## To Whom It May Concern

It is my pleasure to recommend **Ms. Pratigya Thapak** who has worked as a trainee with me for the duration 4 June 2019 to 31 July 2019. Ms. Pratigya is a M.Sc. Student of Amity University, Madhya Pradesh and is in 3<sup>rd</sup> Semester of the course. She did her summer training on "Soil Urease and Acid Phosphatase Activities in the Plantation of Delhi" as a part of her course.

During her stay in college as well as my collaborative lab i.e. Natural Resource Management Lab, Department of Botany, University of Delhi, Delhi, Ms. Pratigya learned various biochemical techniques like analysis of soil enzyme activity and phosphorous content by spectrophotometer, estimation of Na<sup>+</sup>, K<sup>+</sup> content by flame photometer, moisture content in soil etc. I was impressed by her astute observance and keen interest in research. Our discussions were interesting and she could understand the biology behind the project and implemented it successfully to achieve the desired goal.

Pratigya is ambitious, sincere and a dedicated worker. She is a quick learner and will be an asset to any institute she decides to join. She has good work ethics and great interpersonal skills, which help in fostering a positive and cooperative environment at the work place.

I wish her the best in her future endeavours and scientific career.

Abhishek Chandra
