<u>About the Event</u>

This event is a part of the Central Government's initiative YUKTI – National Innovation Repository (NIR), which is aiming to build a system of repository of ideas, innovations, and startups, from premier academic institutions like Amity University and others, across the country.

This event was organized for students of AUMP, preferably for those with background and exposure in the fields of Architecture and Interior Design. The objective of these posters, were to understand innovative ideas and the thinking process of the students. These ideas ranged in the following fields of work - architecture, interior design, furniture design and product design.

In addition to presenting these ideas through the posters and sheets, the students were extremely clear regarding how to sell these ideas in the long run.
