

## **Report on Education Activities in Association with Young Foundation**

The specific aims of the workshop were to answer primarily two questions:

- (1) How can Amity University Chhattisgarh create a framework for youth programs throughout for promoting awareness of water-related and environmental issues?
- (2) How the young generation can use for such a framework and what other tools are necessary to anchor the programme.

### **Outcome**

The outcome was a comprehensive set of ideas that should serve as a basis for the development of new educational and awareness raising projects; furthermore, it could contribute to the formation of a network of involved partners. Such a network of contacts could be invaluable when it comes to asking for support for the educational initiatives and their implementation.

This workshop provides an overview on the main ideas and opinions of the participants in four workshop sessions, during group work and through individual interviews; it also draws overall conclusions reached and highlights potential future steps. Detailed “raw data” is provided in the annex; these include the matrices of the workshop outcomes, transcripts of the interviews, the agenda as well as notes from open discussions.

### **Topics covered**

Topics and key questions elaborated and reflected in four workshop

sessions: Interlinking existing youth programs

Key question: Which relevant youth programs are there?

Communication channels of youth and educational initiatives

Key question: Which means of communication are relevant for these programs?

Tools that need to be developed for “tapping” youth and educational initiatives started from scratch  
Key Question: How should Amity University Chhattisgarh be extended/supplemented to find new targets?

Desired tools from the perspective of individual, already existing youth programs and educational initiatives  
Key Question: Which tools would your organisation use for its youth programs.
