Program learning Outcomes:

After completion of the course students will be able to:

1. Identify the various psychological schools of thought, and compare and contrast them.
2. Demonstrate scientific approach to the study of mind, brain, behavior and experience and the complex way they work together.
3. Develop and demonstrate statistical & scientific research-oriented intellect and skills in research and projects.
4. Apply knowledge of clinical and health psychology in classification and treatment of behavioural issues.
5. Demonstrate the ability to use psychological knowledge, skills, and values in occupational pursuits in a variety of settings that meet personal goals and societal needs.
6. Develop and demonstrate improved psycho-social and emotional skills to deal effectively in personal and professional lives and remain mentally healthy.
7. Develop proficiency in reading, writing and communicating in one foreign language of choice to be ready for cross cultural assignments.
8. Acquire the professional and personal communication skills for assessment, diagnosis and treatment at individual and group level
9. Analyse the complexities of human behaviour and how these dynamics impact life in relationships, groups, organizational and cultural settings.

Semester I

INTRODUCTION TO PSYCHOLOGY

Course Code: PSY101

L:2,T:1,P:0,C:03

Course Objective:

This course is designed to introduce the science of psychology. It identifies and defines the theories, terms, methods, and various fields of psychology. This course can be used as a foundation towards continued education in more specific areas of psychology. Upon completion of this course, student should have completed the following objectives:

To know the major psychologist and the ideas, theories and schools with which they are associated.

To understand the major concepts of general psychology.

Course Contents:

Module I: Introduction – 7 hours

Meaning, Definition, Nature, Goals, Scope and Branches of Psychology

Module II: Methods – 7 hours

Methods of Psychology: Introspection, Observation, Experimental, Interview, Questionnaire and Field Survey

Module III: Historical Perspective – 7 hours

Background and historical perspectives of Psychology

Structuralism, Functionalism, Psychoanalysis

Contemporary schools of psychology: Behaviorism, Gestalt, Humanism, Existentialism.

Module IV: Intelligence and Personality – 8 hours

Intelligence: Meaning and Nature of intelligence, Factors influencing intelligence and Theories of intelligence: Unitary Theory, Two Factor Theory, Multifactor Theory and Group Factor Theory.

Personality: Meaning, Nature and Theories of personality: Trait and Type Theory

Module V: Emotion and Motivation – 7 hours

Emotion: Meaning, Nature and Theories of emotions

Motivation: Meaning, Nature and Theories of motivation

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; FC- Flip class; MA- Movie Analysis; CS- Case study; DP- Discursive paper; A-Attendance; EE-End Session Exam

APPLIED SOCIAL PSYCHOLOGY

Course Code: PSY102

L:2,T:1,P:0; C: 03

Course Objective:

Social Psychology is the study of social interaction and social influence on human behaviour. This course has following objectives.

To expand knowledge about social psychology and human behavior.

To foster respect for human diversity, particularly with regard to matters of gender, race and ethnicity.

To enable students to (a) understand the forces that create group differences in patterns of social behavior, (b) understand and adjust to the behavior of other people, (diverse array of groups and social categories to which they do belong) (c) recognize the limits in generalizing psychological research to all cultural/gender/ethnic/age groups, and (d) understand the dynamics of intergroup relationships, conflict, and cooperation.

Course Contents:

Module I: Introduction – 7 hours

Meaning and Nature of Social Psychology

Scope and Development of Social Psychology

Methods and their Application: Correlation Method, Sociometry method, Cross sectional method.

Relationship of Social Psychology with other discipline

Module II: Social Perception and Cognition – 7 hours

Perceiving ourselves: Self-Concept, Self-esteem and Self-Presentation

Perceiving others: Forming impressions and role of verbal and non-verbal cues

Attribution: Understanding the causes of others' behavior

Attribution Biases

Module III: Interpersonal Attraction – 7 hours

Concept and Meaning of interpersonal attraction

Factors affecting interpersonal attraction,

Theories of interpersonal attraction: Reinforcement Theory, Complementary Theory, Exchange Theory

Module IV: Collective Behaviour – 8 hours

Prosocial Behaviour: Meaning, Nature, and Determinants, Bystander effect

Crowd behavior: Nature, Types and Theories, Social exchange theory

Aggression: Meaning, Theories of Aggression Social, Cultural, Personal and Situational factors,

Prevention and Control of Aggression

Module V: Social influences and Leadership – 7 hours

Social influence: Conformity, Compliance, and Obedience

Leaderships: Types and theories-Fiedler's, Theory Mc Gregor's Theory, Transactional and

Transformational Theory, Trait Theories, Path-Goal Theory, Mount and Blake model of leadership

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT-**Class Test; **H-**Home Assignment; **P-**Presentation; **V-**Viva; **Q-**Quiz; **FC-**Flip class; **MA-** Movie Analysis; **CS-** Case study; **DP-** Discursive paper; **A-**Attendance; **EE-**End Session Exam

EXPERIMENTAL PSYCHOLOGY

Course Code: PSY 103

L:2,T:1,P:0 ; C:03

Course Objectives: Through this course, the students will be introduced to a branch considered as one of the most scientific fields of psychology. The students will be taught popular theories related with the field and will be made acquainted with fundamentals of conducting a psychology experiment in laboratory setting.

Course Contents:

Module I: Introduction – 7 hours

History of Experimental Psychology

Nature of Science and Scientific Methods, Scope of Experimental Psychology

Module II: Experimental Methods – 7 hours

Steps of Experimental Method

Problem and Hypothesis: Nature, Types and Sources

Variables: Nature and types and controlling techniques

Types of experiments

Module III: Memory – 8 hours

Memory Stages (Encoding, Storage and Retrieval)

Information Processing Model

Types of Memory: Sensory Register, Short Term and Long Term Memory

Methods of Measuring Memory Techniques of Improving Memory

Module IV: Forgetting – 7 hours

Nature, Causes and Theories of Forgetting: Trace Decay Theory, Interference Theory, Consolidation

Theory and Repressive Forgetting

Amnesia

Module V: Fundamentals of Psychophysics – 7 hours

Definition, basic concepts, subject matter, theories and principles

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

BIOLOGICAL BASIS OF BEHAVIOR

Course Code: PSY 104

L:2,T:1,P:0,C:03

Course Objective:

The paper on Physiological Psychology correlates the discipline to the physiological aspect of human life and emphasizes the need to study physiology for complete understanding of human beings.

Course Contents:

Module I: Introduction – 7 hours

Physiology & Behavior

Physiological Psychology- Definition, Techniques used to study brain

Module II: Neural conduction Mechanism – 7 hours

Neurons: Structure of Neuron, synapse, reflexes

Neural Impulse Transmission

Neurotransmitters

Module III: Nervous system – 8 hours

Central and Peripheral Nervous System

Lateralization of brain (Left and Right brain)

Role of nervous system in Behavior

The Endocrine system and behavior

Module IV: Biological basis of behavior – 7 hours

Learning and memory

Motivation and emotion

Module V: Sleep and Circadian Rhythm – 7 hours

Homeostasis, Consciousness and its states, Circadian Rhythm, Dreams, Disorders of sleep

Text:

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; FC- Flip class; MA- Movie Analysis; CS- Case study; DP- Discursive paper; A-Attendance; EE-End Session Exam

PRACTICUM-I

Course Code: PSY 120

L:0,T:0,P:4,C: 02

Course Objective:

This course will enable students to understand and apply the general concepts of psychology through experiments & psychological tests.

Every student is expected to perform and write any 06 experiments & tests mentioned below.

List of Practicals:

Memory drum

Stroop test

Span of attention

2-point threshold

Attitude scale

Aggression scale

Achievement test

Movie/Film/TV serial analysis (Psychology theme)

A student will be examined in any one experiment/test as assigned to him. Classification of marks will be as follows:

Practical (Continuous)	Viva Voce	Record Book	Total
40 Marks	30 Marks	30 Marks	100 Marks

DOMAIN ELECTIVES

SYSTEMS AND APPROACHES

Course Code: PSY 105

L:2,T:1,P:0,C:03

Course Objective:

The paper on System and Theories gives a brief history of psychology and the developments within the discipline.

Course Contents:

Module I: Science & Scientific Theory – 7 hours

Psychology as a Science

Module II: Structuralism & Functionalism – 8 hours

Structuralism – Contribution of Wundt and Titchner, Criticisms

Functionalism – Contributions of William James & others, Criticisms

Module III: Psychoanalysis – 7 hours

Classical Psychoanalysts – Sigmund Freud

Neo- Freudism – Eric Erickson, Alfred Adler and Carl Jung

Module IV: Behaviorism – 7 hours

Contributions of Pavlov, Skinner, Watson and Thorndike

Module V: Phenomenology and Gestalt – 7 hours

Contributions of Edmund Husserl

Continuity theory

Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT-**Class Test; **H-**Home Assignment; **P-**Presentation; **V-**Viva; **Q-**Quiz; **FC-** Flip class; **MA-** Movie Analysis; **CS-** Case study; **DP-** Discursive paper; **A-**Attendance; **EE-**End Session Exam

PSYCHOLOGY OF AGEING

Course Code: PSY 106

L:2,T:1,P:0,C:03

Course Objective:

This paper will enable the students to have a better understanding of the needs, theories and processes of ageing. Also, to empower the students with the wider knowledge on how to deal with the issues and problems related to old age.

Course Contents:

Module I: Introduction – 7 hours

Gerontology- Meaning, Nature & Scope, Historical perspective of Ageing
Morbidity & Mortality, Ageing- Myths & Facts
Major Needs and Global Picture- Researches & Studies

Module II: Aspects of Ageing – 7 hours

Developmental, Biological, Physiological, Psychological & Social aspects

Module III: Palliative Care – 7 hours

Assessment, Diagnosis & Planning
Major issues and its care- Physical and Psychological

Module IV: Individual & Social Issues – 7 hours

Adjustment to Old Age, Attitudes towards Old People
Adjustment to Changes: Family Patterns, Loss of Spouse, Living Alone, Remarriage in Old Age,
Physical, Motor & Mental Abilities

Module V: Ethical, Legal & Financial Issues – 8 hours

Welfare Policy and shelter homes for Elderly
Identifying Excellence in Care of Elderly
Ethical Theories & Principles
Constitutional Rights, Public Policy & Services

Text:

Kenneth F. Ferraro: Gerontology: perspectives and issues, Published by Springer Pub. Co., 1990

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

Semester II

LIFE SPAN DEVELOPMENT

Course Code: PSY201

L:2,T:1,P:0,C:03

Course Objective:

The paper will familiarize the students with the psycho-physiological development of infants and children. The course includes the development and changes during adolescence, adulthood and old age.

The objective of this paper is:

To critically evaluate the role of heredity, maturation, and the environment in development.

To critically examine the relationship between scientific theories of development and the reality of development in everyday life.

Course Contents:

Module I: Introduction – 7 hours

Meaning and Concept of Development: Life Span Perspective, Theoretical Perspective on Development, Factors influencing development; Principles of growth & development: Difference between growth, maturation, development & learning.

Module II: Start to Life and Development in Infancy and Toddlerhood (birth to 2years) – 7 hours

Conception and Prenatal Development: The Interaction of Heredity and Environment;

Birth and newborn: Birth Complications, Competent Newborn.

Module III: Development in Childhood The Preschool years (3-6 Years) & The Middle Childhood (6-12 Years) – 7 hours

Physical Development Cognitive Development: Intellectual and Language development

Social and Personality Development, Moral and Emotional Development

Module IV: Development in Adolescence and Young Adulthood Adolescence (12-19 years) – 8 hours

Adolescence:

Physical and Cognitive development in Adolescence and School Performance

Contexts of development: Family, School Peers, Role of Media

Contemporary Psychosocial Issues

Social, Personality, Moral and Emotional Development

Young Adulthood (19-35 years):

Physical Development: Physical Limitations and Challenges

Cognitive Development: Intelligence and Higher Education

Social and Personality Development: Forming Relationship and Choosing Career

Contemporary Psychosocial Issues

Module V: Development in Middle and Late Adulthood Middle Adulthood (35-55 years) – 7 hours

Middle Adulthood:

Physical Development: Sexuality and Health

Cognitive Development: Memory and Remembering

Social and Personality Development: Cultural Dimensions

Late Adulthood (55 years to death):

Physical Development: Health and Wellness

Cognitive Development: Memory and Forgetting

Social and Personality Development: Successful Aging

Death, Dying and Bereavement

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

BASIC COGNITIVE PROCESSES

Course Code: PSY 202

L:2,T:1,P:0;C:03

Course Objective:

The course deals with the understanding of higher mental processes and their relevance in daily living. The study of normal processes is essential to enable the understanding of neurological or abnormal dysfunctions. The objectives of this course are (a) to provide an understanding of normal mental processes and their relationship to brain, mind and behavior, and (b) to study the concept of cognition and its application.

Course Contents:

Module I: Introduction and Sensation – 7 hours

Introduction, History and Background of Cognitive Psychology
Sensory Process: Meaning and Types of Senses, Sensation and Sensitivity

Module II: Attention and Perception – 8 hours

Attention: Nature, Process Types and Determinants of attention
Theories of attentions
Perceptual Process: Meaning and Nature of Perception
Principles of Perceptual organization
Perception of Space, Depth–Visual Monocular Cues and Binocular Cues, Perception of Distance and Direction
Perceptual constancy
Perceptual Illusions, Delusions and Hallucinations

Module III: Learning – 7 hours

Learning: Meaning, Nature and Types of learning (Verbal, Motor, Concept etc)
Theories of Learning –Trial and Error Theory, Classical Conditioning Theory, Operant / Instrumental Conditioning, Insight Learning Theory
Transfer of Training: Meaning, Types and Theories of Transfer

Module IV: Thinking, Problem Solving & Language – 7 hours

Thinking: Nature, and Types of Thinking
Tools of thinking: Images, Concept, Symbols and Signs, Language, Muscle Activities and Brain Function
Problem solving: Meaning and Methods of Problem solving.
Role of set in problem solving
Decision Making: Meaning, Types and Hindrances
Language: Definition, Elements of Language, Development, Acquisition, Influence of Culture

Module V: Intelligence – 7 hours

Intelligence: Meaning and Nature
Theories of intelligence: Unitary Theory, Two Factor Theory, 3-D Model of Intellect, Process Theories of Intelligence, Multi-factor Theory (Howard Gardener), Emotional Intelligence, Social Intelligence, Spiritual Intelligence and Cultural Intelligence

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

STATISTICS IN PSYCHOLOGY

Course Code: PSY 203

L:2,T:1,P:0 ;C:03

Course Objectives:

The paper on Statistics introduces quantification and interpretation of data related to psychology. The students will learn primary concepts and methods of statistical analysis in psychology.

Course Contents:

Module I: Introduction – 7 hours

Meaning, Definition, Importance and Limitations of Statistics in Psychology
Population and Sample, Graphical presentation of Data: Histograms, Frequency polygon, Frequency Curve, Cumulative Frequency Curve (Ogive), Cumulative Percentage Curve
The Normal Curve: Characteristics and Problems in Normal Probability Curve (NPC), The Standard Normal Curve.

Module II: Central tendency & variation – 7 hours

Measures of Central Tendency: Meaning, Application and Computation of Mean, Median and Mode
Measures of Variability: Range and Variation; Average deviation, Quartile deviation and Standard deviation

Module III: Parametric Statistics – 7 hours

Assumptions: t-Test (Independent & correlated)
ANOVA (One way) and Factorial
Correlation-Pearson Product moment correlation (Linear correlation).

Module IV: Non-Parametric Statistics – 8 hours

Introduction, Assumptions
Chi square- Equal probability, 2x2 contingency and 3x3 contingency
Mann Whitney and Wilcoxon rank test
Spearman's rank order correlation

Module V: SPSS – 7 hours

SPSS- training in parametric and non-parametric data analyses.

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

GENDER DYNAMICS AND GENDER STUDIES

Course Code: PSY204

L:2,T:1,P:0,C:03

Course Objective:

This course is designed to introduce students to primary concepts of gender psychology. The course will familiarize them with psychological theories and research findings regarding the differences and similarities between men and women and the effects of gender in social situations. Students will learn to understand the complexity and diversity of gendered experiences in the society.

Course Contents:

Module I: Introduction to Gender Psychology – 7 hours

Key Concepts

Historical development: Role of Early Schools, eminent women, role of assessment

Module II: Various Perspectives – 7 hours

Biological: Role of Heredity, Hormones and Nervous System

Psychological: Freudian and Neo-Freudian, Socio- Cognitive, Humanistic

Sociological and Economic perspectives: Social Norms, Social Conflict, Economic models

Module III: Gender Constructs & Stereotypes – 7 hours

Gender Role and Gender Identity: Components of Gender Constructs

Stereotype in Religious, Global/Cultural Contexts

Effects of stereotypes and roles, Media and Depiction of gender

Module IV: Gender Differences – 8 hours

Areas of gender difference: Physical, cognitive, affective and social abilities,

Health & Fitness, Stress, Coping & Psychopathology,

Internalizing and Externalizing Behavioral Problems

Module V: Contemporary Issues – 7 hours

Third gender issues: Transgender concept and approaches, global scenario

Women empowerment: Feminism: Movement and Branches

Need for gender sensitization

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

PRACTICUM-II

Course Code: PSY 220

L:0,T:0,P:4,C:02

Course Objective:

This course will enable the students to understand and apply the general concepts of psychology through experiments & psychological tests.

The students are required to perform & write any 06 practical.

List of Experiments/Tests:

Muller Lyer test

Bilateral transfer of training

Intelligence test (Raven's)

Learning style

Reading and writing motivation

Masculinity and Femininity scale

Attachment style

Parent child relationship

Adjustment scale

Examination Scheme:

A student will be examined in any one experiment/test as assigned to him. Classification of marks will be as follows:

Practical (Continuous)	Viva Voce	Record Book	Total
40 Marks	30 Marks	30 Marks	100 Marks

TERM PAPER

Course Code: PSY230

L:0,T:0,P:0,C:01

Course Objectives:

With the completion of this course, students will be able to:

1. Enhance the reading and writing skills and understand about the process of carrying out a research work.
2. Develop research orientations to understand and enhance skills in Research Methodology.
3. Gain competency in presentation skills which will further enhance their confidence.

Methodology:

The students will select a psychology based topic on which he/she is going to gain conceptual knowledge by searching related research on available secondary data resources. The students will also learn the techniques employed in conducting literature review and referencing. This is going to help them in attaining research skills. The students should follow following structure:

- a) Topic
- b) Introduction
- c) Review research (min.25 researches)
- d) Key Learning
- e) Conclusion
- f) References

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size 16. The report will be submitted in hard copy a day before presentation.

Evaluation Scheme:

Components	<i>Internal Supervisor</i>	<i>Compilation of Term Paper</i>	<i>Viva-voce</i>	<i>Presentation</i>	<i>Total</i>
Weightage (%)	10	40	30	20	100

READINGS IN PSYCHOLOGY

Course Code: PSY235

L:0,T:0,P:0,C:01

Course Objectives:

With the completion of this course, students will be able to:

1. Inculcate reading habit along with value addition to the existing understanding of the subject.
2. Gain knowledge about current thought related to the discipline.
3. Develop the habit of critical thinking which would broaden their intellectual horizon.

Methodology:

A contemporary and relevant book will be selected by the department. The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters (if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size16. The report will be submitted in hard copy a day before presentation.

Evaluation Scheme:

Components	<i>Report on the Book</i>	<i>Internal Supervisor</i>	<i>Written Test</i>	<i>Total</i>
Weightage (%)	40	10	50	100

Semester III

PSYCHOPATHOLOGY

Course Code: PSY 301

L:2,T:1,P:0,C:03

Course Objectives: Abnormal psychology introduces the students to a comprehensive study of abnormal behavior including the identification, etiology and classification on the basis of symptomatology of psychological disorders.

Course Contents:

Module I: Introduction – 8 hours

Concept and Criteria of abnormality: DSM 5 classification

DSM IV-R and DSM 5: Comparison

Causal factors in Psychopathological Behaviour: (a) Biological determinants (b) Psychological determinants (c) Socio-cultural determinants

Neurosis and Psychosis: Concept and Difference

Module II: Anxiety Disorders and OCD (Obsessive-Compulsive disorders): Symptoms and Etiology – 7 hours

Generalized anxiety disorders; separation anxiety disorder; Phobic Disorders and Panic disorder

OCD (Obsessive-Compulsive disorders)

Module III: Mood Disorders & Schizophrenia: Symptoms and Etiology – 7 hours

Depression and Bipolar Disorder, Suicide

Schizophrenia; Types of schizophrenia

Module IV: Dissociative Disorders and Somatic Symptoms Related Disorders: Symptoms and Etiology – 7 hours

Somatic symptom disorder, illness anxiety disorder, conversion disorder and factitious disorder

Dissociative Amnesia, Dissociative Fugue, Dissociative Identity

Module V: Personality Disorders and other types – 7 hours

Cluster I: Paranoid, Schizoid and Schizotypal Personality Disorder

Cluster II: Antisocial, Borderline, Histrionic and Narcissistic Personality Disorder

Cluster III: Avoidant, Dependent and Obsessive-Compulsive Personality Disorder

Substance Abuse Disorders, Impulse Control, Eating and Sleep Disorders

Childhood Disorders

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT-**Class Test; **H-**Home Assignment; **P-**Presentation; **V-**Viva; **Q-**Quiz; **FC-** Flip class; **MA-** Movie Analysis; **CS-** Case study; **DP-** Discursive paper; **A-**Attendance; **EE-**End Session Exam

COUNSELING PSYCHOLOGY

Course Code: PSY 302

L:2,T:1,P:0,C:03

Course Objectives: This course will introduce the students to key theories, approaches and skills required for counseling oneself and others. The scope of counseling in varied professional settings will also be made known through this paper.

Course Contents:

Module I: Introduction – 7 hours

Meaning, Definitions and Goals of counseling
Role of Counselor in different Setting
Characteristics of a good counselor

Module II: Counseling Process – 7 hours

Building Counseling Relationship
Working in a Counseling Relationship
Termination of Counseling Relationship

Module III: Counseling Theories & Approaches – 7 hours

Insight-Oriented Counseling: Client-Centered
Action-Oriented Counseling: Behavioural
Psychodynamic Approaches
Humanistic Approach
Testing, Assessment and Diagnosis in Counseling

Module IV: Counseling Applications – 8 hours

Child Counseling and Counseling in School
Adolescent Counseling and Counseling in College
Career Counseling: Theories of Career Development
Counseling: Individual, Couple, Group and Family Counseling
Addiction Counseling

Module V: Current Issues in Counseling – 7 hours

Ethical and Legal Issues
Mental Health Counseling
Counseling in a Multicultural Society
Counseling with Diverse Population

Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT-**Class Test; **H-**Home Assignment; **P-**Presentation; **V-**Viva; **Q-**Quiz; **FC-** Flip class; **MA-** Movie Analysis; **CS-** Case study; **DP-** Discursive paper; **A-**Attendance; **EE-**End Session Exam

PSYCHOMETRIC TESTING AND ASSESSMENT

Course Code: PSY 303

L:2,T:1,P:0,C:03

Course Objectives: The course enables students to understand the concepts and methodology of psychological tests' development, administration and interpretation of test data. The students will also know about application of some popular psychological tests

Course Contents:

Module I: Introduction – 7 hours

Brief Historical perspectives, Meaning and types of classification of psychological tests based on criteria of scoring, administration, time limit, content

Characteristics of a good psychological test

Uses and abuses of psychological test

Ethical consideration

Module II: Measurement – 7 hours

Nature and significance of Measurement

Distinction between assessment and measurement

Levels of measurement

Techniques of Attitude Measurement

Module III Reliability and validity – 7 hours

Reliability and validity - Meaning, types, ways of improving, factor influencing.

Relationship between reliability and validity

Module IV Test Construction – 7 hours

Item framing, Item analysis, Item selection, Item discrimination, Item of difficulty

Norms-Types of norms and their application.

Module V: Application of Testing – 8 hours

Administration and interpretation of major test of intelligence, personality, aptitude, achievement, interest, attitude/value in diverse fields

Text:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

THEORIES OF PERSONALITY

Course Code: PSY 304

L:2,T:1,P:0,C:03

Course Objective:

This course introduces description and critical evaluation of different theories of personality in the background of the empirical evidence. It enables students to

1. Become familiar with the major theories related to the study of personality.
2. To understand the underlined themes, methodology and assumption of each theory to enhance understanding of personality and behavior.
3. To orient the students in application of this knowledge in case analysis and therapeutic formulation
4. To develop the skills in personality assessment.

Course Contents:

Module I: Introduction – 7 hours

Concept and Definition of Personality: Western Perspective, Eastern Perspective
Methods of Personality Assessment.

Module II: Determinants of Personality – 7 hours

Nature / Nurture Controversy:

Biological Determinants: Role of Genes and Endocrine Glands

Role of Physical Environment: Natural Environment, Constructed Environment, Behavioural

Role of Socio – Cultural Environment: Early Social Experiences and Impact of parenting styles

Role of family in the formation of personality

Module III: Trait and Type Theories of Personality – 7 hours

Hippocrates, Sheldon, Kretschmer, Allport, Cattell, Eysenck, Sheldon, and Friedman, Kobasa

Module IV: Psychoanalytic Theories of Personality - 9 hours

Sigmund Freud, Alfred Adler, Erich Fromm, Karen Horney and Erik Erikson's Theories

Module V: Social, Cognitive and Humanistic Theories of Personality – 7 hours

Behavioural Theory: Skinner

Social-Cognitive Theory: Miller & Dollard; Bandura

Humanistic Theory: Abraham Maslow; Carl Rogers

Texts:

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

PRACTICUM-III

Course Code: PSY 320

L:0,T:0,P:4;C:02

Course Objective:

This paper will enable students to understand and apply the general concepts of psychology through experiments & psychological tests.

The students are required to perform & write any 06 practical enlisted.

List of Experiments/Tests:

Personality test (NEO-FFI)

SCT

Suicidal Ideation

General Health Questionnaire

Mental Health Assessment

Old age fears

Life satisfaction

Adjustment scale

Home Environment Scale

Examination Scheme:

A student will be examined in any one experiment/test as assigned to him. Classification of marks will be as follows:

Practical (Continuous)	Viva Voce	Record Book	Total
40 Marks	30 Marks	30 Marks	100 Marks

DOMAIN ELECTIVES

Course Objective:

To enable the students to acquire meaningful knowledge of various aspects of happiness. Also to apply the concepts with a holistic view to deal with the barriers in day-to-day life.

Course Contents:

Module I: Happiness – 8 hours

Positive and Negative Affectivity
The Effects & Causes of Happiness
Culture and Happiness
Relationships and Happiness

Module II: Happiness and its Physical Aspects – 7 hours

The Problem of Happiness
Physical Needs
Sound Bodies
How to Sleep

Module III: Happiness and its Mental Aspects – 7 hours

Seeing and remembering
Thinking
Self Knowledge

Module IV: Happiness and its Social Aspects – 7 hours

Work and Play
Youth V/s Age
Gold V/s Ideal

Module V: Happiness and Morality – 7 hours

The Religious and Spiritual Concepts of Happiness

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

COMMUNITY PSYCHOLOGY

Course Code: PSY 306

L:2,T:1,P:0,C: 03

Course Objectives: This course would help the students be acquainted with the students about the history & present status of community mental health services. It would also help them develop a community based orientation towards mental health.

Module I: Introduction to community psychology – 7 hours

Social Psychology: Introduction to social psychology; Process of socialization; Group influence; Group dynamics; Social perception; Attitudes

Community psychology: Definition and perspectives with reference to mental health, organizational health and social action.

Module II: Mental health and Community Psychology – 8 hours

Mental health: Definition and characteristics of good mental health. Characteristics of positive health.

Global epidemic of mental disorders. Prevention, identification and intervention services with regard to mental health problems and disability at the community level and quality of life,

Module III: Community based rehabilitation – 7 hours

Community based rehabilitation (CBR): Issues, principles, Health promotion: process of community organization for health promotion, importance. Community program for: child and maternal health, physical challenged and old age in the Indian context.

Module IV: Crisis Intervention – 7 hours

The concept of crisis and the techniques of intervention.

Module V: Interventions in Community mental health – 7 hours

Unit V: Different levels of intervention at the community level with special reference to mental retardation, learning disability, autism, and common mental health problems.

Text:

Duffy, Karan (2002). Community Psychology (3rd Ed.), Allyn & Bacon.

Korchin, S.J. (1976). Modern Clinical Psychology, Part 5 on Community Psychology, New Delhi, CBS Publications.

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT-**Class Test; **H-**Home Assignment; **P-**Presentation; **V-**Viva; **Q-**Quiz; **FC-** Flip class; **MA-** Movie Analysis; **CS-** Case study; **DP-** Discursive paper; **A-**Attendance; **EE-**End Session Exam

Course Objectives:

With the completion of this course, students will be able to:

1. Inculcate reading habit along with value addition to the existing understanding of the subject.
2. Gain knowledge about current thought related to the discipline.
3. Develop the habit of critical thinking which would broaden their intellectual horizon.

Methodology:

A contemporary and relevant book will be selected by the department. The student is expected to thoroughly go through the discipline related prescribed book with the objective of critically reviewing each aspect and character of the book. The student is supposed to have a detailed insight into the following:

1. Content
2. Writing style
3. Information/learning
4. Content handling
5. Characters (if any)
6. Thematic Clarity

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size16. The report will be submitted in the hard copy a day before the presentation. The report will be submitted in the hard copy a day before the presentation.

Evaluation Scheme:

Components	<i>Report on the book</i>	<i>Internal Supervisor</i>	<i>Written Test</i>	<i>Total</i>
Weightage (%)	40	10	50	100

ARTICLE/FEATURE WRITING

Course Code: PSY340

L:0,T:0,P:0;C:01

Course Objectives:

With the completion of this course, successful students will be able to:

1. Develop the scientific bent of mind in understanding the research applications of the subject.
2. Develop an understanding of currently published research literature with the aim of reporting the theoretical work in the field of interest.
3. Describe research insights, existing gaps, future research directions and learn to write review based research articles.

Methodology:

The students will have to select a topic for preparing secondary data based review article appropriate for publishing in any journal. The students will have to collect the literature review in both national and international context. This will be going to help the student in gaining competency in qualitative research. The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size16. The article will be submitted in the hard copy a day before the presentation.

Evaluation Scheme:

Components	Internal Supervisor	Article writing		Presentation	Viva	Total
		Content	References			
Weightage (%)	10	30	20	20	20	100

Semester IV

EDUCATIONAL PSYCHOLOGY

Course Code: PSY 401

L:2,T:1,P:0;C:03

Course Objective:

Through this course students will be able to apply the knowledge of experimental, social and child psychology and theories related to learning, motivation and transfer of learning to educational setup. Course also spans knowledge about individual differences, problems of adjustment in the classroom and about special education.

Course Contents:

Module I: Relationship of Psychology to Education – 7 hours

Nature and Scope of Educational Psychology

Methods of Educational Psychology: Differential, Clinical and Experimental

Concept of Growth and Development: Physical, Mental, Social and Emotional Development during childhood and adolescence

Module II: Individual Differences – 7 hours

Individual Differences: Concept and Areas

Determinants of Individual Differences

Role of Heredity and Environment in developing Individual Differences

Implications of Individual differences for organizing educational program

Module III: Learning & Motivation – 8 hours

Concept and Theories of learning: Trial & Error learning, Conditioning and Cognitive learning theory, Contribution of Gestalt.

Perpetual approach to learning; Gagne's hierarchy of learning types;

Factors influencing learning, Educational Implications

Theories of motivation, Factors affecting motivation, Educational Implications

Module IV: Personality & Creativity – 7 hours

Meaning of personality, Trait and Type Approaches to Personality

Assessment of personality by subjective, objective and projective techniques

Role of teacher in fostering individual's personality.

Creativity: nature and characteristics

Development of creativity, Theories, Assessment and identification of creativity.

Role of teachers in fostering creativity.

Module V: Children with Special needs and Education – 7 hours

Exceptional Children: Gifted, Mentally Retarded, Backward children, Children with learning disabilities
Educational Implications

Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

PSYCHOLOGY OF PEACE

Course Code: PSY 402

L:2,T:1,P:0,C:03

Course Objectives:

Through this course students will be able to understand about the efforts to develop sustainable societies through prevention of destruction, conflict and violence. It will help students develop a sense of empowerment for individual to promote peace related values and disseminate perspectives to build culture of peace and harmony in community life.

Course Contents:

Module I: Introduction to psychology of peace – 7 hours

Peace psychology: nature, scope and relevance
Psychological causes and effects of violence

Module II: Peace and nonviolence – 7 hours

Nonviolence through the Indian perspective: thoughts of Gandhi,
Peace through Indian Scriptures like Bhagvad Gita etc.

Module III: Structural Violence – 8 hours

Social Injustice and Human rights violations as structural violence, Children and structural violence,
Women and structural violence

Module IV: Conflict Resolution and Peace building – 7 hours

Conflict resolution: Theoretical and practical issues, towards a psychology of structural peace building
Introducing cooperation and conflict resolution in schools

Module V: Ways to achieve personal peace – 7 hours

Mindfulness
Yoga
Other Relaxation techniques

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

RESEARCH METHODOLOGY

Course Code: PSY403

L:2,T:1,P:0,C:03

Course Objectives:

The paper on Research Methodology introduces manner of research conducted in psychology, its range and scope. Various techniques of data collection, research designs and report writing will be covered in this paper.

Course Contents:

Module I: Introduction – 8hrs

Scientific Research: Meaning, nature, Importance and limitations

Hypothesis - types, characteristics, errors

Understanding data: Independent variables, dependent variables, intervening variables, confounding variables, moderating and extraneous variable; Primary and secondary data.

Module II: Steps in Research – 7 hours

Problem identification, Hypothesis formulation, Identification and manipulation of variables, Formulation research design, Tool development, Data collection. Data analysis, Summarizing and Conclusion

Module III Sampling – 7 hours

Sampling: Sample, Sampling Procedure and Design, Probability and Non-Probability Sampling techniques

Sampling error

Statistics vs parameter, confidence interval and level of significance

Module IV Data Collection and Research design – 7 hours

Method of data collection – Observation, Questionnaire, Interview, Survey, Sociometric technique, Field studies,

Types of Research design: Experimental Research design –Fundamentals; Between Group and Within Group Design

Non-experimental research design – Correlation, ex-post facto

Quasi –experimental design

Module V Proposal Writing – 7 hours

Report writing-APA style

Ethical consideration

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

CLINICAL PSYCHOLOGY

Course Code: PSY 404

L:2,T:1,P:0;C:03

Course Objectives:

This course will familiarize the students with scope of clinical psychology and role of clinical psychologist. The paper will provide students knowledge about techniques used by a clinical psychologist for diagnosis and treatment of psychological disorders.

Course Contents:

Module I: Foundation of Clinical Psychology – 7 hours

Introduction to Clinical Psychology: Meaning and nature of discipline,
Historical Development of Clinical Psychology

Module II: Contemporary Issues – 7 hours

Professional Activities of Clinical Psychologist
Subspecialties of Clinical Psychology
Organizations in Clinical Psychology
Ethical and Legal Issues in Clinical Psychology

Module III: Diagnosis and Assessment – 7 hours

Nature and Purpose of Clinical Diagnosis and Assessment
Stages in the Assessment Process
Clinical Assessment Techniques: Clinical Interview, Personality and Behavioural Assessment

Module IV: Psychotherapy – 8 hours

Definition, Goals and Stages of Psychotherapy
Essential Process in Psychotherapy
Models of Psychotherapy: Individual Therapy, Group Therapy, Couples Therapy, Family Therapy

Module V: Approaches to Psychotherapy – 7 hours

Psychodynamic Psychotherapy
Behavioral Psychotherapy
Cognitive Psychotherapy
Humanistic Psychotherapy

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

PRACTICUM-IV

Course Code: PSY 420

L:0,T:0,P:4,C:02

Course Objective:

This paper will enable students to understand and apply the general concepts of psychology through experiments & psychological tests.

The students are required to perform & write any 06 practical.

List of practicals:

Interest test
Aptitude test
Test of creativity
Picture Frustration test
PGI memory test
Psychological well-being
Quality of life
PANAS
Stress at work
Examination Scheme:

A student will be examined in any one experiment/test as assigned to him. Classification of marks will be as follows:

Practical (Continuous)	Viva Voce	Record Book	Total
40 Marks	30 Marks	30 Marks	100 Marks

DOMAIN ELECTIVES

DEFENCE PSYCHOLOGY

Course Code: PSY 405

L:2,T:1,P:0,C:03

Course Objectives:

Students will learn about fundamental research in contemporary defence psychology (democracies of the western world). Students will be given a review of current status of defense system.

Course Contents:

Module I: Military psychology – 7 hours

Nature, scope, historical perspective, contemporary issues and emerging trends in military psychology.

Module II: Selection and Training of Military Personnel – 8 hours

Assessment of psychomotor, spatial abilities, interest, aptitudes, and personality; Training- training needs analysis, types and methods of training, evaluation and monitoring.

Module III: Social Factors in military – 7 hours

Leadership and subordination - Conformity, compliance and obedience, maintaining interpersonal relations, group cohesion, morale and motivation.

Module IV: Human factors in Military Organizations – 7 hours

Human errors, safety and accidents, ergonomics and system design; Vigilance, Complacency.

Module V: Environmental factors and Health Issues – 7 hours

Effects of extreme environmental conditions and deprivation on military performance; Mental health issues in military: depression, alcoholism, substance abuse, suicide, combat stress, post-traumatic stress, coping with stress.

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; FC- Flip class; MA- Movie Analysis; CS- Case study; DP- Discursive paper; A-Attendance; EE-End Session Exam

SCHOOL COUNSELLING

Course Code: PSY406

L:2,T:1,P:0,C:03

Course Objective:

This is to enable the students to develop an understanding of counseling within school setup, which is collaborative work of counselor and other school staff.

Course Contents:

Module I: Introduction – 7 hours

Guidance & Counseling

Need and importance of guidance and counseling in school

Module II: Counselor in Educational Setting – 7 hours

Elementary School, Middle School, Secondary School & Higher Secondary

Counseling & Curriculum, Counseling & Family

Module III: Role of Personal Guidance – 7 hours

Principal, Teacher, Counselor, Career Counselor, Parents & other Specialists

Importance of holistic approach in counseling

Module IV: Mental Health of Students – 8 hours

Major difficulties of students and Supportive Services

Students' perspective of Mental Health

Role of Faith & Spirituality in Students' mental Health

Module V: Experience of Transition – 7 hours

Concept of change, Adjustment & Transition

Transition & Students' experiences

PROJECT (WITH PRESENTATION & EVALUATION)

Course code: PSY 460

L:0,T:0,P:0,C:02

Course Objectives:

1. Apply their knowledge of the discipline in understanding human behavior in field settings.
2. Gain understanding about scholarly inquiry into problem or issues involving a systematic approach of gathering and analysis of information/data, leading to a production of a structured report.
3. Develop presentation skills.

Methodology:

The student will select a psychology based research topic on which he/she will conduct an empirical research. The students will be having a supervisor from the department who will guide the subject. The students have to prepare an outcome of Project Work. A project report should have the following components:

- 1) Cover Page
- 2) Acknowledgement
- 3) Table of Content
- 4) Body of the Report
 - a) *Introduction*
 - b) *Conceptual Framework / National and International Scenario*
 - c) *Presentation of Data, Analysis and Findings*
 - d) *Conclusion and Recommendations*
- 5) Bibliography or References
- 6) Annexures

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size 16. The report will be submitted in hard copy a day before presentation.

Evaluation Scheme:

Components	Report					Presentation & Viva Voce	Total
	Chapter 1: Introduction	Chapter 2: Conceptual Framework/ National/ International Scenario	Chapter 3: Result, Analysis & Findings	Chapter 4: Conclusion & Recommendations	Chapter 5: Bibliography		
Weightage (%)	10	25	25	10	05	25	100

SEMESTER V

INDIAN PSYCHOLOGY AND LOGIC

Course Code: PSY501

L:2,T:1,P:0,C:03

Course Objective:

This course would help students understand basic concepts of logic and philosophy to facilitate their thinking, clearly & cogently through the philosophical & conceptual problems. Through this students would be able to express themselves in a coherent & persuasive manner.

Course Contents:

Module I: Linkage between philosophy and psychology – 7 hours

Schools of Indian Philosophy;
Scope and Subject Matter, Sources of Indian Psychology.
Research Methods in Indian Psychology.
Buddhism & Jainism: Primary principles

Module II: Yoga Psychology – 7 hours

Eight-fold means of Yoga
Three Types of Personality in the Bhagavad Gītā
Concept of Purusa, Prakriti & Bharata on Emotions
Consciousness, Different levels of Consciousness

Module III: Logic – 8 hours

Definition, Nature and scope of logic, Utility of logic
Deductive reasoning, Difference between deduction and induction.
The traditional Square of opposition
Exercises based on the relations of opposition
Edition: Conversion, Obversion, Contraposition

Module IV: Categorical syllogisms – 7 hours

Standard form categorical syllogisms
Rules and fallacies, Proving Validity by Venn diagram
Reasoning exercises based on syllogistic rules

Module V: Definition of Truth Function – 7 hours

Negation, Conjunction, Alternation (or Disjunction)
Conditional (or Material Implication)
Bi-conditional (or Material Equivalence),
Use of truth table for deciding consistency (contingency)
Inconsistency (contradiction)
Validity (tautology)

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

CRIME AND DELINQUENCY

Course Code: PSY 502

L:2,T:1,P:0,C:03

Course Objective:

This course would help students understand importance of criminology, the causes of criminal behavior, the significance of criminal profiling to mitigate crime. They will also learn the consequences of crime in society and the elements of criminal justice system.

Course Contents:

Module I: Basics of Criminology – 7 hours

Definition, aims and scope. The History of Psychological Perspectives on Crime. Theories of criminal behaviour – classical, positivist, sociological. Criminal anthropology. Understanding modus operandi. Investigative strategy. Role of media.

Module II: Crime Elements – 7 hours

Nature, causes and consequences of crime, types of crime, approaches to understand criminal behaviour: biological, cognitive, psychological and social perspectives, Psychological Disorders and Criminality.

Module III: Psychology and Criminal Behaviour – 8 hours

Psychopathology and personality disorder. Psychological assessment and its importance. Serial murderers, Psychology of terrorism. Biological factors and crime – social learning theories, psycho-social factors, abuse.

Module IV: Crime and Delinquency – 7 hours

Juvenile delinquency – theories of offending (social cognition, moral reasoning), Child abuse (physical, sexual, emotional), juvenile sex offenders, legal controversies.

Module V: Crime and Punishment – 7 hours

Definition, Theories of punishment: Deterrent, Retributive and Reformatory Punishment
Coping with criminal victimization, rehabilitation of victim and offender

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz; FC- Flip class; MA- Movie Analysis; CS- Case study; DP- Discursive paper; A-Attendance; EE-End Session Exam

ORGANIZATIONAL PSYCHOLOGY

Course Code: PSY 503

L:2,T:1,P:0,C:03

Course Objective:

To understand how the findings of psychology are applied to the problems involving human behavior in the workplace for providing optimum solutions.

To demonstrate the application of relevant psychological theory and research problems faced by employees and organizations.

To understand how workplace can be designed so that both efficiency and the quality of employee life are improved.

Course Contents:

Module 1: Introduction – 7 hours

History of organizational psychology,
Research methods and ethical consideration
Challenges, Opportunities and Application OP

Module IV: Human Relations – 7 hours

Principles of Industrial relations
Industrial fatigue and burn out
Importance of Consumer psychology

Module II: Perspectives on Individual behaviour – 8 hours

Personality and values, Perception and the perceptual process
Attitudes and Job satisfaction, Diversity in the organisation
Work Motivation: concepts to applications
Theories related to work motivation (Early theories and Contemporary theories)

Module III: Dynamics of Organizational Behavior – 7 hours

Communication Process and barriers
Foundations of group behaviour
Work Attitude
Working with Teams
Occupational Stress and its Management

Module IV: Workplace Management and Leadership – 7 hours

Organisational Culture and Structure
Leadership Theories (early and contemporary)
Power and Politics

Module V: Contemporary concepts in OP – 7 hours

Human Engineering in work design
Perceptual Judgments : Physical conditions and psychological conditions
Ergonomics and Human Behaviour

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

HEALTH PSYCHOLOGY

Course Code: PSY 504

L:2,T:1,P:0,C:03

Course Objectives

This course will acquaint the students with key theories and perspectives of health psychology. The students will be familiarized with causes of illnesses and coping mechanisms and ways to maintain good health.

Course Contents:

Module I: Introduction – 7 hours

Definition of Health Psychology; Mind-Body Relationship; Changing Patterns of Illness; Medical Acceptance; Health care services
Models of health Psychology: Bio-Psycho-Social Model vs Biomedical model

Module II: The Immune System – 7 hours

Psycho-Neuro Immunology- the Immune System & immune functioning. Disorders of the Immune System- Infectious Diseases (viral infections & disease); Co-factor theory; Behavioral factors and common cold; AIDS (Transmission of HIV-AIDS & its consequences, coping with AIDS); Cancer- (Psychological factors in Cancer, causes of cancer)

Module III Theories of Health Behavior – 8 hours

Health Belief Model, Theories of Reasoned Action/Planned Behavior, Learning Theories, Social Cognitive Theory, Transtheoretical or Stages of Change Model, Precaution Adoption Process Model
Application of health behavior model in accident prevention, AIDs prevention, regulation of eating, weight control
Treatment compliance and health behaviors: in life terminal illness

Module IV: Health Promotion & Disease Prevention – 7 hours

Stress- Theories of stress (Selye & Lazarus); Responses to stress; Dimensions of Stress; Coping with Stress. Health compromising behavior- Alcohol abuse, Drug abuse, Smoking.
Improving health & wellbeing: Personality and Individual Differences
Personality and Social Support in context of stress

Module V: Management of Pain – 7 hours

Definition, Measurement, Psycho-social factors,
Techniques to control pain: Physical Methods: Medication, Surgery, Physical Therapy/Exercise, Physical Stimulation
Psychological Methods: Hypnosis, Biofeedback, Relaxation and Distraction

Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

PRACTICUM- V

Course Code: PSY520

L:0,T:0,P:4,C:02

Course Objective:

This course will enable students to understand and apply the general concepts of psychology through experiments & psychological tests.

Every student is expected to perform and write any 06 experiments & tests mentioned below.

Course Objective:

To apply the general concepts of psychology through the medium of experiments

Every student is expected to perform and write any 06 experiments out of the following.

List of Practical:

Conflict resolution

Leadership style

Personality test (MBTI)

Coping style

Hardiness scale

Character strength

Triguna scale

Work motivation

Time management

A student will be examined in any one experiment/test as assigned to him. Classification of marks will be as follows:

Practical (Continuous)	Viva Voce	Record Book	Total
40 Marks	30 Marks	30 Marks	100 Marks

DOMAIN ELECTIVES

HUMAN RIGHTS, VALUES AND ETHICS

Course Code: PSY 505

L:2,T:1,P:0,C:03

Course Objective:

The course will address the evolution of international human rights and of the legal instruments designed for their protection. It is a study the theoretical foundations of the idea of human rights in India.

Course Contents:

Module I: Introduction to Human Rights – 7 hours

Historical Perspective of Human rights
Meaning and Evolution of Human rights
Theories of Human Rights
Universalization of Human Rights
General Conditions Underlying the idea of human rights

Module II: Human Rights in Indian Context – 7 hours

Indian constitution and Human rights
Implementation of human rights in India
Personal and family rights
Group rights and right to equality

Module III: Human Rights Education – 8 hours

History and Determinants of Human Right Education
Principles of Human Rights Education
Awareness of Human Rights in Children
Protection of Human Rights in School
Global Need of Human Right Education

Module IV: Human and Civil Rights – 7 hours

Property Rights - Copyright - Intellectual Property
Crime and Social Deviance
Police — Law Enforcement: International Law Enforcement Agencies and National Law Enforcement Agencies, Interpol

Module V: Values and ethics In India – 7 hours

Values and Ethics : Concept and classification
Indian and Western Values and Ethics: Review and Interpretation of Indian and foreign scriptures
Global values

Text:

Wright, S. (2001). *International human rights, decolonization and globalization: Becoming human*. London: Routledge.

Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; **CT**-Class Test; **H**-Home Assignment; **P**-Presentation; **V**-Viva; **Q**-Quiz; **FC**- Flip class; **MA**- Movie Analysis; **CS**- Case study; **DP**- Discursive paper; **A**-Attendance; **EE**-End Session Exam

FORENSIC PSYCHOLOGY

Course Code: PSY 506

L:2,T:1,P:0,C:03

Course Objective:

This course will give an overview of forensic psychology and its applications. This would help students understand the legal aspects of forensic psychology, the significance of criminal profiling. They will know the importance of psychological assessment in gauging criminal behavior.

Course Contents:

Module I: Basics of Forensic Psychology – 7 hours

Introduction to Forensic Psychology: Historical overview, Functions of Forensic Psychologists, Psychology and law, Ethical issues in forensic psychology

Module II: Psychology of Crime – 7 hours

Developmental Theories and Psychobiological bases of crime, Risk Assessment & Violence Prediction. Psychology of evidence – eyewitness testimony, expert testimony, confession evidence. Criminal profiling. Psychology in the courtroom, with special reference to Section 84 IPC.

Module III: Psychological Investigation of Crime – 8 hours

Scientific Lie Detection: Polygraph, Verbal & Non-Verbal Cues, statement analysis, Hypnosis and Narcoanalysis, Behavioural Analysis; brain electrical oscillation signatures – principle and theory,

Module IV: Psychology of Violence – 7 hours

Workplace and domestic violence, Victim Psychology

Understanding the criminal personality- antisocial personality, psychopath & sociopath; Personality Profiling

Module V: Criminal Justice System Board – 7 hours

Components of criminal justice system. Policing styles and principles. Police's power of investigation. Filing of criminal charges. Community policing. Policing a heterogeneous society. Human rights and criminal justice system in India.

SCIENTIFIC RESEARCH PAPER

Course Code: PSY 565

L:0,T:0,P:0,C:01

Course Objectives:

With the completion of this course, students will be able to:

1. Develop research orientations to understand and enhance skills in Research Methodology.
2. Gain competency in presentation skills which will further enhance their confidence.
3. Understand the scientific ways of data collection, statistical analysis, Formulation and interpretation of data.

Methodology:

The students will have to select a topic for research in recent scenario, conduct review literature, plan research design, and collect data and statistical techniques as well. Through this course, the students will be able to develop an understanding about empirical research and referencing. Students are required to publish a research paper under faculty supervision. The publication should be in a refereed peer reviewed National/International Journal.

The SRP will consist of the following chapters:

- 1) Abstract
- 2) Introduction
- 3) Conceptual Framework/Review of literature
- 4) Methodology (with Research Plan/Design)
- 5) Result and Discussion
- 6) Conclusion and Recommendations
- 7) Bibliography or References

The report is to be submitted on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size16. No word limit. The research paper will be submitted in the hard copy a day before the presentation.

Evaluation Scheme:

Components	<i>Methodology & Result and Discussion</i>	<i>Publication</i>	<i>Internal Supervisor</i>	<i>Presentation</i>	<i>Viva-voce</i>	<i>Total</i>
Weightage (%)	20	20	10	20	30	100

DISSERTATION - I

Course Code: PSY 555

L:0,T:0,P:0,C:02

Course Objectives:

With the completion of this course, students will be able to:

1. Gather primary data, to write a report covering a review of relevant literature, the research question, and explanation and justification of the design, a description of the conduct and analysis of the data, and a discussion of the findings therein.
2. Effectively understand the different concepts of research methodology.
3. Understanding of research issues and their implications in the field of psychology.

Methodology:

The students will have to select a topic for research in recent scenario, conduct review literature, plan research design, and collect data and statistical techniques as well. Through this course, the students will be able to develop an understanding about empirical research and referencing. The process of completion of the research will be divided into two parts and the student will be completing it in two semesters. The Dissertation-I will consist of the following chapters:

- 1) Cover Page
- 2) Abstract
- 3) Synopsis
- 4) Introduction
- 5) Conceptual Framework/Review of literature
- 6) Data Collection

The report is to be submitted on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size 16. No word limit. The synopsis will be submitted in the hard copy a day before the presentation.

Evaluation Scheme:

Components	<i>Synopsis & Methodology</i>	<i>Content and Chapterization</i>	<i>Internal Supervisor</i>	<i>Presentation</i>	<i>Viva-voce</i>	<i>Total</i>
Weightage (%)	20	20	10	20	30	100

SUMMER INTERNSHIP EVALUATION

Course Code: PSY 550

L:0,T:0,P:0,C:02

Course Objectives:

With the completion of this course, students will be able to:

1. Acquire practicing competencies developed throughout the internship.
2. Get well acquainted with the organizational structure, protocol, relationships, processes, treatment compliance of inmates and working conditions in a specific organization setting (hospitals, NGO, schools, corporate etc.).
3. Stimulate and take initiation in successfully identifying the professional roles involved in community counseling set up and present it.

Methodology:

The students will join in any one (or more) of the various specific organization setting (hospitals, NGO, schools, corporate etc.). The students have to maintain a logbook. Students have to follow the ethical guidelines of the agency to which they are attached and report to the supervisor in the organization visited as well as their respective internal supervisor assigned by the department. The students have to complete 72 hours of this course. The logbook will be submitted in the hard copy a day before the presentation.

Evaluation Scheme:

Components	<i>Logbook</i>	<i>Internal Supervisor</i>	<i>External Supervisor</i>	<i>Presentation</i>	<i>Viva-voce</i>	<i>Total</i>
Weightage (%)	30	10	10	20	30	100

SEMESTER VI

SPORTS PSYCHOLOGY

Course Code: PSY 601

L:2,T:1,P:0,C:03

Course Objectives:

This course would help the student trace the development of sports psychology as an independent discipline with its multidimensional perspectives; to identify the relationship of personality and situational factors with performance on individual and team events; and to apply the psychological interventions in sports.

Course Contents:

Module I: Introduction – 7 hours

Nature, Historical & recent perspectives on sports psychology

Module II: Stress Management in Sports – 7 hours

Role of stress, arousal, anxiety and attention in the performance of individual and team sports

Module III: Individual Psychological Attributes – 7 hours

Motivation, skills and performance, personality profiles of successful sports persons

Module IV: Enhancing individual and team performance – 8 hours

Cognitive and social psychological dimensions of individual & team sports

Module V: Coaching & Intervention – 7 hours

Training/Coaching techniques, cognitive and behavioral interventions

Role of Sports Psychologists and Physiotherapist

Text:

Tenenbaum G. & Eklund R.C. (2007). Handbook of Sports Psy. John & Sons 3rd ed.

Examination Scheme:

Components	MTE	CT/H/P/V/Q	FC/MA/CS/DP	A	EE
Weightage (%)	15	15	15	5	50

MTE- Mid Term Exam; CT-Class Test; H-Home Assignment; P-Presentation; V-Viva; Q-Quiz;
FC- Flip class; MA- Movie Analysis; CS- Case study; DP- Discursive paper; A-Attendance;
EE-End Session Exam

POSITIVE PSYCHOLOGY

Course Code: PSY 602

L:2,T:1,P:0,C:03

Course Objective:

This course would enable students to understand the theory and research related to positive psychology and equip students to develop and apply positive psychology for enhancement of their self and others.

Course Contents:

Module I: Introduction to Positive Psychology – 8 hours

Positive Psychology: Meaning, Concept & Historical Overview
Goals of Positive Psychology: Culture and meaning of good life

Module II: Positive Emotional States and Processes – 7 hours

Broaden & Build Theory of Positive Emotions
Positive Emotions: Hope & Optimism, Love, Empathy
Emotional Intelligence: Mayer and Salovey' and Goleman' concept

Module III: Identifying Strengths – 7 hours

VIA Classification
Character Strengths and Virtues
Discovering Strengths

Module IV: Positive Psychology and Health – 7 hours

Positive Psychology and Health Psychology
Positive Prevention
Positive Psychotherapy

Module V: Positive Psychology at Work – 7 hours

Leadership and well-being
Positive and creative organizations

PRACTICUM- VI

Course Code: PSY 620

L:0,T:0,P:4,C:02

Course Objective:

This course will enable students to understand and apply the general concepts of psychology through experiments & psychological tests.

Every student is expected to perform and write any 06 experiments & tests mentioned below.

List of Practical:

Sports motivation scale

Sports anxiety scale

Locus of control

Attribution style

Resilience scale

Psychological Capital

Mindfulness scale

Job Satisfaction scale

Emotional maturity scale

A student will be examined in any one experiment/test as assigned to him. Classification of marks will be as follows:

Practical (Continuous)	Viva Voce	Record Book	Total
40 Marks	30 Marks	30 Marks	100 Marks

SEMINAR

Course Code: PSY 645

L:0,T:0,P:0 C: 01

Course Objectives:

With the completion of this course, students will be able to:

1. Select a topic of relevance to their area, drawing on different theories, perspectives and past research studies and methods.
2. Write a comprehensive review of literature on a topic in psychology or a related discipline.
3. Write a journal length manuscript of qualitative research, appropriate for submission to a professional journal in psychology or a related discipline.

Methodology:

Each student will engage themselves in interaction and observation of Psychological Processes in a subject/field of their choice and document a seminar report. The Students will then present the findings in the form of a paper for Seminar discussion.

The report is to be submitted in about 3000 words on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size 16. The documentation will be submitted in hard copy a day before presentation.

Evaluation Scheme:

<i>Components</i>	<i>Documentation</i>	<i>Internal Supervisor</i>	<i>Presentation</i>	<i>Viva-voce</i>	<i>Total</i>
<i>Weightage (%)</i>	40	10	20	30	100

DISSERTATION – II

Course Code: PSY 655

L:0,T:0,P:0; C:06

Course Objectives:

With the completion of this course, students will be able to:

4. Gather primary data, to write a report covering a review of relevant literature, the research question, and explanation and justification of the design, a description of the conduct and analysis of the data, and a discussion of the findings therein.
5. Effectively understand the different concepts of research methodology.
6. Understanding of research issues and their implications in the field of psychology.

Methodology:

The students will have to select a topic for research in recent scenario, conduct review literature, plan research design, and collect data and statistical techniques as well. Through this course, the students will be able to develop an understanding about empirical research and referencing. The process of completion of the research will be divided into two parts and the student will be completing it in two semesters. The Dissertation-II will consist of the following chapters:

- 1) Result and Discussion
- 2) Conclusion and Recommendations
- 3) Limitations and Implications
- 4) Bibliography or References
- 5) Annexures

The report is to be submitted on A4 size sheets, Font 12pt., Times New Roman, 1.5 spacing, headings in Font Size 16. No word limit. The thesis will be submitted in hard bound a day before presentation.

Evaluation Scheme:

Components	<i>Data Collection & Methodology</i>	<i>Content and Chapterization</i>	<i>Internal Supervisor</i>	<i>Presentation</i>	<i>Viva-voce</i>	<i>Total</i>
Weightage (%)	20	20	10	20	30	100
