Abstract:

ABSTRACT A SYSTEM FOR RECOGNIZING THE IDENTITY OF THE SUSPECT ON PORTABLE DEVICE USING FINGERPRINT SCANNING The present invention relates to a system for recognizing the identity of the suspect on portable device using fingerprint scanning. The present invention is a fingerprint sensor provided on the portable device; a data provided on a central server to store and creates a log file of the fingerprints of the user; and a user interface to match the fingerprints of the user from the previously stored fingerprints on demand for a predefined situation.

Complete Specification

Claims:We claim:

1. A system for recognizing the identity of the suspect on portable device using fingerprint scanning, comprising:
a fingerprint sensor provided on the portable device;
a database provided on a central server to store and creates a log file of the fingerprints of the user;
a user interface to match the fingerprints of the user from the previously stored fingerprints on demand for a predefined situation.
2. The system as claimed in claim 1, wherein the database stores the fingerprints of all persons and with respect to the user of the portable device.
3. The system as claimed in claim 1, wherein the user interface is further connected with a display unit to show the output.
4. The system as claimed in claim 1, wherein the database is connected with central authority Data Centres with Data storage and transfer capability for analytics and comparison of fingerprints of all persons.

, Description:FIELD OF INVENTION:

The present invention relates to the identification of unauthorized users of portable digital devices such as smartphone, tablet and the like, and more specifically to capturing fingerprint information for identifying unauthorized users.

BACKGROUND OF THE INVENTION

Portable digital devices (such as smart phones, laptop computers, desktop computers, server computers, mobile computers, tablet computers, digital music players, digital video players, and other such computing devices) may perform a variety of different functions for one or more authorized users. However, various users may attempt to
