Minutes of BOS meeting

1. The chairperson apprised the members and external experts that the students joined through recently(2020) approved M.Sc Biotechnology (DBT - GATB) program of DBT, India and the students who have directly admitted in M.Sc Biotechnology under AUH regulation shall be addressed as **M.Sc Biotechnology-GATB (M.Sc BT-GATB)**, and **M.Sc Biotechnology (M.Sc-BT)** respectively.
2. The separate nomenclature is to be adopted only due to technical limitation of the software (Amizone) used in AUH to mark various activities of the semesters, M.Sc Biotechnology (DBT - GATB) is configured as a separate program as **M.Sc- GATB**. However, apart from internal technical matters (Amizone), both programs will be treated as **M.Sc- BT** only. Both programs **M.Sc- GATB & M.Sc- BT** will run together with same curriculum and assessment schemes.
3. Same degree shall be awarded to all the successful students with the nomenclature of **M.Sc Biotechnology** without any discrimination between two different sources of admission.
4. The committee approved the adoption of model syllabus prescribed by DBT of 94 credits, with the below-mentioned changes. The same syllabus is approved for both the programs.
5. Value-added courses of 14 credits (fourteen) are accommodated in total 100 credit PG program in Biotechnology. Therefore, the credits of few subjects are reduced from DBT's model syllabus of 94 credits to adjust 14 credits. Now the course syllabus has 86 credits from DBT model syllabus and 14 credits for Value-added courses from Amity University Haryana syllabus to complete total 100 credits as per the regular practice or UGC norms.
6. The Elective II in DBT's model syllabus are brought to Sem III from Sem IV. This will allow students of Sem IV to leave the campus for dissertation project, if they wish to do project elsewhere. Also, two extra electives are added in the final syllabus to give more choices to the students. These are 'RNA biology', and 'Advanced Plant Genomics'.
