**3.2 Brief about the address/talk of speakers.**

**3.3 'Take Homes' for the Guest and Attendees** Blood donation is a voluntary procedure that can help save the lives of others. There are several types of blood donation. Each type helps meet different medical needs.

Millions of people need blood transfusions each year. Some may need blood during surgery. Others depend on it after an accident or because they have a disease that requires blood components. Blood donation makes all this possible. There is no substitute for human blood — all transfusions use blood from a donor.
