3.1 General Introduction of the Event

Innovation is to a large extent considered a social and communicative process, and input from other individuals potentially improves the generation of novel and, valuable ideas also in the early stages of idea creation and development. As the encouragement of nursing professionals to utilize their acquired knowledge and skills to creatively generate and develop new ways of working, drawing on technologies, systems, theories and associated partners to further enhance and, evaluate nursing practice.

Nursing innovation is a fundamental source of progress for health care systems around the world. Nurses work in all settings with healthy persons, all types of patients, families, communities, health care personnel and personnel in other sectors. Nurses are critically positioned to provide creative and innovative solutions that make a real difference to the day-to-day lives of our patients, organizations, communities and profession

So, it's very important for us as nursing professional to use innovative ideas in our profession.

Innovative ideas in nursing science aims the highlight to improve quality nursing care and its sustainability.
