ADVANCED GRAPHICS & ANIMATION

Course code	L	T	P/FW	Credit
BAF 305	2	-	2	3

Course Objective:

In this course students will build upon the study of the fundamental principles of animation through exercises utilizing traditional 2D animation techniques and Adobe Flash computer animation. They will also become familiar with Storyboarding, where you will practice creating sequential art to convey story and character in visual media, and Layout and Production, where you will gain the skills to build layouts in a production setting for film and television.

Course Contents:

Module I: Concept of Graphics & Animation

The term **computer graphics** includes almost everything on computers. Today almost every computer can do some graphics, and people have even come to expect to control their computer through icons and pictures rather than just by typing.

Difference between graphics and animation

Computer animation is the use of computers to create animations. There are a few different ways to make computer animations. Most useful is 3D animation. One way to create computer animations is to create objects and then render them. This method produces perfect and three-dimensional graphics and animation.

Classification of Animation

Difference between 2D & 3D Animation
Use of Animation, Compositing Animation

Module II:Flash

Flash Editor, Panels, Timeline
Basic Drawing and Painting Tools
Keyframes, Frame by Frame and Tween Animation, Onion Skins, Frame Rate
Graphic Symbols, Alignment, Libraries, Layers
Importing BMP and JPG images, importing sound
Multi-layering
Creating Animation, Motion Tweening, Shape Tweening Using a Guide Layer, Mask layer Animation,

Module III:

Techniques of animation,
types of animation (traditional animation, Key frame animation, Frame by Frame animation and flip book animation etc.).
Principals of animation,
storyboards and its use in animation.

TERM PAPER

Course Code: BAF 307

Credit Units: 03

Course Objective:

A term paper is primarily a record of intelligent reading from several sources on a particular subject.

The students will choose the topic at the beginning of the session in consultation with the faculty assigned. The progress will be monitored regularly by the faculty. At the end of the semester, the term paper will be submitted to the faculty assigned. The evaluation will be done by Board of Examiners comprising of the faculty members.

GUIDELINES

The procedure for writing usually consists of the following steps:

- a) Choosing a subject
- b) Finding sources of materials
- c) Collecting the notes
- d) Outlining the paper
- e) Writing the first draft
- f) Editing & preparing the final paper

1. Choosing a Subject

- a) The subject chosen should not be too general.
- b) Make sure you start either with a presumption that you want to test or with a question that you want to address. .

2. Finding Sources of materials

- a) The material sources should be not more than 10 years old unless the nature of the topic is such that it involves examining older writings from a historical point of view.
- b) Begin by matching the subjects under investigation with those found in the source materials.
- c) The sources could be books and magazines articles, news stories, periodicals, scientific journals etc.

3. Collecting the notes

Skim through sources, locating the useful material, then make good notes of it, including quotes and information for footnotes.

- a) Notice the methods and procedures and how the author has arrived at the results & conclusions.
- b) Compare your ideas with those of author's arguments.
- c) Bring analysis rather than just opinions.
- d) Check cross references.
- e) This work will be part of the Literature Review

4. Outlining the paper

- a) Review notes and write down your ideas on a piece of paper
- b) Sort the collected material under headings and as again each heading can be divided into sub-sections so that it begins to look more coherent and takes on a definite structure.

c) If it does not, try going back and sorting again for main divisions, to see if another general pattern is possible.

5. Writing the first draft & second draft

Write the article based on the outline. You may follow the following structure:

- a) statement of purpose, limitations, and parameters of the writing
- b) main body (including your references and your ideas and points of agreement and disagreement)
- c) statement of summary, insights gained, further questions, and conclusion
- d) Avoid short, bumpy sentences and long straggling sentences that may contain more than one main idea.
- e) Include only information/ details/ analyses that are relevant to your presumption or question.
- f) Remember that what may be clear to you, will not be to your readers. To avoid this, ensure you briefly explain the relevance of every section.

6. Preparing the final draft

- a) Check to see that quotations serve one of the following purposes:
 - (i) Show evidence of what an author has said.
 - (ii) Avoid misrepresentation through restatement.
 - (iii) Save unnecessary writing when ideas have been well expressed by the original author.
- b) Read the paper to ensure that the language is not awkward, and that it "flows" properly.
- c) Check for proper spelling, phrasing and sentence construction.
- d) Check for proper format for footnotes, quotes, and punctuation.
- e) Check for proper form on tables and graphs. Be certain that any table or graph is self-explanatory.

Term paper should be composed of the following sections:

- 1) Title page
- 2) Table of contents
- 3) Introduction
- 4) Literature Review
- 5) Findings, Discussion & Conclusion
- 6) Bibliography
- 7) Appendix

Generally, the introduction, discussion, conclusion and bibliography part should account for a third of the paper and the review part should be two thirds of the paper.

Discussion

The discussion section either follows the results or may alternatively be integrated in the results section. The section should consist of a discussion of the results of the study focusing on the question or presumption.

Conclusion

The conclusion is often thought of as the easiest part of the paper but should by no means be disregarded. There are a number of key components which should not be omitted. These include:

- a) summary of question posed
- b) summary of findings
- c) summary of main limitations of the study at hand
- d) details of possibilities for related future research

Bibliography

From the very beginning of a research project, you should be careful to note all details of articles gathered.

The bibliography should contain ALL references included in the paper. References not included in the text in any form should NOT be included in the bibliography.

The key to a good bibliography is consistency. Choose a particular convention and stick to this.

Bibliographical conventions:

Journal articles:

Appendix

The appendix should be used for data collected (e.g. questionnaires, transcripts, ...) and for tables and graphs not included in the main text due to their subsidiary nature or to space constraints in the main text.

FILM AND TV PRODUCTION BASICS

Course code	L	T	P/FW	Credit
BAF 401	2	-	2	3

Course Objective:

This course aims to lay basic foundations needed for a filmmaker and television producer. This course aims on practical based learning and exploring the theory covered. This module is focusing on basics of production and its three stages.

Course Contents:

Module I: Pre-Production

Production – Introduction, Types, Features, Dynamics
Production in Film and TV – Differences and Similarities
Pre-Production – Elements
Brainstorming – Stages, Uses, Problems
Idea – Source, Handling Source
Idea to Script, Basics of Script, Screenplay
Writing Dialogue
Budgeting
Location Scouting

Module II: Production

Basics of Production – Direction, Camera, Video Formats and Compatibility
Mise – en – scene
Shooting Plan – Execution of script
Script breakdown – Techniques, methods
Log Sheet – Maintenance
Sound Recording

Module III: Post-Production

Preparing Visuals of Editing
Visual Editing – Linear and Non Linear Editing
Transition and Effects
Rendering and Exporting
Dubbing, Re-recording
Coloring and Visual Effects

Module IV: Roles and Responsibility

Production Crew – Roles and Responsibilities
Ethics of Production
Problems in Production

Practical

Student should produce a television program and short film under the guidance of faculty.

SUMMER PROJECT

Course Code	L	T	P/FW	Credit
BAF 550	-	-	-	6

GUIDELINES FOR SUMMER PROJECT (VIDEO PRODUCTION)

Video projects require students to understand subject matter both on an emotional and intellectual level because video relates mood, tone, intensity, and feeling in addition to information. Students, as video producers, must connect on all the levels to make a video that is as compelling as it is informative.

Different video genres are available for different types of student projects. There are many to choose from to achieve your educational objectives. Each genre has educational potential, positive attributes, and specific demands. Choosing the right genre for each student project is crucial. Factors to consider when choosing a genre are curricular content, educational objectives, time and resource limitations, and the abilities of the students.

Types of Summer Project:

- **Documentary:** The documentary is an excellent choice when serious study of a topic is desired. In this genre, students report on a topic with accuracy and honesty. Thorough research, in-depth understanding, careful planning, and clear writing are required for documentaries.
- **Short Film:** Short films can be fun experiments and great learning experiences. Students should be creative. The best genres to work in are horror, comedy, and musicals, perhaps because they can quickly evoke visceral responses from the audience.
- **Drama:** By staging and videotaping a scene from a novel or reenacting a historical event, students can better understand literature and history. A drama could also be used as a creative exercise, giving your students an opportunity to write, direct, and act in their own one-act play, for example.
- **Music Video:** Students will naturally gravitate to the music video, which will challenge them creatively. Music videos can be a useful way for students to practice music interpretation.
- **Educational Video:** An obvious choice for classroom use, educational video could be a demonstration of a report on a topic. A student could demonstrate how to solve a math problem or operate science lab equipment safely. A report could be prepared on any topic; but in either demonstration or report, the students become teachers without having to face their peers in a live performance.
- **Ad/Corporate Video:** Students can make Ad films or Corporate Films. A good ad commercial is nothing, but a slice of life dipped into day-to-day activities, relatable characters and an emotional connect. All this in just a few seconds, but the challenge is to sell a brand while telling the story.

General Rules:

- Students should submit a *video proposal* to the Faculty Guide before going for recording and shooting.
- **Video Proposal** should contain,
 - i. Video Title
 - ii. Theme of Video
 - iii. Synopsis or Treatment (500 words or less)
 - iv. Video Style
 - v. Target Audience

- vi. Length of Video
 - vii. Objectives
 - viii. Setting and Resources (Team, Equipment, Budget, Setting)
 - ix. Estimated Schedule
- Students should update regularly progress of the video to their Faculty Guide.
 - Students should submit the project in digital format and the project report in printed format.
 - Videos should be duration of 5min to 20 min.
 - Videos should have credits. (Name of Producer, Director, Writer, Editor, Cameraman, Narrator, Sound Director, Music, Cast, Special Thanks etc.)
 - Videos should have production date.

Theoretical Report Layout:

The report may contain the following components.

- Title or Cover Page
- Acknowledgement
- Certificate (Project Guide)- A certificate from the project guide to be enclosed.
- Table of Contents
- A brief summary of the project
- Video Style
- Objective of the video
- Setting and Resources (Team, Equipment, Budget, Setting, References etc.)
- Script

Evaluation Criteria

The evaluation of the projects will depend upon the nature of the subject and the project. However, the following criteria will be taken into consideration for evaluation.

- Project: 30
