ITEM-AC-4:2024:C-19

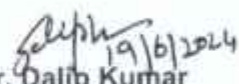

To consider and adopt UGC Guidelines for Institutional Development Plans for Higher Education Institutions (HEIs).

The National Education Policy 2020 states that Quality Higher Education needs to aim to develop good, thoughtful, well-rounded, and creative individuals. HEIs need to enable an individual to study one or more specialized areas of interest at a deep level and develop character, ethical and constitutional values, intellectual curiosity, scientific temper, creativity, spirit of service, and 21st-century capabilities across a range of disciplines including sciences, social sciences, arts, humanities, languages, as well as professional, technical, and vocational subjects. The UGC has sought to provide guidelines for individual HEIs to develop their own Institutional Development Plans to further aims set out in the NEP 2020.

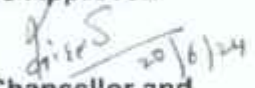

The IDP needs to reflect an integrated, comprehensive and holistic approach that is mindful of every institution's unique vision/mission, context, life cycle stage, location, character, resources, environment, target group of students/ learners, other stakeholders and overall aspirations. Amity University Punjab, Mohali will devise its own Institutional Developmental Plan as per the aims and objectives laid down in the UGC guidelines by incorporating Time-Bound Targets, implementing Plans, conducting Periodic Reviews and appropriate measures for continuous course corrections and further improvements. Faculty Recruitment Process

The faculty recruitment process at Amity University Punjab, Mohali, is a meticulous, structured, and transparent procedure that emphasizes transparency, fairness, and quality to select the best academic and research talent from India and abroad. By adhering to a rigorous evaluation process and involving multiple stakeholders, the university ensures that it continues to attract and retain top talent in the academic and research fields.

The process begins with faculty requirement identification, where each school analyzes its current faculty strength, projected student enrollment, and course offerings. The Head of School (HoS) submits a formal request outlining domains and qualifications required for the positions. The faculty load and requirements are then reviewed to ensure alignment with UGC regulations of 2018 on minimum qualifications for appointment of and other academic staff in universities and colleges, and measures for the maintenance of standards in higher education, and university rules, ensuring that the teaching workload is balanced and sustainable.

Once the requirements are approved, the HR department advertises the vacant positions apart from opening the rolling advertisement; these are advertised through various channels, including the university's website, social media, and professional networks. Interested candidates submit their applications online as per the prescribed format, which includes detailed CVs, research publications, and other relevant documents. There is no fee for applying. The data is prepared on an Excel sheet, and based on the qualifications, the eligible candidates are filtered and marked. A preliminary screening is conducted to filter candidates based on their qualifications, experience, and alignment with the job requirements. A tentative list of shortlisted candidates is prepared. The shortlisted candidates are contacted by the HR division to confirm their interest and evaluate their suitability for the requirements. The final list is then shared confidentially with the Vice-Chancellor (VC) for review and approval.

To ensure a fair and comprehensive evaluation of the applicants, with the consent of the Chancellor-Chairman of the Board of Management and Governing Body, the Vice-Chancellor, Chairman of the Academic Council, invites the relevant experts to form the panel of experts for each subject of the recruitment drive. The panel includes senior faculty members, subject matter experts from reputed institutions, mostly fellows of National Science Academies, including Engineering, as also the Sahitya Academies. The selection of panel members is based on their expertise in the relevant domain. The panel interviews are conducted online in view of the fact that most of the experts find it difficult to travel. Likewise, the candidates are at different locations and avoid travel and stay hassles. This saves the cost of travel, stay, and other lodging costs for the candidates as well. To maintain confidentiality, the VC personally contacts the panel members via telephone to confirm their participation and fix the interview schedule. A formal email invitation is then sent to the panel members by the VC himself, clearly outlining the date, time, and domain of the interviews.

Prior to the interviews, the HR department shares essential documents with the panel members, including the online interview link, candidates' CVs, application forms, standardized evaluation sheets, and any research-related materials (3 best research papers) submitted by the candidates. The VC office prepares a comprehensive file for the VC, which includes printed copies of candidates' CVs, application forms, a list of panel members, and evaluation sheets. This ensures that all necessary information is available for a thorough and unbiased evaluation.

The interviews by the duly constituted panels are conducted online with the Vice-Chancellor as the Chairman of the panel. The VC does not evaluate the technical component of the interviews; it is left for the evaluation by the experts. Each & every candidate is evaluated by the expert panel based on four key components: **Communication Skills (15%)**, **Research Potential (35%)**, **Subject Knowledge (35%)**, and **Other Attributes (15%)**. Communication skills assess the candidate's clarity, confidence, and ability to engage with the panel. Research potential evaluates the candidate's past and future research contributions, including publications, funding, and impact. Subject knowledge assesses the candidate's understanding of current trends and their ability to apply theoretical knowledge to practical problems. Other attributes consider teaching methodology, innovation, leadership skills, and any additional relevant skills. Candidates securing less than 50% marks are outrightly rejected, even if there may be no selection from the panel.

After the interviews, panel members submit their signed, independently evaluated evaluation sheets of each of the above-mentioned four components, which are then collated by the VC office into one master sheet by averaging the scores assigned by the panel members, ensuring a merit-based and unbiased selection process. The VC reviews and approves the final evaluation sheet, which is then forwarded to the HR department for submission to the Competent Authority and Chancellor (Executive Head and the Chairman of the Board of Management/ Governing Body), along with the audio and video recording of the interview held, for final approval and selection.

This multi-level approval process ensures that recruitment decisions align with the university's governance structure and strategic objectives, maintaining academic excellence and innovation.
