1	Ms. Jyotsna J.	Climate action

## GOAL 13: Climate Action

### Ozone Day Celebration on 18<sup>th</sup> September 2018

Environmental science studies patterns and processes in the natural world and their modification by human activity. To understand current environmental problems, we need to consider physical, biological, and chemical processes that are often the basis. For example, ozone depletion describes two related events observed since the late 1970s: a steady lowering of about four percent in the total amount of ozone in Earth's atmosphere (the ozone layer), and a much more significant springtime decrease in stratospheric ozone around Earth's polar regions. The latter phenomenon is referred to as the ozone hole. There are also springtime polar tropospheric ozone depletion events in addition to these stratospheric events.

### Objective(s) of the Event

- AMIENVIRO club always tries to make students aware of the various environmental processes and human activities and their impacts.
- Students from all sorts of educational fields experience the day to day environment-friendly activities.

### GOAL 13: Climate Action

Through the learning experience, students try to apply these sustainable activities to their real life and help make the surrounding environment better.

GOAL 13: Climate Action

## Making exciting Discoveries Together

### Climate Change is visible in Ladakh

The screenshot shows a news article from Times Evoke. The main headline is 'Climate change is visible in Ladakh with glaciers losing ice — this impacts all of us'. Below the headline, it says 'Times Evoke | Updated: Nov 14, 2020, 09:49 IST'. There are icons for email, print, and font size (A- A+). A blue banner for 'WORD Monitor' is present, with the text 'Unlock your blog's true revenue potential' and a 'GET STARTED' button. Below the banner is a portrait of Siddharth Pandey, an aerospace researcher. To the right of the portrait, there is a bio: 'Aerospace researcher Siddharth Pandey heads the Centre of Excellence in Astrobiology at Amity University, Mumbai, and is currently analysing the manifestations of global warming and climate change in Ladakh. Writing in Times Evoke Inspire, he discusses such climate impacts on the region — and how these will extend beyond Ladakh as well:'. At the bottom of the article preview, the text 'Climate change is visible in Ladakh with glaciers losing ice ..' is visible.

### Ami Environ Club Celebrated the Say No Crackers this Diwali Signing Campaign

BFA 1st semester students prepared to sign sheets, Posters and placards for taking photographs. On the day of the signing, BFA, and B.Sc. Animation students were present at the venue throughout the day. The students and Dr. Aradhana, and Ms. Sakshi Bansal (coordinator) motivated others to pledge for the cause.

### GOAL 13: Climate Action

Three hundred ninety signatures were received by the end of the day from students and faculty of different departments. Students took pictures with the placards and pledged not to burst crackers this year.

## GOAL 13: Climate Action

### AmiSustain Club Activity

AmiSustain aims to promote sustainability in all aspects of life, including mental and physical health and food, water, and the environment. This is put into action utilizing spreading awareness via conducting seminars and workshops and by organizing events and competitions. We at AmiSustain, wish to make a difference by finding and implying eco-friendly and cost-effective alternative ways. The club's annual newsletter "AmiSustain" encourages creative thinking and provides a suitable platform to broadcast conservation ideas and a better way of living.
