Horros of Partition

The partition of British India in 1947 into two independent nations, India and Pakistan, was a momentous event in history that brought about immense human suffering and tragedy. The horrors of partition remain etched in the memories of those who lived through it, leaving a lasting impact on the collective psyche of the subcontinent. On 25th August 2023, Amity Institute of Education observed this day to remind the students, staff and other members about the tragic event that took place and how it impacted the people of our country. Millions of people were forced to migrate across newly drawn borders leading to immense hardships for refugees, communal tensions escalated into horrific acts of violence, the abrupt division led to the abandonment of homes, farms, and businesses, resulting in significant economic losses for those affected and families were torn apart as members had to choose between migrating to India or Pakistan. This initiative aimed to raise awareness about this historical significance of the partition that left deep psychological scars on those who lived through it.

School Observation, 1st Sem

All the students of B Ed who are given this golden opportunity where they were given this internship where they were a lot of different schools and different faculties who guided them one how to have the right approach in the school.

The school internship program started from 20th November, and lasted for one whole week, where all the students attended school as teachers in proper formal outfits and were given task to observe the setting of the school and how the things go on in the school.

The experience of being in a school after many years was nostalgic for all of us but also this time we got to see the school set up. The classroom is a reception area, the libraries, school bus area and all the other premises of the school from a different perspective which was from the perspective of a teacher.

This opportunity not only brought us more clarity but also gave us more practical lesson on how to deal with the students of different age groups and how to manage them. All as being a teacher is a very responsible job and one needs to be disciplined and stay in order to do so.

All the students had different experiences which they all shared all together in the lunch break or after coming back to the university after the end of school internship.

Experience was very enlightening for all of us as we gained a lot of more knowledge which has a practical approach and will surely help us all in the future as well.
