**

PR and Advertising

Advertising tools

Marketing

Events

### **Module II: The Advertising Plan**

Concept of a brief

Market segmentation and TA

Influence of marketing and TA on Advertising and consumers

### **Module III: Ingredients of an Ad**

Copywriting- meaning, definition and objectives

Copywriting- Print Media

Copywriting- Electronic Media

Guidelines for creative copywriting

### **Module IV: The Media Plan**

Selecting communication channel

Determining the advertising budget

Deciding on communication mix

Evaluation

## **Examination Scheme:**

Components	P	C	CT	A	EE
Weightage (%)	5	10	10	5	70

P- Project, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

## COMPUTER APPLICATIONS-II

**Course Code: JRN2205**

**Credit Units: 03**

### **Course Objective:**

This unit will give students a broad knowledge of below mentioned softwares with which they can create, edit, manipulate images as per their requirements.

### **Course Contents:**

#### **Module I: Quark Xpress**

The fundamentals of QuarkXPress. It is a page layout application. You can use QuarkXPress to create multi page documents such as Text Books, Magazines and Novels, or single page documents such as a personal letter or a simple business card.

#### **Module II: CorelDraw**

Introduction, Interfaces and various palettes, Document Setting, About Menus. CorelDraw accomplishes all of its magic through objects, so your command of object functions determines much of your skill with this program. In this first of two parts devoted to working with objects, you will learn how to manipulate, move, share properties and many more powerful production techniques.

#### **Module III: Adobe Photoshop**

Introduction, Interfaces and various palettes, Document Setting, About Menus. Photoshop delivers a comprehensive environment for professional designers and graphics producers to create sophisticated images for print, the Web, wireless devices, and other media. With its comprehensive set of retouching, painting, drawing, and Web tools, Photoshop helps you complete any image-editing task efficiently.

### **Examination Scheme:**

<b>Components</b>	<b>H</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

H- Home Assignment, P- Project, CT- Class Test, A- Attendance, EE- End Semester Examination

# INDIAN POLITICAL SYSTEM

**Course Code: JRN2206**

**Credit Units: 02**

## **Course Objective:**

Working knowledge of the Indian Political system is mandatory for any aspiring journalist. The course content has been designed to fulfill this requirement without burdening the students. Knowledge about the government, legislatures, judiciary and political parties is vital for those wishing to enter the media. Students are introduced to the Indian Constitution and electoral system all of which form the foundation of a working democracy like India.

## **Course Contents:**

### **Module I: Overview**

Basic understanding of the Indian political system.  
Political parties and groups in power at the centre and states  
Coalition politics, multiparty and two-party systems  
Parliamentary versus presidential form of government, federal and unitary government  
Political problems and issues facing India – corruption, criminalization, bad conduct of members during legislative sessions, political extremism like Maoism and Naxalism, separatism,

### **Module II: Constitution**

Making of Indian Constitution, philosophy, unity in diversity  
Main features of Constitution, secularism, socialist, democratic, republican, preamble, directive principles, fundamental rights, citizenship  
Key amendments of the Constitution (flexible or rigid?)

### **Module III: Legislatures**

Lok Sabha and Rajya Sabha- election of members, powers, legislative functions and differences  
State legislative assemblies and legislative councils  
Election Commission, powers and structure, model code of conduct, election process  
General elections, midterm election, constituencies  
Electoral reforms

### **Module IV: Executive**

President, election, powers, advice of council of ministers binding (figurehead), circumstances in which President actually uses his powers  
Prime minister and council of ministers, their appointment after elections, powers of the prime minister, collective responsibility of the council of ministers  
Governor-powers, functions, responsibilities, relations with Central govt.  
State Governments, chief minister and state council of minister  
Centre-state relations

### **Module V: Judiciary**

Supreme Court, appointment of Chief Justice of India  
Judicial review  
Public Interest Litigation  
Writ petitions  
High Courts

### **Module VI: Political Parties**

Party system in India  
Main national political parties  
Main regional political parties  
Political defections-anti-defection laws  
Major alliances UPA, NDA, Left  
Pressure groups and lobbies

**Examination Scheme:**

Components	P	C	CT	A	EE
Weightage (%)	5	10	10	5	70

P- Project, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE-End Semester Examination

## READINGS IN MEDIA

**Course Code: JRN2230**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective on readings in media is to inculcate analytical bent of mind in students. This will also encourage reading habit along with value addition to the existing understanding of the subject. The exercise will help media students not only develop understanding of different important issues but also give an insight into content handling. Critical analysis of different genres of write ups would help broaden the intellectual horizon of the student.

### **Guidelines:**

The student is required to critique a discipline-specific book and different genres of write ups (as specified) for which the student has to take prior approval of the faculty in-charge. The student is expected to have a detailed insight into the following:

- Content
- Content handling
- Information
- Writing style
- Thematic clarity
- Relevance of issue

### **Methodology**

The student shall be given high quality news articles, editorials and relevant national/international stories from newspapers and newsmagazines. He/she shall be required to critically review the same in terms of content, media handling and content presentation etc. The student may also be asked to critique any non-fiction book. The given assignments are required to be submitted in the form of reports. He/she will be assessed on the basis of the assignment reports and viva voce.

In order to earn the credits, the student will be required to submit reports on the following:

Book Review (1)

Editorial (1)

News articles published on the edit page of a national/international daily (2)

Cover story of a national/international newsmagazine (1)

The report submissions will be followed by viva voce by a panel of 2 faculty members.

### **Evaluation Scheme:**

The student will be required to submit 5 assignments in all as per the details mentioned above. Each assignment will carry equal marks (20 marks each). The marks break up for each assignment will be as follows:

Written Report	Viva Voce
15 marks	5 marks

# PROJECT (WITH PRESENTATION & EVALUATION)

**Course Code: JRN2232**

**Credit Units: 03**

## **Course Objective:**

This concentration elective will help the student develop a critical and analytical eye when it comes to understanding issues/trends related to media. It will provide a platform to the student to interrogate and review various media concepts. The live project will help in giving hands-on training to the communication students.

## **Major Themes for Project**

The project may be based on any of the following major media streams:

- Print Media
- Electronic Media
- Advertising
- Event Management
- Corporate Communication & Public Relations
- Brand Management
- New Media
- Photography

## **Guidelines for Project**

It must be based on either Industry or Research. The student will work under the guidance of a Faculty Guide that will be assigned by HOI. Student can choose topic as per his/her area of interest under the guidance of the Faculty guide.

The student may also choose to undertake a live project in any of the major media streams.

## **Project Report/Portfolio: 75 Marks**

Before the end of the semester, the student will be expected to submit a project report. The project report shall have the following components.

- Title page
- Index
- Introduction
- Industry Overview
- Objectives
- Methodology
- Findings
- Conclusion
- Annexures (questionnaires, if any)
- Bibliography

In case the student undertakes a live project, he/she will have to submit the portfolio instead of the project report. The portfolio will carry 75 marks.

## **Presentation & Viva: 25 Marks**

Student will make a presentation (based on Project Report) and it will be followed by a Viva Voce in front of a Panel of one internal expert and one external expert.

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III :** Collection of information and data relating to the topic and analysis of the same.

**STEP IV :** Writing the report dividing it into suitable chapters

**STEP V :** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

- Each of the students has to undertake a Project/Live Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report/Portfolio or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report/Portfolio and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report/Portfolio unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report/Portfolio.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Examination Scheme**

**Chapter Scheme and distribution of marks (for Project Report):**

Chapter 1: Introduction with statement of objectives, limitations of the study & hypothesis – 10 marks

Chapter 2: Literature Review/Conceptual Framework/ National/International Scenario – 20 marks

Chapter 3: Research Design – 10 marks

Chapter 4: Findings& Results -- 20 marks

Chapter 5: Conclusion & Recommendations -- 10 marks

Chapter 6: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## WORKSHOP/ CERTIFICATION (DISCIPLINE SPECIFIC)

**Course Code: JRN2233**

**Credit Units: 01**

### **Course Objectives:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes For Workshop:**

The workshop may be conducted on any of the following major themes:

Print Journalism  
Broadcast Journalism  
Advertising  
Public Relations  
Event Management  
Brand Management  
Media Research  
Media Planning  
Photography  
New Media  
Designing Softwares

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

### **Guidelines For Workshop:**

The procedure for earning credits from workshop consists of the following steps:

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of at least 500 words about the learning outcome from the workshop.

### **METHODOLOGY**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study  
Practical assignment  
Group Activity  
Role Play

### **EVALUATION**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# MEDIA PRODUCTION PORTFOLIO

**Course Code: JRN2236**

**Credit Units: 03**

## **Course Objective:**

This subject is an attempt to inculcate professional writing skills and knowledge in flowering buds of the media department. The subject will give hands on experience on different aspects of media writing to the students. The students may choose the option of this subject from their concentration electives.

## **Major Areas of Writing:**

The Media Production Portfolio has the following topics for writing:

	No. of items
1. Press Release	1
2. Feature	2
3. Editorial/Article	1
4. News Story	2
5. News Analysis	1
6. Ad Copy (TV/radio/print)	1
7. Letter to Editor	2
8. Movie Review	1

## **Guidelines for Media Production Portfolio**

The following procedure should be followed for the credits:

1. Thorough reading of relevant study material and references.
2. Students will choose the current topics for every area of writing.
3. Students will discuss the topics with the guide and will take the approval.
4. Students will use the formal writing pattern i.e. 12 font size, 1.5 line spacing and Times New Roman.
5. Students will have to make proper formal document that includes
  - ❖ Title Page
  - ❖ Table of Contents
  - ❖ Acknowledgement
  - ❖ Write ups

## **EVALUATION SCHEME**

The production portfolio will carry 100 marks. The marks break up is as follows:

a)	Complete Work	10
b)	Content	
	• Creativity	15
	• Relevance	15
	• Clarity	15
	• Comprehensiveness	15
	• Originality	15
	• Presentation	15

# Syllabus - Third Semester

## TV JOURNALISM

**Course Code: JRN2351**

**Credit Units: 03**

**Course Objective:**

Students will move further into broadcast journalism in India. The unit will cover the process of how news develops and is moulded into essentials of any medium (Radio or TV) over a chain of processes. The basic attributes and skill set needed to pursue a journalistic path will also be debated and discussed. The unit will encourage students to identify the similarities and differences between key processes in both the mediums. The organizational set up will also be communicated for a better understanding of the functioning of a broadcast media organization.

**Course Contents:**

**Module I: Basics of TV journalism**

Qualities of a journalist

Developing sources of news gathering

Process of a report from the idea till its final implementation

Essentials during reporting

Live reporting and presenting the final story

Different styles of functioning for different beats

Basic Interview Skills: different types of interviews, approach, arrangements, research

Stages of production: pre, shoot and post.

**Module II: Functioning of a TV organization**

Hierarchy of a TV set up

Television Personnel – director, floor manager, audio technician, controller, cameraman

Role of a producer

Technical Process of news from initial stages to telecast.

Working process involved during live bulletin and recorded programme

Role/ contribution of each department and personnel

Hierarchy of a news organization

Professional terminologies

**Module III: Outdoor production**

Basic shooting according to shooting script

Team members and their role

Precautions and safety features while shooting

Single and multi-camera shoot

Shooting for fiction

Shooting for non-fiction

Building a sequence in the camera and without external editing

Process and elements of EFP (Electronic Field Production) and ENG (Electronic News Gathering)

OB (Outdoor Broadcast) Van

Satellite Phone

**Examination Scheme:**

Components	H	P	CT	A	EE
Weight age (%)	5	10	10	5	70

H-Home Assignment, P- Project, CT- Class Test, A- Attendance, EE- End Semester Examination

**Texts & References:**

# BASICS OF RESEARCH-I

**Course Code: JRN2301**

**Credit Units: 03**

## **Course Objective:**

This Course would give students an understanding of Basic Research and its importance. It would give them a basic knowledge about the concepts of research.

## **Course Contents:**

### **Module I: An Introduction to Research**

Research: Meaning and definition, objectives of research  
Types of Research – Basic & Applied Research  
Qualitative & Quantitative Research  
Significance of Research, Criteria for a good Research  
Problems encountered by researchers in India.

### **Module II: Research Problem & Research Design**

Defining the Research Problem  
Selection of a problem  
Techniques involved in defining a problem  
Research Design: Meaning, definition & need of a research design.  
Research designs used for different types of Research

### **Module III: Sampling**

Sampling: Definition & need, concept of population, sample & its characteristics, sample size & sample unit.  
Census & Sample Survey, steps in a sample design  
Criteria for selecting a sampling procedure.  
Types of Sampling Designs : Probability Sample & Non Probability Sampling & its further types.

### **Module IV: Measurement & Scaling Techniques**

Measurement in Research, Measurement Scales  
Nominal, Ordinal, Interval & Ratio Scale  
Sources of Error in Measurement, Scaling: Meaning of scaling  
Important scaling techniques: Rating Scales, Arbitrary Scales,  
Differential Scales (Turnstone-type-scales), Summated (Likert Scale)  
Cumulative scales & Factor Scales.

## **Examination Scheme:**

Components	H	C	CT	A	EE
Weightage (%)	5	10	10	5	70

H- Home Assignment, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

## **Text & References:**

# NEWS AND CONTEMPORARY ISSUES

**Course Code: JRN2302**

**Credit Units: 02**

## **Course Objective:**

The students are now on the brink of entering the job market or pursuing higher studies. Before stepping out, this module will serve as a refresher course, which will comprehensively cover all current newsmakers and events. The students will also get a chance to discuss and debate contemporary issues.

## **Course Contents:**

### **Module I: (International)**

Daily international news (newspapers, radio & TV)

Background to the daily news

Thumbnail sketches of chief personalities figuring in current news reports

Relevance of these reports to India and the world community or why they are considered to be important

Important actions taken under the UN umbrella over past 10 years

Regions of conflict in the world

### **Module II: (Domestic)**

Daily domestic news

Background to the news items

Thumbnail sketches of chief personalities figuring in current news reports

Important bills, acts and Constitutional amendments passed by Indian Parliament over past 5 years

Important Supreme Court rulings over past five years

### **Module III: (Economic)**

Regional economic groupings of the world and their functioning

The European Union and its expansion

The World Bank

The Asian Development Bank

World Economic Forum

Profile of the Indian economy (industry, agriculture, infrastructure, growth rates, world ranking, role of planning, budgets and government policies)

The world's top 15 economies

### **Module IV: (Issues for discussion)**

Globalisation

The environment

US dominated world order – politically, culturally and economically

Parliamentary versus Presidential government

Indian Constitution – does it need a change?

Naxalism and Marxism

Clash of civilizations

Should the nuclear club remain exclusive?

Criminalisation of politics

Reservation

Restructuring the UN

### **Module V: (Science & Technology)**

Space and planetary probes

The US and Russian Space programmes

European space programme

China's and India's space programmes and plans to send manned mission to Moon

Nanotechnology

Latest developments in bio-technology

Nuclear power production and risks

The year's Nobel Prizes and topics for which they have been awarded

Cloning

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>H</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	10	5	70

P- Project, H- Home Assignment, CT- Class Test, A- Attendance, EE- End Semester Examination

# DIGITAL PHOTOGRAPHY

**Course Code: JRN2303**

**Credit Units: 03**

## **Course Objective:**

After being exposed to the basics of photography in the first semester, the students will be eager to try their hands in the comparatively new area of digital photography and imaging. They will be able to start maintaining their portfolios and will be required to make digital presentations and undertake practical assignments.

## **Course Contents:**

### **Module I: Artificial Lighting & its control**

Electronic flash & its synchronization

One, two & three point lighting

Working on the Subject

### **Module II: Subject & Composition Variation for various genres**

Portrait

Product

Wildlife,

Nature & landscapes,

Night photography,

Journalism (photography for newspapers & magazines)

### **Module III: Understanding Digital Photography**

Digital Image Construction (Size & Resolution of Digital Images)

Uses, Advantages and Limitations of Digital over Conventional Photography

Image Sensors (CCD and CMOS)

Formats of a Digital Image

Types of Digital Cameras

### **Module IV: Digital Image Manipulation**

Problems with Digital Photographs

Commonly used image editors

Editing images with Adobe Photoshop and Photoshop Elements

Printing and Sharing Digital Images

### **Module V: Advanced Photography Practicals**

Practicing Outdoor Photography

Photography Assignments and Projects

Developing Personal Digital Portfolio

Digital Image Manipulation using various computer software

## **Examination Scheme:**

<b>Components</b>	<b>H</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

H- Home Assignment, P- Project, CT- Class Test, A- Attendance, EE- End Semester Examination

# PUBLIC RELATIONS

**Course Code: JRN2304**

**Credit Units: 03**

## **Course Objective:**

The unit provides a broad introduction to the principles of public relations practice in India. Students will explore the role of public relations in marketing and its contribution to public and private sectors. It teaches techniques of written presentation for a range of specific purposes focusing chiefly on the importance of the overall campaign brief of writing objectives, internal and external communications, issuing statements and press releases, dealing with crises, and the role of the press officer.

## **Course Contents:**

### **Module I: Basics of Public Relations**

Definitions and concepts  
Role and Objectives of PR  
Public Relations in India  
Changing trends in PR  
Internal&External PR  
Globalisation & PR  
Event &Crisis Management

### **Module II: Public Relations & Media Affairs**

Planning Publicity campaign  
Media relations and media planning  
Making Press kit  
Organising press conference  
Advertising and publicity campaign

### **Module III: PR Writing**

Writing for press  
Press release  
Writing company profile  
Contents for the newsletter

### **Module IV: PR for social development**

Public Relations, NGOs & socio-economic development  
Public Relations in journalism and advertising  
Public Relations Laws and Ethics

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>H</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	10	5	70

P- Project, H- Home Assignment, CT- Class Test, A- Attendance, EE- End Semester Examination

# SUMMER INTERNSHIP EVALUATION-I

Course code: JRN2335

Credit Units: 03

## Course Objective:

The basic objective of a Summer Internship is to refine the practical exposure of the corporate functioning. This summer training will provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

## General Guidelines:

Every student of BJMC shall be required to undergo a practical training in a media organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the semester examinations. The candidates shall be required to undergo training in the various areas of the media organization concerned. The work done by the candidate during the training period shall be submitted in form of a training report.

The last date for the receipt of training report in the department shall be one month after the date of completion of training, i.e. at the beginning of the next semester.

The report has to be type written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise a maximum of 80 to 100 pages and has to be submitted in two copies.

## Components of the Report

The outcome of Summer Internship is the Project Report. A project report should have the following components:

- 1) Cover Page:** This should contain the title of the report with the name of the name of the media organization where the student interned, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during his/her internship.
- 3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report:** The body of the report should have these four logical divisions
  - a) **Introduction:** This will cover the overview of the media organization in which the student has interned, rationale/ need / justification for interning with the organization, expectations from the internship and Chapter Planning.
  - b) **Conceptual Framework / National and International Scenario:** (relating to the media domain in which the organization functions).
  - c) **Work Profile/ Assignments Handled by the Student:**(using the tools and techniques mentioned in the methodology).
  - d) **Conclusion and Recommendations and Skill Sets Learnt during Internship:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexures:** Questionnaires (if any), relevant reports, etc.

## Chapter Scheme

Chapter I: Introduction 20 marks

Chapter II: Conceptual Framework/National/International Scenario 5 marks

Chapter III: Work profile/ assignments handled by the student 35 marks

Chapter IV: Conclusion and Recommendations and skill sets learnt during internship 15 marks

## Examination Scheme:

Report	Power Point Presentation & Viva
75 marks	25 marks

# COMPUTER GRAPHICS, ANIMATION & SOUND

**Course Code: JRN2305**

**Credit Units: 03**

## **Course Objective:**

In this module, the students will learn the usage of graphics and animation as an integral element of packaging, design and statistical representation of ideas. This is primarily a technical unit where the student gets the opportunity to convert ideas into reality and get hands on experience.

## **Course Contents:**

### **Module I: Concept of Graphics & Animation**

The term **computer graphics** includes almost everything on computers that is not text or sound. Today almost every computer can do some graphics, and people have even come to expect to control their computer through icons and pictures rather than just by typing.

#### **Difference between graphics and animation**

Computer animation is the use of computers to create animations. There are a few different ways to make computer animations. Most useful is 3D animation. One way to create computer animations is to create objects and then render them. This method produces perfect and three-dimensional looking animations.

#### **Classification of Animation**

Difference between 2D & 3D Animation

Use of Animation, Compositing Animation

### **Module II: Flash**

Flash Editor, Panels, Timeline

Basic Drawing and Painting Tools

Keyframes, Frame by Frame Animation, Onion Skins, Frame Rate

Graphic Symbols, Alignment, Libraries, Layers

Importing BMP and JPG images, Importing sound

Multi-layering

Creating Animation, Motion Tweening, Using a Guide Layer, Mask Animations

### **Module III: Sound**

Fundamentals of Sound Editing

Types of sound formats- WAVE, MP3

Mixing of Stereo, Mono, and Multi-track sound

Mixing the composed sound with the animation

## **Examination Scheme:**

Components	P	H	CT	A	EE
Weightage (%)	10	5	10	5	70

P- Project, H- Home Assignment, CT- Class Test, A- Attendance, EE- End Semester Examination

## **Text & References:**

# MEDIA PLANNING AND BUYING

**Course Code: JRN2306**

**Credit Units: 03**

## **Course Objective:**

The process by which media selects positions by companies or their agencies is a complex one involving substantial marketing and advertising research. While the process includes numerous steps, it operates in two stages: media planning and media buying.

## **Course Contents:**

### **Module I: Media Planning**

Introduction to Media Planning(MP)  
Defining Media Planning.  
Objectives of MP.  
Importance of MP in the current scenario  
Developing Media Strategy-the media mix  
Factors influencing media strategy decisions.

### **Module II: Media: An Overview**

Media types characteristic of major media forms.  
Internet –the big medium  
ATL & BTL Media  
Electronic media  
Outdoor Advertising  
Transit advertising

### **Module III: Media Planning Process**

Matching media & market- Geographical selectivity, reach & frequency.  
Media briefing  
Media scheduling  
Media plan & Strategy development Process  
Media budgeting ( Traditional& Modern methods)  
Media Buying functions  
New trends in Media Buying

## **Examination Scheme:**

<b>Components</b>	<b>H</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

H-Home Assinment, P-Project, CT- Class Test, A- Attendance, EE- End Semester Examination

# DEVELOPMENT COMMUNICATION

Course Code: JRN2307

Credit Units: 02

## Course Objective:

This course will develop an understanding of developmental issues in the mind of students and will make them understand the importance of the subject as via this they can contribute to the development of the country as future mass communicators.

## Course Contents:

### Module I: Concept and indicators of development

Definition, meaning and process of development, Theories and paradigms of development – developed and underdeveloped economics, Ingredients (5Ms) of development and money generation, MNCs and foreign aid, Basic needs model, Indicators of development, Communication, Democracy, Human Rights as an indicator, Sustainable development, Social Relations [inequality]

### Module II: Development theories and issues

Diffusion of Innovation, Empathy, theory of Magic multiplier, localized approach  
Development support communication - Extension Approach- Health and FW, Women empowerment, Literacy & Education, Unemployment, Watershed management, Harvesting, Participation in development

### Module III: Media and Development

Role of communication in development, process, Development message design and communication, Role and performance of Print, Radio, TV, Outdoor publicity in Indian perspective, Cyber media and development, Traditional media and their role in Development Communication, NGOs and development – Communication for rural development (INDIAN PERSPECTIVE): Panchayati Raj, Advancement in farming and alternative employment, Urban sanitation, Slum development, sanitation, Communication for Tribal development, Wild life and forest conservation etc.

## Examination Scheme:

Components	P	H	CT	A	EE
Weightage (%)	5	5	15	5	70

H-Home Assignment, P-Project, CT- Class Test, A- Attendance, EE- End Semester Examination

# PROJECT (PRESENTATION & EVALUATION)

**Course Code: JRN2332**

**Credit Units: 03**

## **Course Objective:**

This concentration elective will help the student develop a critical and analytical eye when it comes to understanding issues/trends related to media. It will provide a platform to the student to interrogate and review various media concepts. The live project will help in giving hands-on training to the communication students.

## **Major Themes for Project**

The project may be based on any of the following major media streams:

- Print Media
- Electronic Media
- Advertising
- Event Management
- Corporate Communication & Public Relations
- Brand Management
- New Media
- Photography

## **Guidelines for Project**

It must be based on either Industry or Research. The student will work under the guidance of a Faculty Guide that will be assigned by HOI. Student can choose topic as per his/her area of interest under the guidance of the Faculty guide.

The student may also choose to undertake a live project in any of the major media streams.

## **Project Report/Portfolio: 75 Marks**

Before the end of the semester, the student will be expected to submit a project report. The project report shall have the following components.

- Title page
- Index
- Introduction
- Industry Overview
- Objectives
- Methodology
- Findings
- Conclusion
- Annexures (questionnaires, if any)
- Bibliography

In case the student undertakes a live project, he/she will have to submit the portfolio instead of the project report. The portfolio will carry 75 marks.

## **Presentation & Viva: 25 Marks**

Student will make a presentation (based on Project Report) and it will be followed by a Viva Voce in front of a Panel of one internal expert and one external expert.

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III :** Collection of information and data relating to the topic and analysis of the same.

**STEP IV :** Writing the report dividing it into suitable chapters

**STEP V :** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

- Each of the students has to undertake a Project/Live Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report/Portfolio or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report/Portfolio and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report/Portfolio unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report/Portfolio.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Examination Scheme**

**Chapter Scheme and distribution of marks (for Project Report):**

Chapter 1: Introduction with statement of objectives, limitations of the study & hypothesis – 10 marks

Chapter 2: Literature Review/Conceptual Framework/ National/International Scenario – 20 marks

Chapter 3: Research Design – 10 marks

Chapter 4: Findings& Results -- 20 marks

Chapter 5: Conclusion & Recommendations -- 10 marks

Chapter 6: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## WORKSHOP/ CERTIFICATION (DISCIPLINE SPECIFICATION)

**Course Code: JRN2333**

**Credit Units: 01**

### **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes For Workshop**

The workshop may be conducted on any of the following major themes:

Print Journalism  
Broadcast Journalism  
Advertising  
Public Relations  
Event Management  
Brand Management  
Media Research  
Media Planning  
Photography  
New Media  
Designing Softwares

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

### **Guidelines for Workshop**

The procedure for earning credits from workshop consists of the following steps:

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of at least 500 words about the learning outcome from the workshop.

### **Methodology**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study  
Practical assignment  
Group Activity  
Role Play

### **Examination Scheme:**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# MEDIA PRODUCTION PORTFOLIO

**Course Code: JRN2336**

**Credit Units: 03**

## **Course Objective:**

This subject is an attempt to inculcate professional writing skills and knowledge in flowering buds of the media department. The subject will give hands on experience on different aspects of media writing to the students. The students may choose the option of this subject from their concentration electives.

## **Major Areas of Writing:**

The Media Production Portfolio has the following topics for writing:

	No. of items
1. Press Release	1
2. Feature	2
3. Editorial/Article	1
4. News Story	2
5. News Analysis	1
6. Ad Copy (TV/radio/print)	1
7. Letter to Editor	2
8. Movie Review	1

## **Guidelines for Media Production Portfolio**

The following procedure should be followed for the credits:

1. Thorough reading of relevant study material and references.
2. Students will choose the current topics for every area of writing.
3. Students will discuss the topics with the guide and will take the approval.
4. Students will use the formal writing pattern i.e. 12 font size, 1.5 line spacing and Times New Roman.
5. Students will have to make proper formal document that includes
  - ❖ Title Page
  - ❖ Table of Contents
  - ❖ Acknowledgement
  - ❖ Write ups

## **EVALUATION SCHEME**

The production portfolio will carry 100 marks. The marks break up is as follows:

a) Complete Work	10
b) Content	
• Creativity	15
• Relevance	15
• Clarity	15
• Comprehensiveness	15
• Originality	15
• Presentation	15

# Syllabus - Fourth Semester

## TV PRODUCTION AND PRESENTATION

**Course Code: JRN2451**

**Credit Units: 03**

### Course Objective:

The module is structured for the students to move further into TV journalism. It shall explore strategies to *handle* key areas within broadcast journalism.

The skill for anchoring and presentation will be honed after explaining the nuances and essentials of the task. This module will also familiarize them with all that is needed for outdoor production and the role of important departments on location. From this unit onwards, they will be exposed to essentials of specialized coverage in the field of current affairs, sports, business etc.

### Course Contents:

#### Module I: Anchoring and presentation

Qualities of an anchor

Role of styling (makeup techniques)

Anchoring according to program formats

News anchoring, Entertainment, current affairs, magazine shows etc

Anchoring techniques: live shows & recorded programmes

Discussing different news anchors of the industry

Using the teleprompter

Piece to camera

#### Module II: Editing (Post-production)

Basic FCP (Final Cut Pro) Tools of Editing

Basic Transitions (cut, dissolve, fade, wipe)

Sequencing shots

Concept of montage

Continuity vs. non continuity

Linear vs. non linear editing

Role of the editor

Ingest and digitize

Overlay and underlay of sound

Ethics involved in editing

Importance of File footage and archival footage

From finished product to broadcasting

#### Module III: Specialized coverage I

Current Affairs

Documentaries and Features

Business and stock market reporting

Sports coverage

Legal reporting and Judiciary

Psephology and election based coverage

Political & parliamentary coverage

### Examination Scheme

Components	H	P	CT	A	EE
Weight age (%)	5	10	10	5	70

H-Home Assignment, P- Project, CT- Class Test, A- Attendance, EE- End Semester Examination

# FILM THEORY AND PRACTICE-I

**Course Code: JRN2401**

**Credit Units: 03**

## **Course Objective:**

This course focuses on the basics of filmmaking and cinema techniques. Students are introduced to principles and methodology of filmmaking. They will be expected to exercise their creativity and visualize and make short films. Apart from filmmaking, preliminary idea to film appreciation will also be introduced. The ability to analyse and put film studies in proper perspective will be intended during the course.

Documentary realism will be pitted against mainstream commercial film genres. An attempt to understand the technical as well as the artistic aspects of film making as a means of human communication will be made and classic films will be viewed and discussed.

## **Course Contents:**

### **Module I: Language of cinema**

World space and screen space

Continuity: space & time

Camera Movements, angles & Shots

Different screen elements & Mise-en-scene

Continuous action, compression & expansion of time and concepts of editing

Dimensions of Sound: onscreen & off-screen, di-getic & non-digetic, sync and non-sync, sound effects, and silence, dialogues, ambient sound, background score & musical tracks.

### **Module II: Stages of Film Production**

Development stage

Pre-production

Production

Post Production

Distribution, promotion & Release

### **Module III: Scriptwriting**

Narrative Composition: 3 plot structure,

Characterization & Dramatic Structure

Scriptwriting formats, step outline & shot break down

Screen Play, Storyboarding & shooting script.

Script selection

Writing proposal

### **Module V: Film Theories**

Early experiments & magic lantern

How to view/read the movie

Narrative and non narrative

Film Genre

French New wave & Italian neo-realism

Early Indian cinema & golden era

Evolution of documentary films

Case study of famous movies- Rosomon, Citizen Ken, PatherPanchali, Sholey, Charulata, Gone with the winds etc

## **Examination Scheme:**

Components	CT	C	V	A	EE
Weightage (%)	10	10	5	5	70

CT- Class Test, C- Case Discussion/Presentation/Analysis, V- Viva, A- Attendance, EE- End Semester Examination

# CORPORATE COMMUNICATION & EVENT MANAGEMENT

**Course Code: JRN2402**

**Credit Units: 03**

## **Course Objective:**

Various components like corporate philosophy, identity, citizenship and philanthropy will be learnt and discussed by the students. Image and its management and enhancement which is the core of corporate communication will also be explained. Direct marketing, issue support and crisis management will be learnt. Public affairs and political PR and lobbying as a weapon in the hand of effective communicators will be discussed. To develop an understanding of the role of event Management, in today's fast changing trends. The modules given below will provide complete understanding of the different kinds of events, their organization and how corporate communication plays a role. This subject marks the beginning and serves as an introduction to the Event Management and its related aspects.

## **Course Contents:**

### **Module I: Corporate Communication**

Introduction

Importance and functions

Elements of corporate communication: corporate philosophy, culture

Corporate identity, citizenship and philanthropy

### **Module II**

Image management

Direct marketing, network marketing

Issue management

Crisis management, disaster management

Media management

Event management

### **Module III**

Celebrity management

Public affairs, political PR

Lobbying

Desktop publishing (DTP)

Group communication

### **Module IV: Introduction to Events**

Defining Event and Event Management

Different Kinds of Events

Relationship between-Events, Advertising, and PR

### **Module V: Marketing of Different Kinds of Events**

Departments in an event Management company

Marketing of an Event

Brand Positioning through Events

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>C</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

P- Project, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

# MEDIA MANAGEMENT

**Course Code: JRN2403**

**Credit Units: 02**

## **Course Objective:**

Today newspaper business is one of the most challenging and competitive. It is important for the student of mass communication to know about newspaper management and how the ownership has changed. Media has to operate given within the framework of ethics and laws. Hence it's important for the student to know and learn about media laws and ethics.

## **Course Contents:**

### **Module I: Media Management: An Introduction**

Media as an industry and profession

Journalists becoming managers

Ownership patterns of mass media: Print and Broadcast Media

Organizational structure: Different Departments, General Management, Control and co-ordination, Hierarchy

### **Module II: Contemporary Practices in Media Management**

Media ventures: Growth of Indian Print Media Business, Growth of Indian TV Industry, Resurgence of Radio Industry, The Indian Film Industry

Problems, process and prospects of Indian Media Business

Media Industry: Changing commercial equations vis-à-vis market and audience

### **Module III: Media and Globalization**

Foreign equity in Indian media

The concept of global media

Global Media Giants and their selected holdings

Globalization of media and its impact

### **Module IV: Media Laws and regulation bodies**

Laws governing media: The Contempt of Courts Act, Defamation, The Copyright Act (Concept of piracy), Right to Information Act, The Official Secrets Act, Right to privacy, Freedom of media, The code of media ethics

## **Examination Scheme:**

Components	P	C	CT	A	EE
Weightage (%)	5	10	10	5	70

P-Project, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

## **Text & References:**

# WEB DESIGNING

**Course Code: JRN2404**

**Credit Units: 02**

## **Course Objective:**

The power of the Internet has penetrated every nook and cranny of our lives. Journalism has also been revolutionized with the inclusion of the World Wide Web for news gathering and news dissemination. Aspiring journalists today need to be familiar with cyber journalism and basics of web designing. The course curriculum has been designed keeping this end in view.

## **Course Contents:**

### **Module I: Introduction to Internet**

Internet- Introduction, History, Benefits, limitations and Ethics, Future of the Web  
W3C

Internet tool kits - server, IP address, URL, ISP, networking, browsers, Search Engine, Domain, Domain name etc

Classification of Websites

Home page, hyperlinks

### **Module III: Web Designing**

Web Design Guidelines

Customer-Centered Design Process; Knowing your Customers

Planning your Website

Design Patterns

Basic HTML

CSS

Dreamweaver

### **Module IV: Web Graphics**

Introduction

Image optimization, size, resolution and number of Colours, Creating Homepage,

File formats, Image mapping, Image manipulation (Effects)

## **Examination Scheme:**

<b>Components</b>	<b>H</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

H-Home Assignment, P- Project, CT- Class Test, A- Attendance, EE- End Semester Examination

# BASICS OF RESEARCH-II

**Course Code: JRN2405**

**Credit Units: 03**

## **Course Objective:**

This course will teach students about quantitative research where they will learn about methods of collection and analysis of data and they will also learn about the structured way of writing for research. It will enhance their abilities and understanding and as a result they will undertake a full-fledged research project.

## **Course Contents:**

### **Module I: Data Collection**

Type of research design: experimental, non-experimental, and quasi-experimental

Introduction to hypothesis testing – meaning & characteristics, types of hypothesis, procedure & limitations of hypothesis testing

Type of variables: independent, dependent and controlled

Data collection: The process of measurement, measuring techniques, levels and problems of measurement, psychometric features of an instrument (reliability and validity), developing a survey questionnaire, secondary analysis, and basic ideas involved in sampling and concise introduction to various sampling strategies

Tools: questionnaires, surveys, & schedules

Questionnaire: structured/ detailed, unstructured/open ended, & pictorial

### **Module II: Data Analysis**

Measurement in Research

Measurement Scales: nominal, ordinal, interval & ratio scale

Important scaling techniques: rating scales, arbitrary scales, differential scales (Turnstone-type-scales), summated (Likert Scale), cumulative scales & factor scales

Sources of error in measurement & scaling & meaning of scaling

Mathematical tools: mean, median, mode, & correlation

Measures of central tendency, & measures of dispersion

### **Module III: Data Presentation**

Types of writers

Stages of writing: first draft, second draft, final draft and proof-reading

Difference between proposal, report and thesis

Writing as a continuous process: writing to report vs. writing to learn

Mistakes, Lessons, and Emerging Insights of the Pilot Project

Writing the final findings, insights, questions for future research

Structure and conventions of research writing: Title of the Project, Abstract, Acknowledgements, Table of Contents and Indexing, format of referencing, Difference between footnotes and endnotes, Presenting tables, graphs, diagrams, and appendix

### **Module IV: Research Project**

Each student will be carrying out an individual project on quantitative research

## **Examination Scheme:**

<b>Components</b>	<b>H</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

H-Home Assignment, P- Project, CT- Class Test, A- Attendance, EE- End Semester Examination

# ADVERTISING DESIGN

**Course Code: JRN2406**

**Credit Credits: 03**

## **Course Objective:**

The course provides students a broad knowledge of the skills required to combine all the elements necessary to create an attractive design for advertisements. They will learn the terminology used in layout and design. The students will study the design for advertising layouts, graphics, taking into the consideration the choice of typeface and positioning and choice of colors, images and text. Their work will include practical project as well as investigations into current advertising design.

## **Course Contents:**

### **Module I: Building brand image**

**Corporate Identity:** Study and Usage of Types & Fonts, Color schemes, Punch line etc.

**Corporate Stationary:** Logo, Logotype, Letterhead design, Business Card, Envelop, Catalogues, Brochures. Digital Posters. Calendar Design. Difference between Corporate and Personal stationary.

### **Module II: Communicating through multiple media**

Different types of advertising: Press ad, Magazine ad, Hoardings, Kiosks, Interior & Exterior Signage, Dangers and Banners etc. Choice and use of images and colors. Digital and print produces integrated design solutions.

How different choice of typography is useful in making of layout. Choice of smart fonts makes attractive and reader friendly advertisements. How can one make design, which will stand out from the rest?

How relevant images are manipulated for making up of an effective design.

### **Module III: Concept of Advertising Campaign**

**Advertising Campaign:** Concept development for advertisements. To provide the valuable experience of developing advertising campaigns, from creative to presentation. Study of various existing campaigns. Practical work on developing an advertising campaign involving various facets of all the mediums. Working on campaign elements- Tagline, Visuals, Copy, **Spot colors**, Processcolors, **Color Management for images**.

### **Module IV: Relevant Softwares of Computer**

Photoshop, PageMaker, Corel draw & Illustrator, its relevant usage indifferent in different design forms. Different softwares are used for different purpose with proper impact. Which software is to be used for making layouts, creating vector graphics/images and raster images?

### **Module V: Computer and Advertising**

How computer and advertising is synonym to each other. To create any ad or design computer is a basic tool. It is smarter and faster to execute layouts. Working examples of the same to be discussed.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>C</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

P- Project, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

# BRAND MANAGEMENT

**Course Code: JRN2407**

**Credit Units: 02**

## **Course Objective:**

This course will familiarize students with the power of Branding. Students will learn the basic concepts related to brands. And how various tools of marketing & communication revolve around launching, building and sustaining brands.

## **Course Contents:**

### **Module I: Concept of a Brand**

Evolution of Brands

Company, Brands & Products

Brand Differentiation

Brand Equity

Brand Extension

Brand Perspectives – Visual / Verbal, Positioning, Value, Brand Image, Value Added, Perceptual

Appeal & Personality perspectives

### **Module II: Important Brand Decisions**

Brand Positioning – Attribute Benefit, Application, User, Competitor, Price / Quality & Product

Category positioning.

Building brands in the new economy

Brand Image & Verbal Identity

Packaging & Labeling

### **Module II: Branding Strategies**

Products Branding

Line Branding

Range Branding

Umbrella Branding

Source/Double Branding

Endorsement Branding

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>CT</b>	<b>C</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

P-Project, CT- Class Test, C- Case Discussion/Presentation/Analysis, A- Attendance, EE- End Semester Examination

# PROJECT (PRESENTATION & EVALUATION)

**Course Code: JRN2432**

**Credit Units: 03**

## **Course Objective:**

This concentration elective will help the student develop a critical and analytical eye when it comes to understanding issues/trends related to media. It will provide a platform to the student to interrogate and review various media concepts. The live project will help in giving hands-on training to the communication students.

## **Major Themes for Project**

The project may be based on any of the following major media streams:

- Print Media
- Electronic Media
- Advertising
- Event Management
- Corporate Communication & Public Relations
- Brand Management
- New Media
- Photography

## **Guidelines for Project**

It must be based on either Industry or Research. The student will work under the guidance of a Faculty Guide that will be assigned by HOI. Student can choose topic as per his/her area of interest under the guidance of the Faculty guide.

The student may also choose to undertake a live project in any of the major media streams.

## **Project Report/Portfolio: 75 Marks**

Before the end of the semester, the student will be expected to submit a project report. The project report shall have the following components.

- Title page
- Index
- Introduction
- Industry Overview
- Objectives
- Methodology
- Findings
- Conclusion
- Annexures (questionnaires, if any)
- Bibliography

In case the student undertakes a live project, he/she will have to submit the portfolio instead of the project report. The portfolio will carry 75 marks.

## **Presentation & Viva: 25 Marks**

Student will make a presentation (based on Project Report) and it will be followed by a Viva Voce in front of a Panel of one internal expert and one external expert.

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III :** Collection of information and data relating to the topic and analysis of the same.

**STEP IV :** Writing the report dividing it into suitable chapters

**STEP V :** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

- Each of the students has to undertake a Project/Live Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report/Portfolio or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report/Portfolio and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report/Portfolio unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report/Portfolio.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Examination Scheme**

**Chapter Scheme and distribution of marks (for Project Report):**

Chapter 1: Introduction with statement of objectives, limitations of the study & hypothesis – 10 marks

Chapter 2: Literature Review/Conceptual Framework/ National/International Scenario – 20 marks

Chapter 3: Research Design – 10 marks

Chapter 4: Findings& Results -- 20 marks

Chapter 5: Conclusion & Recommendations -- 10 marks

Chapter 6: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## WORKSHOP/ CERTIFICATION (DISCIPLINE SPECIFICATION)

## **Guidelines for Media Production Portfolio**

The following procedure should be followed for the credits:

1. Thorough reading of relevant study material and references.
2. Students will choose the current topics for every area of writing.
3. Students will discuss the topics with the guide and will take the approval.
4. Students will use the formal writing pattern i.e. 12 font size, 1.5 line spacing and Times New Roman.
5. Students will have to make proper formal document that includes
  - ❖ Title Page
  - ❖ Table of Contents
  - ❖ Acknowledgement
  - ❖ Write ups

## **Examination Scheme**

The production portfolio will carry 100 marks. The marks break up is as follows:

a) Complete Work	10
b) Content	
• Creativity	15
• Relevance	15
• Clarity	15
• Comprehensiveness	15
• Originality	15
• Presentation	15

# Syllabus – Fifth Semester

## NEW MEDIA

**Course Code: JRN2551**

**Credit Units: 03**

### Course Objective:

Apart from discussing specialized coverage, *the concept of convergence* will be explored in this semester. The power of the Internet has penetrated every nook and cranny of life. Journalism has also been revolutionized with the inclusion of the World Wide Web for newsgathering and news dissemination. Aspiring journalists today need to be familiar with cyber journalism and the basics of web designing. The course curriculum has been designed, keeping this end in view

### Course Contents:

#### Module I: Specialized coverage – II

Disaster & crises coverage  
Science and technology  
Environment, Poverty, and Gender

#### Module II: Convergence

What is convergence?  
Emergence of convergence and its effects on broadcast media  
Language, structure and technology of new media  
Creative, Business, Technical Skills in Convergence Media Programming

#### Module III: Cyber Media

Cyber Journalism: History of Internet  
Comparison of cyber media with Print, TV & Radio.  
Writing for Web Media  
Online as a publishing medium  
Online as an advertising tool  
Why Print & Electronic Media networks are going on the Net?  
Impact of Web Journalism on reading habits of people and media industry.  
Analysis of important Indian news-based websites  
Impact of globalization on Web Journalism  
Cyber Laws and debates  
Concept of e-governance & e-learning  
Finding information on the World Wide Web  
Writing for blogs

### Examination Scheme:

Components	P	H	A	CT	EE
Weightage (%)	10	5	5	10	70

P- Project, H- Home Assignment, A- Attendance, CT- Class Test, EE- End Semester Examination

### Text & References:

# FILM THEORY AND PRACTICE-II

**Course Code: JRN2501**

**Credit Units: 03**

## **Course Objective:**

The finer nuances of cinema will be explained. Film appreciation will be an integral part of the semester. The ability to analyse and put film studies in proper perspective will be intended during the course. Work of famous directors will be screened and analyzed. The students will be expected to put into practice their understanding by shooting a film on a topic of their choice.

## **Course Contents:**

### **Module I: Editing Techniques**

Digital & Analog editing systems

Linear & Non-Linear editing

Online and offline editing

Technical Vs Creative editor

Basic transitions

Match cut, jump cut, cut-in & cut-away

Parallel cutting & inter-cutting

Intellectual editing & Montage theory

Techniques of editing- Action sequence, comedy sequence, Romantic sequence, conversation sequences, chasing sequence, music video etc.

Use of graphics & animation

Basics operations of Final Cut Pro

### **Module II: Documentaries Film**

Producing a documentary

Types of documentary films

Scripting documentary film

Post-production techniques of documentaries

Narration and voice-over style

Importance of Research in documentary film

### **Module III: Funding, Marketing, Promotions & Union memberships**

Pitching the producer & distributors

Packaging of final product

Marketing and promotion strategies

Exhibition & film festival

Funding agencies and financial issues

Associations and Guilds

Changing audience perceptions and tastes

Strategies to garner profit: Multi theatre or single theatre release

Structure of the film industry

### **Module IV: Film Studies**

Auteur Theory

Feminist Film Theory

Avant-Garde & Cinema Verite

Contemporary Indian Cinema

Case study of famous film directors- Satyajit Ray, Alfred Hitchcock, D.W Griffith, Charlie Chaplin, Guru Dutt, Raj Kappor, Yashchopra, AdoorGopalkrishnan etc.

Current & Changing trends in Indian cinema

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>C</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

P- Project, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

# NATIONAL AND INTERNATIONAL ISSUES AND AFFAIRS

**Course Code: JRN2502**

**Credit Units: 02**

## **Course Objective:**

This course focuses on the need to keep the students abreast of the latest happenings in the national and international arenas. This module will have all the latest information on contemporary events. Essential backgrounders on prominent national and international organizations that are constantly in the news for various reasons will also be provided to the students. Students will be introduced to and kept updated on other current issues and affairs, which are high on the world agenda.  
International organizations-

## **Course Contents:**

### **Module I: International organizations**

United Nations, International Red Cross, Interpol,

### **Module II: International groupings**

Like G8, Non Aligned movement, Commonwealth

National organizations- Central Bureau of Investigation (CBI), Election Commission (EC), Central Vigilance Commission (CVC), National Human Rights Commission

### **Module III: Indian foreign policy-**

India and issue of permanent seat in the UN

India's relations with different countries- US, UK, Pakistan, Nepal, Sri Lanka, Middle East

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>H</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	10	5	70

P- Project, H- Home Assignment, CT- Class Test, A- Attendance, EE- End Semester Examination

## SUMMER INTERNSHIP EVALUATION-II

Course Code: JRN2535

Credit Units: 06

### Objective:

The basic objective of a Summer Internship is to refine the practical exposure of the corporate functioning. This summer training will provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

### General Guidelines:

Every student of BJMC shall be required to undergo a practical training in a media organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the semester examinations. The candidates shall be required to undergo training in the various areas of the media organization concerned. The work done by the candidate during the training period shall be submitted in form of a training report.

The last date for the receipt of training report in the department shall be one month after the date of completion of training, i.e. at the beginning of the next semester.

### Components of the Report

The outcome of Summer Internship is the Project Report. A project report should have the following components:

- 1) Cover Page:** This should contain the title of the report with the name of the name of the media organization where the student interned, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during his/her internship.
- 3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report:** The body of the report should have these four logical divisions
  - a) **Introduction:** This will cover the overview of the media organization in which the student has interned, rationale/ need / justification for interning with the organization, expectations from the internship and Chapter Planning.
  - b) **Conceptual Framework / National and International Scenario:** (relating to the media domain in which the organization functions).
  - c) **Work Profile/ Assignments Handled by the Student:**(using the tools and techniques mentioned in the methodology).
  - d) **Conclusion and Recommendations and Skill Sets Learnt during Internship:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexures:** Questionnaires (if any), relevant reports, etc.

### Chapter Scheme

Chapter I: Introduction 20 marks

Chapter II: Conceptual Framework/National/International Scenario 5 marks

Chapter III: Work profile/ assignments handled by the student 35 marks

Chapter IV: Conclusion and Recommendations and skill sets learnt during internship 15 marks

The report has to be type written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise a maximum of 80 to 100 pages and has to be submitted in two copies.

### Examination Scheme:

Report	Power Point Presentation & Viva
75 marks	25 marks

# EVENT MANAGEMENT-II

**Course Code: JRN2503**

**Credit Units: 03**

## **Course Objective:**

This course gives a further insight to the students, on the latest yet very important element of marketing communications – Event Management. With the traditional forms of communications becoming saturated, event management has emerged as an effective alternate for brand awareness. The students will essentially be taken through fundamentals of event management, concept and design, logistics, marketing and promotion, stagecraft

## **Course Contents:**

### **Module I: Activities in Event Management**

5c's of Event Designing

Scheduling

Pre, During Post Event Activities Logistic

Suppliers

Technical requirements-Lighting, Audio/Video

### **Module II: Event theme**

Venue

Target Audience

Layout

Theme

Backdrop, Banner

Décor

### **Module III: Entertainment**

Catering

Various media for event promotion

Understanding the relevance of each media to event promotion

Comparison and strengths and weaknesses of each

Sponsorships

Event marketing and event promotion

### **Module IV: Event Evaluation**

Basic Evaluation Process

Establishing tangible objectives and sensitivity in evaluation

Evaluation from Event Organizers' Point of View

Evaluation from Clients' Point of View

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>Q</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	10	5	70

P- Project, Q- Quiz, CT- Class Test, A- Attendance, EE- End Semester Examination

# MULTIMEDIA

**Course Code: JRN2504**

**Credit Units: 03**

## **Course Objective:**

This course focuses on the design and evaluation of multimedia learning and teaching environments in higher education settings as well as corporate training contexts. Students are introduced to principles of multimedia design based on cognitive theories and constructivist approaches to learning. Based on the hands-on experience approaches, methods, and criteria for the evaluation of multimedia environments are introduced and will be applied to the examples. In the end of the course, students are exposed to further case studies and develop their own concept for a multimedia project.

## **Course Contents:**

### **Module I: Introduction to Multimedia**

Introduction, Classification, Elements (Video, Sound, Text, Graphics, Animation, etc), Characteristics of multimedia, Constraints of multimedia, Application of multimedia in various industries, Challenges of multimedia.

### **Module II**

Design Concepts

User Interface Design and Navigation

Hypermedia Authoring Concepts

Pre Production and Planning and Design

Post Production Evaluation

Multimedia Sound

Digital Video and Audio

Digital Video Production (compression and decompression)

Animation for Multimedia (concept, storyboard, key frames, production)

### **Module III**

Basic Flash Action Scripting

Portfolio creation or show reel based on Flash or Dreamweaver

Final Project Presentations

## **Examination Scheme:**

Components	P	Q	CT	A	EE
Weightage (%)	5	10	10	5	70

P- Project, Q- Quiz, CT- Class Test, A- Attendance, EE- End Semester Examination

# ADVANCED RESEARCH

**Course Code: JRN2505**

**Credit Units: 02**

## **Course Objective:**

In the previous semesters students learnt about both qualitative & quantitative research and in this semester the students will not only work on a more expansive research project but will learn about communication research theories and specialized application of research in the field of advertising and marketing.

## **Course Contents:**

### **Module I: Communication Research Theories**

Brief introduction to main communication models

Three traditions in communication research: Users and gratification, lifestyle, and reception analysis

### **Module II: Marketing Research**

Concepts & definitions

Stages & process

Strengths & limitations

Relationship with marketing management

Applications of market research

Case Studies

Field trip to market research companies & submit a research report

### **Module III: Advertising Research**

Concept & definitions

Importance of advertising research

Strengths & limitations

### **Module IV: Main Project**

Students have a choice to choose from qualitative or quantitative project mixed approach to doing research.

## **Examination Scheme:**

<b>Components</b>	<b>Q</b>	<b>P</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
<b>Weightage (%)</b>	5	10	10	5	70

Q-Quiz, P- Project, CT- Class Test, A- Attendance, EE- End Semester Examination

# PROJECT (PRESENTATION & EVALUATION)

**Course Code: JRN2532**

**Credit Units: 03**

## **Course Objective:**

This concentration elective will help the student develop a critical and analytical eye when it comes to understanding issues/trends related to media. It will provide a platform to the student to interrogate and review various media concepts. The live project will help in giving hands-on training to the communication students.

## **Major Themes for Project**

The project may be based on any of the following major media streams:

- Print Media
- Electronic Media
- Advertising
- Event Management
- Corporate Communication & Public Relations
- Brand Management
- New Media
- Photography

## **Guidelines for Project**

It must be based on either Industry or Research. The student will work under the guidance of a Faculty Guide that will be assigned by HOI. Student can choose topic as per his/her area of interest under the guidance of the Faculty guide.

The student may also choose to undertake a live project in any of the major media streams.

## **Project Report/Portfolio: 75 Marks**

Before the end of the semester, the student will be expected to submit a project report. The project report shall have the following components.

- Title page
- Index
- Introduction
- Industry Overview
- Objectives
- Methodology
- Findings
- Conclusion
- Annexures (questionnaires, if any)
- Bibliography

In case the student undertakes a live project, he/she will have to submit the portfolio instead of the project report. The portfolio will carry 75 marks.

## **Presentation & Viva: 25 Marks**

Student will make a presentation (based on Project Report) and it will be followed by a Viva Voce in front of a Panel of one internal expert and one external expert.

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III :** Collection of information and data relating to the topic and analysis of the same.

**STEP IV :** Writing the report dividing it into suitable chapters

**STEP V :** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

- Each of the students has to undertake a Project/Live Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report/Portfolio or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report/Portfolio and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report/Portfolio unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report/Portfolio.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e. average marks of the internal and external experts will be allotted to the candidate.

**Examination Scheme**

**Chapter Scheme and distribution of marks (for Project Report):**

Chapter 1: Introduction with statement of objectives, limitations of the study & hypothesis – 10 marks

Chapter 2: Literature Review/Conceptual Framework/ National/International Scenario – 20 marks

Chapter 3: Research Design – 10 marks

Chapter 4: Findings& Results -- 20 marks

Chapter 5: Conclusion & Recommendations -- 10 marks

Chapter 6: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## WORKSHOP/ CERTIFICATION (DISCIPLINE SPECIFIC)

**Course Code: JRN2533**

**Credit Units: 01**

### **Course Objective:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes For Workshop**

The workshop may be conducted on any of the following major themes:

Print Journalism  
Broadcast Journalism  
Advertising  
Public Relations  
Event Management  
Brand Management  
Media Research  
Media Planning  
Photography  
New Media  
Designing Softwares

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

### **Guidelines For Workshop**

The procedure for earning credits from workshop consists of the following steps:

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of at least 500 words about the learning outcome from the workshop.

### **Methodology**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study  
Practical assignment  
Group Activity  
Role Play

### **Examination Scheme**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# MEDIA PRODUCTION PORTFOLIO

**Course Code: JRN2536**

**Credit Units: 03**

## **Course Objective:**

This subject is an attempt to inculcate professional writing skills and knowledge in flowering buds of the media department. The subject will give hands on experience on different aspects of media writing to the students. The students may choose the option of this subject from their concentration electives.

## **Major Areas of Writing:**

The Media Production Portfolio has the following topics for writing:

	No. of items
1. Press Release	1
2. Feature	2
3. Editorial/Article	1
4. News Story	2
5. News Analysis	1
6. Ad Copy (TV/radio/print)	1
7. Letter to Editor	2
8. Movie Review	1

## **Guidelines for Media Production Portfolio**

The following procedure should be followed for the credits:

1. Thorough reading of relevant study material and references.
2. Students will choose the current topics for every area of writing.
3. Students will discuss the topics with the guide and will take the approval.
4. Students will use the formal writing pattern i.e. 12 font size, 1.5 line spacing and Times New Roman.
5. Students will have to make proper formal document that includes
  - ❖ Title Page
  - ❖ Table of Contents
  - ❖ Acknowledgement
  - ❖ Write ups

## **EVALUATION SCHEME**

The production portfolio will carry 100 marks. The marks break up is as follows:

a) Complete Work	10
b) Content	
• Creativity	15
• Relevance	15
• Clarity	15
• Comprehensiveness	15
• Originality	15
• Presentation	15

# Syllabus - Sixth Semester

## PROFESSIONAL PROJECT (ANY ONE)

**Course Code: JRN2601**

**Credit Units: 09**

### Course Objective:

To give an in-depth exposure to the area of specialization, in order to make the students “industry ready” immediately after the programme

### Course Contents:

#### Project Outlines

The students can opt for any of the following specialized area:

- Print
- Advertising
- Public Relations
- Photography
- Electronic Communication

#### PRINT

Students can jointly bring out a journal with each one attending to a specific function of its production like reporting, editing, sub-editing, design and layout, photography and graphics.

#### ADVERTISING

The students will use their understanding of all advertising concepts learnt in the previous semesters to do a practical exercise. Students will act as brand managers of a new brand being launched. They will be required to study the following elements for the product category assigned to them:

- Market Research to determine the situation analysis
- Segmenting the market and selecting a segment for their new brand
- Identifying target audience
- Positioning their brand. This will involve a detailed study of the positioning of the competitive brands
- Developing the media strategy, including the communication mix
- Developing the creative strategy
- Creative strategy to follow a complete campaign creative presentation. This will include development of TV Commercials, print ads, radio ads and POP material.

#### PUBLIC RELATIONS & EVENTS

PR specialization can be undertaken in these different areas

- Crisis case studies
- PR in Non- Governmental organizations
- Cross- cultural PR
- Internal PR department in corporate situation

Event specialization can be undertaken as a consolidation of various elements of event management. The student will conceptualize and develop an original project which will incorporate the following aspects.

Designing of an event  
Event logistics and Stage management  
Marketing and promotions of the event

(Topics other than listed can also be chosen in consultation with the concerned faculty)

## PHOTOGRAPHY

Student can choose any two subjects for Specialization:

- Photojournalism
- Travel Photography
- Portrait Photography
- Product & Table-top Photography
- Glamour Photography
- Wild life Photography

Students have to get themselves registered with the faculty concerned and take up project work in a systematic manner, planning, exposing in colour as well as in B & W processing, contact sheet, enlargements and presentation in a portfolio.

These projects have a direct bearing on the career prospects of students as well as the image of the Photography Department of ASCO, therefore, the decision of faculty in every stage of assignment would be considered final and binding.

## ELECTRONIC COMMUNICATION

(The Student can choose between creating and analyzing a topic in radio or television as part of this specialization. )

### RADIO

Students can do specialization in the different areas of Radio production Viz. Various Formats, News, Talk shows, Spots and commentaries, Radio documentary, Radio features, Various music formats- classical, countdown shows, contemporary hit radio, music on demand, oldies, artist spotlights, request and dedication shows etc.

Commercials/Jingles/ PSAs

### TELEVISION

The students can choose a specific area of TV production in which they want to specialize, viz. TV Journalism, Reporting, Anchoring, Editing, Camera, Documentary Film making, Feature Films, Short Film, Ad Film making, Entertainment Based programming etc.

The above specialization will be conducted by guides and mentors responsible for a group of students and will include industry training, research and dissertation.

### Examination Scheme:

Total marks for professional project -	100 marks
Break-up of marks	
<b>A)Project File</b>	<b>55 marks</b>
A.I) Timely Submission	5 marks
A.II) Content	
A.II.i) Clarity	25 marks
A.II.ii) Comprehensiveness	20 marks
A.II.iii) Originality	5 marks
<b>B) Project Presentation</b>	<b>45 marks</b>

# INTERNSHIP / DISSERTATION

Course code: JRN2637

Credit Units: 09

## Course Objective:

The basic objective of a Summer Internship is to refine the practical exposure of the corporate functioning. This summer training will provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus this summer internship programme is an attempt to bridge the gap between theory and practice. This will also enhance the students' intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach.

## General Guidelines:

Every student of BJMC shall be required to undergo a practical training in a media organization approved by the Institute for eight weeks, normally in the Summer Vacation, after the end of the semester examinations. The candidates shall be required to undergo training in the various areas of the media organization concerned. The work done by the candidate during the training period shall be submitted in form of a training report.

The last date for the receipt of training report in the department shall be one month after the date of completion of training, i.e. at the beginning of the next semester.

## Components of the Report

The outcome of Summer Internship is the Project Report. A project report should have the following components:

- 1) Cover Page:** This should contain the title of the report with the name of the media organization where the student interned, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
- 2) Acknowledgement:** Various organizations and individuals who might have provided assistance /co-operation during his/her internship.
- 3) Table of Content:** Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
- 4) Body of the Report:** The body of the report should have these four logical divisions
  - a) **Introduction:** This will cover the overview of the media organization in which the student has interned, rationale/ need / justification for interning with the organization, expectations from the internship and Chapter Planning.
  - b) **Conceptual Framework / National and International Scenario:** (relating to the media domain in which the organization functions).
  - c) **Work Profile/ Assignments Handled by the Student:**(using the tools and techniques mentioned in the methodology).
  - d) **Conclusion and Recommendations and Skill Sets Learnt during Internship:** In this section, the concluding observations based on the main findings and suggestions are to be provided.
- 5) Bibliography or References:** This section will include the list of books and articles which have been used in the project work, and in writing a project report.
- 6) Annexures:** Questionnaires (if any), relevant reports, etc.

## Chapter Scheme

Chapter I: Introduction 20 marks

Chapter II: Conceptual Framework/National/International Scenario 5 marks

Chapter III: Work profile/ assignments handled by the student 35 marks

Chapter IV: Conclusion and Recommendations and skill sets learnt during internship 15 marks

The report has to be type written in font Times New Roman, 12 points, 1.5 line spacing on both sides of the paper, Spiral Bound. The report should comprise a maximum of 80 to 100 pages and has to be submitted in two copies.

## Examination Scheme:

Report	Power Point Presentation & Viva
75 marks	25 marks

# MEDIA ANALYSIS

**Course Code: JRN2602**

**Credit Units: 03**

**Course Objective:**

The objective of this course is to provide a clear understanding of trends, movements and principles of journalism, problems and issues in newsgathering.

**Course Contents:**

**Module I: Problems and Issues in Newsgathering**

Objectivity

Introduction to defamation

Activism in journalism

Embedded reporters

Credibility of sources

Pressures on media – internal, governmental, advertising, PR

**Module II: Commercialization of media**

Media trials

Changing equations in media business – mergers & acquisitions, cross media holdings, new trends

Media ethics

**Module III: Alternate media**

Citizen Journalism

Blogs as alternate media

Community media

**Module IV: Broadcast Regulations**

Overview of Broadcast law

Evolution of Broadcast Bill

Cable TV Regulation Act

**Examination Scheme:**

Components	P	C	CT	A	EE
Weightage (%)	5	10	10	5	70

P- Project, C- Case Discussion/Presentation/Analysis, CT- Class Test, A- Attendance, EE- End Semester Examination

## READINGS IN MEDIA

**Course Code: JRN2630**

**Credit Units: 02**

### **Course Objective:**

The objective of this concentration elective on readings in media is to inculcate analytical bent of mind in students. This will also encourage reading habit along with value addition to the existing understanding of the subject. The exercise will help media students not only develop understanding of different important issues but also give an insight into content handling. Critical analysis of different genres of write ups would help broaden the intellectual horizon of the student.

### **Guidelines:**

The student is required to critique a discipline-specific book and different genres of write ups (as specified) for which the student has to take prior approval of the faculty in-charge. The student is expected to have a detailed insight into the following:

- Content
- Content handling
- Information
- Writing style
- Thematic clarity
- Relevance of issue

### **Methodology**

The student shall be given high quality news articles, editorials and relevant national/international stories from newspapers and newsmagazines. He/she shall be required to critically review the same in terms of content, media handling and content presentation etc. The student may also be asked to critique any non-fiction book. The given assignments are required to be submitted in the form of reports. He/she will be assessed on the basis of the assignment reports and viva voce.

In order to earn the credits, the student will be required to submit reports on the following:

Book Review (1)

Editorial (1)

News articles published on the edit page of a national/international daily (2)

Cover story of a national/international newsmagazine (1)

The report submissions will be followed by viva voce by a panel of 2 faculty members.

### **Examination Scheme**

The student will be required to submit 5 assignments in all as per the details mentioned above. Each assignment will carry equal marks (20 marks each). The marks break up for each assignment will be as follows:

Written Report	Viva Voce
15 marks	5 marks

# PROJECT (PRESENTATION & EVALUATION)

**Course Code: JRN2632**

**Credit Units: 03**

## **Course Objective:**

This concentration elective will help the student develop a critical and analytical eye when it comes to understanding issues/trends related to media. It will provide a platform to the student to interrogate and review various media concepts. The live project will help in giving hands-on training to the communication students.

## **Major Themes for Project**

The project may be based on any of the following major media streams:

- Print Media
- Electronic Media
- Advertising
- Event Management
- Corporate Communication & Public Relations
- Brand Management
- New Media
- Photography

## **Guidelines for Project**

It must be based on either Industry or Research. The student will work under the guidance of a Faculty Guide that will be assigned by HOI. Student can choose topic as per his/her area of interest under the guidance of the Faculty guide.

The student may also choose to undertake a live project in any of the major media streams.

## **Project Report/Portfolio: 75 Marks**

Before the end of the semester, the student will be expected to submit a project report. The project report shall have the following components.

- Title page
- Index
- Introduction
- Industry Overview
- Objectives
- Methodology
- Findings
- Conclusion
- Annexures (questionnaires, if any)
- Bibliography

In case the student undertakes a live project, he/she will have to submit the portfolio instead of the project report. The portfolio will carry 75 marks.

## **Presentation & Viva: 25 Marks**

Student will make a presentation (based on Project Report) and it will be followed by a Viva Voce in front of a Panel of one internal expert and one external expert.

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor.

**STEP III :** Collection of information and data relating to the topic and analysis of the same.

**STEP IV :** Writing the report dividing it into suitable chapters

**STEP V :** The following documents are to be attached with the Final Project Report.

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

**Guidelines for evaluation:**

- Each of the students has to undertake a Project/Live Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report/Portfolio or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report/Portfolio and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report/Portfolio unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report/Portfolio.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.

**Examination Scheme**

**Chapter Scheme and distribution of marks (for Project Report):**

Chapter 1: Introduction with statement of objectives, limitations of the study & hypothesis – 10 marks

Chapter 2: Literature Review/Conceptual Framework/ National/International Scenario – 20 marks

Chapter 3: Research Design – 10 marks

Chapter 4: Findings& Results -- 20 marks

Chapter 5: Conclusion & Recommendations -- 10 marks

Chapter 6: Bibliography -- 05 marks

<b>Project Report</b>	<b>Power Point Presentation &amp; Viva</b>
75 marks	25 marks

## WORKSHOP/CERTIFICATION (DISCIPLINE SPECIFIC)

**Course Code: JRN2633**

**Credit Units: 01**

### **Course Objectives:**

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two way. The trainer has to make sure that the aspect covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

### **Major Themes for Workshop**

The workshop may be conducted on any of the following major themes:

Print Journalism  
Broadcast Journalism  
Advertising  
Public Relations  
Event Management  
Brand Management  
Media Research  
Media Planning  
Photography  
New Media  
Designing Softwares

These themes are merely indicative and the trainer may choose any recent and relevant topic of study.

### **Guidelines for Workshop**

The procedure for earning credits from workshop consists of the following steps:

- Relevant study material and references will be provided by the trainer in advance.
- The participants are expected to explore the topic in advance and take active part in the discussions held
- Attending and Participating in all activities of the workshop
- Group Activities have to be undertaken by students as guided by the trainer.
- Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
- Submitting a write up of at least 500 words about the learning outcome from the workshop.

### **Methodology**

The methodology followed at the workshop could be based on any one or more of the following methods:

Case Study  
Practical assignment  
Group Activity  
Role Play

### **Examination Scheme**

Attendance	Active Participation	Multiple Choice Questions/ Quiz	Solving the case/ Assignment/ Write up	Total
10	30	30	30	100

# MEDIA PRODUCTION PORTFOLIO

**Course Code: JRN2636**

**Credit Units: 03**

## **Course Objective:**

This subject is an attempt to inculcate professional writing skills and knowledge in flowering buds of the media department. The subject will give hands on experience on different aspects of media writing to the students. The students may choose the option of this subject from their concentration electives.

## **Major Areas of Writing:**

The Media Production Portfolio has the following topics for writing:

	No. of items
1. Press Release	1
2. Feature	2
3. Editorial/Article	1
4. News Story	2
5. News Analysis	1
6. Ad Copy (TV/radio/print)	1
7. Letter to Editor	2
8. Movie Review	1

## **Guidelines for Media Production Portfolio**

The following procedure should be followed for the credits:

1. Thorough reading of relevant study material and references.
2. Students will choose the current topics for every area of writing.
3. Students will discuss the topics with the guide and will take the approval.
4. Students will use the formal writing pattern i.e. 12 font size, 1.5 line spacing and Times New Roman.
5. Students will have to make proper formal document that includes
  - ❖ Title Page
  - ❖ Table of Contents
  - ❖ Acknowledgement
  - ❖ Write ups

## **Examination Scheme**

The production portfolio will carry 100 marks. The marks break up is as follows:

- a) Complete Work 10
- b) Content
  - Creativity 15
  - Relevance 15
  - Clarity 15
  - Comprehensiveness 15
  - Originality 15
  - Presentation 15

# Master of Arts Journalism & Mass Communication

## Syllabus - First Semester

### INTRODUCTION TO MASS COMMUNICATION

**Course Code: JRN4101**

**Credit Units: 03**

**Course Objective:**

Students will be introduced to the basic aspects of human communication and especially mass communication. Mass Media industries have developed in unprecedented ways due to changes in the society, economy, and technologies. There has been a corresponding change in the way the role of mass communication has been understood. Theories have mostly responded to developments in the Western society but they help us to interpret how these industries interact with the society in the past, present, and future. While in other subjects, students will learn about contemporary forms, in this course they will be introduced to the traditional modes of communication and expression in India which have worked closely with local communities. With this basic grounding in place, students will be able to evaluate mass media within a wider context. Students will be introduced to new ideas through case studies, practical exercises, class presentations, screenings, and reading groups.

**Course Contents:**

**Module I: Introduction to Communication**

Process and elements of communications

Levels of communication: individual, group, organizational, mass communication, international and intercultural

Barriers to effective communication

Future of communication studies

Brief introduction to main communication models: wartime to postwar period

Three traditions in communication research: Users and gratification, lifestyle, and reception analysis

Forms and Functions of communication

**Module II: Traditional Media**

Introduction to traditional media

Oral Tradition of story-telling since early civilization

Influence of TM on all forms of mass communication in India

Types: street theatre, puppetry, music, dance, folk and tribal art, local fairs

Elements and case studies of each form

Strengths and limitations

Relationship with the society

Present Scenario

Tool for political, social, economic, and health awareness

**Module III: Introduction to Mass Communication**

Definition and forms of mass communication

History of Western mass media

Four eras in mass communication theories

Era of mass society theory (1850-1940)

Era of scientific perspective on mass media (1940-1950)

Era of limited effects (1950-60s)

Era of cultural criticism (1960s-1980s)

Ongoing Debates

Growth of mass media in India

**Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

(Note: CT has been marked less and compensated with higher weightage for S as students will need to demonstrate their understanding through practical exercises and discussions)

# PRINT JOURNALISM – REPORTING AND EDITING

Course Code: JRN4102

Credit Units: 03

## Course Objective:

This unit will make students familiar with the history of the Indian press. The unit will also teach the basics of journalism and news reporting. News structure, interview skills and news values will be made clear and they will learn the process of editing also. Agency and magazine journalism will also be taught.

## Course Contents:

### Module I: History of Press in India

Press in pre-independent India

Growth of press post-independence

Role of English and Vernacular Press during freedom struggle

Emergence of newspapers, magazines and publication houses

Growth of Indian news agencies

### Module II: Reporting

What is Journalism?

What is News, News Value and Sources of News

Basic elements of News

Qualities and responsibilities of a reporter

Interviewing skills required for reporting

Types of Reporting

Structure of News Report

Lead and types of leads

Body text

Newsroom Set up

News Agencies

### Module III: Editing

Copy Editing

Role and functions of copyeditor

Newsroom

Desk management

Tools of editing

Editing marks and symbols

Editing on line

Rewriting

Headlines and captions

Style Guides and importance

### Module IV: Mechanics of newspaper layout and design

Photo-editing: Choosing a picture, Creative cropping, Giving captions

Relationship between newspaper content and design

Tools and techniques of layout designing, front page make-up, types and type faces, use of white space in layout designing, importance of dummy

# MEDIA ARTS- I: RADIO AND TV

**Course Code: JRN4103**

**Credit Units: 03**

## **Course Objective:**

The basic concepts and fundamental elements of Radio and TV production will be introduced to the students in this unit. The purpose of the whole exercise is to familiarize the students with the broadcast equipment and inculcate in them the creative techniques to use them.

## **Course Contents:**

### **Module I: Characteristics and nature of sound**

The basic attributes: Loudness, Frequency, Intensity, Pitch, Amplitude, and Timbre  
Sound Aesthetics- Spatial Hearing, Sound Isolation, Sound perspective (mono and stereo)  
Importance of speech in broadcast media  
Sound and its functions  
Functions of sound in relation to picture.  
Acoustics and psychoacoustics

### **Module II: Technique of Capturing Sound**

Types of microphones  
Directionality and pick-up patterns  
Cardioid, Omnidirectional, supercardioid and hypercardioid  
Quadraphonic and surround sound  
Construction of mikes- dynamic mics and condenser mics  
Positioning of mics- floor stand, hidden mics, camera mics, wireless mics

### **Module III: Lighting**

Nature, quality, lighting for TV  
Colour temperature  
Lighting instruments  
Three point lighting  
Creative additions to lighting for different genres

### **Module IV: Editing techniques**

Editing; principles and techniques  
Continuity and non continuity editing  
Linear and non-linear editing

### **Module V: Basic Structure of Video**

The basic structure of a Video Camera  
Working mechanism and basic parts of camera  
Types of camera  
Camera Mounts

### **Module VI: Aesthetics for broadcast**

Camera movements & angles, shots  
Composition principles  
TV as a Medium of close ups  
Role of sound / voice over in TV programs  
TV as a medium of glamour, immediacy, democratizing, Infotainment

## **Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

# ADVERTISING: CONCEPTS AND PRINCIPLES

**Course Code: JRN4104**

**Credit Units: 03**

## **Course Objective:**

The challenging and very competitive world of Advertising will be unveiled in this module. This fascinating subject will be explored with the specific objective of enabling interested students to eventually carve out a viable career in this field. The modules have been designed to give students in-depth knowledge of the principles and practices of advertising. The mysteries of marketing will also be dwelt upon. Agency structures and advanced advertising practices like positioning, market segmentation and targeting will be explained.

## **Course Contents:**

### **Module I: What is Advertising**

Definition

Concepts of Advertisement and Advertising Campaign

Target audience and audiences for advertising

Classification of advertising

### **Module II: Advertising as a tool of marketing**

The Marketing Plan

Situation Analysis to the Marketing Mix

Introduction to the concepts

Market Share

Target Segment

Positioning

Relationship of advertising to the marketing process

### **Module III: Understanding advertising agencies**

Types of advertising agencies

Advertising agency structure

Functions of various departments

### **Module IV: Segmenting, Targeting and Positioning (STP) strategy**

Market Segmentation

Markets, market segments and niches

Basis for segmenting consumer markets

Targeting strategies

Undifferentiated targeting

Differentiating targeting

Niche targeting

Various positioning strategies

Benefit approach

Price –Quality approach

User approach

Product category approach

Competitor approach

## **Examination Scheme:**

# INTRODUCTION TO PHOTOGRAPHY

**Course Code: JRN4105**

**Credit Units: 03**

## **Course Objective:**

Photographs are an effective communication medium and students will explore this immensely artistic as well as highly technical media in this unit. The importance of photographs, techniques and utility of photography and its applications in mass media will be made clear to them. The unit will expose them to the intricacies of developing, printing and enlarging photographs. Functioning of Photo agencies and publicity units will be made clear to them lighting and equipment handling will be learnt by the students through practical work and assignments undertaken as a part of their course.

## **Course Contents:**

### **Module I: Introduction and applications**

Historical background, stages of development  
Requirement and utility of photographs  
Principles of light  
Working of Photography

### **Module II: Camera & Accessories**

Various still photography cameras & its types (Including pinhole, view camera, compact camera, T.L.R., S.L.R., digital camera, D-SLRs)  
Lenses, its type  
Exposure Control in SLRs

- Aperture
- Shutter

Films, its types and sizes

### **Module III: Aesthetics of Photography**

Depth-of-field  
Composition & its Rules  
Outdoor & indoor lighting

### **Module IV: Photography Practicals**

Handling of camera, studio lights  
Practicing outdoor, indoor in B. & W. and Colour  
Developing, Printing and Enlarging ( B. & W. )  
Assignments / Portfolio /Presentations

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## **Text & References:**

# DESIGN SOFTWARE

**Course Code: JRN4106**

**Credit Units: 03**

## **Course Objective:**

This unit will give students a broad knowledge of the basics of computer usage in Advertising. How to work with computers, what are the design software's? Students will study the design and layout of pages, taking into consideration the choice of typeface and positioning and choice of color, images and text. Their work will include practical projects as well as investigations into current design and editing practices in a variety of print forms.

## **Course Contents:**

### **Module I: Basics of Computer**

What is a computer, the Hardware/Software required, Input devices/ Output devices.

Windows, MSOffice: - Ms Word, Ms Power Point, Ms Access,

Networking: - LAN, WAN concept.

### **Module II: What is Design?**

Design Elements, Design Principles. How elements and principles helps in design. Where and how these elements and principles are applicable. showing how design elements combine to create an overall 'look' to the publication (Magazine, newspaper, leaflet, poster, pamphlet etc).

### **Module III: Typography**

History of fonts, Sizes of fonts, Classification of fonts, Text: generation and preparation for use, display, digital typesetting, editing, creation of headlines using appropriate font.

### **Module IV: Processes and equipments.**

Images: choice of appropriate pictures/graphics, electronic scanning and manipulation using proper resolutions.

### **Module V: Software**

Page design packages (e.g. **Adobe PageMaker, QuarkXpress, Adobe Illustrator, CorelDraw**), picture management packages (e.g. **Adobe Photoshop**); creation of pages, importation and movement of copy and images, selection and cropping of photographs and graphics, use of text wrap, anchored graphics and rules, various palettes, master pages, templates etc. Adobe Illustrator is used for creating vector graphic images and typography. Also file formats. After creating graphic files, which format you are suppose to save and why? Colour Modes, File Formats, Image resolution etc.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## **Text & References:**

- Art and production; Sarkar, N.N.
- Newspaper Layout & Design: A Team Approach; Daryl & Moen

# HISTORY, CULTURE AND SOCIETY

**Course Code: JRN4107**

**Credit Units: 03**

## **Course Objective:**

Before stepping out into the field of mass communication and journalism, students need to have basic knowledge, curiosity, and awareness of politics, history, economics, and society. Various teaching methods and streams will be introduced (such as quizzes and debates) to make the students aware of contemporary issues so that they not only have opinions but also can intelligently analyze them in a broad perspective. Classes will be conducted in interesting and interactive ways where examples will be drawn from real life situations and from media texts so that students enjoy learning.

## **Course Contents:**

### **Module I: (History)**

What do you know of Indian history?  
Main periods in Indian history  
Stories of some main events & personalities  
Colonial Rule  
Struggle for Independence  
Modern Independent India  
Division of States and the ongoing debates on autonomies of state  
Post-Liberalization India  
Screening of Chanakya & Bharat Ek Khoj

### **Module II: (Politics)**

Parliamentary, Presidential, and Monarchy  
Single party, two party and Coalition Governments  
Federal and Centralized System  
3 wings of the Government: Judiciary, Legislation, and Executive  
Chief national personalities figuring in current news  
Important bills, Parliamentary Acts and Constitutional amendments passed by Indian Parliament over past 5 years  
Important Supreme Court rulings over past five years  
Bi-polar and uni-polar world after fall of communism  
Chief international personalities figuring in current news  
Regions of conflict in the world  
Role of UN umbrella over past 10 years

### **Module III: (Economics)**

India a mixed economy –feudalism, socialism, and capitalism  
Industrial and agricultural economies  
Developing, Developed, and Under-Developed economies  
Role of Private and Public Enterprise in the economy  
Role of Banks: RBI, World Bank, Asian Development Bank  
Regional economic groupings and their functioning  
The European Union and its expansion  
World Economic Forum  
Indian Economy: Growth Patterns

### **Module IV: (Society)**

Globalization and its cultural impact  
Global warming and environment  
Naxalism and Marxism  
Family, marriage, and gender relationships  
Cultural shifts in Indian society  
Urbanization & migration  
Growth of Entertainment Industry  
Shifts in the Indian Sports Scenario  
Criminalization of politics

Reservation & Positive Affirmation  
New Age Spiritualism/ Health

**Module V: (Science and Scientific Temper)**

Modern day debates on War and warfare  
Debates on Nuclear Non-Proliferation  
Nanotechnology  
Latest developments in bio-technology  
Nobel Prizes in Science  
Debates on Cloning

**Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

**Text & References:**

- Newspapers
- Magazines
- Online literature
- Journals

## Syllabus – Second Semester

### ADVERTISING PLANNING AND STRATEGY

**Course Code: JRN4201**

**Credit Units: 03**

**Course Objective:**

The students will now be ready to understand the nitty gritty of advertising. Brands will be introduced and brand management, positioning and loyalty will be discussed. The steps involved in developing an advertising plan will be taught. The consumers, who are the ultimate targets of the advertisers, will also be examined in this section. Students will undertake studies to evaluate and understand their behavior, preferences and compulsions. The all- important decision making process will find adequate mention in the classroom. An understanding of the media which is so vital for the completion of the advertising process will also be examined in detail.

**Course Contents:**

**Module I: The Advertising Plan**

Steps involved in developing an advertising plan  
Situation analysis  
Identify target audience  
Determine communication objective  
The creative plan  
Copywriting  
The Media Plan: selecting the communication channel  
Determining the advertising budget  
Deciding on the communication mix  
Evaluation

**Module II: Advertising and Consumer Behavior**

The Decision process  
Low-Involvement Decision Process  
High-Involvement Decision process  
Stages in the decision process

**Module III: Advertising and Ethics**

ASCI's code of Advertising Practice  
Truth in advertising  
Advertising to children  
Advertising controversial products

**Module IV: How advertising works**

Rational to emotional approaches  
Advertising strategies  
Generic  
Preemptive  
USP  
Positioning  
Brand Image Approach  
Resonance  
Affective  
Concept of an advertising brief  
Study of various elements of a brief and how advertising evolves out of a brief

**Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

# PRINT DESIGN AND VISUALIZATION

**Course Code: JRN4202**

**Credit Units: 03**

## **Course Objective:**

The course provides students a broad knowledge of designing of layouts of various mediums. They will learn the terminology used in layouts and designs in indoor medium (newspapers, periodicals, leaflets etc.) as well as outdoor medium (hoardings, posters, banners etc.). The students will study the design for advertising layouts, graphics, taking into the consideration the choice of typeface and positioning and choice of colors, images and text. They will also learn the terminology used in page layout and design and the importance of house styles. Their work will include practical project as well as investigations into current advertising design and editing practices in a variety of print forms.

## **Course Contents:**

### **Module I: House styles**

What is style sheet? How to create style sheet? Style guide: examples from newspapers, magazines; own guide produced for new publication.

Styles: choice of typeface and masthead, choice and use of images and color, positioning of articles and images on the page, use of headlines in an appropriate font, point size, number of lines etc, text manipulation, juxtaposition of text/images/advertising, Typography.

### **Module II: Comparison in newspapers and magazines**

What is the difference between Newspaper & Magazine layouts? What needs to take care when creating layouts for Fashion feature or Business articles or News pages. Which software is to be used for making layouts, creating vector graphics and raster images? Proper utilization of design elements and principles in layouts.

### **Module III: Advertising concepts**

Corporate Identity: Usage of Types & Fonts, Color schemes, Punch line, Orientation.

Corporate Stationary: Logo, Letterhead design, Business Card, Envelop, Catalogues, Brochures, Digital Posters, Calendar Design.

Communicating through multiple media: Digital and print produces integrated design solutions. Different types of advertising: Press ad, Magazine ad, Hoardings, Kiosks, Interior & Exterior Signage, Dangers, and Banners etc. Choice and usage of images and colors in advertisements.

### **Module IV: Relevant Softwares to design Advertisements**

Advertising Campaign: Developing advertising campaigns, from concept to creation, from creative to presentation.

Photoshop, PageMaker, CorelDraw, Illustrator, and their relevant usage in creating different forms of design for advertisements and campaigns.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>

# SPECIALIZED REPORTING AND FEATURE WRITING

**Course Code: JRN4203**

**Credit Units: 03**

## **Course Objective:**

After learning the basics of newspaper reporting in the first semester, the students will now be required to delve into the issues of specialization in news. The concepts of beats will be introduced and they will learn the subtle differences between reporting on politics, business, sports and crime. The student will be given focus on the principles of editing, mechanics of newspaper layout and design and acquiring skills for feature writing.

## **Course Contents:**

### **Module I: Beat Reporting**

Covering a news beat

Coverage of various beats: crime, education, health, civic affairs and local government.

Political Reporting (Political structure in India, Covering political parties/events/rallies/ elections)

Parliament Reporting (Parliament Structure, reporting on legislature)

Covering the Government (PIB, Ministries)

Legal Reporting (structure & jurisdiction of courts, reporting court hearings, precautions)

### **Module II: Business & Sports Reporting**

Basic Business Knowledge & Business Bodies

Corporate Reporting

Covering Economic policy (ministries of commerce, finance, industry, company affairs and other infrastructure ministries)

Stock market coverage

How to develop good sports writing skills

Covering local, national and international level events

Entertainment and Lifestyle Reporting

### **Module III: Investigative Reporting**

Definition and elements

Tools of investigative reporting

Importance of Sources

Sting Operations and latest trends

Relevant Case studies: Indian and International

### **Module IV: Feature Writing**

How to write a feature

Different types of features

Book reviews and film reviews

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## **Text & References:**

- Journalism Reporting; Sharma, Seema
- Writing the New's; Fox, Walter
- The newswriter's Handbook; Stein, M.L. & Paterno, Susan F.
- Basic News writing; Mencher, Melvin
- News Writing; Hough, George A.
- Sports Writing: The Lively Game; Fink Conrad C.
- 21<sup>st</sup> Century Journalism in India; Rajan, Nalini
- The Newspapers Handbook; Keeble, Richard

## MEDIA ARTS - II: RADIO AND TV

**Course Code: JRN4204**

**Credit Units: 03**

### **Course Objective:**

This unit will give students the opportunity to study the contemporary conventions and practices in Television and Radio Journalism. Students will be taught to identify and examine key principles involved and required in news broadcasting, and TV and radio programming. This unit will train the student in basics of news and feature reporting, writing and programming.

### **Course Contents:**

#### **Module I: Writing For Media**

Writing styles for Broadcast Medium

TV - Writing for visuals, Conversational Writing

Terminology

Script, screen play, story board, script formats

Writing for different formats

Radio- Writing for ear

Style, Radio scripts for different formats, Jargon and terminology

#### **Module II: Introduction to TV journalism**

Basic contours and characteristics of TV news journalism

TV news room- hierarchy, role of each element in hierarchy

The news process from field reporting to packaging and going on Air

Various technical departments

Functioning of each department

Designations of technical staff

Equipments or hardwares for a news channel

Utility of each

Importance of technical functioning in a news channel

Coordinating with the newsroom

Professional terminologies

Functioning while working on a live bulletin and recorded programme

TV news bulletin; rundown, stacking, blocking

#### **Module III: Television Reporting: the human angle**

Qualities and attributes of a broadcast reporter.

Essentials during reporting

Live reporting and working on a story

Different functioning for different beats

Interviewing skills

The news Anchor- qualities, role and responsibilities.

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

# PUBLIC RELATIONS AND CORPORATE COMMUNICATION

Course Code: JRN4206

Credit Units: 03

## Course Objective:

This unit provides an introduction to the principles, concepts and objectives of Public Relations & Corporate Communication. Media handling and planning which are integral parts of successful Public Relations in today's world will be explained. The students will also be taught the techniques of effective press release writing, how to issue releases, statements.

## Course Contents:

### Module I: Public Relations

Basics of Public Relations: Evolution and History of PR  
Definitions and Concepts: PR definition and PR w.r.t allied disciplines  
Political and financial PR, PR as management function.  
Role and Objectives of PR (need of PR for effective employee & community relations)  
Publics in public relations: Internal and External PR, targeting the correct public.  
Public Relations in India and other developing countries.  
Globalisation & PR: Changing trends in PR

### Module II: Public Relations and Media Affairs

Planning Process in PR: Research –Brief Intro of qualitative and Quantitative research methods and Media Planning,  
Implementation and Evaluation of Campaign and techniques, program budget & assessing results  
Event and Crisis management  
Media Relations (Understanding the Media, Media events and facility visit, principles of good media relations)

### Module III: PR tools

Press releases, Backgrounders, catalogues, Brochures, Journals, annual reports, writing company profile, Newsletter (types & contents)  
Making press kit, organizing press conference (Role & importance, press reception and conference organization)  
Public Relations & Socio –Economic development  
Public Relations in Journalism and Advertising  
Public Relations Laws and Ethics  
PRSI, origin, Objectives and Achievements

### Module IV: Corporate Communication

PR vs Corporate Communication  
Introduction, its need, importance and functions  
Elements of corporate communication: corporate philosophy, culture, corporate identity, citizenship and philanthropy  
Important concepts in corporate communication: Image management, direct marketing, network marketing, Issue management, Celebrity endorsement

### Module V: Tools of Corporate Communication

Desktop Publishing (DTP)  
Corporate Communication through websites, designing of website  
Annual Reports: Budget, timing and general concepts of the annual report, essentials of designing a report  
Types of leaflets, formal and informal invitations, Designing of leaflets, invitations  
Blogs, Pod casting, chat rooms, social networking sites and current TV: Impact of citizen journalism and "Transparency" on Corporate communications practice

## Examination Scheme:

# ADVANCED PHOTOGRAPHY

**Course Code: JRN4207**

**Credit Units: 03**

## **Course Objective:**

After being exposed to the basics of photography in the first semester, the students will be eager to try their hands in the comparatively new area of digital photography and imaging. They will be able to start maintaining their portfolios and will be required to make digital presentations and undertake practical assignments.

## **Course Contents:**

### **Module I: Advanced Lighting & Composition**

Lighting & its control (Source, Contrast & Direction of light)

Electronic flash & its synchronization

One, two & three point lighting

Working on the Subject (Changing proximity, Varying angles, tightly framing subjects)

### **Module II: Aesthetic Variations for various beats**

Portrait

Wildlife,

Nature & landscapes,

Night photography,

Journalism (photography for newspapers & magazines)

### **Module III: Understanding Digital Photography**

Digital Image Construction (Size & Resolution of Digital Images)

Uses, Advantages and Limitations of Digital over Conventional Photography Image Sensors (CCD and CMOS)

Formats of a Digital Image

Types of Digital Cameras

### **Module IV: Digital Image Manipulation**

Problems with Digital Photographs

Commonly used image editors

Editing images with Adobe Photoshop and Photoshop Elements

Printing and Sharing Digital Images

### **Module V: Advanced Photography Practicals**

Practicing Outdoor Photography

Photography Assignments and Projects

Developing Personal Digital Portfolio

Digital Image Manipulation using various computer software

## **Examination Scheme:**

# **MEDIA PLANNING AND BRAND MANAGEMENT**

**Course Code: JRN4209**

**Credit Units: 03**

## **Course Objective:**

Media planning is the strategic formulation of activities designed to carry out the objectives of the advertising program. Students are involved in research to become proficient in media analysis and hone their negotiation skills. This course will familiarize students with the most important aspect of all marketing – ‘Brands’. Students will learn the basic concepts associated with brands as well as how marketing and communication revolves around launching, building and sustaining brands. The process by which media selects companies or their agencies is a complex one involving substantial marketing and advertising research. While the process includes numerous steps, it operates in two stages: media planning and media buying.

## **Course Contents:**

### **PART I: MEDIA PLANNING**

#### **Module I: Media Planning**

Planning is the strategic formulation of activities design to carry out the goals or objectives of the advertising program. The planner decisions are directed by a series of questions:

Whom is the campaign directed to

Where will the campaigns run

How long will the campaign run

When will the campaign run

What degree of target coverage and repetition of exposure are necessary

Integrating science with creatively in advertising

Role of media in the Marketing Framework

Media Planning framework

Developing Media Strategy-the media mix, Factors influencing media strategy decision.

Media availability & economics

#### **Module II: Overview**

Media types characteristic of major media forms.

Electronic media-The global goose

Outdoor Advertising-They do not circulate market circulates around them

Transit advertising

Internet-news born medium for the millennium

#### **Module III: Matching media & market**

Geographical selectivity, reach & frequency

Maximizing advertising exposure

Media briefing

Media scheduling

What patterns of exposure works best

Timing the effective exposure and finding time opportunities to communicate

Media budget

#### **Module IV: Selecting and buying acceptable media**

Media Buying functions

New trends

Increasing complexity in Media Buying

### **PART II: BRAND MANAGEMENT**

#### **Module V: Brand Concepts**

Evolution of Brands

Brands & Products

Brand Perspectives

Brand Differentiation  
Brand Positioning  
Brand Image  
Brand Equity  
Brand Extension

**Module VI: Branding Strategies**

Closing Branding Strategies  
Products Branding  
Line Branding  
Range Branding  
Umbrella Branding  
Source/Double Branding  
Endorsement Branding

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

**Text & References:**

## TERM PAPER-I

**Course Code: JRN4231**

**Credit Units: 01**

### **Course Objective:**

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a domain of their choice by undertaking a significant practical unit of examining and analyzing various aspects of mass communication and journalism at a level commensurate with the learning outcomes of the various courses taken up by them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person from the chosen domain may be interviewed face to face.

### **Guidelines:**

1. The term paper will be related to the contemporary media issue and the topic will be given by the department/assigned mentor.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

### **Examination Scheme:**

<b>Organisation and relevance of content</b>	<b>Literature Review</b>	<b>Findings/Conclusion</b>	<b>Presentation &amp; Viva</b>	<b>Total</b>
20	25	15	40	100

# Syllabus – Third Semester

## MEDIA ARTS-III: FILM

**Course Code: JRN4301**

**Credit Units: 03**

### Course Objective:

This course focuses on the language of filmmaking and its techniques. Students are introduced to principles and methodology of filmmaking. They will be expected to exercise their creativity and visualize and make short films. Apart from filmmaking, film appreciation will also be a part of the semester. The ability to analyze and put film studies in proper perspective will be intended during the course.

The finer nuances of cinema will be explained. Documentary realism will be pitted against mainstream commercial film genres. An attempt to understand the technical as well as the artistic aspects of film making as a means of human communication will be made and classic films will be viewed and discussed.

### Course Contents:

#### Module I: Language of cinema

Shots, camera angles, movements

Mise-en-scene

Dimensions of Sound: sync and non-sync, sound effects, and silence, dialogues, ambient sound.

Narrative Composition: 3 plot structure, Characterization & Dramatic Structure

Ideation and Visualization, Screen Play, Storyboarding

#### Module II: Production Overview

Three stages of Film Production: Pre-production, Production, Post Production

Lighting

Art Direction

Departments and their role

Role and importance of the director

Division of roles between creative and technical personnel

#### Module III: Aesthetics of film

Sound as a metaphor

Importance of silence

Misc en scene and interpretations

Continuity vs discontinuity

Film space and screen space

Changing dimensions of pace and rhythm

#### Module IV: Film Genres

Narrative and non narrative

Fiction: romance, comedy, family drama, suspense thriller

Documentary Film and its sub-gneres

The bollywood masala

#### Module V: Film Studies

Film Genre and Auteur Theory

Feminist Film Theory

New Wave Cinema

Changing trends in Indian cinema

### Examination Scheme:

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

# MEDIA LAWS AND ETHICS

**Course Code: JRN4304**

**Credit Units: 03**

## **Course Objective:**

Today's media is increasingly market driven, and the students in this section will learn the regulation and practices of various ownership patterns. Legal implications of news, and other legal issues and laws, which rule the everyday lives of newsmen, will be discussed. Students will learn in detail about the contempt of court, defamation legislation, copyright and issues of privacy, Debates and discussions on the ethical issues related to the media will take place in class. Newspaper management will also be explained.

## **Course Contents:**

### **Module I: Introduction**

Defining Ethics

Truth, Fairness & Objectivity

Sources of Information

Case Studies: Aarushi & the Indian media

### **Module II: Constitutional Framework**

Constitutional Provisions on freedom of speech and expression

Constitutional Restrictions on freedom of speech and expression

Law on Morality, Obscenity and Censorship

### **Module III: Media Laws**

Contempt of court (Reporting on the judiciary)

Defamation

Right to Privacy

Intellectual Property Rights

Right to Information (Official Secrets Act, 1923, The Evidence Act, 1872)

Cinematograph Act

### **Module IV: Media Ethics**

Editorial content & integrity

Editorial & advertorial

Meeting Advertisers' Needs

Press Council Guidelines

Broadcast Regulation

Sting Journalism

CoCA and trial by the media

Case Studies: Uma Khurana sting operation, other relevant case studies

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

# DEVELOPMENT COMMUNICATION

**Course Code: JRN4305**

**Credit Units: 03**

## **Course Objective:**

This course will develop an understanding of developmental issues in the mind of students and will make them understand the importance of the subject as via this they can contribute to the development of the country as future mass communicators.

## **Course Contents:**

### **Module-I: Concept and indicators of development**

Definition, meaning and process of development

Theories and paradigms of development – unilinear and non-unilinear theories/paradigms

Characteristics of underdeveloped economics

Ingredients (5Ms) of development and money generation

MNCs and foreign aid

Basic needs model

Indicators of development

Communication, Democracy, Human Rights as an indicator, Sustainable development, Social Relations [inequality]

### **Module-II: Development theories and issues**

Diffusion of Innovation, Empathy, theory of Magic multiplier, localized approach

Development support communication - Extension Approach:- Health and FW, Women

empowerment, Literacy & Education, Unemployment, Watershed management, Harvesting,

Participation in development

### **Module-III: Media and Development**

Role of communication in development process

Development message design and communication

Role and performance of Print, Radio, TV, Outdoor publicity in Indian perspective, Cyber media and development

Traditional media - music, drama, dance, puppetry, street play, fairs, festivals and their role in Development Communication

NGOs and development – preparing projects, Communication for rural development (INDIAN PERSPECTIVE): Panchayati Raj, Advancement in farming and alternative employment, Urban sanitation, Slum development, sanitation, Communication for Tribal development, Wild life and forest conservation etc.

## **Examination Scheme:**

# DIGITAL MEDIA PRODUCTION

**Course Code: JRN4306**

**Credit Units: 03**

## **Course Objective:**

The limitless potential in the field of digital media will be revealed in this unit. The processes and practices of graphics and animation that help to translate creative imaginations into digital realities will be taught. Acoustics and Sound editing will also be learnt. The primary goal is to help students use the power of the Internet as a tool in multimedia presentations.

## **Course Contents:**

### **ModuleI: Concept of Graphics & Animation**

Understanding graphics, Types of graphics, Understanding animation, Difference between graphics and animation, Conventional aspects of graphics and animation, new form of animation /recent trends.

### **ModuleII: Formats**

Stop motion and Go motion animation, Different Forms of animation, 2D, 3D, Cell, Clay (Making stets) etc, Concept, Definition and Uses.

### **ModuleIII: Applications of Macromedia Flash –5**

Key-frame  
Onion Key-frame  
Importing BMP and JPG images  
Multi-layering  
Importing sound

### **ModuleIV: Fundamentals of Sound Editing**

Types of sound formats- WAVE, MP3  
Mixing of Stereo, Mono, and Multi-track sound  
Mixing the composed sound with the animation

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

# MASS MEDIA AND INDUSTRY

**Course Code: JRN4307**

**Credit Units: 03**

## **Course Objective:**

A knowledge of mass media as a corporate enterprise is essential for a complete understanding of mass communication. Today's media is increasingly market driven, and the students will learn about the various branches in the mass media industry and various aspects of the industry such as ownership patterns, legal issues and laws, and organizational structure.

## **Course Contents:**

### **Module I: Media as an industry**

Journalists becoming managers  
Ownership patterns in Print Media  
Ownership patterns in Broadcast Media  
Organizational structure  
Fieldtrip to media industries

### **Module II: Contemporary Practices**

Overview of Indian Media Market  
Growth of the Indian Print Business: Problems and Prospects  
Growth of the Television Industry: Problems and Prospects  
Radio Industry: Growth, Problems and Opportunities  
Indian Film Industry: Growth and success story, problems and prospects  
Overview of the Indian Music Industry

### **Module III: Media and Globalization**

Foreign equity in Indian media  
The concept of global media  
Global Media Giants  
Critical analysis of media globalization

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## **Text & References:**

20	25	15	40	100

# SUMMER INTERNSHIP EVALUATION

Course Code: JRN4335

Credit Units: 06

## GUIDELINES FOR SUMMER PROJECT

Research is an endless quest for knowledge. Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critiqued by the faculty guide and corrected by the student at each stage.

The File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation.

### Types of Summer Project

1. Comprehensive Case Study covering formulation, analysis and recommendations.
2. Inter organizational study if any and comparison, surveys.
3. Field study.
4. Preparation of daily report in case of summer training work.

### In general, the Project should be comprehensive and include

- A short account of the activities that were undertaken as part of the project;
- A statement about the extent to which the project has achieved its stated goals and objectives.
- A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
- Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
- Any problems that have arisen that may be useful to document for future reference.

### Report Layout

The report should contain the following components:

#### Title or Cover Page

The title page should contain the following information: University Logo at the top, Project Title; Student's Name; **Roll No.**; Course; Year; Supervisor's Name. Name of the university and the dept. at the bottom.

#### ➤ Preface

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project

#### ➤ Acknowledgement

Acknowledgment to any advisory or financial assistance received in the course of work may be given.

#### ➤ Certificate (Project Guide)

A certificate from the project guide to be enclosed.

➤ **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

➤ **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. Project objective is a must where as hypotheses is to be included if necessary. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

➤ **Research Design**

This section should aim at experimental designs, materials used. Methodology should be mentioned in details including modifications if any.

➤ **Literature Review**

This section should contain a detail list of related literature reviewed by the project investigator while preparing the project report.

➤ **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing these section, emphasis should be given on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary never write in “point” form.

➤ **Summary of Findings, conclusion and Recommendations**

A conclusion should be the final section in which the outcome of the work is mentioned briefly supported by some suggestive recommendations.

➤ **Future prospects**

➤ **Appendices**

The Appendix contains material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➤ **References / Bibliography**

This should include papers and books referred to in the body of the report. These should be ordered alphabetically on the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

**Examples**

Foot notes to be given.

**For research article**

Padhy, M. K., (2005) Development communication campaign in developing countries, Journal of Communication studies, Vol.1, PP.116–117.

**For book**

Padhy, M.K., (2006) Advertising and Marketing Communication, Gyan Jyothi Publication, Kathmandu, ISBN No. 99946-645-1-4, Edn. I, PP. 63-67.

**Assessment of the Project File**

Essentially, marking will be based on the following criteria: the quality of the report, the technical merit of the project and the project execution.

Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project.

Project execution is concerned with assessing how much work has been put in.

The File should fulfill the following *assessment objectives*:

**Range of Research Methods used to obtain information (Including the statistical devices).****Execution of Research****Data Analysis**

Analyse Quantitative/ Qualitative information

Control Quality

**Draw Conclusions****Examination Scheme:**

An examiner appointed by the Director other than the guide shall evaluate the report. The examiner will conduct the Viva-Voce at the time of Final Examination. Date and Time will be intimated at the time of examination.

Project Report: 50

Viva Voce: 50

**Total: 100**

# **Syllabus – Fourth Semester**

## **PROFESSIONAL PROJECT**

**Course Code: JRN4401**

**Credit Units: 06**

After learning the intricacies of mass media and its various mediums, it is hoped that the students will now be competent to decide the particular arena of mass communication in which they would like to find a place. With the objective of helping them to focus on a specific stream of mass media, they will be required to pursue specialization in the field of their choice. They can choose amongst the broad categories of Television, Radio, Print, Public Relations and Photography. They will devote special time and attention to these specific areas and attempt to comprehensively as well as minutely understand them through making projects, presentations, reports and assignments on these. This will be immensely helpful once they step into the job market, as they will have definite ideas of the kind of work they want to do instead of wasting time and energy in discovering this on the job.

### **SPECIALIZATION (ANY ONE)**

#### **RADIO**

**Course Objective:**

Students can do specialization in the different areas of Radio production Viz. Various Formats, News, Talk shows, Spots and commentaries, Radio documentary, Radio features, various music formats- classical, countdown shows, contemporary hit radio, music on demand, oldies, artist spotlights, request and dedication shows etc. Commercials/Jingles/ PSAs

#### **TELEVISION**

**Course Objective:**

The students can choose a specific area of TV production in which they want to specialize, viz. TV Journalism, Reporting, Anchoring, Editing, Camera, Documentary Film making, Feature Films, Short Film, Ad Film making, Entertainment Based programming etc.

#### **PRINT**

**Course Objective:**

Students can jointly bring out a journal with each one attending to a specific function of its production like reporting, editing, sub-editing, design and layout, photography and graphics.

## **ADVERTISING**

### **Course Objective:**

The students will use their understanding of all advertising concepts learnt in the previous semesters to do a

practical exercise. Students will act as brand managers of a new brand being launched. They will be required to

study the following elements for the product category assigned to them:

Market Research to determine the situation analysis

Segmenting the market and selecting a segment for their new brand

Identifying target audience

Positioning their brand. This will involve a detailed study of the positioning of the competitive brands

Developing the media strategy, including the communication mix

Developing the creative strategy

Creative strategy to follow a complete campaign creative presentation. This will include development of TV Commercials, print ads, radio ads and POP material.

## **PUBLIC RELATIONS**

### **Course Objective:**

PR specialization can be undertaken in these different areas

Crisis case studies

PR in Non- Governmental organizations

Cross- cultural PR

Internal PR department in corporate situation

## **PHOTOGRAPHY**

### **Course Objective:**

Student can choose any two subjects for Specialization:

Photojournalism

Travel Photography

Portrait Photography

Product & Table-top Photography

Glamour Photography

Wild life Photography

Students have to get themselves registered with the faculty concerned and take up project work in a systematic manner, planning, exposing in colour as well as in B & W, processing, contact sheet, enlargements and presentation in a portfolio.

These projects have a direct bearing on the career prospects of students as well as the image of the Photography Department of ASCO, therefore, the decision of faculty in every stage of assignment would be considered final and binding.

### **Examination Scheme:**

- |                                     |           |
|-------------------------------------|-----------|
| a) Duration of summer Project -     | 8 weeks   |
| b) Total marks for summer project - | 100 marks |

Break-up of marks

I) Timely Submission 5 marks

II) Content

i) Clarity 25 marks

ii) Comprehensiveness 20 marks

iii) Originality 5 marks

c) Project Presentation 45 marks

## **MEDIA ARTS-IV: CYBER MEDIA**

**Course Code: JRN4402**

**Credit Units: 03**

### **Course Objective:**

No aspect of today's world has been able to escape the influence of the World Wide Web. Journalism has also been revolutionized with the inclusion of the Internet for newsgathering and news dissemination. The students will be made familiar with online organization, process and strategies as well as Internet tool kits, servers and other aspects of the virtual world.

### **Course Contents:**

#### **Module I: Introduction to Internet**

Internet-history and development, WWW, W3C, revenue generation Internet tool kits - server, IP address, URL, ISP, networking, browsers, Search Engine, Domain, Domain name, home page, hyperlinks, etc

#### **Module II: Cyber Journalism**

Comparison of Cyber Media with Print, TV, Radio mediums, Online as a publishing medium (main features), Basic rules of online writing, content writing, blog writing, advertising on net, Print & Electronic Media networks are going on the Net, Impact of Web Journalism and reading habits, Web Journalism as a career, Cyber Laws.

#### **Module III: Web Designing**

Web Design Guidelines

Planning your Website

Design Patterns

Basic HTML

Dream weaver

### **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

### **Text & References:**

# MEDIA ANALYSIS

**Course Code: JRN4403**

**Credit Units: 04**

## **Course Objective:**

The objective of this course is to provide a clear understanding of the Growth of print media in India, trends, movements and principles of journalism, problems and issues in news gathering. It emphasizes on various theories of media, culture and society while encouraging students to become critical consumers of the media and engaged citizens in the society. It also offers directions for surveying the cultural landscape and tools for critiquing the media's influences on democratic life and consumer culture.

## **Course Contents:**

### **Module I: Culture & the evolution of mass communication**

Oral & written communication  
Printed Communication  
Electronic & Digital Communication  
Defining culture and media culture  
Cultural turn in Media research

### **Module II: Theories of Media, Culture & Society**

Overview  
Marshall McLuhan: The medium is the message  
Harold Innis: The bias of communication  
McLuhan: Understanding media  
Social Marketing Theories  
Knowledge Gap  
Agenda Setting  
Spiral of Silence  
Media Systems Dependency theory  
Cultivation Analysis  
Case Studies: The commodification of culture; Advertising: The ultimate cultural commodity

### **Module III: Media Industries & Culture**

Newspapers & the rise of modern journalism  
Sound recording & popular music  
Popular radio & broadcasting  
Television / Cable and the power of visual culture  
Movies & the impact of images

### **Module IV: Democratic Expression vs Commercial Culture**

Advertising & Commercial culture  
Public Relations & framing the message  
Media Economics & the global marketplace  
The culture of journalism: Values, Ethics & Democracy  
**Trends in newsgathering (Activism, Citizen Journalism, Pressures on Media)**

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

# DISSERTATION

**Course Code: JRN4437**

**Credit Units: 6**

By the final semester, the students have learnt about all the aspects of mass communication. It is now time to put this knowledge to use in a professional manner. Students now have to be introduced to the professional world of media and research. In order to ease this transition, students are expected to work on a dissertation or undergo an internship in a professional organization. This period is one of hardcore learning and putting whatever was learnt in class into practice. This period of summer training or working on a dissertation forms an important part of their resume as well. Students may be given choice to opt for dissertation or internship, depending on their aptitude.

Research is a genuine exploration of the unknown that leads to new knowledge which often warrants publication. Students—whether they choose to intern or work on dissertation-- will also be expected to publish a research paper in research journals of repute. These research papers could be based on the dissertation reports or their internship.

## **Guidelines for Dissertation**

The primary purpose of dissertation is to introduce the final semester students to the processes of scholarly research and writing under the guidance of an assigned supervisor. Through this research experience involved in the process of dissertation, students gain exposure to research methodology and its various tools & techniques. It usually requires the use of advanced concepts with a sound understanding of theoretical underpinnings.

The primary objectives of dissertation are:

- To enable the students to apply their theoretical and methodological understanding and skills into devising researchable ideas
- To design and execute a meaningful research report (dissertation) that demonstrates spatial thinking and uses the knowledge and skills learned during the programme
- To enable the students to understand the research process and be aware of research obligations and pitfalls.

The **layout guidelines** for the dissertation are:

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (11 points)
- Line spacing: Preferably 1.5
- Top and Bottom margins: 1 inch/2.5 cm; left and right margins: 1.25 inches/ 3 cm

The dissertation should include

Cover Page

Table of Contents

Certificate of originality by the Supervisor

Acknowledgements

Main Body

References

Appendices

The **Main Body** will have **different sections/chapters** and will include the following items which will be evaluated for the final assessment:-

Introduction

- Scope of the study

- Conceptual Background
- Research Objectives & Questions
- Hypothesis (wherever applicable)
- Limitations of the study

Review of Literature

Research Design & Methods

Results & Discussion

Conclusion

The dissertation should be submitted to the supervisor at least ten working days before the commencement of the end-term exams (as per the date decided upon by the supervisor). The dissertation submission will be followed by a PowerPoint Presentation on their research experience as per the date decided by the HoI in consultation with the research supervisor.

#### **Examination Scheme:**

<b>Dissertation Submission by Student</b>	<b>50</b>
<b>Presentation &amp; Viva</b>	<b>45</b>
<b>Research Paper Publication</b>	<b>05</b>
<b>Total</b>	<b>100</b>

#### **Guidelines for Internship**

Duration of Internship: 6-8 Weeks

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship program can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or an institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

The primary objectives of internship are:

- To provide an out-of-the classroom training environment for the students and provide opportunities for them to apply the knowledge and skills that they have learnt in real life working environment.
- To enable the students to be exposed to more real life work situations and prepare them for their career.

Upon completion of the internship and at least ten working days before the commencement of the end-term exams (as per the date decided upon by the HoI in consultation with the Programme Co ordinator) the students will submit their **Internship Reports**. The Internship File aims to encourage students to keep a personal record of their learning and achievement throughout the training. It can be used as the basis for

lifelong learning and for job applications. Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.

The Internship report will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and their own personal contribution to the organization.

The Internship report submission will be followed by a PowerPoint Presentation on their internship experience as per the date decided by the HoI in consultation with the Programme Coordinator.

The **layout guidelines** for the Internship File:

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (11 points)
- Line spacing: Preferably 1.5
- Top and Bottom margins: 1 inch/2.5 cm; left and right margins: 1.25 inches/ 3 cm

The Internship report should include

1. Title Page
2. Table of Contents
3. Internship Experience Certificate
4. Acknowledgements
5. Main Body
6. Appendices

The **Main Body** will have **different sections/chapters** and will include the following items which will be evaluated for the final assessment:-

An analysis of the company in which the student has interned

Student's expectations from the internship

Student's work profile/ Assignments handled during the course of internship

A **research report** that the student has prepared on the project assigned to him/her by the organization (if applicable)

Skill set (technical skills & soft skills) learnt during the internship

Overall internship experience

#### **Examination Scheme:**

<b>Internship Report by Student</b>	<b>45</b>
<b>Industry Feedback</b>	<b>05</b>
<b>Presentation &amp; Viva</b>	<b>45</b>
<b>Research Paper Publication</b>	<b>05</b>
<b>Total</b>	<b>100</b>

## **Guidelines for Evaluation**

- Each of the students has to undertake dissertation/internship report individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of the dissertation/internship report and Viva-Voce Examination may be English. The dissertation/internship report must be typed and hard bound.
- Failure to submit the dissertation/internship report or failure to appear in the viva-voce Examination will be treated as “Absent” in the Examination. The student has to submit the dissertation/internship report and appear in the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the dissertation/internship report unless the student appears in the Viva-Voce Examination. Similarly, no marks will be allotted in Viva-Voce Examination unless the student submits his/her dissertation/internship report.
- Evaluation will be done jointly by one internal expert and one external expert with equal weightage, i.e. average marks of the internal and external experts will be allotted to the student.

# **Post Graduate Diploma in Journalism & Mass Communication**

**Curriculum & Scheme of Examination**

**2020**

**AMITY UNIVERSITY HARYANA**

**GURUGRAM**

# **Post Graduate Diploma in Journalism & Mass Communication**

## **Syllabus - First Semester**

### **INTRODUCTION TO MASS COMMUNICATION**

**Course Code: JRN3101**

**Credit Units: 03**

**Course Objective:**

Students will be introduced to the basic aspects of human communication and especially mass communication. Mass Media industries have developed in unprecedented ways due to changes in the society, economy, and technologies. There has been a corresponding change in the way the role of mass communication has been understood. Theories have mostly responded to developments in the Western society but they help us to interpret how these industries interact with the society in the past, present, and future. While in other subjects, students will learn about contemporary forms, in this course they will be introduced to the traditional modes of communication and expression in India which have worked closely with local communities. With this basic grounding in place, students will be able to evaluate mass media within a wider context. Students will be introduced to new ideas through case studies, practical exercises, class presentations, screenings, and reading groups.

**Course Contents:**

**Module I: Introduction to Communication**

Process and elements of communications

Levels of communication: individual, group, organizational, mass communication, international and intercultural

Barriers to effective communication

Future of communication studies

Brief introduction to main communication models: wartime to postwar period

Three traditions in communication research: Users and gratification, lifestyle, and reception analysis

Forms and Functions of communication

**Module II: Traditional Media**

Introduction to traditional media

Oral Tradition of story-telling since early civilization

Influence of TM on all forms of mass communication in India

Types: street theatre, puppetry, music, dance, folk and tribal art, local fairs

Elements and case studies of each form

Strengths and limitations

Relationship with the society

Present Scenario

Tool for political, social, economic, and health awareness

**Module III: Introduction to Mass Communication**

Definition and forms of mass communication

History of Western mass media

Four eras in mass communication theories

Era of mass society theory (1850-1940)

Era of scientific perspective on mass media (1940-1950)

Era of limited effects (1950-60s)

Era of cultural criticism (1960s-1980s)

Ongoing Debates

Growth of mass media in India

**Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

(Note: CT has been marked less and compensated with higher weightage for S as students will need to demonstrate their understanding through practical exercises and discussions)

# PRINT JOURNALISM – REPORTING AND EDITING

Course Code: JRN3102

Credit Units: 03

## Course Objective:

This unit will make students familiar with the history of the Indian press. The unit will also teach the basics of journalism and news reporting. News structure, interview skills and news values will be made clear and they will learn the process of editing also. Agency and magazine journalism will also be taught.

## Course Contents:

### Module I: History of Press in India

Press in pre-independent India  
Growth of press post-independence  
Role of English and Vernacular Press during freedom struggle  
Emergence of newspapers, magazines and publication houses  
Growth of Indian news agencies

### Module II: Reporting

What is Journalism?  
What is News, News Value and Sources of News  
Basic elements of News  
Qualities and responsibilities of a reporter  
Interviewing skills required for reporting  
Types of Reporting  
Structure of News Report  
Lead and types of leads  
Body text  
Newsroom Set up  
News Agencies

### Module III: Editing

Copy Editing  
Role and functions of copyeditor  
Newsroom  
Desk management  
Tools of editing  
Editing marks and symbols  
Editing on line  
Rewriting  
Headlines and captions  
Style Guides and importance

### Module IV: Mechanics of newspaper layout and design

Photo-editing: Choosing a picture, Creative cropping, Giving captions  
Relationship between newspaper content and design  
Tools and techniques of layout designing, front page make-up, types and type faces, use of white space in layout designing, importance of dummy

# MEDIA ARTS - I: RADIO AND TV

**Course Code: JRN3103**

**Credit Units: 03**

## **Course Objective:**

The basic concepts and fundamental elements of Radio and TV production will be introduced to the students in this unit. The purpose of the whole exercise is to familiarize the students with the broadcast equipment and inculcate in them the creative techniques to use them.

## **Course Contents:**

### **Module I: Characteristics and nature of sound**

The basic attributes: Loudness, Frequency, Intensity, Pitch, Amplitude, and Timbre  
Sound Aesthetics- Spatial Hearing, Sound Isolation, Sound perspective (mono and stereo)  
Importance of speech in broadcast media  
Sound and its functions  
Functions of sound in relation to picture  
Acoustics and psychoacoustics

### **Module II: Technique of Capturing Sound**

Types of microphones  
Directionality and pick-up patterns  
Cardioid, Omnidirectional, supercardioid and hypercardioid  
Quadraphonic and surround sound  
Construction of mikes- dynamic mics and condenser mics  
Positioning of mics- floor stand, hidden mics, camera mics, wireless mics

### **Module III: Lighting**

Nature, quality, lighting for TV  
Colour temperature  
Lighting instruments  
Three point lighting  
Creative additions to lighting for different genres

### **Module IV: Editing techniques**

Editing; principles and techniques  
Continuity and non continuity editing  
Linear and non-linear editing

### **Module V: Basic Structure of Video**

The basic structure of a Video Camera  
Working mechanism and basic parts of camera  
Types of camera  
Camera Mounts

### **Module VI: Aesthetics for broadcast**

Camera movements & angles, shots  
Composition principles  
TV as a Medium of close ups  
Role of sound / voice over in TV programs  
TV as a medium of glamour, immediacy, democratizing, Infotainment

## **Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

## **Text & References:**

- Radio Production, Robert McLeish.
- P.C. Joshi, Broadcasting in India, concept Publication.

# ADVERTISING: CONCEPTS AND PRINCIPLES

**Course Code: JRN3104**

**Credit Units: 03**

## **Course Objective:**

The challenging and very competitive world of Advertising will be unveiled in this module. This fascinating subject will be explored with the specific objective of enabling interested students to eventually carve out a viable career in this field. The modules have been designed to give students in-depth knowledge of the principles and practices of advertising. The mysteries of marketing will also be dwelt upon. Agency structures and advanced advertising practices like positioning, market segmentation and targeting will be explained.

## **Course Contents:**

### **Module I: What is Advertising**

Definition

Concepts of Advertisement and Advertising Campaign

Target audience and audiences for advertising

Classification of advertising

### **Module II: Advertising as a tool of marketing**

The Marketing Plan

Situation Analysis to the Marketing Mix

Introduction to the concepts

Market Share

Target Segment

Positioning

Relationship of advertising to the marketing process

### **Module III: Understanding advertising agencies**

Types of advertising agencies

Advertising agency structure

Functions of various departments

### **Module IV: Segmenting, Targeting and Positioning (STP) strategy**

Market Segmentation

Markets, market segments and niches

Basis for segmenting consumer markets

Targeting strategies

Undifferentiated targeting

Differentiating targeting

Niche targeting

Various positioning strategies

Benefit approach

Price –Quality approach

User approach

Product category approach

Competitor approach

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## **Text & References:**

# INTRODUCTION TO PHOTOGRAPHY

**Course Code: JRN3105**

**Credit Units: 03**

## **Course Objective:**

Photographs are an effective communication medium and students will explore this immensely artistic as well as highly technical media in this unit. The importance of photographs, techniques and utility of photography and its applications in mass media will be made clear to them. The unit will expose them to the intricacies of developing, printing and enlarging photographs. Functioning of Photo agencies and publicity units will be made clear to them lighting and equipment handling will be learnt by the students through practical work and assignments undertaken as a part of their course.

## **Course Contents:**

### **Module I: Introduction and applications**

Historical background, stages of development  
Requirement and utility of photographs  
Principles of light  
Working of Photography

### **Module II: Camera & Accessories**

Various still photography cameras & its types (Including pinhole, view camera, compact camera, T.L.R., S.L.R., digital camera, D-SLRs)  
Lenses, its type  
Exposure Control in SLRs

- Aperture
- Shutter

Films, its types and sizes

### **Module III: Aesthetics of Photography**

Depth-of-field  
Composition & its Rules  
Outdoor & indoor lighting

### **Module IV: Photography Practical**

Handling of camera, studio lights  
Practicing outdoor, indoor in B. & W. and Colour  
Developing, Printing and Enlarging (B. & W. )  
Assignments / Portfolio /Presentations

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## **Text & References:**

- Basic Photography; Langford, Michael (Focal Press).

# DESIGN SOFTWARE

**Course Code: JRN3106**

**Credit Units: 03**

## **Course Objective:**

This unit will give students a broad knowledge of the basics of computer usage in Advertising. How to work with computers, what are the design software's? Students will study the design and layout of pages, taking into consideration the choice of typeface and positioning and choice of color, images and text. Their work will include practical projects as well as investigations into current design and editing practices in a variety of print forms.

## **Course Contents:**

### **Module I: Basics of Computer**

What is a computer, the Hardware/Software required, Input devices/ Output devices.

Windows, MSOffice: - Ms Word, Ms Power Point, Ms Access,

Networking: - LAN, WAN concept.

### **Module II: What is Design?**

Design Elements, Design Principles. How elements and principles helps in design. Where and how these elements and principles are applicable. To show how design elements combine to create an overall 'look' to the publication (Magazine, newspaper, leaflet, poster, pamphlet etc).

### **Module III: Typography**

History of fonts, Sizes of fonts, Classification of fonts, Text: generation and preparation for use, display, digital typesetting, editing, creation of headlines using appropriate font.

### **Module IV: Processes and equipments.**

Images: choice of appropriate pictures/graphics, electronic scanning and manipulation using proper resolutions.

### **Module V: Software**

Page design packages (e.g. **Adobe PageMaker, QuarkXpress, Adobe Illustrator, CorelDraw**), picture management packages (e.g. **Adobe Photoshop**); creation of pages, importation and movement of copy and images, selection and cropping of photographs and graphics, use of text wrap, anchored graphics and rules, various palettes, master pages, templates etc. Adobe Illustrator is used for creating vector graphic images and typography. Also file formats. After creating graphic files, which format you are suppose to save and why? Colour Modes, File Formats, Image resolution etc.

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## **Text & References:**

- Adobe Page Maker 7.0 Classroom in a book; BPB Publication.
- Art and production; Sarkar, N.N.
- Newspaper Layout & Design: A Team Approach; Daryl & Moen.

# HISTORY, CULTURE AND SOCIETY

**Course Code: JRN3107**

**Credit Units: 03**

## **Course Objective:**

Before stepping out into the field of mass communication and journalism, students need to have basic knowledge, curiosity, and awareness of politics, history, economics, and society. Various teaching methods and streams will be introduced (such as quizzes and debates) to make the students aware of contemporary issues so that they not only have opinions but also can intelligently analyze them in a broad perspective. Classes will be conducted in interesting and interactive ways where examples will be drawn from real life situations and from media texts so that students enjoy learning.

## **Course Contents:**

### **Module I: (History)**

What do you know of Indian history?  
Main periods in Indian history  
Stories of some main events & personalities  
Colonial Rule  
Struggle for Independence  
Modern Independent India  
Division of States and the ongoing debates on autonomies of state  
Post-Liberalization India  
Screening of Chanakya & Bharat Ek Khoj

### **Module II: (Politics)**

Parliamentary, Presidential, and Monarchy  
Single party, two party and Coalition Governments  
Federal and Centralized System  
3 wings of the Government: Judiciary, Legislation, and Executive  
Chief national personalities figuring in current news  
Important bills, Parliamentary Acts and Constitutional amendments passed by Indian Parliament over past 5 years  
Important Supreme Court rulings over past five years  
Bi-polar and uni-polar world after fall of communism  
Chief international personalities figuring in current news  
Regions of conflict in the world  
Role of UN umbrella over past 10 years

### **Module III: (Economics)**

India a mixed economy –feudalism, socialism, and capitalism  
Industrial and agricultural economies  
Developing, Developed, and Under-Developed economies  
Role of Private and Public Enterprise in the economy  
Role of Banks: RBI, World Bank, Asian Development Bank  
Regional economic groupings and their functioning  
The European Union and its expansion  
World Economic Forum  
Indian Economy: Growth Patterns

### **Module IV: (Society)**

Globalization and its cultural impact  
Global warming and environment  
Naxalism and Marxism  
Family, marriage, and gender relationships  
Cultural shifts in Indian society  
Urbanization & migration  
Growth of Entertainment Industry  
Shifts in the Indian Sports Scenario  
Criminalization of politics

Reservation & Positive Affirmation  
New Age Spiritualism/ Health

**Module V: (Science and Scientific Temper)**

Modern day debates on War and warfare  
Debates on Nuclear Non-Proliferation  
Nanotechnology  
Latest developments in bio-technology  
Nobel Prizes in Science  
Debates on Cloning

**Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

**Text & References:**

- Newspapers
- Magazines
- Online literature
- Journals

## Syllabus – Second Semester

### ADVERTISING PLANNING AND STRATEGY

**Course Code: JRN3201**

**Credit Units: 03**

**Course Objective:**

The students will now be ready to understand the nitty gritty of advertising. Brands will be introduced and brand management, positioning and loyalty will be discussed. The steps involved in developing an advertising plan will be taught. The consumers, who are the ultimate targets of the advertisers, will also be examined in this section. Students will undertake studies to evaluate and understand their behavior, preferences and compulsions. The all- important decision making process will find adequate mention in the classroom. An understanding of the media which is so vital for the completion of the advertising process will also be examined in detail.

**Course Contents:**

**Module I: The Advertising Plan**

Steps involved in developing an advertising plan  
Situation analysis  
Identify target audience  
Determine communication objective  
The creative plan  
Copywriting  
The Media Plan: selecting the communication channel  
Determining the advertising budget  
Deciding on the communication mix  
Evaluation

**Module II: Advertising and Consumer Behavior**

The Decision process  
Low-Involvement Decision Process  
High-Involvement Decision process  
Stages in the decision process

**Module III: Advertising and Ethics**

ASCI's code of Advertising Practice  
Truth in advertising  
Advertising to children  
Advertising controversial products

**Module IV: How advertising works**

Rational to emotional approaches  
Advertising strategies  
Generic  
Preemptive  
USP  
Positioning  
Brand Image Approach  
Resonance  
Affective  
Concept of an advertising brief  
Study of various elements of a brief and how advertising evolves out of a brief

**Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

# PRINT DESIGN AND VISUALIZATION

**Course Code: JRN3202**

**Credit Units: 03**

## **Course Objective:**

The course provides students a broad knowledge of designing of layouts of various mediums. They will learn the terminology used in layouts and designs in indoor medium (newspapers, periodicals, leaflets etc.) as well as outdoor medium (hoardings, posters, banners etc). The students will study the design for advertising layouts, graphics, taking into the consideration the choice of typeface and positioning and choice of colors, images and text. They will also learn the terminology used in page layout and design and the importance of house styles. Their work will include practical project as well as investigations into current advertising design and editing practices in a variety of print forms.

## **Course Contents:**

### **Module I: House styles**

What is style sheet? How to create style sheet? Style guide: examples from newspapers, magazines; own guide produced for new publication.

Styles: choice of typeface and masthead, choice and use of images and color, positioning of articles and images on the page, use of headlines in an appropriate font, point size, number of lines etc, text manipulation, juxtaposition of text/images/advertising, Typography.

### **Module II: Comparison in newspapers and magazines**

What is the difference between Newspaper & Magazine layouts? What needs to take care when creating layouts for Fashion feature or Business articles or News pages? Which software is to be used for making layouts, creating vector graphics and raster images? Proper utilization of design elements and principles in layouts.

### **Module III: Advertising concepts**

Corporate Identity: Usage of Types & Fonts, Color schemes, Punch line, Orientation.

Corporate Stationary: Logo, Letterhead design, Business Card, Envelop, Catalogues, Brochures, Digital Posters, Calendar Design.

Communicating through multiple media: Digital and print produces integrated design solutions. Different types of advertising: Press ad, Magazine ad, Hoardings, Kiosks, Interior & Exterior Signage, Dangers, and Banners etc. Choice and usage of images and colors in advertisements.

### **Module IV: Relevant Softwares to design Advertisements**

Advertising Campaign: Developing advertising campaigns, from concept to creation, from creative to presentation.

Photoshop, PageMaker, CorelDraw, Illustrator, and their relevant usage in creating different forms of design for advertisements and campaigns.

## **Examination Scheme:**

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

## **Text & References:**

- Art and production; Sarkar, N.N.
- Newspaper Layout & Design: A Team Approach; Daryl & Moen.

# SPECIALIZED REPORTING AND FEATURE WRITING

**Course Code: JRN3203**

**Credit Units: 03**

## **Course Objective:**

After learning the basics of newspaper reporting in the first semester, the students will now be required to delve into the issues of specialization in news. The concepts of beats will be introduced and they will learn the subtle differences between reporting on politics, business, sports and crime. The student will be given focus on the principles of editing, mechanics of newspaper layout and design and acquiring skills for feature writing.

## **Course Contents:**

### **Module I: Beat Reporting**

Covering a news beat

Coverage of various beats: crime, education, health, civic affairs and local government.

Political Reporting (Political structure in India, Covering political parties/events/rallies/ elections)

Parliament Reporting (Parliament Structure, reporting on legislature)

Covering the Government (PIB, Ministries)

Legal Reporting (structure & jurisdiction of courts, reporting court hearings, precautions)

### **Module II: Business & Sports Reporting**

Basic Business Knowledge & Business Bodies

Corporate Reporting

Covering Economic policy (ministries of commerce, finance, industry, company affairs and other infrastructure ministries)

Stock market coverage

How to develop good sports writing skills

Covering local, national and international level events

Entertainment and Lifestyle Reporting

### **Module III: Investigative Reporting**

Definition and elements

Tools of investigative reporting

Importance of Sources

Sting Operations and latest trends

Relevant Case studies: Indian and International

### **Module IV: Feature Writing**

How to write a feature

Different types of features

Book reviews and film reviews

## **Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

## **Text & References:**

- 21<sup>st</sup> Century Journalism in India; Rajan, Nalini.
- The Newspapers Handbook; Keeble, Richard.

## MEDIA ARTS - II: RADIO AND TV

Course Code: JRN3204

Credit Units: 03

### Course Objective:

This unit will give students the opportunity to study the contemporary conventions and practices in Television and Radio Journalism. Students will be taught to identify and examine key principles involved and required in news broadcasting, and TV and radio programming. This unit will train the student in basics of news and feature reporting, writing and programming.

### Course Contents:

#### Module I: Writing For Media

Writing styles for Broadcast Medium

TV - Writing for visuals, Conversational Writing

Terminology

Script, screen play, story board, script formats

Writing for different formats

Radio- Writing for ear

Style, Radio scripts for different formats, Jargon and terminology

#### Module II: Lighting

Nature, quality, lighting for TV

Colour temperature

Lighting instruments

Three point lighting

Creative additions to lighting for different genres

#### Module III: Editing techniques

Editing; principles and techniques

Continuity and non-continuity editing

Linear and non-linear editing

#### Module IV: Introduction to TV journalism

Basic contours and characteristics of TV news journalism.

TV news room- hierarchy, role of each element in hierarchy

The news process from field reporting to packaging and going on Air

Various technical departments

Functioning of each department

Designations of technical staff

Equipments or hardwares for a news channel

Utility of each

Importance of technical functioning in a news channel

Coordinating with the newsroom

Professional terminologies

Functioning while working on a live bulletin and recorded programme

TV news bulletin; rundown, stacking, blocking

#### Module V: Television Reporting: the human angle

Qualities and attributes of a broadcast reporter.

Essentials during reporting

Live reporting and working on a story

Different functioning for different beats

Interviewing skills

The news Anchor- qualities, role and responsibilities

### Examination Scheme:

Components	P	A	CT	EE
Weightage (%)	10	5	15	70

# PUBLIC RELATIONS AND CORPORATE COMMUNICATION

Course Code: JRN3206

Credit Units: 03

## Course Objective:

This unit provides an introduction to the principles, concepts and objectives of Public Relations & Corporate Communication. Media handling and planning which are integral parts of successful Public Relations in today's world will be explained. The students will also be taught the techniques of effective press release writing, how to issue releases, statements.

## Course Contents:

### Module I: Public Relations

Basics of Public Relations: Evolution and History of PR  
Definitions and Concepts: PR definition and PR w.r.t allied disciplines  
Political and financial PR, PR as management function.  
Role and Objectives of PR (need of PR for effective employee & community relations)  
Publics in public relations: Internal and External PR, targeting the correct public.  
Public Relations in India and other developing countries  
Globalization & PR: Changing trends in PR

### Module II: Public Relations and Media Affairs

Planning Process in PR: Research –Brief Intro of qualitative and Quantitative research methods and Media Planning,  
Implementation and Evaluation of Campaign and techniques, program budget & assessing results  
Event and Crisis management  
Media Relations (Understanding the Media, Media events and facility visit, principles of good media relations

### Module III: PR tools

Press releases, Backgrounders, catalogues, Brochures, Journals, annual reports, writing company profile, Newsletter (types & contents)  
Making press kit, organizing press conference (Role & importance, press reception and conference organization)  
Public Relations & Socio –Economic development  
Public Relations in Journalism and Advertising  
Public Relations Laws and Ethics  
PRSI, origin, Objectives and Achievements

### Module IV: Corporate Communication

PR vs Corporate Communication  
Introduction, its need, importance and functions  
Elements of corporate communication: corporate philosophy, culture, corporate identity, citizenship and philanthropy  
Important concepts in corporate communication: Image management, direct marketing, network marketing, Issue management, Celebrity endorsement

### Module V: Tools of Corporate Communication

Desktop Publishing (DTP)  
Corporate Communication through websites, designing of website  
Annual Reports: Budget, timing and general concepts of the annual report, essentials of designing a report  
Types of leaflets, formal and informal invitations, Designing of leaflets, invitations  
Blogs, Pod casting, chat rooms, social networking sites and current TV: Impact of citizen journalism and “Transparency” on Corporate communications practice

# ADVANCED PHOTOGRAPHY

Course Code: JRN3207

Credit Units: 03

## Course Objective:

After being exposed to the basics of photography in the first semester, the students will be eager to try their hands in the comparatively new area of digital photography and imaging. They will be able to start maintaining their portfolios and will be required to make digital presentations and undertake practical assignments.

## Course Contents:

### Module I: Advanced Lighting & Composition

Lighting & its control (Source, Contrast & Direction of light)

Electronic flash & its synchronization

One, two & three point lighting

Working on the Subject (Changing proximity, Varying angles, tightly framing subjects)

### Module II: Aesthetic Variations for various beats

Portrait

Wildlife,

Nature & landscapes,

Night photography,

Journalism (photography for newspapers & magazines)

### Module III: Understanding Digital Photography

Digital Image Construction (Size & Resolution of Digital Images)

Uses, Advantages and Limitations of Digital over Conventional Photography Image Sensors (CCD and CMOS)

Formats of a Digital Image

Types of Digital Cameras

### Module IV: Digital Image Manipulation

Problems with Digital Photographs

Commonly used image editors

Editing images with Adobe Photoshop and Photoshop Elements

Printing and Sharing Digital Images

### Module V: Advanced Photography Practicals

Practicing Outdoor Photography

Photography Assignments and Projects

Developing Personal Digital Portfolio

Digital Image Manipulation using various computer software

## Examination Scheme:

# **MEDIA PLANNING AND BRAND MANAGEMENT**

**Course Code: JRN3209**

**Credit Units: 03**

## **Course Objective:**

Media planning is the strategic formulation of activities designed to carry out the objectives of the advertising program. Students are involved in research to become proficient in media analysis and hone their negotiation skills. This course will familiarize students with the most important aspect of all marketing – ‘Brands’. Students will learn the basic concepts associated with brands as well as how marketing and communication revolves around launching, building and sustaining brands. The process by which media selects companies or their agencies is a complex one involving substantial marketing and advertising research. While the process includes numerous steps, it operates in two stages: media planning and media buying.

## **Course Contents:**

### **PART I: MEDIA PLANNING**

#### **Module I: Media Planning**

Planning is the strategic formulation of activities design to carry out the goals or objectives of the advertising program. The planner decisions are directed by a series of questions:

Whom is the campaign directed to

Where will the campaigns run

How long will the campaign run

When will the campaign run

What degree of target coverage and repetition of exposure are necessary

Integrating science with creativity in advertising

Role of media in the Marketing Framework

Media Planning framework

Developing Media Strategy-the media mix, Factors influencing media strategy decision.

Media availability & economics

#### **Module II: Overview**

Media types characteristic of major media forms.

Electronic media-The global goose

Outdoor Advertising-They do not circulate market circulates around them

Transit advertising

Internet-news born medium for the millennium

#### **Module III: Matching media & market**

Geographical selectivity, reach & frequency

Maximizing advertising exposure

Media briefing

Media scheduling

What patterns of exposure works best

Timing the effective exposure and finding time opportunities to communicate

Media budget

**Module IV: Selecting and buying acceptable media**

Media Buying functions

New trends

Increasing complexity in Media Buying

**PART II: BRAND MANAGEMENT****Module V: Brand Concepts**

Evolution of Brands

Brands & Products

Brand Perspectives

Brand Differentiation

Brand Positioning

Brand Image

Brand Equity

Brand Extension

**Module VI: Branding Strategies**

Closing Branding Strategies

Products Branding

Line Branding

Range Branding

Umbrella Branding

Source/Double Branding

Endorsement Branding

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>A</b>	<b>CT</b>	<b>EE</b>
<b>Weightage (%)</b>	10	5	15	70

**Text & References:**

- William B. Goodrich, Jack Z. Sissors, Media Planning Workbook ( 2 Photocopies), NTC Business Books
- Jack Z. Sissors, Lincoln Bumba, Advertising Media Planning, NTC Business Books

# PROJECT

**Course Code: JRN3232**

**Credit Units: 03**

## **Course Objective:**

Project will help the student develop a critical and analytical eye when it comes to understanding issues/trends related to media. It will provide a platform to the student to interrogate and review various media concepts. The live project will help in giving hands-on training to the communication students.

## **Major Themes for Project**

The project may be based on (but not restricted to) any of the following major media streams:

- Print Media
- Electronic Media
- Advertising
- Event Management
- Corporate Communication & Public Relations
- Brand Management
- New Media
- Photography

## **Guidelines for Project**

It must be based on either Industry or Research. The student will work under the guidance of a Faculty Guide that will be assigned by HoI. Student can choose topic as per his/her area of interest under the guidance of the Faculty Guide.

The student may also choose to undertake a live project in any of the major media streams.

## **Project Report/Portfolio: 75 Marks**

Before the end of the semester, the student will be expected to submit a project report. The project report shall have the following components.

- Title page
- Index
- Introduction
- Industry Overview
- Objectives
- Methodology
- Findings
- Conclusion
- Annexures (questionnaires, if any)
- Bibliography

In case the student undertakes a live project, he/she will have to submit the portfolio instead of the project report. The portfolio will carry 75 marks.

## **Presentation & Viva: 25 Marks**

Student will make a presentation (based on Project Report/Portfolio) and it will be followed by a Viva Voce in front of a Panel of one internal expert and one external expert.

## **The Steps of a Project Report**

**STEP I :** Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic

- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

**STEP II :** Finalisation of the topic and preparation of project proposal in consultation with the Faculty Guide.

**STEP III :** Collection of information and data related to the topic and analysis of the same.

**STEP IV:** Writing the report dividing it into suitable chapters

**STEP V :** The following documents are to be attached with the Final Project Report (if applicable).

- 1) Approval letter from the supervisor (Annexure-IA)
- 2) Student's declaration (Annexure-IB)
- 3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

#### **Guidelines for Evaluation**

- Each of the students has to undertake a Project/Live Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report (if applicable) must be typed and hard bound.
- Failure to submit the Project Report/Portfolio or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report/Portfolio and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report/Portfolio unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report/Portfolio.

Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e. average marks of the internal and external experts will be allotted to the candidate.

#### **Examination Scheme**

##### **Chapter Scheme and distribution of marks (for Project Report):**

Chapter 1: Introduction with statement of objectives, limitations of the study & hypothesis – 10 marks

Chapter 2: Literature Review/Conceptual Framework/ National/International Scenario – 20 marks

Chapter 3: Research Design – 10 marks

Chapter 4: Findings& Results -- 15 marks

Chapter 5: Conclusion & Recommendations -- 10 marks

Chapter 6: Bibliography -- 05 marks

<b>Project Report/Portfolio</b>	<b>Power Point Presentation &amp; Viva</b>
70 marks	30 marks

# ANIMATION

## Syllabus - Semester First

### BASIS OF SKETCHING & DRAWING

**Course Code: ANI2151**

**Credit Units: 03**

**Course Objective:**

This course will cover the fundamentals of drawing with a focus on shapes. It will address line, tone, volume, space, scale, proportion and artistic expression. An emphasis on “process” will direct the momentum of this course

**Course Content**

**Module-I**

Introduction to pose to pose sketching (Action analysis). Rapid sketching from live models, Introduction to Acting, Modeling, Sketching from Acting, Sketching from live models, Introduction to Rapid Sketching Techniques, Sketching from Memory, live action. Basics of Acting - Style breaking, Movements.

**Module-II**

Shading in different angles of pencil strokes, formatting in different textures with pencil, shading, simple objects in drawing, simple shapes of geometrical shapes, roadsides, rivers, perspective in lines in landscapes, different head shapes, characters, human anatomy

**Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

**Text and References:**

**Text**

- Drawing: The head and Figure; Jack Hamm; Penguin Publishers

**Reference**

- Pencil Sketching: Thomas C Wang; John Wiley and Sons

# Syllabus - Semester Second

## BASICS OF HTML

**Course Code: ANI2251**

**Credit Units: 03**

**Course Objective :**

Begins with an HTML overview, how HTML evolved, how to construct a basic HTML page, explore the ins and outs of formatting, Web colors, images, and links, essential elements of a Web page, to create files and folders using the correct directory structure, view source code to learn from the inspiration of others.

**Course Content:**

**Module-I:**

Course Introduction; Course software; What is a HTML and HTML 5; Getting started with tags; How to save web pages; Viewing your web pages; Basic HTML Tags ; Basic HTML template; Heading Tags; Paragraph and Break tags; Bold and Italics; HTML lists

**Module-II:**

Dealing with Images; Types of Images; Inserting Images; Image Attributes; Images and CSS; Text wrapping with CSS; CSS and image borders; Background Images; Adding captions to images

**Module-III:**

Linking to other pages; Hyperlinks; Linking to other pages; Other types of hyperlinks; CSS and hyperlinks; External stylesheets; HTML lists and nav bars

**Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

# Syllabus - Semester Third

## INTRODUCTION TO 3D

**Course Code : ANI2351**

**Credit Units: 03**

**Course Objective :**

This course is the first level of 3D animation and focuses on introducing 3D software and practicing each students existing motion skills.

**Course Content:**

**Module-I**

Introduction to 3D, Interface of 3D Max, Basics of 3D Max Modeling, Exporting, Using the menus. Floating and docking, Using drag and drop feature, Introduction to different workspaces. Geometry, sub objects, Extruding, welding, bridging etc. Recognizing the workspaces.

**Module-II**

Introduction to modifiers and modifier gizmos. Familiarity with common modifier like bend, editpoly, Xform wave, lathe symmetry etc.

**Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

**Text and References:**

**Text**

# Syllabus - Semester Fourth

## MAYA FUNDAMENTALS

**Course Code: ANI2451**

**Credits units: 03**

### **Course Objective:**

In this section, student will get an introductory look at the processes in Maya. Student will use a project-based approach as we cover the fundamentals of Maya, look at commonly used tools, and talk about some time-saving tips and techniques gleaned from production experience.

### **Course Content:**

#### **Module-I**

Introduction to the interface of Maya. Hotkeys. Using the spacebar. Manipulating a view. Creating objects. Simple primitives. Lights, cameras, selecting objects, types of selection- single selection, adding and subtracting selection, edit menu selection options. Marquee selection, Lasso selection, selection mask.

#### **Module-II**

Using hyper shade, relationship editor, hyper graph and outliner. The channel box.

Duplicating objects, pivot points, introduction to snapping-2D snapping and 3D snapping. Using layers. Introduction to particles and materials.

### **Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

# Syllabus - Semester Fifth

## DIGITAL EDITING

**Course Code: ANI2551**

**Credits Units: 03**

### **Course Objective:**

This course aims to guide student through the various stages of digital editing and post-production phase of documentary production. Students will actively participate in the editing of their own material.

### **Course Content**

#### **Module-I**

Basics of editing, Pal Video for windows, Pal quick time multimedia QuickTime, Using Project Window, Video Settings, Audio Settings, Compressor, Depth, Frame Size, Frame Rate, Importing still images, Using the monitor window, Viewing safe zones, use of editing and full knowledge about video editing.

#### **Module-II**

Creating transitions, Transition Settings, Image Mask Transition, Applying transitions, viewing transitions.

#### **Module-III**

Making movie, finalizing sound and effects, rendering, making video CD

### **Examination Scheme:**

Components	A	CT	A	EE
Weightage (%)	10	15	5	70

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

### **Text and References:**

# Syllabus - Semester Sixth

## STOP MOTION

**Course Code: ANI2651**

**Credit Unit: 03**

**Course Objective:**

This course will help students enhance outcomes beyond just creative and artistic expression. This is an introductory course in stop-motion animation, a medium that requires a wide array of technical skills. We consider such techniques as sculpting, two part molds, foam rubber casting, armature configuration, set design, and lighting for small spaces. Through motion and movement tests, students explore the way in which three-dimensional objects move through space.

**Course Content:**

**Module-I**

Stop-motion basic technique, Mix equal parts digital camera, computer, and imagination. Introduction to many ways to go about shooting, editing and finalizing a stop-motion short film;.

**Module-II**

Sculpting heads demo; make head armatures; Making molds demo molding and casting heads, casting multiples; Discuss body material, clothes; Begin Animation Introductory Project - Mr. Blob - students learn the SAM Animation software while creating a simple movie of a blob moving - come up with a funny dance or have Mr. Blob perform a trick.

**Examination Scheme:**

Components	A	CT	A	EE	
				Theory	Prac
Weightage (%)	10	15	5	50	20

(A: Assignment; CT: Class Test; A: Attendance; EE: End Term Examination)

# JOURNALISM

## Syllabus - Semester First

### PRINT MEDIA – REPORTING AND EDITING

**Course Code: JRN2151**

**Credit Units : 03**

**Course Objective:**

This unit is aimed at introducing the students to the world of journalism- news and its handling in context of print media. It deals with basic news elements, news structure as also the newsroom set up. The student is to be taught about agency and magazine journalism. Editing is an integral part of this unit.

**Course Contents:**

**Module I: History of Journalism**

Journalism in pre-independence era in India  
Role of English and vernacular press during freedom struggle  
Growth of journalism post independence

**Module II: Growth and development of press**

Emergence of newspapers, magazines and publication houses  
Emergence and growth of Indian news agencies

**Module III: The newsroom Set-up**

Various departments in Editorial set-up  
Hierarchy in the Newsroom  
Qualities and responsibilities of a reporter  
Sources and beats

**Module III: News Reporting**

What is News, News Value and Sources of News  
Basic elements of News  
Writing a News Report  
Types of leads & Body text  
Interviewing skills required for reporting  
Types of Reporting

**Module IV: Editing News**

Role and functions of desk  
Role of copy editor  
Electronic Copyediting  
Rewriting  
Writing Headlines and captions  
Understanding the importance of style guides  
Newspaper design & Layout

**Examination Scheme:**

<b>Components</b>	<b>P</b>	<b>C</b>	<b>CT</b>	<b>A</b>	<b>EE</b>
