### 3. Event Report along with glimpses of the event (Photographs)

#### 3.1 General Introduction of the Event

Intellectual property is a complicated topic. Although some situations are fairly clear-cut, the answer to other questions is a perplexing "It depends." Some nurse educators haven't thought about how they can or cannot legally use works created by others, or even by themselves, in a previous job position. Meanwhile, other nurse educators who do consider the legality of use have unintentionally acted on incorrect information. In either case, ignorance of intellectual property and copyright is not an excuse for misusing material and can lead to legal action.

An intellectual property right is the vital need of the hour which is linked head-on to innovation and creativity. Its important to address how today's nurses can use and share information and enhance their educational offerings without infringing upon copyright protections.

#### 3.2 Objectives of the Event

- To understand the basics of Patents, Copyrights and other Intellectual property rights of Nursing and other health fraternity
- To determine what intellectual property is and what are types
- To know the basic requirements for different types of Patents.
- To understand why to register and how to register for intellectual property.
