Amity Quality Journal Checker is a cutting-edge mobile application differentiates between cloned and fake academic journals. This application provides a simple and efficient way for researchers, academicians, and students to verify the authenticity of journals before submitting their work for publication. With the growing number of fraudulent journals and predatory publishers, it is becoming increasingly important to have a reliable tool to ensure the quality and credibility of the journals in which one publishes. Amity Quality Journal Checker is an indispensable tool for anyone looking to publish their work and maintain the integrity of their research.

Misleading profile of the Editorial Board members

Impact factor is ambiguous

**Conceptual Framework;  
08 Novel ways to identify Cloned Journals**

At Amity Quality Journal Checker we follow a conceptual framework to identify fake and cloned Journals. These 8 novel ways are the pathway to identifying cloned journals and will help researchers and academicians in doing authentic work. Academic integrity is the need of the hour for researchers, and we are committed to working in the same direction.
