1. The University has 10 Nos of Borewells in the campus. The borewells dug in the campus do not have enough ground water to yield water continuously. Half of the borewells dry up during continuous pumping. To recharge these existing borewells and to restrict the out-flow of rainwater Amity University has constructed 10 Water Harvesting Pits of capacity 30,000 ltrs at various locations (Water Catchment Area) 10 conserve rainwater. These pits have been provided enough filter media to restrict the mud/silt during rains.
2. The above has brought sea change in saving of rainwater and has thus improved the water level, of our borewells which helps us in meeting our water requirement in peak summers.
3. This has also been applauded by Hon'ble High Court Gwalior MP Local Newspaper.
