Role

-

**Technical Production Support Executive**

Job Description

-

- When you work on a project, your mandate is rather restricted and the learning is rather limited to the requirement, but in support there are no restrictions to learning

- Current requirement is more Technology/Configurational support than Functional Support on the product
- Working opportunity on various technologies like database (SQL, Oracle and Sybase), Middleware(Jboss, WebSphere, WebLogic), OS (UNIX, AIX, Windows)
- Opportunity to learn the product entirety and financial domain
- Direct client interactions which help associate to learn and understand the various business models and multi-tier technology implementation or architecture
- Product Support is a revenue earning model for IT industry and have bright future
- Year by Year the production support demand is growing very fast in comparison to any other stream
- Salary for the technical + functional production support is higher in market
