Message From Head of Institute

Heartiest Greetings!

It is my pleasure to introduce the Volume 2, Issue 1 of our bi-annual newsletter 'FASHION SCAPE' by Amity School of Fashion Design and Technology.

"FASHION SCAPE" has a primary focus on the remarkable journey of ASFDT and the ever-evolving world of fashion. Our aim is to disseminate the most current developments in the fashion industry, including the latest trends, insightful perspectives from fashion experts, and the remarkable achievements of ASFDT. This newsletter serves as a bridge to connect students, researchers, and academicians with the cutting-edge research and innovations within the realms of fashion and textiles.

I want to express my heartfelt gratitude to our dedicated Designer and our diligent editor, and the invaluable anonymous reviewers who have generously contributed to the success of this newsletter. I want to extend my sincere appreciation to the editorial team for their hard work in crafting this informative masterpiece.

We eagerly invite your valuable contributions for our upcoming edition in January 2024. Your insights will undoubtedly enrich the content and make "FASHION SCAPE" an even more indispensable resource for all fashion enthusiasts.

Thank you for embarking on this exciting journey with us. Together, let's continue to celebrate the boundless creativity and innovation that fashion and textiles bring to our lives.

MS. ANSHU SINGH CHOUDHARY
HEAD OF INSTITUTE
ASFDT, AUMP

Message From Editor and Designer

After completing 1 year of successful journey, we are here with our 2nd Volume 1st Issue of 'Fashion Scape'. This newsletter stands as a testament to the culmination of our institution's creative endeavours in both curricular and co-curricular activities.

I extend my heartfelt appreciation to Ms. Anshu Singh Choudhary, the Head of Institution at ASFDT, and the entire ASFDT team for being unwavering sources of motivation in bringing this project to fruition.

Graduation Design Collection

Theme

Extinct to Re-Create

Human life can be summed up as a continuous quest for self-identity. The Baigas are a forest-dwelling tribe and the motifs of Baiga tattoos are primarily inspired by nature.

Dots, crosses and circles are the other major shapes that are tattooed in a symmetrical manner between larger and thicker lines on the whole body with its symbolic resemblance. Our designer Aayush Shrivastava has created a binary where traditional tattooing is transferred from skin to screen and is traditional yet cultured in garments

Aayush Kumar
Shrivastava

Theme

Intangible Heritage

Indonesians' daily lives are influenced by the methods, symbolism, and culture used to create the hand-dyed cotton and silk clothing known as Indonesian Batik. By using hot wax to create dots and lines on fabric, proud artisans create batik, which can be coloured selectively by soaking the fabric in one color, removing the wax with boiling water, and repeating if more than one colour is desired. The timeless designs of beautiful batik motifs have been utilized by our designer Sumriddhi Maheshwari who would like to share the beauty of batik with an even wider audience across the globe.

*Sumriddhi
Maheshwari*

Theme

The Vintage Embroidery of Kutch

The designer has worked on most distinctive and easily identifiable craft styles of India - Kutch work or Kachchhi embroidery from Kutch region of Gujarat. The work is distinguished for the large and complex embroidery that adorns the entire fabric on which it is based, as well as the use of vivid colors, mirrors, and beads. She found inspiration in the energizing and colorful Kutch motifs to craft fresh and contemporary expressions using the art of Kutch Embroidery. From distinctive apparel to accessories all are handcrafted with the exquisite beauty of Kutch Embroidery.

*Isha
Goyal*

Theme

Ancient craft of Block Printing

Ajrakh is believed to have the sky as its theme. The sky is represented by the colour blue, evening by the colour red and night by black. The white star-like motifs represent stars. Ajrakh patterns resemble kaleidoscopic patterns in appearance. Deep crimson and indigo are the primary colours used by the symmetrical block prints to transmit their patterns onto fabric. Inspired by the legacy of this craft our designer Drashti Agarwal has prepared her collection.

Pandit Jawaharlal Nehru had rightly said that “Children are like buds in a garden and should be carefully and lovingly nurtured, as they are the future of the nation and the citizens of tomorrow.”

Amity University Gwalior is committed to contribute to the well-being of communities and society through various environmental and social measures. This year, Amity School of Fashion Design & Technology is launching a Social Venture ‘AASH’ for financially weak children. 'AASH - A way from destitute to happiness' is a social venture to create a range of clothing for such kids and give them a ray of hope through by providing them proper clothing.

The main motive of this venture is to help underprivileged children who have lack of access to affordable, adequate, appropriate clothing. This venture would bring happiness on the faces of the underprivileged children of our society by providing them with designer clothes.

The team of ‘AASH’ used the old, discarded clothes and crafted them with creativity, and re-designed them using their creative and artistic ideas. The new designed clothes will be presented to the underprivileged children across the city.

—A way from destitute to happiness

Fashion: An Empowering Journey of Self-Expression

**Anushka Sharma,
ASET, Amity University,
Gwalior, M.P**

Fashion is a powerful medium through which individuals express their unique reality, personality, and lifestyle. It encompasses various elements such as clothing, footwear, accessories, colours, designs, hairstyles, and makeup. With the passage of time, fashion evolves and adapts to changing trends, allowing people to embrace their autonomy and showcase their individuality.

Today, fashion plays a vital role in shaping one's confidence, acceptance, and self-love. It empowers individuals to live life on their own terms and create a style that resonates with their personal taste. Fashion draws inspiration from diverse cultures, blending elements from different traditions and lifestyles. For instance, one can find influences from Rajasthan in the form of metal accessories and jewellery or the elegance of sarees from Bengal and Banaras.

Fashion seamlessly blends traditional and modern elements. What was once considered normal and traditional becomes a trend for the present generation. Take, for example, the resurgence of bell-bottom pants in today's fashion scene. It reflects how fashion keeps evolving and capturing the essence of different eras.

In today's generation, fashion has become a means of expressing one's true self, emotions, and individuality. It provides a canvas for creative expression, allowing individuals to showcase their unique skills and talents. Moreover, fashion has the power to uplift our spirits and make us feel good about ourselves.

It is important to note that there are no right or wrong choices in fashion. The key is to stay true to oneself and wear what brings joy and happiness. Fashion should be embraced as a creative outlet that celebrates our individuality. So, let us venture into the world of fashion, explore new styles, experiment with different looks, and confidently embrace our personal style.

Remember, fashion is not just about following trends; it is about embracing who we are and expressing ourselves authentically. Let fashion be the tool that empowers us to celebrate our uniqueness and embark on a journey of self-expression with confidence.

CAD And Fashion

In present era, CAD has become one of the most popular designing applications. The connection between CAD and fashion design is getting deeper and more powerful. The knowledge of CAD software is essential for an aspiring Fashion Designer entering the Fashion industry and also for an established fashion designer within the Fashion Industry. Illustrator and Adobe Photoshop are the most commonly used CAD (Computer Aided Design) software programs in the fashion industry which is very helpful to make designs.

It is helpful in giving dimension to any design, experimenting changes on it, configuring the design according to needs, archiving the design, exchanging of data and information. It is a tool for product manufacturing through the use of a computer system that may involve both hardware and software, design between teams and organisations, adding development of the designs for future analysis. Designers can use CAD software to sketch concepts, create patterns, model clothing, and modify it for particular body types and uses.

It helps designers to view designs in virtual 2D and 3D models and in various colors, shapes, size, etc. In the fabric designing process, it allows the designers to work with different fabric patterns and textures. This will ultimately reduce the cost and will save the time. It reduces errors in the making process. The two CAD (Computer Aided Design) software programmes that are most frequently utilised in the fashion industry are Adobe Illustrator and Adobe Photoshop.

The manual design is also very important and a fine balance between the use of computer technology and manual designing is very important.

One of the most important sectors in our modern society is fashion. I think fashion is one of the main ways people express their personalities and set themselves apart from others is via their sense of style. As i see new trends emerge with each New Year that comes and passes, and they all aim to be more vibrant and stylish than those that i've seen the year before. As a fashion designing student i've found inspiration everywhere, including in printed magazines and online stores like Roden Grey. Throughout human history, people have wanted to express themselves by fashion and tried to connect with people around them.

New fashion trends are a serious addiction for people of all ages if they're kids , my age (adults) or senior citizens . I would love to visit different regions of the world and see for oneself how people there dress because different cultures and nations have varied fashion tastes. I think garments are no longer just a tool to hide our nakedness. Instead, garments shows a lot about a person their choices, their life, their perspective and many aspects of their way living.

However, in my opinion, occasionally people should go with their hearts and wear whatever makes them happy.

Fashion trends and oneself own style

Fast Fashion

Samiksha Chougule
B.Tech, Shivaji University,
Kolhapur, Maharashtra

Fashion is form of self expression. It is a way one carry the things that replicate the trends and showcase ones personality . It is art of expressing your sense of beauty. Today lot of changes takes place in the world as we know fashion is too dynamic in nature . Fashion not only includes the clothing and make up but also includes accessories that one carry . Today we also came across fast fashion which means clothing designs that move quickly from the catwalk to stores to take advantage of trends. Fast fashion clothing are low priced with different kind of styles that always try to be trendy for example Zara and H& M are the two best giants for fast fashion. The fashion industry encompass many different smaller and more niche industries. Often people think of it as just retail/online stores, design houses and brands, and fashion magazines. Thus fashion is the collection of ideas that work on different inspiration and always try to put forth best out of it and make them trendy that will be acquired by the masses.

Indian Fashion Industry influencing the World

Ms. Shivani Saxena
Faculty GWPC
Gwalior, M.P

Fashion has always been about creativity and innovation. The Indian fashion trends are an impression of the nation's different and rich social legacy. From soft sarees to creative tank tops, Indian fashion is a mix of conventional and contemporary styles. The current trend is also about comfort which is maintainable design and has turned into a significant pattern in India, by making eco- accommodating apparels. The fusion of old and new is creating unique and exciting fashion pieces. The main Idea behind this is to reduce, reuse, recycle. As the fashion designers are now aware of the environmental issues, they are adopting such techniques which minimizes the waste.

The Indian fashion industry will continue to evolve and embrace new trends while preserving the rich cultural heritage of India and will continue to influence the world.

Role of colour psychology on the style

Dr. Ayushi Garg
Assistant Professor, ASAP
Amity University, Gwalior, M.P

Color psychology in interior design isn't only about how colors affect your mood but also how they can make you look good. Colors play a major role in deciding the fashion scape of a particular space especially in terms of upholstery. We are constantly surrounded by different shades at home and these have a long-lasting effect on the way we think, feel, and even appear. Every color has a different effect on the mood and feeling of an individual in a space. All of this largely comes down to color psychology, and the way light falls on the color and is reflected on our skin. As per research by the National Library of Medicine, colors affect our minds to a great extent.

Generally, when it comes to paint ideas, warm colors like red, orange, and yellow are considered hues that evoke feelings of happiness, optimism, and energy. Cooler shades such as green, blue, and purple are considered calming and soothing. Some of the examples have been sighted as per the colors used in our environment and upholstery to determine the relation of hues to color psychology in a space.

Sustainable garments are clothing items that are made using environmentally friendly and socially responsible methods. These methods aim to minimize the negative impact of clothing production on the environment and on people. Sustainable garments can be made from a variety of materials, such as organic cotton, recycled fabrics, and natural fibres like linen or hemp. Interest in eco-fashion has increased over the past ten years along with the rise in consumer social and environmental concerns. The apparel business contributes significantly to resource depletion and environmental challenges throughout the textile lifespan, which are the driving forces behind rapidly evolving fashion trends.

Without the use of artificial fertilisers, pesticides, or herbicides, organic cotton is grown. In order to promote healthy soil and ward off pests and disease, farmers instead employ natural techniques including crop rotation, beneficial insects, and compost. Organic cotton production also prohibits the use of genetically modified seeds and requires that farmers use water conservation methods. Additionally, organic cotton farming practices prioritize the health and safety of workers by prohibiting the use of toxic chemicals. Organic cotton farming practises lessen the use of dangerous pesticides, support healthy soil, and increase biodiversity, all of which can be advantageous to the local ecology. Organic cotton does not contain harmful residues of synthetic chemicals that can be absorbed through the skin, which can be especially important for people with sensitive skin. Organic cotton(Fig1)2 farming practices prioritize the health and safety of workers, who are not exposed to harmful chemicals in the workplace. Choosing organic cotton products supports sustainable and ethical farming practices, and can have positive impacts on the environment, human health, and social well-being.

Sustainable Garments – An Eco-friendly Approach

Dr. Rwitabrata Mallick
Assistant Professor, ASLS
Amity University, Gwalior, M.P

Sustainable Fashion: The Remedy to Fashion's Negative Environmental Impacts

Ar. Aditya Bhattacharya
Assistant Professor, ASAP
Amity University, Gwalior, M.P

Are the latest brands offering you a buy-one-get-one offer at the nearby mall? Are the latest online big-billion-day sales offering you top branded clothes with flat discounts? Are the mounted clothes on your chair sadly looking at you waiting for their turn to be worn? You might want to hold back, sort your wardrobe, and reuse your already existing clothes, by the time you reach the end of this article. Yes, you might ask, what is wrong with buying new clothes. They look extremely innocuous and tempting, especially with the garland of offers and discount placed around it. Moreover, after the confined lives we all spent during the COVID-19 pandemic, who doesn't want to dress up wearing new outfits, socialize and travel places.

Today, even brands are staying up with the latest fashion trends and are racing ahead towards producing inexpensive clothing at a rapid pace, also called, 'fast fashion'. For customers, shopping is often the new synonym for entertainment. This leads to us contributing to a throwaway culture - discarding used clothes rather than recycling or donating them to the needy. This culture creates a linear model of fashion production, where resources are consumed, turned into a product, then discarded.

The Influence of Indian Culture on Global Fashion

Dr. Shweta Kanungo
Assistant Professor,
Journalism and Mass Communication,
Renaissance University, Indore

Indian culture has a positive impact on global fashion. As an Indian culture, fashion suits all generations and is easily accepted and adaptable to the world.

India began in the 4th millennium BC and in the 5th millennium, the Cultivation of cotton in the Indus civilization. India was generally the only diamond base until the discovery of mines in Brazil in the 18th century. Diamonds were first recognized and mined in central India about 5000 years ago. Indian cultural fashion spread especially after the global trade in wearables began in the late 1980s and 1990s. During this period, India was the world leader. Indian culture offers a wide variety of clothing options ranging from Kashmiri to South Indian clothing and jewelry. Indian clothing brands enjoy great prestige in the global market. Up-coming designer in India make use of cultural elements and advocate arts such as saree, indo western, indigo & block prints, embroidery, body accessories for noses, ears such as rings, anklets, toe rings, turbans and dhotis so on & so forth completed a garment with Such as Indian shoes this all have high demand in the global market. The rapid growth of the Indian film industry has also contributed greatly to global fashion.

The fashion industry has become increasingly conscious of its environmental impact in recent years. In order to reduce their ecological footprints, brands are focusing on developing and producing sustainable clothing made from natural fibers such as organic cotton or linen which can be recycled after use. This is an important step towards protecting the environment but there are certain challenges that come along with it.

One major challenge faced by manufacturers is creating a product that meets the needs of customers while also being environmentally friendly. It's difficult for companies to create garments that have both high quality standards and low levels of water/energy consumption during production, as resources tend to overlap between these two requirements. Additionally, sourcing materials with minimal ecological impact can often involve long lead times which could make products more expensive than those produced cheaply using mass-produced synthetic fabrics like polyester or nylon – presenting another barrier for sustainability advocates looking for affordable ecofriendly alternatives in smart fashion wearables. Moreover, technology used in apparel, especially wearable devices embedded into clothes calls for additional scrutiny: Buttons built on plastic base or zippers made out from non-recyclable metal components evoke contradictions.

The challenge of developing sustainable fashion has been growing steadily in recent years. This is due to a number of factors, including the following:

1. Increasing consumer demand for eco-friendly and ethical products that are produced without harming people or the environment. As consumers become more conscious of their choices, they are looking for clothing companies that can provide them with stylish yet sustainably manufactured garments.
2. The rising costs of producing traditional items made from non renewable materials as well as increasing environmental regulations resulting in higher raw material prices for ethically sourced fabrics such as organic cotton, recycled polyesters and hemp . Companies need to find ways to make these materials both affordable and fashionable if they want to keep up with consumer demands while still protecting our planet's resources.

The Challenges of sustainable smart fashion

Waghodia, Gujarat

Stylized Illustration adding to Avant- Garde design collections

**Dr. Kapil Kishor,
Fashion Guru & Educator**

A style adopted by a particular number of people, group or masses is called as fashion and when we say stylized fashion trends, it's very specific & focused fashion we are targeting at. Stylization is something which exaggerates and increases the plot criteria on which we are working, whether it's AVANT-GARDE or any other style of fashion.

In fashion, the avant-garde style is defined through its personality. Many designers have been asked to define this style and they all added a certain term to define it: sophisticated, mysterious, intimidating, intriguing, striking. The accessories have to be very modern, unusual, but elegant. All clothes should be matched with hats, belts or shoes in the most unusual shapes. Avant-garde clothes mean unusual ones, which catch the eye and does not let you fade in the crowd. In fact, when we discuss about avant-garde fashion, we should not talk only about clothes. In the end, the result of the avant-garde has to be a whole form. Avant-garde fashion is all about style. What is fashionable is not a purse or a blouse but the style that manifests itself through them.

Stylized trends make themselves visible via fashion items such as apparel and accessories. However, it is the way of carrying these items which is more subject to fashion than items themselves. Fashionable items are merely the surface of fashion, but the real meaning of avant-garde fashion can only be seen beneath the material layer.

This is why ability of fashion illustrator to emphasize style in fashion illustration is so important in fashion industry. Fashion concept could originate as an idea of style not a depiction of concrete wearable item. This is when and why fashion drawing helps. Nothing can depict concept of fashion style more clearly than stylized fashion drawing. Enlargement of avant-garde elements in illustration develop new ground for design range which specifically helps to understand technicality of line plan and at the same time specifications of design gives us the track guideline for garment's construction criteria.

Hell on Heels

"Hell on Heels " simply focuses on the strength and resilience of women who have overcome challenges and obstacles to achieve success on their own terms.

The term "hell on heels" is a metaphor that suggests that women can be both tough and feminine, and that they can use their power and confidence to take control of their lives and achieve their goals. Hell on heels encourages women to be proud of who they are and to embrace their unique qualities and strengths.

Expressionnisme

A style of painting or art which the artist seeks to express the inner world of emotion rather than external reality. The theme is inspired from the Abstract art which include colours, shapes, lines, and spatial arrangements. Happiness and sadness tend to yield more predictable behaviours than those from anger or anxiety, and so the entropy in an abstract painting can also help in the evocation of a simple emotion. The garment prints are created by hand painting with the fabric colors to showcase the realistic effect of abstract art. The fabrics used for the collection are German Silk, Cotton, Organza, and net.

Flower of Evil

Flower of evil inspired from the flower “Raat ki Rani” is not only a flower but it also replicates the dark beauty of the night bringing all the shine towards us. Indian and western fashion elements have been merged with each other. The designs represent the different Phases of life consisting of Happiness and sadness, infancy, youth, the middle years and old age. Each stage is an important and beautiful time of growth, learning, caring and sharing in a special and unique way. Just like the two sides of the coin, life is also about two phases happiness and sadness.

Meraki

The traditional outfit for Rajasthani men is "dhoti and angarkha or pyjama-kurta. And for females are ghagra, choli (also called Kanchli or kurti) and odhni. A cocktail dress is a semi-formal dress intended to be worn to late - afternoon or early-evening social gatherings, events, or occasions. Fusion- Combining two or more styles from different cultures into one to show the vibrance in them.

Verve

To think beyond the norms made by the society and to create something extraordinary. Designers have been inspired by the indigenous culture and tribal art of Ethiopian tribes. Tribal fashion depicts traditional old vibe with its contemporary silhouettes. Brighter colours like white, blue, yellow, and red have recently been seen as runway trends, despite the fact that earthy tones and deep desert hues are excellent for tribal patterns.

Love of Darkness

Roses are considered as a symbol of love and Gothic is understood as a symbol of horror or romance. The designer has used rose as an element to show love. According to the designer love is not always beautiful. It has a few dark shades and sorrowful endings also.

Sun Printing

Amity School of Fashion Design & Technology (ASFDT), AUMP, organized a three day's workshop on Tribal Art & Sketching from 15th and 16th may 2023 from 2:00 pm onwards.

The workshop began with the introduction of the expert, Mrs. Nupur Shrivastava, Fevicryl Instructor. The purpose of the workshop was to enlighten the students with the concept of Sun Printing and 3D embroidery. Sun Printing, also known as Heliographic Art, a simple technique that uses sunlight or infrared bulbs to "set" the color. With this technique, students have created stunning photograms on fabrics and paper using Fevicryl sunflower kit. Mrs. Nupur Shrivastava also demonstrated 3 D embroidery technique using Pidilite Fevicryl Colours. She used 3D colours to give the effect of embroidery. Such colors used by students on T-shirts, Scarf and Kurtas. The students keenly participated in the workshop. This workshop was very fruitful for the students as it helped them to create their own designs with innovative style. Approximately thirty students participated in the workshop.

KVS ZIET Gwalior had organized a 03 days' workshop for TGT (AE) from 18th April to 21st April 2023 and they invited Ms. Shweta Singh (Asst Prof) Amity School of Fashion Design and Technology for a workshop session on Tie & dye as Pre-Vocational Education under NEP 2020 on 20 April 2023. In this training program more than 60+ participants participated from all over India. Ms. Shweta Singh taught them about the techniques and a new insight of tie and dye through practical & demonstration methods with natural dyes like Flowers, Leaf's, Tea, coffee, Palak, Haldi, Onion and many more. The Workshop was supported by the hard work of Anshika Dwivedi and Ananya Mudgal from 3rd year (ASFDT). The training program ended on a good note as all the participants were happy and satisfied after presenting their creative work on the platform.

Amity School of Fashion Design & Technology (ASFDT), AUMP, organized a workshop on 'Machine Embroidery' on Wednesday, 17th May 2023 from 2:15 pm onwards.

The workshop started with the welcoming of guests, Mr. Pradeep Chaubey and Mr. B.K Upadhyay instructor from USHA SEWING MACHINE, Ms. Anshu Singh Choudhary, HoD, ASFDT, AUMP, faculty members and students from ASFDT. The objective of the workshop was to make students to learn Machine Embroidery and also introduce new advance model of Usha machine.

Through this workshop students has learnt the various features of a beautiful looking sewing machine, the Sew Magic- it comes with features like automatic start/end switch, needle threading, triple strength stitch, feed drop lever to facilitate embroidery, and a hard cover for extra protection. Further it comes with nine applications that includes stretch stitching, button fixing, rolled hemming, blind stitch hemming, smocking, and zip fixing and 13 built in stitches including the button hole. Mr. Pradeep and Mr. B.K Upadhyay give the demonstration of different features and each student practiced on machine, which help them to understand the use of machine and also, they understand that they can create various decorative stitch patterns or designs on garment by using these machine.

Machine Embroidery

Sustainable Art for Fashion and Textile

Amity School of Fashion Design & Technology (ASFDT), AUMP organized Sustainable Art for Fashion and Textile, 14th and 15th March 2023 at 11:00 am onwards.

The workshop has gained too much popularity and we have received huge registration across the country from different universities, schools, and colleges.

The workshop was planned to focus on, to discover students entrepreneurial skills and make them learn how to create stunning pieces of sustainability art that promote environmental responsibility.

Sustainability living is rising in popularity because of the many benefits. Beyond its positive environmental impacts, the advantages of sustainability living also include cost and energy efficiency, less maintenance, improved health, and wellness and increase in property value.

On First day Dr. Gunjan Shuklaa taught about the Fashion and Entrepreneurial skills with marketing strategy, Product development (Tie and dye) with natural dye like coffee, tea, vegetables, fruits, flowers and many more.

On Second day she discussed about the up-cycle clothing and Redesigning (Take shirt and redesign it into Apron) and give them tips regarding interview, portfolio and resume. The Workshop ended on a good note as all the participants were happy with their products.

Ms. Preeti Vijaywargiya

As a workshop instructor at Amity University, I had an immensely rewarding experience. The students' exceptional talent and passion for design were truly inspiring. The faculty's dedication to providing a top-notch learning environment and encouraging innovation was commendable. The emphasis on hands-on learning and collaboration enriched the experience. I felt valued and respected by the entire community. This design school is a beacon of excellence, nurturing creativity and shaping future design leaders. It was an honor to be part of this journey, and I eagerly anticipate their continued success.

Ms. Urvashi Rathore

First of all, I was impressed with the workshop's organisation and the students' enthusiasm. Giving students practical instruction in print development was a wonderful experience, and I really enjoyed the time. I appreciate the opportunity provided by Amity University's Amity School of Fashion Design and Technology.

Dr. Gunjan Shuklaa

Amity School of Fashion and Technology is one of the institutes I came across, which takes a lot of initiatives for the students to give them good exposure in the field of fashion which help them connecting with recent trends. The institute aims at enhancing knowledge, skills, and ability of students to keep them practically and theoretically updated, I wish Amity School of Fashion and Technology a bright future ahead.

Ms. Nandini Gidwani

Sharing my knowledge with the brilliant young minds at Amity University's Amity School of Fashion Design and Technology department was a wonderful experience. I taught fashion design students who had a lot of background in the field how to make bags. Students majoring in fashion design enthusiastically took part in the workshop and produced beautiful samples while I watched. They use various methods, materials, and designs to create various types of bags, which they then embellish. Overall, I have a great time at the workshop, and everyone works very hard to make it a success. I appreciate the invitation and the chance to speak with the young minds that the ASFDT team provided.

Ms. Namrata Chaturvedi

I am grateful that Amity School of Fashion Design and Technology gave me the opportunity to serve as a resource person during a workshop. I also like that the workshop was interactive, allowing for active participation and hands-on practise, which I felt was very beneficial for the students.

Ms. Nupur Shrivastava

It is a matter of pride for me to work with Amity. My work experience with Amity Gwalior was great! All students and faculty were very cooperative.

Ms. Neysa Vas

The chance to interact and network with other attendees/students was one of the workshop's most beneficial features. I appreciate the invitation from Amity School of Fashion Design and Technology to speak to their students as a guest on the topic of "Design Thinking, Creative Thinking, & Innovation." Being in a room full of people with similar interests and objectives was a welcome change of pace. We were able to learn from one another and gain new perspectives through the discussions and group activities, which enriched the overall learning process.
