- Persuasion is a skill that requires logic, reasoning, evidence and effective communication.

- The outcome of such efforts depends largely on the reasonableness of your request, your credibility, and the ability to make your request attractive to the reader.

Requests and promises are the lifeblood of business communication.

An effective request has four elements:

- say exactly what you want
- say exactly who you want it from
- say exactly when you want it
- make sure you have the same assumptions about what is needed to ensure the desired outcome.

Planning and Organizing Content for Talk

There are three things to do at the very beginning:

- (1) Get the attention of the audience.** You can get attention and interest by relating the topic to the audience. People pay attention to things that affect them directly.
- (2) Startle the audience with an arresting or intriguing statement.** “Almost one year ago today, a perfect stranger saved my best friend’s life.”
- (3) Arouse Curiosity.** Give an arresting synopsis of what you will explore. Or you may question your audience. This draws the audience in immediately.
