Job Title	**Band – 1 Product - Business Analyst** **Product - Business Analyst** is responsible for analyzing, planning and leading analysis work for routine projects /professional services. The individual contributes to activities to improve quality and advance the overall analysis practice throughout the segments, organization driving successful implementations. This role will be aligned under the Business **Solutions & Consulting (BSC)** job group. **You'll spend time on the following:** ● Create partnerships across the organization to author requirements that ensure overall implementation solution meets desired need ● Performing requirements analysis on product defects and enhancements (Development & Production) ● Work effectively with a wide variety of individuals, engineering, project management, and technical staff ● Ability to evaluate system changes and its results to certify that all changes are accurate and meet quality standards as per initial expectations. ● Gathering critical information from meetings with various stakeholders and producing useful reports ● Evaluating business processes, anticipating requirements, uncovering areas for improvement, and developing and implementing solutions ● Ability to independently create Functional Specifications, RCA's and Process flow diagrams ● Active participation in peer review sessions for requirements, estimates, and specifications

- Staying up-to-date on the latest process and IT advancements to automate and modernize systems.
- Analyzing qualitative data to uncover industry, company, and customer trends

Education Credentials
- The candidate must have *2-4* yrs. of working experience in the same or an equivalent role.

Here's what we're looking for:
- Relevant **Domain** Experience
- Problem Solving & Analytical thinking, ensuring best of the breed solutions for the defects, needs and asks.
- Demonstrated experience working successfully with cross-functional teams to deliver software
- Strong facilitation, prioritization, and influencing skills
- Strong communication skills, listens and shares information

About Business Solutions & Consulting group (BSC group)
The BSC Group is one of the unique horizontal capabilities within GlobalLogic primarily enabling the Product Management function. BSC Group has 200+ member teams globally playing key *product management roles* across client engagements. BSC Group also leads Presale's function for the APAC region and supports PreSales globally. The team supports both Delivery and Sales organization in Pursuits (Proposal, Solution, RFI/RFP, positioning etc.) and Advisories (Consulting, Domain, POV, Research Led) leveraging the current team of Business Analysts, Product Management team and Business Consultants.

Band – 2 Product Owner

Product Owner owns the backlog and takes care of its prioritization, and its evaluation. Closely work with Scrum team(s) to ensure time boxed achievement of impeccable features and functionality of the product. This role will be aligned under the Business **Solutions & Consulting (BSC)** job group.

You'll spend time on the following:
- Take lead of scrum teams as the Product Owner, and can manage multiple scrum teams.
- Providing vision and direction to the Agile development team and stakeholders throughout the project and create requirements
- Ensure that the team always has an adequate amount of prior prepared tasks to work on
- Define & Elaborate Release Backlog, Product feature backlog and development for the product
- Prepare epics, user stories based on communication with client
- Assess value, develop cases, and prioritize stories, epics and themes to ensure work focuses on those with maximum value that are aligned with product strategy
- Provide backlog management, iteration planning, and elaboration of the user stories
- Work closely with Product Management to create and maintain a product backlog according to business value or ROI

- Lead the planning product release plans and set expectation for delivery of new functionalities
- Take Ownership of end to end releases - Release Plans, Backlogs, Release Note and Guides
- Provide an active role in mitigating impediments impacting successful completion of Release/Sprint Goals
- Research and analyze the market, the users, and the roadmap for the product. Follow our competitors and the industry

Education Credentials
- The candidate must have *4-8* yrs. of working experience in the same or an equivalent role.

Here's what we're looking for:
- You have a track record of delivering impactful software, ideally on a collaborative software delivery team
- You have attention to detail, a practical approach to the day-to-day work of story-writing and delivery, and can draw a line directly from an overarching client strategy to your team's outcomes
- You are a well versed with Agile, Lean and Continuous Delivery methodologies and love to mentor others
- You understand how businesses operate and have experience modeling business processes using a variety of tools and techniques to facilitate requirement elicitation sessions
- You have a knack for prioritization, obtaining buy-in from stakeholders, and resolving conflicts as they arise
- You're resilient and flexible in ambiguous situations and can approach challenges from technical and business perspectives
- You have a genuine passion for quality software and the know-how to get from sketch to code
- Strong communication skills, listens and proactive communicator.

About Business Solutions & Consulting group (BSC group)
The BSC Group is one of the unique horizontal capabilities within GlobalLogic primarily enabling the Product Management function. The team supports both Delivery and Sales organization in Pursuits (Proposal, Solution, RFI/RFP, Positioning etc.) and Advisories (Consulting, Domain, POV, Research Led) leveraging the current team of Business Analysts, Product Management team and Business Consultants.

Band 3 - Product Manager/Senior Product Owner

Product Manager owns the products by conducting market research, creating product timeframes and plans, and crafting marketing strategies for new products. This role will be aligned under the Business **Solutions & Consulting (BSC)** job group.
You'll spend time on the following:
- Drive the entire vision and delivery of innovative new products to keep the business relevant and competitive

- Conduct market research to identify user need for new products
- Have past experience working in collaboration with Business departments- Sales, Operations, Marketing, & R&D.
- Prioritize product opportunities using criteria and requirements defined during research
- Establish requirements and specifications for existing and new products
- Clearly communicate vision and goals of existing and new products to Technical PM/BA/PO & team
- Lead and participate in planning meetings and provide advice and guidance on direction of products
- Manage cross-functional teams in business, product, design and engineering.
- Demonstrate functionality of completed products to end users and other stakeholders
- Develop metrics and KPIs to assess the success of products and features and determine necessary enhancements
- Collaborate with customers, team members, and outside influencers to ensure a solid and well-rounded understanding of products and developing needs
- Maintain in-depth knowledge of products, solutions, and company offerings as well as competitors
- Drive or support branding, marketing & pre-sales activities, GTM planning & strategies

Education Credentials
- The candidate must have *8-10* yrs. of working experience in the same or an equivalent role.

Here's what we're looking for:
- You have a track record of delivering impactful software, ideally on a collaborative software delivery team
