Health

- We went to a slum area near DD nagar.
- Around 40 -50 kids were there who were not properly getting medical aids.
- Some of them were new born babies many of them didn't get basic treatment.
- We communicated with parents and told them about the advantages of good health, cleanliness,hygiene.

- We told them about the facilities MP govt is giving like free injections, basic medicines for poor people.
- The slum area was situated near drainage system. We asked them to shift their place to somewhere else or else talk to the local authorities.

HYGIENE

- The problem of clean water is there in the slum area.
- Water tanks are provided by gwl municipal to slum areas.
- We also told them about the aanganwadi where their kids can get meal for one time and can be monitored by nurses.

EDUCATION

- Apart from this education was also a point to discuss with them.
- Kids not even getting basic education is an issue.
- We told them about the benefits of education.
