

Assessment of Sustainability Literacy and Knowledge of Students

Institution: Amity University Madhya Pradesh (AUMP), Gwalior

Assessment Year: 2025–2026

Submission for: QS Sustainability Rankings 2027

Category: Environmental Impact – Sustainability Literacy Assessment

The Assessment's Objective

An institutional survey was carried out to gauge students' sustainability literacy and knowledge as part of AUMP's dedication to promoting sustainable practices and reaching global benchmarking through the QS Sustainability Rankings 2027. In addition to gathering feedback on future sustainability training needs, the assessment seeks to understand their attitudes, personal practices, and awareness of sustainability concepts.

Assessment Tool

To collect information on people's knowledge and comprehension of sustainability principles and the 17 Sustainable Development Goals (SDGs) established by the UN, an online Google Form was made and distributed. The survey also sought to evaluate the actions that AUMP should take to encourage sustainability among college students.
