markit®

Job description

Position title	Associate, QA Analyst Trainee
Location	**Noida**
Business Function	**Technology**

Department overview:

The Global Quality Assurance team comprises of 120+ experienced Testing professionals located in Europe, North America and India. The team supports the high quality of Markit's software by independently verifying that software functionality conforms to business requirements using a combination of manual and technical Testing techniques. The team is also responsible for verifying technical aspects of the implementation including the performance and scalability of the solution.

The Noida based Quality Assurance group of approximately 100 Testing professionals work closely with colleagues in other Markit offices.

Position summary

Markit is seeking a bright and enthusiastic graduate to join its Markit India operation as a QA Analyst Trainee. The individual will learn a range of QA skills and provide support for testing products through a variety of activities, examples of which are:

- Driving innovation through the use of test automation using industry leading tools
- Development of proprietary tools and solutions to support test automation
- Developing automated tests at both unit test and system integration test level
- Improving the quality of software development through partnership with Development, Product and QA
- Development of business knowledge required to support testing for Markit's products
- Involvement in testing phases varying from requirements analysis to test planning, execution and defect management
- Development of relational database theory and SQL knowledge
